

A July 1998 Urban Institute study of Los Angeles County portrays a sharp decline in immigrant applications for welfare benefits even though the vast majority remained eligible under state-funded programs. This study suggests that many immigrants are not attempting to prove their eligibility partly due to confusion about the law, but especially out of fear of negative consequences. They are afraid that revealing information about their immigration status (as in the case of undocumented parents trying to collect benefits for legal immigrant or citizen children) could result in deportation or compromise future attempts to naturalize if they are labeled a "public charge."

These well-founded anxieties can prevent those who are aware of their eligibility from seeking benefits for themselves or for their children. PRWORA's provisions requiring public agencies to report to the INS any persons "known to be unlawfully present" in the U.S., have exacerbated this fear. Although public health care providers are exempt from such reporting requirement, because they are prohibited from having an official policy that they will not share immigrant status information with the INS, they cannot guarantee protection for undocumented patients. According to the Center for Public Policy Priorities in Austin, TX, "Public health providers report that this is already having a chilling effect on the use of prenatal care, preventative care and primary care."

One of the most egregious problems directly resulting from PRWORA has been an extraordinary increase in hunger among legal immigrants. As for the welfare reductions in general, a disproportionate share of the federal savings from Food Stamp cuts came from restricting immigrant eligibility. Prior to PRWORA, 5.2% of all Food Stamp recipients were immigrants, yet over 30% of Food Stamp cuts came from slashing immigrants benefits. Not surprisingly, many immigrants who lost benefits now are suffering. A May 1998 study by Physicians for Human Rights (PHR) tracked household hunger among legal Latino and Asian immigrants in California, Texas and Illinois. Finding 79% of households interviewed to be food insecure, PHR called "the cuts against individuals who are in the U.S. legally and who pay taxes. . . a serious human rights violation." Legal immigrant households were ten times more likely than the general population to suffer from severe hunger and one-third of immigrant households surveyed reported moderate or severe hunger caused by a lack of sufficient resources.

A similar study by the California Food Policy Advocates (CFPA) echoes these findings, but also documents an "alarmingly high rate of hunger among children in legal immigrant households where food stamps have been cut." Immigrant households in Los Angeles that lost benefits were 30% more likely to experience "food insecurity with extreme hunger" than those that did not. In San Francisco, this number jumped to 173%, making immigrants affected by PRWORA almost twice as likely to be suffering from extreme hunger than an unaffected group. Moreover, in both cities, immigrant households with children which had lost food stamps were almost two-thirds more likely to experience serious food problems than similar households that retained complete benefits.

Although both studies were conducted prior to the Agricultural Act, CFPA's findings were shocking even though California exercised its option—unlike most states—to

fill the gap with state funds for the same population that now has regained eligibility. Without further legislation, marked improvements of this nature in the future are unlikely because most of those benefiting from the restoration are immigrant children living in "mixed" households where "eligible" individuals live with others who are not. In Texas alone, there are 65,396 "mixed" households with approximately 9,000 legal immigrant and 145,000 citizen children. Although these children can again collect food stamps, the total resources available to the family remain low because their parents still cannot.

IS "FAIRNESS" IN THE FUTURE?

The Fairness to Legal Immigrants Act of 1999, recently introduced in the Senate, proposes the most extensive restoration to date and offers the first substantive opportunity to right the wrongs done to legal immigrants by PRWORA. If approved, this bill would restore food stamps to all eligible "before" immigrants and those otherwise qualified "after" immigrants who suffer domestic abuse. It would also allow states to cover all pregnant legal immigrant women and children who entered after August 22, 1996 under Medicaid and restore many health and SSI disability benefits for certain immigrants from both the "before" and "after" groups. This bill represents a significant step towards rectifying several of the most controversial outcomes of welfare reform by protecting dependent children, addressing the mixed household problem and providing essential food assistance to many needy legal immigrant families. Wholehearted support by this Congress would send a clear message to law-abiding, taxpaying immigrants that they need not fear, that they need not go hungry and that they will not be abandoned in their times of need.

HONORING ODYSSEY OF THE MIND TEAMS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 14, 1999

Mr. KILDEE. Mr. Speaker, I rise today to recognize and honor the achievements of a group of young people who have distinguished themselves as some of the brightest in the world. On July 6, school and local officials, friends, and family, gathered to honor students from Mason Middle School and Cray Middle School, both located in Waterford, Michigan, for their success in the Odyssey of the Mind world competition, recently held in Knoxville, Tennessee.

Students from Mason Middle School placed fifth out of 58 teams in the vehicle problem category, designing a vehicle that would travel through three countries, without touching the ground, and setting off a specific event upon entering the country. Through the use of superior problem solving skills, the Mason team created a vehicle that would travel through China, Egypt, and the United States. In addition to placing fifth, the team won the Ranatra Fusca Award, the competition's highest honor for creativity.

The Mason team includes Alysse Cohen, Robert Dziurda, Tamara Haynes, Caitlin Johnson, Megan Long, and Elizabeth McGregor.

Their coaches are Suzy Cohen and Robin McGregor.

Students from Cray Middle School placed sixth out of 53 teams in the environmental challenge category, creating a series of possible habitats for an animal following the destruction of the creature's original habitat, with the judges given the ability to randomly poison one of the habitats.

The Cray team includes Alex Caryl, Eric Chapman, Steve Grabowski, Brad Howell, and Jeff Ritter. The coaches were Angela and Tom Chapman.

Odyssey of the Mind teams provide a large opportunity for some of country's brightest young people to exercise their cognitive and problem-solving skills. To compete in a world competition, a team must place first in the state in their category. It is rare for more than one team from the same school district, and even more rare for them both to perform as highly as Mason and Cray has done.

Mr. Speaker, at a time when the future of our young adults is a constant concern, I am very happy to honor these students and the parents who have taken time out of their schedules to coach the teams. I ask my colleagues in the 106th Congress to join me in congratulating Mason and Cray Middle Schools.

IN RECOGNITION OF TAMARAC ELEMENTARY SCHOOL

HON. PETER DEUTSCH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 14, 1999

Mr. DEUTSCH. Mr. Speaker, I rise today to celebrate the selection of Tamarac Elementary as a "National Blue Ribbon School of Excellence." It is both an honor and a privilege for me to recognize this exemplary school for receiving such a distinguished award.

Since 1982, the Blue Ribbon Schools Program has celebrated many of America's most successful schools. A Blue Ribbon symbol denotes a level of educational proficiency recognized by parents and students in thousands of communities. Superior teaching, dedicated staff, and a caring environment for students are a few reasons why Tamarac Elementary has been chosen for such an exclusive award after a rigorous selection process.

Tamarac Elementary School was built in 1973 and is the only school in the city of Tamarac, Florida. The school's extraordinary devotion to educating the leaders of the 21st century is illustrated best by its mission statement: "The mission of Tamarac Elementary is to establish an educational environment where children reach their highest potential intellectually, socially, emotionally and physically through a total commitment of school, home, and community." Mr. Speaker, I am sure that my colleagues will agree with me when I say that this mission statement demonstrates noble goals—goals which all schools should strive to fulfill.

Tamarac Elementary has taken the Blue Ribbon Challenge and triumphed with flying colors. I wish to congratulate Principal Kathleen Goldstein and her devoted staff for this
