My colleagues, this is a situation which must be met with fierce determination. We need to support an aggressive agenda for Indian education because the current landscape is not meeting the challenge.

Right now, the BIA and Office of Indian Education is not authorized to distribute privately donated monetary gifts or resources to supplement the missions of these agencies. Yet every year numerous inquiries from the public are made as to where they can donate funds that will be spent wisely on behalf of Indian education. Simply put, we are missing out on a unique opportunity to help funnel non-governmental resources into Indian education. Ultimately, I believe this legislation is the appropriate answer to this situation. We can give the public a high profile mechanism to reach out to Indian Nations in a way that is apolitical and noncontroversial.

Simply put, establishment of an American Indian Education Foundation is good government. It speaks to a modern way of going things in which successful private-public partnerships are created. It is also an efficient way to get at the heart of a very pressing problem without placing an undue additional burden on taxpayers.

Within 2 to 3 years after enactment of this bill the Foundation should be completely self-sufficient and will not use more than 10 percent of its generated funds to pay for operating expenses. My colleagues, let’s be clear at the outset—the purpose of this legislation is not to create a new level of bureaucracy or make some staffer richer. In my opinion such a situation would be one more example of where this government has failed in its trust duty to Indian Country. In brief, if it is my intention to hold the bureaucracy to the letter of the law that we are now beginning to draft.

As for the role of Congress, I do want to make one thing perfectly clear. It should not be the intent of this legislation to use the funds raised to take the place of existing Indian education programs. Rather, these funds should be considered entirely separate and supplemental to the efforts of the Federal and tribal governments.

My colleagues, we all understand the budget shell game and I do not want to see the success of this program leveraged against governmental funding for teacher training, school modernization, and education technology initiatives.

In short, I do not want to hear one voice out there saying that we do not need to fund the Office of Indian Education because the Foundation has X amount of dollars in its account. To do so would again be another slight against our trust and treaty obligations to the First people of this nation.

In the end, I will not reiterate the obvious. Indian Country is lacking in the resources needed to train its children for the demands of the global economy.

The 106th Congress has a chance to help rectify this problem. While we should continue to allocate more federal resources towards the growing population of children within Indian Country we can also make it easier for private interests to become involved. Helping Indian children achieve not only a public trust but a private one as well.

Mr. Speaker, I hope the House will move this legislation in an expeditious manner.
