THE HALLOWEEN SAFETY ACT OF 1999

MR. ENZI. Mr. President, today I am pleased to introduce the "Halloween Safety Act of 1999." This Act has one simple purpose: to extend the date on which the daylight saving time ends from the last Sunday in October to the first Sunday of November in order to include the holiday of Halloween.

The idea of extending daylight saving time was first introduced to me by Sharon Rasmussen, a second grade teacher from Sheridan, Wyoming, and her students. I received a packet of twenty letters from Mrs. Rasmussen's second grade class expressing their wish to have an extra hour of daylight during Halloween in order to make the holiday safer. These children explained that they would feel more secure if they had an extra hour of daylight when venturing door-to-door in their annual trick-or-treating. Halloween is a holiday of great importance to youngsters throughout the United States and a large number of children do celebrate by trick-or-treating in their neighborhoods and towns. I believe this reasonable proposal would make those Halloween activities safer.

Upon conducting some research of my own, I discovered that Halloween is a time of increased danger for children. According to the Insurance Institute for Highway Safety, fatal pedestrian-motor vehicle collisions occur most often between 6 and 9 p.m., comprising twenty-five percent of the total. Another twenty-one percent occur between 9 p.m. and midnight, making nighttime the most dangerous time for pedestrians.

Unfortunately, these general accident trends are magnified on Halloween given the considerable increase in pedestrians—most of whom are children, on Halloween evening. A study by the Division of Injury Prevention, National Center for Injury Prevention and Control of the Center for Disease Control, concluded that the incidence of pedestrian deaths in children ages 5-14 is four times higher on Halloween than any other night of the year. In order to make this holiday safer for all our children, Congress should take the modest
