

was. We have heard tonight of his efforts to create or strengthen various scientific institutions, the National Science Foundation, the White House Science Advisers, OSTP, the EPA, the Office of Technology Assessment, NASA. He advanced international scientific cooperation, energy conservation, alternative sources of energy, sustainable agriculture, peaceful uses of space. He advanced the cause of peace around the world.

I have long respected George Brown for these contributions as a scientist and as a Member of Congress before I got to know him. When I was a AAAS fellow in Congress in the early 1980's, George Brown served as a positive example to us fellows of how government policy could be used in the support and advancement of science. His personal enthusiasm and passion for science and for the people associated with the fields of science has left perhaps the most lasting impression of George Brown around the country.

And, Mr. Speaker, I will provide for the RECORD some of the remarks of other AAAS fellows who have shared with me their memories of George Brown.

George Brown understood the big picture of how science could benefit the world and how to construct government mechanisms and policy to appropriately support it. I believe no one in Washington had a better understanding of the role and the nature of science.

George Brown was a champion of science, but he was not an apologist for science. It was George who challenged both the scientific community and its policy advocates to be self-aware, yes, to be self-critical lest we continue to, in his words, develop an uncritical faith that where science leads us is where we want to go.

George Brown did not shy away from asking the tough questions. He pointed out that "It is still difficult to draw a correlation between scientific and technological capability on the one hand and quality of life on the other." He reminded us that if we look at the world as a whole, it is not at all clear that advances in science and technology have translated into sustainable advances in the quality of life for the majority of the human race.

He warned us of the potential societal crisis fueled by a deteriorating public education system, unaffordable health care, ethnic polarization, urban violence, environmental degradation, and the lack of political courage and leadership necessary for decisive action on these matters. Representative George E. Brown, Jr. had that kind of courage and he demonstrated it in each of his 18 terms in this House. George Brown never took the easy or politically expedient way. What a model he provided for us.

Mr. Speaker, I yield to my good friend and colleague, the gentleman from California (Mr. FARR).

Mr. FARR of California. Mr. Speaker, I thank the gentleman for yielding to me, and I would like to add, Marta, that I felt that memorializing your husband, our colleague, in statuary hall, where he was surrounded by some of the greatest leaders of this country, was appropriate because in my mind George was as great as all of them and he should be in that hall. He is in this hall here tonight, because as long as someone is in our minds, they are here.

We have heard from his colleagues tonight. What a great father for the State of California. I do not think anybody understood what made California tick, what made California the center of so many excellences, the center of excellence for electronics, the center of excellence for the entertainment industry, the center of excellence for agriculture, and so many kinds of agriculture. Agriculture in the north and agriculture in the south, totally different. From row crops to forestry, to all kinds of diversity, he understood the diversity of the people who live in the great State of California.

When we talked to him, we realized that we were talking to someone who grasped the entire potential of California. I think he saw that defined through science and technology; that if we could take enough good minds and put those good minds to practical use on beautiful places, like the diversity, the geographical diversity, that we cannot help but solve problems. And those problems are not just solved for California, they are solved for the United States. And when they are solved for the United States, they are solved for the world.

Just a remarkable human being in our time. Every one of us was touched by him. I think that he was, indeed, one of the fathers of modern California, and for that we will forever remember him as one of the great statues of this great state.

TRIBUTE TO THE LATE GEORGE E. BROWN, JR.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. HUNTER) is recognized for 5 minutes.

Mr. HUNTER. Mr. Speaker, I am not going to use 5 minutes, because my colleagues have spoken much more eloquently than I could, and I also want to thank the gentleman from Wisconsin (Mr. RYAN) for delaying his long-awaited special order to allow us to complete this California memory of George Brown.

I think that the centerpiece and the trademark of our democracy in this House of Representatives is civility. The ability of the Members of the House to have close quarters combat on values and on philosophy and yet remain civil to each other. And I think if there was anything that George Brown

taught not only the delegation but the rest of the House it was civility.

He did all the things that my colleagues have mentioned. When we on the Republican side ran strong, tough races against him, the next time we saw him, he would be smiling, he would be beaming, he would be winning, and he would not hold it against you. It was an amazing lesson. I think it was a lesson that we all ourselves tried to emulate, and in that sense he threw a rock into the pond and caused a lot of ripples of civility. He helped us to be better to each other.

He was a guy with a great good sense of humor. I recall when we were working the Salton Sea project, which he was a real champion of, and he worked with the gentleman from California (Mr. LEWIS), the gentleman from California (Mr. BONO), the gentlewoman from California (Mrs. Bono), the gentleman from California (Mr. CALVERT), and myself on that project, and one day, on an extremely windy day, we went to the Salton Sea, which is fed by the most polluted river in North America, the New River, when the waves were about two feet high and had whitecaps, and we were to go out with the Secretary of the Interior Mr. Babbitt on these air boats and tour the Salton Sea.

As George and I walked down to our air boat, I noticed that our two seats were extremely low to the water. And I looked over at the Secretary of the Interior's air boat and he had a high seat that was about five feet off the water. And I asked a friend of mine, who was a native there in Imperial Valley, and George Brown was born in Imperial Valley, in Holtville, he was really a man of the desert, and I asked this friend of mine, do you want to go out? And he says, not on your life. He said, this is the most polluted stuff in North America. He said, you are going to be catching that stuff right in your teeth.

So I suggested to the fish and wildlife people, who were conducting the tour, that maybe George and I might be allowed to ride in the air boat that had the high seats. And, of course, we were denied that privilege. That went to Mr. Babbitt. So George says, looks like they have a little something less for us. They provided us with a single sheet of plastic. I think we were to pull up like a makeshift windshield to keep ourselves from getting too much of this pollution in the teeth.

We got lots of it that day. And here was George Brown, a guy who had immense prestige and political power, and could have been doing a lot more comfortable things than riding around in the Salton Sea with whitecaps coming over the stern of this little air boat, because he believed in this cause of cleaning up the Salton Sea. That was George Brown. A man of great civility, a man with great good humor.

And I like to think of George as being a real product of this country
