

November 18, 1999

she developed a quiet courage and inner strength. By the early 1950's she would need that bravery to confront the passing of her beloved husband at a young age. She never remarried and his memory remains with her today.

Mrs. Standbridge began another memorable chapter in her life when she moved to Northern California and ultimately settled in Mountain View where she has lived for 38 years. Living in beautiful Silicon Valley, Mrs. Standbridge witnessed the world change again—in a far more positive way. The technological revolution that has occurred over the last few decades has made her world and ours, a more prosperous place than ever before.

The events of the 20th Century have had a great impact on Mrs. Standbridge's life and she has been shaped by the relationships of those who hold her dear. Family and friendship flow through her life and have enriched her century of living. She is a great example of resilience and courage. I'm proud to represent Mrs. Standbridge and ask my colleagues to join me in wishing this extraordinary woman a very blessed and a very happy 100th birthday.

EXTENSIONS OF REMARKS

TRIBUTE TO PETER McCUEN

HON. DOUG OSE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 17, 1999

Mr. OSE. Mr. Speaker, I rise today with a humble heart to pay tribute to a distinguished leader, a personal friend, and a true pioneer for the city of Sacramento, Mr. Peter McCuen. The city lost one of its great giants on Monday, when Peter succumbed to his third battle with cancer.

More than any other person in the last 20 years, Peter McCuen transformed the landscape of Sacramento and many of those who live in it. We can see the visual legacy he left when we drive through the Highway 50 corridor. The region's most graceful skyscraper and its most visible ziggurat building remind us how integral he was in bringing prosperity to the city.

Peter came to Sacramento in 1980 after having successful careers as a professor at Stanford University and a hi-tech entrepreneur in Silicon Valley. He had planned on retiring in the city. But immediately after he arrived, he saw the many opportunities Sacramento had to offer. He was involved in over 100 development projects, including the Library Plaza, the U.S. Bank Plaza, the Teale Data Building, and

30823

the redevelopment of Mather Air Field. He also played a vital role in brining major corporations like Intel and Sprint to this region, which created thousands of jobs for the people of Sacramento. His impact on the economic development of the Sacramento area is unparalleled.

But for many of us, it is not just the suburban business parks he built or the highrises he helped engineer that touched our lives. It is Peter's unreserved generosity, canny vision, boundless energy and incomparable intellect that make him a truly unique human being.

Peter's philanthropic efforts benefited a long list of causes and groups in the city. His renowned love of arts, education and civic organizations earned him the Regional Pride Excellence Award in 1991. He served on the advisory boards of the Cancer Center at UC Davis Medical Center and both the engineering school and the graduate school of management at UCD. He also served on the advisory board to the president of the Cal State University, Sacramento and the State's Clean Air Partnership.

Peter had a bright vision for our city, and he tried everything in his power to fulfill that vision. Sacramento is a better place because of Peter McCuen. My heart goes out to his wife Susan, his two children, Pamela and Patrick, and the entire McCuen family. Sacramento will miss one of its true leaders.
