

game of the World Series, so someone seeing him for the first time would not be disappointed.

The people of my district in Kansas City, MO, were fortunate enough to see Mr. DiMaggio play in an exhibition game against the Kansas City Blues. A Yankee teammate and Kansas City resident Hank Bauer said of DiMaggio, "He was the most outstanding center fielder I have seen." He taught America what it means to embrace excellence and strive for greatness without seeking acclaim. I and others of my generation are in public service today because of role models like Joe DiMaggio.

Joe DiMaggio served as an inspiration to my generation. Simon and Garfunkel memorialized his leadership in their song *Mrs. Robinson*. The lyrics, "Where have you gone Joe DiMaggio? Our Nation turns its lonely eyes to you," express dismay at the absence of heroes like the Yankee Clipper to lead our Nation to peace and prosperity.

The number five will always hold a special place in the hearts of Yankee fans everywhere. His record of safe hits in 56 consecutive games might never be broken. His lifetime batting average of .325 and his 361 career home runs remain impressive numbers even when we have new heroes such as Mark McGwire and Sammy Sosa. He led his Yankee to nine World Series titles and was the American League's Most Valuable Player three times. As our Nation turns its lonely eyes once more toward this hero, let us learn from his life and his example of heroism. In the words of the Negro League Legend Buck O'Neil, "I don't cry for Joe. I cry for the people who never got to see him play."

MILLS-PENINSULA HOSPITAL HONORED FOR OUTSTANDING CARE AND PERFORMANCE

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 11, 1999

Mr. LANTOS. Mr. Speaker, it is my distinct privilege today to recognize the Mills-Peninsula Hospital, which is located in my congressional district. In an annual study, "100 Top Hospitals: Benchmarks for Success," Mills-Peninsula was named one of the top hospitals for 1998 in the United States. The study was conducted by HCIA, a health care information company based in Baltimore, and William M. Mercer, a New York-based human resources management consulting firm. Nine measures of clinical, operational, and financial performance were used in the study to determine accurately the best hospitals.

Mills-Peninsula is a not-for-profit health service organization, and it has managed to improve and maintain existing services, despite battling extreme difficulties associated with the costs of managed care. By combining the highest quality care with the most cost-efficient operation, Mills-Peninsula has increased the standard of medical care and quality of life in the Bay Area. We are truly honored to have such an outstanding hospital located in our area.

Managed health care has sought to improve cost reductions and to streamline operations. The standards of excellence in health care management are becoming ever higher. Mills-Peninsula has thrived in this challenging atmosphere and continued to deliver a high level of care, and at the same time shown an ability to respond to change.

Mr. Speaker, the recognition of Mills-Peninsula Hospital has only confirmed the high value which residents of my district already place on the hospital's services. I offer my deepest and warmest congratulation to those individuals that have contributed to the success of Mills-Peninsula Hospital.

Mr. Speaker, I ask that the editorial praising Mills-Peninsula Hospital from *The Independent* be placed in the RECORD.

PENINSULA HOSPITAL AMONG TOP 100

Bravo to Peninsula Hospital for being named among the top 100 performing hospitals in the nation by the consulting firm of William M. Mercer Inc., of New York, NY, the honor is one that should reassure residents in the area that they have one of the top hospitals in the country taking care of their health needs.

The study, naming Peninsula Hospital, was published in the December issue of *Modern Health care* magazine. This assessment of the nations benchmark acute care hospitals is published annually by Mercer and HCIA Inc., a data processing company based in Baltimore.

The study considers three separate categories including financial management, operations and clinical practice. Each category is then broken down into smaller components and evaluated.

The elements considered under clinical practices include mortality rates of complications during treatment. The information is published to show legitimate health care data about patients and health care facilities to measure performance.

This is a study that is in its sixth year of identifying the top management teams and best run facilities in the country. The longer the publication studies industry trends, the more established and prestigious its list becomes. People throughout the country are concerned and interested in the performance of their community hospitals and this rating hospital care.

In an interview with this newspaper, Mills-Peninsula CEO Robert Merwin explained the price pressures Peninsula is under, to maintain services at the hospital. Merwin explained that the business community, Medicare and the costs of managed care, put pressure on all hospitals throughout the country, so maintaining standards of excellence was a major challenge.

We are happy to see that Peninsula has met that challenge and among the thousands of hospitals throughout the nation, been rated one of the best. That makes us proud of Peninsula and of the management and staff at the hospital who have carried the ball of excellence in recent years while the health care industry has been in radical change.

We know what happens when change comes to an industry, when economic pressures for change bring so many disruptions to the way a hospital does business. We commend the folks at Peninsula for not letting these changes disrupt the quality of health care they provide to the community. This rating is welcome news, especially in light of the fact that a decision must be made soon to spend millions of dollars either retrofitting

peninsula or rearing it down to build a new facility.

We don't know which decision the powers to be will make but we do know that Peninsula is a very special hospital facility that is valued by everyone in the community. The rating only bears out the fact that its management and staff have been outstanding in face of unbelievable stress in the industry. We congratulate the people, all of them, that made this rating possible and look forward to the continuation of an evaluation that places Peninsula among the top 100 hospitals in the nation.

INTRODUCTION OF THE WATER POLLUTION CONTROL AND ESTUARINE RESTORATION ACT

HON. JOSEPH CROWLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 11, 1999

Mr. CROWLEY. Mr. Speaker, I rise in strong support of the Water Pollution Control and Estuary Restoration Act being re-introduced today by the gentlelady from New York, Mrs. LOWEY, and gentlelady from Connecticut, Ms. DELAURO. I compliment and applaud my colleagues for their untiring efforts on behalf of our Nation's valuable fresh and estuarine water bodies.

Mr. Speaker, the protection of America's lakes, rivers, streams, and near coastal waters should indeed be one of our top concerns as a Nation, and I am proud and honored to be an original cosponsor of this important piece of legislation. The DeLauro-Lowe bill is a reasonable, straightforward measure that seeks to build upon past successes under the Clean Water Act (CWA). This measure will continue and strengthen several progressive programs to protect and enhance water bodies throughout our country, and I urge my colleagues to support this common sense and cost effective means of cleaning-up and protecting our water resources.

The DeLauro-Lowe bill will ensure that the existing State Revolving Loan Fund (SRF) program continues to be adequately funded to provide the financial wherewithal for States and municipalities to maintain and upgrade their wastewater treatment facilities to protect America's water bodies. This program has achieved tremendous success in the past and clearly deserves to be maintained and enhanced.

While fresh water is important for life itself, and clean lakes and rivers provide a multitude of recreational benefits to society, the vitality of our estuaries is also of great importance. Estuaries, near coastal waters, play a dual function of protecting coastal lands as well as serving as the all important nursery grounds for most marine species. Of course, these waters also provide many important recreational activities.

The Congresswomen's legislation will serve to strengthen the U.S. Environmental Protection Agency's existing National Estuary Program (NEP) that is widely regarded as a model for watershed-based pollution control. In addition, the legislation will clarify EPA's responsibility to assist States in developing and implementing their estuary management plans.
