Whereas it is important that the United States support individuals with cervical cancer, as well as their families and loved ones, through public awareness and education programs: Now, therefore, be it

Resolved, That the Senate—

(1) proclaims the month of January 1999 as "National Cervical Health Month"; and

(2) requests that the President issue a proclamation calling upon the people of the United States to observe the month with appropriate programs and activities.

● Mr. MACK. Mr. President, in an effort to help increase awareness and education about cervical cancer, and to pay tribute to women who have battled the disease, today I am submitting a Senate Resolution to designate the month of January as "National Cervical Health Month." I am pleased that Senator DIANNE FEINSTEIN and 31 bipartisan colleagues in the Senate have agreed to be original co-sponsors of this Senate Resolution. I understand that Representative JUANITA MILLENDER-MCDONALD will be introducing similar legislation in the United States House of Representatives, and I would like to commend her for the leadership she has shown in this important effort.

I would also like to pay tribute to Ms. Carol Ann Armenti, Director of the Center for Cervical Health in Toms River, New Jersey. Ms. Armenti has worked tirelessly on behalf of cervical cancer patients and their families, and she has been a true leader in educating women about this disease. In January, her organization, along with the American Medical Women's Association, launched the National Cervical Cancer Public Education Campaign. The leadership of Ms. Armenti will have a lasting impact upon the lives of women of today, and future generations will be the beneficiaries of her work.

Mr. President, the issue of cervical cancer is one which is deeply personal to my wife, Priscilla, and to me. In 1990, our daughter, Debbie, was diagnosed with cervical cancer. Because of our family history with cancer, Debbie was aware that she had an increased risk of cancer and she made sure to take advantage of early detection screening procedures. Fortunately, her cervical cancer was detected at an early stage, and she was treated successfully with surgery. Not long after her treatment, she have birth to our third grandson. Debbie's experience with cervical cancer exemplifies the fact that early detection saves lives.

According to the American Cancer Society, nearly 1,000 women in Florida will be diagnosed with cervical cancer in 1999. This year, Florida will have the third largest number of new cases of cervical cancer. Yet, despite significant progress being made in the war on cancer, not all segments of the U.S. population have benefitted to the fullest extent from the advances made in the understanding of cancer. According to the U.S. Institute of Medicine report, "The Unequal Burden of Cancer," rates of cervical cancer are significantly higher in Hispanic and African-American women. We simply must reinforce our efforts to eradicate this terrible disease.

Research, education, and early detection are the most effective weapons we have in the war on cervical cancer.

Research is the key to finding a cure for cervical cancer, and significant
