

in the allocation of payments to hospitals. Everyone benefits from advances in medical research and well-trained health professionals. Life expectancy at birth has increased from 68 years in 1950 to 76 years today. Medical advances have dramatically improved the quality of life for millions of Americans. And it is largely because of our academic medical centers that we are in the midst of a new era of biotechnology that will extend the advances of medicine beyond imagination, advances that will prevent disease and disability, extend life, and ultimately lower health care costs.

The Association of American Medical Colleges, the National Association of Public Hospitals, the National Association of Children's Hospitals, the American Medical Student Association, the American Physical Therapy Association, the American Occupational Therapy Association, the American Speech-Language, Hearing Association, and the American Association of Colleges of Nursing have all expressed support for the bill.

I urge my colleagues to join me in protecting America's academic medical centers and the future of our physician workforce by cosponsoring the All-Payer Graduate Medical Education Act.
