

often forced to move from classroom to classroom to escape the stench of sewer back-up that permeates the building. I have walked the halls of this school and have found the conditions these students face on a day-to-day basis to be deplorable.

The legislation we are introducing today offers the best opportunity for Cannonball, and the Grand Forks School District to meet these urgent construction needs. Our legislation would create a separate Impact Aid construction account and authorize a federal appropriation of \$50 million for each of the next five fiscal years. The funding would be divided equally between Indian land/federal property and military schools and would create a reserve account for emergency repair needs. Under the legislation, an individual school district could receive a grant up of to \$3 million any time during the five year authorization period. In order to make the limited federal funds go farther, the bill targets funding directly to those school districts located on Federal property or that serve a high concentration of federally-connected students. Additionally, the bill requires districts to provide matching funds on all but the small portion of funds reserved for emergencies.

Mr. Speaker, the federal government has a clear obligation to federally impacted schools, and only by stepping up its support can these schools continue to provide a quality education to thousands of children across the country. I am looking forward to working with my colleagues on a bipartisan basis to support Impact Aid schools. I urge my colleagues to support this important legislation, which would enable federally impacted schools across the country to meet their urgent construction and repair needs.

HONORING KEITH LUND AS A
"STAR OF LIFE"

HON. E. CLAY SHAW, JR.
OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 18, 1999

Mr. SHAW. Mr. Speaker, I commend Keith Lund for being designated as a "Star of Life" by the American Ambulance Association.

Keith's selection as the "Star of Life" Award winner for Dade, Broward, Monroe and Palm Beach Counties of Florida is an appropriate honor for such a dedicated paramedic. Keith has worked with American Medical Response for eight years, rising from an emergency medical technician to a paramedic and supervising officer.

Anyone who has been in an emergency situation can easily recognize the vital importance of a calm, direct manner and the ability to work as a team member. Keith Lund embodies these to near-perfection. He handles his daily work in the high-stress environment as a critical care paramedic with eagerness, diligence, and pride.

I believe it is exceedingly difficult to separate professional life and personal life. This is an especially complicated task for a single parent. As a single father, Keith's dedication to his job is balanced with his dedication to his son. Keith's commitment to both should be honored and admired.

EXTENSIONS OF REMARKS

Mr. Speaker, I urge my colleagues to join with me in honoring the 150 emergency medical professionals being honored as "Stars of Life" during National EMS Week of 1999. I commend Keith Lund for his dedication to emergency care for the people of South Florida as a true "Star of Life".

U.S.-TAIWAN RELATIONS

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 18, 1999

Mr. PAYNE. Mr. Speaker, I rise today in support of President Lee Teng-Hui and Vice-President Lien Chan of Taiwan as they prepare to celebrate their anniversary in office this May 20th. We are reminded once again that we have a strong partner and friend in the Far East—The Republic of China on Taiwan.

Throughout its history, the Republic of China on Taiwan has always continued to foster good relations with the United States. Many of Taiwan's leaders were either educated in the United States or the United Kingdom and they, just as much as we do, believe in democracy and a free enterprise system.

In the future, I hope we can continue to work together on issues that are mutual beneficial to both countries in the areas of democracy and governance, the rule of law, international trade and the environment. Taiwan has always supported the United States in many areas as it relates to security in and outside of the region. I hope we can continue to do this. It is time we show our appreciation of Taiwan by offering our help to them when they need us.

IN SPECIAL RECOGNITION OF
GEOFFREY L. EARNHART ON HIS
APPOINTMENT TO ATTEND THE
U.S. MILITARY ACADEMY

HON. PAUL E. GILLMOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 18, 1999

Mr. GILLMOR. Mr. Speaker, I rise today to pay special tribute to a truly outstanding young man from Ohio's Fifth Congressional District. Recently, I had the opportunity to nominate Geoffrey L. Earnhart for an appointment to attend the United States Military Academy at West Point, New York.

I am pleased to announce that Geoff has been offered an appointment and will be attending West Point with the incoming cadet class of 2003. Attending one of our nation's military academies is one of the most rewarding and demanding time periods these young men and women will ever undertake. Our military academics turn these young adults into the finest officers in the world.

Mr. Speaker, without question, Geoff belongs with the incoming West Point class of 2003. During his time at St. Francis DeSales High School, in Perryburg, Ohio, Geoff has achieved a remarkable grade point average of 4.427, which currently ranks him tenth in his

class of 178 students. Geoff is a three-year member of the National Honor Society, and has received many awards for his academic excellence.

Outside the classroom, Geoff has been a four-year member of the St. Francis DeSales Marching Band. In his senior year, Geoff is the leader of the percussion section. In addition, Geoff has demonstrated his dedication and commitment to excellence by obtaining his Eagle Scout ranking with the Boy Scouts of America. He has also been a Scout patrol leader and summer camp counselor.

Mr. Speaker, at this point, I would ask my colleagues to stand and join me in paying special tribute to Geoffrey Earnhart. Out service academies offer the finest education and military training available anywhere in the world. I am sure that Geoff will do very well at West Point, and I wish him much success in all of his future endeavors.

COMMEMORATING THE 150TH ANNIVERSARY OF THE FOUNDING OF THE SISTERS OF ST. FRANCIS OF ASSISI

HON. GERALD D. KLECZKA

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 18, 1999

Mr. KLECZKA. Mr. Speaker, I rise today to commemorate the founding of The Sisters of St. Francis of Assisi, a congregation that is celebrating its 150th anniversary this year.

In 1849, thirteen secular Franciscans emigrated from Bavaria to establish a religious order to meet the education needs of German immigrants in Milwaukee. As such, The Sisters of St. Francis of Assisi are the first Third Order regular Franciscan congregation founded in the United States.

Over the years the work of the congregation has extended to virtually every walk of life and touched countless thousands through ministries of healing, teaching, reconciliation and liberation.

The congregation is involved in diverse ministries, which include: Making affordable housing units available through Canticale Court and Juniper Court, promoting undergraduate and graduate education at the renown Cardinal Stritch University, making affordable rental units available to non-profit groups through the Marian Center, and offering community-based care for all ages through the innovative work at the St. Ann Center for Intergenerational Care. In addition, ministries are maintained by the congregation throughout the U.S. and Taiwan through St. Colett's organizations in Wisconsin, Illinois and Massachusetts. And, a collaborative relationship is maintained with a Franciscan congregation in Cameroon, West Africa.

In all, nearly 350 Sisters and 75 Associates promote the mission of the congregation in areas of education, pastoral ministry in parishes, hospitals and nursing homes, music ministry, elder housing and day care service to those with developmental challenges, and volunteer work of all kinds.

In the last week of July, The Sisters of St. Francis of Assisi will bring its mission to television in a series of public education messages called, "We are Franciscans with a Future." On Sunday, May 30 the 150th celebration will culminate with the May Crowning and on Open House.

Then, in August, another celebration will take place with two other congregations who share the same roots of foundation: The Franciscan Sisters of Perpetual Adoration from La Crosse, Wisconsin, and The Franciscan Sisters of the Eucharist from Meriden, Connecticut. In addition, some 35 friends and parishioners from parish church in Ettenbeuren, Bavaria will join the celebration. They will also visit the motherhouses of all three religious congregations.

Mr. Speaker, it is with immense pride and gratitude that I commemorate The Sisters of St. Francis of Assisi on its jubilee anniversary and the wonderful contributions the congregation has made to the spiritual, academic, and temporal quality of life in communities close to home and around the world.

H.R. 1592, THE REGULATORY FAIRNESS AND OPENNESS ACT OF 1999

HON. RICHARD W. POMBO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 18, 1999

Mr. POMBO. Mr. Speaker, it is rare for both Houses of Congress to reach an agreement—fully bipartisan legislation. The Food Quality Protection Act (FQPA) was enacted in this manner in 1996. This bill eliminated the famous Delaney Clause for residues in raw and processed foods—replacing it with a scientific, rational standard of "reasonable certainty of no harm." Food, agricultural and consumer interests, as well as the pesticide industry saw the passage of FQPA as an opportunity to assure that sound science is paramount in EPA's determinations on the use of chemicals on crops, in homes and for public health concerns. FQPA required the EPA to establish scientific, rational, sound and reasonable standards.

Mr. Speaker, sound science is what the authors intended and expected. This is what Congress wanted—sound science as the rule's foundation. Further, the new law provided an additional safety factor to protect infants and children, and new ways of assessing pesticide benefits and risks. This is something Congress fully supported and continues to support. Despite strong congressional support, implementing the law at the regulatory level has been a very difficult and unnecessarily complex process.

In fact, only a few months after the law was passed, the FQPA implementation process broke down. Members of Congress voiced their concern. The problems were so great and concerns from America's agricultural industry so substantial that Vice President Gore sent a memorandum to both the Department of Agriculture and the Environmental Protection Agency on April 8, 1998. This memorandum laid out the White House's plan for

putting FQPA's implementation on the right track.

The White House's plan for FQPA implementation contained four basic principles: sound science in protecting public health, regulatory transparency, reasonable transition for agriculture, and consultation with the public and other agencies. America's agricultural and urban pest control community supported the Vice President's approach.

Mr. Speaker, now, a year after the White House got directly involved in FQPA's implementation process, it remains derailed. It has become clear to me that Congress must again revisit this issue. It is my humble hope, we can revisit FQPA the way we left it, in a bipartisan spirit of cooperation.

Mr. Speaker, Congress wanted a law to eliminate the scientifically inadequate and outdated Delaney Clause. What Congress and the Nation got was much worse. In fact, the EPA has failed to provide scientifically sound guidance to the regulated community. The EPA's approach follows a path toward great economic harm for agricultural producers and pest outbreaks causing diseases concerns for urban and suburban communities it is an approach that is without a scientific foundation.

Farmers, the food industry, pest control interests, and many others are understandably concerned. Americans want and deserve a fair, workable implementation of the bipartisan law. Americans want and deserve rules that are based on real information and sound science. Americans want and deserve rules that follows the Vice President's stated goals. Americans want and deserve rules that fit FQPA's requirements.

In order to achieve these results, I along with Mr. TOWNS, Mr. CONDIT and Mr. BOYD have introduced "The Regulatory Fairness and Openness Act of 1999." This legislation maintains the strong safety standards established by FQPA. This bill simply establishes a scientific-based process for implementing the law which will be based on sound, peer reviewed science and open for public review. Further, it ensures that agricultural producers across the country, who are already facing tough times, will not be adversely impacted by loss of crop protection tools because the EPA failed to use good science in reviewing crop protection tools under the new standards of FQPA. It will also ensure the consumers' food supply and food quality will not be affected by incomplete and faulty data.

MY LEGISLATION ACCOMPLISHES THE FOLLOWING

The Regulatory Fairness and Openness Act of 1999 lays out the problems that the EPA has faced over the last few years in implementing the law. In many cases, the EPA simply does not know what to do because the scientific protocols for assessing certain crop protection products under the new law have not been developed. Further, it highlights the extreme negative consequences if the law is implemented improperly. For example, organophosphate insecticides are used on 70 percent of the acres treated in the United States and are used to control of vector insects that spread diseases. If the EPA continues on their current path, many of these products could be lost. Farmers will be left without replacement products and exposed to major losses due to pest outbreaks. Con-

sequently, this will lead to either a shortage of quality produce or increase in import from countries where their farmers do not follow our stringent guidelines. It will also limit the ability of agencies to control vector insects, thus causing health risks for millions of Americans.

This legislation will require the EPA to perform a simple "transition analysis" on products before releasing any information about the safety of the product to the public or making final tolerance decisions. If the transition analysis determines that the Administrator is using assumptions when existing data makes the use of the assumption unnecessary or is using worst case estimates, anecdotal, unverified, or scientifically implausible data, the Administrator cannot make final re-registration decisions on those products until sufficient time has been provided to allow the data to be developed, submitted and subsequently evaluated by the Agency.

The Administrator is required to issue rules to implement the FQPA properly within one year of enactment of this bill. Further, the Administrator is required to issue guidelines specifying the kinds of information that will be required to support the issuance or continuation of a tolerance or exemption from the requirements for a tolerance and shall revise such guidelines from time to time.

My bill provides protections, especially to small acreage farmers to ensure that they will not be left without crop protection tools. This legislation requires the Administrator to report to Congress priorities for registering new products that will replace products that are being removed from use and expedite the registration process. This will allow the farmers to continue to provide a safe, reliable food supply.

The USDA and EPA are required to assess the potential negative trade effects of implementing FQPA. The program will monitor the competitive strength of major United States agricultural commodity sections in the international marketplace. Such commodity sectors include fruits and vegetables, corn wheat, cotton rice, soybeans and nursery and forest products.

Mr. Speaker, FQPA must be implemented properly or grave results will occur. My bill gives this Congress a chance to do something good for the American people and the American Farmer. I urge my colleagues to cosponsor this legislation.

THE LIVING ORGAN DONATION INCENTIVES ACT OF 1999

HON. KAREN L. THURMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 18, 1999

Mrs. THURMAN. Mr. Speaker, I never thought that I would come before my colleagues to discuss the importance of organ donation. Frankly, it was never an issue until seven years ago—organ donation was something other people did and organ transplants affected other people's families.

Well, I am here to tell you that this issue can affect anyone. You never know.

My husband, John, suffers from Polycystic Kidney Disease. John endured years of dialysis while awaiting a kidney transplant. In 1996,
