suffering by a Jewish community and not to help."

About 400 Jews from Serbia have become guests of the Budapest Jewish community. Since males between 14 and 65 cannot leave Serbia, this split occurs. In some cases, mothers have come with their children to Budapest; in others just the children have been sent.

But that is not all. Israel is also playing host to Muslim and Jewish refugees from the fighting areas. In fact, when we flew back to Israel that evening, 32 Yugoslav Jews who had been staying in Budapest came up with us.

Some were coming as visitors, and others to make aliyah. All these efforts are also being assisted by JAFI and the JDC—that is, through resources provided by Jews everywhere.

In Israel, we visited with several of the hundreds of Kosovars and Serbs—Muslims and Jews—that the state is hosting.

Each had his own sad story, though all expressed gratitude for the kindness extended by Israelis and other Jews. Perhaps the most memorable exchange occurred when a member of the UJC delegation asked a Jewish family from Kosovo what they had expected before arriving in Israel. Anita Conforti, 22, translated her mother’s answer into English: “Warm deserts and cold people.”

What did you find after you got here?

“Paradise.”

UNION CARBIDE CORPORATION TECHNICAL CENTER IN SOUTH CHARLESTON CELEBRATES ITS 50TH ANNIVERSARY

HON. ROBERT E. WISE, JR.
OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 1999

Mr. WISE. Mr. Speaker, I would like to extend my congratulations to the Union Carbide Corporation Technical Center in South Charleston in celebration of its 50th Anniversary.

As an innovator for Union Carbide activities worldwide, the Technical Center was first occupied in April of 1949 in the Research Building. Occupants from the Union Carbide South Charleston Plant soon occupied the Technical Center.

Since that time 50 years ago, the site has grown to approximately 650 acres with approximately 125 acres developed. By offering support through research and development of technology used in the chemical industry and providing engineering for the construction of plant facilities and support to computer systems, the Technical Center offers worldwide assistance to Union Carbide manufacturing businesses.

Building upon its success as an innovator as a multinational petrochemical company, Union Carbide now provides 25 percent of the world’s manufacture of polyethylene. It should come as no surprise that Union Carbide has garnered awards for three of its products and services which were primarily developed at the Technical Center. These include the UNIPOL process for polyethylene, the low-pressure OXO process, used to make alcohols and acids and finally the production of ethylene oxide and the derivatives of ethylene oxide, in which Union Carbide is the world’s largest producer.

REMEMBERING SHEL SILVERSTEIN

May 25, 1999

EXTENSIONS OF REMARKS

I commend Dr. William H. Joyce, CEO of Union Carbide Corporation and the employees of the Technical Center and look forward to continuing a very productive working relationship. The Technical Center, in addition to being a highly profitable and decorated organization, has been a good corporate citizen in its involvement as volunteers in the area and a good partner for the community.

I again congratulate the Union Carbide Corporation Technical Center in recognition of its anniversary and offer my wishes for continued success and prosperity.

HON. MICHAEL F. DOYLE OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 1999

Mr. DOYLE. Mr. Speaker, I rise today in praise of an outstanding young adult from the 18th Congressional District of Pennsylvania, Ms. Amanda Iannuzzi, a Congressional Award medal recipient. Amanda’s commitment to self-development and community involvement serves as an inspiration to people of all ages, and illustrates the accomplishments that come with hard work and determination.

Without motivation, however, hard work and determination are destined to remain unfilled ideals. Amanda’s motivation breathed life into innumerable commendable acts. Not only did Amanda involve herself in volunteer work, but invested time in broadening her artistic and physical skills. While much of what is directed towards young people is prescriptive in nature, it is important to note that these acts were of Amanda’s own design and were completed with her own resolve.

Upon review of Amanda’s achievements, one is particularly struck by the considerable amount of time that was devoted to obtaining this award. Hundreds of hours over the course of months were invested. Clearly, Amanda recognizes the immense value of giving one’s time to help others. It is my hope that your actions foreshadow a life distinguished by the pursuit of new challenges.

Congratulations Amanda! Best wishes to you for continued success.

HON. BENJAMIN A. GILMAN OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 25, 1999

Mr. GILMAN. Mr. Speaker, I rise today to ask my colleagues to join in honoring sister Brigid Driscoll, President of Marymount College, who, as a prominent figure from my district, has been a role model for the espousal of women’s education for the last forty years. Sister Brigid, who will be retiring from her position in June, has devoted her life to Marymount College, establishing its solid foundation within the educational arena and the greater Tarrytown, New York community.

For more than twenty years as its president, and before that as an administrator and faculty member, Sister Brigid’s visionary leadership has overseen Marymount’s transformation from a homogeneous liberal arts college exclusively for women, to an institution that maintains a strong focus on women, while
