

HONORING LEELA DE SOUZA AS A  
WHITE HOUSE FELLOW

**HON. BOBBY L. RUSH**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 26, 1999*

Mr. RUSH. Mr. Speaker, it is with great pleasure today that I rise to commend Leela de Souza of Chicago, Illinois in recognition of her achievements this year as a distinguished White House Fellow.

A native of Chicago, Ms. de Souza graduated Phi Beta Kappa from the University of Chicago, earning an AB in biopsychology. She received her MBA degree from Stanford University Graduate School of Business. After college, she moved to Spain and became a volunteer teacher at the American School of Madrid. Prior to college, at the age of 18, she became a professional ballet dancer. By age 23, she was the prima ballerina for the Hubbard Street Dance Company, one of America's pre-eminent contemporary dance troupes. Ms. de Souza is a management consultant with McKinsey & Co. in San Francisco, where she works with clients in the packaged goods, energy and health care industries. In addition to her professional career, she has done extensive pro bono work with two national symphonies. Ms. de Souza has also been involved as a mentor and tutor in the I Have a Dream Program in East Palo Alto, California, and serves on the Business Arts Council of San Francisco.

Established in 1965, the White House Fellowship program honors outstanding citizens across the United States who demonstrate excellence in community service, leadership, academic and professional endeavors. The nearly 500 alumni of the program have gone on to become leaders in all fields of endeavors, fulfilling the fellowship's mission to encourage active citizenship and service to the nation. It is the nation's most prestigious fellowship for public service and leadership development.

As a White House Fellow, Ms. de Souza serves in a position with the Office of the First Lady. She works at the White House Millennium Council to help create national projects and initiatives to celebrate the promise of the new millennium. In this capacity, Ms. de Souza assists with various initiatives such as Millennium Evenings at the White House and Save America's Treasures. She is also the acting liaison with several of the First Lady's millennium projects, including speech writing, federal agency millennium initiatives, and with non-governmental organizations seeking to partner with the White House on national millennium projects.

Mr. Speaker and fellow colleagues, it is an honor to pay tribute to Leela de Souza for her outstanding service as a White House Fellow.

**EXTENSIONS OF REMARKS**

HEALTH INFORMATION PRIVACY  
ACT

**HON. EDWARD J. MARKEY**

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 26, 1999*

Mr. MARKEY. Mr. Speaker, last night I joined Mr. CONDIT and Mr. WAXMAN in introducing the Health Information Privacy Act of 1999, the "Condit-Waxman-Markey" bill.

Without question, the rapid advance of the Information Age is revolutionizing the American economy and forcing the evolution of new relationships both good and bad. There is no area of its development that causes more anxiety for ordinary people than the area of privacy. And there is no area of privacy that causes more anxiety for Americans than the privacy of their most personal health information.

Today, we are experiencing the erosion of our medical privacy. With the stroke of a few keys on a computer or the swipe of the prescription drug card, our personal health information is being accumulated and tracked.

This erosion of our privacy threatens the very heart of quality health care—doctor/patient confidentiality. By undermining this sacred relationship, we destroy the trust that patients rely on for peace of mind, and doctors depend on for sound judgment.

In an HMO today, anywhere from 80–100 employees may have access to a patient's medical record according to the Privacy Rights Clearinghouse in San Diego California. With such unrestricted access to one's personal health information, it's impossible to separate the health privacy keepers from the "just curious" peepers.

Not to mention the greatest threat to our medical privacy—the information reapers.

The evolution of technology has provided the ability to compile, store and cross reference personal health information, and the dawning of the Information Age has made your intimate health history a valuable commodity.

Last March, the Wall Street Journal wrote about the ultimate information reaper—a company that is "seeking the mother lode in health 'data mining'". This company is in the process of acquiring medical data on millions of Americans to sell to any buyer.

Currently there is no federal medical privacy law to constrain the information reapers as they delve into large data bases filled with the secrets of millions of individuals. These data bases represent a treasure chest to privacy pirates and every facet of your medical information represents a precious jewel to be mined for commercial gain.

With this unfettered access, patient confidentiality has become a virtual myth, and the sale of your secrets a virtual reality.

Because of the rapid evolution of technology, we have fallen behind in assuring a right that we have come to expect—the fundamental right to keep our personal health information private.

Due to the deadline imposed by the Health Insurance Portability and Accountability Act 1996, Congress has until August 21st to enact a medical privacy law. We have no time to

*May 26, 1999*

waste. Now is the time to unite in an effort to move legislation forward. The Condit/Waxman/Markey bill is a good consensus and comes at a time when consensus is crucial.

This bill creates an incentive to use information which is not personally identifiable wherever possible, it would require a warrant for law enforcement to access medical records and it would provide a federal floor creating a uniform standard without preempting stronger state laws.

I look forward to working with Rep. CONDIT and Rep. WAXMAN and the rest of my colleagues in the House of Representatives on this important issue. I believe together we will succeed in passing a strong federal medical privacy bill which will give patients the right they deserve—the right to medical privacy.

CRISIS IN KOSOVO (ITEM NO. 6),  
REMARKS BY AMBASSADOR JONATHAN DEAN, UNION OF CONCERNED SCIENTISTS

**HON. DENNIS J. KUCINICH**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 26, 1999*

Mr. KUCINICH. Mr. Speaker, on May 6, 1999, I joined with Representative JOHN CONYERS, Representative PETE STARK, and Representative CYNTHIA MCKINNEY to host the third in a series of Congressional Teach-In sessions on the Crisis in Kosovo. If a peaceful resolution to this conflict is to be found in the coming weeks, it is essential that we cultivate a consciousness of peace and actively search for creative solutions. We must construct a foundation for peace through negotiation, medication, and diplomacy.

Part of the dynamic of peace is a willingness to engage in meaningful dialogue, to listen to one another openly and to share our views in a constructive manner. I hope that these Teach-In sessions will contribute to this process by providing a forum for Members of Congress and the public to explore alternatives so the bombing and options for a peaceful resolution. We will hear from a variety of speakers on different sides of the Kosovo situation. I will be introducing into the CONGRESSIONAL RECORD transcripts of their remarks and essays that shed light on the many dimensions of the crisis.

This presentation is by Ambassador Jonathan Dean, who joined the Union of Concerned Scientists in 1984 as advisor on international security issues. He was United States Representative to the NATO-Warsaw Pact force reduction negotiations in Vienna between 1978 and 1981. Before that, he was deputy U.S. negotiator for the 1971 Four Power Berlin Agreement with the Soviet Union.

Ambassador Dean discusses the need to negotiate a peace with Russia as the leading mediator. With regards to the peace keeping force to be in place after the conflict, Mr. Dean reiterated the necessity to have a UN peace keeping force in place rather than a NATO led force. He also addresses the importance of having more preventative measures in place to help avert such conflicts in the future.
