in Vermont. He admits that when he first took over it was viewed as a stepping stone, but he says the people here have been so welcoming and unlike the flinty New England stereotype, that he and his wife Glenda have fallen in love with the state and plan to retire. The college provides housing on the campus for the president, so the Clarkes built a "weekend" home in Addison, near Lake Memphremagog.

On the college front, he’s planning more relationships with businesses. He’s working to develop one with IDX, the Burlington-based company, which recently announced an expansion. He hopes to provide a six-month program of technical training to liberal-arts graduates.

Clarke also wants to assist Vermont businesses to get into what he calls "e-commerce," selling their wares over the Internet. "We know the technology and we can help," he says. "Most businesses are barely scratching the surface."

And he wants to encourage the state to come up with a coordinated effort to deal with vocational-technical education.

He applauds the efforts of the Higher Education Financing Commission on which he sat, but feels the key to having its recommendations work is a multi-year commitment by the state. For example, he notes that the new Trust Fund just passed by the Legislature is about $9 million to start and its use is limited to the earnings from the amount.

"It’s an important first step," he says, "but one that will have marginal impact until it grows." For each of the state colleges, the fund will produce about $20,000 a year for scholarships as it now stands. He’s disappointed, however, that there are no "workforce development" funds. Most states provide funds for training and re-training workers, but in Vermont the cost must be borne entirely by the companies.

Unless, of course, some clever entrepreneur somewhere—someone like Bob Clarke—can find the money and the backing to put a package together.

HONORING COLORADO STATE SENATOR TILMAN BISHOP

Mr. ALLARD. Mr. President, I’d like to take a moment to honor an individual who, for so many years, has exemplified the notion of public service and civic duty and an individual the western slope of Colorado will find difficult to replace.

Senator Tilman Bishop, a true Colorado native, represented Colorado’s 7th District in the Colorado State Senate for 24 years and before that, 4 years in the Colorado House of Representatives. From 1993 to 1998 he also served as president pro tem of the senate. His years of service rank him 4th in the State’s history for continuous years of service and he is the longest serving senator from the western slope of Colorado.

Senator Bishop has, for decades, selflessly given of himself and has always placed the needs of his constituents before his own. I had the honor of serving with Senator Bishop in the Colorado State Senate from 1983 to 1990 and have always valued his advice and counsel.

The numerous honors and distinction that Senator Bishop has earned during his years of outstanding service exemplify his dedication to the legislature and his constituents. Senator Bishop’s wisdom and knowledge will be sorely missed.

Senator Bishop’s tenure in the State legislature ended in 1998. There are too few people in elected office today who are prepared to serve in a responsible and diligent manner of Tilman Bishop. His constituents owe him a debt of gratitude and I wish him and his wife Pat the best in their well-deserved retirement.

TO TRIBUTE TO TONY BURNS OF FLORIDA

Mr. GRAHAM. Mr. President, I rise today to salute a special milestone involving one of America’s premier business and civic leaders, Mr. Anthony "Tony" Burns of Miami, Florida.

A quarter-century ago, Tony Burns began his career with Ryder System, Inc. in 1974, as the Director of Planning and Treasurer. Under his guidance, Ryder expanded to become the largest truck leasing and rental company in the world, and the largest private transit management company in the United States. Now serving as Chairman, President and Chief Executive Officer, Tony celebrates his 25th anniversary with the firm on June 3, 1999.

While elevating Ryder’s corporate status, Tony has helped lead the effort to make the workplace more family friendly. He has implemented programs such as Kids’ Corner, the Diversity Council, and a flextime policy to allow parents greater schedule flexibility.

In addition, Tony Burns personifies community involvement, including service to the Boy Scouts of America.

Mr. President, as we approach a new millennium and look back on the all-but-complete 20th Century, we are reminded of the importance of the dedicated people who strive to improve both their workplace and their community. I commend Tony Burns for his business acumen, his leadership, and his commitment to his company and the south Florida community. As he prepares to celebrate his 25th anniversary with Ryder, I ask you to join me and his many friends in extending congratulations and best wishes.

ON BEHALF OF THE LATE JIM BETHEL, DEAN EMERITUS OF THE UNIVERSITY OF WASHINGTON’S COLLEGE OF FOREST RESOURCES

Mr. GORTON. Mr. President, I rise to acknowledge the passing of an eminent teacher, scientist and academic administrator in my state. On Tuesday, May 18, Jim Bethel, Dean Emeritus of the University of Washington’s College of Forest Resources, died in a Seattle hospital.

Dean Bethel was one of the Nation’s most prominent and influential forest leaders and was recognized both nationally and internationally. During his 17-year tenure as Dean from 1984 to 1991, he was a principal architect of creative educational innovations and related research programs that have endured in one way or another to this day. Furthermore, his extensive experience and leadership in international forestry affairs has contributed greatly to the College’s involvement in international academic and research activities.

As an administrator, Dean Bethel set an unendingly high standard for his successors, faculty and administrators to emulate. Dean Bethel was responsible for initiating the College’s pulp and paper program and the Center for Quantitative Science. Under his leadership, the College was repeatedly ranked among the top five forestry institutions in the U.S. Incidentally, while Dean, Bethel never gave up teaching two undergraduate courses, conducting personal research and advising graduate students.

Bethel received a BS degree from the University of Washington and advanced degrees at Duke University. In fact, he was one of the first individuals to be granted a Doctor of Forestry. Bethel held faculty appointments at Pennsylvania State University and Virginia Polytechnic University. During a 10-year stint at North Carolina State University, he was Professor and the Director of the Wood Products Laboratory and acting Dean of the Graduate School. He worked at the National Science Foundation for three years prior to becoming the Associate Dean of the Graduate School at the University of Washington. He also served as Professor and subsequently the Dean of the College of Forest Resources.

Several organizations recognized Bethel’s scientific contribution: he was elected fellow of the Society of American Foresters, the American Association for the Advancement of Science and the International Academy of Wood Sciences. He served on various boards and was a consultant to the National Academy of Sciences. Bethel also served on the President’s Council on Environmental Quality. He was one of the founders of the Forest Products Research Society.

Bethel has significantly influenced the lives of many professional foresters. Perhaps his greatest and most enduring professional legacy are his graduate students who went on to responsible and successful positions, and the impressive list of professional journal articles and books.

Dean Bethel will be missed by those concerned about the scientific stewardship of forest resources in my State and the world.

PLIGHT OF THE KURDISH PEOPLE

Mr. DODD. Mr. President, I rise today out of concern for the plight of the
Kurdish people living in Northern Iraq and Eastern Turkey. They have been victims of some of the most egregious human rights abuses in recent years, including brutal military attack, random murder, and forced exile from their homes. While American efforts in Northern Iraq have greatly improved the plight of the Kurds, there is certainly much room for improvement both there and in Turkey.

In 1988, the world was stunned by the horrific pictures of the bodies of innocent Kurds disfigured by the effects of a port-injected gas attack by Saddam Hussein. We may never know exactly how many people died in that particular attack due to Saddam Hussein’s efforts to cover up his culpability. The number of victims, however, is most likely in the thousands.

This was certainly not Iraq’s first deplorable attack on the Kurds and, sadly, it was not destined to be the last. Yet, this attack continues to represent a stark milestone in the long list of deplorable deeds Saddam Hussein has perpetrated against his own people.

In recent years, however, the United States has come to the aid of the Kurds of Northern Iraq. At the conclusion of the Gulf War, the United States and our allies established “no-fly” zones over Northern and Southern Iraq. These zones, plus the damage the Iraqi military sustained during Operation Desert Storm, have mercifully curtailed Saddam Hussein’s ability to attack the Kurds in Northern Iraq. Mr. President, the men and women of the United States Air Force who risk Iraqi anti-aircraft fire over Iraq each day in order to enforce these no-fly zones deserve our support and commendation.

Not only do their efforts protect nations throughout the region and around the world from Saddam Hussein’s aggression, but their daily flights serve as deterrents against human rights abuses.

Mr. President, the United States has taken other, more direct actions to help the Kurds of Northern Iraq. Following the Gulf War, the United States Agency for International Development worked to provide important humanitarian assistance to Iraqi Kurds. When Iraqi incursions into the region once again threatened the lives of thousands of innocent civilians, the United States worked to evacuate more than 6,500 people to the safety of Guam. Many were later granted asylum in the United States.

Our relationship with the Kurdish people of Northern Iraq is not a one-way street. More than 2,000 of the Kurds who the United States evacuated in 1996 were either employees of American relief agencies or family members of those employees. Others have provided invaluable intelligence information to the United States.

As I mentioned earlier, many Kurds also live in Eastern Turkey. A minority of Turkish Kurds have taken up arms against the democratically elected Turkish government in a bid for independence. While both sides in this internal conflict are guilty of human rights abuses against innocent Kurdish civilians.

The Kurdistan Workers Party, or PKK, has devolved into a terrorist organization targeting not only Turkish military and police forces but innocent Kurdish civilians as well. While reliable estimates of the number of victims are extremely hard to come by, it is clear that thousands, probably tens of thousands, have died at the hands of the PKK.

As is often the case, neither side in the dispute holds a monopoly on human rights abuses. The PKK’s actions unquestionably demand a response from the government. Rather than a measured and targeted response, however, Turkey has declared a state of emergency in a large portion of Eastern Turkey, directly affecting more than 4 million of its citizens.

Under the cover of emergency, Turkey has severely rationed food, leading to great hardship amongst innocent civilians. In addition, Turkey has forced hundreds of thousands of people out of their homes, leaving more than 2,900 towns and villages mere ghost towns.

These actions are all aimed at suppressing the PKK’s terrorism. Yet, the government has actively targeted not only known terrorists but those believed to agree with the PKK’s goal of independence—although perhaps not their methods—as well. Even those who support neither the PKK’s goals nor their means suffer at the hands of the Turkish military and police forces. Thus, Turkey’s Kurdish population is under attack from both sides without any place to hide.

Turkey is both a democracy and an important ally of the United States. In Kosovo and Bosnia, Turkey has stood firmly with other NATO members against human rights abuses. In recent weeks, Turkey has opened its borders to tens of thousands of innocent Kosovars desperate to escape Slobodan Milosevic’s murderous rampage. Turkey, along with our other NATO allies, deserves a great deal of credit for its principled stand in the Balkans. In fact, Turkey has allowed the United States to enforce the no-fly zone over Northern Iraq from our air force base on Turkish soil.

Yet, it would be inappropriate for us to overlook Turkey’s human rights abuses against its own people simply because of its commendable actions elsewhere. Mr. President, the intentional murder of innocent non-combatants is an anathema to the United States irrespective of where it occurs or who the perpetrator is. Thus, the PKK’s efforts to intimidate others by random murder, certainly not indicative of all Kurds, deserves our condemnation as does Turkey’s abuse of its own innocent citizens in the pursuit of terrorism.

Mr. President, we must never let our nation’s commitment to the protection of human rights lapse. As we sit here today, the human rights of an entire race of people in Turkey and Iraq are under assault. I urge my colleagues to join me in condemning these abuses.

TRIBUTE TO COGGESHALL ELEMENTARY SCHOOL ON ITS 100TH ANNIVERSARY

Mr. REED. Mr. President, I rise to congratulate Coggeshall Elementary School of Newport, Rhode Island, which this year celebrates its 100th anniversary.

Coggeshall has seen much since it opened to students in 1899. It has seen the rise of the automobile, the invention of the airplane, and the emergence of the Internet. It has weathered the great hurricanes of 1938 and 1954. It was around for 5 Boston Red Sox World Series titles. It has been the witness to the summer summers of bitter defeat since the last in 1918. Coggeshall has seen its graduates serve in two World Wars. It has seen its female students earn the right to vote.

Since Coggeshall opened its doors, the sound barrier and the four minute mile were broken. Charles Lindburg traversed the Atlantic, Neil Armstrong walked on the moon, and Rosa Parks ignited the Civil Rights movement.

Mr. President, Coggeshall Elementary has not only experienced history; it has shaped it. Coggeshall and its teachers have had an impact on generations of Newport’s students. The school’s influence is certain to reach far into the future.

I want to take this opportunity to commend Coggeshall Elementary for its continuing legacy to Rhode Island—its students.

Recently, Jessica Perry, a fifth grade student at Coggeshall, penned a history of the school. I ask unanimous consent that her paper be printed in the RECORD, and I urge my colleagues to join me in congratulating Coggeshall Elementary on its 100th anniversary.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HISTORY OF COGGESHALL ELEMENTARY SCHOOL

(By Jessica Perry, Grade 5)

Coggeshall Elementary School was built beginning 1899. It opened to students in 1899. This year Coggeshall will be celebrating its 100th anniversary.

When Coggeshall was first opened there was no library. The boys and girls had to go in one door and the girls had to go in the other door. Boys and girls almost always rode their bicycles so they had a bike room. Where the library is now was the boys bike room. Where the kitchen is now was the girls bike room. There was no office. There were only four classrooms each on the 1st and 2nd floor.

The school had been open for a short period of time in the spring of 1899. June 24, 1899.
