(a) AUTHORIZATION OF APPROPRIATIONS, AIR FORCE. Funds are hereby authorized to be appropriated for military construction and land acquisition, and military family housing functions of the Department of the Air Force in the total amount of $1,961,051,000 as follows:

1. For military construction projects outside the United States authorized by section 2301(a), $651,833,000.
2. For military construction projects outside the United States authorized by section 2301(b), $76,650,000.
3. For unspecified minor construction projects authorized by section 2805 of title 10, United States Code, $8,741,000.
4. For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $38,264,000.
5. For military housing functions:
   - For construction and acquisition, planning and design, and improvement of military family housing and facilities, $333,671,000.
   - For support of military family housing (including the functions described in section 2833 of title 10, United States Code), $281,892,000.

(b) PLANNING AND DESIGN. Using amounts appropriated pursuant to the authorization of appropriations in section 2304(a)(5)(A), the Secretary of the Air Force may carry out architectural and engineering services and construction design activities with respect to the construction or improvement of military family housing units in an amount not to exceed $17,471,000.

SEC. 2405. CONSOLIDATION OF AIR FORCE RESEARCH LABORATORY FACILITIES AT ROME RESEARCH SITE, ROME, NEW YORK.

The Secretary of the Air Force may accept contributions from the State of New York in addition to amounts authorized in section 2304(a)(5)(A). The Secretary of the Air Force may improve existing military family housing units in an amount not to exceed $129,962,000.
SEC. 2402. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS.

Subject to section 2825 of title 10, United States Code, and using amounts appropriated pursuant to the authorization of appropriations in section 2405(a)(8)(A), the Secretary of Defense may improve existing military family housing units in an amount not to exceed $50,000.

SEC. 2403. MILITARY FAMILY HOUSING IMPROVEMENT PROGRAM.

Of the amount authorized to be appropriated pursuant to section 2405(a)(8)(C), $78,756,000 shall be available for credit to the Department of Defense Family Housing Improvement Fund established by section 2883(a)(1) of title 10, United States Code.

SEC. 2404. ENERGY CONSERVATION PROJECTS.

Using amounts appropriated pursuant to the authorization of appropriations in section 2405(a)(6), the Secretary of Defense may carry out energy conservation projects under section 2865 of title 10, United States Code, in the amount of $31,900,000.

SEC. 2405. AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES.

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1999, for military construction, land acquisition, and military family housing functions of the Department of Defense (other than the military departments) in the total amount of $1,842,582,000 as follows:

(1) For military construction projects inside the United States authorized by section 2401(a), $288,320,000.

(2) For military construction projects outside the United States authorized by section 2401(b), $211,685,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $18,618,000.

(4) For contingency construction projects of the Secretary of Defense under section 2804 of title 10, United States Code, $398,000.

(5) For architectural and engineering services and construction design activities under section 2807 of title 10, United States Code, $33,844,000.

(6) For energy conservation projects authorized by section 2404, $31,900,000.

(b) OUTSIDE THE UNITED STATES.—Using amounts appropriated pursuant to the authorization of appropriations in section 2405(a)(2), the Secretary of Defense may acquire real property and carry out military construction projects for the installations and locations outside the United States, and in the amounts, set forth in the following table:

Total: $211,685,000

(d) For military family housing functions:

(1) For improvement of military family housing and facilities, $50,000.

(2) For support of military housing (including functions described in section 2833 of title 10, United States Code), $41,440,000 of which not more than $35,639,000 may be obligated or expended for the leasing of military family housing units worldwide.

(4) For the construction of the Ammunition Demilitarization Facility, Blue Grass Army Depot, Kentucky, authorized by section 2401 of the Military Construction Authorization Act for Fiscal Year 1999 (division B of Public Law 101–182; Stat. 1338), $184,000,000 (the balance of the amount authorized under section 2401(a) for the construction of the Ammunition Demilitarization Facility, Blue Grass Army Depot, Kentucky).

(5) For the construction of the Ammunition Demilitarization Facility, Yongsan General Depot, South Korea, authorized by section 2401 of the Military Construction Authorization Act for Fiscal Year 1999, $61,000,000.

(7) For the construction of the Ammunition Demilitarization Facility, Charleston Naval Shipyard, South Carolina, authorized by section 2401 of the Military Construction Authorization Act for Fiscal Year 1999, $24,250,000.

(8) For the construction of the Ammunition Demilitarization Facility, Naval Air Station, Norfolk, Virginia, authorized by section 2401 of the Military Construction Authorization Act for Fiscal Year 1999, $23,150,000.

(9) For the construction of the Ammunition Demilitarization Facility, Mayport Naval Station, Florida, authorized by section 2401 of the Military Construction Authorization Act for Fiscal Year 1999, $24,670,000.

(10) For the construction of the Ammunition Demilitarization Facility, Blue Grass Army Depot, Kentucky, authorized by section 2401 of the Military Construction Authorization Act for Fiscal Year 1999, $184,000,000.

(14) For the construction of the Ammunition Demilitarization Facility, Aberdeen Proving Ground, Maryland, authorized by section 2401(a) of the Military Construction Authorization Act for Fiscal Year 1999, $66,600,000.

(b) LIMITATION OF TOTAL COST OF CONSTRUCTION PROJECTS.—Notwithstanding the cost variation authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost of all projects carried out under section 2401 of this Act may not exceed—

(1) the total amount authorized to be appropriated pursuant to paragraphs (1) and (2) of subsection (a);

(2) $115,000,000 (the balance of the amount authorized under section 2401(a) for the construction of the hospital replacement, Fort Wainwright, Alaska); and

(3) $184,000,000 (the balance of the amount authorized under section 2401(a) for the construction of the Ammunition Demilitarization Facility, Blue Grass Army Depot, Kentucky).
SEC. 2406. MODIFICATION OF AUTHORITY TO CARRY OUT CERTAIN FISCAL YEAR 1997 PROJECT.

The table in section 2401 of the Military Construction Authorization Act for Fiscal Year 1997 (division B of Public Law 104–201; 110 Stat. 2775), under the agency heading relating to Chemical Demilitarization Program, is amended in the item relating to Pueblo Chemical Activity, Colorado, by striking "$179,000,000" in the amount column and inserting "$203,500,000".

TITLE XXV—NORTH ATLANTIC TREATY ORGANIZATION SECURITY INVESTMENT PROGRAM

SEC. 2501. AUTHORIZED NATO CONSTRUCTION AND LAND ACQUISITION PROJECTS.

The Secretary of Defense may make contributions for the North Atlantic Treaty Organization Security Investment program as provided in section 2806 of title 10, United States Code, in an amount not to exceed the sum of the amount authorized to be appropriated for this purpose in section 2502 and the amount collected from the North Atlantic Treaty Organization as a result of construction previously financed by the United States.

SEC. 2502. AUTHORIZATION OF APPROPRIATIONS, NATO.

Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1999, for contributions by the Secretary of Defense under section 2806 of title 10, United States Code, for the share of the United States of the cost of projects for the North Atlantic Treaty Organization Security Investment program authorized by section 2501, in the amount of $166,340,000.

TITLE XXVI—GUARD AND RESERVE FORCES FACILITIES

SEC. 2601. AUTHORIZED GUARD AND RESERVE CONSTRUCTION AND LAND ACQUISITION PROJECTS.

There are authorized to be appropriated for fiscal years beginning after September 30, 1999, for military construction projects, land acquisition, family housing projects and facilities, and contributions to the North Atlantic Treaty Organization Security Investment program (and authorizations of appropriations therefor), for which appropriated funds have been obligated before the later of—

(1) October 1, 2002; or

(2) the date of the enactment of an Act authorizing funds for military construction for fiscal year 2003.

(b) EXCEPTION.—Subsection (a) shall not apply to authorizations for military construction projects, land acquisition, family housing projects and facilities, and contributions to the North Atlantic Treaty Organization Security Investment program (and authorizations of appropriations therefor), for which appropriated funds have been obligated before the later of—

(1) October 1, 2002; or

(2) the date of the enactment of an Act authorizing funds for military construction for fiscal year 2003 for military construction projects, land acquisition, family housing projects and facilities, or contributions to the North Atlantic Treaty Organization Security Investment program.

SEC. 2701. EXPIRATION OF AUTHORIZATIONS AND AMOUNTS REQUIRED TO BE SPECIFIED BY LAW.

(a) EXPIRATION OF AUTHORIZATIONS AFTER THREE YEARS.—Except as provided in subsection (b), all authorizations contained in titles XXI through XXVI for military construction projects, land acquisition, family housing projects and facilities, and contributions to the North Atlantic Treaty Organization Security Investment program (and authorizations of appropriations therefor) shall expire on the later of—

(1) October 1, 2002; or

(2) the date of the enactment of an Act authorizing funds for military construction for fiscal year 2003.

(b) EXCEPTION.—Subsection (a) shall not apply to authorizations for military construction projects, land acquisition, family housing projects and facilities, and contributions to the North Atlantic Treaty Organization Security Investment program (and authorizations of appropriations therefor), for which appropriated funds have been obligated before the later of—

(1) October 1, 2002; or

(2) the date of the enactment of an Act authorizing funds for fiscal year 2003 for military construction projects, land acquisition, family housing projects and facilities, or contributions to the North Atlantic Treaty Organization Security Investment program.

SEC. 2702. EXTENSION OF AUTHORIZATIONS OF CERTAIN FISCAL YEAR 1997 PROJECTS.

(a) EXTENSIONS.—Notwithstanding section 2701 of the Military Construction Authorization Act for Fiscal Year 1997 (division B of Public Law 104–201; 110 Stat. 2782), authorizations for the projects set forth in the tables in subsection (b), as provided in sections 2201, 2202, and 2601 of that Act and amended by section 2806 of this Act, shall remain in effect until October 1, 2000, or the date of the enactment of an Act authorizing funds for military construction for fiscal year 2001, whichever is later.

SEC. 2704. EFFECTIVE DATE.
Titles XXI, XXII, XXIII, XXIV, XXV, and XXVI of title 10 of the United States Code, shall take effect on the later of—
(1) October 1, 1999; or
(2) the date of the enactment of this Act.

TITLE XXVIII—GENERAL PROVISIONS
Subtitle A—Military Construction Program and Military Family Housing Program Changes

SEC. 2801. EXEMPTION FROM NOTICE AND WAIT REQUIREMENTS OF MILITARY CONSTRUCTION PROJECTS SUPPORTED BY BURDENSHARING FUNDS UNDER TAKEN FOR WAR OR NATIONAL EMERGENCY.

Section 2350(h) of title 10, United States Code, is amended—
(1) in subsection (e), by adding at the end the following new paragraph:

``(3)(A) A military construction project under subsection (d) may be carried out without regard to the requirement in paragraph (1) and the limitation in paragraph (2) if the project is necessary to support the armed forces in the country or region in which the project is carried out by reason of a declaration of war, or a declaration by the President of a national emergency pursuant to the National Emergencies Act (50 U.S.C. 1601 et seq.), that is in force at the time of the commencement of the project."

``(B) When a decision is made to carry out a military construction project under subparagraph (A), the Secretary of Defense shall submit to the congressional committees specified in subsection (g)—

``(i) a notice of the decision; and

``(ii) a statement of the current estimated cost of the project, including the cost of any real property transaction in connection with the project.'';

and

(2) in subsection (g), by striking ``subsection (e)(1)'' and inserting ``subsection (e)(1) and inserting subsection (e)''.

SEC. 2802. PROHIBITION ON CARRYING OUT MILITARY CONSTRUCTION PROJECTS FUNDED USING INCREMENTAL FUNDING.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the President should request in the budget for each fiscal year submitted to Congress under section 1105 of title 31, United States Code, sufficient amounts to fund fully each military construction and family housing construction project proposed to be authorized in such fiscal year; and

(2) Congress should authorize and appropriate each fiscal year amounts sufficient to fund fully each military construction and family housing construction project authorized in such fiscal year.

(b) PROHIBITION ON INCREMENTAL FUNDING OF MILITARY CONSTRUCTION PROJECTS.—Section 2802 of title 10, United States Code, is amended by adding at the end the following new subsection:

``(c) The Secretary of Defense and the Secretaries of the military departments may not obligate funds for a military construction project (including a military family housing project) otherwise authorized by law unless the total amount of appropriations allocated for obligation and expenditure for the project is sufficient, without additional funds, to provide for the construction of a usable facility meeting the purpose of the project.''

SEC. 2803. DEFENSE CHEMICAL DEMILITARIZATION CONSTRUCTION ACCOUNT.

(a) ESTABLISHMENT.—Subchapter I of chapter 169 of title 10, United States Code, is amended by adding at the end the following:

``§ 2814. Defense Chemical Demilitarization Construction Account

``(a) ESTABLISHMENT.—There is established on the books of the Treasury the Defense Chemical Demilitarization Construction Account in this section referred to as the 'Account'.

``(b) CREDITS TO ACCOUNT.—There shall be credited to the Account amounts authorized for and appropriated to the Account.

``(c) USE OF AMOUNTS IN ACCOUNT.—Amounts in the Account shall be available to the Secretary of Defense for carrying out military construction projects authorized by law in support of the chemical demilitarization actions of the Department of Defense under section 1412 of the Department of Defense Authorization Act, 1986 (50 U.S.C. 1521) and other provisions of law.

``(d) LIMITATION ON OBLIGATION AND EXPENDITURE.—(1) Subject to paragraph (2), amounts appropriated for a military construction project shall remain available for obligation and expenditure for the project in the fiscal year for which appropriated and the two succeeding fiscal years.

``(2) Amounts appropriated for a military construction project for a fiscal year shall remain available for the project until expended without regard to the limitation specified in paragraph (1) if—

``(A) any portion of such amounts are obligated for the project before the end of the fiscal years referred to in that paragraph; or

``(B) the availability of such amounts for the project are otherwise extended by law.''

(b) DEFENSE CHEMICAL DEMILITARIZATION CONSTRUCTION ACCOUNT.

SEC. 2804. LIMITATION ON AUTHORITY REGARDING ANNUAL SUPPORTING FACILITIES UNDER ALTERNATIVE AUTHORITY FOR ACQUISITION AND CONSTRUCTION OF MILITARY HOUSING.

Section 2891 of title 10, United States Code, is amended—

(1) by inserting ``(a) IN GENERAL.—'' before ``Any project''; and

(2) by adding at the end the following new subsection:

``(b) LIMITATION.—A project referred to in subsection (a) may not include the acquisition supporting facility if, as determined by the Secretary concerned, the facility is to be used for providing merchandise or services in direct competition with—

``(1) the Army and Air Force Exchange Service;

``(2) the Navy Exchange Service Command;

``(3) a Marine Corps exchange;

``(4) the Defense Commissary Agency; or

``(5) any nonappropriated fund activity of the Department of Defense for the morale, welfare, and recreation of members of the armed forces.''

SEC. 2805. AVAILABILITY OF FUNDS FOR PLANNING AND DESIGN IN CONNECTION WITH ACQUISITION OF RESERVE COMPONENT FACILITIES.

Section 12823(c)(1) of title 10, United States Code, is amended by inserting ``and design'' after ``planning''.

SEC. 2806. MODIFICATION OF LIMITATIONS ON RESERVE COMPONENT FACILITY PROJECTS FOR CERTAIN SAFETY PROJECTS.

(a) EXEMPTION FROM NOTICE AND WAIT REQUIREMENT.—Subsection (a)(2) of section 2805(c) of title 10, United States Code, is amended by adding at the end the following new subparagraph:

``(C) An unspecified minor military construction project (as defined in section 2805(a) of this title) that is intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening;''

(b) AUTHORITY.—Subsection (b) of that section is amended to read as follows:

``(b) Under such regulations as the Secretary of Defense may prescribe, the Secretary may spend from appropriations available for operation and maintenance amounts necessary to carry out any project authorized under section 12823(a) of this title costing not more than—

``(1) the amount specified in section 2805(c)(1) of this title; or

``(2) the amount specified in section 2805(c)(2) of this title, in the case of any other project.''

SEC. 2807. EXPANSION OF ENTITIES ELIGIBLE TO PARTICIPATE IN ALTERNATIVE AUTHORITY FOR ACQUISITION AND IMPROVEMENT OF MILITARY HOUSING.

(a) DEFINITION OF ELIGIBLE ENTITY.—Section 2871 of title 10, United States Code, is amended—

(1) by redesignating paragraphs (5) through (7) as paragraphs (6) through (8) respectively; and

(2) by inserting after paragraph (4) the following new paragraph (5):

``(5) The term 'eligible entity' means any individual, corporation, firm, partnership, company, State or local government, or housing authority of a State or local government.''

(b) GENERAL AUTHORITY.—Section 2872 of such title is amended by striking ``private persons'' and inserting ``eligible entities''.

SEC. 2808. LEGISLATIVE HISTORY AND FUNDING OF RANGE IMPROVEMENT AND MAINTENANCE FUNDS.

Section 2873 of such title is amended—

(1) in subsection (a)(1)—
CONGRESSIONAL RECORD—SENATE

June 7, 1999

11793

(A) by striking “persons in private sector” and inserting “eligible entities”; and
(B) by striking “such persons” and inserting “the eligible entity”; and
(2) in subsection (b)—
(A) by striking “any person in the private sector” and inserting “an eligible entity”; and
(B) by striking “the person” and inserting “the eligible entity”.

Investments—Section 2876 of this title is amended—
(1) in subsection (a), by striking “non-governmental” and inserting “eligible”; and
(4) in subsection (e), by striking “a non-governmental entity” and inserting “an eligible entity”;
(e) Rental Guarantees—Section 2876 of such title is amended by striking “private persons” and inserting “eligible entities”.
(f) Differential Lease Payments—Section 2877 of such title is amended by striking “private”.
(g) Conveyance or Lease of Existing Public Facilities—Section 2878(a) of such title is amended by striking “private persons” and inserting “eligible entities”.
(h) Clerical Amendments—(1) The heading of section 2878 of such title is amended to read as follows:
“§ 2878. Investments.”.
(2) The table of sections at the beginning of subchapter IV of chapter 159 of such title is amended by striking “September 30, 2000” and inserting “September 30, 2005”.

SEC. 2821. EXTENSION OF AUTHORITY FOR LEASES OF PROPERTY FOR SPECIAL OPERATIONS ACTIVITIES.

Section 2860(d) of title 10, United States Code, is amended by striking “September 30, 2000” and inserting “September 30, 2005”.

SEC. 2812. ENHANCEMENT OF AUTHORITY RELATING TO UTILITY PRIVATIZATION.

(a) Extended Contracts for Utility Services.—Section 2868 of title 10, United States Code, is amended—
(1) by redesignating subsections (f), (g), and (h) as subsections (b), (i), and (j), respectively; and
(2) by inserting after subsection (e) the following new subsection (f):
“(f) Extended Contracts for Utility Services.—(1) The Secretary concerned may, in connection with a conveyance of a utility system under this section, enter into a contract for the provision of utility services.
“(2) Notwithstanding the proviso in section 201(a)(3) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 481(a)(3)), a contract under this subsection may be up to 50 years.”.
(b) Availability of Military Construction Funds to Facilitate Conveyances.—That section is further amended by inserting after subsection (f), as added by subsection (a) of this section, the following new subsection (g):
“(g) Availability of Military Construction Funds to Facilitate Conveyances.—(1) Funds appropriated for a military construction project authorized by law for the construction, repair, or replacement of a utility system to be conveyed under this section may, instead of being used for the project, be used for a contribution by the Secretary concerned to the utility company or entity to which the utility system is being conveyed for the costs of the utility company or entity with respect to the construction, repair, or replacement of the utility system.
“(2) The Secretary concerned shall take into account any contribution under this subsection with respect to a utility system for purposes of the economic analysis required for the conveyance of the utility system under subsection (e)(1).”.

Subtitle C—Defense Base Closure and Realignment

SEC. 2821. CONVEYANCE OR LEASE OF PROPERTY AT INSTALLATION CLOSED OR REALIGNMENT UNDER THE BASE CLOSURE LAW: WITHOUT CONSIDERATION FOR ECONOMIC REDEVELOPMENT PURPOSES.

(1) in subparagraph (A)—
“(A) by inserting “or realigned” after “closed”;
and
(2) by striking subparagraph (B) and inserting the following new subparagraph (B):
“(B)(i) Subject to clauses (ii) and (iii), the transfer of property under this paragraph shall be for consideration at the fair market value of the property.
“(ii) The transfer of property under this paragraph shall be without consideration with respect to the installation—
“(I) provides in the agreement for the transfer of such property that the proceeds of the sale or lease of such property, or portion of such property, received by the redevelopment authority during the period after the date of the transfer of such property agreed upon by the redevelopment authority and the Secretary (but not less than 10 years after that date) shall be used for economic redevelopment of the installation or related to the installation; and
“(II) accepts control of such property under the agreement within a reasonable time (as determined by the Secretary) after the completion of the property disposal record of decision or the entry of a finding of no significant environmental impact with respect to the transfer under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).
“(iii) For purposes of clause (ii), the following activities shall be treated as economic redevelopment of the installation or related to the installation:
“(I) Road construction or improvement.
“(II) Construction or improvement of transportation management facilities.
“(III) Construction or improvement of storm and sanitary sewers.
“(IV) Construction or improvement of facilities for correctional or detention services.
“(V) Construction or improvement of other public facilities.
“(VI) Construction or improvement of utility facilities.
“(VII) Rehabilitation or improvement of buildings, including preservation of historic property.
“(VIII) Construction, improvement, or acquisition of pollution prevention equipment or facilities.
“(IX) Demolition of facilities.
“(X) Property management activities, including removal of hazardous material, landscaping, grading, and other site or public improvements.
“(XI) Planning and marketing the development and reuse of the installation.
“(v) An agreement for the transfer of property of an installation under clause (iii)(I) shall permit the Secretary to recoup from the redevelopment authority concerned such portion as the Secretary determines appropriate of the amount of any proceeds of the sale or lease of the property that the redevelopment authority does not use for economic redevelopment of the installation or related to the installation for the period specified in the agreement.
(1) in subparagraph (A)—
“(A) by inserting “or realigned” after “closed”;
and
(2) by inserting “for purposes of creating jobs at the installation” before the period at the end; and
“(B)(i) Subject to clauses (ii) and (iii), the transfer of property under this paragraph shall be for consideration at the fair market value of the property.
“(ii) The transfer of property under this paragraph shall be without consideration with respect to the installation—
“(I) provides in the agreement for the transfer of such property that the proceeds of the sale or lease of such property, or portion of such property, received by the redevelopment authority during the period after the date of the transfer of such property agreed upon by the redevelopment authority and the Secretary (but not less than 10 years after such date) shall be used for economic redevelopment of the installation or related to the installation; and
“(II) accepts control of such property under the agreement within a reasonable time (as determined by the Secretary) after the completion of the property disposal record of decision or the entry of a finding of no significant environmental impact with respect to the transfer under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).
“(iii) For purposes of clause (ii), the following activities shall be treated as economic redevelopment of the installation or related to the installation:
“(I) Road construction or improvement.
“(II) Construction or improvement of transportation management facilities.
“(III) Construction or improvement of storm and sanitary sewers.
“(IV) Construction or improvement of facilities for correctional or detention services.
“(V) Construction or improvement of other public facilities.
(V) Construction or improvement of other facilities.

(VI) Construction or improvement of utilities.

(VII) Rehabilitation or improvement of buildings, including preservation of historic properties.

(VIII) Construction, improvement, or acquisition of pollution prevention equipment or facilities.

(X) Demolition of facilities.

(XI) Planning and marketing the development and reuse of the installation.

(V) An agreement for the transfer of property of an installation under clause (ii)(I) shall permit the Secretary to recoup from the redevelopment authority concerned such portion as the Secretary determines appropriate of that portion of any proceeds of the sale or lease of the property that the redevelopment authority does not use to support economic development of the installation or related to the installation for the period specified in the agreement.

(c) APPLICABILITY TO CERTAIN PRIOR ACCORDS. Subject to subparagraph (B), the Secretary of Defense may modify an agreement for the transfer of property under section 2905(b)(4) of the Defense Base Closure and Realignment Act of 1990, or under section 2904(b)(4) of the Defense Authorization Amendments and Base Closure and Realignment Act of 1990, or amended—

(1) by striking ''(i)'' and ''(ii)'' from clause (ii) of that subsection, all right, title, and interest of the United States in and to a parcel of real property, including improvements thereon, consisting of approximately 4 acres at Red Butte Army Ammunition Plant, for the purpose of permitting the City to construct a city hall complex on the parcel.

CONGRESSIONAL RECORD—SENATE

SEC. 2832. LAND CONVEYANCES, TWIN CITIES ARMY AMMUNITION PLANT, MINNEAPOLIS, MINNESOTA.

(a) CONVEYANCE TO CITY AUTHORIZED. The Secretary of the Army may convey to the City of Arden Hills, Minnesota (in this section referred to as the "City"), all right, title, and interest of the United States in and to a parcel of real property, including improvements thereon, consisting of approximately 35 acres at the Twin Cities Army Ammunition Plant, for the purpose of permitting the City to construct a maintenance facility on the parcel.

(b) CONVEYANCE TO COUNTY AUTHORIZED. The Secretary of the Army may convey to Ramsey County, Minnesota (in this section referred to as the "County"), all right, title, and interest of the United States in and to a parcel of real property, including improvements thereon, consisting of approximately 39 acres at the Twin Cities Army Ammunition Plant, for the purpose of permitting the County to construct a maintenance facility on the parcel.

(c) CONVEYANCE AUTHORITY. As a consideration for the conveyances under this section, the City shall make the city hall complex available for use by the Minnesota National Guard for public meetings, and the County shall make the maintenance facility available for use by the Minnesota National Guard, as detailed in agreements entered into between the City, County, and the Commanding General of the Minnesota National Guard. Use of the city hall complex and maintenance facility by the Minnesota National Guard shall be without cost to the Minnesota National Guard.

(d) DESCRIPTION OF PROPERTY. The exact acreage and legal description of the real property to be conveyed, or such additional terms and conditions in connection with the conveyance as the Secretary considers appropriate to protect the interests of the United States.

SEC. 2833. REPAIR AND CONVEYANCE OF RED BUTTE DAM AND RESERVOIR, SALT LAKE CITY, UTAH.

(a) CONVEYANCE REQUIRED. The Secretary of the Army may convey, without consideration, to the City of Arden Hills, Minnesota, any other improvements thereon, comprising the parcel of real property, including the dam, spillway, and any other improvements thereon, consisting of approximately 4 acres at the Red Butte Dam and Reservoir, for the purpose of permitting the City to construct a city hall complex on the parcel.

(b) CONVEYANCE TO CITY AUTHORIZED. The Secretary of the Army may convey, without consideration, to the City of Arden Hills, Minnesota (in this section referred to as the "City"), all right, title, and interest of the United States in and to a parcel of real property, including improvements thereon, consisting of approximately 4 acres at Red Butte Dam and Reservoir, for the purpose of permitting the City to construct a city hall complex on the parcel.

(c) CONVEYANCE TO COUNTY AUTHORIZED. The Secretary of the Army may convey to Ramsey County, Minnesota (in this section referred to as the "County"), all right, title, and interest of the United States in and to a parcel of real property, including improvements thereon, consisting of approximately 39 acres at the Twin Cities Army Ammunition Plant, for the purpose of permitting the County to construct a maintenance facility on the parcel.

(d) DESCRIPTION OF PROPERTY. The exact acreage and legal description of the real property to be conveyed, or such additional terms and conditions in connection with the conveyance as the Secretary considers appropriate to protect the interests of the United States.

SEC. 2834. CONVEYANCE AUTHORIZED. As a consideration for the conveyances under this section, the City shall make the city hall complex available for use by the Minnesota National Guard for public meetings, and the County shall make the maintenance facility available for use by the Minnesota National Guard, as detailed in agreements entered into between the City, County, and the Commanding General of the Minnesota National Guard. Use of the city hall complex and maintenance facility by the Minnesota National Guard shall be without cost to the Minnesota National Guard.

SEC. 2835. DESCRIPTION OF PROPERTY. The exact acreage and legal description of the real property to be conveyed, or such additional terms and conditions in connection with the conveyance as the Secretary considers appropriate to protect the interests of the United States.
to meet the standards applicable to the dam and reservoir under the laws of the State of Utah.

(c) Use of Funds.—The District shall use funds made available to the District under subsection (a) for purposes of improving Red Butte Dam and Reservoir to meet the standards referred to in that subsection.

(d) Responsibility for Maintenance and Operation.—Upon the conveyance of Red Butte Dam and Reservoir under subsection (a), the District shall assume all responsibility for the operation and maintenance of Red Butte Dam and Reservoir for fish, wildlife, and flood control purposes in accordance with the repayment contract or other applicable agreement between the District and the Bureau of Reclamation with respect to Red Butte Dam and Reservoir.

(2) Paragraph (1) applies to a conveyance described in subsection (a) if the Secretary makes the conveyance authorized by subsection (a) without consideration.

(3) The Secretary shall deposit in the General Fund of the Treasury an amount equal to the fair market value (as determined by a survey satisfactory to the Secretary) of real property under the terms and conditions applicable to the conveyance authorized by subsection (a) as the Secretary considers appropriate to protect the interests of the United States.

PART II—NAVY CONVEYANCES

SEC. 2841. CLARIFICATION OF LAND EXCHANGE, NAVY RESERVE READINESS CENTER, PORTLAND, MAINE.

(a) Clarification on Conveyee.—Subsection (a)(1) of section 2652 of the Military Construction Appropriation Act for Fiscal Year 1999 (division B of Public Law 105-261; 112 Stat. 2220) is amended by striking “Gulf of Maine Aquarium Development Corporation, Portland, Maine, a non-profit educational corporation” and inserting “Gulf of Maine Aquarium Development Corporation, Portland, Maine, a non-profit educational corporation (in this section referred to as the ‘Aquarium’)”.

(b) Conforming Amendments.—That section is further amended by striking “the Corporation it appears and inserting “the Aquarium”.

SEC. 2842. LAND CONVEYANCE, NEWPORT, RHODE ISLAND.

(a) Conveyance Authorized.—The Secretary of the Navy may convey, without consideration, to the City of Newport, Rhode Island (in this section referred to as the “City”), all right, title, and interest of the United States in and to a parcel of real property (together with any improvements thereon) consisting of approximately 15 acres and known familiarly as the Ranger Road site. The real property is bounded by Naval Station Newport, Rhode Island, to the north and east, and by Admiral Kalbfus Road, the Jai Alai fronton, the Newport City Yard, and the ramp to Newport Bridge to the south.

(b) Condition.—The conveyance authorized by subsection (a) shall be subject to the condition that the City use the conveyed property for one or more of the following purposes:

(1) A satellite campus of the Community College of Rhode Island.

(2) A center for child day care and early childhood education.

(3) A center for offices of the Government of the State of Rhode Island.

(c) Reversionary Interest.—If during the 5-year period beginning on the date the Secretary makes the conveyance authorized by subsection (a) the Secretary determines that the conveyed property is not being used for a purpose specified in subsection (a), all right, title, and interest in and to the property, including any improvements thereon, shall revert to the United States, and the United States shall have the right of immediate entry onto the property.

(d) Inspection on Certain Subsequent Conveyances.—(1) Subject to paragraph (2), if at any time after the Secretary makes the conveyance authorized by subsection (a) the Secretary determines that the property conveyed under that subsection to a private entity, the City shall pay to the United States an amount equal to the fair market value (as determined by a survey at the time of the conveyance) of the portion conveyed at the time of its conveyance under this subsection.

(2) Paragraph (1) applies to a conveyance described in subsection (a) if the Secretary makes the conveyance authorized by subsection (a) without consideration.

(3) The Secretary shall deposit in the General Fund of the Treasury an amount equal to the fair market value (as determined by a survey at the time of the conveyance) of the property conveyed under subsection (a) as the Secretary considers appropriate to protect the interests of the United States.

PART III—AIR FORCE CONVEYANCES

SEC. 2851. LAND CONVEYANCE, MCCLELLAN NUCLEAR RADIATION CENTER, CALIFORNIA.

(a) Conveyance Authorized.—Notwithstanding any other provision of law, the Secretary of the Air Force may convey, without consideration, to the Regents of the University of California, acting on behalf of the University of California, Davis (in this section referred to as the ‘Regents’), all right, title, and interest of the United States in and to the parcel of real property, including improvements thereon, consisting of the McClellan Nuclear Radiation Center, California.

(b) Inspection of Property.—The Secretary shall, at an appropriate time before
the conveyance authorized by subsection (a), permit or otherwise authorized to be conveyed for purposes of such investigation of the McClellan Nuclear Radiation Center and the atomic reactor located at the Center; the Secretary of the Air Force considers appropriate to protect the interests of the United States in and to the following:

(i) Any and all costs associated with the decontamination and decommissioning of the atomic reactor at the McClellan Nuclear Radiation Center under requirements that are imposed by the Nuclear Regulatory Commission or any other appropriate Federal or State regulatory agency.

(ii) Any and all injury, damage, or other liability arising from the operation of the atomic reactor after its conveyance under this section.

(B) As consideration for the agreement under subparagraph (A), the Secretary may pay the Regents an amount determined appropriate by the Secretary. The amount may not exceed $17,593,000.

(2) Notwithstanding the agreement under paragraph (1), the Secretary may, as part of the consideration provided by subparagraph (A), enter into an agreement with the Regents under which agreement the United States shall indemnify and hold harmless the University or the Regents, to the extent of any survey or other services performed at the property or pipeline, as the case may be, in connection with the operation of the atomic reactor at the McClellan Nuclear Radiation Center after the conveyance under this section that arises from a defect in the atomic reactor that could not have been discovered in the course of the inspection carried out under subparagraph (A).

(d) FEDERAL SCREENING.—(1) If any of the property authorized to be conveyed by this section is under the jurisdiction of the Administrator, or the enactment of this Act, the Administrator shall conduct with respect to such property the screening for further Federal use otherwise required by subsection (a) of section 2696 of title 10, United States Code.

(2) Subsections (b) through (d) of such section 2696 shall apply to the screening conducted under subsection (a) of such section 2696. For purposes of such subsection (b), the date of the enactment of the provision of law authorizing the conveyance of the property authorized to be conveyed by this section shall be the date of the enactment of this Act.

(e) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the real property to be conveyed under subsection (a), the easement to be conveyed under subsection (b)(2), and the pipeline to be conveyed under subsection (b)(1) shall be determined by surveys satisfactory to the Secretary. The cost of the survey shall be borne by the Secretary.

(f) ADDITIONAL TERMS AND CONDITIONS.—

(1) The Secretary may require such additional terms and conditions in connection with the conveyance under subsection (a) as the Secretary considers appropriate to protect the interests of the United States.

Subtitle E—Other Matters

SECTION 2861. ACQUISITION OF STATE-HELD LANDS IN EAST RANGE OF FORT HUACHUCA, ARIZONA

(a) ACQUISITION AUTHORIZED.—The Secretary of the Air Force may acquire, without consideration, to the Pease Development Authority, New Hampshire (in this section referred to as the "Authority"), all right, title, and interest of the United States in and to parcels of real property, together with any improvements thereon, consisting of approximately 10.26 acres and located in Newington, New Hampshire, the site of the Newington Defense Fuel Supply Point. The parcels have been determined to be excess to the needs of the Air Force.

(b) RELATED PIPELINE AND EASEMENT.—As part of the conveyance authorized by subsection (a), the Secretary may convey to the Authority all right, title, and interest of the United States in and to the following:

(i) The pipeline approximately 1.25 miles in length that is to be authorized to be conveyed under subsection (a) and former Pease Air Force Base, New Hampshire, and any facilities and equipment related to the pipeline.

(ii) An easement consisting of approximately 4.612 acres for purposes of activities relating to the pipeline.

(c) ALTERNATIVE CONVEYANCE AUTHORITY.—If at the time of the conveyance authorized by this section the Secretary has transferred jurisdiction over any of the property to be conveyed to the Administrator of General Services, the Administrator shall make the conveyance of such property under this section.

(d) FEDERAL SCREENING.—(1) If any of the property authorized to be conveyed by this section is under the jurisdiction of the Administrator, or the enactment of this Act, the Administrator shall conduct with respect to such property the screening for further Federal use otherwise required by subsection (a) of section 2696 of title 10, United States Code.

(2) Subsections (b) through (d) of such section 2696 shall apply to the screening conducted under subsection (a) of such section 2696. For purposes of such subsection (b), the date of the enactment of the provision of law authorizing the conveyance of the property authorized to be conveyed by this section shall be the date of the enactment of this Act.

(e) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the real property to be conveyed under subsection (a), the easement to be conveyed under subsection (b)(2), and the pipeline to be conveyed under subsection (b)(1) shall be determined by surveys satisfactory to the Secretary. The cost of the survey shall be borne by the Secretary.

(f) ADDITIONAL TERMS AND CONDITIONS.—

(1) The Secretary may require such additional terms and conditions in connection with the conveyance under subsection (a) as the Secretary considers appropriate to protect the interests of the United States.

(2) The Secretary may also acquire by eminent domain, with the consent of the State of Arizona and the Bureau of Land Management, in accordance with the Uniform Appraisal Act (42 U.S.C. 4401 et seq.), any real property in the Fort Huachuca East Range, in accordance with the Uniform Appraisal Act (42 U.S.C. 4401 et seq.), any real property in the Fort Huachuca East Range, in connection with the conveyance and acquisition of the State of Arizona's interest in the land described in subsection (a) of section 2696 of title 10, United States Code.

(g) USE OF EMINENT DOMAIN.—The Secretary may acquire the State lands and mineral rights under subsection (a) pursuant to such laws and regulations governing eminent domain.

(h) DETERMINATION OF FAIR MARKET VALUE.—Notwithstanding any other provision of law, the value of the lands and interests in lands acquired or conveyed by the United States under this section shall be the value of the lands and mineral rights acquired or conveyed by the United States under subsection (a) and not exceed $17,593,000.

(i) In making the conveyance authorized by this section, the Secretary may determine the fair market value of the lands and mineral rights acquired or conveyed by the United States under this section and the fair market value of the property described in subsection (a).

(j) CONDITIONS ON CONVEYANCE TO STATE.—To the extent that the lands and mineral rights described in subsection (a) are conveyed to the State of Arizona, the State of Arizona shall provide to the United States the same consideration as the Secretary considers appropriate to protect the interests of the United States.

(k) DEFINITIONS.—In this section, the terms "State" and "State of Arizona" mean the State of Arizona.

(l) MISCELLANEOUS.—The provisions of subsection (a), (b), (c), and (d) of section 2696 of title 10, United States Code, shall apply to the conveyance and screening conducted under this section.
under subsection (a) and the conveyance of public lands under subsection (b) shall be borne by the Secretary of the Army.

SEC. 2862. DEVELOPMENT OF FORD ISLAND, HAWAII.

(a) In General.—(1) Subject to paragraph (2), the Secretary of the Navy may exercise any authority or combination of authorities in this section for the purpose of developing or facilitating the development of Ford Island, Hawaii, to the extent that the Secretary determines the development is compatible with the mission of the Navy.

(2) The Secretary may not exercise any authority under this section until—

(A) the Secretary submits to the appropriate committees of Congress a master plan for the development of Ford Island; and

(B) a period of 30 calendar days has elapsed following the date on which the notification is received by those committees.

(b) CONVEYANCE AUTHORITY.—(1) The Secretary of the Navy may convey to any public or private person or entity all right, title, and interest of the United States in and to real property or personal property under the jurisdiction of the Secretary in the State of Hawaii that the Secretary determines—

(A) is not needed for current operations of the Navy and all of the other Armed Forces; and

(B) will promote the purpose of this section.

(2) A conveyance under this subsection may include such terms and conditions as the Secretary considers appropriate to protect the interests of the United States.

(c) LEASE AUTHORITY.—(1) The Secretary of the Navy may lease to any public or private person or entity any real property or personal property covered by the lease if the property is leased for the purposes of Paragraph (2) and the Secretary determines—

(A) is not needed for current operations of the Navy and all of the other Armed Forces; and

(B) will promote the purpose of this section.

(2) The term of a lease under paragraph (1) may not exceed 10 years, unless the Secretary considers appropriate to promote the purpose of this section.

(3) A lease under this subsection may provide that, upon termination of the lease, the lessee shall have the right of first refusal to acquire the real property covered by the lease if the property is then conveyed under subsection (b).

(4)(A) The Secretary may provide property support services to or for real property leased under this subsection.

(B) To the extent provided in appropriation Acts, any payment made to the Secretary for services provided under this paragraph shall be credited to the appropriation account, or fund from which the cost of providing such services was otherwise paid.

(d) ACQUISITION OF LEASEHOLD INTEREST BY SECRETARY.—(1) The Secretary of the Navy may acquire a leasehold interest in any facility constructed under subsection (f) as consideration for a transaction authorized by this section upon such terms as the Secretary considers appropriate to promote the purpose of this section.

(2) The term of a lease under paragraph (1) may not exceed 10 years, unless the Secretary considers appropriate to promote the purpose of this section.

(3) A lease under this subsection may provide that, upon termination of the lease term, the United States shall have the right of first refusal to acquire the facility covered by the lease.

(e) REQUIREMENT FOR COMPETITION.—The Secretary of the Navy shall use competitive procedures for purposes of selecting the recipient of real or personal property under subsection (b) and the lessee of real or personal property under subsection (c).

(f) CONSIDERATION.—(1) As consideration for the conveyance of real or personal property under subsection (b), or for the lease of real or personal property under subsection (c), the Secretary of the Navy shall accept cash, real property, personal property, or services, or any combination thereof, in an aggregate amount not less than the fair market value of the real or personal property conveyed or leased.

(2) Subject to subsection (1), the services accepted by the Secretary under paragraph (1) may include the following:

(A) The construction or improvement of facilities at Ford Island.

(B) The restoration or rehabilitation of real property at Ford Island.

(C) The provision of property support services for property or facilities at Ford Island.

(g) NOTIFICATION.—The Secretary of the Navy may not convey or lease any property or facilities at Ford Island, or for the provision of property support services for property or facilities at Ford Island, or for the development of Ford Island; and

(h) FUNDING.—The Secretary of the Navy may not exercise any authority under subsection (a) and the conveyance of real or personal property under subsection (b), or for the lease of real or personal property under subsection (c), until—

(A) the Secretary submits to the appropriate committees of Congress a notification of the transaction, including—

(A) a detailed description of the transaction; and

(B) a justification for the transaction specifying the manner in which the transaction will meet the purpose of this section; and

(B) a period of 30 calendar days has elapsed following the date on which the notification is received by those committees.

(i) FORD ISLAND IMPROVEMENT ACCOUNT.—(1) There is established on the books of the Treasury an account to be known as the "Ford Island Improvement Account".

(2) There shall be deposited into the account the following amounts:

(A) Amounts authorized and appropriated to the account.

(B) Except as provided in subsection (c)(4)(B), the amount of any cash payment received by the Secretary for a transaction under this section.

(j) USE OF FUND.—(1) Subject to paragraph (2), to the extent provided in advance appropriation Acts, funds in the Ford Island Improvement Account may be used as follows:

(A) To carry out or facilitate the carrying out of a transaction authorized by this section.

(B) To carry out improvements of property or facilities at Ford Island.

(k) SCORING.—Nothing in this section shall be construed to waive the applicability to any lease entered into under this section of the budget scorekeeping guidelines used to measure compliance with the Balanced Budget Emergency Deficit Control Act of 1985.

(l) COMFORMING AMENDMENTS.—Section 2863(c) of title 10, United States Code, is amended—

(1) in paragraph (1), by adding at the end the following new subparagraph:

"(E) Any amounts that the Secretary of the Navy transfers to that Fund pursuant to section 2862(i)(3)(A)(i) of the Military Construction Authorization Act for Fiscal Year 2000, subject to the restrictions on the use of the transferred amounts specified in that section."; and

(2) in paragraph (2), by adding at the end the following new subparagraph:

"(E) Any amounts that the Secretary of the Navy transfers to that Fund pursuant to section 2862(i)(3)(A)(ii) of the Military Construction Authorization Act for Fiscal Year 2000, subject to the restrictions on the use of the transferred amounts specified in that section.".

(m) DEFINITIONS.—In this section:

(1) The term "appropriate committees of Congress" has the meaning given that term in section 201(4) of title 10, United States Code.

(2) The term "property support service" means the following:

(A) Any utility service or other service linked to section 2686(a) of title 10, United States Code.

(B) Any other service determined by the Secretary to be a service that supports the operation and maintenance of real property, personal property, or facilities.

SEC. 2863. ENHANCEMENT OF PENTAGON RENOVATION ACTIVITIES.

The Secretary of Defense in conjunction with the Pentagon Renovation Program is authorized to design and construct secure secretarial office and support facilities and to acquire or lease property or facilities at Washington, D.C., or any other location, that the Secretary determines is necessary to carry out the purposes of the Act.

SEC. 2864. ONE-YEAR DELAY IN DEMOLITION OF RADIO TRANSMITTING FACILITY TOWERS AT NAVAL STATION ANNAPOLIS, MARYLAND, TO FACILITATE TRANSFER OF TOWERS.

(a) ONE-YEAR DELAY.—The Secretary of the Navy may not obligate or expend any funds for the demolition of the naval radio transmitting towers described in subsection (b)
during the one-year period beginning on the
date of the enactment of this Act.
(b) COVERED TOWERS.—The naval radio
transmitting towers described in this sub-
section are the three southeastern most
naval radio transmitting towers located at
Naval Station, Annapolis, Maryland that are
scheduled for demolition as of the date of en-
actment of this Act.
(c) TRANSFER OF TOWERS.—The Secretary
may transfer to the State of Maryland, or the
County of Anne Arundel, Maryland, all
right, title, and interest (including mainte-
nance responsibility under applicable
laws) in and to the towers described in subsection (b)
if the State of Maryland or the County of
Anne Arundel, Maryland, as the case may be, are
agreed to accept such right, title, and interest (including accrued maintenance responsi-
bility) during the one-year period referred to
in subsection (a).

SEC. 2903. ARMY RESERVE RELOCATION FROM
FORT DOUGLAS, UTAH.
Section 2603 of the National Defense Au-
thorization Act for fiscal year 1998 (P.L. 105–
88) is amended as follows:
(1) Public Law 99–606 authorized public land
withdrawals for several military instal-
lations, including the Barry M. Goldwater
Air Force Range in Arizona, the McGregor
Range in New Mexico, and Fort Wainwright
and Fort Greely in Alaska, collectively com-
prising over 4 million acres of public land;
(2) these military ranges provide important
military training opportunities and serve a
critical role in the national security of the United States and their use for these pur-
poses should be continued;
(3) in addition to their use for military
purposes, these ranges contain significant natural and cultural resources, and provide
important wildlife habitat;
(4) the future use of these ranges is impor-
tant not only for the affected military
branches, but also for local residents and
other public land users;
(5) the public land withdrawals authorized in
1986 under Public Law 99–606 were for a pe-
riod of 15 years, and expire in November 2001; and
(6) it is important that the renewal of these
public land withdrawals be completed in
a timely manner, consistent with the pro-
cess established in Public Law 99–606 and other applicable laws, including the comple-
tion of appropriate environmental impact
studies and opportunities for public com-
ment and review.

SEC. 2902. SENSE OF THE SENATE REGARDING
RENEWAL OF MILITARY
LAND WITHDRAWALS.
It is the sense of the Senate that—
(1) it is vital to the national interest that
the withdrawal of the lands withdrawn by
section 2(c) of the Military Lands With-
drawal Act of 1986 (Public Law 99–606), relat-
ing to Barry M. Goldwater Air Force Range and the Cabeza Prieta National Wildlife Ref-
uge, which would otherwise expire in 2001, be
renewed in 1999;
(2) the renewed withdrawal of such lands is
required if the United States is to provide
the Armed Forces with experience neces-
sary to defend the national interests;
(3) the Armed Forces currently carry out
environmental stewardship of such lands in
a comprehensively and focused manner; and
(4) a continuation in high-quality manage-
ment of United States natural and cultural
resources is required if the United States is
to preserve its national heritage.

DEPARTMENT OF ENERGY NA-
TIONAL SECURITY ACT FOR CAL-
YEAR 2000
On May 27, 1999, the bill, S. 1062, was
passed by the Senate. The text of the bill is as follows:

BE IT ENACTED BY THE SENATE AND HOUSE
OF REPRESENTATIVES OF THE UNITED STATES OF AMERICA
IN CONGRESS ASSEMBLED,

SECTION 1. SHORT TITLE.
This Act may be cited as the “Department of Energy National Security Act for Fiscal Year 2000”.

SECOND TITLE CONTENTS.
The table of contents for this Act is as fol-
 lows:
Sec. 1. Short title.
Sec. 2. Table of contents.
Sec. 3. Conferences with defense committees.

TITLE XXXI—DEPARTMENT OF ENERGY
NATIONAL SECURITY PROGRAMS
Subtitle A—National Security Programs
Sec. 3101. Weapons activities.
Sec. 3102. Defense environmental restora-
tion and waste management.
Sec. 3103. Other defense activities.
Sec. 3104. Defense nuclear waste disposal.
Sec. 3105. Defense environmental manage-
ment privatization.

Subtitle B—Recurring General Provisions
Sec. 3211. Reprogramming.
Sec. 3212. Limits on general plant projects.
Sec. 3213. Limits on construction projects.
Sec. 3214. Fund transfer authority.
Sec. 3215. Authority for conceptual and con-
struction design.
Sec. 3216. Authority for emergency plan-
ing, design, and construction activities.
Sec. 3217. Funds available for all national
security programs of the Depart-
ment of Energy.
Sec. 3218. Availability of funds.
Sec. 3219. Transfers to Defense environ-
mental management funds.

Subtitle C—Program Authorizations,
Restrictions, and Limitations
Sec. 3311. Prohibition on use of funds for
cleanup activities under Formerly
Utilized Site Remedial Action Program.
Sec. 3312. Continuation of processing,
treatment, and disposition of legacy
nuclear materials.
Sec. 3313. Nuclear weapons stockpile life ex-
tension program.
Sec. 3314. Tritium production.
Sec. 3315. Independent cost estimate of Ac-
celerator Production of Trit-
um.
Sec. 3316. Nonproliferation initiatives and
activities.

Subtitle D—Safeguards, Security, and Coun-
terintelligence at Department of Energy
Facilities
Sec. 3311. Short title.
Sec. 3312. Commission on Safeguards, Secu-
ritv, and Counterintelligence at Department of Energy Facili-
ties.
Sec. 3313. Background investigations of cer-
tain personnel at Department of Energy facilities.
Sec. 3314. Plan for polygraph examinations of
personnel at Department of Energy facilities.
Sec. 3315. Civil monetary penalties for viola-
tions of Department of Energy regulations relating to the safe-
guar ding of security of Restricted Data.
Sec. 3316. Moratorium on laboratory-to-lab-
oratory and foreign visitors and assign-
ments programs.
Sec. 3317. Increased penalties for misuse of
Restricted Data.
Sec. 3318. Organization of Department of En-
ergy counterintelligence and intelligence programs and ac-
tivities.
Sec. 3319. Counterintelligence activities at certain Department of Energy facilities.
Sec. 3320. Whistleblower protection.
Sec. 3321. Investigation and remediation of
alleged reprisals for disclosure of
certain information to Congress.
Sec. 3322. Notification to Congress of certain
security counterintelligence failures at Department of Energy facilities.
Sec. 3323. Conduct of security clearances.
Sec. 3324. Protection of classified informa-
tion during laboratory-to-lab-
oratory exchanges.
Sec. 3325. Definition.

Subtitle E—Other Matters
Sec. 3371. Maintenance of nuclear weapons
expertise in the Department of Defense and Department of En-
ergy.
Sec. 3372. Modification of budget and plan-
ing requirements for Department of Energy national secu-
ritv activities.
Sec. 3373. Extension of authority of Depart-
ment of Energy to pay vol-
untary separation incentive payments.
Sec. 3374. Integrated fissile materials man-
agement plan.
Sec. 3375. Use of amounts for award fees for
Department of Energy closure projects for additional cleanup projects at closure project sites.
Sec. 3376. Pilot program for project manage-
ment oversight regarding De-
partment of Energy construc-
tion projects.
Sec. 3377. Extension of review of Waste Isola-
tion Pilot Plant, New Mexico.
CONGRESSIONAL RECORD—SENATE

11799

Project 99–D–106, model validation and system certification test center, Sandia National Laboratories, Livermore, California, $2,400,000.

Project 99–D–107, central health physics calibration facility, Los Alamos National Laboratory, Los Alamos, New Mexico, $1,000,000.

Project 99–D–108, renovating existing roadways, Nevada Test Site, Nevada, $7,055,000.

Project 97–D–102, dual-axis radiographic hydrotest facility, Los Alamos National Laboratory, Los Alamos, New Mexico, $6,500,000.

Project 99–D–109, various locations, $21,800,000.

Project 99–D–110, various locations, $11,700,000.

(B) Stockpile Management.—Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 for stockpile management in carrying out weapon activities necessary for national security programs in the amount of $2,093,300,000, to be allocated as follows:

(A) For operation and maintenance, $1,880,621,000.

(B) For plant projects, including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, and land acquisition related thereto, $158,679,000, to be allocated as follows:

Project 99–D–122, rapid reactivation, various locations, $11,700,000.

Project 99–D–123, stockpile management restructuring initiative, nuclear material safeguards and stockpile upgrades project, Los Alamos National Laboratory, Los Alamos, New Mexico, $1,300,000.

Project 98–D–700, road rehabilitation, Idaho National Engineering and Environmental Laboratory, Idaho Falls, Idaho, $2,590,000.

Project 97–D–401, H-tank farm storm water systems upgrade, Savannah River Site, Aiken, South Carolina, $2,977,000.

Project 96–D–453, plutonium stabilization and handling system for plutonium finishing plant, Richland, Washington, $16,860,000.

Project 97–D–450, Actinide packaging and storage facility, Savannah River Site, Aiken, South Carolina, $7,200,000.

Project 97–D–470, regulatory monitoring and bioassay laboratory, Savannah River Site, Aiken, South Carolina, $12,220,000.

Project 96–D–406, spent nuclear fuels canister storage and stabilization facility, Richland, Washington, $24,441,000.

Project 96–D–676, electrical and utility systems upgrade, Idaho National Engineering and Environmental Laboratory, Idaho, $1,971,000.

Project 96–D–471, chlorofluorocarbon heat exchanger installation, and air conditioning and chiller retrofit, Savannah River Site, Aiken, South Carolina, $931,000.

Project 96–D–103, decontamination and waste treatment facility, Lawrence Livermore National Laboratory, Livermore, California, $2,000,000.

(3) Program Direction.—Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 for program direction in carrying out weapons activities necessary for national security programs in the amount of $224,000,000.

SEC. 3102. DEFENSE ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT.

Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 for environmental restoration and waste management in carrying out programs necessary for national security in the amount of $3,532,868,000, to be allocated as follows:

(1) Closure projects.—For closure projects carried out in accordance with section 3143 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–201; 110 Stat. 2636; 42 U.S.C. 7274a) in the amount of $1,069,492,000.

(2) Site Project and Completion.—For site projects and completion in carrying out environmental restoration and waste management activities necessary for national security programs in the amount of $960,919,000, to be allocated as follows:

(A) For operation and maintenance, $880,629,000.

(B) For plant projects (including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, and land acquisition related thereto), $100,290,000, to be allocated as follows:

Project 00–D–0, Transuranic waste treatment, Oak Ridge, Tennessee, $12,000,000.

Project 00–D–400, Site Operations Center, Idaho National Engineering and Environmental Laboratory, Idaho Falls, Idaho, $1,300,000.

Project 99–D–402, tank farm support services, F&A areas, Savannah River Site, Aiken, South Carolina, $3,150,000.

Project 98–D–401, H-tank farm storm water systems upgrade, Savannah River Site, Aiken, South Carolina, $2,977,000.

Project 98–D–453, plutonium stabilization and handling system for plutonium finishing plant, Richland, Washington, $16,860,000.

Project 97–D–700, road rehabilitation, Idaho National Engineering and Environmental Laboratory, Idaho, $2,590,000.

Project 97–D–450, Actinide packaging and storage facility, Savannah River Site, Aiken, South Carolina, $7,200,000.

Project 97–D–470, regulatory monitoring and bioassay laboratory, Savannah River Site, Aiken, South Carolina, $12,220,000.

Project 96–D–406, spent nuclear fuels canister storage and stabilization facility, Richland, Washington, $24,441,000.

Project 96–D–676, electrical and utility systems upgrade, Idaho National Engineering and Environmental Laboratory, Idaho, $1,971,000.

Project 96–D–471, chlorofluorocarbon heat exchanger installation, and air conditioning and chiller retrofit, Savannah River Site, Aiken, South Carolina, $931,000.

Project 96–D–103, decontamination and waste treatment facility, Lawrence Livermore National Laboratory, Livermore, California, $2,000,000.
CONGRESSIONAL RECORD—SENATE
June 7, 1999

11800

(3) POST-2006 COMPLETION.—For post-2006 projects, carry out environmental restoration and waste management activities necessary for national security programs in the amount of $2,962,548,000, to be allocated as follows:

(A) For operation and maintenance, $2,847,997,000.

(B) For plant projects (including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, and land acquisition related thereto), $34,551,000, to be allocated as follows:

Project 00–D–401, spent nuclear fuel treatment and storage facility, title I and II, Savannah River Site, Aiken, South Carolina, $7,000,000.

Project 99–D–403, privatization phase 1 infrastructure support, Richland, Washington, $15,900,000.

Project 97–D–402, tank farm restoration and safe operations, Richland, Washington, $20,516,000.

Project 93–D–187, high-level waste removal from filled waste tanks, Savannah River Site, Aiken, South Carolina, $3,987,000.

(4) SCIENCE AND TECHNOLOGY.—For science and technology in carrying out environmental restoration and waste management activities necessary for national security programs in the amount of $325,500,000.

(5) PROGRAM DIRECTOR.—For program direction, $7,345,000.

(6) ENVIRONMENT, SAFETY, AND HEALTH (DEFENSE).—For environment, safety, and health, defense, $79,000,000, to be allocated as follows:

(A) For the Office of Environment, Safety, and Health, defense, $79,000,000.

(B) For program direction, $24,769,000.

(7) OFFICE OF HEARINGS AND APPEALS.—For the Office of Hearings and Appeals, $5,000,000.

(8) NAVAL REACTORS.—For naval reactors, $675,000,000, to be allocated as follows:

(A) For naval reactors development, $654,400,000, to be allocated as follows:

(i) For operation and maintenance, $630,400,000.

(ii) For plant projects (including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, and land acquisition related thereto), $21,000,000.

(B) For program direction, $20,600,000.

(b) REPORT.—(1) The total amount authorized to be appropriated pursuant to subsection (a) is the sum of the amounts authorized to be appropriated for the project and the aggregate of funding and the funds required pursuant to this section is the sum of the amounts authorized to be appropriated for the project, plus the amount of funds required pursuant to subsection (a) reduced by $12,559,000.

(4) WORKER AND COMMUNITY TRANSITION ASSISTANCE.—For worker and community transition assistance, $30,000,000, to be allocated as follows:

(A) For worker and community transition, $26,500,000.

(B) For program direction, $3,500,000.

(c) ADJUSTMENT.—The amount authorized to be appropriated in subsection (a) is the sum of the amounts authorized to be appropriated for the project and the aggregate of funding required pursuant to this section is the sum of the amounts authorized to be appropriated for the project, plus the amount of funds required pursuant to subsection (a) reduced by $25,000,000 for use of prior year balances of funds for defense environmental management privatization.

SEC. 3103. OTHER DEFENSE ACTIVITIES.

(a) IN GENERAL.—Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 for other defense activities necessary for national security in the amount of $1,821,000,000, to be allocated as follows:

(1) NONPROLIFERATION AND NATIONAL SECURITY.—For nonproliferation and national security programs of the Department of Energy for fiscal year 2000 in the amount of $1,344,409,000.

(i) For nonproliferation and verification activities necessary for national security programs of the Department of Energy for fiscal year 2000, $344,409,000.

(ii) For arms control, $215,000,000.

(iii) For plant projects (including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, and land acquisition related thereto), $675,000,000, to be allocated as follows:

(i) For plant projects (including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, and land acquisition related thereto), $630,400,000, to be allocated as follows:

(A) For operation and maintenance, $610,400,000.

(B) For program direction, $20,600,000.

(2) WHICH HAS NOT BEEN PRESENTED TO, OR RECEIVED BY, CONGRESS.—Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 in the amount of $54,231,000.

(b) ADJUSTMENT.—The amount authorized to be appropriated pursuant to subsection (a) is the sum of the amounts authorized to be appropriated for the project and the aggregate of funding required pursuant to this section is the sum of the amounts authorized to be appropriated for the project, plus the amount of funds required pursuant to subsection (a) reduced by $12,559,000.

(5) SEC. 3104. DEFENSE NUCLEAR WASTE DISPOSAL

(a) DEFENSE NUCLEAR WASTE DISPOSAL.—Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 for payment to the Nuclear Waste Fund established in section 302(c) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222(c)) in the amount of $12,559,000.

(b) ADJUSTMENT.—The amount authorized to be appropriated pursuant to subsection (a) is reduced by $20,000,000 to reflect an offset provided by user organizations for security initiatives in carrying out environmental restoration and waste management activities necessary for national security programs in the amount of $325,500,000.

SEC. 3105. DEFENSE ENVIRONMENTAL MANAGEMENT PRIVATIZATION

(a) IN GENERAL.—Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 2000 for privatization initiatives in carrying out environmental restoration and waste management activities necessary for national security programs in the amount of $241,000,000, to be allocated as follows:

(b) ADJUSTMENT.—The amount authorized to be appropriated in subsection (a) is the sum of the amounts authorized to be appropriated for the project and the aggregate of funding required pursuant to this section is the sum of the amounts authorized to be appropriated for the project, plus the amount of funds required pursuant to subsection (a) reduced by $25,000,000 for use of prior year balances of funds for defense environmental management privatization.

SEC. 3112. LIMITS ON CONSTRUCTION PROJECTS.

(a) IN GENERAL.—The Secretary of Energy may carry out any construction project under the general plant projects authorized by this title if the total estimated cost of the construction project does not exceed $3,000,000.

(b) REPORT TO CONGRESS.—If, at any time during the construction of any general plant project authorized by this title, the estimated cost of the project is revised because of unforeseen cost variations and the revised cost of the project exceeds $3,000,000, the Secretary shall immediately furnish a complete report to the congressional defense committees explaining the reasons for the cost variation.

SEC. 3115. LIMITS ON CONSTRUCTION PROJECTS.

(a) IN GENERAL.—Except as provided in paragraph (2), construction projects may not be started or additional obligations incurred in connection with the project above the total estimated cost, when each of the current estimated cost of the construction project, which is authorized by section 3101, 3102, or 3103, or which is in support of national security programs of the Department of Energy, has been authorized by any previous Act, exceeds by more than 25 percent the higher of—
or from authorizations under this title.

SEC. 3124. FUND TRANSFER AUTHORITY.

(a) TRANSFER TO OTHER FEDERAL AGENCIES.—The Secretary of Energy may transfer funds authorized to be appropriated to the Department of Energy pursuant to this title to other Federal agencies for the performance of work for which the funds were authorized. Funds so transferred may be merged with and be available for the same purposes and for the same period as the authorizations of the Federal agency to which the amounts are transferred.

(b) TRANSFERS WITHIN DEPARTMENT OF ENERGY.—(1) Subject to paragraph (2), the Secretary of Energy may transfer funds authorized to be appropriated to the Department of Energy pursuant to this title between any such authorizations. Amounts of authorizations so transferred may be merged with and be available for the same purposes and for the same period as the authorization to which the amounts are transferred.

(2) Not more than 5 percent of any such authorization may be transferred between authorizations under paragraph (1). No such authorization may be increased or decreased by more than five percent by a transfer under such paragraph.

(c) LIMITATION.—The authority provided by this section to transfer authorizations—

(1) may only be used to provide funds for items of similar nature that are necessary for national security programs that have a higher priority than the items from which the funds are transferred; and

(2) may not be used to provide funds for an item for which Congress has specifically denied funds.

(d) NOTIFICATION TO CONGRESS.—The Secretary of Energy shall promptly notify the Committee on Armed Services of the Senate and the Committee on Armed Services of the House of Representatives of any transfer of funds to or from authorizations under this title.

SEC. 3125. AUTHORITY FOR CONCEPTUAL AND CONSTRUCTION DESIGN.

(a) REQUIREMENT FOR CONCEPTUAL DESIGN.—(1) Subject to paragraph (2) and except as provided in paragraph (3), before submitting to Congress a request for funds for a construction project that, as determined by the Secretary, may be completed within the same period as the authorization to which the funds are transferred; and

(2) if the estimated cost of completing a conceptual design for a construction project exceeds $3,000,000, the Secretary shall submit to Congress a request for funds for a conceptual design before submitting a request for funds for the construction project.

(b) AUTHORITY FOR CONSTRUCTION DESIGN.—(1) Within the amounts authorized by this title, the Secretary may use any funds available for the construction design (including architectural and engineering services) in connection with any proposed construction project if the total estimated cost for such design does not exceed $600,000.

(2) If the total estimated cost for construction design in connection with any construction project exceeds $600,000, funds for such design must be specifically authorized by law.

SEC. 3126. AUTHORITY FOR EMERGENCY PLANNING, DESIGN, AND CONSTRUCTION ACTIVITIES.

(a) AUTHORITY.—The Secretary of Energy may use any funds available to the Department of Energy pursuant to this title to advance planning and construction activities that the Secretary intends to carry out under this section and the circumstances making such activities necessary.

(b) LIMITATION.—The Secretary may not exercise the authority under subsection (a) in the case of any construction project until the Secretary has submitted to the congressional defense committees a report on the activities that the Secretary intends to carry out under this section and the circumstances making such activities necessary.

(c) SPECIFIC AUTHORITY.—The requirement of section 3126(b)(2) does not apply to emergency planning, design, and construction activities conducted under this section.

SEC. 3127. FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY.

Subject to the provisions of appropriations Acts and section 3121, amounts appropriated pursuant to this title for management and support activities conducted under the general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

SEC. 3128. AVAILABILITY OF FUNDS.

(a) IN GENERAL.—Except as provided in subsection (b), amounts appropriated pursuant to this title shall remain available until expended.

(b) EXCEPTION FOR PROGRAM DIRECTION FUNDS.—Amounts appropriated for program direction pursuant to an authorization of appropriations in this Act shall remain available until expended only for the fiscal year for which appropriated.

SEC. 3129. TRANSFERS OF DEFENSE ENVIRONMENTAL MANAGEMENT FUNDS.

(a) TRANSFER AUTHORITY FOR DEFENSE ENVIRONMENTAL MANAGEMENT FUNDS.—The Secretary of Energy may transfer funds to or from any program or project under subsection (a) in a fiscal year.

(2) The amount transferred to or from a program or project under subsection (a) may not exceed $5,000,000 in any fiscal year.

(3) A transfer may not be carried out by a manager of a field office under subsection (a) unless the manager determines that the transfer is necessary to address a risk to health, safety, or the environment or to assure the efficient use of defense environmental management funds at the field office.

(4) Funds transferred pursuant to subsection (a) may not be used for an item for which Congress has specifically denied funds or for a new program or project that has not been authorized by Congress.

SEC. 3130. TERMINATION OF AUTHORITY.

The authority provided by this Act shall cease to exist on October 1, 2004.

Subtitle C—Program Authorizations, Restrictions, and Limitations

SEC. 3131. PROHIBITION ON USE OF FUNDS FOR CERTAIN ACTIVITIES UNDER FORMERLY UTILIZED SITE REMEDIAL ACTION PROGRAM.

Notwithstanding any other provision of law, no funds authorized to be appropriated or otherwise made available by this Act, or by any Act authorizing appropriations for the military activities of the Department of Defense or the defense activities of the Department of Energy for a fiscal year after fiscal year 2000, may be obligated or expended to conduct treatment, storage, or disposal activities at any site designated as a site under the Formerly Utilized Site Remedial Action Program as of the date of the enactment of this Act.

SEC. 3132. CONTINUATION OF PROCESSING, TREATMENT, AND DISPOSITION OF LEGACY NUCLEAR MATERIALS.

The Secretary of Energy shall continue operations and maintain a high state of readiness at the Savannah River Site, Aiken, South Carolina, and shall provide the technical...
SEC. 3133. NUCLEAR WEAPONS STOCKPILE LIFE EXTENSION PROGRAM.
(a) Program Required.—The Secretary of Energy shall, in consultation with the Secretaries of Energy and Defense, develop, maintain, and carry out a program to provide for the extension of the effective life of the weapons in the nuclear weapons stockpile.
(b) Administrative Responsibility for Program.—The program under subsection (a) shall be a program within the Office of Defense Programs of the Department of Energy.
(c) Program Plan.—As part of the program under subsection (a), the Secretary shall develop a long-term plan for the extension of the life of the weapons in the nuclear weapons stockpile. The plan shall provide the following:

(1) Mechanisms to provide for the remanufacture of each weapon design designated by the Secretary for inclusion in the enduring nuclear weapons stockpile as of the date of the enactment of this Act.

(2) Mechanisms to expedite the collection of data necessary for carrying out the program, including data relating to the aging of materials, components, and facilities, and the retirement of personnel.

(3) Mechanisms to ensure the appropriate assignment of responsibilities and missions for each Department nuclear weapons laboratory and production plant, including mechanisms for allocation of workload, mechanisms to ensure the carrying out of appropriate modernization activities, and mechanisms to ensure the retention of skilled personnel.

(4) Mechanisms for allocating funds for activities related to the aging of materials, components, and facilities, including allocations of funds by weapon type and facility.

(5) Annual Submittal of Plan.—(1) The Secretary shall submit to the Committees on Armed Services of the Senate and the House of Representatives the plan developed under subsection (c) not later than January 1, 2000. The plan shall contain the maximum level of detail practicable.

(2) The Secretary shall submit to the committees referred to in paragraph (1) each year after 2000, at the same time as the submitting of the report required under section 1105 of title 31, United States Code, an update of the plan submitted under paragraph (1). Each update shall contain the same level of detail as the plan submitted under paragraph (1).

(b) Sense of Congress.—It is the sense of Congress that the President should include in each budget for a fiscal year submitted to Congress under section 1105 of title 31, United States Code, an update of the plan submitted under subsection (a) that is specified in the most current version of the plan for the program under this section.

SEC. 3134. TRITIUM PRODUCTION.
(a) Production of New Tritium.—The Secretary of Energy shall produce new tritium to meet the requirements of the Nuclear Weapons Stockpile Memorandum at the Tennessee Valley Authority Watts Bar or Sequoyah nuclear power plants consistent with the Secretary of Energy December 22, 1998, decision document designating the Secretary’s preferred tritium production technology.

(b) Support.—To support the method of tritium production described in subsection (a), the Secretary shall design and construct a new tritium extraction facility in the H-
Chairman of that Committee.

the Senate, in consultation with the ranking intelligence matters, as follows:

(b) A list of the most successful projects under the Initiative for Proliferation Prevention program, including for each such project the name of the institute and scientists who are participating or have participated in the project, the number of jobs created through the project, and the manner in which the project has met the nonproliferation objectives of the United States.

(C) A list of the institutes and scientists associated with mass destruction programs or other defense-related programs in the states of the former Soviet Union that the Department seeks to engage in commercial work under the Initiative for Proliferation Prevention program or the Nuclear Cities Initiative, including—

(1) a description of the work performed by such institutes and scientists under such weapons of mass destruction programs or other defense-related programs; and

(d) Nuclear Cities Initiative defined.—For purposes of this section, the term “Nuclear Cities Initiative” means the initiative arising pursuant to the March 1998 discussions between the Vice President of the United States and the Prime Minister of the Russian Federation and between the Secretary of Defense of the United States and the Minister of Atomic Energy of the Russian Federation.

Subtitle D—Safeguards, Security, and Counterintelligence at Department of Energy Facilities

SEC. 3151. SHORT TITLE.

This subtitle may be cited as the “Department of Energy Safeguards, Security, and Counterintelligence Enhancement Act of 1999.”

SEC. 3152. COMMISSION ON SAFEGUARDS, SECURITY, AND COUNTERINTELLIGENCE AT DEPARTMENT OF ENERGY FACILITIES

(a) Establishment.—There is hereby established a commission to be known as the “Commission on Safeguards, Security, and Counterintelligence at Department of Energy Facilities” (in this section referred to as the “Commission”).

(b) Organizational Matters.—(1) The Commission shall be composed of nine members appointed from among individuals in the public and private sectors who have significant experience in matters related to the security and protection of nuclear facilities, the classification of information, or counterintelligence matters, as follows:

(A) Two shall be appointed by the Chairman of the Committee on Armed Services of the Senate, in consultation with the ranking member of that Committee.

(B) One shall be appointed by the ranking member of the Committee on Armed Services of the Senate, in consultation with the Chairman of that Committee.

(C) Two shall be appointed by the Chairman of the Committee on Armed Services of the House of Representatives, in consultation with the ranking member of that Committee.

(D) One shall be appointed by the ranking member of the Committee on Armed Services of the House of Representatives, in consultation with the Chairman of that Committee.

(E) One shall be appointed by the Secretary of Energy.

(F) One shall be appointed by the Director of the Intelligence Community.

(G) One shall be appointed by the Director of Central Intelligence.

(2) Members of the Commission shall be appointed for four year terms, except as follows:

(A) One member initially appointed under paragraph (1)(A) shall serve a term of two years.

(B) One member initially appointed under paragraph (1)(B) shall serve a term of two years.

(C) The member initially appointed under paragraph (1)(C) shall serve a term of two years.

(2) Vacancy in the Commission shall be filled in the original appointment and shall not affect the powers and duties of the Commission.

(4)(A) After five members of the Commission have been appointed under paragraph (1), the Chairman of the Committee on Armed Services of the Senate, in consultation with the Chairman of the Committee on Armed Services of the House of Representatives, shall designate the chairman of the Commission from among the members appointed under paragraph (1)(A).

(B) The Chairman of the Commission may designate once five members of the Commission have been appointed under paragraph (1).

(5) The members of the Commission shall be appointed not later than 60 days after the date of the enactment of this Act.

(6) The members of the Commission shall be assigned for the activities of the Commission, including procedures for calling meetings, requirements for quorums, and the manner of taking votes.

(7) The Commission shall meet not less often than once every three months.

(8) The Commission may commence its activities under this section upon the designation of the chairman of the Commission under paragraph (4).

(c) Duties.—(1) The Commission shall, in accordance with this section, review the safeguards, security, and counterintelligence activities (including activities relating to information management, computer security, and personnel security) at Department of Energy facilities for—

(A) determine the adequacy of those activities to ensure the security of sensitive information, processes, and activities under the jurisdiction of the Department against threats to the disclosure of such information, processes, and activities; and

(B) make recommendations for actions the Commission determines to be necessary to ensure that such security is achieved and maintained.

(2) The activities of the Commission under paragraph (1) shall include the following:

(A) An analysis of the sufficiency of the Design Threat Basis documents as a basis for the allocation of resources for safeguards, security, and counterintelligence activities at the Department facilities in light of applicable guidance with respect to such activities, including applicable laws, Department of Energy orders, President’s Decision Directives, and Executive Orders.

(B) Visits to Department facilities to assess the adequacy of the safeguards, security, and counterintelligence activities at such facilities.

(C) Evaluations of specific concerns set forth in Department reports regarding the status of safeguards, security, or counterintelligence activities at particular Department facilities or at facilities throughout the Department.

(d) Reviews of relevant laws, Department orders, and other requirements relating to safeguards, security, and counterintelligence activities at Department facilities.

(e) Any other activities relating to safeguards, security, and counterintelligence activities at Department facilities that the Secretary of Energy considers appropriate.

(f) Report.—(1) Not later than February 15 each year, the Commission shall submit to the Secretary of Energy and to the congressional defense committees a report on the activities of the Commission for the preceding year. The report shall be submitted in an unclassified form, but may include a classified annex.

(2) Each report—

(A) shall describe the activities of the Commission during the year covered by the report;

(B) shall set forth proposals for any changes in safeguards, security, or counterintelligence activities at Department of Energy facilities that the Commission considers appropriate in light of such activities; and

(C) may include any other recommendations for legislation or administrative action that the Commission considers appropriate.

(e) Personnel Matters.—(1)(A) Each member of the Commission who is not an officer or employee of the Federal Government shall be compensated at a rate equal to the daily equivalent of the annual rate of basic pay prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Commission.

(B) All members of the Commission who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

(2) The members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Commission.

(3)(A) The Commission may, without regard to the civil service laws and regulations, appoint and terminate such personnel as may be necessary to enable the Commission to perform its duties.

(B) The Commission may fix the compensation of the personnel of the Commission without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification of positions and General Schedule pay rates.

(C) An officer or employee of the United States may be detailed to the Commission without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

(5) The members and employees of the Commission shall hold security clearances.
appropriate for the matters considered by the Commission in the discharge of its duties under this section.

(f) APPLICABILITY OF PCA.—The provisions of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the activities of the Commission.

(g) FUNDING.—(1) From amounts authorized to be appropriated by sections 3101 and 3103, the Secretary shall make available to the Commission not more than $1,000,000 for the activities of the Commission under this section.

(2) Amounts made available to the Commission under this subsection shall remain available until expended.

(A) by striking “(a) IN GENERAL.—”; and

(B) by striking subsection (b).

SEC. 3153. BACKGROUND INVESTIGATIONS OF CERTAIN PERSONNEL AT DEPARTMENT OF ENERGY FACILITIES.

(a) IN GENERAL.—The Secretary of Energy shall ensure that an investigation meeting the requirements of section 145 of the Atomic Energy Act of 1954 (42 U.S.C. 2165) is made for each Department of Energy employee, or contractor employee, at a Department of Energy facility who—

(1) exercises duties or responsibilities in or around a location where Restricted Data is present; or

(2) has or may have regular access to a location where Restricted Data or information important to the national security interests of the United States is or may be present; or

or around a location where Restricted Data is present.

(b) COMPLIANCE.—The Secretary shall have one year from the date of the enactment of this Act to meet the requirement in subsection (a).

(c) Limitation on Use of Funds Pending Certification.—(1) Except as provided in paragraph (2), no amounts authorized to be appropriated by section 3101 or 3103 or otherwise made available to the Department of Energy for fiscal year 2000 may be obligated or expended to conduct a program referred to in subsection (a)(2), or any study or plan in anticipation of such program, beginning on the date that is 45 days after the date of the enactment of this Act and continuing until 30 days from which the Director of Central Intelligence submits to the committees referred to in subsection (a)(3) the certification referred to in subsection (a)(1). The certification shall be submitted in unclassified form, but may include a classified annex.

(2) (A) The 30-day wait period specified in paragraph (1) for the obligation and expenditure of funds for a program referred to in subsection (a)(2) shall not apply if the certification with respect to the program under subsection (a)(1) is submitted during the 45-day period beginning on the date of the enactment of this Act.

(B) The limitation in paragraph (1) shall not apply—

(i) to the obligation or expenditure of funds authorized to be appropriated by title III for activities relating to cooperative threat reduction with states of the former Soviet Union; or

(ii) to the obligation or expenditure of funds authorized to be appropriated by section 3103(a)(1)(A)(i) for the materials protection control and accounting program of the Department.

SEC. 3157. INCREASED PENALTIES FOR MISUSE OF RESTRICTED DATA.

(a) COMMUNICATION OF RESTRICTED DATA.—Section 224 of the Atomic Energy Act of 1954 (42 U.S.C. 2274) is amended—

(1) in clause a., by striking “$20,000” and inserting “$40,000”; and

(2) in clause b., by striking “$10,000” and inserting “$30,000”.

(b) RECEIPT OF RESTRICTED DATA.—Section 225 of the Atomic Energy Act of 1954 (42 U.S.C. 2275) is amended by striking “$30,000” and inserting “$50,000”.

(c) DISCLOSURE OF RESTRICTED DATA.—Section 227 of the Atomic Energy Act of 1954 (42 U.S.C. 2277) is amended by striking “$2,500” and inserting “$5,000”.

SEC. 3158. ORGANIZATION OF DEPARTMENT OF ENERGY COUNTERINTELLIGENCE ACTIVITIES.

(a) OFFICE OF COUNTERINTELLIGENCE.—Title II of the Department of Energy Organization Act (42 U.S.C. 7131 et seq.) is amended by adding at the end the following:

“OFFICE OF COUNTERINTELLIGENCE

“Sec. 213. (a) There is within the Department of Energy an Office of Counterintelligence.

“(b)(1) The head of the Office shall be the Director of the Office of Counterintelligence.

(B) A cooperative program carried out between the Department of Energy and an independent state of the former Soviet Union.

(C) A cooperative program carried out between the Department of Energy and any nation designated as sensitive by the Secretary of State.

(3) The committees referred to in this paragraph are the following:

(A) The Committees on Armed Services and Appropriations and the Select Committee on Intelligence of the Senate.

(B) The Committees on Armed Services and Appropriations and the Permanent Select Committee on Intelligence of the House of Representatives.

(C) The Committees on Armed Services and Appropriations and the Permanent Select Committee on Oversight and Government Reform.
(2) The Director of the Office shall become familiar with classified intelligence with respect to nuclear weapons and materials, other nuclear matters, and energy security.

(c) Clerical Amendment.—The table of contents for this report shall be amended by inserting the following items:

"213. Office of Counterintelligence."

"214. Office of Intelligence."

SEC. 3159. COUNTERINTELLIGENCE ACTIVITIES AT CERTAIN DEPARTMENT OF ENERGY FACILITIES.

(a) ASSIGNMENT TO COUNTERINTELLIGENCE PERSONNEL.—The Secretary of Energy shall assign to each Department of Energy facility at which Restricted Data is located an individual who shall assess security and counterintelligence matters at that facility.

(2) An individual assigned to a facility under subsection (a) shall be stationed at the facility.

(b) SUPERVISION.—Each individual assigned under subsection (a) shall report directly to the Director of the Office of Counterintelligence of the Department of Energy.

(c) COVERED VIOLATIONS.—A violation referred to in subsection (a) is—

(1) the number of violations that were investigated; and

(2) the number of violations that remain unresolved.

(c) REMEDIAL ACTIONS.—(1) If the Secretary determines that an employee has been subjected to an adverse personnel action referred to in subsection (a) in contravention of the provisions of section 3160(a), the Secretary—

(A) determine whether or not the complaint is frivolous; and

(B) if the Inspector General determines the complaint is not frivolous, conduct an investigation of the complaint.

(2) The Inspector General shall submit a report of each investigation undertaken under paragraph (1)(B) to—

(A) the employee who submitted the complaint on which the investigation is based;

(B) the contractor concerned, if any; and

(C) the Secretary of Energy.

(d) PROHIBITION.—(1) No person shall discharge, demote, or otherwise discriminate against an employee or contractor employee who reasonably believes to provide direct and specific evidence of a violation described in subsection (c) of this section.

(2) An employee of Congress who—

(A) determine whether or not the complaint is frivolous; and

(B) if the Inspector General determines the complaint is not frivolous, conduct an investigation of the complaint.

(2) The Secretary shall, with the concurrence of the congressional defense committees pursuant to this section, immediately submit to the congressional defense committees a report on the investigations undertaken under subsection (b)(1)(B) during the preceding fiscal quarter, including a summary of the results of such investigations.

(2) A report under paragraph (1) shall not identify or otherwise provide any information on a person submitting a complaint under this section without the consent of the person.

SEC. 3162. NOTIFICATION TO CONGRESS OF CERTAIN SECURITY AND COUNTERINTELLIGENCE FAILURES AT DEPARTMENT OF ENERGY FACILITIES.

(a) REQUIREMENT.—The Secretary of Energy, after consultation with the Director of Central Intelligence and the Director of the Federal Bureau of Investigation, as appropriate, shall submit to the congressional defense committees a report on the investigations undertaken under subsection (b)(1)(B) during the preceding fiscal quarter, including a summary of the results of such investigations.

(b) DEADLINE.—The Secretary shall submit a notice under subsection (a) for a failure covered by that subsection not later than 30 days after learning of the failure.

(c) PROCEDURES.—The congressional defense committees shall each establish such procedures as may be necessary to carry out the provisions of this title.

(d) PROTECTION OF CLASSIFIED AND OTHER SENSITIVE INFORMATION.—(1) The House of Representatives and the Senate shall each establish, by rule or resolution of such House, procedures to protect from unauthorized disclosure classified information, all information relating to the protection of classified information, all information relating to the protection of classified information, all information relating to the protection of classified information, and other national security information that is furnished to the congressional defense committees pursuant to this section.

(2) Such procedures shall be established in consultation with the Secretary of Energy.
the Director of Central Intelligence, and the Director of the Federal Bureau of Investigation.

(e) SAVINGS PROVISIONS.—(1) Nothing in this section shall be construed as authority to withhold from the Director of Central Intelligence or the Director of the Federal Bureau of Investigation any funds for recruitment or other purposes relating to intelligence.

(2) Nothing in this section shall be construed to supersede any other requirement to report information on intelligence activities to Congress, including the requirement under section 901 of the National Security Act of 1947 (50 U.S.C. 413) for the President to ensure that the intelligence committees are kept fully and currently informed of the intelligence activities of the United States and for the intelligence committees to notify promptly other congressional committees of any matter relating to intelligence that requires the attention of such committees.

SEC. 3163. CONDUCT OF SECURITY CLEARANCES.

(a) RESPONSIBILITY OF FEDERAL BUREAU OF INVESTIGATION.—The Director of the Federal Bureau of Investigation shall have one employee specially trained to counter threats of espionage and intelligence-gathering by foreign nationals against Department of Energy employees and Department contractor employees who travel abroad for laboratory-to-laboratory exchange activities or other cooperative exchange activities on behalf of the Department.

(b) Director of Counterintelligence of the Department of Energy may assign at least one employee from the pool established under paragraph (1) to accompany a group of Department of Energy employees or Department contractor employees who travel to any nation designated to be a sensitive country for laboratory-to-laboratory exchange activities or other cooperative exchange activities on behalf of the Department.

SEC. 3165. DEFINITION.

In this subtitle, the term ‘‘Restricted Data’’ has the meaning given that term in section 11 y. of the Atomic Energy Act of 1944 (42 U.S.C. 7274).

Title E—Other Matters

SEC. 3171. MAINTENANCE OF NUCLEAR WEAPONS EMPLOYEES OF THE DEPARTMENT OF DEFENSE AND DEPARTMENT OF ENERGY.

(a) ADMINISTRATION OF JOINT NUCLEAR WEAPONS PROGRAMS.—(1) Subsection (b) of section 179 of title 10, United States Code, is amended by adding at the end the following new paragraph:

‘‘(3) The Council shall meet not less often than once every three months.’’

(2) Subsection (c) of that section is amended by adding at the end the following new paragraph:

‘‘(3) If the position of Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs remains vacant for a period of more than 9 months, the Secretary of Energy shall appoint a qualified individual to serve as acting staff director of the Council until the position of Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs is filled.’’

(b) REORGANIZATION OF JOINT NUCLEAR WEAPONS COUNCIL.—(1) The Secretary of Defense and the Secretary of Energy shall jointly prepare and submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the joint nuclear weapons workforce. Each report shall include the following elements:

(A) A baseline of current skills and capabilities.

(B) A statement of the skills or capabilities that are at risk of being lost within the next ten years.

(c) ANNUAL REPORT ON COUNCIL ACTIVITIES.—The Secretary of Defense shall, after consultation with the Secretary of Energy, submit to the Committees on Armed Services of the Senate and the House of Representatives on an annual basis a report on the activities of the Joint Nuclear Weapons Council. Each report shall include the following:

(1) A description of the activities of the Council during the 12-month period ending on the date of the report together with any assessments or studies conducted by the Council during that period.

(2) A description of the highest priority requirements of the Department of Energy with respect to the Department of Energy stockpile stewardship and management programs as of that date.

(3) An assessment of the extent to which the requirements referred to in paragraph (2) are being addressed by the Department of Energy as of that date.

(d) NUCLEAR MISSION MANAGEMENT PLAN.—The Secretary of Defense shall develop and implement a plan to ensure the continued reliability of the capability of the Department of Defense to carry out its nuclear deterrent mission. The plan shall—

(1) articulate the current policy of the United States on the role of nuclear weapons and nuclear deterrence in the conduct of defense and foreign relations matters;

(2) establish stockpile viability and capability requirements with respect to that mission, including the number and variety of warheads required;

(3) establish requirements relating to the contractor industrial base, support infrastructure, and surveillance, testing, assessment, and certification of nuclear weapons necessary to support that mission;

(4) take into account requirements for the critical skills, readiness, training, exercise, and testing of personnel necessary to meet that mission; and

(5) take into account the relevant programs and plans of the military departments and the defense agencies with respect to readiness, sustainment (including research and development), and modernization of the strategic deterrent forces.

(e) NUCLEAR EXPERTISE RETENTION MEASURES.—(1) The Secretary of Energy and Secretary of Defense shall jointly submit to the appropriate committees referred to in subsection (c) a plan setting forth the actions that the Secretaries consider necessary to retain core scientific and technical skills and capabilities within the Department of Energy, the Department of Defense, and their contractors in order to maintain the United States nuclear deterrent force indefinitely.

(2) The plan shall include the following elements:

(A) A baseline of current skills and capabilities.

(B) A statement of the skills or capabilities that are at risk of being lost within the next ten years.

(C) A proposal for recruitment and retention measures to address the loss of such skills or capabilities.

(D) A proposal for the training and evaluation of personnel with core scientific, engineering, and technical skills and capabilities.

(E) A statement of the additional advanced manufacturing programs and process engineering programs that are required to maintain the nuclear deterrent force indefinitely.

(F) An assessment of the desirability of establishing a nuclear weapons workforce reserve to ensure the availability of the skills and capabilities of present and former employees of the Department in the event of an urgent future need for such skills and capabilities.

(f) REPORTS ON CRITICAL DIFFICULTIES AT NUCLEAR WEAPONS LABORATORIES.—Section 3139 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104-201; 110 Stat. 2842; 42 U.S.C. 7727(e)) is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following new subsection:

‘‘(4) INCLUSION OF REPORTS IN ANNUAL SECURITY CERTIFICATIONS.—Any report submitted pursuant to subsection (a) shall also be included with the decision documents relating to the certification in each annual security certification report submitted in accordance with section 3162(a) of this title.’’
that accompany the annual certification of the stockpile of the United States nuclear weapons stockpile which is provided to the President for the year in which such report is submitted.".

(g) TECHNICAL AMENDMENT.—Section 179(f) of title 10, United States Code, is amended by striking "the Committee on Armed Services" and all that follows through "House of Representatives" and inserting "the Committee on Armed Services and Appropriations of the House of Representatives".

SEC. 3172. MODIFICATION OF BUDGET AND PLANNING REQUIREMENTS FOR DEPARTMENT OF ENERGY NATIONAL SECURITY ACTIVITIES.

(a) ENHANCEMENT OF ANNUAL FIVE-YEAR BUDGET.—(1) Section 515 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–201; 110 Stat. 2841; 42 U.S.C. 7271b) is amended—

(1) by redesignating subsection (b) as subsection (c); and

(b) by striking subsection (a) and inserting the following new subsections:

(a) REQUIREMENT.—The Secretary of Energy shall prepare for each fiscal year after fiscal year 2000 a program and budget plan for the national security programs of the Department of Energy for the five-fiscal year period beginning in the year the program and budget plan is prepared.

(b) ELEMENTS.—Each program and budget plan shall include the following:

(1) The estimated expenditures and proposed appropriations necessary to support the programs, projects, and activities of the national security programs of the Department during the five-fiscal year period covered by the program and budget plan, expressed in a level of detail comparable to that contained in the budget submitted by the President to Congress under section 1105 of title 31, United States Code.

(2) A description of the anticipated workload requirements for each Department site during that five-fiscal year period.; and

(C) in subsection (c), as so redesignated, by striking "five-year budget" and inserting "five-fiscal year program and budget plan".

(b) ADDITIONAL REQUIREMENTS FOR WEAPONS ACTIVITIES BUDGET.—Section 3116 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104–201; 110 Stat. 2861; 42 U.S.C. 7217c) is amended—

(1) by redesignating subsection (c) as subsection (d); and

(2) by inserting after subsection (b) the following new subsection (c):

(c) IMPACT OF BUDGET ON STOCKPILE.—The Secretary shall include in the materials the Secretary submits to Congress in support of the budget for any fiscal year after fiscal year 2000 that is submitted by the President pursuant to section 1105 of title 31, United States Code, a description of how the funds identified for each program element in the weapons activities budget of the Department for such fiscal year, as determined by the Congress, are used to acquire and maintain the United States nuclear weapons stockpile which is safe and reliable as determined in accordance with the criteria established under section 3156 of the National Defense Authorization Act for Fiscal Year 1999 (Public Law 105–261; 112 Stat. 2257; 42 U.S.C. 2121 note).".

SEC. 3173. EXTENSION OF AUTHORITY OF DEPARTMENT OF ENERGY TO PAY VOLUNTARY SEPARATION INCENTIVE PAYMENTS.

(a) EXTENSION.—Notwithstanding subsection (c) of section 663 of the Treasury and General Government Appropriations Act, 1997 (Public Law 104–208; 110 Stat. 3009–383; 5 U.S.C. 5597 note), the Department of Energy may pay voluntary separation incentive payments to qualifying employees who voluntarily separate during the five-fiscal year period beginning January 1, 2003.

(b) EXERCISE OF AUTHORITY.—The Department shall pay voluntary separation incentive payments to qualifying employees (whether by retirement or resignation) before January 1, 2003.

SEC. 3174. INTEGRATED FISSILE MATERIALS MANAGEMENT PLAN.

(a) PLAN.—The Secretary of Energy shall develop a long-term plan for the integrated management of fissile materials by the Department in subsection (a)—

(1) identify means of consolidating or integrating the responsibilities of the Office of Environmental Management, the Office of Fissile Materials Disposition, the Office of Nuclear Energy, and the Office of Defense Programs for the treatment, storage and disposition of fissile materials, and for the management of nuclear waste materials, in order to achieve budgetary and other efficiencies in the discharge of those responsibilities; and

(2) identify any expenditures necessary at the sites that are anticipated to have an enduring mission for plutonium management in order to achieve the integrated management of fissile materials by the Department.

(b) SUBMITTAL TO CONGRESS.—The Secretary shall submit the plan required by subsection (a) to the congressional defense committees not later than February 1, 2000.

SEC. 3175. USE OF AMOUNTS FOR AWARD FEES FOR DEPARTMENT OF ENERGY CLOSURE PROJECTS AT CLOSURE PROJECT SITES.

(a) AUTHORITY TO USE AMOUNTS.—The Secretary of Energy may use such amount authorized to be appropriated for the payment of award fees for a Department of Energy closure project for purposes of conducting additional cleanup activities at the closure project site if the Secretary—

(1) anticipates that such amount will not be obligated for payment of award fees in the fiscal year in which such amount is authorized to be appropriated; and

(2) determines the use will not result in a deferral of the payment of the award fees for more than 12 months.

(b) REPORT ON USE OF AUTHORITY.—Not later than 30 days after each exercise of the authority under paragraph (1), the Secretary shall submit to the congressional defense committees a report on the exercise of the authority.

SEC. 3176. PILOT PROGRAM FOR PROJECT MANAGEMENT OVERSIGHT REGARDING DEPARTMENT OF ENERGY CONSTRUCTION PROJECTS.

(a) REQUIREMENTS.—The Secretary of Energy shall carry out a pilot program on use of project management oversight (PMO) services for Department of Energy construction projects established by the Department's assessment of the feasibility and desirability of utilizing project management oversight services for Department of Energy construction projects.

(b) SUBMITTAL TO CONGRESS.—In preparing the schedule, the Secretary shall assume the following:
A closure date for the Rocky Flats Plant in 2006 is not later than December 31, 2000, the Comptroller General shall submit to the Committees on Armed Services of the Senate and House of Representatives a report assessing the progress in the closure of the Rocky Flats Environmental Technology Site effect ongoing cleanup at the site.

The Secretary of Energy could provide flexibility to the contractor at the site in order to quicken the closure of the site.

The Secretary could take additional actions throughout the nuclear weapons complex of the Department of Energy in order to quicken the closure of the site.

The developments, if any, since the April 1999 report of the Comptroller General that could alter the pace of the closure of the site.

The possibility of closure of the site by 2006.

The actions that could be taken by the Secretary or Congress to ensure that the site would be closed by 2006.

(2) That all waste that is transferable from the Rocky Flats Plant to the Waste Isolation Pilot Plant will be removed from the Rocky Flats Plant by that closing date as specified in the current 2006 Rocky Flats Plant Closure Plan.

(3) That, to the maximum extent practicable, shipments of waste from the Rocky Flats Plant to the Waste Isolation Pilot Plant will be carried out on an expedited schedule, but not interfere with other shipments complying with the Waste Isolation Pilot Plant that are planned as of the date of the enactment of this Act.

Title XXXII—Defense Nuclear Facilities Safety Board

Section 3201. Defense Nuclear Facilities Safety Board

There are authorized to be appropriated for fiscal year 1999 $77,700,000 for the operation of the Defense Nuclear Facilities Safety Board under chapter 21 of the Atomic Energy Act of 1954 (42 U.S.C. 2286 et seq.).

Title XXXIII—National Defense Stockpile

Section 3301. Authorized Uses of Stockpile Funds

(a) Obligations of Stockpile Funds.—During fiscal year 2000, the National Defense Stockpile Manager may obligate up to $78,700,000 of the funds in the National Defense Stockpile Fund to the authorized uses of such funds under section 9(b)(2) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h(b)(2)), including the disposal of hazardous materials that are environmentally sensitive.

(b) Additional Obligations.—The National Defense Stockpile Manager may obligate amounts in excess of the amount specified in subsection (a) if the National Defense Stockpile Manager notifies Congress that extraordinary or emergency conditions necessitate the additional obligations. The National Defense Stockpile Manager may make the additional obligations described in the notification after the end of the 45-day period beginning on the date on which Congress receives the notification.

(c) Limitations.—The authorities provided by the law shall be subject to such limitations as may be provided in appropriations Acts.

Section 3302. Limitations on Previous Authority for Disposal of Stockpile Materials

(a) Public Law 105-261 Authority.—Section 3303(b) of the National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 115 Stat. 2283; 50 U.S.C. 98d note) is amended—

(1) by striking “(b) LIMITATIONS ON DISPOSAL QUANTITY.—” and inserting “(b) LIMITATIONS ON DISPOSAL AUTHORITY.—(1)”;

(2) by adding at the end the following:

“(2) The President may not dispose of materials under this section in excess of the disposals necessary to result in receipts in the amounts specified in subsection (a).”.

(b) Public Law 104-201 Authority.—Section 3305(b) of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105-15; 112 Stat. 2538; 50 U.S.C. 98d note) is amended—

(1) by striking “(b) LIMITATION ON DISPOSAL QUANTITY.—” and inserting “(b) LIMITATIONS ON DISPOSAL AUTHORITY.—(1)”;

(2) by adding at the end the following:

“(2) The President may not dispose of materials under this section in excess of the disposals necessary to result in receipts in the amounts specified in subsection (a).”.

Section 3401. Short Title

This title may be cited as the “Panama Canal Commission Authorization Act for Fiscal Year 1999.”

Section 3402. Authorization of Expenditures

(a) In General.—Subject to subsection (b), the Panama Canal Commission is authorized to use the Panama Canal Revolving Fund to make such expenditures within the limits of funds and borrowing authority available to it in accordance with law, and to make such contracts and commitments, as may be necessary under the Panama Canal Act of 1979 (22 U.S.C. 3601 et seq.) for the operation, maintenance, improvement, and administration of the Panama Canal for the period October 1, 1999, through June 30, 1999.

(b) Limitations.—For the period described in subsection (a), the Panama Canal Commission may expend from funds in the Panama Canal Revolving Fund not more than $25,000 for official reception and representation expenses, of which—

(1) not more than $7,000 may be used for official reception and representation expenses of the Supervisory Board of the Commission;

(2) not more than $3,500 may be used for official reception and representation expenses of the Secretary of the Commission; and

(3) not more than $14,500 may be used for official reception and representation expenses of the Administrator of the Commission.

Section 3403. Purchases of Vehicles

Notwithstanding any other provision of law, the funds available to the Commission shall be available for the purchase and transportation to the Commission of replacement passenger motor vehicles, the purchase price of which shall not exceed $26,000 per vehicle.

Section 3404. Expenditures Only in Accordance with Treaties

Expenditures authorized under this title may be made only in accordance with the Panama Canal Treaties of 1977 and any law of the United States implementing those treaties.

Section 3405. Office of Transition Administration

(a) Expenditures From Panama Canal Commission Dissolution Fund.—The Office of Transition Administration established under subsection (b) of section 1305 of the Panama Canal Act of 1979 (22 U.S.C. 3714a) is authorized to obligate and expend funds from the Panama Canal Commission Dissolution Fund established under subsection (c) of such section for the purposes enumerated in such subsection until the fund terminates.

(b) Administrative Offices.—The Office of Transition Administration shall have offices in the Republic of Panama and in Washington, District of Columbia. The office in Panama shall be subject to the authority of the United States chief of mission in the Republic of Panama.

(c) Oversight of Close-Out Activities.—The Panama Canal Commission shall enter into an agreement with the head of a department or agency of the federal government to supervise the close out of the affairs of the Commission under section 1305 of the Panama Canal Act of 1979 and to certify the completion of that function.

(Pursuant to the order of May 27, 1999, the text of S. 1060, as amended, is Division A of S. 1059; the text of S. 1061, as amended, is Division B of S. 1059; and the text of S. 1062, as amended, is Division C of S. 1059.)

Orders for Tuesday, June 8, 1999

Mr. COCHRAN. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. on Tuesday, June 8. I further ask consent that on Tuesday, immediately following the prayer, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate then resume debate on S. 1122, the defense appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COCHRAN. Mr. President, I further ask consent that the Senate stand in recess from the hours of 12:30 p.m. to 2:15 p.m. for the weekly policy conferences to meet.

The PRESIDING OFFICER. Without objection, it is so ordered.

Program

Mr. COCHRAN. For the information of all Senators, the Senate will resume consideration of the defense appropriations bill at 9:30 a.m. on Tuesday. By previous consent, a vote on the pending
Crassley amendment will occur at 9:45 a.m. Also by previous consent, first-degree amendments to CR-2 must be offered by 9:30 a.m. tomorrow. Therefore, further amendments and votes are expected throughout tomorrow's session of the Senate.

As a reminder, cloture on the motion to proceed to the Y2K legislation was filed today. That cloture vote will occur on Wednesday at a time to be determined.

RECESS UNTIL 9:30 A.M.
TOMORROW

Mr. COCHRAN. If there is no further business to come before the Senate, I now ask unanimous consent that the following nominations be laid on the table:
THE TENTH ANNIVERSARY OF THE TIANANMEN SQUARE MASSACRE

HON. STENY H. HOYER
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. HOYER. Mr. Speaker, on June 4th we commemorated the tenth anniversary of the massacre of thousands of students and workers at Tiananmen Square. We also remember the thousands injured, as well as the tens of thousands arrested and sentenced to prison or labor camps on that fateful day. We honor their bravery and courage, and the ultimate sacrifice which they made in the name of democracy and human rights.

Ten years ago today, the forward march of reform in China came to a halt; crushed by the steel tread of tanks, trampled by the boots of soldiers. The human rights situation in China has continued to deteriorate during the past decade. As recently as last week, the Washington Post reported the arrest of Yang Tao, one of the student leaders of the 1989 demonstration. This was clearly an effort by the Chinese leadership to discourage further protest on the anniversary of the Tiananmen massacre. Beijing has also attempted to silence the internet, another medium through which the memory of that tragic day will certainly be refreshed.

These efforts to erase the events of 1989 from popular conscience, Mr. Speaker, also include a strategy of redirecting the rage of the Chinese people by distorting the truth about the accidental bombing of the Chinese embassy in Belgrade. Today we send a clear message, not only to Beijing, but to the people of China. The United States has not forgotten, and will never forget, the events that transpired ten years ago in Tiananmen Square. We support those who continue their valiant struggle for democracy.

H.R. 1882, THE SMALL BUSINESS REGULATORY FLEXIBILITY ACT

HON. THOMAS W. EWING
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. EWING. Mr. Speaker, as one of the original champions of the Small Business Regulatory Flexibility Act, otherwise known as SBREFA, I wish to express my strong support for H.R. 1882, the Small Business Review Panel Technical Amendments Act, of which I am an original co-sponsor. As the bill’s name would suggest, it will make several needed technical changes to the original landmark law. But more significantly, H.R. 1882 will hold the Internal Revenue Service more accountable to small businesses. This important piece of legislation will require the IRS to convene Small Business Advocacy Review Panels when proposing new regulations that will have a significant impact on small businesses. These review panels will involve actual small business owners and their comments will be used to help improve regulations prior to release. Since 1996, the panel process has been applied to the Environmental Protection Agency and the Occupational Safety and Health Administration and the results thus far have been extremely positive leading to much improved rulemaking.

I am extremely pleased the House is considering amending SBREFA to include the IRS. However, I am concerned the benefits of this legislation may go partially unrealized. A primary reason for the success of SBREFA has been the role the SBA Office of Advocacy plays in the review panel process. Economic research conducted by the Office of Advocacy has been instrumental in demonstrating errors in assumptions made by the EPA and OSHA. But the Office of Advocacy’s economic research budget has been stretched to the limit, forcing the chief Counsel for Advocacy to limit the office’s research activities. If we are to expand the Office of Advocacy’s responsibilities under SBREFA, as this bill does, then I feel it is absolutely necessary to make sure that Advocacy’s economic research budget equals these new responsibilities.

I urge my colleagues to support the passage of H.R. 1882 and applaud the efforts of Chairman Jim Talent to bring this bill to the floor and his consistent work on behalf of small businesses throughout the country.

SOCIAL SECURITY AND MEDICARE SAFE DEPOSIT BOX ACT OF 1999

IN THE HOUSE OF REPRESENTATIVES

HON. DAVID D. PHELPS
OF ILLINOIS

Wednesday, May 26, 1999

Mr. PHELPS. Mr. Speaker, I rise today to reluctantly support H.R. 1259, the Social Security and Medicare Lock Box Act of 1999. Although this legislation does not improve Social Security or Medicare solvency, it serves as a sign of commitment to preserving Social Security and Medicare by taking them off budget. H.R. 1259 offers largely symbolic protection of our Social Security surpluses by blocking the consideration of any Budget Resolution or legislation that dips into these funds. This legislation includes a loophole which would exempt from these points of order any legislation that contains a sentence designating the legislation as “Social Security reform” or “Medicare reform.” Unfortunately, the bill provides no standards or definition of the word “reform.” Insuring the stability of the Social Security system for today’s seniors and future generations of retirees is one of my top priorities. I do not believe that this measure will negatively impact that goal, and thus I will support it. However, to truly demonstrate our commitment to protecting the Social Security Trust Fund, we must require all surpluses—the Social Security surplus and the Medicare surplus—to be reserved until solvency has been extended by 75 years for Social Security and by 30 years for Medicare. The legislation that would accomplish this is the Democratic alternative, which would close the current loophole in H.R. 1259, and provide true meaningful protection for the Trust Fund.

In an era of unprecedented growth and prosperity, we have a responsibility to implement policy that ensures economic growth for all sectors of our society. This requires investing in the future—creating a better America for our children, a future in which working families can afford to send their children to college, and in which all Americans can count on the continued integrity of Social Security. While I support this bill as a first step towards protecting Social Security and Medicare, I truly hope that our actions today do not become an excuse for complacency in the future, but rather a catalyst for continued progress on the critical issues of Social Security and Medicare.

THE STUDENT WINNERS OF THE 1999 EXPLORAVISION AWARDS

HON. GEORGE E. BROWN, JR.
OF CALIFORNIA

HON. CONSTANCE A. MORELLA
OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. BROWN of California. Mr. Speaker, for the recognition of their achievement, my colleague, Mrs. MORELLA, and I are inserting into the RECORD the names of the student winners of the 1999 ExploraVision Awards.

Irving B. Weber Elementary School, Iowa City, IA: Grades K–5; Project: Step Throat Home Tester; Students: Derek Ibarra, Bentley Wingert, Spencer Nash, Nathan Davidson; Teacher Advisor: Tracy Elmer; Community Advisor: Hector Ibarra.

Leeds Elementary School, Arlington, WI; Grades 4–6; Project: AllerScan; Students: Kallie Harrier, Teague Harvey, Anna Jagen, Amanda Treinen; Teacher Advisor: Jennifer McGinley; Community Advisor: Roger Clausen.

Point Grey Mini School, Vancouver, BC; Grades 7–9; Project: Woven Engineered Bone System; Students: Patricia Lau, Olivia Maginlin, Robyn Massel, Katie Mogan; Teacher Advisor: John O’Connor; Community Advisor: Lynne Massel.

South Salem High School, Salem OR; Grades 10–12; Defeating A.D.D. through Bi-sensing Technology; Students: Jonina Allan, Amanda Moreland.
IN RECOGNITION OF MICHO KUSHI
HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. KUCINICH. Mr. Speaker, I rise today to recognize Michio Kushi, the 20th century developer of macrobiotics. This diet is the catalyst for many of the mainstream dietary and lifestyle changes currently taking place.

The Standard Macrobiotic diet has been practiced widely throughout history by all major civilizations and cultures. The Diet centers on whole cereal grains and their products and other plant product. Twenty-five to thirty percent of daily food consists of vegetables and the remaining intake is comprised of soups, beans and sea vegetables. Consumption of products such as meats and dairy products are typically avoided. Michio Kushi, the founder of macrobiotics, was born in Japan and graduated from Tokyo University, the Faculty of Law, Department of Political Science. Influenced by the devastation of World War II, he decided to dedicate his life to the achievement of world peace and the development of humanity.

Kushi and his wife Aveline introduced macrobiotics to North America in the 1950s by establishing the first macrobiotic restaurant in New York. In the 1960s, the Kushi moved to Boston and founded Erewhon, the nation’s pioneer natural foods distributor and manufacturer. Over the last thirty years Michio Kushi has taught throughout the United States and abroad, giving lectures and seminars on diet, health, consciousness and the peaceful meeting of East and West. In 1978, the Kushi founded the Kushi Institute, an educational organization for the training of future leaders of society, including macrobiotic teachers, counselors, cooks and lifestyle advisers. In 1986, Michio Kushi founded One Peaceful World, an international information network and friendship society of macrobiotic friends, families, business, educational center, and other associations to help guide society and contribute to world health and world peace. In the 1980s, Kushi began meeting with government and social leaders at the United Nations, the World Health Organization, and the White House. The health benefits of a macrobiotic diet have attracted the attention of leading medical professionals. The American Cancer Society reports that a macrobiotic diet may lower the risk of cancer.

The Smithsonian Institution will announce the acquisition of the Michio Kushi Family Collection on Macrobiotics and Alternative and Complementary Health Care during a special day-long event at the National Museum of American History in Washington, D.C. on Wednesday, June 9. The events include a symposium featuring Michio Kushi and his wife Aveline Kushi, an exhibit of macrobiotic food and books, and an awards presentation to Mr. and Mrs. Kushi for their significant role in the development of alternative and complementary health care and to the formation of the natural and whole foods movement.

I ask my fellow colleagues to join me in applauding the dedication and hard work of the Kushi in helping to educate the world’s population on the benefits of the macrobiotic diet.

EXTENSIONS OF REMARKS

HON. JAMES L. OBERSTAR
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. OBERSTAR. Mr. Speaker, safety is our highest responsibility in aviation. The travelling public has the right to expect the highest standards of safety when flying on a U.S. carrier or on a U.S. carrier’s code share partner.

Last September, the aviation community received a wake up call when SwissAir flight 111 crashed off the shores of Nova Scotia. On board this fatal flight were 53 U.S. passengers who had purchased tickets from Delta Airlines for Delta flight 1111, but who flew on SwissAir, through an arrangement called code-sharing. This accident brought home the realization that, in a world of close alliances between domestic and foreign airlines, the lines separating domestic safety regulation and international safety regulation have been blurred. It is clearly time to reassess our safety activities to make certain the American travelling public flies safely, whether on a U.S. or a foreign carrier.

As relationships between domestic and foreign carriers continue to grow through code sharing, we need to take a hard look at whether safety has kept pace. Since 1994, the number of code-sharing alliances has more than doubled—from 61 to 163. A passenger who buys a ticket from a U.S. airline for a code-sharing flight (ticketed as a flight by a U.S. airline) has a right to expect that the entire flight will be operated to the highest American safety standards. Yet, put simply, there is not a process for assuring that a foreign code-share partner, when the changing nature of relationships between airlines becomes more complex than ever before, maintains the standards set forth in its FAA-approved safety audit program. The FAA does not evaluate the safety of the foreign airline itself.

Delta’s recent suspension of its code-share with Korean Air underscores this point. The FAA had no safety concerns with the arrangement because South Korea has a system for regulating safety that, on paper, appeared adequate. However, in this case, as possibly in far too many other cases—there appears to be little correlation between FAA’s assessment of the foreign regulatory system and the actual safety performance of a carrier.

That observation is not meant to fault FAA for its efforts to assess the aviation regulatory systems of foreign governments. The FAA’s assessment does provide valuable information about the structure and capabilities of a particular country’s civil aviation authority; it does not provide specific assurance that a foreign code-share partner, when the changing nature of international aviation demands such an assessment.

This legislation will respond to the challenges of increasing the safety margin for the American travelling public by establishing a process for making meaningful safety judgments about foreign airlines.

I urge my colleagues to join me in co-sponsoring this legislation.

TRIBUTE TO THE MENNONITE COLLEGE OF NURSING
HON. THOMAS W. EWING
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. EWING. Mr. Speaker, I rise today to honor the Mennonite College of Nursing in Bloomington, Illinois on the occasion of their 80th year. Not only is this an historic marker in the college’s time line, but on July 1, 1999, this fine institution will combine with Illinois State University, ensuring that its fine traditions and quality educational programs continue far into the next century.
June 7, 1999

The Mennonite College of Nursing was founded in 1919, as the Mennonite Sanitarium Training School, with the purpose of providing a Christian ministry though the operation of a hospital and a diploma school of nursing. Since its founding, the school has provided cutting edge training for its students. In the early 1980’s and to meet the changes nursing education needed by changing health care delivery systems, the Board of Directors decided to transition Mennonite Hospital School of Nursing into Mennonite College of Nursing, awarding a four-year baccalaureate degree, the Bachelor of Science in Nursing degree.

The North Central Association awarded Mennonite College of Nursing institutional accreditation in 1986. Mennonite College of Nursing made nursing history as the first independent upper-division single purpose institution of nursing education in the U.S. to receive accreditation from the National League for Nursing.

In 1995, Mennonite implemented the Graduate program, with its first educational track for Family Nurse Practitioner. And in 1998, the Master of Science in Nursing degree program was awarded initial accreditation by the National League of Nursing.

The mission of the Mennonite College of Nursing is to educate beginning and advanced practitioners of nursing to go beyond academia and serve the citizens of central Illinois and the world. In keeping with the traditions of its roots, this fine institution has placed a particular focus on addressing the health care needs of both urban and rural populations, including those who are most vulnerable and under served.

In reviewing the work of the College’s many graduates, it is clear they have been successful in not only teaching the technical skills of the nursing profession, but in instilling a whole philosophy of ministering to the sick. Unlike other schools, at the core of its curriculum, the Mennonite College of Nursing promotes four key values. They are: the affirmation of the dignity and worth of all persons; the recognition of the wholeness of life; the responsible use of nature; and the promotion of a life of peace.

Mr. Speaker, I am greatly honored to have this fine professional school in my district. With 83% of its graduates remaining in Central Illinois, I can affirm the fact that the quality of life in our communities has benefited greatly the Mennonite College of Nursing.

Mr. Speaker, the important work of the Mennonite College of Nursing needs to be recognized by this Congress, so that the school is forever acknowledged before the American people as it becomes the sixth academic college of Illinois State University. I am very proud to have the Mennonite College of Nursing in the 15th district of Illinois, and I ask all of my colleagues to join me in extending our heartfelt congratulations to this outstanding institution.

EXTENSIONS OF REMARKS

TRIBUTE TO RICHARD D. REYNOLDS

HON. DAVID D. PHELPS
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. PHELPS. Mr. Speaker, I rise today to pay tribute to Richard D. Reynolds, a life long resident of Southern Illinois, who was born on April 13, 1938. I want to take this opportunity to recognize a true gentleman who stands firmly on his commitments. Richard has had a long history working for labor in southern Illinois and is retiring as business manager/secretary treasurer of Southern and Central Illinois Laborers’ Local Union 1330. Richard has dedicated many years of his life to protecting the rights of workers and laborers in Illinois. His tireless efforts have led to many improvements for a great number of Southern Illinoisans. He represents a group of people who do honest work and expect, and have received from Richard, strong and dedicated union leadership. He has contributed to nearly double the counties his union covers. The union staff has grown from 1 to 20, and he has helped the union raise thousands of dollars for charitable causes. Richard’s service with the union is truly outstanding and has helped push the labor movement forward to a stronger level. Richard’s accomplishments will not soon be forgotten and I know that he will be greatly missed by many. When a man retires who has dedicated so much of his life to improving the lives of others, we all must strive to keep up the good work of that man and not forget the ideals and values which guided him. Mr. Speaker, I invite all of my colleagues to honor Richard Reynolds and to not only wish him the best in his retirement but also God’s speed.

TRIBUTE TO THE EXPLORAVISION AWARDS PROGRAM

HON. GEORGE E. BROWN, JR.
OF CALIFORNIA

HON. CONSTANCE A. MORELLA
OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. BROWN of California. Mr. Speaker, my colleague, Mrs. MORELLA, and I are proud to announce the introduction of the ExploraVision Resolution, a concurrent resolution to honor the ExploraVision Awards Program and to encourage more students to participate in this innovative national student science competition. The program, sponsored by Toshiba and administered by the National Science Teachers Association (NSTA), is the largest K-12 student science competition in the world. Working in teams of 3 or 4 with a teacher-advisor, students use their imaginations to envision a form of technology 20 years from now, and compete by written description and story boards. ExploraVision is truly an innovative program that energizes students with a desire to learn and increases their interest in the world of science. We are pleased to see the role this competition takes in developing students’ science skills to meet the challenges of the future. We commend the efforts NSTA and Toshiba put into making the competition meaningful and beneficial to the students.

On June 4, more than 40 students came to our Nation’s capital to receive top honors in the 1999 ExploraVision Awards. We applaud the student winners for their hard work, creativity, and ability to function together as a team to explore innovative scientific work for the future. With their enthusiasm for learning and their commitment to scientific excellence, the future of our Nation is in good hands.

Mr. Speaker, we ask our colleagues to join us in cosponsoring this resolution to support the goals of the ExploraVision Awards Program, and to commend the student winners for their outstanding accomplishment.

MASAKOWSKI ANNIVERSARY

HON. PAUL E. KANJORSKI
OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. KANJORSKI. Mr. Speaker, I rise today to pay tribute to my long time friend, Monsignor John C. Masakowski, who celebrated the 50th anniversary of his Ordination on June 4, 1999. It is my pleasure to have been invited to participate in this milestone celebration.

Monsignor Masakowski, or Father John as he is affectionately known to his parishioners, is the son of the late John and Stasia Gorney Masakowski. He was born in my hometown of Nanticoke in 1924 and educated in our local schools. Father John left the area to receive his degree in philosophy at St. Mary’s College in Orchad Lake, Michigan and his degree in theology from SS. Cyril and Methodius Seminary, also in Orchard Lake. He was ordained at St. Peter’s Cathedral of Scranton by the late Bishop William Hafey.

Father’s first assignment was at St. Mary’s parish in Swoyersville, where he served for ten years. Father John, along with the help of Judge Bernard Brominski, established the Assumpcta Council of the Knights of Columbus and served as the Council’s chaplain.

Father John served as secretary to Bishop Henry Klonowski at Scranton’s Sacred Hearts of Jesus and Mary parish for the next several years before serving at St. Mary’s Church in Wilkes-Barre. He was assigned as the administrator of St. Mary’s Church in Wanamie and later as administrator of St. Joseph’s Church in Hanover, where he oversaw the extensive remodeling and repairs of the church building.

In 1971, Father John became the twelfth pastor of his present church, Larksville’s St. John the Baptist Church. Father John has had the church remodeled and refurbished during his tenure at St. John’s and built a chapel in the parish cemetery in 1985. He reorganized the parish societies and reinstated the locally-famous parish picnic. Not long after he came to St. John’s, he organized the construction of a grotto to Our Lady of the Pines. In 1983, he organized the Fourth Degree Assembly in honor of Our Lady of Czestochowa.
Mr. Speaker, the beautiful St. John’s Church is a landmark in Larksville due to the labors of the church’s dedicated parish leader. His church and parish have always remained his top priority. On July 10, 1990, Father John was rewarded for his dedication with his designation as Monsignor Masakowski.

I have always considered Monsignor Masakowski to be a close family friend and have appreciated the warm welcome I always receive when visiting. Father John’s extraordinary sensitivity was demonstrated to me when he offered me great comfort by participating in my mother’s funeral mass. I will always be grateful for the warmth and kindness of that gesture.

As St. John the Baptist Church celebrates its Centennial Celebration this year, I am pleased and proud to join with all of my friends at the parish in congratulating Monsignor Masakowski on his milestone anniversary. I send my very best wishes to this beloved and respected man.

IN RECOGNITION OF C. WILLIAM HOWLAND

HON. JAMES P. McGOVERN
OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. McGovern. Mr. Speaker, I rise today in recognition of C. William Howland, Principal of Rice Elementary & Chaffins Elementary Schools in Holden, Massachusetts.

Mr. Howland has served the parents and children of Holden from 1961 until today. He will be enjoying a well-deserved retirement upon the completion of this school year. The career of this talented and respected teacher and administrator began with graduation from North Brookfield High School in 1957. He earned a Bachelor of Science in Education from Worcester State College in June 1961. And in the Fall of 1961 until 1966 he taught Grade 5 at the Rice Elementary School. During this period he received a Master of Education Degree from Worcester State College in August 1964.

In 1966, Mr. Howland was appointed Assistant Principal of the Dawson Elementary School where he served until 1969. He returned to Rice Elementary as Principal in 1969 where he remained until 1997. In 1997, he was appointed Principal of the Rice Elementary and Chaffins Elementary Schools.

It will be my privilege to visit the Rice Elementary School on June 1, 1999, to highlight the importance of summer reading. And with great pleasure I will honor Mr. Howland for his dedication to the children past and present who have profited from his commitment to education. I wish him all the very best in his future endeavors.

EXTENSIONS OF REMARKS

CENTRAL NEW JERSEY RECOGNIZES RICKY FLETCHER

HON. RUSK D. HOLT
OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. Holt. Mr. Speaker, I rise today in recognition of the accomplishments of Richard Fletcher and his contributions to his community. Ricky has been awarded the Boy Scouts of America’s Eagle Scout Award—the highest award in Scouting.

Ricky is assistant senior patrol leader with Troop 1776 from Titusville. He has been a Boy Scout since 1997 and had his Eagle Scout Board of Review in February of this year.

Ricky, who is 12 years old, is one of the youngest Eagle Scouts in the United States. Fewer than 2 percent of all Boy Scouts receive the Eagle Scout Award, making Ricky’s age in relation to his achievement all the more impressive.

Ricky’s accomplishments and contributions to his community are many. In addition to his Eagle Scout Project, which consisted of building benches, boardwalks, and a handicapped picnic table for a local park, Ricky has earned 41 merit badges. Only 21 are required to attain the Eagle Scout award.

Ricky is an honor roll student who is involved in several clubs at school. He has received awards and honors from numerous organizations. Ricky also participates in his church youth group, volunteers his time for litter pick up, and plays ice hockey.

Ricky Fletcher has demonstrated dedication to his goals and to his community. He has worked to improve himself and his environment. I urge all of my colleagues to join me in recognizing Ricky’s accomplishments.

HONORING ELAINE AND DAVID GILL

HON. HOWARD L. BERMAN
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. Berman. Mr. Speaker, I rise to pay tribute to my friends, Elaine and David Gill, who are being honored this year by The Brandeis-Bardin Institute. The Brandeis-Bardin Institute opened in 1947; Elaine and David began their involvement in the mid-1950s, when they were students at UCLA. More than 40 years later, the Gills remain devoted to Brandeis-Bardin. They have done much during that time to help Brandeis-Bardin in its quest to build a strong Jewish community for the present and the future.

The Gills’ ties to Brandeis-Bardin are social, professional, and familial. In 1959, the year before they were married, Elaine and David worked at the Institute as head counselors. Elaine has subsequently served as a member of the Board, chair of the Women of Brandeis-Bardin, and co-chair of the Brandeis-Bardin Associates. David is currently a member of the Board and the Executive Committee.

The Gill children have in this case emulated their parents. Elaine and David have four sons; two of them, Michael and Larry, married women they met at Brandeis-Bardin’s Camp Alonim. During a 29-year span, at least one and sometimes all four of Elaine and David’s sons (the others are Daniel and Lawrence) were involved as campers or camp directors at Alonim. In addition, Larry currently serves on the Board of Directors.

I don’t know of any husband/wife team more active in promoting Jewish causes and Judaism than the Gills. David has for many years served on the Board and Executive Committee of the Jewish Federation and is active in United Jewish Fund. He also served as Los Angeles Chair of the United Jewish Appeal’s Young Leadership Cabinet.

Elaine was chair of the Young Women’s Division of the Federation, a member of the Board of Jewish Family Services, and is now a museum docent at Skirball Cultural Center. Elaine and David have together led many missions to Israel.

Both of them are active at Valley Beth Shalom, where they served as pararabbinic counselors and assisted in creating its Havurah program. Elaine is currently Vice President of Religion at Valley Beth Shalom.

This extraordinary partnership also includes a passion for music. Elaine and David have each been vocal accompanists for musical performances at Brandeis-Bardin.

I ask my colleagues to join me in saluting Elaine and David Gill, whose selflessness and devotion to our community is inspiring. I am proud to be their friend.

CRISIS IN KOSOVO (ITEM NO. 7):
REMARKS BY LANDRUM BOLLING, HARVARD UNIVERSITY

HON. DENNIS J. KUCINICH
OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. Kucinich. Mr. Speaker, on May 6, 1999, I joined with Rep. John Conyers, Rep. Pete Stark, and Rep. Cynthia McKinney to host the third in a series of Congressional Teach-In sessions on the Crisis in Kosovo. If a peaceful resolution to this conflict is to be found in the coming weeks, it is essential that we cultivate a consciousness of peace and actively search for creative solutions. We must construct a foundation for peace through negotiation, mediation, and diplomacy.

Part of the dynamic of peace is a willingness to engage in meaningful dialogue, to listen to one another openly and to share our views in a constructive manner. I hope that these Teach-In sessions will contribute to this process by providing a forum for Members of Congress and the public to explore alternatives to the bombing and options for a peaceful resolution. We will hear from a variety of speakers on different sides of the Kosovo situation. I will be introducing into the CONGRESSIONAL RECORD transcripts of their remarks and essays that shed light on the many dimensions of the crisis.

This presentation is by Landrum Bolling, a member of Harvard University’s Conflict Management Group and a visiting Senior Fellow at the Center for International Policy. He was
part of Rev. Jesse Jackson’s delegation that freed the three American soldiers who were captured and imprisoned by the Serbs. Bolling addresses an important question: “Where do we go from here?” Based upon discussions that he and other members of the Jackson delegation had in Belgrade, Mr. Bolling predicts that Slobodan Milosevic will be prepared to accept a peace settlement that is quite close to NATO’s central demands. He also emphasizes the critical importance of the refugees being able to return to their homes.

Presentation by Landrum Bolling of Harvard University’s Conflict Management Group

Thank you, Mr. Chairman. Friends, I’m very pleased to be invited to be here with you and to share some thoughts about our present situation in Kosovo and the outcomes of it. Most of the provocative comments that have been made by Ambassador Swartz are things that I very much agree with. We’ll quarrel a bit about whether a Bosnian nation does, can or could ever exist. But he is absolutely right. We’ve got to make up our minds whether we’re going to win this war. If so, it has to be done quickly, or it will be an absolute disaster, not only for the Serb people and for the state of Yugoslavia, which will be destroyed, but we’ve also had a great many losses ourselves, and we will be made a kind of moral pariah country in the world. We cannot sustain this level of violence against people, many of whom are totally opposed to Milosevic, many of whom have no support whatsoever for the Milosevic government but have, they’re paying the price and we are not protecting any of the Kosovars who we said we were launching this campaign to protect.

Now, I think the central issue is this one, that the Ambassador has put forth very clearly: Where do we go from here? What next? I think from the general feel of things, the atmosphere that I found in Belgrade, the sorts of sotto voce conversations I had with various friends and acquaintances, and what I read in the New York Times and the Washington Post this morning, something is happening, something is about to happen. You won’t have all the answers. And yet, I think it is something coming out of it. What it will be is yet to be seen.

Our talks in Belgrade, beyond those of just getting the soldiers released, were a worthy mission in itself, though some people criticized us very severely for trying and told us quite confidently that we never succeed. Well, we did succeed. They told us it was risky and our lives would be in danger, the U.S. government could do nothing to protect us. OK, we said “fine.” We went there, we came back. We had the opportunity to explore ideas among people within the leadership of this Milosevic government. We sampled public opinion from talking to a variety of people. And I simply want to share with you a few of those impressions.

Trying to read Mr. Milosevic’s mind is an enormously complicated and lengthy task. But it really has to be done. It’s not a fig leaf to cover him. So, that will be one of the big sticking points. The withdrawal of Serb troops, police forces and special groups from this terrible activities in Kosovo. He knows he will have to withdraw. He will try tenaciously to keep some presence there. He will insist that we’ve got to have some Serb police as part of this peacekeeping force. He will deliver. He will have a certain logic to that. But how do you constrain them, control them, I don’t know. That’s one of the issues. He’s going to be very tough in bargaining about this total withdrawal. He’s going to fight for some presence to be maintained there.

The other thing is, of course, the composition of the international peacekeeping police service (whatever you call it, semantics do have some place) he wants some kind of fig leaf to cover him. So, that will be one of the things that will be stumbling block.

But I think in the end he will agree to a multilateral, armed policing service. Probably, he would like, of course, it not to carry the NATO flag and for NATO to withdraw. He will have to have a substantial NATO component within it. He will be of course very cagey in how he finalizes his commitments, and he will hope that he will be able to remain in power and be a party to the signing of whatever agreement is finally made. I think that we need to step up our negotiating efforts and indeed I think they are in fact taking place.

One of the things that bothers me is the fear that a lot of the American public, the American media, and Congress in both parties will be so amused with this need to show how tough and strong we are, and how we must not weaken and we must not give in. We must be careful that we don’t make it seem that we are manipulating by this evil man. We are in danger of taking counsel of our fears instead of mount your courage of our convictions and our hopes for a better world and for a solution.

I think that a solution that we could accept is possible. It will take hard bargaining, it will take tremendous attention to details, and here’s one thing I want to say finally, Mr. Chairman. I think we need to give much more attention to the issue of the process by which we accomplish these things. We have an illusion that somehow if we get the top leaders together around the table, we will produce the document that will be the one that will solve the problem.

That’s one of the troubles with the Dayton agreement. We got the people together, we got them bickering, we gave them into so-called negotiating and gave the document to sign. The document was enormously complicated and lengthy which was wrong. It just sent the message to the state and all the rest of it. We gave it to them and said: “Now you sign here and we’re going out and implementing it.” The Dayton agreement has a lot of flaws but it really has, the applica- tion has turned out to be. We didn’t really enforce it and we didn’t carry it out in all kinds of ways.

I think we need to have a step by step process in motion in which specialists can come forth with proposals of how these issues can be dealt with and how to involve all of the parties who must be a part of the final framing of that agreement and signing it. The idea that you can make peace by a dicta is not a viable concept of international diplomacy, it simply won’t work. That is not real diplomacy nor will it produce peace and stability in the region.

The final thing is that we’ve got to ingrain in our policy and in our actions the return of the refugees to their homes. This is the heart of the problem also in Bosnia. It is the heart of the problem if we cannot deliver on this obligation to enable people to go back to where they came from. That above everything else is what they want. Don’t let anybody tell you, Henry Kissinger or anyone else, the refugees don’t want to go home, that’s nonsense. And if we can’t deliver that, we are bankrupt in terms of creative diplomatic ideas, and we expose our posturing of power as a hollow, hollow thing.

A TRIBUTE TO VICTOR A. KOVNER

HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mrs. LOWEY. Mr. Speaker, I rise today to express my great admiration for Victor A. Kovner, a remarkable leader and citizen who this year receives the Stanley M. Isaacs Human Relations Award from the New York Chapter of the American Jewish Committee.

A man of high principle, piercing intelligence, and extraordinary ability, Mr. Kovner has touched countless lives in the New York area through a variety of professional and civic activities, while also promoting the cause of peace and justice through his senior position with the law firm of Davis Wright Tremaine, Mr. Kovner is widely respected for his legal experience and skill, qualities evident during his service as Corporation Counsel of the City of New York, and in a wide range of other important positions such as Chair of the New York State Commission on Judicial Conduct, as well as Chair of the New York City Bar Association’s Committees on the Judiciary and Communications & Media Law.

But despite this stellar professional record, it is Mr. Kovner’s extra-professional accomplishments in which his character and dedication are most apparent. He has been instrumental in advancing the cause of Middle-east peace as a member of the board of Americans for Peace and as a leader with the Israel Policy Forum.

In the United States, Mr. Kovner has been a tireless advocate for social justice and progress. He helped found the Black-Jewish Coalition, chaired the board of Planned Parenthood, and worked to advance such important causes as anti-Semitism, environmental protection, and civil liberties.

In short, Victor Kovner is a man of national and international stature, whose vision and
Ms. CARSON. Mr. Speaker, I rise today to congratulate and bestow much deserved recognition to Reggie Cross of Arlington High School located in my hometown of Indianapolis, Indiana.

Reggie exemplifies what it means to be a student-athlete. As a student, Reggie has satisfied the National Collegiate Athletic Association’s Scholastic Aptitude Requirements and will be able to go to the college of his choice and pursue his goal of a psychology degree. As an athlete, Reggie has excelled in both basketball and track. In basketball, Reggie helped the Arlington Knights win the city championship, and earned a spot on the city All-Star team. As Captain of the Arlington Track team, Reggie set the 400 meter record for both the North Central Sectional and the City Championship. At the State Track and Field Meet, Reggie blew away the rest of the field to win the State 400 meter championship.

I can pay no greater tribute to Reggie than his track coach, Harold Grundy did when he said “Nobody works harder than Reggie.” Reggie shows us that hard work and determination are the best way for young people to achieve their dreams.

Mr. Speaker, at a time when many people are looking down at young people, we can all look to the Regents of our communities and know that the future of America is still looking up.

HONORING MS. ESTHER KRAUS

HON. JERRY MORAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. MORAN of Kansas. Mr. Speaker, today I would like to recognize the dedication of Mrs. Esther Kraus to the young people of Kansas. She has served with distinction for ten years as the coordinator of the We the People . . . Program for Kansas’ First congressional District.

Mrs. Kraus’ superior efforts on behalf of this program have far exceeded the normal duties of a district coordinator. She has tirelessly promoted the program, identifying local people who are interested in civics and government and finding ways for them to contribute to the goals of We the People . . . Mrs. Kraus has also provided materials and support to high school government teachers who are interested ion entering their classes in the competition.

HONORING MS. ESTHER KRAUS

CONGRATULATING ALEXANDER GRAHAM BELL ELEMENTARY FOR RECEIVING THE BLUE RIBBON SCHOOL DESIGNATION

HON. JAY INSLEE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, June 7, 1999

Mr. INSLEE. Mr. Speaker, Alexander Graham Bell Elementary is an outstanding elementary school in the First Congressional District of the State of Washington. The students and staff of Alexander Graham Bell Elementary recently received the Blue Ribbon School designation awarded by the U.S. Department of Education.

The Blue Ribbon School designation is a very prestigious award. It is given to schools who are especially effective in meeting local, state and national education goals. Blue Ribbon Schools, such as Alexander Graham Bell Elementary, serve as models for other schools seeking to improve the quality of education for their students.

The staff, students and parents at Alexander Graham Bell Elementary are committed to achieving high academic standards. Over 75% of their fourth graders met the state standard on the Washington Assessment of Student Learning in reading this year. Their math scores also doubled from last year’s results.

Clearly these remarkable achievements do not occur by chance. More than 100 parents volunteer at Alexander Graham Bell Elementary. These dedicated parents mentor students, serve as “lunch buddies” and assist teachers. Education at Alexander Graham Bell Elementary is a community priority, and its teachers, parents and staff should be commended for the commitment they have made to our children.
has touched countless lives in the New York area through a variety of professional and civic activities.

For seven years, Mr. Rapfogel has been the Executive Director of the Metropolitan New York Coordinating Council on Jewish Poverty, one of New York City's largest not-for-profits. Through the Met Council, Mr. Rapfogel has been instrumental in expanding home care, housing, and employment opportunities, while also providing crisis intervention and other services to deserving recipients. Mr. Rapfogel's commitment to social progress is matched by a life-long devotion to the Jewish community. He has been the Executive Director of the Institute for Public Affairs of the Orthodox Union and of the American Jewish Congress Metropolitan Region.

In addition, Mr. Rapfogel contributed his time and energy to all New Yorkers by serving as an able and effective Assistant Comptroller of New York City.

We are a stronger community thanks to William Rapfogel's vision and leadership. I am confident that Mr. Rapfogel's exceptional example will remain a source of guidance and inspiration to his colleagues and admirers for many years to come.

IN HONOR OF THE 25TH ANNIVERSARY OF THE OHIO BOYCHOIR

HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. KUCINICH. Mr. Speaker, I rise today to honor the 25th Anniversary of the Ohio Boychoir, a community choir rich with talent, passion for music and community pride. Established in 1974, the Ohio Boychoir is a very distinguished non-profit organization open for all boys from third grade to voice change regardless of race, creed or economic status. The major goals of the Ohio Boychoir are to develop appreciation for music and vocal quality. One of Ohio's most prized cultural assets, the Ohio Boychoir is supported by contributions and grants from individuals, corporations, foundations and other organizations.

Over the past 25 years the Boychoir has been invited to give concerts at many prestigious venues. In 1982, the choir sang at National Christmas Tree Lighting at the White House and at the Bach Festival at the Kennedy Center. Based on their incredible performance in the past, the choir was invited to sing at a High Mass at Notre Dame Cathedral in Paris, France and at the Franciscan Church in Salzburg, Austria in 1984. They have also sung at the Air Force Academy Cadet Chapel in Colorado Springs.

In addition to the many tours and concerts, the Ohio Boychoir has been recognized with a very unique international award. The Ohio Boychoir was selected to be presented with the Gold Award at the Munich International Music Festival.

The Boychoir of Ohio has brought countless hours of entertainment across the world. They have filled the hearts of thousands with joy and excitement through their music.

My fellow colleagues, please join me in honoring the Ohio Boychoir on the 25th Anniversary and wish them luck on future performances.

PERSONAL EXPLANATION

HON. JAMES P. McGOVERN
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. McGOVERN. Mr. Speaker, because of weather-related travel difficulties, I was unfortunately detained in Massachusetts on Monday, May 24, 1999 and missed votes as a result. Had I been here, I would have voted in the following way: I would have voted "yea" on rollocall votes 145 and 146.

CENTRAL NEW JERSEY BENEFITS FROM THE CONTRIBUTIONS OF BARRY FISHER

HON. RUSHD D. HOLT
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. HOLT. Mr. Speaker, I rise today in recognition of the accomplishments of Barry Fisher and his contributions to our central New Jersey community. Mr. Fisher has been active in his community for many years and continues to give his time and efforts.

Mr. Fisher was recognized by the Marlboro Jewish Community Center at a ceremony on June 5, 1999. Barry Fisher has been active and involved in many civic organizations. He is on the board of the Federation of Greater Monmouth County and the Western Monmouth Advisory Board. He is vice president of the Freehold Hebrew Benefits Society, vice president of the New Jersey branch of the United Synagogues of Conservative Judaism, and he is on the board of trustees of the Western Monmouth Jewish Community Center. He held the position of president of the Marlboro Jewish Center and served on the board of directors of the Freehold Center Partnership.

Mr. Fisher also maintains his business, Ace Aluminum, which his family opened when they moved to Monmouth County in 1953. He and his wife Rose have raised four children, including twins.

Barry Fisher's work over the years has contributed to the growth and well being of the central New Jersey community as a whole. I urge all my colleagues to join me in recognizing Barry Fisher and his accomplishments.

IN HONOR OF DANIEL J. BADER OF MILWAUKEE

HON. THOMAS M. BARRETT
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. BARRETT of Wisconsin. Mr. Speaker, on June 2, 1999, the American Jewish Committee, Milwaukee Chapter, will host a dinner in honor of one of Milwaukee's kindest and most generous citizens, Mr. Daniel J. Bader.

Dan is the President of the Helen Bader Foundation, a charitable foundation named for his mother, Helen Bader, a true philanthropist who passed away in 1989. After her death, Dan and his family sought to create a lasting way to fulfill her dream of making Milwaukee and the world better places for human growth and development. Since the inception of the foundation in 1992, more than $50 million in grants have been awarded with the expressed intention of advancing the well-being of people and promoting successful relationships with their families and communities.

As President, Dan spearheads the foundation's everyday interaction with projects and programs here in the United States, mainly in Wisconsin, and abroad in Israel. He also holds a seat on the seven-member Board of Directors, which evaluates grant proposals and provides strategic oversight of the foundation's grant programs, mainly in the areas of Alzheimer's disease and dementia, early childhood development in Israel, economic development, education, Jewish life and learning, and supportive programs for central city children and youth.

Dan Bader's commitment to education, the strengthening of our communities, and the improvement of life in Israel and in Wisconsin make him a bright light of opportunity to disadvantaged families in Wisconsin and in Israel. In fact, the American Jewish Committee considers his work to be a complement to its own vital human relations agenda. And that is why the AJC is honoring Dan Bader on June 2.

Dan Bader is a successful businessman and family man. His decision to maintain his family's commitment to their fellow man speaks volumes about his character. Thousands of people in Wisconsin and around the world have benefitted from his work and generosity.

We in Milwaukee are proud to call him colleague, neighbor, and friend. I congratulate him on his accomplishments and I join with the American Jewish Committee of Milwaukee in thanking him.

HONORING THE BEACON HOUSE ASSOCIATION OF SAN PEDRO

HON. STEVEN T. KUYKENDALL
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. KUYKENDALL. Mr. Speaker, I rise today to recognize the Beacon House Association of San Pedro, a licensed, nonprofit alcohol and drug recovery program located within my district. This month, the Association is celebrating its 25th year in operation. It is a distinguished program that has assisted over 3,000 individuals seeking help for substance abuse problems.

For 25 years, the Beacon House Association has provided residential services to newly recovering alcoholics and addicts. The facility has been so successful due to its culture that one must do "whatever it takes" to complete the rigorous program. The success rate for the individuals of the Beacon House is exceptional, with nearly 70% of those treated remaining substance free following the program.
The Beacon House Association is also very active within the San Pedro community. The individuals undergoing treatment devote nearly 20,000 hours each year to volunteer community service. They are actively involved in tutoring local students, removing graffiti from the community, and staffing local festivals and functions, among other things.

Drug and alcohol abuse is a serious problem affecting our society, but programs like the Beacon House Association provide the appropriate rehabilitative care to those individuals with the greatest need for help, ultimately returning them to the community as fully productive citizens.

I commend the Beacon House Association of San Pedro for an outstanding twenty-five years and I wish them continued success.

PERSONAL EXPLANATION

HON. MICHAEL G. OXLEY
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. OXLEY. Mr. Speaker, I was unavoidably absent from the House Chamber for four roll-call votes held on Wednesday, May 26. Had I been present, I would have voted "nay" on roll-call votes 158, 159, 160, and 161.

IN HONOR OF REV. JAMES M. LYNCH'S 25TH ANNIVERSARY OF ORDINATION

HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. KUCINICH. Mr. Speaker, I rise today to honor Reverend James M. Lynch for 25 years of Ordination.

Reverend Lynch was born in Cleveland, Ohio and attended St. Edward High School. He went on to study at Borromeo College and St. Mary's Seminary. Throughout his career Reverend Lynch has worked hard to serve his community. By going on many international missions he has also helped less fortunate people throughout the world. Recently, he took a permanent oath in the Maryknoll Missionaries and is unfortunately no longer a priest of the diocese of Cleveland.

Since 1911, thousands of concerned Catholics across the United States have responded to the worldwide cry of the poor by becoming Maryknoll Missionaries. Today, world renowned Maryknollers help many people overseas build communities of faith. Some work in war zones with refugees, others minister to the sick, the elderly, orphans or people with AIDS. Through lives of dedicated service, Maryknollers translate the gospel of love into different languages and in different cultures. Reverend Lynch is currently helping people in need as a Maryknoll Missionary in Puno, Peru.

Reverend Lynch is a wonderful example of being a man for others. Through his dedication and work Reverend Lynch has changed hundreds of lives for the better. His example is truly something to be recognized and praised.

EXTENSIONS OF REMARKS

My fellow colleagues, please join me in honoring this man for twenty-five years of dedicated service.

THE SPIRIT OF STONEWALL

HON. CAROLYN B. MALONEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mrs. MALONEY of New York. Mr. Speaker, I rise to commemorate the thirtieth anniversary of the modern gay rights movement. On Friday, June 27, 1969, the New York City Police Department raided and attempted to close the Stonewall Inn for the perceived crime of operating a dance bar that catered to homosexuals. Recall, that in 1969 New York it was illegal for men to dance with men, although, oddly, it was legal for women to dance with women.

In New York City and almost everywhere, police raids on gay bars were routine. Usually, the patrons scurried, fearful of the repercussions of being caught in a gay bar. On this night, brave young men and women stood up to the police. They were no longer willing to accept daily harassment and the abridgement of their civil rights.

The Police operated in their customary fashion, hurling a string of homophobic comments, as they evicted the bar patrons one by one. As patrons and onlookers gathered outside, the crowd grew. A parking meter was up-rooted and used to barricade the door. Thirteen gay people were arrested that first night.

This was the beginning of a number of nights of demonstrations that drew national attention. Moreover, it demonstrated to the gay community that there was an alternative to continued oppression. It also showed the community at large that gays were no longer willing to be silent in the face of injustice. After that night the movement to protect the rights of gays, lesbians, bisexuals and the transgendered gained strength and respectability.

In the last thirty years, much has changed. Gay bars can be found in almost every town—from Anchorage, Alaska to Wheeling, West Virginia. More important, bookstores, hotlines and support groups have appeared in smaller communities to ease the isolation previously felt by many gays. The legacy of Stonewall can be seen in the lives of hundreds of thousands of men and women who are able to live their lives honestly and out of the closet. The Stonewall Revolution inspired men and women to “come out” and showed young gays and lesbians that they are not alone.

Today, an openly gay person is no longer automatically disqualified from holding public office or other positions of trust. Now, numerous communities have embraced the post-Stonewall reality by passing laws specifically protecting against discrimination based on real or perceived sexual preference.

I am proud to represent thousands of gay and lesbians in Manhattan and Queens and I am proud of my close relationships with an support of the Stonewall Veterans Association, a group of those actually present on that fateful night.

As we celebrate the anniversary of the modern gay rights movement, we recognize the expansion of freedom has not been uniform and much remains to be done to celebrate the important, but incomplete, steps toward equality for those previously banished to the closet. Much more remains to be done to eliminate irrational prejudice against those who are different. And we must recommit ourselves to the fight against all types of bigotry, whether based on race, religion, national origin, sex or perceived sexual preference.

IN HONOR OF BETTY BAUMAN

HON. PETER DEUTSCH
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. DEUTSCH. Mr. Speaker, I rise today to honor Betty Bauman, soon to be named Woman of the Year by the American Sportfishing Association (ASA). Ms. Bauman’s extraordinary vision and enthusiasm has made her an exemplary contributor to the sportfishing community, and I congratulate her on this well deserved award.

Betty Bauman has become a fishing guru to thousands of women through her “Ladies, Let’s Go Fishing!” weekend saltwater fishing seminars in Florida. Ms. Bauman’s “no-yelling school of fishing” features a non-intimidating environment, hands-on training, a real fishing expedition, and a fish filleting and cooking class. Held in conjunction with the Florida Department of Environmental Protection, Division of Marine Fisheries, the program is in its third year and now attracts more than 600 women annually.

Betty Bauman’s success in attracting women to her fishing weekends demonstrates her intense dedication to increasing the overall participation in sportfishing, a fundamental goal of the ASA. Furthermore, her life-long enthusiasm for the sport is reflected in her notoriety within the fishing community. Through her efforts she has successfully cultivated a love of sportfishing within new participants, introducing a broader cross-section of society to the complete fishing experience.

Mr. Speaker, through her unique vision and entrepreneurial spirit, Betty Bauman has contributed a great deal to the sportfishing community, making her especially deserving of this award. I wish to convey a heartfelt congratulations to Betty and her family for this honor, as well as many thanks to her for working to enrich the lives of the entire South Florida community.

IN HONOR OF MR. AND MRS. ABRAHAM ZUCKERMAN ON THE 50TH ANNIVERSARY OF THEIR ARRIVAL TO THE UNITED STATES

HON. ROBERT MENENDEZ
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. MENENDEZ. Mr. Speaker, I rise today to recognize Mr. Abraham Zuckerman and his
June 7, 1999

wife, Mina, as they prepare to celebrate the 50th Anniversary of their emigration to the United States.

Fifty years ago, Mr. and Mrs. Zuckerman left behind the degradation of the Nazi regime and the loneliness and disdain of the displacement camps and headed to America to start a new life—one without bitterness and without hatred.

The Zuckerman's relocated to New Jersey and raised their family, which has now grown to three children, eight grandchildren, and one great-granddaughter. The Zuckerman's flourished in their new homeland but they have continued to bear witness to the horrors they endured during the Holocaust.

Mr. Zuckerman's commitment to bearing witness to the honest and truthful portrayal of the Holocaust has spanned a lifetime. He has made it his quest to educate people about both the atrocities and the heroism of the era. Mr. Zuckerman has been dedicated to honoring the memories of the 6 million Jews who perished in the Holocaust, including countless friends and relatives, as well as honoring the memory of the man to whom he says he owes his life—Oskar Schindler.

Well before Oskar Schindler was a household name, Mr. Zuckerman had been personally responsible for the renaming of more than 20 streets in the State of New Jersey after the German industrialist and remarkable humanitarian. In fact, Mr. Zuckerman committed his tory to prose in a truly extraordinary and captivating book, "A Voice in the Chorus: Memories of a Teenage Saved by Schindler."

In addition, Mr. Zuckerman is a founding member of the United States Holocaust Memorial Museum in Washington, DC, a member of the Executive Committee of the Holocaust Research Center at Kean College in New Jersey, and is the President of the Jewish Education Center of Elizabeth, New Jersey.

Mr. and Mrs. Zuckerman have overcome unimaginable obstacles and they have done it with love, compassion, understanding, and, most importantly, hope. For these tremendous accomplishments, I ask that you all join me in honoring Mr. and Mrs. Zuckerman on this momentous occasion.

**JEWISH COMMUNITY CENTER OF MONMOUTH COUNTY HONORS RUTH HYMAN**

**HON. RUSH D. HOLT OF NEW JERSEY**

**IN THE HOUSE OF REPRESENTATIVES**

**Monday, June 7, 1999**

Mr. HOLT. Mr. Speaker, I rise today in recognition of the contributions of Ruth Hyman to the Jewish Community Center of Monmouth County. Ruth has been involved with the Jewish Community Center’s Capital Campaign since its inception.

The Community Center will be holding several events to honor Ruth's work. The Capital Campaign’s building will be named after her to recognize her commitment. The Community Center will be holding several events to honor Ruth’s work. The Capital Campaign’s building will be named after her to recognize her commitment.

Mr. Zuckerman’s relocated to New Jersey and raised their family, which has now grown to three children, eight grandchildren, and one great-granddaughter. The Zuckerman’s flourished in their new homeland but they have continued to bear witness to the horrors they endured during the Holocaust.

Mr. Zuckerman’s commitment to bearing witness to the honest and truthful portrayal of the Holocaust has spanned a lifetime. Mr. and Mrs. Zuckerman have overcome unimaginable obstacles and they have done it with love, compassion, understanding, and, most importantly, hope. For these tremendous accomplishments, I ask that you all join me in honoring Mr. and Mrs. Zuckerman on this momentous occasion.

**EXTENSIONS OF REMARKS**

**HON. DENNIS J. KUCINICH OF OHIO**

**IN THE HOUSE OF REPRESENTATIVES**

**Monday, June 7, 1999**

Mr. KUCINICH. Mr. Speaker, I rise today to congratulate an outstanding young woman, Miss Alicia Denihan, on her graduation from Valley Forge High School in Parma, Ohio.

Her graduation is an achievement that took tremendous strength and determination. In December 1995, while walking home from a friend’s house, Alicia was struck by a drunk driver, leaving her with multiple and critical injuries. She was in critical condition for days and suffered severe head trauma and injuries which included a broken hip, cheekbone and lacerated liver. Once involved in numerous athletic activities such as ballet, karate, ice skating, gymnastics and volleyball, Alicia lay comatose for two months.

Initially her prognosis was not promising. Doctors did not expect she would ever wake up, walk, talk, read or write. However, Miss Denihan far exceeded those expectations. After months of hard work in speech and physical therapy Alicia was able to return to school by April of 1996. This miracle young person used only a walker as an aid.

As a result of Alicia’s courage and the support of her family members, teachers, doctors, and therapists, Alicia will attend her high school graduation ceremony on June 8. She plans to attend Cuyahoga Community college by April of 1999.

Mr. Speaker, I ask that my fellow colleagues join me in congratulating this remarkable young woman on her accomplishments. I wish her continued success in her recovery and future endeavors.

**THE NEED FOR EARLY DETECTION OF PROSTATE CANCER**

**HON. JOHN P. MURTHA OF PENNSYLVANIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Monday, June 7, 1999**

Mr. MURTHA. Mr. Speaker, there has been a lot of discussion about the benefits versus risks of the Prostate Specific Antigen (PSA) test in the early detection of prostate cancer. Some have opposed regular PSA testing for the general male population that falls outside of any high-risk category because they argue it will find many slow-growing cancers that should not be treated. They say this is because the risk of serious side effects such as impotency or decrease in urinary function that may result from treatment of the cancer may be greater than the risk of dying of the cancer if it is slow-growing.

I recently raised this question with a good friend of mine, Arnold Palmer, who has been an advocate of increased education and awareness of the issue of prostate cancer due to his own personal experience. I would not that he strongly believes the early detection of prostate cancer due to a PSA test saved his life.

I would like to share with you his as well as his doctor’s response to the question of whether to promote regular PSA testing. Their response supports what I have been promoting Medicare coverage of regular PSA testing: because it detects cancer early, it saves lives. I think that has to be the bottom line.

**YOUNGSTOWN, OHIO**

May 11, 1999.

Hon. John P. Murtha,
House of Representatives, Rayburn House Office Building, Washington, DC.

Dear Congressman Murtha: I have just heard back from my medical specialists in the prostate cancer field at the Mayo Clinic with a response to your inquiry generated by the recent article in the New York Times on the subject of PSA testing.

Dr. Robert Myers, the surgeon who performed my prostatectomy, has given me his opinion, which was relayed to me by his associate, Dr. Ian Hay, with whom I have been in frequent contact over the last two years and who has been out of the country; hence the delay in this response to you. Let me quote directly from Dr. Myers' comments:

"Any prostate cancer no matter how small it is can be lethal if left long enough. There is no way to predict which ones will be life threatening in individual patients, especially younger men. Cure is certain in those patients who have cancer truly confined to the prostate and it is removed surgically. The smaller the cancer the better in terms of successful surgery.

"The PSA test allows discovery of the smallest cancers years before they can be detected any other way. Thus, it stands to reason that if PSA is detecting more small cancers and they are removed surgically, the death rate from prostate cancer will fall. This is exactly what is being recorded in the last few years. The surgery needs to be performed by surgeons who are highly skilled in removing the prostate without affecting either urinary control or sexual function.

"The best long-term survivals (more than 10 years) from prostate cancer death are associated with surgery as a solution to treating this cancer."

Jack, I hope that this provides you with the sort of expert opinion on this very important matter that you wished. I think that it is very succinct and to the point. It encourages me to continue to publicly urge men to submit to PSA testing on a regular basis as I have been doing since my surgery more than two years ago.

I trust that your Congressional duties are permitting you time to play some golf. I
HONORING THE COLORADO CLASS 3A STATE BASEBALL CHAMPIONS—LAMAR HIGH SCHOOL

HON. BOB SCHAFFER
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. SCHAFFER. Mr. Speaker, I rise today to extend my heartfelt congratulations to the Lamar High School boys baseball team on their impressive Class 3A state-championship. The 10–2 victory over Eaton School was a superb contest between two talented and deserving teams. In championship competition, though, one team must emerge victorious, and Lamar proved themselves the best in their class—truly second to none.

The Class A state-championship is the highest achievement in high school baseball. This coveted trophy symbolizes more than just the team and its coach, as it also represents the staunch support of the players’ families, fellow students, school personnel and the community. From now on, these people can point to the 1999 boys baseball team with pride, and know they were part of a remarkable athletic endeavor. Indeed, visitors to this town and school will see a sign proclaiming the Class 3A champions, and know something special had taken place there.

The Lamar baseball squad is a testament to the old adage that the team wins games, not individuals. The combined talents of these players coalesced into a dynamic and dominant baseball force. Each team member also deserves to be proud of her own role. These individuals are the kind of people who lead by example and serve as role-models. With the increasing popularity of sports among young people, local athletes are heroes to the youth in their home town. I admire the discipline and dedication these high schoolers have shown in successfully pursuing their dream.

The memories of this storied year will last a lifetime. I encourage all involved, but especially the Lamar players, to build on this experience by dreaming bigger dreams and achieving greater successes. I offer my best wishes to this team as they move forward from their Class 3A state-championship to future endeavors.

HON. ROB PORTMAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. PORTMAN. Mr. Speaker, I rise to recognize the achievements of a distinguished constituent and friend, Thomas L. Conlan, Jr. Tom is retiring as co-founder, President and CEO of Student Loan Funding Resources, Inc., which is headquartered in Cincinnati, Ohio. Tom has helped to open the doors of college opportunity to hundreds of thousands of young students, and the nation during his nearly two decades of dedicated service in education.

In so many areas of his life, Tom’s commitment has been to access and opportunity. He has played an important role in the development of the National Underground Railroad Freedom Center in Cincinnati. A newly-endowed Ohio foundation, named for his father, Thomas L. Conlan, made a leadership gift to support and advance the Freedom Center’s educational programs for both students and educators. The grant funds will be used to help develop a curriculum for school children focusing on the Underground Railroad, as well as highlighting struggles for freedom across the globe.

In the 1970s, prior to founding SLFR, Tom was Executive Director of the Ohio Energy Advisory Committee, where he led the development of the Ohio winter heating assistance program. He also authored the Federal Home Assistance Program Plan for Ohio. In this work Tom testified before Congress and the Ohio General Assembly on energy assistance for low-income citizens.

His civic involvement over the years includes a founding membership in Ohio Concerned Citizens for the Old, the City of Cincinnati’s Energy Conservation Committee; the Ohio Department of Natural Resources Advisory Council to the Little Miami River; and co-chairmanship of the first Little Miami River Cleanup involving 4,000 volunteers. In 1997, he chaired the Education Visioning Committee of the Greater Cincinnati Olympic Commission.

Tom is Vice President of the Hamilton County Alcohol and Drug Addiction Services Board. He is a former trustee of the Queen City Foundation; the Greater Cincinnati Tall Stacks Commission; and the Catholic Big Brothers Association of Cincinnati.

Tom is also devoted to his family—his wife and partner, Nan; his stepchildren, Kate and Matt; his granddaughter, Morgan Ann; his brother, John; five sisters, Gretta, Maureen, Mary Carol, Ginny and Chris; and his nieces and nephews. He also carries dear the memory of his parents.

Nowhere has Tom been more directly responsible for improving the lives of people in need than in this stewardship of the education loan financing company, SLFR, that he co-founded. During his tenure, SLFR has provided funds and support services to more than 600,000 students. Tom has been a national leader in fashioning education loan policy to benefit America’s students and their families.

In 1993, he helped establish the Coalition for Student Loan Reform that has been a beacon for industry self-reform nationwide. He advocated the superiority of the Federal Family Education Loan Program (FFELP), a long-standing public-private partnership involving private funds, localized administration and loan guarantees from Washington.

Under Tom’s leadership, SLFR developed innovative education loan credit products in Ohio that represent affordable education financing options. The Supplemental Student Loan Program of Ohio, which provides low-cost loans for students and families whose financing needs exceed the amount of assistance available through federal and state financial aid programs, and the Jump Start Loan, which rewards borrowers with a sharply reduced interest rate, are examples of these options.

THANKS TO “FRAU” JANE EMPYE-THEEP

HON. THOMAS M. BARRETT
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. BARRETT. Mr. Speaker, I appreciate this opportunity to share with my colleagues my appreciation for the dedicated service of Ms. Jane Empey-Theep. On June 8th, her family, friends and colleagues are gathering in Milwaukee to celebrate her career and wish “Frau” Empey-Theep well as she retires as Principal of the Milwaukee German Immersion School.

Milwaukee German Immersion School (MGIS) is one of several schools in the Milwaukee Public Schools system offering total language immersion programs that attract children from all over the city. Its success directly reflects the determination and ingenuity of Principal Jane Empey-Theep.

Ms. Empey-Theep began her career with Milwaukee Public Schools over 20 years ago, and when she became MGIS’ Principal in 1989, she brought a wealth of experience to the job. She knew that, to truly excel, MGIS needed to involve and empower students and their parents. Under her direction, that is exactly what MGIS has done. Last year, the Milwaukee PTA chose an MGIS teacher as Parent of the Year and an MGIS parent as Parent of the Year. The school also won recognition from Redbook Magazine and several other distinctions, including what is perhaps the highest honor: designation by U.S. Department of Education as a Blue Ribbon School.

Jane Empey-Theep has been actively and personally involved in leading MGIS toward excellence. She hasn’t spent time firmly seated behind her desk. She has been out interacting with the students and the staff, meeting with parents and educators and students. She has worked not only to execute troubleshooting, but also to identify and implement strategies for improvement, and she has empowered the educators, staff, parents and students of MGIS to do the same.

Now, after over two decades of service to Milwaukee Public Schools and 10 years as Principal, Jane Empey-Theep is hanging up her hall passes. Along with many others in our community, I commend her for the work to push the boundaries of educational excellence and admire her efforts to cultivate the talents of the students at MGIS.

As the parent of two MGIS students, I thank Jane Empey-Theep for making school a place where all kids can learn and excel, and a place where they look forward to going. I am proud to join her friends and admirers in expressing appreciation for her career of dedicated service to our community, to our schools, and to our children.

A TRIBUTE TO THOMAS L. CONLAN, JR.

HON. ROB PORTMAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. PORTMAN. Mr. Speaker, I rise to recognize the achievements of a distinguished constituent and friend, Thomas L. Conlan, Jr. Tom is retiring as co-founder, President and CEO of Student Loan Funding Resources, Inc., which is headquartered in Cincinnati, Ohio. Tom has helped to open the doors of college opportunity to hundreds of thousands of young students, and the nation during his nearly two decades of dedicated service in education.

In so many areas of his life, Tom’s commitment has been to access and opportunity. He has played an important role in the development of the National Underground Railroad Freedom Center in Cincinnati. A newly-endowed Ohio foundation, named for his father, Thomas L. Conlan, made a leadership gift to support and advance the Freedom Center’s educational programs for both students and educators. The grant funds will be used to help develop a curriculum for school children focusing on the Underground Railroad, as well as highlighting struggles for freedom across the globe.

In the 1970s, prior to founding SLFR, Tom was Executive Director of the Ohio Energy Advisory Committee, where he led the development of the Ohio winter heating assistance program. He also authored the Federal Home Assistance Program Plan for Ohio. In this work Tom testified before Congress and the Ohio General Assembly on energy assistance for low-income citizens.

His civic involvement over the years includes a founding membership in Ohio Concerned Citizens for the Old, the City of Cincinnati’s Energy Conservation Committee; the Ohio Department of Natural Resources Advisory Council to the Little Miami River; and co-chairmanship of the first Little Miami River Cleanup involving 4,000 volunteers. In 1997, he chaired the Education Visioning Committee of the Greater Cincinnati Olympic Commission.

Tom is Vice President of the Hamilton County Alcohol and Drug Addiction Services Board. He is a former trustee of the Queen City Foundation; the Greater Cincinnati Tall Stacks Commission; and the Catholic Big Brothers Association of Cincinnati.

Tom is also devoted to his family—his wife and partner, Nan; his stepchildren, Kate and Matt; his granddaughter, Morgan Ann; his brother, John; five sisters, Gretta, Maureen, Mary Carol, Ginny and Chris; and his nieces and nephews. He also carries dear the memory of his parents.

Nowhere has Tom been more directly responsible for improving the lives of people in need than in this stewardship of the education loan financing company, SLFR, that he co-founded. During his tenure, SLFR has provided funds and support services to more than 600,000 students. Tom has been a national leader in fashioning education loan policy to benefit America’s students and their families.

In 1993, he helped establish the Coalition for Student Loan Reform that has been a beacon for industry self-reform nationwide. He advocated the superiority of the Federal Family Education Loan Program (FFELP), a long-standing public-private partnership involving private funds, localized administration and loan guarantees from Washington.

Under Tom’s leadership, SLFR developed innovative education loan credit products in Ohio that represent affordable education financing options. The Supplemental Student Loan Program of Ohio, which provides low-cost loans for students and families whose financing needs exceed the amount of assistance available through federal and state financial aid programs, and the Jump Start Loan, which rewards borrowers with a sharply reduced interest rate, are examples of these options.
June 7, 1999

Perhaps Tom’s most important legacy will be the Thomas L. Conan Education Foundation. The Foundation was established in June 1998 from the re-organization of the original Student Loan Funding Corporation, which was co-founded by Tom and his father in 1981. The Foundation helps many Ohioans obtain an affordable, high quality education.

All of us in Cincinnati wish Tom well in his retirement. We expect his retirement years will reflect the same civic spirit that he has carried throughout his life.

HONORING THE FUTURES ACADEMY OF BENTON HARBOR AREA SCHOOLS

HON. FRED UPTON
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. UPTON. Mr. Speaker, it is a great pleasure for me to rise today to honor the Futures Academy of the Benton Harbor Area Schools in Benton Harbor, Michigan. This organization is dedicated to providing education, guidance and new opportunities for students in my hometown.

Now, more than ever, as random acts of violence in our schools terrorize our schools, we must look to our communities for creative ways to keep kids on the right path, giving them a hopeful, bright future.

For two years now, this highly successful program has given students a chance to learn many of life’s essential lessons that cannot always be taught in the classroom. In weekly discussions, they meet to discuss morality, values, and responsibility.

They learn respect for each other, respect for the community, and respect for themselves. In short, the skills and lessons they will need for the future. If the future is in the hands of these young adults, I think we are all in good hands.

They are visiting Washington, D.C. this week to learn more about their government and civic responsibility.

Mr. Speaker, I urge my colleagues here in the House to take notice of this great organization. By working together, Benton Harbor has put in place a successful program that is helping children grow from students into responsible, motivated young adults. It is formula that I would encourage my colleagues to promote in their own districts and communities.

These are really terrific kids. I am so impressed to see how they have dedicated themselves and agreed to work hard toward some very important goals. Again, Mr. Speaker, please join me in celebrating the Futures Academy of Benton Harbor.

EXTENSIONS OF REMARKS

INTERNATIONAL TAX SIMPLIFICATION FOR AMERICAN COMPETITIVENESS ACT

HON. SANDER M. LEVIN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. LEVIN. Mr. Speaker, today I am introducing along with my colleagues Representatives HOUGHTON, MATSUI, SAM JOHNSON, HERGER, ENGLISH, and CRANE to introduce our bill, “The International Tax Simplification for American Competitiveness Act of 1999.”

There has been general agreement that the current U.S. rules for taxing international income are unduly complex. This legislation addresses these problems by rationalizing and simplifying the international tax provisions of the U.S. tax laws by simplifying foreign tax credits; encouraging positive incentives; providing incentives for performance of research and developing in the United States; enhancing U.S. competitiveness in other industrialized countries; and minimizing revenue loss.

Our current tax policies are out of sync with our trade policies and the realities of the global marketplace. In the early 1960s, U.S. companies focused their manufacturing and marketing strategies in the United States, which at the time was the largest consumer market in the world. U.S. companies generally could achieve economies of scale and rapid growth selling exclusively into the domestic market. In the early 1960s, foreign competition in U.S. markets generally was inconsequential.

The picture today is completely different. First, U.S. companies now face strong competition at home. Since 1980, foreign direct investment in the United States has increased by a factor of six (from $216 billion to $752 billion in 1997), and imports have tripled as a share of GDP from an average of 3.2 percent in the 1960s to an average of over 9.6 percent over the 1990-97 period.

Second, foreign markets are more attractive today than they were in the past. For example, from 1986 to 1997, foreign sales of S&P 500 companies grew 10 percent a year, compared to domestic sales growth of just 3 percent annually. Foreign markets also afford increasingly attractive investment opportunities.

From the perspective of the 1960s, there was little apparent reason for U.S. companies to direct resources to penetrating foreign markets, since U.S. companies should achieve growth and profit levels that were the envy of their competitors with minimal foreign operations. By contrast, in today’s economy, competitive success requires U.S. companies to execute global marketing and manufacturing strategies with the result that provisions of our tax system designed when foreign operations were viewed as presumptively tax-motivated have become increasingly outdated.

It is because of the great changes in global trade that we involved ourselves in this issue. The current rules guiding our international tax policies were written at a time when the focus was on preventing tax avoidance, not on promoting international competitiveness. Our main goal this year is to build on the successes that we had in the 105th Congress. This will be our fourth bill in this area, and our third with our Senate counterparts, Senators HATCH and BAUCUS. It includes some new provisions, but in many ways reflects the reality that has been demonstrated of the problems facing U.S. industries in this arena, but there is a great deal of work left to be done.

Our first order of business is to simplify the international tax regime to ensure American competitiveness both at home and abroad. The tax provisions that we are introducing today will significantly affect the national welfare and will enhance the participation of the United States in the global economy of the 21st century. I look forward to working with my House and Senate colleagues to pass this important piece of legislation into law.

THE ASSOCIATION HOUSE OF CHICAGO CELEBRATES 100 YEARS

HON. LUIS V. GUTIERREZ
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. GUTIERREZ. Mr. Speaker, I rise to pay tribute to the Association House of Chicago as it celebrates its 100th anniversary on June 8, 1999. Association House has been serving the community I represent since before the turn of the century. It was founded by more than 100 women and served as a settlement house and social service agency for immigrants arriving in Chicago.

Throughout its century of public service, the mission and goals of Association House of Chicago have expanded. Association House continues to provide vital services, programs and assistance to families, children, seniors and immigrants throughout our community. Each year, Association House assists nearly 20,000 individuals and families throughout the Chicago area, providing services ranging from the most basic of needs to managing larger government contracts. The expansion of Association House’s services during the past two decades led the agency to buy a second facility last year. This growth helps immigrants take naturalization classes, learn English and master trades.

In addition to the programs Association House offers in education, citizenship and job readiness training, Association House offers after-school programs and activities for children. The agency also provides foster care and adoption services, addiction recovery programs and provides emergency food and clothing. The staff of Association House is truly dedicated to their programs and the people they benefit.

Mr. Speaker, I commend the Association House of Chicago for building a strong tradition of service toward others. The work that Association House has accomplished since its first days cannot be measured. For one hundred years, Association House has been assisting, teaching and counseling people of all ages, races, cultures and ethnic backgrounds. From preparing people to enter the workforce to teaching them to speak English, Association House continues to provide programs and services to all people in need.
In the 1960s, the United States accounted for more than 50 percent of cross-border direct investment. By the mid-1990s, that share had dropped to about 25 percent. Similarly, of the world’s 20 largest corporations (ranked by sales), 16 were U.S.-headquartered in 1960. By the mid-1990s, that number had dropped to eight. The 21,000 foreign affiliates of U.S. multinationals now compete with about 260,000 foreign affiliates of multinationals headquartered in other nations. The declining dominance of U.S.-headquartered multinationals is dramatically illustrated by the recent acquisitions of Amoco by British Petroleum, the acquisition of Chrysler by Daimler-Benz, the acquisition of Bankers Trust by Deutsche Bank, and the acquisition of Case by New Holland. These mergers have the effect of converting U.S. multinationals to foreign-headquartered companies.

Ironically, despite the decline of U.S. dominance of world markets, the U.S. economy is far more dependent on foreign direct investment than ever before. In the 1960s, foreign operations averaged just 7.5 percent of U.S. corporate net income. By contrast, over the 1990–97 period, foreign earnings represented 17.7 percent of all U.S. corporate net income. Over the last three decades, the U.S. share of the world’s export market has declined. In 1960, one of every six dollars of world exports originated from the United States. By 1996, the United States supplied only one of every nine dollars of world export sales. Despite a 30 percent loss in world export market share, the U.S. economy now depends on exports to a much greater degree. During the 1960s, only 3.2 percent of national income was attributable to exports, compared to 7.5 percent over the 1990–97 period.

Foreign subsidiaries of U.S. companies play a critical role in boosting U.S. exports—by marketing, distributing, and finishing U.S. products in foreign markets. U.S. Commerce Department data show that in 1996 U.S. multinationals were involved in 65 percent of all U.S. merchandise export sales. In the 1960s, the foreign operations of U.S. companies were sometimes viewed as disconnected from the U.S. economy or, worse, as competing with domestic production and jobs. In today’s highly integrated global economy, economic evidence points to a positive correlation between U.S. investment abroad and U.S. exports.

At the end of the 20th century, we confront an economy in which U.S. multinationals face far greater competition in global markets, yet rely on these markets for a much larger share of profits and sales, than was the case even a few years ago. In light of these changed circumstances, the effects of tax policy on the competitiveness of U.S. companies operating abroad is potentially of far greater consequence today than was formerly the case.

As we begin the process of re-examining in fundamental ways our income tax system, we believe it imperative to address the area of international taxation. In an Internal Revenue Code stuffed with eye-glazing complexity, there is probably no area that contains as many difficult and complicated rules as international taxation. Further, I cannot stress enough the importance of continued discussion between the Congress and Treasury of simplifying our international tax laws; and in making more substantial progress in regard to eliminating particular anomalies such as with the allocation of interest expense between domestic and foreign source income for computation of the foreign tax credit or in regard to how our antiquated tax rules deal with new integrated trade areas such as the European Union.

None of us is under any illusion that the measure which we introduced removes all complexity or breaks bold new conceptual ground. We believe, however, that the enactment of this legislation would be a significant step in the right direction. The legislation would enhance the ability of America to continue to be the preeminent economic force in the world. If our economy is to continue to create jobs for its citizens, we must ensure that the foreign provisions of the United States income tax law do not stand in the way. There are many aspects of the current system that should be reformed and greatly improved. These reforms would significantly lower the cost of capital, the cost of administration, and therefore the cost of doing business for U.S.-based firms. This bill addresses a number of such problems, including significant anomalies and provisions whose administrative effects burden both the taxpayers and the government.

The focus of the legislation is to put some rationalization to the international tax area. In general, the bill seeks in modest but important ways to: (1) simplify this overly complex area, especially in subpart F of the Code and the foreign tax credit mechanisms; (2) encourage exports; (3) enhance U.S. competitiveness in other industrialized countries. The bill would, among other necessary and important adjustments, make permanent the proviso regarding the subpart F exception for active financial services income, modify other provisions that apply subpart F of the Code in inappropriate ways, eliminate double taxation by extending the periods to which excess foreign tax credits may be carried, restore symmetry to the treatment of domestic and foreign losses, and make needed adjustments to the so-called “10/50 company” provisions that burden the joint venture relationships that many of our companies form in their international business relations.

In summary, the law as now constituted frustrates the legitimate goals and objective of American business and erects artificial and unnecessary barriers to U.S. competitiveness. Neither the largest U.S. based multinational companies nor the Internal Revenue Service is in a position to administer and interpret the mine numbing complexity of many of the foreign provisions. Why not then move toward creating a set of international tax rules which taxpayers can understand, and the government can administer? Therefore the proposed changes we believe represent a creditable package and a “down payment” on further reform in the international tax area. We urge our colleagues to join us in cosponsoring this important legislation.

TRIBUTES TO RETIRED COLONEL ALICE GRITSAVAGE

HON. CLIFF STEARNS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. STEARNS. Mr. Speaker, I rise to take notice of a special citizen, Retired Colonel Alice Gritsavage. She is a one of a kind person that deserves special recognition.

Ms. Gritsavage resides in my hometown of Ocala, Florida and she has had a remarkable life. Ms. Gritsavage served our nation as a nurse in both World War II and the Korean War. In fact, her outstanding record as an executive Army nurse in World War II influenced General Douglas McArthur to request that she be named to his staff as Chief Nurse of the Far East Command at the start of the Korean conflict.

I would like to quote from the congratulatory letter Col. Gritsavage received on the date of her departure from the Korean Command on May 28, 1953 from General Mark Clark, Commander in Chief of the United States Army at that time.

General Clark wrote:

You had been in the theatre only a short time when the Communist aggressors threatened world peace by their unprovoked invasion of South Korea. This event required a tremendous build up of medical and hospital facilities, both in Japan and Korea, to care for the wounded of the United Nations. Since that time the standards of the Army Nurse Corps in the Command have reached a level unparalleled in the Corps. Your inspiring efforts, outstanding leadership and devotion to duty have set a brilliant example and have been directly responsible for the excellent services performed by our gallant Army Nurses in this, the United Nations first armed bid for world peace.

Col. Gritsavage’s dedicated service to our nation led our local chapter of Korean War Veterans to name their chapter after Ms. Gritsavage. At the time of this dedication in 1995, the Ocala chapter was the only one in the nation to be named after a woman—reflecting the importance of Col. Gritsavage to our community.
June 7, 1999

I thank Colonel Gritsavage on behalf of my district and on behalf of our nation for her wonderful service in her remarkable life.

IN HONOR OF MS. FEN LEWIS AND MS. LOIS KLAMAR FOR RECEIVING PRESIDENTIAL AWARDS

HON. DENNIS K.UCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. KUCINICH. Mr. Speaker, I rise today to honor Ms. Fen Lewis of Strongville High School and Lois Klamar of Jamison CompuTech Center for receiving presidential teaching awards. Ms. Lewis and Ms. Klamar will receive their awards at a White House ceremony the week of June 7, 1999.

The Presidential Awards program recognizes a special group of elementary and secondary teachers for their commitment and dedication to nurturing student interest in science and mathematics. Ms. Lewis and Ms. Klamar are indeed very devoted teachers and are well deserving of these prestigious awards.

They have set an example for all teachers across the nation to follow. We need more teachers like Ms. Lewis and Ms. Klamar to help our kids strive for excellence in the classroom. The students of these two schools should be honored and proud to have these people as their teachers and role models.

Both teachers are excellent representatives of their schools because of their considerable accomplishments with their students. These teachers have been presented with one of the highest honors in their field and should be given their rightful recognition.

My fellow colleagues, please join me in honoring both of these outstanding teachers on receiving presidential awards.

SIXTH REPORT OF THE SPEAKER’S TASK FORCE ON THE HONG KONG TRANSITION

HON. DOUG BEREUTER
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. BEREUTER. Mr. Speaker, this Member rises today to submit the Sixth Report of the Speaker’s Task Force on the Hong Kong Transition. It has been almost two years since Hong Kong reverted to Chinese sovereignty on July 1, 1997. Prior to that historic event, at the request of Speaker Gingrich, this Member formed the House Task Force on Hong Kong’s Transition. In addition to myself as Chairman, the bipartisan Task Force includes Representatives HOWARD BERNMAN (D–CA), SHERROD BROWN (D–OH), ENI FALEOMAVAEGA (D–AS), ALCEE HASTINGS (D–FL), DON MANZULLO (R–IL), and MATT SALMON (R–AZ).

To date, the Task Force has prepared six quarterly reports assessing how the reversions have affected Hong Kong. The sixth report, which I submit today, covers the period of October through March 31, 1999, during which time this Member, as Task Force Chairman, visited Hong Kong in January 1999.

On Mr. Speaker, the following contains the following Task Force report for the RECORD.

THE SPEAKER’S TASK FORCE ON THE HONG KONG TRANSITION, SIXTH REPORT

This is the sixth report of the Task Force on the Hong Kong Transition. It follows the first report dated on July 1, 1997, the second report dated February 25, 1998, the third report dated May 22, 1998, the fourth report dated July 23, 1998, and the fifth report dated February 2, 1999. This report focuses on events and development relevant to United States interests in the Hong Kong Special Administrative Region (HKSAR) between October 1, 1998, and March 31, 1999, and incorporates findings drawn from the Task Force Chairman’s visit to Hong Kong in January, 1999.

Hong Kong’s ongoing economic recession marked the six months covered by this report as the consequences of the Asian Financial Crisis continued to unfold. Hong Kong’s gross domestic product (GDP) dropped by 5.1 percent in real terms in 1998, its first annual contraction on record. Unemployment and trade figures were correspondingly negative. Despite HKSAR’s reputation for self-governance, Hong Kong’s politi- cal authorities operated independently in all areas of economic decision making, and there was no evidence of any attempt to intervene by Beijing. Opinion on the Hong Kong go- vernment’s controversial August 1998 intervention in the currency, stock and futures markets turned increasingly positive as equities regained much of their lost value and the currency exchange rate held steady.

In the legal-political realm, Chinese officials’ public expressions on the “one country, two systems” concept. The practical consequences of the court decision, which could permit a large number of persons now in China to claim the right to resell in Hong Kong, had not yet been dealt with at the end of March. The Hong Kong Government’s obvious displeasure with the ruling, combined with public fears of the consequences of renewed mass immigration, led to fears that the Government would seek Beijing’s assistance in rolling back the deci- sion in a manner that would undermine Hong Kong’s judicial independence and the rule of law.

ECONOMIC DEVELOPMENTS

Hong Kong continued to suffer the negative effects of the Asian Financial Crisis. In the fourth consecutive quarter of negative growth, as its first recession in thirteen years showed no sign of coming to a quick end, the economy dropped 5.7 percent in real terms in the fourth quarter of 1998 following a decline of 6.9 percent in the third quarter. For 1998 as a whole, Hong Kong’s GDP dropped 3.1 percent, the first annual economic contraction in Hong Kong since statistics have been provided. Spending for private consumption continued at a steady, declining 9.3 percent in the fourth quarter of 1998, as consumer confidence remained affected by rising unemployment and stagnating personal in- come. Price declines brought about significant deflation, with consumer prices declining for four consecu- tive months beginning in November. In February the consumer price index dropped by 1.7 percent. Unemployment reached 6.2 per- cent in the first quarter of 1999, the highest level recorded in twenty-five years. An early economic turnaround continued to appear unlikely, with most analysts predicting an upturn no earlier than the last quarter of 1999. Many view the official Hong Kong govern- ment’s forecast of 9.6 percent GDP growth in 1999 as too optimistic, with some private analysts predicting a decline of as much as 3 percent.

The Government’s budget for the 1999–2000 fiscal year that began April 1, 1999, projects a budget deficit of HK $36.3 billion (US $4.1 billion). This comes on top of an estimated deficit of HK $32 billion (US $4.1 billion) in fiscal year 1998–1999. The government anticipates running a deficit for the next two years before returning to a balanced budget in fiscal 2001–2002, but maintains this is a prudent and modest use of Hong Kong’s size- able reserves during difficult economic times. While the general consensus among analysts is that the trend is not sustainable, available in view of the current recession, some have voiced concern about the impact three consecutive years in the red would have on Hong Kong’s reputation for financial stability. Some also attribute the fiscal deficit in part to Hong Kong’s continued reliance on an ex- cessively narrow, property-focused revenue base.

There was some positive economic news during the reporting period. The tourism market continued to recover, with January/February arrivals up nearly 11 percent over the previous year. The liquidity crunch in the banking sector showed signs of easing, and interest rates began to move downward, although real interest rates were still high by historical standards. Improved international investor confidence helped the stock market to recover much of the ground it had lost since the onset of the financial crisis, and the Hang Seng index stood above 11,000 at the end of March. The renewed buoyancy in the equity markets turned the government’s August 1998 intervention into an extremely profitable venture, with shares ac- quired by the government appreciating by 20 percent or more. The real estate market also showed signs of better health, the govern- ment announced it would resume land sales in April, ending the suspension it imposed in the end of March. The renewed buoyancy in the equity markets turned the government’s August 1998 intervention into a pro- fitable venture, with shares acquired by the government appreciating by 20 percent or more. The real estate market also showed signs of better health, the govern- ment announced it would resume land sales in April, ending the suspension it imposed in June 1998 to reduce downward pressure on property values. Hong Kong’s hard currency reserves also remained substantial.

By the end of March, however, these en- couraging signs had yet to translate into im- provements in Hong Kong’s real economy. Concerns remained about Hong Kong’s con- tinued dependence on entrepot trade and the relative lack of growth in sectors with high value-added, such as the high-tech industry. The government sought to address the latter problem by announcing a ambitious Cyberport project aimed at attracting world-class information technology compa- nies, but opinions varied as to the commerci- al viability of the proposal. An increasing percentage of Hong Kong’s visitors for tourse and travel from Japan and the U.S., whose numbers have stagnated or declined over the same period. In the short term, Hong Kong’s exports (both domestic and transhipped) remain depressed due to the weakened econo- mies of some of its key trading partners and
its higher cost of production relative to competitors that used their own currencies. The problems of certain mainland companies, including financial institutions, highlighted by the insolvency of the Guangdong International Trust and Investment Corporation, also contributed to the potential to negatively affect Hong Kong. With a return to growth apparently still some time off and credit still extremely tight from major banks, more pay cuts and layoffs are likely in the months ahead. Although pressure has clearly eased since the August intervention, the Hong Kong authorities have placed the equities in the stock, currency and futures markets in August 14, 1998. On that Friday afternoon, Financial Secretary Donald Tsang invested the equivalent of US $1.8 billion to support Hong Kong’s reserves in the market in what proved to be a successful effort to defend against outside speculators betting against Hong Kong. The government has retained its currency peg to the U.S. dollar. Although controversial at the time, over the subsequent months the intervention has increasingly come to be viewed as a reasonable, but necessary action, even by many who questioned it initially. During the Task Force Chairman’s visit to Hong Kong in January, it was evident that even the sharpest critics of the intervention had changed their opinion and believed the government made the right decision. Direct discussions with these involved also made it abundantly clear that the Hong Kong authorities acted entirely independently in undertaking the intervention. While they informed their interlocutors in Beijing of their undertaking the intervention, they did not consult them beforehand or seek their agreement before proceeding.

As noted above, the equities purchased by the government have appreciated significantly in value during the recent recovery in the Hong Kong stock market. To allay fears that this could be interpreted as political motivations or will come to influence government decision making, the authorities have placed the equities in the hands of appointed Hong Kong business and financial figures. This helps to resolve substantial doubts about the Hong Kong judicial system’s future independence. The case concerned the “right of abode,” that is, the right of children of legal Hong Kong residents to join their parents in Hong Kong. The CFA decided upon a generous interpretation of the provisions of the Basic Law concerning the right of abode, granting the right to reside in Hong Kong to all children of legal Hong Kong residents, regardless of whether the children are legitimate or illegitimate, and whether their parents are born before or after their attained legal resident status. In making this ruling, the Court clearly opened the door to the legal influx of mainland workers and their children, many of whom are not nationals of the People’s Republic of China, where it is assumed many Hong Kong residents have children born inside or outside of wedlock. Just how many persons will qualify to reside in Hong Kong under the terms of the CFA decision, both now and in the future, remains a subject of considerable controversy. Critics charged the Government with needlessly alarmed Hong Kong residents and the numbers involved, questioning both the methodology of the estimates and the Government’s assumption that the new residents will demand groceries and other public services.

Much of the initial reaction to the CFA decision, however, focused not on the practical concerns of a massive influx of new residents, but on the question of the Court’s authority vis-a-vis that of China’s National People’s Congress. The CFA sparked this furor by the somewhat gratuitous allowance in its decision which asserted its right to rule on actions by China’s National People’s Congress that affected Hong Kong if such actions breach provisions of the Basic Law. In apparent response to this portion of the decision, four Chinese legal experts who had participated in the drafting of the Basic Law, together with an official from China’s State Council, labeled the CFA ruling an attack on the authority of the National People’s Congress and a serious breach of the “one country, two systems” principle. The Hong Kong Government, in turn, reacted to the expressions of Chinese displeasure by dispatching the Justice Secretary to Beijing for urgent consultations. Subsequently, on February 24, the Government made an unprecedented request to the CFA for a “clarification” of the portion of the ruling which touched upon the CFA’s authority to review acts of the National People’s Congress (NPC) and its Standing Committee. Two days later, on February 26, the CFA complied, issuing a clarification in which it limited the scope of what it called “an exceptional situation.”

The clarification did not address the substance of the original January 29 ruling, but merely added that its clarification stated “the court accepts that it cannot question the authority of the NPC or
EXTENSIONS OF REMARKS

As they were not subject to criminal proceedings in China. Negotiators engaged in a formal exchange of letters on the question of criminal suspects between China and Hong Kong are said to be underway, but prospects for a successful conclusion are not clear.

TRADE AND EXPORT CONTROL ISSUES

Final 1998 trade statistics showed across the board drops in Hong Kong’s imports (—11.5 percent), domestic exports (—10.9 percent) and re-exports (—6.9 percent). While much of this is a result of the Asian Financial Crisis, domestic exports are subject to a longer-term downward trend, having now fallen for five of the last six years. The broader regional crisis has thus served to underscore Hong Kong’s continuing dependence on entrepôt trade between China and other nations, particularly the U.S. This makes Hong Kong highly vulnerable to disruptions in the U.S.-China trading relationship, and helps explain the nervousness with which Hong Kong officials view political or economic tensions between Beijing and Washington.

The continued widespread availability of pirated movies, software and other commodities has compounded the problem. As such, tougher enforcement is likely to provide important incentives for further improvements. To combat money laundering, U.S. Government agencies continue to urge the Hong Kong Government to adopt mandatory financial reporting requirements and to explore options for discovering the illicit use of non-bank remittance centers. In early 1999, the Hong Kong Government began efforts to bring these centers under regulatory oversight, complete with mandatory reporting requirements. U.S. Government agencies are also urging that Hong Kong establish a mandatory minimum value currency entry and exit reporting requirement and penalties for illicit cross-border currency movements and bank deposits.

At the time of this report, there appeared to be no significant problems between Hong Kong and the United States Government in the area of trade and export controls. However, the Government continues to vigorously enforce what is widely viewed as a highly regarded trade control regime. The U.S. Government reports no evidence of violations of Hong Kong’s export control decisions. Chinese officials have explicitly recognized that export control matters fall within the trade, rather than the foreign policy, ambit, thereby placing export controls within the Hong Kong Government’s exclusive purview. Hong Kong’s trade control regime is uniquely strict in a number of its features, including the requirement for import licenses as well as the more common export licenses. This enables Hong Kong authorities to track concerns, such as leaving the HKSAR. Hong Kong also refuses to issue re-export licenses for products unless it is sure that the original exporting country, including, of course, the United States, would export the product to the relevant end-user. In one 1998 case, U.S. Commerce Department agents notified Hong Kong’s Department of the sale by a Hong Kong company to a U.S. company of a U.S.-made computer and software to an undisclosed customer. The Hong Kong company was promptly ordered to return the goods to the United States.

The United States Department of Commerce officials continue to conduct regular pre-licensing inspection tours of post-shipment inspections as part of the dual-use licensing process. In addition, U.S. Department of State and U.S. Customs service authorities coordinate pre-license inspections and post-shipment inspections of shipments, given the potential vulnerability, U.S. Government agencies have no indication that the PLA is using
this process to divert U.S. technology to China. The Trade Representative, Mr. Charman, raised this as an area of concern with Hong Kong officials during his visit in January, 1999, and U.S. Government officials have raised it as well.

Macao

Preparations continue for the reversion of Macau to Chinese sovereignty on December 20, 1999, after 442 years as a colony of Portugal. In larger Hong Kong, Macau with its 414,000 residents, will become a Special Administrative Region under the "one country, two systems" formula for the first 50 years. Macao's Chief Executive, Mr. Ho, has repeatedly displayed a disinclination to address the practical implications of Macao's return to Chinese sovereignty in July 1999 and the controversy over its future political evolution. Mr. Ho has steadfastly refused to address the controversy over Macau's political future, and has steadfastly refused to address the controversy over Macao's political future, and has steadfastly refused to address the controversy over Macau's political future, and has steadfastly refused to address the controversy over Macau's political future, and has steadfastly refused to address the refused to address the controversy over Macau's political future, and has steadfastly refusal...
large companies, small business exporters cannot pack up their bags and relocate operations overseas to take advantage of foreign equivalents to OPIC. There are 36 nations that have export credit insurance programs like OPIC. Just like OPIC, most of these nations have local content requirements. If forced to, larger U.S. multinational corporations can pick and choose from one of these other foreign export credit insurance programs. But the work and the jobs, then, are transferred overseas. Small business exporters do not have this luxury. OPIC is needed to maintain the competitive edge of these small business exporters in the United States.

Mr. Speaker, let me give you one concrete example from the hearing last month. Jane Dauffenbach, President of Aquarius Systems, located in North Prairie, Wisconsin, testified how foreign governments constantly try to undermine her small company’s export prospects, even to the point of competing against free donations of similar equipment. Aquarius Systems manufactures aquatic weed harvesters. In Asia, Aquarius Systems lost a large export sale when the Canadian government gave a “free” aquatic weed harvester to the monarch of the country. In Kenya, Ms. Dauffenbach also testified about how the Japanese and the Israeli governments almost snatched another huge export sale from her company to clear water hyacinths clogging Lake Victoria. It was only because she had a World Bank contract, backed by OPIC political risk insurance, that she was able to win and complete the sale. She said, “Simply put, Aquarius Systems is not competing with foreign companies. We are competing with foreign governments... It is imperative that the financing and insurance programs from OPIC exist so that we have the necessary tools available to accomplish our goals.”

Second, the legislation reaffirms the importance of Trade Development Agency (TDA). This small 43 person agency, which develops feasibility studies designing in American specifications so that U.S. exporters can win major infrastructure projects in developing countries and emerging economies later down the road, has generated $12.3 billion in exports since its inception in 1981. Every $1 in spending for TDA projects has led to the export of $32 in U.S. goods and services overseas. The Export Enhancement Act requires, to the maximum extent possible, the imposition of “success fees” on companies who win export deals thanks to the groundwork laid by a feasibility study conducted by the TDA.

Third, the bill examines the three export promotion arms of International Trade Administration (ITA) at the Commerce Department—the U.S. & Foreign Commercial Service, which as 100 U.S. export assistance centers located throughout the United States and 141 posts located in 76 countries around the world; Trade Development, which monitors trade developments in key industries and supports the United States Trade Representative in key industrial sector trade negotiations; and Market Access and Compliance, which ensures that U.S. companies obtain market compliance with existing trade agreements with various countries of the world. The Export Enhancement Act makes a few changes to these programs to make sure that the ITA keeps its focus on helping more small businesses export, particularly to underrepresented regions of the world, like Africa, in the most efficient way possible.

Finally, the Export Enhancement Act proposes to make a few changes to the Trade Promotion Coordinating Committee (TPCC) to insure that the 19 federal agencies that are involved in trade promotion operate more in tandem together.

In conclusion, Mr. Speaker, I encourage my colleagues to support the Export Enhancement Act of 1999.
Mr. BRADY of Pennsylvania. Mr. Speaker, I rise today to pay tribute to Mr. Norman H. Loudenslager, who recently retired as Treasurer of the Democratic County Executive Committee of Philadelphia, a position in which he served for 14 years. Throughout his life, Norman has demonstrated a steadfast and resolute commitment to working people through his leadership in organized labor and the Democratic Party. He has been an active member of the Democratic Party for over 40 years, serving as Committeeman in Philadelphia’s 25th Ward and for ten years as Leader of the 25th Ward.

Norman’s dedication to the needs of working men and women, however, has never been limited to his activities in the Democratic Party. For over 50 years, Norman has been an active member of the Philadelphia Chapter of the International Association of Machinist & Aerospace Workers, serving as President, Vice President, Secretary Treasurer, and the Directing Business Representative for the Philadelphia Area, Southern New Jersey and Delaware Machinist Lodges. He has also served as a Delegate to the Philadelphia AFL-CIO for more than 30 years, and as a Delegate to the Pennsylvania Department of Labor and Industry. As we all know, the Democratic Party and organized labor have a special relationship in American politics—Norman is one of the persons responsible for that bond. As a union member myself, I would like to extend my sincere gratitude to him for standing up for the men and women in the community.

Mr. Speaker, it is because of persons like Norman Loudenslager that Americans have fair labor standards. It is because of persons like Norman Loudenslager that the Democratic Party remains committed to the working people of this country. It is because of persons like Norman Loudenslager that the Democratic Party has always stood up for the community.

Mr. Speaker, we need more people like Norman Loudenslager.

COMMEMORATION OF DR. HENDERSON D. MABE
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. ETHREDGE. Mr. Speaker, I rise today to call the attention of the Congress to commemorate the excellent medical and educational, political and community service rendered by the late Dr. Henderson D. Mabe of Erwin, North Carolina. I also commend the generosity and the personal integrity of Dr. Mabe who passed away in Erwin recently.

Dr. Mabe was born in Kinston, North Carolina. He received his graduate degree in medical sciences at Wake Forest College. At Watts Hospital in Durham, under the supervision of Dr. Ralph Fleming, he served his residency duty. Relocated to Erwin as a temporary substitute for a local doctor recovering from illness, Dr. Mabe became very much attached to the Erwin community. In fact, he spent his entire life at Erwin except when he served his country as a medical doctor in the United States Navy during the Korean Conflict.

In addition to his valuable medical contribution, Dr. Mabe was an influential politician. Having demonstrated his leadership skills as president of the student body and president of his senior class, Dr. Mabe ran for the State Legislature where he served one term from 1963 to 1964 as one of the most respected officials.

Dr. Mabe was highly regarded as a distinguished doctor and scholar, politician and community member. He was loved and respected by the community not only because of his excellent medical service but also because of his personal integrity. As the former U.S. Senator Robert Morgan, a close friend of Dr. Mabe, stated: “Long before Medicaid and Medicare programs were available for the aged and needy, Buster Mabe cared for them and never asked or expected pay. He never turned anyone away if he had to stay at the office until late in the evening, as he often did. We also pay tribute today to one of the most remarkable family doctors this country has ever seen. Dr. Mabe will be sorely missed, but his influence will be felt forever.”

Dr. Mabe’s thoughtful dedication and contribution to advance the progress and education in the medical field as well as to strengthen the Erwin community lives on. In his bequest, Dr. Mabe made a gift worth $2 million to the North Carolina Community Foundation for the establishment of the Henderson D. Mabe Jr. Endowment Fund with a special emphasis on the Erwin community. The gift is the largest charitable donation in the history of Harnett County. In his spirit, this fund will be used to provide college scholarships for Harnett area high school seniors with preference to those living in or around Erwin who have planned to pursue a degree or certification in the medical field at a college, university, community or junior college, technical school, nursing school or other post secondary school training. The fund will also support graduates from Harnett County high schools especially from in or around Erwin who are full time students at Bowman Gray, the Medical School of University of North Carolina, East Carolina Medical School or Duke Medical School. In addition, Good Hope Hospital and St. Stephen’s Episcopal Church in Erwin where Dr. Mabe has been an active member will benefit as well.

Mr. Speaker, I commend the high achievements and personal integrity of Dr. Henderson D. Mabe. Dr. Henderson D. Mabe lived a rich life as a remarkable and distinguished doctor and scholar, public community member of Harnett County, North Carolina. Dr. Mabe will be sorely missed, but he has left a legacy that will live on for many years to come.

GOOD LUCK AND CONGRATULATIONS TO MAJOR GENERAL MORRIS J. BOYD

HON. CHET EDWARDS
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 7, 1999

Mr. EDWARDS. Mr. Speaker, I rise to congratulate a great Army officer and soldier—Major General Morris J. “Morrie” Boyd—and thank him for his contributions to the Army and the country.

General Morrie Boyd will retire in June after a long and distinguished career. He is a consummate professional whose performance in over three decades of service in peace and war, has personified those traits of courage, competency and commitment that our nation has come to expect from its Army officers.

Morrie entered service on the 6th of April 1965. He was selected to attend Officer Candidate School and was commissioned as a second lieutenant in 1966. He served as an artillery officer in Vietnam from October 1966 to June 1968 and again from April 1970 to March 1971. While deployed to Vietnam, he served as an assistant firing platoon leader, executive officer of a battery, commanded a howitzer battery, commanded a battalion from the 21st Aviation Company, and was the Intelligence and Security Officer for the 212th Aviation Battalion.

Morrie was again deployed for combat during Operation Desert Shield/Dessert Storm. From December 1990 to May 1991, he served as the commander of the 42nd Field Artillery Brigade in Saudi Arabia.

He came to Washington in the mid-90s to serve as the Chief, Army Legislative Liaison from June 1995 to June 1997. From June 1997 to June 1999, he ably assisted the Army’s senior leadership in dealing with Members of Congress and their staffs. He was very focused on helping elected officials and their staffs understand the needs of the Army as it
EXTENSIONS OF REMARKS

Medicare's system for creating and assigning procedure codes to medical technologies is cumbersome and slow.

Medicare's methods of updating Medicare payment levels and payment groups to accommodate changes in medical technology increase the risk that Medicare will lag behind new advances in medical technology.

Medicare's refusal to use data that are developed outside of the Medicare program blinds the program to useful insights about the costs, charges and outcomes of medical technologies.

To address these issues, "The Patient Access to Medical Technology Act of 1999" would:

1. Adjust Medicare payment levels and payment categories at least annually to reflect changes in medical practice and technology.

2. Use valid external sources of information to update payment categories if Medicare's data are limited or not yet available. More specifically, the bill directs HCFA to use a valid, statistically representative sample and also to draw on external sources of data when its own dataset is inadequate. It directs HCFA to consider statistically representative data from such sources as private insurers, manufacturers, suppliers and other non-Medicare entities.

3. Update national procedure codes (HCPCS Level II) more frequently to reduce delays and timelag. Without an accurate identifying code, technologies and procedures cannot be reimbursed appropriately by Medicare. It can take HCFA up to 18 months to approve a new code because of the way the agency structures its calendar for making such changes. This bill would make the process more efficient by eliminating the single annual deadline for applications and permitting such requests to be accepted on a rolling, quarterly basis.

4. Continue to use local procedure codes to ensure availability of the most recent advances in medical technology. Most coverage decisions are made at the local level by local contractors, which use the "HCPCS Level III Codes" to describe new technologies that have not yet been incorporated into the national coding process. HCFA has proposed eliminating these useful codes, but this bill would require HCFA to maintain this effective system.

5. Establish an advisory committee on Medicare coding and payment to report to HCFA's coding and payment systems. Most importantly, it will help ensure that Medicare beneficiaries have timely access to life-enhancing and life-saving medical advances.

Mr. Speaker, I urge my colleagues to support this important legislation.
Mr. LANTOS. Mr. Speaker, I invite my colleagues to join me today in paying tribute to Mr. Robert Anderson, who is retiring after two distinguished decades as President of the San Mateo County Central Labor Council. During his remarkable tenure as San Mateo’s top advocate for working people, innumerable working men and women have benefited enormously from Mr. Anderson’s dedication to improving working and living conditions for families in San Mateo County and for employees of the airline industry nationwide.

Bob Anderson, a member of International Association of Machinists, Local Lodge 781, is a former United Airlines Mechanic, and currently he serves as ground safety coordinator for IAM District 141. His outstanding career as a labor advocate includes his efforts to establish, build and chair the San Francisco Airport Labor Coalition and its predecessor, the Airport Health and Safety Coalition. He has served on the advisory boards of the California Occupational Safety and Health Administration and the Labor Occupational Health Program at the University of California, Berkeley.

Mr. Speaker, the labor movement’s involvement and effectiveness in our community has been greatly strengthened through Bob Anderson’s dedication and service on the Central Labor Council’s Committee on Political Action, which supports local, state and national officeholders who share labor’s progressive social values. He worked tirelessly against the passage of Proposition 226, the anti-working family initiative which was rightly rejected by California voters in June of 1998.

Bob Anderson’s most memorable achievement is the establishment of PALCARE, San Mateo County’s community-based, flexibly scheduled childcare center which opened in 1993. For twelve years Bob was undeterred in his determination to establish this affordable, high-quality, around-the-clock childcare for working parents at San Francisco International Airport and other work sites where employees must work non-traditional hours. Mr. Anderson leaves an enduring legacy through his establishment of this safe, happy haven for the children of those who contribute to San Mateo’s thriving economy.

Mr. Speaker, Bob Anderson will be honored at the 20th Annual Banquet of the Committee on Political Education on Saturday, June 11, 1999. I join with those who commend his lifelong, selfless quest to better the lives of his fellow working men and women, and I extend my most enthusiastic wishes for a blissful and happy retirement as he embarks on this new chapter in his life.
learn about the new home for the Pegasus Program for handicapped riders, particularly after working hard to pass a law which directs a study on ways to improve disabled access to outdoor recreation on public lands.

The Pegasus Program is indeed intriguing. I commend Mr. and Mrs.enton for their creativity and for their innovative approach to bettering the lives of the disabled. The Pegasus Program, however, benefits more than just the disabled. They use wild horses trained by inmates at the Cannon City correctional facility. Because wild horses have no natural predators, they tend to overpopulate and overgraze public lands. Sadly, these symbols of the American West out-compete wildlife, and eventually themselves. What a unique opportunity through the Pegasus Program to help wild horses, give prison inmates constructive and rewarding work, and help the disabled overcome their physical limitations. With heartfelt pride, I thank Mr. and Mrs. Penton for their work.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, June 8, 1999 may be found in the Daily Digest of today’s RECORD.

MEETINGS SCHEDULED

JUNE 9

9:30 a.m.

Environment and Public Works
Transportation and Infrastructure Subcommittee
To resume hearings on the implementation of the Transportation Equity Act for the 21st century.

SD–406

Small Business
Business meeting to markup S. 918, to authorize the Small Business Administration to provide financial and business development assistance to military reservists’ small business.

SR–428A

Indian Affairs
To hold oversight hearings on internet gambling.

SR–485

EXTENSIONS OF REMARKS

11831

Appropriations
District of Columbia Subcommittee
To hold hearings on proposed budget estimates for fiscal year 2000 for the government of the District of Columbia.

SD–192

Commerce, Science, and Transportation
To hold hearings on S. 837, to enable drivers to choose a more affordable form of auto insurance that also provides for more adequate and timely compensation for accident victims.

Year 2000 Technology Problem
To hold hearings on Y2K compliance issues within the health care industry.

SD–138

10 a.m.

Finance
To hold oversight hearings to examine risk adjustment methodology and other implementation issues relating to Medicare+Choice.

SD–215

Foreign Relations
To hold hearings on the nomination of Donald Keith Bandler, of Pennsylvania, to be Ambassador to the Republic of Cyprus; the nomination of M. Michael Eink, of Virginia, to be Ambassador to the Former Yugoslav Republic of Macedonia; the nomination of Donald W. Kyeser, of Virginia, to be Ambassador during tenure of service as Special Representative of the Secretary of State for Nagorno-Karabakh and New Independent States Regional Conflicts; the nomination of Joseph Limprech of Virginia, to be Ambassador to the Republic of Albania; the nomination of Richard L. Morningstar, of Massachusetts, to be Representative of the United States of America to the European Union; the nomination of Larry C. Napper, of Texas, for Rank of Ambassador during tenure of service as Coordinator of the Support for East European Democracy (SEED) Program; and the nomination of Thomas J. Mill, of Virginia, to be Ambassador to Bosnia and Herzegovina.

SD–562

Banking, Housing, and Urban Affairs
To hold hearings on issues relating to financial privacy.

SD–538

Governmental Affairs
To resume closed oversight hearings on the national security methods and processes relating to the Wen-Ho Lee espionage investigation.

S–407 Capitol

2 p.m.

Energy and Natural Resources
Water and Power Subcommittee
To hold oversight hearings on the process to determine the future of the lower Snake River dams and conduct oversight on the Northwest Power Planning Council’s Framework Process.

SD–366

Appropriations
Commerce, Justice, State, and the Judiciary Subcommittee
Business meeting to markup proposed legislation making appropriations for the Departments of Commerce, Justice and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1999.

SD–146 Capitol

3 p.m.

Foreign Relations
To hold hearings on the nomination of Gwen C. Clare, of South Carolina, to be Ambassador to the Republic of Ecuador; the nomination of Olver P. Garza, of Texas, to be Ambassador to the Republic of Nicaragua; the nomination of Frank Almaguer, of Virginia, to be Ambassador to the Republic of Honduras; the nomination of John R. Hamilton, of Virginia, to be Ambassador to the Republic of Peru; and the nomination of Prudence Bushnell, of Virginia, to be Ambassador to the Republic of Guatemala.

SD–562

JUNE 10

9:30 a.m.

Commerce, Science, and Transportation
To hold hearings on S. 796, to promote electronic commerce by encouraging and facilitating the use of encryption in interstate commerce consistent with the protection of national security.

SD–253

Energy and Natural Resources
To hold oversight hearings on the report of the National Recreation Lakes Study Commission.

SD–366

10 a.m.

Judiciary
Business meeting to markup S. 467, to restate and improve section 7A of the Clayton Act; S. 606, for the relief of Global Exploration and Development Corporation, Kerr-McGee Corporation, and Kerr-McGee Chemical, LLC (successor to Kerr-McGee Chemical Corporation); S. 692, to prohibit Internet gambling; S. Res. 98, designating the week beginning October 17, 1999, and the week beginning October 15, 2000, as “National Character Counts Week”; and S.J. Res. 21, to designate September 28, 1999, as “Veterans of Foreign Wars of the United States Day”.

SD–226

Finance
To hold hearings on the impact of the Balanced Budget Act provisions on the Medicare Fee-for-Service program.

SD–215

Health, Education, Labor, and Pensions
To resume hearings on proposed legislation authorizing funds for programs of the Elementary and Secondary Education Act, focusing on serving special populations.

SD–628

Foreign Relations
Near Eastern and South Asian Affairs Subcommittee
To hold hearings to examine the United States policy towards Iraq.

SD–562

Governmental Affairs
To hold hearings on dual use and munitions list export control processes and implementation at the Department of Energy.

SD–342

Banking, Housing, and Urban Affairs
To hold oversight hearings on export control issues in the Cox Report.

SD–538
EXTENSIONS OF REMARKS

2:30 p.m.
Energy and Natural Resources
Forests and Public Land Management Subcommittee
To hold oversight hearings on issues related to the proposed Goodrich/Coltec merger.
SD-226

June 7, 1999

JUNE 23
9:30 a.m.
Indian Affairs
To hold oversight hearings on General Accounting Office report on Interior Department’s trust funds management.
SR-485

JUNE 30
9:30 a.m.
Indian Affairs
To hold oversight hearings on National Gambling Impact Study Commission Report.
Room to be announced

SEPTEMBER 28
9:30 a.m.
Veterans’ Affairs
To hold joint hearings with the House Committee on Veterans’ Affairs to review the legislative recommendations of the American Legion.
345 Cannon Building

POSTPONEMENTS

JUNE 17
9:30 a.m.
Environment and Public Works
To hold hearings on S. 533, to amend the Solid Waste Disposal Act to authorize local governments and Governors to restrict receipt of out-of-state municipal solid waste; and S. 872, to impose certain limits on the receipt of out-of-state municipal solid waste, to authorize State and local controls over the flow of municipal solid waste.
SD-406

ENERGY AND NATURAL RESOURCES

10 a.m.
Health, Education, Labor, and Pensions
To hold joint hearings with the House Committee on Education and Work Force on proposed legislation authorizing funds for programs of the Elementary and Secondary Education Act, focusing on research and evaluation.
SD-106

JUNE 14
9:30 a.m.
Joint Economic Committee
To hold hearings on issues relating to the High-Technology National Summit.
SH-216

JUNE 15
9:30 a.m.
Joint Economic Committee
To continue hearings on issues relating to the High-Technology National Summit.
SH-216

Health, Education, Labor, and Pensions
Business meeting to consider pending calendar business.
SD-628

JUNE 16
Time to be announced
Indian Affairs
Business meeting to consider pending calendar business; to be followed by hearings on S. 944, to amend Public Law 105-188 to provide for the mineral leasing of certain Indian lands in Oklahoma; and S. 438, to provide for the settlement of the water rights claims of the Chippewa Cree Tribe of the Rocky Boy’s Reservation.
SR-485

JUNE 17
9:30 a.m.
Joint Economic Committee
To continue hearings on issues relating to the High-Technology National Summit.
SH-216

Energy and Natural Resources
To hold hearings on pending calendar business.
SD-366

JUNE 23
9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on mergers and consolidations in the communications industry.
SR-253

Energy and Natural Resources
To hold hearings on S. 1949, to improve the administration of oil and gas leases on Federal land.
SD-366
The Senate met at 9:30 a.m. on the expiration of the recess and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

For the Lord God is a sun and shield; The Lord will be of grace and glory; No good thing will He withhold From those who walk upright.

Holy Father, Source of strength, Author of the absolutes of morality, and the One to whom we are accountable, we renew our commitment to walk uprightly. We want to stand tall with steady eyes focused on Your irrevocable mandates for character and behavior. Our deepest desire is to walk with You, dear God, at Your pace, in Your timing, and toward Your goals. Help us not to run ahead of You or to lag behind. Only then can we hear what You have to say for each situation and relationship. May this be a sublime day of serenity because we have placed our hands in Your strong and guiding hand. We join our hearts in sympathy for Mrs. Joe Biden as she grieves the death of her father, Donald Jacobs. Comfort her with Your presence and hope. Through our Lord and Saviour. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The able acting majority leader is recognized.

SCHEDULE

Mr. VOINOVICH. Mr. President, today the Senate will resume consideration of the defense appropriations bill with a vote ordered on the pending Grassley amendment to occur at 9:45 a.m. As a reminder, first-degree amendments to the bill must be offered by 2:30 p.m. today. Therefore, additional amendments and votes are expected throughout today’s session, with the expectation of finishing the bill this evening. Cloture was filed on the motion to proceed to the Y2K legislation yesterday. Thus, a cloture vote will take place on Wednesday.

I thank my colleagues for their attention.

Mr. President, I note the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. VOINOVICH). Without objection, it is so ordered.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2000

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of S. 1122, which the clerk will report.

The legislative assistant read as follows:

A bill (S. 1122) making appropriations for the Department of Defense for the fiscal year ending September 30, 2000, and for other purposes.

Pending:

Stevens (for Grassley) amendment No. 540 to reduce the $500,000 threshold amount for the applicability of the requirement for advance matching of Department of Defense disbursements to particular obligations.

AMENDMENT NO. 540

The PRESIDING OFFICER. Under the previous order, there will now be 15 minutes of debate relative to the Grassley amendment No. 540 with a vote to follow thereon.

Mr. GRASSLEY. Mr. President, do I control that 15 minutes?

The PRESIDING OFFICER. The Senator controls the time.

Mr. GRASSLEY. I will not use all of that time for my amendment.

First of all, as to the amendment that is pending, authored by the Senator from Iowa, I thank the Senator from Alaska for offering my amendment yesterday, and I thank the Senator from Alaska for asking for a rollcall vote on my amendment, although this amendment has been offered 5 previous years and adopted 5 previous years without a rollcall vote. So, personally, I do not think it is necessary to have a rollcall vote. But if the chairman of the committee and the ranking member of the committee want such a rollcall vote, that is OK with me. So I will take then just a few minutes to speak about my amendment on matching disbursements with obligations.

The American taxpayers would take for granted, they would expect, the nurturing of their tax dollars to be so well done at the Federal level that Congress would not have to pass a special amendment which would say that the Department of Defense cannot pay out $1 of taxpayers’ money without being able to match it with an invoice and contract that specified what goods or services they were buying. I hope in most of Government that is the case, but it has not been so with the Defense Department. In fact, I have been speaking for years on the subject of the tens of billions of dollars that have actually been spent, and at the time of payment, the department failed to match the particular service or goods that are being paid for with their corresponding contract.

I have had the support of the chairman of the Appropriations Committee in setting in place policies that would gradually reduce the amount of money that could be paid out without an invoice and contract. And I am thankful. This policy has been incorporated in the last five appropriations bills—fiscal years 1995, 1996, 1997, 1998, and 1999. We are now working on the fiscal year 2000 appropriations bill. It is my understanding that the committee supports the amendment again this year.

Under current law, the matching threshold is set at $1 million effective this month. This means that the Department of Defense disbursing officials must match each payment of $1 million or more with a corresponding obligation or contract before the payment is made. My pending amendment would continue the process of ratcheting down the threshold began 5 years ago. It would lower the threshold then from the $1 million in present law to $500,000. Reports of the General Accounting Office and inspectors general consistently show that this policy is helping to reduce DOD’s unmatched disbursement problems. As I understand it, the DOD has lowered the threshold to zero in most disbursing centers.

I thank the Department of Defense for having adopted a policy that every taxpayer would assume is a principle of good Government management, and that is that they would not pay out one penny without being able to show what they ordered and received for that penny. That has become a policy at some of the disbursing centers but not at all the centers. So we want to see the threshold lowered to zero at all locations because we think it is just sound business management that not one penny of the taxpayers’ dollars should be paid out if there is not an invoice and contract for what has been bought and received, either goods or services, for that amount of money.

So we are not quite at zero all over the country with all of the centers. Some Department of Defense disbursing centers still have problems.
This amendment will help keep the pressure on and hopefully in time will help the Department of Defense eliminate all unmatched disbursements, so that the Senator from Iowa will never have to come to the Senate floor again and say we have these billions of dollars that the Pentagon paid out and they have never been able to tell exactly what they ordered and received.

If the threshold specified in this amendment is unworkable, then I have asked the chairman to adjust the dollar level in conference, but I hope it is so obvious that we will be able to tell the taxpayers of this country that we know what they are buying; that at least for the next year we should keep the pressure on for the still fantastically high level of $500,000 that could be paid out under certain circumstances without the invoice and contract immediately available.

I do not want to stand before the Senate and be embarrassed by saying that we can somehow justify even a $500,000 check being written without knowing what goods and services were, in fact, ordered and received and being paid for.

I thank the chairman of the committee, Senator STEVENS, and I thank the ranking minority member, Senator Byrd, for their continuing support of this amendment. Every year for the last 5 years I have offered this amendment, and every year for the last 5 years they have put the amendment in the bill, kept it there and protected it in conference. This effort, particularly with their respected leadership in the area of defense, is very positive toward the Department of Defense changing their attitude about unmatched disbursements and leading us to a point where an reducing the amount of unmatched disbursements.

I thank the chairman and ranking member for their unwavering support, and I hope all my colleagues will support this simple but important amendment.

I have time left over, and if the Senator from Alaska has some of my time, he can have it.

Mr. STEVENS. Mr. President, I will take a couple of minutes.

I was pleased to offer this amendment for my good friend from Iowa, Senator GRASSLEY. Senator GRASSLEY’s determined effort to improve the Department of Defense financial accounting standards, by demanding that funds disbursed are matched by funds obligated—simply meaning that they balance their checkbook and they let us know so the taxpayers will know what the checks have been written for—his efforts has already yielded results in the Department’s unmatched disbursements.

To those who may be unfamiliar with this problem, as of the fiscal year 1998, according to the Department’s own inspector general, the Department reported a substantial problem with disbursements. That means that funds were disbursed to the Treasury but not processed, or, in other cases, the Department’s employees could not match a disbursement to an obligated item.

There is a conflict here. We are trying to make certain those who provide services to the Department of Defense are promptly paid. On the other hand, there is a requirement for the taxpayers that we know what they have paid and what we have bought with the funds, as the Senator said.

The Appropriations Committee is pleased to work with Senator GRASSLEY and the Department of Defense to ensure the Department makes steady progress in reducing these problem disbursements. I do support the amendment of the Senator from Iowa, and I believe all Senators seek to improve the Department’s control over the appropriation of taxpayers’ funds to the Department of Defense.

What time will the vote take place, Mr. President?

The PRESIDING OFFICER. The Senator from Alaska has 6 minutes remaining.

Mr. STEVENS. I remind Senators that first-degree amendments to this bill must be offered by 2:30 p.m. Additional amendments and votes are expected through today’s session. My colleague and I are working on a package of amendments which we will submit as soon as this time has expired and this amendment has been voted upon. At least we will discuss this package.

It is my hope we will be able to finish this bill today. I am going to work to achieve that goal.

Does the Senator from Hawaii wish to make any comments on this amendment?

Mr. INOUYE. No. Mr. STEVENS. How much time remains?

Mr. GRASSLEY. I yield back my time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. STEVENS. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, what time is the vote scheduled to take place?

The PRESIDING OFFICER. At 9:45.

Mr. STEVENS. I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 540. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

The amendment (No. 540) was agreed to.

Mr. BURNS. Mr. President, I move to reconsider the vote.

Mrs. BOXER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mrs. BOXER addressed the Chair.

The PRESIDING OFFICER. The Senator from California is recognized.

AMENDMENT NO. 541

(Purpose: To substitute for section 8106 (relating to operational support aircraft) a requirement for a report.)

The amendment was agreed to.

Mrs. BOXER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The amendment was adopted.

The amendment (No. 541) was agreed to.

Mr. BOXER addressed the Chair.

The PRESIDING OFFICER. The Senator from California is recognized.

AMENDMENT NO. 542

(Purpose: To substitute for section 8106 (relating to operational support aircraft) a requirement for a report.)

The amendment was agreed to.

The amendment is as follows:

Strike section 8106, and insert the following:

SEC. 8106. Not later than March 1, 2000, the Secretary of Defense shall submit to Congress a report on the inventory and status of operational support aircraft, Commander-in-Chief support aircraft, and command support aircraft of the Department of Defense. The report shall include a detailed discussion of the requirements for such aircraft, the foreseeable future requirements for such aircraft, the cost of leasing such aircraft, commercial alternatives to use of such aircraft, the capabilities and appropriateness of the aircraft to fulfill mission requirements, and the relevancy of the missions of the aircraft to warfighting requirements.

Mrs. BOXER. Mr. President, I ask unanimous consent that my amendment be laid aside for further debate.

The PRESIDING OFFICIAL. Without objection, it is so ordered. The amendment will be laid aside.

Mr. BURNS. Mr. President, I suggest the adoption of a quorum.

The PRESIDING OFFICIAL. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICIAL. Without objection, it is so ordered.

AMENDMENTS NOS. 542, 543, 544, AND 545, EN BLOC

Mr. STEVENS. Mr. President, I would like to send to the desk a series of amendments which provide adjustments in the bill brought about by a review made by the Congressional Budget Office and the Office of Management and Budget. These amendments allocate funds in a different manner under the bill.

The first change is an increase in funds for the Army Test Range Facilities Program.

The second readjusts one account in the Navy, and moves $51.84 million into the Joint Warfighting Experimentation Program, and leaves it under the control of Vice Chairman of the Joint Chiefs reporting to the defense committees of the House and the Senate.

The third will appropriate funds to meet the authorization bill's provision of funds for the Red Cross in providing Armed Forces emergency services.

The fourth is to deal with the addition of $10 million from cockpit modifications to the U-2.

I suggest the rollover the desk, and I ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICIAL. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendments numbered 542, 543, 544, and 545, en bloc.

The amendments (Nos. 542, 543, 544, and 545), en bloc, are as follows:

AMENDMENT NO. 542

(Purpose: To provide funds for Research, Development, Test and Evaluation, Army)

In the appropriate place in the bill, insert the following new section:

"SEC. . In addition to any funds appropriated elsewhere in Title IV of this Act under the heading "Research, Development, Test and Evaluation, Army", $9,000,000 is hereby appropriated only for the Army Test Ranges and Facilities program element."

AMENDMENT NO. 543

At the appropriate place in the bill, insert the following:

"Sec. . Notwithstanding any other provision in this Act, the total amount appropriated in this Act for Title IV under the heading "Research, Development, Test, and Evaluation, Navy", is hereby reduced by $26,840,000 and the total amount appropriated in this Act for Title IV under the heading "Research, Development, Test, and Evaluation, Defense" is hereby increased by $51,840,000 to reflect the transfer of the Joint Warfighting Experimentation Program: Provided, That none of the funds provided for the Joint Warfighting Experimentation Program may be obligated until the Vice Chairman of the Joint Chiefs of Staff reports to the congressional defense committees on the role and participation of all referred and specified commands in the JWEP."

AMENDMENT NO. 544

(Purpose: To provide funding for the American Red Cross Armed Forces Emergency Services program)

In the appropriate place in the bill, insert the following new section:

"Sec. . In addition to the amounts appropriated or otherwise made available elsewhere in this Act for the Department of Defense, $23,000,000, to remain available until September 30, 2000 is hereby appropriated to the Department of Defense: Provided, that the Secretary of Defense shall make a grant in the amount of $23,000,000 to the American Red Cross for Armed Forces Emergency Services."

AMENDMENT NO. 545

At the appropriate place in the bill insert the following:

"Sec. . In addition to the funds available in Title III, $10,000,000 is hereby appropriated for U-2 cockpit modifications."

The PRESIDING OFFICIAL. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I have had the opportunity to study these four amendments. They are authorized by the authorizing committees. I am in full support of them.

Mr. STEVENS. Mr. President, I urge adoption of the amendments en bloc.

The PRESIDING OFFICIAL. Without objection, the amendments are agreed to.

The amendments (Nos. 542, 543, 544, and 545), en bloc, were agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

Mr. INOUYE. I move to lay that motion on the table.

Mr. STEVENS. Mr. President, we are working on a managers' package. We have several amendments that we believe the Senate should include in such a package. I urge Members who have identified amendments they intend to offer to consult with my friend from Hawaii, myself, and our staffs to see if we can't enlarge this package and take care of a series of items that are really not controversial during the time that we have a vehicle.

As I have stated before, all amendments to this bill in the first degree must be introduced by 2:30 this afternoon.

We stand ready to work with any Member on an amendment. This would be a good time for anyone who has an amendment that is controversial to come and offer it. So far, no one has volunteered to undertake that task. But pending a Member wishing to offer an amendment, I suggest the absence of a quorum.

The PRESIDING OFFICIAL. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICIAL. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate receives from the House of Representatives the companion bill to S. 1122, the Senate immediately proceed to the consideration thereof: that all after the enacting clause be stricken and the text of S. 1122, as passed, be inserted in lieu thereof: that the House bill, as amended, be read for the third time and passed: that the Senate insist on its amendment, request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate: and that the foregoing occur without a conference with the House.

I further ask unanimous consent that S. 1122 not be engrossed and that it remain at the desk pending receipt of the House companion bill, and that upon passage of the House bill, as amended, the passage of S. 1122 be vitiated and the bill be indefinitely postponed.

The PRESIDING OFFICIAL. Without objection, it is so ordered.

RECESS

Mr. STEVENS. Mr. President, we are working on the managers' package, and to do this, we have to be off the floor. Therefore, I ask unanimous consent unanimous consent that the Senate stand in recess until 11:30 a.m. We hope Members will come and talk to us about this managers' package in the event they want amendments in it.

There being no objection, at 10:42 a.m., the Senate recessed until 11:32 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. ENZI).
The Senate continued with the consideration of the bill.

Mr. STEVENS. I ask unanimous consent that Danielle Scotka, a fellow in the office of Senator HUTCHISON, be granted the privilege of the floor during consideration of S. 1122.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 547

(Purpose: To set aside $63,041,000 of Air Force research, development, test, and evaluation funds for C-5 aircraft modernization.)

Mr. INOUYE. Mr. President, at the request of the senior Senator from Delaware, Mr. BIDEN, I offer an amendment and ask that it be temporarily set aside.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Hampshire [Mr. GREGG] proposes an amendment numbered 548.

Mr. GREGG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. 1. PROHIBITION ON USE OF REFUGEE RELOCATION FUNDS FOR LONG-TERM REGIONAL DEVELOPMENT OR RECONSTRUCTION IN SOUTHEASTERN EUROPE.

None of the funds made available in the 1999 Emergency Supplemental Appropriations Act (Public Law 106-31) for emergency support of refugees and displaced persons and the local communities directly affected by the influx of refugees may be made available to implement a long-term, regional program of development or reconstruction in Southeastern Europe except pursuant to specific statutory authorization enacted on or after the date of enactment of this Act.

Mr. GREGG. Mr. President, the purpose of this amendment, which I will agree to have set aside whenever the chairman decides to do so, is to address the issue of the reconstruction of Kosovo and funds that might be spent in Kosovo for reconstruction. The concept of reconstruction, of course, is something that is going to have to be dealt with by the Congress and the President over the next few months, no matter what happens relative to the air war.

One of the concerns I have, and I think many Americans have, is that America will end up paying a disproportionate cost of the reconstruction of Kosovo and potentially Yugoslavia. It is my opinion that no American funds should be spent for the reconstruction of Yugoslavia until Milosevic is removed as its leader.

It is further my view that America's participation in the cost of long-term reconstruction of Kosovo should be extremely limited, that our cost should be minor, a fraction of the amount of the cost of reconstruction, and that the vast majority of the burden of reconstruction should be borne by the European nations.

As a nation, the United States has borne a disproportionate amount of the cost of the war that has gone on in Yugoslavia. It is, after all, a European issue more than an American issue. The United States had no national strategic interest in this part of the world. Not until the hundreds of thousands of refugees were created did we really have any significant interest at all in this part of the world; the refugees, of course, being a function of part of the diplomacy of this administration, which, in my opinion, has been a gross blunder in this region of the world.

In any event, this is a European issue which should be addressed by the European nations. Certainly, the reconstruction issue is a European issue which should be addressed by the European nations, and American taxpayers should not be asked to bear the cost of it.

What my amendment does is simply state that the emergency appropriations which will pay out emergency funds for purposes of fighting the war in Kosovo, will be limited in their application so they cannot be used for long-term structural reform of the economy or the capital needs of Kosovo, without the President coming to Congress and requesting those funds be used in that way and without him putting forward a strategic plan which reflects how much it is going to cost us as a nation to reconstruct the Kosovo infrastructure. Until we receive that plan and it is approved by the Congress, these funds would not be made available for that sort of effort.

It does not limit these funds being used for humanitarian purposes. It does not limit these funds being used for the immediate needs of our own military, should our own military be interjected into Kosovo for some reason. It does not limit the funds being used for things which as replacement funds for getting people back in their homes with electricity temporarily.

What it does limit is any long-term attempt to rebuild Kosovo's infrastructure, which would be part of an overall plan for reconstruction, without us first getting such a plan and knowing how much it is going to cost the American taxpayers. I do think the administration has an obligation to be honest with the taxpayers and tell us exactly what they are really thinking we are going to have to pay in terms of costs.

I have read news reports coming out of the European Union that suggested the European Union position is that the U.S. taxpayer should pay for half of the cost of the reconstruction of Kosovo. To me, that would be unacceptable. I have read other news reports from folks who work for our agencies saying the United States may be willing to pay up to 25 percent of the total cost of the reconstruction of Kosovo. We are talking about, potentially, 5, 10, 15 years, with significant capital expenditures in that region of the world, and 25 percent would be a huge number.

If that is the administration's position, we need to know what that number is before we start down that road.
Mr. GREGG. Mr. President, I believe my amendment is in sync with the opinion expressed by the chairman. I ask that my amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GREGG. I yield the floor.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

AMENDMENTS NOS. 549 AND 550, EN BLOC

Mr. BYRD. Mr. President, I send two amendments to the desk and ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will read as follows:

The Senator from West Virginia (Mr. BYRD) proposes amendments numbered 549 and 550, en bloc.

The amendments are as follows:

AMENDMENT NO. 549

(Purpose: To set aside $10,000,000 of Operation and Maintenance, Defense-Wide funds for carrying out first-year actions of a longer research plan for addressing low-level exposures to chemical warfare agents) On page 107, between lines 12 and 13, insert the following:

SEC. 8109. Of the funds appropriated in title II under the heading "OPERATION AND MAINTENANCE, DEFENSE-WIDE" for the Office of the Special Assistant to the Deputy Secretary of Defense for Gulf War Illnesses, $10,000,000 shall be available for carrying out the first-year actions under the 5-year research plan outlined in the report entitled "Department of Defense Strategy to Address Low-Level Exposures to Chemical Warfare Agents (CWAs)", dated May 1999, that was submitted to the Committee on Appropriations pursuant to section 247(d) of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 112 Stat. 1857).

AMENDMENT NO. 550

(Purpose: To increase by $10,000,000 the amount provided for the Army for other procurement for an immediate assessment of biometrics sensors and templates repository requirements, and for combining and consolidating biometrics security technology and other information assurance technologies to accomplish a more focused and effective information assurance effort) On page 107, between lines 12 and 13, insert the following:

SEC. 8109. Of the funds appropriated in title III under the heading "OTHER PROCUREMENT, Army": $51,250,000 shall be available for the Information System Security Program, of which $10,000,000 shall be available for an immediate assessment of biometrics sensors and templates repository requirements and for combining and consolidating biometrics security technology and other information assurance technologies to accomplish a more focused and effective information assurance effort.

Mr. BYRD. Mr. President, I have an amendment at the desk.

The Department of Defense operates over two million separate computers and 25,000 distinct computer systems to conduct its mission. These computer systems are integral parts of a wide variety of Department of Defense (DOD) programs. Many of these programs are critical to the direct fulfillment of military or intelligence missions; but they also are integral to maintaining the Department's computer networks through computers believe our information networks to be vulnerable to unauthorized penetration. In recent days, the web sites of the FBI, the White House, the Department of Interior, and even the Senate were attacked by hackers. The compulsion for controlling access to our nation's vital information networks through computers becomes immediately evident when one considers just one battlefield scenario—the possibility that one of our important command and control outposts on the ground is overrun by hostile forces. Just imagine what leverage that would provide to a computer-sophisticated enemy. And, I am told that the Department has learned from its experience in Kosovo that this kind of a threat is not limited to major world powers.

At the present time, the basic process the Department relies upon to protect its computer systems is some kind of card and/or passwords including random characters. Users often are required to have several such cards or passwords in connection with their work. This approach to information security has some serious drawbacks for the long run. Passwords can be forgotten, shared, or observed, and cards can be lost, stolen, or duplicated. Moreover, as the need for even more security grows with advancing technology, the situation will become more cumbersome and less effective. On the other hand, more sophisticated means are expected to become available to make unwanted intrusions, necessitating even more complex password and card systems.

There is an emerging technology available to the Department that provides an effective information security system, and that is biometrics. Almost everyone is familiar with fingerprints. Fingerprint templates are biometric signatures. Others are
voice, face recognition, the iris of the eye, and keystroke dynamics or typing patterns, and I understand there are others as well. With this approach, access to a particular computer or network of computers is controlled by comparing one or several biometric signatures of the person asking to use the machine, with a template on file in a central location that contains the biometric identification of the authorized user of that computer. There is no card. There is no password. The test is whether the potential user is who he or she claims to be. The system authenticates a claimed identity from previously enrolled patterns or distinguishable traits. I understand that in the commercial world there are some examples of biometric identification already in use. Some ATM machines, for instance, now rely on iris signatures to permit access rather than the familiar card we all carry.

The Army has a particular interest in developing controls over the access to its information systems through computers, because of the far-flung nature of its forces, and because its battle systems are becoming increasingly dependent on information networks.

This bill already includes $5.0 million in the Other Procurement, Army, appropriation for an initial biometrics computer information assurance system prototype project. I understand that the Army would like to accelerate its autonomous leadership in the exploration and development of technologies in the biometrics arena, and is a natural leading candidate to be considered as the executive agent in this work for the Department of Defense and perhaps the federal government. The amendment I am offering is intended to respond to the immediacy of the critical information assurance requirement of the Army, and to build on the Army’s leadership in this field. The amendment also builds on the biometrics prototype project to explore a more focused and synergistic effort to develop information assurance technology. Finally, it also builds on and anticipates a working relationship with the Criminal Justice Information Services Division of the FBI, which houses and operates the world’s finest single biometric data base—fingerprints. Specifically, my amendment provides an additional $10.0 million over an immediate assessment of biometrics sensors and templates repository requirements, and for combining and consolidating biometrics security technology and other information assurance measures to accomplish a more focused and effective information assurance effort.

The PRESIDING OFFICER. The amendments will be laid aside.

Mr. DORGAN. Mr. President, I am not going to offer an amendment to this bill. In fact, I am a member of the subcommittee that encompasses the Senator from Alaska, Mr. STEVENS, and the Senator from Hawaii, Mr. INOuye, for their leadership and work on this legislation. I am pleased to work with them on a range of issues that deal with the defense of this country and with the strengthening of the Armed Forces. I think they do an excellent job.

There is one area—and not just on this legislation—of the policy debate in Congress I wanted to mention during the discussion on funding, and that is the area of national missile defense. I do have some concerns about the policy and direction of national missile defense. I wanted to express them now because I think this is the appropriate place.

I don’t quarrel with the question of research for national missile defense. We have been involved in a robust research program on missile defense. Hopefully, at some point, will bear fruit sufficient that if a threat exists that would persuade us to deploy, we would deploy a national missile defense system that is a workable system and one that provides real and significant protection to our country.

Last week—I think perhaps it was a week ago tomorrow—I was driving on a road up in far northeastern North Dakota. I looked to my left and I saw this huge concrete structure. It is, of course, the only antiballistic missile system that was ever built in the free world. It was built in the late 1960s, early 1970s. It was built in Nekoma, ND, up in the northeastern corner of our State. That very month it was declared operational. It was also mothballed. Apparently, in today’s dollars, somewhere around $20 billion was spent. We still have the massive quantities of concrete poured into a building that looks very much like a modern-day prison in the vast reaches of northeastern North Dakota. That is a legacy. I suppose, to the taxpayers who say sometimes you can have a very expensive program that doesn’t turn out quite the way you expected. Some will say, well, that program was just fine; it was a bargaining chip in arms control, and it was mothballed the very month it was declared operational because that was part of the strategic calculation of our country. Of course, that is not the case.

I want to talk for a moment about the range of threats against our country. One of those threats is the threat of a terrorist nation, or an adversary, acquiring an intercontinental ballistic missile and firing that missile into the United States. That is a threat. In fact, it is a threat that Ernest Moniz mentioned an intercontinental ballistic missile being acquired by a terrorist nation. But, it is far more likely that it would not be an intercontinental ballistic missile but a cruise missile; they are much more widely dispersed, and it would be much more easily acquired. That cruise missile would travel 500 feet above the ground, at 500 or 600 miles an hour, and would be launched from a barge, or a submarine, or a plane just off our shores. That is not going to be intercepted by a national missile defense system.

Some say we are working on theater defense that will intercept cruise missiles. Yes, but that theater defense isn’t part of what is going to protect the perimeter of our country. It is far more likely that a terrorist nation would acquire a cruise missile. Is there a defense system against a cruise missile? It is far more likely a terrorist nation would, in fact, terrorize our country with a deadly vial of biological or chemical weapons that could cause the kind of chaos that nearly occurred in Japan a couple of years ago, where the right kind of deadly biological agents can kill thousands, hundreds of thousands, perhaps a million people. It is far more likely that a major U.S. city would be threatened by a suitcase bomb placed in the trunk of a rusty Yugo car on a New York City dock by a terrorist nation. That is far more likely than them acquiring a sophisticated intercontinental ballistic missile.

The potential, for example, of an adversary such as Russia, which has substantial nuclear might, accidentally launching tubes full of missiles from a Russian submarine would not be defeated by the national missile defense system we are talking about because the system being discussed could only potentially defeat a handful of missiles, not an accidental launch of all the tubes of a Russian submarine. Only a handful of missiles could be intercepted by the missile defense system that is currently under discussion. That doesn’t suggest that we ought not consider it. But the question I ask is this: Consideration at what price and with what other consequences?

First, as we begin to make decisions about a national missile defense system, I don’t think we ought to just throw money at the system. I think some who have an appetite for it say we will just keep throwing money in there and somehow a system will emerge that will protect our country. I think that would lead to a great deal of waste.

Second, the debate we have about deploying a national missile defense system, as soon as technologically possible or feasible, is a debate that worries me, because it seems to suggest all
of the consequences are less important and all of the consequences should be set aside.

What are those other consequences? One is a program we now have under way with Russia in which we actually saw the wings off Russian bombers. We actually remove Russian missiles from their silos and remove the warheads from the missile. We are reducing in a dramatic way the number of missiles and bombers and the capabilities of delivering warheads aimed at this country.

I have in this desk drawer a little vial which, with the consent of the Presiding Officer, I will show. This little vial of material is wiring that was ground up. It is from a Russian submarine that carried missiles aimed at the United States. That submarine is reduced to small pieces of metal. It is cut up. It doesn't exist anymore. I have some of the wiring right here.

How do we acquire the wiring of a Russian ballistic missile submarine? You could shoot it and destroy it. That is one way. Or, the other way is with an agreement between ourselves and the Russians to reduce weapons of mass destruction and the delivery capabilities of each side. We have seen submarines and bombers and nuclear warheads being systematically reduced in a very aggressive way.

That is exactly what is happening here. That happens through the Nunn-Lugar funds that are offered in this kind of legislation. It is a very important program. It has been remarkably successful. I do not want to, by what we are doing in other areas, jeopardize that kind of arms reduction and arms control.

One other point, Mr. President: It is true that this is an increasingly difficult and dangerous world. North Korea is testing medium-range missiles. Pakistan and India do not like each other, and they exploded nuclear weapons right under each other's nose. It is a difficult and dangerous world.

I support research on missile defense. But I do not support efforts that would say let us demand deployment of any system as soon as technologically feasible, even if it is at the expense of incurring other efforts to reduce the proliferation of nuclear weapons, or to eliminate delivery systems of nuclear weapons under current arms control regimes.

Some say the ABM Treaty is for a country that no longer exists, the old Soviet Union; don't worry about it; ignore it.

The fact is that we have made significant progress under our arms control agreements. I think we need to be very careful as we proceed down this road not to proceed at the expense of others that we know will work.

I only wanted to say again that the national missile defense program is one that I have provided support for by substantial amounts of research. I do worry sometimes that the amount of money the system is capable of using effectively. It is a difficult technology to hit a bullet with a bullet at intercontinental missile speeds. Some of my colleagues make the point that it is not one program, it is many programs in a seamless transition of dealing with suppression of missile threats in the theater, and also dealing with intercontinental ballistic missile threats.

It is true that these programs represent a number of different kinds of programs. But the largest of them is the national missile defense program, commonly referred to as that, which would be deployed to defend against an intercontinental ballistic missile. Representing a State that is suspected of having the only ABM or national missile defense program that was ever built in the Free World, I have some acquaintance with it.

It is my hope that when and if this country deploys a system in the future, it not be done at the expense of arms control reductions that exist in other arms control agreements. That we not decide to focus so much on this issue that we do so at the expense of the nonproliferation efforts this country ought to have as job one. We ought to worry very much every day and in every way about efforts to prevent the proliferation and spread of weapons of mass destruction.

I think there is a lot of evidence out there about which we need to be very concerned. Frankly, I think it has taken a back seat appears. I think it has taken a back seat in Congress and a back seat in the administration. I don't think we have had nearly as much effort as I would feel comfortable with to try to combat the proliferation of weapons of mass destruction.

There are not too many countries that have nuclear weapons at this point, but many countries want to acquire them. There is a black market in the weapons material and production of nuclear weapons. As all of those countries are seeking to acquire weapons of mass destruction, including nuclear weapons, I hope, as we discuss all of these issues, our country will understand that to prevent proliferation of these weapons, we should not just discuss national missile defense in a way that says it is more important than any other area. If we are to build a safer future for ourselves and our children, it must be a priority for us to say that the proliferation of nuclear weapons around the world is a very serious problem that this country ought to pay serious attention to, and it ought to command a substantial amount of our time.

Mr. President, I yield the floor and I make a point of order that a quorum is not present.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 551

Mr. STEVENS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for Mr. NICKLES, proposes an amendment numbered 551.

At the appropriate place in the bill, insert the following:

"None of the funds appropriated or otherwise made available by this or any other act may be made available for reconstruction activities in the Republic of Serbia (excluding the province of Kosovo) as long as Slobodan Milosevic remains the President of the Federal Republic of Yugoslavia (Serbia and Montenegro)."

Mr. STEVENS. Mr. President, I ask unanimous consent that the amendment be set aside.

The PRESIDING OFFICER. Without objection, the amendment will be set aside.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NOS. 552 THROUGH 573, EN BLOC

Mr. STEVENS. Mr. President, I send to the desk a portion of the managers' package that we have been working on. I will delineate each amendment, send them to the desk, and ask they be considered en bloc.

The first is an amendment of Senator INHOFE pertaining to the Starstreak missile. The next is an amendment of Senator MACK, $6 million for advanced-track acquisition; another amendment of Senator MACK, $3 million electronic propulsion systems; Senator MACK, $5 million for the tropical remote sensing radar; an amendment of Senator BURNS, $6 million for pollution/waste systems, research and development; Senator MCCONNELL, $13 million for the MK-45, and $19 million for the Close In Weapon System.

I have an amendment for $1.5 million for the Pallet-Loading System; Senator BENNNETT, $1 million for the alternative missile engine; Senator HOLLINGS, $3 million for the Environmental Pollution Preventive Initiative; Senator

June 8, 1999

CONGRESSIONAL RECORD—SENATE

11839

AMENDMENT NO. 551
REID, $1.5 million for hot gas decontamination projects; Senator LIEBERMAN, $2 million for the Medical Informatics; Senator REID, $2.8 million for the K-Band Test Obfuscation Pairing System; Senator KERRY, $2 million for recombinant vaccine research; Senator LUTENBERG, an Army fire-fighting equipment amendment; Senator INOUYE, $4 million for laser fusion; an amendment of mine for $20 million for supersonic noise reduction; Senator LEAHY, JCETS reporting requirement; Senator SHELBY, $5 million for the DAU pilot program; Senator INOUYE, an amendment for training by the Center of Excellence for Disaster Management.

As I indicated, these amendments are part of the managers' group and I ask they be considered en bloc.

The PRESIDING OFFICER. Without objection, the clerk will report the amendments by number.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] for himself and Mr. INOUYE, and on behalf of other Senators, proposes en bloc amendments numbered 552 through 573.

Mr. INOUYE. Mr. President, I have studied the measures. I have no objection.

Mr. STEVENS. These amendments have been cleared on both sides. I ask they be considered en bloc, passed and adopted en bloc, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments (Nos. 552 through 573) agreed to en bloc are as follows:

AMENDMENT NO. 552

At the end of the general provisions, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading "RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE", up to $6,000,000 may be made available for the 3-D advanced track acquisition and imaging system.

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading "RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE", up to $6,000,000 may be made available for the 3-D advanced track acquisition and imaging system.

AMENDMENT NO. 553

(Purpose: To authorize use of $6,000,000 of Air Force RDT&E funds (in PE 604694P) for the 3-D advanced track acquisition and imaging system)

AMENDMENT NO. 554

(Purpose: To authorize use of $3,000,000 of Research, Development, Test and Evaluation, Navy funds for electronic propulsion systems)

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading "RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY", up to $5,000,000 may be made available for electronic propulsion systems.

AMENDMENT NO. 555

(Purpose: To authorize use of $5,000,000 of Drug Interdiction and Counter-Drug Activities, Defense funds for a ground processing station to support a tropical remote sensing radar)

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading "COUNTER-DRUG ACTIVITIES, DEFENSE," up to $5,000,000 may be made available for a ground processing station to support a tropical remote sensing radar.

AMENDMENT NO. 556

(Purpose: To provide additional funding for research and development to reduce pollution associated with industrial manufacturing waste systems)

At the appropriate place in the bill, insert the following:

"SEC. 8109. Of the funds made available under the heading "RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY", up to $6,000,000 may be provided to the U.S. Army Construction Engineering Research Laboratory to continue research and development to reduce pollution associated with industrial manufacturing waste systems."

AMENDMENT NO. 557

(Purpose: To correct the allocation of Navy operation and maintenance funds between two naval gun depot overhaul programs)

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title II under the heading "OPERATION AND MAINTENANCE, NAVY," up to $13,000,000 may be available for depot overhaul of the MK-45 weapon system, and up to $19,000,000 may be available for depot overhaul of the Close In Weapon System.

AMENDMENT NO. 558

(Purpose: To provide additional funding for prototyping and testing of a water distributor for the Pallet-Loading System Engineer Mission Module System)

At the end of the general provisions, add the following:

SEC. . Of the funds appropriated in Title IV under the heading "RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY," up to $1,000,000 may be made available for prototyping and testing of a water distributor for the Pallet-Loading System Engineer Mission Module System.

AMENDMENT NO. 559

(Purpose: To designate funds for the development of alternate missile engines)

At the appropriate place in the bill insert the following new general provision:

SEC. . Of the funds provided under Title IV of this Act under "RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE", up to $1,000,000 may be made available only for alternative missile engine source development.

AMENDMENT NO. 560

(Purpose: To set aside $3,000,000 of Army research, development, test, and evaluation funds for the National Defense Center for Environmental Excellence Pollution Prevention Initiative)

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading "RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY", up to $3,000,000 may be made available for the National Defense Center for Environmental Excellence Pollution Prevention Initiative.

AMENDMENT NO. 561

(Purpose: To provide funds for a hot gas decontamination facility)

At the appropriate place in the bill, insert the following new section:

SEC. . Of the funds made available in Title IV of this Act under the heading "RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE-WIDE", up to $4,500,000 may be made available for a hot gas decontamination facility.

AMENDMENT NO. 562

(Purpose: To support a DoD Center for Medical Informatics)

At the appropriate place in the bill, insert the following:

SEC. . Of the funds made available under the heading "DEFENSE HEALTH PROGRAM", up to $2,000,000 may be made available to support the establishment of a DoD Center for Medical Informatics.

AMENDMENT NO. 563

(Purpose: To increase funds for the K-Band Test Obfuscation Pairing System)

On page 107, between lines 12 and 13, insert the following:

SEC. . Of the funds appropriated in Title III under the heading "PROCUREMENT, MAINE CORPS", up to $2,800,000 may be made available for the K-Band Test Obfuscation Pairing System.

AMENDMENT NO. 564

(Purpose: To support recombinant vaccine research)

At the appropriate place in the bill, insert the following:

SEC. . Of the funds made available under the heading "RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY", up to $2,000,000 may be made available to continue and expand on-going work in recombinant vaccine research against biological warfare agents.
Amendment No. 565
(Purpose: To require conveyance of certain Army firefighting equipment at Military Ocean Terminal, New Jersey)
At the end of the general provisions, add the following:

Sect. 8109. (a) The purpose of this section is to provide means for the City of Bayonne, New Jersey, to furnish fire protection through the City's municipal fire department for the property, including the Coast Guard, and property at Military Ocean Terminal, New Jersey, thereby enhancing the City's capability for furnishing safety services that is a fundamental capability necessary for encouraging the economic development of Military Ocean Terminal.

(b) The Secretary of the Army may, notwithstanding title II of the Federal Property and Administrative Services Act of 1949, convey without consideration to the Bayonne Local Redevelopment Authority, Bayonne, New Jersey, and to the City of Bayonne, New Jersey, jointly, all right, title, and interest of the United States in and to the firefighting equipment described in subsection (c).

(c) The equipment to be conveyed under subsection (b) shall consist of firefighting equipment at Military Ocean Terminal, Bayonne, New Jersey, as follows:

7. The conveyance and delivery of the property shall be at no cost to the United States.
8. The Secretary may require such additional terms and conditions in connection with the conveyance under this section as the Secretary considers appropriate to protect the interests of the United States.

Amendment No. 566
(Purpose: To provide $3,000,000 (in FE 622343N) for the Navy for basic research on advanced composite materials processing (specifically, resin transfer molding, vacuum-assisted resin transfer molding, and co-infusion resin transfer molding))
At the end of the general provisions, add the following:

Sect. 8109. Of the funds appropriated in title IV under the heading “Research, Development, Test, and Evaluation, Navy,” up to $3,000,000 may be made available for basic research on advanced composite materials processing (specifically, resin transfer molding, vacuum-assisted resin transfer molding, and co-infusion resin transfer molding).

Amendment No. 567
(Purpose: To set aside $5,000,000 of Army RDT&E funds (in FE 603041A) for Information Warfare Vulnerability Analysis)
At the appropriate place in the bill, insert:

Sect. 8109. Of the funds appropriated in title IV under the heading “Research, Development, Test, and Evaluation, Army,” up to $5,000,000 may be made available for Information Warfare Vulnerability Analysis.

Amendment No. 568
(Purpose: To set aside $7,500,000 of Air Force RDT&E funds (in FE 603065F) for the GEO High Resolution Space Object Imaging Program)
At the appropriate place in the bill, insert:

Sect. 8109. Of the funds appropriated in title IV under the heading “Research, Development, Test, and Evaluation, Air Force,” up to $7,500,000 may be made available for the GEO High Resolution Space Object Imaging Program.

Amendment No. 569
(Purpose: To set aside $4,000,000 for research, development, test, and evaluation of elastin-based artificial tissues and dye targeted laser fusion techniques for healing internal injuries)
At the appropriate place in the bill, insert:

Sect. 8109. Of the funds appropriated in title IV under the heading “Research, Development, Test, and Evaluation, Army,” up to $4,000,000 may be available solely for research, development, test, and evaluation of elastin-based artificial tissues and dye targeted laser fusion techniques for healing internal injuries.

Amendment No. 570
(Purpose: To provide funds for supersonic aircraft noise mitigation research)
In the appropriate place in the bill, insert the following new section:

Sect. 8109. Of the funds made available in title IV of this Act for the Defense Advanced Research Projects Agency under the heading “Research, Development, Test, and Evaluation, Navy,” up to $20,000,000 may be made available for supersonic aircraft noise mitigation research and development efforts.

Amendment No. 571
On line 22, page 97, insert the following:

(d) Report.—Not more than 15 days after the exercise of any waiver under subsection (c), the Secretary of Defense shall submit a report to the congressional defense committees describing the extraordinary circumstances, the purpose and duration of the training program, the United States forces and the foreign security forces involved in the training program, and the information relating to human rights violations that necessitate the waiver.

Amendment No. 572
At the appropriate place in the bill, insert the following:

Sect. 8109. From within the funds provided for the Defense Acquisition University, up to $5,000,000 may be spent on a pilot program using state-of-the-art training technology that would train the acquisition workforce in a simulated government procurement environment.

Amendment No. 573
(Purpose: To stipulate training activities of Center of Excellence for Disaster Management and Humanitarian Assistance)
At the appropriate place in the bill add the following:

Sect. . During the current fiscal year, under regulations prescribed by the Secretary of Defense, the Center of Excellence for Disaster Management and Humanitarian Assistance may also pay, or authorize payment for, the expenses of providing or facilitating education and training for appropriated military and civilian personnel of foreign countries in disaster management and humanitarian assistance: Provided, That not later than April 1, 2001, the Secretary of Defense shall submit to the congressional defense committees a report regarding the training of foreign personnel conducted under this authority during the preceding fiscal year for which expenses were paid under the section: Provided further, That the report shall specify the countries in which the training was conducted, the type of training conducted, and the foreign personnel trained.

Mr. STEVENS. We have several other amendments we are trying to get agreed to. I plead with Members of the Senate to bring forth the amendments so we may study them and know the amendments that we will debate later today. It is my hope we will finish this bill this evening.

Let me state for the information of Members of the Senate, this is not a military construction bill. This is the defense bill. Military construction items will be in a separate bill. That bill will be marked up by the Senate tomorrow. Members who have amendments concerning military construction at home or abroad should present those to the subcommittee for consideration at markup tomorrow. We have had some suggested amendments to the defense section that we do not want those to come to this bill. This is not within the jurisdiction of the Defense Subcommittee. We will be forced to oppose any amendment that is offered that deals with military construction.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk read as follows: The Senator from Alaska [Mr. STEVENS], for Mrs. HUTCHISON, proposes an amendment numbered 574.

(The text of the amendment is printed in today’s RECORD under “Amendments Submitted.”)

Amendment No. 574
(Purpose: To authorize a project at Brooks Air Force Base, Texas, to evaluate methods of improving efficiency in the operation of military missile installations)
Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Amendment No. 575
(Purpose: To provide funds for research, development, test, and evaluation of supersonic aircraft noise mitigation research)
Mr. STEVENS, Mr. President, I ask unanimous consent that I be recognized as in morning business for 3 minutes.
The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENTIAL APPOINTMENT OF JAMES HORMEL

Mr. INHOFE. Mr. President, I was very surprised and disappointed to find that during our recess when we were not here, the President made a very controversial appointment of James Hormel to be U.S. Ambassador to Luxembourg. I believe it is something that should not be done. In fact, when I think of procedures, I look to a man I admire so much, Senator Bob Byrd from West Virginia.

During a recess in 1985, President Reagan made several appointments. Senator Byrd said: The recess appointment power should not be used simply to avoid controversy or to circumvent the constitutional power and responsibility of the Senate. In several cases, Reagan’s recess appointments avoided serious and probing debate by the Senate on controversial issues. There is no evidence that the needs of government required any of these appointments to be made as recess appointments.

Then Senator Byrd went on to give the history, as he always does in his very eloquent style, as to how the Constitution does provide for emergencies, for such things as appointments back in the 1800s when people were traveling and unable to get here or when something strategic is pending. In the case of James Hormel, certainly there is not anything strategic pending.

For that reason, I am serving official notice today that I am going to do the same thing Senator Byrd did back in 1985: I am putting holds on every single Presidential nomination.

In the case of James Hormel, it is a little confusing to a lot of people as to why he became controversial. Yes, he is gay. That is not the reason for people opposing him. It is the fact that he is a gay activist who puts his agenda ahead of the agenda of America. I can recall when he made the statement when first nominated by the President: I wish the President had nominated me to be Ambassador to Norway, because if they have something on the ballot—same-sex marriages, or something like that—I might be allowed to influence it.

That, to me, demonstrated very clearly that he wanted to use this position to advance his own agenda and not the agenda of America.

I hasten to say, I would have the same feelings about any other appointment on any other issue. If David Duke were appointed and came to the conclusion he was going to use his militia interests as his motivation and his agenda as America’s agenda, I certainly would oppose that nomination in the same way. Notice is hereby served.

I suggest the absence of a quorum.
June 8, 1999

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for Mr. DOMENICI, proposes an amendment numbered 577.

The amendment is as follows:

On page 106, line 4, strike “The Communications Act of 1934” and insert “(a) The Communications Act of 1934”.

On page 107, between lines 4 and 5, insert the following:

(b) Not later than 15 days after the date of the enactment of this Act, the Director of the Office of Management and Budget and the Federal Communications Commission shall each submit to the appropriate congressional committees a report which shall—

(A) set forth the anticipated schedule (including specific dates) for—

(i) preparing and conducting the competitive bidding process required by subsection (a); and

(ii) depositing the receipts of the competitive bidding process;

(B) set forth each significant milestone in the rulemaking process with respect to the competitive bidding process;

(C) include an explanation of the effect of each requirement in subsection (a) on the schedule for the competitive bidding process and any post-bidding activities (including the deposit of receipts) that would otherwise have occurred under section 337(b)(2) of the Communications Act of 1934 (47 U.S.C. 337(b)(2)) if not for the enactment of subsection (a);

(D) set forth for each spectrum auction held by the Federal Communications Commission since January 1993 information on—

(i) the time required for each stage of preparation for the auction;

(ii) the date of the commencement and of the completion of the auction;

(iii) the time which elapsed between the date of commencement of the auction and the date of the first deposit of receipts from the auction in the Treasury; and

(iv) the dates of all subsequent deposits of receipts from the auction in the Treasury; and

(E) include an assessment of how the stages of the competitive bidding process required by subsection (a), including preparation, commencement and completion, and deposit of receipts, will differ from similar stages in the auctions referred to in subparagraph (D).

(2) Not later than October 5, 2000, the Director of the Office of Management and Budget and the Federal Communications Commission shall each submit to the appropriate congressional committees the report which shall—

(A) describe the course of the competitive bidding process required by subsection (a) through September 30, 2000, including the amount of any receipts from the competitive bidding process deposited in the Treasury as of September 30, 2000; and

(B) if the course of the competitive bidding process has included any deviations from the schedule set forth under paragraph (1)(A), an explanation for such deviations from the schedule.

(3) The Federal Communications Commission may not consult with the Director in the preparation of the reports required by the Commission by this subsection.

(4) In this subsection, the term “appropriated congressional committees” means the following:

(A) The Committees on Appropriations, the Budget, and Commerce of the Senate.

(B) The Committees on Appropriations, the Budget, and Commerce of the House of Representatives.

The PRESIDING OFFICER. The amendment is laid aside.

AMENDMENT NO. 578

(Purpose: To extend for a period of 3 years the Agricultural Export Relief Act of 1998 and the India-Pakistan Relief Act of 1998.)

(a) EXTENSION OF AGRICULTURE EXPORT RELIEF ACT OF 1998.—Section 2 of the Agriculture Export Relief Act of 1998 (Public Law 105-194; 112 Stat. 627) is amended by striking “September 30, 1999” each place it appears and inserting “September 30, 2002”.

(b) EXTENSION OF INDIA-Pakistan RELIEF ACT OF 1998.—(1) In general.—Section 902(a) of the India-Pakistan Relief Act of 1998 (22 U.S.C. 2799a-1 note) is amended by striking “for a period not to exceed one year upon enactment of this Act” and inserting “for a period not to exceed September 30, 2002”.

(2) REPORT.—Section 904 of such Act is amended by striking “a one-year period described in section 902” and inserting “the first year following the date of enactment of this Act and annually thereafter”.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the earlier of the date of enactment of this Act or September 30, 1999.

The PRESIDING OFFICER. The amendment is laid aside.

Mr. STEVENS. Does the Senator from Hawaii have any amendments?

Mr. INOUYE addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

AMENDMENT NO. 579

(Purpose: Relating to the conveyance of the remaining Army Reserve property at former Fort Sheridan, Illinois)

Mr. INOUYE. I offer an amendment on behalf of Senator DURBIN on Fort Sheridan and ask that it be set aside.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Hawaii [Mr. INOUYE], for Mr. DURBIN, proposes an amendment numbered 579.

The amendment is as follows:

At the appropriate place, insert the following:

Sect. . (a)(1) Notwithstanding any other provision of law, no funds appropriated or otherwise made available by this Act may be used to carry out any operation on any fort or land at the former Fort Sheridan, Illinois, unless such conveyance is consistent with a regional agreement among the communities and jurisdictions in the vicinity of Fort Sheridan and in accordance with section 2662 of the Military Construction Authorization Act for Fiscal Year 1996 (division B of Public Law 104-106; 110 Stat. 573).

(2) The land referred to in paragraph(1) is a parcel of real property, including any improvement thereon, located at the former Fort Sheridan, Illinois, consisting of approximately 14 acres, and known as the northern Army Reserve enclave area, that is covered by the authority in section 2662 of the Military Construction Authorization Act for Fiscal Year 1996 and has not been conveyed pursuant to that authority as of the date of enactment of this Act.

The PRESIDING OFFICER. The amendment is laid aside.

AMENDMENT NO. 580

(Purpose: To extend for a period of 3 years the extension of the Agriculture Export Relief Act of 1998 and India-Pakistan Relief Act of 1998.)

Mr. INOUYE. I offer an amendment on behalf of Senator BINGAMAN on Vieques, Puerto Rico, and ask that it be numbered and set aside.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Hawaii [Mr. INOUYE], for Mr. BINGAMAN, proposes an amendment numbered 580.

The amendment is as follows:

At the end of the general provisions, add the following:

Sect. 8109. (a) Congress makes the following findings:

(1) Congress recognizes and supports, as being fundamental to the national defense, the testing of the Armed Forces weapons and weapon systems thoroughly, and to train members of the Armed Forces in the use of weapons and weapon systems before the forces enter hostile military engagements.

(2) It is the policy of the United States that the Armed Forces at all times exercise the utmost degree of caution in the testing of weapons and weapon systems in order to avoid endangering civilian populations and the environment.

(3) In the adherence to these policies, it is essential to the public safety that the Armed Forces not test weapons or weapon systems, or engage in training exercises with live ammunition, in close proximity to civilian populations unless there is no reasonable alternative available.

(b) It is the sense of Congress that—

(1) there should be a thorough and independent investigation of the circumstances that led to the accidental death of a civilian employee of the Navy installation at Vieques, Puerto Rico, and the wounding of four other civilians during a live-ammunition weapons test at Vieques, including a re-examination of the adequacy of the measures that are in place to protect the civilian population during such testing and of the extent to which the civilian population at the site can be adequately protected during such testing;

(2) the President should not authorize the Navy to resume live ammunition testing on
the Island of Vieques, Puerto Rico, unless and until he has advised the Committees on Armed Services of the Senate and the House of Representatives that—
(A) there is not available an alternative testing site with no civilian population located in proximity;
(B) the national security of the United States requires that the testing be carried out despite the potential risks to the civilian population;
(C) measures to provide the utmost level of safety to the civilian population are to be in place and maintained throughout the testing; and
(D) in the event that testing resumes, measures are to be taken to protect the Island of Vieques and the surrounding area from environmental degradation, including possible environmental harm, that might result from the testing of ammunition containing radioactive materials; and
(3) in addition to advising committees of Congress of the findings as described in paragraph (2), the President should advise the Governor of those findings and, if the President decides to resume live-ammunition weapons testing on the Island of Vieques, consult with the Governor on a regular basis regarding the measures being taken from time to time to protect civilians from harm from the testing.

The PRESIDING OFFICER. The amendment is laid aside.

AMENDMENT NO. 581

Mr. INOUYE. I offer an amendment for Senator INOUYE on native Hawaiian, and I ask to have that numbered and set aside.

The PRESIDING OFFICER. The amendment will be numbered and laid aside.

AMENDMENT NO. 582

(Purpose: To authorize the use of up to $35,000,000 for the retrofitting and improvement of the current inventory of Patriot missiles to meet current and projected threats from cruise missiles)

Mr. INOUYE. Mr. President, I offer an amendment for Senator KENNEDY on Patriot missiles, and I ask that it be numbered and set aside.

The PRESIDING OFFICER. The amendment is numbered and set aside.

The assistant legislative clerk read as follows:

The amendment is as follows:

Mr. INOUYE, Mr. President, I propose an amendment numbered 583.

The amendment is as follows:

At the end of the amendment, add the following new section:

SEC. 8108. Notwithstanding any other provision in this Act, the total amount appropriated in this Act for Missile Procurement, Army is hereby reduced by $200,000,000: Provided, That not more than $336,555,000 of the funds provided under this Act may be obligated for National Missile Defense programs: Provided further. That notwithstanding any other provision in this Act for Aircraft Procurement, Army is hereby increased by $56,100,000 for re-engining of the CH-47 helicopter: Provided further, That notwithstanding any other provision in this Act, the total amount appropriated in this Act for Missile Procurement, Army is hereby increased by $99,400,000 for advance procurement of the Javelin missile: Provided further, That notwithstanding any other provision in this Act, the total amount appropriated in this Act for Procurement of Weapons and Tracked Combat Vehicles, Army, is hereby increased by $20,000,000 for procurement of the Field Artillery Ammunition Supply Vehicle: Provided further, That notwithstanding any other provision in this Act, the total amount appropriated in this Act for Procurement of Aircraft, Army is hereby increased by $25,500,000 for procurement of SINCgars radars.

The PRESIDING OFFICER. The amendment is numbered and set aside.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk read as follows:

The amendment is as follows:

At the appropriate place in the bill, insert the following:

Of the funds appropriated in title III, Procurement, under the heading “Missile Procurement, Army,” up to $35,000,000 may be made available to retrofit and improve the current inventory of Patriot missiles in order to meet current and projected threats from cruise missiles.

The PRESIDING OFFICER. The amendment is numbered and laid aside.

AMENDMENT NO. 583

(Purpose: To reduce funding for the National Missile Defense program by $200,000,000 and to increase funding for Army modernization programs by $200,000,000)

Mr. INOUYE. Mr. President, I offer an amendment for Senator LEVIN on the National Missile Defense program, and I ask that it be numbered and set aside.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The amendment is as follows:

Mr. LEVIN, proposes an amendment numbered 583.

The amendment is as follows:

At the end of the amendment, add the following new section:

SEC. 8108. Notwithstanding any other provision in this Act, the total amount appropriated in this Act by titles III, IV, and VI is hereby reduced by $3,100,000,000, the reductions to be derived from appropriations as follows:

(1) From Operation and Maintenance, Army, $27,000,000.

(2) From Operation and Maintenance, Navy, $36,000,000.

(3) From Operation and Maintenance, Marine Corps, $10,200,000.

(4) From Operation and Maintenance, Air Force, $61,800,000.

(5) From Operation and Maintenance, Defense-Wide, $78,900,000.

(6) From Operation and Maintenance, Army National Guard, $53,500,000.

(7) From Operation and Maintenance, Air National Guard, $2,900,000.

(8) From Aircraft Procurement, Army, $178,000,000.

(9) From Procurement of Weapons and Tracked Combat Vehicles, Army, $26,400,000.

(10) From Procurement of Ammunition, Army, $37,500,000.

(11) From Other Procurement, Army, $17,000,000.

(12) From Aircraft Procurement, Navy, $69,000,000.

(13) From Weapons Procurement, Navy, $54,400,000.

(14) From Shipbuilding and Conversion, Navy, $317,500,000.

(15) From Other Procurement, Navy, $67,800,000.

(16) From Procurement, Marine Corps, $54,900,000.

(17) From Aircraft Procurement, Air Force, $164,000,000.

(18) From Missile Procurement, Air Force, $25,400,000.

(19) From Procurement of Ammunition, Air Force, $5,100,000.

(20) From Other Procurement, Air Force, $53,400,000.

(21) From Procurement, Defense-Wide, $73,000,000.

(22) From National Guard and Reserve Equipment, $190,500,000.

(23) From Research, Development, Test, and Evaluation, Defense-Wide, $61,600,000.

(24) From Research, Development, Test, and Evaluation, Navy, $25,500,000.

(26) From Research, Development, Test, and Evaluation, Defense-Wide, $237,900,000.

(27) From Defense Health Program, $226,200,000.

(28) From Drug Interdiction and Counter-Drug Activities, Defense, $61,600,000.

The PRESIDING OFFICER. The amendment is numbered and laid aside.

AMENDMENT NO. 584

(Purpose: To authorize the Secretary of Defense to waive certain domestic source or content requirements in the procurement of items)

Mr. MCCAIN. Mr. President, I send a second amendment to the clerk, and I ask that it be numbered and set aside. The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The amendment is as follows:

The amendment is as follows:

The amendment is numbered 585.

The amendment is as follows:

At the end of the general provisions, add the following:

SEC. 1186. (a) Subject to subsection (c) and except as provided in subsection (d), the Secretary of Defense may waive any domestic

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

provision in this Act for Aircraft Procurement, Army, $67,800,000.

source requirement or domestic content require-
ment referred to in subsection (b) and thereby authorize procurements of items that are grown, reprocessed, reused, produced, or manufactured—
1) a foreign country the government of which is a party to a reciprocal defense memorandum of understanding that is entered into with the Secretary of Defense and is in effect; or
2) the United States or its possessions; or
3) the United States or its possessions or wholly or partly from components grown, reprocessed, reused, produced, or manufactured outside the United States or its possessions.
(b) For purposes of this section:
(1) A domestic source requirement is any requirement under law that the Department of Defense must satisfy its needs for an item by procuring an item that is grown, reprocessed, reused, produced, or manufactured in the United States, its possessions, or a part of the national technology and industrial base.
(2) A domestic content requirement is any requirement under law that the Department must satisfy its needs for an item by procuring an item produced or manufactured wholly or partly from components grown, reprocessed, reused, produced, or manufactured in the United States or its possessions.
(c) The authority to waive a requirement under subsection (a) applies to procurements of items if the Secretary of Defense first determines that—
1) the application of the requirement to procurements of those items would impede the reciprocal procurement of defense items under a memorandum of understanding providing for reciprocal procurement of defense items that is entered into between the Department of Defense and a foreign country in accordance with section 2531 of title 10, United States Code;
2) the foreign country does not discriminate against items produced in the United States to a greater degree than the United States discriminates against items produced in that country; and
3) one or more of the conditions set forth in section 2534(d) of title 10, United States Code, exists with respect to the procurements.
(d) LAWS NOT WAIVED.—The Secretary of Defense may not exercise the authority under subsection (a) to waive any of the following laws:
3) Sections 7309 and 7310 of title 10, United States Code, with respect to ships in Federal Supply Classes 8345 and articles or items of clothing, footwear, individual equipment, and insignia listed in Federal Supply Classes 8405, 8410, 8415, 8420, 8425, 8430, 8435, 8440, 8445, 8450, 8455, 8465, 8470, and 8475.
(e) RELATIONSHIP TO OTHER WAIVER AU-
THORITY.—The authority under subsection (a) to waive a domestic source requirement or domestic content requirement is in addition to any other authority to waive such requirement.

The PRESIDING OFFICER. The amendment is numbered and set aside.
Mr. McCAIN. Mr. President, I ask the distinguished chairman when he would like me to address the issue of one amendment concerning reallocation of $3.1 billion.
Mr. STEVENS. Could we wait until after 2:30? We are trying to get these in by the deadline, and then I will be happy to listen to the Senator’s comments.
Mr. McCAIN. I thank the chairman, and I yield the floor.

AMENDMENT NO. 586
(Purpose: To provide funds for continued research and development in Space Control Technology)
Mr. STEVENS. I send an amendment to the desk for Senator SHELBY, and I ask that it be numbered and qualified. The PRESIDING OFFICER. The clerk will report.
The assistant legislative clerk read as follows:
The Senator from Alaska [Mr. STEVENS], for Mr. SHELBY, proposes an amendment numbered 586.
The amendment is as follows:
In Title IV, under Research, Development, Test, and Evaluation, Army, add the following:
"(Purpose: To provide funds for research, development, test and evaluation Army, up to $10 million dollars may be utilized for Army Space Control Technology.)"
The PRESIDING OFFICER. The amendment is numbered and laid aside.

AMENDMENT NO. 587
Mr. STEVENS. Mr. President, I have a parliamentary inquiry. As I understand it, amendments should be numbered and qualified now, and we still have a portion of the managers’ package to complete. Would it be in order for me to reserve a place now for the final portion of the managers’ amendment and just have an amendment number for that purpose at this time.
The PRESIDING OFFICER. Without objection, it is so ordered.
Mr. STEVENS. Mr. President, May I inquire now from the clerk what number will that be.
The PRESIDING OFFICER. No. 587.
Mr. McCAIN. I thank the Chair, and I suggest the absence of a quorum.
The PRESIDING OFFICER. The Senators are correct.
Mr. STEVENS. Mr. President, I am number and laid aside.
Mr. STEVENS. Again, Mr. President, for the benefit of all Senators, after 2:30, no further amendments in the first degree will be in order; is that correct?
The PRESIDING OFFICER. The Senators are correct.
Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.
The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 589
(Purpose: To provide $3,800,000 (in PE 0602315N) for polymer cased ammunition and to provide an offset)
Mr. STEVENS. Mr. President, I send an amendment to the desk for Senators LOTT and COCHRAN, and I ask that it be qualified and set aside.
The PRESIDING OFFICER. The clerk will report.
The assistant legislative clerk read as follows:
The Senator from Alaska [Mr. STEVENS], for Mr. LOTT and Mr. COCHRAN, proposes an amendment numbered 589.
The amendment is as follows:
On page 107, between lines 13 and 13, insert the following:
"(a) The amounts appropriated by title II under the heading ‘‘Operation and Maintenance, Defense-Wide’’, up to $220,000 may be made available to carry out study described in subsection (b).
(b) The Secretary of the Army, acting through the Chief of Engineers, shall carry out a study for purposes of evaluating the cost-effectiveness of various technologies utilized, or having the potential to be utilized, in the demolition and cleanup of facilities contaminated with chemical residue at facilities used in the production of weapons and ammunition.

(2) The Secretary shall carry out the study at the Badger Army Ammunition Plant, Wisconsin.
(3) The Secretary shall provide for the carrying out of work under the study through use of the District Corps of Engineers and in cooperation with the Department of Energy Federal Technology Center, Morgantown, West Virginia.
(4) The Secretary may make available to other departments and agencies of the Federal Government information developed as a result of the study.

The PRESIDING OFFICER. The amendment is numbered and laid aside.
Mr. STEVENS. Mr. President, I suggest the absence of a quorum.
The PRESIDING OFFICER. The clerk will call the roll.
The legislative assistant proceeded to call the roll.
The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 590
(Purpose: To authorize the use of $220,000 for a study at Badger Army Ammunition Plant, Wisconsin, relating to environmental restoration and remediation at weapons and ammunition production facilities)
Mr. STEVENS. On behalf of the Senator from Hawaii, I send to the desk an amendment for Senator KOHL, and I ask that it be numbered and qualified.
The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:
The Senator from Alaska [Mr. STEVENS], for Mr. KOHL, proposes an amendment numbered 590.
The amendment is as follows:
At the appropriate place in the bill insert the following:
SEC. . Of the total amount appropriated in this Act for RESEARCH DEVELOPMENT TEST AND EVALUATION, NAVY shall be increased by $3,800,000 to continue research and development on polymer cased ammunition.
The PRESIDING OFFICER. The amendment is numbered and laid aside.
Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant proceeded to call the roll.
Mr. STEVENS, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 596
(Purpose: To set aside an additional $7,300,000 for space launch facilities, for a second team of personnel for range reconfiguration to accommodate launch schedules)
Mr. STEVENS. Mr. President, on behalf of Senator GRAHAM, I send an amendment to the desk and ask that it be numbered and qualified.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for Mr. GRAHAM, proposes an amendment numbered 596.

The amendment is as follows:

At the end of the general provisions, add the following:

SEC. 8109. (a) Of the funds appropriated in title II under the heading “Operation and Maintenance, Air Force” (other than the funds appropriated for space launch facilities), $7,300,000 shall be available, in addition to other funds appropriated under that heading for space launch facilities, for a second team of personnel for space launch facilities for range reconfiguration to accommodate launch schedules.

(b) The funds set aside under subsection (a) may not be obligated for any purpose other than the purpose specified in subsection (a).

The PRESIDING OFFICER. The amendment is numbered and laid aside.

AMENDMENT NO. 591
(Purpose: To provide for a study of the long term solutions to the removal of ordnance from the Tousaint River, Ohio)
Mr. STEVENS. Mr. President, I send an amendment to the desk for Senator VOINOVICH, and I ask that it be numbered and qualified.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for Mr. VOINOVICH, proposes an amendment numbered 591.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

Sec. 8109. Of the funds appropriated in this Act under the heading “Operation and Maintenance, Army”, up to $500,000 may be available for a study of the costs and feasibility of a project to remove ordnance from the Tousaint River.

The PRESIDING OFFICER. The amendment is numbered and laid aside.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant proceeded to call the roll.
Mr. STEVENS, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NOS. 592 THROUGH 601, IN BLOC
Mr. STEVENS. Mr. President, I have a series of amendments that I ask be adopted at this time: A Bond-Santorum amendment, $4 million for MTAPP; Senator HELMS amendment, $5 million for visual display environmental research; Senator BYRD, $10 million for addressing exposure to chemical warfare agents; Senator BYRD, $10 million for biometrics; Senators ASHCROFT and BOND related to the B-2 bomber; Senator SMITH, $10 million for U-2 upgrades; Senator HARKIN, $6 million for Gulf War syndrome; Senator GRAMM, $17.5 million for the F-15 data link; and Senator COLLINS, $3 million for MK-43 gun conversion; Senator INOUYE for Ford Island. I ask that these amendments be considered en bloc and adopted en bloc.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes amendments numbered 592 through 601, en bloc.

The amendments are as follows:

AMENDMENT NO. 592
(Purpose: To set aside $4,000,000 for the Manufacturing Technology Assistance Pilot Program)
On page 107, between lines 12 and 13, insert the following:

SEC. 8109. Of the funds appropriated in title II under the heading “Operation and Maintenance, Air Force”, up to $4,000,000 may be available for the Manufacturing Technology Assistance Pilot Program.

AMENDMENT NO. 593
(Purpose: To set aside $5,000,000 of Army RDT&E funds for visual display performance and visual display environmental research and development)
At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading “Research, Development, Test, and Evaluation, Army”, up to $5,000,000 may be available for visual display performance and visual display environmental research and development.

AMENDMENT NO. 594
(Purpose: To increase by $10,000,000 the amount provided for the Army for other procurement for an immediate assessment of biometrics sensors and templates repository requirements, and for combining and consolidating biometrics security technology and other information assurance technologies to accomplish a more focused and effective information assurance effort)
On page 107, between lines 12 and 13, insert the following:

SEC. 8109. Of the funds appropriated in title III under the heading “Other Procurement, Army”, $51,250,000 shall be available for the Personal System Security Program, of which up to $10,000,000 may be made available for an immediate assessment of biometrics sensors and templates repository requirements and for combining and consolidating biometrics security technology and other information assurance technologies to accomplish a more focused and effective information assurance effort.

AMENDMENT NO. 595
(Purpose: To express the sense of Congress commending the men and women of Whiteman Air Force Base, Missouri, for their ongoing contributions to Operation Allied Force over Yugoslavia)
At the end of the general provisions, add the following:

SEC. 8109. (a) Congress makes the following findings:
(1) The B-2 bomber has been used in combat for the first time in Operation Allied Force against Yugoslavia.
(2) The B-2 bomber has demonstrated unparalleled strike capability in Operation Allied Force, with cursory data indicating that the bomber could have dropped nearly 20 percent of the precision ordinance while flying less than 3 percent of the attack sorties.
(3) According to the congressionally mandated Long Range Air Power Panel, “long range air power is an increasingly important element of United States military capability”.
(4) The crews of the B-2 bomber and the personnel of Whiteman Air Force Base, Missouri, deserve particular credit for flying and supporting the strike missions against Yugoslavia, some of the longest combat missions in the history of the Air Force.
(5) The bravery and professionalism of the personnel of Whiteman Air Force Base have advanced American interests in the face of significant challenge and hardship.
(6) The dedication of those who serve in the Armed Forces, exemplified clearly by the personnel of Whiteman Air Force Base, is the greatest national security asset of the United States.
(b) It is the sense of Congress that—
(1) the skill and professionalism with which the B-2 bomber has been used in Operation Allied Force by the personnel of Whiteman Air Force Base, Missouri, and the Air Force;
June 8, 1999

CONGRESSIONAL RECORD—SENATE 11847

(2) the B-2 bomber has demonstrated an unparalleled capability to travel long distances and deliver devastating weapons payload, proving its essential role for United States power projection in the future; and

(3) the excellence of the B-2 bomber and the personnel of Whiteman Air Force Base deserve the gratitude of the American people for their dedicated performance in an indispensible role in the air campaign against Yugoslavia and in the defense of the United States.

AMENDMENT NO. 597

In the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title III under the heading "AIRCRAFT PROCUREMENT, AIR FORCE," up to $20,000,000 may be made available for U-2 aircraft defensive system modernization.

AMENDMENT NO. 598

(Purpose: To set aside $25,185,000, the amount provided for research and development relating to Persian Gulf illnesses, of which $4,000,000 is to be available for continuation of research into Gulf War syndrome that includes multidisciplinary studies of fibromyalgia, chronic fatigue syndrome and $2,000,000 is to be available for expansion of research program in the Upper Great Plains region)

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the amount appropriated in title IV under the heading "RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, DEFENSE-WIDE", $25,185,000 shall be available for research and development relating to Persian Gulf illnesses, of which $4,000,000 shall be available for continuation of the research into Gulf War Syndrome that includes multidisciplinary studies of fibromyalgia, chronic fatigue syndrome, multiple chemical sensitivity, and the use of research methods of cognitive and computational neuroscience, and of which up to $2,000,000 may be made available for expansion of the research program in the Upper Great Plains region.

AMENDMENT NO. 599

(Purpose: To set aside $17,500,000 for procurement of the F-15A/B data link for the Air National Guard)

At the appropriate place in the bill insert the following:

SEC. 8109. Of the total amount appropriated in title III under the heading "AIRCRAFT PROCUREMENT, AIR FORCE," up to $17,500,000 may be made available for procurement of the F-15A/B data link for the Air National Guard.

AMENDMENT NO. 600

(Purpose: To increase funds for the MK-43 Machine Gun Conversion Program)

At the appropriate place in the bill insert the following:

SEC. 8109. Of the funds appropriated in title III under the heading "WEAPONS PROCUREMENT, NAVY," up to $3,000,000 may be made available for the MK-43 Machine Gun Conversion Program.

AMENDMENT NO. 601

At the appropriate place in the bill insert:

SEC. . DEVELOPMENT OF FORD ISLAND, HAWAII.

(a) In General.—(1) Subject to paragraph (2), the Secretary of the Navy may exercise any authority or combination of authorities in this section for the purpose of developing or facilitating the development of Ford Island in part for Defense personal property under subsection (c), the Secretary of the Navy shall accept cash, real property, personal property, or services, or any combination thereof, in an amount equal to not more than the fair market value of the real or personal property conveyed or leased.

(b) Subject to subsection (i), the services accepted by the Secretary under paragraph (1) may include the following:

(A) The construction or improvement of facilities at Ford Island.

(B) The restoration or rehabilitation of real property at Ford Island.

(C) The provision of property support services for property or facilities at Ford Island.

(d) Notice and Wait Requirements.—The Secretary of the Navy may not carry out a transaction authorized by this section unless—

(1) the Secretary submits to the appropriate committees of Congress a notification of the transaction, including—

(A) a detailed description of the transaction; and

(B) a justification for the transaction specifying the manner in which the transaction will meet the purpose of this section; and

(2) a period of 30 calendar days has elapsed following the date on which the notification is received by those committees.

(h) FORD ISLAND IMPROVEMENT ACCOUNT.—

(1) There is established on the books of the Treasury an account to be known as the "Ford Island Improvement Account".

(2) There shall be deposited into the account the following amounts:

(A) Amounts authorized and appropriated to the Fund.

(B) Except as provided in subsection (c)(4)(B), the amount of any cash payment received by the Secretary for a transaction under this section.

(i) Use of Account.—(1) Subject to paragraph (2), to the extent provided in advance in appropriation Acts, funds in the Ford Island Improvement Account may be used as follows:

(A) To carry out or facilitate the carrying out of a transaction authorized by this section.

(B) To carry out improvements of property or facilities at Ford Island.

(C) To obtain property support services for property or facilities at Ford Island.

(2) To the extent that the authorities provided under subchapter IV of chapter 109 of title 10, United States Code, are available to the Secretary of the Navy, the Secretary may not use the authorities in this section to acquire, construct, or improve family housing units, military unaccompanied housing units, or ancillary supporting facilities related to military housing at Ford Island.

(A) The Secretary may transfer funds from the Ford Island Improvement Account to the following funds:

(1) The Department of Defense Family Housing Improvement Fund established by section 2883(a)(1) of title 10, United States Code.

(2) The Department of Defense Military Unaccompanied Housing Improvement Fund established by section 2883(a)(2) of that title.

(3) The amount transferred under subparagraph (A) to a fund referred to in that subparagraph shall be available in accordance with the provisions of section 2883 of title 10, United States Code, for activities authorized under subchapter IV of chapter 109 of that title.

(j) Inapplicability of Certain Property Management Laws.—Except as otherwise
provided in this section, transactions under this section shall not be subject to the following:

(k) SCORING.—Nothing in this section shall be construed to waive the applicability to any lease entered into under this section of the budgetary scoring guidelines used to measure compliance with the Balanced Budget Emergency Deficit Control Act of 1985.

(1) CONFORMING AMENDMENTS.—Section 2883(c) of title 10, United States Code, is amended—
1. in paragraph (1), by adding at the end the following new subparagraph:
   **"(E) Any amounts that the Secretary of the Navy transfers to that Fund pursuant to section 2862(i)(3)(A)(i) of the Military Construction Authorization Act for Fiscal Year 2000, subject to the restrictions on the use of the transferred amounts specified in that section.";** and
2. in paragraph (2), by adding at the end the following new subparagraph:
   **"(E) Any amounts that the Secretary of the Navy transfers to that Fund pursuant to section 2862(i)(3)(A)(i) of the Military Construction Authorization Act for Fiscal Year 2000, subject to the restrictions on the use of the transferred amounts specified in that section."**

(m) DEFINITIONS.—In this section:
1. The term "appropriate committees of Congress" has the meaning given that term in section 2801(4) of title 10, United States Code.
2. The term "property support service" means the following:
   (A) Any utility service or other service listed in section 2886(a) of title 10, United States Code.
   (B) Any other service determined by the Secretary to be a service that supports the operation and maintenance of real property, personal property, or facilities.

The PRESIDING OFFICER. Without objection, the amendments are agreed to.

The amendments (Nos. 592 through 601) were agreed to.
Mr. STEVENS. Mr. President, I move to reconsider that action.
Mr. INOUYE. I move to lay that motion on the table.
The motion to lay on the table was agreed to.
Mr. STEVENS. Mr. President, it is my understanding that the time has now arrived when no more first degree amendments will be cleared to be offered.
The PRESIDING OFFICER. That is correct.
Mr. STEVENS. I inquire from the Senator from Arizona if he wishes to address the Senate at this time.
I yield the floor.
THE PRESIDING OFFICER. The Senator from Arizona is recognized.

AMENDMENT NO. 584

Mr. MCCAIN. Mr. President, this amendment restores $3.1 billion in operations and maintenance and procurement funding that is cut by section 108 of the bill. It reduces various accounts to eliminate funding for low-priority, unnecessary and wasteful spending by an equal amount. The amendment doesn’t change the total amount for defense in this bill. It simply redirects the cuts to eliminate pork barrel spending rather than high-priority, unnecessary and wasteful spending programs that have not been scrutinized in the normal merit-based review process.

Congress recently passed an emergency spending bill that contained nearly $11 billion in defense spending to pay for the costs of ongoing operations in Kosovo. I believe the administration request was around $5 billion. As the chairman of the committee stated on the floor yesterday, we will very likely need to act later this year on another supplemental bill to pay for continued offensive operations against Serbia or to enforce a peace agreement and protect the Kosovars who return home.

Why, then, would we want to cut funding from this bill that would be needed to carry out these operations into the next fiscal year?

Why wouldn’t we instead cut some of the $5 billion in pork barrel spending that has been put in this bill principally for the benefit of Members and their constituents?

Here is the list of unrequested programs included in the bill that I have accumulated.

I ask unanimous consent that the list ordered to be printed in the RECORD, as follows:

Department of Defense appropriation bill for fiscal year 2000, objectionable provisions—Continued

Directive Report Language: Directs the Army to consider conveying firefighting equipment to the Bayonne Local Redevelopment Authority and the City of Bayonne; recommends that Rock Island Arsenal be included as a priority facility for the Department’s Total Asset Visibility Implementation Plan.

fabrics (Berry Amendment).

BILL LANGUAGE

Operations and Maintenance, Army
Not less than $355 million shall be avail-
able only for conventional ammunition care
and maintenance.

Shipbuilding and Conversion, Navy
The Secretary of the Navy is authorized to enter into a contract for an DD-1 Amphibi-
OUS Assault Ship which shall be funded on
an incremental basis.

Chemical Agents and Munition Destruction, Army
$1 million shall be available until expended
each year only for a Johnston Atoll off-is-
land leave program.

Intelligence Community Management Account
$27 million shall be transferred to the De-
partment of Justice for the National Drug
Intelligence Center.
Kaho‘olawe Island Conveyance, Remedi-
ation, and Environmental Restoration Fund:
$35 million.

National Capital Region

Section 8022: $500,000 shall be used during a
single fiscal year for any single relocation of
an organization, unit, activity or function of
the Department of Defense into or within the
National Capital Region.

Section 8029: Prohibition on the use of funds to
reduce or disestablish the 53rd Weather Reconnaissance Squadron of the Air
Force Reserve, Air Force Base.

Section 8033: $26.4 million shall be avail-
able only for the Civil Air Patrol Corpora-
tion.

Section 8070: Restrictive employment prac-
tices for contractors that could increase the
cost of the work to be performed.

Section 8071: The Army shall use the former
George Air Force Base as the airhead for the
National Training Center at Fort
Irwin.

Section 8083: Authorizes the Defense De-
partment to waive reimbursement costs as
associated with the conduct of seminars, con-
ferences and other activities at the Asia-Pac-
cific Center for Security Studies.

Section 8086: Authorizes $325,333 for pay-
ment to Trans World Airlines to replace lost
and canceled Treasury checks.

Section 8103: $3 million shall be transferred to
the Department of Transportation to re-
align railroad track on Elmendorf Air Force
Base.

Section 8106: Requires procurement of malt
beverages to be produced by nonprofit funds
activities of the Defense Department
from commercial entities within the state in
which the military installation resides.

Section 8107: Amends the Communications
Training Center ........................ 2.0

Mr. McCAIN. Mr. President, it totals
$5 billion. Self-restraint in fiduciary
matters is a virtue, especially for a
party that rose to majority status with
the promise of reducing this type of
taxpayers.

But every year it is the same old
story: More money for NULKA antiship
decoy systems; more money for the
plethora of laser projects that have prolif-
erated at every lab in the coun-
try; more money for unrequested and
unneeded aircraft; more money for
government grenade launchers—we have
got to have a stockpile of these
things that will last forever—more money
for research into double-hull technology,
which shipbuilders are supposed to pro-
vide themselves for the requirements
of the Oil Pollution Prevention Act.

There are millions every year for
hyperspectral research that is not re-
quested by the military. Earmarks like
the one that requires the Army and
Marine Corps to make the Rock Island
arsenal the center of all future design,
development and production activities
related to artillery do not represent
good public policy. What is it that
forces us to designate Rock Island arse-
nal as a center for this? That’s not pub-
lc policy.

Medical research and environmental
matters unrelated to combat ought to be
carefully scrutinized when funded in the
defense budget. We do just the op-
posite: we use the defense budget to fund
pet projects that should be funded through
nondefense agencies in nonde-

Section 8108: Reduces the amount available
for self-restraint in fiduciary
matters.

But every year it is the same old
tale of self-restraint where the public treas-
ury is concerned. Failing to do so will
force us to designate Rock Island and
other bases as a center for this? That’s not pub-
lc policy.

Mandates such bidding process be initiated
during fiscal year 1999.

At the very time a consensus has formed
around the proposition that the
armed forces are being stretched peril-
ously thin, a situation that will get
worse when we send more than a bri-
gade’s worth of ground forces into
Kosovo, it is incumbent upon those of
us elected to represent the interests of
the nation that we act with a modicum
of self-restraint where the public trea-
sure is concerned. Failing to do so will
not only damage the treasure, it will
most assuredly cost lives. This is, after
all, national defense.

Let’s review some recent examples of
readiness shortcomings. Shortcomings
that the Joint Chiefs of Staff have re-
peatedly emphasized pose a serious
threat to both near and long-term
readiness:
The nuclear carrier U.S.S. Enterprise (CVN–65) recently deployed to the Persian Gulf and Kosovo, underrunmanned by some 800 sailors.

We are losing pilots to the commercial airlines faster than we can train them.
The Navy has one-half the F/A–18 pilots, one-third of the S–3 pilots, and only one-quarter of the EA–6B pilots it needs.

Only 26 percent of the Air Force pilots have committed to stay beyond their current service agreement.
The Army says that five of its ten divisions lack enough majors, captains, senior enlisted personnel, tankers and gunners.

Again, the world watches as the Air Force main bomber, the B–52, once again is called to duty to delivery air launched cruise missiles in combat.

How many times has the Air Force called upon this 40-year old workhorse to deliver firepower? The B–52 bomber was already old when I saw it fly in Vietnam, and yet the Air Force plan will carry the current bomber fleet through the next 40 years, with a replacement to the B–52 tentatively planned in 2007.

The Navy is struggling to maintain a fleet of 300 ships, down from over 500 in the early 1990s. The fiscal year 2000 budget will not support a Navy of even 200 ships.

The Marine Corps saves money in spare parts by retreading light trucks and Humvees, so as to afford small arms ammunition for forward deployed Marines.

Mr. President, the cumulative effect of these types of readiness problems will most assuredly translate into higher risks for the young men and women we send into harm’s way to defend us and our country.

Mr. President, I understand what is going on here. We have a problem, and that is the existence of stringent budget caps designed to keep government spending in check. I support those who are resisting the urge to bust the budget by exceeding the spending allowed by the 1997 budget agreement.

I also understand that the Appropriations Committee has to balance the interests of those who favor domestic spending over defense spending, and I realize that compromises have to be made.

...
best reflect the needs of the Department and the pressures across the discretionary accounts under the 1997 budget agreement.

Our committee adjusted the totals in this bill to reflect those specific amounts that carry over from the 1999 appropriation into the year 2000. Having done so, having appropriated and carrying more into this account, we then removed some of the moneys that we previously allocated to the account into the nondefense area. The discretion to do that gave us the ability to meet critical needs in the nondefense area.

We believe that we did address critical readiness problems in the supplemental, and we specifically anticipated some of those needs which could possibly have been incurred—the costs incurred before September 30th of this year. Those now appear to be funds that will be required in the year 2000, and we have met those demands by moving forward with the money.

I know caused some anxiety to people within the Department of Defense who believe that we have cut the bill. We have not cut the bill. The bill is exactly the same amount of money originally under consideration by the committee, but we have found the moneys to pay those bills by carrying forward into the year 2000 some of the 1999 appropriations.

We believe we have met the needs of the military under this bill. The amendment of the Senator from Arizona strikes from the bill $3.1 billion, rather than carry forward with the money from 1999. I think that will have a detrimental impact on the priorities established by the committee and the priorities that some Members have presented not only in committee but on the floor.

For instance, the Senator's amendment would reduce nearly $270 million from the Army's modern standard, the UH-60 Blackhawk. In procurement, the amendment pending would reduce or eliminate funding provided to replace the aging UH-1, the Huey helicopters, built in the 1960s, with the Army's modern standard, the UH-60 Blackhawk.

The amendment reduces funding for advance procurement of one of the Commandant of the Marine Corps' top priorities, the LHD-8 amphibious assault ship.

For the Air Force, funding for additional F-16, EC-130J and JStars aircraft would be deleted.

In research and development, funds added for ground and satellite, national missile defense and the third arrow battery for Israel would be reduced.

For the Defense Health Program, the additional amounts provided for breast cancer research and prostate cancer research were added also by the Senator's amendment.

In response to Members' requests that the committee provide additional funds to fight the war on drugs, the committee did add funding for the Gulf states counterdrug initiative, the National Guard counterdrug missions, and $50 million in response to the proposed Drug Free Century Act. Senator McCain's amendment would delete $81.6 million of the funds added to the bill for those efforts.

The Senator from Arizona and I have discussed on many occasions that we do have different approaches to addressing the funding needs for the Armed Forces. I know Senator McCain is a stalwart proponent of the men and women of the armed services and their families, and I believe I am also. We are just approaching the job from a different direction.

I believe that I must, on behalf of the committee, oppose the amendment. I truly believe a flexible system provided by the committee to the Department of Defense best accommodates the needs of the military, and ensures that funds are available in the accounts where necessary to accommodate readiness, quality of life, maintenance and technology priorities. I can state categorically the accounts that are here to accommodate readiness, quality of life, modernization and technology priorities of the Department of Defense have been met by our bill.

The Senator mentioned some of the items in this bill that affect my State. The Point Barrow landfill was created by the Department of the Navy. It operated in Point Barrow for many, many years. As that installation was closed down, the Department of Navy did not remediate the landfill. It is a terrible problem in the Arctic, particularly in the summertime when that landfill becomes just a morass. The local people have asked, using Defense Department funds, that that landfill be remediated. This bill does, in fact, provide monies for that purpose.

The Senator mentioned the joint Federal telemedicine project that is ongoing in my State. Again, this is an initiative by the Department of Defense that has a substantial amount of communications capability in our State to deal with Federal agencies' needs and the needs of the services they provide throughout the State of Alaska to convert to a system for medicine using telemedicine techniques. We believe that is going to result in reducing the cost of health care delivery to Alaska Native people and the Indian Health Service to the military population throughout our State who serve on military bases and those who receive the benefits of Federal programs. It is not a general program for the population as a whole.

I say to the Senate, I understand the Senator's amendment, I respect it, but I believe and my committee believes that there are instances where activities, which originated on military bases or caused by military occupation of specific portions of land within the individual States, do affect the local population and that those obligations of the Federal Government should be met with defense funds.

The basic problem, though—I go back to the beginning—we did not cut from other accounts in order to get the money to shift to other appropriations bills. For instance, we have shifted a substantial amount of money now through what we call the deficiency subcommittee—which was a subcommittee created specifically for that purpose—piles from various accounts from the Department of Defense into the agriculture appropriations bill, but the way it was done does not reduce the amount of money that will be spent by the Department of Defense in the year 2000. A portion of that money realy are carried over to be spent in the year 2000 rather than being spent in 1999, and that is what we intended when we asked the Congress to approve that supplemental appropriations bill. I hope the Senate will agree with us and will oppose this amendment and defeat it. It is a significant vote for us to determine.

Members will note the reports in the press and in the media concerning the meetings that are taking place in the House of Representatives. They are deciding on an approach quite similar to ours to reduce the amount of money that will be spent through the fiscal year 2000 process and carry over some of the funds from 1999 to meet the obligations in the year 2000.

I think that is a legitimate way to use the money that is available to us and will enable us hopefully to stay under the caps and to stay within the caps that are now no longer high priority so we can meet the obligations of the year 2000 with the funds that will be available under the budget agreement.

I think we will. There is still a serious gap in money, but we will find that money somewhere within the agencies, either by reducing carryover funds or by eliminating funds that are now no longer high priority so we can meet the obligations of the year 2000 with the funds that will be available under the budget agreement. If we cannot do that, we will come to the Senate in September, and we will have to work out a way to solve our problem.

Right now, our goal—and I think it is a bipartisan goal—is to live under the caps in treating all of the bills that have to be passed by our committee. Thirteen separate bills have to be brought to this floor, and ours is the only committee which faces a point of order under the Budget Act if we exceed the caps. We are trying our best to live with that Budget Act. I think we will.

I yield to my friend if he has any comments to make.
The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I join my colleagues, Mr. STEVENS, in opposition to the McCain amendment. In the statement made by the distinguished Senator from Arizona, he mentioned a brown tree snake, $1 million to either control or to rid the State of Hawaii of this menace.

The history of the brown tree snake is a rather simple one, and it has been documented. It was found in Solomon Islands and during the war, army transport vessels accidentally or otherwise carried several brown tree snakes from the Solomon Islands to Guam.

Within 2 years, seven species of birds have been wiped out on Guam, babies have been threatened, and there is a brownout almost once an evening because of the brown tree snakes.

The State of Hawaii has no snakes unless they are brought in. It has been documented that the brown tree snake was brought in from Guam via the Air Force aircraft. Therefore, the Department of Defense, assuming some responsibility for this, has not disapproved this amount of $1 million to help the State of Hawaii rid itself of the brown tree snakes.

Hawaii's environment is such that it is rather fragile. We have no natural predators to control the snakes, and if it ever gets loose in my State, then all the beautiful birds of paradise will disappear.

I think the amount we have put in this bill represents the position on the part of the Department of Defense in assuming responsibility is a rather small one.

I hope my colleagues will join us in opposing the McCain amendment.

Mr. STEVENS. Mr. President, it is my hope that the Senate will agree that we can proceed on other amendments. I ask for the yeas and nays on the Senator's amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that this amendment be set aside and hopefully we will vote on it sometime between 3:30 and 4. I request there be 2 minutes equally divided so the Senator from Arizona can state to the Senate again the purpose of the amendment before the final vote on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 581

Mr. INOUYE. Mr. President, I ask unanimous consent that amendment No. 581 be taken up at this moment.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Hawaii [Mr. INOUYE] proposes an amendment numbered 581.

Mr. INOUYE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert:

Secretary of Defense, assuming responsibility, shall develop a consultation policy with regard to programs and activities which affect the Native Hawaiian community in Hawaii.

On May 14, 1998, President Clinton issued Executive Order 13084, directing every Federal agency to establish an effective process to provide for meaningful and timely consultation and coordination with Native Americans and Native American governments in the development of policies and practices that significantly or uniquely affect their communities. On October 20, 1998, the Secretary of the Department of Defense announced the issuance of the Department's consultation policy affecting two of the three constituent Native Americans—Native Hawaiians and Alaska Natives. The proposed bill language authorizes the Department of Defense to develop a similar consultation policy for the third constituent group of Native Americans—Native Hawaiians—for the purpose of assuring maximum Native Hawaiian participation in the direction and administration of governmental services so as to render those services more responsive to the needs of the Native Hawaiian community.

The United States recognizes and affirms that American Indian, Alaska
Native, and Native Hawaiian people, as the aboriginal, indigenous, native people of the United States is intended to maximize the participation of native people in the direction and administration of governmental services to their communities in order to make those services more responsive to the needs of the native people and their communities. In accordance with that policy, the Congress encourages Federal agency consultation with the aboriginal, indigenous, native people of Hawaii, Native Hawaiians, with regard to agency actions that uniquely or significantly affect them or their communities.

For purposes of these sections in the proposed bill language, the term "Native Hawaiian" means any individual who is a descendant of the aboriginal people who, prior to 1778, "occupied and exercised sovereignty in the area that now comprises the State of Hawaii."

I thank the chairman of the Defense Appropriations Subcommittee, Senator STEVENS, for his willingness to assure that the Department of Defense has a consistent policy as it relates to all Native Americans.

Mr. STEVENS. We are in agreement, Mr. President.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (No. 581) was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. INOUYE. I thank the Chair, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WELLSTONE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WELLSTONE. Mr. President, though I see on the floor Mr. INOUYE and Mr. STEVENS, two Senators for whom I have a tremendous amount of respect, I rise to speak in opposition to the proposed increases in military spending contained in this defense appropriations bill for fiscal year 2000.

I have been a strong supporter of our women and men in uniform, especially our veterans. I think we should provide the best possible training, equipment and preparations for our military forces. I understand and know full well that our forces have been asked in recent years to carry out a number of peacekeeping, humanitarian and other missions.

I voted to support the airstrikes in Kosovo. I have raised questions throughout this conflict. I hope there will be a diplomatic solution, and I hope the Kosovars will be able to go back home. I think we are at the beginning of a huge challenge. In particular, I want us to remember the Kosovars and continue especially with humanitarian assistance.

So I think we need to adequately support these activities, and I also supported the supplemental budget for the cost of the campaign in Kosovo. But I am troubled—and I think I am probably not alone in the Senate—but I have the opportunity and the honor of being able to speak as a Senator from Minnesota, and so I will—by what I see as a stance in this Congress toward even greater increases in Pentagon spending. I think the increase in spending in this legislation goes way beyond what we need to spend in the conflict in Kosovo and way beyond what I think a post-cold war defense budget should reflect.

This appropriation bill totals $264 billion, and we also appropriated a considerable amount more in the supplemental bill, the emergency bill. If you look at the cost of Kosovo, it will be a relatively small percentage of this total. But it comes to manpower, womanpower, from a funding perspective. And if we participate—and I believe we will—in the KFOR peace enforcement process, we will be contributing about 7,000 troops. The total armed force of the United States is roughly 1.5 million. So this is not a question of whether or not we go on and live up to our commitment in Kosovo. I think we can support that mission without this Pentagon budget at the level called for.

I fear that using Kosovo and also some vague rhetoric set of "threats" will end up—and I want to talk about some of the doctrines that underpin this budget—giving a blank check to the Pentagon this year and in the years ahead. This budget accounts for a little over half of the discretionary spending in the annual budget. That is what troubles me. If you look at the peak of the cold war, currently we are spending, roughly speaking, just thinking about real dollar terms, close to 90 percent—about 86—of the cold war budget, and that is during the height of the cold war.

Now, most of the funds in this budget go to maintaining a force structure that is shaped by the requirement to fight two simultaneous, major conflicts and to counter what defense analysts refer to as "uncertainty scenarios."

I recognize that the United States faces a number of threats around the world and that those threats have changed during the cold war period—in particular, the threat of terrorism and the proliferation of weapons of mass destruction. If we look carefully at those threats, we can see that in this budget too much of the spending is not directly related to meeting those threats but, rather, continues with what I define as cold war priorities.

We continue to pour billions of dollars into unnecessary cold war era weapons programs. We continue to maintain a nuclear arsenal that is completely disproportionate to the arming Iraq and Syria against our adversaries—an arsenal that could be substantially cut, resulting in dramatic savings, still providing for as strong a defense as we could ever need.

Congress has also skewed spending priorities by refusing to close military bases that the Pentagon acknowledges are unneeded and obsolete and which the Pentagon itself has pressed to close.

What is especially troubling about the spending in this budget is the Strategic Concepts—the two major regional conflicts concept and other uncertain scenarios—that are, I think, implausible and unlikely. I want to draw here on some excellent work done by analysts Carl Conetta and Charles Knight of the Project on Defense Alternatives in Cambridge, MA.

Beginning in the 1980s, the focus of defense planners moved away from "clear and present danger" of the Soviet Union to a "wild card" scenario of "uncertainty." Along with the shift has come a new kind of Pentagon partisan—the "uncertainty hawk." The uncertainty hawks are engaged in worst-case thinking. Among the sort of nonstandard scenarios, worst-case scenarios that are, for example, talked about with this kind of doctrine are defending the Ukraine or the Baltics against Russia, civil wars in Russia and Algeria, a variety of wars in China, contention with Germany, and wars against Iraq, Turkey, and Iran against Saudi Arabia. The Pentagon's Quadrennial Defense Review, QDR, uses unnamed "wild card" scenarios to help define these requirements.

Now, although both the 1993 and 1997 Defense Reviews link the two-war requirements to the Korean and Persian Gulf scenarios, these were also described merely as examples of possible wars. Officially, the two-war requirement—that we have to be able to fight two wars simultaneously—is generic. It is not tied directly to Korea or the gulf. As the Quadrennial Defense Review puts it, "We can never know with
June 8, 1999

CONGRESSIONAL RECORD—SENATE

11857

It is important to recognize, as opposed to appropriating money based upon this kind of strategic doctrine, that since 1945 the United States has fought only three major regional conflicts—one every 15 or 20 years. The regional great powers and peer competitors that currently enthral planners are only hypothetical constructs, and the world changes all of the time.

I will give an example of a little bit more of this doctrine. The prime candidates, in addition to these uncertainty scenarios, worst-case scenarios, for future peer rival status, given current doctrine, are Russia and China. A dozen years of dedicated investment might resuscitate a significant portion of the Cold War budget and forces, but that certainly is not what we are looking at right now—a major military competitor, Russia. The Chinese “threat,” even given all of the developments we have been talking about over the last several years, even more if China’s economy holds out, in 30 years it might be able to mount a “Soviet-style” challenge.

Surveying the prospects worldwide, a Defense Intelligence Agency analyst concludes that “no military or technical peer competitor to the United States is on the horizon for at least a couple of decades.”

As I have said, I believe we should maintain a strong defense. We face a number of credible threats in the world, including terrorism and the proliferation of weapons of mass destruction. But let’s make sure we carefully identify the threats we face and tailor our defense spending to meet them. Let’s not continue to maintain military spending and programs that are built on hypothetical threats that may not arise for decades—if at all.

I will argue as we look at this budget, which again makes up about one-half of our discretionary spending, that we ought to consider this vote in the context of where we are heading with these budget caps. I say yes to a strong defense but no to some of the unnecessary spending that is in this budget; no to some of the scenarios that are laid out in this budget and some of the doctrines that undergird the spending in this budget, especially when we are talking about over 50 percent of discretionary spending going into this area.

Whatever happened to the discussions we once had about national security at home? If we are going to spend 50 percent of our discretionary budget on the Pentagon—and we are not going to do anything about these budget caps, and we will have to, in my view, take these caps off, there is no question about it. But on current course within this context of the budget we now have before us, we are going to spend over 50 percent of discretionary spending on the Pentagon. And, as a result, what are we not doing? We are not looking at the other part of our national security, the part of our real national security is the security of our local communities.

Whatever happened to the idea that we were going to focus on early childhood development? Whatever happened to the necessity that we were talking about as being so important to our country that we had to invest in the health, skills, intellect, and character of our children? Whatever happened to the importance of affordable child care? Whatever happened to the importance of decent health care coverage for people?

In my State of Minnesota, 35 percent of senior citizens—that is it, 35 percent of senior citizens—have some prescription drug coverage, and other 66 percent have no coverage at all. Many of them are spending up to 40 percent of their budget just on these costs. Where is the funding going to be for that? Where is the funding going to be for the 44 million people who have no health insurance at all?

Yesterday, we had a White House conference dealing with mental health. I would add substance abuse. I have been doing work with Senator Domenici and proud to do so—on trying to deal with some discrimination and making sure that people get decent mental health coverage.

How are we going to move forward to make sure there is decent health care coverage for people? How are we going to make sure there is affordable child care? What about affordable housing? How are we going to take the steps in our communities to reduce the violence and to be able to get to the kids—I think of the juvenile justice bill that we passed not more than a couple of weeks ago—before they get into trouble in the first place? How are we going to make sure that higher education is affordable? How are we going to make sure we have the best education for every child?

I simply want to say I am going to vote against this bill, and I am going to vote against this bill for two reasons, neither of which has anything to do with the two very distinguished Senators who are moving this bill.

First of all, as I said, I think much of it goes beyond Kosovo. Much of it goes beyond our real national defense. I think too much of it is still based upon a cold war doctrine. I believe we can make cuts in the Pentagon budget and still have a strong defense. I have tried to lay that out.

Second of all, I am going to vote against this bill—I don’t think too many Senators are—because I view the vote on this Pentagon bill in the context of the overall budget and where these appropriations bills are going. I view some of the dollars spent on the Pentagon as being dollars that we are not going to spend for affordable child care, that we are not going to spend to make sure there is decent education for our children, that we are not going to spend to make sure there is affordable housing.

I argue that somewhere in the debate in the Senate we have to also look at real national security as not just being a strong defense as defined in this budget, which I am for, although I think a strong defense doesn’t necessitate all of the money we are spending, but, in addition, we have to think about real national security as the security of our local communities where—one more time, and I will finish on this—there is affordable child care—when are we going to get to that?—there is affordable housing, there is decent education, there is decent health care for our children, that we are not going to spend to make sure there is affordable housing.

I think that has to be part of the definition of our real national security. I think we have to make more decisive investments in these areas of public life in our Nation.

I believe this appropriations bill, in the context of the budget, where these appropriations bills are going to, subtracts from that very important agenda as well.

Let me finish one more time by being one of the Members of the Senate—I don’t know whether others will say—I think others will say this eventually—Mr. President, it is my view that right now we are in a fiscal straitjacket. We will not be able to live with these caps. We will be making a huge mistake if we don’t make some of the decisive investments I am talking about on the floor today. This will be a very shortsighted vision. We need to do much better as a nation going into the next century. And it can’t be just Pentagon spending; it always has to be to make sure that there is a peaceful opportunity for every child in our country, that we don’t have one out of every four children under the age of 3 growing up poor in our country, where we don’t have one out of every two children of color under the age of 3 growing up poor in our country, and make sure that every child, no matter color of skin, or income, or rural, or urban, or boy or girl, can grow up dreaming to be President of the United States of America.

I think this appropriations bill, in the context of the budget, where these appropriations bills are going to, subtracts from that very important agenda as well.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, it is about time to vote on the McCain amendment. We thought we would have another amendment offered by this time. But it has not been offered. I believe it is time we start voting on these amendments.

I will state for the Chair that it is my intention to find some way to call up these amendments in the order they were presented and dispose of them now as quickly as we can. There is a vote on cloture tomorrow on the Y2K
CONGRESSIONAL RECORD—SENATE

June 8, 1999

proposition. I assume that will carry. We certainly do not want to have this defense bill sailing around for the completion of a long process that is related to cloture.

I urge Members to cooperate with us. I will inquire of Members as they come to the floor now on this vote as to when they will be able to present their amendments to see if we can find some way to get some time limitations. It is possible. I believe, to finish this bill tonight with the cooperation of Members of the Senate.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 584

Mr. McCAIN. Mr. President, the chairman and ranking member spoke eloquently about the merits of several projects in this bill that affect their States. As I have said before, I don’t pretend to judge the merit of each and every project on the list of objectionable mandatory offsets. I do, however, object to the process by which these projects were added to this bill, the process that circumvented the normal and appropriate merit-based review for determining the highest priority not only in defense but across all appropriations bills.

I want to clarify something the chairman said: In this list, it does not—repeat, does not—include funding for the SBIRS program on the Israeli arrow missile defense program. There is no reduction in funding for those programs.

Finally, my colleagues know the military service chiefs testified to Congress earlier this year that they need more than $37 billion every year in order to redress several readiness shortfalls. This bill falls about $6 billion short of that goal. This amendment would restore $13 billion in high-priority readiness and modernization funds to help meet the services’ needs, offsetting every time with low-priority spending cuts.

I emphasize they came over and said that the proposal is acceptable to both sides. I ask that this amendment be agreed to in a way that is acceptable to both sides. I ask that this second-degree amendment. It will modify this amendment in a way that is acceptable to both sides. I ask that this amendment, as modified, be agreed to.

I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 584), as modified, was agreed to, as follows:

At the appropriate place in the bill, insert the following:

SEC. 79. Of the funds made available in Title IV of this Act under the heading—"Research, Development, Test And Evaluation, Navy"—up to $3,000,000 may be made available to continue research and development on polymer cased ammunition.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NOS. 588 AND 591, EN BLOC

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate amendments Nos. 588 and 591, and I ask that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendments.

The amendments (Nos. 588 and 591) were agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. INOUYE. I move to table the motion.

The motion to lay on the table was agreed to.

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 541

Mr. McCAIN. Mr. President, the chairman and ranking member spoke eloquently about the merits of several projects in this bill that affect their States. As I have said before, I don’t pretend to judge the merit of each and every project on the list of objectionable mandatory offsets. I do, however, object to the process by which these projects were added to this bill, the process that circumvented the normal and appropriate merit-based review for determining the highest priority not only in defense but across all appropriations bills.

I want to clarify something the chairman said: In this list, it does not—repeat, does not—include funding for the SBIRS program on the Israeli arrow missile defense program. There is no reduction in funding for those programs.

Finally, my colleagues know the military service chiefs testified to Congress earlier this year that they need more than $37 billion every year in order to redress several readiness shortfalls. This bill falls about $6 billion short of that goal. This amendment would restore $13 billion in high-priority readiness and modernization funds to help meet the services’ needs, offsetting every time with low-priority spending cuts.

I emphasize they came over and said that the proposal is acceptable to both sides. I ask that this amendment be agreed to in a way that is acceptable to both sides. I ask that this second-degree amendment. It will modify this amendment in a way that is acceptable to both sides. I ask that this amendment, as modified, be agreed to.

I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 584) was rejected.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRIVILEGE OF THE FLOOR

Mr. STEVENS. Mr. President, I ask unanimous consent that Bill Adkins, a legislative fellow on Senator Abraham’s staff, be granted privileges of the floor during the Senate’s consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, there are so many fellows being admitted this year that I am going to ask on the next one that comes up that all fellows that are working with Senators be limited to not more than 1 hour each on the floor during the consideration of this bill. Those chairs in the back of the Senate are for people who are working with us on this bill.

Mrs. BOXER addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

AMENDMENT NO. 543

Mrs. BOXER. Mr. President, I will take a little time to explain this amendment and to say that the primary coauthor of it is Senator HARKIN from Iowa. A cosponsor is Senator Wyden.
I ask unanimous consent that Senator Fingold also be added as a co-sponsor of the amendment and that his statement be placed in the Record at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I am happy to listen to the comments of the Senator. On the second page, it says, "... and the relevancy of the missions of aircraft to warfighting requirements."

It is the position of the committee that the aircraft we are talking about are for basically multimission functions and are really not designed for warfighting requirements. They are designed for transportation, basically to meet normal needs. If the Senator would delete that last clause, we will be happy to accept it.

Mrs. BOXER. I just want a moment, if I may confer with my friend.

Mr. STEVENS. Mr. President, I have been told there is an objection to my suggestion, so I withdraw it.

The PRESIDING OFFICER. The Senator from California is recognized.

Mrs. BOXER. Thank you, Mr. President. I will look at this because I have not asked for the yeas and nays at this time. We may well delete that particular part of the amendment. As a matter of fact, we will probably take care of that problem.

Mr. President, this amendment is a very important amendment. We basically say that the provision in the bill for leasing six luxury executive jets for military generals will be essentially deleted. These are the same kinds of executive jets that are used by, frankly, billionaires, CEOs of the biggest multinational corporations. I think providing executive jets to the military’s fleet of over 100 Gulfstream, Lear, and Cessna jets sends the wrong signal to our young men and women in the military and reflects misguided spending priorities by this Congress.

I want to tell you—and I know the Senator from Iowa would agree—it wasn’t easy to find this gold-plated pork. To say it was buried in this bill is an understatement. It was like finding a needle in a haystack. It is so disguised that there is no direct mention of the Gulfstream aircraft anywhere in the bill. They are being leased for the first time. I think, because it disguises the cost, which is enormous—when I get into it, I will tell you. It is about $39 million for one of these executive jets, compared to the executive jet that is in the fleet now that costs $5.4 million, which is very fancy, and that one is the Cessna Citation Ultra. This one is the Gulfstream; this is the gold-plated version.

The New York Times points out that leasing these jets costs taxpayers about $145 million more than buying these jets. But I have to tell you, if you lease them, it is hard to find them in the bill.

In order to find out what is going to be leased, we had to call the Air Force and get a fact sheet that clearly says the jets will be leased, and they will be top-of-the-line Gulfstream V jets. Again, nowhere in this bill do you see Cessna Citation Ultra used by these military commanders. If you read page 142—that is where the authority comes from—this is what it says. This is literally the last page of this bill, page 142.

Aircraft leasing. Inserts a provision to provide the Air Force the necessary authority to negotiate leases for support aircraft.

That is it. Support aircraft. No one would know that these were the Gulfstream jets that were stripped out of people on food stamps. The Senator from Iowa led the fight in the authorization bill to point out that our personnel overseas needed to be part of the WIC Program—the Women, Infants and Children Program—to give their children a chance to survive. So how do we now see up with almost, I might say, $5/2 million over the 10-year period to lease the fanciest executive jets that you can find? Until we are totally convinced—and from my point of view not even then—should we even consider this kind of an expenditure?

What is it for? Four-star generals can travel throughout the world in the greatest of comfort. I love to fly in comfort. I fly across the country almost every week. It is hard. I fly commercial and sometimes I sit in coach and sometimes I use my upgrades and sit in business class. It is wearing and hard, but it is fine. You don’t need to be in a top-of-the-line plane, or lease it at even a higher cost to do the business the military requires you to do. It is a really a question of priorities. We have done a lot for our enlisted personnel, but still we need to do more. Yet, we are doing this in this bill. I am very hopeful that the chairman—if we remove that one part from our amendment—will be able to join us in support of this amendment.

There may be some objection. But I hope we can agree to drop this. Military personnel often live in family housing that needs replacement or repair. This is a priority.

I was looking at the amendment offered by the Senate from Arizona. I almost supported it until the chairman explained what was happening. Sometimes Members understand these things. We look in our own areas. We see the deficiencies. I think that if Members want to put something in to improve the quality of life of the people they represent in the military, it is appropriate. But I don’t think this is appropriate.

Let me quote from the May 24 issue of Defense Week. This is talking about the emergency supplemental.

The New York Times has exposed the bills’ buried aircraft language... this raised lawmakers’ concerns that appropriators would appear even softer on pork than they already seemed.

If the committee thought this was pork and did not belong in this emergency appropriations bill, then I say it is still pork now. It is just in another vehicle. But pork is pork.

What is especially troubling is that this leasing authority could cost more than buying the six aircraft outright. Again, the New York times says that leasing the jets costs $476 million—but that is almost $5 billion over 10 years—while buying them would cost $333 million. I do my subtraction. That is a $143 million difference.

Here is how the Gulfstream company described these particular jets. This is the company that would get the sale of these jets:

The Gulfstream V includes an evolution in cabin design that minimizes the inherent strain of long-range travel. From the 100-person area air control, the aircraft is comfortably maintained 6,000-foot cabin altitude at 51,000 feet. The Gulfstream V provides an interior environment unmatched in transoceanic business travel.

Make no mistake, this is the top of the line in executive jets—$37 million per plane. For $30 million less per plane—for example, a Cessna Citation Ultra at $5.4 million—we could save a tremendous amount of money.

My amendment replaces this authority to lease executive jets with the request that the Department of Defense provide basic information about these aircraft. I will be happy to work with the chairman if he wants me to change some of that language. But we basically called for, in essence, a study to tell us why we would need these planes and what other planes could do the job that these planes do.

By the way, in Defense Week, they called this the “Go to Meetings Plane.” These planes are used to go to meetings. It is described that way in Defense Week.

We want to ask these questions: How many of the missions require a top-of-the-line executive jet?
What wartime requirements make the number of jets needed so high? Are there existing aircraft in the fleet that can meet these mission requirements or that can be modified to meet these requirements?

On another level, and without having to bring it to the Senate, I am going to personally send GAO a letter to look at this in detail later—we are told that a lot of these executive jets such as this can go 4,000 or 5,000 miles without refueling, as necessary to get to theaters of operation around the world. But the fact is, during the Gulf war operations and these were to ask the question: Is it really for the benefit of generals to use for rapid movement during war, or is it more for convenience in peacetime?

As the Senator from California said, we have a lot of budget problems here at the military. I, for one, have been trying to do something about getting WIC programs, as the Senator said, for our military personnel overseas. It is a blot on our national character and on our military that we have military personnel on food stamps. That is not right. It is not right that we have enlisted personnel who need the Women, Infants and Children Supplemental Feeding Program.

Last year, the Senator from California said, we offer an amendment here that would say at least when they go overseas they get the same WIC Program as they got here. If I am not mistaken, I think it came to the grand total of right around $5 to $20 million. The military said they couldn't afford to do it, but they can afford $40 million for six of these aircraft. Something is wrong when the military says they can't afford it, that the Department of Agriculture has to pay for it; the Defense Department can't, but they can afford a business jet such as this. That got me when I saw that. Something has to be done about this.

I understand they want to lease several of these Gulfstream V aircraft. I would like to have one to go back and forth to Iowa. I wouldn't have to go through Chicago anymore—probably nonstop right to Iowa. The Senator from California could use one, get on the jet right here and go to any airport in California nonstop.

Let me show you the interior of the aircraft: A nice, luxurious interior. Lean back, have your own personal TV set, a glass of wine. That is pretty nice travel.

Again, I am not saying that we have to strip down everything, that a general has to ride in a harness on a side bucket strapped onto a C-130. That is not what I am saying. There probably is a need for some of these aircraft to transport these people rapidly. My question has to do with the number of aircraft.

For example, I note that there are now over 300 aircraft in inventory, over 150 jets. I can't quite get an accurate count. Last time I counted, there were 154 jets, 70 Learjets. Regarding the C-9, the same as a Douglas DC-9, the Navy has 27, the Marines have 2, and the Air Force has 5. Gulfstreams, we have 16 already. We have some Gulfstream IIs and IVs, the predecessor to the Gulfstream V. They are about as nice, but they can't go as far. They are a good airplane. We have 70 Learjets total; 727s, we have 3. I am reading just the
Mr. HARKIN. I am delighted to yield for a question.

Mrs. BOXER. I know the Senator was a pilot in the military and I know he understands aircraft.

Mr. HARKIN. I think I do.

Mrs. BOXER. And I know he understands that these jets we are talking about are not fighting machines; they are go-to-meetings machines.

Mr. HARKIN. If I might interrupt, these are what in common nomenclature would be called executive business jets, converted. For example, in military terms, they call it a C-37 but it is really a Gulfstream V.

Mrs. BOXER. My friend showed a couple of photos of the Gulfstream and then a photo of the Cessna Citation.

Mr. HARKIN. Cessna Citation Ultra. By the way, it is a very good plane.

Mrs. BOXER. Yes. Mrs. Boxer has a good understanding that the Cessna Citation Ultra costs $5.4 million a copy, according to the Appropriations Committee, and that the cost on the Gulfstream V is about $39 million.

This is transportation for the highest level of military officers. My friend pointed out that we have a gap growing here between those at the bottom of the economic ladder in the military and those at the top. We know that will always be the case, but it seems to me it is exacerbated with this kind of situation.

I want to ask my friend if he believes that a top general could fly comfortably in a $5.4 million copy. According to the Appropriations Committee, the Gulfstream V costs about $39 million.

What we are doing is simply asking for a study to see if we can accommodate the needs of the generals in a cheaper way.

Mr. HARKIN. The basic answer to that is yes—depending on the mission, of course.

Now, if a general or a four-star wanted to fly from here nonstop to Europe, they couldn’t take this airplane which only has about a 2,000-mile leg. However, I might add, it could fly to Reykjavik and refuel. It can fly to Shannon and refuel. It will take an hour and a half or more; you have to land, refuel, and get out of there. But it is perfectly capable of doing that. A lot of businesses fly these overseas all the time. You just have to stop and refuel in one place, that is all. It even has a bathroom on board.

Mrs. BOXER. If I may ask my friend, isn’t it possible to base some of these planes in Europe, base them in different places, which is what they do anyway, so it is more convenient to make the switch?

Mr. HARKIN. I appreciate the Senator asking that question because I think it points up—first of all, I am not saying in the least need of any of this; I am saying we do need some of these planes. I was talking with the chairman about this. Let’s say a four-star officer has to go from Washington to Florida to Texas to Chicago for a series of meetings. He possibly cannot do it with a civilian plane. I understand that, if one has to go overseas for a certain meeting and get back. There are times when you cannot use civilian airplanes. But this type of jet could be used for any kind of domestic travel in the continental United States. But you might have to land and refuel. That does not bother me a whole heck of a lot.

I am saying with the Gulfstream Vs that we have now—which I said we have two or so right now in inventory, plus we have a number of Gulfstream IVs and Gulfstream IIIs—let’s say a general needed to get from the Pentagon to someplace overseas in a big hurry for something. OK, requisition one of them and use it for that. But if they have to go to Florida and then to Texas and then to California and make all these meetings, use one of these smaller aircraft because they are going to land anyway, while they are at the meeting, they can refuel, take off and go. It is a much cheaper way of operating.

I seriously question whether we need six Gulfstream Vs for whatever purpose they are asking—I really question that—and I question whether or not other versions of aircraft like this or others can be used more for domestic travel.

I have a letter to Chairman STEVENS dated March 8, 1999, from the Deputy Secretary of Defense, Mr. Hamre, and General Ralston, U.S. Air Force. I was reading it over and was struck by a paragraph. It is an assessment of CINC support aircraft. This was required by the Senate Appropriations Committee report last year. I was struck by this paragraph which says:

This study evaluated all military and representative commercial aircraft to determine which aircraft would both be configurable and available for CINC support airlift.

It goes on. This is the paragraph:

The study revealed that when CINC—Commanders in Chief—requirements, combined long, unrefueled range—4,200 to 6,000 nautical miles—more than 18 passengers and short runway capabilities—5,000 to 7,000 feet—a modern commercial aircraft was needed.

I find it interesting. If you go to the CINCs and ask, “What are your requirements?” and they define their requirements, guess what. They meet the requirements of the Gulfstream V. If you ask me what my requirements are to fly around the United States, I bet I can come up with a set of determinants that I need a Gulfstream V. I travel a lot; I go to the coast once in a while; I am always in Iowa; sometimes I have to be in one place for a meeting and then another place for a meeting. I would love to have a Gulfstream V. And I have short runways, too, sometimes.

It is not surprising that we ask the CINCs, “What do you need?” and they
then define their needs and come up with Gulfstream Vs. It seems to me we ought to be defining the needs rather than the commanders in chief, because they are the ones who use the aircraft.

They said:

Based on historical CINC support aircraft usage and future requirements, and discounting the probable need of backup aircraft inventory, seven C–37A aircraft—

that is the Gulfstream V—

should minimally satisfy the existing CINC requirements.

What I cannot figure out—does the Senator from California know—is, how many CINCs are there? Do we know how many CINCs there are?

Mrs. BOXER. Nine.

Mr. HARKIN. There are nine CINCs, so we are getting seven Gulfstream Vs for nine CINCs.

Mrs. BOXER. Plus all the other aircraft that are in the inventory.

Mr. STEVENS. Regular order, Mr. President, regular order.

Mr. HARKIN. I asked the Senator to answer a question. I asked the Senator to respond to a question.

The PRESIDING OFFICER. The Senator from Iowa has the floor, and he can only yield to the Senator from California for a question.

Mr. HARKIN. I can ask a question of the Senator from California, I believe.

The PRESIDING OFFICER. That requires the Senator from Iowa to yield the floor.

Mrs. BOXER. I ask a question of my friend, since that is the rule and that is being strictly enforced today, and I appreciate that. Does the Senator not agree that adding six more of these luxury planes, which would give us a total of nine Gulfstream Vs—we would have six Gulfstream Vs; that is, one for each of the commanders, plus an inventory of other planes that include Learjets and Cessnas—does he not believe that this is going overboard in terms of the priorities we should have?

I agree with my friend, and I ask him this question as well. We are saying that we are very willing to give the generals what they need, but it is a matter of whether you get the gold-plated version or a very solid version, and isn’t that what we are really talking about?

Mr. HARKIN. I think the Senator has put her finger on it: We are willing to give the generals what they need but not what they want.

Mrs. BOXER. Interesting.

Mr. HARKIN. They may want to travel in this kind of luxury, but I am not certain we ought to just give it to them. There are nine CINCs. Each one now would have their own Gulfstream V. Do we know what the per-hour operating cost is of a Gulfstream V? As best I can determine, the per-hour operating cost is over $2,000. I think it is actually higher than that, because I do not think that takes into account depreciation; I think that is just fuel and other requirements.

Let’s just say it is $2,000 an hour. A four-star officer gets on one of those Gulfstream Vs and flies 2 hours someplace for a meeting and 2 hours back; that is 4 hours, $8,000 just to go to a meeting someplace and come back. That is a good use of taxpayers’ dollars?

I will lay you odds that 7 times out of 10 that four-star officer could go right out here to National Airport or Dulles, get on an airplane, and get a first-class ticket—How much is a first-class ticket?—fly to that meeting, and fly back for less than $1,000.

I ask you: When is the last time you ever got on a commercial aircraft in the United States flying anywhere and saw a general or admiral on that plane? It cannot happen very often. I see a lot of lieutenants and commanders and captains, but I never see an admiral or general. Then again, why would you? They are on their Gulfstream Vs, jetting around.

I am not saying there is never a purpose—there may be—but I think this is just a little bit too much. There are about 36 four-star officers in the U.S. military, I am told—about 36 four-star officers—and for that, we have over 154 jets in inventory to fly people around. What is going on here?

In fact, I know our proposal only deals with the Gulfstreams, but if I am not mistaken, the bill also provides for the purchase of five additional C–35s.

Mrs. BOXER. That is correct.

Mr. HARKIN. Those are the Cessnas. We are already going to buy five of these, and we are going to lease six more of the Gulfstream Vs. So it is not just the Gulfstream Vs. The Navyalready has Gulfstream Vs. The Air Force already has Gulfstream Vs, and, as I said, 70 Learjets, C–21s.

I remember one time when I went on a congressional trip—was I still in the House or the Senate? I can’t remember. I may have been in the Senate. We went to Central America. It was during that war in Central America.

We flew from here to Florida, to MacDill, refueled, and we were in a little Lear. There were about six or seven of us crammed into that thing with no bathroom facilities. Because of my Senate duties, I had to get down there to go on a trip that could not be done commercially. So we went from here to MacDill, refueled, then went to Guatemala and Honduras; and then I think we went to El Salvador; then we went to Panama City, had to refuel again, fly to MacDill, refuel again, and then fly home.

I tell you, it was not that comfortable a flight if you are one of those little Lear, six or seven people crammed in there. For a Senator, that is fine. I bet you a general or admiral would never do that. But we had staff. We had committee staff along with us.

I am just saying, sometimes if you are going to do these things, sometimes you have to put up with that. There is no way we could have done it commercially, so I had to take a military aircraft. You do not have to go in elaborate luxury every single time.

That is my point. I do not think there is a critical shortage of these executive jets that should take precedence over the immediate needs of our military.

Besides the sheer numbers of aircraft in each of the armed services indicating there is no shortfall, again, I repeat from the 1995 GAO report that said the armed services should “develop the appropriate mechanisms to ensure the availability of each service’s aircraft to help fulfill the OSA needs of the other services.” In other words, the GAO concluded that the armed services needed to learn to share. This is a simple concept that should be used to relieve any conceivable strain on the number of executive aircraft.

The Pentagon counters this sensible solution by claiming that existing aircraft are being fully used. However, the GAO also found that DOD’s operational support aircraft fleet “far exceeds any possible wartime requirement.”

The Defense Week article that the Senator from California referred to of May 24, 1999, had some interesting things in it. They said:

In particular, the article said, “There are about 600 to 800 users in the DC area authorized to request SAM [VIP Special Air Mission] support for missions” which meet prescribed criteria.

As I understand, that does not include Senators and Congressmen. At least that is what I am told. When I first read there were 600 authorized users for VIP special air missions, I thought that must include the 435 Members of the House and the 100 Senators. I am told that is not so.

I am wondering, who are these 600 to 800 people? I am wondering if some of these jets are being used for less than really vital needs and perhaps could be used to meet the needs of the military CINCs.

Again, quoting from the Defense Week article of May 24:

Brig. Gen. Arthur Lichte, the Air Force’s director of global-reach programs, says these support aircraft are all meeting other requirements [all the other aircraft that we have in inventory] so they could not be used by the commanders.

Again, I am wondering, why not? What are these other requirements? If the commanders cannot use them, who is using them?

Hamre says most of these support aircraft are too small for commanders’ staffs. Plus, the four-stars need to be able to fly non-stop, intercontinental trips while staying in contact with the president could not.

I am not so certain about that. I am not certain that a refueling stop in Shannon is all that burdensome.

The article goes on to say:

June 8, 1999
Some on Capitol Hill respond that the CINC's with smaller staffs on board could live with refueling stops, but Hamre and Lichte don't agree.

I do not know why not. I know a lot of times we go on congressional fact-finding trips. We stop and refuel different places, I don't know why generals command their planes still be in contact. That does not stop your contact with the White House, simply because you land and refuel—not at all.

What about the existing support fleet? "No," Hamre said, "we don't have aircraft that can fly from here to the Persian Gulf. I suppose you could go on a C-12. You could land-hope you did in World War II, but I mean that doesn't make any sense. This big inventory of 500 [operational support aircraft]—most of them are tiny airplanes, four-passenger, six-passenger kind of airplanes.

That is just not so. These are not four-passenger airplanes.

Mr. BOXER. Over $400 million.

Mr. HARKIN. These are eight right here. How much staff does a general have to take with him when he goes to a meeting? I would like to find that out.

He said, "The CINC's aren't [even] happy they have to live with a 12-passenger aircraft." Again I ask, how much staff do they need to take to these meetings they go to?

So, again, the Senator from California and I have this amendment that says basically: We ought to put this lease aside. Let's take a look at this. Let's get a good report in. Do these really meet the warmaking needs of the Pentagon?

Plus, I do not know where the facts lie on this one, but I will just say that, according to the New York Times, the lease will cost the taxpayers more than $475 million over the next 10 years. Purchasing new planes may prove cheaper. Some say purchasing is going to cost more; some say it will cost less. But we do know that for these aircraft, for the cost of the aircraft, plus the operation of them over the next 10 years, it is going to come in at somewhere—

Mrs. BOXER. Over $400 million.

Mr. HARKIN. I think the lease is going to cost over $475 million. And then there are operational costs. Now you are up to $600 or $700 million over the next 10 years just for these aircraft. That may be small change to the Pentagon, which is used to operating with $270 billion budgets, but that is a lot of money for our taxpayers. I just do not know where the facts lie in whether or not leasing is better than purchasing.

We have seen very little information as to the cost tradeoffs of leasing versus purchasing. We have not seen a full report from the Pentagon covering all possible options to cover these CINC's needs, nor do we have much information as to the needs of the military for all of these such aircraft. That is why our amendment requires a report detailing the requirements and options for such aircraft as an important first step. We simply have not had this information.

Quite frankly, I want to know how our amendment fares, I say to the chairman, and others, I plan to come back to this issue, along with my colleague from California, year after year, until we get a clearer picture. How many flights do senior officers take with senior executive aircraft? We do not even know that. What are the costs? What are the per-hour costs? What are the costs for that trip? Could that trip have been utilized with an alternative such as commercial aircraft? At what cost savings? Could some of these aircraft be sold off as excess aircraft if we better managed the total number of executive aircraft that we have?

For example, we know that senior officials and officers fly from base to base and facility to facility. They fly from Andrews Air Force Base to NAS Jacksonville or to MacDill or to other air bases around the country. Could you utilize commercial aircraft for that? Sometimes yes; sometimes no. But we need to ensure that the DOD is looking for cheaper alternatives, including commercial airline alternatives. It may be slightly less convenient, but it sure would be a lot less costly, and it would free up existing DOD aircraft we have now for the unique missions for which they say they are needed.

I yield the floor.

The PRESIDING OFFICER (Mr. ALLEN). The Senator from Alaska.

Mr. STEVENS. Mr. President, I am somewhat surprised by the length and specificity of the argument against this amendment. This amendment, on page 104 of the bill, would authorize the Secretary of the Air Force to obtain transportation for the commanders in chief, the regional commanders, to lease aircraft. It does not mandate any leasing. It authorizes leasing.

Currently these commanders in chief, regional commanders, are already flying 707 aircraft built 30-35 years ago. Commercially, those airlines had 250 seats. They have 45 seats on those aircraft now. They are big. They are old. They are costly to maintain. It is possible to have modern replacements now.

The Senators would have us replace one a year. We will keep operating these old dumbos at enormous cost for repair and replacement of engines, instead of moving out and accepting the fact that there are planes there now. American-built planes, and the Department estimates it will cost $750 million to operate and maintain the current support fleet over the next 10 years. We would reduce that cost and put our people into more cost-effective, quiet, efficient planes.

Yes, they are small compared to what they have now. Today a commander in chief takes along with him up to 45 people. This will reduce that size; there is no question about that. Further, we reduce the number of aircraft from nine to seven. They didn't mention that. This has nothing to say about all those other aircraft.

I would like to have a study of the flights of these airplanes that are out of the Federal Government in particular those owned and flown by the White House. We tried to get that and couldn't get it. We would like to find out who flies in the State Department airplane. We couldn't get that.

Now, by my guest and go get those, but these are commanders of our military who are serving as regional commanders of forces. I wonder if the Senate knows there are forces of the American people in 81 different countries today. We are operating at about one-third the staff we had just 5 years ago. We are trying to carry out missions that are almost impossible. Our reenlistment rate of pilots is down to less than one-third of what it was just a year ago. The degree of fatigue is overwhelming. The degree of fatigue on our managers is overwhelming.

I really never expected this kind of argument about replacing the 707's. I do not think anyone wants to continue to fly on the 707's. If nothing else, they are just old.

Mr. WARNER. Will the Senator yield for an observation?

Mr. STEVENS. No. I am going to table this, follow this bill through, and get it done. I can't understand that an amendment like this would delay this bill, because it is only an authorization to lease. All we have heard today, talking about the number of aircraft, is immaterial. Those aircraft are out there. They are not going to be affected by this amendment at all.

What we are trying to do is say that these commanders who stand in for the President as regional commanders in chief should have the state of the art of American industry in terms of their transportation. That is what this is. What we are doing is trying to get them to lease them, because if we started replacing them, I have to tell you, there is not money in this bill to allow us to buy seven new aircraft for these commanders. We can give them the authority to lease them and replace them, and those leases can be options to buy later. We can fill that in if we want to buy the planes later. We can't do it now, but these planes they are flying now are expensive, and they are too large. They are not what these commanders need.

A DOD report promised us a savings of $250 million over this 10-year period if they had this authority. It doesn't mandate them leasing it. It authorizes them to lease some, buy some, lease with an option to buy, whatever it be, to get that least deal possible to replace these aircraft.

Now, in terms of maintenance alone, this option would save us a lot of
money. I think the problem of having dedicated aircraft is something we ought to look at.

The Senator says he hasn’t seen many four-star admirals or four-star generals on airplanes. I see them. They do not wear their uniforms on airplanes. Why should they? They would automatically be a target. It is not what we want anyway. These people are known throughout the world. I think if anyone in the world needs protection, it is the commanders in chief of the regions. We do not provide that, but we can provide the capability for security and safety as they move around the areas over which they have command.

Talk to the people in industry. Why do you think the big industries are leasing fleets of cars now? Because after the end of a year or so, they turn them back, get a new model—no maintenance, no replacement of parts. The vehicles are out on the civilian market with a good value, because they have only been used for a short while.

We could do the same thing with these aircraft if people would wake up and use the leasing operation. We are not talking about leasing combat aircraft, we are talking about leasing transportation that is vital to the regional commanders.

Again, our section only deals with transportation for the regional commanders, not for all the 684 people. If you want to know who they are, they are people in the State Department. We will be glad to give you a list. State Department, commanders of bases overseas, they are eligible for flight on these aircraft.

But above all, I am sort of taken aback by the fact that we are giving the Department of Defense the right to think about taxpayers’ money as they provide this vital transportation link for the commanders.

This saves money. The study shows they save money. Before they can complete the lease, they have to come back and get the money to lease. There is no money in this bill to lease. As a practical matter, I really don’t understand here we are trying to save money. We are trying to replace these antiquated airplanes. These places these people go, most of them have no commercial connections. They just do not.

I took a trip this last week to California and down to the desert in Arizona and back here on business, down at the border to look at some problems there. I will tell the Senate about that later. There were no connections to Douglas, AZ, commercially. I thought I would get down there and see that problem to determine whether we ought to spend taxpayers’ money. They have the same problem. How can they tell us what they need in these remote places of the world under their command?

And how can they come to meetings and listen to the Commander in Chief or to the Vice Chairman of the Joint Chiefs? These planes are needed by these people. I think one of the great things brought out by Goldwater-Nichols Act was, in fact, regional commanders. It gave us the kind of command and control we needed to maintain a very efficient military, with fewer people, and utilizing the talent of some very distinguished people. I have to tell you, the longer I am here, the greater respect I have for people who get four stars on their shoulders. That is what we are talking about—the people who have come through the services and have reached the point of ultimate command—and I mean ultimate. They can make decisions in lieu of the Commander in Chief in a time of crisis; I am talking about in lieu of the President. They have the power under that act to act in a crisis.

Now, what do we want to do—let them ride commercial planes? I challenge anybody who has been out in the Pacific and has gone from place to place, from island to island, where we have our military, to figure out how to do it commercially. Even in my State, if you want to go out to Adak, you can go out and come back 2 days later.

As a practical matter, this is transportation for the 21st century. If nothing else, this Senator doesn’t want to see representatives of the Nation that leads the world in building aircraft to be traveling in 1960 airplanes in the years 2001, 2002, and 2003. That is what we are talking about. There is a lot here in terms of advertising America to the world. I want these people to be flying in the best we have, because they are demonstrating this country’s ability to maintain its position in the world.

I cannot believe there would be this kind of dialog about giving the authority to use a system that American business has now used very efficiently for 40 years—the leasing of equipment as opposed to buying it. I hope to God they use this authority and save us some money and put our people in safe, modern, efficient transportation.

Does the Senator want to speak before I make a motion to table?

Mr. INOUYE. For just 2 minutes.

Mr. STEVENS. I yield to the Senator from Hawaii for 5 minutes.

Mr. INOUYE. Mr. President, most respectfully, I have been trying to—

Mrs. BOXER. Reserving the right to object—and I will not—I wonder if the Senator from Iowa and I may have a chance to ask a question of the Senator from Alaska so that we can make our point again, because I think he misconstrued what we were saying. I think it is important to set the record straight. May we have 4 minutes between us to talk?

Mr. STEVENS. I will be pleased to enter into that kind of agreement, following the remarks of the Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. INOUYE. This amendment. I have been trying to follow this debate as closely as possible. The explanation the Senator from California has given is that this amendment would strike provisions in the bill which allow the Secretary of the Air Force to lease six Gulfstream V jets to transport the highest ranking military officials.

There is nothing in Section 8106 that speaks of six Gulfstream V jets, nor does it speak of the highest ranking military officials. I have no idea where that came from.

What this section says is:

The Secretary of the Air Force may obtain transportation for operational support purposes, including transportation for combatant Commanders in Chief, by lease of aircraft, on such terms and conditions as the Secretary may deem appropriate, consistent with this section, that are consistent with OMB Circular A-11.

There is nothing about Gulfstreams. There is nothing about the highest ranking military officials. But even if we did say six Gulfstream V jets for the highest ranking military officials, I join my chairman in objecting to this amendment. We should keep in mind that fewer than 1 percent of the population of these United States have stood up and said to the rest of the world they are willing to stand in harm’s way in our defense and, if necessary, give their lives. Fewer than 1 percent of us have taken that oath. The least we can do is to give them the cutting edge, and this is the cutting edge that is necessary to differentiate between defeat and victory.

So, Mr. President, I will support a motion to table this amendment.

Mr. STEVENS. Mr. President, let me ask what the President said. Do we believe under this amendment, by giving the authority to lease aircraft, we will be able to get at least six aircraft in less than 2 years to replace these aircraft that are now well over 30, 40 years old. We believe the savings in retiring these aging, expensive-to-maintain 707 aircraft will be cost effective. But what is more, this move will be very good for the Department, because by pooling these aircraft they will be able to use them efficiently. Nobody will have a dedicated aircraft that is underutilized. They will be able to be used by others when not being utilized under this plan.

We adopted a similar plan last year at my suggestion, and that is when we were able to have the USMA, CIA, and the FBI. We formed a special unit, and they have pooled the aircraft and they are available to them. They will have them available for one or all of them, depending on the needs of the people involved. This is a cost-effective utilization of air transportation to meet the needs of our National Government. I hope we can defeat this amendment.
I am going to make a motion to table. I will be happy to consider time for the Senators to speak. They have spoken almost an hour and a half. I will honor their suggestion if they want some time before I make that motion.

Mr. HARKIN. I would be glad to do 10 minutes and wrap it up.

Mr. STEVENS. I would like to complete it with 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Iowa.

Mr. HARKIN. Mr. President, the Senator from Alaska has made a good point that the military should consider leasing and not consider purchasing. That is what our amendment does. Read our amendment. It says:

Not later than March 1, 2000, the Secretary of Defense shall submit to Congress a report on the inventory and status of operational support aircraft, Commander-in-Chief support aircraft, and command support aircraft of the Department of Defense. The report shall include a detailed discussion of the requirements for such aircraft, the foreseeable future requirements for such aircraft, the cost of maintaining the aircraft, the maintenance alternatives to use of such aircraft, the cost of maintaining the aircraft, the capability and appropriateness of the aircraft to fulfill mission requirements, and the relevancy of the missions of the aircraft to warfighting requirements.

That is exactly what our amendment does. But we want to know, should we even lease them?

Mr. STEVENS. I have one question. The first sentence says to strike the provision on page 104.

Mr. HARKIN. Strike the provision.

Mr. STEVENS. To lease for another year.

Mr. HARKIN. It strikes the provision which allows the Department of Department to go ahead and lease. It says: Let’s do a study before next March 1. What are our requirements? What are our alternatives? And let’s examine the leasing versus the purchasing. We don’t even have that documentation yet.

So I don’t think there is such a need that we have to rush ahead and allow them to go ahead and enter these long-term leasing agreements before March 1 of next year. There is not that requirement there. They tried to put this into the supplemental appropriations bill, and that was knocked out because it wasn’t an emergency. Now they have come back on the regular appropriations bill.

So all our amendment is saying, fine, leasing may be the best way to proceed, but we haven’t gotten to that point yet. Do we even need these aircraft? We haven’t gotten to that point yet. We make the point that we are not certain we need this. Let’s take it one step at a time and see if these are really operational requirements.

The Senator also said that it would be costly; we have these old aircraft in our inventory. We have to repair and keep them up and put new engines in them and all that stuff. It is sort of like my old car. I have an old car, and it needs a new engine. I can put a new engine in that car, and it is going to cost me about $3,000. To fix it, it will affect it, it is a pretty darned nice car. It is just a little old and has a lot of miles on it. If I go out and buy a new car, it will cost me about $20,000. I ask you, which is the better alternative, if I am looking at it cost wise? It is a lot cheaper for me to put a new engine in that old car.

These are 30-year-old, well-main- tained aircraft. They are the best maintained in the world. They go through their periodic inspections, their annual inspections, and they have all kinds of new engines on them and everything. It is much cheaper to keep those flying, to repair them, and to keep them up than it is to go out and pay $40 million for one of these, I can assure you.

Second, my last point: The chairman says that this will not affect the number of aircraft that we have out there now. I beg to differ. It will affect the number of aircraft we have out there now, because if in fact the amendment of the Senator from California and myself is adopted, it is going to require them to take a really hard look at what they have in their inventory, at what their needs are, and at how they can better utilize them. That may affect the other aircraft out there. We may be able to meet the mission requirements of the CINCs with all of the Gulfstream series, Learjets, the Citation jets, the 707s, the 757s, the 727s, and the DC-9s that we have out there if they are better utilized. That is the missing ingredient. We don’t have that kind of an accounting. That is what our amendment calls for.

If it turns out that they really need these aircraft to meet the warfighting capabilities, and it proves that it is cheaper to do it this way than to repair and fix up the older aircraft—if that can be shown—I will be first in line to vote to make sure they get the aircraft.

But I am telling you, this Senator does not have adequate information right now to vote to spend probably upwards of $600 million to $700 million over the next 10 years to lease these Gulfstream V5s and operate them for that period of time.

That is, if we need to just step back, take a deep breath, and have them to report back. One year is not going to be a big loss to them, if they have to wait one year.

I yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Mr. President, I thank the Senator from Iowa for the time that he has spent on working on this amendment with me and for his experience. His being in the military, I think, brings tremendous credibility to this discussion.

I thank the Senator from Alaska and the Senator from Hawaii for their patience. I know that this is an amendment that they do not agree with. I know they are not thrilled that we have offered it, but they have shown great respect and have given us the time that we need to explain it.

I ask unanimous consent to have printed in the Record a list of the more than 300 planes in the inventory. These are aircraft available for military administrative travel. I ask unanimous consent to have that printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MILITARY PLANES—CIVILIAN EQUIVALENT NAMES AND SPECS

<table>
<thead>
<tr>
<th>C-9—military equivalent of McDonnell Douglas DC-9—twint-engine, T-tailed, medium-range, swept-wing jet aircraft. Used primarily for aeromedical evacuation missions.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capacity: 40 litter patients, 40 ambulatory and four litter patients, or various combinations.</td>
</tr>
<tr>
<td>Number in the military: Total=34—Navy, 27; Marines, 2; Air Force, 5.</td>
</tr>
<tr>
<td>C-12 Huron—Beech Aircraft King Air, a twin turboprop passenger and cargo aircraft.</td>
</tr>
<tr>
<td>Built: Wichita, KS—Beech Aircraft Corp. (Raytheon).</td>
</tr>
<tr>
<td>Capacity: up to 8 passengers.</td>
</tr>
<tr>
<td>Number in the military: Total=178—Army, 104; Navy, 51; Marines, 18; Air Force, 5.</td>
</tr>
<tr>
<td>C-20 series— Gulfstream Aerospace Gulfstream III series, these are jets.</td>
</tr>
<tr>
<td>Built: Savannah, GA— Gulfstream Aerospace Corp.</td>
</tr>
<tr>
<td>Capacity: maximum of 19.</td>
</tr>
<tr>
<td>Number in the military: Total=16—Navy, 6; Marines, 1; Air Force, 9.</td>

<tr>
<td>C-26— Fairchild Merlin/Metro, operated exclusively by the Air and Army National Guard, it is a propeller plane with quick change passenger, medivac, and cargo interiors.</td>
</tr>
</tbody>
</table>
I agree with the Senator from Iowa that there are times when of course—I know the Senator from Iowa agrees—we want to have certain planes set aside for the convenience and use of our top brass. That is one question here. There are 300 planes in the military that they can use now. In this very bill, we are purchasing more of the Cessna Citation Ultras, which are beautiful planes that the Senator from Iowa has spoken about, to keep them around in luxury. Yes, they may have to stop to refuel, but they can keep in contact with the President of the United States. I have traveled with very impressive delegations where we had to stop in the middle of very tenuous circumstances.

Mr. HARKIN. If the Senator will yield, as an old military pilot myself, I must say that if the generals want to get someplace in a real hurry—it may be necessary for our Department of Defense to warmaking capabilities, they can get in the back seat of an F–16, get inflight fueling, and they can be there a lot faster than any commercial aircraft or a Gulfstream or anything else. That is the fastest way to get there. Mr. BOXER. I reclaim my time. I have a brief amount of time left.

This isn’t about hurting anyone in the military. My goodness. No one could respect the military more than the Senator from Iowa. I have to say that is not what this amendment is about. This amendment is about a very hard-nosed money question. Can we move these generals around in style but not in the Gulfstream version? Can we look to see what the best way to go is—leasing or purchasing? Then maybe we can save some money that we need desperately.

Our veterans need veterans cemeteries. They are being told that they have to have a 15-percent cut in the VA hospitals. I have to say that is not what this amendment is about. It is about the men and women that we have heard so much about over the past years, the central players in the services. It is about the men and women whose lives are on the line in operations around the world. There is no question, Mr. President, that we must provide them with the necessary resources to defend themselves and the United States.

Just last year, there was a virtual consensus that the armed services were facing a readiness crisis. Last September, the Joint Chiefs testified that there was a dangerous readiness shortfall. General Henry Shelton, Chairman of the Joint Chiefs, claimed that “without relief, we will see a continuation of the downward trends in readiness . . . and shortfalls in critical skills.” Army Chief of Staff General Eric Shinseki said, “The Army faces a ‘hollow force’ without increased readiness spending. Chief of Naval Operations Admiral Jay Johnson asserted that the Navy has a $6 billion readiness deficit. So it went for all the services.

To address the readiness shortfall, the Congress passed on emergency supplemental appropriations bill. The bill was well-intentioned in its support for the efforts of our men and women in uniform. Unfortunately, something happened on the way to the front lines. The bill spent close to $9 billion, but just $1 billion of it went to address the readiness shortfall.

We added $1 billion for ballistic missile defense. The Ballistic Missile Defense Organization still has not spent all that money, yet we have added another $3.5 billion for the BMD in this bill. Last year’s supplemental also added billions to what has become an expected emergency, that being our operational commanders in Bosnia. "That emergency, the year 2000, received a billion dollars. And so it went. What happened to readiness? It is with wonderment that the appropriations bill before us today would spend upwards of $80 million in the next fiscal year, and perhaps as much as half a billion dollars over the next ten years on luxury jets for four-star generals. Am I missing something or is this absurd? We actually have troops stationed in Bosnia. The expected emergency, the year 2000, received a billion dollars. And so it went. What happened to readiness?

It is with wonderment that the appropriations bill before us today would spend upwards of $80 million in the next fiscal year, and perhaps as much as half a billion dollars over the next ten years on luxury jets for four-star generals. Am I missing something or is this absurd? We actually have troops stationed in Bosnia. The expected emergency, the year 2000, received a billion dollars. And so it went. What happened to readiness?

It is about the men and women that we have heard so much about over the past years, the central players in the services. It is about the men and women whose lives are on the line in operations around the world. There is no question, Mr. President, that we must provide them with the necessary resources to defend themselves and the United States.
Mr. President, I would like my colleagues to close their eyes for a few minutes while I describe the jet that has become such a military priority. I take this directly from Gulfstream's website:

From the 100 percent fresh air control system, to the comfortably maintained 6,000 foot cabin altitude at 51,000 feet, to cabin size—a generous 1,669-cubic-feet and the longest in the industry—the Gulfstream V provides an interior environment unmatched in transoceanic business travel. The jet also offers a substantial outfitting allowance of 6,500 pounds—more than 12 percent greater than any other business aircraft current or planned—which affords owners and operators the freedom to select furnishings and equipment with minimum tradeoffs. Space-age titanium mufflers and vibration isolators eliminate hydraulic system noise. Plentiful insulation in the side panels reduces sound further, and we've even reengineered Gulfstream's trademark expansive, oval windows to lessen noise levels. The total effect is library-like science conducive to a productive trip.

Now I ask my colleagues to open their eyes and face reality. Supporting the Defense Department's misguided spending priorities is not synonymous with supporting the military. I urge my colleagues to look themselves in the mirror and credibly ask themselves if they can support corporate jets for generals while front-line troops muddle by on food stamps. Which is the higher priority?

I cannot vote to increase the defense budget by tens of billions of dollars, including tens of millions for corporate jets, which the budgets for veterans' health care, education, agriculture and others are facing deep cuts.

Throwing good money after bad is not tolerated at other Departments and agencies. Why is it tolerated with DOD? Defense Week reported just yesterday that the Navy has lost track of $22 billion in DOD expenditures including tens of millions for corporate jets. GAO concluded that "no contractor. GAO concluded that "no

But if people want this substitute amendment—the Senator from California would require a study for more than a year—we would be back here again.

I hope the Senate will support the need as outlined, but the needs can be met by exercising the authority. We are not mandating anything in this bill.

I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered. The PRESIDING OFFICER. Are the yeas and nays recorded?

The yeas and nays ordered. The PRESIDING OFFICER. The question is on agreeing to the motion to table amendment No. 541. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

Mr. NICKLES. I announce that the Senator from Idaho (Mr. CASSIDY) and the Senator from Arizona (Mr. MCCAIN) are necessarily absent.

Mr. REID. I announce that the Senator from Delaware (Mr. BIDEN) is absent due to a death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 66, nays 31, as follows:

[Rollcall Vote No. 157 Leg.]

YEAS—66

McConnell Roberts
McCoyha Rohm
Murkowski Sessions
Murray Smith (OR)
Nunes Snowe
Reed Snowe
Reid Snowe

NAYS—31

Abraham Feingold
Allaminen Feinstein
Baucus Graham
Bayh Gram
Bingaman Harkin
Boxer Johnson
Byrd Kohl
Conrad Lautenberg
Cox Daskie
Debenedetti Lien
Domenici Lincoln
Edwards Wyden

NOT VOTING—3

Biden Crapo McCain

The motion was agreed to.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I want to state to the Senate what we are going to do here. We have resolved, I tell the Senate, all outstanding issues now. I will offer here a package for myself and the distinguished Senator from Hawaii and a series of colloquies, and then we will have final passage on the bill.

All of the remaining amendments—some that we thought would be controversial—have now been resolved. I do thank the Senators for their cooperation. I am waiting for just one item.

AMENDMENT NO. 578

Mr. STEVENS. Mr. President, I call up amendment No. 578, the Roberts amendment.

AMENDMENT NO. 692 TO AMENDMENT NO. 578

(Purpose: To provide for the suspension of certain sanctions against India and Pakistan.

Mr. STEVENS. I send an amendment to the desk for Senator BROWNBACK and ask unanimous consent it be considered an amendment to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] for Senator BROWNBACK, proposes an amendment numbered 692 to amendment No. 578.

The amendment is as follows:

In lieu of the matter proposed to be inserted by the amendment, insert the following:

TITLE—Suspension of Certain Sanctions Against India and Pakistan

SEC. 1. Suspension of sanctions.

(a) In General.—Effective for the period of five years commencing on the date of enactment of this Act, the sanctions contained in the following provisions of law shall not apply to India and Pakistan with respect to any grounds for the imposition of sanctions under those provisions arising prior to that date:

(1) Section 101 of the Arms Export Control Act (22 U.S.C. 279aa).

(2) Section 102 of the Arms Export Control Act (22 U.S.C. 279aa-a) other than subsection (b)(2)(B), (C), or (G).
(3) Section 2(b)(4) of the Export Import Bank Act of 1934 (19 U.S.C. 636(b)(4)).

(b) SPECIAL RULE FOR COMMERCIAL EXPORTS OF DUAL-USE ARTICLES AND TECHNOLOGY.—

The sanctions contained in section 102(b)(1) of the Arms Export Control Act (U.S.C. 2791a(b)(1)) shall not apply to India or Pakistan with respect to any foreign, for the imposition of such sanction arising prior to the date of enactment of this Act if imposition of the sanction (but for this paragraph) would deny any license for the export of any dual-use article, or related dual-use technology that is not primarily used for missile programs or weapons of mass destruction.

(c) NATIONAL SECURITY INTERESTS WAIVER OF SANCTIONS.—

(1) IN GENERAL.—The restriction on assistance contained in section 102(b)(1)(A), (B), (C), or (D) of the Arms Export Control Act shall not apply if the President determines, and so certifies to Congress, that the application of the restriction would not be in the national security interests of the United States.

(2) SENSE OF THE SENATE.—It is the sense of the Senate that—

(A) no waiver under paragraph (1) should be invoked for section 102(b)(2)(B); or (C) of the Arms Export Control Act with respect to any party that initiates or supports activities that jeopardize peace and security in Jammu and Kashmir;

(B) the broad application of export controls to nearly 300 Indian and Pakistani entities is inconsistent with the specific national security interests of the United States and that this control list requires refinement;

(C) export controls should be applied only to those Indian and Pakistani entities that make direct and material contributions to weapons and weapon systems in order to missile development or to a nuclear weapons program.

(d) REPORTING REQUIREMENT.—Not later than 30 days after the date of enactment of this Act, the President shall submit a report to the appropriate congressional committees listing those Indian and Pakistani entities whose activities contribute directly and materially to missile programs or weapons of mass destruction programs.

(e) CONGRESSIONAL NOTIFICATION.—A license for the export of a defense article, defense service, or technology is subject to the same requirements as are applicable to the export of items described in section 36(c) of the Arms Export Control Act (22 U.S.C. 2776(c)), including the transmittal of information and the application of congressional review procedures described in that section.

(f) RENEWAL OF SUSPENSION.—Upon the expiration of the initial five-year period of suspension of the sanctions contained in paragraph (1) or (2) of subsection (a), the President may renew the suspension with respect to India, Pakistan, or both for additional periods of five years each if, not later than 90 days prior to each renewal of suspension, the President certifies to the appropriate congressional committees that it is in the national security interest of the United States to do so.

(g) RESTRICTION.—The authority of subsection (a) may not be used to provide assistance under chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2544) to India relating to economic support fund assistance except for—

(1) assistance that supports the activities of nongovernmental organizations;

(2) assistance that supports democracy or the establishment of democratic institutions; or

(3) humanitarian assistance.

(b) STATUTORY CONSTRUCTION.—Nothing in this Act prohibits the imposition of sanctions by the President under any provision of law specified in subsection (a) or (b) by reason of any grounds for the imposition of sanctions under that provision of law arising on or after the date of enactment of this Act.

SEC. 2. REPEALS.

The following provisions of law are repealed:

(1) Section 630E(e) of the Foreign Assistance Act of 1961 (22 U.S.C. 2375(e)).

(2) The India-Pakistan Relief Act (title IX of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1999, as contained in section 101(a) of Public Law 105–277).

SEC. 3. APPROPRIATE CONGRESSIONAL COMMITTEES DEFINED.

In this title, the term ‘‘appropriate congressional committees’’ means the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives.

Mr. STEVENS. These amendments pertain to the Pakistan issue that has been discussed. They have been cleared on both sides. I ask unanimous consent the amendment to the amendment be agreed to:

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. STEVENS. I ask unanimous consent the underlying amendment itself, as amended, be agreed to.

The PRESIDING OFFICER. Without objection, the amendment, as amended, is agreed to.

The amendment (No. 578), as amended, was agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS NO. 551, AS MODIFIED

Mr. STEVENS. Mr. President, I call up Senator Nickles’ amendment No. 551. The amendment is acceptable to both sides. I ask for a voice vote.

The PRESIDING OFFICER (Mr. BROWNBACK). The question is on agreeing to the amendment.

The amendment (No. 551) was agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS NO. 575, 580, 586, AND 590, AS MODIFIED

Mr. STEVENS. Mr. President, I send to the desk modifications to four amendments. These are modifications to amendments currently pending on the list. I ask unanimous consent that these amendments be modified and that the amendments be agreed to en bloc.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered. The amendments are modified and agreed to.

The amendments (Nos. 575, 580, 586, and 590) were modified and agreed to, as follows:

AMENDMENT NO. 575, AS MODIFIED

At the appropriate place in the bill, insert the following:

SEC. 8109. Of the funds appropriated in title IV under the heading ‘‘Research, Development, Test, and Evaluation, Army’’, up to $4,000,000 may be made available for the Advanced Helmet System Program.

AMENDMENT NO. 580, AS MODIFIED

At the end of the general provisions, add the following:

SEC. 8109. (a) Congress makes the following findings:

(1) Congress recognizes and supports, as being fundamental to the national defense, the ability of the Armed Forces to test weapons and weapon systems thoroughly, and to train members of the Armed Forces in the use of weapons and weapon systems before the forces enter hostile military engagement.

(2) It is the policy of the United States that the Armed Forces at all times exercise the utmost degree of caution in the training of weapons and weapon systems in order to avoid endangering civilian populations and the environment.
AMENDMENT NO. 574

Mr. STEVENS. Mr. President, I call up amendments Nos. 576 and 585 and ask unanimous consent they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments are agreed to.

The amendments (Nos. 576 and 585) were agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, there is just one remaining item.

AMENDMENT NO. 576

Mr. STEVENS. Mr. President, I call up Senator Hutchison's amendment No. 576, and I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (No. 574) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 582

Mr. STEVENS. Mr. President, I call up Senator Kennedy's amendment No. 582. I ask unanimous consent that Senator Lott's name be added as a cosponsor of the, it is so ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I ask unanimous consent that the amendment be agreed to.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (No. 582) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that Senator Smith
of New Hampshire be added as a co-sponsor of the Kennedy amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. That is amendment No. 582, which we just adopted.

AMENDMENT NO. 548

Mr. STEVENS. Mr. President, have I called up amendment No. 548?

The PRESIDING OFFICER. The Senator from Alaska has not called up that amendment.

Mr. STEVENS. The amendment of the Senator from New Hampshire, Mr. Gregg.

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. I urge the adoption of that amendment. It has been cleared.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (No. 548) was agreed to.

AMENDMENT NO. 579 WITHDRAWN

Mr. STEVENS. The amendment No. 579 by Mr. DURBIN, has that been agreed to?

The PRESIDING OFFICER. Not yet. Mr. STEVENS. I ask unanimous consent that that be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 579) was withdrawn.

AMENDMENT NO. 583 WITHDRAWN

Mr. STEVENS. Amendment No. 583 by Mr. LEEVIN, I ask unanimous consent that that amendment be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 583) was withdrawn.

Mr. STEVENS. Mr. President, I ask unanimous consent that Senator EDWARDS be added as a co-sponsor of Biden amendment No. 547.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NO. 587 THROUGH 607, EN BLOC

Mr. STEVENS. Mr. President, I now send to the desk the amendment we had listed as No. 587, which is the remainder of the managers’ package.

There is the amendment of Senator COVETTELL, a sense-of-the-Senate resolution; an amendment by myself for Senator BOND concerning procurement; an amendment pertaining to the McGregor Range Withdrawal Act in New Mexico for Senator DOMENICI; an amendment regarding military land withdrawals for myself. I ask that they be considered en bloc as the remainder of the managers’ package. They should be separately numbered at this point.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for himself and on behalf of other Senators, proposes amendments en bloc numbered 587 and 605 through 607.

The amendments are as follows:

AMENDMENT NO. 587

(Purpose: To provide funds for the purchase of advanced fighter aircraft.)

In the appropriate place in the bill, insert the following new section: “Sec. 2. In addition to funds appropriated elsewhere in this Act, the amount appropriated in Title III of this Act under the heading “Aircraft Procurement, Air Force,” is hereby increased by $220,000,000 only to procure four (4) F–15E aircraft.”

The PRESIDING OFFICER. Without objection, the amendments are agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

AMENDMENT NO. 597

(Purpose: To provide funds for the purchase of advanced fighter aircraft.)

In the appropriate place in the bill, insert the following new section: “Sec. 3. In addition to funds appropriated elsewhere in this Act, the amount appropriated in Title III of this Act under the heading “Aircraft Procurement, Air Force,” is hereby increased by $50,000,000 on a pro-rata basis; Provided further, that the amount provided in Title IV of this Act under the heading “Research, Development, Test and Evaluation, Defense-Wide” is here- by reduced by $50,000,000 to reduce the total amount available for National Missile Defense; Provided further, that the amount pro- vided in Title III of this Act under the heading ‘National Guard and Reserve Equipment’ is hereby reduced by $50,000,000 on a pro-rata basis; Provided further, that the amount provided in Title III of this Act under the heading ‘Aircraft Procurement, Navy’ is hereby reduced by $50,000,000 to re- duce the total amount available for Spares and Repair Parts.”

AMENDMENT NO. 605

(Purpose: To express the sense of the Senate regarding the investigation into the June 25, 1996 bombing of Khobar Towers)

At the appropriate place, insert:

(a) FINDINGS.—Congress makes the following findings:

(1) On June 25, 1996, a bomb detonated not more than 80 feet from the Air Force housing complex known as Khobar Towers in Dhahran, Saudi Arabia, killing 19 members of the Air Force, and injuring hundreds more.

(2) An FBI investigation of the bombing, soon to enter its fourth year, has not yet de- termined who was responsible for the attack; and

(3) The Senate in S. Res. 273 in the 104th Congress condemned this terrorist attack in the strongest terms and urged the United States Government to use all reasonable means available to the Government of the United States to punish the parties responsible for the bombings.

(b) SENATE.—It is the sense of the Senate that:

(1) The United States Government must continue its investigation into the Khobar Towers bombing until every terrorist involved is identified, held accountable, and punished;

(2) The FBI, together with the Department of State, should report to Congress no later than December 31, 1999, on the status of its investigation into the Khobar Towers bombing; and

(3) Once responsibility for the attack has been established the United States Government must take steps to punish the parties involved.

(MARSHALL FOUNDATION AND JUNIOR ROTC)

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. INOUYE. Now, are there any further amendments that need to be disposed of that would qualify?

The PRESIDING OFFICER. There is none.

STRATEGIC AIRLIFT

Mr. INOUYE. Mr. President, I rise today to address the question of strategic airlift. In this bill, the Managers have attempted to accelerate and increase funding for new modern programs, specifically the C-17, in lieu of investing scarce resources in older aircraft.

Mr. President, currently C-17s are only assigned to a few bases. We recog- nize some members are concerned that by focusing on the C-17, those strategic airlift bases without C-17s will suffer. I recognize this legitimate concern and want to ask the Chairman his views on the usage of C-17 airlift. Would the Senator agree with me that C-17s should be assigned to additional bases to replace aging C-141 and C-5 aircraft?

Mr. STEVENS. I fully agree with the Senator’s statement. I believe that C-17s should be used to replace many other strategic aircraft and that the basing strategy of the Air Force needs to take this into account.

Mr. INOUYE. Would the Chairman agree that one of the bases that should have top priority for C-17s is Dover Air Force Base in Delaware?

Mr. STEVENS. I strongly agree.

Dover is one of the key supply bases for all of our operations in Europe and the Middle East. I think it requires the C-17 as soon as possible. The bill before the Senate adds multi-year authority to purchase more C-17s and I think both our Pacific based forces and forces designated to support Europe need C-17s to stay modern and ready.

Mr. INOUYE. I thank the Senator for his comments. He and I have both ex- pressed support in the past for getting C-17s assigned to the Pacific. I am glad to hear him say that Dover Air Force Base is also a very high priority for C-17s.

I stand ready to work with the Senator on ensuring that our Pacific bases and Dover Air Force Base receive the C-17s as expeditiously as possible.

MARSHALL FOUNDATION AND JUNIOR ROTC

Mr. INOUYE. Mr. President, I commend the Chairman for recognizing the importance of the Junior Reserve Offi- cers’ Training Corps, JROTC, for our nation’s high schools through his sup- port of the program.

I ask if the Chairman is familiar with the George C. Marshall Foundation, which assists in the training of ROTC cadets nationwide.

This foundation has worked for over 20 years to develop the Marshall ROTC award and seminar. The Marshall Foundation now wishes to adapt this leadership program for the JROTC.
Mr. STEVENS. Mr. President, my good friend from Hawaii asks an important question. I am familiar with the Marshall Foundation and am interested in the prospect of adapting this program to the Junior ROTC.

Mr. BYRD. Will my friend, the distinguished Chairman on Appropriations, who also ably serves as the Chairman of the Subcommittee on Defense, the Senator from Alaska, yield for a colloquy?

Mr. STEVENS. I am pleased to yield to the distinguished Senator from West Virginia.

Mr. BYRD. Mr. President, I believe the Joint Computer-Aided Acquisition and Logistics Support program, JCALS, program is one of the most successful joint defense programs in the information technology area. It was begun in 1991 to automate the acquisition and logistics processes that support the Defense Department's weapon systems—

Mr. STEVENS. Mr. President, I believe the Joint Computer-Aided Acquisition and Logistics Support program, JCALS, program is one of the most successful joint defense programs in the information technology area. It was begun in 1991 to automate the acquisition and logistics processes that support the Defense Department's weapon systems—

Mr. BYRD. Mr. President, I believe the Joint Computer-Aided Acquisition and Logistics Support program, JCALS, program is one of the most successful joint defense programs in the information technology area. It was begun in 1991 to automate the acquisition and logistics processes that support the Defense Department's weapon systems. As a direct result of JCALS, the process is now paperless and the acquisition cycle takes just 15 days. The DOD estimates that JCALS will save $2.3 billion through 2014 just by digitizing documents that now are prepared in paper form.

Is my understanding correct that the FY 2000 Defense Appropriations bill now before the Senate contains the President's budget request of $154.1 million for JCALS, with $121.8 million in the Army Operations and Maintenance account, approximately $20 million, are to be allocated to the JCALS southeast regional technical center currently located in Fairmont, West Virginia? I am advised that to the maximum extent practicable, the contractor plans to use these funds in Hinton, West Virginia, to further develop JCALS capabilities to support weapons systems.

Mr. STEVENS. The Senator from West Virginia is correct.

Mr. BYRD. Mr. President, I thank the Senator for his clarification and assistance with this most important issue.

Mr. STEVENS. The Senator from West Virginia is correct.

Mr. STEVENS. The Senator from West Virginia is correct.

Mr. BYRD. Mr. President, I thank the Senator for his clarification and assistance with this most important issue.

Mr. STEVENS. The Senator from West Virginia is correct.
Mr. KENNEDY. Mr. President, as you know, fuel and power logistics support are mission critical elements for the success of the Air Force “Air Expeditionary Force Deployment” concept. The Defense Department has long recognized that fuel cell power systems can reduce the logistics requirements for batteries and liquid fuels, and improve operational effectiveness of various military systems. The Air Force Research Laboratory is the original developer of a polymer membrane material that can dramatically increase fuel efficiency and significantly lower the cost of fuel cells. Unfortunately, reductions in the FY 2000 Air Force Science and Technology budget threaten to terminate Air Force investments in fuel cell development.

I commend my good friend Chairman STEVENS and my good friend and colleague in the Senate, Senator INOUYE, the Ranking Member of the Senate Appropriations Committee, for the Committee’s efforts to adequately fund the Air Force’s Science and Technology programs.

I believe that the Air Force should continue to pursue improvements to polymer processing technique and to transition the membrane material for fuel cell production. There are several specific missions and applications that will benefit from fuel cell technology including Air Expeditionary Force Deployment (AEFD), Aerospace Ground Equipment (AGE), Rapid Global Mobility (RGM) and battlefield computers that need to operate 16 to 32 times longer than heavy battery powered systems. In addition, future Air Force mission plans are based on space missions at or above the edge of the earth’s stratosphere. In these missions fuel cells can play a major role in meeting the energy requirements and improving mission efficiency and effectiveness.

The commercial and military fuel cell market projections are significant—greater than $100 billion per year by the year 2006. Seldom is the opportunity for across the board dual use benefit for the government and commercial sector as vivid as it is for fuel cells. Chairman STEVENS, I’m sure that you will agree that the Air Force should pursue the prototype scale-up, optimization and full-scale demonstration of an advanced solid polymer electrolyte fuel cell that uses PBO based membranes.

Mr. INOUYE. I thank my good friend and colleague, Senator KENNEDY, for his kind remarks regarding this Committee’s work on the FY 2000 Defense Appropriations Bill. I recognize the importance of investing in logistics technologies that can extend our military capabilities and can lower the logistics burden for the Air Expeditionary Force Deployment concept. I agree with my colleague that development of the PBO fuel cell membrane material is important. The membrane is a critical component of the fuel cell, in terms of its performance and cost. Improvements in the fuel cell membrane will result in direct benefits to our military readiness.

Mr. STEVENS. I also wish to thank the distinguished Senator from Massachusetts for his kind remarks about this important Defense Appropriations bill. I share the Senator’s concern about levels of investment by the Air Force in Science and Technology. In the past, wise investments in Science and Technology resulted in many of the military systems that we are currently enjoying. But it is never too late to get on the right track.

The Air Force Air Expeditionary Force Deployment concept is of great interest to the Committee. Fuel Cells can reduce the logistics burden for many military systems used in peace keeping and humanitarian relief operations, as well as for combat operations. I agree that the Air Force should consider the development of fuel cell membrane materials.

HIGH SECURITY LOCK PROGRAM

Mr. McCONNELL. Mr. President, I rise today to discuss an issue that is both important and timely—the security of our nation’s secrets and classified material.

Two days ago a bipartisan committee released a report detailing a level of espionage that few Americans expected. American’s most vital nuclear information was stolen from the very places that were supposed to be the most secure. I am not here to cast blame but, rather, wish to discuss a program designed to help reduce the risk of this type of travesty.

The Department of Defense has in place a Federal Specification, FF-L-2740, which sets the minimum requirements for locks to be used on any container storing classified materials. The Department, to its credit, is near completion of a program to retro-fit all containers which do not currently meet that specification.

However, there remains an area where our classified materials are vulnerable. As Senator STEVENS knows, contractors also store classified documents throughout the country. Unfortunately, they often do so in containers bearing locks which do not meet Federal Specification FF-L-2740. So, I would ask my colleague, Senator STEVENS, does he believe that our nation’s classified documents should be properly stored, whether housed at a governmental agency or contractor’s office?

Mr. STEVENS. I respond to the Senator from Kentucky that I absolutely support the safe storage of all classified documents. For this reason, I was happy to accommodate your request to include an additional $10 million dollars for the specific purpose of retrofitting security containers managed by contractors with locks which meet or exceed federal specification FF-L-2740.

Mr. McCONNELL. I thank the Senator from Kentucky and applaud his leadership on this national security issue.

I also want to make the entire Senate aware of a letter written by the Chairman and Vice Chairman of the Senate Intelligence Committee. Senators SHELBY and KERNEY wrote to the Assistant Secretary of Defense for Command, Control, Communications and Intelligence and pointed out that “It appears the outdated, non-compliant locks still employed by Defense contractors cannot prevent surreptitious entry.” They go on to state that “FF–L–2740 compliant locks are more cost-effective than the devices currently in use.” Finally, they
June 8, 1999

CONGRESSIONAL RECORD—SENATE 11873

close by stating that they ‘believe DOD should consider directing the retrofit of Defense contractors’ equipment’

I thank the Senator from Alaska for his support of the $10 million appropriation for this retrofit program. His leadership will help prevent the type of espionage that has dominated the news in recent days.

Mr. STEVENS. I thank the Senator from Kentucky for his comments.

TROOPS TO TEACHERS PROGRAM

Mr. BINGAMAN. Mr. President, I have been concerned that the extension and improvement of the Troops-to-Teachers program recently authorized in the FY 2000 National Defense Authorization bill, S. 1069, Section 579, might not be funded this year. As my colleagues are well aware, this program will help defray the costs to retire military personnel in obtaining teaching credentials to enable them to make the transition from the military to the classroom in an expedited way. Retired military personnel are highly trained professionals, particularly those with scientific and technical fields—an area in which the nation’s school systems are in dire need of trained professionals. Troops-to-teachers offer stipends to personnel retiring from the military to obtain teaching credentials or vocational instruction certificates needed for primary through secondary schools. It’s program by which everyone wins.

I am advised that the President’s budget requests $18 million in funding for FY 2000 under the jurisdiction of the Labor, Health and Human Services, and Education subcommittee of the Senate Appropriations Committee. Since the Defense Authorization bill would extend the Department of Defense responsibility over the program until it transfers responsibility to the Department of Education at a date not later than October 1, 2001, it is essential that the funding be maintained during this period of transition.

Mr. STEVENS. I thank the Senator from New Mexico for his support for this initiative which I sponsored in this year’s Defense Authorization bill. I agree that it is a critical program benefitting our nation’s children and schools. While I recognize the Senator from New Mexico’s concerns, I believe it is important to remember that the intent of this initiative is to transfer the Troops to Teachers program to the Department of Education. Funding to increase and strengthen this important program is meant to come from the Department of Education, not the Department of Defense. Furthermore, we agreed to delay transfer of this program from DOD to DOE until 2001 in order to ensure a smooth transition which affords minimal disruption to the current program and infrastructure. Our legislation clearly stipulates that expansion of this program through an infusion of funds is meant to be done at the Department of Education with Department of Education funds and not from DOD. I am committed to working with my colleagues, including the Senator from New Mexico, who is an original cosponsor of this measure, to ensure that the appropriated funds are allocated for the Department of Education allowing this agency to reform and strengthen the program as authorized by the Senate.

Mr. BINGAMAN. I fully support that view and appreciate his leadership on this important initiative. The Nation’s schools and the Nation’s students will be the better for it. Mr. President, I yield the floor.

DDG-51 ADVANCE PROCUREMENT FUNDING

Ms. SNOWE. Mr. President, I draw the attention of the Committee to the distinguished Chairman of the Appropriations Committee to a funding provision of the FY 2000 Defense Authorization Bill that passed after the Appropriations Committee had completed its military budget. In section 1061 of the Authorization Bill, the Committee directs the Navy to use no funds in the military construction and defense real property accounts in the Navy’s FY 2000 appropriation to fund DDG-51 Arleigh Burke-class destroyers in Fiscal Years 2002 and 2003. The Navy and the Chairman knows, has already written to Congress that it will need $371 million for this purpose by FY 2001, but the obligation of some of this amount next fiscal year may reduce programmatic risks.

Mr. STEVENS. I thank the Chair of the Senate Armed Services Seapower Subcommittee for highlighting the DDG-51 advance procurement provision contained in the FY 2000 Defense Authorization Bill. I strongly support it as a means of providing the Navy with the flexibility to release up to 50% of the DDG-51 advance procurement budget in FY 2000 should he determine that the manufacturer is making progress towards the Army could reach an end state within a timeframe that would extend Department of Defense’s ability to meet its requirements.

Ms. SNOWE. Mr. President, I thank the Chairman of the Appropriations Committee for his understanding and support of this critical shipbuilding amendment.

PROCUREMENT FOR A K L A R O R O, MEDIUM SPEED ROLL ON/ROLL OFF VESSEL

Mrs. FEINSTEIN. The Marine Corps has an unfunded requirement for one additional sealift ship to complete their Maritime Prepositioning Force Enhancement [MPF (E)] program. In recent testimony before the Senate Armed Services Committee, Lieutenant General Martin Steele concluded that “obtaining a 20th Large, Medium Speed Roll-on/Roll-off vessel (LMSR) and meeting all MPF (E) requirements is the best solution to our third ship requirement.” General Steele also notes that the situation in Kosovo has highlighted the need for the additional ship. In light of these comments, I believe that it is essential that Congress fund the procurement of the 20th LMSR.

Mr. INOUYE. The Army has agreed to release an LMSR to the Marine Corps as long as Congress provides funding in the Fiscal Year 2000 defense budget for the construction of a new ship to replace the one given to the Marines. This presents us with an excellent opportunity to fulfill both requirements.

Mrs. FEINSTEIN. I agree. Funding the vessel will be a win, win, win proposition for the military. The Marine Corps will get their third MPF (E) in a timely manner and at minimal cost, the Army could reach an end state with all eight ships for prepositioning being identical, and the new ship would fill those located in the states of North and South Dakota and Montana. Without the support and cooperation of the Walking Shield American Indian Society, many of the engineering and medical projects conducted by the Department of Defense would not have been possible. This type of civilian-military program has a very positive impact on recruiting and retention and should be continued in FY 2000.

I understand that the report accompanying the Fiscal Year 2000 Appropriations bill for the Department of Defense notes that the Committee believes that the Department should expand the scope of readiness initiatives.
to include Native American groups, when appropriate and compatible with mission for JROTC. Is that correct?

Mr. STEVENS. Yes, it is.

Mr. DORGAN. Are you familiar with the work of Project Walking Shield and the Walking Shield American Indian Society which conduct health, housing, road construction and other projects suitable for military training on Indian Reservations?

Mr. STEVENS. Yes, I am familiar with the work of this excellent group and the benefits it provides not only to the military but to the tribes served by its activities.

Mr. DORGAN. Would you agree that this group provides the kinds of training opportunities envisioned for the Innovative Readiness Program and it should continue its partnership with the Department and its support and cooperation in Fiscal Year 2000?

Mr. STEVENS. This type of partnership certainly is one to encourage.

Mr. INOUYE. I share my colleague's enthusiasm for this excellent program.

Mr. STEVENS. Yes, I agree that the Society's work is what we want to encourage in this account.

JROTC

Mr. DURBIN. Mr. President, I wish to engage the distinguished Chairman of the Senate Appropriations Committee and the Defense Subcommittee, Senator STEVENS, in a brief colloquy regarding the Reserve Officer Training Corps program (JROTC).

As Chairman STEVENS may know, the Chicago Public Schools have developed and implemented a very successful JROTC program. Since the program began, it has served over 7,500 cadets from all four branches of the armed services and helped these students achieve better grades, attendance, conduct, and higher graduation rates. The Chicago example is one we may want to expand of the successful JROTC program to an additional 10 high schools, including the Chicago Military Academy at Bronzeville. And, they are attempting to enter partnerships with all of the branches of the armed services in order to better serve interested students.

The Senate bill includes an increase for JROTC of $3.5 million. Is it the understanding of Chairman STEVENS that successful programs like the one in Chicago should be able to work with the Department of Defense and the various branches to receive funding?

Mr. STEVENS. I am aware of the fine work being done by the Chicago Public Schools in the development of JROTC. It is an example of a program that works. It is my understanding that a number of Chicago high schools would like to include JROTC as part of their curriculum. I believe that the level of funding for JROTC is currently adequate.

Mr. BOND. Mr. President, the Department of Defense is currently drafting proposed regulations to establish a procedure on how military bases are to solicit and select bids from financial institutions to provide banking services on domestic military bases. The regulations are required in June of this year. I understand that the regulations may establish a presumption in favor of bids received from local banks over the bids received from any other bank.

It is important that these new regulations not prevent base commanders from approving a bid from a financial institution that specializes in providing banking services to military personnel, if its bid would provide lower cost and more convenient banking services than a bid submitted by a local bank. There are several financial institutions in this country that have made it their business to provide banking services to our armed forces. Their ability to provide affordable and convenient banking services to our military personnel is evident from the bids they have won to establish branches at bases across the country. The Department of Defense should hold an open and competitive bidding process for the establishment of bank branches on military installations and should not shut out these specialized banks from the process.

I do not suggest that the location of a bank not be a consideration in the selection process. However, it should not be the primary criterion. The cost and convenience of banking services for our military personnel should be the overriding factor in determining the bid that is selected, regardless of whether it is a local bank or a specialized military bank. I intend to follow this regulation closely as it is developed. If it is not written in a manner that best serves the interests of our military personnel, I may seek a legislative change of this policy.

Ambient Environmental Hazards Research

Ms. LANDRIEU. Mr. President, the Defense Department needs the capability to assess and prevent both the adverse impacts of its operations and training activities on the environment, as well as the adverse health effects of contaminated environments on its troops and employees. One particular area of interest is in ambient environmental hazards research, which focuses on the development of biosensors and biomarkers of exposure for human and ecological systems.

The Office of Naval Research (ONR) and the Naval Oceanographic Office (NAVOCEANO) are currently expanding existing research capabilities in basic and applied environmental sciences and aquatic systems. The purpose of this research is to better understand the processes of riverine and gulf systems and to understand the impacts of human development on estuaries and harbor systems throughout the world. This work complements other "brown water" research initiatives in ONR, particularly the STRATAFORM program which is looking at issues of sea level change, climate variability, and riverine runoff.

The joint technology development of the biosensors can be used in autonomous underwater vehicles, which have direct application in support of NAVOCEANO military surveys in the Littoral Zones and the pre-invasion mission to detect mines and obstacles within the Very Shallow Water (VSW) and Surf Zone (SZ) approaches to the amphibious landing areas.

Specifically, the biosensor's role during military surveys conducted by NAVOCEANO will be to conduct the natural "background" environmental harmful agents to personnel that work in the waters of the littoral zones. Development of this definitive database will support the intelligence requirements of the SEAL, EOD, and amphibious assault teams. Moreover, biosensors will improve the probability of mission success, endurance and survivability of SEAL swimmers through detection of harmful agents during the initial environmental surveys. This health-risk assessment will involve the prediction and monitoring of waters polluted (either naturally or by intention or both by the opposing forces) with heavy metals, microbial hazards, chemical hazards, environmental chemicals, toxic organisms, and areas of outflow from waste treatment plants prior to the hunt for mines and obstacles.

Congress should encourage the Defense Department and the Navy to pursue research and development of technologies and methods for better measuring and understanding the full range of impacts of biological hazards, including biological warfare, to humans (both military and civilian) and other living organisms. This will improve our ability to develop suitable preparations or responses to such hazards.

I would like to ask my colleague from Alaska, would be be willing to look at this need and, if appropriate, provide additional support for this research effort before we are asked to give final approval to the Defense Appropriations bill later this year?

Mr. STEVENS. I thank the senator from Louisiana for raising this issue. I understand why the Navy needed to better understand the aquatic environment into which it will send its personnel and equipment. I am willing to look at the need to support additional
research in this area and to recommend an appropriate response if one is indicated.

Ms. LANDRIEU. I thank my colleague and I look forward to working with him to provide for a strong integrated bioenvironmental hazards research capability for the Navy.

DISTANCE LEARNING

Mr. DURBIN. Mr. President, I wish to engage the distinguished Chairman of the Senate Appropriations Committee and the Defense Subcommittee, Senator STEVENS, in a brief colloquy regarding distance learning.

As Chairman STEVENS may know, the City Colleges of Chicago Europe has been providing college degree and certificate programs to the U.S. military service members and their families in Europe since 1969. In fact, the City Colleges of Chicago was one of the early pioneers in distance learning. Today, the program offers over 70 courses on the Internet and provides interactive television via satellite to U.S. peacekeeping forces stationed in the Sinai Desert, Bosnia, and Hungary.

The Senate bill includes an increase for distance learning of $45 million. Is the understanding of Chairman STEVENS that successful programs like the City Colleges of Chicago Europe should be able to work with the Department of Defense to receive funding?

Mr. STEVENS. I am aware of the Center for Opening Learning at the City Colleges of Chicago—Harold Washington College. I believe that the level of funding for distance learning in the Senate bill would give programs like the Center for Opening Learning an opportunity to work with the Department of Defense in order to develop additional courses and enhance new learning technologies that will ultimately help military students stationed overseas.

ELECTRIC DRIVE

Mr. KOHL. Mr. President, I rise to inform the Senate of recent engineering breakthroughs in the area of naval propulsion. In the past few years, industry has been working hard to develop electric drive technology that could be used in a naval vessel. Electric drive would replace the traditional mechanical drive system, that turns the ship’s propellers through a system of reduction gears, with a system that uses electricity directly to turn the engines and power the rest of the ship’s systems.

Electric drive offers major benefits over mechanical drive. It is more efficient and requires fewer crew to maintain. It can also generate more power than mechanical systems. Electric drive is also quieter, making it an attractive option for submarines, or any vessel concerned with stealth. Industry analysts believe electric drive could save the Navy $4.3 billion over the life of the new destroyer program, the DD-21, alone.

Last year the appropriations committee included a provision in the Department of Defense Appropriations bill asking the Navy to produce a report on the potential for electric drive. The Secretary of the Navy released the study in March, a study that was a powerful endorsement of the electric drive technology. This report points to electric drive as a technology that will no doubt have major implications for the future of naval ship design and engineering. I hope the Navy will continue its research efforts, and make every effort to include this technology in the next generation of destroyers, the DD-21. I also hope the Defense Appropriations Subcommittee will maintain its interest in the program and continue its support.

Mr. STEVENS. I thank Senator Kyl. I agree that the Navy should continue its research efforts into electric drive, and it should strongly consider the benefits it could bring to the DD-21 Class of destroyers. In addition, I am aware that this technology will also provide important benefits to other future Navy ships such as improved stealth for future submarines. By developing a modular, common integrated system, where major system elements can be used on all new Navy ship designs without any design changes, the Navy can also realize the multiple benefits of reduced training and logistics costs, as well as significant production cost savings.

Mr. INOUYE. I concur with the opinions of the chairman and of Senator Kohl. I consider it essential that our Navy be equipped with the most advanced technology in their future ships. Since electric drive not only offers significant operational benefits, but also significant savings, I most strongly believe the Navy to continue its research work and make every effort to ensure that this technology is deployed on DD-21.

Mr. KOHL. As I am sure the chairman and ranking member are aware, much of the research into this technology has been privately funded. General Dynamics and Eaton Corporation, among others, have been leaders in the field of electric drive and their efforts have been crucial to moving the development along. The investment has presented the Navy and Congress with an excellent opportunity to take advantage of developments financed in the private sector. As the Navy continues to evaluate electric drive and the DD-21 program I hope the committee will be ready to capitalize on that investment.

Mr. INOUYE. I agree that this presents us with an excellent opportunity. The committee will certainly give the Navy consideration should it make an additional request for funding for electric drive research.

Mr. STEVENS. The potential of electric drive is certainly worth exploring, and the committee would be willing to consider a request from the Navy if they believe it is critical to the DD-21 Design.

Mr. KOHL. I thank both Senators for their support of continuing research and evaluation of electric drive. Senators STEVENS and INOUYE have long been known for their clear vision when it comes to supporting cutting edge military technology, and that reputation is well deserved.

Mr. DOMENICI. Mr. President, I rise in strong support of the bill before us today. I would like to sincerely thank Senators STEVENS and INOUYE for their strong leadership on the Defense Subcommittee. I also would like to recognize the hard work and diligence of the staff on this Committee.

Every year this Committee goes through the Defense Authorization bill, the bill funds almost 1.4 million active duty military personnel. This bill fully funds a 4.8-percent pay raise for FY2000 and includes more than $1.383 billion in supplemental spending for military pay.

This legislation provides approximately $2.1 billion for overseas contingency operations in Southwest Asia and Bosnia. I and many others suspect we’ll be forced to pass an additional emergency supplemental for peacekeeping operations in Kosovo. As Chairman STEVENS has already indicated, it would be premature to speculate about those possible appropriations at this time.

The bill includes appropriations totaling $225 billion for operation and maintenance (O&M). This is $626.1 million above the Administration’s request.

The bill supports the establishment of 17 Rapid Assessment and Initial Detection (RAID) teams. And it provides $1.3 billion for combating terrorism. Within the funds for combating terrorism, the bill makes $79.6 million available to provide Army and Air National Guard full-time personnel to facilitate our successful achievement of this mission.

I fully support the decision to appropriate $745.5 million for Former Soviet Union Threat Reduction programs.
These are important programs that address one of the most significant proliferation threats we face today. I also would like to briefly highlight some of the items that received funding in the appropriations bill.

Directed energy weapons provide the potential of low cost per kill ratios sought for our missile defense capabilities. In the area of directed energy, $14 million will go for the High Energy Laser Test Facility at White Sands, the Army’s premier facility for directed energy programs. There is an additional $15 million for the Tactical High Energy Laser program. This joint program with Israel is very important to proving the concept of using lasers to achieve defenses against short and medium range missiles. After significant cuts and changes to its development plan last year, the Airborne Laser program is fully funded at $309 million.

The Committee added $40 million to the Warfighter Information Network program at Laguna Industries, this program manufactures mobile command and control headquarters for a digital Army.

An additional $7.5 million was appropriated for modernization of testing equipment at White Sands Missile Range. Also, $6 million will be made available for much needed perimeter fencing to prevent further accidents from unexploded ordnances at the range.

$10 million is included for the Scorpions Low Cost Launch program. A significant portion of the research and development for this program is based at Phillips, and testing of the engines and the rocket itself is conducted at New Mexico Tech and White Sands. This is an important program both because of the implications to our national security that arise from exorbitant launch costs and due to potential cost savings to taxpayers by lower cost, re-usable payloads into orbit for U.S. defense programs.

Several other Phillips based programs also received additional support, including: $5 million for further research and development on radio frequency weapons, $25 million for military spaceplane efforts, $5 million for advanced countermeasures using solid state laser technologies. At my and other member’s request, an additional $10 million of funding will be made available for research and development of new technologies to counter chemical and biological threats. $4 million in support was included for the blast mitigation research of both military and non-military explosives at New Mexico Tech.

Lastly, $10 million in additional funding was added for the Theater Air Command and Control Simulation Facility (TACCSF) at Kirtland Air Force Base. This will help a great deal in making this facility the world class training facility necessary to maintain combat readiness of our Air Force in the coming years.

I believe this bill demonstrates the balance required to best fund our armed forces under current fiscal constraints. Again, I am pleased by the hard work of my colleagues on this Committee and express, once again, my admiration for the hard work of Chairman Stevens and Senator Inouye in achieving an appropriate spending package for our military men and women.

**Assembled Chemical Weapons Assessment**

Mr. McConnel. Mr. President, I rise today to address the issue of Chemical Weapons Demilitarization. I do so in order to point out that the Department of Defense has consistently ignored Congressional directive and intent.

In 1996, I offered and the Senate accepted an amendment which directed the Army to identify and demonstrate technologies other than baseline incineration which could be utilized in the destruction of America’s chemical weapons stockpile. This program, which came to be known as the Assembled Chemical Weapons Assessment, or ACWA, enjoyed tremendous initial success. Through the involvement of the DoD, the Army, technology providers and citizens advocacy groups—disparate interests, indeed—agreement was reached on how the process should proceed as well as the criteria for success. It is also critical to point out that one area of consensus was that the timely destruction of the stockpiles remained a top priority. Nobody involved in this process advocates unnecessary delay in efforts to comply with the Chemical Weapons Convention 2007 deadline. Certainly, I never viewed my efforts as anything other than a safeguard to ensure that once the destruction of the stockpile located in Kentucky began, only the safest method available was utilized.

Unfortunately, this is where the good news ends. After rigorous evaluation and discussions, the decision was announced that six separate methods met the technological criteria necessary in order to be tested as alternatives to baseline incineration. These six were the only proposals of the almost 20 originally submitted for consideration which were deemed capable of producing safer methods. Unfortunately the Army and the Department of Defense made the decision to move forward and evaluate only three of the qualified technologies, leaving three untested. Further, this decision was made not on the basis of what was technologically feasible, but solely on the basis on what was politically expedient—agreement of finding the safest manner available to destroy the weapons, but on satisfying the minimum requirements so that the incineration could continue regardless of the results of the testing.

To help ease this budget difficulty, I offered and the Senate accepted, an amendment to the Department of Defense Appropriations Bill which gave the Secretary of Defense the Authority to reprogram up to $25 million in order to fully test each of the technologies which met the criteria for selection as potential alternatives to incineration. This provision was included in the final version of the Defense bill, and was eventually signed into law.

Mr. President, despite this clear expression of Congressional intent, the Army, the Department and the Administration have consistently refused to allocate sufficient funding to complete the testing. As a result, the ACWA program is in danger of losing its credibility—the very quality that led to its initial successes. If the testing of these three technologies does not produce a viable alternative to incineration, then the legitimate question will be posed, “What about the additional proposals which were viewed to have merit as alternatives to incineration?”

Not wishing to answer that question, I worked to encourage the administration to agree that further testing was cost-effective and in the best interests of the country. Their responses, which I will submit for the RECORD, professed their strong support for the goals of the ACWA program, but claimed that the budget was simply too tight for the Department to reprogram funds for additional testing.

With all due respect, that contention is simply false. The truth is that the Department of Defense and the Army made a decision years ago that they would eliminate chemical weapons using incineration and have resisted considering other options since that time.

This year’s report, Senate Report 105–53, states that “the Committee is concerned with the lack of oversight afforded the Chemical Demilitarization Program within the executive branch.”

Further the Report states:
June 8, 1999

CONGRESSIONAL RECORD—SENATE

In a review of the program’s funding, the Committee discovered that funds had systematically been obligated without being expended and in some instances funds were unobligated. Rather than facing a shortfall in funding, the program had over $200,000,000 of obligated and unobligated funds unexpended at the end of fiscal year 1998. In light of the unobligated and unexpended balances available to the Department, the program growth in the budget request is not justified.

Mr. President, this language is a stinging indictment of the Department’s mismanagement of the Chemical Demilitarization program. Further it demonstrates clearly that there is no truth to the assertion that there were not sufficient funds available to allow for the demonstration of all viable alternatives to baseline incineration.

I intend to continue to press the Army to test all six technologies so that the mature stockpiles may be assured that only the safest methods available are employed to destroy chemical weapons.

I ask unanimous consent that the letters to which I referred be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

Hon. MITCH MCCONNELL, U.S. Senate, Washington, DC.

DEAR SENATOR MCCONNELL: This responds to your interest in the Assembled Chemical Weapons Assessment (ACWA) Program. As you know, Congress has directed the Department to demonstrate and evaluate at least two alternatives to baseline incineration for the disposal of assembled chemical munitions. The Fiscal year 1999 Omnibus Appropriations Act provided $40 million “to identify and demonstrate not less than two alternatives to the baseline incineration process for the de-militarization of assembled chemical munitions.” In a letter to your letter, the Administration shared its plans for final demonstration testing. Since in time, the ACWA program identiﬁed six technologies, exceeding the original requirement, but was able to fund only three—the three that were ranked as the Department’s top priority. We would like to go further, but the entire amount appropriated for support of ACWA in the Fiscal year 1999 Defense Appropriations Act will be required to complete demonstration testing and conduct a non-government independent evaluation of cost and schedule with regard to implementing an alternative technology.

The Act also provided authority to use up to an additional $25 million of the funds appropriated for the Chemical Demilitarization program in order to complete ACWA demonstration testing. This language, however, addressed authority only; no additional funds were appropriated. While we will vigorously press for savings in the Chemical Demilitarization program, at this point, we are unable to exercise reprogramming authority without jeopardizing our ability to meet the Chemical Weapons Convention mandate of April 2007 for destruction of our chemical weapons stockpile. If, however, additional funding becomes available in the coming fiscal year, the Department will reprogram the FY 1999 Defense Appropriations Act to reprogram up to $25 million from the Chemical Agents and Munitions Destruction Account to fund the demonstration of alternatives to baseline incineration. Unfortunately, the Act also reduced the President’s request for the account by 78 million dollars. This severely challenges the Army’s ability to successfully destroy this Nation’s chemical stockpile by April 29, 2007, as required by the Chemical Weapons Convention. As a result of the $78 million reduction, to date we have been unable to identify available funds in the Chemical Demilitarization program to reprogram to ACWA, for additional demonstration projects.

The Administration’s policy is to proceed as quickly as possible with the safe destruction of the Nation’s chemical stockpile, while at the same time seeking even safer and more effective methods. The National Academy of Sciences concluded in its 1994 study that the baseline incineration system is a safe and effective disposal process for the stockpile. The Administration will continue to seek even safer methods. We look forward to working with you to that end.

Sincerely,

JACOBS J. LAW,
Director.

THE GALLO RESEARCH CENTER AT THE UNIVERSITY OF CALIFORNIA, SAN FRANCISCO

Mrs. BOXER. Mr. President, I am pleased to see language in the Department of Defense Appropriations report which recommends $300 million for medical research and development efforts to be used for life-saving medical projects, including breast cancer and prostate cancer research.

Of the $300 million, the Committee recommends that $20 million is to be made available for peer reviewed medical research grants and activities. Further, the Committee directs that the Secretary of Defense, in conjunction with the service of the Surgeons General, establish a panel to select medical research projects of clear scientific merit and direct relevance to military health. One of the projects listed as having scientific merit and direct relevance to military health is that of alcohol abuse and prevention research.

I believe that alcohol abuse and prevention efforts must be supported by Congress. We have all been witness to the tremendous health, economic, and social losses attributed to alcoholism. To that end, I would like to share with my colleagues the promising research being conducted to combat alcoholism at the Gallo Center in San Francisco, California.

The mission of the Gallo Center is to identify genes that control brain responses to alcohol and other addicting agents and then develop new drugs to treat addiction. It is the only alcoholism research program in the country that is based with a department of neurology. The Gallo Center is fully equipped for research in cellular, molecular, and behavioral neuroscience and also invertebrate and human genetics.

I join my colleague, Senator FERNSTEIN, in her request for $11 million from the Medical Research activities budget in the Department of Defense Appropriations bill to support alcoholism research at the Gallo Center located at the University of California, San Francisco Medical School. I believe that the important work conducted at the Gallo Center qualifies...
under the medical research project di-
rective as recommended by the Com-
munity, and that it be funded from the $50 million already made
available for peer reviewed medical re-
search grants and activities.

The Department of Defense Health
Program has appropriately identified alcohol research as a priority area.
I believe that, providing $11 million
from the Medical Research activities
budget in the Department of Defense
Appropriations bill for the Gallo Re-
search Center at the University of Cal-
ifornia, San Francisco would prove to be a worthwhile investment in our ef-
forts to learn more about alcoholism,
it causes, and what we can do to fight it.

Mr. LAUTENBERG. Mr. President,
page 95 of the report accompanying S.
1122 contains language that enables the
Army to include Rock Island Arse-
nal in all aspects of the development,
design and production of the Light-
weight 155mm Towed Howitzer Pro-
gram. This directive is problematic for
many reasons. First, it would un-
dermine industrial competition and
conflict with the fair and competitive
process that has occurred to date. It
would preclude further competition for
the 155mm Towed Howitzer and all fu-
ture towed artillery programs. And the
report language would potentially con-
trict several statutes, including the
Army Industrial Facilities Act, the
Working Capital Funds Act, and the
Arsenal Act.

The contract for this program has al-
ready been awarded on a competitive
basis. Vickers Shipbuilding and Engi-
neering LTD developed the original de-
sign and owns background intellectual
property in the current Lightweight 155mm towed system. Attempting now to di-
rect the work to Rock Island would po-
tentially detract from work done at
Picatinny Arsenal in my home state of
New Jersey, as well as potentially cre-
ate all sorts of legal fights. While Rock
Island should be encouraged to com-
pete for a subcontract, all future awards
should be made on a "best-
value" basis. Any legislative micro-
management that compromises the
competitive bidding process is inco-
sistent with legal and economic pru-
dence. I urge such ill-advised acquisi-
tion guidance to be dropped when the
Senate convenes with the House to con-
ference this bill.

McGregor Range Withdrawal

Mr. DOMENICI. Mr. President, my
amendment to the Defense Appropria-
tions bill would renew the withdrawal
of the McGregor Range for use by the
U.S. Army.

McGregor Range is one of six mili-
tary parcels withdrawn from public do-
main in 1986. These parcels comprise
nearly 30 percent of the Department of
Defense’s 25 million acres. The lands
will revert to the public domain in 2001 unless Congress passes new legislation.

This amendment is specific to the
608,000 acres utilized by Fort Bliss and
does not address any of the other re-
newals for other military installations.
McGregor Range comprises nearly
700,000 of Fort Bliss’s 1.12 million acres.
The Fort Bliss garrison is adjacent to
El Paso, Texas, but the McGregor
Range is located entirely in New Mex-
ico.

Sections of McGregor are used for
cattle grazing and other nonmilitary
purposes such as hunting and recrea-
tion. The Bureau of Land Manage-
ment manages the cattle-grazing pro-
gram through close coordination with
the Army. These cooperative efforts
provide for efficient use of the lands as
well as effective stewardship of the
natural resources located there.

Recent studies of this issue provides
a succinct summary of the most rel-
vant policy issues surrounding the re-
newal of withdrawal for military pur-
poses. Mr. President, allow me to brief-
ly list the major findings of this study:

Fort Bliss has a critical role as a na-
tional center for air defense and
McGregor Range is essential for ful-
filling that role;

McGregor Range is the only range in
the United States capable of training
America’s air and missile defense
forces. Because all CONUS Patriot
forces are stationed at Ft. Bliss depen-
d on McGregor for the training needed
to ensure their full readiness prior to
deployment.

Successive BRAC rounds have re-
duced the capability of the DOD to sup-
port both current and future training
and testing requirements with the
available infrastructure. Range com-
plexes such as McGregor and White
Sands Missile Range are critical now
and will become more critical in the
future as weapon systems and doc-
trine evolve which allow greater stand-
off distances and mobility in the fu-
ture. These capabilities are wasted if
we fail to train our forces to the max-
imum extent of their capabilities.

McGregor Range supports the U.S.
Air Force in the training activities at
Holloman Air Force Base.

The combined space of McGregor
Range and White Sands can be lever-
aged to accommodate the needs of a
more modern Army. Currently, the
range supports specialized test oper-
ations by White Sands Missile Range
which require additional safety buffer
zones to ensure public safety.

Military training and testing require-
ments for McGregor Range are foreseen
for at least the next 50 years based on
weapons systems that are either cur-
tently fielded, such as Patriot, or are
planned for fielding in the near future.
Additionally, emerging doctrine and
weapon systems part of the Army’s
After-Next will require large areas to
fully train soldiers in the employment
of these weapons systems. If the re-
quirement is known for the next fifty
years, then it is unclear why a shorter
withdrawal period is reasonable.

The BLM’s 1986 Wilderness Study
made a "No Wilderness" recommenda-
tion regarding the Culp Canyon WSA.
This recommendation was "based on
the low-quality wilderness value of
the WSA and the potential conflicts
with associated military use of the area."
Without this portion of the range, the
Army’s ability to conduct Patriot and
related air and missile defense training
will be reduced by approximately one-
third.

There is strong regional support for
this renewal. 176 public comments ex-
pressed support for the Army’s pre-
ferred alternative. An additional 26 ex-
pressed support for one of the other al-
ternatives.

Whatever the Army’s proposal will con-
inue to support non-military uses of the range
which include livestock grazing and
hunting for 50 years.

The Army has already met its obliga-
tions with respect to performing an En-
vironmental Impact Statement, hold-
ing public hearings, and submission of
request for renewal to the Administra-

In sum, all of the legal requirements
set forth by Congress have been met.
Congressional action is now required
to ensure that the Army retains its abil-
ity to test, simulate, and train for mis-
sions at Fort Bliss. Allowing the
Army’s continued access to these lands
is critical to adequate training and
readiness now and in the future.

One of the fundamental duties of
Congress is the maintenance of the na-
tional defense. Nothing is more funda-
mental than the provision of training
ranges, such as McGregor, in main-
taining a trained and prepared military.

Mr. President, I do not object to my colleague’s amend-
ment to renew the public land with-
drawal for the McGregor Range in New
Mexico, however, I believe the pre-
ferrable course of action is to follow the
process the Senate agreed to just last
month, and allow the Defense and Inte-
rior Departments the opportunity to
jointly develop a legislative proposal.

The McGregor Range in southern
New Mexico was one of several military
ranges that was last withdrawn for
military purposes in 1986 under Public
Law 99-606. The withdrawal period for
McGregor and the other ranges is for 15
years, and does not expire until No-

Last month, language was included in
the Committee-reported version of S.
1058, the DOD Authorization bill, that
would have extended public land with-
drawals at four of the six military inst-
allations covered by Public Law 99-
606: the Barry M. Goldwater Air Force
Range in Arizona; the McGregor Range
in New Mexico, and Fort Wainwright
and Fort Greely in Alaska. During the
consideration of the bill on the Senate
floor, I offered an amendment which

CONGRESSIONAL RECORD—SENATE
June 8, 1999
June 8, 1999

Congressional Record—Senate 11789

replaced the withdrawal language with a "sense of the Senate" statement urging the Administration to submit legislative language for formal withdrawing by July 1. I understand that both the Defense and Interior Departments are currently working on such a legislative proposal and that we still anticipate being able to incorporate legislative language for formal withdrawal. I am, however, concerned that the process for formal withdrawal has only just been completed, and that following that review, the Administration has the opportunity to submit its legislative proposal for our consideration.

The McGregor withdrawal encompasses approximately 606,000 acres of land in New Mexico. The renewal of the withdrawal and future uses of the range of interest not only to the Army, but also to area residents and other public land users. Although the amendment is not clear, I am concerned that it materially changes some of the withdrawal terms from the 1986 Act.

For example, the 1986 Act authorized a withdrawal period of 15 years. This amendment provides for a 50-year withdrawal. I understand that the military desires a longer withdrawal period than the current 15 years, and I am not opposed to considering a longer term. But meaningful periodic reviews and environmental analyses serve an important purpose. They provide local communities with an opportunity to raise issues about the way these lands are managed, and they allow us to consider new land management issues which may not have been present when the original withdrawals were made. I think it is a mistake to significantly change this policy without at least the opportunity for public hearings.

Another aspect of the amendment that seems to be a significant departure from past management practices is a requirement that the Secretary of the Army manage the withdrawn lands. Under current law, the lands are managed by the Bureau of Land Management for a variety of multiple use purposes subject to the limitations of the military uses. For example, the 1986 Act authorizes the Secretary of the Interior to manage the lands in a manner permitting the continuation of grazing, the protection of wildlife and wildlife habitat, the control of predators, recreation, and the suppression of brush fires.

This amendment now provides for management by the Army, under the terms of the new agreement to be developed between the Army and the Interior Department, which is to provide for the proper management and protection of natural and cultural resources. It may very well be that such an agreement will adequately provide for other non-military uses and protect sensitive natural and cultural resources. However, there is no requirement that the lands be managed under existing law, including the Federal Land Policy and Management Act. The amendment also appears to leave very important land management questions unanswered. For example, the Interior Department manages the Culp Canyon Wilderness Study Area within the McGregor Range, as well as an "Area of Critical Environmental Concern." Under this amendment, is the Army required to manage those areas to the same degree of protection as required of the Secretary of the Interior? Again, at the very least, I think it is important that all interested parties be heard on these issues before we decide how to proceed.

Mr. President, I would like to conclude by again urging the Administration to expeditiously complete its legislative proposal by the end of this month. Although I would prefer to hear the Administration's proposal, I am committed to seeing that the McGregor range renewal is enacted this year. If, however, a timely proposal is submitted by the Administration, I hope that we will be able to include appropriate legislative language to renew the withdrawal for McGregor and the other withdrawals affected by this amendment.

Mr. TORRICELLI. Mr. President, I rise today in strong support of the FY 2000 appropriations bill. This legislation demonstrates a strong commitment to America's defense and to our ability to meet future military challenges. I especially thank and acknowledge the efforts of the distinguished chairman of the Appropriations Committee, Senator STEVENS, the distinguished ranking member of the Appropriations Committee, Senator BYRD, and the ranking member of the Defense Subcommittee, Senator INOUYE, for their work and support of this legislation.

I am particularly pleased that the committee included $1 million for exciting new technology designed to make landmine detection safer and more effective. This technology, known as nonlinear technique for landmine detection, has been developed by engineers at the Davidson Laboratory of the Stevens Institute in my home State of New Jersey. This new method for detection of mines and other buried man-made objects has been devised in such a way as to differentiate between landmines through periodic design of other solid objects. This technology will increase our ability to meet our international obligations and dramatically improve the safety and security of our armed forces.

I also express my support for the committee's inclusion of an additional $121 million for the production of 11 new Black Hawk helicopters. A coalition of eight companies in my state manufacture critical components for the Black Hawk, which is the Army's premier tactical transport helicopter. First produced in 1977, it is used for combat assault, combat re-supply, battlefield command and control, electronic warfare and medical evacuation. Currently, the Black Hawk is at the heart of critical support functions for our armed services in Kosovo. This funding will ensure that our military has the ability to continue its current operations and sustain readiness for future deployments.

I am also extremely pleased that this legislation represents a significant increase in our commitment to the Department of Health in the Breast Cancer Research Program. The inclusion of $175 million for the breast cancer program, and the $75 million for the prostate cancer research programs, has special significance for the constituents I represent. New Jersey's breast cancer incidence rate is among the highest in the Nation; and, more than 1,400 of the 6,900 New Jersey men diagnosed with prostate cancer die each year. I am confident that these funding initiatives will bring us much closer to finding answers for the men and women of New Jersey and nationwide, who suffer from these devastating diseases.

be fielded by Picatinny Arsenal. If the committee’s proposal is implemented, I fear that Rock Island Arsenal will ultimately lose its administrative and development responsibilities for the howitzer for which they have never before played a role and may be unqualified to preform. I encourage the committee to strongly consider these concerns which have similarly been expressed by the Army and Marine Corps.

Mr. President, I again thank Chairmen STEVENS, Ranking Member BYRD, and Ranking Member INOUYE for their commitment and attention to these important issues.

Mr. FEINGOLD. Mr. President, I rise today to voice my strong opposition to the fiscal year 2000 Department of Defense Appropriations Act.

Mr. President, it is almost painful to witness the way that this Senate is abdicating its responsibility to scrutinize the Department of Defense. During debate on the fiscal year 2000 DoD authorization bill, we had exactly two amendments that called a multi-billion dollar emergency supplemental into question. On this appropriations bill, we had exactly two amendments worthy of extensive debate. Two amendments, Mr. President. Here we have a defense policy that perpetuates a Cold War mentality into the 21st century, and the Senate has no questions.

Mr. President, on the heels of an authorization bill that exemplifies the Pentagon’s utter failure to adapt its priorities to the post-Cold War era, the American taxpayer is left holding the bag paying for the mess. There are a number of theories that attempt to explain the difficulties faced by the armed services. There is a dearth of thoughtful solutions. The general consensus is that we are pouring enough money into the Defense Department, the problems will go away. Unfortunately, effective problem-solving doesn’t work that way.

The DoD has a weapons modernization strategy that makes it impossible to buy enough new weapons to replace all the old weapons on a timely basis, even though forces are much smaller than they were during the Cold War and modernization budgets are projected to return to Cold War levels. Consequently, the ratio of old weapons to new weapons in our active inventories will grow to unprecedented levels over the next decade.

Subsequently, that modernization strategy is driving up the operating budgets needed to maintain adequate readiness, even though the size of our forces is now smaller than it was during the Cold War. Each new generation of high complexity weapons costs much more to operate than its predecessor, and the longer the replacement and the longer retention and use of older weapons. Thus, as weapons get older, they become more expensive to operate, maintain, and supply.

Couple this with an accounting system that has failed each and every GAO audit since enactment of the Chief Financial Officer Act of 1990, and you have a poorly managed, misguided strategy inviting disaster.

Instead of thoughtfully addressing these shortcomings, Mr. President, we proceed to spend the American taxpayers’ money as we have in the past. No change. We continue to promote bigger and more expensive weapons systems at the expense of our men and women in uniform. No matter how much money we throw at this problem, we won’t find a solution if we stay on this track.

For the past year, Mr. President, we’ve heard the call to address our military’s readiness crisis from virtually all quarters. We were told that forensics to what has become a shortfall were operations and maintenance as well as pay and allowances accounts.

Just last year, there was a virtual consensus that the armed services were facing a readiness crisis. Last September, the Armed Services testified that there was a dangerous readiness shortfall. General Henry Shelton, chairman of the Joint Chiefs, claimed that “without relief, we will see a continuation of the downward trends in readiness... and shortfalls in critical skills.” Army Chief of Staff General Dennis Reimer stated that the military faces a “hollow force” without increased readiness spending. Chief of Naval Operations Admiral Jay Johnson asserted that the Navy has a $6 billion readiness deficit. So it went for all the services.

To address the readiness shortfall, Mr. President, the Congress passed an emergency supplemental appropriations bill that contained no initiatives in its support for the efforts of our men and women in uniform. Unfortunately, something happened on the way to the front lines. The bill spent close to $9 billion, but just $1 billion of it went to address the readiness shortfall.

We added $1 billion for ballistic missile defense. The Ballistic Missile Defense Organization still hasn’t spent all that money, yet we’ve added another $3.5 billion for the BMDO in this bill. Last year’s supplemental also added $2 billion to combat an expected emergency, that being our operations in Bosnia. That other unexpected emergency, the year 2000, received a billion dollars. And so it went. What happened to readiness?

One provision in this bill casts a pall over the readiness needs of our service members and highlights, in microcosm, the Defense Department’s misguided priorities. This appropriations bill will spend upwards of $40 million in the next fiscal year, and perhaps as much as half a billion dollars over the next ten years on luxury jets for four-star generals. Am I missing something or is this absurd? We actually have more than 11,000 troops that qualify for food stamps and DoD can justify spending tens of millions of dollars next year for luxury jets. How can that be?

Mr. President, one concern goes to the heart of the entire debate on our national defense. The underlying question is this: Why should the Pentagon receive billions more in funding when it has failed utterly to manage its budget? Throwing good money after bad isn’t tolerated at other departments and agencies. Why is it tolerated with DoD?

Defense Week reported just yesterday that the Navy has lost track of almost $1 billion worth of ammunition, arms and explosives. Additionally, DoD has yet to pass an audit. A 1998 GAO audit couldn’t match more than $22 billion in DoD expenditures with obligations; it could not find over $9 billion in inventory; and it documented millions in overpayments to contractors. GAO concluded that “no major part of DoD has been able to pass the test of an independent audit.”

Mr. President, this bill also has some painful implications for other federal programs. Essentially, we are spending tax dollars on a wasteful and misguided defense strategy while domestic programs face steep spending cuts in the upcoming fiscal year.

The bill exceeds the Pentagon’s request by $1.4 billion. It spends $1.4 billion more than the Joint Chiefs of Staff believe is sufficient to meet our national defense needs. And that additional money is coming out of vital domestic programs that were already facing spending cuts.

Mr. President, I cannot vote to increase the defense budget by tens of billions of dollars, including tens of millions for corporate jets, while the budgets for veterans health care, education, agriculture and other programs account for deep cuts. In opposition to the Defense Department’s misguided spending priorities is not synonymous with supporting the military.

I yield the floor.

Mr. DOMENICI. Mr. President, I strongly support S. 1122, the Defense appropriations bill for FY 2000. As scored with adjustments, the pending bill provides $264.9 billion in total budget authority and $176.9 billion in new outlays for the Department of Defense and related activities. When adjusted for outlays from prior years and other actions, the bill totals $263.9 billion in BA and $254.6 billion in outlays. There are some major elements to that bill that are important for the Senate for review.

The bill is consistent with the Bipartisan Balanced Budget Agreement and the discretionary spending cap. In fact, in both budget authority and outlays the bill is below the amount that the Congressional Budget Resolution for fiscal year 2000 would contemplate for the Defense Subcommittee’s allocation. This is in recognition of the fact

Mr. KERREY. Mr. President, the Department of Defense appropriations bill will pass this chamber with my support. It is no small feat that a bill encompassing the size and gravity such as our national security can be addressed and passed through the U.S. Senate within the span of two days, with few amendments and little raucous debate. The lion's share of the credit for this accomplishment goes to the managers of the bill, the Chairman of the Appropriations Committee, Senator STEVENS, and the Ranking Member, Senator Inouye. Through their efforts, they have again done the work which is the first priority of our government; the defense of American independence, lives, and security around the world.

When programs have been consistently successful, it is easy to forget that national security and national defense are not a given in the political equation. But, national security doesn't just "happen." We achieve our national security and defense goals because of the men and women honorably serving in our nation's Armed Forces.

Mr. President, I ask unanimous consent that a Senate Budget Committee table displaying the budget impact of this bill be printed in the Record.

There being no objection, the table was ordered to be printed in the Record, as follows:

Another aspect of this appropriations bill which I would like to mention revolves around the President's proposals to reduce and indeed, throughout the world...
Nunn-Lugar program provides assistance to states of the former Soviet Union for safeguarding nuclear materials, dismantlement and disposal activities. The DoD Appropriations bill funds Nunn-Lugar in the amount of $476 million. Additionally, this bill allocates $25 million of these funds to support the Russian nuclear submarine weapons, and other demilitarization measures.

Offutt Air Force Base, located in Bellevue, Nebraska, is responsible for a number of missions which are particularly noteworthy. Offutt, with over 10,000 military and civilian personnel, is home to the United States Strategic Command, the joint command charged with deterring nuclear attacks on our country. There are many threats out there, but only one of them, Russian nuclear weapons, is capable of ending our national life. STRATCOM’s mission may not be in the news that often, but it the most essential of all defense missions, and it is commanded from Nebraska.

Offutt Air Force Base also hosts the U.S. Air Force’s premiere reconnaissance and command-and-control unit, the 55th Wing, the largest wing within the Air Force’s Air Combat Command. The Fighting 55th’s aircraft provide global situational awareness to military leaders and government officials. It is our government’s place to know that we live in the Information Age. Information has become a precious commodity which often can mean the difference between success and defeat. The missions that Offutt specializes in focus on gathering this kind of critical information. In a variety of ways, Offutt’s missions keep us more informed, more aware, and more safe. Here are some specifics on the various programs.

The 55th’s workhorse aircraft is the RC-135, also known as Rivet Joint. The RC-135 mission conducts electronic reconnaissance, providing direct, near real-time information and electronic warfare support to theater commanders and combat forces monitoring. Rivet Joint has played an important role in a number of recent military missions, including Kosovo, Bosnia, and Iraq. Information gathered by the RC-135 is made available to theater commanders through the Department of Defense and National Command Authorities. Data is processed, analyzed and stored by Air Combat Command, the Air Intelligence Agency and the National Security Agency. I am pleased that the bill passed yesterday appropriates $220.4 million for the re-technical applications center at Patrick AFB, Florida, by verifying compliance with the Comprehensive Nuclear Test Ban Treaty. It gathers information on nuclear tests and conducts baseline air sampling. By collecting particles in the air during flight, the WC-135 is able to detect if and when nuclear tests are conducted or if a nuclear bomb is detonated, even from thousands of miles away. Considering the nuclear weapons testing last year of both North Korea and Pakistan, it is clear that the WC-135 has not outlived its usefulness. The WC-135 is the only aircraft throughout the U.S. Air Force conducting this vital mission, and we in Nebraska are fortunate to have it based at home at Offutt Air Force Base.

The OC-135, or Open Skies, is tasked to complete photo reconnaissance flyovers. This mission supports the Defense Threat Reduction Agency by conducting observation flights in accord with the Open Skies Treaty. This treaty will allow the OC-135 to fly over Russian air space to monitor weapons reductions treaties. Although the Open Skies Treaty has not yet been ratified by all parties, the OC-135 has not been dormant. While the Open Skies Treaty awaits ratification, the OC-135 is heavily involved in additional photo reconnaissance projects, including missions such as weather observations of Hurricane Mitch. The Open Skies mission is fully funded in the Defense budget for FY 2001.

Additionally, E-4B aircraft also stationed at Offutt provide transport and command and control for the President, the Secretary of Defense, and Secretary of State. Much more than simply a transport aircraft, the E-4B allows senior officials complete access to critical information and communications in a secure fashion, keeping the President and others “in the loop,” even while in mid-flight.

Along with Offutt Air Force Base, Nebraska continues to make important contributions to our national security through components of the National Guard and the Reserves. Most recently, these components have played important roles in Kosovo alongside their active component counterparts. The 155th Wing of the Nebraska Air National Guard has been very active during the Kosovo mission, flying KC-135s—fuel tanker planes—above and alongside those missions. If the Nunn-Lugar program provides the remarkable task of mid-air refueling for a variety of aircraft, including the B-52 Stratofortress and the E-6. Indeed, over the last several months, the Nebraska unit led the KC-135 refueling effort, involving hundreds of aircraft, and also was the last volunteer unit en- gaged in the call-up. In April, the Nebraska National Guard was again called to service as the last reserve call-up was instituted. This has all been done, even though the 155th Wing is the smallest of all the Air Guard wings across the country. I applaud their efforts and their success.

Along with programs of national concern, there are a number of provisions in this bill that directly allow NebrasKa and Nebraskans to continue their vital work in safeguarding U.S. national security.

The 155th Wing of the Nebraska Air National Guard is currently serving in a nine-month deployment in Bosnia as part of the NATO peace-keeping forces. The 24th Medical Company is working alongside Guard units from across the country to transport patients from the field to hospitals. At a time when a robust economy and opportunities in the private sector can pull people away from public service, I salute these men and women who continue to make sacrificial effort, involving hundreds of aircraft, and also was the last volunteer unit enrolled in the call-up. In April, the Nebraska National Guard was again called to service as the last reserve call-up was instituted. This has all been done, even though the 155th Wing is the smallest of all the Air Guard wings across the country. I applaud their efforts and their successes.

The examples I have given here of the hard work being done by our Armed Forces are not the exception, but the rule. In a time of tight budgets and increased missions, I am proud to say that the Armed Forces are second to none around the globe. Even when we continue to ask more of our military men and women, they always rise to the challenge. We must never forget the risks they take for our sake and the freedoms they forego, and we must provide them the best support, conditions, equipment, and training possible in return. I am proud to have supported passage of the defense appropriations bill yesterday, and I hope and expect that we will continue the strong support of those who are willing to sacrifice all for the cause of your freedom and mine, the men and women of our Armed Forces.

Mr. BYRD. Mr. President, I commend the able managers of this bill, Senator STEVENS and Senator INOUYE, for producing a balanced and comprehensive bill that addresses some of the most pressing needs of the U.S. military.

Together with the emergency supplemental spending bill that Congress sent to the President last month, and the Defense authorization bill that the Senate passed prior to Memorial Day, this Defense appropriations bill marks a major commitment to our men and women in uniform by funding a wide array of vital defense programs. In act- ing quickly and decisively on these three bills, the Senate has sent a strong message of support to the military, particularly to those forces currently engaged in the air war over Yugoslavia. That support is richly deserved. Once again, America’s military forces have demonstrated their superior skills and leadership in the Balkan conflict. We are indebted to them for their service and dedication to their country.

This appropriations bill represents a strong effort on the part of the managers to balance the very real needs of the Defense Department against the
pressing needs of other domestic programs in the budget. This is a tough one for the appropriators. We are working under very tight budget caps to meet a whole host of escalating infrastructure needs—both physical and human—in this nation. Senator Stevens was able to trim slightly more than $3 billion from defense spending to allocate to other programs without damaging the integrity of this bill. Even so, it will be difficult to pass all 13 appropriations bills for Fiscal Year 2000 within the constraints of the current budget caps. I do not know what the resolution to this problem will be, but I commend Senator Stevens for the steps he has taken so far, and I look forward to working with him on the remaining appropriations bills.

Mr. STEVENS. Mr. President, inadvertently, at my request, the Senate adopted the Domenici amendment twice. I ask unanimous consent that it be in order to vitiate the adoption of amendment No. 604. It is a duplicate of amendment No. 577.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. The bill is ready to be advanced to third reading.

The PRESIDING OFFICER. The bill will be ready for the third time.

The bill (S. 1122) was read the third time.

Mr. NICKLES. I announce that the Senate now proceed to a second-degree amendments on the Democratic side: Mr. Biden, 1 amendment; Mr. Kerry (MA), 1 amendment; Mrs. Boxer, 1 amendment; Mr. Graham, 1 amendment; Mr. Lea(, 1 amendment; Mr. Dodd, 1 amendment; Mr. Edwards, 2 amendments; Mr. Daschle, 1 amendment.

Mr. O'LEARY. I announce that the Senate now proceed to a second-degree amendments on the Republican side: Mr. Lott, 1 amendment; Mr. Ashcroft, 1 amendment; Mr.新农村, 1 amendment; Mr. Specter, 1 amendment; Mr. Stevens, 1 amendment; Mr. Dole, 1 amendment; Mr. Smith, 1 amendment; Mr. Breaux, 1 amendment.

Mr. O'LEARY. I announce that the Senate now proceed to a second-degree amendments on the bipartisan side: Mr. Lott, 1 amendment; Mr. Ashcroft, 1 amendment; Mr.新农村, 1 amendment; Mr. Specter, 1 amendment; Mr. Stevens, 1 amendment; Mr. Dole, 1 amendment; Mr. Smith, 1 amendment; Mr. Breaux, 1 amendment.

Finally, I ask consent that there be 12 first-degree amendments in order for each side of the aisle, with relevant second-degree amendments, and one additional first-degree amendment in order for each leader under the same terms as outlined above.

This has been discussed with the Democratic leader and cleared on both sides of the aisle. I thank the Senator from Oregon, Mr. Wyden, for his help on this very important issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the following list be printed in the RECORD with respect to the Y2K agreement and first-degree amendments on the Democratic side:

Mr. Hollings, 3 amendments; Mr. Kerry (MA), 1 amendment; Mrs. Boxer, 1 amendment; Mrs. Feinstein, 1 amendment; Mr. Feingold, 1 amendment; Mr. Graham, 1 amendment; Mr. Leahy, 1 amendment; Mr. Dodd, 1 amendment; Mr. Edwards, 2 amendments; Mr. Daschle, 1 amendment.

MORNING BUSINESS

Mr. STEVENS. I ask unanimous consent that the Senate now proceed to a period of morning business with Senators being permitted to speak therein for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO LIEUTENANT COLONEL JEFF SEVERS, UNITED STATES AIR FORCE

Mr. LOTT. Mr. President, I would like to recognize the professional dedication, vision, and public service of Lieutenant Colonel Jeff Severs who is leaving the Air Force Legislative Liaison Office for assignment as the program manager for the Wind Corrected Munitions Dispenser Program at Eglin Air Force Base, Florida. It is a privilege for me to recognize the many outstanding achievements he has provided for the Senate, the Air Force, and our great Nation.

Lieutenant Colonel Severs has served our country with distinction for nearly 14 years. After graduating from the University of Georgia in 1985, he embarked on his Air Force Career with a training assignment at Keesler Air Force Base, Mississippi. He subsequently completed tours of duty at McClellan Air Force Base, California; Wright-Patterson Air Force Base, Ohio; Los Angeles Air Force Base, California; and back again to Wright-Patterson Air Force Base. In each of his Air Force assignments, Lieutenant Colonel Severs’ performance has been outstanding.
Lieutenant Colonel Severs began his tour on Capitol Hill as a legislative fellow assigned to the office of my esteemed colleague from Oklahoma, Senator Jim Inhofe. During this assignment, he worked on the fiscal year 1998 Defense authorization bill. After his assignment with Senator Inhofe, Lieutenant Colonel Severs was reassigned to the Air Force Office of Legislative Liaison in the Pentagon.

Initially, he was responsible for acquisition and logistics issues and was responsible for preparing the Secretary of the Air Force and Chief of Staff of the Air Force for posture testimony. He was then selected to be the Executive Officer to the Director of Air Force Legislative Liaison followed shortly thereafter by his assignment as Deputy Chief of the Air Force Senate Liaison Office.

Lieutenant Colonel Severs has earned the respect and trust of many of my colleagues on both sides of the aisle. His professional abilities and expertise enable him to foster excellent working relationships that have served the Air Force and the Senate exceptionally well. As a liaison officer in the Senate, Lieutenant Colonel Severs has provided members and staff with informative and timely support regarding Air Force plans, programs, and constituent casework. His efforts have contributed greatly to maintaining the best trained, best equipped, and best prepared Air Force in the world.

Mr. President, Jeff Severs, his wife, Gay, and children, Hugh and Brooke, have made many sacrifices during his 14-year Air Force career. He continues to serve with a dedication and enthusiasm seen only in our Nation’s best and brightest. He is a great credit to the Air Force and the country, and his efforts on behalf of members and staff of the Senate will be greatly missed. As he now departs for new challenges at Eglin Air Force Base, I call upon my colleagues on both sides of the aisle to realize his service to the Senate and wish him well in his new assignment.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Monday, June 7, 1999, the federal debt stood at $5,606,738,885,838.87 (Five trillion, six hundred six billion, seven hundred thirty-eight million, eight hundred eighty-five thousand, eight hundred thirty-eight dollars and eighty-seven cents).

Five years ago, June 7, 1994, the federal debt stood at $4,606,572,000,000 (Four trillion, six hundred six billion, five hundred seventy-two million).

Ten years ago, June 7, 1989, the federal debt stood at $2,795,983,000,000 (Two trillion, seven hundred ninety-five billion, nine hundred eighty-three million).

Fifteen years ago, June 7, 1984, the federal debt stood at $1,519,266,000,000 (One trillion, five hundred nineteen billion, two hundred sixty-six million).

Twenty-five years ago, June 7, 1974, the federal debt stood at $471,794,000,000 (Four hundred seventy-one billion, seven hundred ninety-four million).

(One trillion, five hundred nineteen billion, seven hundred ninety-five billion, nine hundred eighty-three million)

Mr. President, 11,000,000 (Eleven billion)

(One trillion, five hundred nineteen billion, seven hundred ninety-five billion, nine hundred eighty-three million)

(One trillion, five hundred nineteen billion, seven hundred ninety-five billion, nine hundred eighty-three million)
June 8, 1999

WOMEN'S HEALTH

Mr. CAMPBELL. Mr. President, I take this opportunity today to call my colleagues' attention to the importance of women's health care issues. I came to know the importance of women's health early in life. Some of you may know that my mother suffered from tuberculosis. Back in those days, patients with TB had to be isolated, so my mother was living in a sanatorium. I could not see her in person, only through the windows.

In the past, women's health did not receive the attention it deserves. I believe it is time to change that. If we are to eliminate the diseases that especially afflict women today, we will need real dedication to the task of developing new treatments and prevention techniques.

And because women make many of the health care decisions for families, their decisions touch the health of many other women, spouses, elderly parents and relatives. In this great country of ours, where we emphasize personal responsibility, good health care decisions are fundamental to quality health.

As medical science advances into new territory, expanded choices will give women unprecedented opportunities to live better and longer lives, and to affect the quality of health care in our country. Women will be called upon to take charge of their own health as well as to demand medical excellence for their families. Only with the help of such informed decision makers will we be able to develop policies which assure all Americans access to affordable, quality health care.

In an effort to highlight women's health care and to make women aware of the health care choices that are available to them, I recently co-hosted a forum, Health Care: What Every Woman Should Know, with our former colleague in the Senate, Hank Brown, and an article from the Greeley Tribune.

I hope you will use what you learn today to make positive health care choices.

Sincerely,

BEN NIGHTHORSE CAMPBELL,

U.S. Senator.

AGENDA

8:30 a.m.—Registration Confirmation: Coffee, fruit, bagels.
9:00 a.m.—Welcome: UNC President Hank Brown and Senator Ben Nighthorse Campbell.
9:15 a.m.—Panel I: Confronting the “C” Word—Moderator: Kim Christiansen, Channel 9 News Anchor.
10:20 a.m.—Panel II: Confronting the “C” Word—Moderator: Susan Carter, MD; Judy Stauter Huse, RD, MS; Adele Arakawa, RN, PhD; Kim Christiansen, Channel 9 News Anchor.
11:35 a.m.—Getting the Best Care: How You Can Be An Advocate (Legislative Initiatives and Solutions)—Raissa Geary, MA, Senior Science Advisor in the Department of Health and Human Services.
12:00 p.m.—Luncheon: Guest Speaker: Susan Blumenthal, MD, MPA, Assistant Surgeon General—‘Critical Public Health Issues for Women in the 21st Century’.

The Conference on Health Care: What Every Woman Should Know

Sponsored by Senator Ben Nighthorse Campbell and the University of Northern Colorado

DEAR FRIENDS: Thank you for attending today's forum, Health Care: What Every Woman Should Know. I am honored to co-host this event with the University of Northern Colorado, and I hope today's forum provides you with knowledge to ensure a healthier life for you and your families.

I have always worked to ensure access to affordable, quality health care. Women's health has historically received little attention and it is time that we correct that. Because women are the primary care givers and decision makers of the health care decisions for families, it is important to make women aware of the advances that are taking place in the areas of research, detection, treatment and prevention.

Personal health choices are fundamental to quality health care. Today's forum will highlight approaches that can lead to early intervention, less invasive and less expensive treatment and cost-saving strategies.

I sincerely hope you will use what you learn today to make positive health care choices.

Sincerely,

HANK BROWN, President.
Although women's health is not being discussed in Congress, awareness of health problems facing women has increased in the past century, Blumenthal said.

"For many years, serious health problems such as heart disease and lung cancer were thought only to occur in men. But through increasing research in women's health issues, Blumenthal said, concerns such as those are being discussed.

Also, it's important to include women and minorities in all research projects relating to health issues as well as men, Blumenthal said. Programs that don't include women will lose their federal funding.

Marianne Dinges attended the conference Thursday and said the experience was valuable. She said she was impressed with the quality of the speakers and the topics they were scheduled to discuss.

"It appeared we were going to see a full gamut of issues and their political relevance," she said. "A lot of us are involved in women's issues and have a lot about this, but we all got new information."

The conference was sponsored by UNC and U.S. Sen. Ben Nighthorse Campbell, R-Colo. Campbell said he pitched the idea to UNC after receiving many calls from women about health issues.

"It came from the community activists who wanted me to do it," he said.

The issues addressed at the conference need to be at the forefront of public debate, Campbell said.

He said he will take the information back to Washington, D.C., and enter it into the Congressional Record. He also wants to start a series of forums like the one Thursday to further address the issues.

"We just touched the surface of women's health," he said. "The time to endure is passed. It's time to fight back."

HEALTHY LIVING

Susan Blumenthal, assistant U.S. Surgeon general, gave these tips for healthy lives:

- Find a doctor who respects you.
- Know your family health history; many diseases are genetic and run in families. If you smoke, stop. If you don't, never do. It's the No. 1 preventable cause of health problems among women.
- Exercise or do some other sort of physical activity at least 30 minutes every day. This could be as simple as riding a bike or walking up stairs rather than using the elevator. Eat smart.
- Get annual physical exams, and make sure to include routine women's health tests such as pap smears.

Know your health care plan and make sure to read the fine print.

Mr. CAMPBELL. Mr. President, information we received at the conference will be helpful in my work on the Appropriations Committee as we consider funding priorities in the women's health area.

I thank the Chair and yield the floor.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Williams, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Banking, Housing, and Urban Affairs.

The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 4:00 p.m., a message from the House of Representatives, delivered by one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

- H.R. 1115. An act to provide grants to the States to improve the reporting of unidentified and missing persons.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 435) to make miscellaneous and technical changes to various trade laws, and for other purposes.

The message further announced that pursuant to section 334(b)(1) of Public Law 105-220 and the order of the House of Thursday, May 27, 1999, and upon the recommendation of the Minority Leader, the Speaker appoints the following member on the part of the House to the Twenty-First Century Workforce Commission: Mr. David L. Stewart of St. Louis, Missouri.

The message also announced that pursuant to the provisions of 22 U.S.C. 2764, the Speaker appoints the following Members of the House to the Canada-United States Interparliamentary Group, in addition to Mr. HUGH- TON of New York, Chairman, appointed on February 11, 1999: Mr. GILMAN of New York, Vice Chairman, Mr. OBERSTAR of Minnesota, Mr. SHAW of Flor- ida, Mr. LIPINSKI of Illinois, Ms. SLAUGHTER of New York, Mr. UPTON of Michigan, Mr. STEARNS of Florida, Mr. PETERSON of Minnesota, Ms. DANNER of Missouri, Mr. MANZULLO of Illinois, and Mr. ENGLISH of Pennsylvania.

MEASURE REFERRED

The following bill was read the first and second times by unanimous consent and referred as indicated:

- H.R. 1115. An act to provide grants to the States to improve the reporting of unidentified and missing persons; to the Committee on the Judiciary.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:
CONGRESSIONAL RECORD—SENATE

June 8, 1999

EC–3385. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Amendment of Class E Airspace: Thomson, GA” (FAA Docket No. 98–A934), received May 13, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3386. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Standard Instrument Approach Procedures; Miscellaneous Amendments (22), Amdt. No. 1909/5–21 (5–24)” (RIN2120–A66) (1999–0025), received May 24, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3388. A communication from the Special Assistant to the Chief, Mass Media Bureau, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Hazardous Materials: Regulations Governing the Taking of Marine Mammals by Alaskan Natives; Marking and Reporting of Beluga Whales Harvested in Cook Inlet” (RIN0648–AM57), received May 24, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3389. A communication from the Special Assistant to the Chief, Mass Media Bureau, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Memorandum Opinion and Order—Implementation of Section 309(j) of the Communications Act” (MM Docket No. 97–234, CG Docket No. 92–52 and Gen Docket No. 90–264), received May 13, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3391. A communication from the Special Assistant to the Chief, Mass Media Bureau, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Section 72.202(b), Table of Allotments, FM Broadcast Stations (Ely and Carlin, NV)” (MM Docket No. 98–185), received May 13, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3392. A communication from the Special Assistant to the Chief, Mass Media Bureau, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Section 72.202(b), Table of Allotments, FM Broadcast Stations (East Brewton, Alabama and Navarre, Florida)” [MM Docket No. 99–169], received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3393. A communication from the Chair, Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Closure of the Gulf of Alaska to Directed Fishing for Pink Salmon and Correction of a Title Line Gear”, received May 19, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3394. A communication from the Chair, Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Drawbridge Regulations; Gulf of Accoosac Waterway, TX (CGD–06–99–045)” (RIN2115–AE791999–0011), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3395. A communication from the Senior Regulations Analyst, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Hazardous Materials: Regulations Governing the Taking of Marine Mammals by Alaskan Natives; Marking and Reporting of Beluga Whales Harvested in Cook Inlet” (RIN0648–AM57), received May 24, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3396. A communication from the Attorney, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Regulations Governing the Taking of Marine Mammals by Alaskan Natives; Marking and Reporting of Beluga Whales Harvested in Cook Inlet” (RIN0648–AM57), received May 3, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3397. A communication from the Attorney, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Mandatory Noise Certification Tabulations: Eurocopter France Model SA341G and MBB BO105” (RIN2127–AD07), received May 28, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3398. A communication from the Deputy Administrator for Fisheries, National Oceanic and Atmospheric Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Hydrography; Health and Safety of Fishery Personnel; and Oceanographic Survey Vessels” (NOAA Docket No. 99–409–001), received May 23, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3399. A communication from the Assistant Administrator for Weather Service, National Oceanic and Atmospheric Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: S.N. CENTAIR G10I–9022–A” (RIN2120–AA64), received May 3, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3401. A communication from the Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Closure of the Gulf of Alaska to Directed Fishing for Pink Salmon and Correction of a Title Line Gear”, received May 19, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3402. A communication from the Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Fisheries of the Northeastern United States—Announcement That the 1999 Summer Flounder Commercial Quota Has Been Harvested for Maine”, received April 27, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3403. A communication from the Chairman, Federal Maritime Commission, transmitting, pursuant to law, the report of a rule entitled “Licensing, Financial Responsibility Requirements, and General Duties for Ocean Transport Intermediaries” (Docket No. 98–28), received April 29, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3405. A communication from the Legal Adviser, Office of the Secretary, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Order on Reconsideration: In the Matter of Renewal of the Telecommunications Act of 1996; Commercial Availability of Navigational Devices” (CS Docket No. 97–80; FCC 99–95), received May 20, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3406. A communication from the Program Support Analyst, Aircraft Certification Directorate, Federal Aviation Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives; S.N. CENTAIR G101–9022–A” (RIN2120–AA64), received May 3, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3407. A communication from the Program Support Analyst, Aircraft Certification Service, Federal Aviation Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives; Request for Comments: Eurocopter France Model SA314G and SA313J Helicopters; Docket No. 99 SW 03–AD” (RIN2120–AA41), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3408. A communication from the Chairman, United States International Trade Commission, transmitting, pursuant to law, the report of the Office of Inspector General for the period October 1, 1998 through March 31, 1999; to the Committees on Ginnamental Affairs.

EC–3409. A communication from the Administrator, U.S. Small Business Administration, transmitting, pursuant to law, the annual report for fiscal year 1998; to the Committee on Governmental Affairs.

EC–3410. A communication from the Acting Director, Office of Inspector, Federal Aviation Administration, transmitting, pursuant to law, the report of the Office of Inspector General for the period

October 1, 1998 through March 31, 1999; to the Committee on Armed Services.

EC–3411. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report relative to the employment of Americans by the United Nations during calendar year 1998; to the Committee on Governmental Affairs.

EC–3412. A communication from the Director, Office of Government Ethics, transmitting, pursuant to law, the report of a rule entitled “Retirement; to the Committee on Armed Services.

EC–3413. EC–3435. A communication from the Secretary of Energy, transmitting, pursuant to law, a report entitled “Federal Government Energy Management and Conservation Programs” (RIN3235–AH90), received May 27, 1999; to the Committee on Energy and Natural Resources.

EC–3436. A communication from the Secretary of Energy, transmitting, pursuant to law, a report entitled “Alternative Fuel Transportation Program” (RIN3080–A098), received May 27, 1999; to the Committee on Energy and Natural Resources.

EC–3437. A communication from the Acting Assistant General Counsel for Regulatory Legislation, Department of Energy, transmitting, pursuant to law, the report of a rule entitled “Protection of Historic Properties (36 CFR Part 800)” (RIN3234–A094), received May 27, 1999; to the Committee on Energy and Natural Resources.

EC–3438. A communication from the Executive Director, Advisory Council on Historic Preservation, transmitting, pursuant to law, the report of a rule entitled “Indirect Fuel Additives: Polymers” (98F–0730), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC–3439. A communication from the Directors, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled “Indirect Food Additives: Polymers” (98F–0368), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC–3440. A communication from the Directors, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled “Indirect Fuel Additives: Polymers” (98F–0368), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC–3441. A communication from the Directors, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled “Indirect Fuel Additives: Polymers” (98F–0368), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC–3442. A communication from the Directors, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled “Indirect Fuel Additives: Polymers” (98F–0368), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC–3443. A communication from the Directors, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services,
transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Bombardier CRJ-200/ CRJ-200ER Airplanes; Docket No. 99–91–AD; Amendment 39–11123; AD 99–11–01” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3453. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3454. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3455. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3456. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3457. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3458. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3459. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Mitsubishi Model YS–11 Series Airplanes; DOT Docket No. 96–AD; Amendment 39–11159; AD 99–09–14” (RIN 2120–AA64), received May 17, 1999; to the Committee on Commerce, Science, and Transportation.
EC-3474. A communication from the Chair, Medicare Payment Advisory Commission, transmitting, pursuant to law, a report entitled "Selected Medicare Issues", dated June 1999; to the Committee on Finance.

EC-3475. A communication from the Chairman, Federal Election Commission, transmitting, pursuant to law, the report of a rule entitled "Direct Federal Subsidies to a Firm Repeatedly Held as Safe: Cellulase Enzyme Preparation Derived from Trichoderma Longibrachiatum for Use in Processing Food" (79G-0372), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC-3476. A communication from the Director, Regulations Policy and Management Staff, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled "Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers; Correction" (29F-0280), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC-3477. A communication from the Director, Regulations Policy and Management Staff, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled "Approval of promulgation of Air Quality Implementation Plans; approval of a rule entitled "Approval and promulgation of Air Quality Implementation Plans; Ohio; Designation of Areas for Air Quality Planning Purposes; Ohio" (FRL #6437-1), received May 4, 1999; to the Committee on Environment and Public Works.

EC-3478. A communication from the Acting Assistant General Counsel for Regulatory Law, Office of Energy Efficiency and Renewable Energy, Department of Energy, transmitting, pursuant to law, the report of a rule entitled "Direct Federal Subsidies to a Firm Repeatedly Held as Safe: Cellulase Enzyme Preparation Derived from Trichoderma Longibrachiatum for Use in Processing Food" (79G-0372), received May 27, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC-3479. A communication from the Director, Office of Surface Mining, Department of the Interior, transmitting, pursuant to law, a report entitled "Pennsylvania Regulatory Program Rule Correction" (SPATs #PA-125-FOR), received June 1, 1999; to the Committee on Energy and Natural Resources.

EC-3480. A communication from the Director, Public and Private Works, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Approval and promulgation of implementation plans; Texas; revision to the state implementation plan (SIP) addressing sulfur dioxide in Harris County" (FRL #8349-9), received May 26, 1999; to the Committee on Environment and Public Works.

EC-3481. A communication from the Chief, Regulations Unit, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Group-term insurance uniform premium" (RIN1545-AN54) (TD 8821), received June 1, 1999; to the Committee on Finance.

EC-3482. A communication from the Chief, Regulations Unit, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Secured Employee Benefits Settlement Initiative: Employee Assistance Programs" (RIN1545-AN54) (TD 8821), received June 1, 1999; to the Committee on Finance.

EC–3552. A communication from the Acting Assistant General Counsel for Regulatory Law, Office of Environment, Safety and Health, Department of Energy, transmitting, pursuant to law, the report of a rule entitled "Start-Up and Restart of Nuclear Facilities" (DOE O 425.1A), received May 27, 1999; to the Committee on Environment and Public Works.

EC–3553. A communication from the Acting Assistant General Counsel for Regulatory Law, Office of Environment, Safety and Health, Department of Energy, transmitting, pursuant to law, the report of a rule entitled "Safeguards and Security Independent Oversight Program" (DOE O 470.2), received May 27, 1999; to the Committee on Environment and Public Works.

EC–3554. A communication from the Senior Attorney, Federal Highway Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Credit Assistance for Surface Transportation Projects" (RIN2125–AE94), received May 27, 1999; to the Committee on Environment and Public Works.

EC–3555. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report for fiscal year 1997 relative to the Comprehensive Environmental Response, Compensation, and Liability Act; to the Committee on Environment and Public Works.

EC–3556. A communication from the Nuclear Regulatory Commission, transmitting, pursuant to law, a draft of proposed legislation entitled "Nuclear Regulatory Commission Authorization Act for Fiscal Year 2000"; to the Committee on Environment and Public Works.

EC–3557. A communication from the Director, Federal Emergency Management Agency, transmitting, pursuant to law, the report of a rule entitled "Safeguards and Security Independent Oversight Program" (DOE O 470.2), received May 27, 1999; to the Committee on Environment and Public Works.

EC–3558. A communication from the Assistant Secretary for Fish and Wildlife and Parks, Office of Law Enforcement, U.S. Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Migratory Bird Hunting: Regulations Regulating Baiting And Baited Areas" (RIN1018–AD74), received May 26, 1999; to the Committee on Environment and Public Works.

EC–3559. A communication from the Nuclear Regulatory Commission, transmitting, pursuant to law, a report relative to abnormal occurrences for fiscal year 2000; to the Committee on Environment and Public Works.

EC–3560. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Radiological Protection for DOE Activities" (DOE O 470.2), received May 27, 1999; to the Committee on Environment and Public Works.

EC–3561. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of State Plans for Designated Facilities and Pollutants: Florida (FRL #6352–5)"; to the Committee on Environment and Public Works.

EC–3562. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of State Plans for Designated Facilities and Pollutants: Florida (FRL #6352–5) and Grant Application Guidance to Improve Small Business Assistance (FRL #4)"; received May 27, 1999; to the Committee on Environment and Public Works.

EC–3563. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of State Plans for Designated Facilities and Pollutants: North Dakota; Control of Emissions from Existing Hazardous Medical/Infectious Waste Incinerators (FRL #6340–6)" and "Revisions to the Permits and Sulfur Dioxide Allowance System Regulations under Title IV of the Clean Air Act; Compliance Determination (FRL #6341–2)"; received May 7, 1999; to the Committee on Environment and Public Works.

EC–3564. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plan for South Coast Air Quality Management District (FRL #6333–3)"; to the Committee on Environment and Public Works.

EC–3565. A communication from the Chief, Office of Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the temporary security/sea port zone regulations; Ellis Island Medals of Honor Fireworks, New York Harbor, Upper Bay (CGD01–99–634) (RIN2115–AA97) (1999–0016); to the Committee on Commerce, Science, and Transportation.

EC–3566. A communication from the Chief, Office of Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Operations Regulation, Port of New York, NY (CGD01–99–631)" (RIN2115–AA97) (1999–0008); received May 10, 1999; to the Committee on Commerce, Science, and Transportation.

EC–3567. A communication from the President, transmitting, pursuant to law, a report relative to the extension of the waiver, under the Trade Act of 1974, to the People's Republic of China; to the Committee on Finance.

EC–3568. A communication from the President, transmitting, pursuant to law, a report relative to the extension of the waiver, under the Trade Act of 1974, to the Republic of Belarus; to the Committee on Finance.

EC–3569. A communication from the President, transmitting, pursuant to law, a report relative to the continuing humanitarian crisis in the Kosovo region; to the Committee on Foreign Relations.

EC–3570. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Regional Haze Regulations" (FRL #6353–4), received June 1, 1999; to the Committee on Environment and Public Works.

EC–3571. A communication from the President, transmitting, pursuant to law, a report relative to the extension of the waiver, under the Trade Act of 1974, to the Republic of China; to the Committee on Finance.

EC–3572. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "List of Regulated Substances and Thresholds for Accidental Release Prevention: Stay of Effectiveness for Flameproof Housing Requirements (FRL #6351–1)"; received May 25, 1999; to the Committee on Environment and Public Works.

EC–3573. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Guidelines Establishing Test Procedures for the Analysis of Pollutants; Measurement of Mercury in Water (EPA Method 1631, Revision B); Final Rule" (FRL #6353–4), received June 1, 1999; to the Committee on Environment and Public Works.

EC–3574. A communication from the Administrator, National Aeronautics and Space Administration, transmitting, pursuant to law, a report entitled "Progress on Superfund Implementation in Fiscal Year 1998"; to the Committee on Environment and Public Works.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–138. A concurrent resolution adopted by the Legislature of the State of Hawaii relative to the temporary visa waiver program; to the Committee on the Judiciary.

HOUSE CONCURRENT RESOLUTION No. 4

Whereas, the United States Congress passed the Immigration Control and Reform Act of 1986 that established a temporary visa waiver program to pave the way toward better international relations and increased visitor travel between the United States and certain participating foreign countries; and whereas, that program expired in September, 1996, and has since been extended on a year-to-year basis, with the current extension expiring in September, 1999; and whereas, the visa waiver program allows persons with waivers to enter the United States for a period of up to ninety days without a visa; and whereas, twenty-one countries were participating in the visa waiver program with
the United States as of 1996, with more being added since then. An initial and annual OASIS assessment must be completed by a registered nurse, and a 13-page follow-up assessment which is required to be completed every sixty days; and

Whereas, the OASIS system requires an 18-page initial assessment which must be completed by a registered nurse, and the reporting is duplicative of existing assessment and reporting requirements; and

Whereas, in the small-scale home health care organization environment in Iowa, it is not feasible to provide services through separate organizations based upon whether the patient is a recipient of Medicare and

Whereas, the HCFA rules would result in Medicare-certified organizations only providing services to recipients of Medicare, thereby reducing the availability of preventive home services to older Iowans who are not recipients of Medicare, increasing hospital admissions and Medicare costs, and increasing nursing home admissions and Medicaid costs; and

Whereas, OASIS appears to be solely a requirement of the U.S. Department of Health and Human Services, to the President of the United States, to the Secretary of the Department of Health and Human Services, to the President of the United States Senate, to the Speaker of the House of Representatives, to the President of the Senate and the Speaker of the House of Representatives, to the President of the Senate and the Speaker of the House of Representatives, and to each member of Iowa’s congressional delegation.

Whereas, the OASIS system requires federal mandate; and

Whereas, the HCFA requirement necessitates costly reporting for patients who receive services not paid through Medicare and the reporting is duplicative of existing assessment and reporting requirements; and

Whereas, the small-scale home health care organization environment in Iowa, it is not feasible to provide services through separate organizations based upon whether the patient is a recipient of Medicare and

Whereas, the HCFA system is required to provide a copy of this resolution to the President of the United States, to the Secretary of the Department of Health and Human Services, to the President of the United States Senate, to the Speaker of the United States House of Representatives, to the Majority Leaders of the United States Senate and House of Representatives, and to each member of Iowa’s congressional delegation.

POM-141. A concurrent resolution adopted by the Legislature of the State of Idaho relative to Health Care Financing Administration rules; to the Committee on Appropriations.

HOUSE Concurrent Resolution No. 5041
Whereas, New rules made by HCFA require OASIS assessment and follow-up reports for all patients of Medicare-certified home health agencies and health departments whether or not the personal or attendant care for such patients is paid from Medicare, and

Whereas, the new HCFA report requires an 18-page initial assessment, which must be completed by a registered nurse, with a 13-page follow-up assessment being required every 60 days; and

Whereas, The requirement for computer software for the preparation and transmission of such assessments and follow-up reports is another unfunded mandate of the federal government; and

Whereas, The HCFA report requires costly unfunded reporting of those who receive services which are not paid by Medicare—which reporting duplicates existing assessment and reporting requirements of the Kansas Department on Aging; and

Whereas, in the environment of the small, home health care services existing in Kansas and the inability of adequate software and hardware organizations to provide services for non-Medicare customers. The end result of the HCFA

POM-139. A concurrent resolution adopted by the Legislature of the State of Idaho relative to the threat of terrorism; to the Committee on Appropriations.

HOUSE Concurrent Resolution No. 28
Whereas, the threat of terrorism in the United States and other nations, a phenomenon that can strike any community, state or geographic region of our nation; and

Whereas, threats incorporating the use of nuclear, biological, and cyber weapons or combination thereof, may be used against critical infrastructures and the nation’s food supply, of which the state of Idaho is a major producer; and

Whereas, because terrorist incidents would occur in local communities within the states, it is imperative that planning, training, exercises, equipping and funding strategies for state and local response forces be included in any national strategy; and

Whereas, the Legislature joins with the National Governors’ Association and the National Emergency Management Association to affirm its commitment to ensuring a coordinated response and recovery to major emergency events, including incidents of terrorism and the use of weapons of mass destruction; now, therefore,

BE IT RESOLVED, by the members of the First Session of the Fifty-fifth Idaho Legislature, the House of Representatives and the Senate concurring therein, that we recommend the following actions be taken to improve preparedness, including incidents of terrorism and the use of weapons of mass destruction, and

BE IT FURTHER RESOLVED that the Clerk of the House of Representatives be, and she is hereby authorized and directed to forward a copy of this resolution to the U.S. Department of Justice, the President of the Senate and the Speaker of the House of Representatives and the members of the Senate and the House of Representatives representing the State of Idaho in the Congress of the United States.

POM-140. A concurrent resolution adopted by the General Assembly of the State of Iowa relative to Health Care Financing Administration rules; to the Committee on Appropriations.

HOUSE Concurrent Resolution No. 24
Whereas, rules recently promulgated by the Health Care Financing Administration (HCFA) of the United States Department of Health and Human Services requesting Outcome and Assessment Information Set (OASIS) assessment and follow-up reports for all patients of Medicare-certified home health agencies and health departments whether or not the patient is a recipient of Medicare; and

Whereas, the OASIS system requires federal mandate; and

Whereas, the HCFA requirement necessitates costly reporting for patients who receive services not paid through Medicare and the reporting is duplicative of existing assessment and reporting requirements; and
June 8, 1999

CONGRESSIONAL RECORD—SENATE

11895

rules is that Medicare-certified agencies will no longer provide in-home services to non-Medicare customers. Consequently, with lower levels of preventive home services being available to older Kansans there will be an increase in hospital admissions, thus increasing medical costs, and an increase in nursing home admissions, thus increasing Medicaid costs; and

Whereas, the OASIS appears to be solely a research project of HCFA, totally unfunded by federal sources, and accomplished with loss of funds by reporting agencies and loss of services to Kansas seniors; now, therefore;

Be it resolved by the House of Representatives of the State of Kansas, the Senate concurring therein: That we memorialize the Congress of the United States to require the Health Care Financing Administration OASIS reporting and data reporting requirements to apply only to Medicare patients and not to all patients of Medicare-certified home health agencies; and

Be it further resolved: That the Secretary of State be directed to provide an enrolled copy of this Memorial to the President of the United States, Secretary of Health and Human Services, President of the United States Senate, Speaker of the United States House of Representatives, minority leaders of the United States Senate and the United States House of Representatives, and to each member of the Kansas Congressional delegation.

POM-142. A joint resolution adopted by the Legislature of the State of Idaho relative to the estate and gift taxes; to the Committee on Finance.

We, your Memorialists, the House of Representatives and the Senate of the State of Idaho, the First Regular Session of the Fifty-fifth Idaho Legislature, do hereby respectfully represent that;

Whereas, the estate and gift tax is the federal government’s least significant revenue source contributing approximately 1.1% of total federal revenue and in 1998 just 1.66% of adult deaths in the United States are expected able estates; and

Whereas, a rationale for the estate and gift tax is that only the very wealthy pay it, but in 1995, 54% of all estate tax revenue came from the million dollar and estate taxes that year fell for those with estates over twenty million dollars; and

Whereas, the reason for the preceding is that careful estate planning can virtually eliminate the tax, however many estate planning techniques are costly and require long lead-times to implement, making the burden of the estate tax often fall on those with recently acquired modest wealth such as farmers and small businesses; and

Whereas, the tax can be devastating on small businesses and agricultural operations and protecting these ventures from estate taxes can be costly and drain resources that could be better used by the owners to upgrade and expand their operations; and

Whereas, the estate and gift tax may be having unintended environmental consequences as America’s nonindustrial private forests—those who own 59% of America’s forest land—face the untimely timber harvest and disruption of established forest management programs because of the federal estate tax and productivitiy to society’s goals of sustainable forestry and environmental quality and the tax may also have the unintended consequence of forcing a decedent to provide or sell portions of the family land, that otherwise might be managed in a sustainable manner, in order to meet the estate tax obligation; and

Whereas, Canada, Australia and Israel have repealed their estate taxes with three policy reasons given that more people were becoming subject to paying any portion of revenue raised and arguments by economists that the tax is counter-productive; and

Whereas, the inheritance tax is applied to property and goods that have already been taxed and some economists have indicated that the gross domestic product over the next twenty years will be higher due to the elimination of the estate and gift tax were repealed; now, therefore;

Be it resolved by the members of the First Regular Session of the Fifty-fifth Idaho Legislature, the House of Representatives and the Senate concurring therein, that we respectfully request that members of Congress look to recoup the states’ costs of treating smokers; and

Whereas, the Attorneys General Master Tobacco Settlement Agreement, which settled lawsuits seeking to recoup the states’ costs of treating smokers; and

Whereas, the Attorneys General Master Tobacco Settlement Agreement culminated legal action that began in 1994 when states began filing lawsuits against the tobacco industry; and

Whereas, currently, the respective states are in the process of finalizing the terms of the Master Tobacco Settlement Agreement and are making initial fiscal determinations from the settlement funds; and

Whereas, under the terms of the agreement, tobacco manufacturers will pay $206,000,000,000 over the next twenty-five years to the respective states in up-front and annual payments; and

Whereas, under the terms of the Master Tobacco Settlement Agreement, Hawaii is projected to receive $1,179,165,923.07 through the year 2025; and

Whereas, because many state lawsuits sought to recover Medicaid funds spent to treat illnesses caused by tobacco use, the U.S. Health Care Financing Administration contends that it is authorized and obligated under the Social Security Act, to collect its share of any tobacco settlement funds that are attributable to Medicaid; and

Whereas, the Master Tobacco Settlement Agreement declares that legal basis and the Medicaid recoupment issue, and thus, the Social Security Act must be amended to resolve the recoupment issue so that the moneys from the settlement remain with the respective states; and

Whereas, in addition to the recoupment issue, there is also considerable interest in how the state tobacco settlement fund expenditures at both the state and national levels; and

Whereas, as the final approval of the Master Tobacco Settlement Agreement, it is imperative that the states retain their rightful full share of the tobacco settlement funds; now, therefore, be it

RESOLVED by the House of Representatives of the Twentieth Legislature of the State of Hawaii, Regular Session of 1999, That the U.S. Congress is urged to enact legislation that amends the Social Security Act to prohibit the federal government from receiving any share of the funds awarded in the tobacco settlement that was reached in 1998 between the tobacco industry; and be it further RESOLVED that the respective state legislatures retain complete autonomy over the appropriation and expenditure of the respective tobacco settlement funds; and be it further RESOLVED that the U.S. Congress oppose any efforts by the federal government to earmark or impose any other restrictions on the respective states’ use of the state tobacco settlement funds; and be it further RESOLVED that certified copies of this Resolution be transmitted to the President of the United States, the Speaker of the U.S. Senate, the Speaker of the U.S. House of Representatives, and the members of Hawaii’s Congressional Delegation.

POM-143. A resolution adopted by the House of the Legislature of the State of Hawaii relative to tobacco settlement funds; to the Committee on Finance.

Whereas, on November 23, 1998, representatives from forty-six states signed a settlement agreement with the five largest tobacco manufacturers, which settled lawsuits seeking to recoup the states’ costs of treating smokers; and

Whereas, the Convention on elimination of all forms of discrimination against women on September 3, 1981, and by October 1986, 154 countries had consented to be bound by the Convention’s provisions, and

Whereas, the Convention provides a comprehensive framework for challenging various forces that have created and sustained gender-based discrimination against one-half of the world’s population, and

Whereas, the Convention banning discrimination against women guarantees women’s rights across many fields, including employment, education, voting, nationality, marriage and divorce, health care and equality before the law; and

Whereas, the state of Vermont shares the goals of the Convention, namely affirming faith in fundamental human rights, in the dignity and worth of all human beings and in the equal rights of women; and

Whereas, the state of Vermont has a history of supporting efforts to end gender-based employment discrimination and, in 1972, ratified the Equal Rights Amendment to the United States Constitution, and

Whereas, although women have made major gains throughout the 20th century in the struggle for equality in social, business, political, legal, health, educational and other fields, there remains much yet to be accomplished; and

Whereas, the state of Vermont recognizes that other countries still engage in practices of gender apartheid—many African countries practice female genital mutilation; Afghanistan’s Taliban militia does not permit women to work or even leave the confines of their homes unless accompanied by a close male relative, and are
WHEREAS, the extraordinary nature of the land and waters located in this wilderness area has been recognized by the 8th U.S. Circuit Court of Appeals as follows in its decision in State of Minnesota by Alexander v. Block, 449 F. Supp. 1223 (D. Minn. 1980), 660 F.2d 1240 (8th Cir. 1981), Cert. denied 431 U.S. 939 (1982):

“The Boundary Waters Canoe Area is the largest wilderness area east of the Rocky Mountains and west of our wilderness system. It is our Nation’s only lake-land canoe wilderness—a network of more than 1,000 lakes linked by hundreds of miles of streams and short portages which served as the highway of fur traders who followed water routes pioneered by Sioux and Chippewa Indians. Despite extensive logging, the BWCA still contains 540,000 acres of virgin forests, by far the largest such area in the eastern United States. . . .

“[T]his last remnant of the old ‘northwoods’ is remarkable not only for its lakes and virgin forests, but also for its wildlife. . . .

[Many] western wilderness areas lack such complete food chains. . . . The natural eco- system is a valuable biological and scientific resource; it has been the focal point of important research in wildlife behavior, forest ecology, nutrient cycles, lake systems, and vegetation history.”

WHEREAS, within this wilderness that contains a network of more than 1,000 lakes linked by hundreds of miles of streams and short portages and a land surface that is crowned with a forest which includes 540,000 acres of virgin or “old growth” timber that hosts unique plant and animal ecosystems such as that of the timber wolf, the state of Minnesota’s school grant and other lands are scattered in a checkerboard fashion across the entire area, a consequence of the fact that the lands were granted almost entirely in Sections 16 and 36 in most townships in the state of Minnesota located within the Superior National Forest area; now, therefore, be it

Resolved, That the Clerk of the House be directed to send a copy of this resolution to President Bill Clinton, Vice President Al Gore, U.S. Secretary of State Madeleine Albright, U.S. Senator Jesse Helms, Chair of the Senate Foreign Relations Committee and to each member of the Vermont Congressional Delegation.

POM-146. A joint resolution adopted by the Legislature of the State of Idaho relative to a national veterans cemetery in Idaho; to the Committee on Veterans’ Affairs.

WHEREAS, only one state in the nation without either a national veterans cemetery or a state veterans cemetery; and

WHEREAS, the majority of the states without a national cemetery are located in the Northwest; and

WHEREAS, only one of the six states bordering Idaho has a national cemetery; and

WHEREAS, centrally located is a regional cemetery in the Northwest; and

WHEREAS, it is fitting and proper that a grateful nation should provide a burial site within reasonable distance from the homes of those Idahoans and others residing in the northwestern states who honorably served their country in a time of emergency.

NOW, THEREFORE, Resolved, That the Clerk of the House be directed to send a copy of this resolution to President Bill Clinton, to Vice President Al Gore, to U.S. Senator Jesse Helms, to Chair of the Senate Foreign Relations Committee and to each member of the Vermont Congressional Delegation.

WHEREAS, in the 18 years since the federal congress held this discussion of the value of federal authority over state water, the only revenue earned on school and other state grant lands from wilderness users has been derived from a token campground reservation that is required to finance necessary campground maintenance and therefore adds nothing to the permanent school fund, the fund constitutionally established to support public schools of the state out of income derived from school and other grant land sale and natural resource management revenues; and

WHEREAS, continuance of state land ownership within the Boundary Waters Canoe Area Wilderness not only defeats the purpose for which the state school grant lands were granted and dedicated, it also unnecessarily handicaps federal management activities relating to the wilderness area; and

WHEREAS, the Minnesota Constitution, articles XI, sections 8 and 10, provide that school and other grant lands may be sold only at public auction or exchanged; and

WHEREAS, continuation of federal land ownership within the Boundary Waters Canoe Area Wilderness through an exchange of Superior National Forest land that is located within the wilderness area would mutually benefit both the federal and state governments by simplifying federal wilderness area management activities through efficiencies arising from single land ownership and by enabling the state to properly manage its school trust land for the purposes for which these lands were granted and dedicated, as was first contemplated for these lands by the Minnesota legislature in the enactment of Laws 1917, chapter 448, which created the Minnesota state forests in the counties of Cook, Lake, and St. Louis, the first state forests established in Minnesota; and

WHEREAS, there appears, preliminarily, to be sufficient acreage of federal land that is located within the exterior boundaries of the Superior National Forest, exclusive of lands in the Boundary Waters Canoe Area Wilderness, to exchange for the high value state-owned school land and other land holdings located within the wilderness area and thereby by the Legislature of the State of Minnesota that Congress is requested to speedily enact laws that would expedite the exchange of federally owned land located within the Superior National Forest that lies outside of the Boundary Waters Canoe Area Wilderness for land owned by the state of Minnesota located within the Boundary Waters Canoe Area Wilderness, and Be It Further Resolved, That in its deliberations concerning this request, Congress is requested to be especially cognizant that the legal title of the state of Minnesota to its school and other grant lands located within this wilderness area has been preserved, relatively unaltered, since being separated by grant from the federal public domain at statehood, and that the state of Minnesota’s checkerboard land ownership pattern gives these lands a unique value to the state, the lands mandated by the state Constitution to exchange to federal land that is located part of what the 8th U.S. Circuit Court of Appeals recognized in State of Minnesota by Alexander v. Block as . . . our Nation’s only lake-land canoe wilderness characterized by more than 1,000 lakes linked by hundreds of miles of streams and short portages which served as the highway for fur traders . . .

Whereas, the state of Vermont recognizes the greatly increased interdependence of the people of this age of the global village and global telecommunications; and

WHEREAS, the state of Vermont enacted a joint resolution urging the United States Congress to consider ratifying the United Nations Convention on the Elimination of All Forms of Discrimination Against Women, and be it further

Resolved, That the Clerk of the House be directed to send a copy of this resolution to President Bill Clinton, Vice President Al Gore, U.S. Secretary of State Madeleine Albright, U.S. Senator Jesse Helms, Chair of the Senate Foreign Relations Committee and to each member of the Vermont Congressional Delegation.

POM-147. A joint resolution adopted by the Legislature of the State of Minnesota relative to the Superior National Forest; to the Committee on Energy and Natural Resources.

WHEREAS, pursuant to the Organic, Enabling Act authorizing the establishment of the state of Minnesota, on an equal footing with the original 13 states, and the Constitution of Minnesota, by which the citizens of Minnesota were granted the restrictions of the Enabling Act, the ownership of navigable waters and their beds was transferred to the state of Minnesota, all as described in detail in Minnesota Statutes, section 1.0451, subdivision 1; and

WHEREAS, approximately 100,000 acres of state-owned land (mostly school grant land) and approximately 172,000 acres of state-owned waters, or a total of over 272,000 state-owned acres, make up one-quarter of the 1,078,000 acres within that portion of the Superior National Forest that has been designated by Congress as the Boundary Waters Canoe Area Wilderness; and

WHEREAS, consolidation of federal land ownership within the Boundary Waters Canoe Area Wilderness through an exchange of Superior National Forest land that is located within the wilderness area would mutually benefit both the federal and state governments by simplifying federal wilderness area management activities through efficiencies arising from single land ownership and by enabling the state to properly manage its school trust land for the purposes for which these lands were granted and dedicated, as was first contemplated for these lands by the Minnesota legislature in the enactment of Laws 1917, chapter 448, which created the Minnesota state forests in the counties of Cook, Lake, and St. Louis, the first state forests established in Minnesota; and

WHEREAS, the state of Vermont recognizes the greatly increased interdependence of the people of this age of the global village and global telecommunications; and

WHEREAS, the state of Vermont enacted a joint resolution urging the United States Congress to consider ratifying the United Nations Convention on the Elimination of All Forms of Discrimination Against Women, and be it further

Resolved, That the Clerk of the House be directed to send a copy of this resolution to President Bill Clinton, Vice President Al Gore, U.S. Secretary of State Madeleine Albright, U.S. Senator Jesse Helms, Chair of the Senate Foreign Relations Committee and to each member of the Vermont Congressional Delegation.

POM-148. A joint resolution adopted by the Legislature of the State of Idaho relative to a national veterans cemetery in Idaho; to the Committee on Veterans’ Affairs.

WHEREAS, only one state in the nation without either a national veterans cemetery or a state veterans cemetery; and

WHEREAS, the majority of the states without a national cemetery are located in the Northwest; and

WHEREAS, only one of the six states bordering Idaho has a national cemetery; and

WHEREAS, centrally located is a regional cemetery in the Northwest; and

WHEREAS, it is fitting and proper that a grateful nation should provide a burial site within reasonable distance from the homes of those Idahoans and others residing in the northwestern states who honorably served their country in a time of emergency.

NOW, THEREFORE, Resolved, That the Clerk of the House be directed to send a copy of this resolution to President Bill Clinton, Vice President Al Gore, U.S. Secretary of State Madeleine Albright, U.S. Senator Jesse Helms, Chair of the Senate Foreign Relations Committee and to each member of the Vermont Congressional Delegation.

POM-149. A joint resolution adopted by the Legislature of the State of Minnesota relative to the Superior National Forest; to the Committee on Energy and Natural Resources.
WHEREAS, Montana's Congressional Delegation.

CONGRESSIONAL RECORD—SENATE

June 8, 1999

11897

WHEREAS, the western states have developed a customized system of water allocation under the prior appropriation doctrine in response to the arid conditions of the region; and

WHEREAS, water resources in many of the major interstate river basins in the West are apportioned and administered through inter-state and other compacts or court decrees; and

WHEREAS, the western states have extensive experience in managing water resources, including reservoirs, rivers, streams, lakes, and wetlands, and recognize the importance of protecting their water resources for present and future beneficial uses; and

WHEREAS, western states have a system of law for allocation of water rights, and there is broad consensus within the federal system that states should continue to have jurisdiction over water rights; and

WHEREAS, state water law provides for public participation and is based upon the allocation, transfer, and protection of water resources in the public interest; and

WHEREAS, the number of federal agencies involved in some aspect of water policy or management continues to increase, adding duplication, confusion, and conflicting missions to the historic state systems; and

WHEREAS, the U.S. Congress often considers legislation related to water management, some of which contains elements that could increase the federal role in water administration and conflict with the state's responsibility for water programs; now

Resolved by the Senate and the House of Representatives of the State of Montana, That the Montana's Congressional Delegation be respectfully requested to advocate to the appropriate federal agencies that any new or revised federal legislation or policy should:

1) Recognize that water resources administration, management, and protection are primarily the responsibility of the states and that federal policy should be supportive of this role of the western states; and

2) Provide federal agencies with the flexibility to continue to develop and refine water resource programs appropriate for their own circumstances, taking into consideration items such as hydrology, existing water rights, potential development of the area, interstate and other compact obligations, and the public interest;

3) Require all federal agencies to conduct their activities in accordance with, and in support of, state water resource programs and state water law; and

4) Recognize and cooperate with the states' prerogative and ability to manage, administer, and develop their water resources; be it

Further Resolved, That the Secretary of State send copies of this resolution to the President of the United States, the Vice President of the United States, the President Pro Tempore of the Senate of the U.S. Congress, the Speaker of the House of Representatives, the Governor of Montana, the Speaker of the House of Representatives, the President and the Secretary of the United States House of Representatives, the Lieutenant Governors of the Western States, the Western Governors' Association, and the Montana Congressional Delegation.

POM–150. A resolution adopted by the Council of the City of Midland, Texas relative to incentives for the oil and gas industry; to the Committee on Energy and Natural Resources.

POM–151. A resolution adopted by the Council of the City of Midland, Texas relative to incentives for the oil and gas industry; to the Committee on Energy and Natural Resources.

POM–152. A resolution adopted by the Legislature of Montana relative to water resource policies and issues; to the Committee on Energy and Natural Resources.

POM–153. A joint resolution adopted by the Legislature of the State of Idaho relative to the Federal Land and Water Conservation Fund; to the Committee on Energy and Natural Resources.

POM–154. A joint resolution adopted by the Legislature of the State of Montana relative to funding of payments in lieu of taxes on federal land in Montana; to the Committee on Energy and Natural Resources.

POM–155. A joint resolution adopted by the Legislature of the State of Idaho relative to the Federal Land and Water Conservation Fund; to the Committee on Energy and Natural Resources.

POM–156. A resolution adopted by the Council of the City of Midland, Texas relative to incentives for the oil and gas industry; to the Committee on Energy and Natural Resources.

POM–157. A joint resolution adopted by the Legislature of the State of Montana relative to the water resource policies and issues; to the Committee on Energy and Natural Resources.
Whereas, the elimination of Federal Land and Water Conservation Fund allocations has adversely affected Idaho’s outdoor recreation infrastructure, greatly reducing the ability of Idaho’s cities and counties to meet the needs of our rapidly increasing populations, and created a backlog of upgrades, repairs and repairs to outdoor recreation facilities exceeding $270 million; and

Whereas, outdoor recreation provides important economic, social, personal, and recreational benefits to the citizens of Idaho; and

Whereas, it has been determined that four out of every five Americans utilize local and state government recreation and park services; and

Whereas, outdoor recreation reduces crime by providing positive alternatives and experiences for Idaho’s citizens; and

Whereas, the United States Congress is currently considering various bills and amendments concerning statewide funding for the Federal Land and Water Conservation Fund generated from Outer Continental Shelf oil royalties; Now, therefore, be it

Resolved by the members of the First Regular Session of the Fifty-Fifth Idaho Legislature, the House of Representatives and the Senate concurring therein, that the Congress of the United States, through legislation reallocating funding to the states from the Federal Land and Water Conservation Fund, be it

Further Resolved, That the Chief Clerk of the House of Representatives be, and she is hereby authorized and directed to forward a copy of this Memorial to the President of the Senate and the Speaker of the House of Representatives of Congress, and the congressional delegation representing the State of Idaho in the Congress of the United States.

POM–156. A joint resolution adopted by the Legislative Assembly of the State of Idaho relative to the stabilization of payments of the United States Forest Service; to the Committee on Energy and Natural Resources.

Whereas, stabilizing payments required by the 1908 Forest Service law is essential for responsible fiscal planning by the counties; now, therefore, be it

Resolved by the members of the First Regular Session of the Fifty-Fifth Idaho Legislature, the House of Representatives and the Senate concurring therein, that the Congress of the United States Forest Service to county governments through the state treasurer and urge our congressional delegation representing the State of Idaho in the Congress of the United States to support legislation that will stabilize payments made by the United States Forest Service to the counties of the state of Idaho; be it

Further resolved, That the Chief Clerk of the House of Representatives be, and she is hereby authorized and directed to forward a copy of this Memorial to the President of the Senate and the Speaker of the House of Representatives of Congress, and the congressional delegation representing the state of Idaho in the Congress of the United States.

POM–157. A resolution adopted by the Council of the City of Inkster, Michigan relative to state and local land use zoning authority; to the Committee on the Judiciary.
CONGRESSIONAL RECORD—SENATE

POM–158. A joint resolution adopted by the Senate on the floor of the Senate relative to the Illegal Immigration Reform and Immigration Responsibility Act of 1996; to the Committee on the Judiciary.

SENATE JOINT RESOLUTION No. 19

Whereas, The economy of the State of Nevada depends on international travel; and
Whereas, Canada and Mexico rank No. 1 and No. 7, respectively, among Nevada’s sources of international tourism, sending more than 1.5 million Canadian visitors and more than 104,000 Mexican visitors to this state per year; and
Whereas, Visitors from Canada and Mexico comprise a major economic contribution to the State of Nevada; and
Whereas, The United States has entered into international travel agreements with its neighbors, Canada and Mexico, to foster, encourage and stimulate the exchange of goods and products for mutual economic gain; and
Whereas, The United States does not currently require departing tourists returning to Canada and Mexico to be stopped and identified at border crossings; and
Whereas, The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 requires that a new entry-exit control system be implemented to track all comings and goings of and leaving the United States but does not provide any law enforcement benefits; and
Whereas, The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 would impose new border inspection requirements for the gathering of data at entry and departure points for vehicular traffic from Canada and Mexico where none currently exist; and
Whereas, The new border entry-exit system does not provide for any enhancement of provisions for apprehending or removing illegal immigrants, drug traffickers, terrorists or other criminals and would not curtail illegal immigration at the borders; and
Whereas, No inspection stations or other facilities for departing foreign travelers have been constructed; and
Whereas, Any system that would be implemented at enormous expense to the taxpayers of the United States with no tangible benefits; and
Whereas, Congress has held hearings at various sites along the Canadian border to consider exempting that country from the provisions of the Act, but no such hearings have been held or are scheduled in the Mexican border states; and
Whereas, Mexican and Canadian tourists who enter the United States for business and recreational travel are not immigrants; and
Whereas, These nonimmigrant Mexican and Canadian business and leisure travelers who will already be required to present travel documents to enter the United States, would be subjected to inspections and queries upon departure that would cause travel delays and inconveniences to those tourists; and
Whereas, Such delays and inconveniences would discourage tourism in the United States by Mexican and Canadian citizens, delay commerce and create an economic downturn; and
Whereas, The borders with Canada and Mexico should be kept reasonably free of governmental over-involvement in order to encourage tourism, trade and legitimate economic activity that benefit all three countries; and
Whereas, The National Governors’ Association at its meeting in Washington in February 1998 determined that the entry-exit control system may have “unintended negative effects on international trade, tourism and the economy”; and
Whereas, The National Governors’ Association urged suspension of implementation of the entry-exit system; Congress and the President can ensure that any such system will not disrupt tourism, trade or other legitimate traffic entering the United States; and
Whereas, Congress passed legislation in October 1998 delaying imposition of the implementation of the provisions of Section 110 of the Illegal Immigration Reform and Immigration Responsibility Act of 1996; and be it further
Resolved, That Congress is hereby urged permanently to mitigate the consequences of the provisions of Section 110 of the Illegal Immigration Reform and Immigration Responsibility Act of 1996; and be it further
Resolved, That Congress is encouraged to keep the borders between the United States and Canada and Mexico reasonably free of governmental over-involvement and to impose no new restrictions until infrastructure is available that can collect data and detect illegal and unwanted immigration without disrupting legitimate tourist travel; and be it further
Resolved, That the Secretary of the Senate prepare and transmit a copy of this resolution to the Vice President of the United States in the capacity of the President of the Senate, the Speaker of the House of Representatives of the United States and each member of the Nevada Congressional Delegation; and be it further
Resolved, That this resolution becomes effective upon passage and approval.

POM–159. A resolution adopted by the Senate of the State of Michigan relative to prayer in public schools; to the Committee on the Judiciary.

SENATE RESOLUTION No. 55

Whereas, The 48th Annual National Day of Prayer was observed on May 6, 1999, and the United States was founded by men and women with varied religious beliefs and ideals; and
Whereas, The First Amendment to the United States Constitution states that “Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof,” which means that the government is prohibited from establishing a state religion. However, no barriers shall be erected against the practice of any religion; and
Whereas, The establishment clause of the First Amendment was not drafted to protect Americans from religion, rather, its purpose was clearly to protect Americans from government mandates with respect to religion; and
Whereas, The Michigan Legislature strongly believes in a right to voluntary, individual, unorganized, and non-mandated prayer in public schools is an important element of religious choice guarantees included in the Constitution, and will reaffirm by law these religious rights and beliefs upon which the nation was founded; now, therefore, be it
Resolved by the Senate, That the members of this legislative body memorialize the Congress of the United States to strongly support voluntary, individual, unorganized, and non-mandatory prayer in the public schools of this nation; and be it further
Resolved, That a copy of this resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the Michigan congressional delegation.

POM–160. A resolution adopted by the St. Francis Assisi Parish of Houston, Texas relative to capital punishment; to the Committee on the Judiciary.

POM–161. A resolution adopted by the Episcopal Diocese of Washington, D.C. relative to hate crimes; to the Committee on the Judiciary.

POM–162. A joint resolution adopted by the Legislature of the State of Washington relative to the Land and Water Conservation Fund; to the Committee on Appropriations.

To the Honorable William J. Clinton, President of the United States, and to the President of the Senate and the Speaker of the House of Representatives, and to the Senate and House of Representatives of the United States, in Congress assembled:

Whereas, The borders with Canada and Mexico should be kept reasonably free of governmental over-involvement and to impose no new restrictions until infrastructure is available that can collect data and detect illegal and unwanted immigration without disrupting legitimate tourist travel; and be it further
Resolved, That Congress is hereby urged permanently to mitigate the consequences of the provisions of Section 110 of the Illegal Immigration Reform and Immigration Responsibility Act of 1996; and be it further
Resolved, That the Secretary of the Senate prepare and transmit a copy of this resolution to the Vice President of the United States as the presiding officer of the Senate, the Speaker of the House of Representatives of the United States, and each member of the Nevada Congressional Delegation; and be it further
Resolved, That this resolution becomes effective upon passage and approval.
for state projects has been entirely elimi-
nated.

Whereas, Washington and other states lack adequate, dedicated funding for fish and wildlife protection and management, espe-
cially for those species which are not hunted and fished and which are not listed as threat-
ened or endangered. In 1980, Congress passed the Fish and Wildlife Conservation Act (P.L. 96-366) which was intended to address the protection and management of nonhunted wildlife species, but the act was never fund-
ished, leaving the entire responsibility to the states.

Now, therefore, Your Memorialists respectfully
prayer that Congress pass legislation to
restore and revitalize federal funding for the
Land and Water Conservation Fund. Lands
shall be open for public use and enjoyment.
We pray that Congress create a new dedi-
cated fund for state-level fish and wildlife
management, which would be administered by
the United States fish and wildlife ser-
tice; be it

Resolved, That copies of this Memorial be
immediately transmitted to the Honorable
William J. Clinton, President of the United
States, the President of the United States
Senate, the Speaker of the House of Rep-
resentatives, and each member of Congress
from the State of Washington.

POM–163. A resolution adopted by the
Board of County Commissioners of Cuyahoga
County, Ohio relative to the Ryan White
Care Act; to the Committee on Appropria-
tions.

POM–164. A concurrent resolution adopted by
the Legislature of the State of Hawaii rel-
sive to the Social Security Act; to the Com-
mitee on Appropriations.

WHEREAS, the State of Alaska received an in-
crease in its Federal Medical Assistance
Percentage (FMAP) from 50 percent to 59.8
percent in consideration of the high cost of living in Alaska by an amendment to the Social
Security Act; and

WHEREAS, United States Senator Daniel K.
Akaka, United States Senator Daniel K. Inouye, United States Representative Neil Aber-
crombie, and United States Representative
Patsy T. Mink have recently introduced fed-
eral legislation in the United States Sen-
ate to amend the Social Secu-
rity Act to increase Hawaii’s FMAP in con-
sideration of Hawaii’s high cost of living; and

WHEREAS, federal financial participation for the
medicaid program is based on the FMAP
which is calculated according to a formula
based on per capita income in the individual
state in relation to the per capita income of the
United States; and

WHEREAS, the FMAP is calculated as the quotient
of the per capita income of the United States, times a multiplier, the state
income is determined as a designated portion
of the national income as determined at the
United States Department of Commerce, Bu-
reau of Economic Analysis (BEA) and the per
capita income of Hawaii is an amount that is
derived at the BEA as a portion of national
income statistics; and

WHEREAS, because of its island location and other
factors, the cost of living in Hawaii greatly exceeds the cost of living in the mainland states, so that per capita income is a poor
measure of the relative ability to bear the
cost of medical services; and

WHEREAS, a study conducted by the Taubman Center for State and Local Government
at Harvard University’s John F. Ken-
edy School of Government and the Office of
United States Senator Daniel Patrick Moya-
nihan, established that if per capita income is
measured without consideration of
living factors, Hawaii ranked 47th at $19,755 compared to the national average $23,231 and Alaska is ranked 39th with a real
per capita income of $20,734.

WHEREAS the Harvard/Mynnihan study
cites Hawaii with one of the highest poverty
rates in the nation—Hawaii ranks eighth in
poverty rate with 16.9 percent as compared to the national average of 14.7 percent—and on a per capita basis state
revenues and expenditures are far higher in
Hawaii than in the other 48 mainland states, but Alaska’s 10.6 percent poverty rate is lower than the national aver-
age, placing it 39th in the country; and

WHEREAS, Hawaii has not participated in the
economic rebound that has benefited
most of the rest of the nation in the past sev-
eral years, in part because of its heavy de-
pendence on international tourism and
trade, and Hawaii continues to suffer from
the drop in value in the Japanese yen, its un-
employment rate is above the national aver-
age, and its revenues have fallen short of
estimates; and

WHEREAS, based on Hawaii’s current med-
icaid spending level of approximately $700
million annually in additional federal funds;
and

WHEREAS, the State of Hawaii is seeking to
have its medicaid program funded in dollars
equal to its tax contributions based on its
higher per capita income and one that recog-
nizes it social costs, as was done for Alaska;
now, therefore, be it

Resolved by the House of Representatives of
the State of Hawaii, Regular Session of 1999
(—the Senate con-
curring), That this body hereby urges the
United States Congress, the President of the
United States, and the United States Sec-
retary of Health and Human Services to sup-
port United States Senator Daniel K. Akaka,
United States Senator Daniel K. Inouye, United States Representative Neil Aber-
crombie, and United States Representative
Patsy T. Mink’s federal legislation to amend
the Social Security Act to increase Hawaii’s
FMAP in consideration of our high cost of living; and be it further

Resolved by the House of Representatives of
the State of Hawaii, Regular Session of 1999
(—the Senate con-
curring), That this body hereby urges the
United States Congress, the President of the
United States, and the Secretary of the United States Department of Health and Human Services.

POM–165. A joint resolution adopted by the
Legislature of the State of Hawaii relative to
Social Security; to the Committee on Fin-
ance.

WHEREAS, the purpose of Social Security is
to provide a strong, simple and efficient
form of basic insurance against the adversi-
ties of old age, disability and dependency, and

WHEREAS, for 60 years Social Security has
provided a stable platform of retirement, dis-
ability and annuity benefits to protect working Americans and their depend-
ents, and

WHEREAS, to administer 150 million sepa-
rate Social Security accounts requires a
larger bureaucracy, and the resulting ex-
 pense and the cost of converting each ac-
count to an annuity upon retirement would
consume much of the profit or exacerbate the loss realized by each participant, and

WHEREAS, the question of whether part of
the Social Security Trust Fund should be di-
versified into investments other than gov-
ernment bonds so that, while still invested
collectively at low expense, returns may be increased, thus enhancing the capacity of the fund to meet its obligations to pay ben-
efits while spreading the risk across the en-
tire spectrum of Social Security partici-
ants, is entirely different from that of splin-
terizing its millions of accounts, and

WHEREAS, creating an array of winners and
losers would be contrary to the basic prin-
ciples of insurance and risk distribution, there
being no purpose in the use of this part of our
retirement system, and

WHEREAS, Congress amended the Internal
Revenue Code to provide a full menu of pro-
cedures that enables workers and their
employers to voluntarily contribute to
tax-sheltered accounts that are open to the
opportunities and exposed to the risks of in-
maturity; diversifying Social Security contribu-
tions to private accounts duplicates existing programs, and

JOINT HOUSE RESOLUTION 113

Joel H. Basch, President

June 8, 1999

CONGRESSIONAL RECORD—SENATE
June 8, 1999

Whereas, such recently created systems now endanger half of American families, now therefore be it

Resolved by the Senate and House of Rep- resentatives, That the General Assembly re spectively urges Congress not to enact laws that might tend to diminish or undermine a unified and stable Social Sec urity system, and be it further

Resolved, That laws to encourage workers and their employers to save or invest for re tirement should supplement and not sub stitute for the basic benefits of Social Sec urity for American working families, and be it further

Resolved, That the Secretary of State be directed to send a copy of this resolution to the President of the United States Senate, the Speaker of the House of Representatives of the United States and each member of the Vermont Congressional Delegation.

POM–166. A resolution adopted by the Council of the City of Oak Ridge, Tennessee relative to the reindustrialization of the East Tennessee Valley and the United States

POM–168. A joint resolution adopted by the Assembly of the State of Nevada relative to surface mining regulations; to the Committee on Energy and Natural Resources.

Whereas, Mining is of critical importance to Nevada and its rural communities as a significant contributor to this state’s economy; and

Whereas, The “Nevada model” of regulating the mining industry is known and respected industrywide because it balances the global needs for natural resources with related environmental concerns and the economic needs of private business, thereby resulting in an environmentally healthy state with a responsible mining industry that uses state-of-the-art technology; and

Whereas, Surface mining regulations governing hardrock mining operations and mineral exploration activities on public lands are codified in Part 3809 of Title 43 of the Code of Federal Regulations and are commonly referred to as “3809 Regulations”; and

Whereas, The Bureau of Land Management initiated the revision of these regulations in January 1997; and

Whereas, In response to concerns raised by the Western Governor’s Association and a group of 15 United States Senators, including Nevada Senators Harry Reid and Richard H. Bryan, Congress included language in the Omnibus Appropriations Act of 1998 to require a detailed, comprehensive study by the National Academy of Sciences and prohibits final revision of 43 C.F.R. Part 3809, the 3809 Regulations, before September 30, 1999; and

Whereas, The Nevada Legislature strongly supports Alternative 1, the “No Action” alternative, as described in the Draft Environmental Impact Statement on Surface Mining Regulations and Locatable Mineral Operations, to maintain the existing 3809 Regulations without revision or modification; and

Resolved, That the Chief Clerk of the Assembly prepare and transmit a copy of this resolution to the Vice President of the United States as the presiding officer of the Senate, the Speaker of the House of Representatives, the Secretary of the Interior and each member of the Nevada Congressional Delegation; and be it further

Resolved, That this resolution becomes effective upon passage and approval.

POM–169. A resolution adopted by the Legislative Council of the State of Nevada relative to the use of phosphide gas in grain storage and transportation; to the Committee on Agriculture, Nutrition, and Forestry.

LEGISLATIVE RESOLUTION 43

Whereas, Nebraska’s agricultural heritage and economy is dependent upon the harvest, storage, and transportation of grain; and

Whereas, there are 357 grain elevators with 663 million bushels of storage and 55,000 farms with 1.5 billion bushels of storage in Nebraska; and

Whereas, Nebraska grain elevators are valued neighbors to and located in close proximity to the public and busi nesses in most of all Nebraska’s communities; and

Whereas, Nebraska grain elevators, feed mills, processors, and growers are committed to protecting the health and safety of applic ators and workers and to the well-being of the public; and

Whereas, grain elevators are located in Nebraska communities near railroads and highways to facilitate the transportation of grain; and

Whereas, Nebraska is a leader in the nation and in the world in grain production; and

Whereas, Nebraska grain elevators, feed mills, processors, and growers are committed to producing an adequate, safe, and high quality food supply for domestic and world consumers; and

Whereas, treaties and established trade rela tions may require pest-controlled grain before grain can be exported; and

Whereas, insect pests in grain without fumigation and grain storage project to in crease parthenogenetic pests and the choice of other pheromones is limited to regulations that conform with the new requirements of the Bureau of Land Management or having the successful programs of the State of Nevada, which have been carefully tested and enforced over the years, simply cease to be operative on public lands, thereby imposing significantly detrimental impacts on the mineral industry and the State of Nevada; now, therefore, be it

Resolved, by the Assembly and Senate of the State of Nevada, Jointly, That the members of the 78th session of the Legislature hereby urge the Secretary of the Interior to comply with the intent of Congress as stated in the Omnibus Appropriations Act of 1998 which requires a study of the issue by the National Academy of Sciences and prohibits final revision of 43 C.F.R. Part 3809, the 3809 Regulations, before September 30, 1999; and

Resolved, by the Assembly and Senate of the State of Nevada, Jointly, That the General Assembly re

Resolved, by the Assembly and Senate of the State of Nebraska, as the presiding officer of the legislature of Nebraska, first session, and be it further

Resolved, That the Chief Clerk of the As sembly prepare and transmit a copy of this resolution to the Vice President of the United States as the presiding officer of the Senate, the Speaker of the House of Representatives, the Secretary of the Interior and each member of the Nevada Congressional Delegation; and be it further

Resolved, That the Congress of the United States direct the Federal Environmental Protection Agency to ensure that effective enforcement of the label restrictions on fumigants, ensures adequate training of certified applicators, and conducts a fumigation and grain storage project to inspect the use of fumigants; and

Whereas, the State of Nevada practices rigorous enforcement of the label restrictions on fumigants, ensures adequate training of certified applicators, and conducts a fumigation and grain storage project to inspect the use of fumigants; and

Resolved, That the Congress of the United States direct the Federal Environmental Protection Agency to ensure that effective enforcement of the label restrictions on fumigants, ensures adequate training of certified applicators, and conducts a fumigation and grain storage project to inspect the use of fumigants; and

Resolved, That the Chief Clerk of the Assembly prepare and transmit a copy of this resolution to the Vice President of the United States as the presiding officer of the Senate, the Speaker of the House of Representatives, the Secretary of the Interior and each member of the Nevada Congressional Delegation; and be it further

Resolved, That this resolution becomes effective upon passage and approval.

POM–170. A joint resolution adopted by the Legislature of the State of Colorado relative to a pay increase for Members of Congress; to the Committee on Foreign Relations.

SENATE JOINT MEMORIAL 99–005

Whereas, The twenty-seventh amendment to the constitution of the United States, also known as “The Madison Amendment”, pro vides that “No law varying the compensation for the services of the Senators and Representatives, shall take effect until an elec tion of Representatives shall have inter vened.”; and

Whereas, The twenty-seventh amendment requires that an intervening election be held between the enactment of any congressional pay increase and its subsequent application to any member of Congress; and

Whereas, The twenty-seventh amendment’s requirement for an intervening election is intended to allow voters in each state and congressional district to obtain direct information regarding salary increases prior to the reelection of incumbents or the election of others in their stead; and

Whereas, Salary increases for members of Congress are currently approved by “The Government Ethics Reform Act of 1989,” (“The Act”) pursuant to 2 U.S.C. sec. 31; and

Whereas, The Act gives members of Con gress an immediate one-time salary increase and, in subsequent years, an annual cost of living adjustment increase to salaries or pensions; and

Whereas, Such annual cost of living adjust ment is established in accordance with federal law and incorporated in an executive

Whereas, salaries for members of Congress are currently approved by “The Government Ethics Reform Act of 1989,” (“The Act”) pursuant to 2 U.S.C. sec. 31; and

Whereas, The Act gives members of Congress an immediate one-time salary increase and, in subsequent years, an annual cost of living adjustment increase to salaries or pensions; and

Whereas, Such annual cost of living adjust ment is established in accordance with federal law and incorporated in an executive

CONGRESSIONAL RECORD—SENATE 11901
order of the President in December of each year to establish salary increases that are put into effect on January 1 of the next year; and
Whereas, Through the automatic operation of the cost-of-living adjustment provisions, congressional salaries have been increased on the first day of January for several years; and
Whereas, Without the action of legislation, each Congress effectively and automatically enacts for itself a cost of living adjustment salary increase in violation of the seventeenth amendment; and
Whereas, When each year’s cost of living adjustment increase is paid on the following January 1 to members of Congress, former members, or spouses of deceased members without the process of an intervening election, the twenty-seventh amendment is violated; now, therefore be it
Resolved by the Senate of the Sixty-second General Assembly of the State of Colorado, (the House of Representatives concurring herein), That the General Assembly hereby expresses its opposition to automatic annual cost of living adjustment salary increases for members of Congress of the United States as violation of the twenty-seventh amendment to the United States Constitution and hereby memorializes the Congress to refrain from enacting any pay increase for members of Congress without an affirmative vote or that takes effect before the following Congress has been elected and fully sworn into office; and be it further
Resolved, That copies of this Memorial be sent to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to each member of the Congressional delegation representing the state of Colorado.

POM–171. A joint resolution adopted by the Legislature of the State of Washington relative to immigration laws, policies and practices; to the Committee on the Judiciary. House Joint Memorial 4015

To the Honorable William J. Clinton, President of the United States, and to the President of the Senate and the Speaker of the House of Representatives, and to the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:
Whereas, The Anti-Terrorism and Effective Death Penalty Act of 1996 (AEDPA) and the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA) represent the most dramatic changes in immigration law in more than 30 years; and
Whereas, These acts mandate that the Immigration and Naturalization Service (INS) arrest, detain, and deport large segments of the United States immigrant population and the implementation of these laws has had far-reaching effects, including unnecessary financial burdens on the state’s legal, social, and welfare systems; and
Whereas, The United States has long been known as a nation of immigrants, as a champion of human rights for all peoples, and as a country with justice and equality under the law among its highest ideals, especially equal justice under law; and
Whereas, Immigrant detainees may have been legal permanent residents who have lived almost their entire lives in the United States, served in the United States military, have a United States citizen spouse, or have United States citizen children.
Whereas, Detainees, including women and children, are frequently in INS custody for periods longer than seventy-two hours and are especially vulnerable within the INS system; and
Whereas, Families consisting of both legal and illegal family members are often divided causing not only emotional and psychological hardship when mothers are separated from their children, but also financial difficulties resulting in increased welfare rolls when primary wage earners are removed from their jobs.
Now, therefore, Your Memorialists respectfully pray that the President, the Congress, and the appropriate agencies continue to look closely at current immigration law and INS policies and practices, and that necessary changes be made so that problems surrounding immigration may be resolved as soon as possible; and be it
Resolved, That copies of this Memorial be immediately transmitted to the Honorable William J. Clinton, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, each member of Congress from the State of Washington, Doris Meissner, Commissioner of the Immigration and Naturalization Service, and Gary Locke, the Governor of the State of Washington.

REPORTS OF COMMITTEES

The following reports of committees were submitted:
By Mr. MURKOWSKI, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:
S. 323. A bill to redesignate the Black Canyon of the Gunnison National Monument as a national park and establish the Gunnison Gorge National Conservation Area, and for other purposes (Rept. No. 106–69).
By Mr. WARNER, from the Committee on Armed Services, without amendment:
S. 1009. A bill to provide appropriations for fiscal year 2000 for intelligence and intelligence-related activities of the United States Government, the Community Management, the Central Intelligence Agency Retirement and Disability System, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mrs. FEINSTEIN:
S. 1188. A bill to provide grants to State educational agencies and local educational agencies for the provision of classroom-related technology training for elementary and secondary school teachers; to the Committee on Health, Education, Labor, and Pensions.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. FEINSTEIN:
S. 1188. A bill to provide grants to State educational agencies and local educational agencies for the provision of classroom-related technology training for elementary and secondary school teachers; to the Committee on Health, Education, Labor, and Pensions.
changes they believe could most improve public education. Forty-five percent of the teachers surveyed said more technology training would greatly improve conditions for teaching and learning (CTA for the Next Century, 1998).

It is crucial that we given students the opportunity to become familiar with technology in their classrooms because post-high school education and most good jobs require experience using computers. U.S. Commerce Secretary William M. Daley has said, “Opportunities are now dependent upon a person’s ability to use computers and engage in using the Internet” (CQ Weekly, “Digital Haves and Have Nots,” April 17, 1999). In my state, a 1997 Rand report found that there is currently a shift in the state’s economy away from manufacturing and toward higher-skill service and technology industries, and employers are placing a higher premium on the computer skills necessary for these positions (Immigration in a Changing Economy, Rand, 1997). Students are better educated when their teachers are well trained. We cannot prepare students for the increasingly technological workplace without trained teachers.

We have made great efforts to make technology available to students in their classrooms, and now we have a national student to computer ratio of 10 to 1. Seventy-eight percent of our nation’s schools have Internet access. These are good first steps.

But also essential is having teachers and students use all this technology in their day-to-day classroom activities when it can enhance learning. This will not happen until teachers are trained in how to include technology in their instruction.

One teacher expressed her frustration in an article in the National School Boards Association’s Electronic School magazine:

Most teachers have no model to show them the advantages of hooking up to the projects available on the Internet. And shrinking school budgets don’t provide nearly enough money to train teachers in new or visionary techniques. Meanwhile, we can’t escape the magazine and newspaper articles touting the Information Superhighway and heralding new ways of responding to, using, and learning information in our society. Well who most needs to learn to traverse this road successfully? Society future leaders—and their teachers (Electronic School, “Going Global,” February 1996).

I agree.

Our teachers are not prepared to use technology in their classrooms. Students need to learn to use modern technology and it can help them learn. If we are expecting teachers to use up-to-date teaching tools, we must train them to do so. This bill will provide some of the funds needed to do that.

By introducing this bill I am not suggesting that technology is a cure-all for the problems in our schools. Technology is one of many teaching and learning tools. It can bring some efficiencies to learning, for example, providing a new way to do math and spelling drills or keeping students engaged in learning while a teacher works with other students who need extra help. It can also be an important research tool by providing easy access to information that, without a computer, is not easily available.

We expect a great deal from our teachers and students. We must give them the resources they need. This bill is one step.

### ADDITIONAL COSPONSORS

S. 37

At the request of Mr. GRASSLEY, the name of the Senator from Kansas (Mr. ROBERTS) was added as a cosponsor of S. 37, a bill to amend title XVIII of the Social Security Act to repeal the restriction on payment for certain hospital discharges to post-acute care imposed by section 1877 of the Balanced Budget Act of 1997.

S. 216

At the request of Mr. MOYNIHAN, the name of the Senator from Florida (Mr. MACK) was added as a cosponsor of S. 216, a bill to amend the Internal Revenue Code of 1986 to repeal the limitation on the use of foreign tax credits under the alternative minimum tax.

S. 296

At the request of Mr. FRIST, the name of the Senator from Kentucky (Mr. BUNNING) was added as a cosponsor of S. 296, a bill to provide for continuation of the Federal research investment in a fiscally sustainable way, and for other purposes.

S. 337

At the request of Mr. HUTCHINSON, the name of the Senator from Kansas (Mr. BROWNBACK) was added as a cosponsor of S. 337, a bill to preserve the balance of rights between employers, employees, and labor organizations which is fundamental to our system of collective bargaining while preserving the rights of workers to organize, or otherwise engage in concerted activities protected under the National Labor Relations Act.

S. 345

At the request of Mr. ALLARD, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 345, a bill to amend the Animal Welfare Act to remove the limitation that permits interstate movement of live birds, for the purpose of fighting, to States in which animal fighting is lawful.

S. 348

At the request of Ms. SNOWE, the name of the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 348, a bill to authorize and facilitate a program to enhance training, research and development, energy conservation and efficiency, and consumer education in the oilheat industry for the benefit of oilheat consumers and the public, and for other purposes.

S. 459

At the request of Mr. BREAUX, the name of the Senator from New York (Mr. SCHUMER) was added as a cosponsor of S. 459 a bill to amend the Internal Revenue Code of 1986 to increase the State ceiling on private activity bonds.

S. 512

At the request of Mr. GORTON, the name of the Senator from Delaware (Mr. ROTH) was added as a cosponsor of S. 512, a bill to amend the Public Health Service Act to provide for the expansion, intensification, and coordination of the activities of the Department of Health and Human Services with respect to research on autism.

S. 541

At the request of Ms. COLLINS, the name of the Senator from South Dakota (Mr. DASCHLE) was added as a cosponsor of S. 541, a bill to amend title XVIII of the Social Security Act to make certain changes related to payments for graduate medical education under the medicare program.

S. 600

At the request of Mr. FEINGOLD, the name of the Senator from Vermont (Mr. JEFFORDS) was added as a cosponsor of S. 590, a bill to amend the Internal Revenue Code of 1986 to repeal the percentage depletion allowance for certain hardrock mines, and for other purposes.

S. 600

At the request of Mr. WELLSTONE, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 600, a bill to combat the crime of international trafficking and to protect the rights of victims.

S. 625

At the request of Mr. GRASSLEY, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 625, a bill to amend title 11, United States Code, and for other purposes.

S. 632

At the request of Mr. DEWINE the name of the Senator from Wyoming (Mr. ENZI) was added as a cosponsor of S. 632, a bill to provide assistance for poison prevention and to stabilize the funding of regional poison control centers.

S. 642

At the request of Mr. GRASSLEY, the name of the Senator from Georgia (Mr. COVERDAEL) was added as a cosponsor of S. 642, a bill to amend the Internal Revenue Code of 1986 to provide for Farm and Ranch Risk Management Accounts, and for other purposes.

S. 659

At the request of Mr. MOYNIHAN, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 659, a bill to amend the
Internal Revenue Code of 1986 to require pension plans to provide adequate notice to individuals whose future benefit accruals are being significantly reduced, and for other purposes.

At the request of Mr. Chafee, the name of the Senator from Montana (Mr. Baucus) was added as a cosponsor of S. 664, a bill to amend the Internal Revenue Code of 1986 to provide a credit against income tax to individuals who rehabilitate historic homes or who are the first purchasers of rehabilitated historic homes for use as a principal residence.

At the request of Mr. Chafee, the name of the Senator from Nevada (Mr. Bryan) was added as a cosponsor of S. 664, a bill to amend the Internal Revenue Code of 1986 to provide a credit against income tax to individuals who rehabilitate historic homes or who are the first purchasers of rehabilitated historic homes for use as a principal residence.

At the request of Mr. Craig, the name of the Senator from South Carolina (Mr. Thurmond) was added as a cosponsor of S. 740, a bill to amend the Federal Power Act to improve the hydroelectric licensing process by granting the Federal Energy Regulatory Commission statutory authority to better coordinate participation by other agencies and entities, and for other purposes.

At the request of Mr. Leahy, the name of the Senator from Virginia (Mr. Robb) was added as a cosponsor of S. 751, a bill to combat nursing home fraud and abuse, increase protections for victims of telemarketing fraud, enhance safeguards for pension plans and health care benefit programs, and enhance penalties for crimes against seniors, and for other purposes.

At the request of Mr. Fitzgerald, the names of the Senator from Montana (Mr. Burns), the Senator from Alaska (Mr. Stevens), the Senator from Minnesota (Mr. Grams), the Senator from Alabama (Mr. Sessions), and the Senator from Illinois (Mr. Durbin) were added as cosponsors of S. 777, a bill to require the Department of Agriculture to establish an electronic filing and retrieval system to enable the public to file all required paperwork electronically with the Department and to have access to public information on farm programs, quarterly trade, economic, and production reports, and other similar information.

At the request of Mr. Rockefeller, the names of the Senator from Michigan (Mr. Abraham) and the Senator from Iowa (Mr. Grassley) were added as cosponsors of S. 784, a bill to establish a demonstration project to study and provide coverage of routine patient care costs for medicare beneficiaries with cancer who are enrolled in an approved clinical trial program.

At the request of Mr. Inhofe, the names of the Senator from Kansas (Mr. Roberts) and the Senator from South Dakota (Mr. Johnson) were added as cosponsors of S. 860, a bill to amend the Clean Air Act to remove flammable fuels from the list of substances with respect to which reporting and other activities are required under the risk management plan program.

At the request of Mr. Baucus, the names of the Senator from Alaska (Mr. Murkowski) and the Senator from Washington (Mr. Gorton) were added as cosponsors of S. 897, a bill to provide matching grants for the construction, renovation and repair of school facilities in areas affected by Federal Activities, and for other purposes.

At the request of Mr. Domenici, the name of the Senator from Massachusetts (Mr. Kennedy) was added as a cosponsor of S. 951, a bill to amend the Internal Revenue Code of 1986 to establish a permanent tax incentive for research and development, and for other purposes.

At the request of Mr. Jeffords, the name of the Senator from California (Mrs. Boxer) was added as a cosponsor of S. 1003, a bill to amend the Internal Revenue Code of 1986 to provide increased tax incentives for the purchase of alternative fuel and electric vehicle, and for other purposes.

At the request of Mr. Jeffords, the name of the Senator from Florida (Mr. Macc) was added as a cosponsor of S. 1010, a bill to amend the Internal Revenue Code of 1986 to provide for a medical innovation tax credit for clinical testing research expenses attributable to academic medical centers and other qualified hospital research organizations.

At the request of Mr. Moynihan, the names of the Senator from Maryland (Ms. Mikulski) and the Senator from Oregon (Mr. Smith) were added as cosponsors of S. 1023, a bill to amend title XVIII of the Social Security Act to stabilize indirect graduate medical education payments.

At the request of Mr. Rockefeller, the name of the Senator from Vermont (Mr. Jeffords) was added as a cosponsor of S. 1067, a bill to promote the adoption of children with special needs.

At the request of Mr. Torricelli, the name of the Senator from Maryland (Ms. Mikulski) was added as a cosponsor of S. 1066, a bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to encourage the use of and research into agricultural best practices to improve the environment, and for other purposes.

At the request of Mr. Rockefeller, the name of the Senator from Vermont (Mr. Jeffords) was added as a cosponsor of S. 1066, a bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to encourage the use of and research into agricultural best practices to improve the environment, and for other purposes.

At the request of Mr. Rockefeller, the name of the Senator from Vermont (Mr. Jeffords) was added as a cosponsor of S. 1066, a bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to encourage the use of and research into agricultural best practices to improve the environment, and for other purposes.

At the request of Mr. Rockefeller, the name of the Senator from Vermont (Mr. Jeffords) was added as a cosponsor of S. 1066, a bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to encourage the use of and research into agricultural best practices to improve the environment, and for other purposes.

At the request of Mr. Rockefeller, the name of the Senator from Vermont (Mr. Jeffords) was added as a cosponsor of S. 1066, a bill to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to encourage the use of and research into agricultural best practices to improve the environment, and for other purposes.
CONGRESSIONAL RECORD—SENATE

June 8, 1999

S. 1150

At the request of Mr. Hatch, the name of the Senator from Connecticut (Mr. Lieberman) and the Senator from Maine (Ms. Snowe) were added as co-sponsors of S. 1150, a bill to amend the Internal Revenue Code of 1986 to more accurately codify the depreciable life of semiconductor manufacturing equipment.

S. 1177

At the request of Mr. Harkin, the name of the Senator from North Dakota (Mr. Dorgan) was added as a co-sponsor of S. 1177, a bill to amend the Food Security Act of 1985 to permit the harvesting of crops on land subject to conservation reserve contracts for recovery of biomass used in energy production.

S. 1187

At the request of Mr. Dorgan, the name of the Senator from Nebraska (Mr. Hagel) was added as a co-sponsor of S. 1187, a bill to require the Secretary of the Treasury to mint coins in commemoration of the bicentennial of the Lewis and Clark Expedition, and for other purposes.

SENATE RESOLUTION 34

At the request of Mr. Torricelli, the names of the Senator from Delaware (Mr. Roth) and the Senator from Maine (Ms. Collins) were added as cosponsors of Senate Resolution 34, a resolution designating the week beginning April 30, 1999, as “National Youth Fitness Week.”

SENATE RESOLUTION 59

At the request of Mr. Lautenberg, the names of the Senator from Maine (Ms. Snowe), the Senator from Oklahoma (Mr. Smith), the Senator from South Carolina (Mr. Thurmond), and the Senator from Nevada (Mr. Bayh) were added as cosponsors of Senate Resolution 59, a resolution designating both July 2, 1999, and July 2, 2000, as “National Literacy Day.”

AMENDMENTS SUBMITTED

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2000

BOXER (AND OTHERS) AMENDMENT NO. 541

Mrs. Boxer (for herself, Mr. Harkin, Mr. Wyden, and Mr. Feingold) proposed an amendment to the bill (S. 1122) making appropriations for the Department of Defense for the fiscal year ending September 30, 2000, and for other purposes; as follows:

Strike section 8106, and insert the following:

SEC. 8106. Not later than March 1, 2000, the Secretary of Defense shall submit to Congress a report on the inventory and status of operational support aircraft, Commander-in-Chief support aircraft, and command support aircraft of the Department of Defense. The report shall include a detailed discussion of the requirements for such aircraft, the foreseeable future requirements for such aircraft, the cost of leasing such aircraft, commercial alternatives to use of such aircraft, the cost of maintaining the aircraft, the capability and appropriateness of the aircraft to fulfill mission requirements, and the relevancy of the missions of the aircraft to warfighting requirements.

STEVENS AMENDMENT NO. 542

Mr. Stevens proposed an amendment to the bill, S. 1122, supra; as follows:

In the appropriate place in the bill, insert the following new section:

“Sec. In addition to any funds appropriated elsewhere in Title IV of this Act under the heading “Research, Development, Test and Evaluation, Army”, $9,000,000 is hereby appropriated only for the Army Test Ranges and Facilities program element.”

STEVENS AMENDMENT NO. 543

Mr. Stevens proposed an amendment to the bill, S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following:

Sec. . Notwithstanding any other provision in this Act, the total amount appropriated in this Act for Title IV under the heading “Research, Development, Test, and Evaluation, Navy”, is hereby reduced by $26,680,000 and the total amount appropriated in this Act for Title IV under the heading “Research, Development, Test, and Evaluation, Defense-Wide”, is hereby increased by $51,680,000 to reflect the transfer of the Joint Warfighting Experimentation Program to the Joint Chiefs of Staff reports to the Congressional defense committees on the role and participation of all unified and specified commands in the JWEP.

STEVENS AMENDMENT NO. 544

Mr. Stevens proposed an amendment to the bill, S. 1122, supra; as follows:

In the appropriate place in the bill, insert the following new section:

Sec. In addition to the amounts appropriated or otherwise made available elsewhere in this Act for the Department of Defense, $23,000,000, to remain available until September 30, 2000, is hereby appropriated to the Department of Defense: Provided, that the Secretary of Defense shall make a grant in the amount of $23,000,000 to the American Red Cross for Armed Forces Emergency Services.

STEVENS AMENDMENT NO. 545

Mr. Stevens proposed an amendment to the bill, S. 1122, supra; as follows:

At the appropriate place in the bill insert the following:

Sec. In addition to the funds available in Title III, $10,000,000 is hereby appropriated for U-2 cockpit modifications.

DOMENICI AMENDMENT NO. 546

(Ordered to lie on the table.)

Mr. Domenici submitted an amendment intended to be proposed by him to the bill (S. 96) to regulate commerce between and among the several States by providing for the orderly resolution of disputes arising out of computer-based problems related to processing data that includes a 2-digit expression of that year’s date; as follows:

At the appropriate place, insert the following:

SEC. WAIVER OF SOVEREIGN IMMUNITY FOR A Y2K ACTION.

(b) JURISDICTION AND REVIEW.—The United States, when a party to any Y2K action—

(1) shall be deemed to have waived any right to plead that it is not amenable there- to by reason of its sovereignty;

(2) shall be subject to judgments, orders, and decrees of the court having jurisdiction; and

(3) may obtain review thereof, in the same manner and to the same extent as a private individual under like circumstances.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2000

BIDEN (AND OTHERS) AMENDMENT NO. 547

Mr. Biden (for himself, Mr. Schumer, and Mr. Edwards) proposed an amendment to the bill, S. 1122, supra; as follows:

On page 107, between lines 12 and 13, insert the following:

SBC. Of the funds appropriated in title IV under the heading “Research, Development, Test, and Evaluation, Air Force”, $63,041,000 shall be available for C-5 aircraft modernization.

GREGG AMENDMENT NO. 548

Mr. Gregg proposed an amendment to the bill, S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following new section:

SEC. PROHIBITION ON USE OF REFUGEE RELIEF FUNDS FOR LONG-TERM REGIONAL DEVELOPMENT OR RECONSTRUCTION IN SOUTHEASTERN EU-

REGIONAL DEVELOPMENT OR RECONSTRUCTING IN SOUTHEASTERN EU-

None of the funds made available in the 1999 Emergency Supplemental Appropriations Act (Public Law 106–31) for emergency support of refugees and displaced persons and the local communities directly affected by the influx of refugees may be made available to implement a long-term, regional program of development or reconstruction in Southeastern Europe except pursuant to specific statutory authorization enacted on or after the date of enactment of this Act.

BYRD AMENDMENTS NOS. 549–550

Mr. Byrd proposed two amendments to the bill, S. 1122, supra; as follows:

AMENDMENT NO. 549

On page 107, between lines 12 and 13, insert the following:
Mr. STEVENS (for Mr. NICKLES) proposed an amendment to the bill, S. 1122, supra, as follows:

At the appropriate place in the bill, insert the following:

None of the funds appropriated or otherwise made available by this or any other act may be made available for reconstruction activities in the Republic of Serbia (excluding the province of Kosovo) as long as Slobodan Milosevic remains the President of the Federal Republic of Yugoslavia (Serbia and Montenegro).

Mr. STEVENS (for Mr. INHOFE) proposed an amendment to the bill, S. 1122, supra, as follows:

SEC. 1117. Of the funds appropriated in title II under the heading “OTHER PROCUREMENT, ARMY”, up to $250,000 shall be available for the Air Force Procurement account for on-going work in recombinant vaccine research against biological warfare agents.

Mr. STEVENS (for Mr. MACK) proposed three amendments to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 553

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. MACK) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 554

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. MACK) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 555

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. MACK) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 556

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. MACK) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 557

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. MACK) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 558

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. MACK) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 559

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. BENNETT) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 560

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. BENNETT) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 561

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. BENNETT) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 562

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. BENNETT) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 563

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. BENNETT) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 564

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. BENNETT) proposed an amendment to the bill, S. 1122, supra, as follows:

AMENDMENT NO. 565

At the appropriate place in the bill, insert the following:

Mr. STEVENS (for Mr. LAUTENBERG) proposed an amendment to the bill, S. 1122, supra, as follows:
At the end of the general provisions, add the following:

SEC. 8109. (a) The purpose of this section is to provide means for the City of Bayonne, New Jersey, to furnish fire protection through the Secretary’s municipal fire department for the tenants, including the Coast Guard, and property at Military Ocean Terminal, New Jersey, thereby enhancing the City’s capability and furnishing safety services that is a fundamental capability necessary for encouraging the economic development of Military Ocean Terminal.

(b) The Secretary of the Army may, notwithstanding title II of the Federal Property and Administrative Services Act of 1949, convey without consideration to the Bayonne Local Redevelopment Authority, Bayonne, New Jersey, and to the City of Bayonne, New Jersey, jointly, all right, title, and interest of the United States in and to the firefighting equipment described in subsection (c).

(c) The equipment to be conveyed under subsection (b) is firefighting equipment at Military Ocean Terminal, Bayonne, New Jersey, as follows:

(2) Pierce Arrow 100-foot Tower Ladder, manufactured February 1994.

(3) Pierce HAZMAT truck, manufactured 1993.

(d) The conveyance and delivery of the property shall be at no cost to the United States.

(e) The Secretary may require such additional terms and conditions in connection with the conveyance under this section as the Secretary considers appropriate to protect the interests of the United States.

BIDEN AMENDMENT NO. 566
Mr. STEVENS (for Mr. BIDEN) proposed an amendment to the bill S. 1122, supra; as follows:

At the end of the general provisions, add the following:

SEC. 8109. Of the funds appropriated in title IV under the heading “RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY” up to $3,000,000 may be made available for basic research on advanced composite materials processing (specifically, resin transfer molding, vacuum-assisted resin transfer molding, and co-infusion resin transfer molding).

DOMENICI AMENDMENTS NOS. 567–568
Mr. STEVENS (for Mr. DOMENICI) proposed two amendments to the bill S. 1122, supra; as follows:

Amendment No. 567
At the appropriate place in the bill, insert:

SEC. 8109. Of the funds appropriated in title IV under the heading “RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY”, up to $3,000,000 may be available for basic research on advanced composites materials processing (specifically, resin transfer molding, vacuum-assisted resin transfer molding, and co-infusion resin transfer molding).

SEC. 8110. Of the funds appropriated in title IV under the heading “RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY”, up to $5,000,000 may be available for basic research on advanced composites materials processing (specifically, resin transfer molding, vacuum-assisted resin transfer molding, and co-infusion resin transfer molding).

AMENDMENT NO. 568
At the appropriate place in the bill, insert:

SEC. 8109. Of the funds appropriated in title IV under the heading “RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY”, up to $5,000,000 may be available for basic research on advanced composites materials processing (specifically, resin transfer molding, vacuum-assisted resin transfer molding, and co-infusion resin transfer molding).

CONGRESSIONAL RECORD—SENATE
June 8, 1999

WYDEN (AND SMITH) AMENDMENT NO. 569
Mr. STEVENS (for Mr. WYDEN (for himself and Mr. SMITH of Oregon)) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill, insert:

SEC. 8109. Of the funds appropriated in title IV under the heading “RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY”, up to $4,000,000 may be available for research, development, test, and evaluation of elastin-based artificial tissues and dye targeted laser fusion techniques for healing internal injuries.

STEVENS AMENDMENT NO. 570
Mr. STEVENS proposed an amendment to the bill, S. 1122, supra; as follows:

In the appropriate place in the bill, insert the following new section:

SEC. . Of the funds made available in Title IV of this Act for the Defense Advanced Research Projects Agency under the heading “RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, DEFENSE–WIDE”, up to $20,000,000 may be made available for supersonic aircraft noise mitigation research and development efforts.

LEAHY AMENDMENT NO. 571
Mr. WYDEN (for Mr. LEAHY) proposed an amendment to the bill, S. 1122, supra; as follows:

On line 22, page 97, insert the following:

(d) REPORT.—Not more than 15 days after the exercise of any waiver under subsection (c), the Secretary of Defense shall submit a report to the congressional defense committee describing the extraordinary circumstances, the purpose and duration of the training program, the United States forces and the foreign security forces involved in the training program, and the information relating to human rights violations that necessitates the waiver.

SHELBY AMENDMENT NO. 572
Mr. STEVENS (for Mr. SHELBY) proposed an amendment to the bill, S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following:

Sect. . From within the funds provided for the Defense Acquisition University, up to $5,000,000 may be spent on a pilot program using state-of-the-art training technology that would train the acquisition workforce in a simulated government procurement environment.

INOUE AMENDMENT NO. 573
Mr. STEVENS (for Mr. INOUE) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill add the following:

Sect. . During the current fiscal year, under regulations prescribed by the Secretary of Defense, the Center of Excellence for Disaster Management and Humanitarian Assistance may also pay, or authorize payment for, the expenses of providing or facilitating education and training for appropriate U.S. citizens or law enforcement personnel assigned to foreign countries in disaster management and humanitarian assistance: Provided, That not later than April 1, 2001, the Secretary of Defense shall submit to the congressional defense committees a report regarding the training of foreign personnel conducted under this authority during the preceding fiscal year for which expenses were paid under the section: Provided further, That the report shall specify the countries in which the training was conducted, the type of training conducted, and the foreign personnel trained.

HUTCHISON (AND GRAMM) AMENDMENT NO. 574
Mr. STEVENS (for Mrs. HUTCHISON (for herself and Mr. GRAMM)) proposed an amendment to the bill S. 1122, supra; as follows:

On page 107, between lines 12 and 13, insert the following:

SEC. 8109. (a) PURPOSE.—The purpose of this section is to evaluate and demonstrate military and civilian personnel of for milary installations through improved capital asset management and greater reliance on the military or private sector to perform most base support services, where available.

(b) AUTHORITY.—(1) The Secretary of the Air Force may carry out at Brooks Air Force Base, Texas, a demonstration to be known as the “Base Efficiency Project” to improve mission effectiveness and reduce the cost of providing quality installation support at Brooks Air Force Base.

(2) The Secretary shall carry out the Project in consultation with the Community to the extent the Secretary determines such consultation is necessary and appropriate.

(3) The authority provided in this section is in addition to any other authority vested in or delegated to the Secretary, and the Secretary may exercise any authority or combination of authorities provided under this section or elsewhere to carry out the purposes of the Project.

(c) EFFICIENT PRACTICES.—(1) The Secretary may convert services at or for the benefit of the Base from accomplishment by military personnel or by Department civilian employees (appropriated fund) to performances by a combination of authorities provided under this section or elsewhere to carry out the purposes of the Project.

(2) Notwithstanding section 2642 of title 10, United States Code, a contract for services may be awarded based on “best value” if the Secretary determines that the award will advance the purposes of a joint activity conducted under the Project and is in the best interest of the Department.

(3) Notwithstanding that such services are generally funded by local and State taxes and provided without specific charge to the public at large, the Secretary may contract for public services at or for the benefit of the Base in exchange for such consideration, if any, the Secretary determines to be appropriate.

(A) The Secretary may conduct joint activities with the Community, the State, and any private parties or entities on or for the benefit of the Base.

(B) Payments or reimbursements received from participants for their share of direct and indirect costs of joint activities, including the costs of providing, operating, and maintaining facilities, shall be in an amount and type determined to be adequate and appropriate by the Secretary.

(C) Payments or reimbursements received by the Department shall be deposited into the Project Fund.
(d) LEASE AUTHORITY.—(1) The Secretary may lease any real property located on the Base to any lessee upon such terms and conditions as the Secretary considers appropriate and in the interest of the United States, if the Secretary determines that the lease would facilitate the purposes of the Project.

(2) Consideration for a lease under this subsection shall be determined in accordance with subsection (g).

(3) A lease under this subsection—
(A) may be for such period as the Secretary determines is necessary to accomplish the goals of the Project; and
(B) may give the lessee the first right to purchase the property if the lease is terminated.

(4) (A) The interest of a lessee of property leased under this subsection may be taxed by the State or the Community.

(B) A lease under this subsection shall provide that, if and to the extent that the leased property is later made taxable by State government or local governments under Federal law, the lease shall be renegotiated.

(C) The Department may furnish a lessee with other real and personal services, and other base operation, maintenance, or support services, in exchange for such consideration, payment, or reimbursement as the Secretary determines appropriate.

(D) All amounts received from leases under this subsection shall be deposited into the Project Fund.

(5) A lease under this subsection shall not be subject to the following provisions of law:
(A) Section 2697 of title 10, United States Code, other than subsection (b)(1) of that section.

(e) PROPERTY DISPOSAL.—(1) The Secretary may sell or otherwise convey or transfer real and personal property located at the Base to the Community or to another public or private party during the Project, upon such terms, procedures, and conditions as the Secretary considers appropriate for purposes of the Project.

(2) Consideration for a sale or other conveyance or transfer of property under this subsection shall not be subject to the following provisions of law:
(A) Section 2693 of title 10, United States Code.

(B) The Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.).

(C) The authority to acquire an interest in real property under this subsection includes authority to make surveys and acquire such interest by purchase, exchange, gift, or condemnation.

(3) The sale or other conveyance or transfer of property under this subsection shall be deposited into the Project Fund.

(4) Cash payments received as consideration for the sale or other conveyance or transfer of property under this subsection shall be deposited into the Project Fund.

(f) LEASEBACK OF PROPERTY LEASED OR DISPOSED.—(1) The Secretary may lease, sell, or otherwise convey or transfer real property at the Base to (b) and (e), as applicable, which will be retained for use by the Department or by another military department or other Federal agency, if the lease, sale, or conveyance or transfer of the property agrees to enter into a leaseback to the Department in connection with the lease, sale, or other conveyance or transfer of the property or all of the property leased, sold, or otherwise conveyed or transferred, as applicable.

(2) A leaseback of real property under this subsection shall be for operating lease for no more than 20 years unless the Secretary of Defense determines that a longer term is appropriate.

(D) Consideration, if any, for real property leased under a leaseback entered into under this subsection shall be in such form and amount as the Secretary considers appropriate.

(B) The Secretary may use funds in the Project Fund or other funds appropriated or otherwise available to the Department for such purpose if the lease is at the Base for payment of any such cash rent.

(4) Notwithstanding any other provision of law, the Department or other military department or other Federal agency using the real property leased under a leaseback entered into under this subsection may construct and erect facilities on or otherwise improve the leased property using funds appropriated or otherwise available to the Department or other military department or other Federal agency for such purpose. Funds available under any other provision for such purpose include funds in the Project Fund.

(g) CONSIDERATION.—(1) The Secretary shall determine the nature, value, and adequacy of consideration, including any consideration required or offered in exchange for a lease, sale, or other conveyance or transfer of real or personal property or for any actions taken under the Project.

(2) Consideration shall generally be worth at least fair market value. In-kind consideration may be comprised of any combination of the following:
(A) Real property.

(B) Personal property.

(C) Goods or services, including operation, maintenance, protection, repair, or restoration (including environmental restoration) of any property or facilities (including non-appropriated fund facilities).

(D) Base operating support services.

(E) Construction or improvement of Department facilities.

(F) Provision of facilities, including office, storage, or other usable space, for use by the Department or other Federal agency.

(G) Property.

(3) Consideration may not be for less than the fair market value.

(h) PROJECT FUND.—(1) There is established on the books of the Treasury a fund to be known as the ‘‘Base Efficiency Project Fund’’ into which all cash rents, proceeds, payments, reimbursements, and other amounts from leases, sales, or other conveyances or transfers, joint activities, and all other actions taken under the Project shall be deposited. All amounts deposited into the Project Fund are without fiscal year limitation.

(2) Amounts in the Project Fund may be used only for operation, base operating support services, maintenance, repair, construction, improvement of Department facilities, payment of consideration for acquisitions of interests in real property (including payment of rentals for leasebacks), and environmental protection or restoration, in addition to or in combination with other amounts appropriated for these purposes.

(3) Substantial compliance with financial management regulations, the Secretary shall establish the structure of the Project Fund and such administrative policies and procedures as the Secretary considers necessary to account for and control deposits into and disbursements from the Project Fund effectively.

(4) All distributions in the Project Fund shall be available for use for the purposes authorized in paragraph (2) at the Base, except that the Secretary may direct up to 50 per cent of any funds in the Project Fund or other funds appropriated or otherwise available to the Department or other Federal agency at the Base to other Federal agencies or other military department or other Federal agency, which the Secretary determines appropriate.

(i) FEDERAL AGENCIES.—(1)(A) Any Federal agency, its contractors, or its grantees shall pay, in cash, or in property, goods, or services, the fair market value.

(B) Any Federal agency, its contractors, or its grantees shall pay the fair market value, as determined by the Secretary.

(C) The Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.) may be applied to transactions at the Base during the Project.

(2) Not later than March 1 each year, the Secretary shall submit to the appropriate committees of Congress a report on any transactions at the Base during the preceding fiscal year that would be subject to this section and a description of the status of the Project.

(2) THE PROJECT.—(1) The Project shall consist and shall include facilities on or otherwise available to the Department for such purposes.

(2) THE REPORT.—(1) The report shall include a detailed cost analysis of the financial savings and gains realized through joint activities and other actions under the Project authorized by this section and a description of the status of the Project.

(3) LIMITATION.—None of the authorities in this section shall create any legal rights in any person or entity except rights embodied in leases, deeds, or contracts.

(m) EXPIRATION OF AUTHORITY.—The authority to enter into a lease, deed, permit, license, contract, or any other agreement under this section shall expire on September 30, 2004.

(p) DEFINITIONS.—In this section:
(A) The term ‘‘Project’’ means the base efficiency project authorized by this section.

(B) The term ‘‘Base’’ means Brooks Air Force Base, Texas.

(C) The term ‘‘Community’’ means the City of San Antonio, Texas.

(D) The term ‘‘Department’’ means the Department of the Air Force.
shall each submit to the appropriate congressional committees a report which shall—

(A) set forth the anticipated schedule (including specific dates for—

(i) preparing and conducting the competitive bidding process required by subsection (a); and

(ii) depositing the receipts of the competitive bidding process;

(B) set forth each significant milestone in the rulemaking process with respect to the competitive bidding process;

(C) include an explanation of the effect of each requirement in subsection (a) on the schedule for the competitive bidding process and any post-bidding activities (including the deposit of receipts) when compared with the schedule for the competitive bidding and any post-bidding activities (including the deposit of receipts) that would otherwise have occurred under section 337(b)(2) of the Communications Act of 1934 (47 U.S.C. 337(b)(2)) if not for the enactment of subsection (a);

(D) set forth for each spectrum auction held by the Federal Communications Commission since 1993 information on—

(i) the time required for each stage of preparation for the auction;

(ii) the date of the commencement and of the completion of each requirement in subsection (a); and

(iii) the time which elapsed between the date of the completion of the auction and the date of the first deposit of receipts from the auction in the Treasury;

(iv) the dates of all subsequent deposits of receipts from the auction in the Treasury; and

(E) include an assessment of how the stages of the competitive bidding process required by subsection (a), including preparation, commencement and completion, and deposit of receipts, will differ from similar stages in the auctions referred to in subparagraph (D).

(2) Not later than October 5, 2000, the Director of the Office of Management and Budget and the Federal Communications Commission shall each submit to the appropriate congressional committees the report which shall—

(A) describe the course of the competitive bidding process required by subsection (a) through September 30, 2000, including the amount of any proceeds from the competitive bidding process deposited in the Treasury as of September 30, 2000; and

(B) if the course of the competitive bidding process has included any deviations from the schedule set forth under paragraph (1)(A), an explanation for such deviations from the schedule.

(3) The Federal Communications Commission may not consult with the Director in the preparation and submittal of the reports required of the Commission by this subsection.

(4) In this subsection, the term "appropriate congressional committees" means the following:

(A) The Committees on Appropriations, the Budget, and Commerce of the Senate.

(B) The Committees on Appropriations, the Budget, and Commerce of the House of Representatives.

(a) Extension of Agriculture Export Relief Act of 1998—Section 2 of the Agriculture Export Relief Act of 1998 (Public Law 105-194; 112 Stat. 627) is amended by striking "September 30, 1999" each place it appears and inserting "September 30, 2002".

(b) Extension of India-Pakistan Relief Act of 1998—

(1) In general.—Section 902(a) of the India-Pakistan Relief Act of 1998 (22 U.S.C. 2799a-1) is amended by striking "for a period not to exceed one year upon enactment of this Act" and inserting "for a period not to exceed September 30, 2002".

(2) Report.—Section 904 of such Act is amended by striking "a one-year period described in section 902" and inserting "the year following the date of enactment of this Act and annually thereafter".

(3) Effective date.—The amendments made by this section shall take effect on the date of the enactment of this Act or September 30, 1999.

DURBIN AMENDMENT NO. 579

Mr. INOUYE (for Mr. Durbin) proposed an amendment to the bill, S. 1122, supra, as follows:

At the appropriate place, insert the following:

SEC. 8109. (a) Congress makes the following findings:

(1) Congress recognizes and supports, as being fundamental to the national defense, the role of the Armed Forces to test weapons and weapon systems thoroughly, and to train members of the Armed Forces in the use of weapons and weapon systems before the forces enter hostile military engagements.

(2) It is the policy of the United States that the Armed Forces at all times exercise the utmost degree of caution in the testing of weapons and weapon systems in order to avoid endangering civilian populations and their environments.

(3) In the adherence to these policies, it is essential to the public safety that the Armed Forces not test weapons or weapon systems,
or engage in training exercises with live ammunition unless there is a reasonable alternative available.

(b) It is the sense of Congress that—
(1) there should be a thorough and independent investigation of the circumstances that led to the accidental death of a civilian employed by the Navy installation in Vieques, Puerto Rico, and the wounding of four other civilians during a live-ammunition weapons test at Vieques, including a re-examination of the adequacy of the measures that are taken to protect the civilian population during such testing and of the extent to which the civilian population at the site can be adequately protected during such testing;
(2) the President should not authorize the Navy to resume live ammunition testing on the Island of Vieques, Puerto Rico, unless and until he has advised the Committees on Armed Services of the Senate and the House of Representatives that—
(A) there is not available an alternative testing site with a civilian population located in close proximity;
(B) the national security of the United States requires that the testing be carried out despite the potential risks to the civilian population;
(C) measures to provide the utmost level of safety to the civilian population are to be in place and maintained throughout the testing; and
(D) in the event that testing resumes, measures are to be taken to protect the Island of Vieques and the surrounding area from environmental degradation, including possible environmental harm, that might result from the testing of ammunition containing radioactive materials; and
(3) in addition to advising committees of Congress of the findings as described in paragraph (2), the President should advise the Governor of Puerto Rico of those findings and, if the President decides to resume live-ammunition weapons testing on the Island of Vieques, consult with the Governor on a regular and systematic basis regarding the measures being taken from time to time to protect civilians from harm from the testing.

INUOEY AMENDMENT NO. 581
Mr. INOUYE (for Mr. LEVIN) proposed an amendment to the bill S. 1122, supra; as follows:
At the appropriate place, insert:

**SECTION 1. FEDERAL HEALTH CARE PARTNERSHIP.**

Sec. 1. Notwithstanding any other provision in this Act, the total amount appropriated in title III, Procurement, under the heading “MISSILE PROCUREMENT, Army”, up to $35,000,000 may be made available to retrofit and improve the inventory of Patriot missiles in order to meet current and projected threats from cruise missiles.

LEVIN AMENDMENT NO. 583
Mr. INOUYE (for Mr. LEVIN) proposed an amendment to the bill S. 1122, supra; as follows:
At the end of the bill, add the following new section:

_Sec. 1. Notwithstanding any other provision in this Act, the total amount appropriated in title IV of this act under Research, Development, Test, and Evaluation, Defense-Wide, is hereby reduced by $200,000,000. Provided, That not more than $56,555,000 of the funds provided under this Act may be obligated for National Missile Defense programs: Provided further, That notwithstanding any other provision in this Act, the total amount appropriated in this Act for Aircraft Procurement, Army is hereby increased by $56,100,000 for re-engining of the CH-47 helicopter, Provided further, That notwithstanding any other provision in this Act, the total amount appropriated in this Act for Aircraft Procurement, Army is hereby increased by $54,900,000 for procurement of SINGARs radars._

McCain Amendments Nos. 584–585
Mr. STEVENS (for Mr. MCCAIN) proposed two amendments to the bill S. 1122, supra; as follows:

**AMENDMENT NO. 584**
Strike section 8108, and insert the following:

_Sec. 8108. Notwithstanding any other provision of this Act, the total amount appropriated in this Act for the Army, the Marine Corps, and the Air Force for support and maintenance of military equipment, is hereby reduced by $50,000,000: Provided, That notwithstanding any other provision of this Act, the total amount appropriated in this Act for the Army, the Marine Corps, and the Air Force for support and maintenance of military equipment, is hereby reduced by $50,000,000:,_

**AMENDMENT NO. 585**
At the end of the general provisions, add the following:

_Sec. 8109. (a) Subject to subsection (c) and except as provided in subsection (d), the Secretary of Defense may waive any domestic source or domestic content requirement referred to in subsection (b) and hereby authorize procurements of items that are grown, reprocessed, reused, produced, or manufactured—
(1) inside a foreign country the government of which is a party to a reciprocal defense memorandum of understanding that is entered into with the Secretary of Defense and is in effect; or
(2) inside the United States or its possessions;
(3) inside the United States or its possessions partly or wholly from components grown, reprocessed, reused, produced, or manufactured outside the United States or its possessions.

(b) For purposes of this section:
(1) A domestic source requirement is any requirement under law that the Department of Defense must satisfy its needs for an item by procuring an item that is grown, reprocessed, reused, produced, or manufactured in the United States, its possessions, or a part of the national technology and industrial base.
(2) A domestic content requirement is any requirement under law that the Department must satisfy its needs for an item by procuring an item produced or manufactured..._
partly or wholly from components grown, re-
processed, or manufactured in the United States or its possessions.
(c) The authority to waive a requirement under subsection (a) applies to procurements of items if the Secretary of Defense first de-
termines that—
(1) the application of the requirement to procurements of those items would impede the reciprocal procurement of defense items under a memorandum of understanding pro-
viding for reciprocal procurement of defense items that is entered into between the De-
partment of Defense and a foreign country in accordance with section 2531 of title 10, United States Code;
(2) the foreign country does not discrimi-
nate against items produced in the United States to a greater degree than the United States discriminates against items produced in that country; and
(3) one or more of the conditions set forth in section 2534(d) of title 10, United States Code, exists with respect to the procure-
ment.
(d) LAWS NOT WAIVED.—The Secretary of Defense may not exercise the authority under subsection (a) to waive any of the fol-
lowing laws:
(1) The Small Business Act.
(2) The Javits-Wagner-O’Day Act (41 U.S.C.
46–48c).
(3) Sections 7308 and 7310 of title 10, United States Code, with respect to ships in Federal Supply Class 1905.
(4) Section 9005 of Public Law 192–396 (10 U.S.C.
2241 note), with respect to articles or items covered by contract, apparel, shoe findings, tents, and flags listed in Federal Supply Classes 8305, 8310, 8315, 8320, 8335, 8340, and 8345 and articles or items of clothing, footwear, individual equipment, and insignia listed in Federal Supply Classes 8405, 8410, 8415, 8420, 8425, 8430, 8435, 8440, 8445, 8450, 8455, 8465, 8470, and 8475.
(e) RELATIONSHIP TO OTHER WAIVER AUTHORITY.—The authority under subsection (a) to waive a domestic source requirement or domestic content requirement is in addi-
tion to any other authority to waive such re-
quirement.

SHELBY AMENDMENT NO. 586
Mr. STEVENS (for Mr. Shelby) proposed an amendment to the bill S. 1122, supra; as follows:

In Title IV, under Research, Development, Test, and Evaluation, Army, add the fol-
lowing:

“Of the funds appropriated for research, development, test and evaluation Army, up to $10 million may be utilized for Army Space Control Technology.”

BOND (AND ASHCROFT) AMENDMENT NO. 587
Mr. STEVENS (for Mr. Bond (for himself and Mr. Domenici)) proposed an amendment to the bill S. 1122, supra; as follows:

In the appropriate place in the bill, insert the following new section:

“Sic. In addition to funds appropriated elsewhere in this Act, the amount appro-
priated in Title III of this Act under the heading “Aircraft Procurement, Air Force” is hereby increased by $220,000,000 only to procure four (4) F–15E aircraft; Provided, that the amount provided in Title III of this Act under the heading “Research, Development, Test and Evaluation, Defense-Wide” is here-
by reduced by $50,000,000 to reduce the total amount available for National Guard and Reserve Equipment; Provided further, that the amount provided in Title III of this Act under the heading “Aircraft Procurement, Air Force” is hereby reduced by $70,000,000 to reduce the total amount available for Spares and Repair Parts; Provided further, that the amount provided in Title III of this Act under the heading “Aircraft Procurement, Navy” is hereby reduced by $50,000,000 to reduce the total amount available for Spares and Repair Parts.

KOHLS AMENDMENT NO. 588
Mr. STEVENS (for Mr. Kohl) proposed an amendment to the bill S. 1122, supra; as follows:

On page 107, between lines 12 and 13, insert the following:

Sic. 8109. (a) Of the amounts appropriated by title II under the heading “OPERATION AND MAIN-
TENANCE, DEFENSE-WIDE”, up to $220,000,000 may be made available to carry out the study described in subsection (b).

(b) The Secretary shall carry out the study at the Badger Army Ammunition Plant, Wis-
consin.

(c) The Secretary shall provide for the car-
ying out of work under the study through the Omaha District Corps of Engineers and in cooperation with the Department of En-
ergy Federal Technology Center, Morgan-
town, West Virginia.

(d) The Secretary may make available to other departments and agencies of the Fed-
eral Government information developed as a result of the study.

LOTTE (AND COCHRAN) AMENDMENT NO. 589
Mr. STEVENS (for Mr. Lott (for himself and Mr. Cochran)) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill insert the following:

Sic. of the total amount available in this Act for RESEARCH DEVELOPMENT TEST AND EVALUATION, NAVY shall be increased by $3,800,000 to continue research and development on polymer cased ammunition.

GRAHAM AMENDMENT NO. 590
Mr. STEVENS (for Mr. Graham) proposed an amendment to the bill S. 1122, supra; as follows:

At the end of the general provisions, add the following:

Sic. 8109. (a) Of the funds appropriated in title II under the heading “OPERATION AND MAIN-
TENANCE, AIR FORCE” (other than the funds appropriated for space launch facilities), $7,300,000 shall be available in addi-
tional to other funds appropriated under that heading for space launch facilities, for a
second team of personnel for space launch fa-
cilities, to accommodate launch schedules.
(b) The funds set aside under subsection (a) may not be obligated for any purpose other than the purpose specified in subsection (a).

VOINOVICH AMENDMENT NO. 591
Mr. STEVENS (for Mr. Voinovich) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . Of the funds appropriated in this Act under the heading “Operation and Main-
tenance, Air Force”, up to $500,000 may be available for a study of the costs and feasibility of a project to remove ordnance from the Tous-
saint River.

SANTORUM (AND OTHERS) AMENDMENT NO. 592

STEVENS (for Mr. Santorum (for himself, Mr. Bond, and Mr. Specter)) proposed an amendment to the bill S. 1122, supra; as follows:

On page 107, between lines 12 and 13, insert the following:

Sic. 8109. Of the funds appropriated in title II under the heading “OPERATION AND MAINTENANCE, AIR FORCE”, up to $4,000,000 may be made available for the Manufacturing Techno-
logy Assistance Pilot Program.

HELMS AMENDMENT NO. 593
Mr. STEVENS (for Mr. Helms) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following:

Sic. 8109. Of the funds appropriated in title IV under the heading “RESEARCH, DEVELOP-
MENT, TEST, AND EVALUATION, ARMY”, up to $5,000,000 may be available for visual display and performance and visual display environmental re-
search and development.

BYRD AMENDMENTS NO. 594-595
Mr. STEVENS (for Mr. Byrd) proposed an amendment to the bill S. 1122, supra; as follows:

On page 107, between lines 12 and 13, insert the following:

Sic. 8109. Of the funds appropriated in title III under the heading “OTHER PROCUREMENT, ARMY”, $51,250,000 shall be available for the Information System Security Program, of which up to $10,000,000 may be avail-
bale for an immediate assessment of biomet-
rics sensors and templates repository re-
quirements and for combining and consoli-
dating biometrics security technology and other information assurance technologies to accomplish a more focused and effective in-
formation assurance effort.

AMENDMENT NO. 595
On page 107, between lines 12 and 13, insert the following:

Sic. 8109. Of the funds appropriated in title II under the heading “OPERATION AND MAINTENANCE, DEFENSE-WIDE” for the Office of the Special Assistant for the Deputy Sec-
retary of Defense for Gulf War Illnesses, up to $10,000,000 may be made available for car-
ying out the first-year actions under the 5-
year research plan outlined in the report entitled “Department of Defense Strategy to Address Low-Level Exposures to Chemical Warfare Agents (CWA)”, dated May 1999, that was submitted to committees of Congress pursuant to section 247(d) of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 112 Stat. 1977).

ASHCROFT (AND BOND) AMENDMENT NO. 596

Mr. STEVENS (for Mr. ASHCROFT (for himself and Mr. BOND)) proposed an amendment to the bill, S. 1122, supra; as follows:

At the end of the general provisions, add the following: Sec. 8109. (a) Congress makes the following findings:

1. The B–2 bomber has been used in combat for the first time in Operation Allied Force against Yugoslavia.
2. The B–2 bomber has demonstrated unparalleled strike capability in Operation Allied Force, with cursory data indicating that the bomber could have dropped nearly 20 percent of the precision ordnance while flying less than 3 percent of the attack sorties.
3. According to the congressionally mandated Long Range Air Power Panel, “long range air power is an increasingly important element of United States military capability.”
4. The crews of the B–2 bomber and the personnel of Whiteman Air Force Base, Missouri, deserve particular credit for flying and supporting actions against Yugoslavia, some of the longest combat missions in the history of the Air Force.
5. The bravery and professionalism of the personnel of Whiteman Air Force Base have advanced American interests in the face of significant challenge and hardship.
6. The dedication of those who serve in the Armed Forces, exemplified clearly by the personnel of Whiteman Air Force Base, is the greatest national security asset of the United States.

(b) In the sense of Congress that—

1. The skill and professionalism with which the B–2 bomber has been used in Operation Allied Force is a credit to the personnel of Whiteman Air Force Base, Missouri, and the Air Force;
2. The B–2 bomber has demonstrated an unparalleled capability to travel long distances and deliver devastating weapons payloads, proving its essential role for United States power projection in the future; and
3. The crews of the B–2 bomber and the personnel of Whiteman Air Force Base deserve the gratitude of the American people for their dedicated performance in an indispensable role in the air campaign against Yugoslavia and in the defense of the United States.

SMITH AMENDMENT NO. 597

Mr. STEVENS (for Mr. SMITH of New Hampshire) proposed an amendment to the bill S. 1122, supra; as follows:

In the appropriate page in the bill, insert the following: Sec. ... Of the funds appropriated in Title III under the heading “AIRCRAFT PROCUREMENT, AIR FORCE,” up to $17,500,000 may be made available for expansion of the research program in the Upper Great Plains region.

GRAHAM AMENDMENT NO. 599

Mr. STEVENS (for Mr. GRAHAM) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following: Sec. 8109. Of the total amount appropriated in Title III under the heading “AIRCRAFT PROCUREMENT, AIR FORCE,” up to $17,500,000 may be made available for the F–15A/B data link for the Air National Guard.

COLLINS AMENDMENT NO. 600

Mr. STEVENS (for Ms. COLLINS) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following: Sec. ... Of the funds appropriated in Title III under the heading “WEAPONS PROCUREMENT, NAVY,” up to $3,000,000 may be made available for the MK–43 Machine Gun Conversion Program.

INOUIE AMENDMENT NO. 601

Mr. SPECTER (for Mr. INOUIE) proposed an amendment to the bill S. 1122, supra; as follows:

At the appropriate place in the bill, insert the following: Sec. ... DEVELOPMENT OF FORD ISLAND, HAWAII.

(a) In General.—(1) Subject to paragraph (2), the Secretary of the Navy may exercise any authority or combination of authorities in this section for the purpose of developing or facilitating the development of Ford Island, Hawaii, to the extent that the Secretary determines the development is compatible with the mission of the Navy.

(2) The Secretary may not exercise any authority under this section until—

(A) the Secretary submits to the appropriate committees of Congress a master plan for the development of Ford Island; and

(B) a period of 30 calendar days has elapsed following the date on which the notification is received by those committees.

(b) CONVEYANCE AUTHORITY.—(1) The Secretary of the Navy may convey to any public or private person or entity all right, title, and interest in and to any real property (including any improvements thereon) or personal property under the jurisdiction of the Secretary in the State of Hawaii that the Secretary determines—

(A) is excess to the needs of the Navy and all of the other Armed Forces; and

(2) A conveyance under this subsection may include such terms and conditions as the Secretary considers appropriate to protect the interests of the United States.

(c) LEASE AUTHORITY.—(1) The Secretary of the Navy may lease to any public or private person or entity any real property or personal property under the jurisdiction of the Secretary in the State of Hawaii that the Secretary determines—

(A) is not needed for current operations of the Navy and all of the other Armed Forces; and

(B) will promote the purpose of this section.

(2) A lease under this subsection shall be subject to section 2667(b)(1) of title 10, United States Code, and may include such other terms as the Secretary considers appropriate to protect the interests of the United States.

(3) A lease of real property under this subsection may provide that, upon termination of the lease term, the lessor shall have the right of first refusal to acquire the real property covered by the lease if the property is then conveyed under subsection (b).

(4)(A) The Secretary may provide property support services to or for real property leased under this subsection.

(b) To the extent provided in appropriations Acts, any payment made to the Secretary for services provided under this paragraph shall be credited to the appropriation, account, or fund from which the cost of providing the services was paid.

(d) ACQUISITION OF LEASEHOLD INTEREST BY SECRETARY.—(1) The Secretary of the Navy may acquire a leasehold interest in any facility constructed under subsection (f) as consideration for a transaction authorized by this section upon such terms as the Secretary considers appropriate to promote the purpose of this section.

(2) The term of a lease under paragraph (1) may not exceed 10 years, unless the Secretary of Defense approves a term in excess of 10 years for the purpose of this section.

(3) A lease under this subsection may provide that, upon termination of the lease term, the United States shall have the right of first refusal to acquire the facility covered by the lease.

(e) REQUIREMENT FOR COMPETITION.—The Secretary of the Navy shall use competitive procedures for purposes of selecting the real or personal property for the real or personal property under subsection (c).

(5) CONSIDERATION.—(1) As consideration for the conveyance of real or personal property under subsection (b), or for the lease of real or personal property under subsection (c), the Secretary of the Navy shall accept cash, real property, personal property, or services, or any combination thereof, in an aggregate amount equal to not less than the fair market value of the real or personal property conveyed or leased.

(2) Subject to section (3), the services acquired by the Secretary under paragraph (1) may include the following:

(A) The construction or improvement of facilities at Ford Island.

(B) The restoration or rehabilitation of real property at Ford Island.

(C) The provision of property support services for property or facilities at Ford Island.

(A) A detailed description of the transaction specifying the manner in which the transaction will meet the purpose of this section; and

(2) A period of 30 calendar days has elapsed following the date on which the notification is received by those committees.

(b) FORD ISLAND IMPROVEMENT ACCOUNT.—

(1) There is established on the books of the Treasury an account to be known as the “Ford Island Improvement Account”.

(2) There shall be deposited into the account the following amounts:

(A) Amounts authorized and appropriated to the account.

(B) As provided in subsection (c)(4)(B), the amount of any cash payment received by the Secretary for a transaction under this section.

(i) USE OF ACCOUNT.—(1) Subject to paragraph (2), to the extent provided in appropriation Acts, funds in the Ford Island Improvement Account may be used as follows:

(A) To carry out or facilitate the carrying out of a transaction authorized by this section.

(B) To carry out improvements of property or facilities at Ford Island.

(C) To obtain property support services for property or facilities at Ford Island.

(2) To extend that the authorities provided under subchapter IV of chapter 169 of title 10, United States Code, are available to the Secretary of the Navy, the Secretary may not use the authorities in this section to acquire, construct, or improve family housing units, military unaccompanied housing units, or ancillary supporting facilities related to military housing at Ford Island.

(3) (A) The Secretary may transfer funds from the Ford Island Improvement Account to the following funds:

(i) The Department of Defense Family Housing Improvement Fund established by section 2889(a)(1) of title 10, United States Code.

(ii) The Department of Defense Military Unaccompanied Housing Improvement Fund established by section 2889(a)(2) of title 10, United States Code.

(B) Amounts transferred under subparagraph (A) to a fund referred to in that subparagraph shall be available in accordance with the purpose for which that fund was established.

(iii) The Secretary may transfer funds from the Ford Island Improvement Account to those funds:

(A) To carry out or facilitate the carrying out of a transaction authorized by this section.

(B) To carry out improvements of property or facilities at Ford Island.

(C) To obtain property support services for property or facilities at Ford Island.

(iv) In lieu of the matter proposed to be inserted by the amendment, insert the following:

TITLE—SUSPENSION OF CERTAIN SANCTIONS WITH RESPECT TO INDIA AND PAKISTAN

SEC. 1. SUSPENSION OF SANCTIONS.

(a) In General.—Effective for the period of five years commencing on the date of enactment of this Act, the sanctions contained in the following provisions of law shall not apply to India and Pakistan with respect to any grounds for the imposition of sanctions under those provisions arising prior to that date:

(1) Section 101 of the Arms Export Control Act (22 U.S.C. 279aa).

(2) Section 102 of the Arms Export Control Act (22 U.S.C. 279aa–1) other than subsection (b)(2)(B), (C), or (G).

(b) SPECIAL RULE FOR COMMERCIAL EXPORTS OF DUAL-USE ARTICLES AND TECHNOLOGY.—The sanction contained in section 102(b)(2)(G) of the Arms Export Control Act (22 U.S.C. 279aa–1(b)(2)(G)) shall not apply to India or Pakistan with respect to any grounds for the imposition of that sanction arising prior to the date of enactment of this Act if imposition of the sanction (but for this paragraph) would deny any license for the export of any dual-use article, or related dual-use technology (including software), listed on the Commerce Control List of the Export Administration Regulations that would not contribute directly to missile development or to a nuclear weapons program. For purposes of this subsection, an article or technology that is not primarily used for missile development or nuclear weapons programs is not a missile development or nuclear weapons program.
Mr. STEVENS (for Mr. Domenici) proposed an amendment to the bill, S. 1122, supra; as follows:

(b)(1) Not later than 15 days after the date of the enactment of this Act, the Director of the Office of Management and Budget and the Federal Communications Commission shall each submit to the appropriate congressional committees a report which shall—

(a) set forth the anticipated schedule (including specific dates) for—

(i) preparing and conducting the competitive bidding process required by subsection (a); and

(ii) depositing the receipts of the competitive bidding process;

(b) set forth each significant milestone in the rulemaking process with respect to the competitive bidding process;

(c) include an explanation of the effect of each requirement in subsection (a) on the schedule for the competitive bidding process and any post-bidding activities (including the deposit of receipts) when compared with the schedule for the competitive bidding and any post-bidding activities (including the deposit of receipts) that would otherwise have occurred under section 337(b)(2) of the Communications Act of 1934 (47 U.S.C. 337(b)(2)) if not for the enactment of subsection (a);

(D) set forth for each spectrum auction held by the Federal Communications Commission since 1993 information on—

(i) the time required for each stage of preparation for the auction;

(ii) the date of the commencement and of the completion of the auction;

(iii) the time which elapsed between the date of the completion of the auction and the date of the first deposit of receipts from the auction in the Treasury; and

(iv) the dates of all subsequent deposits of receipts from the auction in the Treasury;

(E) include an assessment of how the stages of the competitive bidding process required by subsection (a), including preparation, commencement, and completion, and deposit of receipts, will differ from similar stages in the auctions referred to in subparagraph (D).

(2) Not later than October 5, 2000, the Director of the Office of Management and Budget and the Federal Communications Commission shall each submit to the appropriate congressional committees the report which shall—

(a) describe the course of the competitive bidding process required by subsection (a) through September 30, 2000, including the amount of any receipts from the competitive bidding process deposited in the Treasury as of September 30, 2000; and

(b) if the course of the competitive bidding process has included any deviations from the schedule set forth under paragraph (1)(A), an explanation for such deviations from the schedule.

(3) The Federal Communications Commission may not consult with the Director in the preparation and submittal of the reports required of the Commission by this subsection.

(4) In this subsection, the term “appropriate congressional committees” means the following:

(A) The Committees on Appropriations, the Budget, and Commerce of the Senate.

(B) The Committees on Appropriations, the Budget, and Commerce of the House of Representatives.

COVERDELL (AND KERRY) AMENDMENT NO. 605

Mr. STEVENS (for Mr. Coverdell, for himself and Mr. Kerry), proposed an amendment to the bill, S. 1122, supra; as follows:

At the appropriate place, insert:

(a) FINDINGS.—Congress makes the following findings:

(1) On June 19, 1996, a bomb detonated not more than 80 feet from the Air Force housing complex known as Khobar Towers in Dhahran, Saudi Arabia, killing 19 members of the Air Force, and injuring hundreds more;

(2) An FBI investigation of the bombing, soon to enter its fourth year, has not yet determined who was responsible for the attack; and

(3) The Senate in S. Res. 273 in the 104th Congress condemned this terrorist attack in the following terms and urged the United States Government to use all reasonable means available to the Government of the United States to punish the parties responsible for these bombings;

(b) SENSE OF THE SENATE.—It is the sense of the Senate that:

(1) The United States Government must continue its investigation into the Khobar Towers bombing until every terrorist involved is identified, held accountable, and punished;

(2) The FBI, together with the Department of State, should report to Congress no later than December 31, 1999, on the status of its investigation into the Khobar Towers bombing; and

(3) Once responsibility for the attack has been established the United States Government must take steps to punish the parties involved.

DOMENICI AMENDMENT NO. 606

Mr. STEVENS (for Mr. Domenici) proposed an amendment to the bill, S. 1122, supra; as follows:

On page 102, between lines 12 and 13, insert the following:

TITLE IX—McGREGOR RANGE LAND WITHDRAWAL

SEC. 9001. SHORT TITLE. This title may be cited as the “McGregor Range Withdrawal Act”.

SEC. 9002. DEFINITIONS. In this title:

(2) The term “management plan” means the natural resources management plan prepared by the Secretary of the Army pursuant to section 9004(e).

(3) The term “withdrawn lands” means the lands described in subsection (d) of section 9003 that are withdrawn and reserved under subsection (e).

(4) The term “withdrawal period” means the period specified in section 9007(a).

SEC. 9003. WITHDRAWAL AND RESERVATION OF LANDS AT MCGREGOR RANGE, NEW MEXICO.

(a) WITHDRAWAL.—Subject to valid existing rights, and except as otherwise provided in this Act, the Federal lands at McGregor Range in the State of New Mexico that are described in subsection (d) are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, but not the Materials Act.

(b) PURPOSE.—The purpose of the withdrawal is to support military training and testing, all other uses of the withdrawn lands shall be secondary in nature.

(c) RESERVATION.—The withdrawn lands are reserved for use by the Secretary of the Army for military training and testing.

(d) LAND DESCRIPTION.—The lands withdrawn and reserved by this section (a) consist of all lands described in section 9004.

SEC. 9004. LANDS AND LEGAL DESCRIPTION.

(a) PREPARATION OF MAPS AND LEGAL DESCRIPTION.—As soon as practicable after the date of the enactment of this Act, the Secretary of the Interior shall—

(1) publish in the Federal Register a notice containing the legal description of the withdrawn lands; and

(2) file one or more maps of the withdrawn lands and the legal description of the withdrawn lands with the Committee on Energy and Natural Resources of the Senate and with the Committee on Resources of the House of Representatives.

(b) LEGAL EFFECT.—The maps and legal description shall have the same force and effect as if they were included in this title, except that the Secretary of the Interior may correct clerical and typographical errors in the maps and legal description.

(c) AVAILABILITY.—Copies of the maps and the legal description shall be available for public inspection in the offices of the New Mexico State Director and Las Cruces Field Office Manager of the Bureau of Land Management and in the office of the Commander Officer of Port Bliss, Texas.

SEC. 9005. MANAGEMENT OF WITHDRAWN LANDS.

(a) GENERAL MANAGEMENT AUTHORITY.—During the withdrawal period, the Secretary of the Army shall manage the withdrawn lands as authorized in subsection (c) of this title and the management plan prepared under subsection (e), for the military purposes specified in section 9003(c).

(b) ACCESS RESTRICTIONS.-(1) AUTHORITY TO CLOSE.—Subject to paragraph (2), if the Secretary of the Army determines that military operations, public safety, or national security require the closure to public use of any portion of the withdrawn lands (including any road or trail therein) commonly in public use, the Secretary of the Army is authorized to take such action.

(2) REQUIREMENTS.—Any closure under paragraph (1) shall be limited to the minimum areas and periods required for the purpose specified in such closure. Before a closure, the Secretary of the Army shall keep appropriate warning notices posted and take appropriate steps to notify the public about the closure.

(c) MANAGEMENT OF WITHDRAWN AND ACQUIRED MINERAL RESOURCES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the Secretary of the Interior shall manage all withdrawn and acquired mineral resources within the boundaries of

DOMENICI AMENDMENT NO. 605

Mr. STEVENS (for Mr. Domenici) proposed an amendment to the bill, S. 1122, supra; as follows:

On page 107, between lines 4 and 5, insert the following:

OMENICI AMENDMENT NO. 604

Mr. STEVENS (for Mr. Domenici) proposed an amendment to the bill, S. 1122, supra; as follows:

On page 106, between lines 4 and 5, strike “The Communications Act” and insert “(a) The Communications Act of 1934.”

On page 107, between lines 4 and 5, insert the following:

(b)(1) Not later than 15 days after the date of the enactment of this Act, the Director of the Office of Management and Budget and the Federal Communications Commission shall each submit to the appropriate congressional committees a report which shall—

(A) describe the course of the competitive bidding process required by subsection (a); and

(b)(2) if the course of the competitive bidding process has included any deviations from the schedule set forth under paragraph (1), an explanation for such deviations from the schedule.

(3) The Federal Communications Commission may not consult with the Director in the preparation and submittal of the reports required of the Commission by this subsection.

(4) In this subsection, the term “appropriate congressional committees” means the following:

(A) The Committees on Appropriations, the Budget, and Commerce of the Senate.

(B) The Committees on Appropriations, the Budget, and Commerce of the House of Representatives.

CONGRESSIONAL RECORD—SENATE June 8, 1999
CONGRESSIONAL RECORD—SENATE

June 8, 1999

(2) MANAGEMENT OF MINERAL MATERIALS.—Notwithstanding any other provision of this title or the Materials Act, the Secretary of the Army may, from the withdrawn lands, sand, gravel, or similar mineral material resources of the type subject to disposition under the Materials Act, when the use of such resources is required for construction needs of Fort Bliss.

(d) HUNTING, FISHING, AND TRAPPING.—All hunting, fishing, and trapping on the withdrawn lands shall be conducted in accordance with section 2671 of title 10, United States Code, and the Sikes Act (16 U.S.C. 670 et seq.).

(e) MANAGEMENT PLAN.—

(1) REQUIRED.—The Secretary of the Army and the Secretary of the Interior shall jointly develop a natural resources management plan for the lands withdrawn under this title for the withdrawal period. The management plan shall be developed not later than three years after the enactment of this Act and shall be reviewed at least once every five years after its adoption to determine if it should be amended.

(2) CONTENT.—The management plan shall—

(A) include provisions for proper management and protection of the natural, cultural, and other resources and values of the withdrawn lands and for use of such resources to the extent consistent with the purpose of the withdrawal specified in section 9003(b); and

(B) identify the withdrawn lands (if any) that are suitable for opening to the operation of the mineral leasing or geothermal leasing laws.

(2) DURATION.—The duration of the continuation of livestock grazing at the discretion of the Secretary of the Army under such authorities as are available to the Secretary; and

(D) provide that the Secretary of the Army shall take necessary precautions to prevent, suppress, or manage brush and range fires occurring within the boundaries of McGregor Range and range fires occurring outside the boundaries of McGregor Range resulting from military activities at the range.

(3) SUPPRESSION ASSISTANCE.—The Secretary of the Army may seek assistance from the Bureau of Land Management in suppressing any brush or range fire occurring within the boundaries of McGregor Range or any brush or range fire occurring outside the boundaries of McGregor Range resulting from military activities at the range. The memorandum of understanding under section 9006 shall provide for assistance from the Bureau of Land Management in the suppression of such fires and require the Secretary of the Army to reimburse the Bureau of Land Management for such assistance.

SEC. 9006. MEMORANDUM OF UNDERSTANDING.

(a) REQUIREMENT.—The Secretary of the Army and the Secretary of the Interior shall enter into a memorandum of understanding to implement this title and the management plan.

(b) DURATION.—The duration of the memorandum of understanding shall be the same as the withdrawal period.

(c) AMENDMENT.—The memorandum of understanding may be amended by agreement of both Secretaries.

SEC. 9007. TERMINATION OF WITHDRAWAL AND RESERVATION: EXTENSION.

(a) TERMINATION DATE.—The withdrawal and reservation made by this title shall terminate 50 years after the date of enactment of this Act.

(b) REQUIREMENTS FOR EXTENSION.—

(1) NOTICE OF CONTINUED MILITARY NEED.—Not later than five years before the end of the withdrawal period, the Secretary of the Army shall advise the Secretary of the Interior as to whether or not the Army will have a continuing military need for any or all of the withdrawn lands after the end of the withdrawal period.

(2) APPLICATION FOR EXTENSION.—If the Secretary of the Army determines that there will be a continuing military need for any or all of the withdrawn lands after the end of the withdrawal period, the Secretary of the Army shall file an application for extension of the withdrawal and reservation of the lands in accordance with the then-existing regulations and procedures of the Department of the Interior applicable to extension of withdrawal of lands for military purposes and that are consistent with this title. The application shall be filed with the Department of the Interior not later than four years before the end of the withdrawal period.

(b) LIMITATION ON EXTENSION.—The withdrawal and reservation made by this title may not be extended or renewed except by Act or joint resolution.

SEC. 9008. RELINQUISHMENT OF WITHDRAWN LANDS.

(a) FILING OF RELINQUISHMENT NOTICE.—If, during the withdrawal period, the Secretary of the Army decides to relinquish all or any portion of the withdrawn lands, the Secretary of the Army, if a notice of intention to relinquish with the Secretary of the Interior.

(b) DETERMINATION OF PRESENCE OF CONTAMINATED LANDS.—(1) The Secretary of the Army makes a relinquishment notice under subsection (a), the Secretary of the Army, in consultation with the Secretary of the Interior, shall prepare a written determination concerning whether and to what extent the lands to be relinquished are contaminated with explosive, toxic, or other hazardous wastes and substances. Such determination shall be transmitted with the relinquishment notice.

(c) DECONTAMINATION AND REMEDIATION.—In the case of lands which the subject of a relinquishment notice, the Secretary of the Army shall decontaminate or remediate the land to the extent that funds are appropriated for such purposes if the Secretary of the Interior, in consultation with the Secretary of the Army, determines that—

(1) decontamination or remediation of the lands is practicable and economically feasible, taking into consideration the potential future use and value of the land; and

(2) upon decontamination or remediation, the land could be opened to the operation of some or all of the public land laws, including the mining laws.

(d) DECONTAMINATION AND REMEDIATION ACTIVITIES SUBJECT TO OTHER LAWS.—The activities of the Secretary of the Army under subsection (c) are subject to applicable laws and regulations, including the Defense Environmental Restoration Program established under section 2701 of title 10, United States Code, the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (42 U.S.C. 9601 et seq.), and the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.).

(e) AUTHORITY OF SECRETARY OF THE INTERIOR TO CONSENT.—The Secretary of the Interior shall not be required to accept lands specified in a relinquishment notice if the Secretary of the Interior, in consultation with the Secretary of the Army, concludes that—

(1) decontamination or remediation of any land subject to the relinquishment notice is not practicable or economically feasible; or

(2) the land cannot be decontaminated or remediated sufficiently to be opened to operation of some or all of the public land laws;

or

(3) a sufficient amount of funds are not appropriated for the decontamination of the land.

(f) STATUS OF CONTAMINATED LANDS.—If, because of the condition of the lands, the Secretary of the Interior determines that of the Secretary of the Interior applicable to extension of withdrawal of lands for military purposes and that are consistent with this title. The application shall be filed with the Department of the Interior not later than four years before the end of the withdrawal period.

(1) the Secretary of the Army shall take appropriate steps to warn the public of the contaminated state of such lands and any risks associated with such lands;

(2) after the expiration of the withdrawal, the Secretary of the Interior shall retain jurisdiction over the withdrawn lands, but shall undertake no activities on such lands except in connection with the decontamination or remediation of such lands; and

(3) the Secretary of the Army shall report to the Secretary of the Interior and to the Congress concerning the status of such lands and all actions taken under paragraphs (1) and (2).

(g) SUBSEQUENT DECONTAMINATION OR REMEDIATION.—If lands covered by subsection (f) are subsequently decontaminated or remediated and the Secretary of the Army certifies that the lands are safe for nonmilitary uses, the Secretary of the Interior shall consider accepting jurisdiction over the lands.

(h) REVISION AUTHORITY.—Notwithstanding any other provision of law, upon decontamination or remediation, that it is in the national interest to accept jurisdiction over lands specified in a relinquishment notice, the Secretary of the Interior may revoke the withdrawal and reservation made under this title as it applies to such lands. If the Secretary of the Interior does not accept the relinquishment and to revoke the withdrawal and reservation, the Secretary of the Interior shall publish in the Federal Register an appropriate order which shall—

(1) terminate the withdrawal and reservation;

(2) constitute official acceptance of full jurisdiction over the lands by the Secretary of the Interior; and

(3) state the date upon which the lands will be opened to the operation of the public land laws, including the mining laws, if appropriate.

SEC. 9009. DELEGATIONS OF AUTHORITY.

(a) SECRETARY OF THE ARMY.—The functions of the Secretary of the Army under this title may be delegated.

(b) SECRETARY OF THE INTERIOR.—The functions of the Secretary of the Interior under this title may be delegated, except that an order under section 9008(h) to accept relinquishment of withdrawn lands may be approved and signed only by the Secretary of the Interior, the Deputy Secretary of the Interior, or an Assistant Secretary of the Interior.
Mr. STEVENS (for himself and Mr. DOMENICI) proposed an amendment to the bill, S. 1122, supra; as follows:

TITLE.—RENEWAL OF MILITARY LAND WITHDRAWALS

SEC. 01. SHORT TITLE.
This title may be cited as the Military Land Withholding Act of 1999.

SEC. 02. WITHDRAWALS.
(a) MCGREGOR RANGE.—(1) Subject to valid existing rights and except as otherwise provided in this title, the public lands described in paragraph (3) are hereby withdrawn from all forms of appropriation under the public land laws (including the mining laws and the mineral leasing and the geothermal leasing laws).

(b) Such lands are reserved for use by the Secretary of the Army for—
(A) military maneuvering;
(B) training for artillery firing, aerial gunnery, and infantry tactics; and
(C) such other purposes as may be directed by the Secretary of the Army, pursuant to section 2094(f), for other defense-related purposes consistent with the purposes specified in this paragraph.

(3) The lands referred to in paragraph (1) are the lands comprising approximately 838,384.87 acres in Otero County, New Mexico, as generally depicted on the map entitled “McGregor Range Withdrawal—Proposed”, dated January 1985, and withdrawn by the provisions of section 1(d) of the Military Lands Withdrawal Act of 1986. Such lands do not include any portion of the lands so withdrawn that were relinquished to the Secretary of the Interior under the provisions of that Act.

(4) Any of the public lands withdrawn under paragraph (1) which, as of the date of the enactment of this Act, are managed pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) shall continue to be managed under that section until otherwise expressly provided by law.

(b) FORT GREELY MANEUVER AREA AND FORT GREELY AIR DROP ZONE.—(1) Subject to valid existing rights and except as otherwise provided in this title, the lands described in paragraph (3) are hereby withdrawn from all forms of appropriation under the public land laws (including the mining laws and the mineral leasing and the geothermal leasing laws), under the Act entitled “An Act to provide for the admission of the State of Alaska into the Union”, approved July 7, 1958 (48 U.S.C. note prec. 21), and under the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).

(2) Such lands are reserved for use by the Secretary of the Army for—
(A) military maneuvering;
(B) training for artillery firing, aerial gunnery, and infantry tactics; and
(C) such other purposes as may be directed by the Secretary of the Army, pursuant to section 2094(f), for other defense-related purposes consistent with the purposes specified in this paragraph.

(3) The lands referred to in paragraph (1) are the lands comprising approximately 247,931.67 acres of land in the Fourth Judicial District, Alaska, as generally depicted on the map entitled “Fort Wainwright Maneuver Area Withdrawal—Proposed”, dated January 1985, and withdrawn by the provisions of section 1(d) of the Military Lands Withdrawal Act of 1986. Such lands do not include any portion of the lands so withdrawn that were relinquished to the Secretary of the Interior under the provisions of that Act.

(4) Any of the public lands withdrawn under paragraph (1) which, as of the date of the enactment of this Act, are managed pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) shall continue to be managed under that section until otherwise expressly provided by law.

(c) FORT WAINWRIGHT MANEUVER AREA.—(1) Subject to the requirements of section 2094(f), other defense-related purposes consistent with the purposes specified in this paragraph.

(2) The lands referred to in paragraph (1) are the lands comprising approximately 247,931.67 acres of land in the Fourth Judicial District, Alaska, as generally depicted on the map entitled “Fort Wainwright Maneuver Area Withdrawal—Proposed”, dated January 1985, and withdrawn by the provisions of section 1(d) of the Military Lands Withdrawal Act of 1986. Such lands do not include any portion of the lands so withdrawn that were relinquished to the Secretary of the Interior under the provisions of that Act.

(d) Reimbursement.—The Secretary of Defense shall reimburse the Secretary of the Interior for any costs incurred by the Secretary of the Interior in carrying out this section.

SEC. 04. MANAGEMENT OF WITHDRAWN LANDS.
(a) Management by Secretary of the Interior.—(1)(A) The Secretary of the Interior shall manage the lands withdrawn by this title under the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and other applicable law, including the Recreation Use of Wildlife Areas Act of 1962 (16 U.S.C. 690k et seq.) and this title. The Secretary shall manage such lands through the Bureau of Land Management.

(2) To the extent consistent with applicable law and Executive orders, the lands withdrawn by this title may be managed in a manner permitting—
(A) the continuation of grazing pursuant to applicable law and Executive orders where permitted on the date of the enactment of this Act;
(B) protection of wildlife and wildlife habitat;
(C) control of predatory and other animals; and
(D) recreation; and
(E) the prevention and appropriate suppression of brush and range fires resulting from nonmilitary activities.

(3)(A) All nonmilitary use of the lands withdrawn by this title, other than the uses described in subsection (d), shall be subject to such conditions and restrictions as may be necessary to permit the military use of such lands for the purposes specified in or authorized pursuant to this title.

(B) The Secretary of the Interior may issue any lease, easement, right-of-way, or other authorization with respect to the nonmilitary use of such lands only with the concurrence of the Secretary of the military department concerned.

(b) Closure to Public.—(1) If the Secretary of the military department concerned determines that military operations, public safety, or national security require the closure to public use of any road, trail, or other public facility on the lands withdrawn by this title, that Secretary may take such action as that Secretary determines necessary to effect and maintain such closure.

(2) Any such closure shall be limited to the minimum areas and periods which the Secretary of the military department concerned determines are required to carry out this subsection.

(3) During any closure under this subsection, the Secretary of the military department concerned shall—
(A) keep appropriate warning notices posted; and
(B) take appropriate steps to notify the public concerning such closures.

(c) Management Plan.—(1)(A) The Secretary of the Interior (after consultation with the Secretary of the military department concerned) shall develop a plan for the management of each area withdrawn by this title.

(2) Each plan shall—
(A) be consistent with applicable law;
(B) be subject to conditions and restrictions specified in subsection (a)(3); and
(C) include such provisions as may be necessary for proper management and protection of the resources and values of such areas.

(3) The Secretary of the Interior shall develop each plan required by this subsection no later than three years after the date of the enactment of this Act. In developing a plan for an area, the Secretary may utilize or modify appropriate provisions of the management plan developed for the area under section 3(c) of the Military Lands Withdrawal Act of 1986.

(d) Brush and Range Fires.—(1) The Secretary of the military department concerned shall take necessary precautions to prevent and suppress brush and range fires occurring
within and outside the lands withdrawn by this title for military uses other than those described in section 2908(g) may be approved and signed into law by the President, other than in the case of the Secretary of the Interior who has the power to make such determination regarding the contamination of such lands under subsection (a) in consultation with the Secretaries of the Interior and Defense.

The Secretary of the Interior shall carry out a program to provide for the environmental decontamination of such lands as of the date of the enactment of this Act.

SEC. 07. ONGOING ENVIRONMENTAL RESTORATION.

(a) REQUIREMENT.—To the extent provided in advance in appropriations Acts, the Secretary of the military department concerned shall carry out a program for the environmental restoration of the lands withdrawn by this title.

(b) REPORTS.—(1) At the same time the President submits to Congress the budget for any fiscal year after fiscal year 2000, the Secretary of the Interior shall provide Congress a report on the analysis. The report shall satisfy the requirements of section 2706(a) of title 10, United States Code, with respect to the activity described in subsection (a).

(2) The committees referred to in paragraph (1) are the Committees on Appropriations, Armed Services, and Resources of the House of Representatives (in lieu of the Committee on Appropriations of the Senate).

SEC. 08. RELINQUISHMENT.

(a) AUTHORITY.—The Secretary of the military department concerned may relinquish any lands withdrawn by this title to the Secretary of the Interior.

(b) NOTICE.—If the Secretary of the military department concerned determines to relinquish any lands withdrawn by this title under subsection (a), that Secretary shall transmit to the Secretary of the Interior a notice of intent to relinquish such lands.

(c) DETERMINATION OF CONTAMINATION.—(1) Before transmitting a notice of intent to relinquish any lands under subsection (b), the Secretary of Defense, acting through the Secretary of the military department concerned, shall determine, to the extent provided in advance in appropriations Acts, the extent to which such lands are contaminated with explosive, toxic, or other hazardous substances.

(2) A copy of a determination with respect to any lands under paragraph (1) shall be transmitted to the Secretary of the Interior together with the notice of intent to relinquish such lands under subsection (b).

(d) DISCONTAMINATE.—(1) If any land subject to a notice of intent to relinquish under subsection (a) is contaminated, and the Secretary of the Interior, in consultation with the Secretary of the military department concerned, makes the determination described in paragraph (2), the Secretary of the Interior, in consultation with the military department concerned, shall carry out a program to decontaminate the land.

(2) A determination referred to in this paragraph is a determination that—

(A) decontamination of the land concerned is practicable and economically feasible (taking into consideration the potential future use and value of the land); and

(B) upon decontamination, the land could be opened to operation of some or all of the public land laws, including the mining laws.

(e) ALTERNATIVES.—(1) If a circumstance referred to in paragraph (2) arises with respect to any land which is covered by a notice of intent to relinquish under this title, the Secretary of the Interior shall not be required to accept the land under this section.

(2) A circumstance referred to in this paragraph is—

(A) a determination by the Secretary of the Interior, in consultation with the Secretary of the military department concerned that—

(i) decontamination of the land is not practicable or economically feasible; or

(ii) the land cannot be decontaminated to a sufficient extent to provide for the operation of some or all of the public land laws; or

(B) the appropriation by Congress of amounts that are insufficient to provide for the decontamination of the land.

(f) STATUS OF CONTAMINATED LANDS.—If, because of their contaminated state, the Secretary of the Interior declines to accept jurisdiction over lands withdrawn by this title which have been proposed for relinquishment under subsection (a), the Secretary of the military department concerned shall take appropriate steps to warn the public of the contaminated state of such lands and all risks associated with entry onto such lands.

(2) The Secretary of the military department concerned shall report to the Secretary of the Interior and to Congress the status of such lands and all actions taken in furtherance of this subsection.

(g) REVOKE OR AUTHORITY.—(1) Notwithstanding any other provision of law, the Secretary of the Interior may, upon finding that it is in the public interest to accept jurisdiction over lands proposed for relinquishment pursuant to subsection (a), revoke the withdrawal established by this title as it applies to such lands.

(2) Should the decision be made to revoke the withdrawal, the Secretary of the Interior shall publish in the Federal Register an appropriate order which shall—

(A) terminate the withdrawal;

(B) constitute official acceptance of full jurisdiction over the lands by the Secretary of the Interior; and

(C) state the date upon which the lands will be added to the operation of some or all of the public land laws, including the mining laws.

(h) TREATMENT OF CERTAIN RELINQUISHED LANDS.—Any lands withdrawn by section 2902(c) or 2902(d) that are relinquished under this section shall be public lands under the jurisdiction of the Bureau of Land Management and shall be considered vacant, unserved, and unappropriated for purposes of the public land laws.

SEC. 09. DELEGABILITY.

(a) DEFENSE.—The functions of the Secretary of the Interior concerning the Secretary of a military department under this title may be delegated.

(b) INTRUDER.—The functions of the Secretary of the Interior under this title may be delegated, except that an order described in section 2706(g) may be approved and signed by the Secretary of the Interior, the Under Secretary of the Interior, or an Assistant Secretary of the Interior.

SEC. 10. WATER RIGHTS.

Nothing in this title shall be construed to establish a reservation to the United States with respect to any water or water right on the lands described in section 2902. No provision of this title shall be construed as authorizing the appropriation of water on lands described in section 2902 by the United States after the date of the enactment of
this Act except in accordance with the law of the place which lands described in section 2902 are located. This section shall not be construed to affect water rights acquired by the United States before the date of the enactment of this Act.

SEC. 11. HUNTING, FISHING, AND TRAPPING.

All hunting, fishing, and trapping on the lands withdrawn by this title shall be conducted in accordance with the provisions of section 2971 of title 10, United States Code.

SEC. 12. MINING AND MINERAL LEASING.

(a) DETERMINATION OF LANDS SUITABLE FOR OPENING LANDS.—On the day specified by the Secretary of the Interior in a notice published in the Federal Register pursuant to subsection (a), the land identified under subsection (a) as suitable for opening to the operation of the Mining Law of 1872, the Mineral Lands Leasing Act of 1920, the Mineral Leasing Act for Acro canonical Lands of 1920, the Geothermal Steam Act of 1970, or any one or more of such Acts.

(b) OPENING LANDS.—On the day specified by the Secretary of the Interior in a notice published in the Federal Register pursuant to subsection (a), the land identified under subsection (a) as suitable for opening to the operation of one or more of the laws specified in subsection (a) shall automatically be open to the operation of such laws without the necessity for further action by the Secretary or Congress.

(c) EXCEPTION FOR COMMON VARIETIES.—No deposit of minerals or materials of the types identified by section 3 of the Act of July 23, 1872, or any lands opened pursuant to this section, the terms or provisions of the Mining Law of 1872 shall be liable for any injuries or damage to persons or property suffered in the course of any mining or mineral or geothermal leasing activity conducted on lands described in section 2902.

NOTICES OF HEARINGS

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Ms. COLLINS. Mr. President, I would like to announce for the public that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs, will hold a hearing entitled “Home Health Care: Will the New Payment System & Regulatory Overkill Hurt Our Seniors?” This Subcommittee hearing will focus on how the new Medicare Interim Payment System and new regulatory requirements from the Health Care Financing Administration may limit the access of beneficiaries most in need of home health services.

The hearing will take place on Thursday, June 10, 1999, at 2:00 p.m., in Room 342 of the Dirksen Senate Office Building. For further information, please contact Lee Blalack of the Subcommittee at (202) 224-6901.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. MURKOWSKI. Mr. President, I would like to announce for the public that the Senate Committee on Energy and Natural Resources will hold a hearing on Tuesday, June 8, 1999, at 9:30 a.m. in room SD-366 of the Dirksen Senate Office Building in Washington, D.C.

The purpose of this hearing is to receive testimony on fire preparedness on Federal lands. Specifically, what actions the Bureau of Land Management and the Forest Service are taking to prepare for the fire season; whether the agencies are informing the public about these plans; and ongoing research related to wildfire and fire suppression activities.

Those who wish to submit written testimony should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C. 20510. For further information, please contact Mike Menge (202) 224-6170.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. CRAIG. Mr. President, I would like to announce for the public that a full committee hearing on S. 1049, the “Federal Oil and Gas Lease Management Improvement Act of 1999,” scheduled for June 17, 1999 at 9:30 a.m. in room SD-366 of the Dirksen Senate Office Building has been postponed and will be rescheduled for a later date to be announced by the committee.

For further information please contact Dan Kish, of the professional staff, at (202) 224-8276.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Tuesday, June 8, 1999, at 9:30 a.m. in open session, to consider the nominations of General Eric K. Shinseki, USA, for reappointment to the grade of general and for appointment as Chief of Staff, United States Army; and Lieutenant General James L. Jones, Jr., USMC, to be general and for appointment as Commandant of the Marine Corps.

STATEMENT OF THE PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized
June 8, 1999

CONGRESSIONAL RECORD—SENATE 11919

Mr. BURNS. Mr. President, as the Senate proceeds with its debate on the Defense Appropriations Bill, it is appropriate that we pause and recognize the contribution of a Defense Procurement Official on the occasion of his retirement. Colonel William Alexander—is retiring this month after an Air Force career spanning almost 30 years. Alex has spent much of his career leading and mentoring Defense Acquisition Professionals, leaving as his legacy a new generation of experienced procurement managers.

Born in the baby boom era between WWII and the Korean War, Alex grew up in Indiana, where he attended DePauw and Indiana Universities. After completing his Masters Degree in 1970, he entered the Air Force at Wright-Patterson Air Force Base in Dayton, Ohio. Some of his early projects started the development for today's generation of precision guided weapons. It was a whole lot trickier then, without the advantage of the Global Positioning System, but his team worked to develop a way to triangulate a target designation to improve bomb targeting reliability.

These Air Force recognized the contributions of this young officer and moved him into a career in procurement and satellite operations. Alex spent the next 20 years of his career moving between different aspects of the complex world of keeping satellites operating successfully on orbit. He was involved in a number of software source selections, using his abilities to aid the Air Force in getting revolutionary operating software for its expanding fleet of satellites. After his work in operations, the Air Force wisely transferred him into the National Reconnaissance Office as the Director of the Acquisition and Engineering Group within the Communications System Acquisition and Operations Directorate. When the Deputy Director of the Communications Directorate was reassigned, Alex was selected for this position in light of his vast experience in successful acquisitions.

However, I don't want to spend too much time discussing the technical details of Colonel's career. There are many successful procurement officials within the Air Force and the Department of Defense, but few are as widely recognized for their crafting of personnel in addition to their acquisition expertise. Although the project was always treated with importance, Alex always made sure that his people came first. He was always looking to find ways to challenge his staff to grow both in technical ability and in interpersonal relationships. His success gives credence to the philosophy of empowering and caring for your people, which ultimately leads to the program success. One night during his time in satellite operations, a satellite was having difficulties getting initialized. Scores of people were working around the clock trying to work through the complex issues involved. Recognizing that people do not perform at their best when they are exhausted, Colonel Alexander banished a number of people from the operations floor until they had a rest period. The engineers returned to the floor with clearer heads and ultimately were able to get the satellite up and running successfully on orbit.

When there was a tragic death of an employee on official travel, Alex temporarily set aside his own grief to assist others in the office in addition to the employee's family. In the confusion that surrounded the funeral, Alex took time to help the family members try to help them understand the events that had taken place. It was a difficult time for all involved, but Alex clearly demonstrated his caring for his co-workers and should be commended for his actions.

One area where Colonel Alexander should be especially proud is in his initiatives for acquisition reform. Alex was always driving to improve all aspects of buying satellites and software, blending old methods with new ideas. Under his leadership, a security rebaselining was started which resulted in his program appearing on CBS’ Eye on America. His drive in this area has literally saved the federal government millions of dollars.

Finally, I want to thank Colonel Alexander for one final initiative. After being nominated for a Congressional Fellowship by Colonel Alexander, a member of his staff has joined my staff for the legislative year. This staff member has been of great assistance already in the Defense bills that have gone to the floor, and I look forward to his continuing contribution through the rest of the Senate's session.

I'm sure that there are still many details for Colonel Alexander to work out as he transitions to a "former" military life. I wish him the best in his endeavors and pass along a sincere thank you on behalf of Congress for his outstanding service to our nation’s defense. I commend for his actions.

The Air Force recognized the contributions of this young officer and moved him into a career in procurement and satellite operations. Alex spent the next 20 years of his career
Since 1973, the Fenway CDC has worked skillfully to improve the quality of life in the community, actively encouraging residents to participate in decisions that affect it. Under its leadership, residents from different cultures, age groups, and income levels have all come together for a better Fenway. I commend them for what they have done to empower people and strengthen the fabric of their neighborhoods.

A large part of this success comes from many activities to improve life in the Fenway. Protecting existing housing, actively seeking opportunities to develop affordable new housing, pursuing commercial development that meets the needs of the neighborhood—all of these are essential parts of the mission.

Other activities include homebuyer counseling—the afterschool programs and playground renovation for neighborhood youth through the Fenway Family Coalition—the computer training and job opportunities with local employers through the Work to Walk Program—and the Senior Task Force, which maintains affordable housing for low income elderly residents, as well as blood pressure screenings and recreation facilities available at the Peterborough Senior Center. All of these programs have contributed immensely to the quality of life in the Fenway neighborhood, and the Corporation deserves great credit for these achievements.

Fenway CDC is a respected leader of CDCs nationwide. I congratulate them for 25 years of skillful work and real results, and I know that the next 25 years will be just as successful.

TRIBUTE TO THE LOON MOUNTAIN RECREATION CORPORATION

Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Loon Mountain Recreation Corporation—the computer training and job opportunities with local employers through the Work to Walk Program—and the Senior Task Force, which maintains affordable housing for low income elderly residents, as well as blood pressure screenings and recreation facilities available at the Peterborough Senior Center. All of these programs have contributed immensely to the quality of life in the Fenway neighborhood, and the Corporation deserves great credit for these achievements.

As a senior member of the Senate Environment and Public Works Committee, I realize the impact that industrialism can have upon the environment, and I am excited to see businesses such as Loon Mountain working hard to minimize these impacts. I commend the Loon Mountain Recreation Corporation for their environmental awareness, and I am proud to represent them in the U.S. Senate.

Andre Agassi

Mr. BRYAN. Mr. President, I rise today to recognize the historic event that took place this past weekend in Paris when Las Vegas’s own Andre Agassi captured the 1999 French Open Championship. Andre’s completion of the career Grand Slam secures him a place in the pantheon of players that only five other men can claim, and as a testament to his versatility, he is the only person to accomplish this feat on three different surfaces—hardcourt, grass, and clay. He is the first American in 61 years to win all four majors— Wimbledon in 1992, the U.S. Open in 1994, the Australian Open in 1995, and now the French—and his victory will soon catapult him to No. 4 in the world rankings.

As great as Andre’s accomplishments have been on the court throughout his career, they are, in my opinion, overshadowed by the generosity and compassion he has shown off the court. Andre’s commitment to at-risk and underprivileged youth has been a passion of his throughout his tennis career. His establishment of the Andre Agassi Foundation in 1994 to support and fund programs that serve underprivileged kids has provided much needed assistance to a variety of service organizations that work with underprivileged youth in the Las Vegas area, including the Boys & Girls Clubs in Las Vegas, the Assistance League of Las Vegas, and Child Haven. Since its inception, the Agassi Foundation has donated over $5 million to local youth charities.

In today’s world of professional sports, it is always refreshing to see an athlete who recognizes the blessings and opportunities he has received, and has chosen to give something back to his community. Andre Agassi’s charity and love for his fellow man.

TRIBUTE TO MEYER “MIKE” BERMAN

Mr. MOYNIHAN. Mr. President, I rise today to pay tribute to Meyer “Mike” Berman, a World War II veteran who demonstrated unusual heroism during his two years of service in the United States Army.

Mike Berman, Private First Class, served as part of the 12th Infantry Regiment during World War II. An outstanding soldier, he was decorated with the Good Conduct Medal, the Bronze Star Medal with one Oak Leaf Cluster, the World War II Victory Medal and Ribbon, the European African Middle Eastern Campaign Medal, and a Ribbon with one Silver Service Star.

However, the accomplishment Mike Berman is proudest of is the time he saved the life of his friend, Private John Buyers. While artillery shells were coming from all directions, Mike Berman rushed to the aid of Private Buyers, who had been gravely injured. Mike Berman singlehandedly carried Private Buyers by foot to the service jeep that transported him to medical aid. I ask that Private Buyers’ letter expressing the gratitude he felt towards Private Berman be having his life be printed in the RECORD.

The letter follows:

England: Oct: 29th 1944

Mr. Berman,

The letter follows:

England: Oct: 29th 1944

Dear Mike,

Just a few lines to say hello and let you know I’m coming along pretty good. I just wanted to thank you for what you done for me the day I got hit. I’ll never forget it. If it hadn’t been for you, I wouldn’t be living today. That’s why I’ve had three operations so far and I’m pretty weak, but I’ll live through it. I won’t be with you boys’ any more but tell them all hello for me. Please write to me if you get a chance.

Well, Mike, be good and take care of your self. I sure didn’t last long, did I? Oh well! It was all in the cards I guess. Please excuse my writing. I can do better but I’m pretty nervous these days. Once again thanks for what you done for me and maybe some day, I’ll be able to sort of square things up.

So long.

Cordially,

Mr. MOYNIHAN. It is particularly appropriate with the recent celebration of Memorial Day that we pay homage to truly courageous individuals like Mike Berman, whose faith in democracy and freedom for mankind have helped make our nation as great as it is today.

The worst of times often best reveals the character of an individual. In the worst of times, Mike Berman proved that we all love for a fellow man. He went beyond the call of duty when no one else dared to.

Having come from an immigrant family, Mr. Berman’s achievements illustrate the American dream and desire America’s immigrants to create a better future in their newly adopted country. Our recognition of Mr. Berman reminds us of the tremendous contribution that immigrants have made in the American Nation. This diverse group of extraordinary, enterprising, and self-sufficient individuals have continuously served to strengthen the United States.

DEAR MIKE: Just a few lines to say hello and let you know I’m coming along pretty good. I just wanted to thank you for what you done for me the day I got hit. I’ll never forget it. If it hadn’t been for you, I wouldn’t be living today. That’s why I’ve had three operations so far and I’m pretty weak, but I’ll live through it. I won’t be with you boys’ any more but tell them all hello for me. Please write to me if you get a chance.

Well, Mike, be good and take care of your self. I sure didn’t last long, did I? Oh well! It was all in the cards I guess. Please excuse my writing. I can do better but I’m pretty nervous these days. Once again thanks for what you done for me and maybe some day, I’ll be able to sort of square things up.

So long.
CONGRESSIONAL RECORD—SENATE

June 8, 1999

APPOINTMENT OF CONFEREES—H.R. 1554

Mr. STEVENS. I move that with respect to H.R. 1554, the Senate insist on its amendment, request a conference with the House, and further, the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed from the Judiciary Committee: Mr. HATCH, Mr. THURMOND, Mr. DEWINE, Mr. LEAHY, and Mr. KOHL; from the Commerce, Science and Transportation Committee: Mr. MCCAIN, Mr. STEVENS, and Mr. HOLLINGS conferees on the part of the Senate.

ORDERS FOR WEDNESDAY, JUNE 9, 1999

Mr. STEVENS. Mr. President, I ask unanimous consent when the Senate completes its business today, it stand in adjournment until 9:30 a.m. on Wednesday, June 9. I further ask that on Wednesday, immediately following the prayer, the Journal of proceedings be approved to date, the morning hour be deemed to have expired, and the time for the two leaders be reserved for their use later in the day.

I further ask consent there then be a period of morning business until 11 a.m., with Senators permitted to speak up to 30 minutes each, with the following exceptions: Senator COLLINS, 20 minutes; Senator SMITH of New Hampshire, 10 minutes; Senator DURBIN or his designee, 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. As I understand it, the consent that was just entered into means Senator MCCAIN will be recognized at the close of that period of morning business. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. I further ask unanimous consent that at 11 a.m. the Senate begin consideration of S. 96, the Y2K legislation, in accordance with that agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. STEVENS. For the information of all Senators, the Senate will be in a period of morning business until 11 a.m. tomorrow. By previous consent, the cloture vote on the motion to proceed to S. 96 has been vitiated, and at 11 a.m. the Senate will begin debate on the important Y2K legislation. Hopefully, the Senate will make substantial progress throughout the day, and therefore votes on amendments can be expected.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. STEVENS. If there is no further business to come before the Senate, I now ask the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 6:52 p.m., adjourned until Wednesday, June 9, 1999, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate June 8, 1999:

FEDERAL HOUSING FINANCE BOARD

FRANZ S. LEICHTER, OF NEW YORK, TO BE A DIRECTOR OF THE FEDERAL HOUSING FINANCE BOARD FOR A TERM EXPiring FEBRUARY 27, 2006, VICE DANIEL F. EVANS, JR., TERM EXPIRED.

DOUGLAS L. MILLER, OF SOUTH DAKOTA, TO BE A DIRECTOR OF THE FEDERAL HOUSING FINANCE BOARD FOR A TERM EXPiring FEBRUARY 27, 2002, VICE LAWRENCE U. COSTIGLIO, TERM EXPIRED.
The House met at 9 a.m. and was called to order by the Speaker pro tempore (Mr. Gibbons).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC.
June 8, 1999.
I hereby appoint the Honorable Jim Gibbons to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

MORNING HOUR DEBATES

The SPEAKER pro tempore. Pursuant to the order of the House of January 19, 1999, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to 25 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to 5 minutes each, but in no event shall debate continue beyond 9:30 a.m.

The Chair recognizes the gentleman from Texas (Mr. DOGGETT) for 5 minutes.

THE ABUSIVE TAX SHELTER SHUTDOWN ACT OF 1999

Mr. DOGGETT. Mr. Speaker, long ago, Will Rogers suggested that, "people want just taxes even more than they want lower taxes. They want to know that every man is paying his proportionate share according to his wealth."

Today, some of our worst tax inequities arise from those who use abusive tax shelters to exploit loopholes in the Tax Code. To stop these, and to make our tax system more fair and just, I am introducing the Abusive Tax Shelter Shutdown Act of 1999.

Forbes Magazine, which proudly proclaims itself "The Capitalist Tool," recently reported on, as the cover of the magazine says, what are called "Tax Shelter Hustlers: Respectable accountants are peddling dicey corporate tax loopholes." Here on the cover, we see the fellow with the fedora standing in the shadows. Unlike those supermarket tabloid stories about UFO abductions, with this particular cover, the substance inside actually lives up to the teaser on the cover. It is true that most abusive tax shelters are already against the law. The problem is that every time we shut down one, more spring up. That is not by accident because, as Forbes also reported, some of the Big 5 accounting firms actually have teams of staffers, and my guess is that most abusive tax shelters are better than this fellow does, who are out there and have as their job to come up with one new tax shelter every single week.

Deploring what he calls the "energy, creativity and viciousness" of these so-called "shelter shops," Calvin Johnson, a professor of tax law at the University of Texas, has labeled these hustling operations "skunk works" because of the sorry offer specialists and their feeling of our tax system. The literal hustling of improper tax shelters is so commonplace that one representative of a Texas-based multinational corporation has recently indicated that he gets a cold call every day from someone hawkling or hustling one of these shelters.

Some are even called black box proposals. They are kept under wraps and are not offered to any but a select few so as to avoid public notoriety. As a partner at one national firm boasted, "A whale cannot get harpooned unless it surfaces for air."

What a whale-sized gulp of arrogance toward honest taxpayers everywhere who dutifully file their returns on April 15 and who have to make up for the taxes that the big boys dodge.

My legislation will curtail egregious behavior without impacting legitimate business deals. It will eliminate the well-justified feeling that these high rollers are cheating and gaming the system, a feeling which leads to distrust and disrespect on behalf of our taxpaying public.

This bill seeks to shut down abusive tax shelters by prohibiting loss generators, these are transactions that lack any legitimate business purpose that are ginned up just to obtain another tax loss, credit or deduction in order to dodge taxes.

The second thing the bill does is it says that a company which thinks it has a proper shelter will be required to provide complete, clear and concise disclosure verified by a corporate officer. This does not make them forfeit their buried pirate treasure but on these complex transactions it does require them to give up the map where X marks the spot of the treasure.

These disclosure provisions were drafted based on the sound advice of tax practitioners; not the kind of practitioner that is proud to define their success by having another loophole named after them, but the thoughtful commentary of the tax section of the American Bar Association.

The third provision is directed to the penalty for tax dodging, and we tighten and increase the penalty for such tax dodging. Just getting some thick carpet, downtown lawyer to bless what the accounting department has contrived with the help of these tax shelter hustlers is no longer going to be sufficient to save a corporation from penalties if it has clearly stepped over the line with an abusive tax shelter.

These abusive tax shelters have grown and have become so extensive that some experts estimate that they account for $10 billion a year in lost tax revenue. Typical is a recent ad selling a guide to offshore tax shelters that ran in the Wall Street Journal. Featuring a happy, smiling, bikini-clad couple, sipping cocktails on the beach, obviously enjoying the good life at someone else's expense, the ad promised, "Live simply and easily make a tax-free fortune using the world's most exotic places," and you can do all this, it claimed, "in complete privacy and full protection from everyone, including your spouse, competitors, partners and more."

Such schemes suggest the challenge that we face. Surely if locally owned businesses in central Texas can play by the rules, the big boys should, too. The Abusive Tax Shelter Shutdown Act is not a panacea but it will help law enforcement close some loopholes, eliminate the sham transactions and stop the hustlers.

As we say in Texas, move 'em out and shut 'em down.

TURKEY MUST ACCEPT KURDISH PEACE OFFER

The SPEAKER pro tempore. Under the Speaker's announced policy of January 19, 1999, the gentleman from New Jersey (Mr. PALLONE) is recognized during morning hour debates for 5 minutes.

Mr. PALLONE. Mr. Speaker, there are some who call it the "trial of the century." Abdullah Ocalan, the imprisoned Kurdish rebel leader, is on trial before a Turkish military tribunal. The trial could hardly be called fair. Mr. Ocalan, who faces the death penalty if convicted, has been denied access to his lawyers. His legal team has faced a pattern of harassment and threats.

This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.
The Turkish government and media have stirred up nationalist passions against Mr. Ocalan. If the Turkish government stands with illegally railroading Mr. Ocalan and the threat to hang him is carried out, the result would be disastrous for all the people of the region. Yet interestingly enough, the trial of Mr. Ocalan has created a potentially positive and long overdue opening towards reconciliation between the Turkish and Kurdish peoples.

Standing in the dock at his show trial, Mr. Ocalan made a brave plea for a negotiated, Democratic solution to the Kurdish question. Mr. Ocalan’s organization, the Kurdish workers’ party known as the PKK, has announced its support for Mr. Ocalan’s peace offer. With the media attention that the trial is attracting, putting the Kurdish issue in the spotlight to an almost unprecedented degree, Turkey could vastly improve its international standing by simply agreeing to begin negotiations with the Kurdish leaders but, sadly, Mr. Speaker, so far the Turkish government has rejected the path to peace insisting that it will not negotiate with Mr. Ocalan or any leaders of the Kurdish movement.

Yesterday’s Washington Post had an editorial entitled, “Turkey’s Kurdish Opening,” which begins with these words: “Turkey may have a once in a generation opening to treat its national cancer, the problem of its aggrieved Turkish minority.”

The editorial in the Post, a paper that has previously shown sympathy to the Turkish point of view on a number of issues, notes that the Turkish policy of relentless military and political attack on the Kurdish movement dooms Turkey to a conflict that sets it at odds with the human Democratic values of the western nations whose company it most values.

That is the point, Mr. Speaker, that Turkey has put itself into. Turkey is a member of NATO and has sought membership in the European Union, so far unsuccessfully. At the same time, Turkey continues not only to wage a dirty war against a minority community within its borders but to repress and essentially deny the existence of a distinct Kurdish identity, language or culture.

In the meantime, Turkey’s economic development, levels of education, infrastructure, development and standard of living, lag far behind European standards while scarce resources are squandered on its ongoing war against the Kurds. It is a cycle that must be broken.

As The Washington Post editorial concludes, “Friends of Turkey must hope it can muster the courage to broaden its perspective and to conduct an honest exploration of the Ocalan initiative.”

Mr. Speaker, two recent articles in the New York Times suggest unfortuently that the Turkish political and military establishment is a long way from making this major leap. Last Friday’s editorial printed a potentially positive and long overdue opening towards reconciliation between the Turkish and Kurdish peoples.

What was his subversive activity? Mr. Birdal, chairman of the Human Rights Association, has repeatedly urged the Turkish state to reach a peaceful settlement with Kurdish rebels. Now, as the article reports, such statements constitute support for terrorism under Turkish law. This same law has recently been used to convict two journalists, a university professor and an aide to Mr. Birdal. While some brave Turks, including the country’s top judge, have called for repeal of the law, the hardline regime refuses to give in.

Mr. Speaker, in an effort to encourage the U.S. Government to play a constructive role in the ugly crisis in Turkey, my colleague, the gentlewoman from California (Mr. FILNER) and I, are circulating a letter this week asking our colleagues to sign a letter to President Clinton urging his intervention to implore that the Turkish authorities show some basic fairness in trying Mr. Ocalan and to spare his life. Seeking a fair trial for Mr. Ocalan should be the first step in our efforts to press Turkey to enter into negotiations to achieve a political solution to this tragic struggle.

Mr. Ocalan and his Kurdish organization have offered an olive branch to the Turkish government. It would be both the decent and the smart thing to do for Turkey to accept this good faith offer and to embark on the path of peace.

In fact, Mr. Speaker, Mr. Ocalan made several previous cease-fire offers prior to his arrest—all of which were summarily rejected by the Turkish government and military officials.

An article in Sunday’s New York Times further describes the hardening of official attitudes in Turkey. According to the article, the Turkish Interior Ministry has issued a directive listing terms that must be used when discussing Mr. Ocalan, his movement or Kurds in general. The rules are binding on all reporters for state-run news agencies. It represents another example of the ongoing pattern of inciting nationalistic fear and distrust of the PKK, while trying to blind the Turkish people to the Kurds, the history of their struggle.

Mr. Speaker, the Turkish regime refuses to even acknowledge the Kurds’ existence, referring to them as “mountain Turks,” prohibiting all expression of Kurdish culture and language in an effort to forcibly assimilate them, while jailing hundreds of Kurdish leaders. The Government of Turkey’s undeclared war on the Kurds has claimed close to 40,000 lives and caused more than 3 million people to become refugees.

The SPEAKER pro tempore. There being no further requests for morning hour debates, pursuant to clause 12, rule I, the House will stand in recess until 10 a.m.

Accordingly (at 9 o’clock and 11 minutes a.m.) the House stood in recess until 10 a.m.

THE JOURNAL

The SPEAKER pro tempore (Mr. SHAW), The Chair has examined the Journal of the last day’s proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. GIBBONS. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair’s approval of the Journal.

The SPEAKER pro tempore. The question is on the Chair’s approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GIBBONS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.
PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Michigan (Mr. KOLLENBURG) come forward and lead the House in the Pledge of Allegiance.

Mr. KOLLENBURG led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

INTRODUCING THE GUEST CHAPLAIN

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, I take this opportunity to introduce to the House the guest chaplain who is with us today, the Reverend Dr. Peter M. Kurowski. The Reverend is affectionately referred to as "Pastor Pete" by his congregation at St. Paul's Lutheran Church in California, Missouri, which is located in Missouri's Fourth Congressional District.

In recent years, I have had the privilege of getting to know Pastor Pete through our discussions of history and the Missouri Tigers. I have found his spiritual guidance to be uplifting as well as inspirational. Pastor Pete, along with his wife of 25 years, Janice, continue to make such an outstanding contribution to their communities.

A native of Green Bay, Wisconsin, Pastor Pete has attended Oshkosh State University, Concordia College and Fort Wayne Senior College. He later attended Concordia Seminary in St. Louis, Missouri.

He has served congregations in St. Louis, Missouri, Joylton, Illinois, and New Orleans, Louisiana, prior to serving the California, Missouri community.

Pastor Pete is the author of the book, Lifelines of Love, and has done script writing for the Lutheran Layman League animated video "Red Boots for Christmas." He has also written a number of theological and sports articles for various periodicals.

I am truly proud to have such a distinguished leader from California, Missouri give the opening prayer to my colleagues here in the House this morning.

VOTE "NO" ON H.R. 45, NUCLEAR WASTE POLICY ACT OF 1999

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, the Committee on Commerce recently amended H.R. 45, the Nuclear Waste Policy Act of 1999 to exempt the $8 billion Nuclear Waste Fund from the Budget Enforcement Act. So what does this mean?

Well, this move to take the nuclear waste budget off-budget would open the floodgates to unrestricted, uncontrollable spending.

By taking H.R. 45 off-budget, we will permit funding increases without the necessary offsets and provide for little or no congressional oversight and accountability, all in the name of nuclear waste.

By fragmenting the budget to accommodate nuclear waste interests, we would set a dangerous precedent that every other trust fund would undoubtedly attempt to follow.

As Members of Congress, we should be concerned about any erosion of our commitment to budget discipline. Let us not forget that there are several hundred trusts and special funds in existence today, with only Social Security receiving this special status of off-budget.

I would encourage my colleagues to uphold their commitment to fiscal responsibility and vote "no" on H.R. 45. Let us not make nuclear waste more important than our Social Security, Medicare, seniors and children.

CRA IS A VITAL SUCCESS STORY

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, the Community Reinvestment Act is a success. Community reinvestment means banks responding to creditworthy applicants in their local neighborhoods or towns.

Congress must maintain this vital policy, not undercut it.

CRA means safe and sound business for financial institutions. That is the policy requirement of the 1977 law. CRA’s bank success is meeting people opportunities that safe and sound business represents.

In my home district, the University National Bank is serving Frogtown, an inner-city community in St. Paul. This bank has received an outstanding CRA rating for its efforts.

Amazingly, over 70 percent of the loans in University Bank’s portfolio qualify for CRA. Of the millions of dollars these loans represent, they have had losses totaling only $300. These loans happened because every year University Bank officers are required to make 500 calls, person-to-person, getting outside the bank.

In telling the story of improving the urban community, Bill Reiling, the owner and president of the University National Bank, states and I quote, “Behind every statistic is a human success story with repercussions that echo and multiply a dozen-fold. How do you measure the impact of a successful new retail business that brings a new job base? How do you measure the positive effect of revitalizing a decaying neighborhood?”

Mr. Speaker, that is CRA. That is how we measure it.

COMMUNITY REINVESTMENT ACT HAS BEEN SUCCESSFUL

(Mr. LaFAFEC asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LaFAFEC. Mr. Speaker, the Community Reinvestment Act was created by the Congress in 1977 to combat discrimination by encouraging federally insured financial institutions to help meet the credit needs of the communities they serve. I am here today to report that the Community Reinvestment Act, or CRA, has been a tremendous success.

CRA’s success results from the effective partnerships of municipal leaders, local development advocacy organizations, and community-minded financial institutions. Working together, the CRA has proven that local investment is not only good for business but critical to improving the quality of life for low- and moderate-income residents in the communities financial institutions serve.

We will be hearing about other CRA success stories in the next few weeks,
and I want to applaud the financial services industry for their extraordinary record of meeting their CRA obligations. At present, it is estimated that almost 98 percent of all financial institutions have achieved a satisfactory or better CRA compliance. We need to keep and strengthen CRA.

READINESS AND MORALE A PROBLEM WITH U.S. MILITARY

Mr. KNOLLENBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. KNOLLENBERG. Mr. Speaker, President Clinton has created a national security emergency by spreading our troops all over the world while neglecting the defense budget.

From 1980 until 1991, American troops were deployed 10 times. Since the Cold War, our fighting forces have been called into action an astonishing 26 times. Strangely enough, this increased activity has occurred during a period in which our military has shrunk by 40 percent.

Mr. Speaker, the defense bill the House will consider later this week addresses the problems of troop readiness and troop morale by providing the resources to ensure that American troops are the best trained and best equipped in the world.

The important bill also provides funding to facilitate the deployment of a national missile defense system that will protect the American people from a ballistic missile attack launched by a rogue nation.

Mr. Speaker, this legislation replenishes our military, strengthens our national security, and enhances our ability to carry out foreign policy objectives. I urge all my colleagues to support it.

PEACE AGREEMENT IN KOSOVO

Mr. KUCINICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. KUCINICH. Mr. Speaker, about 40 days ago an 11-member bipartisan congressional delegation, led by my good friend, the gentleman from Pennsylvania (Mr. WELDON), went to Vienna in search of a structure of peace which could be put together with leaders of the Russian Duma, a peace plan which, hopefully, would lead to an end to the war in the Balkans. That was 40 days ago.

One of the principles in this plan was the following: Article 4. The humanitarian crisis will not be solved by bombing. A diplomatic solution to the problem is preferable to the alternative of military action.

Unfortunately, in the ensuing 40 days we saw an intense military escalation which resulted in the deaths of countless innocent civilians.

One of the articles in this plan that was put together called on the interested parties to find practical measures for a parallel solution to three tasks, without regard to sequence: the stopping of the bombing, the withdrawal of Serbian armed forces from Kosovo, and the cessation of the military activities of the KLA.

That is where the G–8 is headed now. But they should have stopped the bombing, and they should not today be threatening Belgrade with further bombing if there is not a signature on the dotted line today.

AMERICAN TAXPAYERS ARE NOT UNDERTAXED

Mr. CHABOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. CHABOT. Mr. Speaker, every once in a while in politics the truth slips out. Sometimes the so-called political pros call it a gaffe. Well, we have a perfect example of a gaffe by the leader of the Democratic Party in this body in the House, the gentleman from Missouri (Mr. GEPHARDT).

The gentleman spoke to a group the other day and he said, and I quote, “You’ve got to have a combination of taking it out of the defense budget and raising revenue. We can argue about how to do that, closing loopholes or even raising taxes to do it.”

Well, maybe the other side can argue about how they want to raise taxes, but Republicans in this House are arguing about how to cut taxes, not raise them. The American people are overtaxed, not undertaxed.

Let us get together and cut taxes across the board on all Americans, and let us get rid of this horrible tax, the death tax, where the Federal Government can take up to 55 percent of what Americans earn during the course of their lives, even though they have been taxed for that over and over again over the course of their lives.

Let us cut taxes, not talk about raising them.

NATIONAL HOMEOWNERSHIP WEEK

Ms. SANCHEZ asked and was given permission to address the House for 1 minute.

Ms. SANCHEZ. Mr. Speaker, today I rise to discuss homeownership in America. Buying a home is a dream for many Americans. People want a place where they can raise their children, where neighborhoods come together to form a safe community, and ultimately, where they can comfortably grow older.

A memory I have from when I was young was my grandmother. She came to this country. She worked 7 days a week, every day that I can remember, walking half a mile to get on the bus and go to work. She was a restaurant worker. She would come back late at night after dark. I lost her a few years ago. The last thing she told me was she had two dreams she did not accomplish in the United States: one, to visit the Pope; and two, to own her own home.

This week is National Homeownership Week and it is a time that we can appreciate the growth our Nation has made in homeownership, and it is also when we realize how much more we have to do to help people own that little piece of the American dream, their own home.

I hope that this week we all gather together and work very hard to ensure that there are ways, like CRA and other ways, to help people become homeowners in the United States.

AMERICAN NUCLEAR TECHNOLOGY SECRETS STOLEN BY CHINA

Mr. WELDON of Pennsylvania asked and was given permission to address the House for 1 minute.

Mr. WELDON. Mr. Speaker, I say to Bill Richardson, tell the truth. He has been traveling around America and this city saying that when he found out, this administration, that China stole the secrets to our nuclear weapons, the W–88 and the W–87, that he took aggressive steps in 1995 to change that. Tell the truth, Bill Richardson.

U.S. News and World Report, special feature, July 31, 1995. Hazel O’Leary leaked the plans, which are in this magazine, for the W–87 nuclear warhead.

Tell the truth, Bill Richardson. It was this administration that publicly released the documented evidence related to our W–87 warhead in U.S. News and World Report, July 31, 1995.

Tell the truth, Bill Richardson.

AMERICA SHOULD GUARD AMERICAN BORDERS

Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. TRAFICANT. Mr. Speaker, 90 percent of all crime in America is drug related. Eighty percent of all heroin, 80 percent of all cocaine comes across the Mexican border. To boot, only three out of every 100 trucks coming from Mexico are even inspected.

It is so bad, experts now admit it is even possible for terrorists to smuggle nuclear weapons across our border. And after all this, the White House wants to send 7,000 American soldiers to guard the borders of Yugoslavia.

I say to the House, we should be guarding the borders of Europe and Yugoslavia. America should be guarding the borders of America for the American people. Think about that.
I yield back this weak and foolish national security policy we have in place.

SOCIAL SECURITY SURPLUS

(Mr. SMITH of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Michigan. Mr. Speaker, the challenge before this body this week and the next several weeks is passing 13 appropriation bills. The challenge is based on whether or not we are going to stick by the promise that we made in the balanced budget agreement of 1997. At that time most of the Democrats and most Republicans voted for that balanced budget agreement.

That balanced budget agreement included setting caps on future spending. Keeping that commitment means that for the next fiscal year we will not be spending any of the Social Security surplus.

Now the question is—can we keep that commitment? Can we keep that promise? Last week we passed what we called a lockbox, again stating that we are not going to spend the Social Security surplus dollars for other government spending programs. Let us keep our commitment. Let us keep our promise to the American people. Let us not jeopardize current and future Social Security recipients by caving in to the big spenders.

GUN SAFETY LEGISLATION

(Ms. DeLAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DeLAURO. Mr. Speaker, 2 weeks ago the Republican leadership in this House told us that we could not vote on gun safety legislation before we left for the Memorial Day break because we needed to have a hearing in committee, needed to go through the proper legislative process.

Ah-ha. Well, now they are bringing this legislation to the floor with no hearings and with no markup. So what was the 2-week delay all about? It was about giving the NRA a head start. We took the Republican leadership at their word that they would play it straight with gun safety legislation. But now it appears that they spent the last 2 weeks scheming with the NRA to bring down gun safety legislation.

With their 2-week head start, the NRA has launched a 2-week campaign of fear. They have spent more than a million dollars in the last several days to kill gun safety legislation.

I am here today to ask to plead with the Republican leadership in this body to stop playing games with gun safety. This debate is about protecting our children. Thirteen children a day are killed by gunfire in the United States.

This vote on gun safety is deadly serious. There is no more room for political games. Let us stop the games. Let us pass gun safety legislation for our families and for our children.

U.S. MILITARY SHOWING SEVERE SIGNS OF STRAIN

(Mr. TANCREDO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TANCREDO. Mr. Speaker, American military success in Kosovo has shown once again that American forces are second to none in the world. Our brave pilots and many thousands who work around the clock to support them deserve our highest praise and our deep gratitude.

However, the military operation in Kosovo has also exposed the problem in our national defense structure that we need that needs immediate attention. Our military structure, understaffed, overextended, and showing severe signs of strain after having to do more with less for too long.

The defense appropriations bill on the House floor later this week is an excellent first step to reverse the trend and to end the damage to the short-changing of the U.S. military. I urge its support.

COMMEMORATING LIVES OF D.C. FIREFIGHTERS

(Ms. NORTON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. NORTON. Mr. Speaker, I rise this morning to commemorate the lives of two brave young firefighters who gave their lives in a fire in the District while Congress was out of session. Both firefighters were born and raised in the Nation's Capital.

The loss is not only to their families but to the Congress of the United States and to this city, where D.C. firefighters prepare every day to do what is necessary to protect both hometown Washington and official Washington, including the Members of this House.

Anthony Phillips of Engine Company No. 10 worked the busiest fire house in the Nation. Only 30 years old, he was the father of two boys, one 21 months old, the other 6 years old. Firefighter Phillips married his childhood sweetheart, Lysa. They were a deeply loving couple and family.

Louis Matthews of Engine Company No. 26 was only 29 years old but served 7 years as a D.C. firefighter. He leaves a loving family, including his mother, Cassandra Shields, and two young children.

Members of this body have been mindful of the risks firefighters face and the sacrifices that their families could be called upon to make. I am grateful that the 106th Congress passed my bill, the Officer Brian Gibson Tax Free Pension Equity Act, that allows the families of firefighters killed in the line of duty to receive survivors' benefits tax free. They did their duty, and I am grateful that we did ours.

SPIRIT OF FREEDOM AWARD

(Mr. DeMINT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DeMINT. Mr. Speaker, last Thursday I presented to Mobile Meals of Spartanburg, South Carolina, the first Spirit of Freedom Award. Every day Mobile Meals volunteers deliver as well as prepare over 1,700 meals to needy people in my district, all without government funding. The people at Mobile Meals have shown me that freedom comes from the able hands of local people, people who take responsibility for themselves and their communities.

Here in Washington, we can either protect or take away those freedoms. I believe it is our role in Congress to be the guardians of freedom. That is why we are working to return dollars, decisions and freedoms to the hands of local people.

I thank Mobile Meals for showing us that freedom begins at home.

RAISING ELIGIBILITY AGE OF MEDICARE RECIPIENTS

(Mr. SANDERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SANDERS. Mr. Speaker, this Nation already has the most unfair distribution of wealth and income in the entire industrialized world.

Given that reality, it is absurd that some in Congress are talking about giving huge tax breaks to some of the wealthiest people in this country while at the same time they are talking about raising the eligibility age of Medicare to 67, charging a 10-percent copayment fee for home health care, and voucherizing Medicare, which would mean more out-of-pocket expenses for seniors in this country.

Mr. Speaker, 111 members of Congress have written to the President. We have urged him, do not raise the eligibility age of Medicare to 67, do not charge a 10-percent copayment fee on home health care to some of the weakest and most vulnerable people in this country, and do not force seniors to pay more out-of-pocket for their health care costs.

I urge all Members of this body to join us.
SCHOOL SAFETY AND GUN VIOLENCE

(Ms. WOOLSEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WOOLSEY. Mr. Speaker, how much longer do families have to live in fear for Congress acts? How many more memorials must our Nation have before Congress passes sensible gun control? Those are the questions.

It appears that the answer is that some politicians would rather have the National Rifle Association invest in them than for our Congress to invest in our children’s future, investing with a sensible gun control measure.

Millions of families across the Nation agree that we need to tighten gun control laws. So it is time for the House to act. The Senate has done the right thing. Now the House must do the same. If that means coming to the floor every day demanding that the Republican leadership bring debate on child safety locks, on background checks at gun shows, and a prohibition on the import of large magazines, so be it, we are going to do it.

We must pass gun safety legislation, we must make our schools safe, and we must do it now.

CHINA HAS AMERICAN NUCLEAR WEAPONS TECHNOLOGY

(Mr. EHLERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EHLERS. Mr. Speaker, I suspect I am one of the few individuals in this House who has worked at a nuclear weapons laboratory. I did this for one summer while I was a graduate student at Berkeley at the University of California. And I found it to be a very good experience to work at a nuclear weapons laboratory, even though my work was primarily on unclassified science.

What impressed me is that the individuals who worked at that laboratory were extremely security conscious and they were very concerned about any leaks of information about nuclear weapons. We seem to have lost that. We have lost that culture ever since the Berlin Wall fell.

But what is dismaying to me is the reaction of the White House to the discovery that the Chinese have managed to obtain information about our nuclear weapons. The spin doctors have gone to work full-time. The President’s men seem to be more concerned with blaming the Bush and Reagan administration than with taking responsibility and trying to correct the problem as they should be doing.

[1030]

It is the mark of strong individuals to take responsibility for the mistakes that they have made and to correct them, and I expect no less of the President and his aides. We do have leaks, we have to cure them, and it is absolutely essential that those individuals who are responsible take responsibility, correct the problem, and solve it.

SUPPORT GUN CRIME PROSECUTION ACT

(Mr. UDALL of New Mexico asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. UDALL of New Mexico. Mr. Speaker, today along with the gentleman from California (Mr. COX) my Republican colleague, the gentleman from

PLAUDITS TO COX COMMITTEE

(Mr. COOKSEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COOKSEY. Mr. Speaker, I think every single Member of this body owes a debt of gratitude to the gentleman from California (Mr. COX) my Republican colleague. The gentleman from

A BETTER WAY

(Mr. HAYWORTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYWORTH. Mr. Speaker, I listened with great interest to my neighbor from New Mexico offer a point which I think cannot be stated enough. You see, it is not enough to pass laws in Congress. The fact is, prosecutors and those who would uphold the law need to enforce existing laws and need to obey existing laws.

Mr. Speaker, that is one of the things I heard time and again visiting with my constituents in the Sixth Congressional District of Arizona. I know that different Members of this body spent their district work periods in different ways. For example, the minority leader of this body, the gentleman from Missouri (Mr. GEPHARDT), spent time in Philadelphia bragging about how my friends on the left might take control of this body, the gentleman from Missouri.

You’ve got to have a combination of taking it out of the defense budget and raising revenue. We can argue about how to do that. We can close loopholes or even raise taxes to do it.

There is the candor attack, the honesty episode from the minority leader. Cut defense and raise taxes. That is their prescription for the future? Mr. Speaker, there is a better way.
11928

California headed the Select Committee on China and has been an outstanding example of even temperament, fair-mindedness and bipartisanship in his handling of the House investigation of Chinese espionage at our
nuclear laboratories.
Although there is considerable evidence that the administration has been
selectively leaking the most sensational stories to the New York Times,
the Cox Committee has been a tomb.
No one has accused Chairman COX or
anyone on his staff of leaking information about his long-awaited report, an
extraordinary achievement in Washington.
Thus far, public statements by the
gentleman from California have been
judicious and moderate and he has bent
over backwards not to be partisan,
even though most of the espionage occurred during the periods 1994 and 1995.
Instead, he has focused on what can be
done about the problems at our Energy
Department laboratories.
CHRIS COX, well done. The American
people have benefitted greatly from
your outstanding work on this extremely important issue.
f

COMMENTS ON COX COMMITTEE
(Mr. STEARNS asked and was given
permission to address the House for 1
minute and to revise and extend his remarks.)
Mr. STEARNS. Mr. Speaker, recently
Secretary of Energy Bill Richardson
stated, ‘‘I can assure the American people that their nuclear secrets are now
safe at the labs.’’ Somehow I do not
think the American people believe him.
In fact, the unanimous conclusion of
the Cox Committee is also at odds with
the Secretary’s reassurance. The committee concludes that ‘‘such thefts almost certainly continue to the present
day.’’
I am quite distressed at the reaction
of the administration’s spokesmen who
even to this very day are downplaying
the significance of the Cox report finding. And, of course, they are changing
the subject.
The big news is not that our nuclear
secrets were stolen. The incomprehensible news is what this administration
has done about it when it was discovered in 1995 that the crown jewel of our
nuclear arsenal, the W–88, was stolen
by the Communist Chinese.
No one told the President.
The Justice Department denied the
FBI’s request for a wiretap on the clear
and obvious suspect.
The issue, my colleagues, is what was
f

THE JOURNAL
The SPEAKER pro tempore (Mr.
SHAW). Pursuant to clause 8 of rule XX,
the pending business is the question de
novo of the Speaker’s approval of the
Journal.

VerDate Aug 04 2004

June 8, 1999

CONGRESSIONAL RECORD—HOUSE

09:02 Oct 04, 2004

Jkt 069102

The question is on the Speaker’s approval of the Journal of the last day’s
proceedings.
The question was taken; and the
Speaker pro tempore announced that
the ayes appeared to have it.
Mr. GIBBONS. Mr. Speaker, I object
to the vote on the ground that a
quorum is not present and make the
point of order that a quorum is not
present.
The SPEAKER pro tempore. Evidently a quorum is not present.
The Sergeant at Arms will notify absent Members.
The vote was taken by electronic device, and there were—yeas 355, nays 46,
answered ‘‘present’’ 1, not voting 31, as

vote. Had I been present, I would have voted “yes.”

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC, June 8, 1999.

Hon. J. Dennis Hastert,
The Speaker, House of Representatives,
Washington, DC.

Dr. William R. Ford, Jr., Governor, State of Louisiana, indicating that, at the Special Election held on May 29, 1999, the Honorable David Vitter was duly elected Representative in Congress for the First Congressional District, State of Louisiana.

With best wishes, I am, Sincerely,

Jeff Trandahl,
Clerk.

SERVING LOUISIANA WITH HONOR, HUMILITY, AND AWE

(Mr. VITTER asked and was given permission to address the House for 1 minute.)

Mr. VITTER. Mr. Speaker, ladies and gentlemen of the House, distinguished Congressman Tauzin and other members of the Louisiana delegation, I am honored, humbled, awestruck to stand before you today.

My goal in the years ahead is simply this: to become at ease and comfortable with you as I become a respected colleague and friend; to become at ease and comfortable with the ways of the House as I become an effective Congressman; to never become so at ease and comfortable that I lose these feelings of honor, of humility, of awe. And how could I? This is the people’s House. You, we, are the people’s representatives, a vital part of the most powerful and moral political experiment in human history.

I look forward to always honoring you as the people’s representatives and to working constructively with you on the people’s business.

In closing, I would like to recognize the forces that have brought me here today: God; family, led by my parents and my wife; friends; and, of course, the wonderful people of Louisiana’s First Congressional District. They are here today, they are here always, and I thank them from the depths of my heart.

EDUCATION LAND GRANT ACT

Mr. SESSIONS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 189 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 189

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to rule XIX, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 150) to amend the Act commonly known as the Recreation and Public Purposes Act to authorize disposal of certain public lands or national forests to local educational agencies for use for elementary or secondary schools, including public charter schools, and for other purposes. The first reading of the bill shall be dispensed with. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Resources. After general debate the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider as an original bill for the purpose of amendment under the five-minute rule the nature of a substitute recommended by the Committee on Resources now printed in the bill. The committee amendment in the nature of a substitute shall be considered as read. During consideration of the bill for amendment, the chairman of the Committee of the Whole may accord priority in recognition on the basis of whether the Member offering an amendment has caused it to be printed in the portion of the Congressional Record designated for that purpose in clause 8 of rule XVIII. Amendments shall be considered as read. The chairman of the Committee of the Whole may: (1) postpone until a time further consideration in the Committee of the Whole a request for a recorded vote on any amendment; and (2) reduce to five minutes the minimum time for electronic voting on any postponed question that follows another on the same subject without intervening business, provided that the minimum time for electronic voting on the first in any series of questions shall be 15 minutes. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted. Any Member may demand the prior approval of the Clerk of the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without amendment.

The SPEAKER pro tempore (Mr. Shaw). The gentleman from Texas (Mr. Sessions) is recognized for 1 hour.

Mr. SESSIONS. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from New York (Ms. Slaughter), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, H. Res. 189 is an open rule providing 1 hour of general debate, divided equally between the chairman and ranking minority member of the Committee on Resources. The rule makes in order the Committee on Resources’ amendment in the nature of a substitute as an original bill for the purposes of amendment, which shall be considered as read.

Members who have preprinted their amendments in the record prior to their consideration may be given priority in recognition to offering their amendments or otherwise consistent with House rules.

The Chairman of the Committee of the Whole may postpone votes during consideration of the bill and reduce...
voting time to 5 minutes on a post-
poned question if the vote follows a 15-
minute vote.

Finally, the rule provides for one mo-
tion to recommit, with or without in-
tuctions.

Mr. Speaker, H.R. 150, the Education Land Grant Act, is the product of tire-
less efforts of my colleague, the gen-
tleman from Arizona (Mr. HAYWORTH).

The gentleman is looking for innova-
tive ways to provide educational re-
sources for State and local govern-
ments.

Like many western States, Arizona
has scarce non-Federal resources with-
in the National Forest land system,
making it very expensive and cost-pro-
hibitive for school districts to buy land
needed to expand or build the nec-
esary school facilities.

The governor from Arizona (Mr. HAYWORTH) recognized this clearly
when he had to fight to convey 30 acres
of Forest Service land to the Alpine
School District for the purpose of
building new school facilities during the
104th Congress. The Education
Land Grant Act would codify this pro-
cess for all Forest Service land. This
legislation authorizes the Secretary of
Agriculture to convey Forest Service
lands for educational purposes, as long
as the school is publicly funded, the
conveyance serves the public interest,
and the land is not environmentally
sensitive or needed for the purpose of
the National Forest System.

This process mirrors the Recreation
and Public Purposes Act, which allows
Congress to sell or lease Bureau of
Land Management land to State and
local governments, and qualified non-
profit organizations for public pur-
poses.

I am proud of the work my colleague,
the gentleman from Arizona (Mr. HAYWORTH) has done.

Mr. Speaker, I urge support for the
rule and the underlying legislation,
and I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I
yield myself such time as I may con-
sume.

Mr. Speaker, today we return to the
Education Land Grant Act, which was
scheduled for consideration a few
weeks ago but postponed until today.
The bill was reported on a voice vote
from the Committee on Resources. It is
a relatively straightforward bill and
enjoys bipartisan support.

Although I know there are Members
who have objections which will be
raised in the ensuing debate, it will be
ably handled on our side by my good
friend, the gentleman from California
(Mr. GEORGE MILLER).

Mr. Speaker, this is a request for an
open rule on a bill which could easily
be handled on the suspension calendar,
and an open rule which was granted
only after the Democrat efforts to
bring forward the juvenile justice bill
were defeated on a party line vote.

Mr. Speaker, I had the privilege to at-
tend my granddaughter’s high school graduation and to hear her
give a commencement address wel-
coming her classmates to the last day
of their childhood and the first day
of the rest of their lives.

She said:

We have come to an intersection with
no signs, our past heeding loudly at us and
a foggy road ahead. Some of us are
struggling wildly in life, which in life is ut-
erly impossible. We are hesitantly facing
our future, an unnerving task for we know
not what the future holds. But take comfort,
the beauty of the future lies not in its plan-
ning, but in its spontaneous creation.

Mr. Speaker, I was just like thou-
sands of other parents and grand-
parents who attended the graduation
 ceremonies over the past few weeks.
There were worrying our kids, our
grandkids, the kid next door who only
last week it seems was learning to ride
without training wheels, and is now
about to claim his or her future.

Sadly, so many, far too many
children in recent years have gone
through that rite of passage forever
tinged by violence inside their school
walls. In some instances, the classes
following these children will have
learned not only the fire drill but the
evacuation drill, in case a classmate has a gun.

A columnist in my hometown paper,
the Democrat and Chronicle in Roch-
ester, New York, observed that we have
had so many school shootings that we can
now rank them in order of the car-
nage which was created. It is so sad I
can hardly speak to it, but in homes
across this country, families are being
forced to have exactly that discussion.

Mr. Speaker, if Members do not be-
lieve this is happening to the mere
child who came to me recently won-
dering how to find a bulletproof vest.

Mr. Speaker, let us not get compla-
cent on the issues of gun violence and
juvenile justice. Let us not let another
graduation day pass without action by
this House to reduce violence and to
help our troubled children.

Mr. Speaker, that is still a debate
which this House needs, which I en-
courage the leadership to allow, and
which America wants. Instead of or at
least in addition to the debate on the
Education Land Grant Act, let us have
a constructive and bipartisan debate on
our response to the growing crisis of
school violence.

Mr. Speaker, I reserve the balance of
my time.

Mr. SESSIONS. Mr. Speaker, con-
tinuing debate on H.R. 150, I yield such
time as he may consume to the gen-
tleman from Utah (Mr. HANSEN), the
chairman of the Subcommittee on Pub-
lic Lands and National Parks.

Mr. HANSEN. Mr. Speaker, I thank
my friend, the gentleman from Texas,
for yielding time to me.
Again, I want to congratulate the gentleman from Arizona (Mr. HAYWORTH).

Mr. HAYWORTH. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. HAYWORTH).

Mr. SESSIONS. Mr. Speaker, I yield such time as I may consume to my colleague, the gentleman from Texas (Mr. SESSIONS), a member of the Committee on Rules, for yielding time to me.

I also thank my colleague, the gentlewoman from New York (Ms. Slaughter) for her remarks, such as they pertain to this particular piece of legislation.

Mr. Speaker, today we have the opportunity to come together as Americans, not as Democrats or as Republicans but as Americans, to pass an important piece of legislation that will make it easier for economically-challenged communities to provide educational facilities for our children.

The bill says it all: The Education Land Grant Act. This act would allow school districts around the country to apply for conveyances of small tracts of Forest Service land at nominal cost to build, renovate, or expand their educational facilities.

Currently only school districts near Bureau of Land Management land can apply for conveyances under the Recreation and Public Purposes Act, or R&PPA. Modeled after the R&PPA, my legislation simply adds Forest Service lands to this equation.

Mr. Speaker, the idea for this legislation grew out of work I was honored to do in the 104th Congress during my first term here representing the Sixth Congressional District of Arizona. At that time the Alpine School District in eastern Arizona was in desperate need of new school facilities. This district lies within Apache County in the eastern part of the State, near our border with New Mexico.

Eighty-five percent of Apache County, Arizona, is federally-controlled land. That limited what could be raised in property taxes, so the school district was dependent on proceeds from timber harvesting. However, due to lawsuits, logging had been halted. Consequently, the timber receipts that had gone toward funding the schools all but dried up.

The Alpine School District faced a dilemma. It could not afford both the cost of land, estimated to be $225,000, and the cost of new school facilities. So I introduced legislation which was signed into law that conveyed 30 acres of Forest Service land to the Alpine School District so that the people there could use that land for the construction of new school facilities.

Construction of those facilities proceeded, and I am pleased to report that when the children of Alpine return to school this fall, the facilities will be completed.

The legislation we consider today sets up a national mechanism for school districts to apply to the Secretary of Agriculture for Forest Service land to build schools that may help small Western communities to provide educational facilities for our children.

Second, the conveyance must serve the public interest.

Third, the land cannot, cannot be environmentally sensitive or needed for purposes of the National Forest system.

Finally, the total acreage to be conveyed will be limited to the amount reasonably necessary for the proposed use, but not to exceed 80 acres.

It also provides that conveyances under this legislation shall be made for a nominal cost using guidelines established under the R&PPA for approximately $10 an acre. The bill would provide expedited review of applications by requiring the Secretary of Agriculture to acknowledge the receipt of an application within 14 days.

A final determination about whether to convey the land must be made within 120 days unless the Secretary of Agriculture submits a written notice to the applicant explaining the delay.

Passage of this bill will be a boon for rural areas throughout our Nation, but especially in the West and in the South, where there is a large amount of federally-controlled land.

For example, Gila County, Arizona, a county in my district which is approximately the size of the State of Connecticut, only finds 3 percent of its land mass privately owned. In other words, 97 percent of Gila County, Arizona, is under the control, the ownership, if you will, of some governmental entity.

That is why in the West private land, when we can find it, like in Gila County, only 3 percent, is extremely expensive. Not only that, but the West also confronts the problem and the challenge of rapidly growing populations. In fact, Arizona, Utah, and Nevada are the three fastest growing States in the Nation. This means there will be more demand to build school facilities but less land to do it on.

The Education Land Grant Act is one of the ways we can alleviate some of the West’s growing pains and at the same time help our children receive the education they need and deserve.

Mr. Speaker, my colleagues on both sides of the aisle have continually talked about the importance of education and the future of our children.

H.R. 150 is a commonsense proposal on which we can all agree because it will allow economically-strapped school districts throughout the United States to put the money where it counts, in the classroom helping teachers teach, helping children learn. This is a goal I believe we all support, Mr. Speaker.

I hope this House will strongly support the rule and this bipartisan, commonsense legislation.

Ms. SLAUGHTER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SESSIONS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. SESSIONS). Pursuant to House Resolution 189 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 150.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 150) to amend the Act popularly known as the Recreation and Public Purposes Act to authorize disposal of certain public lands or national forest lands to local education agencies for use for elementary or secondary schools, including public charter schools, and for other purposes, with Mr. SHAW in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Utah (Mr. HANSEN) from California (Mr. GEORGE MILLER) each will control 30 minutes.

The Chair recognizes the gentleman from Utah (Mr. HANSEN).

Mr. HANSEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 150, the Education Land Grant Act. H.R. 150 is a good piece of legislation that will help school children in rural communities throughout the country. I commend the gentleman from Arizona (Mr. HAYWORTH) for his hard work on this bill.

The Education Land Grant Act was designated to alleviate the problem that may help small Western communities. These towns are often hemmed in by government-owned lands such as national forests, State land, national monuments, national parks, et cetera.

Since so much of this land base in these areas is nontaxable government
land, they often find it difficult to afford school facilities. The little private land that does exist in these areas tends to be very expensive. This often makes land acquisition for school facilities cost-prohibitive.

Those communities that are fortunate enough to have a suitable parcel of BLM land near their town can get the land at nominal cost for school facilities through the Recreation and Public Purposes Act. Unfortunately, those communities that are next to a suitable parcel of forest land do not have this option because the Recreation and Public Purposes Act does not apply to Forest Service lands.

H.R. 150 was designed to help these towns and cities surrounding or adjacent to Forest Service land. They would be able to buy parcels of land for school facilities within the Forest Service at nominal cost. This will allow many of these cash-strapped communities to build more adequate educational facilities for their children.

I would like to thank the minority for working closely with us on this legislation. The legislation we have before us today is much improved and something I believe we should all support.

I understand that the administration has some concerns with this legislation. In particular, the object of the concept of selling Forest Service lands at less than full market value. While I understand their concerns, I think it is important to note who it is that we are trying to help. We are talking about schoolchildren. We are talking about giving school districts a little land to build an elementary school or a playground for the children.

This is a good cause and a very good idea. H.R. 150 is simple legislation that resolves a difficult problem for rural school districts. I urge all of my colleagues to support H.R. 150.

Mr. Chairman, I reserve the balance of my time.

Mr. GEORGE MILLER of California.

Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as introduced, H.R. 150 had significant problems. The bill would have amended the Recreation and Public Purposes Act to provide for the transfer of national forest lands to local educational authorities for use as elementary and secondary schools, including public charter schools.

At the Committee on Resources hearing on H.R. 150, the administration testified in opposition to the bill. While they supported the objective of making Federal lands available in certain circumstances for public purposes, they testified that the legislation was burdensome.

One of the problems with the bill was that the Recreation and Public Purposes Act was designed to apply to public lands only. H.R. 150 tried to shoe-horn national forest lands into that law and it was not a very good fit. The problem was not only with using the Recreation and Public Purposes Act, but also the fact that the bill sponsor was seeking waivers or changes to the normal requirements of land conveyances.

We should not be setting different requirements for school lands than applied to public lands used for hospitals or other public purposes. Further, we had no definition of a public charter school and, as such, we did not know what such use would entail.

During the Committee on Resources’ consideration of H.R. 150, an amendment in the nature of a substitute was adopted and made substantial improvements to this legislation. As reported by the Committee on Resources, the bill is now a freestanding measure that provides discretionary authority to the Secretary of Agriculture to make available certain national forest system lands at nominal cost to qualifying entities for use as elementary and secondary schools and related facilities.

The bill requires that in order to make such a conveyance, the Secretary must determine that, one, the land will be used for the intended purposes, two, that the conveyance will serve the public interest, three, that the land to be conveyed is not otherwise needed for the national forest system, and four, the total acreage to be conveyed does not exceed the amount reasonably necessary for the proposed use.

In any event, the conveyance is limited to 80 acres, and the mineral rights are reserved to the United States. In addition, the committee amendment includes the reverter clause that would be applicable if the lands were to be used, without consent of the Secretary, for use other than the use for which the lands were conveyed.

Mr. Chairman, H.R. 150, as amended by the Committee on Resources, is a significant improvement from the bill as it was introduced. Although the administration objects to the bill because the lands are authorized to be conveyed for less than full cost, I do not think that what the bill provides in this case is unreasonable, given the discretionary nature of the bill and the public interests being served.

Mr. Chairman, I reserve the balance of my time.

Mr. HANSEN. Mr. Chairman, I yield such time as he may consume to the gentleman from Arizona (Mr. HAYWORTH), the author of this legislation, and compliment the gentleman for doing such an excellent job on this very necessary bill.

Mr. HAYWORTH. Mr. Chairman, I thank the gentleman from Utah (Mr. HANSEN) for yielding to me. I also thank the gentleman from California (Mr. GEORGE MILLER) because, as I have learned since coming to this institution, good legislation is often a collaborative process.

I would simply say in response to a couple of points raised by the administration and the Forest Service, it is precisely because so many rural communities find themselves enclosed by federally controlled land are so economically strapped, so economically disadvantaged that we brought this legislation forward.

Fair market value in this case cannot apply, nor should it apply; and this bill rectifies that at a nominal cost to allow these communities to concentrate their resources where they are best utilized, in the education of our children, by helping teachers teach, helping children learn, and helping local communities within their discretion use this as another tool to empower parents, to empower these varied communities.

The irony of the Forest Service opposition I think speaks volumes, sadly, of the fact that oftentimes there are two Americas. There is the America that is the case celebrated in magazines, of the media events, of the cries on our National Mall to remember the children, to care for the children.

Mr. Chairman, folks from the Sixth District of Arizona in remote communities, folks from rural America, do not often get the chance to come to Washington and engage in a photo op. They do not often get the chance to have officials from the administration come with hordes of media to cover an hour in a schoolroom.

But, Mr. Chairman, do rural children not count as much as those in the city? Do those who find their industry shut and their way of life abandoned not have the same rights as those who are easily accessible by the national media and so many opportune photo experiences? I say yes.

Mr. Chairman, I believe Members on both sides of the aisle, acknowledging notwithstanding, understand full well our responsibility to children, whether they reside in a cosmopolitan place such as the Bay area of California or a rural location such as Apache County, Arizona.

Mr. Chairman, I have often said that Mark Twain had it right. History does not repeat itself, but it rhymes. With this new Education Land Grant Act, we will reaffirm one of the greatest examples that has gone before.

Another Republican member of the Committee on Ways and Means, Justin Smith Morrill, in the 1860s brought similar legislation to the floor of this body. Indeed, in the presidential campaign of 1860, it is often obscured because of the terrible Civil War that followed, but a one-term Member, former Member of this body, a man named Abraham Lincoln, told Congressman Morrill that his land grant act would be one of the pillars of the Lincoln administration.

What the Morrill land grant act did for institutions of higher learning,
Mr. George Miller of California. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as I said before, we do not deny the bill has been, we believe, substantially improved with the substitute, as proposed, to the bill, as amended. We have no problem with this.

I would say I do not think this bill is going to solve the education problems in this country. There is much for this Congress to do. While we are happy to help pass this legislation, we wish that the majority would get on with the rest of the agenda that the people in this country want with respect to schools, and clearly part of that is to protect our students and schools from violence. We wish that before the break you had taken up the legislation dealing with background checks at gun shows, child safety locks, and other measures to try to prevent the easy access and irresponsible access of young people to guns that have played out in the tragic incidents, oft too often, in this country.

We appreciate that this legislation may impact 40, 50, maybe 60, 70 districts that may have access to some lands, but there are millions of students that are in schools that are crumbling, that are not ready for the next century, that have not been wired, and we really think that the Federal Government should participate in helping, whether it is through the Tax Code or whether through loans or grants, to rebuilding some of these crumbling schools in America that are both urban and rural so that children can learn in which to learn and in which knowledge can be conveyed and can be acquired by these children.

So this is an interesting piece of legislation, but it falls far short of what the country expects of this Congress with respect to the children’s education in this Nation. And we would hope at some point, since we are only working a couple of hours a week around here, that we would find time to address that legislation and deal with the issue of revitalizing the infrastructure of education in this country.

Mr. Chairman, I yield back the balance of my time.

Mr. Hansen. Mr. Chairman, I yield myself such time as I may consume to concur with what the gentleman from Arizona said regarding this bill before us. I do not think that people who come from the large metropolitan areas or the large heavily populated States realize the problems we have in some of our rural America. Many States, and we can look at a lot of the western States in particular and some in the south, where there is a small community surrounded by government land. I come from one of those communities myself where all of a sudden the Forest Service or BLM land has you hemmed in and communities can do nothing. They cannot touch it or do anything with it. Then, when they want to expand for a playground or expand their school, they have to come up against this barrier of how do we do it.

Nothing is more difficult, Mr. Chairman, in America than trying to figure out a way to get the Federal Government to trade, barter, or somehow buy some Federal land. It goes through the biggest fudge factory there is in America, and communities are lucky if they get it done. It normally takes 11 years before they even look at it. Therefore, this is an undue piece of legislation.

At this particular time we have a President of the United States and Vice President of the United States, and last Thursday the minority leader of the Democratic side, talking about the need for education, but we are not seeing too much happening around here. This is the first time this term, in my mind, that we have seen something that substantially helps school-children.

I commend the gentleman from Arizona for taking it upon himself to do it. I know he had some tough fights in committee to get it to this point, but finally we will get something that will help these little communities that are a forgotten part of America. Everyone thinks of the New Yorks and the San Franciscos and the L.A.s, but they do not think of the little Apache areas or Farmington, Utah, or some other little place in Wyoming. Finally, we are doing something for those folks.

Mr. Thomas. Mr. Chairman, I support H.R. 150, the Education Land Grant Act, because it will help children in my district in Kern County, California, to continue to expand their school situated on federally owned land in the Los Padres National Forest. Passage of this bill will finally give the U.S. Forest Service the authority to dedicate 10 acres of land currently used by the Frazier Park Elementary School for continuation of this school’s operation.

Many schools in the rural West were built on land owned by the U.S. Forest Service. There is often no other choice because the communities are surrounded by government owned land—‘‘land-locked’’. However, under current regulations, these schools are facing skyrocketing lease prices from the Forest Service’s new land value assessment methods. Many schools are finding it almost impossible to remain open because of being hit by the higher leases. Yet, it makes no sense for the federal government to dedicate billions to general education while strangling specific schools that operate on federal land.

Frazier Park Elementary is a good example of a rural school the bill could aid. Imbedded within the Los Padres National Forest, the school is now facing a financial crisis. Since 1975, the School has leased and developed land from the Forest Service. Like many lessees, their property has been reevaluated by the Forest Service, and the lease has gone up by 1300% in one year from $1,290 per year to $17,750 per year.

Does it make sense to take education dollars from isolated, rural schools to put into the coffers of a federal land agency? Local Forest Service officials have repeatedly lamented that they had no authority to dedicate the land to the school district. Passage of this bill will finally give the Forest Service the authority and direction from Congress to make such a dedication in the case of Frazier Park Elementary School.

The Education Land Grant Act provides real and immediate assistance to school districts like Frazier Park Elementary School that are asking for our help. I urge my colleagues to stand and join me in voting for this bill and provide the funding support we do not see how we can do it.

Mr. Hansen. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.
Pursuant to the rule, the committee amendment in the nature of a substitute printed in the bill is considered as an original bill for purposes of amendment and is considered as read.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 150

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE. This Act may be cited as the "Education Land Grants for National Forests Act".

SEC. 2. CONVEYANCE OF NATIONAL FOREST SYSTEM LANDS FOR EDUCATIONAL PURPOSES.

(a) AUTHORITY TO CONVEY.—Upon application, the Secretary of Agriculture may convey National Forest System lands for use for educational purposes if the Secretary determines that—

(1) the entity seeking the conveyance will use the conveyed land for a public or publicly funded elementary or secondary school, to provide grounds or facilities related to such a school, or for both purposes;

(2) the conveyance will serve the public interest;

(3) the land to be conveyed is not otherwise needed for the purposes of the National Forest System; and

(4) the total acreage to be conveyed does not exceed the amount reasonably necessary for the proposed use.

(b) REDUCTION OF APPLICATION.—A conveyance under this section may not exceed 80 acres. However, this limitation shall not be construed to preclude an entity from submitting a subsequent application under this section for an additional 80 acres, provided the conveyance is for educational purposes.

SEC. 3. CONVEYANCE OF LANDS IN THE CONGRESSIONAL NOMINATED PLACE.

The Chairman of the Committee of the Whole may postpone a demand for a recorded vote on any amendment and may reduce to a minimum of 5 minutes the time for voting on any proposed question that immediately follows another vote, provided the time for voting on the first question shall be a minimum of 15 minutes.

Are there any amendments to this bill?

If not, the question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. MURPHY) having assumed the chair, Mr. SHAW, Chairman of the Committee of the Whole on the House of the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 150) to amend the Act popularly known as the Recreation and Public Purposes Act to authorize disposal of certain public lands or national forest lands to local education agencies for use for elementary or secondary schools, including public charter schools, and for other purposes, pursuant to House Resolution 189, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The SPEAKER pro tempore. The question is on the committee amendment in the nature of a substitute.

The CHAIRMAN. Under the rule, the previous question is ordered.

The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HANSSEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 420, nays 0, not voting 14, as follows:

For the cost of direct and guaranteed loans, including the cost of modifying loans as defined in section 502 of the Congressional

### TITLE II

#### CONSERVATION PROGRAMS

**OFFICE OF THE UNDER SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT**

For necessary salaries and expenses of the Office of the Under Secretary for Natural Re- sources and Environment to administer the Agricultural Conservation Program of the Service and the Natural Resources Conserva- tion Service, $883,000.

#### NATURAL RESOURCES CONSERVATION SERVICE CONSERVATION OPERATIONS

For necessary expenses to carry out the provisions of the Act of April 27, 1935 (16 U.S.C. 996a–f), including preparation of conservation plans and establishment of meas- ures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water manage- ment as may be necessary to prevent floods and the sitiation of reservoirs and to control agricultural related pollutants); operation of conservation plant materials centers; classi- fication and mapping of soil; dissemination of information; acquisition of lands, and interests therein for use in the plant ma- terials program by donation, exchange, or purchase at a nominal cost not to exceed $100 shall be available:

- To the Commodity Credit Corporation to
  - $1,000,000 shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $1,000,000 shall be available for employment under 5 U.S.C. 3109.
  - That none of the Commodity Credit Corporation to
  - $1,000,000 shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $1,000,000 shall be available for employment under 5 U.S.C. 3109.

### STATE MEDICINE GRANTS

For grants pursuant to section 502(b) of the Agricultural Credit Act of 1967 (7 U.S.C. 5101– 5106), $4,000,000.

### DAIRY INDENITY PROGRAM (INCLUDING TRANSFERS OF FUNDS)

For necessary expenses involved in making indemnity payments to dairy farmers for milk or cows producing such milk and manu-facturers of dairy products who have been di- rected to remove milk or dairy products from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government, and indemnity payments for milk, or cows producing such milk, at a fair market value to any dairy farmer who is directed to remove his milk from commercial markets because of: (1) the presence of products of nuclear radiation or fallout if such contamination is not due to the fault of the farmer; or (2) residues of chemicals or toxic substances included under the first sentence of the Act of August 13, 1968 (7 U.S.C. 450), if such chemicals or toxic substances were not used in a manner contrary to applicable regulations or labeling instructions provided at the time of use and the contamination is not due to the fault of the farmer, $450,000, to remain available until expended (7 U.S.C. 2299b).

### COMMODITY CREDIT CORPORATION FUND

**REIMBURSEMENT FOR NET REALIZED LOSSES**

For fiscal year 2000, such sums as may be necessary to reimburse the Commodity Credit Cor- poration for net realized losses sus- tained, but not previously reimbursed (esti- mated to be $14,366,000,000 in the President’s fiscal year 2000 Budget Request (H. Doc. 106– 3)), but not to exceed $14,368,000,000, pursuant to section 2 of the Act of August 17, 1961 (15 U.S.C. 713a–11).

**OPERATIONS AND MAINTENANCE FOR HAZARDOUS WASTE MANAGEMENT**

For fiscal year 2000, the Commodity Credit Corporation shall not expend more than $5,000,000 for expenses to comply with the re- quirement of section 107(g) of the Comprehensive Environmental Response, Com- pensation, and Liability Act of 1980 (42 U.S.C. 9607(g), and section 6001 of the Resource Con- servation and Recovery Act, 42 U.S.C. 9601: Provided, That these funds shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 shall be available for employment under 5 U.S.C. 3109.

### WATERSHED SURVEYS AND PLANNING

For necessary expenses to conduct re- search, investigation, and surveys of watersheds of rivers and other waterways, and for small watershed investigations and planning, in accordance with the Watershed Protection and Flood Prevention Act approved August 4, 1954 (16 U.S.C. 1001–1009), $10,386,000: Provided, That this appropriation shall be available for employment under 5 U.S.C. 3109.

### WATERSHED AND FLOOD PREVENTION OPERATIONS

For necessary expenses to carry out pre- ventive measures, including but not limited to research, engineering operations, methods of cultivation, the growing of vegetation, re- habilitation of existing works and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act approved August 4, 1954 (16 U.S.C. 1001–1005 and 1007–1009), the provisions of the Act of
CONGRESSIONAL RECORD—HOUSE

June 8, 1999

1138

April 27, 1935 (16 U.S.C. 590a–f), and in accordance with the provisions of laws relating to the activities of the Department, $99,443,000, to remain available until expended (7 U.S.C. 2209b) (of which up to $15,000,000 may be available to carry out the purposes of the Endangered Species Act of 1973 (Public Law 93–205), including cooperative efforts as contemplated by that Act to relocate endangered or threatened species to other suitable habitats as may be necessary to expedite project construction.

RESOURCES CONSERVATION AND DEVELOPMENT

For necessary expenses in planning and carrying out projects for resource conservation and development and for sound land use pursuant to the provisions of section 32(e) of title III of the Bankhead-Jones Farm Tenant Act (6 U.S.C. 1767), the Agriculture and Food Act of 1981 (16 U.S.C. 3461–3461e), to remain available until expended (7 U.S.C. 2225), and not to exceed $200,000 shall be available for employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2209b): Provided, That any obligated and unobligated balances available from prior years for the “Rural Utilities Assistance Program” account shall be transferred to and merged with this account.

AMENDMENT NO. 12 OFFERED BY MR. SANDERS

MR. SANDERS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 12 offered by Mr. Sanders:

Page 35, line 7 (relating to the rural community development), insert after the dollar amount the following: “(increased by $1,000,000)”. Page 53, line 7 (relating to ocean freight differential grain, insert after the dollar amount the following: “(reduced by $3,000,000)”).

MR. SANDERS. Mr. Chairman, the amendment I am offering would provide $1 million in the rural community development program in order to fund a national pilot program to promote agritourism. The purpose of this program is to provide another means of income for America’s struggling family farmers. I think the plight of the family farmers in America is well documented and I do not need to get into it at this time. But I believe that the body here knows that many, many thousands of hardworking family farmers are struggling to keep their farms afloat and to keep their heads above water. I am impressed with the work done in the chairman’s home State of New Mexico with agritourism, and I know the gentleman from New Mexico has been very active in this program. I think it would be very useful to farmers in the State of Vermont and farmers throughout this country to expand this general concept into a national program. The concept here is that in States throughout this country, tourism brings in substantial sums of money. One of the reasons people come to the State of Vermont or come to many of the other beautiful States in this country is because of the work done by family farmers in keeping the land open and keeping our landscape beautiful.

Unfortunately, in many areas throughout the State, the farmers themselves do not substantially benefit from the tourism that comes into rural areas. So it seems to me that if we could get a pilot program developed at the Federal level by which States can develop their own innovative programs, this would be a means by which tourism dollars can come into the hands of farmers and I think would well serve rural America.

My understanding, Mr. Chairman, is that the chairman of the committee agreed to accept this amendment. I am very grateful to him for that.

Mr. SKEEN. Mr. Chairman, if the gentleman will yield, this amendment has a lot of value for the rural parts of the United States. We have a program in New Mexico that was patterned after the same one that the gentleman is headed for. We accept the amendment.

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. SANDERS. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. I thank the gentleman for yielding. I just wanted to rise in support of this important amendment and to say that we would certainly want to encourage the Department of Agriculture to do as good a job as possible on linking many of the rural events around the country, many of our special fairs, rural shows, whether it is equipment, whether it is planting or whatever it might be. This is an incredible display of American innovation and creativity. I just really want to compliment the gentleman from Vermont (Mr. Sanders) for seeing this opportunity which can benefit Vermont, an incredible State. I am so happy to have traveled there myself, just the sheer beauty of it would be of interest to our own people and people from abroad, but all of the counties and townships and communities across the country that are bringing forth their wares and their culture and to make this more open and available to people who are touring. I just think the gentleman has an excellent idea and support this amendment.

Mr. SANDERS. I thank both the chairman and the ranking member very much for their support. The bottom line is that we are all fighting very hard to see that our family farmers in agriculture and tourism is one way we can get some cash into the pockets of our family farmers. I thank both the chairman and the ranking member for their support.
The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Vermont (Mr. SANDERS).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

**RURAL HOUSING SERVICE**

**RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT**

(Including Transfers of Funds)

For the obligations for the principal amount of direct and guaranteed loans as authorized by title V of the Housing Act of 1949, to be available from funds in the rural housing insurance fund, as follows:

$4,537,632,000 for loans to section 502 borrowers, as determined by the Secretary, of which $3,200,000,000 shall be for unsubsidized guaranteed loans; $32,400,000 for section 504 housing repair loans; $100,000,000 for section 538 guaranteed multi-family housing loans; $25,000,000 for section 514 farm labor housing; $120,000,000 for section 515 rental housing; $5,152,000 for section 524 site loans; $7,505,000 for credit sales of acquired property, of which up to $1,250,000 may be for multi-family credit sales; $100,000,000 for section 523 self-help housing land development loans.

For the cost of direct and guaranteed loans, including the cost of modifying loans, as defined in section 502 of the Congressional Budget Act of 1974, as follows: section 502 loans, $133,620,000, of which $19,520,000 shall be for unsubsidized guaranteed loans; section 504 housing repair loans, $9,900,000; section 538 multi-family housing guaranteed loans, $480,000; section 514 farm labor housing, $11,308,000; section 515 rental housing, $47,610,000; section 524 site loans, $5,656,000; section 523 self-help sales of acquired property, $874,000, of which up to $49,250 may be for multi-family credit sales; and section 523 self-help housing land development loans, $281,000: Provided, That of the total amount appropriated in this paragraph, $9,829,000 shall be for empowerment zones and enterprise communities, as authorized by Public Law 103–46, empowerment zones as authorized by Section 951 of the Taxpayer Relief Act of 1997 (Public Law 105–34), enterprise communities as authorized by Section VII, Title VI, Section 1466 of the Fiscal Year 1999 Omnibus Appropriations Act (Public Law 105–277), and communities designated by the Secretary of Agriculture as rural economic area partnership zones: Provided further, That if such funds are not obligated for empowerment zones and enterprise communities by June 30, 2000, they shall remain available for other authorized purposes under this head.

In addition, for administrative expenses necessary to carry out the direct and guaranteed loan programs, $377,879,000, which shall be transferred to and merged with the appropriation for "Rural Housing Service, Salaries and Expenses":

**AMENDMENT NO. 18 OFFERED BY MS. KAPUTR**

Ms. KAPUTR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 18 offered by Ms. KAPUTR:

In the third paragraph under the headings "RURAL HOUSING SERVICE" and "RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT (INCLUDING FUNDS)," respectively, at the end of the paragraph, strike the following: "Provided, That of this amount the Secretary of Agriculture may transfer up to $7,000,000 to the appropriation for "Outreach for Socially Disadvantaged Farmers":".

Ms. KAPUTR. Mr. Chairman, this amendment relates to a special effort for outreach for our socially disadvantaged farmers. Members might recall, last year we made a real effort to try to help the Department of Agriculture to resolve former civil rights problems that existed with loan programs and programs that were there to reach many of the small-scale farmers and ranchers, those grants that go through our 1890 and 1862 land grant institutions, American Indian community colleges, Hispanic- and Latino-serving institutions, as well as all minorities involved in agriculture. I think we did a good job on the unusual step of waiving statutes of limitation to allow complaints involving racial discrimination to move forward. This amendment this year would not increase the budget but would merely allow the Secretary of Agriculture to go up to $7 million from the rural housing salaries and expenses account to this program. If the Secretary uses the full authority to do that, that would mean that this outreach program for socially disadvantaged farmers would be brought up to the $10 million request level by the administration for fiscal year 2000. This program is important, because it provides technical and managerial assistance to small-scale farmers and ranchers. There is a particular emphasis in the program on farmers from minority groups, but the program is not just limited to racial or ethnic minorities. It is carried out through grants to colleges and universities, including the 1890 and 1862 land grant institutions, American Indian community colleges and Hispanic- and Latino-serving institutions as well as through grants to community-based organizations throughout our country. These institutions and organizations in turn provide intensive training and management assistance to small farmers and ranchers. This assistance includes, for example, preparing individualized farm plans, helping in upgrading accounting systems, and applying for credit, aid and better understanding and taking advantage of USDA programs and services.

This outreach is especially crucial now because of the crisis afflicting rural America. And it is vital to helping small and minority farmers and ranchers weather these hard times and stay on the land. I think it also adds to an important civil rights sensitivity that we need to continue pressing at the U.S. Department of Agriculture.

I want to thank Secretary Glickman and his staff for being open to the efforts of this Congress to serve all of America. For these reasons, I am pleased to offer this amendment. I greatly appreciate the support of the gentleman from New Mexico for this initiative, and I urge adoption of the amendment.

Mr. SKEEN. Mr. Chairman, I support the adoption of the gentlewoman's amendment. I thank her for her concern. The committee has increased funds for civil rights funds at USDA in the past several years but progress has fallen far short of their expectation.

The 2501 program has been moved within the bureaucracy several times, and it has never been audited. I believe the committee should look carefully at this. I call on my colleagues as we approach a vote on the amendment offered by the gentlewoman from Ohio (Ms. KAPUTR).

The amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Ohio (Ms. KAPUTR).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For rental assistance agreements entered into or renewed pursuant to the authority under section 521(a)(2) or agreements entered into in lieu of debt forgiveness or payments for eligible households as authorized by section 502(c)(5)(D) of the Housing Act of 1949, as amended, $383,400,000; and, in addition, such sums as may be necessary, as authorized by section 521(c) of the Act, to liquidate debt incurred prior to fiscal year 1992 to carry out the rental assistance program under section 521(a)(2) of the Act: Provided: That of this amount, not more than $5,900,000 shall be available for debt forgiveness or payments for eligible households as authorized by section 502(c)(5)(D) of the Act, and not to exceed $10,000 per project for advances to nonprofit organizations or public agencies to cover delinquent rental payments (other than court-ordered payments) incurred in purchasing projects pursuant to section 502(c)(5)(C) of the Act: Provided further, That agreements entered into or renewed during fiscal year 2000 shall be funded for a five-year period, although the life of any such agreement may be extended to fund additional amounts when necessary.

**MUTUAL AND SELF-HELP HOUSING GRANTS**

For grants and contracts pursuant to section 523(b)(1)(A) of the Housing Act of 1949 (42 U.S.C. 1490c), $28,000,000, to remain available until expended (T.H.R.S. 2219E: Provided, That of the total amount appropriated, $1,000,000 shall be for empowerment zones and enterprise communities, as authorized by Public Law 105–36, empowerment zones as authorized by Section 951 of the Taxpayer Relief Act of 1997 (Public Law 105–34), enterprise communities as authorized by Section VII, Title VII, Section 766 of the Fiscal Year 1999 Omnibus Appropriations Act (Public Law 105–277), and communities designated by the Secretary of Agriculture as rural economic area partnership zones: Provided further, That if such funds are not obligated for empowerment zones and enterprise communities by June 30, 2001, they shall remain available for other authorized purposes under this head.

**RURAL HOUSING ASSISTANCE GRANTS**

For grants and contracts for housing for domestic farm labor, very low-income housing repair, supervisory and technical assistance, compensation for construction defects,
and rural housing preservation made by the Rural Housing Service, authorized by 42 U.S.C. 1474, 1479(c), 1486, 1490e, and 1490m, $50,000,000, to remain available until expended: Provided, That the total amount appropriated, $2,250,000, shall be for economic development and enterprise communities, as authorized by Public Law 103–66, empowerment zones as authorized by Section 951 of the Taxpayer Relief Act of 1997 (Public Law 105–34), enterprise communities as authorized by Division A, Title VII, Section 706 of the Fiscal Year 1999 Omnibus Appropriations Act (Public Law 105–277), and communities designated by the Secretary of Agriculture as Rural Economic Area Partnership Zones: Provided further, That if such funds are not obligated by June 30, 2000, they shall remain available for other authorized purposes under this heading.

SALARIES AND EXPENSES

For necessary expenses of the Rural Housing Service, including administering the programs authorized by the Consolidated Farm and Rural Development Act, title V of the Housing Act of 1949, and cooperative agreements; for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $250,000 may be used for employment under 5 U.S.C. 3109: Provided, That the Administrator may expend not more than $10,000 to provide model nonmonetary awards to non-USD A employees.

RURAL BUSINESS-COOPERATIVE SERVICE
RURAL DEVELOPMENT LOAN FUND PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

For the cost of direct loans, $22,799,000, as authorized by the Rural Development Loan Fund (42 U.S.C. 4912a(a)): Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974: Provided further, That these funds are available to subside gross obligations for the principal amount of direct loans of $52,495,000: Provided further, That the total amount appropriated, $4,343,000 shall be available for the cost of direct loans for empowerment zones and enterprise communities, as authorized by Public Law 103–66; empowerment zones was authorized by Section 951 of the Taxpayer Relief Act of 1997 (Public Law 105–34), enterprise communities as authorized by Division A, Title VII, Section 706 of the Fiscal Year 1999 Omnibus Appropriations Act (Public Law 105–277), and communities designated by the Secretary of Agriculture as Rural Economic Area Partnership Zones: Provided further, That if such funds are not obligated by June 30, 2000, they shall remain available for other authorized purposes under this heading.

In addition, for administrative expenses to carry out the direct loan programs, $3,337,000 shall be transferred to and merged with the appropriation for the Rural Business-Cooperative Service, Salaries and Expenses.

RURAL ECONOMIC DEVELOPMENT LOANS PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

For the principal amount of direct loans, as authorized under section 313 of the Rural Electrification Act of 1949 (7 U.S.C. 933), $121,500,000; 5 percent rural telecommunications loans, $75,000,000; cost of money rural telecommunications loans, $121,500,000; 5 percent rural telecommunications loans, $3,290,000.

For the cost of direct loans, including the cost of modifying loans as defined in section 502 of the Congressional Budget Act of 1974, $15,453,000.

Of the funds derived from interest on the cushion of credit payments in fiscal year 2000, as authorized by section 313 of the Rural Electrification Act of 1936, $3,453,000 shall not be obligated and $3,453,000 are rescinded.

RURAL COOPERATIVE DEVELOPMENT GRANTS

For rural cooperative development grants authorized under section 310B(e) of the Consolidated Farm and Rural Development Act of 1996 (Public Law 104–123), which $1,500,000,000 shall be available for cooperative agreements for the appropriate technology transfer for rural areas program and $1,500,000 for cooperative research agreements.

SALARIES AND EXPENSES

For necessary expenses of the Rural Business-Cooperative Service, including administering the programs authorized by the Consolidated Farm and Rural Development Act, section 1233 of the Food Security Act of 1985; the Cooperative Marketing Act of 1929; for activities relating to the marketing aspects of cooperatives authorized by the Agricultural Marketing Act of 1946; for activities with institutions concerning the development and operation of agricultural cooperatives; and for cooperative agreements; $25,612,000: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $260,000 may be used for employment under 5 U.S.C. 3109.

RURAL UTILITIES SERVICE
RURAL ELECTRIFICATION AND TELECOMMUNICATIONS LOANS PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

Insured loans pursuant to the authority of section 305 of the Rural Electrification Act of 1936 (7 U.S.C. 935) shall be made as follows: Insured rural electrification loans, $121,500,000; 5 percent rural telecommunications loans, $75,000,000; cost of money rural telecommunications loans, $121,500,000; municipal rate rural electric loans, $206,000,000; and loans made pursuant to section 306 of that Act, rural electric, $1,500,000,000 and rural telecommunications, $120,000,000, to remain available through September 30, 2000, of which $4,611,829,000 is hereby appropriated and $4,935,199,000 shall be derived from funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c): Provided, That none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That up to $1,383,000 shall be available for independent verification of school food service claims: Provided further, That none of the funds under this heading shall be available unless the value of bonus commodities provided under section 32 of the Act of August 24, 1935 (49 Stat. 774, chapter 611; 7 U.S.C. 612c), and section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is included in meeting the minimum commodity assistance requirement of section 6(g) of the National School Lunch Act (7 U.S.C. 1755).

RURAL TELEPHONE BANK PROGRAM ACCOUNT
(INCLUDING TRANSFERS OF FUNDS)

The Rural Telephone Bank is hereby authorized to make purchases, within the limits of funds available to such corporation in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out its authorized programs. During fiscal year and any fiscal year after, not more than 5 percent of the amount of direct loans shall be $175,000,000.

For the cost, as defined in section 502 of the Congressional Budget Act of 1974, $15,000,000, to remain available through September 30, 2001: Provided, That none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That not more than $1,383,000 shall be available for independent verification of school food service claims: Provided further, That none of the funds under this heading shall be available unless the value of bonus commodities provided under section 32 of the Act of August 24, 1935 (49 Stat. 774, chapter 611; 7 U.S.C. 612c), and section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is included in meeting the minimum commodity assistance requirement of section 6(g) of the National School Lunch Act (7 U.S.C. 1755).

SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC)

For necessary expenses to carry out the special supplemental nutrition program as authorized by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1772), and not to exceed $105,000 may be used for employment under 5 U.S.C. 3109.

TITLE IV
DOMESTIC FOOD PROGRAMS
OFFICE OF THE UNDER SECRETARY FOR FOOD, NUTRITION AND CONSUMER SERVICES

For necessary salaries and expenses of the Office of the Under Secretary for Food, Nutrition and Consumer Services, as authorized under the laws enacted by the Congress for the Food and Nutrition Service, $554,000.

FOOD AND NUTRITION SERVICE
CHILD NUTRITION PROGRAMS
(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to carry out the National School Lunch Program (42 U.S.C. 1751 et seq.), except section 21, and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), except sections 17 and 21; $9,547,028,000, to remain available through September 30, 2001, of which $4,611,829,000 is hereby appropriated and $4,935,199,000 shall be derived from funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c): Provided, That none of the funds made available under this heading shall be used for studies and evaluations: Provided further, That up to $1,383,000 shall be available for independent verification of school food service claims: Provided further, That none of the funds under this heading shall be available unless the value of bonus commodities provided under section 32 of the Act of August 24, 1935 (49 Stat. 774, chapter 611; 7 U.S.C. 612c), and section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is included in meeting the minimum commodity assistance requirement of section 6(g) of the National School Lunch Act (7 U.S.C. 1755).
available under this heading shall be used for studies, research, and evaluations:
Provided, That none of the funds provided in this account shall be available for the purchase of infant formula except in accordance with the cost containment and competitive bidding requirements specified in section 17 of the Child Nutrition Act of 1966.

FOOD STAMP PROGRAM

For necessary expenses to carry out the Food Stamp Act (7 U.S.C. 2001 et seq.), $21,577,000, of which $100,000,000 shall be placed in reserve for use only in such amounts and at such times as may become necessary to carry out program operations: Provided, That the funds made available under this heading shall be used for studies, research, and evaluations: Provided further, That none of the funds in this Act shall be available to pay administrative expenses of WIC clinics except those that have an announced policy of prohibiting smoking and the admission of smoking within the space used to carry out the program: Provided further, That none of the funds provided in this account shall be available for the purchase of infant formula except in accordance with the cost containment and competitive bidding requirements specified in section 17 of the Child Nutrition Act of 1966.

Commodity Assistance Program

For necessary expenses to carry out the commodity supplemental food program as authorized by section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612: note) and the Emergency Food Assistance Act of 1983, $141,000,000, to remain available through September 30, 2001: Provided, That none of these funds shall be available to reimburse the Commodity Credit Corporation for commodities donated to the program.

Food Donations Programs

For necessary expenses to carry out section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612: note); special assistance for the nuclear affected islands as authorized by section 103(b)(2) of the Compacts of Free Association Act of 1985, as amended; and section 311 of the Older Americans Act of 1965 (42 U.S.C. 300a-10, §141,000,000, to remain available through September 30, 2001: Provided, That none of these funds shall be available to reimburseconstitute the Commodity Credit Corporation for benefits provided to this program.

Food Program Administration

For necessary administrative expenses of the domestic food programs funded under this Act, $108,561,000, of which $5,000,000 shall be available only for simplifying procedures, reducing overhead costs, and other innovations and improvements in food stamp operations, to remain available through September 30, 2001.

Title V

Foreign Assistance and Related Agencies

For expenses of the Foreign Agricultural Service carrying out this title of the Agricultural Act of 1964 (7 U.S.C. 1761–1768), market development activities abroad, and for enabling the Secretary to carry out the programs and activities of the Foreign Agricultural Service in connection with foreign agricultural work, including not to exceed $128,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1766), $137,768,000: Provided, That the Service may utilize advances of funds, or reimburse this appropriation for expenditures made on behalf of Federal agencies, public and private organizations and institutions under agreements executed pursuant to the Agricultural Trade Development and Assistance Programs (7 U.S.C. 1736) and the foreign assistance programs of the United States Agency for International Development.

None of the funds in the foregoing paragraph shall be available to promote the sale or export of tobacco or tobacco products.

Public Law 480 Title I

For the cost, as defined in section 502 of the Congressional Budget Act of 1974, of Public Law 83–180 title I credits, including the cost of modifying credit arrangements under said Act, $165,400,000, to remain available until expended.

In addition, for administrative expenses to carry out the Agricultural Trade Development and Assistance Programs, title VI of the Agricultural Act of 1954, as amended, to the extent funds appropriated for Public Law 83–180 are utilized, $1,958,000, of which not to exceed $1,000,000 may be transferred to and merged with “Salaries and Expenses” of the Foreign Agricultural Service, and of which not to exceed $654,000 may be transferred to and merged with “Salaries and Expenses” of the Food and Drug Administration, where; and not to exceed $25,000 for employment under 5 U.S.C. 3109, $65,000,000, includ-

Public Law 480 Title II and III

For expenses during the current fiscal year, not otherwise recoverable, and uncovered prior years’ costs, including interest thereon under the Agricultural Trade Development and Assistance Act of 1954, as amended, $14,000,000, to remain available until expended for ocean freight differential costs for the shipment of agricultural commodities pursuant to title I of said Act, including Food for Progress programs as authorized by the Food for Progress Act of 1985, as amended: Provided, That funds made available for the cost of title I agreements and for title I ocean freight differential may be used interchangeably between the two accounts (7 U.S.C. 1701b, 229b).

Public Law 480 Title IV

For expenses during the current fiscal year, not otherwise recoverable, and uncovered prior years’ costs, including interest thereon under the Agricultural Trade Development and Assistance Act of 1954, as amended, $387,000,000 for commodities supplied in connection with dispositions abroad pursuant to title III of the Act: Provided, That sums made available to carry out title II or title III of said Act shall remain available until September 30, 2003 (7 U.S.C. 1691, 1721–26a, 1721–26d, 1731, 2301 et seq.). Of the funds made available by this Act to carry out the Agricultural Trade Development and Assistance Act of 1964, not to exceed 1 percent of the amount available to carry out any title of said Act may be used to carry out any other title of said Act.

Commodity Credit Corporation Export Loans Program Account

For administrative expenses to carry out the Commodity Credit Corporation’s export guarantee program, GSM 102 and GSM 103, $4,085,000; to cover common overhead expenses as permitted by section 11 of the Commodity Credit Corporation Charter Act and in conformity with the Federal Credit Reform Act of 1990, of which $3,415,000 may be transferred to and merged with the appropriation for “Foreign Agricultural Service” and General Sales Manager” and $672,000 may be transferred to and merged with the appropriation for “Farm Service Agency, Salaries and Expenses”.

Title VI

Food and Drug Administration

For necessary expenses of the Food and Drug Administration, for the purchase of passenger motor vehicles; for payment of space rental and related costs pursuant to Public Law 92–313 for programs and activities of the Food and Drug Administration which are included in this Act; for rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous necessary and emergency expenses of enforcement, inspection, and activities authorized and approved by the Secretary and to be accounted for solely on the Secretary’s certificate, not to exceed $25,000; $1,218,384,000, of which not to exceed $145,494,000 in prescription drug user fees authorized by 21 U.S.C. 379(h) may be credited to this appropriation and remain available until expended: Provided, That no more than $100,180,000 shall be for payments to the General Services Administration for rent and related costs.

INDEPENDENT AGENCIES

Commodity Futures Trading Commission

For necessary expenses to carry out the provisions of the Commodity Exchange Act (7 U.S.C. 1 et seq.), including the purchase and hire of passenger motor vehicles; the rental of space (to include multiple year agreements) in the District of Columbia, or elsewhere; and not to exceed $25,000 for employment under 5 U.S.C. 3109, $65,000,000, including not to exceed $2,000 for official reception and representation expenses: Provided, That the Commission is authorized to charge reasonable fees to attendees of Commission sponsored educational events and symposia and to the Commissions, for the reasonable costs of providing those events and symposia, and notwithstanding 31 U.S.C. 3302, shall be
That this limitation shall not apply to expenses for uniforms or allowances therefor as authorized by law, appropriations and authorizations made available in the event that a fee authorized levels of funding could be made for the Department of Agriculture for research and service introduction of new packaging materials and new uses for existing ones. I appreciate the committee's statement recognizing the value of this regulation. I am concerned that the necessary funds have yet to be appropriated since both the committee and the administration are counting on the authorization of user fees. Although the industries benefiting from this program are willing to support reasonable use of fees, an authorization by Congress this year is not guaranteed. In fact, as of today no fee authorization bill has been introduced much less discussed in any detail.

I just wanted to point this out and I say it would be a shame if this innovative new program were to fall between the cracks, and as this bill moves along, in the process I would hope that the chairman and ranking member would make sure that at the authorized levels of funding could be made available in the event that a fee system cannot be enacted in time for Fiscal Year 2000.

The CHAIRMAN. The Clerk will read The following:

SEC. 708. No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements entered into by the Department of Agriculture and nonprofit institutions in excess of 10 percent of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate payment of indirect costs on grants and contracts with such institutions when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

SEC. 712. Notwithstanding any other provision of this Act, all loan levels provided in this Act shall be considered estimates, not limitations.

SEC. 714. Appropriations to the Department of Agriculture for the cost of direct and guaranteed loans made available in fiscal year 2000 shall remain available until expended to cover obligations made in fiscal year 2000 for the following accounts: the rural development loan fund program account; the Rural Telephone Bank program account; the rural electrification and telecommunications loans program account; the Rural Housing Insurance Fund Program Account; and the rural economic development loans program account.

SEC. 715. Such sums as may be necessary for years 2000 and 2001 shall be subject to the limitation of this Act.

SEC. 716. Notwithstanding the Federal Grant and Cooperative Agreement Act, marketing services of the Agricultural Marketing Service; Grain Inspection, Packers and Stockyards Administration; the Animal and Plant Health Inspection Service; and the food safety activities of the Food Safety and Inspection Service may use cooperative agreements to reflect a relationship between the Department of Agriculture and a State or cooperative agreement.

SEC. 717. Notwithstanding the Federal Grant and Cooperative Agreement Act, the Natural Resources Conservation Service may enter into contracts, grants, or cooperative agreements with a State agency or subdivision, or a public or private organization, for the acquisition of goods or services, including personal services, to carry out natural resources conservation activities: Provided, That Commodity Credit Corporation funds obligated for such purposes shall not exceed the level obligated by the Commodity Credit Corporation for such purposes in fiscal year 1999.

SEC. 718. None of the funds in this Act may be used to retire more than 5 percent of the Class A stock of the Rural Telephone Bank or maintain any interest within the accounting records of the Rural Telephone Bank the creation of which has
not specifically been authorized by statute; Provided, notwithstanding any other provision of law, none of the funds appropriated or otherwise made available in this Act may be used to transfer to the Treasury or to the Federal Financing Bank any unobligated balance of the Rural Telephone Bank telephone liquidating account which is in excess of current requirements and such balance shall be set forth as funds made available under that section.

SEC. 719. Of the funds made available by this Act, $1,100,000,000 shall be used to cover necessary expenses of activities related to all advisory committees, panels, commissions, and task forces of the Department of Agriculture, except for panels used to comply with negotiated rule makings and panels used to evaluate competitively awarded grants.

SEC. 720. None of the funds appropriated in this Act may be used to carry out the purposes of the National Drought Policy Commission.

SEC. 721. None of the funds made available by this Act may be used to establish any new programs, projects, or activities that would otherwise be made available by this Act or any other Act, unless the Committee on Appropriations of both Houses of Congress is notified fifteen days in advance of such reprogramming of funds.

SEC. 722. None of the funds appropriated or otherwise made available in this Act to any other agency or office of the Department for more than 30 days unless the individual's employing agency or office is fully reimbursed by the receiving agency or office for the salary and expenses of the employee for the period of the assignment.

SEC. 723. None of the funds appropriated or otherwise made available in the Department of Agriculture shall be used to transmit or otherwise make available to any non-Department of Agriculture employee questions or responses to questions that are a result of information requested for the appropriations hearing process.

SEC. 724. None of the funds made available to the Department of Agriculture by this Act may be used to acquire new information technology systems or significant upgrades, as defined in the Office of Management and Budget Circular A-130 as modified by Circular A-102, the Office of the Chief Information Officer, without the approval of the Chief Information Officer and the concurrence of the Executive Information Technology Committee.

SEC. 725. That interagency relations or activities, or panels, commissions, and task forces of the Department of Agriculture, except for panels used to comply with negotiated rule makings and panels used to evaluate competitively awarded grants, which are notified fifteen days in advance of such reprogramming of funds.

SEC. 726. None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel who carry out an environmental quality incentives program authorized by sections 334-341 of Public Law 104-127 in excess of $174,000,000.

SEC. 727. None of the funds appropriated or otherwise made available by this Act may be used to administer the provision of contract payments to a producer under the Agricultural Market Transition Act (7 U.S.C. 7230 et seq.) for contract acreage on which wild rice is planted unless the contract payment is reduced by an acre for each contract acre planted to wild rice.

SEC. 728. None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel who carry out the provisions of section 401 of Public Law 104-127, with the exception of funds made available under that section on January 1, 1997.

SEC. 729. None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel who carry out the wetlands reserve program.

SEC. 730. None of the funds appropriated or otherwise made available by this Act, $1,000,000 is appropriated for the purpose of providing Bill Emerson and Mickey Leland Hunger Fellowships through the Congressional Hunger Center, which is an organization described in subsection (c)(3) of section 501 of the Internal Revenue Code of 1986 and is exempt from taxation under subsection (a) of such section.

SEC. 731. None of the funds appropriated by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 732. None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel to establish an Office of Community Food Security or any similar office within the United States Department of Agriculture without the prior approval of the Committee on Appropriations of both Houses of Congress.

SEC. 733. None of the funds appropriated or otherwise made available by this Act, $1,000,000 is appropriated for the purpose of providing Bill Emerson and Mickey Leland Hunger Fellowships through the Congressional Hunger Center, which is an organization described in subsection (c)(3) of section 501 of the Internal Revenue Code of 1986 and is exempt from taxation under subsection (a) of such section.

SEC. 734. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 735. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 736. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 737. None of the funds appropriated by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 738. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 739. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 740. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.

SEC. 741. None of the funds appropriated or otherwise made available by this Act, if such program exceeds $99,000,000.

(b) None of the funds provided by this Act, or provided pursuant to any other Act to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2000, or provided from any account other than the United States budget other than the Treasury, shall be used to pay the salaries and expenses of personnel to enroll in excess of 120,000 acres under the Conservation Reserve Program, except that such program exceeds $99,000,000.
I just want to make sure that the letter from the National Cattlemen’s Beef Association is entered into the Record as part of this amendment, and I rise in strong support of the gentlewoman’s amendment.

**National Cattlemen’s Beef Association,**

Hon. Carrie P. MEEK, House of Representatives, Cannon House Office Building, Washington, DC.

Dear Rep. MEEK:

On behalf of the members of the National Cattlemen’s Beef Association (NCBA), I wanted to inform you that NCBA supports the language on inspection equivalency you plan to offer to the FY 2000 House Agriculture Appropriations measure. We appreciate your staff reviewing the proposed amendment with us.

NCBA strongly supports measures that work, through sound science, to ensure the safety and wholesomeness of the U.S. food supply. In addition, we are constantly engaged in trade discussions and disputes with other countries who use the “equivalency” issue as a barrier to U.S. beef and other livestock products. Your proposed amendment certainly would ensure the Secretary of Agriculture’s important role in making sure that any beef, other meat, or poultry products imported into the United States adhere to the same rigorous standards that America’s cattlemen and women, and other livestock producers meet.

Thank you for your leadership on this matter. We look forward to its successful inclusion in the Agriculture Appropriations package. Please let us know if we can be of assistance in this effort.

Sincerely,

DALE W. MOORE,
Executive Director, Legislative Affairs.

Mr. SKEEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we have sent this amendment in its earlier version to the USDA but received no formal comment. We have been told that the administrator of the Food Safety Inspection Service has concerns about the amendment, but we do not know what those concerns are at this time. I think we can all agree with the heart of the amendment, that imported food ought to meet the same standard as the domestic products. There are important trade and food safety considerations here, and I would have liked some time to hear from the administration.

Nevertheless, I am prepared to support the gentlewoman’s amendment, with the understanding that we will need to work together before the conference to give the administration an opportunity to be involved.

Mr. COBURN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to go on record as supporting this amendment. As a physician and as a Member of Congress from a cattle and farm State, to me it is unconscionable that we can produce cattle and butter it in the State of Oklahoma and ship it to Kansas under great quality standards, but, at the same time, meat produced outside of this country can come anywhere in this country and not meet those same standards.

I would like to say, as a Member of Congress from a cattle producing State, that this not only makes sense from a standpoint of food safety, but also is eminently fair to our cattle producers and our consumers. This will not raise the cost. What it will do is assure that the American consumer is getting what they paid for. The imported goods coming into this country ought to have to meet the same standard as the provider of goods in this country domestically produced. So I support the amendment.

Mr. TRAPICANT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to echo those comments and I want to support very strongly the amendment offered by the gentlewoman from Florida. Her efforts in this regard will not only help with the safety standards, but, keep in mind, in the last several years, where we used to inspect trucks coming across Mexico and Canada, now you have trucks coming from Canada with Australian ground beef that is not even being inspected on some occasions.

Now, yes, this may pose some hardship on our regulatory system, but it is very much overdue and there is a tremendous economic factor involved here as well.

Our farmers have sold hogs at 7 cents a pound live weight. My God, the one thing we can do is ensure that the same hoops and hurdles our farmers have to overcome shall be the world’s hurdles and hoops as well to ensure safety and quality and standardization of product.

So I want to compliment the distinguished gentlewoman. It is a great amendment and I support the amendment.

Mrs. MEEK of Florida. Mr. Chairman, I ask unanimous consent to strike the requisite number of words.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Florida?

There was no objection.

Mrs. MEEK of Florida. Mr. Chairman, I just wanted to say if anyone has ever suffered from salmonella from eating unsafe meat and poultry, they would understand the significance of this amendment. Why should our consumers be subjected to this very illness-causing disease and have these foreign countries being able to bring in meats and poultry without an equivalent kind of thing?

In speaking to the USDA, the USDA cannot clearly speak to this amendment because they do not have any facts, any substantive facts, that will prove that what they are accepting is equivalent, because last year, the last time, it looks as if USDA is not really enforcing the congressional directive,
June 8, 1999

CONGRESSIONAL RECORD—HOUSE 11945

and we need this tough new inspection system, and it is a key part of it, to take these sampling materials.

In closing, I want to thank the Congress, because this is a very, very essential matter to the health and welfare of our Nation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mrs. MEEK).

The amendment was agreed to.

AMENDMENT NO. 16 OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 16 offered by Mr. Traficant:

SEC. 9. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—In the case of any equipment or products that may be purchased using financial assistance provided under funds appropriated or otherwise made available by this Act, it is the sense of the Congress that entities receiving such assistance should, in expending the assistance, purchase only American-made equipment and products.

(b) NOTICE TO RECIPIENTS OF ASSISTANCE.—In providing financial assistance using funds appropriated or otherwise made available by this Act, the Federal agency providing the assistance shall provide to each recipient of the assistance a notice describing the statement made in subsection (a) of the Congress.

The amendment was agreed to.

AMENDMENT NO. 5 OFFERED BY MR. DEFAZIO

Mr. DEFAZIO. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 5 offered by Mr. DeFazio:

Insert before the short title the following new section:

SEC. 9. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—In the case of any equipment or products that may be purchased using any financial assistance under this Act, it is the sense of the Congress that those receiving such assistance should purchase American-made goods. It gives a notice to that effect. Meaningfully, this provision also states in its final section that if it is determined by a court or Federal agency that any person has intentionally affixed a label bearing a “Made in America” inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, those people shall be ineligible to receive any contract, award or subcontract that is made available by this Act. The bottom line, if you are saying it is made in America, it better be.

Finally, when we are going to spend hard-earned tax dollars of farmers that are getting hit from all ends, we should try and buy American-made goods. That just makes good sense.

Mr. SKEEN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I thought so much of the gentleman’s amendment that we made it permanent law 2 years ago. I am happy to accommodate the gentleman and put this item in the fiscal year 2000 bill as well.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. Traficant).

The amendment was agreed to.
Mr. SKEEN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I hope the House will vote down this amendment. It is true, there are funds in the Animal and Plant Health Inspection Service for predator control in western States. There are also funds for predator control in northern, southern, and eastern States.

There is money for research on Lyme disease and diseases spread by rats. There is money to control the spread of rabies in wild animals in the Midwest and eastern States. There is money to protect the bird population in Hawaii from devastation by the brown tree snake. There is money to protect airline passengers by controlling flocks of birds at airports. There is money to control damage to grain crops by blackbirds and to protect predatory birds that feed on domestically produced fish, so those farmers can make a decent living. There is money to promote nonlethal methods of animal control. There is money for animal welfare.

Mr. Chairman, I would suggest that if we are going to go after farmers and ranchers in one area of the country and deny them help, maybe we should look at all of the programs in this country and subsidies, to shift the entire burden to the States and the private sector.

Mr. Chairman, I ask my colleagues to vote no on this amendment.

Mr. BASS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the amendment. This is the same amendment that we passed on a Friday and then defeated on a Monday with a few phone calls having been made over the weekend. Congress would have the opportunity to vote again and be on record and pass this amendment this time.

It has been said that this is a very important program. From my perspective, I think it is a waste of money. The program does not work. It essentially is money from the taxpayers' pockets to private landholders to control predators on their own property. But what is said about it is that the program seeks to spend $20 million to solve a problem that only costs private landholders $7.2 million per year.

Nothing in this amendment, nothing in this amendment will affect in any way the programs for technical assistance or for bird control at airports. I serve on the Committee on Transportation and Infrastructure and on the Subcommittee on Aviation. I am an instrument-rated pilot. I have flown all over the country. I can assure the Members I would do nothing that would affect the safety of our Nation's airport.

This would carve out cleanly a subsidy to private individuals to control predators in a situation whose effectiveness is clearly under considerable question.

It is true that some of the resources for this program do go to other parts of the country, but 95 percent of the funds for this program go to these western States and to these large ranchers to use for predator control.

I would suggest that we can save money by passage of this amendment. We can eliminate a practice that by even the best of interpretations is neither effective nor seemly, and I think it is an entirely inappropriate use of Federal funds.

Although I have enormous respect for all of the Members of the Committee on Appropriations who have supported this amendment, I think it is time that we eliminated this unnecessary funding from the Federal government.

Mr. WALDEN of Oregon. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. I want to talk about how my district is affected by what is going on out there. I want to share with the body some letters that I have received from people not only in the district but from the State of Oregon with regard to this.

The head of the Department of Fish and Wildlife, the director, James Greer, has written saying, "We rely heavily on Wildlife Services as a partner in addressing the effects of wildlife and predatory animals on livestock and crops. Specifically, they provide animal damage control assistance to help resolve predations caused by black bear, cougars, and other predatory animals. In addition, they deal with human safety threats from an increasing cougar and bear population."

These threats are from a cougar population that is very real. "According to a recent study conducted by the Oregon Agricultural Statistics Service, more than $158 million of annual damage to Oregon agriculture products occurs from wildlife," this from Phil Ward, the director of the Department of Agriculture in Oregon.

Mr. Chairman, my district is one of the most rural districts in America. We have lots of family farms, and 55.5 percent of it is under Federal control. The refugees and all out there, we have enormous populations growing of predators. The Wallowa County School District tells me they have such a problem with cougars that they will not let the young kids off the bus until their parents are there to meet them. These are issues.

Is this amendment going to deal with all of that? Probably not. I am not up here to make extraordinary claims. But the point is in these small rural counties, in these small counties that have 1,000, 2,000, 7,000 people, this program is an integral piece in an overall package to deal with predators.

I want to show the Members a picture that does not look too damaging here, but this is a coyote and this is a lamb. The next picture in this series is probably too graphic for C-Span to show. When we have heard about control, predator control and that somehow that is an awful thing, the flip side of that is awful, as well. The flip side is the maiming that is done of sheep and cattle and all; animals raised on production. I move to strike the requisite number of words.

Mr. Chairman, I think this amendment goes too far. I think it hurts a program that is very important to the rural parts of America and that helps not just a handful of wealthy ranchers, as some might say, but probably close to 10,000 livestock producers each year are helped by this program.

Mr. DeFAZIO. Mr. Chairman, will the gentlewoman yield?

Mr. WALDEN of Oregon. I yield to the gentleman from Oregon.

Mr. DeFAZIO. Mr. Chairman, I thank the gentleman for yielding. Just on the photo, that was provided by the Federal government. It was actually taken at a test facility where the coyotes were starved and then put into an enclosure with sheep. It is a graphic photo, but it is not exactly representative.

Mr. WALDEN of Oregon. Reclaiming my time, Mr. Chairman, if I might, the point is illustrative, here. The gentleman knows as well as I do, and as well as anybody out in agriculture knows, the next in a series of photos like this out in the real world, not in some pen but in the real world, is the devastation that we see.

Mr. DeFAZIO. If the gentleman would further yield, and I appreciate the gentleman yielding, although we are opposite sides on this issue, also on the total wildlife damage in agriculture in Oregon, it was $158 million. The gentleman is exactly correct. However, the damage to livestock from predators was about $1 million, and more was spent by the State and the Feds to control that than if we had actually reimbursed people. The major damage was damage to crops. $14.6 million.

That damage, interestingly enough, took place from things on which coyotes prey, such as field mice, ground squirrels, prairie dogs, et cetera, et cetera. All of their prey is causing a big problem. Now we have to start another new program to go out and control the things that the predators used to prey on. I am out here because they are eating the grain and other crops.

We need to get a better vision. I think the gentleman and I could construct something that would work better. I thank the gentleman for his time.

Mr. WALDEN of Oregon. I appreciate the gentleman's comments. However, I would say that indeed, I thought I heard earlier a comment about how the
June 8, 1999  CONGRESSIONAL RECORD—HOUSE  11947

Mr. DEFAZIO. Not at all. If the gentleman will further yield, we will talk about coyote biology.

Mr. WALDEN of Oregon. Mr. Chairman, reclaiming my time, the point here is that we have many problems in my district in terms of predators devouring livestock. This program is helpful to that as part of the bigger package that combines State and local funds to deal with it.

Sometimes it is one game person that is out there dealing with this, one predator control officer. But because they are from such small entities, the funding is all combined.

Mr. Chairman, I urge opposition to this.

Mr. STENHOLM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the DeFazio amendment, which basically guts the core funding for USDA's Wildlife Services program. This is an important program that serves the public good in a number of ways, and it should be funded at the level approved by the House Appropriations Committee.

Reducing funds for USDA's Wildlife Services will not just affect lethal predator control in the West, it will also cripple other needed activities throughout the Nation. Often the same USDA staff who help ranchers manage problems of predators may also help local airports protect human life by removing flocks of birds near runways.

I emphasize that one of the reasons why the DeFazio amendment does not work as he had intended is that we use the same people, and when we eliminate a person, that person who might be not only helping ranchers with their predator problems might also be the same person that is dealing with flocks of birds around airports. That gets overlooked in some of the concerns which has been expressed here on the floor.

Make no mistake about it, this reduction in funds is not a targeted cut. Let me also add that Wildlife Services is not a Federal giveaway program. The majority of funding for the work of USDA's Wildlife Services comes from sources outside the Federal government, like State, local, and private organizations. Federal funds help to secure the basic program staff, who then are able to draw in significant funding directly from those who benefit from their work. However, without these USDA staff, it is unclear whether these outside funds will continue to be made available.

Finally, I am amazed by the argument that this program is not needed because wildlife-generated losses to property and human life are considered low by some folks. That is like arguing that childhood immunization programs are a waste of money since so few children now die from these diseases.

That is true. We spend public money on preventative programs so we will not have to face the alternative. We spend money on Wildlife Services in order to avoid rabies epidemics, downed aircraft, and dead or maimed livestock. I simply do not agree that just because the program seems to be working efficiently, it should now be eliminated.

Please support the responsible and necessary management of wildlife by opposing the DeFazio amendment.

Mr. DEFAZIO. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from Oregon.

Mr. DEFAZIO. Mr. Chairman, I would like to offer a compromise here. The gentleman raised a number of issues in which I am vitally concerned: Airports, bird strikes, those things on which a pitiful amount of money was spent last year, inadequate.

So if the gentleman would accept the first part of the amendment, which is a limitation only for lethal predator control for livestock, and not delete the amount of money and then support that, I would be happy to actually leave the funds in and if we direct the service to not waste the money on the lethal predator control.

Would the gentleman accept that?

Mr. STENHOLM. I most certainly would not, because I absolutely disagree with the intent of gentleman's amendment. Even though that sounds very reasonable, it completely overlooks one of the fundamental areas I disagree with, that we do not need to be assisting our ranchers with predator control.

The gentleman ought to come to the Seventeenth District of Texas and see what happens to livestock and what would happen under gentleman's proposal.

I just respectfully differ with the gentleman regarding what the gentleman intends and would like to do.

Mr. DEFAZIO. If the gentleman would further yield, Mr. Chairman, I was the county commissioner. We had tough times. We had to cut our match, which lost our Federal predator control agents.

All of my sheep ranchers were in and said, my God, you will not believe what is going to happen, Commissioner, if we do that. Do Members know what happened? Nothing. In fact, the predation went down over a 5-year period.

That is really interesting, that when we stop spending the money, and we heard that they did kill some predators still, but they did it in a very discriminatory fashion on their farms without a subsidy. I have a real life example in my district, which gets these funds, where we do better without them. I thank the gentleman.

Mr. STENHOLM. That is where we have reasonable differences. I have real life experience on the other side.

But also I would point out one other major, important aspect of it. It is rabies control. This is something that is extremely important to the general population in large segments of Texas. Perhaps in this one district in Oregon it is different.

I would assure the Members, in most places of the country, the argument on the side of the Committee on Appropriations and what the gentleman from New Mexico (Mr. SKEEN) and the gentlewoman from Ohio (Ms. KAPTUR) are suggesting is what the full House ought to do today. We ought to defeat this amendment.

Mr. BONILLA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to this amendment. This is a classic case of the proponents of an amendment using misinformation and emotional rhetoric to try to push their cause.

I think I heard the word earlier in one of the arguments in favor of the amendment, the word “barbaric” used to describe the animal damage control program that currently exists, also called Wildlife Services, now. I stand corrected.

But I ask my friends who suggest that this program might be barbaric for them to think for a second about children who might be afflicted by wildlife who are bitten by an animal afflicted by rabies.

When you think of the possibility of the eradication that we try to do in Texas, in Texas, for example, children playing in their yards and in States all across the country and throughout the Southwest, playing in their yards, who might be afflicted by rabies because of some raccoon or some other animal that might be crossing through a playground that might be afflicted, I would suggest that that is barbaric for anyone to think that a program that exists to protect the safety of children in playgrounds, that is pretty barbaric to suggest that that program is ineffective.

Also think about we just had a plane crash last week; and although the cause was not a form of wildlife, a flock of geese or birds flying into a plane engine, it is possible that that could occur. This wildlife services program tries to address that problem and keep those passengers safe in areas, many of which are located in the Northeast and in the New England area, tries to keep those passengers safe from any kind of accident like this by providing funds to control those flocks of birds near runways and airports.

Now, I would suggest that it is barbaric for anyone to think that a program like this is not a good program
Mr. Chairman, I want to also rise in opposition to this amendment that would severely undermine the USDA’s Wildlife Services Program. While I do not have a district out in the West but rather in the Midwest, it is very rural, and it is very big, and the fact of the matter is this program is a critical resource for the farmers and ranchers in the Midwest, to compensate them for the threat of crop and livestock damage.

As a matter of fact, wildlife causes as much as $1.6 billion in damage to agriculture each year. Given the fact that our farmers, right now their entire livelihoods are threatened with uncertain markets, unpredictable weather, some of the lowest prices we have ever seen in decades, this additional threat of losses due to wildlife is really above and beyond all the other factors. It is something that we have to be very mindful of.

I also want to make another point which is often overlooked. Our farmers and ranchers are among the best stewards of the land anywhere. They are our best conservationists. Their land provides wildlife habitat. Their production methods promote wide stewardship of that land. So let us not point the finger at the family farmer and rancher when, in fact, they are doing good things for the environment and things that are good for the American consumer.

I oppose the amendment, and I urge my colleagues to do the same.

Mrs. MORELLA. Mr. Chairman, I rise in strong support of the Bass-DeFazio amendment. The U.S. Department of Agriculture’s Wildlife Services program spends millions of dollars annually to kill more than 100,000 coyotes, foxes, bears, mountain lions, and other predators in the Western United States. Although there are non-lethal alternatives, Wildlife Services chooses to shoot, poison, trap, and even club to death both target and non-target animals. This taxpayer subsidy gives ranchers a disincentive to seek alternative methods of livestock protection that might be more effective.

The USDA predator control methods are non-selective, inefficient, and inhumane. Aerial gunning, sodium cyanide poisoning, steel-jawed leghold traps, and neck snares are Wildlife Services’ killing methods. These techniques have been known to kill pets and endangered and threatened species. Much of the killing is conducted before livestock is released into an area, with the expectation that predators will become a problem. However, killing wildlife to protect livestock is effective only if the individual animals who attack live stock are removed. Targeting the entire population is needlessly cruel, wastes taxpayer dollars and can be counter-productive. Studies have shown that predator populations reduced through indiscriminate killing produce larger litter sizes, which can be counter-productive.

With this amendment, the Wildlife Services’ program would be funded to assist with non-lethal predator protection services and in
cases to protect human and endangered species lives. I urge my colleagues to support the Bass-DeFazio amendment.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I rise in support of this amendment, which curtails the funding for what was formerly known as the Animal Damage Control program.

This amendment cuts $7 million in funding for the Department of Agriculture’s inappropriately named “Wildlife Services” program. I say that it is inappropriately named, because the program does nothing to serve in the best interests of wildlife. It is, instead, a program whose purpose is to help farmers cope with natural predators who may prey on their livestock. While I believe that helping farmers is a laudable goal, the problem is that the way this program is administered, little help is provided and much damage caused.

Each year, this program indiscriminately kills 90,000 coyotes, foxes, bears and mountain lions. It is indiscriminate because there are few controls to ensure that the animals being slaughtered are tied to attacks on livestock. Sometimes, young cubs are caught and killed, and on occasion, even a domesticated dog or cat will be mistakenly killed. This is simply not appropriate—and it should be stopped.

Wildlife Services is cruel because Wildlife Services still insists on using barbaric methods to handle these animals—including poisons, snares, and leg-hold traps. Sometimes, these animals are simply clubbed to death. Harp Seals are not the only animals that need protection from this brutal practice. We can do better than this—humane animal control techniques exist in our modern world. We can relocate animals that have caused problems.

How is it that we can build an internationally-sponsored space station yet we cannot find a way to treat our animals humanely? Do we need to spray poison in the face of animals that can contaminate other animals, or even humans, it comes in contact with afterwards? Must we kill not only the offending animal, but also every innocent scavenger that happens upon its corpse?

This program has been ineffective, and roundly criticized. It was fully reviewed by advisory committees under the Kennedy, Johnson, Nixon and Carter Administrations—each of which suggested numerous reforms, but none have been adopted. The General Accounting Office (GAO) similarly reviewed a report in 1995 that found the program to be largely ineffective.

Studies have shown the coyotes have adapted to our killing techniques much better than we have adapted towards more humane methods of predator control. Despite a 71% increase in funding for these programs between 1983 and 1993, coyotes have compensated for the culling of their species by simply having more pups. Surely, we have been out-foxed here—and it is time to stop the havoc that it would cause in dairyland all across the Nation.

My amendment also would have continued existing law, meaning that it would allow the continuation of the Northeast Dairy Compact. There has been increasing support for similar compacts around the country as a way to protect against and otherwise prevent the harm that would be done by the Secretary’s proposal and the havoc that it would cause in dairyland all across the Nation.

So, Mr. Chairman, rather than offer the amendment at this time, I would like to enter into a colloquy with several of my colleagues. I see the gentleman from Texas (Mr. COMBEST), chairman of the authorizing committee, the Committee on Agriculture, here; and I appreciate the gentleman coming down to participate in this discussion today.

Would the gentleman from Texas (Mr. COMBEST) agree that the Department of Agriculture’s recommendation of a modified version, Option 1-B, is unacceptable to the majority Members of Congress and more importantly the majority of American dairy farmers and would therefore have to be modified through the regular legislative process?

Mr. COMBEST. Mr. Chairman, will the gentleman yield?

Mr. WALSH. I am happy to yield to the gentleman from Texas.

Mr. COMBEST. Mr. Chairman, I would certainly be able to say yes just indicative of the fact that there is a bill to implement a different policy that I think has almost half of the Members of the House that are cosponsors of the bill. Certainly with the interest and concerns among the dairy industry, the Committee on Agriculture is certainly going to be looking into this in very short order.

Mr. WALSH. Mr. Chairman, reclaiming my time, I appreciate the gentleman’s statement and clarification of the Committee on Agriculture’s position. My concern is that we need to ensure that the legislation is enacted into law before the Secretary’s modified Option 1-B pricing reform is imposed on dairy farmers in my district.

Mr. COMBEST. Mr. Chairman, if the gentleman will yield, I would indicate to the gentleman, who has been a strong advocate of a dairy policy in this country and with a great deal of interest in this, there is a bill which has been introduced that will be the vehicle that will be used for hearing purposes and for markup. I think will be very much in line with the interest of the gentleman from California (Mr. POMBO), who is a strong advocate of a dairy policy in this country.

Mr. COMBEST. Mr. Chairman, I thank the gentleman from Texas (Mr. COMBEST) for explaining the position of the committee clearly.

Mr. WALSH. Mr. Chairman, I yield to the gentleman from California (Mr. POMBO), chairman of the Subcommittee on Livestock and Horticulture for his comments.

Mr. POMBO. Mr. Chairman, I concur with the statement of the full committee chairman. I know of the intense interest of the gentleman from New York (Mr. WALSH) on this issue as well as a number of other Members of the House. As we have been negotiating and working through this issue, I will
Mr. WALSH. I thank the gentleman. With the assurances received from the chairman of the subcommittee and the chairman of the full committee, I will not offer an amendment.

Mr. OBEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to comment on the colloquy that we just heard with respect to regional differences in the fluid milk prices, and I would like to recite for this House what the history of this matter is.

Since 1937, we have been operating under an outmoded system of milk marketing orders, which mandates by law, that certain farmers in certain regions of the country be paid more for their milk than are farmers from other sections of the country. That is a Federal law, believe it or not, and it has long served its usefulness.

When the farm bill was up on the floor 4 years ago, then-Congressman Gunderson, the chairman of the Dairy Subcommittee, tried to get a legislative remedy to that outmoded policy, and when he did that, he was blocked off at the pass by the House leadership, the Republican leadership in the form of the Speaker and Mr. Solomon, who chaired the Committee on Rules. In essence, what they told Steve at the time was, “Sorry, we are not going to give you a chance to vote on a legislative remedy; the best you are going to get is that we will give the Secretary of Agriculture an opportunity to look at these milk marketing orders and decide whether or not administrative action is needed to change this structure.”

Acting under that authority, Secretary Glickman proposed what was known as Option 1–B, which provided very minimal changes in the milk marketing order system across the country. That was found to be objectionable by many Members of this House, certainly not me but by many other Members, and so this House last year passed legislation which blocked the Secretary from moving ahead with those changes, those reforms in the milk marketing order system.

So, then, Mr. Glickman went back to the drawing board and he produced a second modified version of his proposal, which would have provided some changes, some modernization in that system, and it would have resulted in farmers in 15 of the 33 regions actually getting better prices for their milk than they do right now, and it would have had a downward pressure on some other regions.

It just struck me that it is amazing that the folks who won by preventing us from getting a legislative decision on this issue, and who insisted that this ought to be handled through the administrative route, are now saying that they are unhappy with even the tiny changes that were made administratively by the Secretary and are now suggesting that yet another legislative action is required to selectively amend the farm bill.

I do not believe that is the right way to go. It seems to me strange indeed that in a Congress which so often talks about the need to move closer to market arrangements, that we are having people who are insisting on sticking to the status quo which blocks moving agriculture in the dairy area closer to market arrangements.

I also find it interesting that some of the same folks who say that we should have free trade internationally are some of the same folks who, when it comes to internal trade within our own country, want to put up all kinds of trade barriers, informal trade barriers, in the form of these regional compacts.

So I would simply say I cannot do anything about the colloquy that just took place between the Members of the majority party. All I can say, as one Member from the upper Midwest, is that I do not think it is fair for people to try to have this issue both ways. We were told that we should take our shot at the administrative route rather than the legislative route. That is what happened. And now the Members, at least some of the Members who just spoke, are now trying to suggest that we ought not to have let that happen either.

We cannot move agriculture into the 20th century by sticking with this outmoded, old-fashioned milk marketing order system. And I would suggest if we are going to open this issue up, then we ought to open up the whole farm bill; that we ought to open up the question of whether we ought to have any milk marketing orders at all. We ought to be allowed to vote on the question of whether there ought to be one national milk marketing order rather than a whole series of them.

So I would urge Members to think carefully and confirm the try to selectively reopen that farm bill.

Mrs. CLAYTON. Mr. Chairman, I move to strike the last word.

If the chairman will engage me in a colloquy on the funding for the USDA facilities loan program, I would like to solicit his support for the administration’s funding request for programs like the community facilities loan and grant program, which finances multi-purpose community centers through which local governments are able to provide services for children and the elderly, school facilities, and fire and rescue equipment.

Mr. Chairman, over 50 percent of the community facilities funds are used for a variety of health services, including rural hospitals, rural health facilities, nursing homes, child care facilities which are desperately needed to assist in welfare reform.

There is a great need for these facilities in rural America and especially in my First Congressional District of North Carolina where local governments do not have sufficient tax resources or the sufficient tax base to provide for these essential services.

Mr. SKEEN. Mr. Chairman, will the gentlewoman yield?

Mrs. CLAYTON. I yield to the gentleman from New Mexico.

Mr. SKEEN. Mr. Chairman, I thank the gentlewoman for her support for this program and for rural America. I share her concern and promise to work in the conference to preserve the community facilities loan and grant program for rural America and appreciate the gentlewoman’s efforts.

Mrs. CLAYTON. Mr. Chairman, I thank the gentleman.

AMENDMENT NO. 5 OFFERED BY MR. DEFAZIO

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Oregon (Mr. DeFazio) on which further proceedings were postponed and on which the noise prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The CHAIRMAN. The pending recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 193, noes 230, not voting 11, as follows:

CONGRESSIONAL RECORD—HOUSE

Ms. DANNER, Ms. BROWN of Florida, Mrs. MEEK of Florida, and Messrs. HILL of Montana, HILLIARD, SMITH of Idaho, Mrs. MEEK of Florida, and Messrs. NETHERCUTT and HALL of Texas, ENGEL and MICA changed their vote from “no” to “aye.” So the amendment was rejected.

The result of the vote was announced as above recorded.

Amendment offered by Mr. NETHERCUTT

The Clerk read as follows:

Amendment offered by Mr. NETHERCUTT:

In the general provisions title, insert the following new section:

(a) PROHIBITION ON UNILATERAL ECONOMIC SANCTIONS.—Notwithstanding any other provision of law, the President shall not restrict or otherwise prohibit any exports of any kind, other agricultural products (including fertilizer, medicine, or medical supplies or equipment as part of any policy of existing or future unilateral economic sanctions imposed against a foreign government.

(b) NATIONAL SECURITY WAIVER.—The President may waive, for periods of not more than one year each, the applicability of subsection (a) with respect to a foreign country or entity if the President, with respect to each such waiver—

(1) determines that the national security so requires; and

(2) transmits to the Congress that determination, together with a detailed description of the reasons therefor, including an explanation of how the sanctions will further the national security.

(c) UNILATERAL ECONOMIC SANCTION DEFENSE.—In this section, the term “unilateral economic sanction” means any restriction or condition on economic activity with respect to a foreign country or foreign entity that is imposed by the United States for reasons of foreign policy or national security, except in a case in which the United States imposes the measure pursuant to a multilateral regime and the other members of that regime have agreed to impose substantially equivalent measures.

Applicability.—This section shall apply only to private commercial exports that are not subject to any Federal guarantee or direct credit.

Mr. NETHERCUTT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD. The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. DIAZ-BALART. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from Florida reserves a point of order. Mr. NETHERCUTT. Mr. Chairman, the policy of the United States of America for years has been to impose unilateral sanctions against trade between our Nation and other nations with which we might disagree on policy matters. The policy of sanctions imposed on other nations with which we might disagree on policy matters is outdated. In 1980, we in the agriculture communities of this country have still not gotten back the markets that we lost in 1980 by virtue of the unilateral imposition of sanctions against the Soviet Union. There are today nations around this country upon which the United States has imposed unilateral sanctions that we are not doing business with, but other countries of the world are doing business with these countries and selling agriculture products and medicines to these countries. We can change because of our outdated sanctions policy.

What my amendment does is, it lifts those sanctions on all countries on which we currently have sanctions for food and medicine only. There is no way in today’s world that food should be used as a weapon in international relations with other countries. It is inhumane, it is improper, and what it eventually does is damage the American agriculture community. My State of Washington exports roughly 90 percent of all the wheat that it grows in our State. We are an export State, and we feed the world. But yet our farmers, in a time of great challenge for American agriculture, are at a distinct disadvantage because we cannot sell to some of these sanctioned countries.

What my amendment does is, it lifts sanctions on all countries on which there are currently sanctions around the world as those sanctions relate to agriculture and medicine. They involve no direct Federal subsidies, these lifting of the sanctions, but it would allow our farmers to sell directly to sanctioned nations and sell our product. We are at a distinct disadvantage because
other countries, our competitors for our farmers, are able to sell to those countries and provide food and medicine to their people. Because of our outdated sanctions policy, American farmers cannot.

This is wrong, it is something that should be changed. The market alone, the dollar market alone for our country and our American agriculture community is $6 billion that we would be able to bring into this country by virtue of sales to those sanctioned nations. Now, I understand the politics of dealing with a terrorist like Saddam Hussein, or the North Koreans or other countries on which we have sanctions and no trade relations. But yet as to agriculture and medicine, it seems to me this is bad policy, because it hurts our farmers. This amendment allows the President to reimpose those sanctions if for national security reasons he feels it is in the national security interests of our country to reimpose those there is a waiver provision in this amendment.

This amendment received consideration in the full Committee on Appropriations, of which I am a member, and I am happy to be a member of the Subcommittee on Agriculture. It was a wonderful debate. Democrats and Republicans alike debated this issue back and forth. The amendment unfortunately lost by a 28-24 vote. But it was a great debate and it is something we ought to have in this country as we decide how to help agriculture in the free market system as we are moving to under the farm bill and from a humanitarian standpoint how we ought to be dealing with people in these other nations who have corrupt governments but not corrupt people.

This is a humanitarian amendment. I fully appreciate the point of order that is being made. I respect that, I understand that completely, and my friend from Florida and I have discussed this issue at length. I respect him greatly. I respect his views on this whole issue. I understand the likely success of this amendment. But I want to make the very serious point that we, in this country have to make a decision about whether we are going to continue to use food as a weapon and medicine as a weapon. We will be faced in this Congress with the likelihood that the agriculture interests of our country, because of depressed prices, because of depressed markets, will come to this body and say, “We need more Federal assistance.” If that is the case, then the logical free market way to get through this is to lift sanctions to allow sales to be made abroad from a free market standpoint.

I want my colleagues to know how seriously I view this issue. I hope that the House will take this matter up at the appropriate time.
I will give my colleagues an example. The gentleman from Florida did bring up the issue of Cuba. I have a bill to do just that, to sell food and medicine to Cuba. In the area of food alone, if my colleagues can get past, for a second, the issue of whether we should even give this food away or not and the issue of food alone, the Cuban Government has made it clear that they would purchase up to $850 million in rice from this country, that they would purchase $700 million in corn, that they would purchase over $500 million in chicken. Now, every time I mention one of these products, I know that a certain State delegation or a different State delegation gets excited. What a wonderful opportunity to do that which is humanely right and that which is good for our farmers.

I must tell my colleagues when I first got elected 9 years ago, coming from a district in the Bronx, I never thought that I would have American farmers supporting a piece of legislation I presented, and they do, and they do because they support the fact that it is a good thing to do and a good thing to establish, Mr. Chairman.

Now, the President, as we know, very recently said that we should do this with all other countries, but he could not do it for Cuba because of the fact that this is handled by legislation, that we cannot sell food and medicine to Cuba, and so I think that while this issue obviously will not be dealt with today, while this issue obviously will not become law anytime soon, while this issue obviously is still at the center of a political debate in this House which is not one that seems for our side to be winning, our side being those of us who agree that we should do this, the fact is that the time is coming for this.

We cannot continue to have food and medicine business, if my colleagues will, with China, with Iraq, were Iran, with Sudan and other countries in the world and continue to argue that one place gullies from Miami should not be allowed the same sale.

So I would hope that we do pay attention to this issue, and I would hope that in the near future the sponsorship of our bill will continue to grow. As it is, it is over 150 sponsors at the moment, and the minute we get to 216, we will talk to our colleagues about bringing it to the House.

So I would hope, Mr. Chairman, with all due respect that all Members would see this for what it is. It is something that is right, it is something that is fair, and it is something that is long overdue.

Mr. DIAZ-BALART. Mr. Chairman, will the gentleman yield?

Mr. SERRANO. I yield to the gentleman from Florida.

Mr. DIAZ-BALART. Mr. Chairman, the gentleman said that he came up with incredible numbers that I had not heard before about what Castro says he would buy from the United States. I think the gentleman said $800 million in rice and $500 million in chicken. Where does he buy that from now? Does the gentleman from New York know?

Mr. SERRANO. Yes, those purchases made everywhere but from American farmers.

Mr. DIAZ-BALART. Everywhere.

Mr. Chairman, could the gentleman give me where that everywhere is?

Mr. SERRANO. Well, rice comes from Asia. Mr. DIAZ-BALART. I know that that is a confidence, but knowing, as I do, that Castro does not make those purchases now, I was curious to find out where the gentleman indicated that they are made now by Castro based on the fact that he has promised to make them in theory from us.

Mr. SERRANO. Those purchases are made now, and they will be made here later.

Mr. LATHAM. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I yield to the gentleman from Washington (Mr. NETHERCUTT).

Mr. NETHERCUTT. Mr. Chairman, I just want to make one final point relative to this debate. It is a good debate, it is a debate that we all ought to be having. It is a debate that we all ought to be having in this country because it affects foreign policy issues, it affects economic issues for our country.

Look what we do in North Korea. We are providing hundreds of millions of dollars of agriculture aid, food aid, at the expense of the taxpayer to a regime that think by all accounts is a corrupt regime in North Korea. Now I would rather have our country purchase, I should say our farmers sell commodities to North Korea and other such regimes like Iran and Iraq and others with whom we disagree violently on policy issues but who will purchase our grains and will purchase our apples and purchase our other products, and lentils and other foodstuffs that will help from a humanitarian standpoint feed the people of those countries and feed American farmers in our rural agriculture economy. So on the one hand our country is giving food to North Korea.

What I want to do is we debate this in the days ahead, and I am not as pessimistic as perhaps my friend from New York. I think this has a great chance to be enacted this year if enough people will show their concern and compassion for the issue, and debate it and pursue it very forcefully. I think this is the best policy for our country to deal with these regimes diplomatically very forcefully, but not punish them and us by not providing them food and medicine.

I just will put a plug in here, Mr. Chairman, for H.R. 212. It is the sanctions relief bill that has been introduced, that I introduced, that has lots of cosponsors, and we can have the debate about which sanctions we ought to impose or not impose on which countries. But from a conceptual standpoint, from a policy standpoint, lifting sanctions is the best policy for American agriculture, and I hope this House will adopt this, and the other chamber as well along with the President. This is good policy for our country.

Mr. DIAZ-BALART. Mr. Chairman, will the gentleman yield.

Mr. LATHAM. I yield to the gentleman from Florida.

Mr. DIAZ-BALART. Mr. Chairman, I agree with the gentleman from Washington (Mr. NETHERCUTT). This is an issue that needs debate. Every single country is in the world geographically, but historically and sociologically and politically in a different situation and in a different moment with regard to the certainty that it will have a democratic transition the moment of that democratic transition, and to broad-brush this issue, certainly again I would reiterate the wisdom of not doing so on an appropriations bill at the same time that I reiterate my willingness to continue discussions with those people like the gentleman from Washington (Mr. NETHERCUTT) who feel so strongly out of good-faith in this issue, not out of support for dictatorships, but out of good faith, and I will continue our discussions because it is obvious that we will no longer be sanctioned, that they will be in a situation where the American market will be open to them before liberation of political prisoners or free elections are held.
can be very destructive at this particular time.

So I thank the gentleman for yielding, and I look forward to further discussions on this issue which must not be broad-brushed and which must remain leaving to the United States the option in particular instances of not having to have recourse to military action as the only way in which the United States can act.

Mr. LATHAM. Mr. Chairman, I just want to make one point.

I do not think this would be as much of an issue if we did not use embargoes like we have in this recent administration, and talk about sanctions, they are embargoes. No one likes to use that term because in agriculture that has real connotations, has real effects.

We remember the Nixon embargo, the Carter embargo, how that devastated the agriculture. This, in fact, is what we are talking about, our embargoes, and in the last 80 years there have been 120 embargoes put forth by this country and other countries, and in fact over 100 of them have been put in place in the last 6 1/2 years.

So my colleagues can see the dramatic impact this has had on agriculture in recent years, a major reason for the decline in prices today, the fact that 40 percent of the world's population today is under some type of embargo from the United States, and it is extraordinarily destructive to agriculture, to free trade and our position in the world market.

Amendment offered by Mr. Coburn

Mr. COBURN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Coburn:

Insert before the short title the following new subsection:

Sec. . None of the funds appropriated or otherwise made available by this Act may be used by the Food and Drug Administration for the development, approval (including approval of production, manufacturing, or distribution) of any drug for the chemical induction of abortion.

Mr. SKEEN. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 2 hours and that the time be equally divided.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

The CHAIRMAN. Does the gentleman wish to designate with whom the time will be divided?

Mr. SKEEN. Mr. Chairman, no, we do not.

Mr. COBURN. Mr. Chairman, I ask unanimous consent to control one-half of the time, 1 hour, and allow the opposition to control one-half.

The CHAIRMAN. Any Member seeking to control 1 hour in opposition?

Ms. KAPTUR. Mr. Chairman, yes, we will on this side control the 1 hour in opposition.

The CHAIRMAN. The gentlewoman from Ohio (Ms. KAPTUR) will control the 1 hour in opposition, the gentleman from Oklahoma (Mr. Coburn) will control the 1 hour in favor.

Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we are going to hear a lot of debate this afternoon and statements about the intended purpose of this amendment. I want to say from the outset that this amendment is not intended to have an effect on any drug used for any purpose other than that which is specifically spelled out in this amendment.

The taxpayers of the United States spend a great deal of money each year in funding the Food and Drug Administration. There is something terribly wrong when we ask the taxpayers of this country to spend money in a way which is designed to give the Food and Drug Administration the ability to research and approve drugs that are designed to kill unborn children.

Now let me explain. The purpose of this amendment is to limit the FDA’s ability to approve any drug which has its sole purpose to eliminate and terminate an unborn child.

This should not be in a debate about abortion, and I do not intend it to be. It is about how we use taxpayers’ money and for what purpose should that money be used.

Abortion is legal in this country. I recognize that. But allowing a Federal agency to spend taxpayers’ dollars to perfect and approve a method under which we take life to me seems totally irreconcilable with the fact that our whole country is supposed to be about the pursuit of happiness, the pursuit of freedom and the pursuit of life.

So this amendment will not block Cytotech from being used in other medicines and in other ways, it will not block RU-486 if it has an intended purpose for giving a woman a chance to change her mind, to prolong life. It will not stop any utilization of FDA funds in terms of that effort. Its sole purpose is to say to the FDA none of their money should be used in a manner which will enhance the taking of unborn life.

It is a very simple proposition. Whether one believes in abortion or do not, both sides of this issue believe that we have way too many abortions. None of us think that abortion is a great thing. There are not many people who have been through an abortion who think an abortion is a great thing.

So I want to move our debate not to the issue of abortion, but whether or not we can in good conscience utilize taxpayer defense drugs to kill unborn children. That is what the debate is about. It is not about whether or not somebody can have an abortion; we all know that is possible.

Mr. Chairman, I reserve the balance of my time.

Ms. KAPTUR. Mr. Chairman, I rise in opposition to the amendment, and yield myself such time as I may consume.

Mr. Chairman, as the gentleman knows, on many votes we share similar values, a similar point of view, and this Member certainly does not have a voting record of supporting Federal funding for abortion. I have read carefully the gentleman’s amendment. I think it is a bit different from the one the gentleman offered 1 or 2 years ago, if I recall.

I think that the wording of the gentleman’s amendment has a worthy purpose. The problem is, I oppose the gentleman’s amendment respectfully for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.

I do not think that we can really say with certainty and the kind of broad language that the gentleman has included in his amendment, for three reasons. First of all, on the basis of science.
June 8, 1999

Mr. COBURN. Mr. Chairman, will the gentlewoman yield?

Ms. KAPTUR. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, perhaps the gentlewoman did not hear my first statement. There is nothing in this amendment that will limit the research of any drug in any way, in any concept, whose purpose is something other than that. So if you were to take Cytotech or RU-486 and say you want to try to use it in a different way, this does not limit that at all. When you file an application with the FDA, you give your intended purpose is. What this amendment says is if you bring FDA a drug whose only intended purpose is to induce the separation of a blastocyst from the uterine wall, that is the technical term for what it does, that they should not spend money approving that.

If this is the same drug to the FDA and say this is something that solves a problem with the liver, or this decreases portal hypertension, even though it might have that effect of causing an inducement of abortion, it is still approved.

Let me give you some examples. There is a new hair treatment to grow hair back on the head of the gentleman from California (Mr. WAXMAN), yet it is still approved.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma.

There is a new hair treatment to grow hair back on the head of the gentleman from Oklahoma. There is a new hair treatment to grow hair back on the head of the gentlewoman just said is it is against the very nature probes into the unknown, inquiry and the work of the FDA by its committee. So I find it somewhat uncomfortable to try to accept the gentleman's amendment, when our subcommittee really had absolutely nothing, we did not spend one minute on this within the committee itself.

So for those three reasons, and I want to yield time to other Members to comment, on the basis of science, on the basis of the safety by having the FDA involved, and also committee procedure, I would respectfully oppose the gentleman's amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume to respond.

Mr. Chairman, again, what the gentlewoman just said is it is against the Federal law to use Federal dollars for abortion. But the FDA approves a drug whose sole purpose is to kill unborn children, that is spending Federal dollars to perform abortion. So I would counter that.

Number two, there was no intention to come before your committee on this issue. This is a well-known issue, this is well documented. There is lots written on RU-486 and Cytotech, and through this discussion I will be happy to give you all of the references in the literature on that.

Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. PITTS).

Mr. PITTS. Mr. Chairman, I rise today in support of the Coburn amendment’s efforts to protect the lives and health of our Nation’s women and unborn children.

This amendment would bar FDA’s approval and development of new drugs whose primary purpose is to induce abortion. Those are called abortifacients.

Some people believe it is in the best interests of women to make all forms of abortion available to women. However, even for those who support abortion on demand, approving RU-486 is shortsighted and a risky approach.

Scientific studies have shown a link between abortion and breast cancer. Unfortunately, many who commit abortions do not want to let women know about that risk.

Breast cancer is the leading form of cancer among middle-age American women, but we do not even want to tell women who are considering abortion of this risk.

Ten out of 11 studies on American women report an increased risk of breast cancer after having an induced abortion.

A meta-analysis in which all worldwide data were combined reported that an induced abortion was associated with a woman’s risk of developing breast cancer by 30 percent. How can we in good conscience approve new forms of abortion before we study the breast cancer and abortion link further and let women know of the risk?

Let me move onto this amendment this afternoon. I am shocked, quite frankly, that we are going through this debate again this year after the outcry of the many medical and pharmaceutical organizations who opposed this amendment last year. It is an unprecedented invasion into the FDA’s approval process.

Quite frankly, this is a place where Congress has no right to be. We are not scientists. We do not know what is best for the health of American citizens.

This amendment is intended to block research. It blocks not only drugs that are currently in the pipeline, but potential future breakthroughs in biomedical research. It is an attempt to promote an anti-choice agenda. I have respect for people who have a different view of this issue on choice than I do, but the proponents of this amendment are risking the lives of millions of Americans, because this amendment would also block the development of drugs to cure cancer, ulcers, rheumatoid arthritis, epilepsy, and other medical conditions because some of
Mr. Chairman, it is wrong for us to prevent biomedical research. We have an obligation. We spend billions of dollars to promote what happens at the National Institutes of Health because we believe we have the obligation to cure disease in this country. Do not take an action here this afternoon that would in fact condemn millions to die because somehow we want to score a point on choice in this country.

It is wrong, it is unconscionable, and I pledge with my colleagues to defeat this outrageous amendment this afternoon.

Mr. SMITH of New Jersey. Mr. Chairman, I ask unanimous consent to control the time allotted to the gentleman from Oklahoma (Mr. COBURN) during his brief absence.

The CHAIRMAN (Mr. PEASE). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. SMITH of New Jersey. Mr. Chairman, I am happy and pleased to yield such time as she may consume to the gentleman from North Carolina (Mrs. MYRICK).

Mrs. MYRICK. Mr. Chairman, I think most of us agree that we would like to be seeking alternatives to abortion, rather than making abortion more accessible.

But the one issue that I wanted to speak on today is what has been shown scientifically as an increased risk of breast cancer. Supposedly there is a link between breast cancer and abortion. This should be examined much more thoroughly before any new forms are approved.

Ten out of 11 studies on American women report an increased risk of breast cancer after having an induced abortion, particularly among women with a history of breast cancer in their families. We know this is already a major problem which we are trying to effectively deal with because currently cancer is the leading form, or breast cancer is the leading form of cancer among middle-aged American women.

In the few countries in which RU–486 is available, it is strictly regulated by the government's health care systems. However, in the U.S., control of abortion drugs is more lax, and sometimes they are often dispensed without a doctor's approval, which again potentially endangers women's health.

But because of the potentially dangerous side effects of abortion, and this is not just physical, this is emotional, as well, these drugs should not be administered without consultation and medical follow-up with a doctor. So I hope we give this serious thought.

Ms. KAPTur. Mr. Chairman, I am very pleased to yield 4 minutes to the gentlewoman from the great State of New York (Mrs. LOWEY), a member of the committee.

Mrs. LOWEY. Mr. Chairman, I thank our ranking member for yielding time to me.

Before I address the overall issue, I would like to respond to my colleague, the gentlewoman from North Carolina (Mrs. MYRICK) by reading another quote.

"The Danish researchers concluded that induced abortion has no effect on the risk of breast cancer." When reporting on a particular study, the New York Times stated: "This longstanding issue shall now be settled. No evidence exists to link induced abortion and breast cancer."

Mr. Chairman, I rise in strong opposition to the Coburn amendment. The amendment would stop the drug approval process in its tracks by placing unprecedented roadblocks in front of the FDA. It puts ideology ahead of science and compromises women's health.

The Coburn amendment would block the final approval of a drug, RU–486, that the FDA has already declared to be safe and effective. I repeat, this amendment would block final approval of a drug that the FDA has already declared safe and effective.

This amendment would make FDA drug approval contingent not on science but on politics. The FDA is charged with protecting the public's health, and should not be subject to congressional interference. Should we subject each FDA decision to a congressional vote? Mr. Chairman, let us allow the FDA to do its job free from right-wing intimidation. The American people do not want the Christian Coalition in charge of our Nation's drug approval process.

This amendment may also prohibit the development of new, more effective contraceptive methods, if Members believe, as some do, that any form of hormonal contraception, like in this bill, is tantamount to an abortion.

What about other drugs that as a side effect may induce abortion, like many chemotherapy drugs and anti-ulcer medication? Will research be halted on these lifesaving drugs as well? This amendment is too vague even to give us a clear answer to that question.

So, Mr. Chairman, this amendment is about much more than RU–486. It is about whether the FDA will be free to test, develop, and approve needed drugs without congressional interference. It is about whether politics or science will govern our Nation's drug approval process.

Since Roe v. Wade, the anti-choice minority has attempted to stymie contraceptive research and suppress advances in reproductive health. For example, there used to be 13 pharmaceutical companies engaged in contraceptive research. There are now four. Thankfully, despite pressure tactics, scientists have made some important progress. Among the most significant is the development of RU–486.

RU–486 would make a dramatic difference in the options available to women facing unintended pregnancies. It could make abortion, already one of the safest medical procedures, even safer. Women in Sweden and Great Britain have been using RU–486 for a decade. It is also available in Sweden and Great Britain.

Over 400,000 women have had abortions using RU–486. The New England Journal of Medicine has published clinical trials confirming its acceptability and effectiveness. Also, RU–486 has another significant advantage over current abortion procedures, it can be given in the privacy of a physician's office.

What will the right do when it is approved? Will it picket every doctor's office in America? Will it harass every woman in the Nation? Thankfully, it cannot. That is why it is fighting to block the approval of this drug.

Mr. SMITH of New Jersey. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, first of all, I just want to respond briefly to the previous speaker. When I hear talk of the so-called anti-choice minority, I find that not only empirically unsound, because the data clearly shows America is moving increasingly toward the right-to-
life position. But its insulting as well. Minority! I don’t think so. As a matter of fact, USA Today polls recently came out. One does show the Faye Wattleton group, the former president of the Planned Parenthood Federation of America. According to The Center for Gender Equality survey, January of 1999: “Seventy percent of women favor more. Twenty-six percent of the other women, 70 percent. That doesn’t sound like a “minority” to me. The survey also found fifty-three percent of women today favor banning abortion except for rape, incest, and life of the mother. Rape, incest and life of the mother is about two or three percent of all the reasons as to why abortions are procure. So most women want most abortions made illegal.

Most of the 4,000 babies who die each day in America would be saved if the opinions of a majority of women—if their sentiment—were enacted into law. The Coburn amendment does far less than what a majority of women want and we are not talking even remotely about banning abortions in this pending amendment. Yet, 53 percent of women today favor banning abortion, except for rape, incest, or life of the mother. The survey interestingly points out that that is up from 45 percent of women just 2 years ago. So there is a sea change occurring. Americans are beginning to wake up to the fact that abortion is violence against children.

There is also a USA Today Gallup poll that found that 55 percent of all men and women say abortion in America should be legal only under rape, incest, or threat to the life of the mother. So again, a majority of men and women and a majority of just women that have been found in the USA poll and the Center for Gender Equality survey that the majority is in favor of protecting the lives of innocent unborn children, except in the most extreme circumstances that, frankly, rarely, rarely happen.

If we had legislation that protected those children, again, we would be saving most of the lives. When polled on funding, an overwhelming majority of Americans in every poll, and I ask Members to look at their own polls in their own districts, most will show clearly an overwhelming majority of Americans are against using taxpayer-funded monies to pay for abortions, except in the rarest of cases.

This legislation, this amendment, the amendment offered by the gentleman from Oklahoma (Mr. COBURN) is the Hyde amendment of the FDA. Let us be very clear about it, it is the Hyde amendment being applied to testing of those drugs that are used to procure an abortion.

I believe history and human rights observance are on our side, the pro-life side. Some day the viewpoint from the pro-abortion side will be seen as so misguided and even cruel that people will say, how could they have imposed such violence on innocent, unborn children, especially at a time when we know more about unborn children than ever before in the history of mankind or womankind. Today microsurgery on unborn children, it is not uncommon for Children's ears literally lifted out of the mother’s womb and surgery is performed, and then they are reinserted to grow and develop and mature until birth time. Birth has to be the day. I say to my colleagues, as an event that happens to each and every one of us. It is not the beginning of human life. That happens much, much sooner than that at fertilization.

What the gentleman from Oklahoma (Mr. COBURN) is trying to do with his amendment is to say that babies are not junk. They are not throwaways. Some Members want to allow the FDA to invent the newest form of mouse-trap, to be therefore lethal way of destroying unborn children. We can’t allow that to happen. And RU–486 is not really a morning after drug, it is used up to 7 weeks after fertilization. It causes the abortion to occur usually after 7 weeks into the gestational cycle. That is not morning after.

I find it offensive, that my tax dollars, American people, not some so-called anti-choice minority but a pro-life majority are used to test and approve deadly poisons for children. The pro-abortion side does not enjoy a majority in this country. Through manipulation of poll data over the years the pro-abortion side has given the impression, the perception that that is the case, but now the pollsters are now asking more specific and enlightening questions, and all of a sudden it is revealing that, one, more people are now asking when they ask the same question over the last several years, there has been a change in our direction.

My friend from New York Mrs. LOWEY says there is no linkage of abortion and breast cancer. Yet 10 out of 11 studies on American women report an increase in breast cancer when women under goes abortion. The “denial!” people remind me, of the tobacco Institute, because we feel so strongly that we should not be mixing up politics and science, confusing our own personal views, and I respect the gentleman’s, on whether or not women should have a choice. I would expect that the gentleman respects others.

In 1996 the National Cancer Institute, concerned that some anti-abortion groups were misrepresenting the science on the subject, issued a statement, not my statement, their statement, and I quote, “The available data on the relationship between induced abortions or spontaneous abortions, miscarriages, and breast cancer are inconsistent, inconclusive. There is no evidence of a direct relationship between breast cancer or other induced or spontaneous abortion.”

Mr. SMITH of New Jersey. Reclaiming my time, Mr. Chairman, as I pointed out earlier in the debate 10 of the 11
studies on American women reported an increase on breast cancer when the women had an abortion. You may say there needs to be more studies. I say there needs to be more studies. Everybody says that.

But when we get a preponderance of studies pointing in the same direction, I think we alert women that there is a negative devastating side effect sometimes manifesting itself 20 to 30 years down the line that cannot be ignored and trivialized.

When Janet Daling’s study came out, which was National Cancer Institute-funded it received adequate coverage in the Washington Post for one day. Then all trace of the story was killed with spin from the abortion rights side.

Mr. COBURN. Mr. Chairman, I ask unanimous consent to reclaim control of the time.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to respond to the National Cancer Institute study. The gentlewoman added one word there that totally throws out what they said, “spontaneous.” If we add all the spontaneous abortions in with the induced abortions, we will not get an effect, because the number of spontaneous abortions is close to 600,000 to 700,000 per year. In some studies. So by combining that data, a normal response to a wrong and incomplete reproductive event to the termination of a normal event, we do not have good data. They know that. That is why they put that material in there. I want to continue my point, if I may. I will be happy to debate back and forth with the gentlewoman.

Mr. Chairman, I heard from this floor statements exactly opposite of what I said was the intention of my amendment. I am deeply concerned that people would use untruth about what this intended amendment is. Everyone knows me well enough that I am not going to oppose good research for things that help people get well.

There is nothing, and it does not matter what the gentlewoman says, there is nothing in this amendment that will eliminate any cure for cancer, eliminate any process under which any drug can be studied for cancer, because the actual application that the Food and Drug uses, which is right here, it says, what is the purpose for the IND. And if the purpose is chemical induction for abortion, then they cannot do it. If it is something else other than that, they cannot.

Finally, I would like to comment about the comments on whether or not we ought to be involved in this.

Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I wish to state that, as I listened to the gentleman from Oklahoma (Mr. COBURN) and his desire to try to protect life, I think that his amendment and the words of his amendment, in fact, do not do that. So there is not a disagreement with the objective, but rather the means to get there.

Mr. Chairman, I yield 3 minutes to the distinguished gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman, I thank the gentlewoman from Ohio (Ms. KAPTUR) very much for yielding to me this time.

This bill does not provide taxpayers subsidies for abortion. This bill before us is an appropriation to fund the Food and Drug Administration. The Food and Drug Administration receives applications from those private industries that manufacture drugs who come to them and say we want to market our drug. But the law says we must apply to FDA to assure the public that the drug is safe and effective. The FDA then uses its scientific method to determine whether the drug ought to be sold as safe and effective.

The Coburn amendment would prevent the FDA from using science. It would say to the FDA they may not approve a drug that is safe and effective because we are going to substitute a political judgment for what has been a scientific judgment under which the FDA has been mandated in carrying out its responsibilities. So what we are doing is preventing taxpayers’ funding of the Food and Drug Administration to determine whether a drug is safe and effective.

Now, there is an interesting argument that the gentleman from Oklahoma (Mr. COBURN) makes, and I am sure he is sincere, that his amendment would only apply to a drug solely to be used for abortion purposes. But that is not what his amendment says. His amendment says that the FDA cannot use any of its funds for testing, development, or approval of any drug for the chemical induction of abortion. Well, “for the chemical induction of abortion” may be a side effect of a drug that may be intended to cure cancer. It may be intended for some other purpose.

Now abortion is legal. If abortion is legal, why should we not allow funds to be used by private enterprise to develop a drug that would lead to safer abortions, earlier, safer abortions?

We have heard the story about the link of abortions with breast cancer. I have seen no evidence of that. But let us say that there is a drug that would allow a termination of a pregnancy without any additional risk that may now be out there for those who do decide to terminate a pregnancy.

This amendment is a political amendment. It really is inappropriate in this legislation to tell the FDA to do its job, which is to use science, to allow research based on science as the FDA considers whether a drug ought to be marketed to the American people.

I would hope that we would oppose this amendment and let FDA do its job and allow a procedure that is legal to be done in the safest possible way.

Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume.

I think one of my proposals is that the gentlewoman from California (Mr. WAXMAN).

Number one, the definition of “for” under the dictionary that we have in the House is with the object or purpose of.

The gentleman refuses to address our issue. Our issue is that Federal dollars should not be used to enhance the taking of life. Now, his claim that he has no knowledge of the connection between breast cancer and abortion, I can take his word. He may not read the studies. I have read every study. Having been trained in science and having read all studies associated with breast cancer and abortion, I think
there is some legitimacy to it. I do not know how much there is, but I have read at least a few of these things in the past myself. Number two is, for the gentleman to object that this is not a place for this debate, again it is not inappropriate, for we have an opportunity as Members of this House to put limitation amendments on appropriations bills. We may not like it, and I understand that, but it does not mean that it is inappropriate or wrong for us to do it.

I also have the legislative history where my dear friend, the gentleman from California (Mr. WAXMAN), has been very effective in doing some of these same things in the past himself. So the use of a limitation amendment on an appropriation bill is both appropriate and within the rules of the House.

So again I want to say this amendment will not, and I will take my colleagues to the application of the Food and Drug Administration, one has to list a purpose or indication for a drug when one applies. If that is something other than the termination of pregnancy, then they can approve anything. The gentleman from California (Mr. WAXMAN) knows that. He knows what the forms say. He knows more about the Food and Drug Administration than anybody in this Congress. I understand that. But I also know full well that this amendment will have its intended purpose, and that no drug whatsoever which has a purpose other than that will be limited in any way.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield to me?

Mr. COBURN. I am happy to yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I will insert for the RECORD a statement from the Food and Drug Administration where they say very clearly they do not read the gentleman’s amendment as he does. Their lawyers have said this will prevent them from dealing with any drug that is brought to them for approval that may have the consequence of terminating a pregnancy.

But my view is, even if its original intended purpose is to terminate a pregnancy, if it is a safer way to do that, we may be saving lives as a result. We may be saving the life of the mother.

Mr. COBURN. Reclaiming my time, let me give the gentleman from California some reasons why we have breast cancer associated with abnormal pregnancies. When a woman is pregnant, there is a large increase of both estrogen and progesterone. The abrupt termination of those, one has turn-on factors in the breast tissue which are not modulated in a normal cycle that the body knows how to do it. That is why we have an increased risk of breast cancer in women who have late onset pregnancies.

This is not something that is new to the medical community. This is some-thing that we suspect, and now we are starting to see data for. I understand the gentleman’s opposition. I would say I would take an amendment from the gentleman from California (Mr. WAXMAN) that puts the word “solely” in there. I would happily agree to that. But I think his real objection is that we should not be doing this. But the point is I am happy to accept an amendment that will say solely for that, because, as a practicing physician, I know we sometimes get consequences that are ill-effective, and I have no intention of stopping it.

The final point that I would make is the lawyers for the FDA ought to read the legislative history. This passed the House last year, and the history on it shows very much, we actually even had a ruling from the Chair which the gentleman from California (Mr. WAXMAN) had the point of order on, which said this would do that, and the Chair ruled it would not.

Mr. Chairman, I yield 5 minutes to the gentleman from Indiana (Mr. HOSTETTLER).

Mr. HOSTETTLER. Mr. Chairman, I rise in strong support of this amend-ment from the gentleman from Okla-homa (Mr. COBURN). The Supreme Court has told us that we have to allow the killing of unborn children on de-mand. It has not, however, told us the government has an obligation to facili-tate this service.

This amendment would help ensure that American taxpayers do not end up funding the approval of drugs that are designed to kill our unborn children. FDA’s mission, as it was created by this very Congress, should be to approve drugs that save lives, not end lives.

I would just hasten to add that Congress does have oversight responsibility with regard to all agencies of the Federal Government. It has been stated that Congress is sticking its nose into places it should not be. Well, if Congress should not be here now, then it is assumed that the proponents of that philosophy say that the Federal Gov-ernment should not have been involved in the Food and Drug Administration’s creation.

Second, there has been the point made with regard to the Supreme Court and the Supreme Court decision that has been made. Earlier today we heard an oath from a new Member that said he swore to support and defend the Constitution of the United States. He did not say anything about according to what the Supreme Court says that the Constitution says.

Separation of powers says that the House of Representatives, the Congress, has the constitutional obligation to decide what constitutes the interest; and that is what the amendment of the gentleman from Oklahoma (Mr. COBURN) is doing right here, saying that it is Congress’ obligation to deter-mine how the taxpayers’ money is spent.

And that point has also been made that Congress are not scientists. Well, there are several of us that happen to be sci-entists. We are not in the area with regard to medical science, but we have been told about other doctrines of science, other theories of science; and that is one of those old theories that we are asked to subscribe to today.

Well, that is not the point here. The point is that a child at conception is a child at conception, it is a child 2 months after conception, it is a child 9 months after conception, and it is a child 2 years after it is born.

We should not, as Members of this House, be asked to subscribe to a the-ory in science that was done away with hundreds of years ago by scientific knowledge at that time. Therefore, we are being asked to facilitate the FDA doing something safe and effective. If that child is a child at conception, and it does not automatically spontane-ously generate into a child sometime later, then we are to make sure that drugs are safe and effective for children that are inside the womb as well and not be facilitating the destruction of that human life.

Finally, I will say that there has been much said here about cancer sur-vivorship, and I would be one that would say that I am pleased at the rate of survivorship of Members of this House, Members of this Chamber. My mother is a cancer survivor. However, my father had cancer and he is not a survivor of cancer. This weekend I am going to take part in a relay for life where those survivors of cancer are going to come and celebrate life. My father will not get to take part in that process this year because he is not a survivor of cancer. I can tell my colleague this: that the way my father raised me is such that he would not take one innocent child’s life in order for him to survive cancer. And that is not what this amendment does. It says and I quote, “None of the funds made available in this act may be used by the Food and Drug Adminis-tration for the testing, development, or approval, including approval of produc-tion, manufacture or distribution, of any drug for the chemical inducement of abortion.”

This amendment by the gentleman from Oklahoma simply deals with a
phenomenon of the day, and that is RU486, an abortifacient, that is not being used to save people of cancer as it could have my father. Let us remove all the veneer, let us remove all of the camouflage over this and tell the story as it is. The gentleman’s amendment will not stop one drop of research into saving people’s lives that have cancer. I wish that research would have happened a few years earlier, so that my father could have taken part in that relay for life this weekend.

Let us do say a word for life today. Let us say that innocent preborn life is worth securing, is worth protecting and is at least worth not spending taxpayer dollars on to find a more efficient way to exterminate it.

Ms. KAPTUR. Mr. Chairman, I yield 2 minutes to the gentlewoman from Colorado (Ms. DEGETTE).

Ms. DEGETTE. Mr. Chairman, I am frankly disturbed by the claims that are being made by the proponents of this amendment. The proponents of the amendment say that the drug cannot be used for the sole purpose of abortion or the primary purpose of abortion, but that is not what the text of the amendment says. The text of the amendment says is none of the funds appropriated shall be used for the testing, development or approval of any drug for the chemical induction of abortion. Those words are not in there.

But there are more problems than that. The other problems are that there is no recognized definition by the FDA of the words “chemical,” “induce...ment,” or “abortion.” So nobody is filing applications with the FDA saying we want to use this research solely for the purpose of the chemical induction of abortion.

The truth is the way this amendment is written it would prevent research on many, many drugs which may have a side effect of causing abortion. And if my colleagues believe the last speaker, many people believe that it is a worthwhile societal goal to have millions of cancer victims die in order to stop what may be abortions. That is unacceptable both from a human and a scientific standpoint.

The truth is that under this amendment we would be banning research of drugs which would cause miscarriages by treating cancer, hypertension, cirrhosis, rheumatoid arthritis, and even some vaccines. We cannot sacrifice scientific research into abortion, which is legal, or equally importantly into cancer and all these other things simply because of a political agenda. And that is what we are talking about here. We are talking about a political agenda.

And the reason this amendment is written so broadly is because there are people who would ban drugs whose primary purpose is for other purposes, like cancer research, in order to stop abortion. And that is wrong. Defeat the amendment.

Mrs. MORELLA. Mr. Chairman, I yield 2 minutes to the gentleman from Maryland (Mrs. MORELLA).

Mrs. MORELLA. Mr. Chairman, I thank the gentlewoman for yielding me this time and I rise in strong opposition to this amendment which would restrict the FDA from its current system of research and testing of drugs that could eventually save lives.

Reproductive health drugs should be subject to the FDA’s strict science-based requirements which any drug must meet before approval can be granted, but this amendment would prevent the FDA from reviewing any drug that could possibly induce miscarriages as a side effect.

Health research is threatened when we legislate that should be left to medical researchers and doctors. Under current law, a company that wants to begin clinical trials on a new drug submits its application to the FDA for approval and, if the application has not been responded to within 30 days, the company is free to move forward. With this amendment, no funds could be used to oversee or even disapprove of such tests.

Mr. COBURN. Mr. Chairman, will the gentlewoman yield?

Mrs. MORELLA. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, I would say to the gentlewoman that there is nothing in the legislative history or the ruling of the Chair from last year or the legal parameters that we have had that makes the gentlewoman’s statement a true statement.

The fact is that all drugs whose sole purpose is something other than the chemical induction of abortion have free reign at the FDA, and I thank the gentlewoman.

Mrs. MORELLA. Reclaiming my time, Mr. Chairman, the gentleman’s amendment, though, would say review of any drug that could possibly induce a miscarriage as a possible side effect. Well, now this amendment is opposed by such groups as the National Coalition for Cancer Research and the American Medical Association, and they believe very strongly, as we do, that attempts to legislate any drug’s approval or disapproval is inappropriate and that not only does it threaten the credibility of the drug approval process, but it would impede development of pharmaceuticals that may be used either as contraceptives or to treat diseases related to reproduction.

As a matter of fact, it was during last year’s debate that drug companies stated that researchers and pharmaceutical companies would be less likely to invest in drugs that might cause miscarriages, and currently many drugs do have this side effect.

So if disease- or condition-specific approval is dictated by legislative action, we are in big trouble. So I urge my colleagues to vote against this amendment.

Mr. COBURN. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. WELDON), and I would note for the House that he is a medical doctor.

Mr. WELDON of Florida. Mr. Chairman, I thank the gentlewoman for yielding me this time, and as Yogi Berra said, “It’s like deja vu all over again.” We are having this argument now and it is the same set of arguments as we had last year when the Coburn amendment failed the House. I believe by a margin of 223 to 202. I would encourage all my colleagues to vote in support of the Coburn amendment.

I believe very strongly that this is a very reasonable and prudent amendment. As has been very, very clearly stated by the gentleman from Oklahoma, when these pharmaceutical companies, medical schools, individuals put in these applications for new drug approval, they put down what its indication is. And the Coburn language is very specific. We had a ruling from the Chair on this issue last year. If the specific indication is to induce chemical abortion, under the provision of his amendment they will be barred from doing that.

Now, I practiced internal medicine for 15 years prior to coming to the House. I still see patients occasionally on weekends. I have had the unfortunate experience of diagnosing people with cancer; indeed, the even more unfortunate experience of seeing many of my patients die. And I would not support any amendment that in any way would interfere with the new development and approval of any drug for the treatment of cancer. And I think it is very disingenuous for anybody to imply that this amendment would have that kind of an implication. This amendment is very, very clear in its language. It is very reasonable and prudent.

I would also like to point out that what we are talking about today is very, very significant. The FDA has been around for years, and it has safeguarded the American people from the introduction of many potentially dangerous drugs. A great example of this is thalidomide, a drug that was introduced in Europe and produced terrible birth defects. But our American Food and Drug Administration reviewed the approval of that drug and, thus, prevented millions of American babies from being born with such a type of malformation.

The Food and Drug Administration has never had a drug application before it that requires the specific indication that the drug was to lead to the death of an unborn baby. Now, abortion, obviously, is a very controversial issue. Every time these issues come up, the arguments are very, very impassioned. And they should be because it is an issue of life and death.

We all know that the baby in the womb has a beating heart. At 40 days it
June 8, 1999

CONGRESSIONAL RECORD—HOUSE

11961

has detectable brain waves. Those are the criteria that I used to use when I practiced medicine to make a determination whether or not somebody was dead or alive. So this is a very, very significant issue. And to have the U.S. Food and Drug Administration reviewing a drug and approving a drug where its intended purpose is to kill the unborn baby in the womb, I think, is very, very inappropriate. I think it is very, very appropriate for us to speak on this issue. So, therefore, I would encourage all of my colleagues to vote “yes” on the Coburn amendment.

I just want to touch on one additional issue that has come up in the course of this debate, and that is the reported possible link between abortion and breast cancer. My colleagues, I have reviewed the statistics on this issue and the studies are very, very compelling that there really is a link. The statement released by the NCI, I believe, is a very disingenuous statement. It really sincerely ignores the facts. This issue has been ignored.

If my colleagues actually take the time to read the studies, it is very, very bothersome to me that there are a lot of people within the cancer research community that are turning a blind eye to this issue.

Now, finally, let me close by saying the President of the United States once said in a speech that he wanted to make abortion safe, legal, and rare. There are lots of us who hold that abortion is never safe for the unborn baby in the womb, and I do not think anybody would argue with that. Some people may want to turn a blind eye to the humanity of that child in the womb, but it is never safe for the child in the womb.

Mr. Coburn also said that there has been absolutely no effort on the part of the administration to truly make abortion rare. Indeed, in trying to push through something like this, we are in many ways trying to facilitate abortion, trying to make it easier, make it more common. And I do not think we should be going in that direction.

I applaud the gentleman for introducing this amendment, and I encourage everyone to support it.

Mrs. LOWEY. Mr. Chairman, I ask unanimous consent that I be allowed to manage the time of the gentlewoman from Ohio (Ms. KAPTUR).

The CHAIRMAN. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. LOWEY. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. BENTSEN).

Mr. BENTSEN. Mr. Chairman, I rise in support of this amendment offered by the gentleman from Oklahoma (Mr. COBURN).

The author of this amendment may, in fact, believe that it is narrowly drawn and will not affect other research that is being done, but I think his comments a few speakers ago, when the gentleman from California was talking, that he was willing to accept a clarifying amendment, indicates even a specter of doubt in his own mind that there may be a problem with this amendment.

The question is, even with the ruling of the Chair, this issue would not be decided by the Chair; it is ultimately decided across the street at the Supreme Court.

That is what is to happen if we go through with this type of amendment because it may address RU–486 today, but it will open the door for lawsuits to address other types of research tomorrow and it will not be decided in this body or in the other body, it will be decided in the courts. This is a very dangerous precedent-setting amendment that takes the Congress, in my opinion, down the wrong path where we do not want to go.

The gentleman raised the issue of drive-through mastectomies and drive-through deliveries, and, yes, voted for those. I do not know if the gentleman did or not. I think that is a dangerous position for us to take. But here we are going even further. And I think this amendment is so broadly drawn that it creates a serious problem, and I think the House ought to reject it.

Our other colleague from Indiana talked about removing the veneer. Well, let us do remove the veneer. This is not just about RU–486. This is about chipping away once again at “Roe v. Wade” and getting this in front of the Supreme Court again and seeing if they can overturn a woman’s right to choose. That is what this is about. But in the wake of doing that, it creates a lot of damage in the research world.

I hope my colleagues will oppose this poorly drafted amendment.

Mr. COBURN. Mr. Chairman, I yield 3 minutes to the gentlewoman from Connecticut (Mrs. JOHNSON) who is, I might say, in opposition to my amendment.

Mrs. JOHNSON of Connecticut. Mr. Chairman, I thank the gentleman for yielding to me, knowing that I oppose his amendment. And I do oppose his amendment very strongly.

The law of the land is that abortion is legal, whether we like it or not. The law of the land and Supreme Court decisions have given women total control over the decision of whether they will get pregnant and carry a pregnancy during the first trimester. That right is compromised as the fetus grows and women have essentially no right to abortion except under extreme circumstances that are life-threatening toward the end of their pregnancy.

Now, that is simply the law of the land. If my colleagues do not like it, bring a bill to ban abortion, and let us debate that on the floor as the representatives of the people. Let us see if the Congress wants a policy that bans abortion.

Italy has reversed their policy banning abortion because if we ban abortion, we just raise the number of women who die, who die getting illegal abortions. And we know that that was true in our history.

When we first made abortions legal, the big change was not an increase in abortions, because there was not any increase in abortion. The big change was a radical, precipitous decline in maternal deaths. So, mark my words, this is about abortion. Women have a right to abortion and they have a right to a variety of safe, legal procedures. Women in Europe have had access to those. This is not about thalidomide. This is about something that women in Europe have used for 20 years. Our FDA has reviewed it on the basis of science. That is their job. And under that standard, they have found it to be an effective agent. And women have every bit as great a right in America to a pharmaceutical agent as they do to the surgical procedures. Why would men, in America particularly, want to make the decision for women that they have to go in a sense, under the knife rather than taking a pharmaceutical pill?

So this is, by gum, about a woman’s right to choose and the right to abortion in the very earliest months when even there may not have been any fertilization of the egg. This is not necessarily an abortive phase. It depends on what happened and what did not happen, which they do not know at the time they take it. It is a very big advance. And to deny it and stop it on this way is to indicate that we will approach contraceptive research the same way and that we will narrow rigorously the options available to women to manage their reproductive capability and, with it, their health.

I strongly oppose this amendment. This Congress should not be banning by procedure methods of abortion.

Mrs. LOWEY. Mr. Chairman, I yield myself such time as I may consume to respond to the gentleman from Florida (Mr. WELDON) who I believe has left the floor.

But he referred to this administration and said they have done nothing to make abortion rare. I would invite him and my other colleagues to join us in supporting our contraceptive coverage bill, because that is really the way we reduce the number of abortions. Having the Federal Employee Health Benefit Plan and other private insurance plans cover contraceptives will increase the number of abortions, and the administration has been strongly supportive of that.

Mr. Chairman, I am delighted to yield 2 minutes to my colleague, the
gentlewoman from California (Ms. WOOLSEY).

Ms. WOOLSEY. Mr. Chairman, I rise in strong opposition to the Coburn amendment.

In my first term in the House of Representatives in 1993, during the Year of the Woman, with my good sisters and a good number of men, we fought here on the House floor so that the United States could have expanded healthy alternatives to surgical abortions. We supported research development and availability of drugs for medical abortions, like RU-486, in the United States.

Since then, I have witnessed RU-486 being made available in Europe, while here in our country in the United States, here in this Congress, we have had to fight back the far right's constant blows to RU-486, RU-486 and women's health in general.

I am saddened to say it, but this is the same attack by the conservatives as last year and the year before and the year before that. This amendment seeks to deny women the right to early and safe drugs, such as RU-486, when faced with a crisis pregnancy. Finally, because it bans the Federal Drug Administration from approving drugs like RU-486, it represents an unprecedented threat to the FDA's approval process.

Let us make no mistake about it. These repeat attacks are an unwarranted intrusion on a woman's life and a woman's right to good health, and this attack is by the extreme right. Let us get the far right out of women's health, get politics out of science, and allow the FDA to determine what drugs are safe for women.

Once again, I urge my colleagues, vote against the Coburn amendment, vote for women and women's health.

Mr. Chairman, I am pleased to yield 3 minutes to the gentleman from Washington State (Mr. MCDERMOTT).

Mr. MCDERMOTT. Mr. Chairman, I think, as a physician, I listen to this debate and it is very interesting to watch us practice medicine out here on the floor of the House of Representatives.

It is pretty clear that if the gentleman from Oklahoma (Mr. COBURN) wanted to ban RU-486, that is what he would have put in this amendment. But it is very clear that this is not what the intention is. The intention is to get a law out there that they can then get involved in lawsuits. It is a very well-known political strategy over the last 10 years to start something and get involved in the courts and tie it up forever.

Now, if they have pharmaceutical companies, and the gentleman from Oklahoma (Mr. COBURN) knows this, they screen all kinds of drugs. Right now, I heard thalidomide mentioned here on the floor. And it became a very bad drug because of its effects on newborn babies and causing defects. It is now being used for another illness. And when pharmaceutical companies screen these drugs, they know exactly what it is going to be used for. And what they are essentially doing here is opening the door for a lawsuit against the pharmaceutical company who comes to the FDA, having spent $20 or $40 or $100 million developing a drug, and if somebody says, this causes abortion, therefore, we have a cause of action against them and we stop it, they are interfering in a process that is presently legal.

A woman has a right to an abortion, and pharmaceutical companies have a right to develop drugs to do that in a very safe way. And for us to get into that position, the logical slope that they are headed down here, has already been mentioned. The next thing will be, when the sperm meets the egg, if that is a baby, then the next thing is going to be we must ban all birth control.

We already have difficulty getting birth control paid for by the Federal Employees Health Benefit Program. And so we know what is in their minds. But beyond that, the next thing will be an amendment out here on the floor that would prevent any money from being used for medical school training of any school that trains anybody to do abortions. Because if we go back and back and back and go down the stream, why should we waste money training physicians, obstetricians, in the skill of doing a safe abortion? We should not because they are ending the life of a child, and we get into all this inflammatory rhetoric.

Now, every word that is wrong. And this amendment is just the beginning of it. It is designed to do that and it is designed to hide what it is up to. Mrs. LOWEY. Mr. Chairman, I am pleased to yield 2 minutes to my colleague, the gentlewoman from New York (Mrs. MALONEY).

Mrs. MALONEY of New York. Mr. Chairman, I thank the gentlewoman for yielding me the time for her leadership on this issue.

Mr. Chairman, I rise in opposition. This is an antichoiced, an antiscience amendment. It is not just about RU-486. It is about FDA's ability to test, research, and approve any drug based on sound, scientific evidence which may have as a side effect a miscarriage. It could slow or stop research on a wide range of life-saving drugs.

Science, not politics, should determine what drugs are approved. This is why the National Coalition for Cancer Research, the American Medical Association, the American Public Health Association, among others, oppose this amendment.

Many drugs, including chemotherapy and antiulcer medication, have the side effects of inducing abortion. This is why pregnant women are advised against taking certain medications.

One of the drugs targeted by this amendment, mifepristone, is not just a drug to make abortion safer. It has been shown to be useful in treating uterine fibrosis, endometriosis, glaucoma, and certain breast cancer tumors.

Another drug targeted by this amendment, methotrexate, has also been used to treat a wide array of conditions including arthritis, lupus, and some forms of cancerous tumors. Blocking research and development of safe and effective drugs in the name of abortion politics is just plain wrong. Never before has Congress told the FDA to approve or disapprove of a particular drug.

This vote is the 108th antichoiced vote before this Congress since the new majority came to power. We should not be listening to the voices of the woman's right to choose procedure by procedure. This is antiscience, antichoiced, antiwoman. I urge a "no" vote.

Mr. COBURN. Mr. Chairman, might I inquire of the time remaining?

The CHAIRMAN. The gentleman from Oklahoma (Mr. COBURN) has 23 1/2 minutes remaining. The gentlewoman from New York (Mrs. LOWEY) has 27 minutes remaining.

Mr. COBURN. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina (Mr. DEMINT).

Mr. DEMINT. Mr. Chairman, I rise in support of this amendment, because I think it is important for this Congress to change the culture of this country by renewing our commitment to the value of life. This is not the time to send a signal to all Americans that abortions of convenience are a way to solve the problem of promiscuity and recreational sex. It is a hoax on the American people and women, in particular, to suggest that this is a healthy way to handle an unwanted pregnancy. We must not send the signal that it is easy as a pill to end an unwanted pregnancy.

This is one of the most important issues facing our country today, because as we look around at the violence and the apparent disregard for life in every walk of life, we have got to question if this type of ease in ending life is contributing to that. This amendment will do what it needs to do in stopping the approval of a way of life in America, in restoring value to life to all ages in America.

Ms. KAPTUR. Mr. Chairman, I ask unanimous consent to reclaim my time.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Ms. KAPTUR. Mr. Chairman, I yield 3 minutes to the very distinguished gentlewoman from the District of Columbia (Ms. NORTON).
June 8, 1999

CONGRESSIONAL RECORD—HOUSE

Ms. NORTON. Mr. Chairman, I thank the gentlewoman from Ohio for yielding this time, because I would like to express my own concern about why I think there is confusion about this amendment. The gentleman may be a doctor, but in drawing his amendment it is clear that he is not a lawyer. He says he has drawn an amendment to stop the FDA from approving RU-486. The language he has used instructs us on an amendment to stop the FDA from testing drugs that can treat cancer, high blood pressure, ectopic pregnancy, fibroids, epilepsy. The list is very long. The reason is that although the gentleman mysteriously says that he would accept an amendment to limit the language, he does not propose language of that kind. Why has he brought broad language here?

The reason that his language is defective is that, in the law, it is overinclusive and overbroad. Therefore, in the words he used, it must have unintended effects. In the law it is called a chilling effect. What that means in this case is that a pharmaceutical company will not come forward with a drug that may cure cancer because that company believes it may be sued because of the overinclusive language he has used. It ought to stop every Member in this body when they know that every chemotherapy drug can cause a miscarriage. If, in fact, this amendment had been in the law at the time these drugs were being produced, people who are alive today by the hundreds of thousands would be dead.

I ask you, how many people would be dead today if we consider how many drugs are on the market that have unintended effects that none of us could possibly approve, deadly effects? That is why politics and medicine, or politics and science, are like oil and water. You get into politicians overreaching when you insert political judgments into what should be only scientific matters.

Nor is this one of those great ethical issues on the frontiers of science, where ethicists and politicians have some reason to intrude, because abortion is legal, and I regret to say that miscarriages are also legal. We are entitled to ask, where does it begin, where will it end? I believe we must today let it end with legitimate scientific research. If we care anything about the many drugs that will be stopped by this amendment, we must defeat the Coburn amendment.

Ms. KAPTUR. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Washington (Mr. McDERMOTT).

Mr. McDERMOTT. Mr. Chairman, in the earlier debate I did not say something that needs to be said out here. We hear all these polls, that the American people do not like abortion and all this stuff. But I would tell you, in the election of 1998 in the State of Washington, the issue of partial-birth abortion was on the ballot, and the people turned it down. Now, you can tell me all you want about polls but the only poll that really matters is when people actually come out and vote. I believe that the gentlewoman from the District of Columbia (Ms. Norton) has talked about her finger on the whole issue. Because if you open up a cause of action against every pharmaceutical company that brings anything to the market or to the FDA for approval that might cause an abortion, you are going to chill the pharmaceutical industry, which is exactly the reverse of what I see in the appropriations process. We put all this money into the National Institutes of Health because we treasure our health care system and the pharmaceutical industry. It is a bad amendment.

Ms. KAPTUR. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from New York (Mr. NADLER).

Mr. NADLER. Mr. Chairman, I rise today in strong opposition to this amendment. This amendment would ban FDA approval of RU-486 which has been found safe and effective for early, nonsurgical abortion and is awaiting final approval by the FDA. RU-486 would expand access to safe abortion for American women. Its consideration for approval should be dependent on the science, not dictated by antichoice ideologues.

This debate is not about RU-486 or abortion. It is about the FDA’s ability to test, research, and approve any drugs for a legal purpose based on sound scientific evidence. Reproductive health drugs should not be singled out because they are reproductive drugs. The FDA found mifepristone which has been available in Europe widely for nearly 20 years, safe and effective for early medical abortion 3 years ago. The approval was based on extensive clinical trials in this country and in France. They await information on manufacturing and labeling of the drug before final approval can be issued.

This amendment could have dangerous implications for the development of drugs that are used for purposes other than terminating a pregnancy. Many drugs, including those for chemotherapy and antiulcer medication, have the side effect of inducing an abortion. That is why pregnant women are warned that a medication could imperil their pregnancy. New developments in the treatment of these and other conditions, for cancer and for other conditions, would be prohibited under the broad scope of this amendment. New contraceptive development would also be targeted.

Mr. Chairman, the right to abortion services should be safe and legal. The Supreme Court grants this right. What this amendment would do, even at the price of letting people who otherwise would have a right to abortion, die from cancer because it would prevent the development, the approval of certain chemotherapies, what this would do is to deny the FDA the right to approve a drug simply because it would do what is legal and is guaranteed right and that, Mr. Chairman, is wrong. That is why the amendment should be rejected.

Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume.

We have heard again the tactic from the other side, it is to misdirect, to dodge. This is not about creating lawsuits. This is not about preventing drug research in other areas. This amendment is written very clearly. I would have not ashamed to say, I do not understand from the gentleman from California (Mr. WAXMAN) because then I would have felt he would have been obligated to vote for the amendment, and that is why he would not offer it. We understand that.

This is about spending Federal money in a way to figure out how to kill unborn children. That is what this amendment is about. There is no ulterior motive to it. It is saying, is it a principle position of this country to tax working families and then take that money and spend it on science on how to figure out how to kill an unborn baby. That is what this amendment does. They know that is what it does. The only thing that we are hearing is that this will limit cancer research, this will make unintended consequences. That is not true at all. Having been in the drug manufacturing business, having applied for NDAs and INDs, I understand full well how the drug companies have to test, research, and approve any drugs that are going to be on the market. You have to specify what you are applying that drug for. If it is for anything other than the induce-ment of abortion, this law will have no effect.

The other side understands that but they do not have an argument against that, so, therefore, they use an argument that is not based on any intellectual honesty. It is based on a dishonest pass out of bounds. This is about, and I am not above to say, I cannot think one dollar of Federal taxpayer money should be used to figure out how to kill an unborn child. I have no embarrassment for that whatsoever. I am proud to make that statement.

If we look at what is going on in our country, we understand where violence comes from. The first act of violence is to violate a baby in its mother’s womb. When we decide that that life has no value, then no life has value, regardless of what is outside of it. At 19 days postconception, a baby has a heartbeat. At 41 days postconception, the baby has brain waves. In this country, in every State, in every territory
you are alive if you have brain waves and a heartbeat, and you are only dead if you do not. I explain to me why a baby at 5½ weeks pregnant is considered dead but not considered alive when if you are considered the opposite of that, you are considered dead. We are schizophrenic in our law because we cannot have equal justice under the law for the unborn when we want the convenience of doing what we in fact know is wrong.

Mr. Chairman, I yield 2 minutes to the honorable gentleman from Illinois (Mr. HYDE), the chairman of the Committee on the Judiciary.

Mr. HYDE. Mr. Chairman, I want to congratulate the gentleman from Oklahoma (Mr. COBURN) for making a necessary stand for life and against the culture of death. The question is about abortion. It is a shame that in discussing this life-and-death issue, the forces of prolife are demonized as antichoice ideologues.

One good thing that has come from this debate has been the use of the word 'abortion.' You are getting away, however slowly, from the euphemism of 'choice,' because, of course, there is no choice for the unborn whatsoever. The question is, should Federal funds be used to pay for learning how to make chemical warfare on a defenseless, unborn child? You relegate that child to nothingness because you do not consider the well-being of the child. You only consider the woman who for one reason or another wants an abortion, and that is a tragedy. But life is precious. And once it has begun, that life ought to be protected.

Now, yes, abortion is legal. More is the pity. What a shame on this country’s conscience. But the policy of this government and this Congress has been not to coerce money from working people to terminate the extermination of a human life once it has begun. Those people arguing against the gentleman from Oklahoma are all for abortion. They think that is a good thing. God bless them for thinking so. I think it is a horrible thing. I think it is morally wrong. I do not think people ought to be coerced into supporting it because it is morally wrong. I hope Members will support the Coburn amendment as I do.

Ms. JACKSON-LEE of Texas. I yield 3 minutes to the very distinguished gentlewoman from California (Ms. PELOSI).

Ms. PELOSI. Mr. Chairman, I thank the distinguished ranking member of the committee for yielding me this time and for her great service on the Subcommittee on Agriculture.

Mr. Chairman, I want to respond to some of the comments made by the distinguished gentleman from Illinois (Mr. HYDE), and distinguished and respected colleagues talked about the chemical warfare that we would be waging on the unborn. But I want to point out to my colleagues that the Hyde amendment allows for termination of a pregnancy in cases of rape, incest and life of the mother. If this is indeed the Hyde amendment and what the gentleman from Illinois believes and those who support the Hyde amendment, then why would they not want to have women have access to safe, early, nonsurgical abortion?

I certainly respect the gentleman’s religious beliefs and understand them, as a Catholic, myself, and mother of five, grandmother of four, and that we do not think abortion is a good thing. Abortion is a failure, it is a failure across the board. But to deprive the FDA of the opportunity to engage in research which would provide safe, nonsurgical terminations of pregnancy in case of rape, incest and life of the mother seems entirely contradictory to what the amendment offered by the gentleman from Illinois (Mr. HYDE) is, in the first place, I believe in that, and I do believe he is sincere. It would trample on the FDA’s ability to test, research and approve drugs based on sound scientific evidence, and in that respect the amendment offered by the gentleman from Oklahoma (Mr. COBURN) is starting to have this body, this room, this Chamber, look like the Flat Earth Society again, Mr. Chairman.

We have our Flat Earth Society days around here, and this appears to be one of them. RU–486 has been available to women in Europe for nearly 20 years. After extensive clinical trials in this country and France, the FDA has determined that this drug is safe and effective for an early medical abortion such as the kind allowed under the Hyde amendment for rape, incest and the life of the mother.

But this amendment is not about access to one safe and effective drug. The Coburn amendment would have a dangerous chilling effect on the development of drugs that are used for a wide variety of purposes, Mr. Chairman. Drugs used to treat other conditions including cancers and ulcers can induce abortion. This is the modus operandi. The FDA’s ability to consider approval of these therapies would be abolished.

And RU–486 also has promise for other potential medical uses including treatments for breast cancer, HIV and burns. The Coburn amendment forces researchers away from these promising treatment opportunities.

Mr. Chairman, the Coburn amendment puts a social agenda ahead of a woman’s needs, ahead of needs of individuals confronting a variety of disabling and disfiguring conditions, the research authority of the FDA. Once again, this Congress must decide whether to put political agendas ahead of health research.

Mr. Chairman, I urge my colleagues to oppose the Coburn amendment. Mr. COBURN of Oklahoma, I yield myself such time as I may consume.

I wonder if the gentlewoman from California (Ms. PELOSI) might stand and take a question? Might I inquire, and I would be happy to yield her to what part of the amendment would eliminate RU–486 from being used in breast cancer research, burns or any other portion?

Ms. PELOSI. Mr. Chairman, will the gentleman yield? Mr. COBURN. I yield to the gentlewoman from California.

Ms. PELOSI. Mr. Chairman, I say the gentleman’s amendment would have a chilling effect on the research. Medical research thrives, we have free and open inquiry.

Mr. COBURN. Reclaiming my time, there is nothing in the amendment that will have such an effect.

Again, we are seeing an attempt at characterizing the amendment in something other than it is. I understand why, because there is not a good factual argument against the Federal Government taking taxpayers’ dollars to figure out how to kill children. It is another part of the problem that we find ourselves in our society today.

There is nothing in this amendment that will limit in any way what the FDA can do if a drug manufacturer comes and uses, says I want to take 486 and get an indication for it for burns and breast cancer treatment; there is nothing in this amendment that will limit them from it. All they have to do is say that is what we are going to do with it.

And if they want to then let a doctor use it in an unapproved way, that is up to them. But to approve a drug for the very purpose of taking life goes against everything our country is founded on: the pursuit of life. And we are pursuing ways to take life.

Mr. Chairman, I reserve the balance of my time.

Ms. JACKSON-LEE of Texas. Mr. COBURN of Virginia. Mr. Chairman, I thank the gentlewoman from Ohio.

Mr. Chairman, I yield to the gentleman from Virginia (Mr. MORAN).

Mr. MORAN of Virginia. Mr. Chairman, I wonder if the gentleman from Oklahoma is aware that NIH is currently looking at RU–486 as potentially a very effective method of addressing both breast cancer and brain tumors. They feel that there is a substantial benefit and that the potential with RU–486. That ability to research the capability of RU–486 would be completely terminated under this legislation.

So my colleague’s suggestion is inconsistent with the facts.

Mr. COBURN. Mr. Chairman, will the gentlewoman yield?

Ms. JACKSON-LEE of Texas. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, there is nothing in this amendment that will keep a drug manufacturer or the manufacturer of RU–486 from making an application to use that drug in any way.
they want except the chemical induce-
ment of abortion. That is a fact.
Mr. MORAN. Virginia. The lawyers’
opinion is quite different, but I think
we will make that point subsequently
on the record.
Ms. JACKSON-LEE of Texas. Mr. Chair-
man, I thank the gentleman from
Virginia, and I would like to pick up
where the gentleman left off, particu-
larly acknowledge the gentleman from
Oklahoma (Mr. COBURN), that none of
us rise to the floor of the House to
challenge any of the beliefs, and I know
the very sincere beliefs held by you and
many who oppose the women’s right to
choose along with my respected col-
league on the Committee on the Judi-
cracy.
But if I might share with those who
are listening, the language of this amend-
ment in fact indicates that none of the
funds appropriated or otherwise made
available by this act may be used by the
Food and Drug Administration for
testing, development or approval
including approval of production, man-
ufacturing, or distribution of any drug
for the chemical inducement of abor-
tion. It may sound narrowly focused,
but if I may draw the gentleman’s at-
tention to the fact that chemotherapy
drugs can cause a miscarriage, most of
these drugs would not have been devel-
oped and future drugs may be jeopard-
ized just by the breadth of the lan-
guage.
I rise today in opposition to the Coburn
Amendment that would limit FDA testing
on the drug mifepristone or RU–486. This amend-
ment, as drafted, would limit FDA testing on
any drug that might induce miscarriage, in-
cluding drugs that treat cancer, ulcers and
rheumatoid arthritis.
The FDA is charged with determining
whether a drug is safe and effective. Mife-
pristone was developed as a drug that
induces chemical miscarriage. It has other
potential use in treating conditions such as in-
fertility, ectopic pregnancy, endometriosis, uterine
fibroids and breast cancer.
For example, chemotherapy drugs can
cause miscarriage. Most of these drugs would
have not been developed, and future drugs
may be jeopardized. Research of potential
treatments for each of these conditions is cru-
cial to women’s health. Concerning
this particular drug should not be a
barrier to treatment.
Science should dictate what drugs are ap-
proved by the FDA, not politics. Congress has
never instructed the FDA to approve or dis-
approve a drug. The FDA protocol for drug
approval depends upon rigorous and objective
scientific evaluation of a drug’s safety. Ulti-
ately, this is a decision that should be made
by the researchers and doctors.
I understand the integ-
ity of the FDA approval process. Under this
process, a company that wants to begin clin-
ical trials on a new drug must submit an appli-
cation for FDA approval. If that application has
not been approved within 30 days, the com-
pany may move forward.
This amendment would prevent the FDA
from reviewing any application for a drug that
might induce miscarriage. No funds would be
available for the FDA to even oversee any
trials.
Therefore, I urge my Colleagues to oppose
this amendment. We cannot afford to inhibit
research on certain health conditions based
upon the controversy of the particular drug.
We also cannot allow the FDA to be limited in
its ability to approve drugs based on politics.
Ms. KAPTUR. Mr. Chairman, I yield
myself such time as I may consume.
It is very clear that we have a dif-
ference of philosophy and maybe reli-
gious beliefs. I happen to think that I
am a person who believes in life and
that I support the right to life, I also
support the right-to-life decision-mak-
ing being that of the woman, her God
and her family, and what we are doing
here is to now just intrude into the
very infrastructure of government to
be able to say to even our Food
and Drug Administration, which has
the main responsibility of dealing with
drugs that Americans take to heal
themselves, now we are suggesting that
even the most benign of drugs that
may ultimately cause or induce a mis-
carriage, we now are prohibiting
women, we are prohibiting those who
have ulcers, those who have breast can-
cer, from even getting that fair treat-
ment by the FDA doing that right kind
of testing.
This interferes with the 30-day proc-
ess that the Food and Drug Administra-
ion has for any new drug that, if
they do not comment on it, the manu-
facturer can move forward. I think it is
tragic when we as a government glob-
ally decide to interfere with the pri-
ivate rights of a woman and deny the
good testing of a drug that may save
lives. I believe in life. I want to save lives.
This amendment should be defeated.
Mr. Chairman, I yield 2 minutes to
the gentleman from New York (Mr.
WEINER).
Mr. WEINER. I appreciate the oppor-
tunity, Mr. Chairman, to speak on this
amendment.
As my colleagues know, I think the
amendment offered by the gentleman
from Oklahoma is fraught with two
fundamental problems. One is a philo-
sophical inconsistency. I have come, in
my brief time here, to view Mr. COBURN
as a consistent, conservative voice in
this Congress, something that he
should be proud of perhaps.
Yet, by the same token, we have an
amendment here that is so counter to
that philosophy that we here in this
Chamber are now going to wade into the
operations of doctors and physi-
cians and clinical experts to decide
how to interpret the word “for,” be-
cause that is what this comes down to.
How Mr. COBURN interprets the word
“for” is very narrowly. It says it is
only RU–486.

CONGRESSIONAL RECORD—HOUSE

11965

The American Medical Association,
the American College, American Col-
lege of Obstetricians and Gyneco-
lologists, the American Medical Wom-
en’s Association and others interpret it
that a whole litany of research will now
be off the table because that word
“for” is ambiguous, and that is the sec-
ond problem with this bill. It is intel-
lectually ambiguous.
It is difficult to determine when re-
search begins what the outcome might
be. It is difficult for scientists some-
times to know when they are doing re-
search on figuring out how to put a
shuttle into space, that they might get
technology that produces something
far different.
The same is true here, that the prob-
lem with this amendment is, it is craft-
ed in such a way that the gentleman
may offer simply RU–486 except if
RU–486 turns out to cure cancer, then
it is okay.
Mr. Speaker, that is not a way for us
to be operating in this Chamber. This is
a very dangerous amendment.
I understand the argument that the
gentleman is making about abortion. I
disagree with it with every ounce of
my strength, but I understand that.
The problem is with this amendment is
it conceivably opens the door to prohi-
bitions about all kinds of other types
of research.
It is simply not the type of business
we should be doing here, and it is not
the type of business that anyone that
considers themselves in this body a
conservative and is intellectually hon-
est in that position should be taking.
Ms. KAPTUR. Mr. Chairman, I yield
2 minutes to the gentlewoman from
New York (Mrs. LOWEY).
Mrs. LOWEY. Mr. Chairman, as we
close this debate, I would like to ad-
dress some remarks again to my good
friend, the gentleman from Oklahoma
(Mr. COBURN) because I respect his
point of view. We may differ on this
issue, but I certainly respect his point
of view.
As a mother and grandmother of
four-and-a-half, I have to tell my col-
league after 10 years of serving in this
body I am so tired of debating abortion
on the floor of the House, restriction
after restriction, ban after ban, amend-
ment after amendment. If we really
really want to reduce the number of abor-
tions, please work with us to increase
funds for family planning. Work with
us to ensure that women have access to
prescription contraceptives.
I have been working to prevent un-
tended pregnancies, reduce the num-
bers of abortions. We need to make
abortions less necessary, not more dan-
gerous, and I am sorry that this
amendment is being offered to an oth-
erworldly point of view.

The amendment was offered last
year. Although it passed the House
narrowly, it faced a veto threat from the
administration, rejected by the

June 8, 1999

11965
Mr. COBURN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would say to my friend from Ohio and the gentleman from Virginia and the gentlewoman from New York this is not a fun debate in the political practice of medicine. I urge rejection of this amendment.

Mr. Chairman, Congress should not inject politics into the FDA's drug approval process. This amendment ignores sound science, it puts women’s health in jeopardy, and it should be defeated.

Ms. KAPTUR. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia.

Mr. MORAN of Virginia. Mr. Chairman, I thank the distinguished ranking member of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies.

The prior gentlewoman from New York was so right. We spend an enormous amount of our time in this body trying to restrict women’s access to the best and safest reproductive health care. If we can channel this energy into more productive activities, maybe we can find more money for the women and infant care program or even help to prevent more of the unplanned pregnancies that are the cause of this problem. None of us want to support abortion, and hopefully all of us want to create an environment where there will be far fewer abortions.

But what we are talking about today is really the political practice of medicine, and Congress should be doing nothing to support abortifacients or drugs to induce abortion. The point is should we really be supporting them? We should not be engaged in the political practice of medicine. I urge rejection of this amendment.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, Congress should not inject politics into the FDA’s drug approval process. This amendment ignores sound science, it puts women’s health in jeopardy, and it should be defeated.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, Congress should not inject politics into the FDA’s drug approval process. This amendment ignores sound science, it puts women’s health in jeopardy, and it should be defeated.

The prior gentlewoman from New York was so right. We spend an enormous amount of our time in this body trying to restrict women’s access to the best and safest reproductive health care. If we can channel this energy into more productive activities, maybe we can find more money for the women and infant care program or even help to prevent more of the unplanned pregnancies that are the cause of this problem. None of us want to support abortion, and hopefully all of us want to create an environment where there will be far fewer abortions.

But what we are talking about today is really the political practice of medicine, and Congress should be doing nothing to support abortifacients or drugs to induce abortion. The point is should we really be supporting them? We should not be engaged in the political practice of medicine. I urge rejection of this amendment.

The second thing I would say is this amendment will have no effect whatsoever on any other utilization of any other drug. Cytotec, which is the second drug used with RU-486, is used to protect the lining of the stomach. It is a prostaglandin inhibitor. We use prostaglandins today. We are actually starting to use Cytotec, a very strong component of this, to induce labor. I did it about a week ago, first time.

So we did not learn that from it being studied on the basis of it being an abortifacient or a drug to induce abortion. We learned that because that drug was developed to protect the lining of the stomach for people who have ulcers, consequently learning that you do not dare take that drug if you are pregnant.

Well, if it works in terms of causing uterine contractions, what about using it to induce labor? Maybe it is safer than pitocin or other prostaglandins. So there is no limitation that is going to come about from this amendment.

Five percent of the women who take this drug get a uterine infection, which, when you have a uterine infection, number one, it will affect your ability to conceive in the future. One hundred percent of the women lose more blood with a chemically induced abortion than they would either through a spontaneous or a surgical abortion. It may not be important to you, but if it is beating the blood, it becomes very important.

Number three, more than one-third of them end up delivering the conceptus outside of the clinic. In France, they have very selected rules on how you can use this drug. None of those are protected and planned in this country.

So is the issue all of the things that we have heard: Not being able to use research? Not being able to get cancer drugs? No, it is not. The issue is nobody from the opposing viewpoint, either from the Republican or Democrat side of the aisle, answered the question, should Federal money be used to help find ways to kill babies? Nobody there really do that? I do not think that is because there is not a good answer. Nobody agrees with it. So, therefore, we see arguments that are something other than that. We distort what the argument is because there is not a good argument.

We will not limit in any way the ability of the FDA to do any research. What we will say is, is if your number one goal is to figure out how to kill an unborn baby, number one, first of all, this does not work in 2 days or 3 days or 5 days or 6 days postconception. I am sorry if that is what people think.

This works 4 and 5 and 6 and 7 and 8 weeks after. It is not a morning-after drug. That is now how it is going to be used.

What this is going to do is say if you are intending to bring a drug to the market, then the FDA should not spend the first Federal taxpayer’s money to figure out how to kill a baby. All right, if it is going to be used for an other intended purpose, maybe that is okay. Because these drugs, Cytotec, is going to be used for that. You do not have to have approval of the FDA to use drugs in ways other than how they are indicated. We all know that.

So Cytotec is already being used to induce abortions. The point is should we spend the money, your children’s, your grandchildren’s, our community’s money, to figure out how to take a life? My answer is no. I ask you, should we really be spending the money to help find ways to kill babies? Nobody there really do that? I do not think that is because there is not a good argument.

That does not say that abortion still is not legal. It is. The question comes, when you have done, as I have, and sat there at the bottom of a table when a woman delivers a 13-week fetus or a 12-week fetus, and hold it in your hand, and she is distraught and crying because that baby was created by her and her partner, and is totally unique to anything else that has ever been created on this earth, will be created. It has a totally unique genetic structure, it is a God-ordained being, and we are going to say it is okay, we are going to figure out ways to kill those God-ordained
being, and we are going to say for con-
venience sake, because we made a mis-
take, because somebody erred, because some-
thing failed to protect us, that it is okay to destroy that life. I re-
ject it. I do not like anybody who disagrees with me on that, but I reject it as an argument of the heart and of the soul.

If we are going to decide in this coun-
ty that you are dead when you do not have heart-beat and brain waves, but you are alive in all 50 States and terri-
tories when you do, how can we reject the argument that at 41 days every fetus, every unborn child, has a heart-
beaat and a brain wave? Now, you can-
not deny that scientific fact. That is absolutely proven. So the response to that question is “we will talk about something different.”

It is bad enough; I understand. I wish we did not have unintended pregnancy. The gentlewoman from New York (Mrs. LOWEY) and I have the same goal on that. We believe in getting there a dif-
ferent way. I am not supporting some of her contraceptive research, because I am seeing what is happening with con-
traceptives and sexually transmitted disease and cancer of the cervix, which is at an all-time high in this country, under the false assumption you are safe, when a condom offers no protec-
tion from human papilloma virus whatever, yet we tell all our kids they are safe.

Well, I am tired of all the deceit around the arguments. There is good science. I am a scientist by training. I have read the studies. I have looked at it. This amendment is designed for one thing only.

The gentleman from Washington State gave me more credit. I have never thought out about to figure out how to be devious enough to set up lawsuits. My purpose was to say no taxpayor money from Oklahoma or anywhere else ought to be used in fig-
uring out how to kill children.

Mr. Chairman, I yield back the bal-
cance of my time.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume to close at this point.

Mr. Chairman, I rise in opposition to the gentlewoman’s amendment for many of the reasons that were stated earlier. The first one is that I do not think that this Congress should be prejudging medical science. We have talked this afternoon about how scientific discover-
ies and how science proceeds, often with unintended consequences. We have talked about how many of the drugs currently being used to treat mental illness in this country were dis-
covered by accident.

They were not discovered in this country; they were discovered in France. They were discovered during operating room procedures when pa-
tients were trying to be put at ease and the process of pain remediated during operations, and, all of a sudden, for some reason, certain drugs worked. Eventually they came to this country, and today we do not understand why they work to help patients with serious mental illness. But for some in our population, they have been able to be given great relief and help through those drugs.

The science was talked about with X-rays. When the scientists invented X-rays, it was an accident. They really went in there with one objective, and, all of a sudden, they made a mistake and it turned out to be an X-ray, and sometimes science is not quite as scientific as it seems. I think that this particular Chamber should not be judging what is science and what is not science.

For the amendment of the gentleman from Oklahoma (Mr. COBURN), which I would really encourage the Members to read if they are going to be voting on this, because I do not think his amend-
ment says what he purports to do in his oral remarks here, but this amendment would absolutely set a dangerous precedent.

This Congress has never legislated the approval or disapproval of any drugs. That is the job of the Food and Drug Administration. We pay for sci-
entists. We, as taxpayers, pay to make sure that what reaches our shelves is safe; but we do not prejudge what is medically relevant.

We also know that many drugs are tested at the end of use for treatment of more than one illness, disease, or condition. We do not really control that. So I would say that on the basis of science alone this amendment should be rejected.

I think that the committee also on which we serve, and we are a very re-
ponsible committee, we are the first one on this floor, we are trying to clear this bill under regular order, and I do believe that the gentleman from Okla-
ahoma (Mr. COBURN) has given been suffi-
cient time, actually a lot of time over the last several weeks, to express his points of view, which have been very well articulated. But the truth is, our subcommittee never had any hearings on this par-
ticular matter. The reason is we are the Committee on Appropriations. We do not try to tell FDA what to do. We expect the authorizing committees will deal with that.

If my experience proves me right, my guess would be that if there are con-
cerns about something that is inappro-
priate, that is best taken to the au-
thorizing committees.

This amendment is not going to be in the Senate bill, and it is not going to become a part of the final legislation.

So I would say on science, based on safe procedures, that this is some-
thing the FHA should be imple-
menting, and also based on regular order, the gentleman’s amendment should be defeated. I would urge my colleagues to do so.

Mr. STARK. Mr. Chairman, I rise in strong opposition to the Coburn amendment to the Agriculture Appropriations bill that would ban the Federal Drug Administration from using funds to test, develop, or approve Mifepristone (RU–486)—a drug which has been found to be safe and effective for early, non-surgical abortion.

This is yet another political vote and political debate on a drug whose benefits have been scientifically proven. This amendment is an unwarranted intrusion into the work of the FDA, whose job is to decide whether to ap-
prove RU–486 or other drugs based on health and safety—not abortion politics.

Medical abortions and RU–486, if approved, would allow more choices to women seeking abortion. Medical abortions are a better health option for some women. Medical abortions allow women to avoid surgery as well as pro-
tect their privacy—women can receive RU–486 in pill form in a regular doctor’s office, and be spared the trauma of protesters and vio-
ence that continue to stigmatize these women for exercising their constitutionally protected right to choose.

Approval of RU–486 is critical so that doc-
tors may use this procedure when they believe it is the safest way to end a pregnancy and leave the woman with the best chance to have a healthy baby in the future.

New contraceptive development would also be targeted. Many anti-choice groups believe that some contraceptive methods cause an abortion. This is untrue. If that contention were accepted as fact, research and development of man new contraceptives would come to a halt. This amendment would deprive women of the benefits of significant contraceptive ad-
vances.

Make no mistake, a vote for this amend-
ment endangers the health of women, and adds to the long list of barriers set by the ma-
jority in Congress that make reproductive health services more dangerous and difficult to obtain. I strongly oppose the Coburn amend-
ment.

Ms. KAPTUR. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentle-
man from Oklahoma (Mr. COBURN).

The question was taken; and the Chairman announced that the noes ap-
peared to have it.

RECORDED VOTE

Mr. COBURN. Mr. Chairman, I de-
emand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic de-
vice, and there were—ayes 217, noes 214, not voting 4, as follows:

[Roll No. 173]

AYES—217

Mr. REYES changed his vote from "aye" to "no."

MESSRS. DREIER, TAYLOR of North Carolina, OXLEY and BATEMAN changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT NO. 17 OFFERED BY MR. CHABOT

THE CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 17 offered by Mr. CHABOT: Insert before the short title the following new section:

SEC. (A) LIMITATION.—None of the funds appropriated or otherwise made available by this Act may be used to award any new allocations under the market access program or to pay the salaries of personnel to award such allocations.

Mr. CHABOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

Mr. REYES changed his vote from "aye" to "no."

MESSRS. DREIER, TAYLOR of North Carolina, OXLEY and BATEMAN changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Amendment No. 17 offered by Mr. CHABOT: Insert before the short title the following new section:

SEC. (A) LIMITATION.—None of the funds appropriated or otherwise made available by this Act may be used to award any new allocations under the market access program or to pay the salaries of personnel to award such allocations.

Mr. CHABOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 17 offered by Mr. CHABOT: Insert before the short title the following new section:

SEC. (A) LIMITATION.—None of the funds appropriated or otherwise made available by this Act may be used to award any new allocations under the market access program or to pay the salaries of personnel to award such allocations.

Mr. CHABOT. Mr. Chairman, the rationale behind this amendment is simple. Hard-working taxpayers should not have to subsidize the advertising costs of America’s private corporations, yet this is exactly what the Market Access Program does.

Since 1986, the Federal Government has extracted well over $1 billion from the pockets of American taxpayers and handed it to multimillion dollar corporations to subsidize their marketing programs in foreign countries. In other words, the U.S. taxpayer is helping successful private companies and trade associations advertise their wares in foreign countries.

Mr. CHABOT. Mr. Chairman, I think the American people would agree that their money could better be spent on deficit reduction or on education or on saving Social Security, on the environment, or on tax cuts.

In the past, we have witnessed MAP supporters present some good-sounding arguments for preserving what is in my view a corporate welfare scheme. The only problem is that when we cut through the pro-MAP propaganda, there is no credible evidence to back up their claims.

Let me give my colleagues an example. MAP supporters have argued that this so-called business government partnership creates jobs. But I think, Mr. Chairman, that the American people know that the only jobs usually created by big government spending programs are for big government bureaucrats.

This view of the MAP program is backed by the General Accounting Office. GAO studies indicated that this program has no discernible effect on U.S. agricultural exports. So if the program cannot increase U.S. exports, how can it possibly create more private-sector jobs?

For years, supporters of MAP have lauded the economic benefits created by the program. However, in April 1999, a GAO report, requested by myself and Senator SCHUMER and a bipartisan group of House Members, concluded that the economic benefits of this program are uncertain at best.

According to that report, it seems that the Foreign Agricultural Service, the bureaucracy which administers this corporate welfare program, has used certain assumptions that the OMB has determined to be inadequate for economic benefit analysis. For example, the Foreign Agricultural Service assumes that there are no opportunity costs for promoting one product over another.

But even if my colleagues do believe these supposed benefits, they have all the more reason to support this amendment. These numbers, if accurate, prove that, given these positive returns on an investment overseas, MAP-supported corporations and trade associations ought to be spending their own money and not the money of the taxpayers of this Nation.

My opposition to MAP is not based solely on the false premises of its supporters. I am offering this amendment today because we simply do not need this wasteful program. Let us be honest. Most American businesses do not benefit and do not try to take advantage of government handouts like this MAP program.
In the case of MAP, as in most corporate welfare programs, beneficiaries consist primarily of politically well-connected corporations and trade associations. Most, if not all of these organizations, would advertise their products overseas, even without MAP funds. They probably would work much harder to ensure that the money is well spent.

Let me give just one example of the kind of waste and mismanagement that this program breeds. We all remember a few years ago when the California Raisin Board sponsored the “I heard it through the grapevine” raisin commercial. Based on the success of that commercial in the U.S., MAP decided that it would be a good idea to use that commercial to attempt to boost raisin sales in Japan and put $3 million into the program.

Not surprisingly, however, the ads played in English, leaving many Japanese confused, unaware that the dancing characters were raisins. Most thought they were potatoes or chocolate. In addition, many Japanese children were afraid of the wrinkled, misshapen figures. This, of course, is the kind of wasteful spending that inevitably occurs when we give someone the ability to spend other people’s money.

Mr. Chairman, Congress should end the practice of wasting tax dollars on special interest spending programs that unfairly take money from hard-working families to help profitable private companies pad their bottom line. MAP is a massive corporate welfare program that we should eliminate today.

Finally, in MAP, MAP’s proponents have argued that due to recent reforms, big corporations no longer receive MAP funds. It is true that in June 1998, in order to correct some of the more egregious abuses of the MAP, the Foreign Agricultural Service revised its regulations to limit a company to 5 years of assistance in a particular country. After this 5-year period had expired, companies were to be graduated from the country’s market. Translation: These billion-dollar corporations were no longer to receive tax dollars to fund their product promotions.

So I would urge my colleagues to vote to get rid of this very wasteful program.

Mr. KAPTUR. Mr. Chairman, I rise to strike the last word.

Mr. Chairman, I rise in opposition to the gentleman’s amendment and am somewhat surprised that a Member from Ohio, future is our leading industry, would offer this particular amendment. If one reads the changes that have been made in this program, particularly targeting its benefits at small- and medium-sized operations, I think some of what the gentleman has said might have been true many years ago, but they are certainly not true today.

If one looks at what is happening in rural America, which is swimming in surpluses, and we know that for this country to help rural America make it, we must expand our exports in spite of collapses in the Asian economy and other places, there is one program we do not want to cut at all and it is this program.

I think what is really hard sometimes for Members who represent only urban or suburban areas, where production does not occur, where people largely reside and where agricultural development does not happen on an everyday basis, it is hard to understand how a farmer, who may raise beans or may raise animals and who wish to export a product, many times those same people cannot sell in Cincinnati. A farmer over in Butler County, the only way they can get product into the City of Cincinnati is to perhaps sell at their farmers’ market. They cannot even get their products on the shelves of the stores in Cincinnati. Imagine how difficult it is for that same farmer to move product into Japan or any other part of Asia or Latin America or Europe.

The market access program is the only mechanism we have to help growers move product abroad. This is not Procter & Gamble. This is not where we can take production and move it anywhere in the world and then distribute the product. This is not U.S. Shoe, where all of their products are made abroad and then imported into Cincinnati and distributed to the rest of the United States. This is trying to help our producers in this country to be able to lift product off our market and take it somewhere else.

And, Mr. Chairman, I underline “producers.” This is really a very, very important program. And if my colleagues know the trade accounts of this Nation, you have not only going into more and more serious trade deficit, every single year more imports coming in here than exports going out, the one rosy light in a very bleak set of tables is agriculture. And the light is not getting any brighter; it is getting dimmer as the years go on, but it is still lit up. And the reason is because we have been able to move product elsewhere around the world.

So I would just say to the gentleman, in a State where our leading industry is agriculture, in a Nation where the trade deficit is shrinking, it is the only positive side of the trade ledger, this is exactly the program we do not want to cut. And we do not want to cut it particularly at a time when rural America is in deep depressions. This is a time to help our people, not to penalize them, and especially to meet the subsidized kind of programs that our trade competitors have on the books all across the world.

Stand up for American agriculture when she is calling us and asking us to hear her voice.

Mr. EWING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I reluctantly rise to oppose this amendment by my colleagues, we often get but, fortunately, this year have not gotten on this bill dealing with important crops like peanuts, sugar, and tobacco. But let me speak to the MAP, the Market Access Program.

The United States is outspent more than 20 to 1 by our foreign competitors spending money on export promotion and export subsidies. In 1997, the leading U.S. competitors spent $924 million to promote agricultural exports, much of it in this country, and the United States spends $90 million. Ninety million dollars spent by the United States compared to $924 million by our competitors.

There is no limit placed on the amount that can be spent by exporting countries for agricultural promotion. The WTO does not limit that. And right now, while the U.S. has diminished the amount of money spent, other countries in the world are expanding the amount that they are spending to promote their products in this country and other places in the world.

Foreign spending in the U.S. on promoting our competitors’ agriculture is growing. A hundred million was spent in 1997 for that purpose. That much more. The biggest spenders are New Zealand, Italy, Spain, Australia and Canada.

The U.S. exports have gone down over the past 3 years. This is not the time when we should be cutting the funds necessary to promote our exports. SUDA estimates that agricultural exports will be only $49 billion this year. Just 3 years ago they were $60 billion. We have serious problems in American agriculture. The way to address them is not to cut the promotional funds needed to make us competitive around the world, and I reluctantly would rise and ask my colleagues to oppose this amendment.

Mr. FARR of California. Mr. Chairman, I move to strike the requisite number of words.
Mr. Chairman, my colleagues should wake up and smell the coffee. That Juan Valdez who is in all our homes, on our television sets, telling us about the virtues of Colombian coffee, and we see him in those advertisements in every grocery store promoting that coffee, where do my colleagues think that money comes from? It comes from the Colombian Coffee Growers Association. And why are they doing it? They are paying to promote their product. Not a brand name but a generic name.

Well, what is wrong with us doing the same thing? How are we going to sell agriculture around the world? We produce in agriculture, which is essentially if we really look at this, a lot of small farmers getting together and promoting a product. They have to, under this program, come up with 50 percent of the amount that was come from Marketing Government comes in only after they have initiated it and they do a match.

Remember Ruiutti Wine that was advertising all over America a few years ago? Where do my colleagues think the advertising fee that came from Marketing promotion from Italy to get Americans to drink Italian wine. Now, we export $60 billion worth of food around the world. Why do my colleagues think people buy our food? Because we help them promote it, just like anyone would sell anything else. Well, this is the program that helps promote it. Only this program does not allow, as the author of the amendment indicated, big corporate agriculture to benefit. This program ties it to small- and medium-sized companies. He says this is big corporate welfare. Well, there is no big corporate welfare in the Seed Trade Association, in the Asparagus Association, in the Kiwi Commission, in the Prune Board, in the North American Blueberry Council, in the Catfish Institute, in the Apple Association. That is not big corporate welfare. Last time I checked, these products were being grown by small farmers, and they are trying to get their products sold.

Now, why is it good for America? Because the one area where our balance of trade is strong is in agriculture. We export $60 billion and we import $30 billion. We cannot say that about any other industry in America. We are actually gaining that amount of revenue. That is what it is all about. Well, this is the program that helps do it. Why would we want to undermine that program?

A lot of the data being quoted is old data. In the last few years we amended this program and we said participants had to come up with a match, they had to come up with a match, they had to come up with a match. This helps sell American agriculture. It is the only way we are going to be able to sell it. Support this program. It is not big corporate welfare, it is small American farmers being able to sell their product abroad. I ask for a "no" vote on the amendment.

Mr. NETHERCUTT. Mr. Chairman, I move to strike the requisite number of words.

I have great respect for the sponsor of this amendment, but not so much respect that I am going to vote for it. In fact, I am going to oppose it, simply because what my friend from California just stated is absolutely true.

What happens in this Market Access Program is this. Growers and consortia, Sunkist for orange juice, Tree-Top for apple juice, which is very prominent out my way in the State of Washington, get together and they decide how they can best promote their products overseas. They pay half the freight. The taxpayer pays half and the amount relative to what it used to be half. And that is what is fair about this program.

It has been cut down dramatically since I have been in this House. I have seen Members on both sides of the aisle have some concern about this, people, by the way, who do not care much about agriculture and do not understand exports, but they have managed to whittle down this particular expenditure in the agriculture appropriations bill such that it is down to virtually very little when it can do so much. It can do so much.

What I think the sponsor does not appreciate, and maybe others who might support this do not appreciate, is that when we submit this amount of money, the small amount of money relative to the rest of the agriculture budget for market promotion, for promotion of our products overseas, that has direct impact on the farmer. It has direct impact on rural America.

And talking about big corporate welfare, that is not the case in this particular program. This helps the grower, the farmer, the person who works the land and presents a product that can be exported overseas and dramatically helps our balance of trade.

As the gentleman from California (Mr. FARR) said, agriculture is a huge benefactor to the balance of trade. It helps our country by exporting products. So, number one, it is a small amount of money relative to what it used to be and what it is in the agriculture budget; number two, it helps the small farmer, it helps the grower; number three, it helps the American economy, especially the rural economy, because we are essentially buying shelf space and competing with European and other products around the world; and, finally, the governments of these other countries are subsidizing tremendous amounts of money to their growers and their processors to sell products in our country.

So this is a small way, a fair shared way that our products can get on the shelf in Europe, and our growers, our producers, our farmers, our market system, the export market system can work in our country.

So, again, I pay great respect for the gentleman from Ohio (Mr. CHABOT). He is a good Member and has good ideas, but this one is one that should be defeated. I hope my colleagues will vote "no" on this amendment.

Mr. BOSEWELL. Mr. Chairman, I move to strike the requisite number of words.

We have had some good discussion here already, and I am not going to try to repeat it over and over, but I appreciate the things that have been said. I might just give my colleagues a little lesson in history that some Members might not be aware of about the American farmer. We are in a crisis in agriculture, no question about it. I live out there, as many of my colleagues do. I just spent a week in my district, and it is tough and it is real.

A few years ago, when we had the Ag crisis of the 1980s, it was interesting to me, and that is what motivated me to get involved in this arena, the political arena, we had people going to their lenders and different organizations, and I will not get into that, and they told our farmers to go back and sell their cow herds or sell their sows, or do this or that. In other words, dispose of their factory. In a sense, we do not want to do that again. We have to get out there and be competitive in the export market.

In my State we have to export about 40 percent to make things work. That is kind of a reflection of the country. We have to do about the same thing to make things work. As we have heard many of our colleagues say already, agriculture puts a plus on the trade deficit in our favor, so we cannot let this happen. It is not a time to let up and say we are not going to go out there and be competitive.

In our Committee on Agriculture here a number of weeks ago, we had the Secretary come and talk to us and mention the unprecedented 3 years in a row that there has been overproduction. And so when our people go to sell to someone else, they say, excuse me, we have something we want to sell. And so this is a time when we want to cut back on the promotion. We cannot do that.

So I encourage a "no" vote and hope that we can do that; that we can give a leg up for the American farmer and agriculture production. It is important to all of us. I do not care where we live, what part of the country, what we do, it is important to all of us and let us not forget that.

Mr. ROYCE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, since the Great Depression, American farmers were shackled by the Federal Government
with programs and regulations that kept them from producing all they could. We all remember how many farmers, instead of growing crops; they were paid subsidies to grow others.

Over the last few years, our colleagues on the agriculture and agricultural appropriation committees have done an excellent job in reducing harmful government interference in American agriculture and putting it on the road back to the market system that works so well. American farmers are now unshackled and free to produce as they see fit, not as Washington tells them.

However, more work remains to be done. The market access program is a relic of our former government-heavy agricultural system. The MAP program, a Market Access Program, provides millions of dollars in taxpayer subsidies per year to agribusinesses to supplement their international advertising and marketing.

We have heard that agriculture is one of the most important businesses in America, and we have also heard that advertising American agriculture overseas is critical. And I agree with these points. They are certainly true.

The question is not whether agriculture and American farmers are important. Without question, they are very important to this economy. And we all know that advertising is an essential part of doing business. The question is whether MAP is a proper use of taxpayer money. And it is not.

The cost of advertising should be borne by the firms which stand to benefit, not the taxpayers.

Let me also say that I do not believe that working men and women should continue to foot the bill for advertising subsidies to multinational corporations. Promotional advertising for product is simply not the role of government. It is the role of those private concerns that benefit from the sale of those products.

The future and continued performance of American agriculture is not contingent upon handing out taxpayer money for advertising. The success of American agriculture results from the energy and ingenuity of American farmers, not government subsidies.

Let me also say that as far as the GAO report, the GAO report found that there is no clear relationship between the amount spent on government export promotion and changes in the level of U.S. exports.

In a separate report, the GAO questioned whether funds are actually supporting additional promotional activities or if they are simply replacing private industry funds. What is obvious on its face is that money handed out by government bureaucrats does not magically become several dollars.

And let me say that another argument that is often made is that we are being subsidized by the European Union and other countries throughout the world. I might point out that our farmers are becoming as competitive as those countries by every measure.

Our gross national product most every other country in the world. We have the most productive workers. Our per capita income is highest. Unemployment is almost nonexistent.

I, for one, do not wish to follow the European model of subsidies. I do not think that many of my colleagues do either. We should continue striving to shed these vestiges of central planning instead of defending those that have crept into our economy in the past.

Government has no business deciding which companies are worthy of advertising funds. That is precisely what the free market is there to do, to allocate resources in the efficient way possible. The government ought not to be taking tax money from companies to finance the advertising of their competition, which is the direct result of redistribution.

I make no argument that advertising sells products. This is obvious. The point, however, is whether private conditions should pay for the promotion of their own product or whether the American taxpayer should be forced to do so. We do not force the American taxpayer to pay for other corporate expenses like office supplies. American taxpayers should not pay for this cost of doing business.

Mrs. CLAYTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that, obviously, as we look at this program, the question is, is this a program that is of value to the American people? Is it a program of value to the American farmers? And should we be investing in promoting the American farmers' product abroad?

I think there is value in investing in the promotion of the American farmers, because not only is that a public policy that we support our farmers. True enough, in 1996, we had a farm bill that said we were removing ourselves from the subsidy model and we are going more to a market model. I personally did not support that. But nevertheless, even in a market-driven model, not to have this tool is counterproductive.

This tool simply says that it is a tool to market our farmers who were herebefore dependent and subsidized. Our farmers are having a very difficult time. If we are not going to make the market available as a tool to them, as we pull away the safety net, how do we expect our farmers in rural areas to survive? How is it that they are going to be on a competitive basis with other countries subsidizing large quantities if we expect they have no safety net, and yet we are not going to give them the tools to survive?

We are struggling in rural America. I cannot think of a commodity that made money in my State. And without this tool, the majority of them would not have it. And the claim that this only goes to large corporations, indeed, that has been in the past, but this program has been improved. Indeed, it goes now to small farmers, to associations.

What kind of commodities does it support? It supports dry beans, eggs, frozen potatoes, grapes, peanuts. My colleagues would expect me to say peanuts because I am from North Carolina. But also pears. All of these small farmers' products, associations getting together, having their government to recognize the importance of their coming together and promoting their goods.

We travel abroad and we find that other countries are subsidizing the marketing of their products. We make our farmers less competitive when we remove this tool.

So I urge my colleagues to vote against this amendment, as well-meaning as it might be. This is counterproductive to the needs of the farmers in the rural areas.

Mr. LATHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would just like to make a few points. The idea that this money goes to large corporations is simply bogus. This money is matched by money which is raised from producers, such as pork producers, who are hurting so badly today. The cattle men, the corn growers, the soybean growers put their own money with this. This is not to enhance a particular brand name. It is to sell U.S., high-quality pork, corn products, feed products overseas.

One part of the argument that I think is really missing is what effect does this cultural export have on American consumers as far as their jobs? And one gentleman made a statement about people working hard to pay taxes and using their money for this. Well, the fact of the matter is, in the State of California, where that gentleman was from, there are 124,000 jobs directly dependent upon agricultural exports. Think of it, 124,000 jobs which could be greatly reduced if we lose our export markets and if we do not continue to grow in our exports.

In Ohio there are 27,000 jobs directly related to agricultural exports. It is extraordinarily important in a State like Ohio to maintain those good, high-paying jobs which are dependent upon agricultural exports.

In the State of Iowa, a smaller population State, it has a huge impact. We have 80,000 jobs in Iowa that are directly related to agricultural exports.

So when we talk about this program being some kind of corporate welfare, I hope people here will recognize the fact that our constituents at home are dependent upon agricultural exports.
It is very important that we go and promote high quality American pork overseas, not a particular company, but American pork. It is very important that we promote American soybeans and find new uses for those products overseas for corn products, for beef overseas.

It is extremely important. We have a tremendous number of jobs that are directly dependent.

So let us not just talk about exporting and competing with other nations. Let us talk about at home in our own districts how important it is that we continue to use the tools available that the producers themselves are willing to contribute to to sell their products overseas which create good jobs at home in our own districts, high-paying jobs, and really are the future for agricultural in the international marketplace.

Mr. HAYES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise today in strong support of the fiscal year 2000 Agriculture Appropriations bill. I commend the gentleman from New Mexico (Mr. SKEEN), the chairman, and the gentlewoman from Ohio (Ms. KAPTUR), the ranking member, and all my colleagues on the subcommittee for bringing this bill to us, a bill which supports American farmers in rural communities. This bill comes to us after much time, deliberation, and discussion. I thank the subcommittee for their hard work.

I want to address the current amendment to eliminate the Market Access Program. This program is vital to the success of our farmers. If this amendment passes, we as a Congress are to blame for handing over U.S. agricultural market share to foreign competitors.

I believe with my whole heart that the American farmers are the most efficient in the world and produce the best products at the lowest prices and provide the safest food of anyone in the world. With this knowledge, I confidently say that given an equal opportunity, American farmers can compete and succeed against agricultural products from any other country.

However, American farmers are not being given this equal opportunity. The United States is outspent by more than 20 to 1 by our foreign competitors, promoting and subsidizing their own products.

In 1997, the leading U.S. competitor spent $924 million to promote their agriculture exports, $100 million of that spent on promotions here in the United States. Conversely, we grant our farmers assistance to the tune of $90 million to help them compete against our competitor’s $924 million.

In conclusion, let me simply say the Market Access Program is a valuable tool we are able to provide our farmers. This tool not only helps them compete abroad, but it also supports thousands of U.S. export jobs, 24,000 in my State of North Carolina alone.

I urge my colleagues to vote in favor of U.S. farmers by voting against this amendment.

Mr. BALDACCI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment that has been offered by my colleague, who intends on eliminating the Market Access Program.

We revisit this issue annually. Reforms have been undertaken. The Foreign Agriculture Service reviews proposals submitted by the agriculture cooperatives and nonprofit organizations. They must provide matching funds. The FAS scrutinizes expenses and the performances. Farmers across the country are suffering from prices having dropped. Export opportunities have been withering, and they are trying to gain a market share in countries around the world. They are competing with odds against them.

Eliminating the cost share assistance of MAP would make that struggle even harder.

As we have eliminated the trade barriers between our country and other countries, we have not required the same relaxation in other countries as our farmers are competing with their hands tied behind their backs, we are trying to help them to search out other markets, other opportunities, beyond their traditional markets. We have tried to do this and we have been successful at it.

The money spent in this program, $90 million, has returned, according to estimates, $12.5 billion trade surplus in agriculture. And when our country has a trade deficit of billions of dollars, this is the only part of our trade and our export that actually has a trade surplus.

The European Union spends more on export promotion for wine than the United States does for all of our agricultural programs combined.

This amendment would impact the small wine producers, those who rely upon Federal export assistance to enter and compete in the global marketplace. Let us be clear. The playing field in the world export market for wines is not level. Unlike Europe and unlike South America, U.S. wine producers receive no production subsidies, no subsidies whatsoever, for their production. Furthermore, our competitors outspend the United States in export subsidies by more than 6 to 1.

Mr. Chairman, small California wineries suffer in such a lopsided marketplace without some marketing assistance. Let there be no mistake, this amendment targets small, family-owned businesses. Eighty-nine percent of the wineries that participate in the Market Access Program are small wineries. Furthermore, the Market Access Program is not a handout. It is a partnership, a partnership between small businesses and the USDA. And it provides funds on a cost-share basis. The European Union export subsidies amounted to approximately $10 billion last year. Mr. Chairman. In fact, the European Union spends more on export promotion for wine than the United States does for all of our agricultural programs combined.
CONGRESSIONAL RECORD—HOUSE

June 8, 1999

We need only look at last year to see this unfair disparity. Market promotion funds for the American wine industry totalled approximately $5 million. The heavily subsidized European wine industry received $1.5 billion. That is $5 million in the United States and $1.5 billion in Europe. The money we spend to increase the markets for American agricultural products is money well spent. Because of assistance from the Market Access Program, U.S. wine exports had their 14th consecutive record-breaking year in 1998, reaching $337 million. This level is $100 million over the year before, which means that each Market Access Program dollar generated a $20 increase in exports.

Just as important, California wines can now be found on the retail shelves of over 184 countries. In the last 10 years, an additional 7,500 full-time jobs and 5,000 part-time jobs have been created by exporting wine. This is not only good for the American balance of trade, it is good for the American economy.

Mr. Chairman, we should help export U.S. products, not U.S. jobs. Oppose this amendment.

Mr. BARRETT of Nebraska. Mr. Chairman, I rise to oppose the Chabot amendment to the Market Access Program (MAP). Unfortunately, some of my colleagues appear not to understand the importance of MAP to our producers.

Two weeks ago, the director of the Nebraska Department of Agriculture was in town to discuss agriculture policy with Members of Congress and the administration. We discussed in general terms all of the options for supporting American producers, and keeping U.S. agriculture competitive in the world market. But there was one thing the director specifically wanted to say, and that was continued funding for the Market Access Program.

Nebraska’s central location and small population base make it difficult for many individual producers to compete internationally. MAP funds help our producers, and the Nebraska Department of Agriculture, to overcome this hurdle by partially funding market service, and trade and research missions to foreign countries. These funds help support and promote the buying, selling, and development of Nebraska agricultural products. In today’s market, this is critical.

Let’s face it, our producers must export in order to survive and prosper. And their productivity is taxed by production from overseas, not U.S. jobs. Oppose this amendment.

Mr. VENTO and Mr. LAZIO changed their vote from “no” to “aye.”

The result of the vote was announced as above recorded. Stated against:

Mr. BUYER. Mr. Chairman, on rollcall No. 174, I was present and voted “no,” but was not recorded, this is my third new voting card. I now have a 4th voting card.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

This Act may be cited as the “Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2000.”

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG OF FLORIDA. Mr. Chairman, I offer an amendment.

The Clerk read as follows: Amendment offered by Mr. Young of Florida:...
At the end of the bill, immediately preceding the short title, insert the following new section:

Sec. 3. Notwithstanding any other provision of this Act, appropriations under this Act for the following agencies and activities are hereby reduced to the following respective amounts:

Agriculture Buildings and Facilities and Rental Payments:

Repairs, Renovation and Construction .......... $0

Cooperative State Research, Education and Extension Service:

Integrated Activities ...... $0

Agri-Housing Research Service:

Buildings and Facilities $0

Rural Housing Service:

Rural Housing Insurance Fund Program Account:

Administrative Expenses $0

Food and Drug Administration:

Salaries and Expenses .... 1,198,384,000

Mr. YOUNG of Florida (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

1800

Mr. YOUNG of Florida. Mr. Chairman, the agriculture bill as we present it was at the 302(b) level, but was over last year’s spending limits. In consultation with many Members on both sides of the aisle, we had some agreement and some disagreement that we would make some adjustments in the total of this bill in order to make additional funding available for some of the other bills that will come along later. So we developed this amendment in lieu of all of the amendments that our friend from Oklahoma had filed in advance of the consideration of the bill.

Mr. Chairman, this bill in its original form is approximately $14 billion new discretionary budget authority. This amendment would reduce that amount by $102,500,000.

We have gone carefully through these accounts. What we are doing in most of these cases is delaying some construction, at least until next year, construction that is not essential to the farm programs that we are all trying to preserve.

By doing this amendment, we are able to guarantee that the money that is going into the system to help our farmers as they are planting and as they are preparing to harvest later in the year, that we help our farmers do what we have to do to help them to stay alive, to keep the family farms and to keep those people who are producing the food for America, to keep them in business.

This amendment, while it is a substantial cut based on the overall amount in the bill, it is not that great. It is merely in most of the cases postponing until next year some of the construction that we would have done originally in this bill. So I would ask the Members to expedite the consideration of this amendment so we can complete this bill and get it into conference.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION AND RELATED AGENCIES

1 Of which $26,000,000 shall be reduced from repairs, renovation, and construction.
2 Of which $10,000,000 shall be reduced from payments to the General Services Administration.

Ms. KAPTUR. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, we had heard on this side that this amendment might be coming, and I want to say to the chairman of our full committee, there is no Member that I would respect more in this House than the gentleman from Florida (Mr. YOUNG). I believe he is a man of integrity who would want to do what is right for America, and especially for rural America, as troubled as it is right now.

We have had an opportunity to review this amendment just for a few moments, and I would have to say overall to the membership that what this amendment does is it cuts an additional $102 million of the funds that are available to the U.S. Department of Agriculture to meet the needs of rural America.

Now, let me say that I oppose the gentleman’s amendment, and I strongly oppose it. I am sorry that I have to do that, because the chairman of the subcommittee and I came out of subcommittee in hopes we could have had the kind of bipartisan unity that has always characterized this bill when it reaches the floor. But I think that I have to oppose the bill today for many reasons.

One of them is that, overall, if you look at the amount of funds that we will spend in our country today to serve the needs of rural America, we are about 33 percent under for the Year 2000 what we will spend this year just to prevent the hemorrhages that are going on from coast to coast, whether it is cattle country in Florida, whether we are talking about grain producers in the Midwest, whether we are talking about cotton ranchers down in Texas or whether we are talking about the Salinas Valley in California. We are talking about a situation that just does not need Band-Aids, but serious repair.

When we brought this bill for the Year 2000 to the floor, as uncomfortable as we were, we felt that, well, okay, so it is a big Band-Aid to get us through, but we know later in the year we are going to have to do more. Now for us to accept an additional $102 million in cuts is beyond what we feel is the right thing to do for America.

This may be, with all due respect to the majority in this House, the right way to get you out of a political box among various warring factions inside the Republican Caucus, but it is not the right thing to do for America.

For example, one of the major areas you cut is under the Agricultural Research Service. I do not know how many of you have ever been out in these Agricultural Research Service buildings. These are not fancy places. I mean, this is where the structures of the building kind of get rusty. These do not look like America’s defense facilities or America’s NASA facilities. Yet, in fact this is where the future of America is being reborn every day because of the general use of research that goes on.

Yet in this cut, what do we do? We are cutting the Beltsville Agricultural Research Center by over $13 million. It affects the State of Maryland. For New York, the Plum Island Animal Disease Center. In Pennsylvania, the Eastern Regional Research Center. In California, both in Albany and in Davis, their research labs. In Illinois, and this one really surprised me, in Peoria, the
National Center for the Agricultural Utilization Research Service.

Now there are additional $10 million in research that is cut from the Cooperative Research Service and our extension programs. When we cut that additional $10 million, that adds to the $3 million that was already cut below last year. It is a net negative of $13 million in those cooperative research accounts below this year.

Research really is the seed corn of the future, and, with what is going on in rural America today, we need every single dime of that research working to invent the new technologies for the future that can help us preserve our food and fiber and fuel production inside the boundaries of this country.

We are very troubled by the additional cuts and the way this has been used in this amendment in the Food and Drug Administration. Here we are talking about the inspection service for food safety. We all know what is going on across this country with added needs for food safety. We have had plenty of outbreaks in everything from cyclosporin to E. coli, everything that has affected citizens across this country. We do not need to cut the salaries and expenses account for the Food and Drug Administration.

I heard ad nauseam in our subcommittee about the need to approve different devices and prescription drugs, that FDA was not moving fast enough, we needed to do more. America was not moving fast enough to meet the commercial marketplace. We had to do more for FDA. Well, this budget does less for FDA.

The CHAIRMAN. The time of the gentleman from Ohio (Ms. KAPTUR) has expired.

Ms. KAPTUR. Mr. Chairman, I would also like to mention that one of the cuts in here relates to the repairs to the South Building along Independence Avenue here, the Agricultural Building, $20 million, a building whose heating and cooling systems dates back to the 1930s, the first major repair as we get ready for the 21st century. We have been waiting and waiting and waiting. This measure actually completely eliminates any construction, real improvements that could occur in that building, one of the relics around this city.

So, Mr. Chairman, I would have to say I know the gentleman is struggling. For those of us on this subcommittee who have worked very hard for many months on this bill, this is an important moment for us.

So I would say to the gentleman from Florida (Mr. YOUNG), I strongly oppose the gentleman in his efforts to remove an additional $102 million from the accounts for the U.S. Department of Agriculture and the Food and Drug Administration, at a time when America is asking us to do more in these areas, and particularly now when rural America is in crisis. This is absolutely not the place to make these cuts.

I would encourage the gentleman to go back and look at some of the other accounts, and would strongly urge the membership to vote no on this Young amendment.

Mr. POMEROY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, back in North Dakota this afternoon there are a number of farmers I represent wondering whether they will even be able to get through until next fall. We have had an unprecedented level of rain. It has destroyed the planting season, on top of the hardship they already faced because prices are below the cost of production. At a time when they have not been able to get for their crop what it costs them to grow the crop, and then on top of that production difficulties that have utterly disrupted their ability to get their crop in.

This is a time of crisis in North Dakota. I would think it is a time of crisis well beyond a provincial concern as a North Dakota Congressman, because I am talking constantly with many Members representing farmers around the country. While your production dimensions may be different than ours, the fundamental is the same: Prices have not covered the cost of production, and that is irrespective of commodity and irrespective of region, and it has given us a crisis in agriculture.

I believe the floor consideration of the agriculture appropriations bill has been an utter travesty. At one point we had more than 100 amendments filed. We were going to do production at a time when they have not been able to get for their crop what it costs them to grow the crop, and then on top of that production difficulties that have utterly disrupted their ability to get the crop in.

This is a time of crisis in North Dakota. Mr. STRICKLAND and Ms. KIL-PATRICK changed their vote from "aye" to "no." Ms. KELLY and Messrs. LIPINSKI, DELAHUNT, TIERNEY, DELAHUNT, and SWEENEY changed their vote from "no" to "aye." So the amendment was agreed to.

The result of the vote was announced as above recorded.

Stated against:

Ms. McCARTHY of Missouri. Mr. Chairman, on rollcall No. 175, I was unavoidably detained. Had I been present, I would have voted "no."

Mr. HOYER. Mr. Chairman, I move to strike the last word.

Now, I understand, and the Republican Conference met, and they have had trouble passing this bill, and they had a discussion. I do not know what went on. I was not in the conference. Apparen-ently there was a determination, well, we will cut some programs from the bill. We will cut some items from the bill, $102.5 million. These items were cut after going through the sub-committee and full committee.

My belief is that they were not cut substantively, that is to say, I do not believe for one second that a sub-stantive judgment was made with reference to the merits of these particular projects. In my opinion, these cuts were made essentially as somewhat an across-the-board cut in order to get the requisite number of votes to pass this bill on the Republican side of the aisle.

Now, when we were in charge, I op-posed those kinds of amendments, and I oppose them when we are not in charge.

My colleagues will not be surprised to the fact that one of the projects cut was mine. Now, it was not mine personally, it was a lab facility, the Beltsville Agricultural Research Center, which this Nation has created. It happens to be located in my district. But it is America's research facility, and it is the best research facility in the world.

Every farmer, not just in America, but throughout the world relies on the research that that institution has produced. In fact, productivity at every farm in America and every farm in the world that uses our technology is very substantially up because of the product of the Beltsville Agricultural Research Center.

I was not singled out. Feoria, Illinois, had a project, the gentleman from Illi-nois (Mr. LAHOOD) took a hit. Others took a hit. So I do not perceive this to have been a partisan hit. I do not ascribe my colleagues' motives as partisan. I ascribe them to needing to get votes.

But I suggest to my colleagues, and I suggest to my colleagues on the other side, my side of the aisle, this is not the way to legislate. This is not the way to make critical judgments on the priorities of America.

Now, one of my colleague's Members had a lot of amendments, and he was going to offer hundreds perhaps until next week, and perhaps this got him on board. It appears that it did. He is not offering amendments anymore.

Mr. MCARTHUR of Missouri. Mr. Chairman, I move, in opposition to the passage of this bill. I regret doing so, and I intended to support it. The comity in this body requires, I think, that we give notice to one another of actions that are being taken.

Now, I understand, and the Republican Conference met, and they have had trouble passing this bill, and they had a discussion. I do not know what went on. I was not in the conference. Apparen-ently there was a determination, well, we will cut some programs from the bill. We will cut some items from the bill, $102.5 million. These items were cut after going through the sub-committee and full committee.

My belief is that they were not cut substantively, that is to say, I do not believe for one second that a sub-stantive judgment was made with reference to the merits of these particular projects. In my opinion, these cuts were made essentially as somewhat an across-the-board cut in order to get the requisite number of votes to pass this bill on the Republican side of the aisle.

But I suggest to my colleagues, and I suggest to my colleagues on the other side, my side of the aisle, this is not the way to legislate. This is not the way to make critical judgments on the priorities of America.
$102 million. It takes $10 million in rental payments from FDA and says, we will not pay it.

My colleagues just passed a bankruptcy act that said something about personal responsibility, about paying one's bills. But in the amendment for which my colleagues just voted, they said, but one does not have to pay one's rent, do not worry about it. So that when GSA goes to refurbish or maintain or build new facilities, there will not be any money in the pot.

Why? Because we did not pay our rent. Guess what? It is free. It is supply side maintenance and building of capital assets. That is what this amendment does that my colleagues voted for.

I would hope that my colleagues would vote against this bill. I would hope that, if it allows the Northeast Dairy Compact to operate. If my colleagues want to cut, if the majority will is to cut, then let us do so in a rational, considered way, not by this, it was not midnight, but I had no notice of it, and I suggest that perhaps most Members did not have notice of it. I urge a "no" vote on this legislation.

Mr. RYAN of Wisconsin. Mr. Chairman, I have watched the debate over agriculture appropriations for the past two days. Farmers are the backbone of my state. The economy of Wisconsin is based on agriculture—if our farmers suffer, the economy of our entire state suffers. These issues are vital to the people of the district I serve; however, no issue in agriculture is as vital to the farmers of Wisconsin as the reform of the dairy market order system.

This country, one of the most technologically advanced countries in the world, continues, at the behest of Congress, to force an antiquated system of price-fixing in the dairy industry, one that is artificially advanced. This system needs to be reformed because it unfairly penalizes the Midwest dairy farmers and it hurts consumers and taxpayers. They are being asked to subsidize inefficiencies in the production of dairy products. They are being asked to pay for a program that continues to waste their tax dollars. They are being asked to pay higher prices at the supermarket for food.

We are no longer giving farmers in certain areas of the country an incentive to produce more milk. We are now giving them an incentive to overproduce milk. This type of system does not provide an incentive for farmers to operate efficiently or to produce items that are natural to their agricultural environment. How can we vote against a system that encourages the market to operate more efficiently?

If this House forces its will on the USDA, you will be silencing the voices of millions of farmers around the country who have been heard on this issue by USDA and deserve the right to vote on this reform. This reform must be supported by 2/3 of the farmers in a region before it can be implemented in that region.

The USDA estimates that the reform will result in a loss of production for farmers in some districts of approximately $0.02 per hundredweight.

This system needs to be reformed because it unfairly penalizes the Midwest dairy farmers and it hurts consumers and taxpayers. They are being asked to subsidize inefficiencies in the production of dairy products. They are being asked to pay for a program that continues to waste their tax dollars. They are being asked to pay higher prices at the supermarket for food.

We are no longer giving farmers in certain areas of the country an incentive to produce more milk. We are now giving them an incentive to overproduce milk. This type of system does not provide an incentive for farmers to operate efficiently or to produce items that are natural to their agricultural environment. How can we vote against a system that encourages the market to operate more efficiently?

If this House forces its will on the USDA, you will be silencing the voices of millions of farmers around the country who have been heard on this issue by USDA and deserve the right to vote on this reform. This reform must be supported by 2/3 of the farmers in a region before it can be implemented in that region.

The USDA estimates that the reform will result in a loss of production for farmers in some districts of approximately $0.02 per hundredweight.

Mr. ROYBAL-ALLARD. Mr. Chairman, I rise in reluctant opposition to H.R. 1906, the Agriculture Appropriations Bill for fiscal year 2000. It had been my intention to support H.R. 1906 because it contains many worthy programs that are of benefit not just to our farmers, but to all Americans. However, in a last-minute play, the Republican leadership decided to make deep cuts to this bill that call into question their commitment to both American farmers and American consumers who rely on adequate funding for these programs. Those cuts included important agricultural construction projects in California, including improvements to the Agricultural Research Service’s Western Regional Research Center at Albany and the University of California Human Nutrition Laboratory at Davis. These projects are supported by the Department of Agriculture, they were in the President’s budget request, and there was no opposition to including the necessary construction funds prior to today. I am very disappointed that the Republican leadership has chosen to pull the rug out from under these projects that are so critical.

H.R. 1906, as reported by the Appropriations Committee, was not a perfect bill, but I believe Chairman Joe SKEE and Ranking Member MARC JAPSTUR and their subcommittee members did a commendable job under tough budget constraints to fund the many deserving programs in this bill. The last-minute amendment offered by Rep. BILL JUNG to apease the right wing of his party works against that spirit of bipartisanship.

This bill’s scope, the so-called “agriculture” appropriations bill, is sweeping, from agriculture research, rural development and land conservation programs to food safety and operations of the Food and Drug Administration. Administration of our farm programs and marketing of our agricultural commodities is also included. The nutrition programs in this funding goes for nutrition programs, including food stamps, school breakfast and lunch, and the Special Supplemental Nutrition Program for Women, Infants and Children or WIC.

I’m particularly grateful to the committee for adding funding within the extension activities of the Cooperative State Research Education and Extension Service for an after-school program in Los Angeles. Our 4-H after school activity program is operating at 21 sites, and over 4,000 kids are participating in educational field trips, getting homework assistance and receiving other types of mentoring. This program is a wonderful antidote to the drug and gang activity to which many of the kids in my district are susceptible. I very much appreciate this one-time infusion of funding so we can sustain the program and establish a long-term partnership between the government and businesses in our community.

I am also grateful that the bill contains an increase of $5 million for farm labor housing in the Rural Cooperative Service and $9 million for the farm safety mission, which can also be used for non-profit organizations of farm workers. Migrant and seasonal farm workers are some of the nation’s most poorly housed populations. The last documented national study indicated a shortage of some 800,000 units of affordable housing for farm workers. However, farmworker households are some of the poorest, yet least assisted households in the nation. So, the need for housing is great, and the committee has responded, within its overall budget constraints, to make some needed progress in this area.

This bill, as reported by the Appropriations Committee, was neither perfect nor comprehensive, but it does contain many deserving programs in this bill. It will benefit many of my constituents and people of all ages across the United States. However, I share the concern that has been expressed about adequate funding for the WIC program. Prior studies have demonstrated that for every $1 spent on the WIC program, up to $3 is saved in costs to Medicaid and other federal programs. That easily makes WIC one of the most cost-effective programs administered by the federal government. Although the committee increased funding by $71 million over last year, the amount provided is $100 million less than the President’s budget request.

WIC serves 1.2 million Californians, and we are making enormous strides in using the funds to serve all the mothers and children in
Mr. MALONEY of Connecticut. Mr. Chairman, I rise in support of the Food Contact No-tification (FCN) program. The FCN program was authorized in the Food and Drug Adminis-tration Modernization Act of 1997, and received start-up funding in FY 1999. However, FY 2000 Agriculture Appropriations does not provide additional money. Without a funding source, either in the FY 2000 Agriculture Appropriations or through user fees, this program will not be implemented.

By reducing a significant regulatory burden, the FCN reforms expedite the approval of food contact substances, like plastic, paper and aluminum used in food packaging. Under this new streamlined regulatory system, it would be possible for safe food-contact materials to be marketed after only 120 days of filing notification with the FDA—shortening the current process from as much as six years to only a few months. Both consumers and manufacturers would benefit by the availability of better products in a more timely manner.

In fact, during the FY 2000 Agriculture Appropriations hearing the Committee recognized the value of the FCN program. Despite that endorsement, I am concerned that both the Committee and the Administration are relying on the future authorization of user fees to fund the FCN program. Yet to date, no fee authorization bill has been introduced, much less discussed in any detail. Without either an appropriation or a user fee authorization, the FCN program will not be implemented, and important progress in food packaging will be delayed.

It will be unfortunate if this innovative new program was unintentionally thwarted. For that reason, I urge the Chairman and Ranking Member to assure that at least the authorized level of funding be made available in the event that a fee system cannot be enacted in time for FY 2000.

The CHAIRMAN. There being no further amendments, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. LAHOOD) having assumed the chair, Mr. PEASE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1906) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for the fiscal year ending September 30, 2000, and for other purposes, pursuant to House Resolution 185, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is there a separate vote demanded on any amendment? If not, the Chair will put them on.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.
chairman of the subcommittee on the majority side wants to double spending for the National Institutes of Health over the next 5 years. That is a lot of ‘blago.’

But no matter how much we put into research, if we contribute to bottle-necks at FDA, we are delaying the day when new life-saving drugs will reach the marketplace; life-saving drugs that deal with cancer, that deal with Parkinson’s Disease, that deal with every other disease known to man.

I would urge my colleagues when they cast their votes tonight on this amendment to vote on substance, not politics; vote to restore this badly needed $21 million. That is the least we can do to correct some of the damage just done by the previous amendment.

Ms. KAPTUR. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Speaker, I would just say to the gentleman that this particular Member is going to support the amendment to recommit and then will end the evening by voting against the bill, which I apologize to the subcommittee chair and to the full committee chair. It was not my intention as a loyal member, having gone through on our obligation.

Mr. YOUNG of Florida. Mr. Speaker, we all popped the champagne corks and celebrated just done by the previous amendment.

Mr. OBEY. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 207, noes 220, not voting 8, as follows:

Mr. CAMP changed his vote from “aye” to “no.”

Mr. DOYLE and Mr. McINTYRE changed their vote from “no” to “aye.” So the motion to reconsider was rejected.

The result of the vote was announced as above recorded.

Stated against:
Mr. MICA. Mr. Speaker on rollcall No. 176, I was unavoidably detained. Had I been present, I would have voted “no.”

The SPEAKER pro tempore (Mr. LAHOD). The question is on the passage of the bill. Pursuant to clause 10 of rule XX, the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 246, nays 183, not voting 6. [Roll No. 177]

1907

Mr. SHAYS changed his vote from “yea” to “nay.”

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. SHIMKUS). Under the Speaker’s announced policy of January 6, 1999, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

MY TRIBUTE TO DR. HOWARD CAREY: A GOOD NEIGHBOR

The SPEAKER pro tempore. Under a previous order of the House, the question is on the passage of the bill.

Pursuant to clause 10 of rule XX, the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 246, nays 183, not voting 6. [Roll No. 177]
centers, health services for the mentally ill and elderly, and a senior citizen service center.

Dr. Carey’s motto, “being a good neighbor,” is emulated by the extended families of employees at Neighborhood House and reaches from the Mexican border to the northern reaches of San Diego County. His legacy is one of excellence. A professional in the best sense of this word, he is a man of honor, strength and determination. He is dedicated to service and to making life better for his neighbors who are in need.

Dr. Carey is a native of Lexington, Mississippi, a graduate of Atlanta’s Morehouse College, and holds graduate degrees from Atlanta University and United States International University. He became enchanted with San Diego during his 4 years of military service with the United States Navy and returned with his wife, the former Yvonne Arnold of Newman, Georgia, a graduate of Spelman College. Dr. Carey and his wife are the parents of two adult children who are themselves graduates of Spelman College. One would think that his service to the community through his work at the Neighborhood House would fill his days entirely but Dr. Carey’s service extends beyond the neighborhood. As impressive as this list is, it does not do justice to Dr. Carey. It is his passion for service that leads him into these activities. He knows that extraordinary measures are sometimes needed to strengthen communities and families, and he is always willing to go that extra mile. Because Dr. Carey and the work of Neighborhood House reach deep into the hearts and minds of his neighbors and changes lives, his contributions to our community are far-reaching, long-lasting and immeasurable. I sincerely appreciate this opportunity to honor Dr. Carey and his many contributions to San Diego during the past 3 decades.

ANNOUNCEMENT REGARDING AMENDMENT PROCESS FOR H.R. 1501, ADDRESSING YOUTH VIOLENCE AND CHILDREN’S SAFETY; AND H.R. 1000, AVIATION INVESTMENT AND REFORM ACT FOR THE 21ST CENTURY

Mr. BIEGEL. Mr. Speaker, the Committee on Rules is planning to meet the week of June 14 to grant a rule which may limit the amendment process for floor consideration of H.R. 1501, a bill addressing youth violence and children’s safety. Any Member wishing to offer an amendment should submit 55 copies and a brief explanation of the amendment to the Committee on Rules in Room H–312 in the Capitol by noon this Friday, June 11. Amendments should be drafted to H.R. 1501 as introduced. Members should know that the Committee on Rules may consider amendments relating to the causes of and solutions to youth violence and certain firearms proposals.

Mr. Speaker, the Committee on Rules is also planning to meet the week of June 14 to grant a rule which may limit the amendment process on H.R. 1000, the Aviation Investment Reform Act for the 21st century, the so-called Air 21 bill. Any Member who wishes to offer an amendment should submit, again, 55 copies and a brief explanation of the amendment by noon this coming Monday, June 14, to the Committee on Rules. Once again, upstairs in Room 312 here in the Capitol, the amendments should be drafted to the text of the bill as reported by the Committee on Transportation and Infrastructure on May 27. The committee filed this report on H.R. 1000 on May 28. Members should use the Office of Legislative Counsel and their amendments be properly drafted and should check with the Office of the Parliamentarian to be certain their amendments comply with the rules of the House.
think that this is a small price for the States to pay for the safety of their citizens.

The railroads often argue that the 4.3 cent per gallon tax is unfair, that they maintain their own infrastructure unlike the trucking industry. But I think it even more unfair that the taxes go to deficit reduction instead of a program that benefits the railroads and public safety. That is what RSAFE does. It puts railroad money back into the railroads for the benefit of the public.

In addition, after 5 years of increased investment in grade crossing safety, RSAFE repeals the 4.3-cent diesel tax on October 1, 2004. Hopefully, Congress will continue the higher funding for the Section 130 program in the next highway and transportation reauthorization bill. Until then, we may face a day that the tax goes towards deficit reduction is a day that statistics tell us someone will die at a railroad crossing. In 1998, 428 people died from a incident at a grade crossing, 30 of whom died in my home State of Illinois. Clearly, 428 deaths in 1 year is unacceptable.

So I say to my colleagues and to those in the railroad community: Please work with Congressman Cramer and me to pass this legislation. Those in the railroad community: Please work with Congressman Cramer and me to pass this legislation.

CHINA HAS YET TO EARN PREFERENTIAL TRADE STATUS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. BROWN) is recognized for 5 minutes.

Mr. BROWN of Ohio. Mr. Speaker, 10 years ago this week China's Communist dictatorship sent its tanks and armored carriers crashing through the pro-democracy protests in Tiananmen Square in Beijing. Hundreds of innocent protesters were crushed to death, hundreds more were mowed down by machine guns, hundreds more were arrested and executed.

The men and women who lost their lives in Beijing and the ones who remain jailed are the heirs to the legacy of the nation which the United States, the nation which the United States, the nation which the United States...

CONGRESSIONAL RECORD—HOUSE

June 8, 1999
1890 institutions in assisting small farmers. It should concern all of us that of the 1,200 Ph.D. degrees recently awarded to Afro-Americans, to pursue graduate-level education in agriculture.

The 1890 institutions could use additional support in their research and extension efforts. This additional support is especially needed to strengthen the level of performance and the productivity and the research and extension of the 1890 institutions.

A modest increase of not less than 5 percent in formula funding for existing 1890 programs would go a very long way in helping minority farmers and small farmers. Additional funding resources for facility funding and extending such funding to institutional facilities is but another prudent resource that would be a wise investment that will produce immeasurable returns for small farmers.

We must also work with the administration to produce either legislation or regulations that assures continuation of the Federal support when a State fails to provide the matching dollars for the land grant institutions. Many of the programs Congress intends to make available are not available to these institutions because the State matching funds are not often provided.

Finally, given the state of affairs of small farmers, especially socially disadvantaged farmers, a special appropriation of not less than $10 million over the next several years should be targeted, and we should consider this now as we are considering the agriculture appropriation for the next few years. Targeting to reduce the rapid decline of these farmers will be a meaningful investment if we are to stop the erosion and the demise of small farmers.

Mr. Speaker, there can be no doubt that small farmers and ranchers are struggling to survive in America. In fact, small farmers and ranchers are a dying breed. Indeed, in my home State of North Carolina, there has been a 64 percent decline in minority farmers and just over the last 15 years, from 6,996 farms in 1978 to 2,498 farms in 1992. All farmers, all farmers, are suffering under the severe economic downturn we are now facing, but particularly small and disadvantaged farmers are facing severely.

Mr. Speaker, I commend the gentlwoman from Ohio (Ms. KAPTUR) and the gentleman from New Mexico (Mr. SKEEN) for their sensitivity to the needs of socially disadvantaged farmers, but there is very much more we need to do. I hope Congress will be committed to do that in the coming years.

THE PROBLEM OF DRUG ABUSE IN AMERICA

The SPEAKER pro tempore (Mr. SHIMkus), Under the Speaker's announcement of the absence of the Speaker, the gentleman from Florida (Mr. MICA) is recognized for 60 minutes as the designee of the majority leader.

Mr. MICA. Mr. Speaker, I come to the floor again tonight to talk about the problem of drug abuse in our Nation and the tremendous toll that illegal narcotics have taken across our great land.

It is getting so that almost every family, certainly every community across the United States, can today claim that they are victimized by illegal narcotics trafficking in their communities and their schools, among their family members. The statistics are really mind-boggling and do not need to be read in today's newspaper, Mr. Speaker, but indeed they are dramatic.

Last year, over 14,000 Americans died in drug-related deaths. That is only the tip of the iceberg, because now we find that many thousands more that were killed in other accidents and suicides and other causes of death are not counted in that toll. In fact, the figure is much, much higher.

I said before on the floor of the House when we had the terrible tragedy at Columbine with a number of students and faculty who were killed in that tragedy, that we have multiple Columbines across our Nation every day. They are sometimes in the silent but violent deaths of our young people through the use of illegal narcotics.

Today heroin has become the drug of choice, and it is destroying lives by the thousands. I come from Central Florida and represent the area from Orlando to Daytona Beach, a relatively peaceful area. But Central Florida now has had such an epidemic, particularly among our young people, of deaths from illegal drugs and overdoses, that a recent headline in the Orlando Sentinel said that illegal drug overdoses now exceed homicides in Central Florida. That is how severe the problem is in my district.

That is one reason why I chose to accept the Speaker's appointment as chairman of the Subcommittee on Criminal Justice Drug Policy and Human Resources. I had the great privilege and opportunity to serve in the last Congress with the gentleman from Illinois (Mr. HASTERT), someone who folks are just learning more about, who is the Speaker in the House of Representatives.

When the gentleman from Illinois (Mr. HASTERT), the gentleman I refer to, served as chairman of the Subcommittee on Criminal Justice and International Affairs, I served with him and at his side. I had the privilege of watching the gentleman from Illinois (Mr. HASTERT) bring together a consensus in this Congress and in the House of Representatives that we are at a pre-start and that we must remember, and I will detail that in just a few minutes, that the war on drugs basically stopped with the election of this President and his taking office in 1993. I will talk more about that in a minute.

But, again, someone who restarted our national effort now leads the House of Representatives, and I am very proud to have served with him in that effort during the past several years as the new majority chairman here in the House of Representatives.

The record of death and destruction across our land we were very much aware of when we took control of the House of Representatives and we saw the change from the Reagan and Bush administration, where we saw a decline year after year in drug use and drug deaths across the Nation. What should be astounding is that since we really have had new policies and a new administration, that the figures began to really go off of the charts. In fact, I brought a chart tonight to illustrate the problem that we had.

Remember what I said just a minute ago. If you look at this chart for a minute you will see these different lines of drug use illustrated in color. You see that drug use was on the decline. This shows that from 1989 on down to the 1992-93 period here, where the Reagan-Bush administration ended their efforts, the "just say no" campaign, the eradication, the enforcement efforts stopped, and a policy of working primarily on treatment, treating the wounded in this battle began. We saw the increases in drug use that these colored lines represent in almost every area.

Only in the last 2 years, again under the leadership of Speaker HASTERT as we have we are now seeing the figures off, but we still see incredible figures, particularly among our young people in illegal narcotics usage.

Let me give you one figure. Since 1993, again when this administration took control, changed the policy, the figure is this; that we have had an 87 percent increase in heroin usage by our teens. I think if we looked at the charts we would see a dramatic increase in the deaths of our teens. If we look at those more than 14,000 deaths I cited, many of them are among our young people who are now being victimized by very potent illegal hard narcotics that are coming in in an unprecedented stream.

The cost of this whole drug debacle is immense to this country and to the Congress. Right now we are working in our subcommittee to try to coordinate the expenditures of $17.9 billion directly into the war on drugs. That is only the tip of the iceberg, because we spend around a quarter of a trillion dollars in a year. When you take in incarceration, the cost of our judicial
system, the social cost, welfare for these drug victims and narcotics users leave a trail of social disruption that is unbelievable, not to mention the pain to their loved ones and families.

So that is a little bit of the direct toll and cost in dollars and in lives, and, as I said in Central Florida we have had just a dramatic increase in deaths, particularly among our young people.

In our prisons across this land we have almost 2 million incarcerated citizens and other individuals there. Seventy percent of them are there because of drug-related offenses. Our U.S. Attorneys tell us that statistics, our Federal Marshals, our DEA agents, and even in conducting hearings in my local community, our local sheriffs told us that 60 to 70 percent of those individuals behind bars at public expense are there because of drug-related offenses.

So if we look at the crime in this country, we can directly relate it, 60 to 70 percent of it, to illegal narcotics.

One of the interesting myths of this whole drug problem is that people behind bars are there for casual use or for possession, and that is simply not the case. I just reviewed a report from the Commissioner for Crime and Enforcement in the State of New York, and they had a very revealing report which in fact indicated that very few individuals are there for mere possession. Almost all the individuals in that State prison system that are there because of drug-related offenses are there because they were selling substantial quantities, participating in the act of a felony, when they were under the influence of illegal narcotics. So many of the crimes are not victimless. Most of them have victims and are felonies and serious offenses against our community.

So we have an incredible problem, but we have also incarcerated almost 2 million Americans at great cost to the taxpayers because of this problem.

Let me say that, again, the war on illegal narcotics, the war on drugs, died in 1993 with the election of this President and with a majority on the Democrat side that controlled both the House of Representatives, the other body, and the White House from 1993 to 1995.

Sometimes people come to me and say the war on drugs is a failure. I say, yes, the war on drugs is a failure because it died. It not only died, it was killed in 1993. In fact, what this administration did was dealt a death blow to the real effort started under the Reagan administration.

I know because back in the early eighties I worked with Senator Hawkins from Florida when we had a cocaine problem and a drug problem. Under her leadership and under the leadership of the Reagan administration, they began a series of legislative initiatives to stop drugs at their source and eradication of illegal narcotics. They did it by stopping drugs as they came from their source, to involve the military and the Coast Guard and other resources in getting drugs before they got to our border, stopping drugs at our border, and then tough enforcement across the land.

We know that works. The statistics prove that that works. Unfortunately, this administration abandoned those policies in 1993. In 1993, and these are facts, this is not partisan rhetoric, but the other side with Democrat control in the White House and the Congress, they stopped many of the eradication programs, the source country problems.

I will tell the Members, if they want to have the most effective way to stop hard drugs at their source, they have source country eradication programs, where we have those countries become involved in alternative crop production, where we have tough enforcement and eradication of the growth of illegal narcotics. Again, at their source is most cost-effective. There is no question about it.

This administration, the Democratic-controlled Congress, killed those programs in 1993, or severely crippled them. What happened is we saw more and more production.

In 1993, the administration took the first steps towards really cutting the military, not just as we see today and we are trying to make up for, and the many deployments in Kosovo, in Bosnia, on and on, military exercises. But they basically, under the guidance of President Clinton, took the military out of the war on drugs and really changed their mission. It was not their mission to stop drugs; they were not there to stop the drugs at their source; again, stopping the source, eradication programs, country programs, and then stopping the military involvement, then also cutting the Coast Guard dramatically.

The President led the effort to cut the Coast Guard. That particularly affected my district and the State of Florida, because we had a rush of heroin and cocaine come through Puerto Rico, and Puerto Rico is really guarded. It has a coast all the way around, and it is guarded by the Coast Guard.

The cuts in the Coast Guard dramatically increased the flow of heroin and cocaine and other illegal drugs into Puerto Rico, which is of course part of the United States, and the entry-way. And with no protection, those drugs started coming back into Florida in incredible quantities. The deaths we see in central Florida and throughout the State of Florida, again exceeding homicide, are drug-related, and those drugs we can trace coming through that trail.

Then of course the President made a horrible decision in appointing Jocelyn Elders, the infamous now fortunately ex-Surgeon General who said, just say maybe. When we have a mixed message and say maybe, I think that's what he's doing. Then we have a mixed message coming from the chief health officer of the United States to our young people, our young people are not dumb, they pick this up. They get the message that maybe, just maybe, or if I do it to do it again, I would inhale; or kids, do it if it feels good.

That message went across this land. Fortunately, that Surgeon General has been replaced, and we do not have a Nancy Reagan or leadership at the national level really to bring this message of "just say no" and what drugs can do to our young people.

Those direct actions, and again, this is not political rhetoric but those factual and the death and destruction resulted in, again, this chart we see and the dramatic rise of young 12th grade use here we see by this chart, but also in drugs by numerous strata of young people; again, not just in 12th graders.

That is what we are suffering from today.

Stopping illegal narcotics, hard narcotics coming into this country is not a rocket scientist’s venture, really. It requires a simple review of where narcotics are coming from. Let me get another chart up here, if I may.

We know where illegal drugs are coming from. This is very interesting because DEA has produced this chart, and this chart is 1997 heroin signature program results. This is an interesting program because technology is so amazing. Just like we can trace DNA to individual human beings, we can trace and DEA can trace through their labs in this case heroin, and they can tell almost the field that it came from and certainly what country of origin, or where it came from.

This little pie chart shows that 75 percent of the heroin came from South America in 1997. We know that from sampling seizures across the land. We know that 6 percent came from Southeast Asia; I am sorry, 5 percent from Southeast Asia, 6 percent from southwest Asia, and 14 percent from Mexico.

This is a very interesting chart because it tells us where the source of most of the death and destruction to my communities and many communities across the land is coming from. That is heroin, 1997.

Let me tell the Members an absolutely startling statistic. If we took this chart back to 1993 or 1992, there was almost zero heroin coming from South America, almost none in South America 6 years ago, at the beginning of this administration. How did we get 75 percent of the heroin coming into the United States in 6 years? It is simple. It is through the policy of this administration. This administration for 6 years blocked any aid or assistance to the country of Columbia in the way of...
June 8, 1999

CONGRESSIONAL RECORD—HOUSE

11985

helicopters, in the way of eradication equipment, in the way of ammunition, in the way of resources to stop cocaine and heroin production.

Here we are talking about heroin. Again, it would be almost zero at the beginning of the Clinton administration, and it is 75 percent now coming from South America, and almost 90 percent of that is coming from Colombia. Six years ago there was almost none. So their policy, their direct policy has resulted in these startling figures.

Mexico, which on this pie chart accounts for 14 percent, was also way down on the bottom. It was in single digits as far as Mexican heroin coming into the United States. In 6 years they have managed to make Mexico not only a trafficker and conduit and transit country, but also Mexico a producing country rather than stopping it.

Repeatedly this administration has certified Mexico as cooperating in the war on drugs. As required by Federal law, the President must certify whether this country is cooperating, any country is cooperating to stop the production and transiting of illegal narcotics. Certainly Members can see that production is up by this chart. Again, we would be in single digits in the early 1990s, and almost no heroin coming from that area.

What is absolutely startling, and this chart does not show it, and this is just an unbelievable statistic, but 6 years ago there was almost no coca, no base for cocaine produced in Colombia, almost none. In 6 years, again the policy of this administration stopping aid, stopping resources, stopping equipment in the war on drugs from going to Colombia, this is now the number one producer of cocaine in the world. So we have heroin and poppies growing in unprecedented amounts, heroin coming in in unbelievable quantities in these sources from Colombia. Most of this, again, is due to the policy of this administration.

I do want to say that there is some hope on the horizon. Through the efforts of the gentleman from New York (Chairman Gilman), who chairs the Committee on International Relations, through the efforts of the full committee on which I serve, the Committee on Government Reform and Oversight, the gentleman from Indiana (Chairman Burton) and so many others, the gentleman from Florida (Mr. McCollum), we have repeatedly requested, we have repeatedly helped appropriate, and again, through the tremendous leadership of the gentleman from Illinois (Mr. Hastert), who now presides over the House of Representatives, we have succeeded in getting the first equipment to Colombia.

I participated with several of the committee chairmen recently in a ceremony at the Sikorsky Helicopter Division, where the Black Hawks are produced in Connecticut, in a contract and delivery ceremony. Soon those helicopters that will be able to get to the high altitudes to eradicate, to go after the drug traffickers at their source, will be there. We will see a dramatic decrease in the amount of heroin, the amount of cocaine coming into this country; a small amount of money, a great amount of results, stopping drugs where they are grown, where they are produced, and interdicting those illegal narcotics as they come from that source, not when they are on our streets, when it is the most difficult to get those.

What I need to do tonight, Mr. Speaker, is show Members and the American people how we got into this situation. It is a direct policy of this administration and the Congress that was controlled by the other side.

I wanted to also talk about the other primary source of illegal narcotics. In addition to the source country now being a drug producer, through the policy I described, this chart shows Mexico’s statistical tables and it shows opium seizures, cocaine seizures. I believe the dark blue here shows the opium seizures for 1997. The red, the first column is opium seizures, down in 1998. The second is cocaine seizures, down in 1998.

The next is the production. The red shows the yield in 1998 is up. Here is Mexico, our close ally that the United States and this Congress and this House of Representatives have done incredible deeds to assist. In financial trouble we have backed them and actually given them financial stability. In trade we have given them benefits as far as assistance. NAFTA, we gave them almost an open commercial border. We have lost thousands of American jobs to give to lower-paying Mexico jobs.

We have done everything as a good ally, and what have they done? The law requires under certification that the President must certify a country as cooperating in helping to eliminate both the production and the trafficking of illegal narcotics. This administration, this president recommended to this Congress, and we have pending before us a recommendation, to certify Mexico.

From 1997 to 1998, last year there were less seizures of heroin, there were less seizures of cocaine, actually reduced seizures in the country, and more production of illegal narcotics; in this case, heroin.

I showed my colleagues the other chart that showed how production has risen again repeatedly over the past 6 years, and it was in single digits. So this was the result of what we get from Mexico.

Let me talk a little bit about Mexico, which is the source of 60 percent of the illegal narcotics coming into the United States. We know that DEA, our Drug Enforcement Agency, has confirmed that. The hard narcotics, the heroin, the cocaine, the methamphetamine are coming in unbelievable quantities through our Mexican border.

Now this Congress has, under the leadership of the gentleman from Illinois (Mr. Hastert), who brought to the floor several years ago a resolution asking Mexico to take certain actions. It has been now over 2 years ago that we asked Mexico to take those actions, again, the source of 60 percent of the hard drugs, the death, the destruction, those 2 million people that are behind our bars in our prisons. We asked Mexico to help us.

What did we ask for? We asked Mexico, first, to extradite to the United States Mexican nationals who are major drug traffickers, send them to the United States for prosecution. We have indicted them. We have requested their extradition. They are guilty of drug trafficking. We have requested they be extradited to the United States Mexican nationals who are major drug traffickers, send them to the United States for prosecution. We have indicted them. We have requested their extradition. They are guilty of drug trafficking. We have requested they be extradited to the United States, to bring them to justice. The biggest thing drug dealers fear in the world is being brought to justice in the United States, because they will pay a penalty for their crime here.

To date, the Mexicans have not extradited the first Mexican national. Only after coming to the floor of the House repeatedly, only just before Memorial Day when I, the gentleman from Ohio (Mr. Gillmor), and other leaders on the issue introduced a drug kingpin bill that will tie up the assets of these drug dealers did we start to see any action.

To my colleagues, do you know what the Mexican Government did? They extradited in the last week one U.S. national who was on our list, one U.S. national, but to date, not one Mexican national. What did we ask for? We have requested over 40 major Mexican national drug dealers to be extradited. Instead, what they did with the Masquez brothers, who are the kings of methamphetamine production and trafficking into the United States.

So until we got tough just before Memorial Day, they kicked sand in our face, allowing the kingpins not to be extradited. Fortunately, the brothers are still held in prison there.

But we will not give up till these 40 Mexican nationals, whom we know are involved, who have been indicted in the United States, on whom we have a reasonable basis to proceed, 6, 7 years, are brought to justice.

So we asked for extradition, and what did we get? Nothing to date. Zero,
Finally, signing a maritime agreement: We know if it is not coming over land, it is coming over water. The Mexican Government, who have not signed a maritime agreement. They refused to sign a maritime agreement, to my knowledge, in the Caribbean, in Central, South America. Only one other country, Haiti, which is still in total disruption, even after we spent 3-plus billion taxpayer dollars to improve their legislative, judicial, and law enforcement system, they have not been able to have their parliament meet and sign a maritime agreement or confirm one. But the Mexican Government still has refused to sign a maritime agreement with the United States.

So here we are again, you know, with the situation. After the introduction of the bill that I described, major drug trafficking flights after the assets of these drug traffickers, we got a little attention of the administration. The Secretary of State, Mrs. Albright, was to go to Mexico. She was diverted to Kosovo.

I believe that the Attorney General to Mexico over the weekend. We also, I believe, had our Drug Czar, who is doing the best job he can, General McCaffrey, under very difficult circumstances. Hopefully, in this high-level working group with the Attorney General, with other officials from Mexico, some additional progress will be made.

But I can assure my colleagues in this Congress this House of Representatives will not sit idle until they begin an honest effort for enforcement, interdiction, cooperation on the agenda, items that are over 2 years old. So some action hopefully was taken this weekend. We do not know; it is not public yet. But we will continue to pressurize the Mexicans. It is the source of so much of the illegal narcotics coming into the United States.

We also know that in order to get from Peru and Bolivia and Colombia, where 100 percent of the cocaine and coca is produced now and where 75 percent of the heroin comes from Colombia, we know that it must transit again by land either through Panama, through the isthmus, and those Central American countries, and/or through Mexico to get to the United States. Now, what is the policy of this administration relating to stopping drugs in Panama? This is an absolutely unbelievable scenario. What was started under the Carter administration to give away the Panama Canal and 10 billion American dollars in assets, 5,500 buildings is being sewn up into a neat package by the Clinton administration and given to the Panamanians, and at the same time, we have made one simple request. Could we please continue the drug surveillance flights from Howard Air Force Base in Panama, which cover the entire South American region, which cover the area that is producing the hard drugs that I have cited here? That was our question and request.

Now, how could a State Department bungle negotiations for a simple request like that with the Panamanian Government? I do not know. But, Mr. Speaker, the administration’s State Department managed to bungle the negotiations for having our forward drug surveillance flights go out of Howard Air Force Base.

They did that in an incredibly bungling fashion, and we were basically kicked out May 1. Since May 1, there has not been one drug surveillance flight over the drug-producing or drug-trafficking area of South America from Howard Air Force Base. The United States of America was kicked out of Panama. We closed Howard Air Force Base. We had 15,000 drug surveillance flights last year from Howard Air Force Base covering the whole region. When I took over as chair of the Subcommittee on Criminal Justice, Drug Policy, and Human Resources in January, we went down there to Panama. We met with folks. “Can you negotiate?” No, they did not think they could negotiate.

“If you cannot negotiate, can we move our forward surveillance drug operations to other areas?”

“Oh, yes, we will have it taken care of, Congressman Mica. Chairman Mica, it is going to be in place. It will all work out.”

I am here to tell my colleagues that it is June 6, and May 1 is when we were kicked out. The two other operating locations that were chosen, one was in Manzanares, Ecuador, in Ecuador. The other was in Curacao and Aruba, Nether-

lands, and Antilles.

Manzanares, today is June 8, not one flight has taken off for surveillance in the drug-producing areas or drug-trafficking areas from Ecuador. There is only an interim agreement in place.

Aruba and Curacao, we sent staff down there this weekend to examine what is going on. At best, we might be at 30 percent capacity of surveillance flights. So we have a gaping hole in our drug surveillance program, almost no flights taking off to cover that area either where drugs are produced or where drugs are produced.

An incredible situation, incredibly bungled, as I said, by the State Department. Now the Department of Defense is scrambling, only with an interim agreement in Ecuador, and our staff reported to me on their return from Ecuador that that airfield may take $100 million to $200 million to get it into working order.

Now, is the United States of America going to invest, with an interim agreement that expires in September, any money, hard-earned taxpayer dollars, in a forward surveillance location and increasing and improving the infrastructure in that area when we have no
assurances of a permanent operating base! So they bungled it in Panama. They bungled it in Ecuador. Aruba is operating at maybe 30 percent of capacity, and a gaping hole again in our drug surveillance program.

So that really is where we are tonight in some of the war on drugs: Panama, a disaster. No forward operating bases. What does that do, and what is sad about that is it denies countries that have been cooperating like Peru and Bolivia, and now Colombia that is going to get additional equipment, it denies them the information they need to go after drugs at their source; it denies them the information they need to go after traffickers.

Peru has had a very brave shutdown policy. They ask planes to identify themselves, and when they do not identify themselves and they try to scramble away, they shoot them down. And they have provided in-theater and surveillance information by those forward operations, again out of Panama, that have been closed down.

Now, it is easy for me to get up here and to criticize this administration, and I do not mean to do it in a partisan manner. I mean to do it in a factual manner. And, hopefully, we will not repeat the mistakes of this administration in this Congress or in the years ahead, because we know we can stop drugs at their source. We know we can interdict hard narcotics. We know if we give information to other countries and a little bit of assistance they can help us in a cost-effective manner before that ever gets into our streets, into our communities, into our schools and become a tough task for law enforcement.

But let me, as I conclude, just say again what the Republican Congress has done, what this new majority has done, and under the current Speaker, has again must give full credit to the gentleman from Illinois (Mr. HASTERT), who is now the Speaker of the House, who chaired this responsibility and who I worked with in the last Congress, who brought together the source eradication programs that again were destroyed by a previously Democratic-controlled Congress and by this White House.

Let me mention, Mr. Speaker, what just 2 years of effort in working with Peru and Bolivia have done. The cocaine production in those two countries is cut in half. In half. There has been tough enforcement. We must salute President Hugo Banzer, President of Bolivia, for his courageous efforts. We must help Bolivia, because Bolivia has committed in 2 years to eliminate that drug trafficking, and they have cut by 50 percent. So this is not a “pie in the sky” proposal. It is something we know we can do, and with very few bucks; with very few tax-payer dollars in assisting them.

So, additionally, President Fujimori in Peru, with a tough enforcement, with a tough shutdown policy, with a tough eradication and a productive alternative crop program is making great progress in that country. So we know these programs will work.

This Republican administration, again under the leadership of the current Speaker of the House, when he chaired the subcommittee, has helped us now get aid to Colombia. We are reversing a failed policy there. We will stop the production of heroin and poppy production in Colombia. We will eliminate major drug traffickers. We will give the Colombian National Police, that have done a courageous job, losing 4,000 of their officers in this battle, hundreds and hundreds of officials have died in this war, we will give them the arms and the assistance and the aid, the resources to eradicate, to enforce and to interdict and to destroy and those Blackhawk helicopters are on their way. That is something we have done. And this Congress, this House and the American people will see a reduction in the amount of heroin coming into the United States. And also cocaine, which again they have turned in 6 years, Colombia, into the major producer of cocaine. Not just a processor or a transfer but the major producer. In 6 years they have managed to do that. We will start eliminating that through the policies of this new majority in the Congress.

We have restored the cuts in the Coast Guard and we are dramatically increasing the amount that the military provides in getting them back into the war on drugs. I know it was very nice for the Vice President to take the U-2s out of South and Central America in the war on drugs and bring them up to check on oil spills around Alaska. I know it was nice to divert the money for eradication programs of drugs at the source country, which President Clinton did, and put it in Haiti, which basically was more money down the tubes; but, in fact, we do know that getting the military involved in interdiction close to the source does work.

We know that the Coast Guard protects Puerto Rico and restoring their assets does a great job in protecting our coastlines, both of Puerto Rico and the United States, and we have brought them in 2 years back.

We have tough enforcement works. In the next week I will be holding hearings on legalization of illegal narcotics and decriminalization. There is a big wave across this country that we must look at decriminalization, make a health problem, and we should not be tough on drugs and it will all work out.

Mr. Speaker, it does not all work out. Look at the statistics in New York City. We can see since Mayor Rudy Giuliani has taken office what tough enforcement has done. The murders, which were at 2,000 when he took office, 2,000 murders in New York City a year, and most of them drug related, I would venture to say without any question, have been reduced by 70 percent. Just over 600 murders. From 2,000 to 600.

It is safe to walk in New York City because Mayor Giuliani, through a tough enforcement policy, has stopped the violence, the crime, the drug trafficking and he has gone after these folks with a tough enforcement policy that works.

Now, Tom Constantine, who unfortunately is leaving as the head of our DEA, and that is a very sad fact for this Congress and the American people, has read the chart that should be an eye opener for every Member of Congress and for every American. This shows the heroin addiction population in a city that decided to adopt a liberalized enforcement, a liberalized policy. In 1990, the population of Baltimore was over 900,000. In 1996, it was 675,000. In 1950, they had 300 heroin addicts in Baltimore. Listen to this. Three hundred heroin addicts. In 1996, through a liberalized policy, they had 39,985 heroin addicts in Baltimore. This is what a liberalized policy gives us.

And on the other hand, look at New York City: 2,000 murders down to 600 murders through tough enforcement, tough prosecution. So we know this policy works.

Now, we are going to have a full hearing and we are giving all sides the opportunity to be heard in our hearings next week about this process of decriminalization, about tough enforcement, about legalization. And I try, as chairman, to be fair, and you will hear from everybody, but I believe that these statistics, these facts, are irrefutable.

So this new majority on our side has started a program, and again I started to mention the things that we have done in replacing the military, the interdiction, the source country, getting the Coast Guard cuts restored, but we have also put in almost $200 million in the past year in education programs, which is needed by the private sector. So it is almost a half billion dollars in education. And we are putting our money where our mouth is so our young people and all Americans know the dangers of illegal narcotics.

So we, again, I believe, are taking the right steps. They took the right steps under the Reagan and Bush administration. Education, enforcement, interdiction, eradication at the source, and treatment are important, but it cannot be treated just by being tough. This cannot just be treating the wounded in a battle. If we went to war and we did not spend any money on armaments, any money on forward surveillance, any
money on eradication of the enemy, any money on ammunition, we would not have a war on drugs, we would not have a war. And if we only treat the victims in this war, it does not work. We have seen it does not work.

So tonight, as I close, I ask for my colleagues’ assistance to move together in a bipartisan cooperative effort. Mistakes were made in a bipartisan fashion, hopefully, we can make progress in a bipartisan fashion. It is my hope that we can get every Member on both sides of the aisle not to repeat the mistakes of the past and to move forward together. We know that these policies will work. They are tried, they are proven, they are tested.

It is my hope that we can do that because I never want to talk to another mother or another father or another brother or another friend of a young person in my district who has died of a drug overdose. I talked about the cost, the people behind bars, and I talked about what Congress is going to have to appropriate, but we cannot restore a dollar, we cannot restore a life destroyed by this war on drugs.

So it is my hope that I will not have to make these speeches every week in my next term in Congress; that I will not have to come before the Speaker and the House and plead for their assistance in restarting the war on drugs.

Mr. Speaker, although I have a few minutes left, I will yield back the balance of my time and pledge to be back here again next week.

WORKING FAMILIES OF AMERICA BEING MISTREATED BY 106TH CONGRESS

The SPEAKER pro tempore (Mr. FLETCHER). Under the Speaker’s announced policy of January 6, 1999, the gentleman from New York (Mr. OWENS) is recognized for 60 minutes as the designee of the minority leader.

Mr. OWENS. Mr. Speaker, the working families of this Nation are still being trampled on by this 106th Congress. They are being grossly mistreated in two basic ways: One is indifference and neglect on certain key issues, and the other is active oppression.

Indifference and neglect is reflected in the fact that we are not concerned about a minimum wage increase. There is a rumor that the leadership of the majority party has decided that it will agree to a minimum wage vote and that it will take place sometime later rather than sooner, and they are delaying because they want to make sure we get close to the election and be able to say, well, we voted for a minimum wage, or we voted for it in a bipartisan bill. Let the Democrats vote for it, so we did our job.

And, of course, there is a rumor also that the minimum wage being proposed by the majority is 25 cents a year for the next 4 years. An increase of 25 cents per year for the next 4 years. I tell you, the worker would have a dollar increase instead of the two-step increase being proposed by the Democrats.

But there is no hurry. We have an unprecedented prosperity in the Nation. We have a situation where the value of the stock market in 10 years has grown by $10 trillion. We had the assets and the value of the stock market in 1989 at $3 trillion. Now it is $13 trillion. With a $10 trillion increase in the value of the stock market, we can see that there is a great increase in the wealth and prosperity in America at certain levels. Why not share that with the working families? Why not in the most basic way make certain that the wealth of the Nation benefits the entire Nation?

A minimum wage is just one tiny part of that effort. Being willing to finance or support more generous health care is another. The President is proposing soon a new benefit in Medicare, should be in Medicaid also, a new benefit which would cover prescription drugs. In this time of great prosperity, the least we could do is to make the miracles of science available at a cheaper cost to all the people who need them in terms of health care. Prescription drugs ought to be covered by Medicare and Medicaid.

We talk a lot about Medicare and we forget that Medicaid is designed to serve the very poorest and they deserve to have the same kind of increase. We should not have two tiers of health care in America. Second class health care is inadequate health care. There should only be one class of health care.

But we are refusing to deal with that in a forthright manner on a timetable that is meaningful because we just do not seem to care.

□ 2045

There is an indifference, an indifference to the poor, an indifference to the plight of the working families who are not sharing the great boost in our wealth. That great jump from $3 trillion in 1989 to $13 trillion in 1999 is not felt by a lot of people who are still out there struggling to make it. So jobs, health care, investment in education are all obvious kinds of actions that should be taken by the government. This Congress, acting in concert with the President, should make certain that we take advantage of this boom in prosperity to take care of some of our problems.

But there exists in this Congress an attitude which goes in the opposite direction. It is stubborn, it is unyielding, it is not wanting to go on. Take, for example, what happened in the vote on the supplemental budget, or the development of a long-awaited supplemental budget, which included the President’s request for $6 billion for the Kosovo war, a war which I think is very necessary, a war which I believe could have been conducted or been a part of. I do not think we could have walked away from the genocide being committed by the Yugoslavia regime and held up our heads. We have seen it happen too many times already in this century.

What Hitler did was on a grander, more massive scale. They had gas chambers and ovens and millions died, but the numbers are not as important as the action and the kind of thing happening in Kosovo. Certainly if it only means thousands dying, it is still significant and it is happening over and over again. We have seen it happen in Cambodia, we have seen it happen in Rwanda. It is about time that we did something.

We have done that in Kosovo. So we needed our participation in that effort. The $6 billion was requested by the President. But instead of that bill moving ahead with $6 billion plus the emergency aid requested for South America, for Central America as a result of the floods and the extra aid that was needed for the weather disasters that took place in the Midwest, we had a whole lot of other things piled on top of it and a $5 billion request became a $15 billion request, a $15 billion request, most of which came out of the surplus. It was deemed emergency funding and the surplus which is around $100 billion, I think, about the same, a little more maybe in the coming fiscal year. It is going to be the same amount; the surplus was used for most of it. They could have used the surplus to cover it all, but to make a point the majority decided to offset $2 billion, take away from other programs $2 billion worth of money to cover part of the spending.

Now, the emergency in Central America, the emergency in the Midwest with the tornadoes and storms, et cetera, those were emergencies. They clearly rank as emergencies. Why did we have to make the point that they have to be offset? The point that I want to make is that in the process of the offset, who did they go after? The poorest people in America. The bulk of the cuts for the offset came from domestic accounts, including $1.25 billion from the food stamp program, and $350 million from Section 8 low-income housing programs as well as $22.4 million from the Labor Department contingency fund related to unemployment insurance.

They reached into the programs that serve the poorest people, programs that may benefit the working families on
June 8, 1999

CONGRESSIONAL RECORD—HOUSE

11898

the very lowest levels, and they took out the money to offset and make the point that they want to make cuts in social programs.

There is a coming need, according to the budget that has been promulgated by the majority, a coming need to cut further, maybe $20 billion out of the domestic budget. Some of it could come from defense if they wanted to, but it will probably come out of the domestic budget; $20 billion will be cut and the preview of coming attractions we have seen already. The way the supplemental budget was handled tells you they are going to get it from the people who are the weakest, the people who have no power, working families, poor families, poor people who are not even working, the elderly, those who need Medicaid as well as Medicare; they will suffer by a result of the coming $20 billion cuts. More that may be proposed.

Certainly they are not proposing investing any more money in education. Education, most of which would go into the public school system, is the place that you benefit working families most. Working families' children need an education. There is no way to survive, there is no way for them to take advantage of the prosperity that keeps growing and growing as a result of high technology. The jobs that are available are jobs that require education. You are not going to be in on it, it gets worse all the time, the demands are greater and greater. I was at a job training consortium in New York City yesterday and they were telling me about the fact that we just need mechanics. In addition to the known need for information technology people, 300,000 vacancies in information technology need mechanics. They could hire 30,000 mechanics in the metropolitan area if they could find them. Why do they not have mechanics who would work on trucks and tractors and some of the machinery that industry needs? Why do they not have them? Because the demands have gone up educationally. There are computers and various devices being employed now in trucks and cars and various vehicles that require a little more education than a mechanic had to have 10 years ago or 5 years ago.

So we have a problem, a creeping problem of people in basic areas, as basic as mechanics, auto mechanics, that cannot survive because they do not have the personnel to do the job because the education system is failing to produce that pool of people which is needed. A broad pool of people educated, you can reach in and pull out all kinds of people. The range of people with various kinds of skills and know-how would be great. You would get the technicians, the mechanics, the theoreticians, the scientists, the geniuses. That certain percentage of people would come out if you have a broad range of people in the pool because we are educating the masses. Mass education is needed more now than ever before.

But working families who need to have free education in the public school system, free but first rate, it cannot be education in facilities that are falling down, it cannot be education in situations where kids are afraid to go to school because of threats to their health and safety. It has to be the kind of education that everybody wants for their child here in this Congress.

I know large numbers of Members of Congress send their children to private school. It is most unfortunate that they have given up on the public education system, but as public officials, whatever choice they choose to make privately, I think it is dangerous to have public officials give up on our education system.

So when you consider what happened in our $15 billion supplemental appropriation, you can see how it is that these kinds of jobs are going to be harder and harder to find. There is going to be more trouble in working families. It is not just neglect. It is also active oppression to take the money out of the programs that benefit the poor the most. It is even worse than that. The active attack, the oppression which is very aggressive, continues to go on in the Committee on Education and the Workforce. I serve as the ranking Democrat on the Subcommittee on Workforce Protections. As the ranking Democrat on Workforce Protections, I will be the first to tell you that the name of the committee under this majority Republican administration ought to be changed. It is not workforce protection that they are concerned about. It is workforce persecution. It is workforce domination. It is changing the way in which the Department of Labor to do what they want to do. It is sabotage by the majority on that committee an attempt to make life more difficult for working families.

We have three coming up very soon we have just passed recently in the Subcommittee on Workforce Protections, and now it is going to go to the full committee, and they are a continuation of what was started in the 104th Congress and continued in the 105th Congress, and now it is into a sort of a guerrilla warfare basis. It is not talked about as much but it is still the same agenda. They are attempting to take away rights that workers have won over the last 50 years.

There is a bill, H.R. 987. It is an attempt to block the implementation of any ergonomic standards, standards which relate to the fact that there are jobs which require repetitive motions that end up in injuries and debilitation of people's muscular faculties; they cannot function. Carpal tunnel syndrome is one of them. Back injuries are a large part of it, people who have repetitive kinds of activities that strain certain parts of their bodies. That is the broad topic of ergonomics the majority on the committee want to have discussed. They do not want to allow the Department of Labor, the Occupational Safety and Health Administration under the Department of Labor to do what they have been doing for years, establish a set of standards to relate to these workplace injuries, workplace dangers.

So they have H.R. 987 which ironically the Republican majority on the committee calls the Workplace Preservation Act. It is an attempt to make the workplace more dangerous by blocking an effort to deal with a clear and present form of injuries that we have been discussing for the last 15 years. So H.R. 987 is one of those examples of an attack on working families through a reduction in the safety provisions in the workplace. There are more than 6,000 people who die every year in our workplace situation, and then many, many others who are injured. This attack on the workers continues by the Republican majority.

They have another one, H.R. 1381. It is an attempt to sabotage overtime payment rates by excluding bonus income. H.R. 1381 is ironically called Rewarding Performance in Compensation Act. But they have a way of reaching in to take out the income that is figured in the bonus in order to reduce the rate of hourly wage that is not included when you pay a person overtime. It is a little guerrilla trick, it is almost something you would not see or not respond to if you were not very alert. But it is an attempt to sabotage overtime payment rates by excluding bonus income. H.R. 1381, another attempt to reduce the benefits of working families.

H.R. 1439 is another one. That attempts to sabotage workers in the Occupational Safety and Health Administration's enforcement by misusing the self-audit process. We have a self-auditing process that we encourage. We want to make a partnership between government and industry. But they want to allow industries to audit themselves and then not allow the result of the audit, which determines whether or not they have certain hazardous conditions in the workplace, in the plant, in the garage, whatever unit of employment this is. After they complete the audit, if they identify things that are wrong, they are allowed to keep it secret and we are saying, "No, you have to reveal what is there." The self-audit process would be permitted. You make your survey and audited yourself, identified hazards, and then refused to correct them because, of course, it might cost a great deal, but you keep them secret, nobody else knows about it. Of course you would fire any employee who also knows about it and then would report it. So we have H.R. 1439 which again, an ironical title, is described as the Safety and Health Audit
Promotion and Whistleblower Improvement Act of 1999. The Safety and Health Audit Promotion and Whistleblower Improvement Act of 1999 would make an attempt to do just the opposite. It is going to make the workplace less safe.

We have another bill, an alternative which we will offer at the final markup of the full committee which is entitled “The Whistleblower Protection Act.” That is H.R. 1851 which I introduced as a countervailing force against the phony H.R. 1439.

But I give you examples of concrete bills, the business that is going on here in this place. We are moving at a very slow pace. Things that ought to be done and ought to be on the agenda are not on the agenda. But the guerrilla warfare against working families, against workers in the workplace, the guerrilla warfare against us, we come to grips with the fact that this is wrongheaded, stubborn, unyielding, and at a time like this very dangerous in America. We should be investing in our workers in every way instead of oppressing them and neglecting them.

\[2100\]

In another area, education, which I talk about often, education reform is still rhetoric. We are talking, always when we talk about education about nickels and dimes and lots of words.

Everybody has adopted some kind of education platform, everybody is in favor of improving and reforming education, but nobody wants to spend significant amounts of dollars. Words instead of dollars is the order of the day with respect to education. Education reform is rhetoric, too much rhetoric in the area of the majority; and in many cases, in the minority, too, there is too much rhetoric and too little commitment to real dollars for education.

School construction is one of the tests of whether or not we are only concerned with rhetoric and only going to play word games with the voters. Or are we really going to do something significant about education?

The voters have given us a mandate. As my colleagues know, it is one of the few times in history where we have the focus groups and polls, everything keeps creating the message over and over again. The voters of America want the Congress of the United States, and the President and the entire government to significantly take steps to improve education, to give Federal aid to education in the process of trying to improve education.

Now, because the voters are saying that we will get plenty of rhetoric from both sides, but there is contempt for the whole public education process that is expressed in many ways. They express it in ways which relate to neglect and abandonment and indifference, but also it is sometimes expressed in a very active way. As I said before, there are actions taken which are aggressively against working families and things that working families need. Education and investment in education by the government is one of the things that working families would benefit from greatly, and they need it.

We saw on the floor of the House today a vote which demonstrates great contempt for education, a great contempt for the whole research process. It happens to be an agricultural appropriations bill, and the agriculture appropriations bill, in the hassling back and forth for reasons that I do not clearly understand, the majority knows what it is doing; but for reasons that certainly are not noble and reasons that are not reasonable and were not laid out and described to the Members of Congress in any respectful debate, but certain standards for our entire agricultural research, something like $100 million cut in agricultural research.

Now, agricultural research is at the heart of America’s great food production system. We know, agricultural research, the research, the educational part of it, the egghead part of it, that draws great contempt obviously from the majority party members. Instead of them dealing with subsidies which may be wasteful or the Farmers Home Loan Mortgage Program, and there are a lot of wasteful programs in agriculture just as there are in some other places in the government, but because they have constituencies and because the ol’ boys network demands that they be protected, they are protected. But academia and research, the people who are on the cutting edge of improving agriculture and responsible for the fact that Americans enjoyed the best food production system in the world, we get the best food at the lowest prices, and everything happened by accident.

There is a long history involving education and research starting with the Morrill Act which created the land grant colleges. The model for land grant colleges was Thomas Jefferson, and the University of Virginia was the first State university. It was a very wise move by Thomas Jefferson who made, of course, numerous wise moves and set certain standards for our entire country that we still should be very grateful for and set us on a course that has proven to be very positive.

Jefferson was not in favor of a national university. He did not want one big, huge university in Washington similar to the Sorbonne, to the Oxford chain in London. He wanted each State to have its own university, and Virginia, of course, was the first example, and later the Morrill Act established the Edward David and Whipple. The Federal land grant colleges were established, colleges and universities were established; and going beyond just the establishment of land grant colleges, they were given a mandate for practical education, practical education starting with an assumption that agriculture education is based on the fact that one benefited from science and education.

So applied science in the area of agriculture became the driving force that took our farmers, long before farmers anywhere else in the world, into a whole new realm of production, greatly improving the yield of the land, greatly increasing the kind of production that resulted in our having a tremendous amount of surplus products, as we still do in many areas.

This agriculture research, as my colleagues know, the experimental station, the theoretical base in the universities, the county agents to take it out to the farmers and show them how to apply it, it is one of the great things that are going on in this country. As my colleagues know, in terms of new kinds of bugs and viruses and various kinds of things that go on and on that can wipe out gains that are made over the years if they are not researched, if they do not keep up with them.

So even in the area of agriculture we have such a sterling record of performance, today we found the reckless attitude towards the things that matter most to ordinary Americans take hold and in one fell swoop we wiped out some basic parts of our agriculture research system.

Then, as my colleagues know, I think that a lot of this preoccupation with the reduction of programs that benefit working families, that benefit people who are in greatest need in our Nation, a lot of this preoccupation and obsession is based on the fact that we have generated a great deal of tax cuts. We have a spending record of performance, today we found the reckless attitude towards the things that matter most to ordinary Americans take hold and in one fell swoop we wiped out some basic parts of our agriculture research system.

I said before that the stock market value has gone from $3 trillion in 1989 to $13 trillion in 1999. So do the rich need a tax cut? Do they need some help? As my colleagues know, why are we preoccupied with making the budget balance by cutting taxes? Why are we willing to cut food stamps and willing to cut low-income housing in order to make the budget safe for a tax cut? But that is what is coming. The Republican
tax cut crouches in the bush like a wounded lion. It is there, it is not going to go away.

One of the problems we have is that the people who represent and care about working families, the great majority of our Nation, of course, made up of working families, those people do not have a tax program or working families. Working families have suffered the biggest tax increase of any group in the last 20 years, the payroll tax, Social Security and Medicare. Those payroll taxes have jumped more percentage-wise than any other taxes.

They hit the people on the very bottom. Nobody is proposing to relieve them. I have a few proposals that I would like to offer, and I will offer them in a few minutes.

As my colleagues now, my point is, you need a whole platform, I guess, for working families, and we do not have it. My friends in organized labor, as my colleagues know, they have things that they care about that they are always telling us about, and those are the right kinds of things that working people need; but it all comes in bits and pieces.

We need a whole platform which lays out the need for working families being given their fair share of the great American prosperity in many ways. The Republican tax cut should be answered by a proposal for a tax cut for working families as well.

Between now and Election Day in November 2000 we must lift up a meaningful platform for working families. The showdown will come sometime in the fall of the year 2000. The pattern has been the same for the last, and it will probably continue as it has been for the last 4 years in the conflict between a Republican-controlled Congress, a Democratically-controlled White House.

The really important measures are going to come down to a negotiation session at the White House between the majority in the Congress and the White House, the President. The really big decisions are going to be made then. What we do with this surplus is really going to be determined then.

Whether we are going to allow working families to have a share of the wealth of America through programs that benefit them will be determined then.

So we have a scenario. We have time, but we have to start now visiting a platform for working families which has all of these components; and you know we have to come to grips with the fact that there is a mind-set in this Nation maybe among powerful people that they do not have to be concerned with the poor. The poor are poor because they did not make it, they are poor because they deserve to be poor. They are not wealthy, they are not able to take care of themselves without some help because that is the way it is, and that is the way it deserves to be, and why should the Nation care?

As my colleagues know, we have whipped the welfare mothers to death, and they are becoming a nonentity in this Nation. They have been whipped so often and so much, until they almost just disappeared. They may be still aching out there, there may be situations where we are causing more harm than good because we are splitting families in a bird, and the children are suffering, and those suffering children are going to create great problems in the future for our health care system, our education system, our corrections system, prison system. As my colleagues know, we may be generating a lot of problems.

Right now, they are invisible. We beat them to death, and now we are going after working families in the workplace, take their overtime, take away safety provisions, etc., etc., because there is no ethic which says we have a responsibility to these people.

Let me just take the conversation in a new direction. Because of the war in Kosovo, I think we ought to stop and think, as my colleagues know, and it certainly brings to mind it is one more situation where we are at war, there is no threat to the United States, and there are a lot of elements there that do not fit the description of the war against Hitler.

As my colleagues know, World War II was a war where there was a real threat to the whole Western world, and it was just a matter of if we stood in line, if we did nothing, our time would come. So between, as my colleagues know, Tojo and Hitler we had to act, and it was a war which definitely was a war to save our own way of life. There may be doubts about other wars, but we had the same rationale in the Korean war and in the Vietnam war, and in Vietnam an assumption that, you know, you had to do this, the domino theory of fighting the Communists; if you do not stop them there, they will keep going.

I do not want to get into all of the various arguments, pro and con. Let us just accept war as a fact of life. Let us accept the fact also that the most any citizen can do for their country is place their lives at risk in a war. I mean, I do not know of anything greater that any citizen can do for their Nation, whether they volunteer, that they are drafted and forced to go or whether they volunteer, that they are in a situation where they are on the firing line, their lives are at risk, than they are offering this supreme price.

And of course, if they are injured and become casualties, they pay a great price, and of course, if they are killed in combat, they die. That is the supreme price, as my colleagues know, to have to give your life. So I do not think the public will discuss it.

Let me just point out the fact that, mind you, and I got these figures on casualties from the Pentagon, from the Archives, which got them, of course, from Pentagon research, so they are sound figures.

Who dies in the wars? Who dies? There is a lot of contempt always directed at our big cities, our inner-cities, where the poor live mostly. One of the things that is coming out over and over again, and some Democrats are as guilty as Republicans, is they do not want to do anything about the public school system, because if you had legislation which appropriated large amounts of money for school construction and you did it on the basis of need, where the oldest schools are and the needs are and they do not have libraries and laboratories, buildings are more than 75 years old, if you did it on that basis, most of the money would go to the big cities. They have the greatest need in that area.

Just like we have an insane argument now that is being promulgated by the Committee on Transportation, I think in the Senate, in the other body, that need relates to the fact they say Los Angeles and New York are getting too much transit money, too much mass transit money.

Los Angeles and New York are the places where you have most of the mass transit. New York has more than 30 percent of all the mass transit in the country, of the riders, and yet we do not get 30 percent of the funding. The amount we get, however, has aroused the ire of certain people and they want to cut down the amount New York gets or Los Angeles gets in transit money. That is where the people are.

Why do we have large amounts of casualties come out of the big cities in every war. World War I, World War II, the Korean conflict, the Vietnam conflict, where did most of the casualties come from? The big states with the big cities.

New York has always led in casualties, even back to the Gettysburg battle. The largest numbers of casualties at Gettysburg were soldiers from New York State. They did not break it down by city, but I assure you most of them were poor immigrants out of the cities.

But I will not go back to that. I am not interested in discussing the fact that valor and willingness to fight and all kinds of conditions are in motion to generate casualties. But the fact is that the casualties come out of the places where people live, where the population is. That is where you are going to have the people to put their lives at risk, the people who died, who paid the supreme price. They will be the people that come from the areas where the most people are. It is simple arithmetic.

New York in World War I, there were total casualties of 55,100 official casualties. Out of those there were 7,307 combat deaths, those casualties, larger than any other state. For some reason
California in World War I was very low. I think maybe because it was not as highly urbanized and the poor were not as concentrated as they are now. Whatever the reason, New York.

Pennsylvania had 29,576 casualties, 5,996 deaths in World War I. By the way, Pennsylvania has Philadelphia, Pittsburgh, the big cities. Illinois has Chicago, Springfield, big cities: 15,000 casualties, 3,000 combat deaths. Ohio, Cleveland and Cincinnati, big cities, 14,487 casualties, 3,073 deaths. Massachusetts, with Boston and a couple other big cities, 11,455 total casualties, 2,253 deaths. Michigan, with Detroit, 9,000. New Jersey, a small highly urbanized state, 8,776 casualties. There is a pattern.

The pattern is the same in World War II. The casualties went up a great deal. New York, 89,656 total casualties, 27,659 deaths in combat from New York State. Why? Because they were braver than anybody else? Maybe. I do not know. The important thing is that because it is where the people are. Larger numbers came from New York, because that is where the people are, first of all, and probably that is where the poorest people are who were drafted in larger numbers, and they went off and fought and died for their country. Why do we treat that class of people with great contempt now? Pennsylvania, 81,000 casualties, 24,000 died in combat. Illinois, where Chicago is located, 54,000 casualties, 17,000 died in combat. Ohio, 49,000 casualties, 15,000 died in combat. They came out of the big cities where the people lived. California in World War II, more urbanized, 47,000 total casualties, 17,000 died in combat.

Korea, New York had 8,780 casualties, 2,249 combat deaths. Pennsylvania, again, second, Illinois, third, Ohio, same pattern.

Vietnam, the same pattern: New York, Pennsylvania, Illinois, Massachusetts, Ohio, Michigan, California. Simple arithmetic.

The point is, the people who die, who pay the supreme price for their country, come out of the big states and the big cities. Therefore, we have every right to treat them with great respect. We should honor the dead from these big cities.

Simple arithmetic.

The voters say we want education to be the number one priority of the government. The decisionmakers in Washington say it is education. Why do we not in our policies for the people that we expect to die for America?

Madam Speaker, I will submit a little summary that I made called Big State, Big City Casualties, which lists some of the things that I have just said about where the casualties are, in which states, and the statistics are by state, and also indicates the cities located in those states.

I have, of course, a bigger record that is more complicated. It lists all the states. In the case of the war in Vietnam they even list the casualties by race. You find that the black casualties there are greater than the proportion of blacks in the population. In Vietnam certainly, when those 54,000 casualties by race, some of the same people were treated with great contempt as we abandon our school systems and abandon our safety net, health care services, welfare. Those same people paid the supreme price for our country in large numbers. Let us stop and think about the pattern of exploitation, negative, abandonment of working families in America.

We need a tax plan which addresses itself to the needs of working families. Not only are we in a situation where the only targets for cuts, for taking away benefits that have existed for years, are programs that benefit working families and poor families, the poor who do not work, the elderly, the disabled, a lot of people who are not working who benefit from these programs, we are not only targeting the cuts for them, we are targeting the benefits of government policy to the rich.

We have got tax proposals that are going to be brought on the table between now and the end of this appropriations process, and, of course, they will be pursued again next year in the final showdown that takes place in this Congress, this two year span. There are going to be tax cuts on the table and a bargaining process, and we are probably going to end up with some kind of tax cut.

All those people who are benefiting from the great increase in wealth, the enormous surpluses, want them to go to the rich, a large amount of that is what you call unearned income. Unearned income is a term I did not invent, but it is all the money you make that does not come from wages directly. Wage earners provide the principal support for the Federal Government. Almost two-thirds of Federal revenue comes from income and Social Security taxes that are paid by workers, people who earn wages. They are the ones who provide the taxes. It is taxes on earned income.

By contrast, income taxes on unearned income, stocks and bonds and that kind of thing, produce only about
June 8, 1999

CONGRESSIONAL RECORD—HOUSE 11993

12 percent of the total Federal revenue. I propose, and I think that the working families platform that ought to be adopted by working families and organizations that are supposed to represent them, I propose a massive shift in the burden of the taxes from the earned income of working people to the unearned income of those who are getting the greatest increases in wealth.

Ten years ago, the early 1989, as I said, the value of all U.S. stocks was about $3 trillion. Now it is about $13 trillion, a $10 trillion increase. That is the opportunity. You can get new revenue from that increase and the people who are continuing to earn without any pain being caused.

The great political position that we need a tax cut is not related to pain and the reduction of pain; it is related to a long-term reality, a long-term policy which defines "them" and "us" and disregards the fact that there is a place, there ought to be a place, for working families to share the great wealth of America.

I introduced on March 11 of this year H.R. 1099, which I call the Social Security Protection and Tax Relief Act of 1999. It cuts the Social Security tax rate from 7.65 percent to 6.4 percent.

This will give a tax cut of $15 for every $10,000 of earned income to all working families and to the rich as well as the poor, if the rich are working and earning wages, and whether or not they pay income tax, of course, they will benefit through the various devices in place in the Tax Code.

So cuts of the social security tax, payroll taxes, where the biggest increases have taken place over the last 20 years, when our 20 million people at the bottom are taxed at the same rate as the people on the top, those cuts would be a great benefit for working families.

My H.R. 1099 imposes a new 12 percent social security tax on all taxable unearned income to offset what you would lose from reducing the taxes on people at the lowest levels. We propose social security taxes on all taxable unearned income.

I also on April 12 introduced another bill, H.R. 1390, the Income Tax Fairness Act of 1999. That cuts all income tax brackets by 3 percentage points, all income tax brackets, from the highest to the lowest. The present rates in the 5 brackets are 15 percent, 28 percent, 36 percent, 39.6 percent. The new rates would be 12 percent, 25 percent, 28 percent, 33 percent, and 36.6 percent.

I am not on the Committee on Ways and Means, and I know most people would consider it inappropriate that I should be working on taxes and changes in the tax policy. The Committee on Ways and Means is an exclusive committee. For the benefit of people who are not close to Washington, we have a caste system in the Congress. There are exclusive committees and there are other committees not on an exclusive committee on Appropriations and the Committee on Ways and Means is an exclusive committee. The Committee on Appropriations is exclusive, the Committee on Ways and Means is exclusive, the Committee on Commerce and the Committee on Energy are exclusive.

Some of the wrongheadedness and anti-democratic attitudes that are generated come out of the structure itself. It is all wrong to say that education is a lesser committee. The Committee on Education and the Work Force is not an exclusive committee. However, what is more important to the Nation at this point than the education system which brought us to where we are and will take us into the future is to place a social security tax on the Committee on Ways and Means, but I think every Member of Congress has a right to speak out and offer the best wisdom that they can offer to stimulate the discussion. Hopefully we will develop a new generation of politicians who consider themselves advocates for the average American, the average taxpayer out there, the working families, will also get involved in the debate.

Steve Forbes and the various other conservatives should not be the only ones who are concerned about tax reform. There ought to be a tax reform program that comes from working families and their advocates.

H.R. 1390 cuts deductible depreciation on nonresidential buildings from 2.6 percent per year, and it is based on an estimated useful life of 39 years, et cetera, et cetera, some other details that I think we need not go into.

The estimate is that this tax program will be the only one that is revenue-neutral or a revenue-plus. Total Federal revenue, income and social security taxes, will be reduced by between $190 to $200 billion per year and increased by the same amount or more, $200 to $250 billion a year by the mechanisms in these bills.

I am also convinced that the great social security problem we all talk about, and we have good reason to worry about, the great social security problem could be dealt with if we were to cut the social security tax on all unearned income. In addition to the tax on earned income, let us put it on all unearned income. That is the area of greatest growth. That is the area where the ratio of people in the workplace does not determine what goes into the social security coffers.

Let us have a social security tax on unearned income for the first time, and that will save the social security system for at least two generations, and it will help us fund that and solve the problem once and for all.

In other words, I think working families deserve a platform, a program of their own. I hope the candidates, certainly the candidates in the Democratic Party for president, will break out of the mold, will break out of the operational wisdom, and move forward and talk in more direct and affirmative terms about programs which benefit the great masses in America.

Finally, I want to conclude on the program that I think benefits the most people, and all of us, but certainly working families in dire need of the public education system that is able to deliver the kind of education that is needed as we go into the new millennium.

As we go into the 21st century, we need the best schools in the world. We are not going to be able to maintain our lead economically if we do not have the best educated populace in the world. We are not going to be able to deal with a high-tech military. If we don't have the best educated populace in the world.

Already we have great shortages in the Navy. I understand the last great super aircraft carrier that was launched was short of personnel by 300 people. They could not find 300 people to staff it. There are other shortages throughout the Navy and other services, shortages of appropriate personnel.

Are there shortages of bodies in a Nation with more than 250 million residents? There is never a shortage of bodies. They are talking about a shortage of people who have the capacity and the prerequisite training to be able to deal with a high-tech military. The Navy needs people who have some kind of education which prepares them to learn how to operate high-tech weapons. The Air Force needs the same kind of people. The Army needs the same kind of people.

Even in the military, we need the best security effort that we can launch, which would be a better educated populace through a revamped public education system, everywhere we go, economics, foreign policy, globalization, military, and even social security.

If we are worried about social security, what is the great worry about social security? The number of people who are going to be on social security as we progress into the 21st century, the ratio of people who are early and drawing money from social security will be far greater than the number of people who are in the work force paying into social security. That is a simple understanding that is correct. We are going to have fewer people paying into social security than are getting benefits from social security. Then we have a situation where if we do not find new sources of revenue, it is going to run out of money.

The just-mentioned part of the solution may be to look for other revenue sources for social security. But even if we stay with the primary revenue source of wage-earners paying into the
social security fund, if we have an education system which guarantees that the job of this creation in this Nation will be there and the people who are in the Nation can qualify for them and earn wages and pay into the social security system, we are helping social security.

So education helps to keep us strong militarily, it helps to keep us strong economically. Education is the best investment we can make in social security.

The problem now is that because already we have not been able to fill many of the jobs in the high-tech industries, corporations are contracting out to other nations. Bangalore, India, is called the computer capital of the world because in Bangalore, India, they have numerous contractors from this Nation who are contracting with firms in Bangalore to provide computing services. And because of our high-tech communications facilities, we can do that kind of thing.

In addition to large numbers of corporations contracting to firms located in Bangalore, and the people in Bangalore, of course, pay their social security into the Indian system, not the American system, we have also large numbers who come to this country as foreign workers and improve their skills because they are hired in the jobs that cannot be filled by our corporations. They go back and make the computer and other high-tech industries of their Nation more efficient and effective as competitors. So wherever we look, we find the need for greater investment in education.

There are many ways we can invest in education. We have talked a lot of them. I do not think that I would rank reducing the classroom size over construction or construction over reducing the size of the elementary classes, but I would like to say that a school construction initiative which is meaningful would send a message to the whole Nation and the whole public education system.

If we believe in a religion, then the first visible commitment of that religion is manifested in the kind of church they build or temple they have or synagogue they have. The physical facility is not at the heart of what the religion is all about, but the physical facility is a visible manifestation of a commitment.

If we abandon the public schools of this Nation, and we have a situation similar to the one we have now, where we are spending only 25 cents per child. We have 55 million children in school. When we look at the amount of money the Federal Government is spending, it is about 23 cents per child.

I propose a bill, H.R. 1820, which I have already introduced and am seeking cosponsors, where we would spend $147 per year per child instead of 23 cents per year per child. For $417 per year per child, we could deal with the crumbling, dilapidated schools, schools that endanger the health of youngsters because they have coal-burning furnaces, lead pipes, some have serious problems in terms of the roof. No matter how many times you repair it, the water seeps into the walls at the top and it keeps coming down. Lead paint, lead is in the paint. There are all kinds of dangers.

Many buildings are just so old. We have a lot of buildings in New York City that are 75 years or older, many that are 90 years old. This is not unique to New York City. All of the big cities have the same problem. Many rural areas, of course, have even worse problems. They never had sound buildings. We need a construction effort.

I conclude by saying that investment in the public education system is one of many of the steps we need to take to end the oppression of working families and provide benefits, and have them share in the wealth, instead of being objects of our contempt.

Madam Speaker, I include for the RECORD the following information on World War II:

**CONGRESSIONAL RECORD—HOUSE**

June 8, 1999

**REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1401, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2000**

Mrs. MYRICK (during the Special Order of Mr. WELDON of Pennsylvania), from the Committee on Rules, submitted a privileged report (Rept. No. 106–175) on the resolution (H. Res. 200) providing for consideration of the bill (H.R. 1401) to authorize appropriations for fiscal years 2000 and 2001 for military activities of the Department of Defense, to prescribe military personnel strengths for fiscal years 2000 and 2001, and for other purposes, which was ordered to be printed.

**INFORMATION RELATIVE TO THE COX REPORT**

The SPEAKER pro tempore (Mrs. BIGGERT). Under the Speaker’s announced policy of January 6, 1999, the gentleman from Pennsylvania (Mr. WELDON) is recognized for 60 minutes.

Mr. WELDON of Pennsylvania, Madam Speaker, I rise tonight to continue to provide for our colleagues in the House and for the constituents that they represent across the country information relative to the Cox report and the way this report is being spun by this administration.

Madam Speaker, I had wanted to go into much of the information I am going to share tonight in more detail yesterday, but because I had to leave after 30 minutes, I could not go into detail last evening, I will do so tonight.

Madam Speaker, I want to start off this evening, as I did last night, by saying it is not my normal course to spend every evening over a given period of time on the floor of this House discussing the same issue. But like eight of my colleagues, I spent almost the last year of my life focusing on the investigation that we were asked to perform by the leadership in both parties in this body on potential security harm done to our country by our policies relative to China and other nations that might benefit from technology developed here in America.

We worked tirelessly behind closed doors, cooperating fully with the FBI and the CIA, and with the full support of George Tenet, who heads the CIA, in trying to determine whether or not there were damages done to our national security, and if so, what was the extent of that damage.

We deliberately made a decision when we began the process last summer that we would not go into the specifics of campaign finance activity or what other motives would have driven some individuals to leak thresholds for exports, or perhaps the reasons why influence would be allowed by Chinese nationals and others, both at the White House and to other Federal agencies, to
allow those key players to gain access to the key decision makers that would benefit them in acquiring technology.

The nine Members that were a part of the Cox committee represent a broad basis of views in this Congress, four Democrats and five Republicans, very serious Members; and our goal was and the result was a totally nonpartisan effort.

We looked at every aspect of technology that may in fact pose problems for us down the road whether or not that technology had in fact been transferred; if so, to what extent, how it was transferred, and what the implications were for our long-term security.

The almost 1,000-page document that we completed I think, very detailed and certainly would be required reading for any American. The problem is, most American citizens, like most Members of Congress, do not have the time to sift through almost 1,000 pages of detailed explanations and stories relative to various technologies that had been transferred out of the U.S. over the past several decades.

Therefore, because much of this is contained within the thousand-or-so-page report, even though 30 percent of that remained classified because the administration would not declassify the entire document, the media, to a large extent, have chosen not to focus on the substance of what is in the Cox committee report.

Unfortunately, the bulk of the American media, and I say the bulk because there are a few exceptions, people like Jeff Girth with the New York Times, who has been doing tireless work in this area before our report was even issued. People like Carl Cameron at Fox News, who continues to do extensive work in this area; people like 60 Minutes, who are right now doing research in these areas, and other network affiliates, they are the exception. The bulk of the mainstream media, have chosen to accept the spin that has been given by this White House to the work that we did.

What I am trying to do, Madam Speaker, is to present information to our colleagues, which they could, in turn, provide to their constituents, of a factual basis that compliments the work that was done by the Cox committee.

Now, the public at large can receive copies of the Cox committee report. It is available on the newsstand, or they can get it on the Web site that has been established by the Cox committee itself. Many libraries now have copies of the Cox committee three-volume series.

Last evening, I mentioned the fact that I have now established a Web site on the Cox report that goes beyond the information that is covered in the Cox report and provides the visual explanation of the overview of the problem that we dealt with in the Cox committee.

So our colleagues, Madam Speaker, and all of their constituents can now turn to the Internet where they can access the material I am going to show this evening, and they can download the actual charts that I am going to provide. In addition, smaller versions of these larger charts have been made available to every Member of this body. All they have to do is contact my office, send a staffer over; and be they Republicans or Democrats, they can get the charts and all the related information that goes with the charts so they can share this information in a factual way with their constituents.

The Web site where our colleagues and the American people across this country can access this information is www.house.gov/curtwelley. Any American represented by any one of our colleagues can access this information through that site.

In fact, last evening, we had a number of contacts from throughout the country from people who want to get additional factual information in an investigational form, in a condensed form about what actually the Cox report focused on.

As I have said in a series of speeches that I have been giving both here and around the country, Madam Speaker, the focus of the Cox committee was not just on our laboratories. Now, if my colleagues listen to Bill Richardson, the Secretary of Energy and the point person that has been asked by the administration to provide the spin for the Cox committee report, my colleagues might think that only focused on our laboratories, Los Alamos, Sandia, and Lawrence Livermore in particular. Nothing could be further from the truth, Madam Speaker.

While it is true that the laboratory security was one part of what we looked at, it is only one small part of the bigger picture of the way that we loosened the controls over our technology for the past 7 years.

The American people need to understand that this effort was well beyond our laboratories. But as I did last night, I want to highlight four specific actions that rebut what Secretary Richardson has been saying around the country as the point person for this administration as he has tried to spin the Cox committee report as though it is only concerned with lab security.

Now, Madam Speaker, our colleagues know full well, because they have read the text of Mr. Richardson’s speeches, that his focus has been something along the lines of this: This administration was the administration who uncovered the Chinese espionage in 1995 that has been transferred to China and that the only thing they did was that they uncovered the fact that, in 1995, they learned that China had stolen the designs for our warhead capabilities, the W-88 and the W-87, that occurred in previous administrations. That has been the extent of Secretary Richardson’s comments.

He has also gone on to say, now, look, we have taken steps to correct all of this, and today we have corrected the bulk of the problems.

Well, I am here to rebut that, Madam Speaker. I would like to do it in a forum where I could stand directly across from Secretary Richardson, or even the President, and have a chance to go at it verbally and exchange information, but it looks like that is not going to be possible.

The national media outlets will put Secretary Richardson on the Sunday morning talk shows to give the White House spin, but they have yet to give full consideration to the factual rebuttal to what Secretary Richardson has been saying. So I am going to attempt to do that here again on the public record tonight.

First of all, we must remind the American people that contrary to what Secretary Richardson has been saying, it was this administration, under the leadership of then-Energy Secretary Hazel O’Leary in 1993 that ended the policy of color coding laboratory security credentials at our laboratories. My understanding is that she thought having color coded badges was to some extent discriminatory and they were not necessary. So under her administration, acting on behalf of Bill Clinton, we did away with that process in 1993.

Now what did that mean? That meant, Madam Speaker, that all of those employees at our labs that we used to be able to tell by the color of the identifying ID system that they had on them no longer could be done, or no longer could be checked, because we did away with that color coding, making it much more difficult to determine where employees could or could not go. And we have a particular classified laboratory setting.

So under Secretary Hazel O’Leary, this administration ended the practice of visually being able to identify what people at our labs could or could not have access to key areas. Now, obviously that made it much easier for unauthorized people to go into areas where they did not have appropriate clearance.

Now, if this policy were so acceptable and defensive, my question is, why did this administration 2 weeks ago reinstate the policy as it existed under President Reagan, President Bush, and even President Carter and before that?
If this policy change, which Secretary O'Leary made on behalf of Bill Clinton in 1989 and 1994, was so critically important, why 20 years later did they go back to the policy as it was under Republican Presidents?

Was perhaps there some new revelation that this relaxation that occurred by the Clinton administration in 1993 and 1994 led to security problems in our laboratories? Bill Richardson has yet to answer that question.

Second point, Madam Speaker, we have not heard Bill Richardson talk about the fact that it was under Secretary Hazel O'Leary, acting on behalf of President Clinton, that FBI background checks of people who worked at our labs and visited our labs were put on hold.

Now, why do we have FBI background checks? They were there to discourage people who should not have access to our country's secrets to get into places where those secrets were kept. That was not done prior to 1993, Madam Speaker. That was done by this administration, as a major change in policy that opened the floodgates for people to go to our labs, who in previous years would not have been allowed access to those facilities.

Bill Richardson has not dealt with that issue, because as he said, this administration only inherited problems and did everything to correct them.

Third point. There was an incident involving a retired employee from Lawrence Livermore Laboratory in the 1993 to 1995 time frame, where that employee, former employee, was accused by the Department of Energy of having released sensitive classified information to unauthorized people. The Department of Energy investigated that issue, because as he said, this administration only inherited problems and did everything to correct them. However, the Department of Energy saw fit, based on the factual evidence to remove that former employee’s classified status so that he no longer, as a retiree, had access to classified information.

The employee appealed that decision to the Secretary of Energy’s office. Hazel O’Leary herself overturned the decision of the Oakland Department of Energy office and allowed that retiree to retain his classified status. When that occurred, Madam Speaker, employees all across DOE involved in sensitive security areas got the feeling that this administration felt that giving away classified secrets was no big deal.

We lowered the threshold for the security clearance process. We stopped the FBI background checks. Then we even had an employee who was accused by the Department of Energy itself, and found guilty of giving classified information. The Secretary herself overturned the Department of Energy decision to take away his security clearance.

Now, those people that I have talked to in the Department of Energy who worked under Hazel O'Leary, way more than one or two people, have said that under her leadership, there were whole-sale declassifications to declassify massive amounts of information, in some cases boxes and cartons of records that no one had gone through, simply declassified, made available for people to read in a spirt that I guess was considered openness, even though these were, in many cases, the most important technical secrets that this country had.

Let me give my colleagues one particular example, Madam Speaker. Secretary Richardson has gone around the country, and he has made the case that when this administration found the evidence in 1995 that China had stolen or received the design for our most capable nuclear warheads, the W-88 and the W-87, that this administration immediately corrected those problems so they would never occur again. Even though Janet Reno cannot properly explain why the Justice Department turned down requests for four wiretaps, for efforts by one of our employees at one of our laboratories, thought a spy. Secretary Richardson has said they took aggressive action.

Now, that is what he said publicly. I wish he would answer this question, because that same year, in 1995, U.S. News and World Report published a special report entitled “Shockwave.” “Shockwave” was printed on July the 31, 1995, distributed all across the country and around the world. I am sure a number of these copies were sold in China.

Because when I traveled to Beijing I saw copies of U.S. News and World Report on the newsstands that people could buy. The same thing in Russia. These copies were available in North Korea, in Iran or Iraq. This edition of U.S. News and World Report’s Special Supplement were sold wherever people would pay the price of whatever this document cost, $3.50. What was in this special report on the last page, which I showed last evening, was startling.

On July 31, 1995, this administration, not the Reagan administration, not the Bush administration, not the Carter administration, this administration leaked the design for our W-87 warhead to U.S. News and World Report. Not just the Chinese, the North Koreans, the Iraqis and Iranians, anyone who would buy U.S. News and World Report on July 31, 1995 got a documented diagram of the W-87, which up until that point in time was classified.

Here is the color version of what the Department of Energy released to U.S. News and World Report. This design shows in some detail the way our most capable nuclear warhead works. It shows and explains the process, it shows and locates the technology, the fuel, the process, the activity, the physics of the way America’s most capable warhead would work. This was not secretly stolen by the Chinese, that this administration maintained the proof that they found in 1995. This diagram was given to U.S. News and World Report by this administration in 1995, and reproduced in U.S. News and World Report.

As I said last evening, Madam Speaker, this has been told, and I am tracking this down right now, that there was an internal investigation within the Department of Energy to find out who leaked this diagram, this sensitive diagram to U.S. News and World Report. Because I have been told, Madam Speaker, that that individual and group were told to stop the investigation. Why? Because the assumption that was that this diagram came from Hazel O’Leary’s office herself.

Secretary Richardson talk about this, Madam Speaker? Why is he not talking about in 1995, in July, when this diagram for the W-87 was reproduced and sold on newstands all over the world to anybody who would pay the price? This was not some secret espionage capability of the Chinese. This was the Department of Energy, following Hazel O’Leary’s desire to open up to the people of the world our most secret information about technologies important to our country.

There is one additional factor that needs to be investigated, Madam Speaker. There was an individual, or is an individual employed at the Department of Energy who has currently been placed on what I call political administrative leave. His name is Edward J. McCallum. He was the one who briefed Members of Congress and their staffs about problems with one of our nuclear weapons laboratories, Rocky Flats.

McCallum found out that he had done the outrageous thing of informing Congress about security concerns at one of our nuclear sites, what was the response of this administration? They put him on administrative leave. Secretary Richardson has announced that he is going to fire Mr. McCallum because he claims he gave out classified information.

Madam Speaker, I cannot believe this is happening in America, but there is some added irony here. Madam Speaker, I am providing for the CONGRESSIONAL RECORD, a document dated May 3, 1999, prepared by Mr. McCallum which outlines the problems at Rocky Flats and what steps he took to correct them.

STATEMENT OF EDWARD J. MCCALLUM
Mr. Chairman, thank you for the opportunity to speak with the committee today on the Department of Energy’s Safeguards and Security Program. Over the past nine years, I have served as the Deputy Director of Safeguards and Security. In this capacity, I have been responsible for the development and promulgation of policy that governs the protection of national security assets entrusted to the department, to include those assets that are part of the nation’s nuclear
CONGRESSIONAL RECORD—HOUSE

WEAPONS SYSTEMS SECURITY

by the media recently, is the loss of classified
information. The DOE Computers Security Program faces a
number of problems. One of the primary concerns is the protection of unclas-
sified information. However, the DOE Computers Security Program's effor-
tive has been directed toward the area of foreign visi-
tors and the protection of classified information.

Another area of great concern is the mig-

The DOE Computers Security Program suf-

There have been several other con-
sequences of the reduction in the number of Protective Force Officers. First,
there was an increase in protective force response. Second, Protective Force Officers were
no longer able to do their protective force response in situations where there was an
imminent threat to safety. Third, Protective Force Officers were no longer able to
provide training and technical assistance to DOE field sites when requested. My office is also charged
with conducting special inquiries into incidents that require the Secretary's con-

A centrally funded and well-integrated Na-
tional-level security exercise program is critical to meet the protec-
tion needs of DOE and the nation. Exercises that address site response and manage-
ment of security crisis are required by regulation to be held annually at critical DOE facil-
ities. However, participation by State and local law enforcement, regional offices of the
Federal Bureau of Investigation (FBI) and other Federal agencies is inconsistent and varies considerably across the complex. Under Presidential Decision Directives 39 and 62, the Secretary of Energy is directed to conduct exercises to ensure the safety and security of its nuclear facilities from ter-
rorsim. DOE is also tasked to support the FBI in its lead as the Federal agency respon-
sible for managing all domestic incidents invol-
volved terrorist threat or use of weapons of
mass destruction (WMD). In addition, recent
creations of the Department of Justice National Domestic Preparedness Office, the
FBI Critical Incident Response Group (CIRG), and other National crisis response
agencies requires that DOE plan and practice a new and expanded role in response to
security crisis response beyond the local site and internal Department level.

The current DOE organizational structure separates the responsible between O

One of the primary interests expressed by the Committee, and indeed widely covered

The department has not been able to resolve

The Defense Department's Computer Security

On Oversight in the DOE in 1991, by General James Freeze, and the

The Department of Energy has placed me on Administrative Leave since April 19, 1999. DOE officials allege that I

The DOE Computers Security Program suffers from a variety of problems. One of the primary concerns is the protection of unclassified information processed by the DOE Computers Security Program. Unfortunately, many of them do not have the computer security background or knowledge required to implement a sound computer security program. Attempts to issue comprehensive guidance by my office and the Chief Information Officer as early as 1995 met with significant Laboratory resistance. Several Laboratories complained that providing protection such as firewalls and passwords were unnecessary and a hindrance to their operations. Implementation of the proposed Computer Security Manual in 1996 would have prevented many of the problems being reported today.

Another area of great concern is the migration of classified information from systems approved for processing classified data to less secure unclassified processing systems. My office has noted a number of problems in this area to include: Failure to conduct classification reviews before placing information onto a classified processing system, intentionally creating unclassified data that is very close to classified data to ease processing, and using personal computers at home to process classified information.

A variety of computer security tools and techniques, such as encryption devices, firewalls, and disconnect features, are available and their use is required; however, these protective measures are not always used. In some cases, system administrators are forcing the use of protective measures on users whose knowledge by system administrators. In other cases, it is due to lack of funding or priority for the required equipment.

PROTECTIVE FORCES

While much of the attention has been directed toward the area of foreign visi-
tors and the protection of classified information, equal serious cause for concern exists in other areas as well. For instance, since 1992, the number of protective forces at DOE sites nationwide has decreased by almost 40% (from 5,640 to the current number of approximately 3,500) while the inventory of nuclear material has increased by more than 30%. The number of Protective Force Officers has declined to the point where it is questionable as to whether facilities whether the DOE Protective Force could defend an adversary. By 1996 several facilities were no longer capable of recapturing a nuclear asset or facility if an adversary attack occurred. Indeed, it was confirmed that a number of sites stopped even training for this mission because resources had been re-
duced below the minimum level necessary to meet this mission. As a result, DOE is increasing these numbers of recent years so that at this time all sites report they can meet this minimum capability. Several sites report using computer simulation programs to determine that their Protective Force can defend the adversary; however, many of these tests are not realistic. For example, performance tests are conducted by simulating the adversary with the weaponry or explo-

By systems that are critical to ensure the adequate protec-
tion of Special Nuclear Material (SNM). Many facilities have systems ranging in age from the mid-70’s to early-80’s technology. Because of the obso-

Another area of concern involves aging and deteriorating security systems throughout the complex. New systems are required to ensure effective protection because the obsolescence of these systems, replacement parts and services are increasingly expensive and hard to find. The effectiveness of protective measures (i.e., protective force response) are required to ensure necessary levels of adequate protection. Old systems are often dependent on technologies that are easily detectable and ready to access.
Continual reductions, delays or cancellations of planned security programs and projects increases the vulnerability risks to sites protection capability. Also, DOE is not realizing significant savings available through advancements in technology that have increased detection, assessment, and delay capabilities.

Some sites are using a variety of non-standards based alarm and access control systems that have not been fully tested to determine if they contain vulnerabilities, or if they meet Departmental requirements without compensatory measures. Such systems may have back doors or viruses, that allow the insider adversary to cripple the entire site protection system, thus leaving the site vulnerable. Some sites do not have qualified personnel to conduct these vulnerability tests and are generally unwilling to conduct any type of attack on the system to determine if such vulnerabilities can be accomplished.

**COUNTERTERRORISM MEASURES**

PDD–99, The United States Policy on Counterterrorism, requires all governmental agencies to develop and maintain security measures to defend against Weapons of Mass Destruction, including chemical and biological weapons. The Office of Safeguards and Security has developed policies and requirements for positions in line-item construction funding. This is the central, driving issue. Budget cutbacks have adversely affected all of DOE. As previously alluded to, however, when PDD–99 was released there is a tendency to cut security programs on a pro rata basis without the benefit of assessing the impact these cuts would have on the Department’s protection posture. The implementation of virtually every security program, from the Information Security Program to the Protective Force Program, has suffered significantly as a result. I believe many of these cuts are shortsighted and ill advised as they eventually lead to security lapses. Nevertheless, my office has no authority to force any of the Department to implement departmental security policies and requirements. Similarly, my office has no funds to provide to Program Offices or Field Offices to implement appropriate security measures. Without an adequate budget there is simply no authority.

Security Policy and Requirements Formulation. DOE security policies and requirements are based upon current threat data and requirements identified by outside intelligence organizations. DOE, the Department of Defense, the Nuclear Regulatory Commission, the Federal Bureau of Investigation, and the Central Intelligence Agency meet every two years to evaluate current threat data and formulate an agreed upon threat statement that governs security programs throughout the United States. Government. In addition, the Department of Energy internally reviews this threat statement annually. In DOE parlance, the resulting document is known as the Design Basis Threat. Program managers and designers develop the Design Basis Threat as the baseline for planning security measures. Security requirements are also levied upon the Department by the Office of General Services Administration. For example, Presidential Decision Directive 39 directed all Executive Branch agencies to protect against terrorist attacks. This directive resulted in an increased need for explosive detection equipment, more frequent security patrols, and hardening of structures. In some cases, Program Offices have directed their field elements not to implement departmental security requirements. This is due to 2 main reasons: The program offices can’t afford the new directive, or they simply don’t agree with it. In other cases, they have issued interpretive guidance that changes the security policy or undermines the effectiveness of that policy.

Safeguards and Security has no authority to demand compliance with departmental security policies and requirements.

I would be less than forthcoming if I failed to mention some positive aspects of the Department’s safeguard and security program. Let me start by saying that the program is staffed by a cadre of men and women throughout the country who are firmly committed to protecting the critical national security assets entrusted to their care. These individuals are most demanding, even dangerous in some respects. Yet despite the dwindling re-sources made available to them, these individuals perform in an outstanding fashion. Where this department has failed is in providing these professionals the necessary resources to allow them to perform their responsibilities appropriately. The Department has failed to provide adequate protection so that individuals will bring forward problems and deficiencies without fearing retaliation.

Progress has been made in some of the areas I previously addressed. In the area of physical security, the Department is working to protect the Nation’s nuclear facilities. Specifically, the Department augmented security at some field sites by deploying new technologies to safeguard special nuclear materials and weapons; worked with other agencies to train departmental protective forces; identified and developed more sophisticated detection and deterrent systems; and hired additional security personnel. New explosive detection systems are being installed at selected nuclear facilities and some sites are upgrading access control systems.

In the area of information security, the Secretary recently directed the shut down of classified computer operations at three national laboratories until such time as he was assured that information in the systems is being done so securely. From a longer-term perspective, the department is requesting a dramatic increase in budget for information security. This funding will be used to help further secure the department’s classified and unclassified computer networks. The improvements will help strengthen firewalls, decrease human intrusion detection devices, and fund rapid response teams to work with the FBI to detect and address security threats.

In the area of the control, measurement and accountability of special nuclear materials, the Department has established the Fissile Materials Assurance Working Group (FMAWG) to assess needed areas of improvement and make recommendations. In this regard, the FMAWG identified unmeasured or unaccounted for fissile materials and initiated action to resolve discrepancies. They further identified issues regarding the safeguarding of irradiated material and are promulgating policy for implementing safeguards. The Department is developing new technologies to tamper indicating devices and proposing pilot projects for field implementation.

**A PATH FORWARD**

All of these positive steps are good, necessary actions to ensure the adequacy of our protection posture. More is needed, however.

As previously addressed, organizational realignment of safeguards and security activities is sorely needed. I understand that this is now under review by the department. While addressing the problems inherent in the current organizational structure of the Department will not in itself solve all of the issues contained in this report, it will establish the necessary framework to allow resolution of these issues in a more effective and lasting manner. Simple organizational realignment, however, by itself, will not result in the fundamental change in approach that is required.

The Department is working closely with Congress to establish a budget line item for safeguards and security. Doing so will enable a more accurate accounting and control of funds and expenditures. It will also improve the likelihood that policy will be issued in conjunction with the necessary resources to implement that policy.

The President is responsible for having effective internal oversight of the DOE safeguards and security program; and failure
June 8, 1999

CONGRESSIONAL RECORD—HOUSE

over a twenty-year period. While there have been several periods when DOD has had effective, organizational and budgetary pressures have played too central a theme for this function to remain within DOE. An organizational defense Nuclear facilities Board should be established to independently review Security at DOE and the Laboratories. Further a direct reporting mechanism should be established to one or more of the Congressional Committees.

Perhaps the biggest challenge facing the Department today as we strive to meet our protection requirements is the attitude throughout the complex toward security. There are some that believe that safeguards and security is an overhead expense, I disagree, strongly. Safeguards & security is a mission-critical element. Without it, why bother creating new national defense technologies, if present or future foes can have ready access to it? To treat it as a mission-critical element requires a greater sense of accountability than seen to date. Secretary Richardson has committed to establishing and maintaining a centralized security program. We will take the commitment not only of the Secretary, however, but of every program official throughout the Department, where its operations are viewed as ancillary.

Both Congress and the public rightfully expect our best effort in executing this vital program. We should demand no less from ourselves.

DEPARTMENT OF ENERGY,

MEMORANDUM FOR DISTRIBUTION LIST

From: Edward J. McCallum, Director, Office of Safeguards and Security.

Subject: Status of Safeguards and Security.

This report provides a comprehensive review of Safeguards and Security activities throughout the Department of Energy complex. It provides a good forecast of where we are in the future of the Program. The report is structured to present a Departmental perspective of the Safeguards and Security Program. This report examines the management and coordination of Safeguards and security professionals. For the first time the report also contains a section which summarizes safeguards and security participation in National Nuclear Command and Control activities.

During the past year disturbing trends continued that resulted in additional budget reductions, further diminishing technical resources, reducing mission training and undermining our ability to protect nuclear weapons, special nuclear materials and other critical assets. This is occurring at a time of increased responsibilities resulting from the international transfer of nuclear materials and dismantling of U.S. nuclear weapons. Although traditional and time proven protection principles are still emphasized, it is becoming increasingly difficult to adequately protect our nation’s nuclear stockpile in the face of these resources, one of the more difficult to fulfill National Security mandates. It is imperative that the Safeguards and Security downward resource spiral be immediately halted. Special nuclear materials must be consolidated to reduce costs or additional resources must be found for protection. Adequate investment is essential to sustain a vital Safeguards and Security Program that continues to support the nation’s security, the public health, safety and our environment.

I am confident that the report will be a valuable tool to stimulate open conversation, provide constructive feedback and assist in addressing the continued viability of the Department’s Safeguards and Security Program. Collectively, we must continue to strive to maximize the use of our resources necessary to ensure requisite security for the Nation’s and the Department’s most vital assets.

Attachment.

CENTRAL INTELLIGENCE AGENCY,

DR. ERNIE MONIZ,
Acting Deputy Secretary, Department of Energy,
Washington, DC.

DEAR DR. MONIZ:

As the Central Intelligence Agency’s representative to the Department of Energy (DOE) Security Management Program, I am sending you some important perspectives concerning on-going discussions to reorganize the Department’s security element. Of concern is consideration of the current decentralized DOE’s security management apparatus and assignation of security expenses to indirect costs (i.e., overhead) at the individual sites and Laboratories. In my judgment, and based on our experience at CIA, DOE should undertake some realignment and reorganization.

Using CIA’s experience as an example, reorganization through division can be highly ineffective and inefficient. Shortcomings to CIA’s 1994 decision to divide the Office of Security were quickly exposed, including: expensive duplication of security activities, deteriorated management focus over a tangential security program, elimination of a coherent security career service, and dilution of CIA’s leadership role in the Community. Adding to the difficulties, security managers under this arrangement had limited control over the expenditure placed alongside and beneath numerous budgetary layers.

Director Tenet recognized these inefficiencies in his testimony before the Senate Appropriations Committee last May, he charged that consolidating CIA’s program in 1997. In addition, he has provided security with a stronger voice in its fiscal future. The process to reconstitute our security apparatus has been challenging; but, its benefits have already become apparent through a stronger, more viable security program.

The lessons learned after CIA decentralized its security organization have also been experienced by other agencies, several of which have been charged to reorganize their activities. With such stark examples of the shortcomings of decentralization in security apparatus, I urge you to give strong consideration to the implications of such reorganization of DOE.

Furthermore, in today’s world of sophisticated technological threats, and given the developing review at one of the National Laboratories already publicized, I would urge the Department to take further caution against leading the charge toward field autonomy, and anticipated the Department looking toward reinforcing centralization and maintaining a sound safeguards and security program.

When appointed to the Security Management Board a year ago I expected that the Department wanted the input of the representatives of other Agencies in security issues of this nature. In fact, I believed that obtaining such outside counsel on issues of this nature was the purpose for which the Board was established. Unfortunately, any experience with the Board indicates that it is a feckless exercise with no accomplishments, almost fifteen months after it was established. I would welcome the opportunity to further discuss my views with you at your convenience.

Sincerely,

RAYMOND A. MISLOCK, Jr., Associate Deputy Director
For Administration for Security.

Washington, D.C.-House and Senate investigators are launching new inquiries into the Energy Department’s $800 million security program and how it failed to stop the apparent compromise of many of the nation’s most sensitive nuclear-weapons secrets.

Rep. John D. Dingell, the Michigan Democrat who led several of the House Commerce Committee’s previous investigations in the 1990s, early this month wrote that “the department runs a system of “inverse reward and punishment.” People who have identified lax security at the nation’s defense labs have been punished and their scientific freedom ignored or abused, he said.

The panel will hold hearings this week on the latest example of this seeming paradox: Edward McCallum, the Energy Department’s top internal critic of security deficiencies, has been put on leave and is being investigated by the Federal Bureau of Investigations for allegedly leaking secret information. At the same time, Wen Ho Lee, the former Los Alamos nuclear-weapons scientist who allegedly transferred many of the nation’s most sensitive nuclear-weapons codes to an unprotected computer between 1983 and 1995, is described by the FBI as being “unprosecutible.”

There is no evidence that China obtained any of the codes, although Mr. Lee met with China’s weapons experts on two occasions during the 1980s and was among the most frequent visitors to the lab.

The Commerce Committee has threatened to subpoena 13 Energy Department officials who know about the investigation of Mr. McCallum, a 25-year department veteran who, among other things, has complained about difficulties in trying to protect the secret computer system at Los Alamos.

The network of 2,000 computers is used to store digital models of nuclear tests that show, moment-to-moment, how nuclear weapons work.

Committee members have invited Mr. McCallum to testify along with another department veteran, Glenn Podolsky, who runs internal inspections for the agency. While Republicans are leading the charge in the various congressional investigations, the two witnesses and others are expected to tell of foul-ups and budget shortfalls that date to the Carter administration.

Energy Department reports show that Mr. Podolsky, as early as 1994, had identified the problem that researchers could transfer data from the secured computer system to the unprotected one.

Over the weekend, Department of Energy officials said that a classified report prepared by U.S. intelligence agencies in November showed that there had been numerous efforts to penetrate the laboratories’ unclassified computer system. The secret report also noted that China was among
a number of nations the laboratories should regard as a threat. Still, investigators didn’t examine Mr. Lee’s computer until March and didn’t close down the classified system until last month. The report’s findings were first published in the New York Times.

Brooke Anderson, a spokeswoman for Energy Secretary Bill Richardson, said the secretary “is extremely concerned that the hearing did not address potential disclosure of classified information and his priority is to protect the national security.” Mr. Richardson, a former member of the Commerce Committee, irritated its leaders after a security hearing last week, accusing the panel of “exhuming the past.”

David Tipp, Mr. McCallum’s lawyer, said the information involved in the allegations against Mr. McCallum wasn’t classified and that he is being punished for being “a pain in the neck” about exposing security problems. Rose Gottemoeller, the assistant energy secretary who removed Mr. McCallum from his job, denied that was the reason, calling Mr. McCallum “a valued security professional” who has made “major improvements.”

Despite substantial spending on “gates, guards and locks,” the problem that the investigators decried relatively little scrutiny is the so-called insider threat. As the Cold War has faded, the threat has grown because many American citizens who become naturalized U.S. citizens, such as Mr. Lee, Taiwanese whose skills included modeling nuclear-weapons explosions on supercomputers.

Memorandum to: Al Santoli.
Director, Office of Security Affairs, U.S. Department of Energy.

Mr. JOSEPH MAHALEY,
Computers and thermonuclear weapons.

Lee, Taiwanese whose skills included modeling nuclear-weapons explosions on supercomputers.

The second area of conversation identified for review is the statement “Put some HE on top of it and boost it up—you don’t need to take it in the middle of Denver anyway.” This portion of the conversation refers to a radiological dispersal device. CG–SS–3, Chapter 3, “Malvolent Dispersal of Radioactive Material.”

Subject: Classification of Rocky Flats Transcripts

Mr. JOSEPH MAHALEY,
Director, Office of Security Affairs, U.S. Department of Energy, Washington, DC.

DEAR JOE: Since I have not been given the opportunity to present my technical analysis of the document’s contents, I believe that the decision that I made during the subject discussions with the DOE contractor whistleblower, Mr. Jeff Peters, will do so now. The presentation being made in this letter should have been part of the first step of the inquiry process described in DOE Manual 471.2-1B, Ta.(1), and should have been completed before proceeding with any inquiry. If both sides of a technical discussion had been laid on the table before the Department’s classification authority, I firmly believe that no other issues that have been reviewed or could be considered even close to classified information. Further, I was given a 30-minute briefing on Defense Programs weapons design systems in 1997. Nothing I have seen or heard of these programs would void or invalidate the published guidance in CG–SS–3.

Further, information concerning radiological dispersal is not case sensitive or case specific. A radiological dispersal threat as illustrated in CG–SS–3, Paragraph C, states that for information to be classified it must be detailed, specific information that, if not controlled, would significantly enhance the probability of such a dispersal.” Further elements of these conversations include, “Details of specialized access procedures to areas or equipment . . . ”. Detailed scenarios (combining details of radioactive source type, size and quantity; container design; dispersal mechanism design) . . .

I firmly believe that I have not disclosed classified information and have not crossed any boundaries, real or imagined. In no case were details or specifics provided any reader. I was not asked to draw conclusions that are completely external to these illegally recorded conversations. The transcripts have been reviewed by a number of DOE classifiers and all have reached the conclusion that the conversation does not contain classified information and in no way crossed any prohibited boundaries.

I believe that one element of the problem is the lack of understanding by the DOE decision makers of this issue and the classification guidelines and regulations that are in place to prevent the disclosure of classified information.

Sincerely,

JOE MAHALEY
Director, Office of Security Affairs
DOE

Memorandum for: Joseph M. Mahaley, Director, Office of Safeguards and Security

From: Edward J. McCallum, Director, Office of Safeguards and Security.

Subject: Henggner Study

I have completed my initial review of the subject document and offer the following impressions. These thoughts are not intended to be all inclusive, nor do they address all of the facts that I find questionable. In this report, the investigators did not refer to other documents or regulations regarding factual inaccuracies will be warranted. Beyond the factual accuracy of some of the items found in the report, however, it is evident that this study not only misses the mark of the task assigned, but if left unchallenged could serve to damage the Department’s standing in the security and intelligence community.

In reading the report, I am struck by the elementary understanding it portrays of the Safeguards and Security (S&S) Program, specifically as it relates to the national level directives that provide much of the foundation for many of the areas called into question. There is no mention of the Presidential Decision Directives (PDD) or the requirements contained therein governing federal agencies and their policies toward counterterrorism, explosives detection, radiological dispersal and weapons defense. In fact, the assertions offered are in direct contradiction to President Clinton’s policy on Counterterrorism programs.

Furthermore, it conveys a lack of understanding of the environment in which the Department operates that consequentely diminishes the value of any findings or recommendations.

Beyond the lack of depth of understanding of S&S Program requirements, however, I find the team failed to answer the only question that was posed to them. Specifically, whether current—DOE practices ensure that Special Nuclear Material (SNM) and Nuclear Weapons are adequately protected against Radiological Dispersal Device (RDD) and Improvised Nuclear Device (IND) threats. The short statements in the report that we need to change policies to require a higher standard of protection of SNM and SNM facilities provides no new information.

The single graphic depicting greater quantities of explosives relative to SNM types was recognized and many years ago when the Atomic Energy Commission began this program, and again in 1988 when the graded safeguards table for SNM protection was established. I was disappointed to find that specific time lines of existing guidelines currently in the Secretary’s office awaiting
June 8, 1999

CONGRESSIONAL RECORD—HOUSE

June 8, 1999

Mr. WELDON of Pennsylvania. Madam Speaker, Mr. McCallum has been punished and has been placed on administrative leave and may lose his job. Guess who now sits on the corporate board of directors, being paid, overseeing the operation of that same facility? You guessed it, Madam Speaker. Hazel O’Leary. Hazel O’Leary now sits on the board of directors of the company that oversees the Rocky Flats facility that Mr. McCallum at one time, even though it looks like a hodgepodge of blocks, it can be pulled down on the Internet site, as I have said earlier, and this site is www.house.gov/curtweldon. This document gives the full pictorial representation of what we think China had were occurring in the Department of Energy. But Notra Trulock lucked out. Because when the administration realized that Notra Trulock was telling the truth, they could not go after him. They gave Notra Trulock a $10,000 bonus and now Notra Trulock is on national media programs and talks about how the administration has gotten its act together.

It is a shame that Mr. McCallum did not precede Notra Trulock. Perhaps he would have gotten the $10,000 raise for being the whistle-blower. I can tell my colleagues, Madam Speaker, I am not going to sit by, and neither are a number of our colleagues, and see an innocent individual doing his job professionally be railroaded out of his position because this administration is embarrassed over the policies of their last administration. Security measures involving our national laboratories, our Department of Energy facilities, our defense installations, and our military and other technologies.

The American people, Madam Speaker, can now read the statement of Mr. McCallum for themselves in tomorrow’s CONGRESSIONAL RECORD. The American people also now, Madam Speaker, can read information I provided last evening giving the big picture of the China connection. I want to review that again today in some more detail.

As a member of the Cox committee, I had the opportunity, over the 7 months that we worked aggressively on this project, to meet a number of senior and very capable intelligence officers and people within our intelligence establishment who are absolutely frustrated by what they see occurring in this administration on security issues. When we completed the final report, I knew that the American people would not sit through and read, for the most part, a document that is almost a thousand pages in length. Very difficult to understand.

So working with this group of people, and I would add for the record, who are today currently employees of this administration, so I cannot name them because they will be given the same treatment as Mr. McCallum has been given, these people have given me the information that I am providing to our colleagues and to the American people.

This chart, Madam Speaker, for the first time, even though it looks like a hodgepodge of blocks, it can be pulled down on the Internet site, as I have said earlier, and this site is www.house.gov/curtweldon. This document gives the full pictorial representation of what we think China had...
say we are the fools if we are stupid enough to allow China to access information that we could be controlling. And the only reason why I think the buck stops here, Madam Speaker, lies with our own government. It was our government that failed the American people.

This chart outlines the Central Military Commission of the People’s Liberation Army of China. The red boxes on this chart, which are too difficult to read without having the chart directly in front of you, are the various military commands and entities that are a part of the Central Military Commission that we know have been involved in engaging and in acquiring technology for China. Now, some of that acquisition has been legal, and there is nothing wrong with that. If they can buy legal; these Peau, front companies? What was the motivation? We need to look at, because some of those green boxes have attached to them campaign donations. Ted Stoeng, $200,000 to $400,000 to the Democratic National Committee, or John Huang and James Ryo, and all of these people who were distributed millions of dollars to the Democratic National Committee. Or the temple that gave, through Maria Hsia, $50,000 at a fundraiser at a temple of impoverished religious leaders. Those connections need to be pursued.

This information, Madam Speaker, has been investigated much more thoroughly by the FBI and the CIA than I have. Now, I have seen some of the classified versions of this, which are far more elaborate, which I obviously cannot show publicly. What I have shown here is an unclassified version of the connections between these agencies that have been publicly identified. And in response to a question by a Member of Congress, Louis Freeh, the director of the FBI, was asked: “How much of the information that we are aware about in public form, like this, compares to what you know in the FBI and the CIA about what happened in this entire series of transactions?” The director of FBI director Louie Freeh. “The public knows about 1 percent.” One percent of what went on that we have in the FBI and the CIA in terms of these connections. One percent, Madam Speaker, which means that 99 percent beyond this our intelligence and our law enforcement agencies know about but we do not.

Madam Speaker, the individual that Louis Freeh assigned to investigate this, Charles LaBella, when he got through all of this evidence, well beyond what I have, wrote a memorandum to Louis Freeh that I have been told is almost 100 pages in length. That then resulted in Louis Freeh sending a memo to Janet Reno saying there is enough evidence here that you better impeach a special investigative effort, an independent counsel, because of what may be here. Janet Reno refused Louis Freeh and never released Mr. LaBella. That document has never been released to the Members of Congress nor the American public. In fact, I am not aware of any Member of Congress that I can tell you, Madam Speaker, every Member of this body and every citizen in America should demand of this President one thing, and, that is, to release the LaBella memorandum. If this President and Vice President Gore have nothing to hide, if there are no connections, if there is no scandal, if there is no grand scheme, if there are no implicating factors, it can all go away very quickly by releasing the LaBella memorandum. That document has been subpoenaed by the Congress and has been refused by Janet Reno to be turned over to us so that we have not had the opportunity to see what Charles LaBella said was there in that 99 percent of information that we do not know about. What I have given to the American people is the unclassified information that they can read, and it in itself is revealing. In fact, Madam Speaker, you will notice there are lines connecting many of these boxes. The solid lines indicate direct relationships between the PLA entities, the financing entities, and the front companies. So they are directly linked. The dotted lines, which are fewer in number, are those where there is a loosely connected relationship but not a direct relationship. Now, the logical question is, “Well, hold it, Congressman, you can’t just draw lines. You’ve got to provide some documentation.” Well, we did. Again working with existing employees of this government who have spoken to these financial people have been seen occurring have helped me identify 26 documents that are available on the public record that are not classified, that include newspaper articles, research documents, business reports, all annual reports, that can connect the lines. Each of the numbers on this chart which corresponds with a line gives you a specific document that you can read which I have outlined and identified in the CONGRESSIONAL RECORD yesterday which you can get off of my web site which gives you the public information that supports the linkage between these various entities. It is public information. Now, that is not all. And the media when I brought this out last week said, “Well, wait a minute, you haven’t established a direct relationship.” I cannot show classified information here. That is a violation of our Federal laws. I have given unclassified documentation which without a doubt shows the connections between the major effort to allow China to acquire technology that they have been wanting to buy.

Now, the administration would have us believe that this is really all concocted by China and that we should make China the evil empire. I am not doing that, Madam Speaker. I cannot blame China if decisions made by this administration allowed technology to flow legally, and that is what occurred in most cases. The influence that was peddled by these financial people ended up lowering the controls over our regulation of technology being sold abroad. The influence exercised by these people and their money influenced key decisionmakers in this administration. In my opinion, that lies in terms of fault at the feet of this administration itself. And as much as we would like to totally blame China, I blame our own government.

Now, are there instances where China went too far? Absolutely. And I would say this again on the record. If we can document that there is direct espionage that took place at our labs or at other facilities, we should use the full
force of our law to prosecute those people who in fact spied on America, much like I have done in the past. But what we cannot blame on this country if we foolishly sold them the bulk of this technology because of influence they were able to get by putting some money around or by currying favor with certain people.

Let me go to the second chart, Madam Speaker. The second chart, which was also prepared with the help of existing employees that work for this government who are in sensitive positions, gives the time line, the time line was liberalized and decontrolled technologies to the People's Republic of China. But I want you to know, it was not just China that benefited from these policies. Many of these policy decisions benefited a number of countries who were able to legally buy our technologies.

Now, I am not against our companies selling technology abroad. In fact, I am an advocate of our companies being able to sell and compete in the world marketplace. But, Madam Speaker, that has not occurred here. What occurred here was the elimination in a wholesale way of a legitimate process that was in place under previous administrations to monitor technology and to do it with our allies. As I mentioned last night, the reason I started this chart in 1993 was not because that is when Bill Clinton took office, it was because in 1993 this President ended a process called COCOM. COCOM was an organized group of our allied nations and that met on a regular basis to monitor sensitive technology that was produced in any one of the allied countries. There was an agreement that none of those COCOM nations would sell sensitive technology to countries that were in the process of acquiring it. That was in place and there was competition against us, so that none of our companies were hurt because all the countries that have this technology were working together so that no one could benefit.

It was this administration in 1993 that unilaterally decided to end COCOM, did away with it. Without even consulting with our allies, we said, "We're doing away with this process." From 1993 on, the floodgates opened. Because now you had companies in Great Britain and France and Japan who said, "Wait a minute, there's no more COCOM, we're not going to let the U.S. sell this technology abroad, we're going to sell competing technology." So now you had a mad scramble, you had American companies trying to keep up with German, French, Italian, British and Japanese firms who now saw American companies selling technologies that under COCOM they could not sell. So the European countries that are Europe, they said, "Wait a minute, we're going to sell that technology as well," and you had a mad scramble to sell technology in a totally uncontrolled fashion. That began in 1993 under this administration. The Commerce Department will tell you it was good for business. Some business leaders tell you it was good for business. We on the Cox Committee will tell you it was bad for America. Other allied nations will tell you it was bad for international security. Proliferation has never been worse than it has been for the past 6 years, Iran, Iraq, Syria, Libya, North Korea, India, Pakistan, all have cutting-edge technologies that up until 1993 were tightly controlled by COCOM, all of that ended by this administration. That is the focus of the Cox report.

The chronology of this chart takes each technology separately: warhead design, machine tools, low observable technologies, telecommunications, propulsion systems, high-powered computers, encryption technology, space launch technology, and analyses when key decisions were made by this administration and gives you the month and the date that allowed technologies to flow to that up until those dates were controlled and not being sold by the number of red dots here that during this time frame, the floodgates opened. We said, "We'll sell anything and everything and we won't consult with our allies." So you have had a mad competition among companies in countries that up until 1993 worked together to make sure that no one could unfairly have a larger share of the market with sensitive technologies. After 1993, the demise of COCOM, the floodgates opened. Everything and anything was for sale. Our companies got their way, they got to sell whatever they wanted, foreign countries and companies the same thing, and China took advantage of it.

Now, there are some interesting other factors about this chart, Madam Speaker. You will notice a gray area in the center of this chart, starting in 1995, ending in 1997. Why did I make that gray? Because in 1995, we have been told by Bill Richardson that this administration found out that China was acquiring our most sensitive technology. And if you listened to Secretary Richardson, this is what he said: "Boy, when we found that out, we took aggressive action. We said, 'We're not going to let China steal our technology.'"

"Well, that is what he said. The color in the blue, Madam Speaker, and all the red dots you see here, just under Space Launch alone, 15 separate actions after this administration knew that China had stolen our design technologies that they took in 3 years to give more technology to countries like China. And that is across the board, Madam Speaker. So the blue indicates where we learned that China was trying to acquire this technology and doing it illegally, opened the floodgates even further for more technology.

There is one more factor here, Madam Speaker. All of us in America know that the election of 1994 was bad for international security. Pro-liferation has never been worse than it has been for the past 6 years, Iran, Iraq, Syria, Libya, North Korea, India, Pakistan, all have cutting-edge technologies that up until 1993 were tightly controlled by COCOM, all of that ended by this administration. That is the focus of the Cox report.

The chronology of this chart takes each technology separately: warhead design, machine tools, low observable technologies, telecommunications, propulsion systems, high-powered computers, encryption technology, space launch technology, and analyses when key decisions were made by this administration and gives you the month and the date that allowed technologies to flow to that up until those dates were controlled and not being sold by the number of red dots here that during this time frame, the floodgates opened. We said, "We'll sell anything and everything and we won't consult with our allies." So you have had a mad competition among companies in countries that up until 1993 worked together to make sure that no one could unfairly have a larger share of the market with sensitive technologies. After 1993, the demise of COCOM, the floodgates opened. Everything and anything was for sale. Our companies got their way, they got to sell whatever they wanted, foreign countries and companies the same thing, and China took advantage of it.

Now, there are some interesting other factors about this chart, Madam Speaker. You will notice a gray area in the center of this chart, starting in 1995, ending in 1997. Why did I make that gray? Because in 1995, we have been told by Bill Richardson that this administration found out that China was acquiring our most sensitive technology. And if you listened to Secretary Richardson, this is what he said: "Boy, when we found that out, we took aggressive action. We said, 'We're not going to let China steal our technology.'"

"Well, that is what he said. The color in the blue, Madam Speaker, and all the red dots you see here, just under Space Launch alone, 15 separate actions after this administration knew that China had stolen our design technologies that they took in 3 years to give more technology to countries like China. And that is across the board, Madam Speaker. So the blue indicates where we learned that China was trying to acquire this technology and doing it illegally, opened the floodgates even further for more technology.
over 6-year time period. Here is that chronology as documented by the Congressional Research Service.

The dates, the type of transfer, who the transfer went to are all documented. This was not done by some partisan group; it was done by the Congressional Research Service, a part of the Library of Congress.

These violations of arms control agreements by China, were they sent technology? Where did they send the technology to? Let us look at the chart.

Well, they sent technology to Pakistan, Iran; Iran? North Korea, Syria. They sent solid propellant production technology to Libya, Iran, Egypt. They sent missile accelerometers and gyroscopes to Iran, Syria, Libya, Libya, Egypt and Pakistan. They sent antiship missiles to Iran. They sent more material to Pakistan; chemical weapons technology to Iran again.

All of these transfers done by China. What was the response of this administration? Nothing.

On, yes, two times out of about 17 or 21, I forget which it is, they did impose temporary sanctions; but they eventually waived them.

So not only are we getting Chinese access in a way they never had access before, not only were we helping to expedite and grease the skids for the financing of the purchase of technologies, but we were ignoring violations of arms control agreements that China was required to abide by. We did not call them on these violations.

And at the bottom of the chart, Madam Speaker, even though I could not complete it, I was only able to do this chart, but I list a number of times that the major players in the Chinese financing scams visit at the White House, not visited Members of Congress, but were in private visits in the White House itself.

In the case of John Huang, in the one year of 1993 alone, we know of 12 times he was in the White House. In 1994, twice; in 1995, let us see, one, two, three times; or 1994, three times; 1995, three times. These are people that are involved in that elaborate scheme of organizations and financing entities that were given direct access to our White House, to our top policy maker to our commander in chief, to our key leaders who were then being pressured to relax our policies relative to technology being sold abroad.

Madam Speaker, these two charts represent the pictorial view of the Cox committee report. They represent what needs to be explored further.

I am not here as a partisan, Madam Speaker. Both times I ran for mayor of my hometown I was the nominee of the Republican Party and the Democrat Party both times I ran. I work with many Democrats in this body and frequently get up on the floor of this House and praise our Democrat colleagues for their leadership role on defense and when we joined with members of the Democrats on a number of key issues involving social policy, family medical leave, environmental policies, protection for our workers, and I have supported the President and the administration in some of those issues which my party has not been supportive of. But, Madam Speaker, when it comes to national security, we have a big problem here. This needs to be looked at beyond the Cox committee.

To me, I know why in my mind Janet Reno turned down the recommendation of Louis Freeh based on the memos sent by Charles LaBella to appoint an independent counsel. I am convinced, Madam Speaker, the evidence is there. I am convinced that 99 percent that we have been told we have not seen yet has far more than many people in this country want to become public.

I am also convinced, Madam Speaker, that we had better pay attention here. This is not some story about a dress, this is not some intern in the White House. This is not some story about a travel office. This is not even about Republicans or Democrats. Madam Speaker, this is about the very core of what our country is about. No one, no party official in either party, no elected leader, has the right to allow a wholesale technology faucet to open that we are going to have to pay the price for.

Now, if I am overreaching, Madam Speaker, I do not think I am because, a member of the Cox committee having sat through as many of those meetings as any one of my colleagues, with perhaps the exception of Chairman Cox himself, knew that the FBI and the CIA has, and I have only seen a small fraction of what is not on this chart. I know there is much more.

If there is nothing there, Madam Speaker, the President can clear this entire issue up in a heartbeat. All he has to do is release the entire unabridged version of the Charles LaBella memo to Louis Freeh. If there is nothing to hide, if there is nothing to these connections, if there is no story, I will be happy.

I do not think that is the case. Madam Speaker. I think the reason why Janet Reno did not accept Louis Freeh's recommendation, based on LaBella's memo, is because she knew what is there. That document that LaBella prepared, which I understand is quite voluminous, goes into extensive detail and actually points to individual people.

Madam Speaker, this country, this democracy, nearly the American people and its elected officials to see the overview of the evidence that LaBella gave to Freeh that now remains closed and confidential. If there is nothing there, then there is no problem with the memo; if there is no evidence, if there is no story, if there is no substance, the train will go on. And, then the China story will end, and we will make the necessary corrections to our own policies.

Madam Speaker, I would encourage every one of our colleagues and every constituent in every district of a Member of this body and the other body to demand that this administration do one thing: release the full text, the uncensored text, of the Charles LaBella memorandum to Louis Freeh. Let us see what evidence they thought may be there in terms of a greater scheme for the Chinese to acquire technology by facilitating and greasing the skids of certain key people and certain key agencies that ended up with America's security being harmed. That was the unanimous vote of all nine members of the Cox committee, that America's national security has been harmed by the actions that we investigated in the Cox committee work.

We cannot just stop with this document, and we cannot rely on the mainstream media because with the exception of a few people like those that I have mentioned and some others, the mainstream media is too stinking lazy to go through the investigative details necessary to uncover what is here. We need to have this administration come clean, give us the uncensored text of what Charles LaBella said to Louis Freeh which only went to Janet Reno. When that happens, we will then know the true extent of the China connection and its impact with this administration.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mrs. Biggert). The Chair will remind Members to refrain from making personal references towards the President.

INTRODUCTION OF LEGISLATION TO DENY COMMUNIST CHINA NORMAL TRADE RELATIONS STATUS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 1999, the gentleman from California (Mr. Rohrabacher) is recognized for 60 minutes.

Mr. ROHRABACHER. Madam Speaker, first of all, I would like to commend my colleague, the gentleman from Pennsylvania (Mr. weldon). We have worked together over these last 10 years while I have been a Member of Congress on many, many occasions, and I find Congressman Weldon to be a patriot, a man of integrity, a man of courage, and I think when all of this is said and done, when we find out the jeopardy that our country has been put in and take the measures that are necessary to correct this situation and to
make our country safe again, the gentleman from Pennsylvania (Mr. WELDON) will be on the list of real American heroes that came about in save the day, and I am just proud to serve with him.

Madam Speaker, tonight it is fortuitous that I will be speaking after the gentleman from Pennsylvania (Mr. WELDON) because my remarks are in parallel with what Mr. WELDON has been talking about. It goes into a slightly different subject. Tonight I will be talking about Most Favored Nation status and our economic, as well as military and diplomatic, relations with China. But of course everything that Mr. WELDON has said today amplifies the need that I will be demonstrating for us to reexamine American policy towards Communist China.

The gentleman from Texas (Mr. ARMSTRONG) let me put the ginning that when it comes to Communist China, we have been treating a hostile power, the world’s worst human rights abuser, as a strategic partner. That is what this administration has insisted on calling Communist China, and I believe that Americans will pay a woeful price for this irrational, amoral and greed-driven policy if we do not change it, and that is what we need to do to change that policy that has been in place to some degree or another for 2 decades, but especially in these last 6 years.

Yesterday I introduced legislation to do just that, to change that policy. It is a bill of disapproval of extending so-called “normal trade relations,” which was previously known as Most Favored Nation status, with Communist China. So what my proposal is is that we deny Communist China normal trade relations status with the United States, formerly called Most Favored Nation status.

The time, Madam Speaker, is long since past when the United States should reexamine its fundamental policies toward the Communist dictatorship that now rules the mainland of China. Our commercial policies, as well as our diplomatic and military policies, for the past decade have worked against the interests of our own people and have not, as we had hoped, increased the level of freedom enjoyed by the Chinese people. In fact, some of the initial progress that we saw in China has now gone in the opposite direction, especially since the end of the Reagan administration and the tragic national reversal in China in 1989 at Tiananmen Square when they had the massacre at Tiananmen Square.

The gentleman from Texas (Mr. ARMSTRONG), one of our Republican leaders here in the House, defines “insanity” as doing more of the same, but expecting the result to be different. Well, for 10 years the cause of freedom in China has been in decline. Things are getting worse. So much for the engagement theory, the strategy of engagement, and what we hear from those people advocating normal trade relations and to continuing our relations with China is that continuing our fundamental policies toward China will bring about different results now.

Well, that makes no sense. It is the unreasonable and perhaps irrational optimism of some people to assume that China is going to be different, that there will be different results now. So much for the engagement, and I just want to be a proud to serve with him.

The Beijing regime is modernizing and expanding its military power while threatening the United States and bullying its neighbors, especially in Taiwan and the Philippines.

Big business falsely claims that China is a country that is liberalizing through commercial engagement. There is no evidence for that claim. So every time you hear it: Well, we have got to engage China, that is what will make them better; just be aware that there is every evidence to show just the opposite. In fact, the empirical evidence shows that China is going in the opposite direction, that engagement is not making things better, is not causing a freer China, but instead for the last 10 years has resulted in more repression, more militarization.

Furthermore, the trade relationship is working against the people of the United States. So here we are in an economic engagement that is not helping us bring about a freer China, thus, less belligerent, thus a China that will be more peaceful. It is not doing that, but it is also not even helping us economically.

The Chinese are using their $60 billion annual trade surplus with us to modernize their Armed Forces, including building nuclear missiles aimed at the United States, and they are continuing to proliferate weapons of mass destruction. For example, Communist China is reported to be the power behind North Korea’s space program. Get into that.

North Korea has a space program. This is a country that has people who are starving by the thousands, that we are giving millions of dollars worth of food aid to, but they have a space program? You got it. Communist China is helping the North Korean regime with a so-called space program. In other words, they are helping them build rockets that, when tested, end up flying over Japan and land close to Alaska.

North Korea, of course, is not the only looney country Communist China is helping along with deadly weapons technology. You have got Iran, Libya, Pakistan, all have benefited from Beijing’s helping hand. Of course, some of the technology now being handed over China is continuing to ship weapons of mass destruction technology to the Middle East and South Asia, despite repeated promises to end such activity.

A separate U.S. intelligence report found that China has recently provided North Korea with specialty steel used in the building of missile frames. However, the State Department officials, including Secretary of State Madeleine Albright, have repeatedly avoided answering questions before the House International Relations Committee hearing when asked about China’s ongoing proliferation activities.

When Secretary Albright was in China last summer with the President, China conducted its first successful test of a motor for a ballistic missile that can strike the United States from China. So here was the President of the United States, so eloquent in his presentation, there he was representing us, along with Secretary of State Albright, supposedly representing our interests. They were aware that this new missile engine was being tested, a missile engine that could threaten the people of the United States. They were also aware that weapons technology had been stolen from the United States that would permit Communist China to build warheads, nuclear warheads, that would be on the top of those new rockets, and these rockets could strike the United States.

Yet there was no record of the Secretary of State or President Clinton raising this issue with their Chinese hosts. Instead, they continued on that visit to praise the increasingly, I would say increasingly bidden communist leaders, as being strategic partners, strategic partners, and the type of people that we can do business with.

This is very sad. It is more than sad, it is frightening. The recent Pentagon report describes how Chinese Government-owned companies are selling weapons technology and knowhow and providing training to countries such as Iran and Pakistan. An American military official familiar with the report said that the Chinese are skirting non-proliferation treaties with the United States.

So they have agreed not to proliferate. This was the President’s great accomplishment, supposedly, with Communist China. We were going to send them and allow them all sorts of trade benefits so they would not proliferate, yet we know now they are proliferating and developing weapons of their own and giving them to these hostile and
somewhat crazy states, states that are lacking in positive and responsible leadership. But the Communist China is shopping for the technology anyway, even though they have made these agreements.

The Chinese are shipping these rogue nations missile components, some of which, of course, are American products as well as American knowhow, and they are shipping the components rather than shipping the whole missile. That way they are saying they are not really proliferating missiles to these other countries.

But they are. They are proliferating on a routine basis, of course, without technically breaking the agreements with the United States, by just sending the parts to the missile. This nefarious behavior would be, we might call it the Mandarin version of a famous Arkansas homily, “smoke, but don’t inhale.”

After reading the Cox report, one is struck by the mind-boggling loss of our country’s most deadly secrets. When you hear the gentleman from Pennsylvania (Mr. WELDON) explain the magnitude of the loss that we have seen, it takes your breath away and makes you wonder how our children will live, what type of lives they will live, whether or not America could be incinerated by a Chinese dictatorship that feels it can afford to lose hundreds of millions of people if it means wiping out its enemy, 100 or 200 million Americans.

The theft of U.S. nuclear secrets by Communist China is surpassed only by the complete abandonment of security precautions at our Department of Energy under the Clinton Administration, as well as a brazen attempt by the Clinton Administration to keep the knowledge of this catastrophic transfer of technology, to keep this news of this from the Congress and the American people.

On May 30, the New York Times reported the utter cynicism and duplicity of the Clinton administration concerning our nuclear weapons programs. After the Cox committee released its report on Chinese espionage at our nuclear labs, Bill Clinton called protecting atomic secrets “a solemn obligation.” That is what President Clinton called it.

However, in private, administration officials told reporters, and this is reported by the New York Times, that openness, a euphemism for giving away our nuclear secrets, has its advantages, despite the risks, and has been a potent force for international good.

Hazel O’Leary, who the gentleman from Pennsylvania (Mr. WELDON) has also quoted and talked about some of her policies, in fact Mr. WELDON was right by targeting this and even add to what Mr. WELDON was saying, Hazel O’Leary, President Clinton’s Secretary of Energy from 1993 to 1997, was the grand poobah of nuclear openness, as we have seen by what Mr. WELDON told us this evening. In fact, she massively declined federal law and she actually put them on the Energy Department’s web site, including the diagrams of some advanced nuclear weapons which we saw tonight in Mr. WELDON’s presentation.

When asked about that recently, Mrs. O’Leary said, “we pulled off an impossible feat,” and she recently boasted this while defending her action. She went on, “To say that all of our efforts were negative is not to understand the benefits, not to see what we did in terms of building international trust.”

See, the idea is if everybody had all this information, information about deadly weapons technology that we had spent hundreds of billions of dollars developing, that if everyone had it, well then, it might be a more peaceful world, this is looney tunes. This is someone who has a fanatical anti-American attitude in a position to hand over to our worst enemies secrets that put our young people and our country in jeopardy.

Needless to say, most defense experts obviously disagree with Mrs. O’Leary’s bizarre, and I would say strange, logic. It takes more than a postgraduate degree from an ivy league school to have logic like this. However, O’Leary could not have undertaken this massive giveaway of a decade of brilliant and costly weapons research that permitted the United States to be the arsenal of democracy, she could not have done this without at least the tacit support of the Commander in Chief.

The New York Times surmised that the new age defense policy emanating from the White House explains why Mrs. O’Leary did this. It explains also the administration’s slow response to evidence of Chinese spying and the loss of blueprints for frighteningly powerful weapons.

In 1993, O’Leary told a news conference at the start of the openness process, “The United States must stand as a leader. We are declassifying the largest amount of information in the history of our department.” O’Leary also did away with a counterintelligence effort, security badges and effective security training. She eliminated all of these, as Mr. Weldon alluded to a few moments ago.

Remember the promise to reinvent government? Remember that promise? Well, this is it. This administration reinvented our government policy towards its labs. You might say they turned our nuclear labs into a high-tech K-Mart. I guess in Arkansas you might say Wal-Mart, in terms of the giving away or making available to international inspectors and spies information that we invested billions of dollars to develop.

This was not a going-out-of-business sale on the part of the United States Government; this was a going-out-of-sanity sale on the part of the United States. I guess Wal-Mart had Thailand, but benefitted the most were the minions of the People’s Republic of China, the Communist Chinese, our erstwhile constructive strategic partners.

Madam Speaker, I yield to my friend from Arizona.

Mr. HAYWORTH. Madam Speaker, I want to thank my friend from California and our colleague from Pennsylvania (Mr. WELDON) who preceded us in the well of the House. If there have been two among the 435 honored to serve in this chamber, it has been the gentleman from Pennsylvania and the gentleman from California who, together, have sounded the clarion call to the extent of the threat which affects our national security.

Madam Speaker, I was honored earlier today to bring to this floor a measure that deals with the educational security of rural America, and it is worth noting that there is only one member of this House present who voted against the legislation for the New Education Land Grant Act.

Madam Speaker, I said at that time, this is an issue that affects us not as Republicans or as Democrats, but as Americans. Madam Speaker, the full House assembled worked its will in bipartisan fashion.

How sad it is, Madam Speaker, to see what transpires in this town via smoke and mirrors and spin, when we are dealing with a problem that threatens the security of every American; to read in the Little Rock Democrat Gazette from one columnist that this is some form of red scare, to have those hurl verbal brickbats at a clear and present danger to the United States.

As my colleague from California no doubt experienced during the district work period, Madam Speaker, I heard from countless people from those who had borne the brunt of battle, from those who had worn the uniform of our country in peacetime and in war, from those who were concerned citizens, asking, what is this Chinese connection? What is this notion of a strategic partnership that would involve illegal political donations to those who would occupy our highest offices in the executive branch, what would possess business leaders to so jeopardize American security to grant technological prowess to the Communist China, and why would there be those within the administration who would turn a deaf ear and a blind eye to the theft of our most precious secrets?

□ 2300

As my colleague from California pointed out, why would there be cabinet officials who had a curious notion of utopia who would open our national labs, expose our national secrets, create an environment in which an employee at Los Alamos could put on an
unsecured computer our legacy codes, the width and breadth of American nuclear knowledge and technological knowhow to fall into the hands of any foreign power, but especially the Communist Chinese?

And how, Madam Speaker, could we have an Attorney General, given the number of wiretaps for national security, that were authorized, fail to authorize the two wiretaps involving one Wen Ho Lee, the accused assailant who would surrender our nuclear secrets to the Communist Chinese?

Again, Madam Speaker, as my colleague, the gentleman from California, as our friend, the gentleman from Pennsylvania, so eloquently pointed out, this is not a matter of being Republican or Democrat, this is not a matter of preening and posturing for the last election.

Indeed, Madam Speaker, this goes to the core of our national security and the security of every American family and our place in the world, and those who would oppose us and use our technologies against us. That is what we deal with.

Mr. ROHRABACHER. Madam Speaker, perhaps the most disturbing part of this whole controversy is the response that we have had from people who are trying to protect the administration from being held accountable for certain things dealing with this controversy.

For example, I heard in a committee hearing, those of us who were complaining about this were accused of vulgar partisanship, as if in bringing this up we were doing this out of partisan concerns.

I certainly explained at that point that the only thing vulgar and the only vulgar partisanship going on was that certainly on the other side felt compelled to have to try to block those of us who were trying to investigate this, trying to hold those who have committed this sin against the American people accountable, claiming that we were being partisan in doing so.

Even today we hear people who are apologists for this, and this has to be labeled a national security catastrophe of a magnitude that we have yet to experience. Even the Rosenberg catastrophe, where Josef Stalin got his hands on the first nuclear weapon, that was horrible, that was a bad thing. That affected the entire Cold War. It probably led to the war in Korea. But that probably was not as bad for our long-term national security as what has happened here.

But we are told even now by these people who are trying to say that, well, it is not really that bad, and how many times will we hear someone say, we spy, our allies spy, everybody spies, so how can we blame China? Yes, in a way, how can we blame China? We have to blame the incompetence or culpability of people in our government to let this happen.

But let me point out, it is not the same when Great Britain or Belgium or Italy or a democratic country spies on country. Great Britain is not aiming its weapons at the United States. We cannot perceive and conceive of a situation where they will.

But what we are talking about when someone says that, well, we spy, they spy, everybody spies, what they are talking about is a moral equivalency argument. This is the same moral equivalency argument that says there is nothing, no difference between a democracy and a vicious dictatorship. This is the type of thinking that leads to the type of actions that were taken by Mrs. O'Leary there at the beginning of the administration and probably consistent with the President's world theory that you can just shovel all this information out and every country can have it, regardless if they are a dictatorship or a democracy, and it will not make any difference.

It is more likely, and this is the motive here if you have a moral equivalency argument, we can then let all of this information out and we can build a world authority, and perhaps that was the goal.

Two things we should know about, moral equivalency and globalization. Moral equivalency and globalization, that is a formula for tyranny. It is a formula for the destruction of the United States of America. There is nothing morally equivalent about a democratic country that protects the rights of its people, protects the rule of law, and defends the Constitution of the United States. We take our oath of office, we take our oath of office to the Constitution of the United States. We hear the President and Vice President talk about the Constitution, talk about fighting for the Constitution of the United States; not the U.N. charter, not the NATO charter, not a utopian notion of a strategic partnership, but our allegiance is to our Constitution, to our sovereignty and to our legitimate national interest.

How tragic it is that it appears those national security interests have been bartered away for campaign contributions, or naively given away for global considerations.

Mr. ROHRABACHER. Madam Speaker, I would like to go through a few reasons of why China is not our strategic partner. People have to understand, there is a lot of rhetoric about China being the worst human rights abuser. People do not understand that the specifics of what we are talking about.

What we have here is the world's largest dictatorship. According to Amnesty International, there are thousands of political prisoners who remain in prison today in the Lao Gai forced labor camps, which are a prison system where you have basically slave labor. Sometimes these are just, as we say, thousands of political prisoners who...
are making some of these low-cost items, and this suit did not come from China.

But perhaps the suit worn by someone who is reading this CONGRESSIONAL RECORD at listening tonight is made in Kosovo. One must remember that that suit might have been made by someone who simply was a religious believer who was thrown into a prison system and forced for decades to work as a slave laborer because of his or her faith.

There are at least 2,000 persons in prison for so-called counterrevolutionary crimes. Some 200 Tiananmen Square protesters, after 10 years, are still in prison for peacefully participating in pro democracy protests.

During the past 2 months, the Chinese Communist government has issued new laws. This is just the last 2 months, that strengthen the Communist party and further restrict freedom of speech and the formation of political parties.

Genocide continues in Tibet where hundreds of thousands have perished since the invasion of 1950. China’s own statistics show that, during the 1959 freedom uprising in Tibet 87,000 Tibetans were “eliminated.” Today the Tibet Information Center in London cites at least 183 political prisoners at the end of 1998, including 246 women. The Physicians of Human Rights have reported the brutal torture of Tibetan political prisoners by their Chinese jailers, and this torture by their Chinese jailers is rampant.

The Chinese Government has recently issued a new law in Tibet eliminating religion in and promoting Marxism. This is the Chinese Government in Beijing that suppressed the young religious leader who would then take the seat of the Dalai Lama someday if he is still alive. What monstrous regime would take a little child who is nothing more than a pacifist religious leader, a figure of pacifism and a religious Buddhist, and take him away and perhaps murder him.

On May 29, the South China Morning Post Newspaper reported that, since March, Beijing has deployed extra troops to tighten control over Tibet. In addition, they have recruited former People’s Liberation Army troops from China to migrate to Tibet to act as sort of a civil guard to assure China’s control of Tibet by force.

So here we are, as we are fighting and spending tens of billions of dollars to try to thwart ethnic cleansing in Kosovo, but we are calling the Communist Chinese regime our strategic partners when they are engaged in ethnic cleansing every bit as brutal and every bit as criminal as what is going on in Kosovo.

When some people claim that China is not a threat to its neighbors, they conveniently forget that when Mao Tse Tung conquered China in 1950, Tibet was a sovereign country with its own language, its own religion, and its own culture. There is no difference, as I say, between China’s occupation and the genocide of Tibet than Japan’s brutal occupation and the ethnic cleansing of Manchuria in the 1930s.

The United States tried to pretend at that time in the 1930s that the Japanese were not committing an aggression. They had hoped that by trade and finance that the Japanese would be able to be turned, that the presence of Japanese students at our colleagues and universities, that dancing the Charleston would help the Japanese turn a different way, that Japan would be our friend with this type of engagement.

In 1941, these delusions lead to the tragedy of Pearl Harbor. Given the lethal power of today’s weapons of mass destruction, we would not have the luxury of months to build up our Navy and our military and our Air Force to respond to a devastating surprise attack by China’s so-called asymmetrical warfare plans.

In the Xinjiang region, in the far regions known as East Turkestan, that is Xinjiang, the suppression of religion, and that is the Muslim religion and political arrests and executions parallel the systematic brutality in Tibet.

In 1999, Amnesty International documented 190 executions of political prisoners in that province after unfair and summary trials. The report also cites 200 political prisoners known to be detained at this time with arbitrary arrests continuing.

Whether it is Tibet or in East Turkestan, while the local populations continue to be subjected to forced abortion, part through sterilization, ethnic Chinese, as I have stated, the ethnic Chinese are moving in. Hordes of them are coming in and establishing these areas as colonies, as resource-rich territories.

China is making major military moves, not only on the continent of Asia, but is moving towards places like the Spratley Islands, bullying our regional democratic allies, such as the Philippines and Indonesia, and threatening the vital sea lanes of the South China Sea.

There are some people who claim that it is wrong to compare the Communist Chinese to Hitler and the Nazis. I agree maybe that that comparison is not right. But I do believe that there is a more accurate comparison; and that is, the Communist Chinese should be compared to the militaristic regimes in the Japanese era of the 1920s, perhaps the regimes of Tojo and Yamamoto who were in charge of Japan.

What was the goal of the Japanese in the 1920s? They believed themselves to be racially superior. They believed they had a right to dominate Asia and to conquer the Pacific. It is ironic that, in less than 10 years before the attack on Pearl Harbor, American Admiral Yamamoto attended graduate school in the United States at Harvard University and as a student in the United States was made aware of many American military strategies.

The Spratley Islands are close to the coast of the Philippines, Malaysia, and Indonesia. China is now building fortifications on these atolls and reefs while it builds up a blue water navy and a submarine force.

De facto, there has been no militarization of these islands, the Spratley Islands, since the Japanese used them as stationery aircraft carriers during the early stages of World War II. The Spratleys were turned in at that time, they were turned into military bases in preparation to invade the Philippines.

It was incredibly eerie last December, on the eve of Pearl Harbor Day, while I was special envoy to the Philippines and my good friend Jeff Baxter toured the battlefield and the tunnels of Corregedor right outside of Manila. And on this pleasant tropical mountainous island, American military men and women held out and their ammunition ran out and they held out against overwhelming Japanese occupation force.

In fact, my wife’s Uncle Lou was captured by the Japanese in the Philippines. He was part of the Bataan Death March where he saw innocent civilians being bayonet and horrible human rights abuses and abuses and horrible things that happened to those American prisoners.

That was what happened because of our policy in the 1920s, ignoring what was going on in Japan. That was our policy of engagement with the Japanese, just as our policy is now to the Communist Chinese; and they have the same dream the same dream, the same domination of Asia and the Pacific basin.

Two days later after my visit to Corregedor, my friends and I, including Filipino Congressman Roy Golez, a graduate of the U.S. Naval Academy flew over the Spratley Islands in an antiquated Philippine air force C-130, which is around 150 miles from the Philippines over to the South China Sea.

We dropped out of a thick monsoon cloud cover to about 500 feet over the Spratleys over an outcropping called Mischief Reef. In that lagoon at Mischief Reef, within this oval-shaped reef, there were three large Chinese warships. I witnessed hundreds of Chinese construction workers with sparks flying off their welding torches, building permanent military structures on that reef 150 miles off the coast of the Philippines, and bracketing the South China Sea and all of the routes, the trading routes that go through there.

Half or three-quarters of the Japanese trade goes through those areas, that trading route, that waterway.
Within 2 months after that flight, Congressman Golez sent me new photos showing me a three-story Chinese concrete demand and control building on the very site that we overflew. This grab of territory and this bullying of the Philippines is a warning we ignore at our own peril.

Again, it is time to fundamentally change our policies toward the Communist Chinese government that controls the mainland of China. We are not talking about isolating China. Those claiming that we are trying to isolate China are setting up a false dichotomy. We are talking about a rational policy towards a hostile dictatorship, not an isolationist policy of ignoring overseas threats.

In fact, those of us who are advocating to have a strong and forceful policy toward China, who stand by the opposite of those who want to overlook Communist Chinese aggressions.

Those are the ones who are more akin to the isolationists of the past. In fact, they are relying on wishful thinking instead of making the tough decisions that are necessary to avert war. We are the realists. We are not isolationists. We are the ones who are asking for a policy that makes sense when confronting a dictatorship. And dictators do not respect weakness. They respect strength, they respect purpose, they respect people who watch out for their own interests.

I introduced a resolution, as my colleague is aware. I introduced this resolution yesterday and it is a resolution of disapproving the annual extension of normal trade relations, formerly Most Favored Nation status, and we do that by our own Democratic principles, and we will protect the economic as well as the military interests of our country.

And when we talk about our country, we are not just talking about a small business elite, a clique of billionaires who make a short-term profit at a time when the economic policies are hurting us economically and the military consequences are overwhelming.

Madam Speaker, I yield to my colleague, the gentleman from California.

Mr. OSE. Madam Speaker, I thank the gentleman from California and I am particularly pleased to be here with my good friend in the Speaker's chair. I do not speak often on the floor, and I welcome the chance to come down today.

I, in particular, was sitting in my office listening this evening to the discussion on the floor and I thought of the Cox report that I have been reading, traveling back and forth to my district, and in volume I, on page XXIV, it talks about the basis from the Reagan years, that that having been a decision on our part here in the United States to use our relationship with the People’s Republic of China as a strategic offset in the Cold War with the Soviet Union and also to buttress our ability to launch space-based vehicles.

The determination of the Permanent Select Committee on Intelligence, and as noted here in the Cox report, again on page XXIV in volume I, is that that decision, contrary to what people might hear banded about by many of our colleagues, no longer is applicable; that the consequence or the necessity of having Red China as an offset to the Soviet Union no longer exists because the Cold War no longer exists. So the strategic underpinning of our commercial interaction with China has evaporated.

The reason I bring that up is that in that same document, on XVIII, it talks about two particular war that have engaged in significant commercial interaction with the PRC, having to do with their missile defense and development programs, those being Hughes and Loral, and I just wanted to read to my colleagues some of the language that was agreed upon by the bi-partisan China commission that the gentleman from California (Mr. Cox) chaired, for the record, having to do with multiple independent reentry vehicles; having to do with accident investigation techniques; having to do with testing, modeling and simulation, hardware design and manufacture of these ballistic missiles.

I quote. “In both 1993 and ’95, Hughes failed to apply for or obtain the required Department of State licenses for its activities, because Hughes knew that the Department of State would be unlikely to grant the license and that the licensing process would in any case be lengthy.”

It goes on to say, and keep in mind this is a bipartisan unanimous report, “Hughes also engaged in deliberate efforts to circumvent the Department of State licensing requirement.”

Now, this is the part that I almost went myself ballistic on the airplane over. “To this end, Hughes sought the approval of a Department of Commerce official for its 1995 activities and claims to have sought the approval of a Department of Defense monitor for some of its 1995 activities, although Hughes knew that neither official was legally authorized to issue the required license.” They knew.

This goes on. And it is not just Hughes, it was also Loral. Same page, of course, out of the Cox report, and these are not my words, this is a bipartisan unanimous writing of the report, “Loral and Hughes deliberately acted without the legally required license and violated U.S. export control laws.” This has to do with our most sensitive equipment, dealing with intercontinental ballistic missiles, targeted potentially on the United States.

Where does this lead? Where does this lead? Where is the administration? Again, this is not put out with any singularity. This is a bipartisan report, an unanimously accepted report of the Cox commission.

Mr. ROHRABACHER. Reclaiming my time for a moment, Madam Speaker, the first point the gentleman made, I would understand that. During the Cold War, when we were in a contest with the Soviet Union, we used the China card. We played the China card. And, yes, just like during World War II, when we allied ourselves with Joseph Stalin in order to defeat Adolf Hitler, which was the major threat to peace and freedom at that time, that was a moral thing to do. We were allying ourselves with one bad group in order to defeat a greater threat. We were ready to defeat Adolf Hitler by working with the communists, but after Adolf Hitler was off the scene and defeated, it was no longer the right thing to do working with the communists. That is number one.

When Ronald Reagan was President of the United States and continued to have this policy of working with China, because the Soviet Union was still our enemy, even then we were supporting a democracy movement in China. We were supporting those people who were struggling to build a free China. That is why there was a great surge of democracy at the end of the Reagan administration. And at Tiananmen Square, which occurred right after Reagan left office, there was this great upsurge of democracy in China, and within a few months they were massacred. They were massacred at Tiananmen Square, which was just 16 years ago.

But let me go to this point about the companies that my colleague from California is talking about. I am the chairman of the Subcommittee on Space and Aeronautics of the Committee on Science, and it was the activities of several of these American aerospace companies that first led me several years ago to investigate this issue.

I spent 6 months of my life investigating that American companies were upgrading communist Chinese rockets. Perhaps my friend from Arizona remembers me stopping on the floor and saying something terrible is going on here and I am going to do it. I went around telling people, “I investigated this. I went to the contractors and subcontractors.” And, finally, I got enough information to prove exactly what the Cox report has verified and there was an open investigation launched by the Cox report.

But what is significant here is these companies are part of an engagement
strategy. My colleagues have to re-
member we have set down the rules for
these companies to go into China. The
idea is that engagement will make
China more liberal and will then pose
less of a threat to the United States.
But what are we reading? What is the
gentleman telling us? What that report
verifies is this policy has had the op-posite
impact. In a horrible way it has
made us vulnerable like we never dreamed we would be vulnerable. Our
children now are in jeopardy to be in-
cinerated by these high-tech weapon
systems we spent billions of dollars to
develop. We could not have imagined
that in our worst nightmare. It has
been a wrong policy. We have to go
back and reexamine it. We have to change
that policy.

And what has it done? It has made us
less safe. The other countries go for
us economically. Our companies are
setting up factories over there to put
our own people out of work. It is cor-
rupting our own political process.

Those same companies and other compa-
yes are lobbying us. They are not
over in China lobbying for democ-
racies. They are lobbying us. They are
giving us contributions in order to pro-
tect their slave trade and their blood
money.

I yield to my friend from Arizona.

Mr. HAYWORTH. I thank my col-
leagues from California. I thank our
new Member of the Congress for his
perceptive abilities to go right to the
bipartisan report and get to the heart
of the matter. And as my more senior
colleague from California points out,
as I sit and hear my two friends reflect
on this obscenity committed against our
republic, I think he would help as a student of history step back and realize how prophetic were the
words of our 34th President, Dwight
David Eisenhower, in his farewell ad-
dress when he told us to be mindful of
the military-industrial complex, of those whose allegiance to our Nation
could be subverted. And we have seen it
in the case of Hughes and Loral, in the
case of Loral, Bernard Schwartz, the
top contributor to the Democratic Na-
tional Committee, and it is tragic that
this has happened. But facts are stubborn
things. And to look beyond that, to the
words of the bipartisan report, that
these companies willfully cir-
sumvented American law and, Madam
Speaker, this points out an affliction, a
unease. There is no partisan glee to
this. But the strength of our constitu-
tional republic throughout our history
has been that we heed the call and un-
derstand the threats and understand the
dangers. And we stand again, Madam
Speaker, at that very juncture. How tragic the circumstance. But how compel-
ing the call to action for this
Congress and for the American people.

Mr. ROHRABACHER. Reclaiming my
time for a moment, let me just state
the thrust of this issue. I believe that
our military and our normal trade relations. If we again
renew normal trade relations with
Communist China, this body is going to
send the signal to not only Communist
China but to the world that we are
bucking away. That we do not have the
will to protect our interests, we do not
have the will to be the world’s leader,
we do not have the will to even protect
our own national interests and our own
national security. All those who are
listening, all those people, American
people who are out in the hinterland
wondering what can I do, what can we
do, there are policies that we have to
make. The Cox report outlined things
that we have to do. First and foremost,
we have to quit treating Communist
China as if it is a friend, as if it is like
Great Britain or a democratic society.
First and foremost, we have to quit
calling it our strategic partner, quit
acting like it is our friend and we have
to recognize that it is a hostile power.
Americans do not have to put their
scientists coming through our laborato-
ries, we do not have exchange
programs with their military which I
found out they were having exchange
programs with our military. We were
inviting them here, have been having
them here to see how our military con-
ducts its business and train their
own military in logistics and how to
run military operations. We have got
to quit treating them that way. We
have to build a missile defense system.
We have got to do it. We have now
given them the ability to incinerate
our people. Our only hope is to make
sure that we rush ahead with tech-
nology development to protect them
now that that genie is out of the bot-
tle. We have got to make sure that the
United States of America ends the trad-
ing relationship that gives the
Communist Chinese $60 billion in hard
currency.

The Communist Chinese, those people
who run Beijing, they understand what
is going on. At the end of the year,
they have $60 billion in hard currency
to do with what they want, to mod-
ernize their weapons, to make alliances
with dictators and gangsters and drug
lords over the billions in hard currency
to destroy us. We have got to end the rules of the game that
gives them that $60 billion. By the way,
it is not a free trade situation. The
Chinese have high tariffs against any
American products that we want to sell
there. And we have permitted them to
have those high tariffs while their
goods flood into the United States at
low tariffs. Is this good for American
working people? No. In fact, what is
happening when you hear about we have about $14 billion where they say,
“They bought $14 billion worth of goods
from us.” But if you look at what those goods are, those are mainly
institutions and manufacturing units,
so that we are building up their capa-
cities, their manufacturing capabilities with
that $14 billion, while they flood into
our market with about $80 billion
worth of goods and services which they
tell us to us with almost no tariff. So, in
other words, when they talk about,
“We can’t isolate China, we have to
trade with them,” they are not selling
our products over there, they are build-
ing factories over there and they are
doing it by closing factories here. And
here is the real stinger; which I men-
tioned earlier. Most favored nation
status or normal trade relations, as
they say, what does that really mean
in terms of government policy? The
real impact of it is, because even if we
do not pass it, people can still sell
to China, those who are not eligible to partici-

June 8, 1999
these big businessmen from having their investments guaranteed by the taxpayers and that very same taxpayers are having their jobs taken away because they are setting up factories in China to export back to the United States.

Now, who has it been good for? Who has this big economic policy been good for? It has not been good for our security, we have already shown that. My colleague from California demonstrated that these companies ended up doing, what, doing something that strategically national security-wise is a nightmare, so it is not good for our national security. It is not good for us economically. They say, “Oh, look at our big economic boom.” Well, our good, big economic boom, yes, why do these Americans have to be investing over seas in Communist China for us to have a boom? They could invest in a democratic country like the Philippines, for example, they need investment there.

No, they are investing in Communist China because they can cut one deal with a gangster and they think they are going to get a quick profit.

So who has it been good for? It has not been good for our country, for our economy, for the working people. It has been good for a few billionaires. I call them Bill’s billionaire buddies.

That is who this China policy has been good for. We have got to have the courage to sever ourselves from the policies of the past and fundamentally reexamine those policies and strategies, not for isolation, not for isolation. We want engagement, yes, just the way we would engage Adolf Hitler or Tojo or someone like that. We engaged them in a way that showed them courage and determination and engaged them only in a way that would benefit the people of the United States and the security of the United States, not in a way that would make them think that we were whimpering cowards.

☐ 2340

At the end of the day, when the President of the United States goes to Beijing and says, or Madeleine Albright goes to Beijing and mouths some cliche from California until the top of the hour, which will be 9 p.m. in the Western States from whence we hail.

But, Madam Speaker, it is worth noting that our words and observations tonight carry to the American people not a paranoia, not a panic, but a clear, strong resolve that at long last those of us who advocate the authority to provide for the common defense understand the clear and present danger that confronts our constitutional Republic.

We take no glee in it, we wish it were not so. But as former President Reagan said, facts are stubborn things, and as my junior colleague from California points out and the bipartisan words of the Cox committee report, there are disturbing conclusions drawn that force us to reassess our national security, that force us to reassess our trade policy, that force us to reassess the affairs of state that oftentimes come under the heading of foreign policy.

The challenges are real. No amount of spin, no amount of economic prosperity, no amount of lip-biting and empathy can obscure them from any quarter. And again we offer this because, as I was taught again during our district work period when I had the chance to stand alongside veterans in Flagstaff, Arizona, when more than 200 residents of that city came together to commemorate the sacrifices of our war dead, I was reminded that the words of our Constitution are more than verbage strung on parchment. They are a living, breathing part of us as a people, and we dare not, we dare not ignore our duties and our responsibilities. And citizen after citizen came to me expressing their real concerns.

Oh, we do not hear about them from the 24-hour news networks, we do not hear about them except in scant effort by the three major news network anchors, but the American people under stand, understand, and so it is that we find ourselves here talking about rocket scientists, because under no circumstances do I pretend to be a rocket scientist. However I think, like so many things we are involved in, whether it be running our families with our spouses or raising our children or running our businesses, the devil of doing anything is in the details that are involved. And I want to run through a few things that are in the Cox report and in what used to be the United States’ quantitative and qualitative edge in technology and what damage has occurred as a result of the loss of these secrets.

As many people know, the United States has continually improved its ability to deliver intercontinental ballistic missiles, whether it be telemetry or design or payloads or what have you; year after year after year, compared to the situations in other countries where the technology available, for instance to the People’s Republic of China or others, was either based on 1950s design or was wholly unavailable, period. And the reason these things are so important and particularly related to the most current news we hear about the loss of secrets from Los Alamos and other laboratories is that the technology of the warheads and the manner in which they are delivered are significantly improved, both in terms of payload and efficiency, by virtue of having one country steal from us that technology that we have created by virtue of investment over tens of years and billions of dollars.

For instance, what used to be our technology in the 1950s one could deliver arguably a relatively small payload accurately. Over the years we have been able to create technology and implement technology that allows us to shrink the size of our warheads, improve the delivery system on a ballistic missile basis and put multiple warheads in a single delivery system as opposed to one warhead per delivery.

The tragedy of the theft of these secrets is that our ostensible trading partners now possess the same ability, as compared to as few as 10 years ago, in the late 1980s, when they were totally incapable, incapable of delivering that kind of a weapon on the United States. And the reason that is important is that, as we speak, the House wishes and has adopted with its national ballistic missile defense plan, as we go forward, putting that in place, if we have a missile come to our shores
with multiple, independent reentry vehicles, the difficulty of preventing those directions from detonating are multiplied logarithmically. It is not arithmetic, it is logarithmic because our ostensible trading partners, instead of having again one warhead per missile have shrunk the size of their warheads and loaded multiple warheads onto the missile, and as they come back into the atmosphere, will release them on target.

This is something that affects every single one of us. It has nothing to do with economic trade in my opinion. This is a national security issue, and it is of great concern to me on this issue, as it has been, as you both know and as many of the others know here as to our intervention in Yugoslavia, that we, number one, are ignoring the national security interests in the case of these ballistic missiles and the information that has been stolen relative to technology and the like in one case, and we are unable to identify a national security interest in another case, that being Yugoslavia.

So the gentleman from Arizona’s comment is well made about how to get access to this. I am sure that the gentleman from California (Mr. Cox) has it on his web site. I would encourage every American to at least read the forward in volume I, it is frightening information. It is emblematic of the difficulty that we face and the dangers we face in the real world today.

Mr. HAYWORTH. In fact, I thank my colleagues for his comments.

Madam Speaker, I would invite every member of this House, with the technological capabilities we all enjoy, to post this unanimous bipartisan report on the internet on web sites so that, Madam Speaker, those in this country who are citizens, who are concerned, can have access to this information, full and unfettered, so that they understand the extent to which our national security has been jeopardized.

I yield to my more senior colleague from California.

Mr. ROHRBACHER. I think we have certainly outlined tonight the magnitude of the problem, and my colleague from California has demonstrated that what we are talking about is the survival or the incineration of millions of Americans. I mean, again, it is worse than our worst nightmare could possibly have been 10 and 20 years ago. No one could ever have imagined that this would come about.

But I worked for a guy in the White House who always said that what is important is not just to focus on the problem, but to make sure you always offer a solution, and then look towards the opportunities that you have. So I would just like for a couple of minutes talk about the options that we have and just say, what are they?

Number one, first and foremost, we have to start off with a missile defense system. We have to move forward with missile defense. As my colleague from California just mentioned, it is going to be a lot harder now, because they not only have a missile with one warhead, and a missile that was pretty unreliable, but, thanks to some American things to housing technology that we paid for, we paid for it, taxpayers developed that technology to protect us during the Cold War, now it has been given away and stolen and actually sold by our major corporate leaders, some of these major corporate leaders. So we have to go forward with missile defense, do it seriously, and do it as if the lives of our children depend upon it.

Number two, we have to work closely and reestablish close ties and a trusting relationship with the democracies of the Pacific and Asia and the Philippines, Japan, Korea and Thailand, which no longer trust in the word of the United States, which see us kowtowing before the communist dictatorship in Beijing. The democratic peoples of the world have to know they can count on the United States, and especially in that area in Asia and the Pacific region.

Again, we must go back to Communist China and we must alter our fundamental relationship, quit treating them as a friend and begin treating them as a hostile power, which means no more military exchanges, no more scientific exchanges, and especially no more subsidies for our businessmen going over there to invest and building up their economy and their capabilities technologically to build these weapons you are talking about. It is one thing to have the blueprints. It is another thing to have the tools and the computer technology in order to accomplish that.

We can start, first of all, doing this by elimination their ability to have an unfair trade relationship with us, by supporting my resolution of disapproval of normal trade relations in the next couple of weeks, which is going to come before the body.

The American people, all of the veterans you saw and that I saw in your Memorial Day services, veterans from around the United States, should be here pounding on doors, demanding, demanding that we eliminate most-favored-nation status, that normal trade status with China be denied.

This should be a goal of the American Legion and the Veterans of Foreign Wars. Patriotic organizations around the United States in the next two weeks should mobilize behind this and knock on every Congressman’s door, and they will listen if the American people speak. Money talks maybe in these campaign contributions, but in a democracy the voice of the people talk louder, and we can be glad we live in a country where the people’s will will be heard. We must invest in democracy.

What that means is: How did Ronald Reagan win the Cold War without having to fight with the Soviet Union? We faced the same type of incineration, by the way, you are talking about, with the Soviet Union. The Soviet Union had MIRVed warheads too, did they not? They were a horrible threat to our well-being. For decades we lived under that threat.

Ronald Reagan ended it in a number of ways. He rebuilt our military strength, which is something we need to do, not only missile defense. But what he did, most importantly, was support those people who believe in democracy around the world, whether it was in Eastern Europe by the Nicaraguan freedom fighters, who people on the other side of the aisle did everything they could to prevent us from helping those people they called the Contras, and eventually there was a free election in Nicaragua, and those communists, the Sandinistas, were booted out, even though our colleagues on the other side of the aisle said they represent the real will of the Nicaraguan people.

If we support democracy around the world, and that means especially in China, we should be financing and working just like we did with Lech Walesa in Poland and freedom movements, what Ronald Reagan did all over the world. We should focus on China as if our very national survival depended on us reaching out to the decent freedom-loving people of China. If any message goes out tonight, it should be Communist China, Communist China, may be our enemy. That war of gangsters may be our enemy.

But our greatest ally, our greatest ally, is the people of China. The Chinese people are our friends. They are wonderful people. They long for the same type of human dignity and freedom and liberty and justice and opportunity for their families that we long for for our families. They do not hate the United States. They are not our enemies. We have to do everything to work for the freedom-loving people and build up that democracy movement that was wiped out by the Communist Chinese once Ronald Reagan left office.

Let us work with them and build Radio Free Asia. Let us support the freedom movement. It is what is true to our principles. Do not let anybody say we are anti-Asian, anti-Chinese. We are not. We are pro-freedom, and we believe that freedom is the right of every person of every color of every religion and every ethnic background. That is our strength.

Mr. HAYWORTH. Madam Speaker, one can almost anticipate the reflexes action of those who man the spin cycles elsewhere in the sectors of this
capital city, those cacophony of critics that we are certain to hear.

A couple of final notes. It is sad that the American people deserve better. It should be the mission of the would-be burglars, to let them in quaint, but I think it is appropriate. It is one thing to lock your windows and doors and set an alarm and go on vacation and have folks cut that alarm off, somehow circumvent that system, come into what you thought was your secured home and steal your secrets.

It is quite another thing for your neighbor next door to meet the truck of the would-be burglars, to let them in the House, to help them find your most valuable possessions, and then to disavow any knowledge of that action. And that is just how simple and just how sad the current dilemma we face in fact presents itself.

A couple of final notes. It is sad that this administration has worked at cross-purposes. It has, on the one hand, deployed American forces to more locations than any other administration in the post World War II era, and, at the same time, it has denied the efforts of this common-sense conservative Congress to provide for our national defense, to provide the weapons systems, to provide the manpower and material. So you have a situation where there is work at cross purposes.

Worse still, the actions of this Congress to provide a missile defense system at long last after the news of the Chinese theft, those on the left joined in bipartisan fashion, and yet this President subsequent correspondence has, pointed out by our majority leader, sought to reassure the Chinese that we would not mount a missile defense system.

Madam Speaker, the American people deserve better. It should be the mission of this Congress to make sure we provide for the common defense.

ANNOUNCEMENT BY THE SPEAKER—PRO TEMPORE

The SPEAKER pro tempore (Mrs. Biggert). The Chair will remind Members to direct their remarks to the Chair and not to the television audience.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. FORD (at the request of Mr. Gephardt) for after 5 p.m. On Tuesday, June 8, on account of personal business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders hereof referred to, was granted to:

(The following Members (at the request of Mr. McNulty) to revise and extend their remarks and include extraneous material:)

Mr. FILNER, for 5 minutes, today.

Mr. LIFENSIK, for 5 minutes, today.

Ma. NORTON, for 5 minutes, today.

Mr. RUSH, for 5 minutes, today.

Mr. BROWN of Ohio, for 5 minutes, today.

Mrs. CLAYTON, for 5 minutes, today.

Mr. FALLONE, for 60 minutes, today.

Mr. OWENS, for 60 minutes, today.

(The following Members (at the request of Mr. Ose) to revise and extend their remarks and include extraneous material:)

Mr. FLETCHER, for 5 minutes, on June 10.

Mr. BURTON of Indiana, for 5 minutes, on June 15.

ENROLLED BILL SIGNED

Mr. THOMAS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 1378. An act to amend the Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999, to make a technical correction relating to international narcotics control assistance.

ADJOURNMENT

Mr. HAYWORTH. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to: accordingly (at 12 midnight), the House adjourned until Wednesday, June 9, 1999, at 10 a.m.

OATH OF OFFICE MEMBERS, RESIDENT COMMISSIONER, AND DELEGATES

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1884 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

I, AB, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.
CONGRESSIONAL RECORD—HOUSE
June 8, 1999

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

[Omitted From the Record of June 7, 1999]

By Mr. CHABOT (for himself, Ms. SLAUGHTER, and Mr. SHIMKUS):

H.R. 2006. A bill to amend title I of the Employee Retirement Income Security Act of 1974 to provide a minimum benefit for plan years beginning with the year 2000 and to provide for a 4-year extension for the work opportunity credit and the welfare-to-work credit; to the Committee on Ways and Means.

By Mr. FRANKS of New Jersey (for himself, Mr. HERLINGHUYSEN, and Mrs. ROUKEMA):

H.R. 2005. A bill to establish a statute of limitations for the Medicare Program; to the Committee on Ways and Means, and in addition to the Committee on the Judiciary.

By Mr. DUNCAN:

H.R. 2004. A bill to amend the Inspector General Act of 1978 to provide for the appointment of the Inspector General of the Department of Defense, to prescribe military personnel strengths for fiscal years 2000 and 2001, and to provide for a 4-year extension for the work opportunity credit and the welfare-to-work credit; to the Committee on Ways and Means.

By Mr. GLUTRIERRE (for himself and Ms. BROWN of Florida):

H.R. 2010. A bill to provide for the establishment of a National Firearm Injury Reporting System, and for grants to States for the study of firearm injuries caused by firearms; to the Committee on the Judiciary.

By Mr. CHRISTENSEN:

H.R. 2011. A bill to establish the District Court of the Virgin Islands as a court under Article III of the United States Constitution; to the Committee on the Judiciary.

By Mr. DEUTSCH (for himself and Mr. WEXLER):

H.R. 2012. A bill to amend title XVIII of the Social Security Act to provide for the extension for a year of the Medicare Program; to the Committee on Ways and Means, and in addition to the Committee on Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HERGER (for himself and Mr. PUMBO):

H.R. 2013. A bill to amend the Inspector General Act of 1978 to provide for the appointment of the Inspector General of certain Federal agencies by the President of the United States; to the Committee on Government Reform.

By Mr. FRANKS of New Jersey (for himself, Mr. HERLINGHUYSEN, and Mrs. ROUKEMA):

H.R. 2014. A bill to prohibit a State from imposing a discriminatory commuter tax on nonresidents; to the Committee on the Judiciary.

By Mr. GONZALEZ:

H.R. 2015. A bill to amend the Internal Revenue Code of 1986 to provide a 4-year extension for the work opportunity credit and the welfare-to-work credit; to the Committee on Ways and Means.

By Mr. GLUTRIERRE (for himself and Ms. BROWN of Florida):

H.R. 2016. A bill to amend title XIII, United States Code, to repeal the provision of law requiring termination of the Advisory Committee on Minority Veterans as of December 31, 1999; to the Committee on Veterans’ Affairs.

By Mr. HERGER (for himself and Mr. PUMBO):

H.R. 2017. A bill to amend the Endangered Species Act of 1973 to enable Federal agencies responsible for the preservation of threatened species and endangered species to rescue and relocate members of any of those species that would be taken in the course of certain reconstruction, maintenance, or repair of Federal or non-Federal mammal flood control levees; to the Committee on Resources.

By Mr. HOUGHTON (for himself, Mr. LEVIN, Mr. SAM JOHNSON of Texas, Mr. HERGER, Mr. MATSUI, Mr. CRANE, and Mr. ENGLISH):

H.R. 2018. A bill to amend the Internal Revenue Code of 1986 to simplify certain rules relating to the taxation of United States business operating abroad, and for other purposes; to the Committee on Ways and Means.

By Mrs. JOHNSON of Connecticut (for herself, Mr. ENGLISH, Mrs. THURMAN,
CONGRESSIONAL RECORD—HOUSE

May 18, 1999

12015

Mr. FOLEY, Mr. COOKSEY, Mr. SHOWS, Mr. SCHOLNICK, Mrs. CLAYTON, Mr. WYNN, and Mr. PAUL: H.R. 2039. A bill to amend the Internal Revenue Code of 1986 to provide that the unearned income of children attributable to persons who receive campaign financing from the Presidential Election Campaign Fund shall not be taxed at the marginal rate of the parents; to the Committee on Ways and Means.

By Mrs. JOHNSON of Connecticut (for herself, Mr. Houghton, Mr. Camp, Mr. English, Mr. FoleY, Mr. Upson, Mr. Lazio, Mr. Beshler, Mr. Green- way, Mr. Stupak, Mr. Ehlers, Mr. LoBiondo, Mr. Gillespie, Mr. Bass, Mr. Horn, Mr. Bilbray, Mr. Kolbe, Mr. Quinn, Ms. Pryce of Ohio, Mr. Frelinghuysen, Mr. Manzullo, Mr. Ose, Mr. Smith of Michigan, Mr. Horsford, Mr. Dijker, Mrs. Kelly, and Mrs. Roukema): H.R. 2030. A bill to amend the Internal Revenue Code of 1986 to provide marriage penalty relief, incentives to ensure health coverage, and increased child care assistance, in the case of an exception to tax provisions, and for other purposes; to the Committee on Ways and Means.

By Mr. KENNEDY of Rhode Island (for Mr. Brown of Connecticut): H.R. 2031. A bill to prohibit, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. McIntosh (for himself, Mr. Pitts, Mr. Rohrabacher, Mr. English, Mr. Tancredo, Mr. Billey, Mrs. Chenoweth, Mr. Souder, Mr. Istook, Mr. Sessions, Mr. Rostenkowski, and Mrs. Myrick): H.R. 2032. A bill to prohibit compliance by the executive branch with the 1972 Anti-Ballistic Missile Treaty and the 1997 multilateral Memorandum of Understanding related to that treaty; to the Committee on International Relations.

By Mr. McIntosh (for himself, Mr. Pitts, Mr. Rohrabacher, Mr. English, Mr. Tancredo, Mr. Billey, Mrs. Chenoweth, Mr. Souder, Mr. Istook, Mr. Sessions, Mr. Rostenkowski, and Mrs. Myrick): H.R. 2033. A bill to provide a schedule for production of elements for a national missile defense system; to the Committee on Armed Services.

By Mr. Oberstar (for himself, Mr. Lipinski, and Ms. Ehrlich Briscoe Johnson of Texas): H.R. 2034. A bill to amend the Department of Energy Organization Act to establish a Nuclear Security Administration and an Office of Under Secretary for National Security in the Department of Energy; to the Committee on Commerce, and in addition to the Committee on Armed Services, and for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. Pascrell (for himself, Mrs. Maloney of New York, Mr. Weiner, Mr. Underground, Mr. Delahunt, Mrs. Maloney of Pennsylvania, Mr. Nadler, Mr. McNulty, and Mr. Brady of Pennsylvania): H.R. 2035. A bill to ban the manufacture of handguns that cannot be personalized, to provide for the establishment of the National Firearms Academy, and to encourage local and commercial feasibility of personalizing firearms, and to provide for grants to improve firearms safety; to the Committee on the Judiciary.

By Mr. Paul: H.R. 2036. A bill to enforce the guarantees of the first, fourteenth, and fifteenth amendments to the Constitution of the United States in cases in which a party, in any judicial or administrative proceeding, denies the right to participate in certain elections; to the Committee on House Administration.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

(Omitted from the Record of June 7, 1999)

H. R. 111: Mr. Farr of California.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H. R. 1401
OFFERED BY: Mr. COX of CALIFORNIA
AMENDMENT No. 14: At the end of division A (page 326, after line 16), insert the following new title:

TITLE XIV—PROLIFERATION AND EXPORT CONTROL MATTERS

SEC. 1401. REPORT ON COMPLIANCE BY THE PEOPLE’S REPUBLIC OF CHINA AND OTHER COUNTRIES WITH THE MISSILE TECHNOLOGY CONTROL REGIME.

(a) Report Required.—Not later than October 31, 1999, the President shall transmit to Congress a report on the implementation of subsection (a) of section 1513 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 112 Stat. 2175; 22 U.S.C. 2778 note), transferring satellites and related items from the Commercial Control List of dual-use items to the United States Munitions List. The report shall update the information provided in the report under subsection (d) of that section.

(b) Technology Control Regime by the People’s Republic of China in violation of this section. The report shall include a list specifying each actual or suspected transfer by Russia or any other country of missile technology to the People’s Republic of China in violation of the Missile Technology Control Regime, and on any actual or suspected transfer by Russia or any other country of missile technology to the People’s Republic of China in violation of the Missile Technology Control Regime. The report shall include a list specifying each actual or suspected violation of the Missile Technology Control Regime by the People’s Republic of China in violation of this section.

(c) Security Measures.—The report under subsection (a) shall also include information concerning—

(1) actual or suspected use by the People’s Republic of China of other countries of missile technology from Russia and other countries that is subject to a technology control regime; and on any actual or suspected transfer by Russia or any other country of missile technology to the People’s Republic of China in violation of the Missile Technology Control Regime.

(2) that the missile technology control regime plan for the launch of the satellite, both before and during launch operations, and include enhanced security measures if the launch site is within the jurisdiction of the People’s Republic of China or any other country that is subject to section 1514 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999.

(3) that each person providing security for the launch of that satellite—

(A) be employed by, or under a contract with, the Department of Defense;

(B) have received appropriate training in the regulations prescribed by the Secretary of State known as the International Trafficking in Arms Regulations (hereafter in this section referred to as “ITAR”);

(C) have significant experience and expertise with satellite launches; and

(D) have been investigated in a manner at least as comprehensive as the investigation required for the issuance of a security clearance with the level designated as “Secret”.

(4) that the number of such persons providing security for the launch of the satellite shall be sufficient to ensure the security of the satellite and related launch vehicle and other sensitive technology.

(5) that the licensees agree to reimburse the Department of Defense for all costs associated with the provision of security for the launch of the satellite.

(b) DEFENSE DEPARTMENT MONITORS.—The Secretary of Defense shall—

SEC. 1402. ANNUAL REPORT ON TECHNOLOGY TRANSFERS TO THE PEOPLE’S REPUBLIC OF CHINA.

(a) Annual Report.—The President shall transmit to Congress an annual report on transfers to the People’s Republic of China by the United States and other countries of technology with potential military applications, during the 1-year period preceding the transmittal of the report.

(b) Initial Report.—The initial report under this section shall be transmitted not later than December 31, 1999.

SEC. 1403. REPORT ON IMPLEMENTATION OF TRANSFER OF SATellite EXPORT CONTROL AUTHORITY.

Not later than August 31, 1999, the President shall transmit to Congress a report on the implementation of subsection (a) of section 1513 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 112 Stat. 2175; 22 U.S.C. 2778 note), transferring satellites and related items from the Commercial Control List of dual-use items to the United States Munitions List. The report shall update the information provided in the report under subsection (d) of that section.

SEC. 1404. SECURITY IN CONNECTION WITH SATELLITE EXPORT LICENSING.

(a) Security at Foreign Launches.—As a condition of the export license for any satellite to be launched outside the jurisdiction of the United States, the Secretary of State shall require the following:

(1) That the technology transfer control plan required by section 1514(a)(1) of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261; 112 Stat. 2175; 22 U.S.C. 2778 note) be prepared by the Department of Defense, and agreed to by the licensor, that the plan set forth the security arrangements for the launch of the satellite, both before and during launch operations, and include enhanced security measures if the launch site is within the jurisdiction of the People’s Republic of China or any other country that is subject to section 1514 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999.

(2) That each person providing security for the launch of that satellite—

(A) be employed by, or under a contract with, the Department of Defense;

(B) have received appropriate training in the regulations prescribed by the Secretary of State known as the International Trafficking in Arms Regulations (hereafter in this section referred to as “ITAR”);

(C) have significant experience and expertise with satellite launches; and

(D) have been investigated in a manner at least as comprehensive as the investigation required for the issuance of a security clearance with the level designated as “Secret”.

(3) That the number of such persons providing security for the launch of the satellite shall be sufficient to ensure the security of the satellite and related launch vehicle and other sensitive technology.

(4) That the licensees agree to reimburse the Department of Defense for all costs associated with the provision of security for the launch of the satellite.
(1) ensure that persons assigned as space launch campaign monitors are provided sufficient training and have adequate experience in the ITAR and have significant experience and expertise with satellite technology, launch vehicle technology, and launch operation procedure.

(2) ensure that adequate numbers of such monitors are assigned to space launch campaigns so that 24-hour, 7-day per week coverage is provided;

(3) take steps to ensure, to the maximum extent possible, the continuity of service by monitoring one space launch campaign period (from satellite marketing to launch and, if necessary, completion of a launch failure analysis); and

(4) adopt measures designed to make service as a space launch campaign monitor an attractive career opportunity.

SEC. 1405. REPORTING OF TECHNOLOGY PASSED AND OF FOREIGN LAUNCH SECURITY VIOLATIONS.

(a) Monitoring of Information.—The Secretary of Defense shall require that space launch monitors of the Department of Defense assigned to monitor launches in the People's Republic of China maintain records of all information transmitted to the People's Republic of China, including copies of any documents authorized for such transmission, and reports on launch-related activities.

(b) Transmission to Other Agencies.—The Secretary of Defense shall ensure that records under subsection (a) are transmitted on a current basis to appropriate elements of the Department of Defense and to the Department of Commerce, the Department of State, and the National Intelligence Office.

(c) Retention of Records.—Records described in subsection (a) shall be retained for at least the period of the statute of limitations for violations of the Arms Export Control Act.

(d) Guidelines.—The Secretary of Defense shall prescribe guidelines providing space launch monitoring and the Department of Defense with the responsibility and the ability to report serious security violations, problems, and weaknesses in the overseas launch system directly to the headquarters office of the responsible Department of Defense component.

SEC. 1406. REPORT ON NATIONAL SECURITY IMPLICATIONS OF EXPORTING HIGH-PERFORMANCE COMPUTERS TO THE PEOPLE'S REPUBLIC OF CHINA.

(a) Review.—The Secretary of Energy, the Secretary of Defense, and the Secretary of State, in consultation with other appropriate departments and agencies, shall conduct a comprehensive review of the national security implications of exporting high-performance computers to the People's Republic of China. As part of the review, the Secretary shall conduct a classified testing of the extent to which national security-related operations can be performed using clustered, massively parallel processing or other combination of computers.

(b) Report.—The Secretary of Energy shall submit to Congress a report on the results of the review conducted under subsection (a). The report shall be submitted not later than six months after the date of the enactment of this Act and shall be updated not later than the end of each 1-year period.

SEC. 1407. END-USE VERIFICATION FOR USE BY PEOPLE'S REPUBLIC OF CHINA OF HIGH-PERFORMANCE COMPUTERS.

(a) Revision of ITAR.—The President shall seek to enter into an agreement with the People's Republic of China to revise the existing verification system so that such an agreement with respect to end-use verification for high-performance computers exported or to be exported to the People's Republic of China so as to provide for an open and transparent system of reviewing end-use verification for such computers and, at a minimum, providing for on-site inspection of the end-user and end-user of such computers, without notice, by United States nationals designated by the United States Government. The President shall transmit a copy of the agreement to Congress.

(b) Definition.—As used in this section and section 1406, the term “high performance computer” means a computer which, by virtue of its composite theoretical performance level, would be subject to section 1211 of the National Defense Authorization Act for Fiscal Year 1998 (50 U.S.C. App. 2404 note).

(c) Adjustment of Composite Theoretical Performance Levels for Post-shipment Verification.—Section 1213 of the National Defense Authorization Act for Fiscal Year 1998 is amended by adding at the end the following:

“(e) Adjustment of Performance Levels.—Whenever a new composite theoretical performance level under section 1211(d), that level shall apply for purposes of subsection (a) of this section in lieu of the level set forth in that subsection.”

SEC. 1408. PROCEDURES FOR REVIEW OF EXPORT OF CONTROLLED TECHNOLOGIES AND ITEMS.

(a) Recommendations for Prioritization of National Security Concerns.—The President shall submit to Congress the President's recommendations for the establishment of a mechanism to identify, on a continuing basis, the technologies and items the export of which is of greatest national security concern relative to other controlled technologies and items.

(b) Recommendations for Executive Department Approvals for Exports of Greatest National Security Concern.—With respect to controlled technologies and items identified as of greatest national security concern, the President shall submit to Congress the President's recommendations for the establishment of a mechanism to identify procedures for export of such technologies and items so as to provide—

(1) that the period for review by an executive department or agency of a license application for any such export shall be extended to a period longer than that otherwise required when such longer period is considered necessary by the head of that department or agency for national security purposes; and

(2) that a license for such an export may be approved only with the agreement of each executive department or agency that reviewed the application for the license, subject to appeal procedures to be established by the President.

(c) Recommendations for Streamlined Licensing Procedures for Other Exports.—With respect to controlled technologies and items other than those identified under subsection (a), the President shall submit to Congress the President's recommendations for modifications to licensing procedures for export of such technologies and items so as to streamline the licensing process and provide greater transparency, predictability, and certainty.

SEC. 1409. NOTICE OF FOREIGN ACQUISITION OF CONTROLLABLE TECHNOLOGIES AND ITEMS.

SEC. 1410. FIVE-AGENCY INSPECTORS GENERAL EXAMINATION OF COUNTERMEASURES AGAINST ACQUISITION BY THE PEOPLE'S REPUBLIC OF CHINA OF MILITARILY SENSITIVE TECHNOLOGY.

Not later than January 1, 2000, the Inspector General of the Central Intelligence Agency shall submit to Congress a report on the adequacy of current export control measures to protect against the acquisition by the People's Republic of China of militarily sensitive United States technology. Such report shall include a description of measures taken to address any deficiencies found in such export controls and counterintelligence measures.

SEC. 1411. OFFICE OF TECHNOLOGY SECURITY IN DEPARTMENT OF DEFENSE.

(a) Enhanced Multilateral Export Controls.—

(1) New International Controls.—The President shall work in the context of the scheduled 1999 review of the Wassenaar Arrangement and otherwise) to establish new binding international controls on technology transfers that threaten international peace and United States national security.

(2) Improved Sharing of Information.—The President shall take appropriate actions (in the context of the scheduled 1999 review of the Wassenaar Arrangement and otherwise) to improve the sharing of information by nations that are major exporters of technology so that the United States can track movements of technologies that influence United States technology controls and re-export requirements.

(b) Office of Technology Security.—There is hereby established in the Department of Defense an Office of Technology Security. The Office shall support United States Government efforts to—

(1) establish new binding international controls on technology transfers that threaten international peace and United States national security; and

(2) improve the sharing of information by nations that are major exporters of technology so that the United States can track movements of technologies that influence United States technology controls and re-export requirements.

At the end of subtitle A of title XXXI (page 119, after line 3), insert the following new section:}

(a) Enhanced Multilateral Export Controls.—

(1) New International Controls.—The President shall work in the context of the scheduled 1999 review of the Wassenaar Arrangement and other wise) to establish new binding international controls on technology transfers that threaten international peace and United States national security.

(2) Improved Sharing of Information.—The President shall take appropriate actions (in the context of the scheduled 1999 review of the Wassenaar Arrangement and otherwise) to improve the sharing of information by nations that are major exporters of technology so that the United States can track movements of technologies that influence United States technology controls and re-export requirements.

At the end of subtitle A of title XXXI (page 419, after line 3), insert the following new section:

(3) by adding at the end the following:

SEC. 3106. DEPARTMENT OF ENERGY COUNTERINTELLIGENCE CYBER SECURITY PROGRAM.

(a) Increased Funds for Counterintelligence Cyber Security.—The amounts provided in section 3106 in the matter preceding paragraph (1) and in paragraph (3) are each hereby increased by $8,600,000, to be available for Counterintelligence Cyber Security programs.
b. OFFSETTING REDUCTIONS DERIVED FROM CONTRACT CANCELLATION.—(1) IN GENERAL.—The amounts provided in section 3101 in the matter preceding paragraph (1) (for weapons activities in carrying out programs necessary for national security) is hereby reduced by $1,700,000.

(2) The amount provided in section 3102 in the matter preceding paragraph (1) of subsection (a) (for environmental restoration and waste management in carrying out programs necessary for national security) is hereby reduced by $1,900,000.

(3) The amount provided in section 3103 in the matter preceding paragraph (1) is hereby reduced by $2,000,000.

At the end of title XXXI (page 453, after line 15), insert the following new subtitle:

Subtitle F—Protection of National Security Information

SEC. 3181. SHORT TITLE.

This subtitle may be cited as the "National Security Information Protection Improvement Act." 

SEC. 3182. FORM ANNUAL REPORT BY THE PRESIDENT ON ESPIONAGE BY THE PEOPLE'S REPUBLIC OF CHINA.

(a) REPORTS REQUIRED.—The President shall transmit to Congress a report, not less often than every six months, on the steps being taken by the Department of Energy, the Department of Defense, the Federal Bureau of Investigation, the Central Intelligence Agency, and all other relevant executive departments and agencies to respond to espionage and other intelligence activities by the People's Republic of China, particularly with respect to the theft of sophisticated United States nuclear weapons design information and the targeting by the People's Republic of China, nuclear weapons codes and other national security information of strategic concern.

(b) INITIAL REPORT.—The first report under this section shall be transmitted not later than January 1, 2000.

SEC. 3183. REPORT ON WHETHER DEPARTMENT OF ENERGY SHOULD CONTINUE TO MAINTAIN NUCLEAR WEAPONS RESPONSIBILITY.

Not later than January 1, 2000, the President shall transmit to Congress a report regarding the feasibility of alternatives to the current arrangements for controlling United States nuclear weapons development, testing, and maintenance within the Department of Energy, the Atomic Energy Commission, and the Department of Energy Organization Act (42 U.S.C. 2271 et seq.) is amended by inserting after section 3102 (42 U.S.C. 7143) the following new section:

"OFFICE OF COUNTERINTELLIGENCE . . ."

SEC. 3184. DEPARTMENT OF ENERGY OFFICE OF FOREIGN INTELLIGENCE AND OFFICE OF COUNTERINTELLIGENCE.

SEC. 3185. COUNTERINTELLIGENCE PROGRAM AT DEPARTMENT OF ENERGY NATIONAL LABORATORIES.

SEC. 3186. COUNTERINTELLIGENCE ACTIVITIES AT OTHER DEPARTMENT OF ENERGY FACILITIES.

SEC. 3187. DEPARTMENT OF ENERGY POLYGRAPH EXAMINATIONS.

SEC. CONGRESSIONAL RECORD—HOUSE

June 8, 1999

12022
contract in the event of a violation by the contractor or contractor employee of any rule, regulation, or order relating to the safeguarding or security of Restricted Data or other classified or sensitive information. The provisions shall specify various degrees of violation and the amount of the reduction attributable to each degree of violation. “c. The powers and limitations applicable to the assessment of civil penalties under section 234A shall apply to the assessment of civil penalties under this section.”.

(b) CLARIFYING AMENDMENT.—The section heading of section 234A of such Act (42 U.S.C. 2282a) is amended by inserting “SAFETY” before “REGULATIONS”.

(c) CEREMONIAL.—The table of sections in the first section of that Act is amended by inserting after the item relating to section 234 the following new items:

“(234A) Civil Monetary Penalties for Violations of Department of Energy Safety Regulations. (234B) Civil Monetary Penalties for Violations of Department of Energy Regulations Regarding Security of Classified or Sensitive Information or Data.”.

SEC. 3188. INCREASED PENALTIES FOR MISUSE OF DEPARTMENT OF ENERGY DATA

(a) COMMUNICATION OF RESTRICTED DATA.—Section 224 of the Atomic Energy Act of 1954 (42 U.S.C. 2274) is amended—

(1) in clause a., by striking "$20,000" and inserting "$400,000"; and

(2) in clause b., by striking "$10,000" and inserting "$200,000".

(b) RECEIPT OF RESTRICTED DATA.—Section 225 of such Act (42 U.S.C. 2275) is amended by striking "$20,000" and inserting "$400,000".

(c) PERMISSIBILITY OF USE.—Section 227 of such Act (42 U.S.C. 2277) is amended by striking "$50,000" and inserting "$200,000".

SEC. 3190. RESTRICTIONS ON ACCESS TO NATIONAL LABORATORIES BY FOREIGN VISITORS FROM SENSITIVE COUNTRIES

(a) BACKGROUND REVIEW REQUIRED.—The Secretary of Energy may not admit to any facility of a national laboratory any individual who is a citizen or agent of a nation that is named on the current sensitive countries list unless the Secretary first completes a background review with respect to that individual.

(b) MORATORIUM PENDING CERTIFICATION.—

(1) During the period described in paragraph (2), the Secretary may not admit to any facility of a national laboratory any individual who is a citizen or agent of a nation that is named on the current sensitive countries list.

(2) The period referred to in paragraph (1) is the period beginning 30 days after the date of the enactment of this Act and ending on the later of the following:

(A) The date that is 90 days after the date of the enactment of this Act; and

(B) The date that is 45 days after the date on which the Secretary submits to Congress a certification described in paragraph (3).

(c) WAIVER OF MORATORIUM.—

(1) The Secretary of Energy may waive the prohibition in subsection (b) on a case-by-case basis with respect to any specific individual or any specific delegation of individuals whose admission to a national laboratory is determined by the Secretary to be in the interest of the national security of the United States.

(2) Not later than the seventh day of the month following a month in which a waiver is made, the Secretary shall submit a report to the Committees providing notice of each waiver made in that month to the following:

(A) The Committee on Armed Services and the Select Committee on Intelligence of the Senate;

(B) The Committee on Armed Services and the Permanent Select Committee on Intelligence of the House of Representatives.

(3) Each such report shall be in classified form and shall contain the identity of each individual or delegation for whom such a waiver was made and, with respect to each such individual or delegation, the following information:

(A) A detailed justification for the waiver.

(B) For each individual with respect to whom a background review was conducted, whether the background review determined that negative information exists with respect to that individual.

(C) The Secretary’s certification that the admission of that individual or delegation to a national laboratory is in the interest of the national security of the United States.

(4) The authority of the Secretary under paragraph (1) may be delegated only to the Director of Counterintelligence of the Department of Energy.

(d) EXCEPTION TO MORATORIUM FOR CERTAIN INDIVIDUALS.—The moratorium under subsection (b) shall not apply to any person who—

(1) is, on the date of the enactment of this Act, an employee or contractor of the Department of Energy, or of a contractor of the Department; and

(2) has undergone a background review in accordance with subsection (a).

(e) EXCEPTION TO MORATORIUM FOR CERTAIN PROGRAMS.—In the case of a program undertaken pursuant to an international agreement between the United States and a foreign nation, the moratorium under subsection (b) shall not apply to the admittance to a facility of a citizen of that foreign nation whose admittance is important to that program.

(f) SENSE OF CONGRESS REGARDING BACKGROUND REVIEWS.—It is the sense of Congress that the Secretary of Energy, the Director of the Federal Bureau of Investigation, and the Director of Counterintelligence should ensure that background reviews carried out under this section are completed in not more than 15 days.

(g) DEFINITIONS.—For purposes of this section:

(1) The term “background review”, commonly known as an investigation, means a review of information provided by the Director of Counterintelligence and the Director of the Federal Bureau of Investigation relating to an individual, including information relating to any history of criminal activity or to any evidence of espionage.

(2) The term “sensitive countries list” means the list of nations that the Secretary of Energy known as the Department of Energy List of Sensitive Countries.

SEC. 3191. REQUIREMENTS RELATING TO ACCESS BY CONTRACTORS AND EMPLOYEES TO DEPARTMENT OF ENERGY FACILITIES ENGAGED IN DEFENSE ACTIVITIES

(a) SECURITY CLEARANCE REQUIRED.—The Secretary of Energy may not allow unescorted access to any classified area, access to classified information, or access to any facility of the Department of Energy engaged in the defense activities of the Department to any individual who is a citizen of a foreign nation unless—

(1) the Secretary, acting through the Director of Counterintelligence, first completes a security clearance investigation with respect to that individual in a manner at least as comprehensive as the investigation required for the issuance of a security clearance at the level required for such access under the rules and regulations of the Department; or

(2) a foreign government first completes a security clearance investigation with respect to that individual in a manner that the Secretary of State, pursuant to an international agreement between the United States and that foreign government, determines is equivalent to the investigation required for the issuance of a security clearance at the level required for such access under the rules and regulations of the Department.

(b) REQUIREMENTS ON CONTRACTORS AND EMPLOYEES.—The Secretary shall ensure that any individual who, on the date of the enactment of this Act, is a citizen of a foreign nation and an employee or contractor of the Federal Bureau of Investigation or other contractor of the Department is not discharged from such employment as a result of this section, before the completion of the security clearance investigation of such individual under subsection (a) unless the Director of Counterintelligence determines that such discharge is necessary for the national security of the United States.

SEC. 3192. ANNUAL REPORT ON SECURITY AND COUNTERINTELLIGENCE STANDARDS AT NATIONAL LABORATORIES AND OTHER DEFENSE FACILITIES OF THE DEPARTMENT OF ENERGY

(a) REPORT ON SECURITY AND COUNTERINTELLIGENCE STANDARDS AT NATIONAL LABORATORIES AND OTHER DEFENSE FACILITIES OF THE DEPARTMENT OF ENERGY.

(1) The Secretary of Energy, acting through the Director of Counterintelligence of the Department of Energy, shall submit a report on the security and counterintelligence standards at the national laboratories, and other facilities of the Department of Energy engaged in the defense activities of the Department, to the following:

(A) The Committee on Armed Services and the Select Committee on Intelligence of the Senate; and

(B) The Committee on Armed Services and the Permanent Select Committee on Intelligence of the House of Representatives.

(b) CONTENTS OF REPORT.—The report shall be in classified form and shall contain, for each such national laboratory or facility, the following information:

(1) A description of all security measures that are in place to prevent access by unauthorized individuals to classified information of the national laboratory or facility;

(2) A certification by the Director of Counterintelligence of the Department of Energy as to whether—

(A) all security measures are in place to prevent access by unauthorized individuals to classified information of the national laboratory or facility; and

(B) such security measures comply with Presidential Decision Directives and other Federal requirements relating to the safeguarding and security of classified information.

(3) For each admission of an individual under subsection (a) described in a previous report under this section, the identity of that individual, and whether the background...
review required by that section determined that information relevant to security exists with respect to that individual.

SEC. 3193. REPORT ON SECURITY VULNERABILITIES OF NATIONAL LABORATORY COMPUTERS.

(a) Report Required.—Not later than March 1 of each year, the National Counterintelligence Policy Board shall prepare a report, in consultation with the Director of Counterintelligence of the Department of Energy, on the security vulnerabilities of the computers of the national laboratories.

(b) Preparation of Report.—In preparing the report, the National Counterintelligence Policy Board shall establish a so-called “red team” of individuals to perform an operational evaluation of the security vulnerabilities of the computers of the national laboratories, including by direct experimentation. Such individuals shall be selected by the National Counterintelligence Policy Board from among employees of the Department of Defense, the National Security Agency, the Central Intelligence Agency, the Federal Bureau of Investigation, and of other agencies, and may be detailed to the National Counterintelligence Policy Board from such agencies without reimbursement and without interruption or loss of civil service status or privilege.

(c) Submission of Report to Secretary of Energy and to FBI Director.—Not later than March 1 of each year, the report shall be submitted in classified and unclassified form to the Secretary of Energy and the Director of the Federal Bureau of Investigation.

(d) Forwarding to Congressional Committees.—Not later than 30 days after the report is submitted, the Secretary and the Director shall each separately forward that report, with the recommendations in classified and unclassified form of the Secretary or the Director, as applicable, in response to the findings of that report, to the following:

(1) The Committee on Armed Services and the Select Committee on Intelligence of the Senate.

(2) The Committee on Armed Services and the Permanent Select Committee on Intelligence of the House of Representatives.

SEC. 3194. GOVERNMENT ACCESS TO CLASSIFIED INFORMATION ON DEPARTMENT OF ENERGY DEFENSE-RELATED COMPUTERS.

(a) Procedures Required.—The Secretary of Energy shall establish procedures to govern access to classified information on DOE defense-related computers. Those procedures shall, at a minimum, provide that each employee of the Department of Energy who requires access to classified information shall be required as a condition of such access to provide to the Secretary written consent which permits access by an authorized investigative agency to any DOE defense-related computer used in the performance of the defense-related duties of such employee during the period of that employee’s access to classified information and for a period of three years thereafter.

(b) Expectation of Privacy in DOE Defense-Related Computers.—Notwithstanding any other provision of law (including any provision of law enacted by the Electronic Communications Privacy Act of 1986), no user of a DOE defense-related computer shall have any expectation of privacy in the use of that computer.

(c) Definitions.—For purposes of this section:

(1) The term ‘‘DOE defense-related computer’’ means a computer of the Department of Energy or a Department of Energy contractor that is used, in whole or in part, for a Department of Energy defense-related activity.

(2) The term “computer” means an electronic, magnetic, optical, electrochemical, or other high-speed data processing device performing logical, arithmetic, or storage functions, and includes any data storage facility or communications facility directly related to, or operating in conjunction with, such device.

(3) The term “authorized investigative agency” means an agency authorized by law or regulation to conduct a counterintelligence investigation or investigations of persons who are proposed for access to classified information to ascertain whether such persons satisfy the criteria for obtaining and retaining access to such information.

(4) The term “classified information” means any information that has been determined pursuant to Executive Order No. 12356 of April 2, 1982, or successor orders, or the Atomic Energy Act of 1954, to require protection against unauthorized disclosure and that is so designated.

(5) The term “employee” includes any person who receives a salary or compensation of any kind from the Department of Energy, is a contractor of the Department of Energy or an employee thereof, is an unpaid consultant of the Department of Energy, or otherwise acts for or on behalf of the Department of Energy.

(d) Establishment of Procedures.—Not later than 90 days after the date of the enactment of this section, the Secretary of Energy shall establish procedures to govern access to classified information as may be necessary to implement this section.

SEC. 3195. DEFINITION OF NATIONAL LABORATORY.

For purposes of this subtitle, the term “national laboratory” means any of the following:

(1) The Lawrence Livermore National Laboratory, Livermore, California.

(2) The Los Alamos National Laboratory, Los Alamos, New Mexico.

(3) The Sandia National Laboratories, Albuquerque, New Mexico.

(4) The Oak Ridge National Laboratories, Oak Ridge, Tennessee.
UNITED STATES-CHINA TRADE RELATIONS

HON. CHRISTOPHER H. SMITH
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. SMITH of New Jersey. Mr. Speaker, the Administration's toothless human rights policy towards China has failed miserably. In the five years since President Clinton de-linked China's MFN status from human rights considerations, there has been regression—not progress—within China. Even standing apart from new revelations of nuclear espionage and the skyrocketing U.S.-China trade deficit, this deteriorating situation justifies a fundamental reassessment of U.S.-China trade policy. A couple of examples may help flesh out the seriousness of the matter.

In 1992 the U.S. and Chinese Governments signed a Memorandum of Understanding (MOU) prohibiting trade in slave-made goods, which was followed by a 1994 Statement of Cooperation. Notwithstanding those agreements and China's own laws against slave-made exports, Beijing is turning the Laogai—the Chinese Gulag—into a profit-making venture. Slave-made products—from office supplies to Christmas decorations—regularly make their way to the shelves of American stores. Even the State Department has been forced to admit that "forced labor is a problem" and that China's cooperation with the MOU "has been inadequate." Indeed, the Department reports that in every case where the United States asked to visit a suspect facility during 1998, "the [Chinese] Ministry of Justice refused the request, ignored it, or simply denied the allegations made without further elaboration." In short, the MOU is not worth the paper it is written on.

Similarly, in October 1998, the Chinese regime signed the International Covenant on Civil and Political Rights. Taking the bait, the Administration heralded China's signature as the groundwork for future human rights achievements. Admittedly, the Administration was correct. It forces women who have "unauthorized" pregnancies to abort their children and submit to sterilization. It continues to brutalize the Uighur Autonomous Region. It retails and sells the internal organs of executed prisoners. It forces women who have "unauthorized" pregnancies to abort their children and submit to sterilization. It continues to brutalize the indigenous peoples of Tibet and East Turkestan. It continues to brutalize the indigenous peoples of Tibet and East Turkestan.

Thus, when big business and the Clinton Administration really want to change Beijing's conduct—for instance, in the effort to get China to respect international copyright—what do they do? Do they decide that we should be patient, that we should constructively engage for a few years, and sooner or later Beijing will come around? No. They use economic sanctions—the very same sanctions they say would be counterproductive as a means of promoting political and religious freedom in China. I am aware of at least three occasions since 1991 when the U.S. Trade Representative threatened to impose billions of dollars in sanctions to vindicate U.S. intellectual property interests. In each of those cases, when faced with the sanctions, the Chinese government changed its behavior.

By their actions, big business and the Clinton Administration should show their faith in sanctions. By their reactions, Chinese leaders show the efficacy of sanctions. Thus, the question before us is not "Can economic sanctions work?" It is, "Why do we use sanctions to protect software, but not human life; to protect musical recordings but not fundamental political and religious freedoms; to stop movie piracy, but not torture?" In all the years I have been asking that question, I have not yet heard a good answer.

We have abandoned the American ideals of freedom and democracy for the sake of marginally cheaper consumer goods. We have squandered our patrimony of liberty for the profit of corporations who want access to China's inexpensive labor market. The people of the United States are waking up to this reality and, I believe, will no longer stand by for it.

It is time to do an about face, to condition expanded trade relations upon respect for internationally recognized, fundamental human rights. American interests and American values demand no less.

FINANCIAL INCENTIVES ON DOCTORS NOT TO PROVIDE CARE: FEDERAL COURT EXPLAINS THE DANGERS: REASONS WHY WE SHOULD PASS H.R. 1375

HON. FORTNEY PETE STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. STARK. Mr. Speaker, recently, I introduced H.R. 1375, a bill to limit the amount of financial pressure an HMO can place on a doctor to discourage referrals and testing. A recent Federal Appeals Court case provides new documentation on why we should pass such legislation.

Current regulations allow an HMO to withhold up to 25% of a doctor's compensation as a way to discourage "unnecessary" treatment.
The problem is, such "withholds" can discourage necessary as well as unnecessary treatments and referrals. Many believe that any medical "hold" or "withhold" to 10% to 20% and encourage the use of quality measures as the basis of payments to doctors.

On March 7, 1991, Pegram, Herdrich's doctor, discovered a six by eight centimeter "mass" (later determined to be her appendix) in Herdrich's abdomen. Although the mass was inflamed on March 7, Pegram delayed instituting an immediate treatment of Herdrich, and forced her to wait more than one week (eight days) to obtain the accepted diagnostic procedure (ultrasound) used to determine the actual size and extent of the mass. Ideally, Herdrich should have had the ultrasound administered with all speed after the inflamed mass was discovered in her abdomen, in order that her condition could be diagnosed and treated before deteriorating as it did, but Carle's policy requires plan participants to receive medical care from "contracted facilities," in what they classify as "non-emergency" situations. Because Herdrich's treatment was considered to be "non-emergency," she was forced to wait the eight days before undergoing the ultrasound at a Carle facility in Urbana, Illinois. During this unnecessary waiting period, Herdrich's health problems were exacerbated and the mass rapidly turned into an "emergency"—her appendix ruptured, resulting in the onset of peritonitis. In an effort to defray the increased costs associated with the surgery required to drain and cleanse Herdrich's ruptured appendix, Carle insisted that she have the procedure performed at its own Urbana facility, necessitating that Herdrich travel approximately 100 miles from her neighborhood hospital in Bloomington, Illinois. The "market forces"—the dissent refers to hardly seem to have any effect on the health of the patient—played their part of the mass. Ideally, Herdrich should have been taken seriously, according to keepers of people in the evolving HMO system. Whether the defendants' plan "encouraged physicians to limit treatment and referrals. Due to regained trust, HMOs need to be more sensitive to the doctor-patient relationship and the ethical responsibilities that financial interest in patient care, says Caplan. Instead, doctors should have a predetermined budget and be able to advocate for patients without the threat of financial penalties.

Another hot-button issue for HMO members is the extent of a life-saving experimental procedure will be denied because of its cost. Caplan says the industry should follow the lead of the handful of HMOs that have established outside, independent panels to make final decisions.

Even care providers fear that they "have become somewhat preoccupied with [their] ownership status and consequently have not paid as much attention as [they] should have kept their eye on the competencies." (Id.) The specter of medical concerns driving the health care system, says S. a group of Massachusetts physicians and researchers writing from the "inside" of a covenant into a business contract. Canons of commerce are displacing dictates of healing, trampling our professions' most sacred values. Market medicine treats patients as "profit centers." (For Our Patients, Not for Profits: A Call to Action, JAMA, Dec. 3, 1997, at 1773.) As one professional stated, "It's too bad, we used to spend most of our time worrying about how to do a better job. Now we worry about doing a better job at a lower price." (Id.)

Thousands of American physicians and nurses, outraged by the increasingly "corporate" nature of American medicine, recently staged a reenactment of the famous Boston Tea Party by symbolically dumping 1 million each minute into Boston Harbor to dramatize the amount of health care money that is being wasted to pay for HMO marketing, profits, and administrative salaries. See Id.

The shift to profit-driven care is a gallop. For nurses and physicians, the space for giving good care to their patients is shrinking rapidly. For the public, who are mostly healthy and use little care, awareness of the degradation of medicine builds slowly; it is mainly those who are expensively ill who encounter the dark side of market-driven health care. We criticize market medicine not to obscure or play down the "darker side of market-driven health care."

Another commentator observed that "American "market theology" is being invoked as an excuse for the downsizing of patient care and the growing absence of compassion in health care." (Bob LeBow, Nation Needs to Take Control of Health Care Sys tem for Patients, not Profits, Idaho States man, Dec. 2, 1997, at 6A.) Instead of providing health care, doctors are forced to "spend more time in front of a computer trying to figure out ways to make money and keep the doors open."

The problem is, such "withholds" can discourage necessary as well as unnecessary treatments and referrals. Many believe that any medical "hold" or "withhold" to 10% to 20% and encourage the use of quality measures as the basis of payments to doctors.

A doctor who is responsible for the real-life financial demands of providing for his or her family—sending four children to school (including two who are in college or going to the associated primary school), making home payments, covering office overhead, and paying malpractice insurance—might very well "flinch" when told he or she should not spend money on a patient's care in order to limit its cost and increase the medical office's income. The patient may be very ill, and the doctor may feel that the patient's insurance company is not paying the doctor a fair amount for the care the patient needs. (Galen, Inc., United States v. Carle Clinic Association, No. 91 C 2241, 1994 U.S. Dist. LEXIS 10534, at 13-14 (N.D. Ill. 1994).)
the dual-loyalties at work. Carle doctors were faced with an incentive to limit costs so as to guarantee a greater kickback.

In summary, we hold that the language of the plaintiff’s complaint is sufficient in alleging that the defendant’s incentive system depleted plan resources so as to benefit physicians who, coincidentally, administered the Plan, possibly to the detriment of their patients. The ultimate determination of whether the defendants violated their fiduciary obligations to act solely in the interest of the Plan participants and beneficiaries, see 29 U.S.C. §1104(a)(1), must be left to the trial court. On the surface, it does not appear to us that it was in the interest of plan participants for the defendants to deplete the Plan’s funds by way of year-end bonus payouts. Based on the record we have before us, we hold that the plaintiff has alleged sufficiently a breach of the defendants’ fiduciary duty.

IN SPECIAL RECOGNITION OF CULLEN T. GALLAGHER ON HIS APPOINTMENT TO ATTEND THE UNITED STATES AIR FORCE ACADEMY

HON. PAUL E. GILLMOR
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. GILLMOR. Mr. Speaker, I rise today to pay special tribute to a truly outstanding young man from Ohio’s Fifth Congressional District. Recently, I had the opportunity to nominate Cullen T. Gallagher for an appointment to attend the United States Air Force Academy in Colorado Springs, Colorado.

I am pleased to announce that Cullen has been offered an appointment and will be attending the Air Force Academy with the incoming cadet class of 2003. Attending one of our Nation’s military academies is one of the most rewarding and demanding time periods these young men and women will ever undertake. Our military academies turn these young adults into the finest officers in the world.

Mr. Speaker, Cullen has demonstrated the kind of leadership and dedication needed to enter the Air Force Academy with the class of 2003. While attending Perkins High School in Sandusky, Ohio, Cullen excelled academically attaining a grade point average of 3.795, which ranks him forty-first in his class of one-hundred sixty students. Cullen is a member of the National Honor Society, the Academic Challenge Team, and the Who’s Who Among American High School Students. In October, 1998, Cullen was named the Rotary Club’s Student of the Month.

In addition, he attended the National Youth Leadership Forum on Law and the Constitution in Washington, D.C., and attended the United States Air Force Academy Summer Scientific Seminar. Outside the classroom, Cullen is the president of the Ski Club, and is a member of the Spanish Club, Drama Club, Marching Band, and Show Choir. On the fields of competition, Cullen is a member of the Perkins High School Varsity Cross Country and Tennis teams.

Mr. Speaker, at this point, I would ask my colleagues to stand and join me in paying special tribute to Cullen T. Gallagher. Our service academies offer the finest education and military training available anywhere in the world. I am sure that Cullen will do very well at the Air Force Academy, and I wish him much success in all of his future endeavors.

TRIBUTE TO WESTLAKE HILLS ELEMENTARY SCHOOL

HON. BRAD SHERMAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. SHERMAN. Mr. Speaker, I rise today to celebrate the designation of Westlake Hills Elementary School as a United States Department of Education National Blue Ribbon School.

The Blue Ribbon Award for Educational Excellence recognizes a school’s achievement in all facets of academic development including teacher training, student achievement, educational innovation, and community involvement.

Westlake Hills Elementary School has far transcended the norm in all these areas and has demonstrated its deep commitment to molding well rounded, socially conscious leaders for the 21st century through its outstanding range of programs.

Westlake Hills teachers frequently participate in workshops and conferences on a wide range of educational issues, showing the tremendous value Westlake Hills places on maintaining the high caliber of its faculty and keeping its teachers abreast of new ideas in education. These teachers then employ these ideas in the classroom, resulting in projects including a 6th grade “wax museum” and a 1st grade “dinosaur dig.” In addition, Westlake Hills recognizes the importance of involving a child’s first and most influential teachers in the learning experience, with 75% of Westlake Hills parents logging in an astounding 12,000 hours of volunteer time.

These efforts are reflected in the test scores of the student body, which place Westlake Hills above all the other elementary schools in its district. Westlake Hills has also answered President Clinton’s “America Reads Challenge” by forging a partnership with nearby Pepperdine University, in order to ensure that each and every child can read both independently and effectively.

Along with its demonstrated excellence in the classroom, Westlake Hills realizes the importance of extracurricular activities in creating the “total” student. Over 200 children participate in clubs for subjects including drama, physical fitness, and Spanish. A club also exists for computers, making use of the school’s technology center.

Westlake Hills believes that their goal in forming the “total” student would also be incomplete without instilling in the students a sense of their responsibilities as members of their local community. They have joined General Colin Powell’s “Make a Difference” volunteer program, where the children share their time assisting senior citizens.

Mr. Speaker, distinguished colleagues, please join me in celebrating the recognition of Westlake Hills Elementary School as a National Blue Ribbon School. It is a prime example of the extremely positive effects which a partnership between all members of a school community can produce. Westlake Hills’ approach to public education is a paradigm which all American schools should strive to emulate.

A TRIBUTE TO THE DE JONG FAMILY

HON. RANDY “DUKE” CUNNINGHAM
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. CUNNINGHAM. Mr. Speaker, I rise today to pay tribute to the de Jong family of San Diego County, California. Over the last few years, I have had the privilege of working with Arie de Jong and other members of a family that epitomizes the American success story. The de Jong’s are close friends to which has given them the opportunity to lead and succeed. On May 26, the de Jong family celebrated 50 years of American heritage with a reunion in Poway, California. Since 1948, when Tom de Jong moved to America, the de Jong family has been an important piece of San Diego’s community.

I have attached an article from the online edition of the San Diego Union Tribune that explains more family history and this recent celebration.

In addition, I want to extend my personal congratulations on their first 50 years in American history, and wish them health and happiness for the next 50 years.

FAR-FLUNG FAMILY MEETS, MARKS 50 YEARS IN U.S.

(John Berhman)

POWAY—The de Jong family is a coming-to-America success story.

Fifty years ago, from their native Holland, the family—a mother, father and 10 children—traveled across the United States to a relative’s sparse cottage in the North. Today, that beginning, they grew into one of the most successful and well-known families in North County.

The family’s Hollandia Dairy in San Marcos in an institution. Family members have spread out all over California and the country, many of them working in the dairy business.

Yesterday, many of them returned to their American roots, celebrating 50 years of being in this country with a family reunion where it all started.

They met at Old Wyoming Picnic Grounds, the family homestead at the end of Old Pomerado Road in south Poway. They gathered around shady oak trees and three stone buildings that served as the family’s first homes in this country to reminisce and give thanks.

It is quite an extended family now. From 10 brothers and sisters have come 54 children and nearly 100 grandchildren, most of whom are expected during the reunion. About five family members, mostly cousins, are attending from Holland. Other family members have come from Oregon, Michigan, New Mexico and various parts of California.

“This is wonderful. This is what family and friends are all about. And, this great
country. We feel so privileged to be a part of this country. Tom de Jong, at 73 the oldest of the 10 brothers and sisters, said yesterday at the kickoff of the event.

Tom was the first of the family to come to America. That was in 1948, when he took a job working on his uncle Sam Bruinsma's ranch in what is now Poway. Bruinsma was married to Tom's father's twin sister, Tante Jet.

Impressed with America and the opportunities it offered, Tom wrote to his parents, insisting they join him.

The rest of the family did indeed follow the oldest son, arriving in New York on May 26, 1949. This week's reunion—expected to draw more than 200 de Jongs and close friends—marks the 50th anniversary of that event.

"I will never forget that day," Arie de Jong, 60, perhaps the best known of the clan, said yesterday. "The Statue of Liberty and that New York skyline—and coming to America. "America has been good to us."

Arie, after helping his family start the Hollandia Dairy, became a millionaire in the trash-hauling business. Among the possessions he has acquired are the three stone structures in Poway that his family first lived in.

The reunion, the first of its kind for the family, was Arie's idea. "It's really for the kids and the grandkids through," he said. "It's to show them where their family started in this country."

Arie has arranged a busy schedule that included a barbecue picnic last night at the old family homestead, a trip to Catalina today and tomorrow, another barbecue and picnic Saturday at nearby Big Stone Lodge, and church on Sunday followed by final farewell.

A TRIBUTE TO H. GAYLON GREENHILL

HON. PAUL RYAN
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. RYAN of Wisconsin. Mr. Speaker, I rise today to honor a distinguished public servant. H. Gaylon Greenhill, Chancellor of the University of Wisconsin-Whitewater, has decided to retire after 37 years of dedicated service to the institution and our region. Chancellor Greenhill has done so much to advance the cause of higher education in Wisconsin, and it is for his service that I salute him today.

H. Gaylon Greenhill has served in a variety of capacities at the University of Wisconsin-Whitewater throughout his tenure. Before being appointed chancellor in 1991, he served as Chairman of the Political Science department, Dean of Summer School and Extension Services, Acting Dean of the College of Letters and Sciences, Vice Chancellor for Academic and Student Affairs, and Vice Chancellor and Dean of Faculties.

Chancellor Greenhill received his Bachelor's degree in Social Studies at University of Wisconsin-River Falls and earned his Master's and Doctorate degree in Political Science from the University of Wisconsin. He was a Fulbright Scholar at the University of Oslo from 1960–61.

During his tenure as chancellor at UW-Whitewater, the university developed and implemented the campus exterior plan, constructed the Irvin L. Young Auditorium, renovated the James R. Connor University Center and Hyer Hall, and made technological advances such as the construction of a fiber optic computer network, the addition of numerous workstations in computer labs and the complete wiring of the residence halls.

Under Chancellor Greenhill's leadership, UW-Whitewater has been ranked in U.S. News & World Report's top tier of midwestern regional universities for five consecutive years. UW-Whitewater has also recently received accreditation from the North Central Association and National Council for Accreditation of Teacher Education.

Chancellor Greenhill initiated the Excellence for the 21st Century Campaign to raise $10 million for scholarships and university betterment. Not only did UW-Whitewater surpass this goal, it did it two years early and had $2.4 million in excess.

Chancellor Greenhill will retire from UW-Whitewater effective June 30, 1999. I know that I speak for everyone in the UW-Whitewater family when I wish him and his family well as they begin this new and exciting stage in their lives together. Thank you for your service to your community, Chancellor, and thank you for what you have done for the university.

IN HONOR OF THE LATE MAJOR JOHN B. MAHAN

HON. SCOTT MCINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. McINNIS. Mr. Speaker, it is with a heavy-heart that I wish to take this moment to recognize the life and career of one of The United States’ great men, Major John B. Mahan. Sadly, Major John Mahan died after suffering a stroke in 1995. While his family and friends remember the truly exceptional life of Major Mahan, I, too, would like to pay tribute to this remarkable man.

Major John B. Mahan served proudly in the U.S. Army from 1938 until his retirement in 1961. During that time, he served in North Africa. While in North Africa, Major Mahan was wounded and had to spend months in a state-side hospital to recover. In the Marine Division, Major Mahan served in the Korean War as a liaison officer/transportation officer in some of the war’s most intense months.

Later in his life, Major Mahan was stationed at Fort Carson as company commander. In 1957, he became the Commander of Cadets in the R.O.T.C program for the Denver Public School District. Major Mahan put all his into the R.O.T.C. program, running it until his retirement.

Although his professional accomplishments will long be remembered and admired, most will remember Major John Mahan, above all else, as a friend. It is clear that he is truly missed, yet his family can take solace in the knowledge that each is a better person for having known Major John Mahan.

ANOTHER REASON WE NEED A RX BENEFIT FOR EVERYONE IN MEDICARE

HON. FORTNEY PETE STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. STARK. Mr. Speaker, a number of us have introduced H.R. 1495, a bill to provide a prescription drug for everyone in Medicare. A provision in that bill requires a system to prevent drug errors and the use of contra-indicated drugs.

Over-prescription and reactions among multiple prescriptions costs Americans billions of dollars a year in illness—and thousands of deaths. If we can reduce those errors, the total health care system can make enormous savings.

A new article in the May/June 1999 issue of the Journal of the American Pharmaceutical Association provides another example of why we should improve the quality of drug use among Medicare beneficiaries. Following is the abstract of Rajender Aparasu’s study entitled, "Visits to Office-Based Physicians in the United States for Medication-Related Morbidity."

Objective: To examine the prevalence, nature, demographics, and resource use associated with visits to office-based physicians in the United States during 1995 for medication-related morbidity.

Design: A nationwide cross-sectional survey of ambulatory care visits to physician offices, based on data from the National Center for Health Statistics’ 1995 National Ambulatory Medical Care Survey.

Patients: Patients visiting office-based physicians for principal diagnoses of adverse effects of medications (ICD-9-CM E-code 930.00-947.9).

Main Outcome Measures: Weighted measures of prevalence, nature, demographics, and resource use associated with visits related to adverse effects of medications.

Results: An estimated 2.01 million (95% confidence interval, 1.99 to 2.03 million) visits for medication-related morbidity were made to office-based physicians in the United States during 1995, representing an annual rate of 7.90 visits per 1,000 persons. Medication-related visit rates were greater in women, in patients between 65 to 74 years of age, and in the Midwest. The most frequently cited reasons for medication-related visits were skin rash, nausea, and shortness of breath. The therapeutic agents responsible for medication-related visits were most often hormone and synthetic substitutes (13.32%), antihypertensives and short acting beta blockers (12.57%), and cardiovascular drugs (9.30%). Medication-related visits most often involved diagnostic services and medication therapy. The majority included instructions for a scheduled follow-up, and fewer than 1% resulted in hospital admission.

Conclusion: Medication-related ambulatory care utilization can pose a significant burden on health care resources unless specific strategies are initiated to control medication-related problems. The provision of pharmaceutical care can play an important role in reducing medication-related problems and associated health care costs.
IN SPECIAL RECOGNITION OF ELBERT GILL IN CELEBRATION OF HIS RETIREMENT FROM THE OTTAWA COUNTY BOARD OF ELECTIONS

HON. PAUL E. GILLMOR
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. GILLMOR. Mr. Speaker, I rise today to pay a very special tribute to one of the truly outstanding individuals from Ohio's Fifth Congressional District, Mr. Elbert Gill. On Monday, May 31, 1999, Elbert Gill will retire from service as Chairman of the Ottawa County Board of Elections.

Elbert Gill has certainly been a valuable asset to the Ottawa County Board of Elections. Since joining the Board of Elections in March 1984, Mr. Gill has worked diligently to serve the voters of Ottawa County in every manner possible. Whether it is his generosity in taking the staff to meetings or assisting with trouble-shooting on election night, Elbert Gill has given unselfishly of his time and helped make Ottawa County one of the best Boards of Elections in the state of Ohio.

Mr. Speaker, Elbert Gill embodies the very spirit of American workmanship through his conscientious attention to detail. In his job as Chairman of the Ottawa County Board of Elections, Mr. Gill has epitomized the word that best describes him—service. Although he is retiring after ten years on the board, his hard work, commitment, and dedication to the citizens of Ottawa County will continue long into the future.

Mr. Speaker, it has often been said that America succeeds due to the remarkable accomplishments and contributions of her citizens. It is very evident that Elbert Gill has given freely of his time and energy to assist in the preservation of American ideals. Our electoral process is the backbone of our nation, and those individuals, like Elbert Gill, who work hard to make that system free and democratic are true American patriots.

Mr. Speaker, at this time, I would urge my colleagues to stand and join me in paying special tribute to Elbert Gill. On the occasion of his retirement as Chairman of the Ottawa County Board of Elections, we thank him for his service and we wish him all the best in the future.

HONORING THE SACRIFICE OF OUR FIREFIGHTERS

HON. PAUL RYAN
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. RYAN of Wisconsin. Mr. Speaker, today I am introducing a resolution honoring firefighter throughout our nation that have died in the line of duty. It is appropriate that the Congress pay its respect to these individuals.

Just last week, the District of Columbia lost two brave and dedicated public servants. Firefighter Anthony Phillips died while fighting a fire at a DC town house. Firefighter Louis Matthews died days later from burns sustained while fighting the same blaze.

There are over 1.1 million firefighters on active duty everyday in the United States, and over the last 10 years, we have lost 1,109 of these courageous individuals to circumstances associated with doing their job.

Almost a month ago, the National Fire Protection Agency announced that 91 firefighters died in the line of duty during the year 1998. That is the lowest number of deaths in the last 10 years, and one of the lowest totals on record. While we are pleased to see the number of deaths decrease, clearly all Americans look forward to the day when we don't lose a single firefighter.

These brave individuals, many of whom serve as volunteers without compensation, risk their lives daily to ensure that we can exit safely from our homes when they catch fire and provide life-saving care when we are injured in an accident. It is for these reasons that we honor these courageous individuals.

I trust my colleagues will join me in paying tribute to those who have made the ultimate sacrifice, both in the District I serve, and all across the nation.

EXTENSIONS OF REMARKS

IN HONOR OF THE LATE STAFF SERGEANT ALVIN W. PLASTER

HON. SCOTT McINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. McINNIS. Mr. Speaker, I would like to take a moment to recognize a man who exemplified courage and determination, Staff Sergeant Alvin W. Plaster. Tragically, Alvin Plaster died in 1996 after a long battle with a grave illness. While family and friends remember the truly exceptional life of Staff Sergeant Alvin W. Plaster, I, too, would like to pay tribute to this remarkable man.

Persistence and dedication displayed on the part of Alvin Plaster is what got him into the Army. Failing the physical examination twice, he convinced an Army physician to bend the rules and put him in. From 1942 to 1945, Alvin Plaster was Staff Sergeant in the Quartermaster Corps. He served with integrity, enthusiasm, and most of all, pride.

Individuals such as Alvin Plaster, who contribute selflessly, are a rare breed. Though his family and friends no doubt mourn his absence, they have all gained immensely through knowing Alvin W. Plaster.

LEGISLATION HONORING FALLEN FIREFIGHTERS

HON. JAMES E. ROGAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. ROGAN. Mr. Speaker, today, the House Judiciary Committee will introduce legislation designed to help fight the scourge of violence among young people. Included in this bill is a proposal I authored with my colleague Rod Blagojevich of Illinois.

Our plan, HR 1717, known as the Violent Youth Offender Accountability Act, will prohibit violent juvenile felons from ever purchasing a firearm. Under current law, many states permit juveniles who have been convicted of violent felonies to have their criminal records expunged upon reaching age 18. As a result, it is perfectly legal for a juvenile with a record as a violent felon to legally purchase a deadly weapon. Mr. Speaker, this is wrong.

As many of my colleagues know, I spent nearly a dozen years as a criminal trial court judge and gang murder prosecutor. Some of the most serious crimes I have seen were committed by juveniles. We need to ensure that our streets are kept safe, and that young people learn how serious committing a violent crime can be. One of the surest ways to meet this goal is by keeping firearms out of the hands of serious criminals of any age.

We must also take steps to ensure that the law applies equally to all Americans. The Juvenile Justice bill includes a key provision of our bill which will apply the same standard to juveniles as to adults who have committed serious felonies. Crimes that are considered “serious violent felonies” and would disqualify an adult from legally purchasing a firearm must also apply to juveniles. Under current federal
law, these crimes include: murder, rape, manslaughter, robbery, extortion, arson and similar severe ones. Mr. Speaker, we need to keep guns out of the hands of violent criminals. I am proud that my colleague ROD BLUM and I have reached across party lines to stand for what is right: protecting our nation’s youth. Later this week, the Judiciary Committee will mark up legislation incorporating our proposals and a number of key measures to ensure that the same goal is met. We must not cease in our efforts to ensure safe, effective schools and communities our children deserve nothing less.

**MEDICARE MODERNIZATION NO. 8: SETTING THE GOAL OF MOVING TO A SINGLE, UNITED P.P.S. SYSTEM FOR POST-CARE HOSPITAL SERVICES**

**HON. FORTNEY PETE STARK**

**OF CALIFORNIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, June 8, 1999**

Mr. STARK. Mr. Speaker, as part of a series of bills to provide for the modernization of Medicare, I am today introducing a bill to set the goal that by the year 2010 Medicare will develop and use a single, united prospective payment system for post-acute hospital services. Currently, payment for post-acute care is a Tower of Babel, with different PPS and non-PPS systems used depending on whether one goes to a non-PPS hospital, a skilled nursing home, a home health agency, or some other form of therapy. The different payment rates and systems greatly increase Medicare’s complexity and makes the system vulnerable to ‘gambling’—the placement of a patient where the provider will get the most money, not where the patient will get the best care.

The Congressional advisory commission MedPAC, and other health experts, have long warned that the proliferation of payment systems makes it evermore difficult for us to know what we are buying and how well patients are being treated. But moving to a single, unified, and simpler system is not easy. In many areas, the data or basic research is not available. Therefore, my bill sets out a long-term goal for Medicare to move in this direction. I hope that HCFA can develop these simplifications and cross-comparisons sooner, but if not, the bill sets a ‘hammer’ of requiring the provider communities and HCFA to come together to achieve this goal by the end of the next decade.

In the long run, this effort should yield savings and improve quality measurement. My introduction of this bill is a signal that this is the direction we should be moving.

Following are some quotes from the March 1999 MedPAC report to Congress on why this wonky issue is also an important issue.

To guide the development of consistent payment policies across post-acute care settings, MedPAC recommends that common data elements be collected to help identify and quantify the overlap of patients treated and services provided. Further, it is important to put in place quality monitoring systems in each setting to ensure that adequate care is provided in the appropriate site. We also support research and demonstrations to assess the potential of alternative patient classification systems for use across settings to make payments for like services more comparable.

A lack of readily available data on patient function and health status limits the ability to identify where differences and overlaps in patients occur and to compare costs and payments across provider types. In particular, policymakers are concerned that payment policies may furnish incentives for providers to place patients in settings for financial, rather than for clinical reasons. A core set of common data about patients in all post-acute care settings will improve considerably the ability to monitor and make policy decisions about post-acute care.

**IN SPECIAL RECOGNITION OF THE LATE MAJ. GEN. WALTER A. CHURCHILL (RET.), U.S. MARINE CORPS, FOR HIS DEDICATED SERVICE TO THE UNITED STATES OF AMERICA**

**HON. PAUL E. GILLMOR**

**OF OHIO**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, June 8, 1999**

Mr. GILLMOR. Mr. Speaker, I rise to pay special tribute to a truly outstanding individual from the state of Ohio, the late Major General Walter A. Churchill (ret.), United States Marine Corps. On Monday, June 7, 1999, a special celebration will take place in Toledo, Ohio to honor the outstanding life and military career of General Churchill.

Mr. Speaker, Walter Augustus Churchill, Sr. was born on November 12, 1903. At the age of 19, he enlisted in the United States Marine Corps and began a distinguished military career culminating with the rank of Major General in 1969. General Churchill served from the United States Marine Corps on December 1, 1963, after a remarkable 41 years and 8 days of service to his country.

During his career in the Marine Corps, General Churchill served the United States proudly around the world at Guantanamo Bay, Iceland, Guam, Guadalcanal, and other areas of the Pacific theater in World War II. While serving in World War II, General Churchill was awarded the Bronze Star Medal with Combat ‘V’ for Valor and a Gold Star as Commander of the Fifth Field Service Command, Fleet Marine Force, Pacific.

After his military career, General Churchill was instrumental in forming the United States Marines Youth Foundation, whose goal is to keep children free from the dangers of drugs and substance abuse. General Churchill was also the Chairman of the Board and CEO of Churchill Supermarkets, Inc., the family business of five supermarkets. His tireless dedication and innovation helped propel General Churchill’s standing in the business community.

Always the community activist, General Churchill was a member of the Toledo City Council and was Chairman of the Toledo Republican Executive and Central Committees. He was a member of the Toledo Rotary Club, the National Association of Grocers, Ohio Automobile Association, and many more. Among other honors, he was recognized as “Marine of the Year,” “Grocer of the Year,” and, in 1992, he received the President’s Distinguished Service Award.

Mr. Speaker, I would urge my colleagues to stand and join me in paying tribute to the late Major General Walter A. Churchill. For his unwavering service and the call of duty, we owe him our most gracious thanks.

**TRIBUTE TO DAVID AND ELAINE GILL**

**OF CALIFORNIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, June 8, 1999**

Mr. SHERMAN. Mr. Speaker, I rise today to pay tribute to Elaine and David Gill for their almost fifty years of leadership and devotion to the Brandeis-Bardin Institute and the Los Angeles Jewish community.

Since they first attended the Brandeis Collegiate Institute in the 1950s, Elaine and David have forged a warm, longstanding relationship with the Brandeis-Bardin Institute as a whole. Both of them have served on the Board and David is a member of the Executive Committee. Elaine has served as chair of the Alonim Committee, the Women of Brandeis-Bardin, and as co-chair of the Brandeis-Bardin Associates.

The Gills have known the important role that BBI plays in enhancing the spiritual life of Jews of all ages and levels of observance, and they have committed their time and energy to ensuring the Institute’s continued success and development.

The Gills’ relationship with the Brandeis-Bardin Institute exists on the personal level as well. All four of their sons have attended Camp Alonim, the youth resident summer camp held on the grounds of the institute. Between 1971 and 1994, at least one of their sons was involved with the camp either as a camper or a staff member. In fact, both of the couple’s married sons met their wives at Alonim. A third generation of Gills, grandsons Jasper, Jonah, and Micah, are all future campers.

In addition to all their efforts on behalf of Brandeis-Bardin, Elaine and David have found time to volunteer with several other Jewish organizations, showing that their dedication to the local Jewish community extends far beyond the tree-lined gates of the institute.

At Valley Beth Shalom, one of the largest Conservative synagogues in the San Fernando Valley, the Gills have both been active members. They have served as pararabbinic counselors and they have been instrumental in developing the synagogue’s havurah program, which brings together families with similar interests for social and religious fellowship. David has been chairman of the Board and has led two building fund campaigns. Elaine is currently Religious Vice President.

The Gills have also devoted an extraordinary amount of time to the Los Angeles Jewish Federation which offers a wide range of activities and services to individuals throughout Los Angeles. Together, David and Elaine...
EXTENSIONS OF REMARKS

IN HONOR OF THE LATE DR. THEODORE MILLER

HON. SCOTT McNINIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. McNINIS. Mr. Speaker, it is with great sadness that I wish to take this moment to recognize the remarkable life and significant achievements of one of Pueblo, Colorado's treasured pediatric physicians. Tragically, Dr. Theodore Miller died after a long battle with prostate cancer. While his family and friends remember the truly exceptional life of Dr. Theodore, I, too, would like to pay tribute to this remarkable man.

As a pedestrian in Pueblo, Colorado, for forty years, Dr. Miller's bedside manner was the best around. According to former patients and colleagues, Dr. Miller was the kind of man who took time for the children to get them directly involved with their diagnosis and recovery. Dr. Miller's love for his work was evident through his dedication to his partner, and his patients.

Dr. Theodore Miller served in the medical corps in World War II, and moved to Pueblo Colorado soon after. He graduated from Northwestern Medical School in 1945 and started his partnership in 1951. After forty years of serving the community of Pueblo, Dr. Miller retired in 1991. He was a member of the American Academy of Pediatrics, and the Colorado State Medical Society. Dr. Miller also served on the American Board of Pediatrics, and was once president of the Pueblo County Medical Society.

Although his professional accomplishments will long be remembered and admired, most who knew him well remember Dr. Miller, above all else, as a friend. It is clear that the multitude of those who have come to know him, mourn his absence. However, Mr. Speaker, I am confident that, in spite of this profound loss, the family and friends of Dr. Theodore Miller can take pride in the knowledge that each is a better person for having known him.

HONORING THE SERVICE OF RUTH SQUIRES

HON. JAMES E. ROGAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. ROGAN. Mr. Speaker, this year marks the 36th year of service for a teacher in my district. Sadly, as students and parents in La Crescenta, CA, would agree, it also marks the end of her distinguished career in education. For her three decades of service to the families of California's 27th Congressional District, and for her distinguished work in the La Crescenta community, I ask my colleagues to join me in honoring the service of Ruth Squires.

TRIBUTE TO THE REPUBLIC OF CROATIA FOR CELEBRATING THE NINTH ANNIVERSARY OF ITS INDEPENDENCE ON MAY 30, 1999, AND FOR OPENING A NEW CONSULATE GENERAL IN CHICAGO ON APRIL 8, 1999

HON. GEORGE RADANOVICH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. RADANOVICH. Mr. Speaker, I rise today to pay tribute to the Republic of Croatia for celebrating the 9th anniversary of its independence on May 30, 1999, and for opening a new Consulate General in Chicago on April 8, 1999.

I am proud, and especially proud today, to be one of the more than 2 million people of Croatian descent living in the United States who have maintained their links with Croatia. Croatian Americans arrived in the United States with little except for the belief in the "American Dream" and a perseverance to succeed and watch their children excel. Since they first arrived in large numbers in the United States more than one hundred years ago, Croatian Americans have done well in all aspects of American historical, socio-cultural and political life. Their sons and daughters have grown up to be doctors, lawyers and other professionals who have served the country which welcomed their ancestors with open arms.

Croatia is a country rich in history, culture and beauty. Its people have a special appreciation for the United States and Americans. A Croatian poet, Antun Gustav Matos, wrote in 1906 that "America is presently the most important factor in the creation of Croatian democracy, the best school of Croatian vitality."
Today these words are even more meaningful than they were in 1906. We all remember Croatia's lengthy war for independence that made headlines worldwide in the early part of this decade. We celebrated when Croatia finally broke from the Serbian-dominated Yugoslavia in 1991, after such great loss of human life, to become its own independent country. Today, we stand with the Croatians to pay tribute to their courage and perseverance. We pay tribute to Croatia's fully functioning, democratic political structure, and its commitment to further economic development.

I also want to pay tribute to the Republic of Croatia's opening of a new Consulate General in Chicago on April 8, 1999. The three-day series of events entitled Croatia in Chicago was the largest gathering ever of the Croatian community in the U.S. and it demonstrated that the partnership between Croatia and the U.S. is constantly being strengthened. One particularly special event was a Gala Dinner organized by the Croatian community in Chicago. There were 1,400 guests in attendance and the revenues of the dinner went to benefit the children's hospitals in Croatia.

Lastly, Mr. Speaker, I want to associate myself with the remarks of Ambassador Robert Gelbard at the Croatia in Chicago event. Mr. Gelbard said, "As our trade and business ties grow so must Croatia's integration into the full range of Western and Euro-Atlantic institutions." I believe we must do all we can to help Croatia achieve these goals, and we must continue to reinforce to the Croatian people that our goal is a full partnership with Croatia.

Mr. Speaker, as a member of the Congressional Sportsmen's Caucus and District of Columbia Appropriations Subcommittee, I am deeply concerned about the environment in and around our nation's capital.

Two years ago the Congressional Sportsmen's Caucus held a monthly informational briefing on fishing in the Washington, D.C. area. Following that briefing I submitted for the record an article written by Charles Verharen, a Professor at Howard University and avid record an article written by Charles Verharen, a Professor at Howard University and avid

THE POTOMAC—AN ENDANGERED RIVER

HON. RANDY “DUKE” CUNNINGHAM
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. CUNNINGHAM. Mr. Speaker, as a member of the Congressional Sportsmen’s Caucus and District of Columbia Appropriations Subcommittee, I am deeply concerned about the environment in and around our nation’s capital.

The Potomac River.

At the request of local fishermen, a study on the impact of sediment discharge on anadromous fish was initiated by the U.S. Fish and Wildlife Service (FWS), with the Maryland Department of Natural Resources, the Interstate Commission for the Potomac River Basin, the District of Columbia Fish and Wildlife, and the National Marine Fisheries Service. The report concludes that this sediment discharge is causing a significant adverse impact to anadromous fish during the spawning season.

Joe Fletcher thinks that if Washingtonians knew how dirty their clean drinking water makes the Potomac, they might want to pay a little extra so the shad and the rockfish have a chance to make a comeback. Joe even dreams about the day he might see a sturgeon breaking the water close to his boat—but not too close!
WASHINGTON AQUEDUCT SEDIMENT DISCHARGES

REPORT OF PANEL RECOMMENDATIONS

Fisheries Panel Summary of Recommendations, March 1999

A panel of fisheries biologists from the District of Columbia, State of Maryland, Interstate Commission on the Potomac River Basin, National Marine Fisheries Service, and U.S. Fish and Wildlife Service was convened to provide recommendations on minimizing impacts to migratory fish from sediment discharges at the Washington Aqueduct. The fisheries panel provides these recommendations to the administrators at the Washington Aqueduct in an effort to advance the anadromous (and resident) fish restoration efforts in the Potomac River. By minimizing the adverse effects to water quality from sediment discharges at the Dalecarlia and Georgetown settling basins, fisheries resource managers have a better chance at achieving fish and habitat restoration goals for the Potomac River.

1. The goal is to eliminate sediment discharges to the Potomac River. If sediment discharges are absolutely necessary, the panel recommends eliminating the flocculent/sediment discharges from February 15 to June 15, to avoid the early and late spawning activities of fish.

2. Mix the flocculent/sediments with raw river water in the settling basins to produce an effluent, that when discharged to the river, reduces the adverse impacts of concentrated sediments on migratory fish.

3. Slow the rate of flocculent/sediment discharge to the river to a minimum of 72 hours per basin. We recommend that the ratio of discharge to river flow be less than 0.1%. This will also reduce the adverse impacts to migratory fish from concentrated sediments entering the river.

4. Monitor water quality daily at the discharge sites to identify a time when water quality conditions are least sensitive to sediment discharges in the river. The water quality monitoring parameters include: pH, temperature, alkalinity, and conductivity.

5. Remove rocks from the Dalecarlia outlet to ensure controlled and measurable sediment discharge rates, and establish outfall maintenance and discharge monitoring plans to promote safe operation and predictable discharge rates.

6. Create a panel of stakeholders to assist the Washington Aqueduct with issues relating to the Potomac River ecosystem. These entities could include citizen coalition, local, state, interstate, and federal representatives.

INTRODUCTION OF MEDICARE MODERNIZATION NO. 7: “MEDICARE CLINICAL PRACTICE PATTERNS ACT OF 1999”

HON. FORTNEY PETE STARK
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 8, 1999

Mr. STARK. Mr. Speaker, today I rise to introduce the seventh bill in my Medicare modernization series: the “Medicare Clinical Practice Patterns Act of 1999.” This bill would give the Secretary the authority to document patterns of clinical practice in the Medicare program, determine the effectiveness of treatment, and bring Medicare policy in line with the private sector. The “Clinical Practice Patterns Act” would help to standardize the delivery of health services within Medicare, thereby improving the quality of care provided to Medicare beneficiaries and achieving savings for the program overall.

Earlier this year, I introduced H.R. 1544, the “Patient Empowerment Act of 1999.” The “Patient Empowerment Act” was the first step toward eliminating the wide variation in treatment patterns across the U.S., as identified by Dr. John Wennberg in the Dartmouth Atlas. The “Clinical Practice Patterns Act” builds on this theme by developing evidence-based clinical guidelines to assist providers in treating various illness.

Mr. Speaker, there are literally millions of doctors, nurses, and health administrators working in thousands of different hospitals, all at different hospitals in different communities, who provide care to the 39 million elderly, disabled, and ESRD patients covered by Medicare. With all of these elements interacting together, it’s no wonder that we have such wide variation in treatment patterns across the United States.

Medicare is a combination of both art and science. For most treatments, there are no empirical data on clinical effectiveness that suggest one method is better than another. In these cases, providers use their “best guess” to make treatment decisions—relying on their individual knowledge, preferences, and the resources available to them. This “art” of medicine exacerbates the variation in treatment patterns, and Medicare expenditures, across the U.S.

Yet, as Wennberg notes, there is virtually no difference in health outcomes between low and high spending areas. If less expensive treatments are available, why aren’t we prescribing them more readily? By collecting and distributing data on clinical effectiveness, and encouraging providers to use treatment guidelines, we may be able to minimize practice variation. We simultaneously may be able to achieve substantial savings for Medicare.

Following is a portion of an interview from the May/June 1999 issue of Health Affairs by Princeton professor Uwe Reinhardt with HHS Secretary Donna Shalala discussing how Medicare’s financial problems would be greatly reduced if the variation in clinical practices were minimized:

REINHARDT. “Count on me to be a real thorn in the side of the status quo, then, because I believe that if everyone in America could consume medical care while spending at rates similar to those of Minnesota, Oregon, and Wisconsin, providing health care to the aging baby-boom generation would be a piece of cake, wouldn’t it?”

SHALALA. “Absolutely, and the doctors would feel as though the system were fairer. But once the infrastructure is built and physicians get comfortable with consuming a certain level of resources, it’s very difficult to work your way out unless you buy yourself out, as we have done to do with the downsizing of medical residency positions through HCFA’s New York demonstration.”

Clinical practice guidelines are being used more and more throughout the private sector to improve the quality of health care as well as to increase the efficiency of the health industry. This practice does not in any way diminish the role of the physician. It only improves the science behind treatment decisions.

Medicare is a natural candidate for clinical practice guidelines. With an outstanding database of information on beneficiaries across the country, and the resources of the NIH and AHCPR at hand, Medicare could effectively implement a program to improve clinical effectiveness and achieve savings through efficiency.

IN SPECIAL RECOGNITION OF WILLIAM S. HEFRON ON HIS APPOINTMENT TO ATTEND THE UNITED STATES MILITARY ACADEMY

HON. PAUL E. GILLMOR
OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 8, 1999

Mr. GILLMOR: Mr. Speaker, I rise today to pay special tribute to an outstanding young man from Ohio’s Fifth Congressional District. I am happy to announce that William S. Hefron, of Amherst, Ohio, has been offered an appointment to attend the United States Military Academy at West Point, New York.

Mr. Speaker, Bill as accepted his offer of appointment and will be attending West Point this fall with the incoming cadet class of 2003. Attending one of our nation’s military academies is an invaluable experience that offers a world-class education and demands the very best that these young men and women have to offer. Truly, it is one of the most challenging and rewarding undertakings of their lives.

While attending Lorain Catholic High School, Bill has attained a grade point average of 4.062 on a 4.3 scale, which places him third in his class of sixty-six students. Bill’s scholastic honors include the Lorain Catholic Honor Roll and National Honor Society. Bill is also taking several AP classes to further his outstanding academic achievements.

Outside of the classroom, Bill has distinguished himself as an outstanding student-athlete. On the fields of competition, Bill is a varsity letter winner in cross country, track, football, and basketball. During his Junior season, Bill was captain of the cross country team, Most Valuable Runner, and a school record holder. In track, Bill won the 800 meters at the District Track & Field Meet, and placed fifth in Regional competition. And currently, Bill is the Secretary of the Senior Class.

Mr. Speaker, at this point, I would ask my colleagues to stand and join me in paying special tribute to William S. Hefron. Our service academies offer the finest education and military training available anywhere in the world. I am sure that Bill will do very well during his career at West Point, and I wish him the very best in all of his future endeavors.
In Honor of the Late Keith Clark

Hon. Scott McInnis of Colorado
In the House of Representatives
Tuesday, June 8, 1999

Mr. McINNIS. Mr. Speaker, it is with a heavy heart that I would like to take this moment to honor the remarkable life and exceptional achievements of a great Coloradan and American, Keith Clark. In doing so, I wish to pay tribute to Keith for all of his many years of service and sacrifice on behalf of this nation. At the same time, I would also like to offer my deepest sympathies to the family and friends of Keith as they grieve at his passing. Like those who knew him well, the entire Grand Junction community will miss both Keith and his tireless service on their behalf.

For 29 years in Grand Junction, Colorado's School District 51, Keith was a pillar of education who served with great distinction, both as a teacher and as an advocate for improving our schools. Keith was, for nearly three decades, a powerful voice of leadership and vision for education in the Grand Valley. It is clear, Mr. Speaker, that his leadership in education will continue to benefit students in our school system for many years to come. I know that this is a legacy that Mr. Clark would take great pride in.

In addition to his service as an educator, Keith also served his country with great valor as a B-52 pilot during World War II. Mr. Clark flew and fought bravely over the skies of North Africa and Italy in defense of the nation he loved deeply.

At one might surmise from his sustained service and selfless sacrifice, Keith was also a fierce patriot and proud American. He believed deeply in our constitutional form of government and in the bedrock principles—like freedom, liberty, and individual self-determination—upon which this great republic stands.

It is with this, Mr. Speaker, that I say thank you to Mr. Keith Clark for his decades of service, both in defense of our country as an airman and in defense of our future as an educator. He was truly a great American.

At the same time, I would also like to offer my heartfelt condolences to Keith’s family: his wife of 52 years Anita, his children Katie and Cal, and his three granddaughters Amber, Lily and Hillary. I hope that these family members, like everyone who has had the good fortune of knowing Keith, will take solace in the undisputable fact that they are a better person for having known him.

Personal Explanation

Hon. Kenny C. Hulshof of Missouri
In the House of Representatives
Tuesday, June 8, 1999

Mr. HULSHOF. Mr. Speaker, I missed three votes last night, rollcall Numbers 167, 168 and 169. These votes were missed due to a canceled airline flight. On these votes, I would have voted “aye”.

Tribute to Dr. Augusto Ortiz and Martha Ortiz

Hon. Carlos A. Romero-Barceló of Puerto Rico
In the House of Representatives
Tuesday, June 8, 1999

Mr. ROMERO-BARCELÓ. Mr. Speaker, I am pleased to rise today to pay tribute to Dr. Augusto Ortiz and his wife Martha, who have for half a century provided medical and clinical services to the Spanish-speaking population of Arizona. I wish to recognize their selflessness and commitment to the health and welfare of their fellow Americans.

Saluting the Service of Joan Kelly

Hon. James E. Rogan of California
In the House of Representatives
Tuesday, June 8, 1999

Mr. ROGAN. Mr. Speaker, none of us here today would have found success without the help and guidance of a teacher. As students, we were all influenced by those who commit their lives to the service of others. Too often, this service goes unnoticed. Today, I would like to salute the service of a teacher who has dedicated over a decade of her career to the students in my district.

Joan Kelly has taught in La Crescenta, California for 11 years. However, her work as a teacher began long before her move to my district. Throughout her life, Joan has committed herself to serving the students and the needs of the community.

Joan is a native of Brooklyn, New York. A graduate of Fordham University, she taught elementary school and worked extensively in the New York area. Her work with students and parents led her to develop a counseling program in Yonkers, New York. This program is a shining example of her relentless pursuit of innovative and creative ways to reach students.

Joan joined the faculty at Rosemont Middle School in the Spring of 1987. Her efforts as a math, history, and English teacher and school administrator contributed to Rosemont being recognized as a U.S. Department of Education Blue Ribbon School of Excellence and a California Distinguished School.

In her years of service at Rosemont Middle School, Joan has proven herself to be a leader. She is often called on by colleagues to direct teacher in-service programs, passing on to her peers a lifetime of knowledge about education. Further, she has instilled in teachers the skills to help students be the best they can be. In 1993, she was awarded the prestigious Masonic Award for her service.

Mr. Speaker, the strength of our nation tomorrow depends on the quality of the education our youth receive today. And one need look no further than the roster of Joan’s former students to see the leaders of tomorrow.

For her service to our nation, and for her commitment to public education, I ask my colleagues here today to join me in recognizing Joan Kelly.

Extensions of Remarks

June 8, 1999

During the past year in particular, we have witnessed many discussions about the role that Puerto Rican-Americans play in the mainstream United States. Some have questioned our right to equality as Americans because of our language and our culture, but I want to assure you that the patriotic and law abiding citizens of Puerto Rico have distinguished themselves in all facets of life in the United States, be it in defense of our nation, as community leaders, as athletes, professionals, scientists or as performing artists, making numerous contributions to our great nation. Our language and culture have enhanced and enriched our national culture, contributing to the service and understanding of our fellow citizens throughout the United States.

The merging of our cultures is especially evident in the life of Dr. and Mrs. Ortiz. Their lifelong commitment to Arizona is enhanced by the fact that Dr. Ortiz is a Puerto Rican-American who together with his wife have dedicated their lives to the service of human beings. Thousands of Arizonans feel deep gratitude for Ortiz’ commitment to their health and lives.

How is it that this “Jibaro Puertorriqueño” came to lead his life in the desert? While a boy in Puerto Rico, Dr. Ortiz dreamt of helping others. His parents encouraged his love of learning and dedication to the public service. After graduating from medical school at the University of Illinois in 1945, he joined the military and served as a physician at several posts throughout the country. In the early 1950’s, while stationed at Luke Air Force Base in Phoenix, Arizona, Dr. Ortiz volunteered to assist Dr. Carlos Graeth to provide medical services to the 80,000 Hispanics in Maricopa County. They were the only two Spanish speaking doctors in the County.

Dr. Ortiz became a champion for the rights of those he served. His involvement in improving human needs and access to medical care, better education, housing and jobs led him to become politically active and an ally for people who lacked a voice, particularly farm workers. He worked to improve field sanitation conditions and was instrumental in enabling state laws to regulate the use of pesticides.

Martha Ortiz was the organizational brains of this effort. She served as the full time administrator, personnel director and business manager of the office mostly as a volunteer, because she refused to accept payment for her services. She ably handled the many “pay what you can” patient alternatives that enabled the medical practice to continue to make health services available and affordable to low income and indigent residents of Arizona.

Since 1972, Dr. Ortiz has headed the University of Arizona Rural Health Office and has successfully directed more efficient health services including prevention-focused health campaigns, mobile clinics and community health boards. He is a living model to aspiring doctors and others in the health professions.

During their 50 year commitment to their fellow man and woman, Dr. and Mrs. Ortiz have been awarded many rightfully deserved honors and recognitions at the community, state and national levels.

As a fellow Puerto Rican-American, as a fellow Hispanic and as a fellow American, I am
pleased and proud to recognize the achievements of this couple who have made a difference in the lives of thousands. Dr. Ortiz deserves our deepest gratitude and the nation’s recognition. I ask my colleagues in Congress to join with me in saluting and honoring, Dr. Augusto Ortiz and his wife Martha Ortiz.

CONGRATULATIONS TO ROBERT M. "BOB" ROSE
HON. IRE SKELETON OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. SKELTON. Mr. Speaker, it has come to my attention that Robert M. "Bob" Rose was honored with the honorary degree of Doctor of Humanities during the 1999 academic convocation at Missouri Valley College on Sunday, May 16, 1999.

Mr. Rose is a graduate of Marshall High School in Marshall, Missouri. He also earned a degree from the U.S. Military Academy in West Point, N.Y., and a Master of Arts degree in English Literature from the University of Pennsylvania. It is a graduate of both the U.S. Army Command and General Staff College at Fort Leavenworth, Kansas, and the U.S. Army War College at Carlisle Barracks, Pa.

In 1949, Mr. Rose was commissioned as a Second Lieutenant and he remained a commissioned officer in the U.S. Army until 1971. His overseas service included Germany from 1950 to 1953, Korea from 1960 to 1961, another tour in Germany from 1965 to 1967 and Vietnam from 1967 to 1968. His service time in the United States was divided among Fort Knox, Ky., Fort Meade, Md., Washington, D.C., and various service schools.

Key positions held by Rose while in the U.S. Army included instructor and assistant professor of English at the U.S. Military Academy in West Point from 1956 to 1959, commander of combat units from platoon to division support command in Vietnam and staff officer from battalion to Department of Army headquarters (Pentagon). Rose was promoted to colonel in 1968 and he retired from military service on February 1, 1971.

As a civilian, Rose was the managing partner of Rose and Buckner Store on the east side of the Marshall square. Bob was the third generation of the Rose family in this position. The store closed upon his retirement. Other local business and civic offices held by Rose include being past president and board member of the Marshall Rotary Club, serving on the board of directors of Wood and Huston Bank in Marshall, serving on the board of directors of Wood and Huston Bancorporation Inc. in Marshall and acting as past chairman of the board for Convin Corporation in Kansas City.

Rose was also a board trustee of Ridge Park Cemetery Association in Marshall, a board member of the Missouri River Chapter of the American Red Cross, executive board member of the Great Rivers Council of Boy Scouts of America, past chairman of the Missouri Valley College Board of Trustees and a member of various military, veteran and civic organizations.

Rose is an active member of First United Methodist Church in Marshall. He and his wife Betty are the parents of one son.

Mr. Speaker, I know the Members of the House will join me in congratulating Robert M. "Bob" Rose for his honorary degree of Doctor of Humanities, and for his lifelong service to his community and to his country.

PERSONAL EXPLANATION
HON. WILLIAM M. THOMAS OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. THOMAS. Mr. Speaker, I was not present for the vote on final passage of H.R. 1615, Jennifer’s Law. I am authorized to give to the House some information to help improve the reporting of Unidentified and Missing Persons. If I had been present I would have voted "aye".

TRIBUTE TO D. MAE JOHNSON, W. RAY JOHNSON, MYSTER JAMES KEELS, PASTOR CHESTER RIGGINS, AND JAMES E. WALTON
HON. GEORGE RADA NOVICH OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 8, 1999

Mr. RADA NOVICH. Mr. Speaker, I rise today to pay tribute to D. Mae Johnson, W. Ray Johnson, Myster James Keels, Pastor Chester Riggins, and James E. Walton, Ph.D., for being selected the 1999 Portraits of Success program Honorees by KSEE 24 and Companies that Care. In celebration of African-American History Month, these five leaders were honored for their unique contributions to the betterment of their community.

D. Mae Johnson was a teacher in Fresno and Oakland for twenty years; during this time she also obtained a master’s degree in both Counseling and Guidance from California State University, Fresno (CSUF) and Administration from Pepperdine University. For the past 20 years she has been executive director of Quality Group Homes one of the Central Valley’s largest providers of residential treatment care for adolescents and children. Mrs. Johnson is involved with many professional, church and community organizations, including being a lifetime member of the NAACP. In 1997, she helped found the Fresno chapter of Links Inc., a nonprofit humanitarian organization that provides support services to enrich the quality of life through cultural, civic and educational activities. Inspired by her niece’s long struggle with Sickle Cell Disease, she worked with Fresno Links and St. Agnes Hospital, to bring to Fresno, the only Sickle Cell Anemia program in the Valley.

W. Ray Johnson has been a dedicated public servant for three decades. He is the Director of Community Resources for the City of Fresno. He reports to the City Manager, and works closely with the Mayor and City Council members. He was formerly the Fresno Deputy City Manager and Director of Human Resources. One of his proudest accomplishments was his role in establishing a facility for the African-American Museum, for which he has helped to secure almost half-a-million dollars in funding over the years. He is currently instrumental in setting up the African-American Multi-Service Center as a one-stop facility to work with youth and gang members. Mr. Johnson has served on many boards and commissions, including two terms as vice president of the NAACP. His many awards include State of California Black Women Organized for Political Action, Man of the Year award, United Black Men Community Service award, California State Assembly Civic Involvement award, and the California State Senate Outstanding Community Contribution award.

Myser James Keels has long given himself to benefit the Fresno community. For 27 years, he was a groundsman with the Fresno County Parks and Recreation Department, until he retired in 1995. Along with park upkeep and worker supervision, he also provided supervision of adult and youth offender programs. He gave ten years to the County of Fresno Social Security Board, eight to the County Human Services Agency, and two to the Equal Opportunities Commission. Mr. Keels also served on the Conservation Corps Community Commission at Large Revitalization Board, Southwest Edison Planning Committee, Fresno Neighborhood Alliance, as a deacon for St. Joseph’s Baptist Church, president of the Black Political Council, president of the Coalition for Cooperative Development & Community Development Corporation, treasurer of King of Kings Center Board of Directors, vice chairperson of Westside Fellowship and board member of Central California Legal Services. Honors and awards have come from these entities and many more including a special Certificate of Appreciation for 11 years of assisting alcoholics in their recovery.

Pastor Chester Riggins has served the St. Rest Missionary Baptist Church since 1950 as a Sunday School teacher, Baptist training union instructor, church clerk, financial secretary, deacon, chairman of the Deacon Board and chairman of the Church Pulpit Committee. For many years he was a mail carrier for the Postal Service, but resigned in 1979 to serve the church full time. Pastor Riggins’ activities outside the church have included being the temporary chairman for organizing the Fresno Model Cities Program, member and officer of the West Fresno Intergenerational Min-isters’ Alliance charter member of the Fresno Police Program, member of the Concerned Citizens for Quality Education, secretary-treasurer of the Home Mission Board of the California State Convention and 1st Vice Moderator Emeritus of the St. John Missionary Baptist Association.

Dr. James E. Walton, Ph.D., has been teaching since 1967 and has been a professor of English at CSUF since 1990. He previously taught at Mt. Union College for 20 years and was an exchange professor in Osaka, Japan in 1993. Dr. Walton serves on both Search Committees at CSUF for the Dean of Education, Human Relations Director and vice president and has been a member of the Committee on Academic Policies and the...
Committee on Faculty and Strategic Planning. Apart from the university, he has served as Library Trustee, on the Fair Housing Board, and as a member of the American Red Cross, Junior League, and the NAACP.

Mr. Speaker, it is with great honor that I pay tribute to D. Mae Johnson, W. Ray Johnson, Myser James Keels, Pastor Chester Riggins and Dr. James E. Walton, Ph.D. for being recognized as the KSEE 24 Companies that Care 1999 African-American Portraits of Success honorees. I applaud the contributions, ideas, and leadership they have exhibited in our community. I ask my colleagues to join me in wishing these fine people many more years of success.

Tribute to Robert D. Anderson, Jr.

Hon. Anna G. Eshoo

Of California

In the House of Representatives

Tuesday, June 8, 1999

Ms. ESHTOO. Mr. Speaker, I rise today to honor Robert D. Anderson, Jr., an extraordinary citizen of San Mateo County, California, who will be honored by the San Mateo Central Labor Council on Saturday, June 12, 1999.

Robert D. Anderson, Jr. has been a leader in both the labor movement and his community for the last twenty-five years. After nineteen years of exceptional leadership and service, Bob has announced that he is stepping down as President of the San Mateo Central Labor Council.

Throughout his career Bob has dedicated himself to improving the living and working conditions for families in San Mateo County and the airline industry nationwide. He is a former United Airlines mechanic and a member of the International Association of Machinists, Local Lodge 1781. He is currently the ground safety coordinator at San Francisco International Airport.

During his tenure as President he helped establish, build and chair the San Francisco Airport Labor Coalition and its predecessor, the Airport Health and Safety Coalition. He has also served on the advisory boards of the California Occupational Safety Coalition and Health Administration, and the Labor Occupational Health program at the University of California, Berkeley.

Over the last twelve years Bob has worked with labor and community leaders to bring affordable, high-quality, around-the-clock childcare to families who work non-traditional hours. He has also served on the Board of Directors of PALKARE, San Mateo County’s community-based childcare center since its opening in 1993.

Mr. Speaker, Robert D. Anderson, Jr. is an outstanding individual, a respected labor and community leader, and a valued friend. I salute him for his remarkable contributions and commitment to our community and I ask my colleagues to join me in honoring him upon his retirement as President of the San Mateo Central Labor Council.

Extensions of Remarks

Honoring Naval Commander Kent Rominger

Hon. Scott McNniss

Of Colorado

In the House of Representatives

Tuesday, June 8, 1999

Mr. McNniss. Mr. Speaker, I would like to take a moment to recognize the career of one of Del Norte, Colorado’s natives who has shown great character and motivation, Naval Commander Kent Rominger. In doing so, I would like to honor this individual who has illustrated the notion of duty and service for Colorado and the Navy alike.

Kent Rominger has been flying for the Navy since 1978, when he earned his degree in civil engineering from Colorado State University. As a Naval officer, Rominger flew in Operation Desert Storm. In 1992, Officer Rominger was selected to join the astronaut program. Since his start in the program, Commander Rominger has piloted three previous space missions, one of those being in the space shuttle Discovery.

On May 27, 1999, Kent Rominger returned to the space shuttle Discovery and guided six astronauts into space. As Commander, Rominger oversaw all aspects of the mission and the crew. This is a great honor for Rominger to command a space shuttle that he once piloted into space.

Kent Rominger is an outstanding citizen of Colorado who’s accomplishments will be long remembered and admired. Selfless service and dedication makes Commander Rominger a valued and respected man. His achievement are a great service to us all, and for that we owe him a debt of gratitude.

In Recognition of the Solano Coalition for Better Health

Hon. Mike Thompson

Of California

In the House of Representatives

Tuesday, June 8, 1999

Mr. THOMPSON. Of California. Mr. Speaker, I am pleased today to recognize the Solano Coalition for Better Health (SCBH), which is celebrating its 10th Anniversary year. On June 5, SCBH kicked off its 10th Anniversary Celebration by hosting an Enrollment Day for the Solano Kids Insurance Program (SKIP), in an effort to promote free or low cost health insurance options for Solano County children, and it’s fitting that we honor SCBH at this time for its many contributions to the community.

SCBH is a nonprofit organization of health care administrators, government officials, local physicians, representatives from the business and educational communities, and neighborhood advocates. Its focus is to improve the health and quality of life in Solano County by sharing resources through effective partnerships. It is a nationally recognized model of public and private partnerships, creating systemic changes in the provision of care and services to promote and improve the health and safety of the people and their communities.

SCBH works in a collaborative fashion and places high value on efforts that benefit the community, neighborhoods and people of Solano County, and meets the interests and needs of individuals and specific constituencies within the community.

SCBH recognizes and values diverse communities, neighborhoods and people within Solano County and encourages their participation in improving the health of all county residents, through a multi-lingual network of health and social service providers, reflective of the population of Solano County in gender, sexual orientation, culture, ethnicity, and disability.

SCBH is innovative in its approach to addressing the health needs of Solano County residents and is not adverse to taking risks for potential rewards. Further, it recognizes and values the unique importance of innovative approaches in responding to health issues that disproportionately impact ethnic communities.

SCBH has initiated such unique programs as:

(1) the Partnership HealthPlan of California, a public/private organization designed to provide a cost-effective method of health care delivery to Medi-Cal recipients in Solano County, which has now expanded to include Napa County

(2) Healthier Solano Communities, an initiative that promotes wellness in each of Solano County’s seven cities by creating or supporting a team in each city to look at issues in each city that impact health and wellness; identify one or more issues in each city that can be addressed; and, develop partnerships and plans to address those issues.

(3) The Community Services Task Force, which includes volunteers who are service providers from public, private, County non-profit, and community based organizations, and advocates for health and human services that are culturally, linguistically, geographically, physically, and financially accessible to all residents of Solano County.

(4) Solano Health Improvement Initiative (SHII), which addresses the most critical indicators of health in the community, and has expanded countywide efforts to pursue strategies that address three initial goals:

1. Children will be healthy and ready to learn when they enter school.

2. Comprehensive prevention, early detection, and support services will be developed for individuals living with cancer in Solano County.

3. People with diabetes or at risk of diabetes will live well and independently in the community.

In recognition of the SHII’s outstanding cancer community outreach efforts, the U.S. Postal Service presented the first Prostate Cancer Awareness Stamp Dedication in California on June 5th at the SCBH’s 10th Anniversary celebration.

(5) SKIP which provides outreach efforts to enroll children in free or low cost health insurance options in Solano County.

Mr. Speaker, SCBH participants are people who are personally committed and who dedicate their time, talent and knowledge to influence the organizations they represent to support the Coalition’s mission. I commend them for their outstanding contributions to the community.
Mr. GREEN of Texas. Mr. Speaker, I rise today to honor the achievement of Rebecca Krepick. On May 29, 1999, Rebecca graduated from Klein High School. I ask my colleagues in the House of Representatives join me in congratulating her and her family.

Although this achievement deserves recognition in and of itself, Rebecca accomplished much more. When she was in second grade, the Anthony Robinson Foundation offered 600 students a $20,000 scholarship if they maintained a B+ average, participated in community service, and were a model student for 10 years. On the day of graduation, less than thirty of these students completed the program. Rebecca’s achievement should be recognized and commended.

Rebecca and her fellow scholarship recipients are examples of what is right with public education. They should be held up as role models for other students everywhere to emulate.

Rebecca plans to use the scholarship at the University of Houston, one of the finest universities in our nation. Rebecca’s parents, Mr. and Mrs. George Barbosa, family, friends and community are very proud of her. We wish her well in her future education pursuits. Mr. Speaker, I ask that all Members join me in congratulating Rebecca Krepick for her outstanding achievement.
