The House met at 12:30 p.m. and was called to order by the Speaker pro tempore (Mr. PETRI).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC.
May 24, 1999.

I hereby appoint the Honorable Thomas E. PETRI to act as Speaker pro tempore on this day.

J. DENNIS HASTERT, Speaker of the House of Representatives.

MORNING HOUR DEBATES

The SPEAKER pro tempore (Mr. PETRI). Pursuant to the order of the House of January 19, 1999, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to 30 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to 5 minutes.

The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

PARTNERSHIPS FOR A CLEAN ENVIRONMENT AND BETTER COMMUNITIES

Mr. BLUMENAUER. Mr. Speaker, since I was elected to Congress, I have been focusing on the issue of livable communities and how we can create better partnerships between the Federal Government and our citizens. Unfortunately, one of the obstacles we face is the efforts by some people to create false choices. Last week, we saw two examples here in Congress, one dealing with efforts to reduce gun violence, and the other an important environmental announcement by one of our leading auto companies.

Repeated throughout the discussion regarding guns in our communities have been people who have tried to paint very stark pictures that suggest that really there is nothing that we can do to take simple common sense steps. Hopefully, the action in the Senate indicated that there are things that we can do that bring people together.

At the same time, we find people trying to paint these same sorts of false choices as it relates to the environmental community. Some argue that we have to work against business or manufacturing when the government seeks to improve the environment. This simply does not have to be the case. Last week we had an excellent example of what happens when companies recognize that they are partners in our efforts to protect the environment and improve air quality.

For the last 25 years, trucks and the SUVs have been allowed to produce 2.5 times as much smog-causing gas as cars, and next year, when stricter rules take place, these full-sized vehicles will be producing five times as much as cars under the new rules. Regulations for pickups and the sport utility vehicles were originally more lenient because they were used theoretically primarily by small business, yet today they comprise half of all family vehicles.

Last Monday, Ford Motor Company announced that starting with its model 2000 year, its full-sized pickup trucks will meet current pollution standards for cars. All but the largest will meet the stricter new car requirements as well as the proposed truck requirements that go into effect between the years 2002 and 2007. Ford made their announcement a week after a Federal appeals panel, in a radical departure from established judicial precedent, invalidated air quality regulations set by EPA which were designed, in part, to decrease ground level ozone, a major contributor to smog. If that ruling is upheld, efforts like Ford's will take on much more significance.

Ford is taking this initiative because they recognize that consumers want cars and trucks that are environmentally sound, and that by producing them, Ford will have a competitive advantage. Jacques Nasser, Ford's chief executive and president, said that Ford is doing this because it will benefit the company financially and because "it is the right thing to do."

As the use of pickup trucks and SUVs has increased, so has the amount of smog-producing gas they produce. Manufacturers cleaning up their trucks will allow for cleaner air and easier breathing. Ford's action on the national level will allow each individual driver to contribute less pollution to their community every day, and this new equipment will not adversely affect performance and will come to Ford customers at no extra cost, since Ford has agreed to absorb the $100 per truck cost.

Clean air and a healthy environment benefit each of us and all of our communities. Ford has acknowledged that their industry must be a partner in our efforts to protect and preserve our environment. They are to be commended for this action, and I challenge other car and truck manufacturers to do the same.

This example of the private sector stepping forward and acting on behalf of the environment should be a wake-up call to this Congress as well. We need to do our part by considering rewarding those companies rather than potentially even penalizing them. We must also work together to avoid the debacle that occurred last week with unrelated environmental riders that were added to the supplemental appropriations bill.

Ford's action demonstrated that preserving the environment is a priority for the American people, and that we must do all we can to create an environmental record we can be proud of. I would hope that as we approach further efforts dealing with the environmental protection and, for that matter, the reduction of gun violence, we can avoid the false choices offered by the extreme.
SUPPORT THE SOCIAL SECURITY AND MEDICARE "SAFE DEPOSIT BOX"

The SPEAKER pro tempore. Under the Speaker's announced policy of January 19, 1999, the gentleman from Florida (Mr. STEARNS) is recognized during morning hour debates for 5 minutes.

Mr. STEARNS. Mr. Speaker, tomorrow we will consider legislation to ensure we will no longer use the Social Security Trust Fund for any other purpose than for what it was intended for.

Now, my colleagues might ask, "Why is this necessary?" The answer is quite simple. Despite repeated efforts over the years, we have not been able to stop perpetual raids on the Social Security Trust Fund. We have attempted to stop this violation of the trust fund going as far back as 1988.

Now, that we have enacted legislation, the Budget Enforcement Act, which removed Social Security taxes and benefits from the budget and from calculations of the budget deficit. That was done to prevent Social Security from masking the true size of the deficit and to protect it from budgetary cuts.

The rationale was that if this was done, Congress would not use Social Security in devising the Nation's overall fiscal policy. Historically, the Social Security Trust Fund Board has invested surplus Social Security revenues in U.S. Government securities. These investments are honored just like investments from the private sector. Interest is earned on the monies invested, and returned to the trust fund to help offset long-term obligations to future beneficiaries. It was felt that without such an enforcement mechanism, this practice would continue.

Unfortunately, Mr. Speaker, the intent of the 1990 law has not been fully adhered to, and to guarantee honesty in budgeting we must end the misuse of Social Security Trust Fund investments. This Social Security Trust Fund surplus should not be used to fund any other programs, and it should not be used to mask our Nation's debt.

We have been very zealous in cutting wasteful spending and reducing the size of our government's bureaucracy. We should keep up our efforts to continue to cut unnecessary and wasteful spending. That is why I applaud my colleagues, the gentleman from California (Mr. HENEGER) for introducing H.R. 1259 which will, among other things, provide a mechanism to ensure that all Social Security surpluses are dedicated to saving the program and Medicare.

I feel this concept and believe we will be fulfilling our pledge to our Nation's seniors if we pass this legislation. We must stop this phoney bookkeeping and leave Social Security money alone. Right now, the trust fund is running a $126 billion surplus and it is used to mask the yearly deficit.

In 1997, Congress passed the historic Balanced Budget Act of 1997, which of course reduced wasteful government spending. We believed it was a restraint on Federal spending that has led to a reduction in our yearly deficits. With our Nation's strong economy and fiscal responsibility, there has been a strong revenue growth in this country and it has helped the national Treasury. These two factors make it possible to stop the much-used practice of commingling the Social Security Trust Fund money with the general revenue.

So, my colleagues, this week we can make history, make history by standing up for not only what we believe to be right, but what is absolutely necessary if we are going to make good on our promise to save Social Security and Medicare for this and future generations. We can pass H.R. 1259, stop this practice which started when President Lyndon Johnson unified the budget in 1969. It was then that Social Security, and the other Federal trust funds were officially accounted for in the entire Federal budget.

So this "Safe Deposit Box Act" establishes the submission of separate Social Security budget documents by excluding outlays and receipts of the old-age, survivors, and disability program under the Social Security Act, thereby, Mr. Speaker, preventing Social Security surpluses from being used for any other purpose other than for the Social Security Trust Fund and the Medicare program.

So I urge my colleagues tomorrow and this week to support H.R. 1259.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12 of rule I, the Chair declares the House in recess until 2 p.m. Accordingly (at 12 o'clock and 41 minutes p.m.), the House stood in recess until 2 p.m.

AFTER RECESS

The House having expired, the House was called to order by the Speaker pro tempore (Mr. PEASE) at 2 p.m.

PRAYER

The Chaplain, the Reverend James David Ford, D.D., offered the following prayer:

We pray, gracious God, that Your spirit of comfort and serenity will be with the security workers who turn to You with their life's concerns. We remember the refugees of the world and all those who suffer pain or hunger or fear for the days ahead. Remind us all, O God, that when the resources of the world are not with us, we can rely on Your grace. And when people must walk through the roads of danger and hostility, we earnestly pray that Your healing power and Your reconciling spirit will be with them whatever their need or trouble. O loving and eternal God, bless us and all Your people, now and evermore. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from New York (Mr. SERRANO) come forward and lead the House in the Pledge of Allegiance.

Mr. SERRANO led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

CHINESE ESPIONAGE

Mr. WICKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. WICKER. Mr. Speaker, this headline from the New York Times says it all: China Stole Nuclear Secrets for Bombs. Although the bipartisan Cox report on Chinese espionage will not be officially released until tomorrow, we already know enough that all Americans should be outraged.

According to Chairman Cox, the threat to our security from this major intelligence catastrophe will not be years into the future but within the next few months. Look to the Chinese Communist government to begin testing nuclear ICBMs within a few months, using United States nuclear secrets. While our law enforcement officials were asleep, our national security was compromised. It is not just Attorney General Janet Reno. The entire Clinton-Gore administration owes the United States public an explanation for this outrage.

TWO FORMS OF VIOLENCE

Mr. SERRANO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. SERRANO. Mr. Speaker, the debate goes on in this country as we try earnestly to find solutions for the problem of violence in our schools and throughout our society. At the same
time the 6 o’clock news reports school violence, it reports the violence of war. So I wonder and I ask out loud, is it possible that our children are imitating the actions of our government, that every time we have a difference with another country, we use violence to solve that difference? Secondly, this week on the agriculture appropriation bill we will say “no” once again to selling food and medicine to Cuba. Food and medicine. Economic violence. Is it possible that our children are simply imitating the violence they see coming from our adult behavior?

ON MILK POLICY

(Mr. GUTKNECHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUTKNECHT. Mr. Speaker, very soon a great debate will begin to rage here in the halls of Congress. That debate will be about how we price milk. My friends from other regions of the country will complain that if the system is reformed and the playing field is leveled, their dairy farmers would receive less or they would lose relative to other parts of the country.

But, Mr. Speaker, we should understand that dairy farmers in my region of the country have been losers under the current convoluted milk marketing order system for over 60 years. This makes no economic sense. Even Justice Anton Scalia has called the system “Byzantine.” All we are asking for is equal pay for equal milk, and we will not give up this fight until we get it.

TRADE DEFICIT HITS RECORD HIGH

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, another record. For the third straight month, America’s trade deficit is going through the roof. It is now averaging $20 billion a month. That is 400,000 good-paying American jobs being lost every single month. It is so bad even Commerce Secretary Daley said America cannot continue to subsidize the world. Unbelievable. Something stinks.

Why is this administration still codding to China on MFN and WTO membership? Enough is enough. America is going bankrupt at warp speed and Uncle Sam is buying the rocket fuel. I say it is time to get to the bottom of this action with China. Tell us the truth, White House, before we do not have a job left.

OPPOSE H.R. 45 AND KEEP NUCLEAR WASTE OUT OF NEVADA

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, when I was a young child, people used to say that little green men lived on Mars and the moon was made of cheese. That is when fantasies and rumors were the tools that shaped opinions and science was the unattainable.

Unfortunately, many of my colleagues look at transporting and storing high-level nuclear waste in Nevada in much the same way.

Fantasy and nonsense have no place in scientific studies, studies which prove that a repository site at Yucca Mountain is 10 times more prone to earthquakes and lava flows than government scientists previously estimated, studies that show Nevada ranks third in the Nation for current earthquake activity and has experienced over 650 earthquakes in the last 20 years.

That means with over 30 earthquakes a year. Clearly Yucca Mountain is not suitable and is one of the worst places to store the deadliest material ever created by man.

The space program proved that the moon is not made of cheese and that little green men do not live on Mars, and if the DOE properly addresses this new scientific information as the law requires them to do, they will not force green people to live in Nevada.

Mr. Speaker, oppose H.R. 45 and place true science before fantasy, misinformation and conjecture.

COMBATTING SCHOOL VIOLENCE

(Mr. WISE asked and was given permission to address the House for 1 minute.)

Mr. WISE. Mr. Speaker, mercifully events in Georgia last week produced no deaths in the school shooting. But this shows why it is that all of us at every level of government and every part of our community have to be working harder to reduce school violence. There are things that this Congress can be doing, things that our communities can be doing.

One area that has been working on in West Virginia and which I hope might be of benefit in other areas is we are designing a school safety report card: What are the elements of a safe school, listing them and then giving that to each community so each community can evaluate its own school.

One thing that I have learned following four hearings across our State is that there is no one-size-fits-all. We have to tailor our responses to each community and to each school. But we also have to dedicate ourselves to the proposition that as school ends this year, that when it resumes next year the schools will be safer than they have been.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nay orders, or on which the vote is objected to under clause 6 of rule XX.

Such rollcall votes, if postponed, will be taken after debate has concluded on all motions to suspend the rules but not before 6 p.m. today.

DISTRICT OF COLUMBIA COLLEGE ACCESS ACT

Mr. DAVIS of Virginia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 974) to establish a program to afford high school graduates from the District of Columbia the benefits of In-State tuition at State colleges and universities outside the District of Columbia, and for other purposes, as amended.

The Clerk read as follows:

H.R. 974

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “District of Columbia College Access Act”.

SEC. 2. ESTABLISHMENT OF SCHOLARSHIP PROGRAM.

There is hereby established the District of Columbia College Access Scholarship Program (hereafter in this Act referred to as the “[Program”], under which the Mayor of the District of Columbia shall award scholarships in accordance with section 4 using amounts in the District of Columbia College Access Fund established under section 3.

SEC. 3. DISTRICT OF COLUMBIA COLLEGE ACCESS FUND.

(a) Establishment.—There is hereby established the District of Columbia College Access Fund (hereafter in this Act referred to as the “Fund”), which shall consist of the following amounts:

(1) Amounts appropriated to the Fund under law.

(2) Gifts and bequests.

(3) Refunds paid under section 4(b)(4).

(4) Interest earned on the balance of the Fund.

(b) Administration.—The Mayor of the District of Columbia shall administer the Fund, in consultation with the Secretary of Education.

(c) Use of Fund.—

(1) IN GENERAL.—Amounts in the Fund shall be used solely to award scholarships in accordance with section 4, except that not more than 10 percent of the balance of the Fund with respect to a fiscal year may be used for the administration of the Fund during such year.

(2) DETERMINATION OF AMOUNT AVAILABLE FOR SCHOLARSHIPS.—With respect to each academic year for which scholarships may be awarded under this Act, the Mayor shall determine the amount available from the Fund for awarding scholarships for that academic year.

(d) INVESTMENT.—The Mayor shall invest such portion of the Fund as is not in the
may not exceed $10,000.

under subparagraph (B) for an academic year

of a scholarship provided to an individual

DENTS AT ELIGIBLE PRIVATE INSTITUTION.— Subject to subparagraph (D) and para-

suant to subsection (a).

scholarships to each qualified graduate sub-

able from the Fund under section 3(c)(2) for

The Mayor shall make applications for

or the amount of the tuition

is a resident of such State for such program

charged by that institution to a student who

in a degree, certificate, or other program (in-

ating from a secondary school, or receiving

any period of service on active duty in

the Armed Forces of the United States, in

the Peace Corps or AmeriCorps) of grad-

or the Republic of Palau; (3) may enter into a contract with a non-

governmental agency to administer the Pro-

gram and the Fund if the Mayor determines

that it is cost-effective and appropriate to do

so.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for payment to the Fund such sums as may be

necessary for fiscal year 2000 and for each of the 5 succeeding fiscal years.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS FOR UNIVERSITY OF THE DISTRICT OF COLUMBIA.

There is authorized to be appropriated to the University of the District of Columbia

for fiscal year 2000 and each of the 5 succeeding fiscal years such sums as may be

necessary to enhance educational opportunities for the University.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mr. DAVIS) and the gentle-

woman from the District of Columbia (Ms. NORTON) each will control 20 minutes.

The Chair recognizes the gentleman from Virginia (Mr. DAVIS). Mr. DAVIS of Virginia. Mr. Speaker, I yield myself such time as I may con-

sume.

Mr. Speaker, first of all my thanks to the gentleman from Indiana (Mr. BUR-

ton) and the gentleman from Texas (Mr. ARMEY) for permitting the expedi-

tious consideration of this bill. My thanks as well to the gentleman from the District of Columbia (Ms. NORTON) the ranking member of the Committee on Appropriations and to the Chair for the unanimous support of this amendment.

Mr. Speaker, I welcome the support of this amendment. As members of this Congress strive to enhance educational opportuni-

ties for the University of the District of Columbia, I think it is important that we also take into account the important role of the District of Columbia government in supporting the University. The University of the District of Columbia is an integral part of the University of the District of Columbia system, which includes the University of Maryland-Eastern Shore, the University of Maryland-Hooch, the University of Maryland-Owings Mills, and the University of Maryland-Leslieville. The University of the District of Columbia is a world-class institution that provides a wide range of educational opportunities to students from the District of Columbia.

The University of the District of Columbia is one of the largest and most diverse institutions of higher education in the United States, enrolling more than 20,000 students each year. The University offers a wide range of undergraduate and graduate programs, including programs in the arts, sciences, business, education, and health professions. The University of the District of Columbia also provides a variety of support services, including counseling, career services, and financial aid.

The University of the District of Columbia is dedicated to serving the diverse needs of its student body. The University is committed to providing a welcoming and supportive environment for all students, regardless of their background or circumstances. The University is also committed to providing a high-quality education to all students, regardless of their financial status. The University of the District of Columbia is proud to serve the people of the District of Columbia and the nation, and we are pleased to be able to support the University in this important role.
I would also like to thank some of the staff people who have worked so hard on this legislation: My former staff director Peter Sich, staff director and counsel Howie Denis, communications director Trey Hardin, Anne Mack Barnes, Jon Bouker the gentlewoman from the District of Columbia's staff, and Noah Woofsy of the legislative affairs office.

Today we take a giant step forward in our quest to enhance educational opportunities in the Nation's capital. My thanks to the gentlewoman from the District of Columbia, the ranking member of the subcommittee I chair, and all the others who have expressed encouragement and support for our efforts.

The bill we consider today, H.R. 974, the District of Columbia College Access Act, reflects the recognition by the Congress that the District of Columbia is the de facto State legislature for the District of Columbia. The city by its very nature lacks the capacity for a university system of higher education as that concept is understood in the 50 States. The same choices and opportunities simply do not exist for students and parents here as exist elsewhere in the United States. This has too often led to an out-migration of population in order to take advantage of the higher educational opportunities all other Americans enjoy as residents of a particular State.

A strong element in all of our reform legislation since the creation of the Subcommittee on the District of Columbia has been directed at stopping the bleeding of the population out of the District. This is critical for us all, as you cannot have a healthy Washington region without a healthy city.

The District has lost hundreds of thousands of residents in recent decades, particularly middle-income taxpayers. The Subcommittee on the District of Columbia has helped to lead a strong bipartisan effort in Congress to change that. Our efforts have included economic development, such as facilitating the MCI Center and the new convention center project. We have encouraged home ownership with the $5,000 tax credit for first-time homebuyers. We have improved personal safety, water quality and financial stability itself. Congress can be proud of its efforts to revitalize the Nation's capital.

Congress, in full cooperation with the city and the Federal Government, has in fact restructured relationships so as to have the Federal Government assume many of the functions normally performed by States, such as care for felons prisoners. This has put the District on a glide path to recovery. It is now in a better position to improve delivery of municipal services.

I am pleased to commend those leading local foundations and companies that have banded together in an extraordinary and historic effort to assist District students. The legislation we are voting on today is essential to those great efforts in the private sector.

It is my strong belief that this is the best money the Federal Government will ever spend in this city.

Mayor Williams has characterized H.R. 974 as "very, very important legislation not only in improving education but in bringing our city back." This bill can be a shining example of a bipartisan urban agenda.

While giving graduates more choices, subject to the caps and limits in the bill, this legislation fully respects and leaves untouched college admission policies and standards.

The bill will enable District residents who are high school graduates to attend public institutions at in-State rates in other States in the union. We have included tuition assistance grants as another option for other colleges in D.C., Virginia and Maryland. This is yet another incentive to encourage local population stability through educational enhancement. This TAG program is highly successful in Virginia and many other States.

H.R. 974 helps to level the playing field for District high school graduates. This was deeply moved by the reaction to this bill as I saw it in the eyes of students at Eastern High School, not far from our Capitol building. These students need and deserve a break. They need and deserve the same opportunities that students in other school systems in other States across this land have.

As the students took my hand, looked into my eyes and thanked me for introducing this bill, I knew we were on the right track. Fighting for educational opportunity legislation is one of the reasons I entered public life. I look forward with colleagues who share this vision for the future as we move this bill to the other body.

Mr. Speaker, I reserve the balance of my time.

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

The District of Columbia College Access Act before us is but one example of a series of bipartisan bills benefiting the residents of the Nation's capital on which the gentleman from Virginia (Mr. DAVIS) and I have worked since he became chair of the Subcommittee on the District of Columbia. I want particularly to thank the gentleman from Virginia and Maryland and many other States often offer some funding for private colleges in the District, Maryland and Virginia, just as in-State tuition rates. This provision is essential because unlike every State in the Union, the District has only one public institution of higher education, an open admissions university. One size does not fit all in higher education and certainly not in today's fast-moving technological society.

In addition, the in-State tuition provision is critical to keeping and attracting taxpayers, the sine qua non for the continuing recovery of the city. The cost of higher education is so high today that it alone drives many parents with children out of the city.

H.R. 974 also provides more limited funding for private colleges in the District, Maryland and Virginia, just as States often offer some funding for private college attendance in order to increase the diversity of options students need today.

Encouraged by H.R. 974, the private sector is raising an even larger amount to help District students prepare for and attend college. Business leaders in the District and the region approached the chairman, the gentleman from Virginia (Mr. DAVIS), and me some months ago.
Congressional Record—House
May 24, 1999

Mr. Speaker, I reserve the balance of my time.

Mr. Speaker, let me just note, as my colleague, this does not level the playing field for District students as opposed to other States, but it goes a long way toward that. They still have to compete to get into these university systems out-of-State as out-of-State students, which in many cases is an admissions hurdle that one would not get if they lived within that State; so they are not taking in-State slots, they are taking out-of-State slots.

But should they achieve that, should they overcome this hurdle, this legislation simply says they would then only have to pay in-State. At least it makes that dream affordable for them, and that is all this legislation does.

We are giving to the students in the District of Columbia, our Nation’s Capital, the same affordable educational opportunities that we are finding in the other 50 States. It is a modest step forward, but it is a very important one if we are to integrate our kids in our District with the rest of the region, have them pick up jobs we need to fill in this region. The Northern Virginia Technology Council recently estimated that there were 18,000 available jobs in this region. The Northern Virginia Technology Council recently estimated that there were 18,000 available jobs that we could not find qualified applicants to fill.

We want the District of Columbia to be part of this regional economy as well. There is no reason that they should not be given the equal opportunity and affordable educational opportunities this legislation offers.

Mr. Speaker, I am just as proud to support this bill, and I urge my colleagues to support it.

Mr. Speaker, I yield back the balance of my time.

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, while I appreciate the words of our chairman, the gentleman from Virginia (Mr. DAVIS), this bill in and of itself will encourage youngsters to go to college in the first place who simply would never have tried, despite their qualifications. They know full well that they have the money only for a semester or for a year, and now with this bill, providing 4 years of tuition to go to college, what we have here is a bill that encourages youngsters to do well in school, in junior high school and in high school.

The District of Columbia College Access Group that is supplementing our own efforts with private funds has indicated that it was astonished at how many of our youngsters simply drop out of college after getting into college and earning the right to go to college. The gentleman from Virginia has indicated something very important here, and that is that these youngsters have to get into college in the first place. So have we here an initiative to do well enough to get into college, and what this will do for youngsters is indicated by reference to the gentleman’s own premier university, the University of Virginia, one of the best colleges in the United States.

Well, a youngster in Virginia, no matter what the family income, from the richest to the poorest, pays less than $5,000 to go to one of the best universities in the United States. If a youngster from my side of the river applies to go to University of Virginia, those parents must come up with about three times that amount of money, or $16,000. Imagine what it means to my taxpayers to know that they can encourage youngsters to go to UVA or to go to University of Maryland and that the parents will be able to afford that.

I want to mention something else to the gentleman. The gentleman from Virginia, whom he appoints, has worked very hard for this bill to be nationwide, and I want to inform the gentleman that he and I are going to have to continue that fight.

Our bill says that if one gets into the University of Michigan, if one gets into a junior college in Texas, they can take this money and have it follow the student, and we are going to have to fight for that provision. And I think that is a very important provision, as much as I admire the roster of colleges in Maryland and Virginia, but I want to encourage youngsters to fly, to broaden their horizons, and this is a provision we are going to have to fight for.

One of the reasons that I want us to fight for this provision is that they have other bills introduced which do not have nationwide application, but the reason they do not have nationwide application is because there is a need to make sure that there is enough money. The bill that the gentleman and I have worked on recognizes that it may be necessary to circumscribe the bill based on the amount of money. So the chairman, the gentleman from Virginia (Mr. DAVIS), and I have delegated to the mayor of the District of Columbia, whenever he appoints, the task of drawing the bill in to fit the funds.

Mr. Speaker, I think the gentleman from Virginia (Mr. DAVIS) has acted wisely in this regard, not only for home rule reasons, because, of course, the mayor and those closest on the ground know best, but because we do not want to have the first year or two some of these funds go unused because we have prematurely circumscribed who can, in fact, get these funds. How many of our youngsters may get scholarships to private schools, they do not want to go to school in Maryland and Virginia, we have leftover funds from this bill that
May 24, 1999

Congessional Record—House

10539

Ms. NORTON. I yield to the gentleman from Virginia.

Mr. DAVIS of Virginia. Mr. Speaker, let me just add one final point and that is, if we really want to change the culture in this city where education becomes the thing to do for high school students, where it becomes matter of fact that one goes to high school and they move on to college or higher education, this is the kind of legislation that is needed because right now it is only a dream and not an achievable dream for many.

To be able to go to a quality private or State university system and have an array of choices and have that affordable to someone, we think will break that cycle and will encourage more people to go in.

The contrast between the surrounding suburbs where sometimes over 90 percent of the kids who graduate from high school go on to higher education and the city is astounding. This, I think, could help change that around by making it truly achievable. Again, I commend my friend, the gentlewoman from the District of Columbia (Ms. NORTON) for her efforts in this and look forward to prompt passage.

Ms. NORTON. I could not agree more with the words of the gentleman, and so much so that I want him to know that I will be working with the city to see if residents can use this bill beginning with this school year. If they tool up, I think that they can make it happen, even though our fiscal year begins October 1 and school usually begins in August and September. I thank the gentleman again for his leadership and for his great assistance on this bill.

The SPEAKER pro tempore (Mr. PEASE). The question is on the motion offered by the gentleman from Virginia (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 974, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Ms. NORTON. I yield back the balance of my time.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mr. DAVIS) and the gentlewoman from the District of Columbia (Ms. NORTON) each will control 20 minutes.

The Chair recognizes the gentleman from Virginia (Mr. DAVIS).

Mr. DAVIS of Virginia. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, the gentleman from Utah (Mr. COOK) introduced H.R. 1251 on March 24, 1999, designating the United States Postal Service building located at 8850 South 700 East, Sandy, Utah, as the “Noal Cushing Bateman Post Office Building”.

The Clerk read as follows:

H.R. 1251

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. DESIGNATION.

The United States Postal Service building located at 8850 South 700 East, in Sandy, Utah, shall be known and designated as the “Noal Cushing Bateman Post Office Building”.

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document, policy, or the like, to the United States Postal Service building referred to in section 1 shall be deemed to be a reference to the “Noal Cushing Bateman Post Office Building”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mr. DAVIS) and the gentlewoman from the District of Columbia (Ms. NORTON) each will control 20 minutes.

The Chair recognizes the gentleman from Virginia (Mr. DAVIS).

Mr. DAVIS of Virginia. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, the gentleman from Utah (Mr. COOK) introduced H.R. 1251 on March 24, 1999, designating the United States Postal Service building located at 8850 South 700 East, Sandy, Utah, as the “Noal Cushing Bateman Post Office Building”. This legislation is cosponsored by each Member of the Utah delegation to the House of Representatives pursuant to the policy of the Committee on Government Reform.

The Congressional Budget Office has determined that enactment of this measure would have no significant impact on the Federal budget and would not affect direct spending and receipts. Pay-as-you-go procedures, therefore, would not be applicable.

Mr. Bateman, honored by the bill before us, served in the Sandy City council for 20 years and was mayor for 6 years. He also served as head of the local PTA chapter and led a successful school construction bond campaign. He attained leadership positions in the Church of Jesus Christ of Latter Day Saints.

Mr. Speaker, I urge all Members to support this bill, H.R. 1251.

Mr. Speaker, I reserve the balance of my time.

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to join my colleague, the gentleman from Virginia (Mr. DAVIS), in bringing to the House Floor five postal-naming bills. These five measures have met the Committee on Government Reform requirement and enjoy the full support and cosponsorship of their respective House congressional delegations. All of these bills were reported unanimously out of
the Subcommittee on Postal Service and the full committee. I urge their immediate consideration and approval.

Mr. DAVIS of Virginia, Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DAVIS of Virginia, Mr. Speaker, on that I demand the yeas and nays. The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE
Mr. DAVIS of Virginia, Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 1251.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia? There was no objection.

JOHN J. BUCHANAN POST OFFICE BUILDING
Mr. DAVIS of Virginia, Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1377) to designate the facility of the United States Postal Service located at 13234 South Baltimore Avenue in Chicago, Illinois, as the "John J. Buchanan Post Office Building".

The Clerk read as follows:

H.R. 1377

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.
The facility of the United States Postal Service located at 13234 South Baltimore Avenue in Chicago, Illinois, is hereby designated as the "John J. Buchanan Post Office Building". Any reference to such facility in a law, regulation, map, document, paper, or other record of the United States shall be considered to be a reference to the "John J. Buchanan Post Office Building".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mr. DAVIS) and the gentleman from Illinois (Mr. WELLER), on April 13, 1999. This measure designates the United States Postal Service facility located at 13234 South Baltimore Avenue in Chicago as the John J. Buchanan Post Office Building.

Mr. WELLER. Mr. Speaker, as we work this year to strengthen our local schools, lower taxes for the middle class and save Social Security and Medicare, I particularly want to thank the gentleman from Virginia (Mr. DAVIS) and the committee for this opportunity to honor the work and dedication of Alderman John J. Buchanan, who retired last month as alderman for the 10th Ward in the City of Chicago after almost 20 years of public service.

I introduced H.R. 1377 to recognize Alderman Buchanan's outstanding public service record in Chicago and honor him through the designation of the United States Post Office at 13234 South Baltimore Avenue as the John J. Buchanan Post Office.

Mr. DAVIS of Virginia, Mr. Speaker, I yield back the balance of my time.

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this measure was introduced by my colleague the gentleman from Illinois (Mr. WELLER), on April 13, 1999. This measure designates the United States Postal Service facility located at 13234 South Baltimore Avenue in Chicago as the John J. Buchanan Post Office Building.

Mr. WELLER. Mr. Speaker, I yield the balance of my time.

The question was taken.

Mr. DAVIS of Virginia, Mr. Speaker, on the motion offered by the gentleman from Virginia (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 1251.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

Mr. DAVIS of Virginia, Mr. Speaker, on the motion offered by the gentleman from Virginia (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 1251.
May 24, 1999

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 1377.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 1377.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

CLIFFORD R. HOPE POST OFFICE

Mr. DAVIS of Virginia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 197) to designate the facility of the United States Postal Service located at 410 North 6th Street in Garden City, Kansas, as the “Clifford R. Hope Post Office”.

The Clerk read as follows:

H.R. 197

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

The facility of the United States Postal Service located at 410 North 6th Street in Garden City, Kansas, is hereby designated as the “Clifford R. Hope Post Office.” Any reference to such facility in a law, regulation, map, document, paper, or other record of the United States shall be considered to be a reference to the “Clifford R. Hope Post Office”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mr. DAVIS) and the gentlewoman from the District of Columbia (Ms. Norton) each will control 20 minutes.

The Chair recognizes the gentleman from Virginia (Mr. DAVIS).

Mr. DAVIS of Virginia. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. Moran).

Mr. MORAN of Kansas. Mr. Speaker, I appreciate the gentleman from Virginia (Mr. DAVIS) yielding time to me.

Mr. Speaker, it is a great honor for me to speak today on behalf of this legislation that is before the House. Mr. Hope was an active public servant involved in Kansas politics for more than 37 years. Naming the post office in his hometown of Garden City, Kansas, is an honor. It is a small tribute to Mr. Hope’s lifetime accomplishments.

During Mr. Hope’s political career, his first leadership opportunities presented themselves as a member of the Kansas House of Representatives. First elected in 1921, Mr. Hope at the age of 31 became the youngest speaker of the Kansas House of Representatives. As in many other States in the 1920s, tension mounted surrounding civil rights issues. Mr. Hope, an ardent opponent of the Ku Klux Klan, took the politically difficult stance to ensure that Kansas’ history as a free State was not tarnished and that individual liberties of all its citizens were protected.

After 3 terms in the State legislature, Clifford R. Hope was elected to Congress in 1926. Mr. Hope became a respected leader in this House, ultimately serving as the chairman of the Committee on Agriculture from 1946 to 1951. Mr. Hope was the last Republican chairman of the committee until another Kansan, Pat Roberts, assumed that position in 1965.

Mr. Hope was deeply involved in establishing many of the agricultural programs that still exist today. In addition to his work on behalf of agriculture, Mr. Hope was a strong advocate for defense programs and was heavily involved in programs essential to our successful war efforts during World War II.

Mr. Hope was a veteran of World War I. Spanning the presidential administrations of Presidents Coolidge, Hoover, Roosevelt, Truman and Eisenhower, Mr. Hope’s time in Congress was a period of extraordinary change in our Nation. Through the end of the roaring 1920s, the Depression and World War II, and the critical rebuilding years that followed, Mr. Hope faithfully served Kansans and was actively involved in many legislative accomplishments that we take for granted today.

He was an avid supporter of conservation programs. Mr. Hope first experienced legislative success by passing into law the bill creating the Cheyenne Bottoms Wetlands in Kansas. It was created in 1928, and this wetland still today serves the goals of environmental restoration and preservation. While Mr. Hope’s initial bill was aimed at Kansans, it was followed by one of the largest nationwide conservation programs, the Small Watershed Program, which was developed under Mr. Hope’s tenure as the Committee on Agriculture Chairman. Passed in 1954 and known as P.L. 566, the Small Watershed Program has been successful in reducing runoff, controlling erosion and protecting countless communities from flooding for more than 40 years.

In addition to conservation programs, Chairman Hope also had great success in promoting the United States in its humanitarian role in the world. The Food for Peace Program, P.L. 480, was signed into law by President Eisenhower in July of 1954. From its inception, Food For Peace has been the backbone of the United States’s food donation efforts around the world. Hope’s legislation and feeding programs had such worldly goals. Authorized in 1946, the zeal with which Mr. Hope promoted the School Lunch Program earned him the title of “Hot Lunch Cliff.”

While it is often common to measure a man by his accomplishments, it is the manner in which those accomplishments are achieved that is truly important. In this day of harsh rhetorical battles, it is refreshing to honor a Member with character and demeanor. Our former Governor of Kansas, William H. Avery, also a former member of this body, perhaps said it best about Mr. Hope’s character:

“I never heard Cliff speak a harsh word against those with whom he disagreed, either in debate or in personal conversation. He had the respect and admiration of all who knew him. He will always be remembered as an honest man with an infectious personality, kind to both his friends and adversaries, but unshakable in his convictions.”

In the epilogue to the book “Quiet Courage,” written in 1997 by Congressman Hope’s son, Clifford Hope, Jr., also a distinguished Kansan, the son speaking of his Congressman father concludes that:

“First of all, Congressman Hope had a solid record of substantial legislative accomplishments. He probably spent more time from 1933 until 1957 on farm support legislation than any other single issue, seeking to secure a safety net for farmers and, equally important, striving to ensure a stable supply of inexpensive food and fiber for consumers. His more lasting legislative accomplishments were in the area of soil and water conservation, agricultural research and marketing, and the Food For Peace program.”

Although preoccupied with agriculture problems, Congressman Hope spent many hours studying and seeking the truth on all important issues. Hope’s legislative achievements were not in his son’s opinion, his primary reason that he considered his father a role model Congressman and considered so by many of his contemporaries as well. He was a role model, rather, because of the virtues and values he held dear. In recent years there has been a rediscovery of, or at least a renewed interest in, personal virtues.

William J. Bennett, in his “Book of Virtues” quotes stories and poems which exemplify 10 virtues and responsibilities, self-discipline, compassion, friendship, work, courage, perseverance, honesty, loyalty and faith. Senator Frank Carlson, also a former member of the House of Representatives, in his congressional ceremony honoring his friend Cliff Hope in 1956 cited a list of nine virtues that make up the stature of the perfect man: patience, kindness, generosity, humility,
courtesy, unselfishness, sincerity, good temper, and guilelessness.

Hope would be the first to disclaim that he was a perfect man, but in large measure, he did possess the virtues cited by Bennett and Drummond. All of these in particular were ones imparted and taught to all of those he came in contact with.

So, Mr. Speaker, today as we seek passage of this legislation, H.R. 197, I encourage all of us to strive for these characteristics. We too will leave a mark on the history of this country, and I hope that during my term of service in the United States Congress that I will never forget a fellow Kansan, Clifford R. Hope, that he provided a role model for those of us who engage in this business each and every day, and that we will all strive to serve with quiet courage.

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 197, introduced by the gentleman from Kansas (Mr. MORAN) on January 6, 1999, designates the United States Postal Facility at 410 North 6th Street in Garden City, Kansas as the Clifford R. Hope Post Office.

Mr. Hope was a former Member of Congress representing the 7th congressional district in Kansas from 1927 to 1957. His political career began in the Kansas House of Representatives, where he served as Speaker of the Kansas House. Following his election to Congress, Mr. Hope became Chairman of the House Committee on Agriculture.

I am pleased to honor such a distinguished colleague, and to support this bill from this side of the aisle.

Mr. MOORE. Mr. Speaker, I am pleased to rise today in support of legislation authored by my friend and colleague from Kansas’ Big First District, Representative JERRY MORAN, and cosponsored by the Kansas House of delegation, that would designate the Garden City, Kansas, post office as the “Clifford R. Hope Post Office.”

Clifford Ragsdale Hope was born in Birmingham, Iowa, in 1903. He was educated in the public schools and attended Nebraska Wesleyan University of Lincoln, Nebraska. He graduated from my alma mater, Washburn University School of Law, in Topeka, Kansas, in 1917, and was admitted to the Kansas bar that same year.

Clifford Hope then served in World War I as a second lieutenant with the 35th and 85th Divisions in the United States and France from 1917–1919. After the war, he began the private practice of law in Garden City, and served in the Kansas House of Representatives from 1921–27, where he became speaker pro tempore in 1923 and speaker in 1925.

Representative Hope was elected as a Republican member of the 70th Congress and to the fourteen succeeding Congresses, serving from 1927 to 1957. He chaired the House Agriculture Committee in the 80th and 83rd Congresses, when his party held a majority of seats in this body. He did not seek renomination in 1956, but returned to Garden City, where he served as president of Great Plains Wheat, Inc., of Garden City, Kansas, from 1959–63.

Former Representative Hope died in Garden City, Kansas, on May 16, 1970. He lived a life dedicated to public service for his community, state, and nation. Our home state of Kansas, the United States of America, and American agriculture were all made better because of him. Mr. Speaker, I am pleased to have the opportunity to present remarks in support of this measure to name the Garden City post office after Clifford Hope and I am confident we will see it signed into law in the near future.

Ms. NORTON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DAVIS of Virginia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PEASE). The question is on the motion offered by the gentleman from Virginia (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 197.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 197.

The SPEAKER pro tempore. Pursuant to the long-standing policy of the Committee on Government Reform, all of the Members of the House Delegation of the State of Pennsylvania support the legislation.

Mr. Speaker, the committee voted unanimously to bring this legislation to the floor. I would also like to thank all of our colleagues that the Congressional Budget Office has reviewed this bill, and estimates the enactment of the provisions would have no significant impact on the Federal budget and would not affect direct spending or receipts. Therefore, pay-as-you-go procedures would not apply. Furthermore, the provision contains no intergovernmental or private sector mandates as defined in the Unfunded Mandates Reform Act, nor would it impose any costs on State, local or tribal governments.

The legislation indicates the Postal Service building located at 2601 North Pennsylvania Avenue, shall be known and designated as the “Max Weiner Post Office Building.”

Ms. NORTON. Mr. Speaker, I have no further requests for time, and I yield to the gentleman from Pennsylvania (Mr. FATTAH), who is also the ranking member on the Subcommittee on Postal Service, introduced H.R. 100 on January 6, 1999. The bill names three post offices located in Philadelphia, Pennsylvania, shall be known and designated as the “Freeeman Hanks Post Office Building.”

Mr. Speaker, H.R. 100 was introduced by the gentleman from Pennsylvania (Mr. DAVIS), who is also the ranking member on the Subcommittee on Post Office and Civil Service. Pursuant to the long-standing policy of the Committee on Government Reform, all of the Members of the House Delegation of the State of Pennsylvania support the legislation.

Mr. Speaker, the committee voted unanimously to bring this legislation to the floor. I would also like to thank all of our colleagues that the Congressional Budget Office has reviewed this bill, and estimates the enactment of the provisions would have no significant impact on the Federal budget and would not affect direct spending or receipts. Therefore, pay-as-you-go procedures would not apply. Furthermore, the provision contains no intergovernmental or private sector mandates as defined in the Unfunded Mandates Reform Act, nor would it impose any costs on State, local or tribal governments.

The legislation indicates the Postal Service building located at 2601 North Pennsylvania Avenue, shall be known and designated as the “Roxanne H. Jones Post Office Building.”

Mr. Speaker, H.R. 100 was introduced by the gentleman from Pennsylvania (Mr. DAVIS), who is also the ranking member on the Subcommittee on Post Office and Civil Service. Pursuant to the long-standing policy of the Committee on Government Reform, all of the Members of the House Delegation of the State of Pennsylvania support the legislation.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DAVIS of Virginia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 100.

The question was taken. The Chair recognizes the gentleman from Virginia (Mr. DAVIS).

Mr. DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 100.

The SPEAKER pro tempore. Is there an objection to the request of the gentleman from Virginia (Mr. DAVIS)?

There was no objection.

CARDISS COLLINS POST OFFICE BUILDING, OTIS GRANT COLLINS POST OFFICE BUILDING, MARY ALICE (MA) HENRY POST OFFICE BUILDING, AND ROBERT LEFLORE, JR. POST OFFICE BUILDING.

Mr. DAVIS of Virginia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1191, entitled "to designate certain facilities of the United States Postal Service in Chicago, Illinois.

The Clerk read as follows:

H.R. 1191

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CARDISS COLLINS POST OFFICE BUILDING.

The facility of the United States Postal Service located at 433 West Harrison Street in Chicago, Illinois, is hereby designated as the "Cardiss Collins Post Office Building". Any reference to such facility in a law, regulation, map, document, paper, or other record of the United States shall be considered to be a reference to the "Cardiss Collins Post Office Building".

SEC. 2. OTIS GRANT COLLINS POST OFFICE BUILDING.

The facility of the United States Postal Service located at 2302 South Pulaski Street in Chicago, Illinois, is hereby designated as the "Otis Grant Collins Post Office Building". Any reference to such facility in a law, regulation, map, document, paper, or other record of the United States shall be considered to be a reference to the "Otis Grant Collins Post Office Building".

SEC. 3. MARY ALICE (MA) HENRY POST OFFICE BUILDING.

The facility of the United States Postal Service located at 4222 West Madison Street in Chicago, Illinois, is hereby designated as the "Mary Alice (Ma) Henry Post Office Building". Any reference to such facility in a law, regulation, map, document, paper, or other record of the United States shall be considered to be a reference to the "Mary Alice (Ma) Henry Post Office Building".

SEC. 4. ROBERT LEFLORE, JR. POST OFFICE BUILDING.

The facility of the United States Postal Service located at 3000 West Division Street in Chicago, Illinois, is hereby designated as the "Robert LeFlore, Jr. Post Office Building". Any reference to such facility in a law, regulation, map, document, paper, or other record of the United States shall be considered to be a reference to the "Robert LeFlore, Jr. Post Office Building".

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. Davis of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 100.

The SPEAKER pro tempore. Is there an objection to the request of the gentleman from Virginia (Mr. DAVIS)?

There was no objection.

Ms. NORTON. Mr. Speaker, I yield to the Chair's prior announcement, further proceedings on this motion will be postponed.

The Chair recognizes the gentleman from Virginia (Mr. DAVIS).

Mr. DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks on H.R. 100.

The SPEAKER pro tempore. Is there an objection to the request of the gentleman from Virginia (Mr. DAVIS)?

There was no objection.
Madison Street as the “Mary Alice (Ma) Henry Post Office Building.” Ma Henry was known as one of the leading activists on the West Side, dedicating her life to serving humanity and building her community. She developed a plan for a primary care clinic at Garfield Hospital and that was dedicated in 1992 as the Mary Alice “Ma” Henry Family Health Center, and it presently serves more than 20,000 patients yearly. “Ma” Henry died in 1995.

H.R. 1191, in section 4, also names the postal facility located at 50001 West Division Street as the “Robert LaFlore, Jr. Post Office Building.” Mr. LaFlore served in the Illinois General Assembly for 11 years and was known as a powerful voice for the disadvantaged and underprivileged. Prior to his death in 1993, Mr. LaFlore left behind legislation to help children and senior citizens. Mr. Dwecoah

Mr. Speaker, this legislation has passed both the subcommittee and the committee levels. I urge all Members to support H.R. 1191, introduced by our distinguished colleague, the gentleman from Illinois (Mr. Davis). Mr. Speaker, I reserve the balance of my time.

Ms. NORTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1191 was introduced by my good friend and colleague, the gentleman from Illinois (Mr. Davis). Mr. Davis is the sponsor of a bill to designate four postal facilities in the 7th Congressional District of Illinois.

The four individuals the gentleman from Illinois (Mr. Davis) seeks to name these postal facilities for have a long history of being servants, activists, heroes and heroines in their respective communities. First among them is the first woman in the Congress, because others may have 5 legislative days within which to revise and extend their remarks on H.R. 1191.

The question was taken; and (two-thirds having voted in favor thereof) the rules and bill were suspended. The motion to reconsider was laid on the table.

Ms. SCHAKOWSKY. Mr. Speaker, today I join with my colleagues in commemorating the contributions of an outstanding former Member of Congress. Cardiss Collins, who served in Congress from 1973 to 1985 representing Illinois’ 7th district, was a leader in so many ways. Naming a Chicago postal building after her is a much deserved honor.

After losing her husband in a tragic plane crash, Cardiss Collins committed to continuing the fight for social justice, won the 1973 special elections and began a distinguished tenure here in Washington. Her six terms of service were then the longest service for an African American woman in the House, much revered on both sides of the aisle here. When I was elected to Congress in 1990, she had served for some years then as the only black woman in the Congress, because others had left. During that time and for her entire career here, however, she was known for her devotion, not only to her Chicago constituents and to women and the poor, but for her dedication to the American people.

Cardiss Collins is remembered here for her astute judgment, for her ability, for her collegiality and for her dedication. It is a special pleasure to speak to this bill in particular, and I know that the gentleman from Illinois (Mr. Davis) will regret that he was detained on an airplane and unable to perform this particular service for a woman I know is also his very good friend.

The second postal facility is named for Otis Grant Collins, who, prior to his death in 1992, was recognized as one of the premier activists in apprenticeship training in this country. In addition, while serving as state representative in the Illinois General Assembly, he was a champion of laws that protected minority communities from redlining.

The third postal facility is named for Mary Alice Ma Henry, who, prior to her death in 1985, was recognized as one of Chicago’s most caring and compassionate community activists. She is remembered as a courageous leader for the poor, uninsured and the left out of our society. In 1976, the Mary Alice Ma Henry Family Health Center was dedicated and it serves over 20,000 patients every year.

The fourth postal facility is named after former state representative Robert LeFlore, Jr., who, prior to his death in 1993, was recognized as a leading advocate for the disadvantaged and the underprivileged. He was a tireless worker on behalf of seniors and children, and his contributions will be remembered for a long time.

These individuals represent the best of Chicago and the nation. Their contributions have been significant and their legacies have been embedded in the communities they touched. I am pleased to sponsor this bill on behalf of some of the great African American leaders in the Chicago community and in our country.

Ms. SCHAKOWSKY. Mr. Speaker, today I join with my colleagues in commemorating the contributions of an outstanding former Member of Congress. Cardiss Collins, who served in Congress from 1973 to 1985 representing Illinois’ 7th district, was a leader in so many ways. Naming a Chicago postal building after her is a much deserved honor.

After losing her husband in a tragic plane crash, Cardiss Collins committed to continuing the fight for social justice, won the 1973 special elections and began a distinguished tenure here in Washington. Her six terms of service were then the longest service for an African American woman. Cardiss Collins’ career in Congress was highlighted by a number of notable positions. Congressman Collins was the ranking minority member on the Government Operations Committee, where she chaired the Subcommittee on Manpower and Housing. Cardiss Collins was the first African American and the first woman to serve as Democratic whip-at-large. In 1979, Collins was the Chairwoman of the Congressional Black Caucus.

Cardiss Collins’ commitment to the people of her district and the people of Illinois was apparent even before she came to Congress. A graduate of Northwestern University, she began her career at the Illinois Department of Labor. She later went on to the Illinois Department of Revenue. Cardiss Collins’ commitment to the American political system was also evident through her service as Democratic Committeeman of the 24th Ward.

Again, I applaud the most honorable career and dedication of Congresswoman Collins. I am proud to join my colleagues in the Illinois delegation who share this sentiment.

Ms. NORTON. Mr. Speaker, I yield back the balance of my time.

Mr. DAVIS of Virginia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

NURSING RELIEF FOR DISADVANTAGED AREAS ACT OF 1999

Mr. ROGAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 411) to amend the Immigration and Nationality Act with respect to the requirements for the admission of nonimmigrant nurses who will practice in health professional shortage areas.

The Clerk read as follows:

SECTION 1. SHORT TITLE.
This Act may be cited as the “Nursing Relief for Disadvantaged Areas Act of 1999”.

SEC. 2. REQUIREMENTS FOR ADMISSION OF NONIMMIGRANT NURSES IN HEALTH PROFESSIONAL SHORTAGE AREAS DURING 4-YEAR PERIOD.

(a) Establishment of a New Nonimmigrant Classification for Nonimmigrant Nurses in Health Professional Shortage Areas.—Section 101(a)(15)(H)(i) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15)(H)(i)) is amended by striking “; or” at the end and inserting the following: “; or (c) who is coming temporarily
May 24, 1999

CONGRESSIONAL RECORD—HOUSE 10545

to the United States to perform services as a registered nurse, the Secretary of Labor (including the situations described in section 212(m)(1), and with respect to whom the Secretary of Labor determines and certifies to the Attorney General that an unexpired attestation of the facility (as defined in section 212(m)(6)) for which the alien will perform the services; or

(b) REQUIREMENTS.—Section 212(m) of the Immigration and Nationality Act (8 U.S.C. 1182(m)) is amended to read as follows:

"(2)(A) The attestation referred to in section 101(a)(15)(H)(i)(c), with respect to an alien who is coming to the United States to perform nursing services for a facility, are that the alien—

"(A) has obtained a full and unrestricted license to practice professional nursing in the country where the alien obtained nursing education or has received nursing education in the United States;

"(B) has passed an appropriate examination (recognized in regulations promulgated in accordance with section 212(m) of this title) for the practice of professional nursing as a registered nurse; and

"(C) is fully qualified and eligible under the laws (including such temporary or interim licensing requirements which authorize the nurse to be employed) governing the place of intended employment to engage in the practice of professional nursing as a registered nurse immediately upon admission to the United States and is authorized under such laws to be employed by the facility.

"(2)(B) The admittance to the United States for the purpose of working as a registered nurse under this subsection is contingent on the obtaining of the approval of the Secretary of Labor; or

"(2)(C) Subject to subparagraph (A), an attestation under subparagraph (A) shall not be considered to be an exclusive list of the significant steps that may be taken to meet the conditions in subparagraph (A)(iv).

Nothing in this subparagraph shall be considered as requiring a facility to have taken significant steps before the date of the enactment of the Nursing Relief for Disadvantaged Areas Act of 1999. A copy of the attestation shall be provided, within 30 days of the date of filing, to registered nurses employed at the facility on the date of filing.

For purposes of subparagraph (A)(iv), each of the following shall be considered a significant step reasonably designed to recruit and retain registered nurses:

"(i) Operating a training program for registered nurses at the facility or financing (or providing participation in) a training program for registered nurses elsewhere.

"(ii) Providing career development programs and programs of facilitating health care workers to become registered nurses.

"(iii) Paying registered nurses wages at a rate or level that has been paid to registered nurses similarly employed in the geographical area.

"(iv) Providing reasonable opportunities for meaningful salary advancement by registered nurses.

The steps described in this subparagraph shall not be considered to be an exclusive list of the significant steps that may be taken to meet the conditions in subparagraph (A)(iv). Nothing in this subparagraph shall require a facility to take more than one step if the facility can demonstrate that taking a second step is not reasonable.

(C) Subject to subparagraph (E), an attestation under subparagraph (A)—

"(i) shall expire on the date that is the later of—

"(I) the end of the one-year period beginning on the date of its filing with the Secretary of Labor;

"(II) the end of the period of admission under section 101(a)(15)(H)(i)(c) of the last alien with respect to whose admission it was applied (in accordance with clause (i)); and

"(II) shall apply to petitions filed during the one-year period beginning on the date of its filing with the Secretary of Labor if the facility states in each such petition that it continues to comply with the conditions in the attestation.

(D) A facility may meet the requirements under this paragraph with respect to more than one registered nurse in a single petition.

(E) Subject to subparagraph (G), an attestation under subparagraph (A) shall be considered as renewing the attestation for each registered nurse at the facility employed by a facility during the 90-day period beginning immediately after the date of filing the petition.
Nothing in this paragraph is intended to whether or not the employee accepts the employer at equivalent or higher compensation employment opportunity with the same employee, which the worker is offered, as an alternative, workplace rules, cause, voluntary departure, for inadequate performance, violation of the term ‘lay off’, with respect to a worker—

(a) shall provide the nonimmigrant a wage rate and working conditions commensurate with those of nurses similarly employed by the facility; and

(c) shall not interfere with the right of the nonimmigrant to join or organize a union.

(6) For purposes of this subsection and section 101(a)(15)(H)(i)(c), the term ‘facility’ means a subsection (d) hospital (as defined in section 1886(b)(1) of the Social Security Act (42 U.S.C. 1395ww(d)(1)(B))) that meets the following requirements:

(A) As of March 31, 1997, the hospital was located in a health professional shortage area (as defined in section 332 of the Public Health Service Act (42 U.S.C. 254e)).

(B) Based on its settled cost report filed under title XVIII of the Social Security Act (42 U.S.C. 1395ww(d)(1)(B)), the hospital's acute care inpatient days for such period which were made up of more than 35 percent of the total number of such hospital's acute care inpatient days for such period; and

(D) the number of the hospital’s inpatient days for such period which were made up of patients who (for such days) were entitled to benefits under part A of such title is not less than 35 percent of the total number of such hospital's acute care inpatient days for such period; and

(E) the number of the hospital’s inpatient days for such period which were made up of patients who (for such days) were eligible for medical assistance under a State plan approved by the Secretary of Health and Human Services (as so amended).

(2) For purposes of paragraph (2)(A)(v), the term ‘lay off’, with respect to a worker—

(A) means to cause the worker's loss of employment, other than through a discharge for inadequate performance, violation of workplace rules, cause, voluntary departure, voluntary retirement, or the expiration of a grant or contract; but

(B) does not include any situation in which the worker is offered, as an alternative to such loss of employment, a similar employment opportunity with the same employer at equivalent or higher compensation and benefits than the position from which the employee was discharged, regardless of whether or not the employee accepts the offer.

Nothing in this paragraph is intended to limit an employee’s or an employer’s rights under a collective bargaining agreement or other employment contract.

(c) The amendments made by subsection (a) of section 101(a)(15)(H) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15)(H)) are amended by inserting ‘(i) designated by such commission not later than the assessment date in the four-year period beginning on the date that interim or final regulations are first promulgated under subsection (d).’

(d) IMPLEMENTATION.—Not later than 90 days after the date of enactment of this Act, the Secretary of Labor (in consultation, to the extent required, with the Secretary of Health and Human Services and the Attorney General) shall promulgate final or interim final regulations to carry out section 212(m) of the Immigration and Nationality Act (as amended by section 2(b)) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as amended by section 2(b)) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(3) The amendments made by subsection (a) shall apply to the Congress recommendations (including legislative specifications) with respect to the following:

(1) A program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as amended by section 2(b)) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as amended by section 2(b)) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(3) The Congress recommendations (including legislative specifications) with respect to the following:

(a) The institution of a program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as so amended) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(b) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as so amended) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(4) The amendments made by subsection (a) shall apply to the Congress recommendations (including legislative specifications) with respect to the following:

(1) A program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as so amended) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as so amended) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(3) The Congress recommendations (including legislative specifications) with respect to the following:

(1) A program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as so amended) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as so amended) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(3) The Congress recommendations (including legislative specifications) with respect to the following:

(1) A program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as so amended) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as so amended) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(3) The Congress recommendations (including legislative specifications) with respect to the following:

(1) A program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as so amended) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as so amended) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).

(3) The Congress recommendations (including legislative specifications) with respect to the following:

(1) A program to eliminate the dependence of facilities described in section 212(m)(6) of the Immigration and Nationality Act (as so amended) on nonimmigrant registered nurses by providing for a permanent or temporary exchange of registered nurses who are United States citizens or aliens lawfully admitted for permanent residence.

(2) A method of enforcing the requirements imposed on facilities under sections 101(a)(15)(H)(i)(c) and 212(m) of the Immigration and Nationality Act (as so amended) that would be more effective than the process described in section 212(m)(2)(E) of such Act (as so amended).
Mr. Speaker, I rise in support of this legislation. I appreciate his effort on our behalf with the American Nurses Association, and will subsequently have this letter submitted into the Record.

Mr. Speaker, I include the letter for the Record.

The distinguished gentleman from Texas (Mr. SMITH), the chairman of the House. We want to congratulate the gentlewoman from Texas (Ms. JACKSON-LEE). Mr. Speaker, I yield such time as she may consume to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas, Mr. Speaker, I thank the distinguished gentleman from Guam, one, for his copenhagen and leadership, and certainly I appreciate his effort on behalf of the registered nurses.

The distinguished gentleman from California (Mr. ROGAN) and, of course, the distinguished gentleman from Texas (Mr. SMITH), the chairman of this committee, and myself are delighted to bring H.R. 441 to the floor of the Senate. We want to congratulate and applaud the gentleman from Illinois (Mr. Rush), who had the insight and leadership to bring this legislation forward.

I would like to take the time, Mr. Speaker, to read into the record the words and comments of the American Nurses Association, and will subsequently have this letter submitted into the Record.

I read the letter primarily because I think this is also, this legislation, an affirmation of the importance of nurses in our nation. We want to thank them.

The American Nurses Association stands as the longstanding organization, the only full service professional nursing organization in the country, along with, of course, other organizations that have organized themselves around nursing.

The letter begins, "Dear Congresswoman Lee, the American Nurses Association appreciates the opportunity to comment on H.R. 441, the Nursing Relief Act for Disadvantaged Areas of 1999." They again state that they are the only full service professional nursing organization. "We have a longstanding interest in the development of nursing workforce policy."

However, they remain neutral, and state they will "look forward to ongoing discussions with the Committee to address this complex issue."

Mr. Speaker, I include the letter for the Record.

The American Nurses Association, 600 Maryland Avenue, SW, Washington, DC, March 18, 1999.

Hon. Sheila Jackson Lee, Ranking Minority Member, Subcommittee on Immigration and Claims, Washington, DC.

Dear Congresswoman Lee: The American Nurses Association (ANA) appreciates the opportunity to comment on H.R. 441, the Nursing Relief for Disadvantaged Areas Act of 1999. As the only full-service professional nursing organization, we have a long-standing interest in the development of nursing workforce policy.

Overall, ANA believes that we need to address the root causes for the instability of the nursing workforce that has led to swings in the supply and demand of registered nurses. It is clear that over reliance on foreign educated nurses by the hospital industry serves only to postpone real efforts to address the nursing workforce needs of the United States.

I would like to take the time, Mr. Speaker, to read into the record the words and comments of the American Nurses Association, and will subsequently have this letter submitted into the Record.

To obtain a petition for an alien, an employer would have to meet 4 conditions: First, the employer would have to be located in a health professional shortage area as designated by the Department of Health and Human Services. Second, the employer would have to have at least 190 acute care beds. Third, a certain percentage of the employer's patients would have to be Medicare patients. Finally, a certain percentage of patients would have to be Medicaid patients.

The H-1C program created by this bill would adopt those protections for American nurses contained in the expired H-1A program. For instance, for a hospital to be eligible for H-1C nurses, it would have to agree to take timely and substantial steps to utilize nurses from the American workforce. Also H-1C nurses would have to be paid the prevailing wage.

Additional protections have also been added. H-1C nurses cannot be able to comprise more than 33 percent of a hospital's workforce of registered nurses, and a hospital cannot contract H-1C nurses to work at another facility.

Our goal should be that set out by the Immigration Nursing Relief Advisory Committee created by the Immigration Nursing Relief Act of 1989. We need to balance both the continuing need for foreign nurses in certain specialties and localities for which there are not adequate domestic registered nurses and the need to continue to lessen employers' dependence on foreign registered nurses and protect the wages and working conditions of U.S. registered nurses.

Mr. Speaker, I believe this bill successfully balances both these needs. Because it is so narrowly drafted it is not opposed by the American Nurses Association. I urge my colleagues to support the bill.

Mr. Speaker, I reserve the balance of my time.

Mr. UNDERWOOD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this legislation introduced by the gentleman from Illinois (Mr. Rush) which addresses a pressing need for nurses at low income inner-city hospitals. When similar legislation was proposed last Congress, I expressed my concerns that it did not include adequate safeguards to protect American workers. Fortunately, this legislation was amended to specify that the relief was only temporary and to allow us to move more firmly in the direction of developing a more permanent solution to this problem that will utilize nurses from the American workforce instead of continuing to rely on foreign labor. I supported the revised bill, which passed the committee in the House last year before we ran out of time in the Senate.

The legislation being considered today is nearly identical to the legislation the House approved last Congress. It would provide up to 500 fully qualified foreign nurses to enter the United States each year to work for 3 year periods at hospitals that have not been able to hire enough nurses from the American workforce. Finally, the legislation also includes a provision creating an abbreviated certification process for foreign nurses who seek to work in the United States. I am a proud cosponsor of this bill, and I would certainly like to congratulate the work of the gentleman from Illinois (Mr. Rush), the gentleman from Illinois (Mr. Hyde), the gentleman from Michigan (Mr. Conyers), and, of course, the gentleman from Texas (Ms. Jackson-Lee) on H.R. 441.

On a note relating to Guam, Guam, unfortunately, does not qualify because it is not a state, as other hospital groups with nurses from the American workforce instead of continuing to rely on foreign labor.

Finally, the legislation also includes a provision creating an abbreviated certification process for foreign nurses who seek to work in the United States. I am a proud cosponsor of this bill, and I would certainly like to congratulate the work of the gentleman from Illinois (Mr. Rush), the gentleman from Illinois (Mr. Hyde), the gentleman from Michigan (Mr. Conyers), and, of course, the gentleman from Texas (Ms. Jackson-Lee) on H.R. 441.

On a note relating to Guam, Guam, unfortunately, does not qualify because of a certain threshold here on hospital beds, but certainly I hope we will be able to work that out at some time along in the future or perhaps with different legislation.

Mr. Speaker, I yield such time as she may consume to the gentlewoman from Texas (Ms. Jackson-Lee).

Ms. JACKSON-LEE of Texas, Mr. Speaker, I thank the distinguished gentleman from Guam, one, for his coconsorship and leadership, and certainly I appreciate his effort on our behalf with respect to managing the time on this legislation.

The distinguished gentleman from California (Mr. Rogan) and, of course, the distinguished gentleman from Texas (Mr. Smith), the chairman of this committee, and myself are delighted to bring H.R. 441 to the floor of the House. We want to congratulate and applaud the gentleman from Illinois (Mr. Rush), who had the insight and leadership to bring this legislation forward.

I would like to take the time, Mr. Speaker, to read into the record the words and comments of the American Nurses Association, and will subsequently have this letter submitted into the Record.

I read the letter primarily because I think this is also, this legislation, an affirmation of the importance of nurses in our nation. We want to thank them for their responsible letter that says that they will not oppose this legislation and will work along with us.
The program allowed health care institutions who attested there would be a substantial disruption in the provision of health care services without the help of the alien nurses to essentially sponsor such a nurse. Nurses admitted under the program were permitted to stay in the United States for an initial period of 3 years, but that period was subject to a possible extension up to a total of 5 years. The New York City, Chicago, Houston, Los Angeles and Miami areas accounted for two-thirds of all petitions filed because of the enormous need in these communities.

I support H.R. 441 because it creates a new registered nurse temporary visa program that would sunset after 5 years in collaboration with the insight provided for us by the American Nurses Association. It would limit the number of visas that can be issued to 50 a year and hospitals would be able to petition for an alien nurse to those in need. H.R. 441 would serve to decrease the nursing shortage in the United States and set up a new H–1C visa program.

The Immigration Nursing Relief Act of 1989 created the H–1A visa program in order to allow foreign educated nurses to work in the United States. The First Congressional District of Illinois. The Englewood community, a poor, urban neighborhood with a high incidence of crime, is primarily served by St. Bernard's Hospital. This small community hospital's emergency room averages approximately 31,000 visits per year; 50% of their patients are Medicaid recipients and 35% receive Medicare.

H.R. 441 provides such hospitals relief in compelling circumstances by facilitating the temporary admission to the United States of registered nurses in an H–1C nonimmigrant visa category—subject to a nationwide ceiling of 500 visas issued annually and limits of 50 or 25 (depending on a state's population) on the numbers of nurses who can receive visas each year for employment by hospitals in any one state. The legislation includes an exception from per state limits to facilitate the potential use of otherwise unused visas—as long as the annual nationwide ceiling is not breached.

This narrowly focused program for nurses, which will sunset after a four period, addresses urgent needs that cannot be met in any other way. The House bill was introduced by my colleague from Illinois Mr. Rush with my cosponsorship—and its Senate counterpart was introduced by Senator Durbin with Senator HUTCHISON's cosponsorship.

I became involved in this effort to enact remedial legislation when St. Bernard Hospital, located in the Englewood Community in Chicago, brought its precarious situation with regard to nursing shortages to my attention during the last Congress. I knew the continued functioning of Saint Bernard Hospital would be so essential to the residents of the Englewood Community, I decided to endorse an appropriately limited legislative remedy.

H.R. 441, like the bill that passed the House last year, clearly merits bipartisan congressional support. It provides relief to particularly vulnerable hospitals and incorporates many safeguards designed to protect American jobs.

I commend the gentleman from Texas [LAMAR SMITH], Chairman of the Subcommittee on Immigration and Claims, and the gentleman form Michigan [JOHN CONYERS], Ranking Minority Member of our full committee, for their important contributions to this carefully crafted legislation. Because the language of the bill in its current form reflects a consensus among House and Senate members of both parties, I am hopeful that it can be enacted
into law expeditiously. I urge my colleagues to support it.

Mr. CONYERS. Mr. Speaker, I rise in support of this legislation, introduced by Mr. Rush, which addresses a pressing need for nurses at low income, inter-city hospitals.

When similar legislation was proposed last Congress, I expressed my concerns that it did not include adequate safeguards to protect American workers. Fortunately, the legislation was amended to include an emergency period for hiring nurses from the American work force instead of continuing to rely on foreign labor. I supported the revised bill which passed the committee and the House last year, before we ran out of time in the Senate.

The legislation being considered today is nearly identical to the legislation the House approved last Congress. It would allow up to 500 fully qualified foreign nurses to enter the United States each year to work for three-year periods at hospitals that have not been able to hire enough nurses from the American work force. Since we are facing a temporary shortage of workers, the legislation sunsets in four years.

The bill also provides for a determination to be made on whether the hospitals are taking reasonable steps to recruit and retain nurses from the American work force. In addition, the Department of Labor and the Department of Health and Human Services would be required to conduct a study to establish ways for these hospitals to meet their staffing needs with nurses from the American work force instead of continuing to rely on foreign labor.

Finally, the legislation also includes a provision creating an abbreviated certification process for foreign nurses who meet specified qualification standards. This change is needed to conduct a study to establish ways for these hospitals to meet their staffing needs with nurses from the American work force instead of continuing to rely on foreign labor.

My proposal builds on the positive gains in both reading and math achievement that have been registered and the lowest-performing students—have registered gains in both reading and math achievement.

The TECHNOLOGY FOR EDUCATION initiative under Title II would help move challenging educational standards into every classroom by providing teachers with sustained and intensive high-quality professional development in core academic subjects, supporting new teachers during their first 3 years in the classroom, and ensuring that all teachers are proficient in relevant content knowledge and teaching skills.

The Technology for Education initiative under Title III would expand the availability of educational technology as a tool to help teachers implement high standards in the classroom, particularly in high-poverty schools. My bill would extend, over the next 7 years, the CLASS-SIZE REDUCTION initiative, which aims to reduce class sizes
in the early grades by helping districts to hire and train 100,000 teachers. And the Title VII Bilingual Education proposal would help ensure that all teachers are well trained to teach students with limited English proficiency, who are found in more and more classrooms with each passing year.

Third, my bill would increase support for safe, healthy, disciplined, and drug-free learning environments where all children feel connected, motivated, and challenged to learn and where parents are welcomed and involved. The recent tragedy at Columbine High School in Littleton, Colorado, reminds us that we must be ever vigilant against the risks of violence and other dangerous behaviors in our schools. Our reauthorization bill includes several measures to help mitigate these risks.

We would strengthen the Safe and Drug-Free Schools and Communities Act by concentrating funds on districts with the greatest need for drug- and violence-prevention programs, and by emphasizing the use of research-based programs of proven effectiveness. Moreover, with respect to students who bring weapons to school, this proposal would require schools to refer such students to a mental health professional for assessment and require counseling for those who pose an imminent threat to themselves or others; allow funding for programs that educate students about the risks associated with guns; expand character education programs; and promote alternative schools and second chance programs. A new School Emergency Response to Violence program would provide rapid assistance to school districts that have experienced violence or other trauma that disrupts the learning environment.

My High School Reform initiative would support innovative reforms to improve student achievement in high schools, such as extending the connections between adults and students that are necessary for effective learning and healthy personal development. This new initiative would provide resources to help transform 5,000 high schools into places where students receive individual attention, are motivated to learn, are provided with challenging courses, and are encouraged to develop and pursue long-term educational and career goals.

Fourth, in response to clear evidence that standards-based reforms work best when States have strong accountability systems in place, my proposal would encourage each State to establish a single, rigorous accountability system for all schools. The bill also would require States to end social promotion and traditional retention practices; phase out the use of teachers with certificates authorizing the practice of assigning teachers “out-of-field”; and implement sound discipline policies in every school. Finally, the bill would give parents an important new accountability tool by requiring State, district, and school-level report cards that will help them evaluate the quality of the school their children attend.

Based on high standards for all students, high-quality professional development for teachers, safe and disciplined learning environments, and accountability to parents and taxpayers, the Educational Excellence for All Children Act of 1999 provides a solid foundation for raising student achievement and narrowing the achievement gap between disadvantaged students and their more advantaged peers. More important, it will help prepare all of our children, and thus the Nation, for the challenges of the 21st century. I urge the Congress to take prompt and favorable action on this proposal.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. Pettigrew). Pursuant to the provisions of clause 8 of rule XX, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device will be taken on the additional motion to suspend the rules on which the Chair has postponed further proceedings.

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 100.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. Davis) that the House suspend the rules and pass the bill, H.R. 100, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 368, nays 0, not voting 65, as follows:

[Roll No. 146]

YEAS—368

Mr. BAIRD changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ORTIZ. Mr. Speaker, on rollcall No. 145, I was unavoidably detained by official business in my district. Had I been present, I would have voted "yea."

CONGRESSIONAL RECORD—HOUSE

ROXANNE H. JONES POST OFFICE BUILDING, FREEMAN HANKINS POST OFFICE BUILDING, AND MAX WEBNER POST OFFICE BUILDING

The Speaker pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 100.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. Davis) that the House suspend the rules and pass the bill, H.R. 100, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 368, nays 0, not voting 65, as follows:

[Roll No. 146]
Mr. ORTIZ. Mr. Speaker, on rollcall No. 146, I was unavoidably detained by official business in my district. Had I been present, I would have voted "yea."

PERSONAL EXPLANATION
Mr. RYAN of Wisconsin. Mr. Speaker, I was unavoidably detained due to delays in air traffic control. I missed rollcall votes 145 and 146. Had I been present, I would have voted "yea."

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1906, AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS BILL, 2000
Mr. LINDER, from the Committee on Rules, submitted a privileged report (Rept. No. 106-159) on the resolution (H. Res. 185) providing for consideration of the bill (H.R. 1906) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for the fiscal year ending September 30, 2000, and for other purposes, which was referred to the House Calendar and ordered to be printed.

CERTIFICATIONS REGARDING AMENDED MINES PROTOCOL OF CONVENTION ON CONVENTIONAL WEAPONS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES
The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations:

Sincerely,

JEFF TRANDAHL.

May 24, 1999
take up this violent action with guns against their schoolmates.

It is urgent to the American public that the Congress be able to respond to the problems of children having guns, having easy access to guns, and the irresponsibility of some parents who make those guns available or negligently leave those guns lying around the house, in many instances loaded and unlocked, with easy access by these children.

Last week the Senate passed several pieces of legislation designed to improve the margins of gun safety, if you will, requiring background checks for all gun sales, including gun shows. We have a companion bill here by the gentleman from Illinois (Mr. BLAGOJEVICH) requiring new handguns to be sold with safety locks. We have companion legislation here by the gentleman from Indiana (Ms. CARSON) outlawing high density ammunition clips, so they will not be made available.

I think that these are measures that the American public can understand, that the American public supports, that the American public, whatever their positions are with respect to gun control, understand that these are gun safety issues about the safety of our children.

Our children are, in many instances, some of our most vulnerable citizens, who go to school with all the expectations that we all went to school with when we were growing up, only to find out that it can become a shooting gallery because of the easy access of a troubled teen or a troubled youngster to these kinds of guns. Yet what we see is an effort to somehow not address this legislation on a timely fashion, not to take that legislation from the Senate and to pass it, not to have a freestanding piece of legislation which we can pass and send to the Senate that is identical to that which they passed so that they might be able to put it on the President’s desk before we leave for Memorial Day.

No, what we see is, we are going to get one hearing this week, and then action perhaps in the committee sometime in June. Knowing the July schedule, knowing the August schedule. It is very likely, it is very likely, that America’s schoolchildren will start the next school year without the Congress of the United States having addressed this issue.

I yield to the gentleman from Virginia (Mr. MORAN).

Mr. MORAN of Virginia. Mr. Speaker, I thank the very distinguished gentleman from California for yielding to me.

I would say to the gentleman, 13 young people die from firearms every single day. That amounts to nearly 5,000 a year. It is the second leading cause of death among young people.

There is a reason why there are more deaths from firearms of young people in the United States than in all 25 other industrialized nations combined. Something is wrong here. What is wrong that there are over 225 million guns available in the United States that invariably are getting into the hands of our young people.

There are many things we could and should be doing.

For one thing, we have concealed weapons laws. In the Commonwealth of Virginia it is lawful to take a concealed weapon into a children’s recreation center. In the Commonwealth of Virginia and many other States, one can take guns and park one’s vehicle in his school parking lot with a gun in or on one’s vehicle. That does not make sense.

It does not make sense to be able to buy more than one handgun a month. What people oftentimes do is buy a whole case of guns. They travel up the East Coast and then set up shop on a street corner in an urban area and sell those guns.

These are not responsible situations when we see the kind of death and destruction that is occurring from firearms every day. It is time for the House to take action to complement the action of the Senate, to put forward a good, responsible juvenile justice bill that will in fact make our schools and streets safer for our children.

Mr. GEORGE MILLER of California. Mr. Speaker, I thank the gentleman from Virginia (Mr. MORAN) very much for his contribution. His remarks point out the urgency and the danger that these guns present to young people in this Nation. He has pointed out that 13 children under the age of 18 are killed each day because of guns.

Guns cause one in every four deaths of teenagers between the ages of 15 and 19. Firearms are the fourth leading cause of accidental death among children 5 to 14. Clearly the easy availability and proximity of guns, handled in an irresponsible fashion, to young children is lethal to those children.

We have an opportunity with the very common sense proposals that were presented in the Senate to address this matter and to address it now, with the same sense of urgency that parents are asking themselves about, whether or not they should send their children for the remainder of the school year, whether or not they should pull their children out of school before school closes, whether or not they should try to find another school that they might think will be more safe than the one they are in.

But what we have learned over the last 18 months, we do not know what will happen. We do not know whether or where a troubled child has easy access to a gun and then acts out anger, frustration or problems that that child has by shooting their schoolmates.

That is why we are asking the Republican leadership to schedule this debate, to schedule this vote this week before we go home for Memorial Day, Memorial Day, a rather significant day in the history of this country. But tragically now many will be celebrating Memorial Day at the loss of their children because of tragic shootings. I think that is why we cannot play this by the ordinary rules of legislative procedure and process and jurisdiction and all of those arguments that are designed to keep these common sense approaches from coming to the floor of the House to be voted on.

Why are they doing that? Because the people who oppose trigger locks on guns that are accessible to children, the people that are opposed to getting rid of the loophole for gun shows where one can buy guns and gun shows without a background check, that one would not be allowed to if one went into a gun shop, people who oppose limiting the high density ammunition clips, they want time to re-scramble, to put pressure on the Congress, to give campaign contributions, to lobby the Congress so that they can overwhelm the judgment and the determination of the American people.

The Republican leadership ought not to become a tool for those interests, because it is those interests that are keeping guns in the presence of young children in an irresponsible fashion.

Mr. Speaker, I yield to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I thank the gentleman for yielding to me, and I strongly associate with his comments.

I have only been in Congress 3 years; but in the course of the time that I have been in Congress there have been eight multiple shootings on school yards.

I look at my colleague, the gentlewoman from Colorado (Ms. DEGETTE), she and I were present earlier before tragic shootings in our State, seeking the attention of the Republican leadership and of this Congress to at least allow a vote on simple, common sense, direct approaches that would minimize the impact of gun violence with our children.

We pleaded, for instance, to have the opportunity to at least vote on the most benign of child access protection legislation in the last Congress. We were denied the opportunity in the last juvenile justice bill to have any vote at all on any legislation, any amendment, even slightly taking the tack of trying to increase the safety of guns in the home.

It was frustrating for me that we could have 15 States, starting with the State that was the home of the Chairwoman and all of the committee that had child access protection, the State of Florida, 15 States have followed, and yet we have not been able to have the most innocuous of votes in this Chamber.
I am pleased that finally we are starting to see some movement, that we have seen some action on the Senate side and perhaps the Republican leadership will find it in their heart to allow a vote on the floor of this Chamber. There are a number of proposals that have absolutely nothing to do with the rights of the hunting population around this country. In fact, they are supported by the overwhelming majority of gun owners.

Why? Why do we still sell guns in this country that do not tell one whether or not there is a bullet in the chamber? There are dozens of proposals that would save the lives of children in fact, that would save the lives of children in Oregon (Mr. BLUMENAUER) for his simple, common sense steps that will take its head out of the sand, takes it out of the suffering of the people of this Chamber. Congress will hear and this Congress is ready to do it. If we are ready to protect our children, the children of this Nation, and that loophole needs to be closed.

Mr. Speaker, I deeply appreciate the gentleman from California (Mr. G GEORGE MILLER) for his remarks, and he does point out the inexactness of where we find ourselves. In fact, we are at a point where we are not able to vote on these simple, commonsense steps that would save children’s lives, that are in fact supported by the overwhelming majority of gun owners.

Mr. Speaker, I think the time has come for the people on this floor to seize control of this issue ourselves. It takes a discharge petition in order to come for the people on this floor to take control of this issue ourselves. If we would not think about doing it, that is why we are here. The American people, the people of this Chamber, the people of this Chamber are supported by the overwhelming majority of gun owners.

Why is it that there are more consumer protection devices for toy guns than real guns? Why? Why do we still sell guns in this country that do not tell one whether or not there is a bullet in the chamber? There are dozens of proposals that would save children’s lives, that are in fact supported by the overwhelming majority of gun owners, I think that the time has come.

I deeply appreciate the gentleman from California (Mr. G GEORGE MILLER) for his remarks, and he does point out the inexactness of where we find ourselves. In fact, we are at a point where we are not able to vote on these simple, commonsense steps that will save children’s lives, that are in fact supported by the overwhelming majority of gun owners, I think that the time has come.

Mr. Speaker, I think the time has come for the people on this floor to seize control of this issue ourselves. It takes a discharge petition in order to be able to vote on these simple, commonsense steps that will save children’s lives, that are in fact supported by the majority of Americans, and by the majority of the gun-owning Americans, I think that the time has come.

Mr. Speaker, I thank the gentleman from Oregon (Mr. BLUMENAUER) for his remarks, and he does point out the inexactness of where we find ourselves. In fact, we are at a point where we are not able to vote on these simple, commonsense steps that will save children’s lives, that are in fact supported by the overwhelming majority of gun owners.

May 24, 1999

They should be sent over here. We should pass a freestanding bill and make sure that we can have the become law before our children get back to school. I think it is important that we address it with that kind of urgency.

Mr. Speaker, I yield to the gentlewoman from Texas (Ms. JACKSON-LEE). Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentleman from California for yielding. I particularly thank him for allowing me to join him and my colleagues on an issue of such moment. If you will, and to be able to say to the American people and to my colleague, common sense tells us that guns do kill. They do kill. Ask any law enforcement officer, any person who is responsible for keeping law and order. Ask teachers, parents. Ask kids. Ask injured children and ask the loved ones of those children who are killed.

I have heard the response by those who are advocates of the idea that the Second Amendment should prevail above all. Ask guns do not kill, people do. But people use guns to kill. And I think the American people are way out in front on this issue right now, because if we read the Second Amendment, it has to do with the keeping of a militia for a founding country of 13 colonies trying to survive.

And do my colleagues know what? We have a militia, the National Guard. And no one is trying to take guns away from the National Guard. We also know that the people of America have guns in their homes, and no one is trying to take guns away from the American people.

But in 1995, over 440 children died just of unintentional shootings alone. In my hometown. In Houston, a few years ago, almost 10 years ago, I did something unheard of. I rose up off of City Council and said, we are going to pass an ordinance that holds adults responsible for allowing guns to get in the hands of children.

If my colleagues know Texas, and I do not think my fellow Texans will allow me to praise them as well as to cite that it was an unheard of thing to do for a City Council member to do in the City of Houston. And there was a lot of opposition. The National Rifle Association sent people in to testify against it. But the mothers came forward and said, we want this.

Out of that ordinance came a State law that is now in place in the State of Texas that holds parents responsible, holds parents responsible, for letting guns get in the hands of children. And what we have seen is a 50-percent decrease in unintentional shootings since that was what it was to be directed toward.

To the family in Conyers, Georgia, if those guns had been more secure, as we are attempting to say to parents, not only in a nice display case with a glass front that could be broken, but away from the eyesight of children, it is our responsibility to try and keep them safe, so keep law enforcement officers safe as well.

Firearms are the fourth leading cause of accidental death among children 5 to 14 and the third leading cause of death among 15 to 24 years old. If this were a medical problem, we would call it an epidemic. In 1994, 70 percent of the murder victims between the ages of 15 and 17 were killed by a handgun and 2 in 25 high school students, almost 8 percent, reported having carried a gun in the last 30 days.

As a member of the House Committee on the Judiciary, we have had an opportunity to move this legislation forward. In fact, we could have done just what the Senate did to amend the juvenile bill to be Senate, just passed with common-sense response to these gun issues.

We could, for example, stamp out the loophole in gun shows. Enormously important. We could provide for the safety lock that would protect our children and to realize that they protect others, as well.

My colleagues could not imagine the gun shows that travel around the Nation. And many times there are store owners that participate in these gun shows. But let me assure my colleagues, there are a lot of individuals who come and say, I have no license, I have no permit. I have nothing. I am just here. And the reason I have nothing is because these are in my personal possession.

This is a loophole. And so, we get the individual driving up to the gun show with 25 AK–47s and they say, this is part of my personal ownership. And then 2 or 15 to an individual who gives no reason. I have talked to law enforcement officers who went and bought a gun from someone, an automatic rifle, and said, I am going to use this to kill a cop in New York. And the person who was not licensed at all. Here is a slinger to go with it. But make sure when you do it, do not call my name.

There are too many guns in America. And most Americans want to be safe in their homes. They want law enforcement officers to be safe, as well. And so, I am joining with my colleagues to ensure the closing the loophole in the gun shows. I would like to see a Brady waiting period for those gun shows to protect individuals. I want to see raising the handgun purchase age from 18 to 21. I think child safety locks are an imperative.

And frankly, I wish we could pass the same legislation in the comprehensive gun legislation offered by my colleagues from New York (Mrs. McCARTHY) to deal with the idea of holding adults responsible.

When I spoke to some parents and teachers and explained to them that, no, I am not trying to disadvantage parents, I chair the Congressional Children's Caucus, I do not want to point the blame and put parents, who are already distraught, in a situation where they are criminally liable, but I think such a piece of legislation is common sense, and I think if they understand it fully, they would be running towards supporting it.

Because what it says is, know what your children are doing. Do not leave guns on coffee tables and in places conspicuously, where the child can get it. And if their child is in a garage or reading the Internet and building bombs, they need to know what is going on. Because we have to protect their children and our children. And how much more can we get from not listening to our children.

Let me close by simply saying to my colleagues, and I thank again the gentlewoman from California for yielding, that we know that there are other aspects of this, the video and entertainment industry. I am working on legislation that deals with the violent services, an omnibus mental health services for our children that deals with schools but also deals with other needs that our children have, so that if they are on medication they are not off of it one day and on it the next day.

I think America should be ashamed that we have a children's memorial that acknowledges the number of children that have been killed by guns. And allow me to share with my colleagues.

Chris Hollowell, age 5, was unintentionally shot and killed by his 10-year-old brother. Sean Harvey, 16, was killed by a man who mistakenly thought the boy was stealing the neighbor's car. Brian Crowell, 12, was unintentionally shot by a 14-year-old. Amanda Garza died from a gunshot wound to the head after shooting herself with a .357. Amanda Rogers, dead, 6 years old, was playing with a Nintendo with her cousin and was unintentionally shot by them.

Karissa Miller, 2, was unintentionally shot and killed by a 7-year-old boy. Christopher Murphy, 11 years old, the son of two police officers, unintentionally shot and killed by his 11-year-old friend. Christopher David Holt, 4, unintentionally shot and killed himself with a .357 Magnum.

Amanda Drukenbrod, 13, shot and killed at home when a teenage boy was showing off his gun. I can go on and on, pages and pages of young children who died at the hand of a gun. Not a knife, not a stick, but a gun.

I think it is time now to say that we will not go home for this Memorial Day recess unless we stand up and be counted in the United States Congress and
I am hearing constantly is, this is too big for all of us to handle. We cannot do anything about it. But do my colleagues know what? That is what we hear when they want defeat before they even start.

We have to change the debate. When I am home in my district, I have NRA members that come up to me all the time, "Carolyn, we support what you are doing." But then we have so many Members that are afraid of the NRA leadership. They are afraid of what they can do to them as congresspersons.

Certainly, they are not going to come after me about guns in my district because the people in my district support me on what I am trying to do. But we have Members here, and they have every right to be afraid of the NRA because the NRA will come in and say things about us. They have absolutely nothing to do with guns, or make up lies. And they do make up lies.

What I am asking the American people, the mothers, the fathers of this land, call their congresspersons, give them the support that they need. Because if we only hear from one side, I guarantee my colleagues, in a couple of months, we will be back here when school opens again and there will be another shooting in the school and people will say, why can we not do something?

A year ago, when we had a committee hearing, a psychologist said it was not a matter of if there would be another school shooting, it was a matter of when there would be another school shooting.

But a lot of these young people that were shot, killed, injured, they did not make the newspapers across the country. They might have made it in their hometown newspaper, but they did not make it on the front pages, because they are all individuals.

My colleague before me talked about a health care crisis. We have four young people left in Colorado that have spinal cord injuries. Do you know what it is going to cost the American people on health care? The estimates, the low estimates of health care to our young people on a yearly basis for those that survive their injuries is $14 billion. $14 billion. Can you imagine what we could do with that? Can you imagine what we could do with that money here in Congress? Education, health care, all the things that we want to do.

I am asking every mom, every dad, let us hear from you. We have to hear your voices. Grassroots, that is what we need. That is what changes and certainly motivates this Congress, be it one life. But not, there are a number of us that will continue to fight to reduce gun violence in this country, but it would be nice if we had a few more voices to be heard so we could give our colleagues the strength to do the right thing. They have got to hear from you. If you want to make a difference, then your voice does matter. Do not sit there saying, "Oh, so and so will call. I don’t have to." You have to let the Congresspeople here know what you want. Then we will win.

Mr. GEORGE MILLER of California. I thank the gentlewoman very much for her remarks and think she makes a very important point. It is highly unlikely that we will have this kind of common sense gun legislation to help protect our children, to help protect our communities from the easily accessible and irresponsible ownership of guns, if the American people do not call their Members of Congress and insist upon it.

Over the last couple of weeks as I have been out in the public in my district and talking to groups and just being on the streets of my district, people have come to me and asked time and again: Why can you not do this and do it now?

When they saw the Senate not do it, they were infuriated, and the Senate doubled back and took a new vote and then came in line with what the American people wanted. Then the Senate doubled back a second time and came in line with what the American people wanted.

But apparently the Republican leadership in this House and the NRA are going to delay this legislation, fully understanding that delay is the enemy of legislation, that you get it jammed up at the end of the session against a recess, against the appropriations bills, and this starts to fall through the cracks, and it is nobody’s fault and it is everybody’s fault.

We need the American people to call the Republican leadership, to call their Members of Congress and tell them that these three or four measures, very common sensical measures, should be passed and should be passed immediately. They could, if in fact the leadership wanted to do it, be passed before we leave for Memorial Day.

They are having a hearing on the day we leave town, because then they are hoping for a week where there will not be any discussion of this measure and there will not be an opportunity for the American people to have Congress address this when we come back, and pretty soon we will find ourselves addressing it in September or October. It is the oldest legislative strategy in this town, just delay and delay.

Already we see Members that are supporters of the NRA going around the floor with checklists from the NRA trying to line up their support, who they have given their contributions to and who will they stand tough on this. That is why they want the time. They want the time to kill this bill, not to give it great general consideration but to kill.
these ideas that have passed overwhelmingly in the Senate of the United States.

I would hope that people would heed your call for them to call Members of Congress and ask them to pass these child gun safety measures that have been passed by the Senate.

I yield to the gentlewoman from the District of Columbia.

Ms. NORTON. Mr. Speaker, I thank the gentleman for yielding and I particularly thank him for his leadership on this special order, because there is a hunger and a thirst in the American public for this legislation and for education about this legislation.

Mr. Speaker, this chart came home to the American people finally in Littleton and in Georgia. Close to 60,000 deaths during the tragic Vietnam War. That is compared to 11 years at home, close to 400,000 deaths, increasingly the deaths of children. The reason that so many of us on both sides of the aisle cannot go home for Memorial Day without a bill is that we cannot face our constituents without a bill, not after the massacre in Littleton and the attempted massacre in Georgia.

I want to focus for just a few minutes on gun shows, because frankly I was ignorant until recently of the fact that anybody can buy a gun at a gun show free of any Federal requirement. I am sure most of the public does not know that there is no Federal requirement that says that a person with a mental defect has to be checked before buying at a gun show, with a felony conviction has to be checked before buying at a gun show, or even that a child has to be checked before buying at a gun show.

Remember that some of the guns used in Littleton were bought at a gun show. The Gentleman from Virginia (Mr. MORAN) was on the floor earlier. He is from the district adjoining mine. My district is an absolute ban on guns of any and every kind. As I speak, my district is flooded with guns of every kind. Many of those guns come from gun shows in Virginia, because anybody can buy a gun at a gun show.

The Gentleman from Virginia was on the floor earlier. He is from the district adjoining mine. My district has an absolute ban on guns of any and every kind. As I speak, my district is flooded with guns of every kind. Many of those guns come from gun shows in Virginia, because anybody can buy a gun at a gun show in Virginia. Maryland also provides guns through gunrunning into the District of Columbia.

That is why we need Federal law and Federal regulation. State by State is not enough. We want to make sure that this gap is closed, from the district adjoining mine. My district is an absolute ban on guns of any and every kind. As I speak, my district is flooded with guns of every kind. Many of those guns come from gun shows in Virginia, because anybody can buy a gun at a gun show in Virginia. Maryland also provides guns through gunrunning into the District of Columbia.

The GAO went undercover and asked for .50 caliber weapons of the kind, to use their words, that would pierce a limousine or bring down a helicopter. My friends, this is the Nation’s capital. The people who ride in limousines and helicopters are Members of Congress, the President, the Vice President, and members of the Cabinet.

What this says, of course, is that even here, someone who wanted to take out anybody from the highest official to one that is if it will not make much difference, the city or the region could buy a gun from a legitimate dealer, even telling them virtually that is what they wanted to do. Imagine what a person with a mental defect could do by going to a gun show.

We must remember that this very building was the site of the assassination of two brave Capitol policemen. That gun was shot by a schizophrenic man. At a gun show, he might easily have purchased such a weapon.

The long and short of it, my friends, is that what we have in this country is massive gunrunning across the borders, between one State and another, sometimes shipped in large numbers. The result is that in the large cities such as the one I represent, the District of Columbia, the murders take place one by one. Now in the suburbs the murders take place in groups, by massacre.

Choose your style. The difference is the same. They are all our children.

I focus for just a few minutes for the ages of the youngsters in those cases. A 15-year-old is not the same. They are all our children.

I focus for just a few minutes because of the ages of the youngsters in the last two incidents. A 15-year-old in Georgia, a 17 and an 18-year-old in Littleton. These are precisely the ages of children that could go into a gun show today in many States and purchase a weapon.

Sometimes we are told that what was passed in the Senate the other day will not make much difference, it is at the margins, why pass it? The simple answer is if it will not make much difference, then pass it. If in fact those who cherish guns think that these bills will not hurt them very much, then pass the bills. There will be some slight inconvenience to the legitimate public, but who would say that that inconvenience would not be worth it if the lives of a few children were saved?

And may I remind the House that most of the deaths we will never hear about because they are accidental deaths. We hear about the massacres, we hear about the drive-by shootings. But when these guns are kept in homes, they are most often used accidentally by family members or friends within the homes. The 15-year-old youngster broke into a locked chest to get the gun that he used in suburban Georgia last week.

The silent deaths, the accidental deaths will be reduced, and certainly the deaths that have outraged the country will be reduced if we pass the legislation that we have had forward finally from the Senate last week. That is the very least this House can do if we want to make sure that this gap never appears again in our country.

Mr. GEORGE MILLER of California. I thank very much the gentlewoman for her remarks. I want to thank my colleagues who joined me in this special order to try and urge the Republican leadership to pass this week the common sense gun safety provisions that have passed the Senate of the United States.

We do so with the full understanding that the problems and the tragedies in Littleton or in Georgia or in Oregon or in Kentucky and other such States where young people have taken up guns and assaulted and killed their classmates and their friends, that that problem will not be addressed solely with the questions of gun safety legislation. But clearly in each of these cases or most of these cases, what we find is the easy access of young children, in some cases disturbed young children, with the irresponsible possession of guns in the home.

We believe that trigger locks will help increase the margin of safety in our communities. We believe that not letting young people go into gun shows or people go into gun shows on behalf of young people and with no questions asked be able to buy a gun, a gun they could not buy if they went into a gun shop. They could not do that. They would have to undergo that check. We urge the leadership to pass these common sense gun safety measures.

I yield to the gentleman from Guam.

Mr. UNDERWOOD. Mr. Speaker, I thank the gentleman from California for yielding. I want to extend my congratulations for this excellent special order on the issue of the proliferation of guns. Even in a place as remote as Guam, which lies some 9,000 miles away from here, a couple of weeks ago a couple of young ladies in middle school were detained in school for having handguns, bringing handguns to school. Guam, the place that I come from, is a place where lots of people own weapons.

Fortunately, most people on Guam who feel that they need to own weapons are in total agreement with their registration and with their regulation, so I am happy to report that. But it appears to me that certainly the country’s supply of weapons, the availability of weapons, the easy access of weapons is really the crux of what we are getting at.
It is rather clear that the guns in and of themselves may not be causing these violent episodes that our Nation has been subjected to, but certainly the fact that the weapons are so easily available has made sometimes what would be seen as minor violent acts turn into major, major tragedies, and I cannot help but wonder where is the wisdom that is supposed to be part of the legislative body that we belong to in trying not to address this issue when it is rather obvious that this cries out for action.

As a career educator, and actually early on in my career I was what would be seen as a disciplinarian in a very large high school, and I served in that capacity for several years, one of the things that certainly would help us in trying to deal with all the issues that are at Littleton to the growth of children and the world of children inside educational institutions is to not allow them the opportunity to have things that would be harmful to them. And we think of all the things that we deny them that would be harmful to them, think of all the efforts, extraordinary efforts, that we go through to deny them things that we know are not in their own best interests, things which may lead to tragic circumstances; and yet we seem to hesitate, we seem to falter when it comes to the issue of guns.

So I certainly appreciate and I want to congratulate the work of the gentleman from California (Mr. MILLER) and all the other speakers during this special order.

Mr. GEORGE MILLER of California. Mr. Speaker, I thank the gentleman from Guam.

Finally, I just like to say, Mr. Speaker, this opportunity to talk with a group of students at Pinole Valley High School in my district and had subsequent conversations with five of those students, Brian Davenport, Marcus Maxwell, Jamian Johnson, Kari Washington and Brett Parsons about Littleton, and those students and the students in the larger group had spent a great deal of time watching the news, listening to the news on the Internet, over the networks and elsewhere, acquiring information about what took place in Littleton.

They clearly understood that this was about them, it was about their peers, it was about their generation, children of their same age, and they were terribly troubled about it, and they understood that this is not a problem that can be answered with one solution, that it is, in fact, very complex.

I was also quite pleasantly surprised, the extent to which the students understood clearly they clearly had a very strong role to play in the solution to these outbreaks of rage and the violence and the killing that have taken place in these schools, that they understood that maybe they should be nicer to some of their fellow students, that there were students who they knew were somewhat loners or did not feel a part of the academic world and these should extend themselves, they should go over and talk to them, that maybe they should stop making fun of students or characterizing students because of the way they dressed, whether they had the latest clothes or they did not have the latest clothes, or the latest sneakers, or the wrong color clothes or what have you; that they had to think about not doing that, that students should not be characterized and categorized whether or not they participate in a religious organization after school or the debate club or they were on the track team or the football team.

All of these cliques that are natural, very, very natural during the adolescent years in schools, they understood that that was unfair to those students.

They had formed, they had many celebrations of their differences at Pinole High School over the years. The day I was there, they decided to celebrate their unity, to celebrate their sameness, to celebrate the fact that they were part of one student body drawn from many different communities. It was a very exciting thing to see happen in response to Littleton.

So while we are focused on guns this evening and while we are focused on the need of the Republican leadership to expedite the consideration of these common sense gun safety measures, we also appreciate the complexity and the magnitude of this problem.

And let us not forget, let us not forget as we keep talking about children and schools and violence and killings, that very few of the mass murderers are enrolled in 20,000 schools nationwide. Eight of those youths in six schools perpetrated the school killings of the last 8 months. Twenty-five million children came and went to school every day without being subjected to this danger or perpetrating this danger. We are talking about a handful of young children.

Some people have suggested, and I think the minority whip said it this week in Salt Lake City: The problem is not guns, the problem is we are raising children to kill children.

No, we are not raising children to kill children. Twenty-five million teenagers went to school yesterday, the day before, and the day before Littleton and the day before all of these tragedies, and afterwards, and did not engage in the killing of their classmates or their friends. But a very small handful, because of the easy access and proximity and the irresponsible ownership of these firearms.

So this is not to suggest that these are children of a generation of a culture of violence and killing because it is not true. Those kinds of generalizations will cause us to miss the problem, will cause us to miss the complexity of it.

But what we do know in this particular case was these young people had relatively easy access to these guns, and what we do know is that we have that part, as my colleagues know, that part of the solution coming together in the passage of these measures that have passed the Senate.

So I think we ought to keep and we ought to understand our children, and we should not, we should not paint with the very broad brush of a recent tragedy and we ought to handfuls of children that have perpetrated this kind of violence over the last 18 months. If this was the culture of violence in this young generation, as Michael Males, who is at the School for Social Ecology at the University of California, Irvine, points out, if this was a culture of violence, if we had raised children to kill children, then these killings would not be thousands of miles apart and months apart. This is what all children would be doing.

But they are not doing it. Like all of the children before them, they are going to school to get an education, to socialize and become part of their community, to grow up and to mature and decide what they are going to do with their lives. Their parents did not raise them to kill children.

But some parents unfortunately have been very irresponsible about leaving loaded guns and leaving firearms around, easily accessible to their children, apparently have not had the kind of communication imposed upon their children the kind of discipline I grew up with about a gun.

I hunted, my father hunted, my children hunt. We have very, very strict rules about when one can touch a gun and when they cannot touch a gun and what to do with a gun in the home and what to do with the gun in the field.

Now some parents apparently have not been able to convey that or not willing to convey that or do not understand the kind of risk. We have got to deal with the questions of that kind of parental irresponsibility and in placing some responsibility and liability on those who fail to be the proper custodians of their children and of these firearms.

Mr. WU. Mr. Speaker, the tragedy at Columbine was heartbreaking for all Americans, but it was particularly difficult for the people in my home state of Oregon, where we endured a similar tragedy just one year ago at Thurston High School in Springfield.
May 24, 1999

CONGRESSIONAL RECORD—HOUSE

Mr. WELDON of Pennsylvania. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. Speaker, I ask that all Members have 5 legislative days within which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore (Mr. SIMPSON). Is there objection to the request of the gentleman from California?

There was no objection.

CLINTON ADMINISTRATION CREATING PERCEPTION THAT ALL IS WELL IN THE WORLD

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 6, 1999, the gentleman from Pennsylvania (Mr. WELDON) is recognized for 60 minutes as the designee of the majority leader.

Mr. WELDON of Pennsylvania. Mr. Speaker, we can only spin national security issues and concerns so long, and eventually the truth catches up to us. The truth is about to hit the fan this week in Washington on the national security concerns of this country.

For 7 years, Mr. Speaker, we have heard the rhetoric coming from the White House that the world is safe, there are no problems, our security is intact, and therefore, we can dramatically cut the size of our defense forces and we can, in fact, shift that money over to other purposes.

During the 7 years that that has occurred, Democrats and Republicans alike in this body and the other body have joined together to constantly remind the administration that things were not quite as good as they were being portrayed to the American people.

Unfortunately, we were not as successful as we would have liked. In fact, Mr. Speaker, State of the Union speech after State of the Union speech the President would stand before the American people and would talk about the economy, would talk about jobs, would talk about crimes domestically, but no mention of national security concerns. In fact, Mr. Speaker, this past January, as I sat through the State of the Union speech in this very room, I timed the President’s speech. He spoke for 1 hour and 17 minutes. The total amount of time he devoted to national security was 90 seconds, 90 seconds to talk about the problems we have with our relationship with China, 90 seconds to talk about the problems that are resulting from the economic instability in Russia, 90 seconds to talk about the proliferation that has now caused Iran and Iraq and Syria and Libya to begin to develop medium- and eventually long-range missile systems, 90 seconds to talk about the sabre-rattling between India and Pakistan, 90 seconds to talk about the problems with North Korea, both our nuclear development program and their testing of long-range missiles which the CIA acknowledges now for the first time ever can actually hit the mainland of the U.S.

In fact, Mr. Speaker, during those 90 seconds, all the President did was point up to the gallery and praise one of our young pilots.

Mr. Speaker, support for our military is not when the commander in chief parades a group of soldiers down the White House lawn for a photo op, it is not when the commander in chief stands on the deck of an aircraft carrier and talks about the pride in our services while morale is reaching an all-time low. We have serious problems, Mr. Speaker, and this week, starting tomorrow, those problems are going to be made available for the American people to see for themselves.

Now, as I said earlier, Mr. Speaker, we are aware that this administration has tried to create the perception, and with a great deal of success, that everything is okay in the world, all is safe, Russia is our new friend, China is our new friend and partner, we do not have to worry about the Balkans because we have got our troops deployed.

In fact, Mr. Speaker, what has been occurring over the past 7 years with the strong concerns expressed by both Democrats and Republicans alike in this body is that we have committed our troops to too many places in a short period of time to be effective in
modernizing for the future and in protecting America's vital interests around the world.

I have used this comparison frequently, Mr. Speaker, and I want to use it again:

In the time period from the end of World War II until 1991, during the administration of all those Presidents in between, Mr. Speaker, excluding Harry Truman through Democrat and Republican administrations ending with George Bush, all of those commanders in chief, as they have the ability to under our Constitution, deployed our troops a total of 10 times, 10 times at home and around the world. Some of those deployments were very serious, like Korea and Vietnam and Desert Storm.

Since 1991, Mr. Speaker, our current commander in chief has deployed our troops 33 times, 33 times in 8 years versus 10 times in 40 years. Mr. Speaker, none of these deployments were paid for, none of them were budgeted for, none of these deployments had the administration asking the Congress to vote in support of the deployment before our troops were committed.

In the case of Bosnia, it was not that this Congress is isolationist. Nothing could be further from the truth. The problem in this Congress among Democrats and Republicans was why was America putting 36,000 troops into Bosnia when, for instance, Germany right next door, our friend and ally, was only committing 4,000 troops? It was a question of fairness. Why was America being asked in each of these 33 deployments to pick up an unusually large amount of the responsibility?

In Kosovo today, when we see the nightly news of the bombing raids the previous night, we see U.S. and British planes conducting the bulk of those air strikes, as it was sanctioned by NATO's candidate, the U.S. is only supposed to provide 22 percent of the support for NATO.

May 24, 1999

CONGRESSIONAL RECORD—HOUSE

So Members of Congress rightfully ask the question, where are the other NATO allies? Why is not Europe playing a larger role in these kinds of operations?

In fact, Mr. Speaker, that was the reason why we passed the supplemental bill several weeks ago and just last week approved the defense authorization bill, calling for increases in funding to partially replace the funds that were siphoned off to pay for these 33 deployments, none of which were budgeted for.

When the President would commit our troops to, say, Bosnia or to Haiti, we would then have to find the money in our defense budget, taking it from other programs or from quality of life issues for the troops to pay the costs of these operations. The comptroller of the Pentagon estimates that that cost us $19 billion over the past 7 years. In fact, Bosnia alone has already cost us close to $10 billion. At a time where we have been convinced that the world is safer, and our troops are today at this time deployed all over the world, we have decimated our ability to prepare for the future in our military.

Some other things have occurred, Mr. Speaker, and I want to talk about them briefly.

First of all, this President, working along with Tony Blair from Great Britain, decided it was in the best interest of the U.S. and Britain, along with our NATO allies. And make no mistake about it, the bulk of NATO is decided by our President and Tony Blair, NATO really is dependent upon the leadership of the U.S. and Britain. I do not think Luxembourg would have much of a chance in stopping America from doing anything it wanted in terms of NATO.

The decision to go into Kosovo was one that required the debate and the consent of this body, but that was not to be.

In fact, Mr. Speaker, hindsight always being 20-20 we can now look back, as I have, and talk to some of our analysts in the intelligence operation, which I have. In fact, Mr. Speaker, I have learned that every CIA Balkan analyst in the CIA, every one of them, unanimously agree that an aerial attack on Serbia and Kosovo would not stop ethnic cleansing.

The CIA, for all of its faults, and I have as troubled by the bombing of the Chinese Embassy as anyone, but the CIA's analysts who are the experts on the Balkans told this administration that the bombing that we eventually got involved in would cause a massive problem of refugees. The CIA Balkan analysts told the administration that the bombing that they would be doing, would not stop the ethnic cleansing.

All of this was done prior to the administration's decision. In fact, there were documents internally within the intelligence community, submitted to the administration, outlining the CIA's concern that if the bombing took place it would cause a humanitarian catastrophe, and that is exactly what has happened. It is far worse than just the humanitarian catastrophe.

In fact, many of those analysts said that we actually contributed to the refugee crisis because when we bombed, it obviously caused the observers who were in the former Yugoslavia to leave that country, which then gave Milosevic a free hand to continue at a much higher level the ethnic cleansing and the significant attacks on innocent people.

So in effect, Mr. Speaker, what the intelligence community was saying to us was that our position to conduct the aerial campaign, was that if we went ahead, we would cause the situation to become much worse. That is exactly what has occurred.

We are now into our 60-something day of consecutive bombing and many in this body, having seen the fact that we have the ability to pay for the Kosovo deployment, which is now in excess of probably $2 billion, are now wondering what our strategy is to stop the bombing, what is our strategy to end the crisis. Since many of our colleagues, including myself, do not feel that we have a legitimate strategy to end the conflict, we wonder what the strategy is to win the conflict, because we are controlling what our military can and cannot do in Kosovo, in Serbia.

We are limiting the strikes. We never committed to a ground force. So the question we have to ask is, if we do not have a strategy to end the conflict, and if we do not have a strategy to win the this country really is evil, so why? For many of us, there is no strategy, Mr. Speaker. It is just a continuing massive amount of aerial attacks that in many cases are harming innocent civilians.

Now, let me add further, Mr. Speaker, if we have to look at the situation in the former Yugoslavia and see what we have done, we can look certainly at three different things. We have now rallied all of the people in Serbia, many of whom were against Milosevic, many of whom are ready to try to remove him forcefully, we have managed to rally all of them in support of Milosevic as their hero.

We have managed to help cause an extensive increase in the refugee crisis, to the extent now that we have almost 1 million men and women and children in outlying regions around Kosovo, with no decent housing and no decent food and no timetable to return them to their country.

We have done something else, Mr. Speaker. We have managed to do what one colleague of mine from the Russian Duma told me the Soviet communist party could not accomplish in 70 years, after expending billions of dollars, to convince the Russian people that America was evil, that we really were designed as a nation to hurt innocent people. He said Russians are now convinced, after some 55 days of bombing, which it was when he was here, that the U.S. is a nation to hurt innocent people. He said Russia has now convinced, after some 55 days of bombing, what it is they have managed to do in 55 days what the Soviet communist party could not accomplish in Russia in 70 years.

Mr. Speaker, we are doing ourselves long-term harm in our relationship with Russia. First of all, after starting the aerial campaign, we did not engage Russia. Now the administration would have us believe otherwise. There was no direct contact with Russia after Rambouillet until, in fact, a group of Russian parliamentarians contacted us in the Congress and said: You do not understand what you are doing. You are driving our party out of power. We who support strong relations
with America, we who want to help you solve the proliferation problem in our country, we who want to get rid of the communists and the ultranationalists are being driven out because your policies in the Balkans are causing the Russian people to identify with the communists and the ultranationalists.

When the elections are held this year, if you continue this policy, you are going to drive Russia back into a Cold War era like we saw in the Soviet days.

Our policies in the Balkans are very much of a concern to me, not just because of the crisis being created with the Serbs and with the Kosovars and the refugees, but also because of the long-term implications in our relationship with Russia.

Now, make no mistake about it. Mr. Speaker. I like all of our colleagues in this body, I abhor what Milosevic has done. He is a thug. He is a war criminal, and after this is over we need to proceed in convening a war crimes tribunal.

Our policies, Mr. Speaker, have not succeeded either. We need to have this administration understand that continuing a mistake is worse than trying to find an honorable solution. We have that opportunity.

As I said on this floor several times, 11 Members of this body, 5 Democrats and 6 Republicans, attempted to find common ground with members of the Russian Duma 2 weeks ago in Vienna. We found that common ground. In fact, the agreement that we reached became the basis for the G-8 accord that came out 5 days later, which the U.S. was a signatory of.

That agreement calls for a negotiated settlement along the lines of the five key NATO principles that our President said were most important for us. Now is the time for us to use the leverage that we have and our NATO partners have and Russia has to convince Milosevic that he must come to the negotiating table on our terms.

I am not convinced our administration is still at this very moment doing enough to engage the Russians in applying the appropriate pressure to Milosevic.

Mr. Speaker, the agreement that we reached in Vienna we brought back to Washington, we faxed to the 19 parliaments of all the NATO countries and we asked them to apply pressure to their governments, not to cave into Milosevic, not to hand him a victory but to say now is the time to use our leverage to get this crisis done at the negotiating table, which I am firmly convinced can occur.

In fact, Mr. Speaker, we introduced a resolution in support of our framework agreement in the Congress last week and held a congressional hearing in the Committee on International Relations last week on that resolution. The Duma, following our lead, did the same, and on Friday of last week the State Duma of the Russian Federation passed that document as a formal document in the State Duma.

We are now asking our leadership to work with us to accomplish a similar task, not because we are trying to embarrass the administration but because we understand the urgency of solving this crisis before any more lives are lost, before any more ethnic cleansing is done, before any more Americans are placed in harm's way. Now is the time for this administration to stand up and do what is right, and that is to bring Milosevic to the table and to do it directly, and to use the Russian leverage, which is considerable, in having Milosevic agree to the terms that we laid out with our NATO friends. This disaster is having a terrible effect on our long-term relationship with Russia.

Mr. Speaker, we were supposed to have on Thursday of this week the Russian parliamentarians come back to Washington for a public press announcement in support of the work that we are doing. Because of the press of business and the fact that we will break for the Memorial Day recess this week, they will be coming back the first full week in June.

Something else will happen tomorrow, Mr. Speaker. Two things of significant importance to all of our colleagues, which I hope our colleagues will convey to every constituent all across America. The first is, between 4:00 and 6:30 we will host probably one of the most investigative reporters on security issues in this city at a book signing ceremony in EF-100 of the U.S. Capitol building. Bill Gertz, who writes for the Washington Times, will be here to unveil to Members of Congress and our staff his book entitled "Betrayal."

Every Member of Congress should read this book. In fact, it has hit the bestseller list in just the first week it was released, and an analysis of this spin doctors, which I hope our colleagues will send to us, his book entitled "Betrayal."

That book documents these stories, Mr. Speaker, and I would encourage our colleagues to stop by EF-100

Mr. Speaker, as my colleagues know, I am someone who spends a lot of time working on improving relations with Russia, but with Russian we have to understand one very basic tenet that Ronald Reagan knew very well. We must deal with the Russians from a position of strength, consistency and candor. When we are not candid with the Russians, when we do not call them when they violate treaties, when we do not ask them about things like Yamantau Mountain in the Urals where they are spending billions of dollars on a huge underground complex that we just do not know the purpose of, the Russians lose respect for us.

That is the problem this administration has with Russia. We were so concerned with not embarrassing Boris Yeltsin that we forgot over the past seven years that Russia had to be held accountable for things it did that were in violation of arms control regimes, that were things that destabilized our relationship, and we are now paying the price for those policies.

A second chapter in Mr. Gertz's book deals with a letter that, up until this book, has been classified. The letter was sent and signed by President Bill Clinton to President Boris Yeltsin. Mr. Speaker, every one of our colleagues needs to read this letter because in the letter our President tells President Yeltsin, "Don't worry. Our policies will help you in your reelection effort."

We were so concerned about not doing anything to expose Russian problems for what they were that we even went to the length of ignoring reality. When the Russians transferred technology to Iran for the SHAHAB-3 missile, we ignored it. When we caught the Russians transferring accelerometers and gyroscopes to Iran for the SHAHAB-3 missile, we ignored it. When we ignored the Russians transferring technology to Iran for the SHAHAB-3 missile, we ignored it. We were afraid to do anything to expose violations because we did not want to embarrass President Yeltsin.

We are now paying the price for those policies, Mr. Speaker, and our national security has been harmed because of the absolutely overwhelming proliferation that has gone out from Russia to every destabilized country in the world, technology being used for missile proliferation, weapons of mass destruction, because we did not want to hold the Russians accountable for violations and for their lack of tight controls in terms of technology that could be used abroad. We are now paying the price for those policies, and Russia is a much more destabilized nation.

Now, because of the Kosovo conflict, we are backing Russia into a corner, and the pro-western leaders in Russia are saying we are going to hand Russia over to the Communists and the ultranationalists if we do not get our policy back together.

The Gertz book documents these stories, Mr. Speaker, and I would encourage our colleagues to stop by EF-100.
tomorrow between 4 o’clock and 6:30 to meet Bill Gertz personally and get a copy of his book and to read for themselves.

In fact, I saw an article last week that the FBI may be considering actually pressing charges against Gertz for some of the revelations that he has exposed. It is an absolute shame and outrage when, in America, we have to have a reporter for a newspaper expose us information that Members of Congress and the public should have a legitimate right to understand and know.

It reminds me of that famous national intelligence estimate that this administration spun out four years ago when the President said we have no need to worry about any long-range missiles hitting America for at least 15 years, when the CIA publicly put that document out, it developed a document that said that North Korea has a long-range ICBM today. That is the kind of spin that this administration has placed on national security issues for seven years, but now it is about to unfold.

Also tomorrow, Mr. Speaker, at 10:30 in the morning the gentleman from California (Mr. Cox) and the gentleman from Washington (Mr. Dicks) and nine members in total of the Cox committee, the Select Committee to look at technology transfer from the U.S. to China, which I was honored to be a member of, will issue our public statement.

For five months, Mr. Speaker, we have tried to get the administration to declassify the Select Committee report, and for five months we have been stonewalled. Nine Members of Congress, five Republicans and four Democrats, very honorable people, met behind closed doors all during the breaks, all during the holidays from July through January 1 and 2 of this year.

Behind closed doors we interfaced with the FBI, the CIA, the Defense Intelligence Agency. We held hearings, we called witnesses in, and we said nothing on the record. In a bipartisan way we developed a document that said that that document to veto our defense bill. Three years later, after tremendous pressure from many of us in this room from both sides of the aisle, the CIA has now publicly reversed itself and has said that North Korea has a long-range ICBM today.

But what did the administration do? They tried to spin it: ‘‘We will leak the story about the W–88 because of the press feed on that, and they will think that is what the China Select Committee looked at, and that was done during a Republican administration,’’ and as the administration tried to say, ‘‘Well, we corrected those problems.’’ That was their initial spin.

Then they went to the business community and they said, ‘‘You have to understand what the Select Committee is doing. They aren’t ready to come to a final report that is going to lay all the blame at the feet of American industry,’’ and that was not the case and is not the case, Mr. Speaker. In fact, I am going to publicly say tomorrow, as I am saying tonight, that while there were some cases where American companies went too far, and there are criminal investigations of at least two of those companies under way right now, the bulk of the time American companies have done the right thing. They have wanted to abide by the law.

Now, the law has been changing. The regulations have changed. But it was not for us to blame only industry.

Mr. Speaker, the administration would also have some believe, through its spin efforts, that it is all the fault of China, and China is this bad country that has been able to use espionage to get access to technology that they should never have gotten access to. And in some cases, that is the story. We are careful about that with the story on our laboratories.

But, Mr. Speaker, how can we blame a country like China for buying technology if we as a Nation voluntarily allow that technology to be sold abroad? That is what has occurred over the past seven years. We allowed technology that should not have been on the marketplace.

With its 32 recommendations, all of which were classified, and with the volumes of data we had assembled, we then went to the administration and we asked the administration to look at our recommendations, to come back to us and begin a dialogue of how to protect our Nation’s security.

What did the administration do? Mr. Speaker, as they have done for seven years, they spun America’s national security. Instead of dealing with it up front, putting the report on the table, they leaked stories out.

One story that was leaked to the Wall Street Journal by the administration dealt with the Chinese acquiring our W–88 missile technology, or our nuclear warhead technology, not missile technology. And the reason why that was leaked is because that leakage occurred during a Republican administration.

Now, I can tell my colleagues that the members of the Select Committee, both Democrats and Republicans, were not looking at what administration was responsible for security breaches. We did not care whether it was Clinton, Bush, Reagan, Carter, whomever. Our job was to do the right thing for America.

But what did the administration do? They tried to spin it: ‘‘We will leak the story about the W–88 because of the press feed on that, and they will think that is what the China Select Committee looked at, and that was done during a Republican administration,’’ and as the administration tried to say, ‘‘Well, we corrected those problems.’’ That was their initial spin.

Then they went to the business community and they said, ‘‘You have to understand what the Select Committee is doing. They aren’t ready to come to a final report that is going to lay all the blame at the feet of American industry,’’ and that was not the case and is not the case, Mr. Speaker. In fact, I am going to publicly say tomorrow, as I am saying tonight, that while there were some cases where American companies went too far, and there are criminal investigations of at least two of those companies under way right now, the bulk of the time American companies have done the right thing. They have wanted to abide by the law.

Now, the law has been changing. The regulations have changed. But it was not for us to blame only industry.

Mr. Speaker, the administration would also have some believe, through its spin efforts, that it is all the fault of China, and China is this bad country that has been able to use espionage to get access to technology that they should never have gotten access to. And in some cases, that is the story. We are careful about that with the story on our laboratories.

But, Mr. Speaker, how can we blame a country like China for buying technology if we as a Nation voluntarily allow that technology to be sold abroad? That is what has occurred over the past seven years. We allowed technology that should not have been on the marketplace.
leader for our country. In that report we made 32 recommendations for changes, but we also reached a very simple and extremely obvious conclusion, and that conclusion, Mr. Tenet, you know is that America’s national security has been harmed in a significant way by technology transfers to China." I asked Mr. Tenet, "Do you agree with that assessment that the nine of us reached unanimously?"

This was his answer, Mr. Speaker, two days after Sandy Berger gave the media an unclassified response to our recommendations. George Tenet said, "Mr. Congressman, can I get back to you? I have not finished reading the report yet."

So here was the White House on February 1 issuing to selected media outlets unclassified response to a report that 32 of us had written. The Director of Intelligence two days later said he had not finished reading yet.

Mr. Speaker, that is why we have problems with our national security. Tomorrow, the American people get to see if they can believe what is being said. They get to hear about the warheads and the technology that we have lost. They get to hear about the neutron bomb. They get to hear about technology involving our space launch capability. They get to hear about the MRVing nuclear warhead. They get to hear about military-industrial technology, high-performance computers.

They get to hear about all of these things, and in the end, the administration is going to try to blame someone. They are either going to try to find a scapegoat within the administration who they can say caused these problems, as they are currently trying to do in the Department of Energy, trying to blame the labs, when some of the labs were doing an adequate job but others were not; or they are going to try to blame someone up in the Cabinet who can be the fall guy or gal who takes the blame for what has occurred.

In the end, Mr. Speaker, I am convinced that the blame for our security lapses, as Harry Truman said, started at the top where the buck stops. The administration sets the policy.

Now, some would say, well, the President cannot know everything, and this is true. Some of my CIA friends have told me that this is one of the first Presidents since Eisenhower who never sees the CIA’s morning brief. He never receives the morning brief provided to him. What the CIA analysts that I have talked to say is that they think that what Clinton gets is filtered through Madeleine Albright and Sandy Berger.

Mr. Speaker, this is going to be a bad week in the history of America. The Kosovo crisis continues; Russia is being backed into a corner, to the point where they are now very antagonistic toward America; Bill Gertz comes out with a book called ‘Betrayal’ and writes about specific events that have occurred that have undermined our national security; and tomorrow, a select group involving nine Members of Congress, five Republicans and four Democrats, present a non-classified report and findings of what we found, that our national security has been harmed by our sale and transfer of technology to China.

Many Members are going to use this as a platform to jump all over China and blame the Chinese and say they are an evil nation. I am going to be one, Mr. Speaker, that stands up and says, let us pause a moment.

We need to engage China. Has China done some things that are wrong? Yes. We must deal with them. Does this mean we should isolate ourselves from China and consider all Chinese to be bad people? I don’t believe in that. In the end, Mr. Speaker. I am convinced that the bulk of the problems that we uncovered were caused by our own government. If we are stupid enough to allow another nation to buy sensitive technologies, then we cannot blame that nation. We blame our own policies that caused those technologies to be allowed to be sold for the first time.

In our testimony and in public statements that have been on the record, so I am not revealing any sensitive information, the first director of our Defense Technology Agency called DTS&A, whose responsibility it was to monitor applications for technology sales abroad, and which was decimated during this administration, Steve Brian, is on record as saying that we allowed Chinese entities to acquire technology. None. These are the high end supercomputers, high-performance computers in the 8 to 10,000 MTOPS range, very capable computers that are only used for very elaborate research or for weapons design. China had none.

Only two countries were manufacturing those high performance computers at that time, the United States and Japan, and both of our countries had an understanding that neither would sell those high performance computers to those nations which were, or could become potential adversaries of the U.S.

We relaxed our policy on exporting high performance computers. Mr. Speaker, and in two years, by 1998, China had acquired over 350 high performance computers.

Now, we were told the State Department would monitor where they were being used, but they did not do that, because China would not let our State Department monitor where these computers went. We know now that many of them are being used by organs of the People’s Liberation Army. They are being used for weapons design, they are being used for their nuclear programs, and those devices came from this country.

Mr. Speaker, China did not steal those high performance computers; they bought them because we changed our policies. We allowed Chinese entities, technologies that up until the mid-1990s had been tightly controlled and monitored by those people who are watching out for our security concerns, now and in the 21st Century.

Mr. Speaker, by Thursday of this week I expect to unveil two new documents, documents which I have been working on with a small group of people for the past four months. These two documents will not just focus on the China Select Committee, but will go beyond that.

By Thursday of this week, it is my hope, if the graphic artists have completed the work, which I expect they will, present them to you, and present two, if you will, the visual presentation of what has happened in terms of technology transfer to China.

The first chart, Mr. Speaker, which I have a rough sketch of, will trace every company and operative arm of the People’s Liberation Army that tried to acquire and did acquire technology in America, who the leaders were, what their ties are and were, and how they were able to get the approval to buy technology that is very sensitive and is being used by the Chinese military today, most of it with the support of our government.

The second chart, Mr. Speaker, will be a depiction of a time-line, starting in 1993 and running through 1999. It will take every major technology area of concern that we have, encryption, high performance computers, military-industrial technology, space launch capability, nuclear weapons, which was decimated during this administration, and list specific dates when actions took place in this administration to allow those technologies to be transferred. Almost all of those actions were done voluntarily by our country.

Mr. Speaker, in the end we have got to understand that we are now going to begin to pay the price for 7 years of gloating over our economy, 7 years of pretending Russia and China were not potential problems, and rather than being up front and candid and transparent with Russia and China, we glossed over problems. We pretended things were not happening. We told Yeltsin we would help him get reelected. We did not want to offend Jiang Zemin. In doing that, we gave away technology that America is going to have to deal with for the next 50 years.

Mr. Speaker, this is not a partisan issue. Democrats and Republicans in
As I have said before, there are companies that deserve to be investigated, and two are under criminal investigation right now. But I would hope tomorrow and for the rest of this week as we get ready to celebrate the Memorial Day holiday, that we can step back and begin to seriously consider our national security.

It has not been a high focus for the past 7 years. We have been lulled into a false sense of complacency. The economy is going strong, people are working, inflation is low, unemployment is low, and we have been convinced that the world is safe. Now, all of a sudden, we wake up and see Russia backed into a corner, China involved in technologies that we never thought they should have, North Korea deploying long and short range missiles that now threaten not just our territories, but the mainland of the U.S., Iran-Iraq developing medium range systems with the help of Pakistan, and Pakistan saber rattling with nuclear warheads and medium-range missiles.

Where did they get the weapons from, Mr. Speaker? Where? We saw China supplying Pakistan with the M-11 missiles. We saw China supplying Pakistan with ring magnets. We saw China supplying Pakistan with the technology for the nuclear furnaces. We saw Russia supplying India with technology. Why are we surprised? All of a sudden we come with the realization, we have problems in the world, and we have not dealt with those problems in a fair, open and honest way, in spite of tremendous efforts by Republicans and Democrats in this body and the other body.

It is time to end the spin, Mr. Speaker. It is time for this administration to end the nauseating spin, the spin doctors at the White House who want to spin everything, to make it look as if they have no role to play, just as they did when they lost the Congressional elections and did not want to accept any responsibility in the White House. It was all the fault of those Members of Congress who were out of touch.

It is about time this administration and this President understand that once in awhile he needs to accept the responsibility for his actions and the collective actions of this administration.

ASIAN PACIFIC AMERICAN HERITAGE MONTH

The SPEAKER pro tempore (Mr. SIMPSON). Under the Speaker's announced policy of January 6, 1999, the gentleman from Guam (Mr. UNDERWOOD) is recognized for 60 minutes.

Mr. UNDERWOOD. Mr. Speaker, I appreciate the opportunity to share with the American people and the Members of the House a special order on Asian Pacific American Heritage Month.

As many people know, and it is being widely celebrated in various communities throughout the Nation, May of every year is Asian Pacific American Heritage Month. I want to thank the previous speaker for making a clear distinction between some of the problems and some of the issues concerning espionage and some of the security issues that we are currently experiencing. Mr. Weldon certainly is one of the body's leading experts on national security, and I serve with him on the Committee on Armed Services, and while we may not fully agree on some of the interpretations given to some of the challenges we face, we are certainly unanimous in the sense that all of this discussion should stay clear of any kind of aspersions cast upon the Asian-American community.

The chairman of the Asian Pacific American Caucus for the 106th Congress, it is my privilege and honor to try to bring to the attention of the body and the attention of the American people the multifaceted contributions of the Asian Pacific American community to American life and society.

As members of the Congressional Asian Pacific American Caucus tonight, my colleagues that will participate and I will use this opportunity to honor, remember and celebrate the Asian and Pacific Islander Americans in our country.

In fact, it is important to note that over 65 Congressional districts have a population of at least 5 percent Asian Pacific Americans, and some 28 Congressional districts have over 10 percent Asian Pacific Americans in their home areas.

The history of APA month dates back to some legislation introduced by former Representative Frank Horton from New York in 1978 establishing Asian Pacific American Heritage Week to draw attention to the contributions and to the conditions of this growing part of the American population. In 1990 the week was extended to a month, and it was not until 1992 that legislation was actually passed to make APA month a permanent occasion during the month of May.

This is supposed to be the time that America recognizes the heritage that the many communities which actually make up the rubric of Asian Pacific America bring to the cultural complex of America, and it is a very complex contribution, and a series of actually many heritages.

I am a Pacific Islander, and with us today are the gentleman from American Samoa (Mr. FALEOMAVARGA) a Pacific Islander, and Mr. Wu, a freshman member from Oregon, who is of Chinese ancestry. We represent a wide variety of cultures and civilizations. Actually the area that we draw off account for over half of the world's population. These multiple heritages range from
The ancient civilizations of the Indian subcontinent and China, to the island Pacific, from Japan, Korea, Vietnam and the Philippines. We add our customs and traditions to the beautiful tapestry which makes up American life.

This diversity is good for America. Sometimes we think of minority groups, minority communities as somehow areas of problems to resolve, that there is always some dimension of them that invites solutions to some preceding problem.

I want to happily acknowledge that, as Pacific Americans, indeed all Americans of all races and all ethnic backgrounds should be proud of who they are and the unselfish contributions that they have made to America's social fabric.

Despite the diversity of the backgrounds that make up the Asian Pacific American community, we are united by a characteristic concern for family, for making sure that we protect and nurture each other, those in our immediate once commonly referred to as nuclear family, as well as in our extended family, whether in education, in business, and just about everything in life, we are working hard not only for ourselves, but for our families, and making sure they get better opportunities and encouraging our young people while we pay attention to our elders.

This concern for family across generations I think is characteristic, good strong characteristic of all of the communities which make up Asian Pacific America, and it is something that we proudly wish to share with the rest of America.

This is the month where we can call attention to the best of our community and to demonstrate to Washington and to the Nation that Asian Pacific Americans are making their mark and making their contributions in all segments of society.

There are people like Vera Wang and Josie Natori, both fashion designers who are internationally renowned for their creations. There are entrepreneurs like Jerry Yang, founder of Yahoo, Incorporated, and Robert Nakasone, president and chief executive officer of Toys "R" Us. We also shine in the education field.

Dr. Chang-Lin Tien is the former chancellor of U.C. Berkeley and has made many outstanding contributions to the field of scientific research and journal publications and government consultation.

In the field of the arts, we have performers like Yo-Yo Ma, a cellist with the Boston Symphony Orchestra who dazzles us with his artistry and has some 12 Grammy awards to his name.

We also have actresses like Ming Na-Wen, who not only starred in critically acclaimed movies such as the "Joy Luck Club," but also lent her voice to the famous animated musical "Mulan." In the area of government, we have outstanding civil leaders such as Bill Lann Lee, acting attorney general for civil rights, who has led our Nation's fight for equal opportunity for the past year and a half and has done an outstanding job.

In our armed forces, we have General Eric Shinseki, current Vice Chief of Staff for the U.S. Army, who has had 33 years of military service, won numerous awards, and has recently been nominated to the post of Chief of Staff for the U.S. Army, which would make him the highest ranking officer in the U.S. Army, certainly the highest ranking officer of Asian Pacific American ancestry to rise to that position in our country's history.

In the scientific field, we have innovative doctors such as Dr. David Ho, Times Magazine's 1996 Man of the Year. He has done his ground-breaking research on HIV and AIDS, and he is currently the scientific director of the world's largest independent AIDS research laboratory.

Kalpana Chawla, on the other hand, is renowned in her work on the 1997 Columbia Space Shuttle mission. She is the first East Indian American who has traveled to space.

In the media, we are graced with such talented television journalists as Ann Curry, a two-time Emmy award winning anchor, and she has joined the cast of "NBC Dateline" and the highly popular national morning news show, "The Today Show."

Michelle Kwan's artistry and elegance on the ice have demonstrated to us just how far determination and dedication can take us. On the other hand, the grace of Michelle Kwan is balanced by the grit and force of Junior Seau. American Samoan by ancestry, Junior is a football player with the San Diego Chargers, has been voted for six consecutive Pro-Bowls and was named 1994 NFL line player of the year.

We have, of course, the gentleman from American Samoa (Mr. FALEOMAVAEGA), who, despite the size of his congressional district, has more players in the NFL than probably any six other congressional districts combined. So I am sure he will tell us a little bit more about that.

Of course we have in politics, we have not as many as we would like, but we certainly have a number of them.

Mr. Speaker, I yield to Vice Chair of the Asian Pacific American Caucus, the gentleman from Oregon (Mr. Wu), who has recently been featured in a very complimentary article in A Magazine, which is a national Asian magazine. I want to congratulate him for that. He has a number of issues to share. I was certainly glad that he has come to this House to grace us with his presence.

Mr. Wu. Mr. Speaker, I thank the gentleman from Guam (Mr. UNDERWOOD) foryielding to me.

It is a special pleasure for me to stand here in honor of Asian Pacific American Heritage Month. I am proud to serve as the Vice Chair of the Congressional Asian Pacific American Caucus, and it is my great privilege to stand on the floor of this House as the first Chinese American to serve in this body in the 220-year history of this country.

We all have our small footnotes in history, but I try to keep a touch of humor, and in this town maybe even tougher, a touch of humility about what happens around here. I would like to share a little story that happened right here in this Chamber. The story is only slightly humorous, but perhaps more importantly, it helps illustrate the point which I would like to make tonight.

When I was younger, I attended one year of medical school, and sometime during the fall of that year decided that I wanted to leave medical school to make a broader difference. When I called home to share that with my father, he just said that he was not pleased. He was not pleased at all.

During the next year, when I took a leave of absence and worked for a while, I received a stream of articles, newspaper articles from my parents, from my dad in particular, and it was all about doctors, doctors who were doing wonderful things in impoverished neighborhoods, really working in communities where they were needed. It was also about lawyers and those articles about ambulance-chasing lawyers who were up to no good. My father was really, really hoping, I think, that I would go back to medical school.

Now fast forward 20 years, and I was sitting just about there on this floor. It was July of this year. I was about to be sworn in as a Member of Congress, probably the proudest day of my life. My parents were sitting right up there. My wife was somewhere over here. My in-laws were somewhere over here, and I could not see them.

But I could see my father. As I looked up at him, I could not help but think, I wonder if he still wishes that I graduated from medical school?

I am telling that story because I think that it is something very positive in our community, that we have a lot of people who have become prosperous, who are engineers, who are scientists, who are business owners, but very few people who have gone on to fields like law and politics.

But I am proud to say that there is a movement afoot across America, and I am proud to report to the House tonight that there is a very positive trend occurring in Asian American communities. Gordon Conwell, Max Inge in New York City, Barry Chang, whom I just visited in California, Silicon Valley, Charlie Woo, who is visiting in Washington today...
but who is starting a movement in Los Angeles, and other places like my home in Portland, Oregon, from Chicago to Washington D.C., where Asian Americans are recognizing the importance of encouraging the next generation to branch out, to branch out from the traditional professions like science, like engineering, as good as those professions are, from dentistry, from medicine, into new fields like art or journalism or law or even politics.

I believe that it is vitally important for Asian Americans to participate in the political process. We often hear complaints about not being fairly treated in the media or in other public bodies. But I submit to my colleagues that the only way to make a truly lasting and positive and constructive difference is to get involved and to stay involved, to become part of shaping the dialogue and influencing the process ourselves.

That is what is happening across the Nation today, to do what groups across America are doing to continue to insist in our generation and the next the importance of taking school seriously, and not just taking school seriously but taking participation in the political process seriously, to pass on to our young folks what we have learned from our lives and the lives of our parents: that the opportunity to participate in the American dream is a gift of the American spirit, and that we should not let any part of this gift slip away. We must fully participate in the process.

I am grateful every day to share in that process. I do my job each and every day with the faith that we are serving a larger process. We all need to participate as Americans. This is the message being brought to other Asian Americans, to urge them to get involved and to stay involved.

Each new immigrant group that comes to America has learned, sometimes the hard way, that to be a voice in the political process seriously, to pass on to our young folks what we have learned from our lives and the lives of our parents: that the opportunity to participate in the American dream is a gift of the American spirit, and that we should not let any part of this gift slip away.

We as Asian Americans are clearly in the early formative stages of political participation. Like every other group that has come to America before us, so many sacrifices have been made and so many sacrifices are still in our generation and the next the importance of taking school seriously, and not just taking school seriously but taking participation in the political process seriously, to pass on to our young folks what we have learned from our lives and the lives of our parents: that the opportunity to participate in the American dream is a gift of the American spirit, and that we should not let any part of this gift slip away. We must fully participate in the process.

I am grateful every day to share in that process. I do my job each and every day with the faith that we are serving a larger process. We all need to participate as Americans. This is the message being brought to other Asian Americans, to urge them to get involved and to stay involved.

Each new immigrant group that comes to America has learned, sometimes the hard way, that to be a voice in the political process seriously, to pass on to our young folks what we have learned from our lives and the lives of our parents: that the opportunity to participate in the American dream is a gift of the American spirit, and that we should not let any part of this gift slip away. We must fully participate in the process.

I am grateful every day to share in that process. I do my job each and every day with the faith that we are serving a larger process. We all need to participate as Americans. This is the message being brought to other Asian Americans, to urge them to get involved and to stay involved.

We must fully participate in the process.
duty and retired military personnel and their families. I thank them for my visit to Fort Knox.

Last but not least, Mr. Speaker, I want to also extend my sincere thanks and appreciation to Major General Richard Reynolds, the Commanding General of the Edwards Air Force Base Flight Test Center; Mr. Jim Papa, the Executive Director of the Air Force Flight Test Center; Ms. Mary Jane Gugliotto, the Protocol Officer; Ms. Leonilla Marcelino of the Asian-Pacific Employment Office; Mr. Nu Moa of the Samoan community; and Air Force Major Kevin Toy from the Air Force Congressional Liaison Office. I want to thank them all for making my stay at Edwards Air Force Base a positive experience that I will not forget.

In particular, I want to thank General Richard Reynolds of our base; Mr. Papa, the head of the Edwards Air Force Base Test Center for the depth of their knowledge of our Nation's security needs. And I thank both of these gentlemen for the outstanding leadership roles they have taken and the impact they have had on the airmen and soldiers under their commands, but more importantly their commitment to provide the best as possible for the needs of our men and women in uniform and especially their families.

Mr. Speaker, I am privileged today to be here before my colleagues to speak to the Nation and to share this occasion in celebrating the contributions of the Asian-Pacific American community, well over 10 million strong and among the fastest growing demographic group in the United States today.

During this time for celebration, it is only fitting that we honor our fellow citizens of Asian-Pacific descent, both from this country and from the Pacific islands that have blessed and enriched our Nation. I submit that the Asian-Pacific Americans have certainly been an asset to our country's development, and it is appropriate that we make this recognition accordingly.

As many of you are aware, immigrants from the Asia-Pacific countries are amongst the newest wave to arrive in the United States in recent years. However, they are merely the latest chapter in the long history of Asian-Pacific Americans in our Nation.

The people of Asia-Pacific have contributed much to America's development in the field of sciences and medicine. For example, nothing exemplifies this more than Time Magazine's selection of a Chinese American in 1996 as its Man of the Year, Dr. David Ho, who triumphantly led the way toward new treatments for AIDS.

In 1989, a Japanese immigrant arrived on the shores of this Nation. After years of study and work, this man, Dr. Hideyo Noguchi, isolated the syphilis germ, leading to a cure for the deadly, widespread disease.

For decades, Dr. Makio Murayama, a Japanese-American, conducted vital research in the United States that laid the groundwork for combating sickle cell anemia.

In 1973, Dr. Leo Esaki, another Japanese-American, an immigrant also to our country, was awarded the Nobel Peace Prize for his electron tunneling theories.

In the field of business and commerce, the names of prominent Asian-Pacific American corporate leaders and legal scholars are too numerous to mention. One only need read our Nation's top periodicals and newspapers to document that Asian-Pacific American students, both in high school and at secondary and post-secondary levels are among the brightest minds that our Nation has produced.

In the entertainment field and sports, American martial arts expert Bruce Lee, the late Bruce Lee, captured the movie audiences of this Nation while destroying the stereotype of that passive, quiet Asian-American male.

World class conductor Seiji Ozawa has led the San Francisco Symphony Orchestra through many brilliant performances over the years.

About 70 years ago, Mr. Speaker, a native Hawaiian named Duke Kahanamoku shocked the world by winning the Olympic Gold Medal in swimming, followed by Dr. Sammy Lee, a Korean-American who also won an Olympic Gold Medal in high diving.

And the strange thing about Dr. Sammy Lee, Mr. Speaker, at the time when the Olympic members of our team were on the sports teams from that period, Dr. Lee was not even permitted to practice along with his fellow divers, American divers, simply because he was not white.

Then there was Tommy Kono of Hawaii, also an Olympic Gold Medalist in weightlifting. And, yes, perhaps the greatest Olympic diver ever known to the world, a Samoan-American by the name of Greg Louganis, who recorded a record in gold medals and national championships that will be in the books for a long, long time.

And, yes, the enthralling Olympic ice-skating performances of Japanese-American Kristi Yamaguchi and Chi-
achieve the highest ranking in this ancient sport and the rank of Yokozuna.

Mr. Speaker, in honoring the Asian-Pacific Americans that served in World War II and the Japanese-Americans who served in these units while fighting enemy forces in Europe during World War II.

Mr. Speaker, the records of the 100th Battalion and 442nd Infantry are without equal. These Japanese-American units suffered an unprecedented casualty rate of 314 percent and received over 18,000 individual declarations, many awarded posthumously, for bravery and courage in the field of battle.

Given the tremendous sacrifices of lives, a high number of medals were awarded to these units: 52 Distinguished Service Crosses; 560 Silver Stars; 9,480 Purple Hearts. I find it unusual, Mr. Speaker, that only one Medal of Honor was awarded.

Nonetheless, 442nd Combat Group emerged as the most decorated combat unit of its size in the history of the United States Army. President Truman was so moved by their bravery on the field of battle, as well as that of black American soldiers who served in World War I and World War II, that he issued an executive order to desegregate the U.S. Army. Previous to his current position, General Eric Shinseki was formerly Commanding General of U.S. Army Europe and was Commander of NATO Stabilization Forces in Central Europe and was Commander of the NATO Stabilization Force in Bosnia.

I am pleased by General Shinseki’s appointment. It was not long ago we had the case of Bruce Yamashita, a Japanese American from Hawaii who was discharged from the Marine Corps officer training program in an ugly display of racial discrimination. Marine Corps superiors taunted Yamashita with ethnic slurs and told him, “We don’t want your kind around here. Go back to your own country.” The situation was made worse when the Commandant of the Marine Corps at the time who appeared on television’s “60 Minutes” stated, “Marine officers who are minorities do not shoot, swim or parachute with our commands as well as white officers.”

After years of perseverance and appeals, Mr. Speaker, Mr. Yamashita was vindicated after proving he was the target of vicious racial harassment during his officer training program. The Secretary of the Navy’s investigation into whether minorities were deliberately being discouraged from becoming officers in the Marine Corps resulted in Yamashita receiving finally his commission as a captain in the United States Marine Corps.

I am also disturbed, Mr. Speaker, by events of recent years involving campaign funding where the integrity of the Asian Pacific American community but on unfairly tarnished in the media for the alleged transgressions of a few.

I find this racial scapegoating to be repugnant and morally objectionable. Playing up fears of the “Asian connection” serves to alienate Asian Pacific Americans from participating in our political process. Moreover, this negative reporting acts to marginalize Asian Pacific American political empowerment at a time when we are coming of age in American politics.

When whites raise money for whites, it is called gaining political power. But when Asian Pacific Americans begin to participate, we are accused of being foreigners trying to infiltrate the mainstream of our Nation’s political system. On this note, Mr. Speaker, remember the Oklahoma City bombing incident? Americans of Arab descent were immediately targeted and investigated by local Federal law enforcement agencies. Mr. Speaker, I submit it is simply wrong and un-American to react this way.

To protect America’s greatness, we should all be sensitive to the fact that democratic participation by people of all races and backgrounds, including Asian Pacific Americans, is crucial to our Nation’s health and vitality. I believe Yamashita’s case and the hysteria surrounding the Asian Pacific American contributions bear implications not just for the military and the professional world, but for our society as a whole. It asks the question, how long do we have to endure the attitude of those who consider Asian Pacific Americans and other minorities as lesser Americans?

I applaud Captain Yamashita and others like him who have spoken out to ensure that racial discrimination is not tolerated. During this month as we recognize the diverse experiences and contributions of the Asian Pacific American community to our Nation, I would hope you will all take inspiration from this example.

When I envision America, I do not see a melting pot. Mr. Speaker, designed to reduce and remove racial differences.
The America I see is a brilliant rainbow, a rainbow of ethnicities and cultures, with each people proudly contributing in a distinct and unique way. That is what America is all about. And Asian Pacific Americans wish to find a just and equitable place in our society that will allow them, like all Americans to grow, to succeed, to achieve and contribute to the advancement of this great Nation.

Mr. Speaker, I wish there were no labels. I wish I was not considered a Pacific American or an Asian American or a Black American or a Native American. I never hear of people classifying themselves as French Americans, or British Americans. But why these labels?

With that in mind, Mr. Speaker, I would like to close my remarks by asking, what is a dream? My dream is that one day my children will be judged not by the color of their skin but by the content of their character.”

Mr. UNDERWOOD. Mr. Speaker, I thank the gentleman from American Samoa for those very inspirational remarks and the cataloging of a number of successes that members of various Asian Pacific American communities have had and their contributions that have been made to this country. Nevertheless we continue to face many serious issues. Sometimes we must address those issues in a way that communities must in order to find ways to resolve problems that continue to exist. Some of these problems are long-standing. Some of them have to do with new immigrants or those who are here with current practices and current laws and current perceptions.

I know that in that regard and in working on those issues, the gentlewoman from Hawaii has been on the forefront of many of those issues. She has had a very distinguished career here in the House of Representatives and has served as previous chair of the Congressional Asian Pacific American Caucus, Mr. Speaker, and in that capacity I only continued the struggle for fairness and justice in this country but continued to serve as a mentor for those of us who are following in her footsteps.

I yield to the gentlewoman from Hawaii.

Mrs. MINK of Hawaii. Mr. Speaker, I thank the gentleman from Guam (Mr. UNDERWOOD), and I want to express the appreciation of all of the members of the Asian Pacific Congressional Caucus for his work for his effort in making sure that we have this time this evening in which to express our thoughts about Asian Pacific issues. The gentleman from American Samoa (Mr. FALEOMAVAEGA) has certainly demonstrated in the short time that he took this evening the extensive record that he has been recognized by Asian Pacific individuals throughout this country. I know that he just elaborated on a few. If we had time, we could document many, many more individuals who certainly have brought great credit and recognition to the Asian Pacific community throughout this country. I do not think that there is a single individual in the Congress of the United States that does not recognize the contributions that have been made by Asian Pacific individuals, even in their constituencies. But notwithstanding the tremendous accomplishments of so many of our distinguished Asian Pacific brothers and sisters throughout this country, there are still some very nagging problems that confront us, problems that have to do with the way we look and the assumptions that people make because of the way we look, the way we are treated when we enter certain places, how we are looked at, the more the fact of our Asian appearance. The conclusions that are leaped to, that we neither speak English nor have been educated in this country, and that we are undoubtedly immigrants, recent immigrants, or some characterization like that. This is very hurtful for many Asians. And so compounding on this day-to-day experience that we have to endure and suffer throughout our lives, the crescendo of criticism that has been levied upon all of us because of the misconduct of a few or the apparent misconduct of a few among us is an extremely painful experience. As the gentleman from Oregon (Mr. WU) suggested, we have a huge task, therefore, as Asian Pacific individuals in the Congress of the United States to serve as role models, to make sure that the young people who are thinking in terms of government service, of elective office, or seeking high positions in their local communities, that they are not discouraged by this dramatic news coverage that hits us every now and then.

Following the 1996 campaign, there was so much controversy that even the Congress got overwhelmed by a lot of that discussion. Out of it I believe came some of the very, very discouraging amendments that were added to welfare reform legislation and campaign spending reform legislation which singled out people in our society who are legally present in this country, who are legal residents but notwithstanding were somehow characterized by virtue of their status as not worthy Americans. They could not participate in programs, even though they had paid taxes into Social Security, they were somehow unworthy because they had not seen fit to become U.S. citizens and therefore were pushed aside and denied and certain programs were denied them.

In the campaign spending reform, what was the most egregious provision that was added in a floor amendment was to say that a legal resident could not make a political contribution to a Federal candidate, and that the Federal candidate in receiving a contribution, they could not make any political contribution to a Federal candidate, and that the Federal candidate in receiving a contribution, the income of that individual could be held accountable and even criminally found accountable for having received such a contribution. That was the most egregious of all the provisions that have been added over the years. I found that so egregious, that notwithstanding the fact that I was a strong supporter from the very beginning of campaign spending reform, I felt compelled in the end to vote against that legislation because I could not tolerate the idea that we were enacting into law this kind of disparate treatment of people who are legally within the United States.

So I would hope that when we take up campaign spending reform again this year, that that provision is not included or not considered for an appropriate amendment.

My point is that we have achieved a lot as a group, but there are continuing problems as we go through our lives. And it is important for the Asian Pacific community to stand up as a group, to be proud of their contributions to American life, proud of their citizenship, proud of their ancestry and of those who have come in recently, and to always work to defend their right to live here under the Constitution and to be fully protected by all of the provisions of the Constitution of the United States.

I want to take this opportunity this evening to thank the members on both sides, the House and the Senate, in the work of the committee in approving the $4.3 million which is the last funding for the payment of the reparations that the gentleman from American Samoa mentioned had been enacted in 1988 to pay for the great harm, the insult, the travesty that occurred in their being placed in relocation camps during World War II.
Japanese individuals who were living in Latin America were picked up in the dark of the night and put on board ships, and then bartered to the United States and placed in the same types of concentration camps with the concurrence of the Latin American governments and under the instruction by the United States Government. These individuals have been trying to qualify for the same benefits that have been accorded our own Japanese American citizens, but despite their efforts they were denied under some sort of legal argument that they were not legally here.

Well, how could they be legally here if they were kidnapped in the middle of the night? Most of these individuals, now part of our communities, many of them have become citizens and are part of our American family. They tell me very much discriminated against when they were excluded from the arrangements that the Congress made in 1988.

Thankfully, Mr. Speaker, the Justice Department entered into a settlement with these individuals, not quite as much as the other AJAs, but at least a recognition of the great harm that had been perpetrated upon these individuals, several thousand of them who were captured in the night and brought here under the assumption that they would be traded with our prisoners of war that were captured by Japan, and indeed about 800 of them were, in fact, bartered in this way and were moved over to Japan and perhaps continued to live there. But nonetheless, the Congress has accepted responsibility, the administration has accepted responsibility for this terrible act in the middle of war and made some measure of compensation.

I would hope, as the delegate from American Samoa said, that there would be continuing lessons to be learned by what happened during World War II, and I think it is our job to continue this education process, and so in moments like this it is important to remind the country about what happened. In another generation it will probably be forgotten. That is the tragedy: We have no place in which this story can be permanently told so that the people in this country can understand what happened, and they tell very much discriminated against when they were excluded from the arrangements that the Congress made in 1988.

So, Mr. Speaker, I hope that there will be efforts to establish a fund, an education fund that will be meaningful and will carry this story not in a negative sense of condemnation, but in a hopeful sense that this kind of history would never be repeated again, ever, to any segment of our population.

Mr. FALEOMAVAEGA. Mr. Speaker, I thank the gentleman from Hawaii for her eloquent statement, and as the gentlewoman will know, tomorrow is going to be a very important occasion whereby the Cox committee is going to submit a report to the Congress and to the Nation. This is in reference, of course, to the issue of the Chinese government, regarding access to the secrets and the computers and all of that. And I, as a member of the Committee on International Relations, I thank the gentleman that talked or made his presentation earlier this evening, the gentleman from Pennsylvania (Mr. WELDON). The fear that I have in what is going to happen tomorrow and in the coming weeks, and I am just going to simply label it China bashing, and I am very concerned about this because this is going to be exactly the issue that we have tried to discuss this evening where the stereotyping and the labeling becomes so instantaneous, and I must submit that the media is not going to do anything that we can just see what is going to happen to the Chinese American community. They are all going to be looked upon with suspicion and having some second thoughts about them being not America, simply because they are Chinese.

And I sincerely hope that this is not going to be the case, but I am fearful, just as has been my experience in the several hearings that we have held in the Committee on International Relations when we talk about human rights. It seems that we have only focused on human rights violations in China, but not on other countries and other regions of the world. And I seriously raise the issue if there is fairness and equity in the process, just as I would like to submit that in tomorrow's presentation that there should be a firm understanding that this has nothing to do with the Chinese people.

And what I am really puzzled about is that even our own allies have spied upon this government, and there seems to be no word or indication from the media that Chinese are not the only ones that are spying, if they, in fact, are doing this. But I understand through the media that the report is quite firm, with whatever data they are going to submit, that this did happen. But I am at least grateful to the gentleman from Pennsylvania saying this should not be taken as an attack, not only to our Chinese-American community, but to the Chinese government, because it was our own government and officials that were responsible.

So I think that again I want to thank the gentlewoman for yielding and to allow me to submit this concern that I have in listening to the gentleman from Pennsylvania, the remarks he had made earlier about this report that is going to be submitted tomorrow.

Mrs. MINK of Hawaii. The temptation to the media to do some sensationalism on behalf to present that people will scapegoat and bash and make generalizations about the entire Asian community. If one looked at my colleague, the gentleman from Oregon (Mr. WU) and my colleague from Guam (Mr. UNDERWOOD), perhaps not so much my colleague from American Samoa, but his mustache, but myself, they probably could not make a distinction. Somebody would probably think we are all Chinese.

Mr. FALEOMAVAEGA. Mr. Speaker, I have to go into the matter of the Fili-
that they have had to endure, but understanding that we are having a special order of that issue, at some time during the week, I will refrain from putting these remarks in at this time and await that other period.

So I thank the gentleman from Guam (Mr. UNDERWOOD). I appreciate his leadership in this effort tonight.

Mr. UNDERWOOD. Mr. Speaker, I thank very much the gentlewoman from Hawaii (Mrs. MINK), and as she has indicated, we will have a special order on the matter of the Filipino veterans I believe on Wednesday, and the gentleman from California (Mr. FUKUOKA), who has taken a strong leadership position on that issue, and the gentlewoman's own work in terms of the work of the Congressional Asian Pacific Caucus has been remarkable in this. Many serious issues of to ongoing issues that is a remnant of the war experience, Filipinos who have fought under the U.S. flag, but being denied the veterans' benefits that were promised to them as a result of them fighting under the American flag against the common enemy.

Just to add a little bit more to the issue of how the espionage should be dealt with, it is important, and not just for perceptual reasons, because that in itself is important, but it will have an impact on the employment and contractual opportunities of individuals, and that is where the rubber hits the road on issues like this, in much the same way that was experienced during all the discussion of the fund-raising scandals. I know that I heard many reports from individuals who had difficulties having access to elected officials, who had appointments broken, and to the same extent that if we are not careful in how we deal with this particular issue, there will be additional questions asked of Asian American scientists. And in a way it is an ironic contrast to the fact that the technological lead role of this country is due in large measure to the presence of Asian American scientists, and in fact Asian American scientists continue to make this country much more secure, not less secure, and certainly much stronger and not weaker.

The Asian Pacific American Caucus has many serious issues of to ongoing issues to it: the issue of Filipino Veterans' Rights v. Cayetano, a native Hawaiian case; an effort to try to get President Clinton to meet leaders of the South Pacific nations; census issues; immigration rights issues; and health issues which we will continue to work on as a caucus. But we tend to look at APA month as a time to bring recognition to this enormous community which has made significant progress in this country and enormous contributions to strengthen this. And we will continue to pursue those issues.

Ms. ROYBAL-ALLARD. Mr. Speaker, it is with great honor that I join my colleagues of the Congressional Asian Pacific Caucus in recognizing the month of May as Asian Pacific American Heritage Month.

This year's theme, "Celebrating Our Legacy," commemorates the contributions Americans of Asian and Pacific Islander descent have made to our country. What better place than our nation's Capitol to highlight the historical legacy of Asian and Pacific Islander Americans?

Their contributions, which have enriched our American society and strengthened its core values, are vast and varied. This evening I would like to focus on their valiant efforts to protect our nation.

There is no better example of the critical role Asian Pacific Islanders played in defense of our country than during World War II. Though their families and friends were forcibly moved out of their homes and put into internment camps encircled by barbed wire, many Filipino Americans were allowed to fight for their country. This resulted in the formation of the 442nd Regimental Combat Team.

Among the 442nd’s many heroes is Sadao Munemori from Los Angeles. Mr. Munemori received the Medal of Honor posthumously for saving the lives of his fellow soldiers while sacrificing his own.

In Europe, on April 5, 1945, Mr. Munemori led the attack against the last stronghold of Hitler's army in Italy. Thrust into command when his squad leader was wounded, Munemori attacked two German machine gun nests that had pinned down his squad in a minefield. After withdrawing due to heavy enemy fire, Munemori took refuge in a shell crater already occupied by two of his men. When an unexploded hand grenade bounced off his helmet and rolled toward his companions, Munemori jumped on it, absorbing the blast.

In the South Pacific, Filipino American soldiers fought alongside American soldiers in some of the bloodiest battles of World War II. For almost four years, during the most intense and strategically important phases of World War II, more than 200,000 Filipinos fought side-by-side with Allied forces and willingly sacrificed their lives and well-being in defense of freedom. By holding off the enemy at the Battle of Corregidor for six months, these Filipino American veterans enabled forces to mobilize back home. Moreover, many Filipino American soldiers lost their lives as POW’s during the Bataan Death March, demonstrating their ultimate loyalty to our country. These courageous men won the admiration of the American people and made a tremendous impact on our ability to prevail in the Pacific Theater.

There are many more unsung heroes like Mr. Munemori and the Filipino veterans. And it is their legacy that we celebrate during the month of May. Generation of Asian Americans have given us their culture, traditions, and values and greatly enriched American society. I ask all my colleagues to join us in expressing our heartfelt appreciation to all Americans of Asian and Pacific Islander descent for their contributions to our country.

Ms. ESHOO. Mr. Speaker, I rise today to honor Asian Pacific American Heritage Month this month and to introduce a congressional resolution which condemns prejudice against Asian and Pacific Islander Americans and supports the political and civic participation by Americans of Asian and Pacific Islander ancestry.

All too often, Asian and Pacific Islander Americans are subject to prejudice and acts of violence that often go unnoticed by the public eye. These Americans have suffered un-founded and demagogic accusations of disloyalty throughout the history of the United States. A 1992 report of the U.S. Commission on Civil Rights found that Asian and Pacific Islander Americans are still frequent victims of racially motivated bigotry and violence. As recently as this past weekend, the Los Angeles Times published a story recounting recent and increasing incidence of ethnic prejudice at our nation's nuclear weapon laboratories because of the ongoing investigations at Los Alamos.

Mr. Speaker, we should recognize the rich cultural heritage of the Asian and Pacific Islander Americans and support the political and civic participation by these Americans.

We must not forget the strength our country has gained from the inspiration, the hard work and the loyalty of African American and Asian Pacific Islander ancestry and what their contributions have meant for a stronger, more prosperous America.

[From the Los Angeles Times, May 21, 1999]

SPY SCARE: TAILOTS LABS' CLIMATE, ASIAN AMERICANS SAY

WASHINGTON—On the surface the incidents cited by employees in the nation's nuclear weapon laboratories were not explosive: a snide remark here, an ambiguous warning there. It was hardly materially a clear-cut case of workplace discrimination.

But to Asian Americans who work in the labs, the incidents were real and their implications disturbing. Amid congressional espionage inquiries and press reports that a Chinese American lab employee may have helped China purloin vital nuclear weapon secrets, a small, indignant group of scientists and engineers decided that something should be done to defuse the threat of 'ethnic profiling.'

There were enough things happening that we were very concerned about suspicions and [whether Asian Americans] were being treated differently, said Raymond Ng, a mechanical engineer for Sandia National Laboratory in Albuquerque. ‘There was a lot of fear and concern about what was going on.}
Management was not aware of these incidents. We need to make it known,''

So Ng joined with Joel Wong, an industrial hygienist at Lawrence Livermore Labora-
ty near San Francisco, to give Energy Sec-
retary Bill Richardson a short list of recent incidents of ethnic insensitivity reported by
coworkers who wished to remain unnamed. Richardson, who oversees the labs, said that he
considers the reports to be generally true, even if some particulars remain unverified.

In one account, snickering and hushed laughter broke out in a roomful of computer users
at one of the labs. Someone was introduced to lead a session on computer security. In another, a lab manager told an
Asian American employee that “personal characteristics” would determine a person’s
career opportunities in the wake of recent disclosures of security breaches, implying that ethnicity was one such characteristic.

Then there was the teasing. Someone wondered aloud whether an Asian American em-
ployee got “rich” by selling classified information, according to Ng and Wong. Someone else
insisted on anonymity recounted similar in-
stances in separate interviews with a Times
reporter. One said he had been asked at work
whether he had “dual loyalties.”

CONFLICTS LABS AND ELSEWHERE

Whether an ethnic backlash actually is oc-
curring to any significant degree is hard to
determine. But concerns about possible eth-
cnic stereotyping are rising and not just
among national lab employees. The subject
comes up in government circles, in the sci-
cient community, in the ethnic Asian media, in high-tech business groups and
among Asian American civic leaders who
was challenged,” Richardson acknowledged
surprises that scientists and engineers in
Richardson four times and once with White
American political donors after revelations
of attempts by foreign interests to influence
American political donors after revelations
of ethnic stereotyping.

Leading science periodicals are closely
monitoring the espionage issue, especially
the possible fallout for foreign-born sci-
centists who are U.S. citizens, permanent U.S. residents or distinguished visitors. A
headline in the June issue of Scientific American read: “Explosive Reactions: A
Backlash From Nuclear Espionage Case Might Hurt Science and Do Little to Bolster
National Security.”

Many of the top scientists in America in
this century have been foreign-born, includ-
ing some from mainland China or Taiwan.
Many more, including several Nobel Prize
winners, are of Asian heritage.

Asian American engineers also have been
dependently involved in the U.S. defense industry. According to the National Science Founda-
ion, more than 300,000 people of Asian de-
nomination. They are Americans. By all ac-
counts that I know of, they work hard and
play by the rules.

Campbell said that some scientists and en-
gineers in Silicon Valley now worry about
traveling to professional conferences in
mainland China for fear that they will be
suspected of Chinese technological secrets to the Communist regime.

Still, many lawmakers assert that the
United States must raise its guard against
Chinese espionage and set new limits on sci-
entific exchange with China and other coun-
tries seeking to develop nuclear weapons.

Their campaign is likely to gain consider-
able momentum in the House, where a House
investigative panel’s report listing evidence of widespread leakage of sensitive military
technology to China. The committee’s bipar-
tisan findings are expected to be made public
next week by the chairman, Rep. Christopher
Cox (R-Newport Beach).

Asian American scientists, engineers and
civilian employees are everywhere involved in espionage.

But they content that some Republican lead-
ers in Congress, aided by unbalanced media
reports, have cast a cloud over Chinese
American scientists—doing illegitimate scientific work in the weapons labs and
elsewhere.

SENATOR REFERS TO “VERY CRAPPY PEOPLE”

What one is afraid of are possible future
consequences for a particular ethnic group so long as
white Americans, like himself, were not held
equally responsible for the disastrous Al-
drich Ames spycase.

We’ve seen some of that. They’re real. There’s no other way to put it. And probably in some ways, very crafty people.”

A spokeswoman for the senator, Andrea Andrews, said they are referring to
Chinese spies, not to Chinese Americans in
general. But other read more into his state-
mament. Charles Sie, vice chairman of the
Committee on Science, an influential Chinese
American group whose founders include the
architect I.M. Pei and the cellist Yo-Yo Ma,
called Shelby’s words a “ridiculous” example of ethnic stereotyping.

Also “ridiculous,” said Jeff Garbereson,
spokesman for Lawrence Livermore, was the request he recently received from a national
newsmagazine for a generic photo of an
Asian American employee at work “to illus-
strate a story on espionage.” The request was refused.

Leading science periodicals are closely
monitoring the espionage issue, especially
the possible fallout for foreign-born sci-
centists who are U.S. citizens, permanent U.S. residents or distinguished visitors. A
headline in the June issue of Scientific American read: “Explosive Reactions: A
Backlash From Nuclear Espionage Case Might Hurt Science and Do Little to Bolster
National Security.”

on House Administration, reported
that that committee did on the fol-

Mr. UNDERWOOD, Mr. Speaker, I move
that the House do now adjourn.
The motion was agreed to; accordingly (at 9 o’clock and 29 minutes p.m.) under its previous order, the House adjourned until tomorrow, Tuesday, May 25, 1999, at 9 a.m., for morning debates.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker’s table and referred as follows:

2291. A letter from the Acting Executive Director, Commodity Futures Trading Commission, transmitting the Commission’s final rule—Revision of Federal Speculative Position Limits and Associated Rules (RIN: 3038–AB2) received May 14, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

2292. A letter from the Administrator, Commodity Credit Corporation, Department of Agriculture, transmitting the final rule—1998 Single-Year and Multi-Year Crop Loss Disaster Assistance Program (RIN: 0560–AP75) received May 14, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

2293. A letter from the President and Chairman, Export-Import Bank, transmitting a statement with respect to transactions involving U.S. exports to the Republic of Korea; to the Committee on Banking and Financial Services.

2294. A letter from the Assistant General Counsel for Regulations, Special Education and Rehabilitative Services, Department of Education, transmitting the Department’s final rule—Special Education and Rehabilitative Services for Fiscal Years 1999–2000 for Certain Centers—received April 16, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Education and the Workforce.

2295. A letter from the Secretary of Health and Human Services, transmitting the Sixth Triennial Report to Congress on Drug Abuse and Addiction Research and the Report of Final Fund-Saving Proposals to Advance the Health of the Public, pursuant to 42 U.S.C. 290aa–4(b); to the Committee on Commerce.

2297. A letter from the Legal Advisor, Cable Services Bureau, Federal Communications Commission, transmitting the Commission’s final rule—Satellite Delivery of Network Signals to Unserved Households for Purposes under the Telephone Services Act of 1996 (CC Docket No. 98–201; RM No. 9335; RM No. 9345) received April 18, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Commerce.

2298. A letter from the Chairman, Federal Communications Commission, transmitting the Commission’s Plan for Transferred Government Spectrum; to the Committee on Commerce.

2299. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting a statement certifying that certain countries are not cooperating fully with U.S. antiterrorism efforts: Afghanistan, Cuba, Iran, Iraq, Libya, North Korea, and Syria; to the Committee on International Relations.

2300. A letter from the Chairman, Federal Election Commission, transmitting a copy of the annual report in compliance with the Government in the Sunshine Act during the calendar year 1998, pursuant to 5 U.S.C. 552(b)(j); to the Committee on Government Reform.

2301. A letter from the Director, Office of Surface Mining, Department of the Interior, transmitting the Department’s final rule—Alabamian, Arkansas, Illinois, Indiana, Iowa, Kansas, Louisiana, Missouri, Oklahoma, and Texas Abandoned Mine Land Reclamation Plans and Regulatory Programs (Technical Amendment No. MCBCC–01) received April 20, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Resources.

2302. A letter from the Acting Director, Office of National Marine Fisheries Service, National Oceanic and Atmospheric Administration, transmitting the Administration’s final rule—Fisheries of the Northeastern United States; Summer Flounder, Scup; Pacific Cod by Catcher Processors using Trawl Gear in the Bering Sea and Aleutian Islands (Docket No. 99034603–9083–01; I.D. 050599B) received May 13, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Resources.

2303. A letter from the Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, transmitting the Administration’s final rule—Fisheries of the Northeastern United States; Summer Flounder, Scup; Pacific Cod by Catcher Processors using Trawl Gear in the Bering Sea and Aleutian Islands (Docket No. 99034603–9083–01; I.D. 050599B) received May 13, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Resources.

2304. A letter from the Acting Director, Office of the Secretary, Business Center, Office of the Secretary, for the fiscal year ending September 30, 2000, and for other purposes (Rept. 106–157); to the Committee of the Whole House on the State of the Union.

2305. A letter from the Acting Assistant Secretary, for Legislative and Intergovernmental Affairs, U.S. Department of the Interior, to the Committee on Appropriations.

2306. A letter from the Assistant Secretary, for Legislative and Intergovernmental Affairs, U.S. Department of the Interior, to the Committee on Appropriations.

2307. A letter from the Director, National Park Service, National Park Service, to the Committee on Energy and Natural Resources.

2308. A letter from the Acting Assistant Secretary, for Legislative and Intergovernmental Affairs, U.S. Department of the Interior, to the Committee on Appropriations.

2309. A letter from the Assistant Secretary, for Legislative and Intergovernmental Affairs, U.S. Department of the Interior, to the Committee on Appropriations.

2310. A letter from the Administrator, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, transmitting the Department’s final rule—Airworthiness Directives: Eurocopter France Model SA341G helicopter ( Amendment 39–11174; AD 99–11–03) (RIN: 2120–AA64) received May 17, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Transportation and Infrastructure.

2311. A letter from the Chief, Regs and Admin Law, USCG, Department of Transportation, transmitting the Department’s final rule—Drawbridge Operating Regulation Gulf Intracoastal Waterway, TX (CGD08–99–034) (RIN: 2113–AE47) received May 17, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Transportation and Infrastructure.

2312. A letter from the Assistant Administrator for Weather Services, National Oceanic and Atmospheric Administration, transmitting the Administration’s final rule—American Meteorological Society’s Industry, Government Scholarship, and Fellowship Program (Docket No. 990208054–9006–01) (RIN No: 0648–ZA61) received May 14, 1999, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Science.

2313. A letter from the Assistant Secretary, Department of the Treasury, transmitting proposed draft legislation that provides for the transfer to Puerto Rico and the Virgin Islands, for five years, the full amount of the excise tax collected on imported rum; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for reference to the proper calendar, as follows:

[Presented pursuant to the order of the House on May 20, 1999, the following reports were filed on May 23, 1999]

Mr. TAYLOR of North Carolina: Committee of Appropriations. H.R. 1905. A bill making appropriations for the Legislative Branch for the fiscal year ending September 30, 1999, and for other purposes (Rept. 106–156); referred to the Committee of the Whole House on the State of the Union.

Mr. BURTON: Committee on Government Reform. H.R. 974. A bill to establish a program to afford high school graduates from the District of Columbia the benefits of institutional recognition at Federal universities outside the District of Columbia, and for other purposes; with an amendment (Rept. 106–151); referred to the Committee of the Whole House on the State of the Union.

Mr. DIAZ-BALART: Committee on Rules. H.R. 1903. A bill providing for consideration of the bill (H.R. 106) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for the fiscal year ending September 30, 2000, and for other purposes (Rept. 106–157); referred to the Committee of the Whole House on the State of the Union.

Mr. RINDER: Committee on Rules. H.R. Resolution 186. Resolution providing for consideration of the bill (H.R. 1259) to amend the
By Mr. ANDREWS: H.R. 306: A bill to authorize supplemental appropriations for fiscal year 1999 to ensure the inclusion of commonly used pesticides in State source water assessment programs, and for other purposes; to the Committee on Appropriations.

By Mr. GREEN of Texas: H.R. 1910. A bill to prohibit abuses in the use of unsolicited bulk electronic mail, and for other purposes; referred to the Committee on Commerce, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. LOBIONDO: H.R. 1911. A bill to require that health plans provide coverage for a minimum hospital stay for mastectomies and lymph node dissection for the treatment of breast cancer and coverage for secondary consultations; referred to the Committee on Commerce, and in addition to the Committees on Education and the Workforce, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MORA as a Whole House on the State of the Union. H.R. 1912. A bill to require the Secretary of the Army to designate Fort Belvoir, Virginia, as the site for the planned National Museum of the United States Army; to the Committee on Armed Services.

By Mr. POMEROY (for himself, Mr. BILL of Montana, and Mr. BALDACCI): H.R. 1913. A bill to authorize registration of Canadian pesticides for agricultural crops; to the Committee on Agriculture.

By Mr. THOMAS: H.R. 1914. A bill to amend the Internal Revenue Code of 1986 to permit co-operators to pay dividends on preferred stock without reducing patronage dividends; to the Committee on Ways and Means.

By Ms. ESHOO (for herself, Ms. ROYAL-ALLARD, Mr. ABERCROMBIE, Mr. MATSUI, Mr. FALLOMAYARA, Mr. LANTOS, Ms. LOFREGN, Mr. GEORGE MILLER of California, Mr. UNDERWOOD, Mrs. MINK of Hawaii, and Mr. WAXMAN): H. Con. Res. 111. Concurrent resolution condemning all prejudice against Asian and Pacific Islander Americans in the United States and supporting political and civic participation by such Americas throughout the United States; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 7 of rule X, the Committee on Ways and Means discharged from consideration of H.R. 974. Referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

By Mr. BONILLA: H.R. 1401. A bill to authorize supplemental appropriations for fiscal years 2000 and 2001, and for other purposes; with an amendment (Rept. 106–161). Referred to the Committee of the Whole House on the State of the Union.

Mr. SPENCE: Committee on Armed Services. H.R. 1901. A bill to authorize appropriations for fiscal years 2000 and 2001 for military activities of the Department of Defense, to prescribe personnel strengths for fiscal years 2000 to 2001, and for other purposes; with an amendment (Rept. 106–162). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. TAYLOR of North Carolina: H.R. 1196. A bill making appropriations for the Legislative Branch for the fiscal year ending September 30, 2000, and for other purposes.

By Mr. SKEEN: H.R. 1906. A bill making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for the fiscal year ending September 30, 2000, and for other purposes.

By Mr. COBLE (for himself, Mr. BERMAN, Mr. HYDE, Mr. CONYERS, Mr. ROHRABACHER, Mr. CAMPBELL, Mr. GOODLATTE, Ms. LOFREGN, Mr. DELAHUNT, Mr. PRASSE, Mr. WEXLER, and Mr. GALLEGO): H.R. 1907. A bill to amend title 35, United States Code, to provide enhanced protection for inventors and innovators, protect patent terms, reduce patent litigation, and for other purposes; to the Committee on the Judiciary.

By Mr. GILMAN (for himself and Mr. GEJDENSON): H.R. 1908. A bill to authorize the transfer of native American tribal and certain foreign countries, to the Committee on International Relations.
DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1683: Mr. Crane.
H.R. 1660: Mr. Davis of Virginia.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 1239
OFFERED BY: Mr. TRAFICANT
AMENDMENT No. 1: Add at the end the following new section:

SEC. 6. BUDGETARY TREATMENT OF THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM AND THE HOSPITAL INSURANCE PROGRAM.

It is the sense of the Congress that—

(1) the moneys of the United States held for purposes of the old-age, survivors, and disability insurance program and the hospital insurance program maintained under the Social Security Act and related laws of the United States should always be held in separate and independent trust funds and should always be accounted for from all other moneys of the United States,

(2) the receipts and disbursements of such programs (including revenues dedicated to such programs and effective payment of benefits, payment of administrative expenses, and payment of such amounts as may be necessary and appropriate to correct prior impropriety and to correct prior inappropriateness of the United States, or any officer or employee thereof, should ever be authorized to use, or to authorize the use of, such trust funds for any other purpose.

H.R. 1401
OFFERED BY: Mr. TRAFICANT
AMENDMENT No. 2: At the end of title XXVIII (page 304), insert the following new section:

SEC. 7. CUSTOMS TARIFFS.

It is the sense of the Congress that—

(a) None of the funds appropriated or otherwise made available by this Act may be used to award any new allocations under the market access program or to pay the salaries of personnel to award such allocations.

(b) Corresponding Reduction in Funds.—The amount otherwise provided by this Act under the headings ‘‘COMMODITY CREDIT CORPORATION’’ or ‘‘FOREIGN TRADE BOARD’’ is hereby reduced by $90,000,000. (c) Debt Service.—The amount otherwise provided by this Act under the heading ‘‘DEBT SERVICE’’ is hereby reduced by $7,000,000.

H.R. 1906
OFFERED BY: Mr. BASS
AMENDMENT No. 4: Insert before the short title the following new section:

SEC. . (a) LIMITATION.—None of the funds appropriated for fiscal year 2000 under this Act is available for the purposes of the old-and-age, survivors, and disability insurance program and to maintain the hospital insurance program.

(b) Corresponding Reduction in Funds.—The amount otherwise provided by this Act for salaries and expenses under the heading ‘‘ANIMAL AND PLANT HEALTH INSPECTION SERVICE’’ is hereby reduced by $7,000,000.

H.R. 1906
OFFERED BY: Mr. DEFAZIO
AMENDMENT No. 5: Insert before the short title the following new section:

SEC. . (a) LIMITATION.—None of the funds appropriated or otherwise made available by this Act may be used to pay the salaries of personnel to award any new allocations under the market access program or to pay the salaries of personnel to award such allocations.

(b) Corresponding Reduction in Funds.—The amount otherwise provided by this Act under the heading ‘‘ANIMAL AND PLANT HEALTH INSPECTION SERVICE’’ is hereby reduced by $7,000,000.

H.R. 1906
OFFERED BY: Mrs. MEEK OF FLORIDA
AMENDMENT No. 6: Add before the short title the following new section:

SEC. . After March 1, 2000, none of the funds appropriated or otherwise made available by this Act may be used by the Secretary of Agriculture to—

(1) permit the importation of meat or meat food products under subsections (a) and (f) of section 20 of the Federal Meat Inspection Act (21 U.S.C. 620) from any foreign country with which the Secretary has not made the determination, as is required by subsection (e) of such section, that the foreign country’s meat inspection requirements currently achieve a level of sanitary protection equivalent to that achieved under United States standards; and

(2) to permit the importation of poultry or poultry products under subsection (a) of section 17 of the Poultry Products Inspection Act.
Act (21 U.S.C. 466) from any foreign country with respect to which the Secretary has not made the determination, as is required by subsection (d) of such section, that the foreign country’s poultry inspection requirements currently achieve a level of sanitary protection equivalent to that achieved under United States standards.

H.R. 1906

OFFERED BY: MRS. MEEK OF FLORIDA

AMENDMENT No. 7: Add before the short title the following new section:

SEC. ___. After March 1, 2000, none of the funds appropriated or otherwise available by this Act may be used by the Secretary of Agriculture—

(1) to permit the importation of meat or meat food products under subsections (a) and (f) of section 20 of the Federal Meat Inspection Act (21 U.S.C. 620) from any foreign country in violation of subsection (f) of such section; and

(2) to permit the importation of poultry or poultry products under subsection (a) of section 17 of the Poultry Products Inspection Act (21 U.S.C. 466) from any foreign country in violation of subsection (d) of such section.

H.R. 1906

OFFERED BY: MR. MORA OF KANSAS

AMENDMENT No. 8: Insert before the short title the following new section:

SEC. ___. None of the funds appropriated or otherwise made available by this Act may be used to implement the final rule of the Food Safety and Inspection Service of the Department of Agriculture entitled “Pathogen Reduction: Hazard Analysis and Critical Control Points (HACCP) Systems” with respect to very small establishments, as such establishments are defined in the rule.

H.R. 1906

OFFERED BY: MR. SANDERS

AMENDMENT No. 9: Insert before the short title the following new section:

SEC. ___. For an additional amount for the Department of Agriculture (consisting of an additional $7,000,000 for the commodity supplemental food program under the “Commodity Assistance Program”), $7,000,000.

H.R. 1906

OFFERED BY: MR. SANDERS

AMENDMENT No. 11: At the end of the bill (preceding the short title), Insert the following new section:

SEC. ___. The amounts otherwise provided by this Act are revised by increasing the amount for the Department of Agriculture (consisting of a $2,000,000 competitive grant program for elementary and secondary schools to work with local farmers to purchase locally-grown foods) and reducing the amount for “FOREIGN AGRICULTURAL SERVICE AND GENERAL SALES MANAGER”, by $2,000,000.

H.R. 1906

OFFERED BY: MR. SANDERS

AMENDMENT No. 12: Page 35, line 7 (relating to the rural community advancement program), insert after the dollar amount the following: “(increased by $5,000,000)”. Page 53, line 7 (relating to ocean freight differential grants), insert after the dollar amount the following: “(reduced by $5,000,000)”.

H.R. 1906

OFFERED BY: MR. SANDERS

AMENDMENT No. 13: Page 10, line 14 (relating to the Agricultural Research Service), insert after the dollar amount the following: “(reduced by $10,000,000)”. Page 50, line 9 (relating to the commodity assistance program), insert after the dollar amount the following: “(increased by $10,000,000)”.

H.R. 1906

OFFERED BY: MR. SANDERS

AMENDMENT No. 14: Page 10, line 14 (relating to the Agricultural Research Service), insert after the dollar amount the following: “(reduced by $5,000,000)”. Page 50, line 9 (relating to the commodity assistance program), insert after the dollar amount the following: “(increased by $5,000,000)”.

H.R. 1906

OFFERED BY: MR. SANFORD

AMENDMENT No. 15: Insert before the short title the following new section:

SEC. ___. For an additional amount for the Department of Agriculture (consisting of an additional $2,000,000 for the commodity supplemental food program under the “Commodity Assistance Program”), $2,000,000.

H.R. 1906

OFFERED BY: MR. TRAFFICANT

AMENDMENT No. 16: Insert before the short title the following new sections:

SEC. ___. None of the funds appropriated or otherwise made available by this Act may be expended by an entity unless the entity agrees that in expending the assistance the entity will comply with sections 2 through 4 of the Act of March 3, 1933 (41 U.S.C. 10a-10c; popularly known as the “Buy American Act”).

SEC. ___. (a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—In the case of any equipment or products that may be purchased using financial assistance provided using funds appropriated or otherwise made available by this Act, it is the sense of the Congress that entities receiving such assistance should, in expending the assistance, purchase only American-made equipment and products.

(b) NOTICE TO RECIPIENTS OF ASSISTANCE.—In providing financial assistance using funds appropriated or otherwise made available by this Act, the Federal agency providing the assistance shall provide to each recipient of the assistance a notice describing the statement made in subsection (a) by the Congress.

SEC. ___. If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a “Made in America” inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, such person shall be ineligible to receive any contract or subcontract made with funds appropriated or otherwise made available by this Act, pursuant to the debarment, suspension, and ineligibility procedures described in section 9.400 through 9.409 of title 48, Code of Federal Regulations.
The Senate met at 11 a.m. and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Almighty God, who knows us as we really are and whose grace gives us the courage to change and become more of what we were meant to be, we thank You for this quiet moment in which no secrets are hidden from You, and our deepest longings are revealed. As we begin this new work week, wash out of our minds any negative thinking or any emotions resistant to Your will. Help us to form and hold the picture of ourselves as servant-leaders filled with Your power, patriotism, and enthusiasm. May we completely be absorbed with what is best for our Nation and work together with a cooperative attitude. Free us of the pride that thinks too much about the perpendicular pronoun. We want to be motivators rather than manipulators of the people around us. May this be a great day of progress for the work of the Senate. To that end, bless the Senators with Your grace and goodness. Through our Lord and Savior. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The able acting majority leader is recognized.

Mr. HAGEL. I thank the Chair.

SCHEDULE

Mr. HAGEL. This morning the Senate will be in a period of morning business until 1 p.m. Following morning business, the Senate will begin consideration of S. 1059, the Department of Defense authorization bill. Amendments to the defense authorization bill are expected to be offered during today's session of the Senate. If votes are ordered with respect to S. 1059, those votes will be stacked to occur at 5:30 p.m. this evening. As always, Senators will be notified as votes are ordered.

It is the intention of the leader to complete action on the defense authorization bill this week as well as the defense appropriations bill. Therefore, Senators can expect votes into the evening throughout the week. I thank my colleagues for their attention and cooperation.

Mr. President, I note the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Mrs. FEINSTEIN. Mr. President, I ask unanimous consent that the order for the quorum be suspended.

The PRESIDING OFFICER (Mr. HAGEL). Without objection, it is so ordered.

RESERVATION OF LEADER TIME

The PRESIDING OFFICER. Under the previous order, leadership time is reserved.

MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond the hour of 1 p.m. with Senators permitted to speak therein for up to 10 minutes. The time until 12 noon shall be under the control of the Senator from Illinois, Mr. DURBIN, or his designee, with 20 minutes of the time to be under the control of the Senator from North Dakota, Mr. CONRAD.

Mrs. FEINSTEIN. Mr. President, I designate myself to control approximately 10 minutes of time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. FEINSTEIN. I thank the Chair.

WORK INCENTIVES IMPROVEMENT ACT

Mrs. FEINSTEIN. Mr. President, I wish to speak for a few moments today about a bill that many Senators, some 70 of us, believe will improve the lives of millions of disabled Americans. The Work Incentives Improvement Act would allow disabled adults to enter the workforce without placing their Medicaid or Medicare benefits at risk. I particularly thank Senators KENNEDY, JEFFORDS, MOYNIHAN, and ROTH for their outstanding leadership in crafting this legislation. I am very proud to be a cosponsor.

Today, more than 8 million working-age adults receive disability payments from the Federal Government for conditions that range from paralysis to multiple sclerosis. A recent Harris poll showed that 72 percent of these disabled people would really like to work, but disabled Americans face a terrible Catch-22. The Federal Medicaid program won't cover people who continue to work and remain disabled. So if a disabled adult earns more than $500 a month, he or she loses their Medicaid. That is the rub.

The eligibility criteria for Medicaid benefits have had a devastating effect on disabled Americans. The Medicaid program equates having a disability with being poor and unable to work, furthering inaccurate stereotypes about disability. To make things worse, the Medicaid program ensures that disabled people who do work end up having to shoulder the cost of their care by themselves.

For all but the best-off disabled Americans, these costs are prohibitive. People who earn millions can't pay the out-of-pocket costs of their medical treatment. These costs can run into the tens of thousands of dollars each year. In other words, if a disabled American does have a job, the minute that disabled American earns more than $500 a month, they fall off a cliff and they lose their Medicaid or their Medicare. So millions of disabled Americans remain dependent on cash assistance from the Federal Government simply because they can't work and keep Medicaid at the same time.

Last year, I wrote to President Clinton urging a remedy to the situation. I am proud to be an original cosponsor of the Work Incentives Improvement Act. This bill allows Americans with disabilities to enter the workforce without losing their health coverage under Medicaid or Medicare. Even if disabled people are working in full-time jobs with health benefits, they will be able to buy their Medicaid coverage for medical expenses that their regular insurance does not cover.

In addition, the Work Incentives Improvement Act sets up a new system called Ticket to Work to provide better job training and placement services for the disabled. The Work Incentives Improvement Act will enable disabled Americans to pursue self-sufficiency, to achieve independence, and to contribute in meaningful ways to our economy. It is certainly an idea whose time has come. That is why over 70 Senators have signed on as cosponsors.

Unfortunately, the Senate has not had the chance to vote on this important legislation. The reason I am on the floor today, as well as others who I hope will be coming to the floor, is to urge Senate Majority Leader TRENT LOTT to bring the Work Incentives Improvement Act to the Senate floor for a vote soon. No one should have to choose between a job and their health. By preserving Federal health benefits for disabled workers, we can avoid the Catch-22 and, most importantly, we can help the disabled to live full and healthy lives.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.
The legislative assistant proceeded to call the roll.

Mr. GRAMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAMS. Mr. President, I ask unanimous consent that I be allowed to speak for up to 25 minutes in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The remarks of Mr. GRAMS pertaining to the introduction of S. 1102, S. 1103, S. 1104 are located in today's Record under "Statements on Introduced Bills and Joint Resolutions."

Mr. GRAMS. I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. CONRAD. Mr. President, I rise today to talk about the continuing crisis in the farm economy. I have just been home the weekend before last. Everywhere I went in my State, people were saying to me: Senator, something has to be done. We are facing a crisis in rural America. The prices we are getting for things continues to be at very low levels—in fact, we have the lowest prices in 53 years—and at the same time everything we buy is going up. That is putting us in a cost/price squeeze that is truly strangling American farmers.

The result is going to be devastating unless there is a response. Last year, the Federal Government did respond with a $6 billion program of disaster assistance that made a significant difference in rural America. About half of that money went for a support, a supplement that gave farmers some assistance when prices were collapsing. There was also a second major element for a disaster program, natural disasters around the country that had dramatically reduced farm income. That program made a significant difference.

Those same conditions continue this year. Prices again are at very low levels, and we have seen natural disasters once again strike rural America. In fact, we now know to deliver on the promise we made last year on a disaster program is going to require more money than we appropriated. We appropriated about $3 billion for that purpose. We now know delivery on the program we passed is going to cost another $1.5 billion, because the sign-up of agricultural producers that is now completed indicates to us there are far more eligible than we thought when we wrote the program. That is, of course, because we now face a moving adverse. We are now faced with additional natural disasters that deepen and worsened and made more farmers eligible.

I believe we need that $1.5 billion to keep the promise made last year and another $2.5 billion that will be necessary to give the same kind of income support we provided last year, about a 50-percent AMTA supplemental.

Why are these necessary? What is happening out there so those of us who represent farm country come to our colleagues and talk about a crisis in rural America? Perhaps the best way of showing what has happened is this chart that shows what has happened, over a 53-year period, to farm prices. As we look at the support and help the farmers have been getting from 1946 to 1999, we are now at the lowest level for barley and wheat prices in 53 years. That is the hard reality our farmers are coping with, the lowest prices in 53 years. We know that when the price of a bushel of wheat, just above $5. You can see it here—prices down, down—and the cost of production staying up. That has put our farmers at an extreme disadvantage.

While farmers are paying more but receiving less, it is not surprising, then, they find themselves in a cost/squeeze. This green line shows the prices farmers paid for various inputs. As you can see, the prices farmers had been paying had been going up rather steadily. They have actually dropped at the very time prices at the farms have been dropping. They look at what the prices that farmers have been receiving look like. That is this red line. We can see it peaking right at the time we passed the 1996 farm bill.

The 1996 farm bill changed everything. It said, instead of just paying the cost of production when prices fall, we will no longer do that. The new farm bill said we are going to have fixed payments that are sharply reduced year after year no matter what happens to prices.

Here is the pattern we see: the prices farmers pay for goods they use to produce products going up; the prices they receive going down dramatically. The result is this enormous gap between what they are able to buy for, what they have to pay to receive goods, and what they are able to get when they sell their goods. This dramatic gap, this chasm now, between the prices farmers pay for what they have to buy and what they get for what they sell has opened up. This huge difference that literally tens of thousands of farm families are threatened.

It would be one thing if the United States was alone in this world. If we did not have competitors to worry about, but we do have competitors. The Europeans are our chief competitors, and it is very interesting to see what they are doing.

At the very time when we have dramatically cut support for farmers, cut support at the very time they are in the greatest need, because the gap between what they pay for and what they get has opened up in such a very serious way, we have cut dramatically the level of support we provide our farmers. In the last farm bill, we cut in half the support we provide our farmers. If we look at what our competitors, the Europeans, are doing, we see quite a different pattern.

Our European competitors are spending far more than we are to support their farmers. If we go back to 1996, we can see the red bar is where Europe is spending in direct support; the yellow bar is what we are spending. We can see
the pattern all through 1997, 1998, 1999, the year 2000—and these are projections for 2001 and 2002—that our competitors are providing much more support to their producers than we are providing ours.

I conclude by saying we have a crisis in rural America. It requires a Federal response. I hope very much before this year is over that we have said farming is important in this country, that we understand it is in crisis, and that we are prepared to respond.

I thank the Chair, and I yield the floor.

The PRESIDING OFFICER (Mr. Roberts). The time between 12 noon and 12:30 p.m. shall be under the control of the distinguished Senator from Utah, Mr. Bennett. The Senator is recognized.

SUSPEND BOMBING IN KOSOVO

Mr. BENNETT. Mr. President, I rise to call for a suspension of the bombing in Kosovo, not because of anything Milosevic may have said, or such as the release of three American servicemen; not because of differing opinions within NATO, such as those currently being expressed by the Italians and the Germans; not because of the inadvertent damage done to accidental targets, such as the Chinese Embassy; and not because of any personal animus or distrust of any individuals in this administration. No; I oppose continuation of the bombing in Kosovo because it has not worked. It is not working and shows no signs of working in the future.

The bombing has been of no help to the Kosovars, hundreds of thousands of whom have lost their homes, their neighbors, their children and perhaps even their lives while the bombing has gone on. It has been of no help to the Albanians or the Macedonians who have seen hundreds of thousands of refugees flood cross the borders into their ill-equipped countries. It has been of no help to NATO, an alliance that has seen its military stocks drawn down to dangerously low levels with no effect on the atrocities going on in the killing fields. And the bombing has been of no help to our relationships with nations outside of NATO, particularly Russia and China, who have vigorously opposed our decision to proceed.

Again, in short, the bombing has not worked, even though we have persisted for a longer time than we bomb in Desert Storm. My call for suspending the bombing comes from the modern wisdom that says: If at first you don't succeed, try something else.

There are those, including my colleagues on the Senate floor, commentators and columnists for whom I have the utmost respect, who say we cannot even consider suspension of the bombing. We are at war, they say; we must press on to victory. Anything else would be dishonorable, and on a practical geopolitical level, would send the wrong signal to others who might choose to confront us in the future.

Such language is often called Churchillian, echoing the electrifying rhetoric of the indomitable prime minister speaking in the darkest days of World War II. No one has a higher regard for the magnificent rhetoric and the deeds of Winston Churchill than I, but, to me, the mantra, “Because we're in, we have to win,” is more suitable for a bumper sticker than it is for Winston Churchill.

Let me take you to a Churchillian episode that I think applies here, and it comes not from the darkest days of World War II but World War I.

Those who remember their history will remember that Winston Churchill fell into great disregard during World War I as a result of his sponsorship of the Dardanelles operation. He was removed from responsibility. But because he was still an officer in the British Army, he agreed, indeed sought for, the opportunity to go to the front in France. And so, as Major Churchill, he went to the front, and unlike most British officers of the time, he really went to the front. He went all the way to the front lines and saw for himself over a period of time the horrors and the futility of trench warfare. He saw it firsthand, and he came away convinced that it was not working.

When he returned to England, he became Minister of Munitions and put his full support and strength behind searching for an alternative. If you will, he put aside the patriotic rhetoric of his time and sought for a policy that would work. William Manchester, in his biography of Churchill called the “Last Line,” refers to Churchill as the father of the modern tank. It was Winston Churchill who caught the vision of the fact that you could do something different and created the modern tank, or created the prototype of what became the modern tank, and revolutionized warfare, eliminating the failures of trench warfare.

If at first you don't succeed, try something else. The legacy of Winston Churchill was that he was willing to try something else when he saw the reality of the failure on the ground. I think, frankly, that is the Churchillian example we should seek to follow now: Suspend the bombing and try something else.

There are many suggestions on the table. The one, of course, we hear the most these days is send in the ground troops. To those who urge this, I ask, as I asked when the bombing was proposed in the first place: Will it work? Will it accomplish our goals? And with that question I ask next obvious question: What are our goals?

When Secretary Madeleine Albright made the case for the bombing to the Senators in the Capitol, she told us if we did not bomb, the following would happen: First, there would be brutal and ethnic cleansing throughout all of Kosovo with tens of thousands of people being slaughtered and hundreds of thousands driven from their homes.

Second, she said there will be a flood of refugees across the borders into neighboring countries, swamping their already fragile economies.

Third, she said there will be splits within NATO. This alliance will be torn apart by disagreements.

And finally, she said Milosevic will strengthen his hand on his local political situation.

That was 8 weeks ago. Now, 8 weeks later, the bombing has failed to prevent any of those results. All four of these predictions have come true: The bombing has been of no help to the Kosovars, hundreds of thousands driven from their homes and villages; and No. 3, a rebuilding of their land; No. 4, an international police force in there for an indefinitely long period of time to guarantee that their homes will always be protected; and No. 5 accept those goals for just a moment. I ask the same fundamental question I asked in the beginning with respect to bombing. Will it work? Will continuation of the bombing achieve these four new goals when it did not achieve the four old ones? And what about ground troops? Will ground troops achieve these new goals?

On the first question, as to whether the continuation of the bombing will achieve these new goals, there is disagreement from the experts. In this morning’s Washington Post, General Short says: “Yes, we will see the achievement of these goals within a matter of months.” Last Friday, the Defense Department spokesman Kenneth Bacon said, “No, there was no indication that bombing would achieve the goals.”

I ask this fundamental humanitarian question: Do we have to continue to destroy the economy of Yugoslavia, depriving the civilian population of power and water, as we did over the weekend, raising the specter of the epidemic spread of typhoid while we decide who is right, while we decide which opinion is the correct one? Can
we not suspend the bombing while that debate goes on?''

Ellsberg went on to ground troops, and those who say ground troops are the only answer, those who are calling for an invasion and an indefinitely long occupation of part of Serbia, that part known as Kosovo, to them I would refer the words of Daniel Ellsberg that appeared in the New York Times last Friday. I find them chilling. I would like to read them now at some length.

I cannot paraphrase them and put them in any better form than Mr. Ellsberg himself. He says, referring to a ground invasion in Kosovo:

I believe, it would be a death sentence for most Albanians remaining in Kosovo.

By all accounts, it would take weeks to months to deploy an invasion force to the region of Kosovo, one to so was mine, and Slobodan Milosevic already has troops there fortifying the borders. Wouldn’t the prospect of an invasion lead him to order his forces to fire on all the military-age male Albanians and hold the rest of the population as hostages rather than continuing to deport them?

A very, very important question.

Daniel Ellsberg goes on:

We don’t know how many male Kosovars of military age broadly, (those) from 15 to 60 years old have been killed already.

He says:

But even if the number is in the tens of thousands, that would mean that most of the men were still alive. Focusing invasion, would Mr. Milosevic allow any more men to leave Kosovo to be recruited by the K.L.A., or to live to support the invasion? The Serbs could quickly slaughter 100,000 to 200,000 male Kosovars. (In Rwanda five years ago, an average of 8,000 civilians a day were killed for 100 days, mostly with machetes.)

Obrovac and his subordinates are brutal enough to do that. If they haven’t done it already (and there is no testimony [to suggest] that they have on that scale), because they haven’t, an annihilation would make an invasion inevitable. A commitment now to ground invasion would remove that deterrence.

A very much capable of being convinced. And I went into that briefing carefully and then asked: ''Are you willing to take the next step if the first one does not work?'' And if the answer is ‘No’ then don’t take the first step.’’ I asked, ‘‘Madam Secretary, my question to you is, ‘Are you willing to take the next step?’’ If this doesn’t work, what do we do?’’

I got conversation, but I did not get an answer to my question. I came out of that briefing saying, unless I can get an answer to that question, I will vote against the bombing. I was not satisfied and I did vote against the bombing.

I did not prevail in this Chamber. A majority of the Members voted in favor of the bombing, and so we have now had 8 weeks of it.

That date has an interesting meaning for me, because in this conversation, in the briefing, they were asked, ‘‘How long will it take for us to find out if this is going to work?’’ We were told repeatedly, ‘‘We can’t tell you that. We don’t know.’’

Finally, in some frustration, I spoke out of turn and said to the briefer, ‘‘How long would you be surprised if it were more than?’’

I got kind of a dirty look and then grumpily the fellow said: ‘‘8 weeks.’’

Well, it has now been 8 weeks, and it hasn’t worked, which is why I am here saying let’s suspend the bombing while we talk about something that might. Let us stop destroying the economy of Yugoslavia while we talk about what might work in Kosovo, because our destruction of water works and television stations and power-generating plants in Belgrade has had no effect on the killing in Kosovo. Can’t we stop killing civilians who are not involved in this while we talk about what our options might be?

I think one of the most trenchant and insightful analyses of what happened to this country in Vietnam was written by Barbara Tuchman in a book called ‘‘The March of Folly.’’ In that book she described how people persist in going after solutions that do not work, because they do not want to admit that it won’t work, and they are sure that if we just keep bombing a little bit longer, somehow something will work out.

Shortly after I had my exchange with Secretary Albright, the President, President Clinton, was asked, ‘‘What will you do if the bombing does not work?’’ He was asked by the Prime
MINISTER OF ITALY.

Mr. DORGAN. Mr. President, I have cleared this request. I ask unanimous consent that the time for the consideration of the Senate journal be extended until the hour of 1:30, and that at 1 I be recognized for 20 minutes in morning business.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HAGEL. I thank the Chair, and I thank my friend and colleague from Utah for some additional time.

I rise today to commemorate the 75th anniversary of the modern American Foreign Service.

We have all traveled abroad. I have visited over 60 countries over the years. As many Americans, I have seen firsthand the dedication of professional Foreign Service officers in some of the most difficult and dangerous working environments in the world.

As our Nation grew, it became more globally engaged. Over the last 200 years, year after year, America has become an international community. In 1860, we had only 33 diplomatic missions around the world. But we had 253 consular posts abroad, primarily involved in supporting our Nation’s dramatic economic growth and trade expansion. As America’s role in the world grew, we took on more responsibility. America’s diplomats have needed to draw from the broad strength of our democratic society. And that, too, grew.

The solution was the Rogers Act of 1924. This act created America’s first professional competitive Foreign Service. It merged the small, elite diplomatic corps with the more broadly based consular services. The Rogers Act established a merit-based exam to recruit the best our growing American Foreign Service.

As our Nation grew, it became more foreign policy than ever before. This has a real impact on our national interest. This is as dangerous as what we have been doing to our military. It is like asking the Air Force to permanently maintain an increased flight tempo with aging aircraft and a severe shortage of pilots. This has serious consequences to our country. Few appreciate how dangerous it has become for our diplomats who defend America’s interests in the world.

Since World War II, more ambassadors have been killed in the line of duty than generals and admirals. The Secretary of State has commemorated 186 American diplomats who have died under “heroic or inspirational circumstances.”

Finally, in today’s global community, we have a greater need for an active, energetic, and visionary foreign policy and those who carry out that foreign policy than ever before.

The time for Mr. Smith of New Hampshire shall be controlled by the Senator from New Hampshire.

Mr. HAGEL. I am happy to yield to my colleague from North Dakota.
The PRESIDING OFFICER (Mr. KYL). The time of the Senator has expired. The Senator from North Dakota is recognized.

Mr. DORGAN. Mr. President, I ask unanimous consent that Senator Johnson be added as a cosponsor to S. 1022, the Veterans Emergency Health Care Act of 1999.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. DORGAN. Mr. President, I ask unanimous consent that Josh Aitkin, a member of my staff, be given the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL SON OF SAM LEGISLATION

Mr. DORGAN. Mr. President, last week we debated the Juvenile Justice Act. We passed a number of provisions, especially dealing with guns, gun shows, and gun sales that were very controversial. I did not speak last week on an amendment I offered to the juvenile justice bill that became a part of that and is now a provision that has been passed by the Senate. I want to take a few minutes today to describe the amendment I offered and its importance.

Some while ago, I was watching a television program. It was about a serial killer, a man who killed four women and one man in Gainesville, FL. The program described the book this serial killer has written: “The Making of a Serial Killer: The Real Story of the Gainesville Murders in the Killer’s Own Words.”

I thought: That cannot be the case. If you murder four or five people and are sent to prison, you lose your right to vote and you lose certain rights. Do you have a right to write a book and profit from it? This television program described the dilemma.

There was a murderer in New York who was described as the “Son of Sam” murderer many years ago. He was sent to prison and wrote a book in order to profit from his murder. In other words, a violent murderer goes to prison and spends his time writing a book to sell to the public to make money. Is that a right prisoners have in this country after committing a violent crime? Is there a constitutional right to profit from a violent crime in America? I do not think so.

The State of New York passed a statute, the “Son of Sam” statute, and the Federal Government passed a statute saying that the proceeds from a book written by a violent offender who is sent to prison cannot be retained by the violent criminal.

That was appealed, and went to the U.S. Supreme Court. Guess what. The U.S. Supreme Court said: No, you may not prohibit the expressive writings of a violent criminal, because that is a violation of the First Amendment. I am truncating the Supreme Court decision, but essentially the Supreme Court invalidated the “Son of Sam” laws. The Federal law has never been enforced, to my knowledge, and the State laws have been invalidated.

So we had a circumstance where, on the program I watched, this serial killer was interviewed. The woman with whom he apparently is romantically involved, who is one of the sponsors of this book, was interviewed. It raised the question in my mind: Shouldn’t we correct this issue and these statutes so the next time this goes to the Supreme Court, the Supreme Court will not overturn the law?

I wrote a whole of legislation, after consultation with some constitutional lawyers, that I think does solve this issue and will say to any prospective author, some disgusting human being who murders four young girls and a man in Gainesville, who now says, I want to write a book to describe the detail, the horrible detail of these murders: You can write until you are dead, but you will never ever profit, you will never profit by writing the accounts of your murders and you will not keep the money. Not just you, but your agent, those to whom you assign the profits—you will not be able to reap the rewards of telling the gruesome, dirty tales of your sordid criminal lives.

The Juvenile justice bill which passed last Thursday has an amendment in it that closes the loophole and rewrites the Federal law. It says that any individual convicted of any Federal or State felony or violent misdemeanor, if that convicted defendant tried to sell his book, movie rights, or other expressive work or any property associated with the crime—a bloody glove, murder weapon, photos and so on—whose value has been enhanced by that crime, then the U.S. attorney will make a motion to forfeit all proceeds that would have been received by the defendant or the defendant’s transferees—spouse, partner, friends, and so on.

Is this important? I think it is. I think we ought to have a Federal statute, and if the Supreme Court said the “Son of Sam” statute is not valid, we ought to have a Federal statute that says to anybody in this country: If you commit a violent crime and you go to prison, do not expect to sit in prison and write and profit by publishing a book about your crime.

I offered that in the Senate last Thursday, and I was joined by my colleague, Senator EVAN BAYH. It has now passed the Senate, and my hope is my colleagues in the House will see fit to keep this in the Juvenile Justice Act, and it will go to the President and be signed into law.

(The remarks of Mr. DORGAN pertaining to the submission of S. Res. 105 are located in today’s RECORD under “Submissions of Concurrent and Senate Resolutions.”)

COMPREHENSIVE NUCLEAR TEST BAN TREATY

Mr. DORGAN. Mr. President, I want to make a point about something which I think is critically important to the Senate and to this country and its future. It is something we are spending no time on and pay no attention to. It is the issue of the Comprehensive Nuclear Test Ban Treaty.

In the past two State of the Union Addresses, the President has asked Congress to report out and approve the nuclear test ban treaty.

Going back to a time when President Eisenhower talked about this issue, I think most Americans understand the value of and the interest in a test ban treaty.

Since 1945, six nations have conducted 2,046 nuclear test explosions. That is an average of one test every 9 days. There are a few countries that have the capability of producing a nuclear weapon and testing a nuclear weapon. There are many countries that want that capability. Stopping the spread of nuclear weapons, stopping the spread of missile technology, the means by which nuclear warheads can be delivered, is critically important.

It seems to me one of the underpinnings of those efforts must be the passage of the Comprehensive Nuclear Test Ban Treaty. The United States has been under a moratorium of nuclear tests. We have not been testing since that moratorium began in 1992. We do not test nuclear weapons. We have been a leader. In this area, ratifying the Comprehensive Test Ban Treaty is not only important public policy for our country and the world, it is important in the context of our leadership in these areas.

The difficulties we now have in the Balkans and the ruptures that have occurred with our relationship with the Russians, it seems to me, ought to emphasize to us how important it is to turn back to these issues of arms control.

We know that the Iranians are testing medium-range missiles. We know that the North Koreans are testing medium-range missiles. We know that India and Pakistan exploded nuclear weapons under each other’s nose, and they do not like each other.

Ought that be of some concern to us? Of course it should. Yet, the Nuclear Test Ban Treaty—the CTBT it is called—the Comprehensive Nuclear Test Ban Treaty is here in a committee without movement. There were no hearings on the treaty in the last session of the 105th Congress. We are now 5 months into the 106th Congress. I
very much want our country to do the right thing: Ratify that treaty before September of this year. Then the committee will have four of the five countries that are signatories to that treaty and who have ratified that treaty, about how it will be brought into force and how it will be verified.

I know some say: Well, if you have a treaty on banning nuclear weapons tests, only those who are willing to ban them will ban them, and you can’t deal with the rogues or the outliers.

Look, if that is the attitude, no arms control of any type is worth pursuing. But, of course, that is absurd. Arms control has brought real rewards and real reductions in nuclear weapons.

I have in my desk here in the Senate a piece of a backfire bomber. I am not at my desk to get it, but it is a piece of a wing of a bomber. Normally you would get a piece of a potential adversary’s bomber wing by shooting down a bomber. We did not do that. We cut the wing off the bomber as part of an arms control agreement in which they reduced the number of bombers, they reduced the number of missiles, and they reduced the number of warheads.

Arms control reductions have worked. So too will the Comprehensive Nuclear Test Ban Treaty. I intend to work with a number of my colleagues to see if we are able, in the coming weeks, to speak with some aggressiveness on this issue here on the floor of the Senate and, on behalf of the American people, to make the case that we ought to have the opportunity to vote on the ratification of the Comprehensive Nuclear Test Ban Treaty. We ought to do it soon.

I have seen the agenda that has been offered by the Majority Leader as to what he hopes to bring to the floor during the discussion of S. 1059. It is not on the floor of the Senate before Memorial Day, before the Fourth of July. This is not on it. It must be. It should be. I hope it will be, because this is a critically important issue to our country and to the world.

Efforts to stop the proliferation of nuclear weapons are critical to our future.

Many countries want them. Only a few countries have access to them. We must, at every step of the way, try to forge arms control agreements that work. The Comprehensive Nuclear Test Ban Treaty is one step in that direction.

Other steps include forging additional alliances with Russia who, as all of us know, is in some significant economic difficulty. We worry a lot about the range of issues with respect to their command and control of nuclear weapons.

But the first step, I think, is for the Senate to be given the opportunity to vote on and ratify the Comprehensive Nuclear Test Ban Treaty. I hope that is sooner rather than later.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Ms. LANDRIEU. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Ms. LANDRIEU pertaining to the submission of S. Con. Res. 33 are printed in today’s RECORD under “Submission of Concurrent and Senate Resolutions.”)

Ms. LANDRIEU. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2000

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will report the bill.

The legislative assistant read as follows:

A bill (S. 1059) to authorize appropriations for fiscal year 2000 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes.

The Senate proceeded to consider the bill.

Mr. WARNER. Mr. President, I ask unanimous consent that the staff members of the Committee on Armed Services appearing on the list appendant to this bill be extended the privilege of the floor during consideration of S. 1059.

The PRESIDING OFFICER. Without objection, it is so ordered.

The list is as follows:

ARMED SERVICES COMMITTEE STAFF
Romie L. Brownlee, Staff Director.
David S. Lyles, Staff Director for the Minority.
Charles S. Abell, Professional Staff Member.
Judith A. Ansley, Deputy Staff Director.
John R. Barnes, Professional Staff Member.
Stuart H. Cain, Staff Assistant.
Christine E. Cowart, Special Assistant.
Judith A. Ansley, Deputy Staff Director.
Linda A. Edwards, Staff Assistant.
Shawn H. Edwards, Staff Assistant.
Pamela L. Farrell, Professional Staff Member.

Richard W. Fieldhouse, Professional Staff Member.
Maria A. Finley, Staff Assistant.
Mickie Jan Gordon, Staff Assistant.
Creighton Greene, Professional Staff Member.
William C. Greenwalt, Professional Staff Member.
Joan V. Grimson, Counsel.
Gary M. Hall, Professional Staff Member.
Larry J. Hoag, Printing and Documents Clerk.
Andrew W. Johnson, Professional Staff Member.
Lawrence J. Lanzillotta, Professional Staff Member.
George W. Lauffer, Professional Staff Member.
Gerald J. Leeling, Minority Counsel.
Peter K. Levine, Minority Counsel.
Paul M. Longsworth, Professional Staff Member.
Thomas L. MacKenzie, Professional Staff Member.
Michael J. McCord, Professional Staff Member.
Ann M. Mittermeyer, Assistant Counsel.
Todd L. Payne, Special Assistant.
Cindy Pearson, Security Manager.
Sharen E. Reaves, Staff Assistant.
Anita H. Rouse, Deputy Chief Clerk.
Joseph T. Sixeas, Professional Staff Member.
Rolland A. Sterling, Professional Staff Member.
Scott W. Stucky, General Counsel.
Eric H. Thoennes, Professional Staff Member.
Michele A. Trafoonate, Staff Assistant.
Roslyne D. Turner, Systems Manager.
D. Banks Willis, Staff Assistant.

PRIVILEGE OF THE FLOOR

Mr. WARNER. Mr. President, I ask unanimous consent that Lawrence Slade, a fellow on the staff of Senator MCCAIN, be granted privileges of the floor during the discussion of S. 1059, the national defense authorization bill.

Mr. WARNER. Mr. President, today the Senate begins consideration of S. 1059, the National Defense Authorization Act for Fiscal Year 2000.

It is my distinct privilege as chairman to make the initial statement regarding this bill. I acknowledge the presence on the floor of my senior and most respected member, Mr. THURMOND, the former chairman of the Armed Services Committee. He will be speaking to the Senate just after the statements by the chairman and the ranking member. I thank Senator LEVIN, the ranking member. We came to the Senate together. I think this is our 21st year. We have collaborated on many, many special assignments given to us by previous chairman and/or ranking members through the years. I value our professional relationship and, indeed, our friendship.

I also wish to pay special acknowledgment to the subcommittee chairmen of the Armed Services Committee. Prior to this year, for some 20 years, I was a subcommittee chairman. I understand the role of a subcommittee chairman on our committee. But I must say,
with great humility, I think each of the subcommittee chairmen this year exceeded beyond any current precedent their belief in their personal and professional staff, in preparing the respective parts of this bill over which their subcommittees have jurisdiction.

We have on our committee today marvelous participation by all members of the committee, on both sides of the aisle. I think our committee has historically operated and tried in every way to be nonpartisan on matters of defense, and we have succeeded.

We are supported by just an extraordinary professional staff, and indeed other Members have their various personal staff members who work with the professional staff, and it is all a team together working to produce not only the bill this year, but the more and responsive to each and every Member of the Senate with regard to their requests, or whatever the case may be, as they relate to the jurisdiction of our committee. So I thank them all at this time, as we begin this very important presentation to the Senate for the year 2000.

I am extremely pleased to observe that this is the first time in nearly 15 years—that the defense budget before the Senate represents an increase in real terms, real dollars in our defense spending. This is a much-needed change, one that recognizes the problems brought on by 14 years of decline in defense spending. This overlaps, as the Chair will quickly recognize, both Republican and Democrat administrations. So this is not a political statement, although I do believe that the cuts under President Clinton have been too long and too deep. It was this year that the President, the urging of a very courageous and fine Secretary of Defense, our former colleague, Secretary Cohen, and, indeed, members of the Joint Chiefs, gave his support to raising defense spending levels.

Today, particularly under President Clinton, who has sent forward our troops into harm’s way more times on more different specific missions than any other President in the history of this country, we are asking every day, every month, every year, more and more of the men and women of the armed services at a time when we have this very, very low level of manning of all branches of our services.

At the same period, this world remains a place of ever increasing violence and uncertainty. As U.S. national interests are challenged throughout the globe, it is incumbent upon our military to be prepared to act when necessary, and act they have, with extraordinary commitment and professionalism.

Our military forces are currently strained by ongoing day-to-day operations. The contingency operations in Bosnia, Iraq, and throughout the Balkan regions are putting a very severe strain on our overall manning and command structure. The families—may I underline “the families”—of these service members. In order for the military to respond effectively, it must receive the resources necessary to equip, train, and operate.

Unfortunately, after years of declining budgets and continually increasing deployments overseas, the military services are showing the beginning signs of this overburdening. Recruiting and retention problems are leading to shortfalls in key skills. Insufficient procurement budgets have left our forces with equipment that is somewhat unreliable because of age and, indeed, more costly every day to maintain. Inadequate infrastructure funding has resulted in the degradation of the facilities in which our military personnel work and live.

We must provide additional resources if we are to preserve this Nation’s security and the readiness of its Armed Forces. That is why this bill before the Senate authorizes $288.8 billion in budget authority for fiscal year 2000—$8.3 billion above the President’s request.

I commend the majority leader of the Senate, Senator Lott, for his support and his leadership. It doesn’t just go back a few weeks; it goes back well into last year. When consulting with him and, indeed, our distinguished chairman at that time, Senator Thurmond, the three of us recognized, together with other leaders in the Senate, such as Senator Stevens and Senator Domenici, that we have to bring about a reversal in this decline of defense spending. Those are the origins of the change of this curve that I want, of the extraordinary relationship that exists today between our committee and the Defense Appropriations Subcommittee. I particularly thank Senator Stevens and his staff director, Steve Cortese, for their cooperation and support throughout the process of putting this bill together. Hopefully, Senator Stevens will follow soon behind with his bill so that the Senate can have both to consider.

At this point I wish to take a moment to give credit to the Joint Chiefs of Staff for helping to secure the additional funding for defense. I think this is the first year in my 21 years that they have stepped forward with such absolute determination, vigor, and professional honesty and integrity and told the Senate—in effect, told the American people—of the concerns they have not only for their personnel but for the lack of funding needed to train the personnel, the research and development, and the procurement decline we have experienced through these years. They came before the Senate committee last September and again in January, and they were very forthright. I don’t doubt for a minute that their determination was the primary reason that President and the Secretary of Defense stepped up and began to support additional funding.

The Secretary of Defense, of course, all along had been counseling the President, but I want to pay special respect to the Joint Chiefs.

It is by necessity that I address this question of the shortfall in defense spending and lay it out historically over these 15 years.

But let no one, let no nation, let no leader, let no rogue or terrorist think for a moment that the men and women of the Armed Forces of the United States, together with their equipment and their readiness and training, aren’t prepared to turn back any threat posed against this Nation, or this Nation together with its allies.

In numerous committee hearings this year, the frightening magnitude of some of these problems was revealed. General Shelton, Chairman of the Joint Chiefs of Staff stated, “Anecdotal and now measurable evidence indicates that our current readiness is fraying and that the long-term health of the Total Force is in jeopardy.” General Shelton further informed the committee that our ability to execute our national military strategy has declined so severely that it would “...* * * take us months, and that time to victory would mean that we would lose terrain that we subsequently would have to regain. It means that the casualties to the U.S. would be higher.” Furthermore, according to the latest Quarterly Force Report: “* * * there are currently 115 CINC-identified readiness-related deficiencies, of which 32 are designated category 1 deficiencies—one which entail significant war fighting risk to execution of the National Military Strategy and are key risk drivers for the MTW, Major Theater War, scenarios.”

During the committee’s hearings on September 29, 1998 and January 5, 1999, the Service Chiefs outlined the essential funding requirements necessary to maintain the readiness of the armed forces. General Shelton and the Chiefs identified a series of readiness and modernization problems that, without additional funding of approximately $17.5 billion per year—Mr. President—$17.5 billion per year—would continue to degrade our military capability.

This figure does not include the additional funding necessary for contingency operations such as those we are facing in Kosovo today and in Bosnia and Iraq. It does not include additional funding for these contingency operations and increased pay and retirement benefits necessary to address the serious problems in recruiting and retention. This would cause additional requirements to exceed $20 billion per year.
While the committee acknowledges that the administration’s budget request contained additional monies for defense preparations—because of the Joint Chiefs and Secretary Cohen’s direct pleas to the President, the proposed budget request for fiscal year 2000 still falls short of meeting the Service Chief’s minimum requirements.

One reason why shortfalls within the budget request is the Administration’s request to incrementally fund military construction. Such incremental funding would actually result in increased costs and delays in the construction of critical facilities. In addition, although the administration’s fiscal year 2000 request represents an increase of approximately $500.0 million over the fiscal year 1999 budget request, it does not adequately fund the quality of life programs—those determined by the members of our committee to have that high priority.

A focus of the committee’s action this year has been to address the serious problems we are having with recruiting and retaining a quality force. In January, the committee moved quickly to report out—and the Senate subsequently passed—S. 4, The Soldiers’, Sailors’, Airmen’s and Marines’ Bill of Rights Act of 1999. The act authorized a 4.8-percent pay raise, reformed the military pay tables, and improved the military retirement system.

The National Defense Authorization Act for 2000—this bill—includes pay and personnel improvements of S. 4, as well as other innovative proposals to offer incentives to potential recruits and active-duty personnel.

We believe the policies recommended in this bill will enable the military services to recruit and retain the number of quality personnel required to meet our national military strategy. That is the heart and soul of this bill. Again, I wish to commend Senator Levin, who will have more to say about this, on his strong work in this area. It is vital that the United States of America—certainly the Senate—stands beside them to see they are properly compensated and that their families receive a fair return for their services and the risks they take. There it is. It is in here. I hope it represents a real increase of about $2.2 percent over the fiscal year 1999 level.

With the additional $8.3 billion over the budget request, the committee has done the following: increased fund military construction; added more than $1.2 billion to primary readiness accounts, including ammunition, training funds, base operations, and real property maintenance.

Two, authorized net increases of $509.3 million for ballistic missile defense programs; $218 million for military space programs and technologies; $111.6 million for strategic nuclear delivery vehicle modernization; and $55 million and a fraction for military intelligence programs; authorized $12.2 billion for atomic energy defense activities under the Department of Energy, an $187 million increase over the 1999 funding levels. That is an area in which the Presiding Officer has taken a great deal of interest through the years.

Recommended a comprehensive set of provisions to enhance safeguards, security, and counterintelligence at DOE facilities in response to recent and very, very grave and serious allegations regarding lack of security at DOE laboratories.

We are learning every day about this breakdown in our counterintelligence. Members are participating in this analysis. It is very serious and requires the closest attention by every single Member of the Senate.

The committee has spent a good deal of time examining the allegations of Chinese espionage at the DOE facilities. The initiatives contained in this bill, I believe, will go a long way to fixing the problems that Congress continues to discover. I say “continues,” because more and more comes out every day.

In addition to the other items contained in this potential force, we have put into statute many of the items contained in the Presidential Decision Directive 61. The Secretary of Energy has indicated his support for our legislation. That is in this bill. We passed these provisions with strong bipartisan support in the committee.

We also authorized a $855 million increase to the procurement budget request and a $213 million increase to research, development, test, and evaluation. Support to prepare ourselves, hopefully, to deter any attacks—that is, if they occur, then the resources of the Department of Defense stand well trained to assist other departments and agencies of this Government in bringing about what solutions we would be faced with in such a horrible situation.

I established a new subcommittee this year called Merging Threats under the very capable leadership of the Senator from Kansas, Senator Roberts. He will have more to say today about the very valuable work of this subcommittee and its ranking member and other Members toward what I have described in meeting this particular threat here at home.

These particular teams, each comprised of 22 full-time National Guard personnel specifically trained and equipped to deploy and assess suspected nuclear, biological, chemical, and radiological events in support of local first responders—that is, the local police, the local rescue, hospitals, volunteers all across our country; that is a local responding—would provide greater team coverage nationwide and greatly increase our ability to respond quickly to terrorist attack in the United States of America.

Now, I note that the National Guard is involved. Throughout this bill, throughout current military history, throughout the entire history of the United States, the role for the Guard and Reserve forces. They comprise the total force, when you calculate the military capabilities of this country, and as each year goes by, more and more responsibility must be shared by the Active Forces with the Guard and the Reserve. They have performed brilliantly.

Further, we establish a Department of Defense central transfer account for all funds to combat terrorism both at home and abroad, establish an information assurance initiative to strengthen DOD’s information assurance program, and add an additional $120 million to the administration’s request for information assurance programs, projects, and activities.

The committee also considered additional base closings. This is a very serious subject, and my colleague, Mr. Levin, will have more to say about this, as will Senator McCain. During markup, the committee addressed two amendments submitted by these Senators. Both were not voted favorably by the committee.
Speaking for myself, I have historically supported BRAC as a means of reducing excess military infrastructure.

As Secretary of the Navy, I remember vividly having closed the Boston Naval Shipyard, one of the most significant base closings since World War II. I know how difficult it is on the local community and the State to see one of these facilities close. It is not just a matter of economics, although that is very serious; it is a matter of pride; it is a matter of patriotism; it is a matter of generations of association of the men and women of the military forces who were trained at and operated these bases. It goes back into the sinews of our history.

Today, it is quite clear that the infrastructure and our inventory exceeds that which is needed by the current levels and missions of our Armed Forces. Much of our war-fighting capability has changed dramatically. I remember the first BRAC. I was coauthor of that legislation. We closed a number of the old cavalry outposts that were built for the sole reason of protecting the territories when Americans were settling the West.

By the time we got around, I think, 10, 12 or 15 years ago, to closing these bases, they had long since outlived their military contribution to the overall security of our Nation. Historically, the country has always been behind.

Again, I was the coauthor of the last BRAC bill. However, this time I declined and voted against the BRAC legislation for reasons that I will state. I think the amendment is brought to the floor based on a very sound foundation. I believe the bill before the Senate is vital first step in enhancing military readiness, modernizing our forces, and preparing our service members and their families.

I urge my colleagues to send a strong signal of support, a strong signal of support to the men and women of the Armed Forces bravely performing their responsibilities as their forefathers have done throughout the history of this great Nation, formed 209-plus years ago. I anticipate with this bill and the bills that will follow we will always keep America strong, a beacon of hope, freedom and security to the whole world.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I am pleased to join the chairman of the Armed Services Committee in bringing S. 1059 to the floor. This is our fiscal year 2000 defense authorization bill. It is the product of many months of hard work by the committee under the leadership of our new chairman, Senator WARNER, who has taken the baton from Senator THURMOND, who had done an extraordinary job. Senator THURMOND, who is on the floor, was chairman of our committee for many years. This year he turned that responsibility over to Senator WARNER. Mr. President, Senator WARNER has carried on with great strength and great commitment that is in keeping with the leadership Senator THURMOND showed when he was chairman of this committee. I commend Senator WARNER for carrying on that tradition of Senator THURMOND, and I think, those before Senator THURMOND.

As Senator WARNER has pointed out, our staffs have been instrumental in helping us bring this bill to the floor. We had a unanimous vote for this bill in committee. I think that is a real testament to the chairman's leadership. I commend him for it.

Mr. WARNER. Mr. President, if the Senator will yield, it was a partnership between the Senator from Michigan and myself with all members of our committee.

I think in the context of talking about Senator THURMOND, in the 21 years we have been here, he served with the chairmen before Senator THURMOND—Senator Tower, Senator Goldwater, Senator Stennis. Indeed, both you and I were well trained by these very, very strong and able leaders in the defense of our Nation.

Mr. LEVIN. Mr. President, that is a view I fully share.

The bill we bring to the floor is a sound bill that goes a long way to meet the priorities which have been established by Secretary Cohen and the Joint Chiefs of Staff. It is brought to the floor based on a very sound foundation because General Shelton, the Chairman of the Joint Chiefs, has assured us, the committee, assurance the Congress, and assured the Nation our forces are fundamentally sound and fundamentally capable of fulfilling their role in our national military strategy. So we start with that sound foundation. Obviously, there are some places where we have to put some additional resources. But the foundation is a sound one and the Chairman of our Joint Chiefs has assured us of that.

So, what we seek to do in this bill is build on that sound foundation. I believe we have done so. In accordance with the 2000 budget resolution, the bill includes an $8 billion increase in budget authority above the level provided in the President's budget.

Unlike some of the budget increases in the past years, the added money in this bill will be spent in a much more responsible way than we have sometimes done in the past, because the money we have added this year is entirely spent for programs for which the Department of Defense has indicated a real need. The bottom line is, this bill will improve the quality of life for our men and women in uniform. It will improve the readiness of our military. It will continue the process of modernizing our Armed Forces to meet the threats of the future.

 Virtually all the items for which the committee added funding were taken from either the Services' unfunded priority list for fiscal year 2000 or from the outyears of the future years' defense program, the so-called FYDP, which we deal with in the Armed Services Committee. These add-ons include substantial increases for the highest priority readiness items identified by the Joint Chiefs of Staff, including an added $554 million for real property maintenance, $420 million for base operations, $120 million for ammunition, $73 million for spare parts, $60 million for reserve component training, $40 million for depot maintenance. This money will significantly enhance the ability of our Armed Forces to carry out their full range of missions.

These are areas where we sometimes fall short. These are not the glamorous areas. There are a lot of people lobbying for them. But they are critically important areas—real property maintenance, base operation, spare parts, reserve component training, depot maintenance.

In addition, the bill includes the triad of pay and retirement initiatives sought by Secretary Cohen and by the Joint Chiefs—a 4.8-percent military pay raise for fiscal year 2000, reform of the military pay tax that pays for midcareer NCOs and officers, and changes to the military retirement system. These changes will, hopefully, help address recruiting and retention problems we have in the services.

When S. 4 was considered on the Senate floor, we indicated then we wanted to do everything we could to ensure the men and women in uniform received fair compensation for the service they provide to our country. At that time, I expressed concern regarding with the pay bill outside the context of the defense authorization bill and before Congress had passed a budget resolution. We have now revisited this issue in the context of the budget resolution and the authorization bill. I am pleased to report the changes in military pay and benefits proposed in this bill are all paid for.

Unfortunately, the committee has not yet been able to find a way to fund one of the most important aspects of S. 4, and that aspect is Senator CLELAND's proposals to enhance the GI bill, which is so important in providing educational opportunities to the men and women in our Armed Forces. These provisions, Senator CLELAND's proposal, would provide substantial incentives to help address the current recruiting and retention problems which face the military services while offering our men and women in uniform an educational opportunity in the proud tradition of our country. I expect Senator CLELAND will raise this issue again as we debate the bill on the floor.
May 24, 1999

I sincerely hope we will find a way to adopt these proposals. They are very important proposals. They are important to the retention we need to enhance. They would be important even if there were not a retention problem, in terms of opportunities we should offer to the men and women in our Armed Forces.

The bill reported by the committee also provides full funding for the Department of Defense Cooperative Threat Reduction Program with Russia and with other countries of the former Soviet Union. Unfortunately, one of the three companion programs at the Department of Energy received substantially less funding than requested by the administration. The bill also contains some unfortunate restrictions on the DOE Nuclear Cities Program, which I hope we will be able to address on the Senate floor.

The Cooperative Threat Reduction Program and the related Department of Energy programs are one positive cornerstone of our relationship with Russia. They are a vital role in our national security by reducing the threat of the proliferation of weapons of mass destruction from Russia and from rogue nations with which Russia might be pressured to form closer ties in the future.

One area where I am most disappointed with the outcome of the markup is base closures, and our chairman has made reference to this issue. The case for additional rounds of base closures is overwhelming. The Secretary of Defense has told us that more base closures are critical to meeting our future national security needs. The Secretary’s letter reads, in part, as follows:

[No other reform—]

The two additional rounds under consideration by the committee will ultimately save $25 billion and generate $3.6 billion annually. Both the Congressional Budget Office and the GAO affirm the reasonableness and credibility of our estimates for savings from BRAC. In exchange for property that we do not need and, at the same time, say we have needs that must be addressed. We cannot have this both ways. We do have needs that must be addressed, and we have infrastructure we do not need which, if removed, will provide the resources to meet those needs.

Our top uniformed officers tell us the following:

BRAC is the single most effective tool available to the Services to realign their infrastructure to meet the needs of changing organizations and to respond to new ways of doing business. No other initiative can substitute for BRAC in terms of ability to reduce and realign. Simply stated, our military judgment is that further base closures are absolutely necessary.

Absolutely necessary is what the chairman and the members of the Joint Chiefs tell us.

These are not words of subtlety; these are very direct words which come from our uniformed leadership in this country, and we should heed them. I hope we will do that during consideration of this bill.

Mr. President, I ask unanimous consent that the two letters to which I have referred, in addition to a letter from the Service Secretaries dated May 11, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

Hon. Carl Levin,
Ranking Member, Armed Services Committee, U.S. Senate, Washington, DC.

Dear Carl:

As I have on many occasions, I want to convey my strong support for approval of the FY 2000 Department of Defense Authorization Bill which the Senate Armed Services Committee is marking up this week.

As you are aware, the first three rounds of BRAC have already yielded some $3.9 billion in savings in FY 1999. The second three rounds of BRAC will produce another $25 billion through 2003. These savings have proven absolutely critical to sustaining ongoing operations and current levels of military readiness and the quality of life of our men and women in uniform. Even still, the General Accounting Office (GAO) points out that the Department of Defense continues to retain excess infrastructure, which we estimate at roughly 23 percent beyond our needs.

In my view, we should aggressively reform the Department’s business operations and support infrastructure to realize savings wherever possible. Nevertheless, no other reform even comes close to offering the potential savings afforded by even a single round of BRAC. There simply is no substitute for base closure and realignment.

The two additional rounds under consideration by the Committee will ultimately save $20 billion and generate $3.6 billion annually. Both the Congressional Budget Office and the GAO affirm the reasonableness and credibility of our estimates for savings from BRAC. In exchange for property that we do not need, we can direct $3.6 billion on an annual basis into weapons that give our troops a life-saving edge, into training that keeps our forces the finest in the world, and into the quality of life of military families.

I well appreciate both the difficult decision you and your colleagues now face, as well as the legitimate concerns of bases and communities potentially affected by additional rounds of BRAC. At the same time, many success stories across the nation prove that base closure and realignment can actually lead to increased economic growth. In fact, the GAO recently noted that, in most post-BRAC communities incomes are actually rising faster and unemployment rates are lower than the national average. Moreover, the Department continues to examine the process, making it even easier for communities to dispose of base property and to create new jobs in the future.

The Department’s ability to properly support America’s men and women in uniform today and to sustain them into the future hinges on our ability to measure the critical savings that only BRAC can provide. As such, the Chairman and Joint Chiefs are unanimous in their support of our legislative proposals, and I most strongly solicit your support and that of your colleagues.

BILL COHEN.

CHIEF OF STAFF,

Hon. John Warner,
Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.

Dear Mr. Chairman: We are writing to you to express our strong and unified support for authorization for additional rounds of base closures when the Senate Armed Services Committee marks up the FY 2000 Department of Defense Authorization Bill next week.

Previous BRAC rounds are already producing savings—$3.9 billion net in 1999 and $20 billion through 2003. We believe that two additional rounds of BRAC will produce even more savings—an additional $3.6 billion each year after implementation. This translates directly into the programs, forces, and budgets that support our national military strategy. Without BRAC, we will not have the maximum resources to field and operate future forces while protecting quality of life for our military members. We will also be less able to provide future forces with the modern equipment that is central to the plans and vision we have for transforming the force.

These are our top military officials telling us about the importance of additional rounds of base closures, to remove the unneeded infrastructure that drains resources that are needed for modernization, for readiness, for morale, for training.

We cannot justify maintaining excess infrastructure that we do not need and, at the same time, say we have needs that must be addressed. We cannot have this both ways. We do have needs that must be addressed, and we have infrastructure we do not need which, if removed, will provide the resources to meet those needs.

Our top uniformed officers tell us the following:

BRAC is the single most effective tool available to the Services to realign their infrastructure to meet the needs of changing organizations and to respond to new ways of doing business. No other initiative can substitute for BRAC in terms of ability to reduce and realign. Simply stated, our military judgment is that further base closures are absolutely necessary.

Absolutely necessary is what the chairman and the members of the Joint Chiefs tell us.

These are not words of subtlety; these are very direct words which come from our uniformed leadership in this country, and we should heed them. I hope we will do that during consideration of this bill.

Mr. President, I ask unanimous consent that the two letters to which I have referred, in addition to a letter from the Service Secretaries dated May 11, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

Hon. Carl Levin,
Ranking Member, Armed Services Committee, U.S. Senate, Washington, DC.

Dear Carl:

As I have on many occasions, I want to convey my strong support for approval of the FY 2000 Department of Defense Realign-
maximum possible resources to field and operate future forces while protecting quality of life for our military members. We will also be less able to provide future forces with the modern equipment that is central to the plans and vision we have for transforming the force.

The Department’s April 1998 report to Congress demonstrates that 23 percent excess capacity exist. The Congressional Budget Office agrees that our approach to estimating excess capacity yields a credible estimate. The General Accounting Office also agrees that DOD continues to retain excess capacity.

The importance of BRAC goes beyond savings, however. BRAC is the single most effective tool available to the Services to realign their infrastructure to meet the needs of changing organizations and to respond to new ways of doing business. No other initiative can substitute for BRAC in terms of ability to reduce and reshape infrastructure. Simply stated, our military judgment is that further base closures are absolutely necessary.

BRAC will enable us to better shape the quality of the forces protecting America in the 21st century. As you consider the 2000 Defense Authorization Act, please be assured that your services are working closely with the Department of Defense BRAC Office to identify the best use of our excess capacity. We estimate that 47 percent of the time and real estate excess capacity could be divested in future rounds of BRAC. In total, the BRAC process could provide almost $20 billion in savings through the implementation period and over $3.6 billion thereafter in annual recurring savings.

We remain fully committed to assisting communities recover economically from BRAC actions. Right now we are concentrating on integrating property transfer to further enhance economic redevelopment.

We ask that you support legislation for future BRAC rounds so we can continue readiness, modernization and quality of life improvements well into the 21st century.

Richard Danzig, Secretary of the Navy; P. Whitten Peters, Acting Secretary of the Air Force; Louis W. Caldera, Secretary of the Army.

Mr. LEVIN. Mr. President, as our chairman indicated, the committee spent a great deal of time addressing security concerns at the Department of Energy. The revelations of Chinese espionage directed at the DOE nuclear weapons program underscore 20 years of failure by the FBI and the Department of Energy, over the course of three administrations, to take adequate steps to address security problems in the laboratories.

This problem has been ongoing for 20 years, through three administrations, and we have not seen, until a Presidential decision directive last year, an effort to significantly tighten security at the Laboratories.

We have in that Presidential decision directive, which is called PDD-61, a strong effort by this administration to tighten that security. What we do in this bill is to supplement those efforts, and we do so in a way which does not undermine the ability of the Department of Energy to perform its vital national security function.

I commend our chairman for his leadership in this effort. It is important that we do strengthen the security at the Department of Energy. It is important that we take the effort which finally was made when this administration signed a Presidential decision directive, and the President did so, but that we build additional safeguards which need to be in law.

Here is what we have done. We have written much of that Presidential decision directive into law. We have established an outside Commission on Safeguards, Security and Counterintelligence at the Department of Energy facilities. We have required a certification of the security aspects of the lab-to-lab and foreign visitors programs from the Secretary of Energy, the Director of the CIA, and the Director of the FBI.

The bill reported by our committee includes many other important provisions which will contribute to the national security and the effective management of the Department of Defense.

Some of these provisions include a provision establishing a single account for all Department of Defense funds to combat terrorism, both at home and abroad; a series of provisions to improve the effectiveness and efficiency of health care provided to service men and women under the Tricare Program; a provision promoting reform of Department of Defense financial management systems; a series of provisions promoting more effective management of defense laboratories and test and evaluation facilities; a provision extending the Department’s mentor-protege program for small disadvantaged businesses.

I conclude by, again, thanking our new chairman, Senator WARNER, for the manner in which he and his staff have handled this bill. He has maintained a great tradition of this committee, working with all members to make sure that all voices are heard in the effort which will always be needed to protect the Nation’s security.

I know there is going to be vigorous debate on some provisions of this bill. We hope that Senators will, indeed, come to the floor and offer their amendments so that we can complete Senate action on the bill in a timely manner and go to conference.

But whatever the outcome of the debate on specific amendments or the very essence of that debate, I think I can say unequivocally that our chairman, following in the footsteps of Senator THURMOND, has done so with tremendous strength and has, in doing so, enhanced the security of this Nation.

I yield the floor.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. I thank my colleague. I think his statement reflects the partnership in which we have worked and will continue to work.

We do urge Members to bring their amendments to the floor. Currently, we have the following—I share with my colleague, and I think he is aware of this: Senator ROBERTS has an amendment, Senator SPECTER has an amendment, and Senator ROTH has an amendment, the subject matter I am sure the Senator is familiar with.

It is the desire of the minority leader, and I presume with the concurrence of the minority leader, that votes on these amendments will occur not before 5:30, but as soon thereafter as we can package them and have them ready. So, that is the plan now.

I yield the floor.

I see our distinguished former chairman, the senior Senator from South Carolina.

Mr. THURMOND addressed the Chair.

Mr. LEVIN. Will the Senator yield for one moment?
Mr. WARNER. Yes.
Mr. LEVIN. Will the Senator yield for a question?
Mr. THURMOND. Certainly.
Mr. LEVIN. I thank you.
I want to withhold comment on what the chairman just said in terms of sequence votes, because we are checking with some Senators on this side who may wish to debate one or more of those amendments to which the Senator has referred. We have not seen final language on any of them, I do not believe, so I want to at least alert the chairman I would not want my silence to indicate concurrence in what he indicated and said until we have had a chance to review that. There is the possibility we would want to withhold votes on those until tomorrow, for instance, but we need to see the language on those amendments.

Mr. WARNER. Mr. President, we will provide our distinguished colleague with those amendments. I believe at the desk now is the Specter-Landrieu amendment. So one is before the Senate. I am working with Senator ROBERTS on a revision of his. I presume that the Roth amendment is pretty well in final form. I hope someone can inform the Senator from Virginia as quickly as possible as to the text of the amendment. I yield the floor.

Mr. THURMOND addressed the Chair. The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Senator WARNER and Senator LEVIN and my colleagues, as the Senate begins consideration of the national defense authorization bill for fiscal year 2000, I join my colleagues on the Armed Services Committee in congratulating Chairman WARNER and the ranking member, Senator LEVIN, on their leadership in preparing a strong, bipartisan defense bill. As the former chairman of the Armed Services Committee, I am well aware of the hard demands that they faced in the preparation of the bill and believe they achieved all the objectives the committee established at the start of the year.

At the Armed Services Committee hearing on September 29, 1999, General Shelton, the Chairman of the Joint Chiefs of Staff, stated:

It is the quality of the men and women who serve that sets the U.S. military apart from all potential adversaries. These talented people are the ones who won the Cold War and ensured our victory in Operation Desert Storm. These dedicated professionals make it possible for the United States to accomplish its missions worldwide. They are carrying on the tradition of service to the Nation.

The national defense authorization bill for fiscal year 2000 ensures that our Armed Forces can continue to carry out their global responsibilities by focusing on readiness, future national security threats, and quality of life. I am especially pleased with the focus on the quality of life issues. Our military personnel and their families are expected to make great sacrifices and to serve their country and nation. Therefore, I strongly support the 4.8 percent pay raise, the changes in the retirement system, and the authority for military personnel to participate in the Thrift Savings Plan. These are critical provisions, which when coupled with the additional family housing and barracks construction, will result in a well-earned improvement in the standard of living for all of our military personnel.

During the past several years many Senators have raised the specter of the declining readiness of our Armed Forces. The administration had continually denied this assertion until last fall, when each of the Service Chiefs— I repeat, each of the Service Chiefs—acknowledged that readiness was in fact a serious problem within our Armed Forces.

General Reimer, the Army Chief of Staff stated: ‘Your Army is underfunded today to adequately meet all the competing demands.’ The Chief of Naval Operations, Admiral Johnson, stated: ‘I am deeply concerned that we are at the beginning of a free-fall in terms of readiness.’ And General Krulak, the Commandant of the Marine Corps, put it in these words: ‘We are ready today, but in order to maintain readiness and the current budgetary shortfall and those of previous years, we are effectively mortgaging the readiness of tomorrow’s Marine Corps.’

The defense bill before us is a significant step toward correcting the readiness issues identified by our Service Chiefs. It increases primary readiness accounts by $2 billion; is increases the procurement budget by more than $1.5 billion and increases research and development by more than $200 million. Despite these significant funding increases, I must emphasize that they are but a first step toward reversing the readiness trends. We cannot be satisfied with these increases and ensure continued robust funding increases for these programs in future bills.

Since the fall of the Berlin Wall our Nation has faced ever changing threats. Among these are the spread of nuclear and weapons of mass destruction, international terrorism, and the ever increasing sophistication of weapons in the hands of countries throughout the world. The bill provides the funding for the Department of Defense and the Department of Energy to ensure that the Nation’s military forces, both active and reserve, are prepared to counter these threats as we enter the new millennium.

As with all legislation, there are provisions in this bill that I did not support during the markup that I hope will be amended. Specifically, I am opposed to the provision that would limit the ability of the Federal Prison Industries to sell products to the Department of Defense and the provision in Title C of the bill regarding Tritium production. In my judgement, the Armed Services Committee is overstepping its jurisdiction by legislating on the Federal Prison Industries, which is under the purview of the Judiciary Committee. Regarding Tritium production, I am concerned that the provision has been weakened to the point where the reliability and viability of our Nation’s nuclear weapon’s stockpile may be at risk. Unless we have strong language to support the Secretary of Energy’s decision to complete design for the Advanced Tritium Production source there is a strong possibility that those who oppose a reliable and effective nuclear stockpile will delay tritium production beyond the time we need tritium.

I have previously congratulated the chairman and ranking member for their work on this bill. Before closing, I want to congratulate each of the subcommittee chairmen: Senator SMITH, Senator INHOFE, Senator SNOWE, Senator SANTORUM, Senator ROBERTS, and Senator ALLARD, and the ranking members for their contribution to this bill. Their leadership and work provided the foundation for this legislation. Finally, I believe it is important that we recognize Les Brownlee and David Lyles for their leadership of a very professional and bipartisan staff. I desire to thank Colonel George Lauffer for his fine work.

This national defense authorization bill is a strong and sound bill. I intend to support it and urge my colleagues to join me in showing our strong support for the bill and our men and women in uniform.

Thank you, Mr. President. I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, we thank our distinguished former chairman for that powerful statement. His firm hand and leadership are very much a part of the everyday activities of the Senate Armed Services Committee. I can think of no Member of this body who has served in uniform longer than our distinguished colleague, who entered, in my recollection, through the Army Reserve. I was there at a ceremony.

What was the year that you entered the Army Reserve, Senator? Anyway, way back.

Mr. THURMOND. What was the question?

Mr. WARNER. What was the year you entered the Army Reserve? I recognize I was there when we recognized—

Mr. THURMOND. I finished college in 1923 and became 21 years of age in December of that year.
Mr. WARNER. Isn’t that interesting. I remember when we gathered on the steps of the West Front of the Capitol to recognize the Senator for his service. He fully understands the commitments made by men and women in the Armed Forces through several generations. That historical knowledge has been brought to bear many times on the decisionmaking responsibilities of the Senate Armed Services Committee.

Mr. THURMOND. Thank you very much.

Mr. WARNER. Mr. President, seeing no other Senator at the moment seeking recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. WARNER. Mr. President, I ask unanimous consent that Bill Adkins, a legislative fellow of Senator Abraham’s staff, be granted floor privileges during the consideration of S. 1059.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERTS addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

AMENDMENT NO. 377

(Purpose: To express the sense of the Senate regarding the legal effect of the new Strategic Concept of NATO)

Mr. ROBERTS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. ROBERTS], for himself, proposes an amendment numbered 377.

Mr. ROBERTS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(c) REPORT.—Together with the certification under subsection (a)(1), the President should submit to the Senate a report containing an analysis of the potential threats facing NATO in the first decade of the next millennium, with particular reference to those threats facing a member nation or several member nations where the commitment of NATO forces will be “out of area”, or beyond the borders of NATO member nations.

Mr. WARNER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Mr. ROBERTS. Mr. President, before I make remarks on behalf of the amendment, which pretty well dovetails the second-degree amendment introduced by the distinguished chairman of the committee, I would like to pay a deserved tribute to our distinguished chairman, the Senator from Virginia, for his leadership in forging a defense bill during a time of great, great challenge.

During a time when our military is stressed, strained, and some of us believe hollow, our Nation needs those who will take a stand—a stand, if you will—to really try to fulfill the first obligation of our Federal Government, and that is to safeguard our national security.

Our new chairman of the Senate Armed Services Committee, in the tradition of Senator Thurmond, has been the right man at the right time for the right job. He has, without question, affirmed the standing of the influence of the committee. He has actually given the committee—in this case, the creation of a new Emerging Threats Capabilities Panel—a chance to take a look at really what our Nation faces in terms of our national security threat in the post-cold-war period. I want to thank him publicly for discussing with me the possibility of being the chairman of that committee and for that appointment.

I think the thing I want to mention the most in regard to the chairman’s leadership and also that of Senator Levin is the pay raise and retirement reform contained in this bill. After hearing from the Joint Chiefs and knowing that we have a crisis in regard to retention of our men and women in uniform, the chairman, actually during the impeachment process, sat us down at the table and really hit the ground running.

Despite the criticism of those who wanted a much larger bill, a more comprehensive bill, to address all of the problems that we face in the military and by the way I mention that these challenges include the quality of life issues, the health care issues, the issue of the operations tempo, the issue of the personnel tempo, and that of mission quality. There are those who said, we are not quite sure that this pay raise or this retirement reform will really address the retention problem. There are others who said they wanted to study it further. I suggest to them that if we studied it actually further, we would be in such a problem with retention we would be past the marrow of the bone.

JOHN WARNER really took the issue by the horns and provided the leadership. We are sending a message to every man and woman in uniform, saying that we care and that we act. That is, as I said before, despite the impeachment proceedings and despite a very, very busy schedule here in this Congress.

So thank you to JOHN WARNER and also to Senator Levin, whose expertise in regard to his oversight and his policy actually keeps the committee with very strong leadership. It is a privilege to serve with both Senators. I will make a statement at a later time in regard to the efforts by Senator BINGaman, who is the distinguished ranking member of the Emerging Threats Subcommittee, and what we think we have been able to achieve.

Mr. President. I yield with the support of the chairman of the committee, as well as my colleague from Georgia, Senator Cleland, to offer an amendment to this bill, S. 1059. It is my hope that this amendment will reaffirm the Senate’s important responsibility of either rejecting or consenting to fundamental changes in the letter and spirit of existing treaties—in particular, if those changes actually broaden the nature of U.S. military missions,
responsibilities, and obligations overseas.

I ask my colleagues’ support for a simple sense-of-the-Senate resolution that calls for complete transparency on the part of the President and Senate consideration in regard to the de facto editing of the original North Atlantic Treaty.

My sense-of-the-Senate simply asks the President to certify whether the new strategic concept of NATO, this formalization of new and complicated United States military responsibilities in Europe, as evidenced by the war in Kosovo and the possibility of future editor a document that obligates the United States in any way, shape, or form. If so, my sense-of-the-Senate affirms that this body be given the opportunity to debate, to honest or reject the new blueprint for future NATO actions. These future actions will undoubtedly include substantial components of our own Armed Forces engaged completely outside the province of the original treaty. We start today in regard to the ongoing operations in Bosnia, Albania, Macedonia, and over the Federal Republic of Yugoslavia. These deployments are dominated by U.S. forces, ostensibly because of our responsibilities as a NATO member.

During the cold war, the Congress and the American people believed the original NATO Treaty was in our vital national security interest. I am not so sure we know now whether these new NATO missions meet that important criteria for the possibility of spilling American blood and treasure. There has been a transformation Mr. President, and, while yes the world has transformed since 1949, Congress still needs to be given the opportunity to formally review and endorse what we’re signing up for and committing to do in Europe and elsewhere around the world. Given this situation, I believe it is imperative the Senate ask the President to formally certify whether the new Strategic Concept, which was adopted during the 50-year anniversary here in Washington about a month ago, represents commitments by the United States, and, if so, submit the document for formal congressional scrutiny.

Let’s be honest, Mr. President. If the new Strategic Concept of 1999 is the particular direction we’re headed in regards to Europe, let’s give this body and the American people a chance to formally agree or disagree. If only for budgeting reasons, let’s understand what we are committing to do so we can plan and budget for it.

In this discussion, we must not lose sight of the fact that NATO is a military alliance and the new Strategic Concept of 1999 is its guide for the 21st century. This is a very important document the nineteen nations of NATO have drafted and I encourage every Senator to examine it closely, comparing it with the original North Atlantic Treaty. I believe Senators will find the new Strategic Concept of 1999 is completely inconsistent with the spirit of the original treaty in critical areas. That means the treaty has been changed, albeit rather quietly, during the 50-year anniversary celebration, and the United States has formally committed to a new strategic direction in Europe.

It’s time for the Senate to stop, take notice of what is happening to NATO, and go on record asserting its constitutional role.

Through the new Strategic Concept of 1999, President Clinton, along with the member nations of NATO, has quite possibly taken the commonsense notion of mutual consultation for self-defense and humanitarian relief operations. As a matter of fact, I think the Strategic Concept is reflective for the most part in reference to a speech the President gave over 2 years ago at The Hague outlining what he thought the Strategic Concept and the new goals of NATO should be.

Additionally, I believe the new Concept document is not merely a tool for justifying existing extraterritorial NATO deployments of American military forces, but is a precedent toward formalizing as U.S. policy the lazy tendency of this Administration and yes, others to rely increasingly on the military services to solve social and political problems in Europe and elsewhere. Problems, I would say, Mr. President, the instruments of power are clearly better suited for those tasks.

I want to assure my colleagues, Mr. President, I have decided to submit my amendment as a Sense of the Senate because my objective is not to brace the President to do something he, in his authority as Chief Executive to represent the nation in foreign affairs, has decided not to do or would not do. However, I am trying to encourage the Administration to be clear with the Congress and the American people—indeed to seek our consent and the public’s approval—in regards to this national security policy divergence.

I am sure opponents of my amendment will argue that the new Strategic Concept of 1999 is only that, a concept, an intellectual exercise, mere musings as to future security challenges in the North Atlantic region. I disagree. My colleagues, do not let the title fool you! The new Strategic Concept states its intent to be a “guide that expresses NATO’s enduring purpose and nature and its fundamental security tasks, identifies the central features of the new security environment, specifies the elements of the Alliance’s broad approach to security, and provides guidelines for the future adaptation of its military forces.” That is a direct quote.

For a Congress constitutionally required to provide funding for and oversight to the Departments of State and Defense, those are specific purposes and very clear intentions. NATO’s military forces.

I am sure some opponents will also argue that regardless of the specificity of the new Strategic Concept, it is not a formal treaty and therefore should not be sent to the Senate. I really think that is putting the cart before the horse. First, let’s get our definitions straight. The U.S. Department of State Circular 175, Procedures on Treaties, defines a treaty as “an international agreement regardless of title, if the United States has formally committed to a new strategic direction in Europe takes place only after the Senate has given its advice and consent.”

I will certainly concede that the new Strategic Concept is not a treaty per se. But is this only because the Senate has not given nor had an opportunity to give its advice and consent. If we formally adopted the logic that the President should only send actual treaties to the Senate, the treaty clause of Article II of the Constitution would become irrelevant, contrary to the framers’ intent.

My point is that the decision of the President to submit an international agreement to the Senate is largely a political decision. Nonetheless, when a document tacitly commits the United States to a new strategic direction in Europe, it should contain the Senate’s stamp of approval. It does not have it.

Opponents of my amendment will further argue that the new Strategic Concept is much a less a potential treaty. I believe any document that contains even tacit commitment by the United States and other nations to engage in new types of NATO missions outside the domain of the original treaty, as well as the commitment to structure military forces accordingly, can be considered an international agreement.

Incidentally, the U.S. Department of State Circular 175, Procedures on Treaties, also sets forth eight considerations available for determining whether an agreement or an accord should be submitted to the Senate for ratification. Among them: The extent to which the agreement involves commitments or risks affecting the United States as a whole—if that is not a description of Kosovo, I do not know what it is—whether the agreement can be given effect without the enactment of subsequent legislation by the Congress; past practices as to similar agreements and the preference of Congress as to a particular type of agreement.

In mentioning these criteria, I must note that last year Senators CLELAND,
SNOWE, and I attempted to clarify administrative policy in the use of military forces by attacking several conflicting requirements to fiscal year 1999 defense spending legislation.

My question is: In order to determine what the strategic plan is, what our obligations are, what we are doing in Kosovo and the various areas of the world, does that have to be done each year? Let’s get the Senate involved at the outset. It is the Strategic Concept that is at the genesis of this kind of policy.

The first State Department consideration I mentioned, the new Concept of 1999 and its predecessor document, without question, involved commitments and risks affecting the Nation as a whole. In fact, I only do we see the more succinctly. That is one of the reasons our distinguished chairman, Senator WARNER, wrote to the administration on this issue as the recent NATO summit, the 50-year anniversary, approached. He knew the document’s revision concerned the kind of policy we need to have a debate here in the Congress before moving forward with the other 19 nations. I commend our chairman for his knowledge, his foresight, and his leadership on this issue.

As for the second State Department consideration I mentioned, the new Concept of 1999 probably cannot be given effect without the enactment of subsequent legislation by the Congress—without, that is, huge defense appropriation and authorization acts that try to balance the readiness and the modernization and quality-of-life requirements which this bill tries to address with numerous peacekeeping enforcement missions.

Members on both sides of the aisle may also argue—in good faith, I might add—that the Resolution of Ratification for an expanded NATO which passed this body last spring contained conditions for revising NATO’s Strategic Concept which, if efficiently constituted a Senate endorsement of the new Strategic Concept of NATO.

Again, I disagree. When we compare the actual text of the new Concept and the Resolution of Ratification adopted only last year, I think we see the complete abandonment of the original 1949 treaty, but it is also a document that has gone way beyond what the Senate actually intended.

Section 3 of the Resolution of Ratification as passed by the Senate April 30 of last year contained the following conditions for the new Strategic Concept. Let’s compare these with the Concept document. The Ratification Resolution stated:

(i) First and foremost a military alliance: NATO is first and foremost a military alliance—NATO’s success in securing peace is predicated on its military strength and strategic unity.

(ii) Principal foundation for defense of security interests of NATO members: NATO serves as the foundation collectively defending the security interests of its members against external threats.

However, Senators, I urge you to read this—this document is on your desks—in the Strategic Concept adopted at the 50th anniversary celebration in Washington last month:

Strategic Concept point #24: Any armed attack on the territory of the Allies, from whatever direction, would be covered by Articles 5 and 6 of the Washington Treaty. However, Alliance security must also take account of the global context (emphasize the word “global”). Alliance security interests can be affected by other risks of a wider nature, including acts of terrorism, sabotage, organized crime, and by the disruption of the flow of vital resources. The uncontrolled movement of large numbers of people, particularly as a consequence of armed conflicts, can also pose problems for security and stability affecting the Alliance. Arrangements exist within the Alliance for consultation among the Allies under Article 4 of the Washington Treaty and, where appropriate, co-ordination of their efforts in addressing their own specific risks of this kind.

I must point out, that last phrase is completely original. There is nothing in article 4 of the original NATO treaty even remotely similar to the term “the coordination of their efforts including their responses to risks of this kind.” It is just not there. I cannot imagine a more substantive change to the NATO treaty than adding a collective response obligation for the United States to respond to terrorism and other asymmetrical threats not only in Europe but all around the globe.

The Resolution of Ratification continues—again, that was the expansion treaty that was passed as of last year:

(iii) Promotion and protection of United States vital national security interests: The Strong United States of NATO actually promotes and protects United States vital national security interests.

(iv) United States leadership role: [Now, this is in last year’s language in regard to the ratification of the expansion.] The United States maintains its leadership role in NATO through the stationing of United States combat forces in Europe, providing military commanders for key NATO commands, and through the presence of United States nuclear forces on the territory of Europe.

However, 1 year later in the Strategic Concept, point No. 18—and I urge Senators to pay attention to it:

As stated in the 1994 Summit declaration and reaffirmed in Berlin in 1996, the Alliance fully supports the Purpose of the European Security and Defense Identity (ESDI) within the Alliance by making available its assets and capabilities for Western European Union (WEU)-led operations. To this end, the Alliance and WEI have developed a close relationship and put into place key elements of the ESDI as agreed in Berlin. In order to enhance peace and security in Europe and more widely, the European Allies are strengthening their capacity for action, including by increasing their military capabilities. The increase in military capabilities and capacities of the European Allies with respect to security and defense enhances the security of the environment of the Alliance.

Now, Mr. President, the WEU will be using NATO military equipment paid for by the taxpayers of the United States. That may be proper, that may be a role for NATO, but I think we need to review that proposal.

The Resolution of Ratification of last year does continue:

Common threats: NATO members will face common threats to their security in the post-Cold War environment including—

(I) the potential for the re-emergence of a hegemonic power confronting Europe;

(II) rogue states and non-state actors possessing nuclear, biological, or chemical weapons and the means to deliver these weapons by ballistic or cruise missiles, or other unconventional delivery means;

(III) threats away wider nature, including the disruption of the flow of vital resources, and the possible transnational threats; and

(IV) conflict in the North Atlantic area stemming from ethnic and religious enmity, the revival of historic disputes, and the actions of undemocratic states.

All that was contained in the language when we ratified the expansion in regard to that treaty last year, 1 year later.

Strategic Concept point #20: The security of the Alliance remains subject to a wide variety of military and non-military risks which are multi-directional and often [very] difficult to predict. These risks include social and political difficulties, ethnic and religious rivalries, territorial disputes, inadequate or failed efforts at reform, the abuse of human rights, and the dissolution of states can lead to local and even regional instability. The resulting tensions could lead to [the] crises affecting [the] Euro-Atlantic stability, to human suffering, and to armed conflicts.

Nonmilitary risks, Mr. President? Inadequate or failed efforts at reform? What are we talking about? I do not recall those phrases in the Resolution of Ratification. Why would a military alliance such as NATO care about a non-military risk? What is a nonmilitary risk anyway?

The Resolution of Ratification continues, as of last year:

(vi) Core mission of NATO: Defense planning will affirm a commitment by NATO members to a credible capability for collective self-defense, which remains the core mission of NATO. All NATO members will contribute to this core mission.

No argument there. That is the historical purpose of NATO and that is collective self-defense.

One year later, with the Strategic Concept, while they were popping champagne corks in regard to NATO being 50 years old:

Strategic Concept point #18: To achieve its essential purpose, as an Alliance of nations committed to the Washington Treaty and the United Nations Charter, the Alliance performs the following fundamental security task:

Deterrence and defense: To deter and defend against any threat of aggression against
any NATO member state as provided for in Article 5 of the Washington Treaty.

Crisis management: To stand ready, case-by-case and by consensus, in conformity with Article 7 of the Washington Treaty, to contribute to effective conflict prevention and to engage actively in crisis management, including crisis response operations. I am glad to see that deterrence and defense is still there. But, again, this emphasis on conflict prevention and crisis management is extremely disconcerting and not consistent with the Resolution of Ratification that was passed in the Senate as of last year.

The Resolution of Ratification continues—we are talking about section 7:

(vii) Capacity to respond to common threats: NATO’s continued success requires a credible military capability to deter and respond to common threats. Building on its core capabilities for collective self-defense of its members, NATO will ensure that its military structure, defense planning, command structures, and force goals promote NATO’s capacity to project power when the security of a NATO member is threatened and provide a basis for ad hoc coalitions of willing partners among NATO members. This will require that NATO members provide national military capabilities to rapidly deploy forces over long distances, sustain operations for extended periods of time, and operate jointly with the United States in high-intensity conflicts.

However, 1 year later, in the Strategic Concept point No. 49:

In contributing to the management of crises through military operations, the Alliance’s forces will have to deal with a complex and diverse range of actors, risks, situations and demands, including humanitarian emergencies. Some non-Article 5 crisis response operations may be as demanding as some collective defense missions. Well-trained and well-equipped forces at adequate levels of readiness and in sufficient strength to meet the full range of contingencies as well as appropriate support structures, planning tools and command and control capabilities are essential in providing efficient military contributions.

I do not know how this Nation is to fund, structure, and train U.S. military forces to manage parochial crises in Europe, no matter how small, through military operations. Nor do I think that is the best use of our forces, if you consider already we must meet the two major regional conflict response thresholds within serious budget constraints.

Again, I do not see this use of military forces endorsed in the Resolution of Ratification that the Senate passed last year. The Resolution of Ratification does continue:

The fundamental importance of collective defense:

This was last year.
The Senate declares that—

(i) in order for NATO to serve the security interests of the United States, the core purpose of NATO must continue to be the collective defense of the territory of all NATO members; and

(ii) NATO may also, pursuant to Article 4 of the North Atlantic Treaty, on a case-by-case basis, engage in other missions where there is a consensus among its members that there is a threat to the security and interests of NATO members;

However, once again, in the Strategic Concept, 1 year later, at the celebration, the 50-year celebration, No. 48:

The maintenance of the security and stability of the Euro-Atlantic area is of key importance. An important aim of the Alliance and its forces is to keep risks at a distance by dealing with potential crises at an early stage. In the event of crises which jeopardize Euro-Atlantic stability and could affect the security of Alliance members, the Alliance’s military forces may be called upon to conduct crisis response operations. They may also be called upon to contribute to the preservation of international peace and security by conducting operations in support of other international organizations, complementing and reinforcing political actions within a broad approach to security.

What do we mean by this—’’keep risks at a distance by dealing with potential crises at an early stage’’? Isn’t that the job of diplomacy? Any day the list of inconsistencies between the Resolution of Ratification and the new Strategic Concept of 1999 goes on and on and on.

I have taken a great deal of time of the Senate and my colleagues to be specific about this. Even if they were more consistent, it does not change the fact that the Strategic Concept of 1999 fundamentally alters the nature and the domain of the original treaty that this Senate ratified just a year ago.

So, in closing, I think my bipartisan amendment, warrants support because it is time to go on record that the Senate insists that changes to the original treaty, the Strategic Concept of 1999 were made, that this document by this Senator, and I repeat, proposed—by the 50th anniversary summit conference.

The Senate Armed Services Committee will conduct a series of hearings once the hostilities and the risk of NATO forces is in one way or another—

I hesitate to use the word ‘’terminated’’ because I am not certain if that word is applicable to this situation which in itself is so filled with uncertainty, but whenever the hostilities are contained to the point where the Armed Services Committee can begin to look at what went right and what went wrong in the conduct of the military operations, and most particularly—most particularly—this consensus by the 19-nation doctrine by which this operation has been, is, and will be conducted for an indefinite period of time.

I first became concerned about this new doctrine early this spring. I wrote to the President on April 7 urging him not to allow the summit to ‘’finalize’’—that is the word I used—or write in

It is the Strategic Airlift Command which is heroically—together with the Air Guard, I add, which, of course, is part of that command—out the vast preponderance of the missions associated with airlift in this operation in Kosovo.

If there is one thing this operation tells us, it is that future conflicts are becoming more and more dependent on modern technology. The weapons being employed in this air-only campaign are guided missiles, again predominantly provided by the United States.

The other nations of NATO, for whatever reasons, simply have not equipped themselves or trained their personnel in sufficient numbers to conduct an operation of this magnitude. That is not in any way to detract from their courage in flying their missions, and approach in itself is so filled with uncertainty.
May 24, 1999

CONGRESSIONAL RECORD—SENATE

The main difference in the security tasks identified in the 1991 Strategic Concept and the document adopted this April is the addition of a "crisis management" task, and an emphasis on non-article 5 crisis operations. Non-article 5 operations were not even mentioned in the 1991 Strategic Concept.

I say to my colleague from Kansas, they were not even mentioned, but they are written throughout this new one which was promulgated this April. I will read one paragraph:

The security of all allies is indivisible. An attack on one is an attack on all. With respect to collective defense under article 5 of the Washington Treaty—

Of course, that is the 1949 treaty—

the combined military forces of the alliance must be capable of deterring any potential aggression against it, of stopping an aggressor's advance, and of a possible attack nevertheless occur and assure the political independence and territorial integrity of its member states.

Here is the key sentence:

They must be prepared to contribute to conflict prevention and to conduct a non-article 5 crisis response operation.

That means going beyond the territorial boundary of the 19 nations.

The vote of the American people through its elected Members of the Senate is absolutely essential before we sign on to such a mission. I commend my colleague for bringing that to the attention of the Senate in the form of this amendment.

According to the new Strategic Concept, the alliance is tasked "to stand ready, case-by-case by consensus . . . to contribute to effective conflict prevention, and to engage actively in crisis management, including crisis response operations."

Kosovo is an example of a non-article 5 crisis response operation.

Unfortunately, it is now likely that the NATO Summit will take place against the backdrop of events and conditions relating to Kosovo. At this time, no predictions can be made as to a resolution.

We are just beginning to learn important lessons from the Kosovo conflict. Each day is a new chapter. For example, NATO planners and many in the Administration, and in Congress, have long been aware of the disparities in military capabilities and equipment between the United States and our allies. Now, the military operation against Yugoslavia has made the American people equally aware of this fact. The U.S. has been providing the greatest proportion of attack aircraft capable of delivering precision-guided munitions. Further, the United States will continually be called on to carry the greatest share of the military responsibilities for such "out of area" operations in the future. This issue must be addressed, and the Congress consulted and the American people informed.

It is my understanding that the draft Strategic Concept currently under consideration by NATO specifically addresses NATO strategy for non-Article 5, "out of area" threats to our common interests—threats such as Bosnia and Kosovo. According to Secretary Albright in a December 8, 1998, statement to the North Atlantic Council, "The new Strategic Concept must find the right balance between ensuring the political independence and territorial integrity of its member states and political independence and territorial integrity of its member states and ensuring that the fundamental tasks of the Alliance are intimately related to the broader defense of the North Atlantic region and to the need for broad commitment to be accepted in final form, just weeks away at the 50th Anniversary Summit."

During the Senate’s debate on the Resolution of Ratification regarding NATO expansion, the Senate addressed this issue by adopting a very important amendment put forward by Senator Kyl, which would allow consideration of events in Kosovo. The lessons of Kosovo could even change this position.
The intent of this letter is to give you my personal views on the final draft of the Strategic Concept for the next decade of NATO on the Strategic concept should not be taken—risked—against the uncertainties emanating from the Kosovo situation.

The U.S. and our allies will have many less options as a pivotal part of the future Strategic Concept. Bosnia and Kosovo have been NATO’s first forays into aggressive military operations. As I see it, the Kosovo situation is having a destabilizing effect of the few gains made to date in Bosnia. This combined situation must be carefully assessed and evaluated before the U.S. and our allies sign on a new Strategic Concept for the next decade of NATO.

A brief period for study and reflection by ourselves as well as our Allies would be prudent. NATO is too vital for the future of Europe and American leadership.

With kind regards,

Respectfully,

JOHN WARNER
Chairman

THE WHITE HOUSE
Washington, DC, April 14, 1999.

Hon. JOHN W. WARNER,
Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your thoughtful letter on the upcoming NATO summit and the revised Strategic Concept. I appreciate your attention to these important issues, and I agree strongly with your view that NATO’s continued vitality is essential to a safeguarding American and European security.

I have thought carefully about your proposal to delay agreement on the revised Strategic Concept that will make NATO even more effective in addressing regional and ethnic conflicts of this very sort. Our operations in Kosovo have demonstrated the crucial importance of NATO being prepared for full spectrum of military operations—a preparedness that the revised Strategic Concept will help ensure.

The Strategic Concept will reaffirm NATO’s core mission of collective defense, while also making the adaptations needed to deal with threats such as the regional conflicts we have seen in Bosnia and Kosovo as well as the evolving risks posed by the proliferation of weapons of mass destruction. It will also help ensure greater interoperability among allied forces and an increased European contribution to our shared security.

The Strategic Concept will not contain new commitments or obligations for the United States but rather will underscore NATO’s enduring purposes outlined in the 1949 North Atlantic Treaty. It will also recognize the need for adapted capabilities in the face of changed circumstances. This approach is fully consistent with the Kyl Amendment, which called for a strong reaffirmation of collective defense as well as a recognition of new security challenges.

The upcoming summit offers a historic opportunity to strengthen the NATO Alliance and ensure that it remains as effective in the future as it has been over the past fifty years. While the situation in Kosovo has presented challenges, I am confident that NATO resolve in the face of this tyranny will bring a successful conclusion.

Your support for the NATO Alliance and for our continued involvement in Kosovo is indispensable. I look forward to working closely with you in the coming days to ensure that the summit is an overwhelming success.

Sincerely,

BILL CLINTON.

Mr. WARNER. I assure the Senate that we will deliberate this amendment tomorrow again, I say to the Senator. We are not able to complete it today due to the absence of several colleagues. I am convinced that the Nation’s capital is engulfed in a series of storms preventing a number of our Members from returning. Also, I think it is important that every Member of the Senate hear the words of the Senator from Kansas and others about this very important amendment.

Mr. ROBERTS. Would the distinguished chairman yield for several questions?

Mr. WARNER. Yes.

Mr. ROBERTS. I thank the distinguished chairman for his very kind comments.

Would it be helpful, I ask the distinguished chairman, if Members of this body would know that the same basic feeling exists in regards to the British Parliament in the House of Lords?

Mr. WARNER. I think that is a very important point.

Mr. ROBERTS. I have a statement here by a member of the Parliament. Menzies Campbell says: 

‘‘It is a matter of considerable regret that the House of Commons has never debated properly the issues surrounding the NATO Strategic Concept.’’ He argued that, ‘‘Parliament should have had the opportunity to consider matters such as NATO’s right of independent action without Security Council authorization and the expansion of the alliance and its consequences.’’

He said that:

‘‘Foreign and security policy is the responsibility of the government, but the legislature is surely entitled to express its views.’’

This was also true in regards to the statement by a member of the Parliament. Menzies Campbell says: 

‘‘No intelligent debate’’ ... it is ‘‘quite astonishing that we allow British defence strategy to be structured by an international organisation without any form of input and debate by our Parliament.’’

Then he went on to say, in drawing the example here in the Senate: 

Both Republicans and Democrats. ... argue that the. . . (overemphasis on) the enlargement issue in the run-up to NATO’s 50th anniversary celebration... came at the expense of any meaningful debate over the evolution of NATO and the role that the Alliance will play in the 21st century.

If I could ask my distinguished chairman, would he recall the many times that we have had briefings in regards to the situation in Kosovo and the question over and over again that was posed prior to the bombing: Would this be in our best interests? Would this be in our security interest?

I know the Senator asked that question many times. I know that the distinguished Senator from Utah, Mr. BENNETT, who made a very eloquent speech in this Chamber this morning, and asked that question. It intrigued me that the question in regards to an amendment to the defense appropriations bill last year. I said: Before we would actually commit any troops under this ever-changing concept in that part of the world, could the administration please answer eight questions—as to cost, purpose, exit strategy, end game, and etcetera, etcetera?

That public law requirement was not addressed for 6 months. I am worried about the future of NATO. I would say to my distinguished friend. I know the chairman is. I think that Kosovo is a rock that has hit the NATO windshield, and it has been like shattered glass. It does not matter if you feel that it was a fine mess we have gotten into or whether or not we think that this policy is the right policy.

I am sure the distinguished chairman—I have talked with him about it—will have the full committee or perhaps just a committee meeting at the tactics that have been used, the stress and strain on others, on other services in other parts of the world.

I am sure we have talked about the ethics of conducting a war above 15,000 feet; immaculate coercion, where no allied NATO soldier has suffered any casualty as opposed to the people we are trying to help.

I know that we have talked, Mr. Chairman, about the law of unintended effects; what is happening today in regards to Russia, China, India, Pakistan, South America, and Central America.

President Zedillo of Mexico wondered aloud in the international press: Will NATO now come to enforce human rights within the sovereign territory of Mexico? In regards to the Indian situation? How about East Timor, Chechnya, Turkey, and the Kurds, et cetera, et cetera?

That situation is far more difficult.

I don’t know. Mr. Chairman, I just think there are a lot of real questions that Members have. If you go back to the basic genesis as to why we are there, it comes right back to the President’s speech at the Hague over 2 years ago, reflected in the Strategic Concept of NATO.

I thank the distinguished chairman. Mr. WARNER. I say to my colleague, you are right on.

Indeed, go back before Kosovo to Bosnia. How many debates took place on this floor where the central question was: Was it in the vital U.S. interest to make our commitments there? Time and time again, the administration dropped the word ‘‘vital,” and then talked about how it was in our interest.

But when we put life and limb of the American person on the line, whether it is in the cockpits or on the ground or on the sea, I really believe it should be
in the vital interest of the United States of America for our families to be asked to make those commitments of life and limb. That is the central question, as you pointed out, I think very carefully.

If I might, because I think it bears repeating: "The NATO charter requires the use of force in only one instance"—now this is the 1949 treaty, under article 5—"to respond to an armed attack against one or more of the member nations." Strike one, strike all. There is nothing in that charter that calls for the use of force to protect common interests.

This is being created out of whole cloth, this non-article 5 combat. It is as if we are writing a new article to the original treaty. It is for that reason that we should bring this before the Senate. But through the guise of calling it a strategic concept through the panoply of the 50th anniversary, what they have done here, in my judgment, is create a new article to the fundamental treaty of 1949, and that they cannot do without the advice and consent of the Senate.

Mr. ROBERTS. Would my distinguished chairman yield for one additional question?

Mr. WARNER. Yes.

Mr. ROBERTS. I am worried about the future of NATO. If in fact our involvement in Kosovo was at one time not in our vital national interest, there is, I think, a good argument that can be made—has been made by the national security team and the President—that since NATO's credibility or the future of NATO is now on the line, it is in our vital national security interest.

Having said that, and having looked at this war in Kosovo, I have the tactics used, and the result, and all six of the goals, as outlined by the distinguished Secretary of State in our briefings, being turned on their head as a result of the tactics that have been used in the military strategy, and the law of unintended effects, can you imagine a situation under this Strategic Concept that all 19 nations will ever agree to ever bomb anybody again? On a proactive basis? Where we are going outside of the NATO territory, ignoring the treaty?

Eight nations, right now as I speak, more especially three, want the bombing ended. Many others in this Chamber—not this Senator, for reasons that I could go into, but I will not—did not want to start the bombing campaign. Others wanted to start it. Others wanted to use the ground forces. That debate is going on right now.

We are negotiating within the NATO—within the NATO—alliance as opposed to trying to negotiate, as we are trying to do, with Mr. Milosevic, who, by the way, is a thug and an international terrorist and all the things people say about him. That does not enter into this. But can you imagine, Mr. Chairman, under what circumstance, after Kosovo, that NATO would bomb again, or for that matter ever use ground troops?

What kind of message does that send to the bad guys and the hard targets and the real people that we should be worrying about all around the world? I think we have declimated—well, there is a stronger word for it, but I will not use it—in regards to NATO. I think under this Strategic Concept we have wandered so far afield and into a dangerous pasture that we are endangering the true mission of NATO, which is collective security, not to mention all the rest of these things that are in this concept.

That is what worries me.

Mr. WARNER. Mr. President, I say to my good friend, that argument, predicated on a lot of study in the lifetime of this Senator of the NATO treaty, the doctrine of consensus was predicated on keeping the operations within the borders.

And now, under this proposed 1999 Strategic Concept, to take it beyond the borders, I question whether or not the doctrine of consensus will work.

What a tragedy it would be if we took this magnificent NATO organization, which fulfilled beyond the dreams of all its mission, as laid down in 1949, which kept the peace in Europe for that half century, and allow it to be pulled apart by a doctrine such as this new Strategic Concept. I think the Senator is quite right. We are in this conflict, in all probability, not because of our national vital security interests but because of NATO. It is because of NATO that we cannot allow our military commanders to promulgate the actions which are necessary to go ahead and win it.

I often think, I say to my good friend, as over 50 percent of the airmen are flying tactical missions and over 70 percent of the support missions and the airlift, are we unfairly asking those young aviators to bear the brunt of war disproportionately because NATO did not devise and put in place, concurrently with the air operations, starting a ground operation? Because a ground operation would have transformed this conflict considerably. It might well, in my judgment, have brought about a far earlier conclusion of this conflict and saved the prolonged risk to airmen which is going on today and tomorrow and for the indefinite future, given the absence of bringing together all the forces capable of the 19 nations to bear.

Indeed, the other nations that do not have the air power, as we have it, could have been the primary components of the ground action, leaving to the American airmen the operations in the sky but they undertake the operations on the ground. It would have forced Milosevic to put in place, making in all probability his ground assets a better target than they are today, widely dispersed and hidden in the villages and towns throughout Kosovo and elsewhere.

I think the whole dynamics of this conflict would have been changed had we not limited solely to air but done a ground-air combination, for which our forces have trained these 50 years in NATO, as well as the other NATO nations, for a ground-aired coordinated defense.

I point out, NATO was always to be a defense treaty.

Mr. ROBERTS. If I may ask my distinguished friend, the chairman, one other question; that is, I do not think there is any question in the minds of many that to state that you are not going to use ground forces before you decide to use force was a mistake. There is no question about that.

I am not sure I could still support or still support—I never did support—the use of ground troops, unless I know what their specific mission is: What do we expect them to do. And then, if you "win," if we could ever define "winning," what is it that we have won.

So from the standpoint of tactics, I say again to the chairman, I am very hopeful, once this war is over, we hope and pray that all of this talk that has been rather critical will be secondary, and, if Milosevic would agree to some of the negotiating principles that have been offered, we shall see. I see where one NATO general indicated it is going to take another 2 months. I hope that is not the case.

I hope the Senate Armed Services Committee—and I ask the chairman, would it be his intent to take a hard look. I have a subcommittee that looks at low-intensity conflicts—this became a high-intensity conflict—and military tactics and strategy. I hope we can take a look at this, especially with the asymmetric threat that Mr. Milosevic has used so well against us. He basically took one look at our tactics and acted accordingly and played rope-a-dope. He has achieved most of his objectives. That seems to me to be a real problem here. I hope we have those hearings.

Again, I go back to the genesis of this whole business, and that is a Strategic Concept that puts us in very different pastures. I know there will be some of my colleagues who say this is not a treaty. The fact that we are having this debate today, I think, is encouraging. We had a debate on ratification of NATO expansion last year. To my knowledge, we have not had any debate, if you very lightly, on this Strategic Concept and what it means.

So the Senator's cosponsorship of this amendment is much appreciated. If, in fact it is not a treaty, it has the effect of a treaty.

Mr. WARNER. Mr. President, we are going to have that series of hearings. I do not want to have a hearing or a series of hearings on the Armed Services
Committee until the men and women of the NATO forces are, hopefully, in a very live situation with regard to personal risk.

Mr. ROBERTS. If the chairman will, I heartily agree. The war must be over.

Mr. WARNER. Let me just bring up a final condition monitoring of the allied good friend here. I know others want to speak to this. Then we will have to lay it aside.

I point out that during the 1994 debate on modifications to the ABM Treaty, the Armed Services Committee included a provision, and I was a co-sponsor of that effort in the 1995 DOD authorization act—I ask my colleague to listen carefully—which required the President to submit to the Senate for advice and consent any international agreement which would substantially modify the ABM Treaty."

I think that is a direct parallel and an exact precedent for what the Roberts-Warners amendment seeks.

I yield the floor.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, first I commend our good friend from Kansas for the energy he has put into a very significant issue which has to do with the new Strategic Concept of NATO.

This is not a new issue. The question of NATO's role since the fall of the Soviet Union has been an issue of a number of new Strategic Concepts. Listen to what NATO said in 1990. We have heard a lot about 1999 in Washington, but just listen to the heads of state in July 1990, speaking in London. Here is what the heads of state said:

"The question of NATO's role since the fall of the Soviet Union has been an issue of a number of new Strategic Concepts. Listen to what NATO said in 1990. We have heard a lot about 1999 in Washington, but just listen to the heads of state in July 1990, speaking in London. Here is what the heads of state said:

The alliance must also take account of the global context. Wow. You talk about a different challenge and you talk about a new strategic concept. In 1991, the NATO allies suddenly say that alliance security must take account of the global context. Those are pretty broad words. But I didn't hear any suggestion back in 1991 that there was a change to the NATO treaty. I don't think there is a change to the NATO treaty. I don't think anyone suggested that the new Strategic Concept imposes any new commitments or obligations for the United States."

Those are the President's words.

So what this resolution does is say: Does it? The President said, in April, that it won't. I have no doubt that the President will reaffirm that it won't. But I must say I don't have difficulty with what Senator ROBERTS is doing because it is perfectly appropriate to ask the President: Is there anything in this new Strategic Concept which imposes on us a new obligation or commitment? If so, submit it to us as a treaty amendment. This is very different from some earlier language that was circulated in the Armed Services Committee. This doesn't make a finding that there are new commitments or obligations in this agreement in Washington in 1999. The language before us doesn't make any such finding. The language before us in the Senator's resolution, which I find to be appropriate, requires the President to determine and certify whether or not the Strategic Concept imposes any new commitment or obligations on the United States—whether or not.

And so as I read this resolution, I think the language is appropriate in this resolution, that the President reaffirm what he told us on April 14, tell us if there is any change in his thinking on that. Again, as he wrote Senator WARNER on April 14—and this letter has been made part of the RECORD now, I believe—the President said:
The Strategic Concept will not contain new commitments or obligations for the United States, but rather will underscore NATO’s enduring purposes, outlined in the 1949 North Atlantic Treaty.

There has been reference here to the significance of changes in strategic concepts, and I think it is important that the Senate spend some time doing what Senator ROBERTS and others have done, both on the committee and off, in focusing on this Strategic Concept. It is important that we understand what these new threats and risks are. It is important, in my judgment, that we make a determination as to whether or not we do have new legal commitments and obligations.

I don’t believe the 1999 Strategic Concept creates any new binding obligations or commitments any more than I did that the 1991 Strategic Concept created any new binding commitments and obligations. But our committees of jurisdiction surely should focus on that resolution.

Senator WARNER has indicated in the last few minutes that the Armed Services Committee will, indeed, be holding a series of hearings on this subject. As he stated it, if I heard him correctly, those hearings will occur after the events in Kosovo are resolved. But as of this time, we have not yet had such hearings. I am not certain of this. But I don’t believe that the Foreign Relations Committee has either, at least after the Washington agreement was signed. There may have been a hearing before the Washington agreement. But I don’t believe there has been one since it was signed. The agreement has some very significant provisions in it relative to a European commitment to take on greater responsibility for European defense.

Senator WARNER made reference to the European Security and Defense Initiative, a very significant change—a very significant initiative in terms of what Europe will do. It is something that I have believed for some time that Europe should do. The reference is very specific inside of the Washington agreement.

Two, the European allies taking on—in the words of the agreement—“assuming greater responsibility in the security and defense field in order to enhance the peace and stability of the Euro-Atlantic area, and, thus, the security of all allies.”

Then it goes on to say: “On the basis of decisions taken by the Alliance in Berlin in 1996 and subsequently, the European Security and Defense Initiative will continue to be developed with-in NATO.”

I think it is a very significant change. It is something which we in the United States should welcome. It means that the Europeans will be taking on greater responsibility for the defense of Europe against threats, old and new.

We ought to welcome as well the reference or the discussion of a new initiative where European countries will have greater defense capabilities to address appropriately and effectively the risks that are associated with weapons of mass destruction; new capabilities so that they can deploy more readily greater mobility, greater survivability of forces, greater infrastructure and sustainability. These are initiatives inside of the new strategic doctrine which will make it possible for Europe to take greater responsibility for the defense of Europe. We should welcome this.

I don’t think there has been very much emphasis in the United States on what Europe has agreed to do in the new Strategic Concept—what they have, in effect, put into black and white. The commitment to greater European resources being used for the European defense. As I said a few moments ago, this resolution which is before us says that if there are new commitments and obligations—if then the President should so certify the Senate. And I believe there is none.

Indeed, the Senator from Virginia has been assured by the President in the letter which he put in the Record that the Strategic Concept will not contain new commitments or obligations. I believe there is none in this 1999 Strategic Concept, and I believe there was none in the 1991 Strategic Concept. There was none in 1991.

Even though the language is very similar—again, my good friend from Virginia being here—I just want to read some of the language in the 1991 Strategic Concept again. I will be very brief. But article 12 of the 1991 Strategic Concept said that “alliance security can still be achieved through global concepts”—“global concepts.” “Alliance security interests can be affected by other risks of a wider nature, including proliferation of weapons of mass destruction, disruption of the flow of vital resources and actions of terrorists and sabotage.”

That was in 1991. That is just one part of a Strategic Concept which we all agreed to.

Did that represent changes in the North Atlantic Treaty? No. It did not, in my judgment. Nobody suggests that it did back then. No one suggested that the President back then, President Bush, submit that kind of change in strategic concept to the Senate as a change in the treaty, for a very good reason: It did not constitute a legal obligation or commitment which represented a change in the North Atlantic Treaty. That is why nobody proposed back then that we have to ratify this.

Those are broad words in here, section 9 of the 1991 new Strategic Concept—it was called new Strategic Concept 1991:

Risks to allied security are less likely to result from calculated aggression against the territory of the allies but rather from the adverse consequences of instabilities that may arise in serious economic, social and political difficulties—

Listen to this—

including ethnic rivalries and territorial disputes which are faced by many countries in Central and Eastern Europe.

They could lead to crises in European stability. Did that create legally binding obligations and commitments on the United States? No. It didn’t. And nobody suggested that the President should submit that language, because there is no legally binding obligation or commitment from that kind of language, although, in the words of the Strategic Concept in 1991 they recognized—this is what our leaders said in all of the NATO nations—“that the developments they can place in Europe would have a far-reaching impact on the way in which NATO’s aims would be met in the future.”

“Far-reaching impacts.” 1991. I commend—and I had an opportunity to do this a few minutes ago—the efforts of the Senator from Kansas, the Senator from Virginia, and the Senator from Maine, and others to bring to our attention what this new Strategic Concept is, so that we as a Senate can understand what it is that NATO is looking at in terms of a strategic concept. It is very important that those hearings the Senator from Virginia made reference to take place. In my own opinion, if the Foreign Relations Committee has not already done so—and I don’t believe they have, but I may be wrong—it is important that the Foreign Relations Committee have hearings on this Strategic Concept.

Again, I don’t have any difficulty with the language in this resolution, because I think it is appropriate that the President tell us whether or not we have undertaken in this language any new obligations or commitments. The President wrote my good friend from Virginia on April 14 that the Strategic Concept will not contain new commitments or obligations for the United States. I assume that he will reaffirm that in fact there are no new commitments or obligations when he gives us the certification which is required in this resolution.

I just want to summarize by saying that I have no difficulty with this language, because I think it is appropriate and that assurance, because if there are no new commitments or obligations—it seems to me there should be—then it would be presumably an amendment to a treaty which should be submitted to the Senate. But, again, just as there was none in 1991 when that new Strategic Concept which I just read was adopted by NATO, I don’t believe there are any more important—my belief is that the President has written
the good Senator from Virginia that in fact there are no new commitments or obligations contained in this new Strategic Concept in 1991.

Again, I want to commend the Senators who have focused on this. I think we must address the new kind of environment we face in this world, and that it is important that NATO, which is going to play such a critical role in the stability of Europe and the new kinds of threats which we and Europe face, address those threats, that we do so in the context of the most successful alliance in the history of mankind, an alliance which is now growing, an alliance which when we added three new countries in this Senate, on this floor—we adopted the Kyl amendment that, as I remember it, contained 10 provisions—very similar to what is in this 1999 Strategic Concept.

I won’t take the time to read more than just one section of the 10 principles in the Kyl amendment.

The Senate understands that the policy of the United States is that the core concepts contained in the 1991 Strategic Concept of NATO, which adapted NATO’s strategic strategy of the post-cold-war environment, remain valid today in that the upcoming revision of that document will reflect the following provisions, and there are many.

One is:

(IV) conflict in the North Atlantic area stemming from ethnic and religious enmity, the revival of historic disputes, or the actions of undemocratic leaders.

That is one of the principles of the Kyl amendment in which we confirmed three nations would be added to the NATO alliance.

I yield for a question.

Mr. WARNER. I want to engage in a few more minutes of colloquy. Other Senators are waiting and we have momentum under this bill. One Senator desires to lay down some additional amendments. I cannot let this opportunity go by.

Article 5 of the 1949 treaty laid out in very clear language exactly the reasons for which NATO was established. It very clearly stated that article 5 and not go back within the confines of this magnificent document and get some strained, whatever it is, to justify military action beyond the borders.

Mr. LEVIN. Mr. President, in 1991 this is what the NATO new Strategic Concept said:

Risks to Allied security are less likely to result from calculated aggression against the territory of the Allies, but rather from the adverse consequences of instability that may arise from the serious economic, social, and political difficulties, including ethnic rivalries and territorial disputes which are faced by many countries in central and eastern Europe. They could . . . lead to crises inimical to European stability and to armed conflicts.

That is section 9.

Then they say, in addition to article 5, article 6 which they made reference to, an armed attack of the territory of the allies from whatever direction. In 1991, this new Strategic Concept said, “However, alliance security must also take account of the global context.” That is 1991—“Global context.”

Mr. WARNER. I suggest my good friend is making my argument.

What I am saying is this is likened to statute law. What the Senator is reading are regulations. How often in the history of our country have regulations and not go back within the confines of this magnificent document and get some strained, whatever it is, to justify military action beyond the borders.

Mr. LEVIN. Mr. President, if I may, I will address what I believe is about to take place. The good Senator from Pennsylvania and the good Senator from Louisiana have an amendment which will soon be presented to the Senate and become the pending business. However, before, as I understand it, the Senator from Minnesota will lay down three amendments and we will immediately lay them aside; then our distinguished colleague and member of the committee will address the Senate with regard to the bill for about 10 minutes.

Mr. SPECTER. I have worked with the Senator from Maine that I will speak first and then yield to the Senator from Maine and the Senator from Louisiana who will speak at somewhat greater length.

Mr. WARNER. I yield the floor.

AMENDMENTS NOS. 380 THROUGH 382, EN BLOC

Mr. WELLSTONE. I ask unanimous consent to send three amendments to the desk and then have them temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. WELLSTONE] proposes amendments Nos. 380 through 382, en bloc.

Mr. WELLSTONE. I ask unanimous consent reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments en bloc are as follows:

AMENDMENT NO. 380

(Purpose: To expand the list of diseases presumed to be service-connected for radiation-exposed veterans)

On page 387, below line 24, add the following:

SEC. 1061. EXPANSION OF LIST OF DISEASES PRESUMED TO BE SERVICE-CONNECTED FOR RADIATION-EXPOSED VETERANS.

Section 1112(c)(2) of title 38, United States Code, is amended by adding at the end the following:

“(P) Lung cancer.”
The PRESIDING OFFICER. The Senator from Pennsylvania.

AMENDMENT NO. 383

Mr. SPECTER. Mr. President, after conferring with this distinguished manager, I, too, wish to send an amendment to the desk and ask it be laid aside after it has been read.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:
The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 383.

Mr. SPECTER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place add the following new section:

Snc. Directing the President, pursuant to the United States Constitution and the War Powers Resolution, to seek approval from Congress prior to the introduction of ground troops from the United States Armed Forces in connection with the present operations against the Federal Republic of Yugoslavia or funding for that operation will not be authorized.

None of the funds authorized or otherwise available to the Department of Defense may be obligated or expended for the deployment of ground troops from the United States Armed Forces in Kosovo, except for peacekeeping personnel, unless authorized by a declaration of war or a joint resolution authorizing the use of military force.

Mr. SPECTER. Mr. President, I can describe this very briefly. It provides that none of the funds authorized or otherwise available to the Department of Defense may be obligated or expended for the deployment of ground troops from the United States Armed Forces in Kosovo, except for peacekeeping personnel unless authorized by a declaration of war or joint resolution authorizing the use of military force.

Mr. SPECTER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title 10 add the following:
The Senate finds that:
The United Nations Security Council created the International Criminal Tribunal for the former Yugoslavia (in this concurrent resolution referred to as the "ICTY") by resolution on May 25, 1993;

Although the ICTY has indicted 84 people since its creation, these indictments have only resulted in the trial and conviction of 8 criminals;
The ICTY has jurisdiction to investigate: grave breaches of the 1949 Geneva Conventions (Article 2), violations of the laws or customs of war (Article 3), genocide (Article 4), and crimes against humanity (Article 5);
The Acting Prosecutor of the ICTY, Justice Louise Arbour, stated on July 7, 1996, to the Contact Group for the former Yugoslavia that "[t]he Prosecutor believes that the nature and scale of the fighting indicate that an 'armed conflict', within the meaning of international law, exists in Kosovo. As a consequence, she intends to bring charges for war crimes, crimes against humanity or war crimes, if evidence of such crimes is established";
Reports from Kosovar Albanian refugees provide detailed accounts of systematic efforts to displace the entire Muslim population of Kosovo;
In furtherance of this plan, Serbian troops, police, and paramilitary forces have engaged in detention and summary execution of men of all ages, wanton destruction of civilian housing, forcible expulsions, mass executions in at least 60 villages and towns, and as well as dispersed organized rape of women and young girls;
These reports of atrocities provide prima facie evidence of war crimes, crimes against humanity, as well as genocide;
Any criminal investigation is best served by the depositions and interviews of witnesses as soon as possible after the commission of the crimes;
The indictment, arrest, and trial of war criminals would provide a significant deterrent to further atrocities;
The ICTY has issued 14 international warrants for war crimes suspects that have yet to be served, despite knowledge of the suspects whereabouts;
Vigorous prosecution of war crimes after the conflict in Bosnia may have prevented the ongoing atrocities in Kosovo;
Investigative reporters have identified specific documentary evidence implicating the Serbian leadership in the commission of war crimes.

Snc. It is the sense of Congress that—

(1) the United States, in coordination with other United Nations contributors, should provide sufficient resources for an expeditious and thorough investigation of allegations of the atrocities and war crimes committed in Kosovo;
(2) the United States, through its intelligence services, should provide all possible cooperation in the gathering of evidence of sufficient specificity and credibility to secure the indictment of those responsible for the commission of war crimes, crimes against humanity, and genocide in the former Yugoslavia;
(3) where evidence warrants, indictments for war crimes, crimes against humanity, and genocide should be issued against suspects regardless of their position within the Serbian leadership;
(4) the United States and all nations have an obligation to honor arrest warrants issued by the ICTY, and the United States should use all appropriate means to apprehend war criminals already under indictment; and
May 24, 1999

Mr. SPECTER. Mr. President, as stated very briefly before, I intend to speak for about 10 minutes. Then we have worked out an arrangement where the Senator from Maine will speak for about 10 minutes. We will be preceding Senator LANDRIEU, because she intends to talk for about 30 minutes. That’s the speaking order which we have arranged.

The PRESIDING OFFICER. Is that in the form of a unanimous consent request?

Mr. SPECTER. It is. The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, the sense-of-the-Senate resolution which has been submitted provides for the prosecution of war criminals in Kosovo, arising out of the atrocities and war crimes which have been so blatantly committed in Kosovo.

The somewhat polite term of “ethnic cleansing” has been used to describe these atrocities. But they are, in effect, mass murders and executions committed by the Serbian forces against the people of Kosovo. We have, to the credit of the civilized world, established a War Crimes Tribunal in the Hague. The establishment of this War Crimes Tribunal to prosecute crimes in the former Yugoslavia has already returned 84 indictments and the resulting conviction of some 8 criminals there.

The importance of establishing the rule of law is something that may be the most important legacy that will come out of the Bosnian war and the war in Kosovo. I commend the administration for its courageous leadership, which will inevitably be embodied in a permanent international criminal court—which will remain for another day. Those resolutions have been introduced and pressed by a number of Senators, including Senator DODD and myself and others. But in Bosnia, we saw the war crimes and we have seen very strenuous activity by the War Crimes Tribunal in the 84 indictments and in the 8 convictions now we have seen ethnic cleansing at a high level. We have seen acts of violence which go to the very top of the Serbian-Yugoslavian Government, right to the doorstep of President Milosevic himself. Although he is not named in this sense-of-the-Senate resolution, it is plain that the kind of atrocities which have been carried out could only be carried out by his order, at least with his knowledge and, at the very minimum, with his acquiescence—any of which is sufficient to establish criminal culpability for those war crimes.

Recently, Justice Louise Arbour visited the United States. On April 30, she met with Senator LANDRIEU, other Senators, and myself, and expressed the need for adequate financing for the investigations. The administration had requested funding of some $5 million. On the emergency supplemental which passed both Houses of Congress last week, up to an additional $13 million was added, for a total of $18 million, which was the sum requested by Justice Arbour.

At that time, she made a plea that the NATO forces or the IFOR forces undertake activity to arrest high-level indictees who are at large, referring specifically to Karadzic, whose whereabouts has been identified in the French Quarter, and who could be taken into custody.

Karadzic, the other principal indictee, is said to be in Belgrade and it might require an invasion to apprehend and take him into custody. But at least as to the arrest of Karadzic, that could be accomplished.

Justice Arbour also stated there were other high-ranking officials for whom sealed indictments had been obtained. Those sealed indictments were in the hands of military authorities, and those individuals, too, could be taken into custody.

Justice Arbour expressed the judgment that if these war criminals, alleged war criminals—these individuals indicted on charges of war crimes, to be specific—were taken into custody, then she believed it could have a profound effect on the subordinates, on perhaps Milosevic himself or certainly on the subordinates immediately under Milosevic.

It is our hope this sense-of-the-Senate resolution will impel the authorities to apprehend those individuals. I shall not go through the whereas clauses, setting forth the foundation for the U.N. action on establishing the War Crimes Tribunal or the atrocities themselves, but focusing for just a minute on the five clauses following the resolution:

First, that the United States, in coordination with the United Nations, supply sufficient funds for the investigation of the allegations of the atrocities and war crimes committed in Kosovo.

That can be accomplished with the $18 million appropriated by the United States and appropriations by other responsible nations.

Second, that the United States, through its intelligence services, should provide all cooperation in the gathering of evidence to secure the indictments of those responsible for war crimes.

Third, that where the evidence warrants indictment, those indictments will be brought for war crimes, crimes against humanity, and genocide, regardless of the position of the indictees within the Serbian leadership.

This is directed at President Milosevic himself.

Fourth, that the United Nations and all nations have an obligation to honor the warrants issued by the War Crimes Tribunal, and the United States and other responsible nations should use all possible cooperation to the Tribunal in the gathering of evidence.

Where evidence warrants, indictments should be issued for war crimes and that the United States and all nations have an obligation to honor arrest warrants; and, NATO should not accept any diplomatic resolution to the conflict in Kosovo that would bar the indictment, apprehension, or prosecution of war criminals already under indictments.

That refers to Karadzic, Mladic, and the others under sealed indictments as previously mentioned, having been identified by Justice Arbour.

Fifth, NATO should not accept any diplomatic resolution to the conflict in Kosovo that would bar the indictment, apprehension, or prosecution of war criminals for crimes committed during operations in Kosovo.

If there is any inclination, as part of a plea bargain on any of the negotiations, to spare President Milosevic or other high-ranking officials, that should be rejected as part of the diplomatic resolution of the conflict in Kosovo if such a diplomatic resolution should be obtained.

Last Thursday, Secretary of State Madeleine Albright testified before the Foreign Operations Subcommittee of Appropriations, a committee of which I am a member. She was questioned at that time and stated that the United States was not negotiating with Milosevic.

Well, in effect, an indirect negotiation is not a whole lot different. But it may be—and I made this statement at the time of the hearing—that the line could be drawn so that the United States would maintain its position that it would not be a party to any settlement which, by way of a plea bargain, gave immunity or absolved Milosevic or any other high-ranking diplomatic official or anyone from responsibility for the war crimes warranted by indictments and warranted by the evidence.

I commend Senator LANDRIEU for her support of the resolution. I yield the floor.

Mrs. FEINSTEIN. Mr. President, I rise to cosponsor the amendment offered by my colleagues from Pennsylvania and Louisiana expressing the sense of Congress regarding the need for vigorous prosecution of war crimes, genocide, and crimes against humanity in the former Republic of Yugoslavia.

This amendment expresses the sense of Congress regarding the need for vigorous prosecution of war crimes.

The United States should provide sufficient resources for an expeditious investigation of the allegations of war crimes committed in Kosovo.

The United States should supply sufficient funds for the investigation of the allegations of war crimes committed in Kosovo.

Where evidence warrants, indictments should be issued for war crimes and that the United States and all nations have an obligation to honor arrest warrants; and, NATO should not accept a settlement in Kosovo that would bar the indictment, apprehension, or prosecution of war criminals.
During the past two months, Kosovo has witnessed carnage and bloodshed unseen in Europe for almost fifty years. The victims are the culmination of a decade-long campaign of terror and bloodshed in the Balkans engineered by Mr. Milosevic.

Over 1.2 million Kosovar Albanians are now displaced, having been forced to flee their homes. Over 700,000 Kosovars are now refugees, most in Albania, Macedonia, and Montenegro. Others have been forced to hide in the forests and mountains.

The United States now has hard evidence that war crimes have been committed. A report issued by the State Department earlier this month entitled "Erasing History: Ethnic Cleansing in Kosovo" argued that: "At this writing, the forces of Yugoslav President Slobodan Milosevic, in an unbridled, loot, rape, shell, and de-populate Kosovo, and thousands of refugees continue to flee into neighboring Albania and Macedonia. The refugees coming out of Kosovo are now only beginning to tell their stories. Yet even these fragmented accounts portray a systematic policy of ethnic cleansing."

This report alleges that:

- Serbian forces have made Pristina, the capital of Kosovo, a ghost town.
- Serbian military, police, and paramilitary forces expelled between 100,000 to 120,000 persons from Pristina in only four days. Kosovars in Macedonia indicate that only 100 ethnic Albanians remain in Pristina. Serbian forces are stealing and "confiscating" furniture from abandoned homes.
- In Pec, Serbian forces herded young Albanian women to the Hotel Karagac [Kara-jack], and raped them repeatedly. The commander of the local base used a roster of soldiers' names to allot at least 100 women to the hotel on a rotating basis.
- Violence in western Kosovo is stronger than in any other region of the province. Pec was emptied of ethnic Albanians in 24 hours. In Djakovica's [Jack-o-vika] old city, Serbian forces burned 200 to 600 homes the day after NATO airstrikes began. By the next day, the rest of the old city had been torched.
- The U.N. High Commissioner for Refugees stated that the Djakovica region, and Pec, "undoubtedly has been one of the most violent and cruel in the whole of Kosovo, turning it at times into a virtual killing field."

In fact, the bulk of these crimes are being committed by the Serb paramilitary units, such as the "White Eagles" and "Tigers" under the direct control of the Ministry of the Interior, and, in turn, accountable to Mr. Milosevic.

Indeed, the campaign waged by Mr. Milosevic in Kosovo is a virtual catalog of systematic crimes which I believe merit investigation by the International War Crimes Tribunal. The crimes, to summarize, are:

- Forced expulsions: Over one million people have been forced from their homes;
- Looting and Burning: Some 500 residential areas have been burned since late March, including over 300 villages burned since April 4;
- Detentions: Consistent refugee reports that Serbian forces are separating military-aged men from their families in a systematic pattern. Some analysts estimate that the total number of missing men is as high as 100,000. Their fate is unknown;
- Summary Execution: Refugees have provided accounts of summary executions in at least 70 towns and villages throughout Kosovo;
- Rape: Ethnic Albanian women are reportedly being raped in increasing numbers. Refugee accounts indicate systematic and organized mass rapes in Djakovica and Pec;
- Identity Cleansing: Refugees report that Serbian authorities have confiscated passports and other identity papers, systematically destroyed voter registers and other aspects of Kosovo's civil registry, and even removed license plates from departing vehicles as part of a policy to prevent returns to Kosovo.

The civilized world must send a strong and unambiguous message that ethnic cleansing, genocide, and mass rape are not acceptable, and will not be tolerated.

I will never forget, about 4 years ago, I picked up a copy of the New York Times and opened it. There was a rather large picture of a young girl about 15 years old. She had sort of a Dutch cut, bangs hanging over her forehead. She had on a school uniform. But there was something very wrong with the picture: She was hanging from a tree. Dead in Srebrenica.

And then it came out that there was a major massacre of thousands of people in that supposedly protected enclave by the Serbian military. And to this day, 5,000 to 7,000 Muslim men and boys are simply missing. A few have been found in mass graves, but the most still remain missing.

This crime, too, was committed by those who followed Mr. Milosevic's orders.

I would say that when any nation on earth permits their military police to wear hoods and cover their face while they are carrying out their official duties, then you know that what they are doing is not legal.

And there can be little doubt that those who conduct these activities in Kosovo—be they in the Yugoslav military or in paramilitary outfits such as the "White Eagles" or the "Tigers"—that they are acting on orders which come from Mr. Milosevic.

And now there are reports that Yugoslav authorities have begun to dig up the mass graves in Kosovo in an effort to destroy evidence that could be used against them in war crimes trials.

Try as they might to hide their crimes, the world now knows what has happened in Kosovo. The regime of Mr. Milosevic is warping the people of the Balkans for close to ten years now. The international community must stand up to this, or we will set the stage for further bloodshed and tragedy in Asia, in Africa, and elsewhere in Europe. Mr. Milosevic must be held accountable for the orders which he has given, and the crimes which he has ordered committed.

I urge my colleagues to join me and the distinguished Senators from Pennsylvania and Louisiana and support this amendment. It sends a clear message to Mr. Milosevic and others who commit crimes against humanity: You will be held accountable, and you will be brought to justice.

MS. SNOWE. Mr. President, I rise in strong support of the Fiscal Year 2000 National Defense Authorization Act. This critical legislation brings the military to the threshold of a new century, posing new challenges to the U.S. national security. Under the superb leadership of our distinguished chairman, the senior Senator from Virginia, the Armed Services Committee has reported a bill that shapes a more flexible, mobile, and precision Total Force required for the future.

This bill takes a proven and fundamental approach to enhancing our national defense by devoting more resources to readiness and modernization accounts and improving the quality of life for military families. The total authorized funding of $288 billion in the legislation increases the administration's request by $8 billion and represents a 2.2-percent increase in real terms over the fiscal year 1999 level.

These responsible funding levels try to rescue a defense budget that, as a percentage of the Nation's GDP, has reached its lowest points in 50 years. In modernization programs—those for weapons procurement—funding has fallen by 67 percent since 1985.

At the height of the Reagan buildup, the Pentagon obligated $338 billion for procurement. Since then, the spending fell to a low point of $44 billion in 1997. The fiscal year 2000 budget increases the account to $56 billion, and I commend Secretary Cohen for planning the first budget of this administration that brings procurement back to a threshold of $60 billion, as recommended by the Joint Chiefs of Staff, starting in the year 2001.

The major weapons and systems authorized by this bill, particularly service combatants, strategic and tactical aircraft, and high-speed armored vehicles, will give the armed services more endurance and firepower at lower life cycle costs. Smooth construction materials will deceive the enemy radars
that can detect the hard angles of older platforms. Information technologies will give ships, tanks, and aircraft battlespace data that shows potential enemy movements before they occur. A new series of rapid transporters will bring forces to the shorelines of instability. And from safe distances in the air or at sea, smaller crews will program missiles for strategic inland targets.

As chair of the Seapower Subcommittee, I had the honor of witnessing firsthand the revolution in capabilities by traveling to the Persian Gulf to visit the sailors of the carrier Enterprise and the guided-missile cruiser U.S.S. Gettysburg and the minesweeper U.S.S. Ardent during the Easter recess. Without exception, the men and women of these ships, forward deployed in the Persian Gulf, demonstrated a solid commitment to defending the interests of their nation in some of the most dangerous waters on the planet.

I listened and talked with dozens of sailors who returned to Washington with a fresh understanding of the human dimension of readiness. Only dedicated people can deliver the capabilities needed to project our military power. Far removed from their families and the luxuries of life ashore, the crews of the Enterprise, the Ardent, and the Gettysburg admirably performed their missions of containing the Iraqi military and ensuring the freedom of commerce.

The diligence of the crews of these ships makes a visitor forget their youth. From galleys and control rooms to flight decks and bridges, sailors cooperated with professionalism to ensure that our maritime power upheld peace and stability. They reminded me that patriotism hinges on sacrifice, and that Congress can perform no greater service in defense policy than to improve the quality of life for military families.

Therefore, I think the legislation before us reinforces the wisdom of additional personnel provisions in both this authorization bill, as well as the legislation that was passed by the Senate that would increase the retirement and the pay for the members of our Armed Forces. Far removed from their families and the luxuries of life ashore, the crews of the Enterprise, the Ardent, and the Gettysburg admirably performed their missions of containing the Iraqi military and ensuring the freedom of commerce.

The diligence of the crews of these ships makes a visitor forget their youth. From galleys and control rooms to flight decks and bridges, sailors cooperated with professionalism to ensure that our maritime power upheld peace and stability. They reminded me that patriotism hinges on sacrifice, and that Congress can perform no greater service in defense policy than to improve the quality of life for military families.

I want to highlight a few provisions under this legislation which were within the jurisdiction of my Seapower Subcommittee. I thank Senator Kennedy, the ranking Democrat of the subcommittee, along with the panel's other members, for their diligent work on this year's legislation.

The Seapower Subcommittee held five hearings in our review of the fiscal year 2000 budget request. Our hearings focused on the overarching question of how the Pentagon can sharpen its ability to reinforce U.S. political and economic objectives overseas with an agile maritime fleet.

Towards this end, we explored programs designed to maintain the sea lanes vital to international trade. The Subcommittee also summoned Navy and Marine Corps witnesses to discuss strategic air and sealift in support of regional commanders in chief, littoral force projection and protection, evolving maritime requirements, and priorities in the realms of research and acquisition.

Witnesses before the Seapower Subcommittee testified that the proliferation of weapons and advanced technology caused by the willingness of countries to sell expertise, hardware, and technology present a challenge for the United States to predict potential adversary threats. This trend of proliferation shortens the timeline for an enemy to field an offensive weapon that can disable our forces in any region of conflict.

For these reasons, research and development in systems designed to counter enemy air, land, and sea-launched missiles, in addition to anti-ship torpedoes and mines, will enhance the Navy's capacity to deter conflict throughout the littoral areas of the globe. These coastal zones, within 200 miles of any sea, contain three-quarters of the world's population, 80 percent of the capital cities, and the major corridors of commerce.

Subcommittee witnesses expressed concern that traditional threats, as well as nontraditional threats, from hostile countries and international terrorism would have a degrading effect on sea-going trade and military operations. They pointed out that over 50 countries possessed over 150 types of naval mines; over 60 countries have inventories of more than 60 types of torpedoes; over 75 countries have more than 90 types of antiship cruise missiles; and by 2016, 40 to 50 countries will deploy at least one theater ballistic missile.

Navy and Marine Corps witnesses testified that their services will function as the force of choice in the 21st century. They based this assessment on compelling demographic facts. Water covers 70 percent of the world's surface, and by the year 2010, over 70 percent of the world's population will live in urban areas within 300 miles of a coastline.

An ever-increasing world population—to top 7.5 billion by the year 2025—will only intensify this surge of urbanization and leave new environmental, housing, and health care problems in its wake.

Competition among ethnic and religious populations will furthermore make the urbanized littorals ripe for conflict in the 21st century. The Navy and Marine Corps can, therefore, use the sea area as an operating base and a maneuver space without permission from a foreign country. In this context, maritime forces can serve as a first echelon of U.S. military power projection.

Force modernization must subsequently remain on schedule since America needs high-technology fleet and air units to steam at sea to deny an enemy the option of drawing personnel away from our key forces. The Seapower Subcommittee has held two hearings to consider pending legislation as it relates to the Department of Defense's budget.

From 1988 to 1998, the Navy's total obligational authority, in constant 1998 dollars, decreased by 40 percent. Coincident with this decrease, the Navy and
Marine Corps have experienced a dramatic increase in forward presence and contingency operations.

In the past 50 years, naval expeditionary forces have responded to over 250 crises worldwide. Since 1992 alone, as this "Commander-in-Chief Requirements" chart illustrates, naval forces have responded to 77 different contingency operations or threats around the world—that is between 1992 and 1998—while between the years of 1988 and 1991, they only responded to 27 different threats worldwide. So it shows the disparity in the threats between this decade and the previous decade, to show the tremendous pressures that are being placed on our naval and our marine forces.

During the cold war, Marines were called upon to respond to a threat on average of once every 15 weeks. Since 1990, the Marines have been responding to a threat once every 5 weeks. That is a threefold increase. So as a result of the naval force structures, as one witness said during the Seapower Subcommittee's hearing, there is "no shock absorbency left" when it comes to our force structures and the demands they are placing on our naval and marine forces.

Again, as this chart will illustrate in terms of where we are today on the 300-ship Navy, we are going to have to build, on an annual rate, 8 to 10 ships a year in order to sustain a 300-ship Navy. We are going to decline pretty rapidly. As we are in 1999, we have 315 ships; for the year 2000, 314; by the year 2005, we will be down to 305 ships. In order to sustain 300 ships, we will have to increase the number of ships we are building to 8 to 10 a year from the 6 we are building currently.

Based on the testimony, and also my visits to the deployed fleets units, and discussions with the Navy, the Marine Corps, the Army and Air Force officials, the subcommittee reached the following conclusions:

First, the Navy and Marine Corps capabilities must remain ahead of the threats designed to disrupt or deny maritime operations on the high seas and in the littorals. To respond to this conclusion, the Seapower portion of this bill adds $213 million to the budget request for research, development, testing, and evaluation.

Second, the Navy and Marine Corps future readiness will decline if recapitalization and modernization are deferred. I think again these charts illustrate the problem. So to respond to this challenge, the Seapower portion of this bill adds $1.068 billion to the budget request for procurement.

Third, strategic sea and airlift are required to support daily operations over the future defense requirements, and sustained military campaigns of a major theater war. The force deployment goals of the 1995 Mobility Requirements Study Bottom-Up Review Update established the strategic lift requirements as those required for one major theater war and, later, to swing that lift to support the second nearly simultaneous MTW.

So to respond to this challenge, the bill adds $40 million to the budget request for national defense features in ships.

In addition, the full committee approved the budget request for $3 billion for procurement of 15 C-17 aircraft, $700 million for modifications to the C-5 aircraft, $170 million for the C-17 research and development, and $65 million for the C-5 research and development.

Fourth, the Navy must build no fewer than 8 ships per year to maintain a force structure of approximately 300 vessels, as I mentioned earlier. Ship delivery and so far, with Congress responding to these challenges of both the littorals and the open ocean warfare.

Quantity has a quality of its own, especially when naval operations occur at the same time in different geographic regions. The Seapower portion of the bill therefore adds $375 million advanced procurement for the LHD-8 and extends the DDG-51 multiyear procurement authority to include the fiscal years 2002 and 2003 ships.

The committee, however, remains concerned with the overall shipbuilding rate included in the administration's budget requests. The topic of ship force structure was discussed more than any other issue in the Seapower hearings.

Witnesses stated repeatedly that the current force structure of 324 ships already strains worldwide operations. This problem will only grow, since the projected size of the fleet, as I said, will decrease to 305 platforms in the next 5 years.

Unfortunately, the Department of Defense has provided few specifics on the planned size of the Navy force structure beyond the calendar year 2015 and how it intends to address the impending ship shortfall problem beyond lowering acquisition costs and reducing the size of ships' crews.

The time has come for the administration to demonstrate an understanding of the ship acquisition problem and to Congress a systematic plan to address this serious national security concern.

The report accompanying this bill requires the Secretary of Defense to submit, with the fiscal year 2001 budget request, a report that details the Department's long-range shipbuilding plan through fiscal year 2030 and describes the annual funding required to procure 8 to 10 ships a year between fiscal years 2001 and 2030.

Finally, attack submarines have reached the limits of sustainable operations. The submarines of the 21st century will generate key strategic and tactical intelligence, deploy surveillance and reconnaissance teams, and enhance the firepower of carrier battle groups. In recognition of these facts, we approved the $116 million for submarine advanced technology and adds $22 million for the Advanced Deployable System.

Finally, the key to reducing the operating costs of ships lies in research and development to design future ships that can operate effectively with smaller crews. Our bill approves well-funded research and development programs for developing new ship designs to reduce overall life-cycle costs.

All of these naval programs, as well as the major systems of the other three Services, will require an adequate domestic bashing structure for maintenance and deployment. This factor, along with the changing mix of threats based systems that sustain our national security, triggered the two bipartisan Armed Services Committee votes this year against amendments authorizing additional base realignment and closure rounds.

The committee first rejected the BRAC amendments because no base closure round yet has yielded the taxpayers any clear or proven savings. To appreciate this point, one only need to consider the conclusion of the leading advocate of BRAC, the Department of Defense. DOD's April 1998 base closure report to Congress stated explicitly that "no audit trail, single document, or budget account exists for tracking the end use of each dollar saved through BRAC."

Furthermore, the conflict in Kosovo illustrates how hostilities can strain our ability to project military power in unstable areas of the world. Since this war began in March, the United States has diverted its only aircraft carrier in the Western Pacific, near North Korea, to the Adriatic Sea. We have more than 400 aircraft from airfields across the country now engaged over Kosovo.

In the meantime, the Department of Defense has almost depleted the Nation's air-launch precision missile stocks, strained our aerial tanker fleet, and called up 33,000 reservists. Congress and the administration should therefore consider how to improve, rather than phase out, the shore- and land-based systems that sustain our deployed forces.

We cannot forget that America's overseas basing infrastructure has declined by more than 40 percent since the end of the cold war. The four previous BRAC rounds have eliminated about 25 percent of domestic military installations.

The key challenge of the 21st century force will focus on long-range deployments from American territory to protect interests and allies on short notice. We need a master base plan, still undeveloped, that identifies categories of ports, staging grounds, airfields, depots, and maintenance facilities to
May 24, 1999

Congressional Record—Senate

10605

meet these strategic requirements. The administration cannot ask Congress to approve more closure commissions in a vacuum about what physical support assets at home the troops of tomorrow will need to complete their missions abroad.

This authorization bill advances the goals of shaping the modernized Armed Forces on which America will rely to safeguard their interests in a changing and volatile world.

I again thank the committee chairman, Senator WARNER, for his leadership, and the ranking member, Senator LIVN, for his leadership as well in crafting this significant bipartisan legislation. I urge all Senators to support it.

Privilege of the Floor

Mr. President, I ask unanimous consent that Laurell Braulit, my military fellow for prior proceedings during the Senate consideration of S. 1059.

The Presiding Officer. Without objection, it is so ordered.

The Presiding Officer (Mrs. Hutchinson). The Senator from Virginia.

Mr. WARNER. Madam President, I thank our distinguished colleague. I certainly appreciate the hard work and the intensity to which she brings to her work. Her leadership has been a great inspiration to all of us.

Ms. SNOWE. That is correct.

Mr. WARNER. How fortunate we are in the Senate to have one with that traditional background as now head of the Seapower Subcommittee of the Armed Services Committee of the Senate. You share that with another distinguished colleague in the next-door State of Massachusetts, Senator KENNEDY, who is the ranking member. We are well represented on this committee.

I commend you for your report and bring to the attention of the Senate and the American people the underlying theme of our pay bill, how many times our men and women of the Armed Forces are required now in missions beyond our shores. That is very important. Of course, as to the 300-ship Navy—a famous figure—I hope that you and I and others can hold the line, because we are a maritime Nation. Our entire economic strategy is dependent on the security of our overseas markets and the ability to get our products out. Our entire defense strategy is dependent on what we call forward deployment. The ships of the Navy are a lifeline protection for both our economic as well as our national security responsibilities in this country. I commend the Senator.

Ms. SNOWE. I thank the chairman for his comments. I certainly feel privileged to chair the Seapower Subcommittee and to focus on some of the critical challenges facing our naval forces in the future. Having had the opportunity to visit our personnel on the U.S.S. Enterprise, the U.S.S. Gettysburg, and the U.S.S. Ardent, I had a firsthand experience of being placed on the men and women in our Armed Forces and the more we need to support them in every way possible. That is why I think the pay and retirement provisions are all necessary, given the demands that are being placed on our naval forces overseas. The deployments are longer and they are more rigorous. It is becoming far more difficult for them when they return to home port because they have to begin retraining. So there is very little time for them to prepare for the future and also the demands that these challenges present in keeping them from their families. We have to recognize that. I think the administration has to recognize that in terms of the number of contingency operations that we are really putting a tremendous strain on all of our armed services.

Mr. WARNER. Madam President, I thank our distinguished colleague. I dare say that she will establish a record far superior to that of her predecessor; namely, the Senator from Virginia, as chairman of the Seapower Subcommittee.

I ask unanimous consent that the distinguished Senator from Maine be added as a cosponsor to the Roberts-Warn amendment now pending at the desk.

The Presiding Officer. Without objection, it is so ordered.

Mr. WARNER. Madam President, I understand the order is our distinguished colleague, also a new member of our committee and one who has certainly pulled her weight by a margin of two in her service on the committee.

Amendment No. 1

The Presiding Officer. Under a previous unanimous consent order, the Senator from Louisiana is recognized for 30 minutes.

Ms. LANDRIEU. I thank the Chair.

Madam President, I thank my chairmen for the fine work that he has done in bringing this very important bill to the floor and to acknowledge the work of my colleague from Maine. As a Senator who represents another State with a great maritime tradition, I must certainly appreciate the hard work and the intensity to which she brings to bear in making sure we maintain adequate naval power to support all of our missions around the world. Her leadership has been tremendous. I look forward to working with her, along with our chairman, in the years to come.

Mr. WARNER. Madam President, could I interrupt the Senator. I ask unanimous consent that at 5:30 today—I beg the forgiveness of the Chair and our distinguished colleague—

The Presiding Officer. The Senator from Louisiana.

Ms. LANDRIEU. On an equally important note, I rise to support the sense-of-the-Senate resolution, now in amendment form, offered by the distinguished Senator from Pennsylvania and myself. We are very strongly about presenting it to the whole chamber, and we hope to get a very strong bipartisan vote, in just a few minutes, on this resolution.

Madam President, at the close of World War II, Europe was devastated. The allied armies, in liberating Eastern Europe, had uncovered a horror beyond imagination—6 million Jews, men, women, and innocent children, had been massacred, and millions of other civilians and soldiers had been killed on all sides by fruitless wars of aggression.

Once Germany itself had been occupied, the documentary evidence of these atrocities came to light. Along with victory came the eventual capture of the Nazi leadership, and slowly but surely, the German war leaders who did not kill themselves outright, fell into our hands. At that time there were two competing ideas on how to deal with these prisoners. The English and the Russians simply wanted to take the leaders of Nazi regime outside and shoot them. After all, they were the victors who had treated the vanquished in Europe for hundreds of years, particularly when the vanquished had been so merciless themselves.

However, the American Secretary of War Henry Stimson, proposed a very different, and actually, radical solution. He wanted to use the atrocities perpetrated by Nazi Germany to make real the notion of international law. In retrospect, it seems very strange, indeed, that a Secretary of War would be the primary advocate for holding a legal proceeding. But Secretary Stimson was wise. He understood something very fundamental: America had not joined World War II to prop up the same tired cycle of revenge that had made Europe the bloodiest continent on Earth during the 20th century. We entered the war to create a fair and lasting peace. We had no territorial demands. We asked for no war reparations, and we did not come to loot and rob Germany of its treasures. All we wanted in exchange for the great sacrifice that we made as a people was the assurance that after the war, peace, democracy and freedom would prevail.

The Nuremberg trials were one of the central steps in fulfilling this objective. Instead of revenge, the trials stood for justice. Instead of collective blame, these trials stood for individual accountability. When Europe’s bloody past, the Nuremberg trials held the promise that we could break the cycle of violence.

Over 50 years since the conclusion of those trials, the Nuremberg principles are being called into question. I believe we reached the right conclusions at those trials. We hit upon some universal truths about what needs to be
done to bring true peace to a region wracked by war. We determined it was necessary to establish justice, to hold individuals accountable for their acts, and to try to stop future wars of revenge. Those principles ring true even today.

Ironically, as this map shows and as we are well aware, another conflict in Europe now puts the lessons of the Nuremberg Trials to the test. We began strongly enough. In May of 1993, the United Nations Security Council created the first international war crimes court since the Second World War, since the Nuremberg trials. The International Criminal Tribunal for former Yugoslavia was formed to investigate and try war crimes cases resulting from the war in Bosnia. It was hailed then as the first step towards reconciliation of the warring parties.

If the international community could bring justice to Bosnia, if they could expose the wanton destruction of human life by the Bosnian Serbs, there might be a real chance for the same collective soul searching that occurred in Germany at the end of World War II. That reflection and acknowledgment of wrongdoing has generated a peace between the great powers of Western Europe that was simply unthinkable at the beginning of this century. If it can happen between the Germans and the French, why not between the Croats and the Serbs?

For a number of reasons, mostly political, the international community has simply not grasped the opportunity that this international tribunal has offered us.

In the 6 years since its formation, the Tribunal has indicted 84 people. However, of those 84 indicted, it has completed only one. Twenty-five individuals are now in custody, either awaiting trial, or involved in proceedings. But six convictions in 6 years is a very mediocre showing for a conflict that was marked by intense brutality on all sides. Furthermore, the most significant war criminals remain at large. We are aware of where they are, but they continue operating unmolested. The reality is that while the vast majority of war crime indictments were against Bosnian Serbs, the Croatian and Muslim indictees are far more frequently living normal lives while their associates are in custody.

What is odd about ethnic cleansing is the fact that NATO did not make it a top priority to achieve those ends. Justice, provided impartially and equally, is the most effective means for doing that. It brands indelibly into people's minds the memories of the fire, torture, the shooting, the rape, the running, the horrors of the night and the morning. Instead of erasing history, it actually has the opposite effect. It makes a huge difference in the way they interact with their neighbors. In short, we must demonstrate that might does not make right and that no one can benefit from the misery of their neighbors.

Our State Department recently issued a report entitled "Erasing History: Ethnic Cleansing in Kosovo." This is one of a hundred pictures that have been taken, showing the horrors of mass executions and murder of innocent men, women, and children. That report details much of what is already known—700,000 refugees forced to flee their homes; 500 villages looted and burned; at least 70 instances of summary execution, torture, rape, and murder of women and young girls, and the list goes on.

What is odd about ethnic cleansing is that while it tries to erase history, it actually has the opposite effect. It brands indelibly into people's minds the memories of the fire, torture, the shooting, the rape, the running, the horrors of the night and the morning. Instead of erasing history, Yugoslavia must move beyond it, and NATO needs to continue to press them in that direction to achieve those ends. Justice, provided impartially and equally, is the most effective means for doing that, and we can do that through a strong, well-financed, determined War Crimes Tribunal.

There may be no clean hands in the Balkans, but there can be new beginnings. I believe this resolution will anchor the United States policy to creating one.
I would like to put up another chart of something that shows a video capture from a tape recently smuggled out of Yugoslavia.

Mr. WARNER. Madam President, will the Senator allow me to interrupt to make a unanimous-consent request?

Ms. LANDRIEU. Yes.

Mr. WARNER. Madam President, I ask unanimous consent that at 5:30 today, which is just minutes away, the Senate proceed to vote on or in relation to the Specter-Landrieu amendment No. 384 with no amendments in order to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Madam President, I now ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. WARNER. Madam President, if I might draw the Senate’s attention to the last paragraph, which is section 5, can the Senator read that?

It states: NATO should not accept any diplomatic resolution to the conflict in Kosovo that would bar—” and then, my first question is, Is it conceivable that the United Nations should then likewise not accept any? I mean in the final analysis, it is difficult to predict now. Certainly NATO will have a voice in the matter. But it could be that this thing would be involved before the United Nations. Is the spirit of this to include the United Nations, so to speak?

Ms. LANDRIEU. Yes, I would say so. The spirit of this resolution is clear that no diplomatic end to this war should allow any immunity for those who are guilty of war crimes.

I would object. I want to talk with Senator SPECTER about adding reference to the United Nations. Clearly, though, it is a NATO conflict.

Mr. WARNER. Let me proceed to another topic.

The Senator used the key phrase, she doesn’t want any amnesty or anything to prohibit the prosecution, and I think the Senator said “of those who are guilty.” But who has to establish guilt in terms of who is and who is not guilty? It seems to me if this were to read that it would “bar the indictment, apprehension, or prosecution of persons alleged to have committed,” because the Senator said “war criminals,” that could be interpreted as saying somebody is already designated one, two, three, and four as a war criminal and, therefore, you cannot give them amnesty, but there are some, I would presume, in this conflict who have not been designated “war criminals” but there are indications to that effect, and they would have to proceed through the indictment process. But as this is written, the date of the agreement might cut off a class of individuals who are guilty but have not been as yet designated “war criminals.”

Do I make myself clear?

Ms. LANDRIEU. I understand. I believe, what the Senator from Virginia is asking me. But I think the language of this amendment covers his concerns. We have not been allowed into Kosovo 1 day, but when we are, it will reveal atrocities and evidence of those responsible. It will happen in the same way as when we entered into Central Europe to find the concentration camps. This resolution states that no resolution of this conflict should give immunity in advance to anyone who could be charged and then later convicted of war crimes.

I think the language is clear on that intent.

Mr. WARNER. Let’s hope this colloquy has cleared up any other questions. Before we started the debate, I talked with the Senator, and I thought she was very candid in her private comments to me.

Supposing that this frightful conflict drags on and the only basis on which anyone can reach any resolution is the question of amnesty. What do you think the Senator’s position to be that under no circumstances should the sole remaining provision to stop this conflict be waived by those negotiating and those who eventually have to accept the resolution? Is that your position?

Ms. LANDRIEU. Absolutely. It is quite a serious point of this resolution, and I recognize that it may take a tool off the table, but it is purposefully done that way. I happen to believe it would be a great mistake for this Nation and our NATO allies to enter into any agreements that give immunity to people who are charged with war crimes, with the brutality of gang rape, there are hundreds of examples that we have had now from eyewitness accounts that we hope to prosecute.

Mr. WARNER. Madam President, I don’t take the Senator’s time. I intend to support the resolution. I thought a colloquy would bring out questions that others might have in mind and would clarify any doubts.

Madam President, thank you.

Mr. LEVIN. If the Senator will yield further while she is being interrupted, I want to commend the good Senator from Louisiana for her steadfastness, and for the sponsors’ steadfastness at that very point. There was no provision for amnesty in Dayton. There was no provision for amnesty at Rambouillet. There should be no such provision, nor should the door be opened a crack to any such possibility. People must be held accountable for war crimes. I do not think for 1 minute that there is room for negotiation on that issue, or else we will see an endless repetition of the kind of cleansing of ethnic groups that we have in Balkans.

I commend the sponsors, and particularly the Senator from Louisiana for her strength and support.

Mr. WARNER. Madam President, I likewise commend the esteemed colleague and Senator from Louisiana for the important amendment which will send a signal at this time. It is very timely.

I wish to commend my distinguished colleague from Pennsylvania. It is a very interesting combination of two Senators coming to the floor on an important point.

Ms. LANDRIEU. I thank the Senator. The Senator from Pennsylvania surely brings a tremendous amount of expertise, having been a prosecutor and having dealt with these issues on a domestic basis and an international basis.

Let me just conclude by pointing out and explaining what this picture is. This looks like a picture of people burying bodies. But actually, because this is part of a 20-minute video, this is a snapshot, of people exhuming bodies, digging up a mass grave, to try to hide or relocate these victims. The State Department believes that the Serbs are planning the bodies into mass graves sites to mislead the Yugoslav people and the international community.

This is an important part of the world. If I can close by putting up a map of Yugoslavia—this is not a small, insignificant area—Yugoslavia lays in the heart of Europe on the Mediterranean Sea where civilizations have lasted for thousands and thousands of years. We have fought wars and millions of soldiers have died. Americans have spent fortunes and generations of blood helping Europe to achieve peace. In large part we have succeeded. With this one important exception. Establishing law and order through the Tribunal is the first step on a long road of recovery. That is the point of this resolution.

I hope we will be successful today, and that it will give us the strength to maintain our resolve to bring justice to people who are depending on us.

Thank you, Madam President. I yield the floor.

Mr. LEVIN. Madam President, I ask unanimous consent that I be added as a cosponsor to the amendment.

One of the points raised by the Senator from Virginia is a technical drafting issue, which I think is a relevant one. I believe we can correct it in conference. I think its importance was pointed out.

The PRESIDING OFFICER. The hour of 5:30 having arrived, the question is on agreeing to Amendment No. 384.

The yeas and nays have been ordered.

The clerk will call the roll.

The yeas and nays have been ordered.

The clerk will call the roll.

Mr. NICKLES. I announce that the Senator from Alaska (Mr. MURkowski), the Senator from Arizona (Mr. McCaIN), and the Senator from Arkansas (Mr. HutchINsOn) are necessarily absent.

I further announce that, if present and voting, the Senator from Arkansas (Mr. HutchINsOn) would vote “yea.”

May 24, 1999

CONGRESSIONAL RECORD—SENATE 10607
Mr. REID. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Georgia (Mr. CLELAND), the Senator from Wisconsin (Mr. FEINGOLD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Connecticut (Mr. LIEBERMAN), the Senator from Rhode Island (Mr. REED), and the Senator from New Jersey (Mr. TORRICELLI) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. REED) and the Senator from Connecticut (Mr. LIEBERMAN) would each vote “yea.”

The PRESIDING OFFICER (Mr. FITZGERALD). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 90, nays 0, as follows:

YEAS—90

Abraham Edwards Lott
Akaka East Luger
Allard Feinstein Mack
Ashcroft Feingold McConnell
Baucus Frist Mikulski
Bayh Gorton Moynihan
Bennett Graham Murray
Bindman Gramm Nickles
Bond Grams Reid
Boxer Grassley Roby
Breaux Gregg Roberts
Brownback Hagel Rockefeller
Bryan Hatch Roth
Bunning Hatch Santorum
Burns Helms Sarbanes
Byrd Hollings Schumer
Campbell Hatchison Sessions
Chafee Inhofe Shelby
Cooper Inouye Smith (NH)
Collins Jeffords Smith (OR)
Conrad Johnson Snowe
Covell Kerry Specter
Craig Kerry Stevens
Crapo Kohl Thomas
Daschle Kyl Thompson
DeWine Landrieu Thurmond
Dodd Lautenberg Voinovich
Domenici Leahy Warner
Dorgan Levin Wellstone
Durbin Lincoln Wyden

NOT VOTING—10

Biden Kennedy Reed
Cleland Lieberman Torricelli
Feingold McCain
Hutchinson Murkowski

The amendment (No. 384) was agreed to.

Mr. NICKLES. Mr. President, Senator MURkowski was unable to cast a vote on this amendment because of unavoidable flight cancellations back to Washington.

Mr. WARNER. Mr. President, I move to reconsider the vote.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WARNER. Mr. President, at this time on behalf of the distinguished majority leader, I ask unanimous consent that at 9:30 on Tuesday, tomorrow, the Senate resume the DOD authorization bill and Senator SERRIN of New Hampshire be recognized for up to 30 minutes on a matter regarding the historic connection of the U.S.S. Indianapolis to the history of our Nation, to be immediately followed by 30 minutes for debate, equally divided, with an additional 10 minutes under the control of Senator BACHUS and Senator GRAMM relative to Senator ROTTGARTNER’s amendment regarding Admiral Kimmell and General Short.

I further ask consent that following that debate, the amendment be temporarily set aside and there then be 1 hour for debate equally divided related to the Roberts-Warner amendment No. 377.

I further ask that following that debate, the amendment be laid aside and then there be up to 1 hour equally divided relative to the Wellstone amendment No. 382.

I finally ask consent that at 2:15 on Tuesday, the Senate proceed to a vote on or in relation to the Roth amendment and, following that vote, the Roberts-Warner amendment No. 378 be agreed to and the Senate immediately proceed to a vote on amendment No. 377, as amended, to be followed by a vote on or in relation to amendment No. 382, with 2 minutes for explanation prior to each vote.

For the information of all Senators—

The PRESIDING OFFICER. Is there objection?

Mr. LEVIN. Reserving the right to object, Mr. President—no objection.

The PRESIDING OFFICER. If there is no objection, so ordered.

Mr. WARNER. I thank the Chair.

The PRESIDING OFFICER. If there is no objection, so ordered.

Mr. WARNER. I thank the Chair.

For the information of all Senators, the next votes will occur at 2:15 p.m. on Tuesday. It is the hope of leadership that passage could occur by close of business Tuesday night or Wednesday morning. On behalf of the majority leader and, I am sure, the minority leader, we urge our colleagues to do everything they can to make this possible.

The distinguished whip.

Mr. REID. Mr. President, I don’t know of two more able managers of a bill than the Senator from Virginia and the Senator from Michigan. But on behalf of the majority leader and, I am sure, the minority leader, we urge our colleagues to do everything they can to make this possible.

In short, we want to help. We want to cooperate in any way we can. But we cannot be part of this miracle, because it won’t happen.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, let me thank the Senator from Nevada for not only all of his help in getting bills passed but also in realistically assessing situations, which is part of his job. I must say, given the amendments we already know of, while I am hopeful, too, of completing action on this bill at some point this week, I do not see how the hopes, as expressed here, can come to reality, given the substance of some of the amendments.

Again, the Kosovo amendment alone, I think, would precipitate a significant, lengthy debate on this floor, given all of the circumstances and the length of time which that subject has already required for debate, and that we are in the middle of a conflict right now, and the ramifications for that conflict and the signals which would be sent to the prime creator of that conflict, Mr. Milosevic. It would be a lengthy debate. I think, I would like to finish this bill by Wednesday, too, but I just can’t see, given that amendment and other amendments which are significant, that that is a realistic assessment.

Mr. REID. Will the Senator yield for a question?

Mr. LEVIN. I would be happy to. Mr. REID. It is not a member of the minority who filed that amendment. It is a member of the majority who has filed that amendment, is that true?

Mr. LEVIN. That is correct. Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

(Please see the remarks of Mr. DOMENICI pertaining to the submission of S. Res. 106 are printed in today’s RECORD under “Submission of Concurrent and Senate Resolutions.”)

AMENDMENT NO. 388

(Purpose: To request the President to advance the late Rear Admiral (retired) Husband E. Kimmel on the retired list of the Navy to the highest grade held as Commander in Chief, United States Fleet, during World War II, and to advance the late Major General (retired) Walter C. Short on the retired list of the Army to the highest grade held as Commanding General, Hawaiian Department, during World War II, as was done under the Officer Personnel Act of 1947 for all other senior officers who served in positions of command during World War II)

Mr. ROTH. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. Without objection, the previous amendments will be set aside, and the clerk will report.

May 24, 1999

10608
The assistant legislative clerk read as follows:

"The Senate from Delaware (Mr. ROTH), for himself, Mr. BIDEN, Mr. THURMOND, and Mr. KENNEDY, proposes an amendment numbered 388.

Mr. ROTH. Mr. President, I unambiguously consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment (No. 388) is printed in today's RECORD under 'Amendments Submitted'.)

Mr. ROTH. Mr. President, I rise today on behalf of my colleague from Delaware, Senator BIDEN, and on behalf of Senator THURMOND and Senator KENNEDY to introduce an amendment whose intent is to redress a grave injustice that haunts us from the tribulations of World War II.

Admiral Husband Kimmel and General Walter Short were the two senior commanders of U.S. forces deployed in the Pacific at the time of the disastrous surprise December 7, 1941, attack on Pearl Harbor. In the immediate aftermath of the attack, they were unfairly and publicly charged with dereliction of duty and blamed as singularly responsible for the success of that attack.

Less than 6 weeks after the Pearl Harbor attack, in a hastily prepared report to the President, the Roberts Commission—perhaps the most flawed and unfortunately most influential investigation of the disaster—levied the dereliction of duty charge against Kimmel and Short—a charge that was immediately and highly publicized.

Admiral William Harrison Standley, who served in World War II in a post that was given to every other senior commander of war-time command—an honor that was given to every other senior commander who served in World War II in a post above their grade.

That decision against Kimmel and Short is contrary to the findings of these official reports and investigations conducted after the war, including one Department of Defense report completed in 1995 at Senator Thurmond's request, confirmed these findings.

Our amendment is a rewrite of Senate Joint Resolution 19, the Kimmel-Short Resolution, that I, Senator BIDEN, Senator THURMOND, Senator HELMS, Senator STEVENS, Senator COCHRAN, Senator KENNEDY, Senator DOMANICK, Senator ENZI, Senator MURKOWSKI, Senator ABRAHAM, Senator CRAIG, Senator DURENBERG, Senator JOHN KERRY, Senator KYL, Senator HOLLINGS, Senator BOB SMITH, Senator COLLINS, Senator LANDRIEU, Senator VOINOVICH, Senator DeWINE, and Senator PENSTEIN—a total of 23 cosponsors—introduced last month.

The amendment calls upon the President of the United States to advance posthumously on the retirement lists Admiral Kimmel and General Short to the grades of their highest war-time commands. Its passage would communicate the Senate's recognition of the injustice done to them and call upon the President to take corrective action.

Such a statement by the Senate would do much to remove the stigma of blame that so unfairly burdens the reputations of these two officers. It is a correction consistent with our military's tradition of honor.

Mr. President, General Marshall's investigation did not do so.

In my review of this fundamental information made available to Admiral Kimmel and General Short.

I will now review some of the most crucial points. I was most struck by the honor and integrity demonstrated by General George Marshall who was Army Chief of Staff at the time of the December 7, 1941 attack on Pearl Harbor.

On November 27 of that year, General Short interpreted a vaguely written war warning message sent from the high command in Washington as suggesting the need to defend against sabotage. Consequently, he concentrated his aircraft away from perimeter roads to protect them, thus inadvertently increasing their vulnerability to air attack. When he reported his preparations to the General Staff in Washington, the General Staff took no steps to clarify the reality of the situation.

In my review of this critical information, I think the Senate's recognition of the injustice done to these two officers would do much to remove the stigma of blame that so unfairly burdens the reputation of these two commanders a reputation that was given to every other senior commander who served in World War II in a post above their grade.

That decision against Kimmel and Short is contrary to the findings of these official reports and investigations conducted after the war, including one Department of Defense report completed in 1995 at Senator Thurmond's request, confirmed these findings.

Our amendment is a rewrite of Senate Joint Resolution 19, the Kimmel-Short Resolution, that I, Senator BIDEN, Senator THURMOND, Senator HELMS, Senator STEVENS, Senator COCHRAN, Senator KENNEDY, Senator DOMANICK, Senator ENZI, Senator MURKOWSKI, Senator ABRAHAM, Senator CRAIG, Senator DURENBERG, Senator JOHN KERRY, Senator KYL, Senator HOLLINGS, Senator BOB SMITH, Senator COLLINS, Senator LANDRIEU, Senator VOINOVICH, Senator DeWINE, and Senator PENSTEIN—a total of 23 cosponsors—introduced last month.

The amendment calls upon the President of the United States to advance posthumously on the retirement lists Admiral Kimmel and General Short to the grades of their highest war-time commands. Its passage would communicate the Senate's recognition of the injustice done to them and call upon the President to take corrective action.

Such a statement by the Senate would do much to remove the stigma of blame that so unfairly burdens the reputations of these two officers. It is a correction consistent with our military's tradition of honor.

Mr. President, General Marshall's investigation did not do so.

In my review of this critical information, I think the Senate's recognition of the injustice done to these two officers would do much to remove the stigma of blame that so unfairly burdens the reputation of these two commanders.
pay a price for the disaster at Pearl Harbor.

Let me add one poignant fact about the two wartime investigations. Their conclusions—that Kimmel's and Short's forces had been properly disposed according to the information available to them and that their superiors had failed to share important intelligence—were kept secret on the grounds that making them public would have been detrimental to the war effort.

Be that as it may, there is no longer any reason to perpetuate the cruel myth that Kimmel and Short were singularly responsible for the disaster at Pearl Harbor. Admiral Spruance, one of our great naval commanders of World War II, shares this view. He put it this way:

"I have always felt that Kimmel and Short were held responsible for Pearl Harbor in order that the American people might have no reason to lose confidence in their government in Washington. This was probably justifiable under the circumstances at that time, but it does not justify forever damning those two fine officers."

Mr. President, to do so is not only unfair, it tarnishes our nation's military honor.

Mr. President, this sense of the Senate has been endorsed by countless military officers, including those who have served at the highest levels of command. These include former Chairmen of the Joint Chiefs of Staff Admiral Thomas H. Moorer and Admiral William J. Crowe, and former Chiefs of Naval Operations Admiral J.L. Holloway III, Admiral Elmo R. Zumwalt and Admiral Carlisle A.H. Trost.

Moreover a number of public organizations have called for posthumous advancements of Kimmel and Short. Last August, the VFW passed a resolution calling for the advancement of Admiral Kimmel and General Short.

Let me add that Senator Robert Dole, one of our most distinguished colleagues and a veteran who served heroically in World War II, has also endorsed this sense of the Senate resolution.

This resolution now in amendment form is about justice, equity, and honor. Its purpose is to redress a historic wrong, to ensure that Admiral Kimmel and General Short are treated with the dignity and honor they deserve, and to ensure that justice and fairness fully permeate the memory and lessons learned from the catastrophe at Pearl Harbor.

As we approach Memorial Day and prepare to honor those who served to protect our great nation, it is a most appropriate time to redress this injustice, which this correction is long overdue. I urge my colleagues to support this joint resolution.

Mr. President, I ask unanimous consent that a number of exhibits be printed in the RECORD, including a statement from the Veterans of Foreign Wars, including a resolution adopted by the Veterans of Foreign Wars, a letter from several distinguished admirals of the U.S. Navy who are alive and sent this to us comparatively recently, likewise a letter from the Pearl Harbor Survivors Association, Inc., and finally a copy of the letter from Senator Bob Dole to myself.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

To: All Members of the United States Senate

From: Thomas A. Polliot, Commander-in-Chief

Veterans of Foreign Wars of the United States

Date: 28 September 1998.

On August 31, 1998, the delegates to 99th National Convention of the Veterans of Foreign Wars of the United States unanimously approved Resolution Number 441—"Restore Pre-Attack Ranks to Admiral Husband E. Kimmel and General Walter C. Short." A copy of VFW Resolution Number 441 is attached for your attention.

Based on our resolution and a review of S.J. Res. 55, we believe the goals of both the Senate and VFW resolutions are similar and consistent. Therefore, we strongly endorse this bill and ask that the Senate remove the burden of guilt for the attack on Pearl Harbor from the shoulders of Admiral Kimmel and General Short.

Respectfully,

THOMAS A. POLLIOT
Commander-in-Chief

HON. WILLIAM S. COHEN,
The Secretary of Defense,
The Pentagon, Washington, DC.

DEAR MR. SECRETARY:

Last month, Senator Joe Biden and William Roth of Delaware sent a letter urging you to recommend to the President that Admiral Husband Kimmel and General Walter Short be advanced posthumously to their wartime ranks of four star Admiral and Lieutenant General respectively.

The Veterans of Foreign Wars of the United States supports the recommendation of Senators Biden and Roth, and asks that you consider their request.

Thank you for your consideration.

Sincerely,

JOHN E. MOON
Commander-in-Chief

Resolution No. 441—Restore Pre-Attack Ranks to Admiral Husband E. Kimmel and General Walter C. Short

Whereas, Admiral Husband E. Kimmel and General Walter C. Short were the Commanders of Record for the Navy and Army Forces at Pearl Harbor, Hawaii, on December 7, 1941, when the Japanese Imperial Navy launched its attack; and

Whereas, following the attack, President Franklin D. Roosevelt appointed Supreme Court Justice Owen J. Roberts to a commission to investigate such incident to determine if there had been any dereliction to duty; and

Whereas, the Roberts Commission conducted a rushed investigation in only five weeks. It charged Admiral Kimmel and General Short with dereliction of their duty. The findings were made public to the world; and

Whereas, the dereliction of duty charge destroyed the honor and reputations of both Admiral Kimmel and General Short, and due to the urgency neither man was given the opportunity to defend himself against the accusation of dereliction of duty; and

Whereas, other investigations showed that there was no basis for the dereliction of duty charges, and a Congressional investigation in 1946 made specific findings that neither Admiral Kimmel nor General Short had been negligent in his duty at the time of the bombing of Pearl Harbor; and

Whereas, it has been documented that the United States military had broken the Japanese diplomatic code known as "Purple" and the military code known as "JN-25. The final part of the diplomatic message that told of the attack on Pearl Harbor was received on December 6, 1941. With this vital information in hand, no warning was dispatched to Admiral Kimmel or General Short to provide sufficient time to defend Pearl Harbor in the proper manner; and

Whereas, it was not until after the tenth investigation of the attack on Pearl Harbor was completed in December of 1946 that the United States Government in the report of Under Secretary of Defense Edwin S. Dorn that Admiral Kimmel and General Short were not solely responsible for the disaster, but that responsibility must be broadly shared; and

Whereas, at this time the American public has been deceived for the past fifty-six years regarding the unfounded charge of dereliction of duty against two fine military officers whose reputations and honor have been tarnished; now, therefore

Be it resolved, by the Veterans of Foreign Wars of the United States, that we urge the President of the United States to restore the honor and reputations of Admiral Husband E. Kimmel and General Walter Short.

* * * * *

To: Honorable Members of the United States Senate

Re: We Honor and Recognize Adm. Husband Kimmel and General Walter Short.

Dear Senator:

We ask that the honor and reputations of two fine officers who dedicated themselves to the service of their country be restored. Admiral Husband Kimmel and General Walter Short were sin-...
CONGRESSIONAL RECORD—SENATE

A review of the historical facts available on the subject of the attack on Pearl Harbor clearly demonstrates that these officers were not treated fairly.

1. They accomplished all that anyone could have expected—support provided by their superiors in terms of operating forces (ships and aircraft) and information (intelligence and instructions and intelligence). Their disposition of forces, in view of the information made available to them by the command structure in Washington, was reasonable and appropriate.

2. Admiral Kimmel was told of the capabilities of U.S. intelligence (MAGIC, the code-breaking capability of PURPLE and other Japanese codes) and he promised he could rely on adequate warning of any attack based on this special intelligence capability. Both Commanders rightfully operated under the impression, and with the assurance, that they were receiving the necessary intelligence information to fulfill their responsibilities.

3. Historical information now available in the public domain through declassified files, and post-war statements of many officers involved, clearly demonstrate that vital information was routinely withheld from both Commanders.

4. The code-breaking intelligence of PURPLE did provide warning of an attack on Pearl Harbor, but the Hawaiian Commanders were not informed. Whether deliberate or for some other reason should make no difference, these Officers did not get the support and warnings they were promised.

5. The fault was not theirs. It lay in Washington.

We urge you, as Members of the United States Senate, to take a leadership role in assuring justice for two military careerists who were willing to fight and die for their country, but not to be humiliated by its government. We believe that the American people—indeed their national characteristic of fair-play—would be the record set straight. Thank you.

Respectfully,

ADM. THOMAS H. MOORER
ADM. WILLIAM J. CROWE
ADM. J.L. HOLLOWAY III.
ADM. ELMO R. ZUMWAULT
ADM. CARLISLE A.H. TROTZ.

PEARL HARBOR SURVIVORS ASSOCIATION, INC.

Re: Resolution No. 6.

EDWARD R. KIMMEL.
Wilmington, DE.

Dear Mr. Kimmel: I am writing to you in regards to the resolution that we of the Pearl Harbor Survivors Association, Inc. passed at our National Convention in Albuquerque, NM, this past December 6, 1990.

Subject: Pearl Harbor

Whereas: At the time of the Japanese attack on Pearl Harbor December 7, 1941, the two officers in command of U.S. armed forces at Pearl Harbor, Admiral Husband E. Kimmel (Pacific Fleet Commander) and Lieutenant General Walter C. Short (Hawaii Army Commander) were retired in “permanent grade” from their respective branches of the armed forces.

Whereas: At the time of the attack Admiral Kimmel was serving in a temporary appointment as Rear Admiral (two stars), his permanent grade.

Whereas: At the time of the attack, Lieu-tenant General Short was serving in a temporary appointment as a Major General (three stars) but was retired as a Major General (two stars), his permanent grade.

Whereas: In 1947 provisions were enacted in the governing retirement from the armed forces which permitted officers who had temporarily served in a higher rank to be advanced on the retired list to that higher rank, without benefit of higher pay, when recommended for such advancement by the Secretary of Defense and approved by the President of the United States and concurred in by the Senate.

Whereas: Recently published historical writings and film documentaries established Admiral Kimmel and General Short were unjustly made scapegoats for the success of the surprise attack on Pearl Harbor and other military installations on Oahu on December 7, 1941.

Whereas: At its National Convention in December 1984 at Grossingers Resort in New York, the Pearl Harbor Survivors Association, Inc. representing voices of the nation, unanimously passed a resolution honoring the memory of Admiral Kimmel and General Short and praising them for having single-handedly shouldered the full blame for the disaster at Pearl Harbor when, in fact, others, and the whole nation should have shared the burden.

Whereas: The terms of the 1984 resolution were fulfilled at the PHSA 45th reunion in Hawaii in December 1989 when three officers closest in age to Pearl Harbor were presented beautifully inscribed plaques honoring Admiral Kimmel and General Short at an expression of admiration and respect.

Resolved: (1) That the Pearl Harbor Survivors Association urges the Secretary of Defense to recommend to the President of the United States that he nominate Rear Admiral Husband E. Kimmel (Retired) (Deceased) for posthumous promotion to the rank of full admiral on the list of retired naval officers and Major General Walter C. Short (Retired) (Deceased) for posthumous promotion to the rank of Lieutenant General on the list of retired military officers, and consent with the recommendation that the Office of Defense to recommend to the President of the United States to make the

Submitted by Alex D. Cobb, Jr.

The officers of the Association are now in the process of complying with the above resolution and hopefully will have it in place for the 50th Anniversary of Pearl Harbor.

If I can be of further help please feel free to contact me.

Sincerely,

Kenneth R. Creese, National Secretary.
CONGRESSIONAL RECORD—SENATE  May 24, 1999

SENATOR BOB DOLE

Hon. William V. Roth, Jr.,
Hart Senate Office Building,
Washington, DC.

Dear Bill: I will join my voice with yours in support of the Kimmel-Short Resolution of 1999.

The responsibility for the Pearl Harbor disaster should be shared by many. In light of the more recent disclosures of withheld information Admiral Kimmel and Lieutenant General Short should have had. I agree these two commanders have been unjustly stigmatized. Please keep me informed of the progress of this resolution.

Sincerely,

Bob Dole

The PRESIDING OFFICER. The senior Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of the amendment sponsored by my friends from Delaware—Senators Roth and Biden.

Admiral Husband E. Kimmel and General Walter C. Short were both unfa
cily maligned for their roles during the invasion of Pearl Harbor. They were blamed for not anticipating nor being prepared for the attack. Admiral Kimmel was commander of U.S. forces in the Pacific, and General Short was commander of U.S. Army forces. The overwhelming consensus of the academic community and retired flag officers, most notably naval officers, concur that history must be set straight in this matter. Admiral Kimmel and General Short are, in my opinion, the two final victims of Pearl Harbor. Both officers were relieving of their commands, their careers and reputations destroyed after being blamed for negligence and dereliction of duty. These men were doing their duty to the best of their ability, and without full cooperation from superiors in their chain-of-command. Despite the fact that the charge of dereliction of duty was never proved, that charge still exists in the minds of many people.

Surprisingly, almost everyone above these two officers escaped censure. Yet, we know now that civilian and military officials in Washington withheld vital intelligence information which could have more fully alerted the field commanders to their imminent peril.

In judging Admiral Kimmel and General Short, the following facts have been repeatedly substantiated, but wrongfully and continually ignored:

The intelligence made available to the Pearl Harbor commanders was not sufficient to justify a higher level of vigilance than was maintained prior to the attack.

Neither officer knew of the decoded intelligence in Washington indicating the Japanese had identified the United States as an enemy.

Both commanders were assured by their superiors they were getting the best intelligence available at the time.

There were no prudent defensive options available for the officers that would have significantly affected the outcome of the attack.

Military, governmental and congressional investigators have provided clear evidence that these two commanders were singled out for blame that should have been widely shared.

In 1995, I held an in-depth meeting to review this matter which included the officers’ families, historians, experts and retired high-ranking military officers, who all testified in favor of the two commanders.

In response to this review, Under Defense Secretary Edwin Dorn’s subsequent report disclosed officially—for the first time—that blame should be "broadly shared." The Dorn Report stated members of the high command in Washington were privy to intercepted Japanese messages that in their totality stated strongly toward an attack on Pearl Harbor on the 7th of December, 1941 . . ." and that this intelligence was never sent to the Hawaiian commanders.

The Dorn Report went so far as to characterize the handling of critically important decoded Japanese messages in Washington as revealing “ineptitude . . . unwarranted assumptions and misestimates, limited coordination, ambiguous language, and lack of clarification and follow-up at higher levels.”

They are eligible for this advancement in rank by token of the Officer Personnel Act of 1947, which authorizes retirement at highest wartime rank.

All eligible officers have benefitted. All except for two: Admiral Kimmel and General Short. This advancement in rank would officially vindicate them. No retroactive pay would be involved.

The posthumous promotion of Admiral Kimmel and General Short will be a small step in restoring honor to these men.

It is time for Congress and the Administration to step forward and do the right thing.

I urge adoption of the amendment and yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, with great reluctance, I oppose this amendment. I do so based on some independent study that I have made, and indeed, I guess, throughout my lifetime. I had a very, very modest period of active service at the end of World War II in 1945 for a period of about 15 or 18 months. I can’t remember now.

Anyway, I lived my lifetime through this period of history. Therefore, all of my active service in that period was here in the United States, preparing to join others of my generation for the invasion of Japan, which I thank the Dear Lord for.

I have gone through enough of this material to satisfy me that what we are faced with here is one generation trying to provide revisionist history upon another. That is, in my judgment, unwise, and it could well promote many other meritotious cases during the great period of history—and who knows, going way back in history—to be brought to this Congress for similar rectification or whatever the petition may say.

The records show that the request by many distinguished esteemed colleagues initiated correspondence beginning in 1994—that is roughly 5 years ago. Secretary Perry on 7, September, 1994; again on 22 November, 1994; President Reagan, 1, December, 1994; Deputy Secretary John Deutch, 10, December, 1994; Perry, 5 March, 1995; Deutch, 24 March of 1995; the Dorn Report on 6, October, 1995; Deputy Secretary Defense John White, December, 1995; Secretary Cohen here in 18, November, 1996; and P&R & De Leon, on 20, July, 1998.

In other words, for 5 years the Department of Defense has devoted a good deal of time and effort to try—I presume and I certainly assume—to make an objective analysis of all of these letters, and have turned down the various requests from my two senior colleagues.

First, I ask my distinguished colleague from Delaware, because I look at this very imposing collection of documents and I reflect on the number of inquiries that have been held throughout history, these are the inquiries that have been held regarding these two officers and their association with the tragic losses of men, women, and assets of the United States on December 7, 1941.

We start with the Knox Investigation, December 9 through 14, in 1941. That was followed by the Roberts Commission, December 18 through January 23, 1942. The Hart Investigation, February 12 through June 15 of 1944; the Army Pearl Harbor Board, July 20 through October 20, 1944; Navy Court of Inquiry, July 24 through October 19, 1944; the Clark Investigation, August 4 through September 20, 1944; the Hewitt Inquiry, May 14 through July 11, 1945; the Clausen Investigation, January 24 through September 12, 1945; the Joint Congressional Committee, November 15 through May 23, 1945.

Based on the results of all these investigations, Secretary Cohen wrote to Senator Thurmond and presumably Senator Roth. He said:

Mr. Chairman: Thank you for your interest in exonerating the names of Admiral Kimmel and General Short. In the years since the fateful events at Pearl Harbor there have been numerous formal investigations of the events leading up to the attack, including sharp debate over our state of readiness at the time.

While Under Secretary of Defense for Personnel and Readiness, Mr. Edwin Dorn conducted a thorough review of this issue in 1995. He carefully considered the information contained in nine previous formal investigations, visited Pearl Harbor and personally...
The Senator has raised a very key

As a matter of fact, the finding was made that their disposition based on the information they had was appropriate and proper.

Mr. WARNER. Mr. President, before we leave that point, if none of these reports that I recited—some nine in number which had before them live witnesses, clarity of mind and clarity of recollection—did not exonerate these officers, then why should we now at this late date in history try to make a different finding? There could have been other officers who possibly were not advanced in rank. You cite they should be treated equally. How do I know there are not other officers, Army and Navy, who were not advanced in rank because they bore part of the responsibility for this tragedy? So, when you ask for equality, it would seem to me you would have to come forth with all the cases of all those who bore part of the responsibility and show that they were treated differently than Kimmel and Short.

Mr. ROTH. With all due deference to my colleague, that is hypothetical. It is possible that somewhere someone was mistreated. But those facts are not before us. I am not aware of any such charges. But here we have two individuals about whom many different people agree, from those like Bob Dole, who served with great distinction, from the admirals who were in command, both of the Navy and our military forces, all coming forward with the recommendation that, to be fair, these two individuals should be advanced to their highest wartime rank.

The point the Senator is making is true in life. Many times lawsuits are brought but you cannot, in settling that lawsuit, with the individuals before you—you are not going to solve all the problems of mankind because you only have the facts of those you are considering. Our resolution is a follow-through for two individuals, about whom, time and time again, it was said they served with distinction.

Mr. WARNER. But the Senator said let’s treat these two individuals equally with others who bear part of the responsibility—a reasonable request. But I would want to know beforehand, who are the others? How were they treated?

First, the Dorn Report specifically said that they—Kimmel and Short—do bear part of the responsibility. We are in agreement that.

Mr. ROTH. Yes.

Mr. WARNER. Can the Senator point to any of the investigations that I recited, beginning back in 1941, which in any way totally or otherwise, exonerated Kimmel or Short?

Mr. ROTH. There were some findings that because of the lack of intelligence, they were not advised of the most up-to-date information that Washington had; they were not at fault.

As a matter of fact, the finding was made that their disposition based on the information they had was appropriate and proper.

Mr. WARNER. Mr. President, before we leave that point, if none of these reports that I recited—some nine in number which had before them live witnesses, clarity of mind and clarity of recollection—did not exonerate these officers, then why should we now at this late date in history try to make a different finding? There could have been other officers who possibly were not advanced in rank. You cite they should be treated equally. How do I know there are not other officers, Army and Navy, who were not advanced in rank because they bore part of the responsibility for this tragedy? So, when you ask for equality, it would seem to me you would have to come forth with all the cases of all those who bore part of the responsibility and show that they were treated differently than Kimmel and Short.

Mr. ROTH. With all due deference to my colleague, that is hypothetical. It is possible that somewhere someone was mistreated. But those facts are not before us. I am not aware of any such charges. But here we have two individuals about whom many different people agree, from those like Bob Dole, who served with great distinction, from the admirals who were in command, both of the Navy and our military forces, all coming forward with the recommendation that, to be fair, these two individuals should be advanced to their highest wartime rank.

The point the Senator is making is true in life. Many times lawsuits are brought but you cannot, in settling that lawsuit, with the individuals before you—you are not going to solve all the problems of mankind because you only have the facts of those you are considering. Our resolution is a follow-through for two individuals, about whom, time and time again, it was said they served with distinction.

Mr. WARNER. But the Senator said let’s treat these two individuals equally with others who bear part of the responsibility—a reasonable request. But I would want to know beforehand, who are the others? How were they treated?

Was their treatment commensurate with what the Senator asked for tonight?

Mr. ROTH. No one of whom I am aware, who served in World War II at the time of Pearl Harbor and had any responsibility in Washington, was held accountable and given less rank.

Mr. WARNER. Mr. President, I am primarily concerned with the junior officers in the command of the Army in Hawaii, the command of the Navy in Hawaii. There may have been a number of officers and, indeed, enlisted men—say an intelligence officer. There was a good deal of intelligence out there that the situation was getting very serious, and I will refer to that momentarily. But how do I know their careers were not impeded? They may not have been given the same opportunities of advancement of the U.S. Navy. But whether they were lieutenants or commanders, their careers may well have been blocked. There may be relatives out here and descendants of those officers who feel just as strongly as to the punishment that was meted out to their grandparents or whatever the case may be.

If you are going to open up a case like this, it seems to me it is in the nature of a class action: Let everybody come forward.

Mr. ROTH. I say to the good chairman, the others have not presented the case. These individuals, their families, have tried to correct what I think is a serious wrong. Again, all I can say is that rare is it that by one stroke of action you correct all inequities, all injustices. But here we have two individuals who were scapegoated. Let’s face it. They needed to blame somebody. I think as a matter of fact the Roberts report was not known for the legal jurisprudence with which it was conducted.

I believe, in fairness to these individuals, the record ought to be set straight. They served their country with great distinction through the years. Disaster occurred at Pearl Harbor, but they alone cannot be held responsible. Most of these reports will admit that. The others were permitted to rise to their highest rank, and I just say as a matter of justice—

Mr. WARNER. Mr. President, we do not know. You make an assumption that others were allowed to rise to their highest rank. I do not know that. There is no evidence before the Senate tonight.

This is but one of, what? How many volumes here? The hearings before the Joint Committee on the Investigation of Pearl Harbor. U.S. Congress, 1945. I count, what, 15 volumes here? To me, that is thoroughness of an investigation. I mean, document after document, page after page in which—let’s
see, how many Members of Congress, if they list the committee here? I do not see on this volume, but perhaps it is in other volumes. How many Members of Congress were involved. Usually they list them.

How many Members were involved, does the Senator know?

Mr. ROTH. Let me say this. What I do know, as far as the record shows, only two officers were penalized, were punished.

Mr. WARNER. Mr. President, what record does the Senator speak of, that shows only two? Is there any record that shows only two officers in the U.S. military were ever penalized?

Mr. ROTH. No. But to me it is the same sort of thing. You are in a law case. Can you talk about the others who may be involved in the same kind of a problem? We are only trying to correct what I think are two serious cases.

Let me point out any number of distinguished groups and organizations who have come out in support.

Mr. WARNER. The Senator has recited them. Certainly. I accept that for the record. I also commend your able assistant, Mr. Brzezinski here, who has worked tirelessly on this for several years and done the research. But let me ask you this question. We are both lawyers; we spent years in courtrooms.

What new evidence do you bring before the Senate tonight to ask for a reversal of some nine different boards and commissions that have reviewed this over a period of these many years? What new evidence do you bring in support of your petition?

Mr. ROTH. It really is not a question, I say to my colleague, of new evidence. The evidence has been there for many years, since 1944, when investigations were made both by the Army and Navy. Time has elapsed, it has been found that these two individuals were not the only ones responsible. Admittedly, they share blame with others. But everybody else in the Service was permitted to keep their rank or raised to their higher.

Mr. WARNER. Mr. President, we do not know that as a fact. The Senator keeps repeating everyone else was allowed to advance. I do not see anything before me.

Mr. ROTH. I say, to the contrary, what is the evidence that there are others? Theoretically, you keep saying there are others. Who are they?

Mr. WARNER. Look at the Dorn report. I would like to refer to that at some point here. Let’s just go over the Dorn report. This is a very comprehensive analysis by the Department of Defense over a considerable period of months. I would like to refer to some of their findings.

First, that these officers did receive warning messages on November 27, stating that Japan might take hostile action at any moment. Kimmel and Short concluded the attack would occur in the western Pacific and not Hawaii.

That was apparently their independent judgment. The Army and Navy were separate departments reporting directly to the President. There is a question about the collaboration of these two senior officers on the islands of Hawaii.

Lack of mission discussion between Kimmel and Short on defense plans for Hawaii and long-range air patrols—in other words, they had not collaborated to coordinate the assets of the United States as a deterrent, or indeed a defense against any attack on which they had warning on November 27. Kimmel and Short did not share their internal intelligence with each other. That, to me, is a very troubling fact.

Just to say, as this report does, that responsibility is broadly shared does not absolve Kimmel and Short of accountability for this action to some degree. For example, the commander has plenary, that is, complete, and absolute, responsibility for the welfare of the people under his command and is directly accountable for everything the unit does or fails to do. That is legendary in military history.

Even in the Navy, there are cases where the captain was in his quarters, properly, perhaps, taking a rest and arose with the ship, and there are hundreds of cases where he is held accountable, even though he was not on the bridge at the time.

Three- and four-star positions are listed as positions of importance and responsibility. Both commanders made errors in judgment. The most serious ones were failure to establish a state of readiness in light of warnings received and to liaison between the two commands, i.e., Army and Navy, and to coordinate defensive measures and to maintain effective reconnaissance. Intelligence available to Kimmel and Short was subsequently temperate and procedurally proper; mention of court-martial but no charges brought; some allegations that there was no court-martial because the Government feared bringing charges would implicate other senior military and civilian leaders; could also be there were sufficient grounds for successful court-martial prosecution.

Mr. President, there is no new evidence before the Senate tonight. I would like to go on. I am going to put this in the record. Is there some other point the Senator wishes to make? If I understand—you have been very forthright therethere has been no new evidence.

So what we are really doing is trying to give a fair and impartial judgment by giving our own independent assessment of facts that were deduced in a timely manner in the period of 1941 to, say, 1946. That is the conclusion of this congressional review.

Now we are determining from those facts which were deduced at the time of clarity of memory and presumably many witnesses who testified before the Congress. We are now asked to make this important decision which is tantamount, in the minds of many Americans, to exonerating totally these two officers from any misconduct or dereliction of duty at the time of Pearl Harbor. I just simply cannot go along with that, say to the Senator.

First, again, there are no new facts. We are agreed on that.

Mr. ROTH. The issue is not the question of new facts. The issue is the question of fairness. I believe that is as critically important today as it was at the time. It is my word is clear that these individuals, General Short and Admiral Kimmel, did not have the intelligence information available at the time that would have
Mr. WARNER. May I ask, is that fact not borne out in many of these hear-
ingings that were held in the period of 1941 to 1946? My recollection is that that was always presented at that time, or at least certainly in the congressional one when the war was over.

Mr. ROTH. To me, it is just a differ-
ce, I guess, in approach. If you take the position that it happened in the past and it should not be changed, I think that is wrong. I think there is a strong case that these individuals were not treated fairly. The President was given authority under the 1947 act to raise any retired flag officer to the rank

Mr. WARNER. Mr. President, I re-
member it well. The Senator will recall we did not raise them to their war-
ranks, as the tombstone pro-
motion; am I not correct?

Mr. ROTH. That is correct.

Mr. WARNER. That shows our vint-
gage.

Mr. ROTH. I just think it is not fair to these individuals, to their reputa-
tion. Admittedly, even the Dorn report makes all kinds of conclusions that they did not have the information to which they were entitled, that others shared in the responsibility for what happened.

In this country, in the tradition of the military—and I am not a profes-
sional soldier, although I did have the pleasure of serving several years in the military—

Mr. WARNER. Mr. President, I might say, with distinction; a fine officer.

Mr. ROTH. I appreciate that. I think the important thing is to show that in our country, individuals who were not treated equitably, the record can be set straight.

Mr. WARNER. On that point, so the Senator's argument tonight is one of fairness. But I say to him, if the Senate were to go along with him, implicitly it would say that all of these reports involving hundreds of conscientious men and perhaps women who were on these boards, some seven or eight boards, were unfair.

Mr. ROTH. I go back to the fact, it was the President who decided in the 1947 act not to raise them to their war-
ranks. I think it is a rank injusti-
tice. I think it is a blot on the history of World War II. There are many people one can probably point out who said this, that, or the other.

Here were two gentlemen, one an ad-
miral who had been in command, a naval CO, who was in charge in Hawaii.

General Short was in command of the Army Hawaiian department. They did not have the intelligence.

One has to remember, in a time of war and stress, one of the concerns was that the country was so shocked by what took place in Hawaii that there was concern over what would be the re-
action of the American people. Even though they were found innocent of dereliction of duty, that did not become public information, for the sim-
ple reason they wanted to make cer-
tain that the American people sup-
sported the efforts of this country and more. That was kept secret indefi-
nitely, until 1947, at which time it came out.

But I know the chairman is a fair man. I admire him greatly. I know there are those in the military saying: Well, don't go back and change now.

Let history judge. I just think it is un-
fair to these individuals who did serve with excellence, who did serve with dis-
tinction, to be penalized when they were the only two.

Mr. WARNER. But, Senator, what do you say to all of these people—I wish we had a volume here that showed how many Members of Congress partici-
pated? Perhaps you can provide that. I do not know how many sat on all the boards that Frank Knox had. I recited all of them here, but I did serve in the Department of Navy as an Under Sec-
retary for 5-plus years.

Mr. ROTH. With great distinction.

Mr. WARNER. I am not so sure, but you are nice to say it. It was a chal-
lenge. I was privileged and humbled to do so.

But my point is, a naval court of in-
quiry, that is usually about 9 or 10 offi-
cers certainly for a matter of this im-
portance. All of these investigations involved, I think, at a minimum 10 or 12 people, not to mention all the staffs on both sides. I am sure they had the opportunity for these two officers to make known their own views and to turn over all of the investigations and say that they did not act fairly towards these two men.

Here we are here in May of 1999, with no new evidence. I do not have the records of all these boards. I suppose somebody has gone through them. And Mr. Brzezinski maybe has.

Could I ask, have you got an esti-
mate of how many persons were in-
olved in all these boards which ren-
dered a judgment that these two men must be held accountable for this trag-
edy at Pearl Harbor? Does anyone have an estimate of how many Members of Congress?

Mr. ROTH. I think the point is that in these investigations, the purpose of them was not to determine who was ac-
countable but, rather, it was a state-
ment of fact. But, again, let me under-
score. You keep coming back and say-
ing: Why should we be looking at it today?

I think that is what makes this coun-
try different. If there is a wrong, an error, it is never too late to correct it. Hence, why these indi-
viduals were found not to be solely re-
sponsible for the attack on Pearl Har-
bor. As a matter of fact, there were find-
ings in agreement that many in
Mr. ROTH. Let me make—I do not want to interrupt.
Mr. WARNER. No. Please go ahead.
Mr. ROTH. Let me point out those findings were general findings. But the fact is, the up-to-date intelligence that Washington had in the days immediately before Pearl Harbor was not made available to General Short or Admiral Kimmel.
Mr. WARNER. Mr. President, that sum portion of intelligence, I think that all throughout history has been conceded. And those tribunals, particularly the Congress, had that before it. It is for that reason maybe they were not court-martialed and incarcerated, if found guilty.
Mr. ROTH. Yes, you knew an air carrier attack was possible. But to know, for example, as they knew in Washington in the days right before the attack that the Japanese wanted to know where the warships were located, it was this kind of information that gave immediacy to the threat. To me, that was critical.
You talk about the Dorn Report. Let me just say, as part of the Dorn Report, they sort of are all over the map in their finding. They say:

It is clear today, as should have been clear since 1946 to any serious reader of the JCC hearing record, that Admiral Kimmel and General Short were not solely responsible for the defeat at Pearl Harbor.

* * * * *

* * * more information was available in Washington but not forwarded to them. Army and Navy officials in Washington were privy to intercepted Japanese diplomatic communications (notably the “bomb plot”, “winds”, “pilot”, and “fourteen-part” messages) which provided crucial—

Now, this is the Dorn report—which provided crucial confirmation of the imminence of war. Read together and with the leisure, focus, and clarity of hindsight, these messages strongly towards an attack on Pearl Harbor at dawn on the 7th.

That is the Dorn Report:
The immediacy of an attack on Pearl Harbor at dawn on the 7th.
The evidence of the handling of these messages in Washington reveals some inaptitude, some unwarranted assumptions and misstatements, limited coordination, ambiguous language and lack of clarification and follow-up at higher levels.
I could go on.

A careful reading of the proceedings and reports of those panels suggests clear recognition of the faults at all levels. Yet these two gentlemen were singled out and were not given advance to their wartime rating.

I think it was inequitable. I think it was not fair, and it seems to me the greatness of this country is that we can go back and make changes where warranted.

Mr. WARNER. Mr. President, I have just finished, I think, a document that interests me a great deal. It is entitled, “Investigation of the Pearl Harbor Attack: Report of the Joint Committee on the Investigation of the Pearl Harbor Attack,” pursuant to a resolution of Congress, S. Res. 27. And it was reported on.

Just listen to those Senators who were on this commission: Alben Barkley, you remember him. What an extraordinary man; Walter George, George was considered one of the great, great triumvirate with Nimitz and Stimson; Scott Lucas of Illinois, one of the most senior Senators from the State of Illinois, the Presiding Officer’s State; Owen Brewster from Maine; Homer Ferguson from Michigan.

I say to my good friend, those names still reverberate with absolute distinction and credibility in this Chamber today. They made the findings which left history intact. And we here, just the two of us, really, on the floor tonight, are to judge our colleagues tomorrow to reverse that history?

With all due respect, there is not the foundation, in my judgment, for the Senate to so act and override the findings of these men.

Mr. ROTH. Mr. President, as the Senator knows, I have the greatest respect for his soundness of judgment, for his honesty and integrity. I have the same for the Senators named. But the fact remains, honorable men and women often disagree. Here we do disagree.

I am just trying to join my colleagues—there are 23 of us—in seeking to correct what we think was unfair treatment to two individuals who devoted a lifetime of service to this country. Yes, there are differences of opinion on this matter, but nothing seems to me more important than to try to correct a record which I think, on the basis of the studies I have seen, results in unfairness. We are trying to correct that.

I understand you disagree with the basis of our proposal, but I think both of us want the same thing, and that is fairness.

Mr. WARNER. Mr. President, there is no one in this body for whom I have greater respect than my dear friend and colleague, Senator ROTH. He has put a lot of work, together with his able staff, into this case. But it seems to me that we stand in a momentous hour in the history of this country. We are asking our colleagues to trust in our own judgments and our findings as to whether or not one of the most remarkable and tragic chapters in the history of this Nation, in effect, should have this significant reversal these many years hence, based on no new evidence, based on the fervent plea of my colleague, Senator ROTH and Senator THURMOND.

I shall take the floor tomorrow and most vigorously oppose this. I think for the night we have pretty well concluded this debate. I have to tell the Senator, it is an interesting one for me and not altogether without some implications in my own life, thinking back in that period of history. I will never forget Pearl Harbor.

If I could just reminisce for a moment, it is hard to believe that shortly thereafter this city, the Nation’s Capital, was so severely attacked. I remember it very well, as a small—well, I wasn’t so small. I remember my father was a physician and he was able to drive at night only with a slit on the headlights to get to the hospital. I remember very well our home was equipped with blackout curtains. All the streetlights went out. We were fearful of an attack here in Washington, DC, and, indeed, other east coast cities. There were Nazi submarines patrolling off the east coast of the United States, sinking ships.

How well I recall on the beaches of Virginia there was washed up debris from sunken ships. The people on the west coast lived in constant fear that there would be an invasion. These were serious and strenuous times, calling on the men and women of the Armed Forces for a duty and a commitment and an assumption of risk without parallel, because this Nation in many respects was unprepared. How well we recall the pictures of the Army practicing maneuvers with broomsticks rather than rifles.

When I think of the tragic death, loss of life and property, indeed, if we were to follow your logic—President Roosevelt had that intelligence—we could go back and judge the record of many others. It seems to me that what is before the Senate tonight is clear facts that men and women of clear conscience, with the ability to assess fresh information, have painstakingly gone through it, reached their conclusion year after year, and then a President, Harry Truman, is my recollection, am I correct, made the decision that he did with respect to these two officers.

I just do not believe that the Senate at this time should reverse that history.

MORNING BUSINESS

Mr. WARNER. Mr. President, I ask unanimous consent that the Senate now proceed to a period of morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business Friday, May 21, 1999, the federal debt stood at $5,596,857,521,196.34 (Five trillion, five hundred ninety-six billion, eight hundred fifty-seven million, five hundred twenty-one thousand, one hundred ninety-six billion, eight hundred eighty-six trillion, five hundred thirty-four dollars and thirty-four cents).
May 24, 1999

Fifteen years ago, May 21, 1984, the federal debt stood at $1,485,189,000,000 (One trillion, four hundred eighty-five billion, one hundred eighty-nine million).

Twenty-five years ago, May 21, 1974, the federal debt stood at $470,357,000,000 (Four hundred seventy billion, three hundred fifty-seven million) which reflects a debt increase of more than $5 trillion—$5,126,500,551,196.34 (Five trillion, one hundred twenty-six billion, five hundred million, five hundred twenty-one thousand, one hundred ninety-six dollars and thirty-four cents) during the past 25 years.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Williams, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting a withdrawal and sundry nominations which were referred to the appropriate committees.

(REMOTES RECEIVED DURING ADJOURNMENT—PM 30)

Under the authority of the order of the Senate of January 6, 1999, the Secretary of the Senate on May 21, 1999, during the adjournment of the Senate, received the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Health, Education, Labor, and Pensions.

To the Congress of the United States:

I am pleased to transmit for your immediate consideration the “Educational Excellence for All Children Act of 1999”—MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT—PM 30.

The Technology for Education initiative would help move challenging educational standards into every classroom by providing teachers with sustained high-quality professional development in core academic subjects, supporting new teachers during their first 3 years in the classroom, and ensuring that all teachers are proficient in relevant content knowledge and teaching skills.

The Technology for Education initiative under Title III would expand the availability of educational technology as a tool to help teachers implement high standards in the classroom, particularly in high-poverty schools. My bill also would extend, over the next 7 years, the Class-Size Reduction initiative, which aims to reduce class sizes in the early grades by helping districts to hire and train 100,000 teachers. And second chance programs. A new proposal would help ensure that all teachers are well trained to teach students with limited English proficiency, who are found in more and more classrooms with each passing year.

My bill would increase support for safe, healthy, disciplined, and drug-free learning environments where all children feel connected, motivated, and challenged to learn and where parents are welcome and involved. The recent tragedy at Columbine High School in Littleton, Colorado, reminds us that we must be ever vigilant against the risks of violence and other dangerous behaviors in our schools. Our reauthorization bill includes several measures to help mitigate these risks.

We would strengthen the Safe and Drug-Free Schools and Communities Act by concentrating funds on districts with the greatest need for drug- and violence-prevention programs, and by emphasizing the use of evidence-based programs of proven effectiveness. Moreover, with respect to students who bring weapons to school, this proposal would require schools to refer such students to a mental health professional for assessment and require counseling for those who pose an imminent threat to themselves or others; allow funding for programs that educate students about the risks associated with guns; expand character education programs; and promote alternative schools and second chance programs. A new School Emergency Response to Violence program would provide rapid assistance to school districts that have experienced violence or other trauma that disrupts the learning environment.

My High School Reform initiative would support innovative reforms to improve student achievement in high schools, such as expanding the connections between adults and students that are necessary for effective learning and teen and personal development. This new initiative would provide resources to help transform 5,000 high schools into places where students receive individual attention, are motivated to

CONGRESSIONAL RECORD—SENATE 10617
NOTICE ON AMENDED MINES PROTOCOL—MESSAGE FROM THE PRESIDENT

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States; which was referred to the Committee on Foreign Relations.

To the Senate of the United States:

I am gratified that the United States Senate has given its advice and consent to the ratification of the Amended Mines Protocol of the Convention on Conventional Weapons. The Senate and my Administration, working together, reached agreement on a detailed resolution of advice and consent to ratification, including 13 conditions covering issues of significant interest and concern. I will implement these provisions. I will, of course, do so without prejudice to my Constitutional authorities. A condition in a resolution of advice and consent to ratification cannot alter the allocation of authority and responsibility under the Constitution, for both the Congress and the President.

I am grateful to Majority Leader Lott, Minority Leader Daschle, and Senators Helms, Biden, Leahy, and the many others who have assisted in this ratification effort. It is clear that the practical result of our work together on the Protocol will well serve the critical humanitarian interest of protecting civilians from the dangers posed to them by landmines, as well as the imperative requirements of ensuring the safety and effectiveness of U.S. military forces. In this spirit, I express my hope that the Protocol will lead to further sound advances in the development of the international law of armed conflict.

WILLIAM J. CLINTON.

EC-3149. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report entitled “Effectiveness of Occupant Protection Systems and Their Use” dated April 1999; to the Committee on Commerce, Science, and Transportation.

EC-3150. A communication from the Program Analyst, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Establishment of Class C Airspace and Revocation of Class D airspace at Austin-Bergstrom International Airport, TX; and Revocation of Robert Mueller Municipal Airport Class C; Delay of Effective Date; Docket No. FAA-AWA–44–98” (5–31) (RIN 782–Y–0070–AA46) (1999–0170), received May 3, 1999; to the Committee on Commerce, Science, and Transportation.

EC-3151. A communication from the Chief, Office of Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Safety/Security Zone Regulations; Port of New York/New Jersey Fleet Week (CGD001–98–170)” (RIN2115–AA97) (1999–0017), received May 10, 1999; to the Committee on Commerce, Science, and Transportation.

EC-3152. A communication from the Chief, Office of Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of ten rules relative to Reclassification Regulations (RIN2120–AA69) (1999–0009), received April 9, 1999; to the Committee on Commerce, Science, and Transportation.

EC-3153. A communication from the Administrator, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Federal Airways; Instrument Approach Procedures; Miscellaneous Amendments (82); Amdt. No. 1928” (RIN2120–AA65), received May 4, 1999; to the Committee on Commerce, Science, and Transportation.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3151. A communication from the Chief, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Safety/Security Zone Regulations; Port of New York/New Jersey Fleet Week (CGD001–98–170)” (RIN2115–AA97) (1999–0017), received May 10, 1999; to the Committee on Commerce, Science, and Transportation.

EC-3152. A communication from the Chief, Office of Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of ten rules relative to Reclassification Regulations (RIN2120–AA69) (1999–0009), received April 9, 1999; to the Committee on Commerce, Science, and Transportation.

EC-3153. A communication from the Administrator, Office of the Chief Counsel, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Federal Airways; Instrument Approach Procedures; Miscellaneous Amendments (82); Amdt. No. 1928” (RIN2120–AA65), received May 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC-3154. A communication from the Executive Office of the President, Office of Management and Budget, Office of the Deputy Director, transmitting, pursuant to law, a certification that the report of a rule entitled “Universal and International Health Regulations; Amdt. No. 1927″ (RIN2120–AA65), received May 12, 1999; to the Committee on Commerce, Science, and Transportation.
EC-3194. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report relative to Department of the Treasury, transmitting, pursuant to law, a report relative to the Uniformed Services Employment and Reemployment Rights Act, to the Committee on Veterans' Affairs.

EC-3195. A communication from the Director, Office of the Assistant Secretary of Veterans Affairs, transmitting, pursuant to law, the report of a rule entitled "Schedules for Rating Disabilities: Diseases of the Ear and other Sense Organs" (RIN2000–AF22), received May 12, 1999; to the Committee on Veterans' Affairs.

EC-3196. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, the report of a rule entitled "Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers", received May 11, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC-3207. A communication from the Director, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled "Listing of Color Additives for Coloring Sutures; [Phtalocyaninato (2–)] Copper", received May 14, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC-3208. A communication from the Director, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled "Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers", received May 14, 1999; to the Committee on Health, Education, Labor, and Pensions.

EC-3209. A communication from the Director, Regulations Policy and Management Staff, Food and Drug Administration, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled "FDA Review Fee Act of 1999"; to the Committee on Health, Education, Labor, and Pensions.

EC-3211. A communication from the Secretary of Health and Human Services, transmitting, a draft of proposed legislation entitled "FDA Review Fee Act of 1999"; to the Committee on Health, Education, Labor, and Pensions.

EC-3212. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report relative to the National Health Service Corps; to the Committee on Health, Education, Labor, and Pensions.

EC-3213. A communication from the Secretary of Education, transmitting, pursuant to law, a report relative to the Higher Education Act of 1965; to the Committee on Health, Education, Labor, and Pensions.

EC-3214. A communication from the Director, National Science Foundation, transmitting, pursuant to law, a report entitled "Women, Minorities, and Persons with Disabilities in Science and Engineering: 1998"; to the Committee on Health, Education, Labor, and Pensions.

EC-3215. A communication from the Chief Executive Officer, Corporation for National Service, transmitting, pursuant to law, the annual report for calendar year 1996; to the Committee on Health, Education, Labor, and Pensions.

EC-3216. A communication from the Secretary of the Treasury, the Chairman of the
Board of Governors of the Federal Reserve, the Chairperson of the Federal Reserve Bank of New York, the Chairperson of the Securities and Exchange Commission and the Chairperson of the Commodities Futures Trading Commission, transmitting, jointly, a report entitled “Hedge Funds, Leverage, and the Lessons of Long-Term Capital Management,” received May 19, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–321. A communication from the President and Chairman, Export-Import Bank of the United States, transmitting, pursuant to law, a report relative to a transaction involvingPowered by Alibaba Cloud, pursuant to law, to the Republic of Korea; to the Committee on Banking, Housing, and Urban Affairs.

EC–321A. A communication from the President and Chairman, Export-Import Bank of the United States, transmitting, pursuant to law, a report relative to a transaction involving the Republic of Korea; to the Committee on Banking, Housing, and Urban Affairs.

EC–321B. A communication from the Manager, Federal Housing Finance Board, transmitting, pursuant to law, a report of a rule entitled “Amendment of Affordable Housing Program Regulation” (RIN0659–AA62), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–322. A communication from the Manager, Federal Housing Finance Board, transmitting, pursuant to law, a report of a rule entitled “Amendment of Affordable Housing Program Regulation” (RIN0659–AA73), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–322A. A communication from the Assistant Secretary for Export Administration, Bureau of Export Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Exports to Cuba” (RIN0694–AB93), received May 11, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–322B. A communication from the Go...

EC–323. A communication from the Assistant Secretary for Export Administration, Bureau of Export Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Parts and Accessories Necessary for Safe Operation; Lighting Devices, Reflectors, and Electrical Equipment” (RIN0694–AB15) (1999–0015), received April 15, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–323A. A communication from the Attorney General, Office of the Attorney General, Federal Emergency Management Agency, transmitting, pursuant to law, the report of a rule entitled “List of Communities Eligible for the Sale For Flood Insurance, 64 FR 24957, 05/10/99” (Docket No. FEMA–7712), received May 18, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–323B. A communication from the Director, Office of Personnel Management, transmitting, pursuant to law, the report of a rule entitled “Authorization of Solicitations during Federal Government Holiday,” received May 18, 1999; to the Committee on Governmental Affairs.

EC–323C. A communication from the Legal Advisor, Bureau of Oceans and International Environmental and Scientific Affairs, Department of State, transmitting, pursuant to law, the report of a rule entitled “Report and Order: In the Matter of Cable Television Services Part 76 Public File Information System Reporting Requirements” (RIN0648–AL40), received April 27, 1999; to the Committee on Commerce, Science, and Transportation.

EC–323D. A communication from the Legal Advisor, Bureau of Oceans and International Environmental and Scientific Affairs, Department of State, transmitting, pursuant to law, the report of a rule entitled “Private Land Mobile Services. Second Memorandum Opinion” (RIN2115–AF68), received May 4, 1999; to the Committee on Commerce, Science, and Transportation.

EC–324. A communication from the Chairperson, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Afforable Housing Program Regulation” (RIN0659–AA62), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–324B. A communication from the Chairperson, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Afforable Housing Program Regulation” (RIN0659–AA62), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–324C. A communication from the Chairperson, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Afforable Housing Program Regulation” (RIN0659–AA62), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–324E. A communication from the Chairperson, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Afforable Housing Program Regulation” (RIN0659–AA62), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–324G. A communication from the Chairperson, Federal Communications Commission, transmitting, pursuant to law, the report of a rule entitled “Amendment of Afforable Housing Program Regulation” (RIN0659–AA62), received May 12, 1999; to the Committee on Banking, Housing, and Urban Affairs.

EC–324. A communication from the Chief, Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, a report of a rule entitled "Oil Pollution Act of 1990 (OPA 90) Phase-out Requirements for Single Hull Tank Vessels (USCG–1999–4620)" (RIN2115–ZZ08), received May 3, 1999; to the Committee on Commerce, Science, and Transportation.

EC–325. A communication from the Chief, Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Vessel Identification System (CGD 89–050)" (RIN2115–AD38) (1999–0001), received April 15, 1999; to the Committee on Commerce, Science, and Transportation.

EC–327. A communication from the Chief, Regulations and Administrative Law, U.S. Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Regulated Navigation Areas; Mississippi River, LA: (CGD-08–07–020)" (RIN2115–AF84) (1999–0003), received April 15, 1999; to the Committee on Commerce, Science, and Transportation.

EC–328. A communication from the Rules Administrator, Federal Bureau of Prisons, Department of Justice, transmitting, pursuant to law, the report of a rule entitled "Visiting: Notice to Visitors" (RIN1120–AA67), received May 14, 1999; to the Committee on the Judiciary.

EC–329. A communication from the Director, Policy Directives and Instructions Branch, National Legislative Commission, The United States House of Representatives, transmitting, pursuant to law, the report of a rule entitled "Adjustment of Status for Certain Nationals in Haiti" (RIN1115–AF33) (INS No. 1963–98), received May 13, 1999; to the Committee on the Judiciary.

EC–330. A communication from the Director, National Legislative Coordination, The American Legion, transmitting, pursuant to law, the consolidated financial statements for the calendar years 1997 and 1998; to the Committee on the Judiciary.

EC–331. A communication from the Acting Assistant Attorney General, Department of Justice, transmitting a draft of proposed legislation entitled "Chemical Safety Information and Site Security Act of 1999"; to the Committee on the Judiciary.

EC–332. A communication from the Acting Assistant Attorney General, Department of Justice, transmitting, pursuant to law, the annual report relative to the activities and operations of the Office of Integrity Section of Criminal Division for calendar year 1997; to the Committee on the Judiciary.

POM–124. A resolution adopted by the Senate of the General Assembly of the State of Illinois relative to senior citizens; to the Committee on Finance.

SENATE RESOLUTION NO. 70

Whereas, The Balanced Budget Act of 1997 established a new reimbursement system for Medicare home health services effective for cost reporting periods beginning on or after October 1, 1997, is jeopardizing the health of frail Medicare beneficiaries; and

Whereas, The Balanced Budget Act of 1997 created an interim payment system which is cost-based with reduced limits and is in effect until a prospective payment system is initiated with cost reporting periods beginning on or after October 1, 2000; and

Whereas, The Balanced Budget Act of 1997 made strides to rectify the interim payment system, the real effect of the Omnibus Reconciliation Act of 1996 was to raise the per-patient payment limit for Medicare home health services between only $0.50 and $1.00 and the per-beneficiary limits by less than 5% for the majority of home health agencies; and

Whereas, The Balanced Budget Act of 1997 created a new reimbursement system for Medicare home health services effective for cost reporting periods beginning on or after October 1, 1997, is jeopardizing the health of frail Medicare beneficiaries; and

Whereas, The Balanced Budget Act of 1997 created an interim payment system which is cost-based with reduced limits and is in effect until a prospective payment system is initiated with cost reporting periods beginning on or after October 1, 2000; and

Resolved, That we urge Congress to hold the Health Care Financing Authority accountable for the timely implementation of a fair prospective payment system; and it be further

Resolved, That we urge the federal government to rectify some of the damage wrought by the interim payment system by raising the per-beneficiary and per-visit limits, so that agencies can keep serving patients until the prospective payment system is implemented; and it be further

Resolved, That we urge Congress to require a representative of the federal government to meet with an Illinois Home Care Council member to discuss the questions and concerns raised by this resolution; and it be further

Resolved, That suitable copies of this resolution be delivered to the President pro tempore of the U.S. Senate, the Speaker of the House of Representatives, and of the other members of the Illinois Congressional delegation.

POM–125. A concurrent resolution adopted by the Legislature of the State of Michigan relative to the regulation of insurance matters by the states; to the Committee on Banking, Housing, and Urban Affairs.

HOUSE CONCURRENT RESOLUTION NO. 26

Whereas, In 1994, the Michigan Legislature passed legislation (HB 5281) granting lending institutions the authority to sell all lines of insurance; and

Whereas, That legislation, which became effective in 1996, includes mortgage and fair market protections, such as requiring the separation of lending and insurance transactions; prohibitions against offering or discussing insurance while a loan transaction is pending; requiring separate lending and insurance areas; requirements for full written disclosures to customers; and inclusion of strong prohibitions against sharing confidential insurance-related information in bank loan files with bank-affiliated agencies; and

Whereas, In a joint letter published November 7, 1994, HB 5281 was lapsed and strongly supported by the Michigan Bankers Association, Michigan Association of Insurers, Michigan Savings Institutions, Michigan Association of Life Underwriters, Michigan Chamber of Commerce, Michigan Consumer Federation, Michigan Workers’ Compensation League, Michigan Association of Credit Unions, Michigan Retail Hardware Association, Greater Detroit Chamber of Commerce, Greater Detroit Construction Contractors Association (Michigan Chapter); and

Whereas, In 1995, the Rhode Island Legislature resoundingly passed legislation substantially similar to Michigan law, granting lending institutions the authority to sell insurance;

May 24, 1999

Whereas, The Comptroller of the Currency is an independent federal agency, to which Congress has given the authority to regulate lending institutions, and has adopted regulations that serve to expand bank insurance powers. These banking laws are intended to be consistent with state laws and regulations. These new insurance activities, deemed to be "dangerous" to federal regulators, thereby raising vital questions of states' rights, and the plenary powers of duly elected representatives to enact laws governing insurance activities within their state boundaries; and

Whereas, The McCarran-Ferguson Act of 1945 regulates the sale of insurance and prevents the Office of the Comptroller of the Currency from preempting state laws and regulations. This act authorizes the Comptroller of the Currency from enforcing regulations that comprise a part of our American culture; now, therefore, be it

Resolved, That We, your Memorialists, request the President of the United States and the United States Congress to afford public hearings to determine the necessity of financial and energy resources to help the World War II Memorial take its rightful place in history; and be it further

Resolved: That suitable copies of this resolution be transmitted to the Secretary of State, be transmitted to the Honorable William J. Clinton, President of the United States; the President of the United States Senate; the Honorable of the Senate; and the Honorable of the United States; and the citizens of the American Legion, Department of Maine.

POM–127. A resolution adopted by the Legislature of the Commonwealth of Guam relative to Federal smuggling interdiction capabilities on Guam; to the Committee on Energy and Natural Resources.

RESOLUTION NO. 85

Whereas, Guam in the last year has become a prime target for a human smuggling operation run by the infamous Chinese criminal organization known as the "Snakeheads"; and

Whereas, as a result of concerted efforts by organized criminal operations, Guam has been flooded with illegal aliens of this smuggling activity; and

Whereas, six hundred (600) illegal immigrants have been apprehended and detained at the Guam Department of Corrections correctional facility, including forty-five (45) illegal immigrants currently in detention, for the charge of Guam taxpayers and to the danger of other inmates in an already overpopulated facility; and

Whereas, Guamanian law enforcement officials estimate that more than two hundred (200) other illegal immigrants have gotten through Guam's borders without detection, and are already in the community at large; and

Whereas, Guamanian law enforcement officials estimate that another several thousands illegal immigrants will arrive on Guam in the near future; and

Whereas, the humans smuggling often cannot pay the full price of transportation, estimated at Twenty Thousand Dollars to Thirty Thousand Dollars ($20,000.00 - $30,000.00), and the immigrants therefore become basically indentured servants; and

Whereas, under United States immigration laws, the efforts of these criminal organizations are rewarded because the illegal immigrants they transport immediately claim asylum under U.S. law, and are often paroled and allowed to work free; and

Whereas, the impact of this human smuggling operation on the government of Guam and the local community has been great and is potentially devastating, with costs estimated in the millions, with the mass of illegal immigrants who have likely come into Guam's borders unnoticed, and the illegal immigrants who have been apprehended and paroled and let free in the community are a serious public health hazard, as more than a few have been diagnosed with tuberculosis and other diseases; and

Whereas, neither the United States Immigration and Naturalization Service, nor the United States Coast Guard, currently have sufficient resources stationed on Guam to combat the influx of illegal immigrants, resulting in an alarming lack of enforcement of the very laws that have created this emergency situation; now therefore, be it

Resolved, that I Mina Bente Singko Na Liheslaturan Guahan (Twenty-Fifth Guam Legislature) does hereby, on behalf of the people of Guam, respectfully request the Federal Government of the United States of America to reimburse the government of Guam for the costs of these criminal operations, resulting in an alarming lack of enforcement of the very laws that have created this emergency situation; now therefore, be it

Resolved, that I Mina Bente Singko Na Liheslaturan Guahan (Twenty-Fifth Guam Legislature) does hereby, on behalf of the people of Guam, respectfully request the Federal Government of the United States of America to reimburse the government of Guam for the costs of these criminal operations, resulting in an alarming lack of enforcement of the very laws that have created this emergency situation; now therefore, be it

Illegitimate immigrant operation; and be it fur-
ther
Resolved, that I Mína Bente Singko Na Lihielataurud Gauahan does hereby, on behalf of the people of Guam, respectfully request the United States Congress to pass legislation as soon as possible that would cause Guam to cease to be an area where asylum can be granted under U.S. law; and be it further
Resolved, that I Mína Bente Singko Na Lihielataurud Gauahan does hereby, on behalf of the people of Guam, respectfully request the United States Congress to pass legislation, if simply removing Guam as an area where asylum can be granted would bring the potential for any litigation, to remove Guam from the Immigration and Nationality Act, from U.S. Immigration and Naturaliza-
tion Service jurisdiction and from the immi-
gration laws of the United States of America; and be it further

Resolved, that I Mína Bente Singko Na Lihielataurud Gauahan does hereby, on behalf of the people of Guam, respectfully request the United States Congress to pass legislation millennium projects and celebrations; and

Whereas, during World War II, the United States forcibly removed and interned over 400,000 United States citizens and legal permanent residents of Japanese ancestry from their homes and relocated them to government internment camps; and

Whereas, in a subsequent settlement of a suit alleging that the Treasury Department for Redress/Reparations filed a class action for Redress/Reparations, to which Congress appropriated $1,650,000,000 between October 1990 and October 1993; and

Whereas, the majority of this large grain traffic traverses the Mississippi River system; and

Whereas, the Upper Mississippi River is the dominate originator of grain barge traffic for export; and

Whereas, 95 percent of the world’s population live outside the United States; and

Whereas, economies and populations continue to grow worldwide and these agricultural export markets continue to be the economic future of the Upper Midwest in- cluding Iowa; and

Whereas, international markets are very competitive and opportunities can be gained or lost based on very small differences in price; and

Whereas, the United States Army Corps of Engineers projects Upper Mississippi River barge traffic to increase dramatically; and

Whereas, increased barge traffic will continue to place a burden on the river transpor-
tation system which is more than 50 years old; and

Whereas, the original design specifications for the locks and dams have been surpassed by modern barge technology resulting in delays because towns must be broken down to move through the locks; and

Whereas, delays are projected to rise as high as several million dollars per year; and

Be It Further Resolved, That the Congress is urged to provide adequate funding for major rehabilitation efforts on the Upper Missis-
sippi River; and

Be It Further Resolved, That copies of this Resolution be sent by the Chief Clerk of the House of Representatives to the President of the United States; the Chief of Engineers, United States Army Corps of Engineers, North Central Division; the United States Senate; the Speaker of the United States Senate; the Speaker of the United States House of Representatives;
Whereas, The biggest water pollution problem facing this Commonwealth today is polluted water draining from abandoned coal mines; and

Whereas, Over half the streams that do not meet water quality standards in this Commonwealth are affected by mine drainage; and

Whereas, The Commonwealth has over 250,000 acres of abandoned mine lands, restored and abandoned mine shafts in 45 of Pennsylvania’s 67 counties, more than any other state in the nation; and

Whereas, Under the direction of the Department of Environmental Protection estimates it will cost more than $15 billion to reclaim and restore abandoned mine lands; and

Whereas, Pennsylvania now receives about $20 million a year from the Federal Government to do reclamation projects; and

Whereas, There is now a $1 billion balance in the Federal Abandoned Mine Reclamation Trust Fund that is set aside by law to take care of pollution and safety problems caused by old coal mines; and

Whereas, Pennsylvania is the fourth largest coal producing state in the nation, and coal operators contribute significantly to the fund by paying a special fee for each ton of coal they mine; and

Whereas, Pennsylvania is not seeking to rely solely on Federal moneys to address its abandoned mine reclamation needs and has undertaken a comprehensive program designed to maximize reclamation opportunities by increasing community involvement, making the existing reclamation processes more encouraging and public participation in reclamation activities and reducing the cost of abandoned mine reclamation projects; and

Whereas, The Department of Environmental Protection and 39 county conservancy districts through the Western and Eastern Pennsylvania Coalitions for Abandoned Mine Reclamation have worked as partners to improve the effectiveness of mine reclamation programs; and

Whereas, Pennsylvania has been working with the Interstate Mining Compact Commission, the National Association of Abandoned Mine Land Programs and other states to free more of these funds to clean up abandoned mine lands; and

Whereas, Making more funds available to states for abandoned mine reclamation should preserve the interest revenues now being paid by the United Mine Workers Combined Benefit Fund; and

Whereas, The Federal Office of Surface Mining, the United States Environmental Protection Agency and Congress have not agreed to make more funds available to states for abandoned mine reclamation; therefore be it

Resolved, That the Senate of Pennsylvania urge the President of the United States, and Congress make the $1 billion of Federal mon-
eys already earmarked for abandoned mine land reclamation available to states to clean up and make safe our abandoned mine lands; and be it further

Resolved, That copies of this resolution be transmitted to the United States President, the United States Senate, the House of Representatives, the Department of State, the National Association of Abandoned Mine Land Reclamation; to the Committee on Appropriations. **Senate Resolution No. 33**

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GRAMS:

S. 1102. A bill to guarantee the right of individuals to receive full social security benefits under Title II of the Social Security Act in full with an accurate annual cost-of-living adjustment; to the Committee on Finance.

SOCIAL SECURITY BENEFITS GUARANTEE ACT OF 1999

S. 1103. A bill to transform Social Security by creating personalized retirement accounts, and for other purposes; to the Committee on Finance.

PERSONAL SECURITY AND WEALTH IN RETIREMENT ACT OF 1999

S. 1104. A bill to amend the Social Security Act to provide simplified and accurate information about the social security trust funds, and personal earnings and benefit estimates to eligible individuals; to the Committee on Finance.

SOCIAL SECURITY INFORMATION ACT OF 1999

Mr. GRAMS. Mr. President, I want to take a little time this morning to talk about Social Security. I know our Nation has been engaged in Social Security reform discussions for about 2 years now kind of formally. But, informally, many have been talking about what we are going to do to ensure a safe, sound, secure Social Security system in the future.

We all expected that we could work in a bipartisan manner during this Congress to be able to complete the immense task of saving and strengthening Social Security for the American people.

Unfortunately, President Clinton has failed to take leadership on this issue and has failed to present an honest plan to this Congress to address Social Security's rapid approaching crisis.

There is widespread reluctance to move forward on reform due to political considerations. Yet, if we keep delaying essential reform until after the "next election"—it is always after the next election—we will never be able to complete our goal of ensuring retirement security for future generations of Americans.

Now, on the positive side, the debate has surely raised the public's awareness of their own retirement security shortcomings. It has brought attention to the Social Security crisis and has led to a variety of solutions to fix the system.

I believe this is a healthy debate, one that we must continue to encourage. I am sure that when our elected officials muster the political will to make some of those hard choices we face, the Nation will be ready to support those choices.

Regardless of when we actually consider Social Security reform, we must continue the job of educating Americans about the importance of savings and retirement planning. We must continue to debate the role of future Social Security benefits in our retirement security decisions.

That is why I am here. I rise today to introduce three pieces of legislation as first steps to save Social Security. To outline the bills, my first bill, very simply, would grant every current and future Social Security beneficiary a legal right to those Social Security benefits.

The second is a comprehensive plan to move Social Security from the current pay-as-you-go system to one that is fully funded, personalized retirement system, to ensure a safe, sound, secure retirement program that maximizes benefits for the retiree.

The third bill would provide real information about the costs and the benefits under the current Social Security system.

Mr. President, each working American devotes his or her entire life to a job, or series of jobs, and pays hundreds of thousands of dollars in Social Security taxes into the retirement system. In fact, Social Security taxes are the largest tax that many families will ever pay. A result is that the federal government has one-eighth of the total lifetime income that will go into Social Security. Many people, including myself, believe that Social Security benefits are our "earned right." We think that because we have paid Social Security taxes, we are legally entitled to receive Social Security benefits. But this "earned right" is nothing but an illusion—an illusion created by politicians.
who call Social Security taxes “contributions” and make Social Security sound like it is a regular insurance program.

The truth is that the American people do not have any legal right to their Social Security benefits, though they pay Social Security taxes all of their lives. Their benefits are always at the mercy of the Government and politicians who can adjust them and can even spend them on unrelated Government programs. This fact—that Americans currently have no legal right to Social Security—was decided by the courts when the Social Security was just getting started.

Mr. President, it was back in 1937, less than 2 years after the creation of Social Security, that the Supreme Court decided in the case of Helvering v. Davis that Social Security was not an insurance program.

The court held:

The proceeds of both the employee and employer taxes are to be paid into the Treasury like all federal revenue generally, and are not earmarked in any way.

So, basically, Social Security is just a tax, not a retirement system.

The Court also pointed out:

Congress did not improvise a judgment when it found that the award of old-age benefits would be conducive to the general welfare. The President’s committee on economic security made an investigation and report . . . with the loss of savings inevitable in periods of idleness, the fate of workers over 65, when thrown out of work, is little less than desperate. . . . Moreover, laws of the separate States cannot deal with this effectively. . . . Only a power that is national can serve the interests of all.

What it meant was that Social Security was not and is not an insurance program at all, but a tax—a pure and simple—that leaves retirement benefits entirely determined by the political process—not the benefits of the plan, but the political process.

This decision was later confirmed in another important case, Fleming v. Nestor. In this case, the Supreme Court more expressly ruled that workers have no legally binding contractual rights to their Social Security benefits, and that those benefits can be cut or even eliminated at any time.

Mr. President, this is a very interesting and disturbing case. Ephram Nestor was a Bulgarian immigrant who paid Social Security taxes from 1936 until he retired in 1955. He received a $35.60-per-month Social Security check during his retirement. But in 1956, Nestor was deported for having been a member of the Communist Party in the 1930s. His Social Security checks were stopped in accordance with the law.

Nestor sued the Secretary of Health, Education, and Welfare, claiming that because he had paid Social Security taxes, he had a right to Social Security benefits.

The Supreme Court rejected his claim, clearly stating:

To engraft upon the Social Security system a new “property right” would deprive it of the flexibility and boldness in adjustment to ever changing conditions which it demands.

The Court also held:

It is apparent that the non-contractual interest of an employee covered by the [Social Security] Act cannot be soundly analogized to that of the holder of an annuity, whose right to the payments is based not on the contractor’s personal payments.

It strikes me that these Supreme Court decisions prove that if Social Security is considered more of a welfare program, there is no assurance that retirees will receive benefits now or in the future if they are judged unworthy, or if the IOUs owed to the Social Security Trust Funds are deemed unnecessary to repay. It also shows, contrary to common belief, that Social Security is not backed by the full faith and credit of the government, and it is not a government-guaranteed investment. I believe these decisions—which we rarely see referenced, for obvious reasons—are unfair and wrong, and must be corrected.

In my view, workers must have a full legal right to receive government-guaranteed Social Security benefits. The reason is simple: despite these court cases, I believe most people think that the federal government should provide benefits to the American people for their retirement, if those people have paid into the system. It’s our moral and contractual duty to honor that commitment, and ensure the program is more of an insurance policy than a welfare program. Coming demographic changes will soon create huge cracks in the Social Security program—if the government fails to make the changes necessary to address the crisis ahead, it would be wrong to let current or future generations of retirees be burdened.

As a first step to saving Social Security, legislation I am introducing today would grant every current and future Social Security beneficiary an “earned right,” or legal right, to their Social Security benefits plus an accurate inflation adjustment. This could be achieved by requiring the government to issue U.S. Treasury-backed certificates specifying the level of guaranteed benefits.

Mr. President, this legislation, the Social Security Benefits Guarantee Act, is not at all complicated. All it does is to create an “earned right” to Social Security, which every American deserves and should be given in the first place. It shows that regardless of how we may reform the system in the future, retirees will earn a return on the investment they make in the form of payroll taxes.

By granting Americans this legal right, I hope they would become less greedy. I also hope it would deprive the Government of its ability to create away undertakings resulting from the growing political debate. Social Security will no longer be subject to Washington’s manipulation, and the IOUs will be repaid.

Implementing my legislation would force Congress and the Administration to come up with an honest plan to save and strengthen the Social Security system.

But more importantly, it would put millions of current and future Social Security beneficiaries at ease, allowing them to sleep at night without fearing the loss or reduction of their retirement benefits.

Mr. President, once we have secured Social Security benefits, taking the difficult steps to reform the Social Security system will be easier. The current system has served us well until now. The changing demographics of our society makes it impossible for the system to survive without reform. I believe a fully-funded, market-based, personalized retirement system would give Americans full property rights to their retirement investment.

Not only could personal retirement account, or IRA, benefits be three to five times higher than current Social Security benefits, workers would actually own the money in their account and could pass the assets on to their children. It would be part of your estate, which today, as you know, Social Security does not transfer. Congress would no longer spend the surplus money.

That’s the reason I am today reintroducing my legislation, the “Personal Security and Wealth in Retirement Act.”

Mr. President, Americans today are living longer and retiring earlier than ever before. American retirement security is supposedly built on a three-legged stool: Social Security, private pensions, and personal savings. These are the three cornerstones of a secure retirement.

Unfortunately, today these cornerstones have eroded. Without major repair, the stool will collapse, causing serious financial hardship for millions of Americans.

Most Americans rely increasingly on Social Security for their retirement income. Not everyone has a private pension and some are unable to save. Yet Social Security, upon which rests their hopes for a secure retirement, is headed for bankruptcy.

Benefits for 76 million baby boomers and future generations of retirees will not be there unless something is done soon.

I believe the best solution to our retirement crisis is to reform Social Security by moving it from a pay-as-you-go retirement system to a fully-funded, market based system. The legislation I am introducing today will do just that.

The first criticism you will hear is that a market-based retirement system is too risky. However, my plan would guarantee benefits for current and future beneficiaries, while retaining and expanding the current safety net under Social Security.
At the same time, workers would have the freedom to control their funds and resources for their own retirement security within certain safety and soundness parameters. Workers and their employers could divert 10 percent of a worker's income into personal retirement accounts.

In my plan, workers could also contribute to personal retirement accounts they've established for their non-working children.

Let me focus on the proposed safety net provisions under my plan: One key component of my proposal is to ensure that a safety net will be there at all times for disadvantaged individuals. This can be done without government guarantees of investments or overly strict regulation of investment options.

Under this legislation, a safety net would be set up and would involve a guaranteed minimum benefit level: 150 percent of the poverty level. When a worker retires, if his or her PRA fails to provide the minimum retirement benefits for whatever reason the government would make up the difference. So nobody would retire into poverty. They would retire at least with a minimum of 150 percent of the poverty level.

The same applies to survivor and disability benefits. If a worker dies or becomes disabled, and his or her PRA doesn't accumulate sufficient funds to provide minimum survivor and disability benefits, the government would match the shortfalls.

This simple safety net is necessary, and the minimum benefit would guarantee that no one in our society would be left impoverished in retirement, while still allowing workers to enjoy the freedom and prosperity achievable under a market-based retirement system.

This would operate in a manner similar to the federal government's Thrift Savings program, which includes safe investments and a far higher return than Social Security. If the system works for us, others should also be able to benefit from it.

Another feature of the fully funded retirement system I'm outlining could provide better survivor and disability benefits than the current Social Security system offers.

Under my plan, for instance, when a worker dies, his family would inherit all the funds accumulated in his PRA.

I use my father as an example. He died at the age of 61, and from Social Security he had earned about $15,000 for his death benefit. But that was all. Under our system, all the money that you have paid in during a lifetime of working would be yours. And, if you happen to die early, it would then be a part of your estate and transferred to your heirs. The savings wouldn't disappear into the black hole of the Social Security trust funds, or become tangled in a survivors' benefit bureaucratic debate.

The system would also provide, besides the retirement savings, a survivors' benefit package.

My plan creates personal retirement accounts that manage PRAs to use part of their annual contributions or yield to buy life and disability insurance, supplementing their accumulated funds to at least match the promised Social Security survivors and disability benefits. By requiring retirement funds to purchase life and disability insurance for everyone, all workers in each individual fund would be treated as a common pool for underwriting purposes. The insurance would be purchased as a group policy not by individual workers by investment firms or financial institutions, thus avoiding insurance policy underwriting discrimination while providing the largest amount of benefits at the lowest possible cost.

Mr. President, again, a major criticism of a market-based personal retirement account system is that it's inherently volatile, subject to the whims of investors and the market, exposing a worker's retirement income to unnecessary risks.

My plan specifically addresses this concern by requiring the approved investment firms and financial institutions that manage PRAs to have insurance against investment loss. By approximating the role of the FDIC, we ensure that every PRA would generate a minimum rate of return of at least 2.5 percent, which is more than current Social Security benefits. In fact, Social Security is paying less than 1 percent today, and for future generations it would actually be a negative rate of return.

Regardless of the ups and downs of the markets, workers would still do better under this system than under the current Social Security program.

This is another safety net built into my plan to give the American people peace of mind when it comes to their retirement investment.

To further reduce risks to a worker's PRA, my legislation also requires that rules, regulations, and restrictions similar to those governing IRAs would apply to personal retirement accounts. PRAs must be properly structured and follow strict, sensible guidelines set forth by the independent federal board that will oversee the system.

In choosing qualified investment firms and financial institutions to manage the PRAs, the oversight board is responsible for examining the credibility and ability of these companies, and then approving them as PRA managers accordingly. In other words, to put in place a very safe and sound retirement system, much like the FDIC is in banks. People are confident their money is safe in the FDIC, and the same would be true with their retirement accounts. They would be protected. This will generate much better returns, as much as three to five times more at retirement than today's Social Security—three to five times more benefits when you retire than under the current Social Security plan because personal retirement accounts, unlike Social Security, make real investments which produce new income and produce wealth.

That means improved benefits for everybody, including low-wage earners, without the redistribution of private income.

Mr. GRAMS. The third bill I am introducing today deals with the flow of information related to an individual's Social Security contribution.

Most working Americans are poorly prepared for their retirement. That is because of a disturbing lack of information. Congress needs to help them better plan for retirement by providing useful and accurate information about the Social Security benefits they are going to receive.

In other words, let people know exactly what the system is, how much is going into the trust fund, how much money they can expect to receive at retirement, and what will be the rate of return of their investment.

Americans currently receive Social Security information in the form of personal earnings and benefits estimate statements or the PEBES, provided by the Social Security Administration. However, a recent GAO report shows that the report, although useful, is actually incomplete, it is difficult for many Americans to understand exactly what is in the account for them at Social Security.

As a result, many workers, even those near retirement, continue to overestimate their likely Social Security benefits, which, bottom line, threatens their quality of life throughout their retirement years.

Social Security taxes are the largest tax in any family's tax bill. It will account for up to one-eighth of the total lifetime income they will make. Few Americans know the value or the yield of their investment, because the Government never tells them the whole truth about Social Security by providing them with this key information. Reliable information on Social Security is crucial to enable Americans to better understand the value of their Social Security investment and to help them determine exactly how much they should supplement their expected Social Security benefits with other savings in order to have a certain level of retirement security.

This is particularly important for minority households, because research shows that African Americans have lower rates of return from Social Security. They get less back from the system than others who pay in. Low-income, single, African American males have a much lower rate of return today. As I said, overall it is about a 1 percent rate of return. For many, it will be a negative rate of return. But for low-income, single, African American males...
today, they already have a negative rate of return on the money they pay into the system.

My bill would improve the reports by requiring the Social Security Administration to provide an estimate of the Social Security benefits a worker is going to receive in terms of inflation-adjusted dollars, as well as an estimated rate of return the worker is projected to receive from Social Security.

In real dollars, it means today if you are 20 years old, the report says when you retire you could expect to receive about $38,000 a year in retirement benefits. You say, that is great, 90,000 a year; but if you take in the inflation-adjusted amount throughout those 40 years in buying power, it would be less than $14,000 in today’s money.

So you need to know exactly what you are going to get at retirement and what the buying power of those dollars is going to be 40 years from now so that you can make better plans on how you are going to plan for your retirement.

Given the crucial role of information about Social Security in retirement planning and the fact that, beginning this year, the statements from Social Security will be mailed annually to every eligible individual over 25, immediate improvement of these standards is imperative. These numbers are already going to be sent out, so this isn’t an added cost, this isn’t asking for a new program from the Government; this is saying that the report the Social Security Administration is going to send to every American over 25 needs to be more accurate than the information provided today.

Information will not solve all the problems we have with Social Security, but I think it will surely give working Americans some useful tools to help them plan for their retirement.

In closing, American workers labor mightily to put money aside for retirement and the security of owning their retirement programs out of our Social Security benefits and savings. My legislation gives American workers legal protection to their retirement savings. It will stop politicians from cutting their benefits to spend money in other unrelated programs out of our Social Security trust fund. It also allows American workers maximum freedom to better plan for their retirement by giving them more accurate information on their Social Security benefits.

In closing, retirement security is essential to millions of Americans and we must do everything we can to help them achieve that security and the peace of mind that will go along with it.

My legislation charts a course which I believe will lead us there.

By Mr. BAUCUS (for himself, Mr. LAUTENBERG, MRS. LINCOLN, and Mr. DASCHEL):
Contributors of municipal waste, including municipalities and private parties, can settle for $5.30 a ton. This number was calculated based on the cost of cleaning up a municipal landfill that does not also have hazardous waste.

Title IV provides exemptions for contributors of certain "recyclable materials"—paper, plastic, glass, textiles, rubber (other than other than tires), metal and batteries—that meet specified conditions. It is virtually identical to the Lott-Daschle bill in the 105th Congress. In particular, I appreciate the work of Senator Lincoln on this issue.

Contributions of orphan funding from the Superfund can mitigate much of the perceived unfairness of the joint and several liability system. Allocation pilot studies conducted by EPA revealed that these tools can be a critical tool for achieving settlements, and in the process reducing transaction costs, is for EPA to offer some contribution of funding to offset costs attributable to parties that are unable to pay.

The bill authorizes $200 million per year for five years in mandatory spending to be used by EPA in cleanup settlements. It is so used to offset costs attributable to parties that are insolvent or defunct or otherwise unable to pay, or for other equitable purposes. This mandatory spending is conditional, however, on the Superfund cleanup program being appropriated at least $1.5 billion annually, exclusive of the $200 million for orphan funding. That so-called "firewall" is intended to ensure that cleanups are not sacrificed in order to pay orphan funding. Assuming the program is funded at the required level, EPA would be required to contribute $200 million per year to cleanup settlements. However, to maintain the firewall, EPA would have the discretion to determine how much of the $200 million to allocate to which sites.

The bill authorizes appropriations of $7.5 billion over five years, or $1.5 billion per year. At this level, EPA would be able to maintain the current pace of cleanups, which is resulting in the completion of construction at 85 sites a year. Now that we finally are making good progress in cleaning up sites, it is important to maintain this pace.

On a related point, the bill continues to fund cleanups principally through the Superfund Trust Fund. In doing so, it assumes the reinstatement of the two Superfund taxes—the excise taxes on petroleum and chemical feedstocks and the corporate environmental tax of .12 percent of corporate alternative minimum taxable income above $2 million. By doing so, the bill would retain the current reliance on the trust fund to pay for the majority of cleanup costs, with a limited payment from general revenues.

Mr. President, the chairmen of the Environment and Public Works Committee and its Superfund Subcommittee, Senators Chafee and Smith, also promoted Superfund reform bill, S. 1090. There are several areas of general agreement between the bill that we are introducing today and S. 1090. Some examples are the exemption for bona fide prospective purchasers and other exemptions intended to promote brownfields redevelopment; exemptions for contributors of recyclable material; and exemptions and expedited settlements for contributors of municipal waste or small amounts of hazardous waste, to protect municipalities and small businesses.

There are, however, some significant differences between the approaches taken in the two bills, particularly with respect to providing an adequate federal safety net to protect public health and the environment, the allocation system, and, perhaps most significantly, providing adequate and assured funding to operate the program.

I hope that we can work cooperatively and expeditiously to resolve these differences, so that we can pass a Superfund reauthorization bill with broad, bipartisan support.

Mr. Laufenberg. Mr. President, I rise to introduce the Superfund Litigation Reduction and Brownfield Cleanup Act along with Senators Daschle, Bayh, and Lincoln. This bill will strengthen and improve the current Superfund program by cleaning up urban and rural brownfields and removing small, innocent parties from unnecessary superfund litigation.

Unlike the alternative Superfund proposal offered by the Republicans on Environment and Public Works Committee, this bill continues what is best about the Superfund program and makes the minor adjustments necessary to make it effective.

Mr. President, way back in the 103rd Congress, the critics of Superfund raised a number of issues. They asserted that the program was too slow, that not enough cleanups were taking place, that there was too much litigation.

At the time, we were seeking solutions which would make the program faster, streamline cleanups, treat parties more fairly and get the little guys to the table. Everyone was responsible for the problem and responsible for cleaning it up. This was all within the general goals of achieving more cleanups and therefore providing better protection of human health and the environment.

I am proud of those proposals, and many of us still on the Environment and Public Works Committee, including Chairman Chafee, who voted for that bill way back in the 106th Congress. Indeed, many of those proposals, although never enacted into law, were adopted administratively by EPA and radically altered the Superfund Program as we know it.

Others have been tested and been improved upon. In general, the thrust of this bill has resulted in many of the achievements of the current program.

According to a report issued by the General Accounting Office, by the end of this fiscal year all cleanup remedies will have been selected for 95 percent of nonfederal NPL sites (1,109 of 1,189 sites).

In addition, approximately 990 NPL sites have final cleanup plans approved, approximately 5,600 emergency removal actions have been taken at hazardous waste sites to stabilize dangerous situations and to reduce the threat to human health and the environment.

More than 30,000 sites have been removed from the Superfund inventory of potential waste sites, to help promote the safe, clean, and efficient use of potentially responsible parties in cleaning up their sites.

EPA has negotiated more than 400 diminimis settlements with over 18,000 small parties, which gave protection for these parties against expensive contribution suits brought by other private parties. Sixty six percent of these have been in the last four years alone.

Since fiscal year 1996, EPA has offered “orphan share” compensation of over $145 million at 72 sites to responsible parties who were willing to step up and negotiate settlements of their cases. EPA is now offering this at every single settlement, to reward settlers and reduce litigation, both with the government, and with other private parties.

There are just a few highlights of the improvements made in the program, many drawn from our earlier legislative proposals. Other improvements, such as instituting the targeted review of complex and high-cost cleanups, prior to remedy selection, have reduced the cost of cleanups without delaying the pace of cleanups.

EPA’s administrative reforms have significantly improved the program, by speeding up cleanups and reducing senseless litigation, and making the program fairer, faster and more efficient overall.

But despite the fact that this is a program that has finally really hit its stride, we are now faced with proposals from the majority which could undermine the progress in the program, and which are premised on a goal of closing down the program rather than a goal of cleaning up the sites. Indeed, the very title of their bill, the Superfund Program Completion Act, reflects this intent.

I am deeply troubled by many of the provisions in the Republican bill, which would have the effect of ramping
the program down without regard to the amount of site work left to be done. This bill provides for lowered funding levels, a cap on the NPL, waivers of the federal safety net, and some broad liability exemptions.

At the same time, it creates a number of new, expensive obligations which would further reduce the amount of money available for cleanup. It also shifts the costs of the program to the taxpayers and would not include an extension of the Superfund tax.

In short, while I am encouraged by the fact that the Republican bill drops some troubling provisions from prior bills, it introduces a whole set of new issues that are cause for great concern. I think it is very clear that what we need here is a better Superfund program, not a retreat from tackling our environmental problems.

We need a bill that continues to accelerate the pace of cleanups, keeps cleanups protective, reduces litigation and transaction costs, is affordable and does not shift costs to the American taxpayer.

That is why I am introducing the Superfund Litigation Reduction and Brownfield Cleanup Act of 1999. I believe that this bill, is in some areas very close to the provisions supported by my Republican colleagues, but differs in some critical areas.

It would protect cleanups, reduce litigation and not shift costs to the American taxpayer.

I hope that these are goals we can agree on. And I urge my colleagues to not throw the Superfund baby out with the bathwater.

I look forward to working with my colleagues to strengthen the Superfund program in the 21st century not dismantle it.

I ask unanimous consent that the bill be printed in the RECORD, as follows:

S. 1105

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ‘Superfund Litigation Reduction and Brownfield Cleanup Act of 1999’.

(b) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

TITLE I—BROWNFIELDS LIABILITY RELIEF

Sec. 101. Finality for buyers.
Sec. 102. Finality for NPL owners and sellers.
Sec. 103. Regulatory authority.

TITLE II—SMALL BUSINESS LIABILITY RELIEF

Sec. 201. Liability exemptions.
Sec. 202. Expedited settlement for de minimis contributions and limited ability to pay.
Sec. 203. Small business ombudsman.

TITLE III—SETTLEMENTS FOR MUNICIPALITIES AND CONTRIBUTORS OF MUNICIPAL WASTE

Sec. 301. Municipal owners and operators.
Sec. 302. Expedited settlements with contributors of municipal waste.

TITLE IV—CLASSIFICATION OF LIABILITY FOR RECYCLING TRANSACTIONS

Sec. 401. Recycling transactions.

TITLE V—BROWNFIELDS CLEANUP

Sec. 501. Brownfields funding.
Sec. 502. Research, development, demonstration, and training.
Sec. 503. State voluntary cleanup programs.
Sec. 504. Audits.

TITLE VI—SETTLEMENT INCENTIVES

Sec. 601. Fairness in settlements.

TITLE VII—FUNDING

Sec. 701. Authorization of appropriations.
Sec. 702. Funding for cleanup settlements.
Sec. 703. Agency for Toxic Substances and Disease Registry.
Sec. 704. Brownfields.
Sec. 705. Authorization of appropriations from general revenues.
Sec. 706. Worker training and education grants.

TITLE VIII—DEFINITIONS

Sec. 801. Definitions.

(C) be subject to the requirements for notice and validity specified in subsection (b)(2) and

(D) continue until the earlier of satisfaction of the lien or recovery of all response costs incurred at the facility, notwithstanding any statute of limitations under section 113.

(3) CONDITIONS.—The conditions referred to in paragraph (1) are the following:

(A) RESPONSE ACTION.—A response action for which the United States has incurred unrecovered costs of a response not inconsistent with the National Contingency Plan is carried out at the facility.

(B) FAIR MARKET VALUE.—The response action increases the fair market value of the facility above the fair market value of the facility that existed before the response action was commenced.

(C) SETTLEMENT.—Nothing in this subsection prevents the United States and the purchaser from entering into a settlement at any time that extinguishes a lien of the United States.

DEFINITION OF BONA FIDE PROSPECTIVE PURCHASER.—Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601) is amended by adding at the end the following:

(S) BONA FIDE PROSPECTIVE PURCHASER.—The term ‘bona fide prospective purchaser’ means a person or a tenant of a person that acquires ownership of a facility after the date of enactment of this paragraph that can establish each of the following by a preponderance of the evidence:

(A) DISPOSAL PRIOR TO ACQUISITION.—All active disposal of hazardous substances at the facility occurred before the person acquired the facility.

(B) INQUIRY.—

(i) IN GENERAL.—The person made all appropriate inquiry into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.

(ii) STANDARDS.—The standards and practices referred to in paragraph (3)(A) or those issued by the Administrator under that clause shall satisfy the requirements of this subparagraph.

(C) NOTICES.—The person provided all legally required notices with respect to the discovery or release of any hazardous substances at the facility.

(D) CARE.—The person exercised appropriate care with respect to hazardous substances found at the facility by taking reasonable steps to—

(i) stop ongoing releases;

(ii) prevent threatened future releases of hazardous substances; and

(iii) provide full cooperation, assistance, and access to the persons that are authorized to conduct the response and restoration actions at the facility, including the cooperation and access necessary for the assessment of contamination, installation, preservation of integrity, operation, and maintenance of

BE IT ENACTED,
any complete or partial response action at the facility; and
(ii) has fully complied and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility; and is in full compliance with any noncompliance by other entities and designated by regulation by the President.

(F) RELATIONSHIP.—
(i) In General.—The person is not liable or otherwise similarly situated with respect to the person's property if the person is not affiliated with any other person that is potentially liable under clause (iv), the President shall consider requirements governing each of the following:
(1) A conduct of an inquiry by an environmental professional;
(2) Interviews of each owner, operator, and occupant of the property to determine information regarding the potential for contamination.

SEC. 102. FINALITY FOR OWNERS AND SELLERS. (a) KNOWLEDGE OF INQUIRY REQUIREMENT FOR OWNERS.—Section 107 (42 U.S.C. 9607) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (as amended by section 101(b)) is amended—
(1) in subparagraph (A), by striking "unless" and inserting "the"; and
(2) by striking subparagraph (B) and inserting the following:

(B) KNOWLEDGE OF INQUIRY REQUIREMENT.—
(i) DEFINITION OF CONTAMINATION.—In this subparagraph, the term "contamination" means an existing release, a past release, or a release in a way that may contribute to contamination at the facility that is likely to cause or contribute to contamination at the real property, including any landfill or other disposal location record, underground storage tank record, hazardous waste handler and generator record, spill reporting record, and any other source that identifies a past use or occupancy of the property.

(ii) REQUIREMENT.—
(I) In General.—To establish that the defendant had no reason to know (under subparagraph (A)(i)), the defendant must have made, at the time of acquisition, a site assessment of the property (as well as comply with clause (vii)) into the previous ownership and uses of the facility, consistent with good commercial or customary practice in an effort to minimize liability.

(ii) CONSIDERATIONS.—For the purpose of subclause (I) and until the President issues or designates standards as provided in clause (iv), the court shall take into account—
(aa) any specialized knowledge or experience on the part of the defendant;
(bb) any record of activities likely to cause or contribute to contamination at the real property, including any landfill or other disposal location record, underground storage tank record, hazardous waste handler and generator record, spill reporting record, and any other reasonably ascertainable information about the property.

(dd) the obviousness of the release or likelihood of presence of contamination at the facility; and
(dd) the availability to detect the contamination by appropriate investigation.

(iii) CONDUCT OF SITE ASSESSMENT.—A person who has acquired real property shall be considered to have made all appropriate inquiry within the meaning of clause (ii)(I) if—
(I) the person establishes that, not later than 180 days before the date of acquisition, a site assessment of the real property was conducted that meets the requirements of clause (iv); and

(ii) THE PERSON COMPLIES WITH CLAUSE (VII).

(W) SITE ASSESSMENT.—In a site assessment meets the requirements of this clause if the assessment is conducted in accordance with the standards set forth in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or with any alternative standards issued by regulation by the President or issued or developed by other entities and designated by regulation by the President.

(W) STUDY OF PRACTICES.—Before issuing or designating alternative standards under subparagraph (I), the President shall conduct a study of commercial and industrial practices concerning site assessments in the transfer of real property in the United States.

(V) CONSIDERATIONS IN ISSUING STANDARDS.—In issuing or designating any standards under clause (iv), the President shall consider requirements governing each of the following:
(1) A conduct of an inquiry by an environmental professional;
(2) Interviews of each owner, operator, and occupant of the property to determine information regarding the potential for contamination.

(VI) Review of historical sources as necessary to determine each previous use and occupancy of the property the property was first developed. In this subclause, the term "historical sources" means any of the following:
(a) any common or reasonably ascertained relationship to or designating alternative standards under clause (ii)(I) unless—
(a) any specialized knowledge or experience on the part of the person that acquired the property;
(b) any investigation report for the facility;
(bb) any record of activities likely to cause or contribute to contamination at the real property, including any landfill or other disposal location record, underground storage tank record, hazardous waste handler and generator record, spill reporting record, and any other reasonable activities that the person has undertaken to protect the real property from release by such parties.

(VII) Any specialized knowledge or experience on the part of the person that acquired the property.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.

(VIII) SITE INSPECTION AND TITLE SEARCH.—In the case of property for residential use or similar use purchase by governmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall satisfy the requirements of clause (vii) and is in full compliance with any land use or activity restrictions on the property established or relied on in connection with a response action at the facility, including informing any other person that the person allows to occupy or use the property of such restrictions and taking prompt action to correct any noncompliance by such parties.
SEC. 201. LIABILITY EXEMPTIONS.
Section 107 of the Comprehensive Environmental Response, Compensation, and Liabil-
ity Act of 1980 (42 U.S.C. 9607) is amended by adding at the end the following:

'(i) De Micromis Exemption.—
'(1) In General.—Notwithstanding para-
graphs (1) through (4) of subsection (a), and except as provided in paragraph (2), a person shall not be liable under this Act to the United States or any other person (including liabil-
ity for contribution) for response costs incurred with respect to a facility if—

(A) liability is based solely on paragraph (3) or (4) of subsection (a);

(B) the total of materials containing a hazardous substance that the person ar-
 ranged for disposal or treatment of, arranged with a transporter for transport for disposal or treatment of, or accepted for transport for disposal or treatment, at the facility, was less than 110 gallons of liquid materials or less than 2,200 pounds of solid material,
or such greater quantity as the Administrator may determine by regulation; and

(C) the acts on which liability is based took place after May 24, 1999.

'(2) Exception.—Paragraph (1) shall not apply in a case in which the Administrator determines that—

(A) the material containing a hazardous substance referred to in paragraph (1) con-
 tributed or could contribute significantly, individually or in the aggregate, to the cost of the response action with respect to the fa-
cility, or

(B) the person has failed to comply with any request for information or administra-
tive subpoena issued by the President under this Act or has impeded or is impeding the per-
formance of a response action with respect to the facility.

'(ii) Municipal Solid Waste Exemption.—

(A) liability is based on paragraph (3) or (4) of subsection (a);

(B) liability is based on an arrangement for disposal or treatment of, an arrangement with a transporter for transport for disposal or treatment of, or an acceptance for trans-
port for disposal or treatment at a facility of, municipal solid waste; and

(C) the person is—

(i) an owner, operator, or lessee of resi-
dential property from which all of the per-
son’s municipal solid waste was generated with respect to the facility;

(ii) a business entity (including any par-
ent, subsidiary, or other affiliate of the enti-
ity) that, during the taxable year preceding the date of transmittal of written notifica-
tion that the business is potentially liable, employed not more than 100 individu-
als, and from which was generated the entity’s municipal solid waste with respect to the fa-
cility; or

(iii) a small nonprofit organization that,
during the taxable year preceding the date of transmittal of written notification that the organization is potentially liable, employed not more than 100 individuals, if the part-
division employed fewer than 100 individuals was the location from which was generated all of the municipal solid waste attributable to the or-
ganization with respect to the facility.

'(ii) Exception.—Paragraph (1) shall not apply in a case in which the President deter-
mines that the person has failed to comply with any request for information or adminis-
trative subpoena issued by the President under this Act or has impeded or is impeding the performance of a response action with re-
spect to the facility.

SEC. 202. EXPEDITED SETTLEMENT FOR DE MINI-
S CONTRIBUTIONS AND LIMITED ABILITY TO PAY.

(a) Parties Eligible—Section 122(g) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9222(g)) is amended—

(1) in paragraph (1), by redesignating sub-
paragraph (B) as subparagraph (E);

(2) by striking ''(g)'' and all that follows
through the end of paragraph (1)(A) and in-
serting the following:

'(g) Expedited Final Settlement.—

'(1) Parties Eligible.—

(A) In General.—The President shall, as expeditiously as practicable and in a manner that best ensures that the person is not potentially liable for a settlement, and offer to reach a final administrative or judicial settlement with, each potentially responsible party that the President, meets 1 or more of the conditions stated in subparagraphs (B), (C), (F), and (G).

(B) De Minimis Contribution.—The condi-
tions stated in this subparagraph is that the liabil-
ity of the potentially responsible party is for response costs based on paragraph (3) or (4) of subsection (a) and the potentially responsible party’s contribution of hazardous substances at a facility is de minimis. For the purposes of this subparagraph, a poten-
tially responsible party’s contribution shall be deemed to be de minimis only if the President determines that both of the fol-
lowing criteria are met:

(i) The quantity of material containing a hazardous substance contributed by the po-
tentially responsible party to the facility is minimal relative to the total quantity of material containing hazardous substances at the facility, unless the President determines that the potentially responsible party’s contribution shall be pre-
sumed to be minimal if the quantity is 1 per-
cent or less of the total quantity of mate-
rial containing hazardous substances at the facility, unless the Administrator identi-

(C) REDUCTION IN SETTLEMENT AMOUNT BASED ON LIMITED ABILITY TO PAY.—

'(i) In General.—The conditions stated in
this subparagraph are that the potentially re-
sponsible party—

'(1) is—

(aa) a natural person; or

(bb) a small business; and

(ii) demonstrates to the President an in-
ability or a limited ability to pay response costs.

(ii) Small Businesses.—

'(i) Definition of Small Business.—In this subparagraph, the term ‘small business’ means a business entity that, together with its parents, subsidiaries, and other affiliates, had an average of not more than 75 full-time equivalents in the applicable year, and the parent or more than $3,000,000 in annual gross reve-
ues, as reported to the Internal Revenue

May 24, 1999

CONGRESSIONAL RECORD—SENATE

TITLE II—SMALL BUSINESS LIABILITY

SEC. 103. REGULATORY AUTHORITY.
(a) In General.—The Administrator may—

(1) consultations as the Administra-
tor considers necessary to carry out the
amendments made by this title; and

(2) assign any duties or powers imposed on
or assumed by the Administrator by the
amendments made by this title.

(b) AUTHORITY TO CLARIFY AND IMPLEMENT.—The authority under subsection (a) includes authority to clarify or interpret all terms defined in this title and to implement any provision of the amendments made by this title.
Service, during the 3 years preceding the date on which a potentially responsible party first received notice from the President of its potential liability under this Act.

"(II) OTHER BUSINESSES.—A business shall be eligible for a settlement under this subparagraph if the business—

(a) has an average of not more than 75 employees or an average of not more than $3,000,000 in annual gross revenue; and

(b) meets all other requirements for a settlement under this subparagraph.

"(III) CONSIDERATIONS.—At the request of a small business, the President shall, in consideration of the ability of the small business to pay response costs and still maintain its basic business operations, including consideration of the overall financial condition of the small business and demonstrable constraints on the ability of the small business to raise revenues.

"(IV) INFORMATION.—A small business requesting settlement under this paragraph shall promptly provide the President with all relevant information needed to determine the ability of the small business to pay response costs.

"(V) DETERMINATION.—To be eligible to be covered by this subparagraph, the business shall, at the President's request, concerning the availability of the ability of the small business to pay response costs. If the small business employs fewer than 25 full-time equivalent employees and has average gross source revenues of less than $2,000,000, the President shall, on request, perform any analysis that the President determines may assist in demonstrating the impact of a settlement on the small business' ability to maintain its basic operations. The President may perform such analysis for any other party or request such other party perform the analysis.

"(VI) ALTERNATIVE PAYMENT METHODS.—If the President determines that a small business is unable to pay its total settlement quantity immediately, the President shall consider such alternative payment methods as may be necessary or appropriate.

"(D) ADDITIONAL CONDITIONS FOR EXPEDITED SETTLEMENTS.—

(i) WAIVER OF CLAIMS.—The President shall require, as a condition of settlement under this paragraph, that a potentially responsible party settle some or all of the claims (including a claim for contribution under section 113) that the party may have against other potentially responsible parties for response costs incurred with respect to the facility, unless the President determines that requiring a waiver would be unjust.

(ii) EXCEPTION.—The President may decline to offer a settlement to a potentially responsible party under this paragraph if the President determines that the potentially responsible party has failed to comply with any request for access or information or an administrative subpoena issued by the President under this Act or has impeded or is impeding the performance of a response action with respect to the facility.

(iii) RESPONSIBILITY TO PROVIDE INFORMATION AND ACCESS.—A potentially responsible party that enters into a settlement under this paragraph shall not be relieved of the responsibility to provide any information or access requested by the President in accordance with subsection (e)(3)(B) or section 106(e).

(iv) BASIS OF DETERMINATION.—If the President determines that a potentially responsible party is not eligible for settlement under this subparagraph, the President shall state the reasons for the determination in writing to any potentially responsible party that requests a settlement under this paragraph.

(v) NO JUDICIAL REVIEW.—A determination by the President under this paragraph shall not be subject to judicial review.

(b) SETTLEMENT OFFERS.—Section 122(g) of the Comprehensive Environmental Response, Liability, and Compensation Act of 1980 (42 U.S.C. 9622(g)) is amended—

(1) by redesignating clause (6) as paragraph (9), and

(2) by inserting after paragraph (5) the following:

"(6) SETTLEMENT OFFERS.—

(A) NOTIFICATION.—As soon as practicable after receipt of sufficient information to make a determination, the Administrator shall submit a written offer to each responsible party. A settlement offer shall be in such form that is comprehensible to a layperson, and shall be designed to provide a party with a basis for informed decisionmaking as to whether a settlement offer is based in whole or in part on information available to the Administrator when the settlement determination is made, to be eligible for an expedited settlement under paragraph (1).

(B) OFFERS.—As soon as practicable after receipt of sufficient information, the Administrator shall submit a written offer to each responsible party. A settlement offer shall be in such form that is comprehensible to a layperson, and shall be designed to provide a party with a basis for informed decisionmaking as to whether a settlement offer is based in whole or in part on information available to the Administrator when the settlement determination is made, to be eligible for an expedited settlement under paragraph (1).

(C) INFORMATION.—At the time at which the Administrator submits an offer under paragraph (1), the Administrator shall, at the request of the recipient of the offer, make available to the recipient any information available under section 522 of title 5, United States Code, on which the Administrator bases that offer, and, if the settlement offer is based in whole or in part on information not available under that section, so notify the recipient.

(D) LIQUIDATION MORATORIUM.—

(A) IN GENERAL.—No person that has received notification from the Administrator under paragraph (6) that the person is eligible for an expedited settlement under paragraph (1) shall be named as a defendant in any action under this Act for recovery of response costs (including an action for contribution) during the period—

(i) beginning on the date on which the person receives the notification; or

(ii) ending on the earlier of—

(I) the date that is 90 days after the date on which the President tenders a written settlement offer to the person; or

(II) the date that is 1 year after receipt of notice of the person's potential liability and notice that the person is a party that may qualify for an expedited settlement; or

(iii) the date that is 1 year after the date on which the President tenders a written settlement offer to the person;

(B) SUSPENSION OF PERIOD OF LIMITATION.—The period of limitation under section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9607) applicable to a claim against a person that may be a potentially responsible party is not subject to the moratorium described in subparagraph (A).

(C) NOTICE OF SETTLEMENT.—After a settlement under this subsection becomes final with respect to a facility, the President shall prompt the notification of the potentially responsible parties at the facility that have not resolved their liability to the United States through the settlement.

(c) SETTLEMENTS.—

"(1) ESTABLISHMENT.—The Administrator shall issue regulations under this section within the small business ombudsman office of the Environmental Protection Agency.

"(2) FUNCTIONS.—The small business Superfund assistance section shall—

(A) act as a clearinghouse for the provision to small businesses of information, in a form that is comprehensible to a layperson, regarding this Act, including information regarding—

(i) requirements and procedures for expedited settlements under section 122(g); and

(ii) ability-to-pay procedures under section 122(g);

(B) provide general advice and assistance to small businesses regarding questions and activities of the Environmental Protection Agency that would better fulfill the goals of this title and the amendments made by this title in ensuring equitable, simplified, and expedited settlements for small businesses.

TITLE III—SETTLEMENTS FOR MUNICIPALITIES AND CONTRIBUTORS OF MUNICIPAL WASTE

SEC. 301. MUNICIPAL OWNERS AND OPERATORS.

Section 107 of the Comprehensive Environmental Response, Liability, and Compensation Act of 1980 (42 U.S.C. 9607) (as amended by section 201) is amended by adding at the end the following:

"(1) MUNICIPAL OWNERS AND OPERATORS.—

(A) IN GENERAL.—Any person that is liable for response costs under paragraph (1) or (2) of subsection (a) on the basis of ownership or operation of a municipal landfill that was listed on the National Priority List on or before May 1, 1999, shall be eligible for a settlement under this title.

(B) SETTLEMENT AMOUNT.—

(A) MUNICIPALITIES WITH A POPULATION OF 100,000 OR MORE.—

(i) IN GENERAL.—Subject to clauses (ii) and (iii), the President shall offer a settlement to a municipality with a population of 100,000 (as measured by the 1990 census) or more with respect to liability described in paragraph (1) on the basis of a payment or other obligation equivalent in value to not more than 20 percent of the total response costs incurred with respect to a facility.

(ii) DECREASED AMOUNT.—The President may decrease the percentage under clause (i) with respect to a municipality to not less than 10 percent if the President determines that the municipality took specific actions during the operation of the facility to avoid environmental contamination or exposure with respect to the facility.

(iii) INCREASED AMOUNT.—The President may increase the percentage under clause (i) to not more than 35 percent if the President determines that—

(A) the municipality committed specific actions that exacerbated environmental contamination or exposure with respect to the facility; or

(B) the municipality has average gross income revenues of less than $2,000,000, the President shall, on request, perform any analysis that the President determines may assist in demonstrating the impact of a settlement on the small business' ability to maintain its basic operations. The President may perform such analysis for any other party or request such other party perform the analysis.

(C) INFORMATION.—At the time at which the Administrator submits an offer under paragraph (1), the Administrator shall, at the request of the recipient of the offer, make available to the recipient any information available under section 522 of title 5, United States Code, on which the Administrator bases that offer, and, if the settlement offer is based in whole or in part on information not available under that section, so notify the recipient.

(D) LIQUIDATION MORATORIUM.—

(A) IN GENERAL.—No person that has received notification from the Administrator under paragraph (6) that the person is eligible for an expedited settlement under paragraph (1) shall be named as a defendant in any action under this Act for recovery of response costs (including an action for contribution) during the period—

(i) beginning on the date on which the person receives the notification; or

(ii) ending on the earlier of—

(I) the date that is 90 days after the date on which the President tenders a written settlement offer to the person; or

(II) the date that is 1 year after receipt of notice of the person's potential liability and notice that the person is a party that may qualify for an expedited settlement; or

(iii) the date that is 1 year after the date on which the President tenders a written settlement offer to the person;

(B) SUSPENSION OF PERIOD OF LIMITATION.—The period of limitation under section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9607) applicable to a claim against a person that may be a potentially responsible party is not subject to the moratorium described in subparagraph (A).

(C) NOTICE OF SETTLEMENT.—After a settlement under this subsection becomes final with respect to a facility, the President shall prompt the notification of the potentially responsible parties at the facility that have not resolved their liability to the United States through the settlement.
the 1990 census) with respect to liability de-
municipalities with a population of less than 100,000.—The President shall offer a a combination of 2 or more municipalities shall require, as a condition of a settlement with a munici-
(II) MUNICIPALITIES WITH A POPULATION OF LESS THAN 100,000.—The President shall offer a settlement under this subparagraph, the potentially responsible parties for response costs incurred with respect to the facility.

(5) WAIVER OF CLAIMS.—The President shall require, as a condition of a settlement under this subparagraph, that a municipality or a combination of 2 or more municipalities waive some or all of the claims (including a claim for contribution under section 113) that the party may have against other potentially responsible parties for response costs incurred with respect to the facility, unless the President determines that requiring a waiver would be unjust.

(6) EXCEPTIONS.—The President may decline to offer a settlement under this subparagraph with respect to a facility if the President determines that a municipality or an operator has failed to comply with any request for information or administrative subpoenas issued by the United States under this Act, that a municipality or an operator has failed to provide facility or site records to persons authorized to conduct response actions at the facility, or has impeded or is impeding the performance of a response action with respect to the facility.

SEC. 302. EXPEDITED SETTLEMENTS WITH CONTRIBUTORS OF MUNICIPAL WASTE.

Section 122(g)(1) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9622(g)(1)) (as amended by section 202(a)) is amended by adding at the end the following:

"(F) CONTRIBUTION OF MUNICIPAL SOLID WASTE AND MUNICIPAL SEWAGE SLUDGE.—

"(i) IN GENERAL.—The condition stated in this subparagraph is that the liability of the potentially responsible party is for response costs based on paragraph (3) or (4) of section 107(a) and the potentially responsible party arranged for disposal or treatment of, arranged with a transporter for transport for disposal or treatment of, accepted for transport for disposal or treatment of, or accepted for transport for transfer of, municipal solid waste or municipal sewage sludge and other material containing hazardous substances at the time that the potentially responsible party demonstrates to the President's satisfaction that, with respect to the material other than municipal solid waste or municipal sewage sludge contributed by the party, the party qualifies for the per-ton settlement rate under clause (ii) with respect to its municipal solid waste and municipal sewage sludge in an expedited settlement under this paragraph.

"(ii) SETTLEMENT AMOUNT.—

"(I) IN GENERAL.—The President shall offer an expedited settlement under this subparagraph with respect to its municipal solid waste and municipal sewage sludge at the time that the party agrees to an expedited settlement under this paragraph with respect to its de minimis contribution of other material containing hazardous substances.

"(v) OTHER FACTORS RELEVANT TO SETTLE-

"(F) CONTRIBUTION OF MUNICIPAL SOLID WASTE AND MUNICIPAL SEWAGE SLUDGE.—

"(i) IN GENERAL.—The condition stated in this subparagraph is that the liability of the potentially responsible party is for response costs based on paragraph (3) or (4) of section 107(a) and the potentially responsible party arranged for disposal or treatment of, arranged with a transporter for transport for disposal or treatment of, accepted for transport for disposal or treatment of, or accepted for transport for transfer of, municipal solid waste or municipal sewage sludge and other material containing hazardous substances at the time that the potentially responsible party demonstrates to the President's satisfaction that, with respect to the material other than municipal solid waste or municipal sewage sludge contributed by the party, the party qualifies for the per-ton settlement rate under clause (ii) with respect to its municipal solid waste and municipal sewage sludge at the time that the party agrees to an expedited settlement under this paragraph with respect to its de minimis contribution of other material containing hazardous substances.

"(iv) OTHER PARTIES.—If a party does not make the demonstration under subclauses (III) and (IV), the President shall offer to re-

"(ii) SETTLEMENT AMOUNT.—

"(I) IN GENERAL.—The President shall offer a settlement referred to in clause (i) with respect to liability under paragraph (3) or (4) of section 107(a) on the basis of a payment of $5.30 per ton of municipal solid waste or municipal sewage sludge that the President estimates is attributable to the party.

"(ii) ADJUSTMENT FOR INFLATION.—The Ad-

"(1) IN GENERAL.—In this section, the term "recyclable material" means scrap paper, scrap plastic, scrap glass, scrap textile, scrap rubber other than whole tires, scrap lead, scrap lead-acid, spent nickel-cadmium, and other spent battery, as well as minor
quantities of material incident to or adhering to the scrap material as a result of its normal and customary use prior to becoming scrap.

"(2) EXCLUSIONS.—The term 'recyclable material' does not include shipping containers of a capacity of 300 liters or less, whether intact or not, having any hazardous substance (but not metal bits and pieces or hazardous substances that form an integral part of the container) contained in or adhering to the containers.

"(c) TRANSACTIONS INVOLVING SCRAP METAL, SCRAP PLASTIC, SCRAP GLASS, SCRAP TEXTILES, OR SCRAP RUBBER.—A transaction involving scrap metal, scrap plastic, scrap glass, scrap textile, or scrap rubber (other than whole tires) shall be considered to be arranging for recycling if the person who arranged for the transaction (by selling recyclable material or otherwise arranging for the recycling of recyclable material) demonstrates by a preponderance of the evidence that at the time of the transaction the person—

"(A) met the criteria set forth in subsection (c) with respect to the scrap metal; and

"(B) was in compliance with any applicable regulations or standards regarding the storage, transport, management, or other activities associated with the recycling of scrap metal that the Administrator promulgates under the Solid Waste Disposal Act (42 U.S.C. 1801 et seq.) prior to the date of enactment of this section and with regard to transactions occurring after the effective date of the regulations or standards; and

"(C) did not melt the scrap metal prior to the transaction.

"(2) THERMAL SEPARATION.—For purposes of paragraph (1)(C), melting of scrap metal does not include the thermal separation of 2 or more materials due to differences in their melting points.

"(3) DEFINITION OF SCRAP METAL.—In this subsection, the term 'recyclable material' means bits and pieces of a metal part (such as a bar, a turning, a rod, a sheet, and a wire) or a metal piece that may be combined together (such as welding in items such as a radiator, scrap automobile, or railroad box car), which when worn or superfluous can be recycled, other than scrap metal that the Administrator excludes from this paragraph by regulation.

"(e) TRANSACTIONS INVOLVING BATTERIES.—A transaction involving a spent lead-acid battery, spent nickel-cadmium battery, or other spent battery shall be considered to be arranging for recycling if the person who arranged for the transaction (by selling recyclable material or otherwise arranging for the recycling of recyclable material) demonstrates by a preponderance of the evidence that at the time of the transaction—

"(1) the person met the criteria set forth in subsection (c) with respect to the spent lead-acid battery, spent nickel-cadmium battery, or other spent battery, but the person did not recover the valuable components of such battery; and

"(2)(A) with respect to a transaction involving a lead-acid battery, the person was in compliance with applicable Federal environmental law (including regulations and standards) regarding the storage, transport, management, or other activities associated with the recycling of the battery; and

"(B) with respect to a transaction involving a nickel-cadmium battery, the person was in compliance with applicable Federal environmental law (including regulations and standards) regarding the storage, transport, management, or other activities associated with the recycling of the battery.

"(f) EXCLUSIONS.—

"(i) EFFECT ON PENDING OR CONCLUDED ACTIONS.—The exemptions provided under this section shall not affect any concluded judicial or administrative action or any pending judicial action initiated by the United States prior to the date of enactment of this section.

"(ii) LIABILITY FOR ATTORNEY'S FEES FOR CERTAIN ACTIONS.—Any person who commences an action under section 115, to promulgate additional regulations concerning this section, and to which any person who is not liable by operation of this section shall be liable to that person for all reasonable costs of defending that action, including all reasonable attorneys and expert witness fees.

"(k) RELATIONSHIP TO LIABILITY UNDER OTHER LAWS.—Nothing in this section affects—

"(1) liability under any other Federal, State, or local law (including a regulation),...
SEC. 301. BROWNFIELDS FUNDING.

Title I of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) is amended by adding at the end the following:

"SEC. 128. BROWNFIELDS FUNDING FOR STATE AND LOCAL GOVERNMENTS.

"(a) BROWNFIELDS INVENTORY AND ASSESSMENT GRANT PROGRAM.—

"(1) ESTABLISHMENT.—The Administrator shall establish a program to award grants to States or local governments to inventory brownfield sites and to conduct site assessments of brownfield sites.

"(2) SCOPE OF PROGRAM.—

"(A) GRANT AWARDS.—To carry out this subsection, the Administrator may, on approval of an application, provide financial assistance to a State or local government.

"(B) GRANT APPLICATION PROCEDURE.—

"(i) In general.—The Administrator shall establish a grant application procedure for this section.

"(ii) NATIONAL CONTINGENCY PLAN.—The Administrator may include in the procedure established under clause (i) requirements of the National Contingency Plan, to the extent that those requirements are relevant and appropriate to the program under this subsection.

"(C) GRANT APPLICATION.—An application for a grant under this subsection shall include, to the extent practicable, each of the following:

"(I) An identification of the brownfield sites for which assistance is sought and a description of the effect of the brownfield sites on the community, including a description of the nature and extent of any known or suspected environmental contamination within the areas in which eligible brownfield sites are situated.

"(II) A description of the need of the applicant for financial assistance to inventory brownfield sites and conduct site assessments.

"(III) A demonstration of the potential of the grant assistance to stimulate economic development, including the extent to which the assistance would stimulate the availability of other funds for site assessment, site identification, or environmental remediation and subsequent redevelopment of the areas in which eligible brownfield sites are situated.

"(IV) A description of the local commitment as of the date of the application, which shall include a community involvement plan that demonstrates meaningful community involvement.

"(V) A plan that demonstrates how the site assessment, site identification, or environmental remediation and subsequent development will be implemented, including—

"(I) an environmental plan that ensures the undertaking of appropriate procedures;

"(II) an explanation of the appropriate governmental authority and support for the project as in existence on the date of the application;

"(III) proposed funding mechanisms for any additional work; and

"(IV) a proposed land ownership plan.

"(b) ENVIRONMENTAL REMEDIATION.—The Administrator shall implement, including—

"(I) the ability of the project to be replicated on a national and state basis; and

"(II) the extent to which the potential of the plan for each area in which an eligible brownfield site is situated to stimulate economic development of the area on completion of the environmental remediation.

"(c) Consideration and approval of applications.—The Administrator considers a grant application complete for purposes of this section if the Administrator determines appropriate.

"(d) FUNDING MECANISMS.—The Administrator may, on the basis of the criteria considered under clause (i), attach such conditions to the grant as the Administrator determines appropriate.

"(e) USE OF GRANT.—The grant shall be used—

"(i) by the State or local government to capitalize a revolving loan fund to be used for cleanup of 1 or more brownfield sites; or

"(ii) in the case of a grant under paragraph (1)(B), by the local government for cleanup of brownfield sites.

"(f) GRANT APPLICATION FOR REVOLVING LOAN FUNDS.—An application for a grant under this subsection to establish a revolving loan fund, shall be in such form as the Administrator determines appropriate, and shall include, at a minimum, the following:

"(I) Evidence that the grant applicant has the financial controls and resources to administer a revolving loan fund in accordance with this section.

"(II) Provisions that—

"(a) ensure that the grant applicant has the ability to monitor the use of funds provided to loan recipients under this subsection; and

"(b) ensure that any cleanup conducted by the grant applicant is protective of human health and the environment.

"(III) Identification of the criteria to be used by the State or local government in providing for loans under the program. The criteria shall include the financial standing of the applicants for the loans, the use to which the loans will be put, the provisions to be used to ensure repayment of the loan funds.

"(IV) A complete description of the financial standing of the applicant that includes a description of the assets, cash flow, and liabilities of the applicant.

"(V) A written statement that attests that the cleanup of the site would not occur without access to the revolving loan fund.

"(VI) The proposed method, and anticipated period of time required, to clean up the environmental contamination at the brownfield site.

"(VII) An estimate of the proposed total cost of the cleanup to be conducted at the brownfield site.

"(VIII) An analysis that demonstrates the potential of the brownfield site for stimulating economic development or other beneficial use on completion of the cleanup of the brownfield site.
(5) Grant Approval.—In determining whether a grant made under this subsection, the Administrator shall consider, as applicable—

(A) the need of the State or local government to achieve the Committee on Environment and Public Works of the Senate; and

(B) the number of applications approved by the Administrator during the preceding calendar year; and

(C) the allocation of assistance under subsections (a) and (b) among the States and local governments.

(4) Limitations on Use of Funds.—(A) Excluded Facilities.—A grant for site inventory and assessment under subsection (a) or to capitalize a revolving loan fund or conduct a cleanup under subsection (b) may not be used for any activity involving—

(i) a facility that is the subject of a planned or an ongoing response action under this Act, except for a facility for which a preliminary assessment, site investigation, or final action has been completed and with respect to which the Administrator has decided not to take further response action, including cost recovery action;

(ii) a facility included, or proposed for inclusion, on the National Priorities List maintained by the Administrator under this Act;

(iii) a facility with respect to which a record of decision, other than a no-action record of decision, has been issued by the President under section 104 with respect to the facility;

(iv) a facility with respect to which an administrative or judicial order or a consent decree requiring cleanup has been issued or entered into by the President and is in effect under section 106(a); and

(v) the dredge spoil disposal system established under section 3006 of the Solid Waste Disposal Act (42 U.S.C. 6926 et seq.) has been submitted and closure requirements have been specified in a closure plan.

(B) Use of Funds.—A grant made under this paragraph—

(i) for the development of a State or local program in accordance with this subsection and of cleaning up the environmental contamination at the brownfield site or sites; and

(ii) for a grant to capitalize a revolving loan fund in accordance with this subsection and of cleaning up the environmental contamination at the brownfield site or sites;

(C) Use of Funds.—(1) REVOLVING GRANTS.—For grants made under paragraph (1)(A), the State or local government shall use the funds, including repayment of the principal and interest, solely for purposes of establishing and capitalizing a loan program in accordance with this subsection and of cleaning up the environmental contamination at the brownfield site or sites.

(2) CLEANUP GRANTS.—For grants made under paragraph (1)(B), the local government shall use the funds solely for the purpose of cleaning up the environmental contamination at the brownfield site or sites.

(D) REPAYMENT OF FUNDS.—For grants made under paragraph (1)(A), the State or local government shall require repayment of the loan consistent with this subsection.

(E) NONTRANSFERABILITY.—For grants under paragraph (1)(A) or (1)(B), the loan funds shall not be transferable, unless the Administrator agrees to the transfer in writing.

(F) LIENS.—(1) DEFINITIONS.—In this subparagraph, the terms 'security interest' and 'purchaser' have the meanings given the terms in section 6223(b) of the Internal Revenue Code of 1986.

(2) LIENS.—A lien in favor of the grant recipient arising under the security interest subject to a loan under this subsection.

(iii) COVERAGE.—The lien shall cover all real property and personal property, including cost recovery action; or order has been issued or modified to require the implementation of corrective measures; or order has been issued or modified to require the implementation of corrective measures; or order has been issued or modified to require the implementation of corrective measures.

(E) any land disposal unit with respect to which a closure notification under subtitle C of the Solid Waste Disposal Act (42 U.S.C. 6914 et seq.) has been issued or modified to require the implementation of corrective measures.

(F) a facility at which there has been a release of a polychlorinated biphenyl and that is subject to the Toxic Substances Control Act (15 U.S.C. 2601 et seq.); and

(G) a facility with respect to which an administrative or judicial order or a consent decree requiring cleanup has been issued or entered into by the President and is in effect under section 106(a); and

(i) this Act;

(ii) the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.); and

(iii) the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.);

(iv) the Toxic Substances Control Act (15 U.S.C. 2601 et seq.); or

(v) the Safe Drinking Water Act (42 U.S.C. 300f et seq.);

(H) a facility at which assistance for response activities may be obtained under subsection (a) of the Solid Waste Disposal Act (42 U.S.C. 6905 et seq.) from the Leaking Underground Storage Tank Trust Fund established by section 9508 of the Internal Revenue Code of 1986.

(1) a facility owned or operated by a department, agency, or instrumentality of the
United States, except for land held in trust by the United States for an Indian tribe."

"(2) FACILITY GRANTS.—Notwithstanding paragraph (1), the President may, on a facility-by-facility basis, allow a grant under subsection (a) or (b) to be used for an activity involving any facility or portion of a facility listed in subparagraph (D), (E), (F), (G)(i), (G)(ii), (G)(iii), (G)(iv), or (H) of paragraph (1)."

"(3) FINDS AND COST-SHARING.—A grant made under this title may not be used to pay any fine or penalty owed to a State or the Federal Government or to meet any Federal cost-sharing requirement."

"(4) OTHER LIMITATIONS.—

"(A) IN GENERAL.—Funds made available to a State or local government under the grant programs established under subsections (a) and (b) shall be used only to inventory and assess brownfield sites as authorized by this title and for capitalizing and implementing revolving loan funds or cleanup of a brownfield site as authorized by this title, respectively.

"(B) RESPONSIBILITY FOR CLEANUP ACTION.—Funds made available under this title may not be used to relieve a local government or State of the commitment or responsibilities of the local government or State under State law to carry out cleanup actions at brownfield sites.

"(C) REGULATIONS.—

"(1) IN GENERAL.—The Administrator may issue regulations as necessary to carry out this section.

"(2) PROCEDURES AND STANDARDS.—The regulations shall include such procedures and standards as the Administrator considers necessary, including procedures and standards for evaluating an application for a grant or loan submitted under this section.

"(3) PUBLIC PARTICIPATION.—Nothing in this title affects the liability or response authority of the United States for an Indian tribe.

"(B) TRAINING AND TECHNICAL ASSISTANCE.—Section 117 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9617) is amended by adding at the end the following:

"(g) FINANCIAL ASSISTANCE FOR TRAINING.—The Administrator may provide training and technical assistance to individuals and organizations, as appropriate to—

"(1) inventory and conduct assessments and cleanup of brownfield sites; and

"(2) conduct response actions under this Act."

"SEC. 503. STATE VOLUNTARY CLEANUP PROGRAMS.

"(a) EPA ASSISTANCE FOR STATES FOR STATE VOLUNTARY RESPONSE PROGRAMS.—The Administrator shall assist States to establish and administer voluntary response programs that provide—

"(1) voluntary response actions that ensure adequate site assessment and protective of human health and the environment;

"(2) opportunities for technical assistance (including grants) for voluntary response actions;

"(3) meaningful opportunities for public participation on issues that affect the community, which shall include prior notice and opportunity for comment in the selection of response actions and which may include involvement of State and local health officials during site assessment;

"(4) streamlined procedures to ensure expeditious voluntary response actions;

"(5) adequate oversight, enforcement authorities, and regulations to—

"(A) ensure that voluntary response actions are protective of human health and the environment, as provided in paragraph (1), and are conducted in a timely manner in accordance with a State-approved response action plan; and

"(B) ensure completion of response actions if the person conducting the response action fails or refuses to complete the necessary response activities that are protective of human health and the environment, including operation and maintenance or long-term monitoring activities;

"(6) mechanisms for the approval of a response action plan; and

"(7) mechanisms for a certification or similar documentation to the person that conducted the response action indicating that the response is complete.

"(b) STATE VOLUNTARY RESPONSE PROGRAMS AND REPORTING REQUIREMENT.—

"(1) GRANTS TO STATES.—The Administrator shall encourage the States to establish and administer voluntary response programs described in subsection (a) and is amended by adding at the end the following:

"(q) AUDITS.—

"(1) IN GENERAL.—The Inspector General of the Environmental Protection Agency shall audit a portion of the grants awarded under section 129 to ensure that all funds are used in a manner that is consistent with that section.

"(2) FUTURE GRANTS.—The result of the audit shall be taken into account in awarding any future grants to the State or local government under that section.

"TITLE VI—SETTLEMENT INCENTIVES

"SEC. 601. FAIRNESS IN SETTLEMENTS.

"Section 122 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9622) is amended by adding at the end the following:

"(1) FAIRNESS IN SETTLEMENTS.—An agreement under subsection (a) may, in the discretion of the President, provide for payment of sums appropriated under section 111(e) to pay a portion of the response costs at a facility in accordance with section 122(b) where the President determines there are parties that are insolvent, defunct, or otherwise have a limited ability to pay, or based on other equitable considerations.

"(2) APPLICATION TOWARD CLEANUP SETTLEMENTS OF SUMS RECOVERED IN OTHER SETTLEMENTS.—The President may enter into settlements under paragraphs (3), subparagraphs (B), (C), (F), and (G) of section 122(g)(1), and section 106(b) that include terms providing for the disposition of the proceeds of the settlements in a manner that is fair and reasonable, including, as appropriate, the placement of settlement proceeds in interest-bearing accounts to conduct or enable other persons to conduct response actions at the facility.

"(3) ADDITIONAL SETTLEMENTS BASED ON ABILITY TO PAY.—The President shall have the authority to evaluate the ability to pay of any potentially responsible party, and to enter into a settlement with the party based on that party’s ability to pay.

"TITLE VII—FUNDING

"SEC. 701. AUTHORIZATION OF APPROPRIATIONS.

"Section 111(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611(a)) is amended in the first sentence by striking ‘‘$8,500,000,000 for the 5-year period beginning May 24, 1999’’.
SEC. 702. FUNDING FOR CLEANUP SETTLEMENTS.

Section 111 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611) is amended—

(1) in subsection (a), by inserting after paragraph (6) the following:

"(7) FUNDING FOR CLEANUP SETTLEMENTS.—Payments toward cleanup settlements under subsection (r) and section 122(n)(1);" and

(2) by adding at the end the following:

"(r) MANDATORY FUNDING.—

"(1) IN GENERAL.—Subject to paragraph (4), for the purpose of contributing under section 122(n)(1) to a cleanup settlement, there is made available for obligation for a fiscal year only amounts made available for obligation from amounts in the Hazardous Substance Superfund for each of fiscal years 2000 through 2004, $200,000,000, to remain available until expended.

"(2) EFFECT ON AUTHORITY.—Nothing in this paragraph affects the authority of the Administrator to forego recovery of past costs.

"(3) FISCAL YEAR FUNDS.—Except in fiscal year 2000, if the amounts made available under paragraph (1) available for a fiscal year have been obligated, up to ½ of the amounts made available under paragraph (1) for the next fiscal year may be obligated.

"(4) ON AVAILABILITY.—An amount under paragraph (1) may be made available for obligation for a fiscal year only if the total amount appropriated for the fiscal year under subsection 111(a) equals or exceeds $1,500,000,000.

SEC. 703. AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY.

Section 111 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611) is amended by striking subsection (m) and inserting the following:

"(m) AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY.—There shall be established an Agency for Toxic Substances and Disease Registry to be used for the purpose of carrying out activities described in subsection (c)(4) and section 104(c) not less than $700,000,000 for each of fiscal years 2000 through 2004.

SEC. 704. BROWNFIELDS.

Section 111 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611) is amended by adding at the end the following:

"(e) AUTHORIZATION OF APPROPRIATIONS.—

"(1) INVENTORY AND ASSESSMENT PROGRAM.—There is authorized to be appropriated to carry out section 128(a) $35,000,000 for each of fiscal years 2000 through 2004.

"(2) GRANTS FOR CLEANUP.—There is authorized to be appropriated to carry out section 129(b) $60,000,000 for each of fiscal years 2000 through 2004.

"(3) VOLUNTARY RESPONSE PROGRAMS.—There is authorized to be appropriated for assistance programs under section 129(b) $15,000,000 for each of the first 5 fiscal years beginning after the date of enactment of this section.

"(4) GRANTS FOR CERCLA FUNDING.—The amounts appropriated under this subsection shall remain available until expended.

SEC. 705. AUTHORIZATION OF APPROPRIATIONS FOR MUNICIPAL REVENUES.

Section 111(p) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611(p)) is amended by

(i) dropping paragraph (1) and inserting the following:

"(1) IN GENERAL.—

"(A) AUTHORIZATION.—There are authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to the Hazardous Substance Superfund, $250,000,000 for each of fiscal years 2000 through 2004.

"(B) APPROPRIATION PER SUBSEQUENT YEARS.—In addition to funds appropriated under subparagraph (A), there is authorized to be appropriated to the Hazardous Substance Superfund—

(1) an amount equal to so much of the aggregate amount authorized to be appropriated under subparagraph (A) as has not been appropriated for any previous fiscal year.

SEC. 706. WORKER TRAINING AND EDUCATION GRANTS.

Section 111(c)(12) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611(c)(12)) is amended—

(1) by striking "$10,000,000" and inserting "$40,000,000"; and

(2) by striking "each of fiscal years 1987, 1988, and 1989" and inserting "each of fiscal years 2000 through 2004".

TITLE VIII—DEFINITIONS

SEC. 801. DEFINITIONS.

Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9611) is amended by adding at the end the following:

"(40) BROWNFIELD SITE.—The term 'brownfield site' means a facility that has or is suspected of having environmental contamination that—

(A) could prevent the timely use, development, reuse, or redevelopment of the facility; and

(B) is relatively limited in scope or severity and can be comprehensively assessed and readily analyzed.

"(41) CONTAMINANT.—The term 'contaminant', as used in section 129 and paragraph (44), includes any hazardous substance.

"(42) GRANT.—The term 'grant' includes a cooperative agreement.

"(43) LOCAL GOVERNMENT.—The term 'local government' means the term 'unit of general local government' in section 102(a) of the Housing and Community Development Act of 1974 (42 U.S.C. 5002(a)), except that the term includes an Indian tribe.

"(44) SITE ASSESSMENT.—

"(A) IN GENERAL.—The term 'site assessment', for purposes of sections 128 and 129 and paragraph (35) means an investigation that determines the nature and extent of a release or potential release of a hazardous substance at a brownfield site.

"(B) INVESTIGATION.—For the purpose of this paragraph, an investigation that meets the requirements of this subparagraph—

(i) shall include—

(I) an onsite evaluation; and

(II) sufficient testing, sampling, and other field-data-gathering activities to accurately determine whether the brownfield site is contaminated and the threats to human health and the environment presented by the release of contaminants at the brownfield site; and

(ii) may include—

(I) review of such information regarding the brownfield site and previous uses as is available at the time of the review; and

(II) an onsite evaluation, if appropriate.

"(45) MUNICIPAL SOLID WASTE.—

"(A) IN GENERAL.—The term 'municipal solid waste' means—

(i) waste material generated by a household (including a single or multifamily residence); and

(ii) waste material generated by a commercial, institutional, or industrial source, to the extent that the waste material—

(1) is essentially the same as waste normally generated by a household; or

(2) is collected and disposed of with other municipal solid waste or municipal sewage sludge as part of normal municipal solid waste collection services, and, with respect to each source from which the waste material is collected, qualifies for a de minimis exemption under section 107(r).

"(B) EXAMPLES.—Examples of municipal solid waste under subparagraph (A) include food and yard waste, paper, clothing, appliances, consumer product packaging, disposable diapers, office supplies, cosmetics, glass and metal food containers, elementary or secondary school secondary school laboratory waste, and household hazardous waste.

"(C) EXCLUSIONS.—The term 'municipal solid waste' does not include—

(B) combustion ash generated by resource recovery facilities or municipal incinerators; or

(ii) waste material from manufacturing or processing (including pollution control) operations that is not essentially the same as waste normally generated by households.

"(46) MUNICIPALITY.—

"(A) IN GENERAL.—The term 'municipality' means a political subdivision of a State.

"(B) INCLUSIONS.—The term 'municipality' includes—

(i) a city, county, village, town, township, borough, parish, school, school district, sanitation district, water district, or other public entity performing local governmental functions; and

(ii) a natural person acting in the capacity of an officer, employee, or agent of a political subdivision of a State or an entity described in subparagraph (B)(i) for the performance of governmental functions.

"(47) OWNER, OPERATOR, OR LESSEE OF RESIDENTIAL PROPERTY.—

"(B) IN GENERAL.—The term 'owner, operator, or lessee of residential property' means a person that—

(i) owns, operates, manages, or leases residential property; and

(ii) uses or allows the use of the residential property exclusively for residential purposes.

"(B) RESIDENTIAL PROPERTY.—For the purposes of subparagraph (A) the term 'residential property' means a single or multifamily residence (including incidental accessory land, buildings, or improvements) that is used exclusively for residential purposes.

"(48) SMALL NONPROFIT ORGANIZATION.—The term 'small nonprofit organization' means an organization that, at the time of disposal—

(A) did not distribute any part of its income or profit to its members, directors, or other affiliated persons;

(B) employed more than not paid individuals at the chapter, office, or department disposing of the waste; and

(C) was an organization described in section 501(c) of the Internal Revenue Code of 1986 that is exempt from taxation under section 501(a) of the Internal Revenue Code of 1986.

"(49) AFFILIATE, AFFILIATED.—The terms 'affiliate' and 'affiliated' have the meanings
May 24, 1999

CONGRESSIONAL RECORD—SENATE

10641

that those terms have in section 121.103 of title 13, Code of Federal Regulations (or any successor regulation).

(50) MUNICIPAL SEWAGE SLUDGE.—The term "municipal sewage sludge" means solid, semisolid, or liquid residue removed during the treatment of municipal wastewater, domestic sewage, or other wastewater at or by publicly owned or federally owned treatment works.".

S. 1105—SUMMARY

1. BROWNFIELDS LIABILITY RELIEF

Finality for Buyers (limitation on liability for prospective purchasers).

Finality for Owners and Sellers (liability relief for present and former owners and contiguous property owners).

2. BROWNFIELDS FUNDING

Grants to municipalities, states and tribes to assess conditions at brownfields sites.

Grants to municipalities, states and tribes to capitalize revolving loan funds for cleanup of brownfields sites.

Grants to states to develop and enhance state voluntary cleanup programs.

3. SMALL BUSINESS LIABILITY RELIEF

Liability exemptions:

De micromis (generators and transporters that send less than 110 gallons of liquid material or less than 200 pounds of solid material, except amount determined by the Administrator on a site-specific basis).

Generators and transporters of municipal solid waste who are small businesses, residential homeowners or small non-profits.

Expedited settlement: De Minimis (presumed to be 1% or less of waste at site).

Limited ability to pay.

4. CLARIFICATION OF LIABILITY FOR RECYCLING TRANSACTIONS

Exemption for generators and transporters of recyclable material, as provided in the Lott/Daschle bill in the 105th, and endorsed by ISRF, environmental groups, the Administration and others.

5. RELIEF FOR GENERATORS AND TRANSPORTERS OF MUNICIPAL WASTE AND FOR MUNICIPAL OWNERS OF LANDFILLS

Cap on liability of generators and transporters of municipal solid waste and sewage sludge, and of municipalities that own or operate municipal landfills on the NPL, per EPA 1996 policy that was negotiated with and has the support of several municipal representatives (including National Association of Counties, National League of Cities): expedited settlement based on dollar per ton limits, for generators and transporters; percentage of total costs cap for owners and operators.

6. FUNDING

Authorization levels consistent with recent years and, consistent with past, major funding of the Superfund Trust Fund, with $250 million from general revenues.

EPA to continue to provide orphan funding as incentive for parties to enter into cleanup settlements.

By Mr. TORRICELLI (for himself and Ms. SNOWE):

S. 1106. A bill to amend the Public Health Service Act and Employee Retirement Income Security Act of 1974 to require group and individual health insurance coverage and group health plans provide coverage for qualified individuals for bone mass measurement (bone density testing) to prevent fractures associated with osteoporosis; to the Committee on Health, Education, Labor, and Pen
dustrialization of individuals.

(D) Because osteoporosis is a progressive condition causing fractures primarily in aging individuals, preventing fractures, particularly for post menopausal women before they become eligible for Medicare, has a significant potential of reducing osteoporosis-related costs under the Medicare program.

(4) USE OF BONE MASS MEASUREMENT.—
(A) Bone mass measurement is the only reliable method of detecting osteoporosis at an early stage.

(B) Low bone mass is as predictive of future fractures as is high cholesterol or high blood pressure of heart disease or stroke.

(C) Bone mass measurement is a non-invasive, painless, and reliable way to diagnose osteoporosis before costly fractures occur.

(D) Under section 4106 of the Balanced Budget Act of 1997, Medicare provides coverage, effective July 1, 1999, for bone mass measurements for qualified individuals who are at risk of developing osteoporosis.

(E) Research on osteoporosis and related bone diseases—

(A) Technology now exists, and new technology is developing, that will permit the early diagnosis and prevention of osteoporosis and related bone diseases as well as management of these conditions once they develop.

(B) Funding for research on osteoporosis and related bone diseases is severely constrained at key research institutes, including the National Institute of Arthritis and Musculoskeletal and Skin Diseases, the National Institute on Aging, the National Institute of Digestive and Kidney Diseases, the National Institute of Dental Research, and the National Institute of Child Health and Human Development.

(C) Further research is needed to improve medical knowledge concerning—

(i) cellular mechanisms related to the processes of bone resorption and bone formation, and the effect of different agents on bone remodeling;

(ii) risk factors for osteoporosis, including newly discovered risk factors, risk factors related to health care, and others not ordinarily studied (such as men and minorities), risk factors related to genes that help to control skeletal metabolism, and risk factors relating to the relationship of aging processes to the development of osteoporosis;

(iii) bone mass measurement technology, including more widespread and cost-effective technology that offers more precise measurements and for interpreting measurements;

(iv) calcium (including bioavailability, intake and the role of calcium in building heavier and denser skeletons), and vitamin D and its role as an essential vitamin in adults;

(v) prevention and treatment, including the efficacy of current therapies, alternative drug therapies for prevention and treatment, and the role of exercise; and

(vi) rehabilitation.

(D) Further educational efforts are needed to increase public and professional knowledge of the causes of, methods for avoiding, and treatment of osteoporosis.

SEC. 2. REQUIRING COVERAGE OF BONE MASS MEASUREMENT UNDER HEALTH PLANS.

(A) Group health plans—

(1) Bone mass measurement is the only reliable method of detecting osteoporosis at an early stage.

(2) Low bone mass is as predictive of future fractures as is high cholesterol or high blood pressure of heart disease or stroke.

(3) Bone mass measurement is a non-invasive, painless, and reliable way to diagnose osteoporosis before costly fractures occur.

(b) Requirements for Coverage of Bone Mass Measurement—A group health plan, and a health insurance issuer offering group health insurance coverage, shall include (consistent with this section) coverage for bone mass measurement for beneficiaries and participants who are qualified individuals.

(c) Definitions Relating to Coverage—

(1) Bone Mass Measurement.—The term ‘bone mass measurement’ means a radiologic or radioisotopic procedure or other procedure as determined by the Food and Drug Administration performed on an individual for the purpose of identifying bone mass or detecting bone loss or determining bone quality, and includes a physician’s interpretation of the results of the procedure. Nothing in this paragraph shall be construed as requiring a bone mass measurement to be conducted in a particular type of facility or to prevent such a measurement from being conducted through the use of mobile facilities that are otherwise qualified.

(2) Qualified Individual.—The term ‘qualified individual’ means an individual who—

(A) is an estrogen-deficient woman at clinical risk for osteoporosis;

(B) has vertebral abnormalities;

(C) is receiving chemotherapy or long-term glucocorticoid (steroid) therapy;

(D) has primary hyperparathyroidism, hyperthyroidism, or excess thyroid replacement for any reason;

(E) is being monitored to assess the response to or efficacy of approved osteoporosis drug therapy;

(F) is a woman with low bone mass; or

(G) the Secretary determines is eligible.

(2) Limitation on Frequency Required.—Taking into account the standards established under section 1861(r)(3) of the Social Security Act, the Secretary shall establish standards regarding the frequency with which a qualified individual shall be eligible to be provided benefits for bone mass measurement under this section. The Secretary may vary such standards based on the clinical and risk-related characteristics of qualified individuals.

(3) Restrictions on Cost-Sharing.—

(1) In General.—Subject to paragraph (2), nothing in this section shall be construed as preventing a group health plan or issuer from imposing deductibles, coinsurance, or other cost-sharing in relation to bone mass measurement under this section as if such section applied to such reimbursement.

(2) Limitation.—Deductibles, coinsurance, and other cost-sharing or other limitations for bone mass measurement may not be imposed under paragraph (1) to the extent they exceed the deductibles, coinsurance, and limitations that are applied to similar services under the group health plan or health insurance coverage.

(4) Prohibitions.—A group health plan, and a health insurance issuer offering group health insurance coverage in connection with a group health plan, may not—

(1) deny to an individual eligibility, or continued eligibility, to enroll or to renew coverage under the terms of the plan, solely for the purpose of avoiding the requirements of this section;

(2) provide incentives (monetary or otherwise) to individuals to encourage such individuals not to be provided bone mass measurements to which they are entitled under this section; or provide such incentives to such providers so as to prevent such providers from taking any actions that would lead to such measurement being conducted through the use of mobile facilities that are otherwise qualified.

(3) prohibit a provider from discussing with a patient osteoporosis preventive techniques or medical treatment options relating to this section; or

(4) penalize or otherwise reduce or limit the reimbursement of providers because such provider provided bone mass measurements to a qualified individual in accordance with this section.

(5) Rule of Construction.—Nothing in this section shall be construed to require an individual who is a participant or beneficiary to undergo bone mass measurement.

(6) Level and Type of Reimbursement.—Nothing in this section shall be construed to prevent a group health plan or a health insurance issuer offering group health insurance coverage from negotiating the level and type of reimbursement with a provider for care provided in accordance with this section.

(1) Prescription.—

(1) in General.—The provisions of this section do not preempt State law relating to health insurance coverage of such service, and State law provides greater benefits with respect to osteoporosis detection or prevention.

(2) Construction.—Section 2723(a)(1) shall not be construed as superseding a State law described in paragraph (1).

(b) Conforming Amendment.—Section 2722(c) of such Act (42 U.S.C. 1395w-22(c)) is amended by striking “section 2701” and inserting “sections 2701 and 2707”.

(c) ERISA Amendments.—In General.—Subpart B of part 7 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1185 et seq.) is amended by adding at the end the following new section:

SEC. 714. STANDARDS RELATING TO BENEFITS FOR BONE MASS MEASUREMENT.

(1) Requirements for Coverage of Bone Mass Measurement—A group health plan, and a health insurance issuer offering group health insurance coverage, shall include (consistent with this section) coverage for bone mass measurement for beneficiaries and participants who are qualified individuals.

(2) Definitions Relating to Coverage—

(1) Bone Mass Measurement.—The term ‘bone mass measurement’ means a radiologic or radioisotopic procedure or other procedure approved by the Food and Drug Administration performed on an individual for the purpose of identifying bone mass or detecting bone loss or determining bone quality, and includes a physician’s interpretation of the results of the procedure. Nothing in this paragraph shall be construed as requiring a bone mass measurement to be conducted in a particular type of facility or to prevent such a measurement from being conducted through the use of mobile facilities that are otherwise qualified.

(2) Qualified Individual.—The term ‘qualified individual’ means an individual who—

(A) is an estrogen-deficient woman at clinical risk for osteoporosis;

(B) has vertebral abnormalities;

(C) is receiving chemotherapy or long-term glucocorticoid (steroid) therapy;

(D) has primary hyperparathyroidism, hyperthyroidism, or excess thyroid replacement for any reason;

(E) is being monitored to assess the response to or efficacy of approved osteoporosis drug therapy;
May 24, 1999

CONGRESSIONAL RECORD—SENATE

10643

By Mr. WARNER:

S. 1107. A bill to reform the conduct of Federal elections; to the Committee on Rules and Administration.

CONSTITUTIONAL AND EFFECTIVE REFORM OF CAMPAIGNS ACT OF 1999

MR. WARNER. Mr. President, today I introduce the Constitutional and Effective Reform of Campaigns Act, or "CERCA", which I first introduced during the 106th Congress. This legislation is the product of two years of hearings during my Chairmanship of the Rules Committee, discussions with numerous experts, party officials, and candidates, and nearly 18 months of drafting, acting in bad faith to adopt provisions which in my mind is neither free nor a good policy idea. Why should seekers of federal office get free time, while candidates for state office or local office— from governors to local sheriffs—do not receive comparable free benefits? Such an inequity and imbalance will breed friction between federal and state office seekers. Third, I believe we should try to increase the role of citizens and the public in the political process, any framework of campaign reform legislation must respect and protect the constitutional right of individuals, groups, and organizations to participate in advocacy concerning political issues.

This bill is designed to be a "bilateral" framework among the issues of soft money and union dues: each side must give up identical ground. The Republicans should give ground by allowing union members to decide voluntarily whether to contribute the portion of dues which goes to political contributions or activities.

Specifically, on the issue of soft money, no reform can be considered true reform without placing limits on the corporate and union donations to the national political parties. This bill places a $100,000 cap on such donations. While this provision addresses the public's legitimate concern over the propriety of these large donations, it allows the political parties sufficient funds to maintain their headquarters and conduct their grassroots efforts. In addition, the current limits on "hard" contributions must be updated. The
ability of citizens to contribute voluntarily to a wide range of candidates and to their parties is fundamental to our national political system.

At the same time, the practice of mandatory union dues going to partisan politics without union members' consent must end: it is counter to all the political freedoms that make America a true democracy. The concept of "paycheck protection" must be included in any campaign finance reform, so that these deductions are voluntary, whether these dues fund direct contributions to candidates or parties, or pay for undisclosed spending on phone banks, get-the-vote efforts, literature, and television ads.

Under this legislation, unions would be required to obtain advance, written consent before deducting money for political activities from union members' paychecks. The present state of the law requires most union workers to give up their rights to participate in the union if they seek refunds of that portion of dues going to politics. In addition, this section would strengthen the reporting requirements for deductions engaged in political activities and enhance an aggrieved union member's right to challenge a union's determination of the portion of dues going to political activities.

In the Senate debates thus far, there has been much discussion about whether corporations should be required to obtain shareholder approval to make political contributions. This is an issue which warrants consideration. My proposal not only limits these corporate and union contributions to $100,000, it also includes a requirement that companies disclose their donations to federal political parties in their annual reports. And under current policies of the Securities and Exchange Commission, shareholders who do not want to pay for such donations can easily avoid doing so.

In addition, the SEC is in the process of making it easier for shareholders to raise questions related to social policy matters at annual meetings. I am monitoring how these changes are implemented: if they are insufficient to guarantee adequate rights to shareholders, I will consider amending my bill to protect these rights.

As an aside, I reject the notion that the status of union members is similar to those who belong to groups such as the National Rifle Association or the Sierra Club. Nobody is compelled to join these types of organizations, and those that do, know or should know that their dues are going in part to promote political activities and enhance an aggrieved union member's right to challenge a union's determination of the portion of dues going to political activities.

In the Senate debates thus far, there has been much discussion about whether corporations should be required to obtain shareholder approval to make political contributions. This is an issue which warrants consideration. My proposal not only limits these corporate and union contributions to $100,000, it also includes a requirement that companies disclose their donations to federal political parties in their annual reports. And under current policies of the Securities and Exchange Commission, shareholders who do not want to pay for such donations can easily avoid doing so.

In addition, the SEC is in the process of making it easier for shareholders to raise questions related to social policy matters at annual meetings. I am monitoring how these changes are implemented: if they are insufficient to guarantee adequate rights to shareholders, I will consider amending my bill to protect these rights.

As an aside, I reject the notion that the status of union members is similar to those who belong to groups such as the National Rifle Association or the Sierra Club. Nobody is compelled to join these types of organizations, and those that do, know or should know that their dues are going in part to promote political activities and enhance an aggrieved union member's right to challenge a union's determination of the portion of dues going to political activities.
Solutions: The investigations of contested elections in Louisiana and California have highlighted significant weaknesses in federal laws designed to safeguard the registration and voting processes. The requirement that states allow registration by mail has underlined the need for proof of citizenship when registering and proof of identity when voting. The law requires a photo ID to be accepted at the polls. If a voter does not have a photo ID, they may be allowed to vote with a signature on file.

Lastly, this bill would allow states to purge inactive voters and to allow state law to govern whether voters who move without reregistering should be allowed to vote.

The problems which I believe can be solved in a bipartisan fashion. Attached to this statement is a section by section review of the legislation. I look forward to working with my colleagues to enact meaningful campaign reform, by looking at reform beyond the usual sound bites and advertising the real problems with our present campaign system.

Mr. President, I ask unanimous consent that the text of the bill summary be printed in the RECORD. There being no objection, the material was ordered to be printed in the RECORD, as follows:

CROSS-CLASSIFICATION OF EFFECTIVE REFORM OF CAMPAIGNS ACT—SECTION BY SECTION

TITLE I—ENHANCEMENT OF CITIZEN INVOLVEMENT
Section 101: Prohibits those ineligible to vote (convicted felons, felons) from making contributions (‘hard money’) or donations (‘soft money’). Also bans foreign aliens making independent expenditures and codifies FPC regulations on foreign control of domestic donations.
Section 102: Updates maximum individual contribution limit to $200 per election (primary and general) and indexes both individual and PAC limits in the future.
Section 103: Provides a tax credit up to $100 for contributions to in-state candidates for Senate and House for incomes up to $50,000 ($200 for joint filers up to $120,000).

TITLE II—LEVELING THE PLAYING FIELD FOR CANDIDATES
Section 201: Seed money provision: Senate candidates may collect $300,000 and House candidates $100,000 (minus any funds carried over from a prior cycle) in contributions up to $10,000 from individuals and PACs.
Section 202: ‘Anti-millionaires’ provision: when one candidate spends over $25,000 of personal funds, a candidate may accept contributions up to $10,000 from individuals and PAC’s up to the amount of personal spending minus a candidate’s funds carried over from a prior cycle. This would increase the personal use.
Section 203: Bans use of Senate frank for mass mailings from January 1 to election day for incumbents seeking reelection.

TITLE III—VOLUNTARINESS OF POLITICAL CONTRIBUTIONS
Section 301: Union dues provision: Labor organizations must obtain prior, written authorization for portion of dues or fees not to be used for representation. Establish civil action for misused contribution.

TITLE IV—ELIMINATION OF CAMPAIGN EXCUSES
Section 401: Adds soft money donations to present ban on fundraising on federal property and to other criminal statutes.
Section 402: Hard money contributions or soft money donations over $500 which a political committee intends to return because of illegality must be transferred to the FEC and may be given to the Treasury as part of a civil or criminal action.
Section 403: ‘Soft’ and ‘hard’ money provisions. Soft money cap: no national party, congressional committee or senatorial committee shall accept donations from any source exceeding $100,000 per year. Hard money increases from $25,000 to $50,000 per individual per year with no limit to party committees.
Section 404: Codifies FEC regulations banning conversion of campaign funds to personal use.

TITLE V—ENHANCED DISCLOSURE
Section 501: Additional reporting requirements for candidates: weekly reports for last 90 days of election. Provides periodic disclosure of large contributions extended to 90 days before election, and end of ‘best efforts’ waiver for failure to obtain occupation of contributors over $200.
Section 502: FEC shall make reports filed available on the Internet.
Section 503: 24-hour disclosure of independent expenditures exceeding $100,000 in last 15 days before election, and of those over $10,000 made anytime.
Section 504: Registered lobbyists shall include their own contributions and soft money donations and those of their employers and the employers’ coordinated PAC’s on lobbyist disclosure forms.

TITLE VI—FEDERAL ELECTION COMMISSION
Section 601: FEC shall develop and provide, at no cost, software to file reports, and shall issue regulations mandating electronic filing and allowing for filing by fax.
Section 602: Limits commissioners to one term of eight years.
Section 603: Increases penalties for knowing and willful violations to greater than $15,000 or 300 percent of the contribution or expenditure.
Section 604: Requires that FEC create a schedule of penalties for minor reporting violations.
Section 605: Establishes availability of oral arguments at FEC when requested and two commissioner signatures to create index of Commission actions.
Section 606: Changes reporting cycle for committees to election cycle rather than calendar year.
Section 607: Classifies FEC general counsel and executive director as presidential appointments requiring Senate confirmation.

TITLE VII—IMPROVEMENTS TO NATIONAL VOTER REGISTRATION
Section 701: Repeals requirement that states allow registration by mail.
Section 702: Requires that registrants for federal elections provide social security number and proof of citizenship.
Section 703: Provides states the option of removing registrants from eligible list of federal voters who have not voted in two federal elections and did not respond to postcard.
Section 704: Allows states to require photo ID at the polls.
Section 705: Repeals requirement that states allow people to change their registration at the polls and still vote.

By Mr. COCHRAN (for himself, Mrs. LINCOLN, Mr. COVERDILL, Mr. SESSIONS, Mr. CLELAND, Mr. HOLLINGS, Mr. SHELDY, Mr. ROBB, and Mr. HUTCHINSON):

S. 1108. A bill to amend the Federal Crop Insurance Act to improve crop insurance coverage and administration, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

CROP INSURANCE EQUITY ACT OF 1999

Mr. COCHRAN, Mr. President. I am pleased to have been joined today by my colleague from Arkansas, Mrs. Lincoln, in introducing the Crop Insurance Equity Act of 1999 to reform the federal crop insurance program. The other cosponsors of the bill are: Mr. COVERDILL, Mr. SESSIONS, Mr. CLELAND, Mr. HOLLINGS, Mr. SHELDY, Mr. ROBB, and Mr. HUTCHINSON.

The Crop Insurance Equity Act of 1999 is based on several principles. First, we do not believe that the crop insurance program should be the next iteration of a farm bill. Therefore, this bill maintains the current policy with regard to federal subsidy for revenue insurance products. We developed this bill with the intent of addressing the reasons farmers in our states have found crop insurance to be impractical. We believe that farmers from Washington to Florida and Maine to California will find this bill worthy of their support.

Our bill establishes a process under which the current rates and rating methods and procedures will be re-evaluated by USDA to examine factors not currently considered. This may lower crop insurance rates for some commodities. However, because all current rating methodologies are actuarially sound, if the re-evaluation would result in an increased rate, the current method must remain in place.

This bill also establishes a fixed percentage as the federal contribution to a farmer’s crop insurance premium. Current law provides higher contributions for lower levels of coverage. This bill would treat all farmers fairly.

We believe that one of the simplest ways to make crop insurance more attractive is to make it operate more like other common forms of insurance, such as homeowners or auto insurance. This bill establishes a process of discounts and a menu of policy options from which farmers can choose. These include discounts for coverage of larger, less risky units of production, employment of technologically advanced agricultural management practices, and the reinstatement of good experience discounts. In addition, farmers will be able to choose whether to purchase specific coverages for prevented planting, yield adjustments, and the like.

Mr. President, this bill raises the basic coverage level for the lowest crop insurance rate to $500 for catastrophic. To ensure that all farmers will benefit from this legislation. For the same minimal fee as established in...
current law, this bill will provide catas
trophic coverage for sixty percent of a farm-
ner's historical production at seventy percent of the market price.
Our bill also makes other important changes. It prevents new
farmers or those who rent new land or produce new crops by ensuring they are as-
signed a fair yield until they generate ade-
quate actual production data.

The legislation improves the man-
gagement and oversight of the crop in-
urance program by establishing the Farm Service Agency as the sole agen-
cy for acreage and yield record keeping
within USDA. It restructures the board of directors of the Federal Crop Insur-
ance Corporation to include more
farmers, and establishes a new office to
work with private sector companies
who develop new crop insurance prod-

One of the major complaints that I
have heard about crop insurance is the
abuse and fraud that exists in the cur-
rent program. To address this com-
plaint, our bill also improves the mon-
toring of agents and adjusters to com-
bat both abuse and fraud. It strengthens the pen-
alties available to USDA for compa-

I believe that we have developed a
sound proposal which Senators will find
good reason to support.

Mr. President, I ask unanimous con-
sent that the bill and a summary of the
legislation be printed in the RECORD.

There being no objection, the mate-
rial was ordered to be printed in the
RECORD, as follows:

S. 1108

Be it enacted by the Senate and House of Rep-
resentatives of the United States of America in Congress assembled,

SECTION I. SHORT TITLE; TABLE OF CONTENTS. (a) SHORT TITLE.—This Act may be cited as the "Crop Insurance Equity Act of 1999".
(b) TABLE OF CONTENTS.—The table of con-
ents of this Act is as follows:

TITLE I—CROP INSURANCE COVERAGE

Sec. 101. Prevented planting.
Sec. 102. Alternative rating methodologies.
Sec. 103. Quality adjustment.
Sec. 104. Low-risk producer pilot program.
Sec. 105. Catastrophic risk protection.
Sec. 106. Loss adjustment.
Sec. 107. Cost of production plans of insur-
ance.
Sec. 108. Discounts.
Sec. 109. Adjustments to subsidy levels.
Sec. 110. Sales closing dates.
Sec. 111. Assigned yields.
Sec. 112. Actual production history adjust-
ment for disasters.
Sec. 113. Payment of portion of premium.
Sec. 114. Limitation on premiums includ-
in underwriting gains.

TITLE II—ADMINISTRATION

Sec. 201. Board of Directors of Corporation.
Sec. 203. Office of Private Sector Partner-
ship.
Sec. 204. Penalties for false information.
Sec. 205. Regulations.
Sec. 206. Reinsurance agreement.
Sec. 207. Payments by cooperative associa-
tions.

Sec. 208. Limitation on double insurance.
Sec. 209. Cooperation with State commit-
tees of Farm Service Agency.
Sec. 211. False statements.
Sec. 212. Flexible subsidy pilot program.
Sec. 213. Reinsurance agreements.
Sec. 214. Funding.

TITLE III—CROP INSURANCE PROGRAM

Sec. 301. Eligibility for coverage.
Sec. 302. Payment of portion of premium.
Sec. 303. Sales closing dates.
Sec. 304. Assignment of yields.
Sec. 305. Use of methodologies for rating plans of insurance.
Sec. 306. Implementation.

TITLE IV—AUTHORIZATION OF APPROPRIATIONS

Sec. 401. Authorization of appropriations.

May 24, 1999
yield or area yield basis, indemnified at 70 percent of the expected market price, or a comparable coverage (as determined by the Corporation)."

SEC. 106. LOSS ADJUSTMENT.

Section 508(a)(1) of the Federal Crop Insurance Act (7 U.S.C. 1508(b)(11)) is amended by striking "11 percent" and all that follows through the end of the paragraph and inserting "$50 for each claim that is adjusted under this subsection."

SEC. 107. COST OF PRODUCTION PLANS OF INSURANCE.

(a) In General—Section 508(c) of the Federal Crop Insurance Act (7 U.S.C. 1508(c)) is amended by striking paragraph (5) and inserting the following:

"(5) EXPECTED MARKET PRICE.—

“(a) In General.—For the purposes of this title, the Corporation shall establish or approve the price level (referred to in this title as the ‘expected market price’) of each agricultural commodity for which insurance is offered.

“(b) AMOUNT.—The expected market price of an agricultural commodity—

“(i) except as otherwise provided in this subparagraph, shall be not less than the projected market price of the agricultural commodity determined by the Corporation; and

“(ii) may be based on the actual market price of the agricultural commodity at the time of harvest, as determined by the Corporation;

“( iii) in the case of cost of production or similar plans of insurance, shall be the projected cost of producing the agricultural commodity, as determined by the Corporation."

(b) Conforming Amendments.—Section 508(h) of the Federal Crop Insurance Act (7 U.S.C. 1508(h)) is amended—

(1) by striking paragraph (9); and

(2) by redesignating paragraph (10) as paragraph (9).

SEC. 108. DISCOUNTS.

Section 508(d) of the Federal Crop Insurance Act (7 U.S.C. 1508(d)) is amended by adding at the end the following:

"(3) CHAIRPERSON.—The Board shall select—

“(A) 4 members who are active agricultural producers with or without crop insurance, with 1 member appointed from each of the 4 regions of the United States (as determined by the Secretary); (B) 1 member who is active in the reinsurance business; (C) 1 member who is active in the reinsurance business; (D) 1 member who is active in the reinsurance business; (E) the Chief Economist of the Department of Agriculture; (F) the Chief Economist of the Department of Agriculture; (G) the Chief Economist of the Department of Agriculture; (H) the Chief Economist of the Department of Agriculture; (I) the Chief Economist of the Department of Agriculture; and (J) the Chief Economist of the Department of Agriculture.

"(4) APPOINTMENT AND TERMS OF PRIVATE SECTOR MEMBERS.—The members of the Board described in subparagraphs (A), (B), and (C) of paragraph (2)—

“(A) shall be appointed by, and hold office at the pleasure of, the Secretary; (B) shall not be otherwise employed by the Federal Government; (C) shall be appointed to staggered 4-year terms, as determined by the Secretary; and (D) shall serve not more than 2 consecutive terms.

“(5) CHAIRPERSON.—The Board shall select a member of the Board described in subparagraph (A), (B), or (C) of paragraph (2) to serve as Chairperson of the Board.

“(6) STAFF.—The Board shall employ or contract with 1 or more individuals who are knowledgeable and experienced in quantitative mathematics and actuarial rating to assist the Board in reviewing and approving contracts, policies, and materials with respect to plans of insurance authorized or submitted under section 508."
SEC. 202. OFFICE OF RISK MANAGEMENT.

(a) ESTABLISHMENT.—Section 226A(a) of the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 6933(a)) is amended by striking “independent Office of Risk Management” and inserting “Office of Risk Management,” which shall be under the direction of the Board of Directors of the Federal Crop Insurance Corporation.

(b) FUNCTIONS.—Section 226A(b) of the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 6933(b)) is amended by striking paragraph (1) and inserting the following:

“(1) Assistance to the Board in developing, reviewing, and recommending plans of insurance under section 508(a)(7) of the Federal Crop Insurance Act of 1994 (7 U.S.C. 1508(a)(7)) to ensure that each agricultural commodity (including each new or specialty crop) is adequately served by plans of insurance.”

SEC. 203. OFFICE OF PRIVATE SECTOR PARTNERSHIP.

The Federal Crop Insurance Act is amended by inserting after section 507 (7 U.S.C. 1507) the following:

“SEC. 507A. OFFICE OF PRIVATE SECTOR PARTNERSHIP.

“(a) ESTABLISHMENT.—The Secretary shall establish and maintain in the Department an Office of Private Sector Partnership, which shall be under the direction of the Board.

“(b) FUNCTIONS.—Section 226A(b) of the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 6933(a)) is amended by striking paragraph (6) and inserting the following:

“(6) provide at least monthly reports to the Board on crop insurance issues, which shall be based on comments received from producers, approved insurance providers, and others that the Office considers appropriate;

“(7) review policies and materials with respect to—

“(i) subsidized plans of insurance authorized under section 508; and

“(ii) unsubsidized plans of insurance submitted to the Board under section 508(b); and

“(B) make recommendations to the Board with respect to approval of the policies and materials;

“(C) administer the reinsurance functions described in section 508(k) on behalf of the Corporation;

“(D) review and make recommendations to the Board with respect to methodologies for rating plans of insurance under this title; and

“(E) perform such other functions as the Board considers appropriate.

“(c) ADMINISTRATOR.—The Office shall be headed by an Administrator who shall be appointed by the Secretary.

“(d) STAFF.—The Administrator shall appoint such employees pursuant to title 5, United States Code, as are necessary for the administration of the Office, including employees who have commercial reinsurance and actuarial experience.”

SEC. 204. PENALTIES FOR FALSE INFORMATION.

Section 506(n)(1) of the Federal Crop Insurance Act (7 U.S.C. 1506(n)(1)) is amended—

(1) in subparagraph (A), by inserting “or benefit described in section 1211” after “$10,000”; and

(2) by adding at the end the following:

“(B) perform such other functions as the Board considers appropriate.

“(C) provide at least monthly reports to the Board on crop insurance issues, which shall be based on comments received from producers, approved insurance providers, and others that the Office considers appropriate;

“(D) review policies and materials with respect to—

“(i) subsidized plans of insurance authorized under section 508; and

“(ii) unsubsidized plans of insurance submitted to the Board under section 508(b); and

“(B) make recommendations to the Board with respect to approval of the policies and materials;

“(C) administer the reinsurance functions described in section 508(k) on behalf of the Corporation;

“(D) review and make recommendations to the Board with respect to methodologies for rating plans of insurance under this title; and

“(E) perform such other functions as the Board considers appropriate.

“(c) ADMINISTRATOR.—The Office shall be headed by an Administrator who shall be appointed by the Secretary.

“(d) STAFF.—The Administrator shall appoint such employees pursuant to title 5, United States Code, as are necessary for the administration of the Office, including employees who have commercial reinsurance and actuarial experience.”

SEC. 205. REGULATIONS.

SEC. 206. PROGRAM COMPLIANCE.

Section 506(q) of the Federal Crop Insurance Act (7 U.S.C. 1506(q)) is amended—

(1) by redesignating paragraph (2) as paragraph (6); and

(2) by striking paragraph (1) and inserting the following:

“(1) IN GENERAL.—Not later than 180 days after the date of enactment of the Federal Crop Insurance Act of 1994, the Corporation shall submit to the Board and the Office of Private Sector Partnership for their review the proposed compliance program under this subsection.

“(2) FEES FOR PLANS OF INSURANCE.

SEC. 207. PAYMENTS BY COOPERATIVE ASSOCIATIONS.

Section 507(c) of the Federal Crop Insurance Act (7 U.S.C. 1507(c)) is amended—

(1) by striking “in” and inserting the following:

“(e) COOPERATIVE ASSOCIATIONS.—

“(1) IN GENERAL.—In”; and

(2) by adding at the end the following:

“(2) PAYMENTS.—A cooperative association described in paragraph (1) that is licensed and acts as an agent or approved insurance provider with respect to any plan of insurance offered under this title may provide to the members of the association all or part of any funds received from the Corporation under this title.”

SEC. 208. LIMITATION ON DOUBLE INSURANCE.

Section 507(e) of the Federal Crop Insurance Act (7 U.S.C. 1507(e)) is amended—

(1) by striking “(e) In” and inserting the following:

“(e) COOPERATIVE ASSOCIATIONS.—

“(1) IN GENERAL.—In”; and

(2) by adding at the end the following:

“(2) PAYMENTS.—A cooperative association described in paragraph (1) that is licensed and acts as an agent or approved insurance provider with respect to any plan of insurance offered under this title may provide to the members of the association all or part of any funds received from the Corporation under this title.”

SEC. 209. CONSULTATION WITH STATE COMMITTEES OF FARM SERVICE AGENCY.

Section 508(a) of the Federal Crop Insurance Act (7 U.S.C. 1508(a)) (as amended by section 208) is amended by adding at the end the following:

“(12) CONSULTATION WITH STATE COMMITTEES OF FARM SERVICE AGENCY.—The Corporation shall establish a mechanism under which State committees of the Farm Service Agency are consulted concerning policies of insurance offered in a State under this title.”

SEC. 210. RECORDS AND REPORTING.

(a) CATASTROPHIC RISK PROTECTION.—Section 508(b)(3)(A) of the Federal Crop Insurance Act (7 U.S.C. 1508(b)(3)(A)) is amended by striking “provide, to the extent required by the Corporation,” and inserting “to the extent required by the Corporation, provide to the Secretary, acting through the Farm Service Agency,”.

(b) NONINSURED CROP DISASTER ASSISTANCE PROGRAM.—Section 196(b) of the Agricultural Market Transition Act (7 U.S.C. 7333(b)) is amended—

(1) by striking paragraph (2) and inserting the following:

“(2) RECORDS.—To be eligible for assistance under this section, a producer shall provide annually to the Secretary, acting through the Farm Service Agency, records of crop acreage, acreage yields, and production for each eligible crop.”; and

(2) in paragraph (3), by inserting “annual” after “shall provide”.

SEC. 211. FEES FOR PLANS OF INSURANCE.

Section 508(h)(5) of the Federal Crop Insurance Act (7 U.S.C. 1508(h)(5)) is amended—

(1) by striking “Any policy” and inserting the following:

“(A) IN GENERAL.—Any policy”; and

(2) by adding at the end the following:

“(B) FEES FOR NEW PLANS OF INSURANCE.—

“(i) IN GENERAL.—If an approved insurance provider elects to sell a plan of insurance that was developed by another approved insurance provider after the date of enactment of this subparagraph and the plan of insurance offered coverage that was not available for any crop at the time the plan of insurance was approved by the Board (as determined by the Corporation), the approved insurance provider that developed the plan of insurance shall have the right to receive a fee from the approved insurance provider that elects to sell the plan of insurance.

“(ii) AMOUNT.—

“(A) IN GENERAL.—Subject to subclause (II), the amount of the fee that is payable by an approved insurance provider for a plan of insurance under clause (i) shall be an amount that is—

“(aa) determined by the approved insurance provider that developed the plan; and

“(bb) approved by the Board.

“(B) APPROVAL.—The Board shall not approve a plan of insurance under clause (i) if the amount of the fee unnecessarily inhibits the use of the plan of insurance, as determined by the Board.

“(C) PAYMENTS.—The Corporation shall annually—
May 24, 1999

CONGRESSIONAL RECORD—SENATE

10649

“(1) collect from an approved insurance provider for the policies issued any fees that are payable by the approved insurance provider under subparagraph (B); and
“(ii) credit any fees that are payable to an approved insurance provider under subparagraph (B),”.

SEC. 212. FLEXIBLE SUBSIDY PILOT PROGRAM.

Section 508(h) of the Federal Crop Insurance Act (7 U.S.C. 1508(h)) is amended by adding at the end the following:

“(1) FLEXIBLE SUBSIDY PILOT PROGRAM.—For each of the 2000 through 2002 crop years, the Corporation shall carry out a pilot program under which flexible subsidies are provided under this title to encourage private sector innovation through exclusive marketing rights and premium rate competition."

SEC. 213. REINSURANCE AGREEMENTS.

Section 508(k) of the Federal Crop Insurance Act (7 U.S.C. 1508(k)) is amended—

“(a) in subparagraph (B), by striking the period at the end inserting a semicolon; and
“(b) in subsection (c)(1), by inserting ‘, fees under section 508(h)(5)(B), civil fines under section 508(h)(5)(B),’ after ‘premium income’.”

CRIP INSURANCE EQUITY ACT OF 1999—

Sec. 101.—Prevented Planting. Ensures that producers have the ability to reduce premium cost by giving them the option whether to choose prevented planting coverage for a commodity. Ensures that prevented planting coverage offered under the crop insurance program is equivalent among all commodities. Also amends current ‘black dirt’ requirements allowing producers who are prevented from planting their insured crop to receive the prevented planting indemnity but still plant another, uninsured crop on the same acreage without penalty. Amendment ensures that productive crop land is not idled because of crop insurance requirement.

Sec. 102.—Alternative Rating Methodologies. The preliminary conclusions from a review of current rating methodologies indicates that many of FCIC’s rates and rating procedures are outdated. The bill directs FCIC to develop and implement alternative methodologies for rating insurance plans by September 30, 2000, that takes into account the following: (1) actuarial support for participation in the Federal crop insurance program, and (2) producers that elect to obtain catastrophic coverage. FCIC is also directed to review and make adjustments to methodologies and rates by the 2001 crop year, based on expected future losses (adjusted to correct for adverse selection and old data), program errors and other factors that can cause errors in methodologies and rates. The bill requires FCIC to implement the rating methodologies in a manner that results in the lowest premium payable by producers of a commodity in a particular geographic area. Priority will be given to those commodities with the highest level of participation in buy-up coverage plans.

Sec. 103.—Quality Adjustment. Ensures that quality adjustment coverage is offered as optional coverage.

Sec. 104.—Low-risk producer pilot program. Establishes a pilot program designed to encourage participation in crop insurance by producers who rarely suffer insurable losses. Participating producers would receive a reduction in their premium payable if they incur a yield loss greater than 10%, but not great enough to trigger an indemnity.

Sec. 105.—Catastrophic risk protection. Increases the coverage level for catastrophic coverage to 60% of APH at 70% of the price. Otherwise, the catastrophic coverage underwriting gains and unearned loss adjustment expenses being generated as a result of CAT coverages.

Sec. 106.—Catastrophic coverage. Reduces the fees for loss adjustments with respect to catastrophic coverage.

Sec. 107.—Cost of production plans of insurance. Provides permanent authority for the Federal Crop Insurance Corporation to provide cost of production and revenue insurance coverage.

Sec. 108.—Rebates to cooperatives. The bill requires FCIC to reinstate good experience discounts and to provide rebates to cooperatives who engage in the sale of crop insurance.

Sec. 109.—Adjustment to Subsidy Levels. The bill provides for 50% subsidization of all levels of buy-up coverage.

Sec. 110.—Sales Closing Dates. The bill restores flexibility to FCIC in determining sales closing dates.

Sec. 111.—Assigned Yields. Ensures that beginning farmers or farmers who rent new land or produce new crops will be assigned a fair yield.

Sec. 112.—Actual production history adjustment for disasters. Requires FCIC to adjust APH yields for producers who suffer multi-year disasters by directing FCIC to assign a yield equal to 85% of the county transition yield for any year in which a producer’s yield falls below that 85% level.

Sec. 113.—Payment of Portion of Premium. Prohibits FCIC from subsidizing revenue or price insurance policies.

Sec. 114.—Limitation on Underwriting Gains. The bill limits the amount of underwriting gains companies can make on catastrophic policies to 50 percent of the premium.

TITLE II

Sec. 201.—Board of Directors of Corporation. Expands the board to include 4 producers from 4 regions of the United States, 1 person engaged in the crop insurance business, 1 person engaged in reinsurance, the Undersecretary for Farm and Foreign Agricultural Services, the Undersecretary for Rural Development and the Chief Economist of the Department of Agriculture.

Sec. 202.—Office of Risk Management. Clarifies that the FCIC board of directors shall have direct overall responsibility of RMA.

Sec. 203.—Office of Private Sector Partnership. Establishes the Office of Private Sector Partnership, reporting directly to the FCIC board. The OPSP will have the authority to review and make recommendations on both privately and RMA-developed policies. It will also have the authority to approve reinsurance and review and make recommendations concerning subsidy for new crop policies and, with board concurrence, approve new rating structures.

Sec. 204.—Penalties for false information. Allows anyone convicted of providing false information in connection with any crop insurance claim to be disbarred from all USDA programs.

Sec. 205.—Regulations. Allows certain RMA rulemaking activities to be exempted from the Administrative Procedures Act and other federal statutes.

Sec. 206.—Program Compliance. The bill enhances the compliance authority of FCIC by 1) requiring FCIC to conduct and implement an effective program for monitoring program compliance by all crop insurance participants; and 2) requiring regular oversight of loss adjusters.

Sec. 207.—Payment of rebates to cooperatives. Allowing the payment of rebates to cooperatives who engage in the sale of crop insurance.

Sec. 208.—Limitation on Double Insurance. Prohibits purchasing insurance for two crops on the same acreage in the same state.

Sec. 209.—Consultation with state committees. Requires FCIC to consult with state FSA committees on the feasibility of policies of insurance being offered in their state.

Sec. 210.—Records and reporting. The bill strengthens requirements for accurate recordkeeping and reporting of crop production
by participants and non-participants in crop insurance.

Sec. 211—Fees for plans of insurance. Establishes a system of payment for the sale of policies developed by other companies.

Sec. 212—Subsidy pilot program. Allows for the creation of a flexible subsidy pilot program for the 2000–2002 crop years.

Sec. 213—Reinsurance Agreements. Provides tougher sanctions for agents and reinsured companies that have recurring compliance difficulties, and requires a regular review of the Standard Reinsurance Agreement.

Sec. 214—Funding. Makes necessary adjustments in funding provisions to take into account the establishment of the Office of Private Sector Partnership.

Mrs. LINCOLN. Mr. President, I am pleased to be here today with my colleague from Mississippi, Senator COCHRAN, to introduce the Crop Insurance Equity Act of 1999. We believe this bill makes crop insurance delivery, major component of the existing Federal Crop Insurance Program that are necessary to make crop insurance more workable and affordable for producers across the country.

As we all know, the government’s role in farm programs has changed. The 1996 Farm Bill phased out traditional support for our farmers, and current farm programs require producers to assume more risk than ever before. Due to the Ag economic crisis, there has been much discussion lately on the issue of the “safety net” for our nation’s producers. On that point I would like to be perfectly clear. Crop insurance is a risk management tool to help producers guard against yield loss. It was not created and was never intended to be the end all be all solution for the income needs of our nation’s producers.

As the crop insurance reform debate proceeds, I am hopeful that my colleagues will be cognizant of the various needs in the agriculture community and keep in mind that while the Agricultural Marketing Service, which is a part of the Department of Agriculture, is an important part of the “safety net,” it is not and should not be the only income guard for our nation’s farmers.

Congress has been attempting to eliminate the ad hoc disaster program for years because it is not the most efficient way of helping our farmers who suffer yield losses. Senator Cochran and I have been working over the last few months with individuals involved in crop insurance delivery, major component of the existing Federal Crop Insurance Program. We feel that this legislation takes a significant step toward providing a crop insurance program that is equitable, affordable, and effective.

In response to the outcry we have heard from producers in Arkansas, Mississippi, and across the nation, we have attempted to make the crop insurance program more cost effective for our farmers. In Arkansas, the last estimates I heard indicated that 1% of our cotton producers were participating in the buy-up program this year. Buy-up coverage for all commodities in Arkansas is only available around 12%. That tells me that when producers are home and don’t think that crop insurance is currently providing the kind of help they need. Our bill establishes a process for re-evaluating crop insurance rates for all crops and for lowering those rates if they are not justified. By making the crop insurance program more affordable, additional producers will be encouraged to participate in the program and protect themselves against the unforeseeable factors that will be working against them once they put a crop into the ground.

This legislation directs USDA to establish “good experience” premium discounts for producers who have not filed claims in the last years. This simple-minded policy is based on the idea that if you haven’t had a problem you will have a lower rate. The bill also provides for a more equitable subsidy method by setting the subsidy for crop insurance premiums at a flat rate, regardless of the level of coverage a producer purchases. Current law provides higher levels of federal subsidy to producers who purchase the highest levels of coverage.

In an attempt to improve the record keeping process within USDA, this legislation establishes the Farm Service Agency (FSA) as the central repository for all acreage and yield record keeping. Current USDA record keeping, split between FSA and RMA, is redundant and insufficient. By including both crop insurance program participants and non-program participants in the process, we hope to enhance the agricultural data held by the agency and making market price information less of a hassle for already overburdened producers.

In addition, this bill establishes a role for consultation with state FSA committees and non-program participants in the process. We hope to enhance the agricultural data held by the agency and making market price information less of a hassle for already overburdened producers.

Dear Senators COCHRAN and LINCOLN: On behalf of the American Sugar Cane League of the U.S.A., Inc., which represents the entire sugar cane industry in the state of Louisiana, I offer you our full support for your efforts to improve crop insurance with the introduction of the Crop Insurance Equity Act of 1999. Agriculture in this great country has been in a crisis mode for the last several years and the federal crop insurance program, as it is presently structured, is of limited or no utility to our growers.

In particular, we are pleased with the language which directs the Federal Crop Insurance Corporation (FCIC) to review the rating methodologies, giving high priority to those commodities with the lowest level of participation. Due to the inherent problems with the program, as presently structured, sugar-cane growers in Louisiana have not considered crop insurance an affordable or viable management tool. Again, it is with great enthusiasm that we support this bill which we hope will benefit the entire agricultural community and our industry, and allow us the opportunity to have available to us a viable risk management tool that is affordable.

We appreciate tremendously your initiative with this bill which language seeks to make crop insurance more useful for southern commodities. The Louisiana sugar-cane industry will continue to review the reasons that crop insurance has not worked thus far.
CONGRESSIONAL RECORD—SENATE

May 24, 1999

May 24, 1999

and would like to reserve the option to make additional contributions to you as the process moves forward. Thanks again for taking on a challenge that stands to give American agriculture what the rest of the manufacturing and business community of this country has always had—triable and affordable risk management tool.

Sincerely,

CHARLES J. MELANSON,
President and General Manager.

NATIONAL COTTON COUNCIL OF AMERICA,

May 18, 1999.

Hon. THAD COCHRAN,
Hon. BLANCHE LINCOLN,
U.S. Senate, Washington, DC.

DEAR SENATORS COCHRAN and LINCOLN: On behalf of the National Cotton Council, I would like to convey our sincere appreciation and strong support for your efforts to improve the Federal crop insurance program.

The legislation that you are about to introduce, The Crop Insurance Equity Act of 1999, makes many needed changes to the program, improves compliance, and should increase participation as well.

The profitability crisis we are experiencing in American agriculture and the policy direction we have taken on farm programs has greatly increased the cotton industry’s interest in more sound risk management tools to help weather the tough times. Your legislation takes a very comprehensive approach toward improving the current system. We are especially pleased with your provisions that will result in a reformed rating process, significantly improved record keeping requirements through the Farm Service Agency, equitable prevented planting coverage for all crops, and a streamlined private product approval process.

Finally, we appreciate the efforts of Hunt Shipman and Ben Noble on your staffs who worked tirelessly with the cotton industry to include provisions that would make the program more equitable for all commodities. They are both an asset to your offices.

Thank you again for your efforts and all you do for your cotton industry. We look forward to working with you any way we can to insure passage of your bill.

Sincerely,

RON RAYER,
President, National Cotton Council,
ALLEN HELMS,
Chairman, American Cotton Producers Association.

U.S. RICE FEDERATION,

May 19, 1999.

Hon. BLANCHE LAMBERT LINCOLN,
U.S. Senate, Washington, DC.

DEAR SENATOR LINCOLN: On behalf of the U.S. Rice Federation, which represents producers of over 80 percent of America’s rice crop and virtually all U.S. rice millers, I would like to express our appreciation for the leadership that you and Senator Cochran have provided on the issue of reforming Federal crop insurance. Specifically, we want to express our strong support for the Crop Insurance Equity Act of 1999 which represents a positive comprehensive approach to concerns that U.S. rice producers have had with the existing crop insurance program.

As you probably are aware, most rice producers have traditionally not participated in the Federal crop insurance program because premiums have been viewed as too high relative to the minimal coverage the program offers. During the 1998 crop year, only 43 percent of 3 million acres planted to rice was covered by catastrophic policies while only another 20 percent of the acreage was covered by crop insurance. In general, the low level of participation by U.S. rice farmers has occurred because: CAT coverage offers farmers minimal coverage and buy-up policies are too expensive; ari-yield insurance using actuarial data that is used to calculate premiums have been viewed as too high relative to the minimal coverage the program offers; rice farmers, who traditionally experience relatively low levels of yield variability, want price/revenue protection versus traditional yield coverage. We believe that the Crop Insurance Equity Act begins to seriously address each of these three major issues.

Again, Senator Lincoln, we want to thank you and your staff for working so closely with the USA Rice Federation during the development of this important bill. We are proud to support this bill and look forward to working with you to enact the legislation in 1999.

Sincerely,

A. ELLEN TERRPSTRA,
President and Chief Executive Officer.

THE REDDING FIRM,
331 MASSACHUSETTS AVENUE, N.E., WASHINGTON, DC.

We are very appreciative of Senators Cochran and Lincoln taking the lead on reforming the Federal Crop Insurance Program. Growers in the Southeast want sound product options to a stable program. The Cochran-Lincoln bill moves crop insurance in this direction. Disaster bills do not adequately address the problems growers face in a bad crop year. Crop insurance has to be reformed where growers can plan and address difficult financial times.

SOUTHERN PEAUTY FARMERS FEDERATION,

ALFA FARMERS,
May 18, 1999.

Senator BLANCHE LINCOLN,
Hart Senate Office Building, Washington, DC.

DEAR SENATOR LINCOLN: On behalf of over 398,000 members of the Alabama Farmers and Ranchers Association, we strongly support the introduction of this bill which you and Senator Cochran are introducing titled the Crop Insurance Equity Act of 1999. This crop insurance reform bill goes a long way toward bringing the inequities southern producers face under the current federal crop insurance program. While producers do not want the government to guarantee them a profit, real crop insurance reform is needed to ensure farmers have adequate risk management tools for years when a disaster does occur.

We are pleased that the Crop Insurance Equity Act addresses the so-called “ratings” issue in which southern producers are unfairly penalized by a flawed rating system. As you know, the current 20-year historical actuarial database being used to determine probability of loss and establish premium levels does not accurately reflect real risk (particularly in the Southeast).

In addition, Alabama farmers want increased emphasis on oversight by the federal government and private insurers to prevent fraud. The Federation is pleased that the oversight provisions were included in your bill by making crop insurance more affordable for good farmers and eliminating abuses by the disaster currently享受 it, thereby increasing producer participation.

The Federation is also pleased to note that your bill restores the provision in law that enables producers with good experience to receive premium discounts, as well as eliminating “black dirt” and replant provisions which have unfairly penalized cotton growers in the current Federal crop insurance program.

Furthermore, it is important to note that premium subsidies are shifted to the higher levels of coverage in your bill, as well as recognizing that your provision for the multiple year disaster remedies the problems that producers who experience multiple years of disaster currently face. These provisions should make higher coverage more affordable, as well as encourage greater producer participation.

Again, thank you and Senator Cochran for your leadership for southern agriculture, and we look forward to working toward a reasonable crop insurance program that is truly a risk management tool for producers of all areas of the country.

Sincerely,

G. KIETH GRAY, Director, National Affairs.

By Mr. McCONNELL (for himself, Mr. SMITH of New Hampshire, Mr. KOHL, Mr. FRIST, Mr. GREGG, Mr. JOHNSON, Mr. WARNER, Mr. CLELAND, Mr. SCHUMER, Mr. JEFFORDS, Mr. AKAKA, Mrs. FEINSTEIN, Mr. ENZI, Mr. ROBB, Mr. GRAMS, Mrs. BOXER, Mr. LUGAR, Ms. LANDRIEU, Mr. COCHRAN, Mrs. MURRAY, Mr. INHOFE, Mr. MACK, Mr. TORRICELLI, Mr. BINGAMAN, Mr. THOMAS, Mr. LEAHY, Mr. CAMPBELL, Mr. KENNEDY, Mr. HELMS, Mr. DURBIN, Mr. SANTORUM, Mr. LATENBERG, Mr. BUNNING, Mr. MOYNIHAN, Mr. LIBERMAN, Mr. GRAHAM, Mr. REID, Mr. LEVIN, and Mr. LIEBERMAN):

S. 1109. A bill to conserve global bear populations by prohibiting the importation, exportation, and interstate trade of bear viscera and items, products, or substances containing, or labeled or advertised as containing, bear viscera, and for other purposes; to the Committee on Environment and Public Works.

THE BEAR PROTECTION ACT

Mr. McCONNELL. Mr. President, I rise today to introduce the Bear Protection Act. This legislation, which I sponsored in the 105th Congress, is aimed at eliminating the poaching of America’s bears for profit. As you may know, bear parts, such as gall bladders and bile, which are commonly referred to as visceras, have traditionally been used in myriad Asian medicines—for everything from diabetes to heart disease to hangovers, and in luxury shampoos and cosmetics. Due to the popularity of these products containing bear viscera, Asian bear populations have been decimated, causing poachers to run to American bears to meet the increasing demand.

Mr. President, the practice of poaching bears for viscera is both a national and international problem. Asian and American bear populations are threatened by high demand for and low supply of bear parts and by the black market trade in exotic and traditional medicinal bear products. These products are believed to be endowed with mystical properties and can be used to increase energy and virility, rejuvenate health, and cure a variety of ailments, including anxiety, depression, and tuberculosis. As a result of the bear’s reputation as a powerful animal and the use of its parts in traditional Asian and American medicine, the bear has become one of the most hunted and endangered species on Earth.
Mr. President, as these and other news reports will attest, this problem with poaching and trading bear parts must be addressed. Although many States and the U.S. Fish and Wildlife Service are making efforts to combat this problem, these agencies have neither the funds nor the resources to adequately solve the problem. Moreover, there are loopholes created by a patchwork of State laws that allow these illegal practices to flourish. There are fourteen States in which the sale of bear gall bladders is legal, and eight of those States limit the sale to viscera taken from bears in other States, and there are five States that have no law in this regard. This patchwork of State laws enables poachers to “laundry” the gall through the States that permit the sale of gall bladders. As long as a few States allow this action to go on, poaching for profit will continue.

Mr. President, as I mentioned earlier, this is both a national and international problem, and it is a growing problem. The Convention on International Trade in Endangered Species (CITES), to which the United States is a party, has recognized the issue of bear conservation as a global issue. In fact, CITES has noted that “the continued illegal trade is bear parts and derivatives undermines the effectiveness of the Convention and that if CITES parties... do not take action to eliminate such trade, poaching may cause declines of wild bears that could lead to the extirpation of certain populations or even species.” The Convention goes on to say that in order to achieve this goal, “submitted and measurable action” must be taken—this includes adopting national legislation.

I would like to point out that members of the U.S. delegation to the CITES Convention contributed to the drafting of that resolution, and in doing so, made a strong statement about the need to strengthen our national policy in dealing with poaching of bears. Recently, the Secretariat pointed out that bear poaching is most likely to flourish in countries that have inconsistent internal trade, import, and export controls. In such instances where there are differences in national, Federal, and State laws, the Secretariat asserts that confusion and enforcement difficulties arise which will contribute to the availability of bear viscera that can become available for international trade.

Mr. President, in order to halt the poaching of America’s bears, we need to enact legislation that not only prohibits the import and export of bear viscera, but we need to close the loopholes in State laws that encourage poachers to evade the law. To effectively reduce the laudering of bear viscera through the United States, all States must have a minimum level of protection. We must also stop the import and export of bear viscera, so that we can reduce illegal international trade before America’s bear populations suffer the same fate as Asian bear populations.

The Bear Protection Act will do just that. It will establish national guidelines for trade in bear parts, but will not weaken any existing State laws that have been instituted to deal with this issue. The outright ban on the trade, sale or barter of bear viscera, including items that claim to contain bear parts, will close the existing loopholes and will allow State and Federal wildlife officials to focus their limited resources on much needed conservation efforts.

Mr. President, let me underscore that my bill would in no way infringe on the rights of hunters to legally hunt bears. These sportsmen will still be allowed to keep trophies and furs of bears killed during legal hunts. The Bear Protection Act will also bolster existing efforts to curtail the international bear trade by directing the Secretaries of the Interior and State, as well as the United States Trade Representative to establish a dialogue with the counties that share our interest in conserving bear species. This too, is an important component of the legislation because I believe efforts to both reduce the demand for bear parts in Asia and encourage the increased usage of synthetic and other natural products as an alternative to bear gall should be made a priority.

Mr. President, it is important that we act now to protect the American bear population. The United States must take a stand and be an example to the rest of the world by prohibiting the illegal taking and smuggling of American bears. If we act now, we can stop the poaching of bears, which left unchecked, will lead us down a path toward these magnificent creatures’ extinction. That is why I urge my colleagues to join me in support of this worthwhile legislation.

Mr. President, I ask that the full text of my legislation and additional materials to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1109

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Bear Protection Act of 1999.”

SEC. 2. FINDINGS.

Congress finds that—

(1) all 8 extant species of bear—Asian black bear, brown bear, polar bear, American black bear, spectacled bear, giant panda, sun bear, and sloth bear—are listed on Appendix I or II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (27 UST 1087; TIAS 8249) (referred to in this section as “CITES”);

(2) Article XIV of CITES provides that Parties to CITES may adopt stricter domestic measures regarding the conditions for trade, taking, possession, or transport of species on Appendix I or II, and the Parties to CITES adopted a resolution (Conf. 10.8) urging Parties to take immediate action to demonstrably reduce the illegal trade in bear parts and derivatives;

(3) the Asian bear populations have declined significantly in recent years, as a result of habitat loss and poaching due to a strong demand for bear viscera used in traditional medicines and cosmetics;

(4) Federal and State undercover operations have revealed that American bears have been poached for their viscera;

(5) while most American black bear populations are generally stable or increasing, commercial trade could stimulate poaching and threaten certain populations if the demand for bear viscera increases; and

(6) prohibitions against the importation into the United States and exportation from the United States, as well as prohibitions against the interstate trade in bear viscera and products containing, or labeled or advertised as containing, bear viscera will assist in ensuring that the United States does not contribute to the decline of the bear population as a result of the commercial trade in bear viscera.

SEC. 3. PURPOSES.

The purpose of this Act is to ensure the long-term viability of the world’s 8 bear species by—
SEC. 4. DEFINITIONS.

In this Act:

(1) BEAR VISCERA.—The term “bear viscera” means the body fluids or internal organs, including the gallbladder and its contents but not including blood or brains, of a species of bear.

(2) IMPORT.—The term “import” means to land on, bring into, or introduce into any place subject to the jurisdiction of the United States, whether or not the landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(3) PERSON.—The term “person” means:

(A) any individual, body corporate, partnership, trust, estate, or association, or any other private entity;

(B) an officer, employee, agent, department, or instrumentality of—

(i) the Executive Branch;

(ii) any State, municipality, or political subdivision of a State; or

(iii) any foreign government;

(C) a State, municipality, or political subdivision of a State; and

(D) any other entity subject to the jurisdiction of the United States.

(4) SECRETARY.—The term “Secretary” means the Secretary of the Interior.

(5) STATE.—The term “State” means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, American Samoa, and any other territory, commonwealth, or possession of the United States.

(6) TRANSPORT.—The term “transport” means to move, convey, or ship by any means, or to deliver or receive for the purpose of movement, conveyance, carriage, or shipment.

SEC. 5. PROHIBITED ACTS.

(a) IN GENERAL.—Except as provided in subsection (b) this section shall not—

(1) import into, or export from, the United States bear viscera or any product, item, or substance containing, or labeled or advertised as containing, bear viscera;

(2) sell or barter, offer to sell or barter, purchase, possess, transport, deliver, or receive, in interstate or foreign commerce, bear viscera or any product, item, or substance containing, or labeled or advertised as containing, bear viscera;

(b) EXCEPTION FOR WILDLIFE LAW ENFORCEMENT PURPOSES.—A person described in subparagraph (B) or (C) of section 4(3) may import into, or export from, the United States, or transport between States, bear viscera or any product, item, or substance containing, or labeled or advertised as containing, bear viscera if the importation, exportation, or transportation is for wildlife law enforcement purposes;

(2) is authorized by a valid permit issued under Appendix I or II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (27 UST 1087; TIAS 8249), in any case in which such a permit is required.

SEC. 6. PENALTIES AND ENFORCEMENT.

(a) CRIMINAL PENALTIES.—A person that knowingly violates section 5 shall be fined under title 18, United States Code, imprisoned not more than 5 years, or both.

(b) CIVIL PENALTIES.—

(1) AMOUNT.—A person that knowingly violates section 5 may be assessed a civil penalty by the Secretary of not more than $25,000 for each violation.

(2) MANNER OF ASSESSMENT AND COLLECTION.—A civil penalty under this subsection shall be assessed, and may be collected, in the manner in which a civil penalty under the Endangered Species Act of 1973 may be assessed and collected under section 11(a) of that Act and regulations as are necessary to carry out this section.

(c) PRODUCTS, ITEMS, AND SUBSTANCES.—Any bear viscera, or any product, item, or substance sold, imported, or exported, or attempted to be sold, imported, or exported, in violation of this section (including any regulation issued under this section) shall be seized and forfeited to the United States.

(d) REGULATIONS.—After consultation with the Secretary of the Treasury, the Secretary of Health and Human Services, and the United States Trade Representative, the Secretary shall issue such regulations as are necessary to carry out this Act.

SEC. 7. DISCUSSIONS CONCERNING TRADE PRACTICES.

The Secretary and the Secretary of State shall discuss issues involving trade in bear viscera with the appropriate representatives of countries trading with the United States that are determined by the Secretary and the United States Trade Representative to be the key importers of, or consumers of bear viscera, and attempt to establish coordinated efforts with the countries to protect bears.

SEC. 8. REPORT.

Not later than 1 year after the date of enactment of this Act, the Secretary, in cooperation with appropriate State agencies, shall submit a report on all submissions on behalf of the Executive Office of the President on Environment and Public Works of the Senate and the Committee on Resources of the House of Representatives a report detailing the progress of efforts to end the illegal trade in bear viscera.

[From the Virginia Department of Game and Island Fisheries, Jan. 18, 1999]

JOINT EFFORT TACKLES POACHERS, ILLEGAL BEAR TRADE

LURAY, VIRGINIA.—Earlier today, nearly 110 state and federal officers arrested 25 defendants charged with 112 wildlife violations, and executed 14 search warrants as part of Operation SOUP, or "Special Operation to Uncover Poaching." Operation SOUP is a major, on-going, undercover investigation into illegal hunting and commercialization of American black bears in Virginia and Shenandoah National Park. This three-year investigation has been a joint operation of the Virginia Department of Game and Inland Fisheries, the Virginia Department of Conservation and Recreation, the Virginia Department of the Environment, the Shenandoah National Park, and the U.S. Fish & Wildlife Service. Much of the investigation has been concentrated in the Blue Ridge region of Virginia. According to its commander, Operation SOUP is expected to yield one of the largest prosecutions in the nation's history for crimes relating to bear poaching and illegal trade in bear parts.

Operation SOUP utilizes a three-pronged approach to combat this criminal activity. The first has targeted the sale of bear parts, mostly claws and teeth, for use in the jewelry trade. Sales of intact bear paws used to make ashtrays and other trinkets also fall into this category. This investigation has confirmed that in Virginia there is active trade in bear parts used for jewelry. Independent of yesterday's arrests, over the last eight months 12 individuals have been arrested and charged with 94 counts of buying or selling bear parts in violation of state law.

The second prong of Operation SOUP has targeted trafficking of gall bladders and frozen bear paws. This aspect of the investigation has confirmed that significant trade in gall bladders and bear paws exists, including from bears within and around Shenandoah National Park.

To further this portion of the investigation, federal search warrants were executed in Madison and Rappahannock Counties in Virginia, and near Petersburg, West...
Virginia. They were issued on a combination of home and vehicles, and were five vehicles, several freezers, and an assortment of bear parts, firearms, and cash. Federal felony indictments may be forthcoming in the delivering weeks and months ahead. These operations take place in Roanoke and stretching to the outer portions of the city, including an illegal wildlife ring.

The third prong of Operation SOUP has targeted the poachers themselves. These individuals are associated with specific groups that are engaged in the illegal trade of bear parts. Over the course of the investigation, it is estimated that thousands of dollars were seized, and the international value of these parts is greater than $3 million.

At the heart of Operation SOUP are concerns about an international problem that has a foothold in Virginia. The bear gall bladder trade is a worldwide industry driven by the demand for traditional Asian medicine. Many people from Asian cultures believe bear parts, particularly the gall bladder, have medicinal value for treating and preventing a variety of ailments. A single gall bladder can be sold at auction overseas for thousands of dollars. Dried, ground, and sold by the gram, bear gall bladders have a street value greater than cocaine. In this operation, 300 gall bladders were purchased or seized with an estimated U.S. value of $75,000.

Bear paws also have high commercial value. Bear paws are purchased as an ingredient in Bear Paw Soup, considered a delicacy in some Asian cultures. A single bowl of this soup can sell for hundreds of dollars in the U.S. and thousands of dollars in Asia. No charges have been filed against Presgraves, but the inquiry continues as to whether the Baldwins are involved in illegal trade.

As bear populations dwindle in other parts of the world, victims of excessive hunting and disappearing habitats—poaching has become increasingly lucrative in North America, where an estimated 400,000 bears live. Each year, hundreds of bear carcasses turn up, intact except for missing gall bladders, and their teeth and paws, according to testimony given to Congress.

Gall bladders and the green bile they store are prized in Asia, where they are used in medicine to treat a variety of ailments, including heart disease and hangovers. Bear paws are considered a delicacy in some Asian cultures and are sold—often in restaurants for as much as $90 a bowl. Investigators say, “People are willing to pay any amount of money for a bear product. They are not particular. It’s all right. If it’s good, you take it.”

In Virginia, hunters legally kill 600 to 900 bears each hunting season. Officials say it is unclear how many more of the population is being harvested. While bear hunting is legal in Virginia, it is illegal as, in most states, to sell the animal’s body parts—including gall bladders, heads, hides, claws or teeth. Bear hunting is not permitted in Maryland. Last year, Congressman considere, did not pass, legislation aimed at halting the trade in bear organs.

In Virginia, hunters legally kill 600 to 900 bears each hunting season. Officials say it is unclear how many more of the population is being harvested. While bear hunting is legal in Virginia, it is illegal as, in most states, to sell the animal’s body parts—including gall bladders, heads, hides, claws or teeth. Bear hunting is not permitted in Maryland. Last year, Congress considered, but did not pass, legislation aimed at halting the trade in bear organs.

that legal trade does not provide a conduit for illegal trade in parts and derivatives of Appendix I bears and to increase public awareness of CITES trade controls; (b) encouraging bear range and consumer countries that are not party to CITES to accede to the Convention as a matter of urgency; (c) providing funds for research on the status of endangered bears, especially Asian species; (d) working with traditional-medicine communities to reduce demand for bear parts and derivatives, including the active promotion of research on and use of alternatives and substitutes that do not endanger other wild species; and (e) developing programmes in co-operation with traditional-medicine communities and conservation organizations to increase public awareness and industry knowledge about the conservation concerns associated with the trade in bear specimens and the need for stronger domestic trade controls and conservation measures.

Calls upon all governments and intergovernmental organizations, international aid agencies and non-governmental organizations to work as a matter of urgency, funds and other assistance to stop the illegal trade in bear parts and derivatives and to ensure the survival of all bear species.

By Mr. LOTT: S. 1110. A bill to amend the Public Health Service Act to establish the National Institute of Biomedical Imaging and Engineering and Exercise; to the Committee on Health, Education, Labor, and Pensions.

NATIONAL INSTITUTE OF BIOMEDICAL IMAGING AND ENGINEERING ESTABLISHMENT ACT

Mr. LOTT. Mr. President, I am pleased to introduce today the National Institute of Biomedical Imaging and Engineering Establishment Act. The bill will create a concentrated focus at the National Institutes of Health (NIH) on biomedical imaging and bioengineering.

Imaging has been on the forefront of many of our advances in early diagnosis and treatment of disease. Innovative technologies have greatly reduced the need for invasive surgery and provided remarkable tool for easy detection of disease. Breakthroughs in imaging research have direct application to advances in molecular biology and molecular genetics, accelerating the development of new gene therapies and genetic screening.

Despite the revolutionary influence of imaging on both research and treatment, the NIH traditionally has not concentrated basic research efforts on the imaging sciences. The bill I am introducing today ensures that research is not being conducted in this important field, but that its applications are disseminated across disease fields. The bill also encourages information sharing among federal agencies. Many agencies, such as NASA, do basic imaging research. We should be committed to ensuring that all advances that have applications in our fight against disease are shared with our medical community.

I am proud of the commitment that this Congress has made to the National Institutes of Health (NIH). They have demonstrated our determination to provide increased federal resources in the fight against disease. I believe that the establishment of a National Institute of Biomedical Imaging and Engineering will compliment those efforts.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1110

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be cited as the “National Institute of Biomedical Imaging and Engineering Establishment Act”.

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) Basic research in imaging, bioengineering, computer science, informatics, and related fields is essential to improving health care but is fundamentally different from the research in molecular biology on which the current national research institutes at the National Institutes of Health (referred to in this section as the “NIH”) are based. To ensure the development of new techniques and technologies for the 21st century, these disciplines therefore require an identity and research home within the NIH that is independent of the existing institute structure.

(2) Advances based on medical research promise new, more effective treatments for a wide variety of diseases, but the development of new, noninvasive imaging techniques for earlier detection and diagnosis of disease is essential to take full advantage of such new treatments and to promote the general improvement of health care.

(3) The development of advanced genetic and molecular imaging techniques is necessary to continue the rapid pace of discovery in molecular biology.

(4) Advances in radiology, imaging, and bioengineering, in particular, are increasingly important in the delivery of high quality, reliable medical care to rural citizens and other underserved populations. To fulfill the promise of telemedicine and related technologies fully, a structure is needed at the NIH to support basic research focused on the acquisition, transmission, processing, and optimal display of images.

(5) A number of Federal departments and agencies support imaging and engineering research, with potential medical applications, but a central coordinating body, preferably housed at the NIH, is needed to coordinate these disparate efforts and facilitate the transfer of technologies with medical applications.

(6) Several breakthrough imaging techniques, including magnetic resonance imaging (MRI) and computed tomography (CT), have been developed primarily abroad, in large part because of the absence of a home at the NIH for basic research in imaging and related fields. To create a central focus for imaging and bioengineering research at the NIH would promote both scientific advance and U.S. economic development.

(7) At a time when a consensus exists to add significant resources to the NIH in coming years, it is appropriate to modernize the structure of the NIH to ensure that research dollars are expended more effectively and efficiently and that the fields of medical science that have contributed the most to the detection, diagnosis, and treatment of disease in recent years receive appropriate emphasis.

(8) The establishment of a National Institute of Biomedical Imaging and Engineering at the NIH would accelerate the development of new technologies with clinical and research applications, improve coordination and efficiency at the NIH, and aid the Federal Government, reduce duplication and waste, lay the foundation for a new medical information age, promote economic development, and support a structure to train the young researchers who will make the path-breaking discoveries of the next century.

SEC. 3. ESTABLISHMENT OF NATIONAL INSTITUTE OF BIOMEDICAL IMAGING AND ENGINEERING.

(a) IN GENERAL.—Part C of title IV of the Public Health Service Act (42 U.S.C. 265 et seq.) is amended by adding at the end the following:

“SEC. 461Z. PURPOSE OF THE INSTITUTE.

“(a) IN GENERAL.—The general purpose of the National Institute of Biomedical Imaging and Engineering (in this section referred to as the ‘Institute’) is the conduct and support of research, training, the dissemination of health information, and other programs with respect to biomedical imaging, bioengineering, and associated technologies and modalities with biomedical applications (in this section referred to as ‘biomedical imaging and engineering’).

“(b) NATIONAL BIOMEDICAL IMAGING AND ENGINEERING PROGRAM.—

“(1) ESTABLISHMENT.—The Director of the Institute, with the advice of the Institute’s advisory council, shall establish a National Biomedical Imaging and Engineering Program (in this section referred to as the ‘Program’).

“(2) ACTIVITIES.—Activities under the Program shall include the following with respect to biomedical imaging and engineering:

“(A) Research into the development of new techniques and devices.

“(B) Related research in physics, engineering, mathematics, computer science, and other disciplines.

“(C) Technology assessments and outcomes studies to evaluate the effectiveness of biologics, materials, processes, devices, procedures, and informatics.

“(D) Research in screening for diseases and disorders.

“(E) The advancement of existing imaging and engineering modalities, including imaging, biomaterials, and informatics.

“(F) The development of target-specific agents to enhance images and to identify and delineate disease.

“(G) The development of advanced engineering and imaging technologies and techniques for research from the molecular and genetic to the whole organ and body levels.

“(H) The development of new techniques and devices for more effective interventional procedures (such as image-guided interventions).

“(I) PLAN.—

“(A) IN GENERAL.—With respect to the Program, the Director of the Institute shall prepare and transmit to the Secretary and the Director of NIH a phase, expand, intensify, and coordinate activities of the Institute with respect to biomedical imaging

May 24, 1999

CONGRESSIONAL RECORD—SENATE 10655
and engineering. The plan shall include such recommendations as the Director of the Institute determines appropriate. The Director of the Institute shall periodically review and revise the plan and shall submit to the Secretary of the plan to the Secretary and the Director of NIH.

"(B) RECOMMENDATIONS.—The plan under subparagraph (A) shall include the recommendations of the Director of the Institute with respect to the following:

"(i) Where appropriate, the consolidation of programs of the National Institutes of Health with other agencies of the National Institutes of Health (referred to in this subsection (a), the National Science Foundation, the Centers for Disease Control and Prevention, and the Director of the National Institutes of Health with related activities of other Federal agencies.

"(c) ADVISORY COUNCIL.—The establishment under section 406 of an advisory council for the Institute is subject to the following:

"(1) The number of members appointed by the Secretary shall be 12.

"(2) Of such members:

"(A) at least five shall be scientists, engineers, physicians, and other health professionals who represent disciplines in biomedical imaging and engineering and who are not officers or employees of the United States; and

"(B) six shall be scientists, engineers, physicians, and other health professionals who represent other disciplines and are knowledgeable about the applications of biomedical imaging and engineering in medicine, who are not officers or employees of the United States.

"(3) EX OFFICIO MEMBERS.—In addition to the ex officio members specified in section 406(b)(1), the ex officio members of the advisory council shall include the Director of the Centers for Disease Control and Prevention, the Director of the National Science Foundation, and the Director of the National Institute of Standards and Technology (or the designees of such officers).

"(d) AUTHORIZATION OF APPROPRIATIONS.—

"(1) Subject to paragraph (2), for the purpose of carrying out this section:

"(A) For fiscal year 2000, there is authorized to be appropriated an amount equal to the amount pursuant to the Public Health Service Act and to focus national attention on the biomedical imaging and engineering.

"(B) For each of the fiscal years 2001 and 2002, there is authorized to be appropriated an amount equal to the amount appropriated under subparagraph (A) for fiscal year 2000, except that such amount shall be adjusted for the fiscal year involved to offset any inflation occurring after October 1, 1999.

"(2) Repeal.—The authorization of appropriations for a fiscal year under paragraph (1) is hereby reduced by the amount of any appropriation made for such year for the conduct of the activities by any other national research institute of any program with respect to biomedical imaging and engineering.

(b) RESOURCES.—In providing for the establishment of the National Institute of Biomedical Imaging and Engineering pursuant to the amendment made by subsection (a), the Secretary may transfer to the National Institute of Biomedical Imaging and Engineering:

"(1) may, for quarters for such Institute, utilize such personnel of the NIH as the Director determines to be appropriate; and

"(2) may, for quarters for such Institute, utilize such personnel of the NIH as the Director determines to be appropriate; and

"(3) may obtain administrative support for the Institute from the other agencies of the NIH, including the other national research institutes.

(c) CONSTRUCTION OF FACILITIES.—None of the provisions of this Act or the amendments made by the Act may be construed as authorizing the construction of facilities, or the acquisition of land, for purposes of the establishment or operation of the National Institute of Biomedical Imaging and Engineering.

(d) DATES CERTAIN FOR ESTABLISHMENT OF ADVISORY COUNCIL.—Not later than 90 days after the effective date of this Act, the Secretary of Health and Human Services shall complete the establishment of an advisory council for the National Institute of Biomedical Imaging and Engineering in accordance with section 406 of the Public Health Service Act and in accordance with section 464Z of such Act (as added by subsection (a) of this section).

(e) CONFIRMING AMENDMENT.—Section 401(b)(1) of the Public Health Service Act (42 U.S.C. 281(b)(1)) is amended by adding at the end the following:

"(B) The National Institute of Biomedical Imaging and Engineering;'.

SEC. 4. EFFECTIVE DATE.

This Act shall take effect on October 1, 1999, or upon the date of the enactment of this Act, whichever occurs later.

By Mr. BOND:

S. 1111. A bill to provide continuing authorization for a National Conference on Small Business, and for other purposes; to the Committee on Small Business.

NATIONAL CONFERENCE ON SMALL BUSINESS ACT

Mr. BOND. Mr. President, it is with great pleasure that I am introducing the “National Conference on Small Business Act.” This bill is designed to create a permanent independent commission that will carry-on the extraordinary work that has been accomplished by three White House Conferences.

For the past 15 years, small businesses have been the fastest growing sector of the U.S. economy. When large businesses were restructuring and laying off significant numbers of workers, small businesses not only filled the gap, but their growth actually caused a net increase in new jobs. Today, small businesses employ 55% of all workers in the United States and they generate 50% of the gross domestic product.

Were it not for small businesses, our sustained economic upsurge that has been ongoing since 1992.

The President will name a delegate and alternate represent a President and each U.S. Senator name a small business delegate to develop and conduct or support by any other national research institute of any program with respect to biomedical imaging and engineering.

(b) RESOURCES.—In providing for the establishment of the National Institute of Biomedical Imaging and Engineering pursuant to the amendment made by subsection (a), the Director of the National Institutes of Health (referred to in this subsection as the “NIH”)—

(1) may transfer to the National Institute of Biomedical Imaging and Engineering such personnel of the NIH as the Director determines to be appropriate;
CONGRESSIONAL RECORD—SENATE

SEC. 2. DEFINITIONS.

SEC. 3. NATIONAL AND STATE CONFERENCES ON SMALL BUSINESS.

SEC. 4. PURPOSES OF NATIONAL CONFERENCES.

SEC. 5. CONFERENCE PARTICIPANTS.

SEC. 6. NATIONAL COMMISSION ON SMALL BUSINESS.

level by the small business delegates will need to be thorough and thoughtful to make the National Conference a success.

My goal will be for the small business delegates to think broadly, that is, to think "out of the box." Their attention should include but not be restricted to the traditional issues associated with small business concerns, such as access to capital, tax reform and regulatory reform. In my role as Chairman of the Committee on Small Business, I will urge the delegates to focus on a wide array of issues that impact significantly on small businesses, including the importance of a solid education and the need for skilled, trained workers.

Once the small business delegates are selected, the National Commission on Small Business will serve as a resource to the delegates for issue development and for planning the State Conferences. The National Commission will have a modest staff, including an Executive Director, that will work full time to make the State and National Conferences a major resource to the National Commission and its staff will be the Chief Counsel for Advocacy from SBA. The Chief Counsel and the Office of Advocacy will serve as a major resource to the National Commission, and in turn, to the small business delegates, by providing them with both substantive background information and other administrative materials in support of the State and National Conferences.

Mr. President, small businesses generally do not have the resources to maintain full time representatives to lobby our Federal government. They are too busy running their businesses to devote much attention to educating government as to what is going well, what is going poorly, and what needs improvement for the small business community. The National Conference on Small Business will give small businesses an opportunity every four years to make its mark on the Congress and the Executive Branch. I urge each of my colleagues to review this proposal, and I hope they will agree to join me as cosponsors of the "National Conference on Small Business Act."

I ask unanimous consent that the full text of the bill and the section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. SHORT TITLE.

This Act may be cited as the "National Conference on Small Business Act."
issue of small business and the purposes of this Act.

(3) TIME OF APPOINTMENT.—The appointments required by paragraph (1) shall be made 1 year before the opening date of each National Conference, and shall expire 9 months thereafter. The date of such each National Conference is convoked.

(c) ELICTION OF CHAIRPERSON.—At the first meeting of each National Commission, a majority of the members of the National Commission present and voting shall elect the Chairperson of the National Commission.

(d) VACANCIES.—The National Commission—

(1) may enter into contracts with public agencies, private organizations, and academic institutions to carry out this Act;

(2) shall consult, coordinate, and contract with an independent, nonpartisan organization that—

(A) has both substantive and logistical experience in developing and organizing conferences and forums throughout the Nation with elected officials and other government and business leaders;

(B) has experience in generating private resource from multiple States in the form of event sponsorships; and

(C) has national evidence of a working relationship with Members of Congress from the majority and minority parties, and at least 1 Federal agency; and

(3) shall prepare and implement financial controls and accounting procedures as needed for the handling of funds from fees and charges and the payment of authorized meals, travel, and other related expenses.

(e) PLANNING AND ADMINISTRATION OF CONFERENCES.—In carrying out the National and State Conferences required by this Act, the National Commission shall consult with the Office of Advocacy of the Small Business Administration, the Congress, and such other Federal agencies as it deems appropriate.

(f) REPORTS REQUIRED.—Not later than 6 months after the date on which each National Conference is convened, the National Commission shall submit to the President and to the chairpersons and ranking minority Members of the Committees on Small Business of the Senate and the House of Representatives a final report, which shall—

(1) include the findings and recommendations of the National Conference and any proposals for legislative action necessary to implement those recommendations; and

(2) be made available to the public.

(g) QUORUM.—A quorum of the National Commission shall constitute a quorum for purposes of transacting business.

(h) MEETINGS.—The National Commission shall meet not later than 30 calendar days after the appointment of all members, and at least every 30 calendar days thereafter.

(i) VACANCIES.—Any vacancy of the National Commission shall not affect its powers, but shall be filled in the manner in which the original appointment was made.

(j) EXECUTIVE DIRECTOR AND STAFF.—The National Commission may appoint and compensate an Executive Director and such other personnel to conduct the National and State Conferences to the extent that it may deem advisable, without regard to title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 3 of part II of subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates, except that the rate of pay for the Executive Director and other personnel of the National Commission shall be at the rate payable for level V of the Executive Schedule under section 5318 of such title.

(k) FUNDS.—Members of the National Commission shall be allowed expenses, including per diem in lieu of subsistence at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the National Commission.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS; AVAILABILITY OF FUNDS.

(a) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this Act—

(B) $5,000,000, which shall remain available until expended.

(c) ELECTION OF CHAIRPERSON.—At the first meeting of each National Commission required by this Act, the Chairperson shall be elected by the majority and minority parties, and at least 1 congressional conference on Small Business; and

(d) PLANNING AND ADMINISTRATION OF CONFERENCES.—The National Commission shall—

(1) include the findings and recommendations of the National Conference on Small Business and National Conferences.

Section 2. Definitions.

This section defines key words and terms included in the bill.

Section 3. National And State Conferences on Small Business.

This section states that a National Conference on Small Business will occur every four years during the second year after a presidential election. Prior to the National Conference, there will be State Conferences for the delegates in each State.

Section 4. Purposes of National Conferences.

This section sets forth the reasons for having a National Conference on Small Business.

Section 5. Conference Participants.

Subsection (a) directs the National Commission to conduct National and State Conferences to bring together individuals interested in issues affecting small businesses.

Subsection (b) sets forth the procedures for selecting delegates to the State and National Conferences.

Subsection (c) provides for the appointment of a delegate and an alternate from each relevant organization to act on behalf of the small businesses that it represents.

Subsection (a) directs the establishment of a National Commission on Small Business.

Subsection (b) defines the membership of the National Commission. It will include the SBA Chief Counsel for Advocacy, 2 members appointed by the President, 3 members from the Senate (2 majority, 1 minority), and 3 members from the House of Representatives (2 majority, 1 minority). The appointments will be made 1 year before the opening date of the National Conference and will expire 9 months thereafter.

Subsection (c) sets forth the election of a Chairperson.

Subsection (d) permits the National Commission to enter into contracts with public agencies, private organizations, academic institutions, and independent, nonpartisan organizations to carry out the State and National Conferences.

Subsection (e) directs the National Commission to consult with the Office of Advocacy at SBA, Congress, and Federal agencies in carrying out the State and National Conferences.

Subsection (f) requires that the National Commission submit reports to the Chairmen and Ranking minority Members of the Senate and House Committees on Small Business within 6 months after the conclusion of the National Conference.

Subsection (g) establishes a quorum of 4 members of the National Commission for purposes of transacting business.

Subsection (h) requires the National Commission to hold its first meeting within 20 days after the appointment of all members and at least every 30 days thereafter.

Subsection (i) states that vacancies on the National Commission will be filled in the same manner as the original appointments were made.

Subsection (j) authorizes the National Commission to hire an Executive Director and the staff necessary to conduct the State and National Conferences.

Subsection (k) authorizes the National Commission to reimburse its members for travel expenses, including per diem.

Section 7. Authorization of Appropriations; Availability of Funds.

This section authorizes $5 million to cover all expense incurred under this Act. It states that any funds from SBA may not support the Act unless specifically earmarked for that purpose.

By Mrs. BOXER (for herself and Mr. LAUTENBERG):

S. 1112. A bill to protect children and other vulnerable subpopulations from exposure to environmental pollutants, to protect children from exposure to pesticides in schools, and to provide parents with information on the dangers posed by toxic chemicals that pose risks to children, and for other purposes; to the Committee on Environment and Public Works.

CHILDREN’S ENVIRONMENTAL PROTECTION ACT

Mrs. BOXER. Mr. President, today I am pleased to introduce legislation to protect children from the dangers posed by pollution and toxic chemicals in our environment. My Children’s Environmental Protection Act (CEPA) is based on the understanding that children are more vulnerable to those dangers than adults, and require special protection.

In fact, we know that the physiology of children and their exposure patterns to toxic and harmful substances differ
from that of adults, and make them more susceptible to the dangers posed by that exposure than adults. Children face greater exposure to toxic substances because they eat more food, drink more water, and breathe more air as a percentage of their body weight than adults. Children are also rapidly growing, and therefore physiologically more vulnerable to such substances than adults.

How is this understanding that children suffer higher risks from the dangers posed by toxic and harmful substances than adults taken into account in our environmental and public health standards? Do we gather and consider data that specifically evaluates how those substances affect children?

If that data is lacking, do we apply extra caution when we determine the amount of toxic substances that can be released into the air and water, the level of harmful contaminants that may be present in our drinking water, or the amount of pesticides that may be present in our food?

In most cases, the answer to all of these questions is “no.”

In fact, most of these standards are designed to protect adults rather than children. In most cases, we don’t even have the data that would allow us to measure how those substances specifically affect children. And, finally, in the face of that uncertainty, we generally assume that what we don’t know about the dangers toxic and harmful substances pose to our children won’t hurt them.

We generally don’t apply extra caution to take account of that uncertainty.

CEPA would change the answers to those questions from “no” to “yes.” It would require EPA to account for those substances that can be released into the air and water, the level of harmful contaminants that may be present in our drinking water, or the amount of pesticides that may be present in our food.

CEPA would require the Environmental Protection Agency (EPA) to set environmental and public health standards to protect children. It would specifically require EPA to explicitly consider the dangers that toxic and harmful substances pose to children when setting those standards. Finally, if EPA discovers that it does not have specific data that would allow it to measure those dangers, EPA would be required to apply an additional safety factor—an additional measure of caution—to account for that lack of information.

As work would move forward under CEPA to childproof our environmental standards, CEPA would provide parents and teachers with a number of tools to immediately protect their children from toxic and harmful substances.

First, CEPA would require EPA to provide all schools and day care centers that receive federal funding a copy of EPA’s guide to help schools adopt a least toxic pest management policy. CEPA would also prohibit the use of pesticides containing known or probable carcinogens, reproductive toxins, acute nerve toxins and endocrine disrupters—in those areas. Under CEPA, parents would also receive advance notification before pesticides are applied on school or day care center grounds.

Second, CEPA would expand the federal Toxics Release Inventory (TRI) to require the reporting of toxic chemical releases that may pose special risks to children. In particular, CEPA provides that releases of small amounts of lead, mercury, dioxin, cadmium and chromium be reported under TRI. These chemicals are either highly toxic, persist in the environment or can accumulate in the human body over many years—all features which render them particularly dangerous to children.

Lead, for example, will seriously affect a child’s development, but is still released into the environment through lead smelting and waste incineration. CEPA would then require EPA to identify other toxic chemicals that may present special risks to children, and to provide that releases of those chemicals be reported under TRI.

Finally, CEPA would direct EPA to create a list of recommended safer-for-children products that minimize potential risks to children. CEPA would also require EPA to create a family right-to-know information kit that would include practical suggestions to help parents reduce their children’s exposure to toxic and harmful substances in the environment.

My CEPA bill is based on the premise that what we don’t know about the dangers toxic and harmful substances pose to our children may very well hurt them.

CEPA would require the Environmental Protection Agency (EPA) to set environmental and public health standards to protect children. It would specifically require EPA to explicitly consider the dangers that toxic and harmful substances pose to children when setting those standards. Finally, if EPA discovers that it does not have specific data that would allow it to measure those dangers, EPA would be required to apply an additional safety factor—an additional measure of caution—to account for that lack of information.

As work would move forward under CEPA to childproof our environmental standards, CEPA would provide parents and teachers with a number of tools to immediately protect their children from toxic and harmful substances.

First, CEPA would require EPA to provide all schools and day care centers that receive federal funding a copy of EPA’s guide to help schools adopt a least toxic pest management policy. CEPA would also prohibit the use of pesticides containing known or probable carcinogens, reproductive toxins, acute nerve toxins and endocrine disrupters—in those areas. Under CEPA, parents would also receive advance notification before pesticides are applied on school or day care center grounds.

Second, CEPA would expand the federal Toxics Release Inventory (TRI) to require the reporting of toxic chemical releases that may pose special risks to children. In particular, CEPA provides that releases of small amounts of lead, mercury, dioxin, cadmium and chromium be reported under TRI. These chemicals are either highly toxic, persist in the environment or can accumulate in the human body over many years—all features which render them particularly dangerous to children.

Lead, for example, will seriously affect a child’s development, but is still released into the environment through lead smelting and waste incineration. CEPA would then require EPA to identify other toxic chemicals that may present special risks to children, and to provide that releases of those chemicals be reported under TRI.

Finally, CEPA would direct EPA to create a list of recommended safer-for-children products that minimize potential risks to children. CEPA would also require EPA to create a family right-to-know information kit that would include practical suggestions to help parents reduce their children’s exposure to toxic and harmful substances in the environment.

My CEPA bill is based on the premise that what we don’t know about the dangers toxic and harmful substances pose to our children may very well hurt them. It would require EPA to apply caution in the face of that uncertainty. And, ultimately, it would childproof our environmental laws to ensure that those laws protect the most vulnerable among us—our children.

I am hopeful that my House and Senate colleagues can act quickly to enact my legislation.

I ask unanimous consent that the full text of my legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

**S. 112**

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

**SECTION 1. SHORT TITLE.**

This Act may be cited as the “Children’s Environmental Protection Act.”

**SEC. 2. ENVIRONMENTAL PROTECTION FOR CHILDREN AND OTHER VULNERABLE SUBPOPULATIONS.**

The Toxic Substances Control Act (15 U.S.C. 2601 et. seq.) is amended by adding at the end the following:

"(a) FINDINGS.—Congress finds that—

(1) the protection of public health and safety depends on individuals and government officials being aware of the pollution dangers that exist in their homes, schools, and communities, and whether those dangers present special threats to the health of children and other vulnerable populations;

(2) children spend much of their young lives in schools and day care centers, and may face significant exposure to pesticides and other environmental pollutants in those locations;

(3) the metabolism, physiology, and diet of children, and exposure patterns of children to environmental pollutants differ from those of adults and can make children more susceptible than adults to the harmful effects of environmental pollutants;

(4) a study conducted by the National Academy of Sciences that particularly considered the effects of pesticides on children concluded that current approaches to assessing pesticide risks typically do not consider risks to children and to food commodities for children;

(5) there is often insufficient data to enable the Administrator, when establishing a national environmental and public health standard for an environmental pollutant, to evaluate the special susceptibility or exposure of children to environmental pollutants;

(6) when data are lacking to evaluate the special susceptibility or exposure of children to an environmental pollutant, the Administrator generally does not presume that the environmental pollutant presents a special risk to children and generally does not apply a special or additional margin of safety to protect the health of children in establishing an environmental or public health standard for that pollutant; and

(7) safeguarding children from environmental pollutants requires the systematic collection of data concerning the special susceptibility and exposure of children to those pollutants and the additional safety factor of at least 10-fold in the establishment of environmental and public health standards where reliable data are not available.

(7) safeguarding children from environmental pollutants requires the systematic collection of data concerning the special susceptibility and exposure of children to those pollutants and the additional safety factor of at least 10-fold in the establishment of environmental and public health standards where reliable data are not available.

(b) POLICY.—It is the policy of the United States that—

(1) the public has the right to be informed about the pollution dangers to which children are being exposed in their homes, schools and communities, and how those dangers may present special health threats to children and other vulnerable populations;

(2) each environmental and public health standard for an environmental pollutant established by the Administrator must, with an adequate margin of safety, protect children and other vulnerable populations;

(3) where data sufficient to evaluate the special susceptibility and exposure of children to environmental pollutants are lacking, the Administrator should presume that the environmental pollutant poses a special risk to children and should apply a presumptive additional margin of safety of at least 10-fold in establishing an environmental or public health standard for that environmental pollutant; and

(4) since it is difficult to identify all conceivable risks and address all uncertainties
associated with pesticide use, the use of dangerous schools and day care centers should be eliminated; and

“(5) the Environmental Protection Agency, the Department of Health and Human Services (including the National Institute of Environmental Health Sciences and the Agency for Toxic Substances and Disease Registry), the National Institutes of Health, and other Federal agencies shall support research on the short-term and long-term health effects of cumulative and synergistic exposures of children and other vulnerable subpopulations to environmental pollutants.

SEC. 502. DEFINITIONS.

In this title:

“(1) CHILD.—The term ‘child’ means an individual 18 years of age or younger.

“(2) DAY CARE CENTER.—The term ‘day care center’ means a center-based child care provider that is licensed, regulated, or registered under applicable State or local law.

“(3) ENVIRONMENTAL POLLUTANT.—The term ‘environmental pollutant’ includes a hazardous substance subject to regulation under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.), an air pollutant subject to regulation under the Clean Air Act (42 U.S.C. 7401 et seq.), a water pollutant subject to regulation under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.), and a pesticide subject to regulation under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.).

“(4) PESTICIDE.—The term ‘pesticide’ has the meaning given the term in section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136).

“(5) SCHOOL.—The term ‘school’ means an elementary school (as defined in section 14101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 8801)), a secondary school (as defined in section 14101 of that Act), a kindergarten, or a nursery school that is public or receives Federal funding.

“(6) VULNERABLE SUBPOPULATION.—The term ‘vulnerable subpopulation’ means children, pregnant women, the elderly, individuals with a history of serious illness, and other subpopulations identified by the Administrator as posing a special risk to children.

SEC. 503. SAFEGUARDING CHILDREN AND OTHER VULNERABLE SUBPOPULATIONS.

“(a) IN GENERAL.—The Administrator shall—

“(1) ensure that each environmental and public health standard for an environmental pollutant protects children and other vulnerable subpopulations with an adequate margin of safety; and

“(2) explicitly evaluate data concerning the special susceptibility and exposure of children to any environmental pollutant for which an environmental or public health standard is established; and

“(3) adopt an additional margin of safety of at least 10-fold in the establishment of an environmental or public health standard for an environmental pollutant in the absence of reliable data on toxicity and exposure of the child to an environmental pollutant or if there is a lack of reliable data on the susceptibility of the child to an environmental pollutant for which the environmental and public health standard is being established.

“(b) ESTABLISHING, MODIFYING, OR REVISING ENVIRONMENTAL AND PUBLIC HEALTH STANDARDS.

“(1) IN GENERAL.—In establishing, modifying, or reevaluating any environmental or public health standard for an environmental pollutant, including a neurotoxic or reproductive toxin, a category I or II acutely toxic pesticide, a known or suspected carcinogen, a developmentally toxic pesticide, a known or suspected endocrine disrupter, an environmental pollutant and other substances having a common mechanism of toxicity.

“(2) ADDITIONAL SAFETY MARGIN.—If any of the data described in paragraph (1) are not available, the Administrator shall, in completing a risk assessment, risk characterization, or other assessment of risk underlying an environmental or public health standard, adopt an additional margin of safety of at least 10-fold to take into account potential pre-natal and early childhood exposure to an environmental pollutant, and the completeness of data concerning the exposure and toxicity of an environmental pollutant to children.

“(c) IDENTIFICATION AND REVISION OF CURRENT ENVIRONMENTAL AND PUBLIC HEALTH STANDARDS THAT PRESENT SPECIAL RISKS TO CHILDREN.

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this title and annually thereafter, based on the recommendations of the Children’s Environmental Health Protection Advisory Committee established under section 507, the Administrator shall—

“(A) repromulgate, in accordance with this title, at least 3 of the environmental and public health standards identified by the Children’s Environmental Health Protection Advisory Committee as posing a special risk to children;

“(B) publish a finding in the Federal Register that provides the Administrator’s basis for declining to repromulgate at least 3 of the environmental and public health standards identified by the Children’s Environmental Health Protection Advisory Committee as posing a special risk to children.

“(2) DETERMINATION BY ADMINISTRATOR.—If the Administrator makes the finding described in paragraph (1)(B), the Administrator shall—

“(A) publish a finding in the Federal Register that provides the Administrator’s basis for declining to repromulgate at least 3 of the environmental and public health standards identified by the Children’s Environmental Health Protection Advisory Committee as a posing a special risk to children; and

“(B) provide notice to the board of the school or day care center at the next scheduled meeting of the board.

“(c) PARENTAL NOTICE PRIOR TO ANY PESTICIDE APPLICATION.

“(1) IN GENERAL.—An administrator of the school or day care center shall provide written notice to parents not later than 72 hours before any indoor or outdoor pesticide application on the grounds of the school or day care center.

“(2) CONTENTS OF NOTICE.—A notice under this subsection shall include a description of the intended area of application and the name of each pesticide to be applied.

“(b) LEAST TOXIC PEST CONTROL STRATEGIES.

“(1) IN GENERAL.—The Administrator shall distribute to each school and day care center the current manual of the Environmental Protection Agency that guides schools and day care centers in the establishment of a least toxic pest control strategy.

“(2) LIST.—Not later than 180 days after the date of enactment of this Act and annually thereafter, the Administrator shall provide each school and day care center with a list of pesticides that contain a substance that the Administrator has identified as a known or suspected carcinogen, a developmentally toxic pesticide, an environmental pollutant, or a known or suspected endocrine disrupter, as identified by the endocrine disrupter screening program of the Environmental Protection Agency.

“(d) PROHIBITION OF PESTICIDE APPLICATION.

“(1) IN GENERAL.—Effective beginning on the date that is 2 years after the date of enactment of this Act, no school or day care center that repromulgates a standard shall apply any pesticide described in paragraph (2), other indoors or outdoors.

“(2) EMERGENCY EXEMPTION.—IN GENERAL.—The Administrator of a school or day care center may suspend the prohibition under paragraph (3) for a period of not more than 14 days if the administrator determines that a pest control emergency poses an imminent threat to the health and safety of the school or day care center community.

“(b) NOTICE.—

“(1) IN GENERAL.—Prior to exercising the authority under this paragraph, the administrator shall give notice to the board of the school or day care center of the reasons for finding that a pest control emergency exists.

“(ii) ACTION TAKEN.—An administrator that exercises the authority under subparagraph (A) shall report any action taken by personnel or outside contractors in response to the pest control emergency to the board of the school or day care center at the next scheduled meeting of the board.

“(c) WARNING SIGN.—

“(1) IN GENERAL.—An administrator of the school or day care center shall provide written notice to parents not later than 72 hours before any indoor or outdoor pesticide application on the grounds of the school or day care center.

“(2) CONTENTS OF NOTICE.—A notice under this subsection shall include a description of the intended area of application and the name of each pesticide to be applied.

“(d) WARNING SIGN.—

“(1) IN GENERAL.—An administrator of a school or day care center shall post at any area in the area of the school or day care center where a pesticide is to be applied a warning sign that is consistent with the label of the pesticide and prominently displays the term ‘warning’, ‘danger’, or ‘poison’.

“(2) PERIOD OF DISPLAY.—During the period that begins not less than 24 hours before the application of a pesticide and ends not less than 72 hours after the application, a warning sign shall be displayed in a location where it is visible to all individuals entering the area.

“(e) SAFER ENVIRONMENT FOR CHILDREN.

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this title, the Administrator shall—

“(2) take steps to reduce the exposure of children to pesticides on school grounds, both indoors and outdoors; and

“(3) provide each school and day care center at the next scheduled meeting of the board.

“SEC. 504. PROTECTING CHILDREN FROM EXPOSURE TO PESTICIDES IN SCHOOLS.

“(a) IN GENERAL.—Each school and day care center that receives Federal funding shall—

“(1) take steps to reduce the exposure of children to pesticides on school grounds, both indoors and outdoors; and

“(2) provide each school and day care center at the next scheduled meeting of the board.

“SEC. 505. PROTECTING CHILDREN FROM EXPOSURE TO PESTICIDES IN SCHOOLS.

“(a) IN GENERAL.—Each school and day care center that receives Federal funding shall—

“(1) take steps to reduce the exposure of children to pesticides on school grounds, both indoors and outdoors; and

“SEC. 506. SAFER ENVIRONMENT FOR CHILDREN.
“(1) identify environmental pollutants commonly used in areas that are reasonably accessible to children;

“(2) create a scientifically peer-reviewed list of substances identified under paragraph (1) with known, likely, or suspected health risks to children;

“(3) create a scientifically peer-reviewed list of safer-for-children substances and products recommended by the Administrator for use in areas that are reasonably accessible to children, when applied as recommended by the manufacturer, will minimize potential risks to children from exposure to environmental pollutants;

“(4) establish guidelines to help reduce and eliminate exposure of children to environmental pollutants in areas reasonably accessible to children, including advice on how to establish an integrated pest management program;

“(5) create a family right-to-know information kit that includes a summary of helpful information and guidance to families, such as the information created under paragraph (4), information on the potential health effects of environmental pollutants, practical suggestions on how parents may reduce children's exposure to environmental pollutants, and other relevant information, as determined by the Administrator in consultation with the Centers for Disease Control and Prevention;

“(6) make all information created pursuant to this subsection available to Federal and State agencies, the public, and on the Internet; and

“(7) review and update the lists created under paragraphs (2) and (3) at least once each year.

SEC. 3. ADDITIONAL REPORTING OF TOXIC CHEMICAL RELEASERS THAT AFFECT CHILDREN.

Section 313(f)(1) of the Emergency Planning and Community Right-to-Know Act of 1986 (42 U.S.C. 11023(f)(1)) is amended by adding at the end the following:

“(C) CHILDREN'S HEALTH.—

“(1) IN GENERAL.—With respect to each of the toxic chemicals described in clause (ii) that shall ensure reporting for at least 80 percent of the aggregate of all releases of the chemical or found in areas that are reasonably accessible to children;

“(2) have 10 or more full-time employees; and

“(3) are in Standard Industrial Classification Codes through 39 or in the Standard Industrial Classification Codes under subsection (b)(1)(B).

“(IV) ADDITIONAL FACILITIES.—If the Administrator determines that a facility other than a facility described in clause (iii) contributes substantially to total releases of toxic chemicals described in clause (i), the Administrator shall require that facility to comply with clause (iii).”.

SEC. 4. RESEARCH TO IMPROVE INFORMATION ON THE EFFECTS OF ENVIRONMENTAL POLLUTANTS ON CHILDREN.

The Toxic Substances Control Act (15 U.S.C. 2601 et seq.) (as amended by section 2) is amended by adding at the end the following:

“SEC. 506. RESEARCH TO IMPROVE INFORMATION ON THE EFFECTS OF ENVIRONMENTAL POLLUTANTS ON CHILDREN.

“(a) EXPOSURE AND TOXICITY DATA.—The Administrator, the Secretary of Agriculture, and the Secretary of Health and Human Services shall coordinate and support the development and implementation of basic and applied research initiatives to examine the health effects and toxicity of pesticides (including active and inert ingredients) and other environmental pollutants on children and other vulnerable subpopulations, and the exposure of children and vulnerable subpopulations to environmental pollutants.

“(b) BIENNIAL REPORTS.—The Administrator, the Secretary of Agriculture, and the Secretary of Health and Human Services shall submit biennial reports to Congress describing actions taken to carry out this section.

SEC. 5. CHILDREN'S ENVIRONMENTAL HEALTH PROTECTION ADVISORY COMMITTEE.

The Toxic Substances Control Act (15 U.S.C. 2601 et seq.) (as amended by section 4) is amended by adding at the end the following:

“SEC. 507. CHILDREN'S ENVIRONMENTAL HEALTH PROTECTION ADVISORY COMMITTEE.

“(a) ESTABLISHMENT.—The Administrator shall establish a Children's Environmental Health Protection Advisory Committee to assist the Administrator in carrying out this title.

“(b) COMPOSITION.—The Committee shall be comprised of medical professionals specializing in pediatric health, educators, representatives of community groups, representatives of environmental and public health nonprofit organizations, industry representatives, and State environmental and public health department representatives.

“(c) DUTIES.—Not later than 2 years after the date of enactment of this title and annually thereafter, the Committee shall develop a list of standards that merit reevaluation by the Administrator in order to better protect children's health.

“(d) TERMINATION.—The Committee shall terminate not later than 15 years after the date on which the Committee is established.

“SEC. 508. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as are necessary to carry out this title.”.

ADDITIONAL COSPONSORS

S. 285

At the request of Mr. Cochrane, the name of the Senator from South Dakota (Mr. Johnson) was added as a co-sponsor of S. 285, a bill to amend title II of the Social Security Act to restore the link between the maximum amount of earnings by blind individuals permitted without demonstrating ability to engage in substantial gainful activity and the exempt amount permitted in determining excess earnings under the earnings test.

S. 299

At the request of Mr. Baucus, his name was added as a cosponsor of S. 299, a bill to elevate the position of Director of the Indian Health Service within the Department of Health and Human Services to Assistant Secretary for Indian Health, and for other purposes.

S. 331

At the request of Mr. Jeffords, the name of the Senator from Indiana (Mr. Lugar) was added as a cosponsor of S. 331, a bill to amend the Social Security Act to expand the availability of health care coverage for working individuals with disabilities, to establish a Ticket to Work and Self-Sufficiency Program in the Social Security Administration to provide such individuals with meaningful opportunities to work, and for other purposes.

S. 434

At the request of Mr. Breaux, the name of the Senator from Massachusetts (Mr. Kerry) was added as a co-sponsor of S. 434, a bill to amend the Internal Revenue Code of 1986 to simplify the method of payment of taxes on distilled spirits.

S. 511

At the request of Mr. McCain, the name of the Senator from Alaska (Mr. Stevens) was added as a cosponsor of S. 511, a bill to amend the Voting Accessibility for the Elderly and Handicapped Act to ensure the equal right of individuals with disabilities to vote, and for other purposes.

S. 512

At the request of Mr. Gorton, the names of the Senator from Utah (Mr. Bennett), the Senator from Massachusetts (Mr. Kerry), and the Senator from North Dakota (Mr. Dorgan) were added as cosponsors of S. 512, a bill to amend the Public Health Service Act to provide for the expansion, intensification, and coordination of the activities of the Department of Health and Human Services with respect to research on autism.

S. 514

At the request of Mr. Cochran, the name of the Senator from South Dakota (Mr. Johnson) was added as a co-sponsor of S. 514, a bill to improve the National Writing Project.

S. 542

At the request of Mr. Abraham, the name of the Senator from Colorado
(Mr. CAMPBELL) was added as a cosponsor of S. 542, a bill to amend the Internal Revenue Code of 1986 to expand the deduction for computer donations to schools and allow a tax credit for donated computers. S. 573

At the request of Mr. KENNEDY, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 573, a bill to provide individuals with access to health information of which they are a subject, ensure personal privacy with respect to health-care-related information, impose criminal and civil penalties for unauthorized use, and ultimately to achieve economic self-sufficiency, and for other purposes. S. 622

At the request of Mr. KENNEDY, the name of the Senator from Florida (Mr. GRAHAM) was added as a cosponsor of S. 622, a bill to enhance Federal enforcement of hate crimes, and for other purposes. S. 632

At the request of Mr. DEWINE, the name of the Senator from Minnesota (Mr. WELLSTONE) was added as a cosponsor of S. 632, a bill to provide assistance for poison prevention and to stabilize the funding of regional poison control centers. S. 676

At the request of Mr. CAMPBELL, the names of the Senator from Georgia (Mr. CLELAND) and the Senator from Florida (Mr. MACK) were added as cosponsors of S. 676, a bill to locate and secure the return of Zachary Baumel, a citizen of the United States, and other protected health information, to provide for the strong enforcement of these rights, and to protect States’ rights. S. 680

At the request of Mr. HATCH, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 680, a bill to amend the Internal Revenue Code of 1986 to permanently extend the research credit, and for other purposes. S. 693

At the request of Mr. HELMS, the name of the Senator from Kentucky (Mr. BUNNING) was added as a cosponsor of S. 693, a bill to assist in the enhancement of the security of Taiwan, and for other purposes. S. 749

At the request of Mr. KENNEDY, the name of the Senator from Washington (Mrs. MURRAY) was added as a cosponsor of S. 749, a bill to establish a program to provide financial assistance to States and local entities to support early learning programs for prekindergarten children, and for other purposes. S. 800

At the request of Mr. BURNS, the names of the Senator from Mississippi (Mr. LOTT) and the Senator from Florida (Mr. MACK) were added as cosponsors of S. 800, a bill to promote and enhance public safety through the use of 9-1-1 as the universal emergency assistance number, further deployment of wireless 9-1-1 service, support of States in upgrading 9-1-1 capabilities and related functions, encouragement of construction and operation of seamless, ubiquitous, and reliable networks for personal wireless services, and for other purposes. S. 834

At the request of Mr. CAMPBELL, the name of the Senator from Florida (Mr. MACK) was added as a cosponsor of S. 834, a bill to withhold voluntary proportional assistance for programs and projects of the International Atomic Energy Agency relating to the development and completion of the Busher nuclear power plant in Iran, and for other purposes. S. 836

At the request of Mr. SPECTER, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 836, a bill to amend the Public Health Service Act, the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1986 to require that group health plans and health insurance issuers provide women with adequate access to providers of obstetric and gynecological services. S. 848

At the request of Mrs. FEINSTEIN, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 848, a bill to designate a portion of the Oat Mountain region of California as wilderness. S. 860

At the request of Mr. INHOFE, the names of the Senator from Alabama (Mr. SHELBY), and the Senator from Utah (Mr. BENNETT) were added as cosponsors of S. 880, a bill to amend the Clean Air Act to remove flammable fuels from the list of substances with respect to which reporting and other activities are required under the risk management plan. S. 895

At the request of Mr. LIEBERMAN, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 955, a bill to provide for the establishment of Individual Development Accounts (IDAs) that will allow individuals and families with limited means an opportunity to accumulate assets, to access education, to own their own homes and businesses, and ultimately to achieve economic self-sufficiency, and for other purposes. S. 924

At the request of Mr. NICKLES, the name of the Senator from Texas (Mr. GRAMM) was added as a cosponsor of S. 924, a bill entitled the “Federal Royalty Certainty Act.” S. 1024

At the request of Mr. DORGAN, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1022, a bill to authorize the appropriation of an additional $1,700,000,000 for fiscal year 2000 for health care for veterans. S. 1063

At the request of Mrs. FEINSTEIN, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 1063, a bill to amend title IV of the Social Security Act to coordinate the penalty for the failure of a State to operate a State child support disbursement unit with the alternative penalty procedure for failures to meet data processing requirements. S. 1063

At the request of Ms. COLLINS, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1063, a bill to amend title XVIII of the Social Security Act to provide for a special rule for long existing home health agencies with partial fiscal year 1999 reports in the per beneficiary limits under the interim payment system for such agencies. S. 1070

At the request of Mr. BOND, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 1070, a bill to require the Secretary of Labor to wait for completion of a National Academy of Sciences study before promulgating a standard, regulation or guideline on ergonomics. S. 1077

At the request of Mr. SCHUMER, the names of the Senator from North Dakota (Mr. CONRAD) and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of S. 1077, a bill to dedicate the new Amtrak station in New York, New York, to Senator DANIEL P. Moynihan. S. 1080

CONGRESSIONAL RECORD—SENATE May 24, 1999

At the request of Ms. SNOWE, the name of the Senator from Iowa (Mr. HARKIN) was added as a cosponsor of Senate Concurrent Resolution 9, a concurrent resolution calling for a United States effort to end restrictions on the freedoms and human rights of the enclaved people in the occupied area of Cyprus. S. 1095

At the request of Ms. SNOWE, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of Senate Resolution 84, a resolution to designate the month of May, 1999, as “National Alpha 1 Awareness Month.” S. 1095

At the request of Mr. THURMOND, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of Senate Resolution 95, a resolution declaring August 16, 1999, as “National Airborne Day.” S. 1099

At the request of Mr. REID, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of Senate Resolution 95.
It is important, given where we are with the airstrikes in Kosovo, to think through this question about Slobodan Milosevic and the military forces involved in an air campaign in that part of the world.

These are gruesome pictures, and I will only put one of these photos on the easel. But all of these people have homes and have lived and have suffered that is visited upon them by Slobodan Milosevic. One million to 1.5 million people have been evicted from their homes and communities. Homes have been burned, and innocent civilians have been raped and beaten. Thousands have been massacred, and thousands more have been packed into train cars, reminiscent of the Jews who were hauled to the ovens by the Nazis in the 1940s.

This country and our allies decided we do not want history to record us as saying it doesn’t matter. There is a moral imperative for us, where we can, when we can to take steps to stop ethnic cleansing, to stop the genocide, to stop someone like Slobodan Milosevic. So we commenced the airstrikes.

The very purpose of those airstrikes is underlined by the understanding that Mr. Milosevic is committing horrible war crimes against these ethnic Albanians. They have been driven from their homeland and subjected to rape, torture, and genocide at the hands of the troops commanded by Mr. Milosevic.

The question for these children and these innocent victims is: Shall we, as a country, push to have Mr. Milosevic tried in the International Criminal Tribunal for the former Yugoslavia? The Tribunal exists for a very specific purpose. Should this country not be pressing very aggressively to have this leader, Slobodan Milosevic, indicted and convicted of war crimes?

We made a mistake, in my judgment, with respect to Iraq. Saddam Hussein was never tried for war crimes. He committed many. He is one of the few leaders in the world who has murdered people in his own homeland with weapons of mass destruction, but we did not press for his conviction in an international tribunal. So now, instead of being a convicted war criminal, Saddam Hussein is still in power.

I understand that perhaps we would not have been able to arrest him, but at least in absentia evidence could be presented to say that this is a war criminal. This monster, Slobodan Milosevic, and the despicable acts committed in his name by his troops, ought to persuade our country to support his indictment and conviction in the International Tribunal, which exists for that purpose.

Why would we not do that? I am told that, at some point there has to be a settlement to end this war, and those who are involved in the settlement do not want to be negotiating with a convicted war criminal. That doesn’t make any sense to me. The very reason for launching the airstrikes was that this person and the troops under his leadership was committing unspeakable horrors against the ethnic Albanians, which, in my judgment, brands him a war criminal.

This country and our allies decided we do not want history to record us as saying it doesn’t matter. There is a moral imperative for us, where we can, when we can to take steps to stop ethnic cleansing, to stop the genocide, to stop someone like Slobodan Milosevic. So we commenced the airstrikes.

The very purpose of those airstrikes is underlined by the understanding that Mr. Milosevic is committing horrible war crimes against these ethnic Albanians. They have been driven from their homeland and subjected to rape, torture, and genocide at the hands of the troops commanded by Mr. Milosevic.

The question for these children and these innocent victims is: Shall we, as a country, push to have Mr. Milosevic tried in the International Criminal Tribunal for the former Yugoslavia? The Tribunal exists for a very specific purpose. Should this country not be pressing very aggressively to have this leader, Slobodan Milosevic, indicted and convicted of war crimes?

We made a mistake, in my judgment, with respect to Iraq. Saddam Hussein was never tried for war crimes. He committed many. That doesn’t make any sense to me. The very reason for launching the airstrikes was that this person and the troops under his leadership was committing unspeakable horrors against the ethnic Albanians, which, in my judgment, brands him a war criminal.
Whereas English is the most widely used language in the world, in the areas of finance, trade, technology, diplomacy, and entertainment, and is the living library of the last 100 years of scientific and technological advance;

Whereas more speakers of English as a second language in the world than there are native English speakers, and the large number of English language schools and the world demonstrate that English is as close as any language has been to becoming the world’s common language;

Whereas Spanish exploration in the New World by Juan Ponce de León explored the Florida peninsula, and included the expeditions of Francisco Coronado throughout California to Kansas and across Arizona, New Mexico, Texas, and Oklahoma from 1540 to 1542;

Whereas in 1998 the Nation commemorated the 400th anniversary of the first Spanish Settlement of the Southwest (Ohkay Yunge at San Juan Pueblo, New Mexico) with official visits from Spain, parades, festivities, masses, and other celebrations to emphasize the importance of the first encounters with American Indian cultures and the subsequent importance of encounters with other European cultures;

Whereas El Paso, Texas, the first gateway for Spanish explorers in the Southwest, also celebrated its Quincentennial commemorating the 400th anniversary of the colonization expedition of Don Juan Onate in New Mexico and Texas along the Camino Real;

Whereas Hispanic culture, customs, and the Spanish language are a vital source of familial and individual strength;

Whereas the Bureau of the Census estimates that 1 in 5 Americans will be of Hispanic descent by the year 2050, and that the future cultural, political, and economic strengths of this country are clearly dependent upon our Nation’s ability to harness the talents and skills of this large and growing segment of the American population;

Whereas one of the common bonds of Hispanic people is the Spanish language, and promotores de la lengua de español at home and in cultural affairs will benefit not only the growing Hispanic population of the United States but also the economic interests of the entire Nation;

Whereas English is the common language of the United States, is important to American life and individual success, and 94 percent of United States residents speak English according to the 1990 decennial census;

Whereas immigrants to the United States have powerful incentives to learn English in order to fully participate in American society and the Nation’s economy, and 90 percent of all immigrant families become fluent in English within the second generation;

Whereas a common language promotes unity among citizens, and fosters greater communication;

Whereas there is a renaissance in cultural assertiveness around the world, noting that the more interdependent nations become economically, the more interested the nations are in preserving and sharing cultural identity;

Whereas the reality of a global economy is an ever-present international development that is fostered by international trade and the creation of regional trading blocs, such as the European Union, Mercosur, the North American Free Trade Agreement and the Association of Southeast Asian Nations;

Whereas knowledge of English, Spanish, French, Italian, Russian, German, Japanese, Chinese, Arabic, Korean, Vietnamese, African languages, and the many other languages of the world, enhances competitiveness and tremendous growth in world trade;

Whereas the United States is well postured for the global economy and international development with the United States’ diverse population and rich heritage of languages from all around the world language;

Whereas many American Indian languages are indigenous to the United States, and should be preserved, encouraged, and utilized. One such language, the Navajo Code Talkers created a code that could not be broken by the Japanese or the Germans;

Whereas knowledge of other languages and other cultures is known to enhance the quality of life, global economic forces, and language skills are a tremendous resource to the United States, and such foreign language skills enhance American competitiveness in global markets by permitting improved communication and understanding; and

Whereas the goal of our Nation’s educational system is to encourage educational opportunity for the human potential of all citizens, and to take steps to realize the potential for all;

Whereas skilled labor force is crucial to the competitiveness of the Nation in today’s global economy, foreign language skills are a tremendous resource to the United States, and such foreign language skill enhances American competitiveness in global markets by permitting improved communication and understanding; and

Resolved, That the United States Government should pursue policies that—

(1) support and encourage Americans to master the English language plus other languages of the world, with special emphasis on the growing importance of the Spanish language for our Nation’s economic and cultural relationships with Mexico, Central America, and South America;

(2) recognize the value of the Spanish language to millions of Americans of Hispanic descent, who will be the Nation’s largest minority by 2005, and will constitute one in five by the year 2050;

(3) recognize the importance of English as the unifying language of the United States, and the importance of English fluency for individuals who want to succeed in American society;

(4) recognize that command of the English language is a critical component of the success and productivity of our Nation’s children, and should be encouraged at every age;

(5) recognize that a skilled labor force is crucial to United States competitiveness in a more competitive world, and the ability to speak 1 or more languages in addition to English is a significant skill;

(6) support literacy programs, including programs designed to learn English, as well as those dedicated to helping Americans learn and maintain other languages in addition to English; and

(7) develop our Nation’s linguistic resources by encouraging citizens of the United States to learn and maintain Spanish, French, German, Japanese, Chinese, Russian, Arabic, Vietnamese, Farsi, African languages, sign language, and the many other languages of the world, in addition to English.

Mr. DOMENICI. Mr. President, today I am privileged to be joined by Senators KENNEDY, MCCAiN, HATCH, HUTCHISON, DeWINE, CHAFEE, LUGAR, ABRAHAM, SANTORUM, and WARNER in submitting our Senate Resolution on “English-Plus.” With this resolution, we are affirming the importance of mastering the English language and other languages of the world, such as Spanish, Italian, German, Japanese, Chinese, Vietnamese, and many, many more.

English is the most widely used language in the world in the areas of finance, trade, technology, diplomacy, and entertainment. English is also the world’s living library of the last 100 years of scientific and technological advances. There is no doubt that English is as close as any language in history to becoming the world’s dominant language.

As Americans, we have always valued our “melting pot” ideal. The business of this country is conducted in English, and there is much pride in the ability to speak English as well as to read and write in one’s native language. Those who know English and have mastered another language or two have a distinct advantage in a more competitive world.

As the son of an Italian immigrant, I can personally testify to the importance of the concept of English Plus. My father did not read or write in English, yet he insisted that I learn English first and do my best at speaking it. My parents both spoke Spanish—a skill which they found very useful in establishing a wholesale grocery business in Albuquerque.

Tens of thousands of New Mexican families still speak Spanish at home. Spanish remains a strong tie to their culture, music, history, and folklore. After decades of being taught to learn English first, many thousands of New Mexico’s Hispanic families also speak Spanish fluently.

In New Mexico, 1998 marked the 400th anniversary of the first permanent Spanish settlement near San Juan Pueblo in the Espanola Valley. Many celebrations and educational events marked this important anniversary. Hispanic culture, customs, and language received much attention throughout New Mexico. More than a third of New Mexico’s population is Hispanic, and the Spanish language and culture have a special place in our state’s distinctive blend of Spanish, Anglo, and Indian cultures.

New Mexico is the only state in the United States that has a constitutional requirement to use both English and Spanish in election materials and ballots.

In New Mexico, 37 percent of the people are Spanish-Americans or Mexican-Americans. The term “Hispanic Americans” is used in our country to describe Americans whose roots are in Spanish-speaking Cuba, Central America, and South America. As U.S. News reported in the May 11, 1998, issue, “the label Hispanic obscures the enormous diversity among people who...
come (or whose forebears came) from two dozen countries and whose ances-
tary ranges from pure Spanish to mix-
tures of Spanish blood with Native American, African, German, and
Italian, to name a few hybrids.”

U.S. News also reported that “The number of Hispanics is increasing al-
most four times as fast as the rest of the population, and they are expected to
pass African-Americans as the largest minority group by 2005.” In the
October 21, 1996, issue, U.S. News re-
ported that “Nearly 28 million people—
1 American in 16—consider themselves of Hispanic origin.” By 2050, projec-
tions are that 1 in every 4 Americans will
be Hispanic.

An article in The Economist of April 21, 1998, stresses the value of the Span-
ish language to America’s fastest grow-
ning minority group. “America’s Latinos are rapidly becoming one of its
most useful resources.”

In the western hemisphere, Spanish is clearly the dominant language. With
established and emerging markets in Mexico, Central America, and South
America, the Spanish language is a key to foreign competition in our own
hemisphere.

As the world economy moves into the next century, it has become clear the
domestic-only market planning” has been replaced by the era of inter-
national trade agreements and the cre-
ation of regional trading blocs. In 1996, the total volume of trade with Mexico
was estimated at $130 billion. Our trade with the rest of Latin America that
same year was $101 billion.

Spanish is clearly a growing cultural and economic force in our hemisphere.
It is also the common language of hun-
dreds of millions of people. Recent eco-
nomic trends of this decade show Latin
America as the most promising future
market for American goods and serv-
ces.

With Latin America as the next great market partner of the United States,
those Americans who know both English and Spanish will have many
new grand opportunities. Mexico’s re-
cently hired and celebrated its one-
millionth maquiladora worker in interna-
tional manufacturing plants along our border. This milestone event un-
questionably shows the value of knowing two languages as manufac-
turing expands among the hundreds of Fortune 500 companies now manu-
facturing in Mexico.

Mr. President, I have long believed that New Mexico and other border
states needed to create the focal point of North American trade
with South America. I agree with The Economist observation that “America’s Latinos are rapidly becoming one
of its most useful resources.” I predict
that English Plus Spanish will be one of
the major marketable skills for the
next century.

In conclusion, I would like my col-
leagues to see the value of “English
Plus” Spanish in our own hemisphere.
“English Plus” and other European
languages has long been a shared value,
and Asian languages have become very important
also. In every corner of the world, for-

gnereign languages matter to us for cul-
tural, economic, and security reasons.

Worldwide, we see a renaissance in cultural assertiveness where and Asian
languages take greater interest in preserving and sharing their own cultural identities.

As nations grow more interdependent economically, there is a parallel inter-
est in maintaining their own cultural integrity, with language as a key
linchpin of cultural identity.

Mr. President, our nation’s potential
markets in Mexico, Central America, and South America alone spell a vital
future for “English Plus” Spanish. If
we want to continue to expand our na-
tional’s cultural and economic Amer-
ican influence in the world, then we
urge the adoption of “English Plus” as
our national policy. We believe this ap-
proach will lead to a more prosperous
and secure world.

We believe we should not isolate
America to English only and to do that
would be a big mistake. The Senate
resolution I am speaking of supports
and encourages Americans to master
English first and English plus other languages. We should add to that, but
not English only. We see English plus other languages as a more
sensible statement of our national pol-
icy. Our Nation is rich in resources. We
want to encourage American citizens to
learn other prominent languages that
the world uses and that we must use
in the world and that many in our
country use as part of their cultural
background.

Mr. President, I ask unanimous con-
sent that our resolution regarding
English plus other languages be printed in the Record.

SENATE RESOLUTION 107—TO ES-
TABLISH A SELECT COMMITTEE
ON CHINESE ESPIONAGE
Mr. SMITH (of New Hampshire) sub-
mitted the following resolution; which
was referred to the Committee on Rules and Administration:

Resolved, SENATE RULES AND ADMINISTRATION:

SEC. 1. ESTABLISHMENT OF THE SELECT COMMITTEE.

(a) IN GENERAL.—There is established a temporary Select Committee on Chinese Espio-
nage (hereafter in this resolution referred to as the “select committee”) which shall consti-
tute a quorum thereof for the trans-
action of business, except that the select committee may fix a lesser number as a
quorum for the purpose of taking testimony. The select committee shall adopt rules of
procedure not inconsistent with this resolu-
tion and the rules of the Senate governing standing committees of the Senate.

(b) EFFECT ON OTHER COMMITTEES JURISDI-
CTION.—Nothing in this resolution shall be
 construed as prohibiting or otherwise re-
stricting the authority of any other com-
mittee of the Senate or as amending, lim-
iting, or otherwise changing the authority of any standing committee of the Senate.

SEC. 2. JURISDICTION.

(a) IN GENERAL.—There shall be referred to the select committee, concurrently with re-
ferall to any other committee of the Senate with jurisdiction, all messages, petitions,
memorials, and other matters relating to:

(1) United States-China national security rela-
tions and the rules of the Senate governing
standing committees of the Senate.

(b) EFFECT ON OTHER COMMITTEES JURISDI-
CTION.—Nothing in this resolution shall be
 construed as prohibiting or otherwise re-
stricting the authority of any other com-
mittee of the Senate or as amending, lim-
iting, or otherwise changing the authority of any standing committee of the Senate.

SEC. 3. REPORTS.

The select committee may, for the pur-
puses of accountability to the Senate, make
such reports to the Senate with respect to matters within its jurisdiction as shall
be deemed advisable which shall be referred to the appropriate committee. In making such
reports, the select committee shall proceed in a manner consistent with the require-
ments of national security.

SEC. 4. POWERS OF THE SELECT COMMITTEE.

(a) IN GENERAL.—For the purposes of this
resolution, the select committee is author-
ized at its discretion—

(1) to make investigations into any matter
within its jurisdiction;

(2) to hold hearings;

(3) to sit and act at any time or place dur-
ing the sessions (subject to paragraph 5 of
rule XXVI of the Standing Rules of the Sen-
ate), recesses, and adjourned periods of the
Senate;

(4) to require, by subpoena or otherwise,
the attendance of witnesses and the produc-
tion of correspondence, books, papers, and
documents;

(5) to make expenditures from the contin-
gent fund of the Senate to carry out its func-
tions and to employ personnel, subject to
procedures of paragraph 9 of rule XXVI of
the Standing Rules of the Senate; and

(6) with the prior consent of the Govern-
ment department or agency concerned and
the Committee on Rules and Administration, to
extract, on a reimbursable or nonreimbursable
basis the services of personnel of any such
department or agency.

(b) OATHS.—The chairman of the select
committee or any member thereof may ad-
minister oaths to witnesses.

(c) SUBPOENAS.—Subpoenas authorized by
a majority of the select committee shall be
issued over the signature of the chairman and may be served by any person designated
by the chairman.

SEC. 5. TREATMENT OF CLASSIFIED INFORMA-
TION.

(a) EMPLOYEES.—
against United States national security interests, responding to what is increasingly being viewed as the greatest security threat to the United States in our history—the loss to China of our most sensitive nuclear warhead data over many years from the Los Alamos National Lab, and from other national security facilities and programs. Through no one’s fault, and with the best of intentions, congressional efforts to examine this matter have been disjointed and inconsistent. I respect every Senator on both sides of the aisle who has been working and doing their best to try to get to the bottom of this, especially the chairmen of those committees with some claim to jurisdiction over the Labs and over this whole issue of Chinese espionage.

Unfortunately, that is the problem. There are individuals conducting too many independent investigations, if you will, and too many committees going down the same path. The result has been a duplication of witnesses, many of whom have come back under threat of perjury or five times before the Senate. I don’t think this makes a lot of sense. I think my colleagues on these respective committees—and I chair a subcommittee on the Armed Services Committee with direct jurisdiction over this matter, so I say that as one who would be involved in such an investigation—will agree that there is too much duplication. We need to streamline this effort and we need to put the full weight of the Senate behind it. That means an investigation, a true investigation, the power to call witnesses and administer oaths, and a unified focus of our shared bipartisan concern.

I have had the privilege to serve on two such bipartisan committees. One, the Senate Ethics Committee, is a nonpartisan committee, really, of three members from each party. We look at all the matters before us in a truly bipartisan way. It has worked in the past when we have had serious issues like this. And our effort—will agree that there is too much duplication. We need to streamline this effort and we need to put the full weight of the Senate behind it. That means an investigation, a true investigation, the power to call witnesses and administer oaths, and a unified focus of our shared bipartisan concern.

I have had the privilege to serve on two such bipartisan committees. One, the Senate Ethics Committee, is a nonpartisan committee, really, of three members from each party. We look at all the matters before us in a truly bipartisan way. It has worked in the past when we have had serious issues like this. And our effort here is to gain the truth, to get the facts. I believe this select committee will get the job done.

I want to review briefly what has happened, and why I think it is so important to have a select committee.

About 5 months ago, a special congressional committee investigating security problems with China questioned whether the Department of Energy had adequate safeguards to protect its nuclear secrets. On February 1, 1999, President Clinton responded, saying safeguards were “adequate” and getting better.

That was the statement of the President on February 1. With all due respect, and being as nice about it as I can, that was not true then. It is not true today.

One week later, on February 8, Mr. Lee failed a polygraph test. More than a month later, the FBI finally searched his computer. This is not something
one can take lightly. When the President says that safeguards were “adequate” and getting better, that simply was not true.

Between the time the Justice Department refused the FBI’s request for a court order to search Lee’s computer and Lee’s firing, there were more than 300 break-ins involving the computer network on which Lee had allegedly transferred nuclear secrets.

When Ho Lee was hired by Los Alamos National Laboratories in 1978, he first came under suspicion in 1982 when he made a telephone call to a scientist from Lawrence Livermore Lab who had been fired as a result of an investigation into evidence that a spy had passed neutron bomb secrets to China.

In 1989, when Lee’s 5-year security renewal was up for review, Energy Department officials told him that his files had been “lost” and that he had to come to the FBI headquarters for a security review. Lee put together on Lee that was sent to DOE headquarters for security review was “lost.” And it was not until 1992 that the Department hired an outside contractor to document the “lost” file.

In 1994, a Los Alamos employee reported to security officials that Lee was “embraced” by a Chinese intelligence officer during a delegation visit, and that Lee had discussed with the Chinese the nuclear weapons code similar to the ones he is now suspected of stealing.

In 1995, the Energy Department and the CIA began to learn of China’s alleged espionage.

In early 1995, scientists at the Los Alamos Nuclear Lab had told Mr. Notra Trulock, then intelligence director at the Energy Department, of their fears that China had achieved a remarkable breakthrough in its nuclear tests. About that same time those fears were raised by intelligence files showing that a Chinese agent had handed over a secret document to American officials containing evidence that China had stolen design data on American nuclear warheads and missiles.

In 1996, the CIA concluded American secrets had been stolen. Lee emerged in early 1996 as the FBI’s “prime suspect” at the Laboratories.

In 1996, Mr. Trulock tried to raise warnings about espionage at the Laboratories but was thwarted by his superiors at the Energy Department. Trulock said he finally talked to administration officials as early as April of 1996. He said he met with Sandy Berger. He said Mr. Berger had said Mr. Trulock said he finally talked to administrative officials as early as April of 1996. He said he met with Sandy Berger. He said Mr. Berger had said that Mr. Freeh was not going to have a suspect. We need to wiretap him. And your answer is, no.

Now, I am not going to accept some feeble explanation about why that happened. Somebody is going to be held accountable. Every nuclear weapon in the United States is going to be held accountable. Every nuclear weapon in the United States is going to be held accountable.

In August of 1997, FBI Director Louis Freeh recommended Mr. Lee’s access to classified information be cut off immediately. What happens? Lee is still being held accountable.

In 1996, President Clinton relaxed all controls on sales of advanced computers to countries like China. The next year, his administration resisted congressional efforts to retighten those controls.

The Cox committee reportedly concluded that some of the computers sold to China went to organizations involved in military activities, and they might have been used for military purposes—like upgrading nuclear weapons or developing more accurate missiles.

When something goes to China, it does not just go to private industry. It goes to the military too. Let’s make sure we understand that.

The relaxation of export controls on technology, begun in 1995, I have been hammering away at in my subcommittee—the Strategic Forces Subcommittee—in the Armed Services Committee for seven years. I have watched these controls relax in this administration. I have watched the State Department and the Defense Department lose the fight time after time after time to the Commerce Department.

In 1996, President Bill Clinton shifted licensing responsibility for some commercial satellite sales from the security-oriented State Department to the business-friendly Commerce Department.

I do not know what most Americans think about all of this, but I am going to say what I think about it. I think this is the worst breach of national security in the history of the United States of America. It is not just about Los Alamos, as we are going to find out tomorrow when this report is declassified. We want to talk about it in more detail. Unfortunately, I cannot talk about some of it today. But I urge everyone to get a copy of it and you will see what I am talking about.

The Rosenbergs in 1953 were executed, in my view, for less than what has happened here.

I have seen, time after time, witness after witness from this administration come before the Armed Services Committee—either taking the fifth amendment or denying they had any knowledge of what was going on in the country, or lying under oath, or being unable to remember. That is one thing during some financial inquiry about who gave how much money to some candidate. But I am going to tell you one thing. I am not going to stand for people coming before this Senate—when the security of the United States of America is at stake, when nuclear weapons have been transmitted to a foreign nation who is an enemy of the United States—I am not going to stand for people coming before this Senate and not telling the truth.

I will say it on the record: somebody is going to be held accountable for what has happened. Somebody is going to be held accountable. Every nuclear weapon in the United States is going to be held accountable.

CONGRESSIONAL RECORD—SENATE 10667

May 24, 1999
During the 1998 congressional investigation into satellite export controls, Trulock has said, acting Energy Secretary Elizabeth Moler ordered him—"I emphasize the word 'ordered,'" because I heard him say it in my presence—ordered him not to disclose the Chinese espionage in testimony before the U.S. Congress. A political appointee in the Energy Department, if they, Mr. Trulock, a subordinate, not to tell the Congress.

Now she denies it. Clearly, we need these two witnesses to come forth in public session before this select committee. Let the public decide who is lying and who isn't.

Mr. Lee retained access to classified information after he came under suspicion of spying, from October 1997 to October 1998.

On May 28, 1999, the Clinton administration finally admitted that secret nuclear weapons data had been compromised. They finally admitted it when Bill Richardson, the new Secretary of Energy, to his everlasting credit, pushed this issue and refused to stand for it anymore.

Wen Ho Lee was fired on March 8. His computer was not searched until the following week. They found he had transferred legacy codes covering many U.S. nuclear weapons from the classified to an unclassified computer system where they could be vulnerable to outsiders. In a computer search, more than 1,000 top secret weapons files had been deleted after being improperly transferred from a highly secure computer system.

Those are the facts as I can outline them without going into classified materials. I point out in the framework of the last 4 or 5 months, this information has been withheld from the public. Certain witnesses and Congressmen, if they took it upon themselves, could get a briefing on the Cox report, but it was not allowed to be released.

What happened? What did the President know and when did he know it? That sounds familiar.

March 19, 1999, at a press conference, the President assured the public, “There has been no espionage at the Labs since I've been President.” Let me repeat that: “There has been no espionage at the Labs since I've been President.”

And, “No one reported to me that they suspect that such a thing has occurred.”

The President, in March of this year, March 19, says, “There has been no espionage at the Labs since I've been President,” and, “No one reported to me that they suspect that such a thing has occurred.”

Mr. Berger told the Cox Committee he did not speak with the President about Chinese spying for at least a year, but he did say he did it in early 1998. Berger’s aides now say he remembers informing Clinton in July of 1997.

Mr. President, this is serious business. When atomic secrets in 1953 were passed to the Russians, a man and a woman who handled the information were executed. We have got to get to the bottom of this. Any Senator worth his or her salt, regardless of political party, ought to be ready to go on this with no nonsense.

We are not going to accept ridiculous "I don’t remember" answers anymore. I do not want to hear any of this. And I do not want to be bound by some committee rule where I have 5 minutes to ask a question, and the witness answers for 4½ minutes, and I cannot ask any more. I want the time to ask my questions. I want the time for every Senator to ask these questions on behalf of the American people.

I have never in my life seen anything like this. According to Mr. Berger, he was paraded before the committees of this Congress that I have been a party to—Government Affairs Committee investigations, the Armed Services Committee—time and time and time again, saying "I don’t remember, I can’t recall." That is not good enough. That does not cut it. And it does not cut it on the part of the President of the United States, either. He should have been up here testifying during his impeachment trial. By golly, if we have to have him come up here and testify on this, then bring him up here. This is the national security of the United States we are talking about. This is classified, nuclear, codeword-level information that has been passed, and the President needs to tell us what he knows, if he knows anything.

According to the New York Times, what counterintelligence experts told senior Clinton administration officials in November of 1998 is that China poses an intelligence threat to the weapons labs—an acute intelligence threat to the weapons labs. We now know the President had been briefed in November of 1998 about FBI and CIA suspicions, and in January had even received the secret Cox report detailing those security lapses during the Clinton watch.

What is going on here? All right, so he does not tell us the truth about Monica Lewinsky. But this is national security. According to Mr. Berger, his own National Security Adviser, President Clinton was told about the problems at the weapons labs in July of 1997 or February of 1998.

On May 9, 1999, Tim Russert, on “Meet The Press,” extracted from Energy Secretary Bill Richardson the acknowledgment that President Clinton was “fully, fully briefed,” an admission for which, news reports say, Richardson was savaged by Clinton aides.

Here is what he put in ‘“at the labs” and “against the labs” because we technically don’t know if the stolen info came from the labs or somewhere else. Richardson also said, “there have been damaging security leaks. The Chinese have obtained damaging information during past administrations and the current administration.”

Perhaps this spying started in previous administrations, but this administration knew it was going on and did not respond to it. That just does not cut it. This is not mere "what is it." This is about the security of the United States of America.

On May 23, 1999, the deputy intelligence director at the Department of Energy suggested the White House was informed about China's theft of United States nuclear secrets much sooner than it has acknowledged.

The inaction from this administration did not come in a vacuum. It came in the thick of a 1998 reelection effort that included campaign contributions from those with ties to the Chinese Government, ties to the military, and ties to the intelligence organization. Mr. Berger first briefed in April of 1996, and not until 2 years later does the White House move to tighten security after receiving more detailed evidence in 1997. NSA sought a narrowly focused CIA report to cast doubt on Energy Department claims.

At the same time the FBI and CIA were investigating the source of the Los Alamos leak, Vice President Al Gore was passing the hat among wealthy Buddhist nuns, the President was serving coffee at the White House to PLA arms dealer Wang Jun, and the administration responded favorably to a request from the man who would be the Democratic Party's largest single donor in 1996, Loral chairman Bernard Schwartz, to transfer authority over licensing of satellite technology from the State Department to the Commerce Department. Later, Loral would be granted a Presidential waiver to export its technology to China, even though it was under criminal investigation by the Justice Department for previous technology transfers.

Wake up, America. Wake up. What is going on here? Who knows what? Officials from those two companies, I have news for you. You are coming in here, and you are going to answer some questions that we now know included campaign contributions.

In April of 1996, Energy Department officials informed Mr. Berger that Trulock had uncovered evidence which showed that China had learned how to miniaturize nuclear bombs and it appeared the Chinese had gained that knowledge through the efforts of a spy at the Los Alamos Labs. Berger was told the spy might still be there.

What action did the White House take? Absolutely nothing. But the very same time, the verge of the 1997 Strategic Partnership Summit with Beijing. The administration was also facing the congressional investigations into charges that the
P.R.C. had illegally funneled money into their 1996 Clinton-Gore reelection campaign. I do not know where these dots but if they connected but there were a lot of dots. Mr. Berger assigned an NSC staffer to look into things and asked the CIA to investigate. The CIA’s report comes back that the Trulock analysis was an unsupported worst case scenario. That is not what he told us in private.

Finally, in February of 1998, President Clinton formally ordered the reforms into effect. But, curiously, Energy Secretary Federico Peña never followed the order and soon after left the Cabinet.

Reforms were not instituted until Bill Richardson did so in October of 1998, 30 months after Trulock’s first warning, 9 months after the President’s directed virtual information on every nuclear weapon. Secretary Moler orders Trulock not to tell Congress because it could be used against President Clinton’s China policy.

Do not tell Congress? If this Senate tolerates that kind of action, we deserve all the criticism we get and 10 times more. We have oversight responsibility. This area, the labs, and the security of those labs and those weapons, is directly under this Senator’s supervision and oversight responsibility as the chairman of the Strategic Forces Subcommittees. I am going to tell you something; I do not accept that answer. I am not going to accept that answer. Someone is going to talk, and whoever is accountable, in my view, if they did these things, they are going to go to jail, because that is where they belong. We are going to find out where this path leads, if it is the last thing I do.

Political contributions poured in and United States technology flowed out to China day after day, week after week, month after month, year after year—flowed out to China, made possible by the easing of export controls to this strategic partner of the President’s. We are going to hear that this is China bashing. This is not China bashing. This is the national security of the United States. I hope when the American people read the Cox report, they will understand that the Chinese gained with all our nuclear warhead in our arsenal. They now have the missile to fire it, the warhead to put on it, and the targeting information to direct it at any city in the United States of America—all thanks to the relaxation of export controls, and to the fact we left a spy in our labs.

When are we going to wake up? All through March and April of 1999, the White House fought over the release and declassification of this report. I wonder they do not want it released. The Cox report believes China is still spying. I believe they are too. This has to be investigated.

CONGRESSIONAL RECORD—SENATE

In conclusion, we need a bipartisan select committee to find out where this trail leads, wherever it leads.

SENATE CONCURRENT RESOLUTION 33—EXPRESSING THE SENSE OF CONGRESS REGARDING THE NEED FOR VIGOROUS PROSECUTION OF WAR CRIMES, GENOCIDE, AND CRIMES AGAINST HUMANITY IN THE FORMER REPUBLIC OF YUGOSLAVIA

Ms. LANDRIEU (for herself and Mr. SPECTER) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 33

Expressing the sense of Congress regarding the need for vigorous prosecution of war crimes, genocide, and crimes against humanity in the former Republic of Yugoslavia.

Whereas the United Nations Security Council created the International Criminal Tribunal for the former Yugoslavia (in this concurrent resolution referred to as the “ICTY”) by resolution on May 25, 1993;

Whereas, although the ICTY has indicted 84 people since its creation, these indictments have only resulted in the trial and conviction of 8 criminals;

Whereas the ICTY has jurisdiction to investigate: grave breaches of the 1949 Geneva Conventions (Article 2), violations of the laws or customs of war (Article 3), genocide (Article 4), and crimes against humanity (Article 5);

Whereas the Chief Prosecutor of the ICTY, Justice Louise Arbour, stated on July 7, 1998, to the Contact Group for the former Yugoslavia that “[i]t is the Prosecutor believes that the nature and scale of the fighting indicate that an ‘armed conflict’, within the meaning of international law, exists in Kosovo. As a consequence, the indictment charging crimes against humanity or war crimes, if evidence of such crimes is established”;

Whereas reports from Kosovo Albanian refugees provide accounts of systematic efforts to displace the entire Muslim population of Kosovo;

Whereas in furtherance of this plan, Serbian troops, police, and paramilitary forces have engaged in detention and summary execution of men of all ages, wanton destruction of civilian housing, forcible expulsions, mass executions in at least 60 villages and towns, as well as widespread organized rape of women and young girls;

Whereas these reports of atrocities provide prima facie evidence of war crimes, crimes against humanity, as well as genocide;

Whereas any criminal investigation is best served by the depositions and interviews of witnesses as soon after the commission of the crime as possible;

Whereas the indictment, arrest, and trial of war criminals would provide a significant deterrent to further atrocities;

Whereas the ICTY has issued 14 international warrants for war crimes suspects that have yet to be served, despite knowledge of the suspects’ whereabouts;

Whereas vigorous prosecution of war crimes after the conflict in Bosnia may have prevented the ongoing atrocities in Kosovo; and

Whereas investigative reporters have identified specific documentary evidence implicating the Serbian leadership in the commission of war crimes: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that:

(1) the United States, in coordination with other United Nations contributors, should provide sufficient resources for an expeditious and thorough investigation of allegations of the atrocities and war crimes committed in Kosovo;

(2) the United States, through its intelligence services, should provide all possible cooperation in the garnering of sufficient specificity and credibility to secure the indictment of those responsible for the commission of war crimes, crimes against humanity, and genocide in the former Yugoslavia;

(3) where evidence warrants, indictments for war crimes, crimes against humanity, and genocide should be issued against suspects regardless of their position within the Serbian leadership;

(4) the United States and all nations have an obligation to honor arrest warrants issued by the ICTY, and the United States should use all appropriate means to apprehend war criminals already under indictment; and

(5) NATO should not accept any diplomatic resolution to the conflict in Kosovo that would bar the indictment, apprehension, or prosecution of war criminals for crimes committed during operations in Kosovo.

Ms. LANDRIEU. Mr. President, this resolution, from the Senator from Pennsylvania and me, attempts to address the serious issue of war crimes. It calls for the Senate to make its voice clear on the issue of war crimes and the prosecution of those guilty of such crimes.

AMENDMENTS SUBMITTED

DEPARTMENT OF DEFENSE AUTHORIZATION ACT

KERREY AMENDMENT NO. 376

(Ordered to lie on the table.)

Mr. KERREY submitted an amendment intended to be proposed by him to the bill (S. 1059) to authorize appropriations for fiscal year 2000 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes; as follows:

On page 357, strike line 13 and all that follows through page 358, line 4.

ROBERTS (AND OTHERS)

AMENDMENT NO. 377

Mr. ROBERTS (for himself, Mr. WARNER, and Ms. SNOWE) proposed an amendment to the bill, S. 1059, supra; as follows:

In title X, at the end of subtitle D, add the following:

SEC. 1061. SENSE OF SENATE REGARDING LEGAL EFFECT OF THE NEW STRATEGIC CONCEPT OF NATO

(a) SENSE OF SENATE.—It is the sense of the Senate that—
Mr. WELLSTONE proposed three amendments to the bill, S. 1059, supra; as follows:

**AMENDMENT NO. 380**

On page 387, below line 24, add the following:

SEC. 1061. EXPANSION OF LIST OF DISEASES PRE-­
SUMED TO BE SERVICE-CONNECTED FOR SIMULATION OF RADIATION-EXPOSED VET-
ERANS.

Section 1112(c)(2) of title 38, United States Code, is amended by adding at the end the following:

"(P) Lung cancer.

"(Q) Colon cancer.

"(R) Tumors of the brain and central nervous system.

**AMENDMENT NO. 381**

On page 83, between lines 7 and 8, insert the following:

SEC. 329. PROVISION OF INFORMATION AND TECHNICAL GUIDANCE TO CERTAIN FOREIGN NATIONS REGARDING EN-VIRONMENTAL CONTAMINATION AT UNITED STATES MILITARY INSTAL-
ATIONS CLOSED OR BEING CLOSED.

(a) Requirement to provide information and technical guidance.—The Secretary of Defense shall provide to each foreign nation that is a strategic partner of the United States the following:

(1) Such information meeting the standards and practices of the United States environmental industry as is necessary to assist the foreign nation in determining the nature and extent of environmental contamination at—

(A) each United States military installation that has been closed; and

(B) each site in the foreign nation of a United States military installation that has been closed.

(b) Limitation.—The requirement to provide information and technical guidance under subsection (a) may not be construed to establish on the part of the United States any liability or obligation for the costs of environmental restoration or remediation at any installation or site referred to in paragraph (1) of that subsection.

(c) Definition.—In this section, the term "foreign nation that is a strategic partner of the United States" means any nation which cooperates with the United States on military matters, whether by treaty alliance or informal arrangement.

**AMENDMENT NO. 382**

At the appropriate place, insert the following:

SEC. ___. EVALUATION OF THE OUTCOME OF WELFARE REFORM.

Section 411(b) of the Social Security Act (42 U.S.C. 611(b)) is amended—

(1) in paragraph (3), by striking "and" at the end;

(2) in paragraph (4), by striking the period and inserting "; and"; and

(3) by adding at the end the following:

"(5) for each State program funded under this part, data regarding the rate of employment, job retention, earnings characteristics, health insurance status, and child care access and cost for former recipients of assistance under the program during, with respect to each such recipient, the first 24 months occurring after the date that the recipient ceases to receive such assistance.

**SPECTER AMENDMENT NO. 383**

Mr. SPECTER proposed an amendment to the bill, S. 1059, supra; as follows:

At the appropriate place add the following new section:

SEC. ___. Directing the President, pursuant to the United States Constitution and the War Powers Resolution, to seek approval from Congress prior to the introduction of ground troops from the United States Armed Forces to conduct military operations against the Federal Republic of Yugoslavia for funding that operation will not be authorized.

None of the funds authorized or otherwise available to the Department of Defense may be obligated or expended for the deployment of ground troops from the United States Armed Forces from Congress prior to the introduction of ground troops from the United States Armed Forces to conduct military operations against the Federal Republic of Yugoslavia for funding that operation will not be authorized.

**LANDRIEU (AND OTHERS) AMENDMENT NO. 384**

Mr. SPECTER (for Ms. LANDRIEU (for herself, Mr. SPECTER, Mr. LEVIN, Mr. DORGAN, and Mrs. FEINSTEIN)) proposed an amendment to the bill, S. 1059, supra; as follows:

At the end of title 10 add the following:

The Senate finds that:

The United Nations Security Council created the International Criminal Tribunal for the former Yugoslavia (in this concurrent resolution referred to as the "ICTY") by resolution on May 25, 1993;

Although the ICTY has indicted 84 people since its creation, these indictments have only resulted in the trial and conviction of 8 criminals;

The ICTY has jurisdiction to investigate grave breaches of the 1949 Geneva Conven-

tions (Article 2), violations of the laws or customs of war (Article 3), genocide (Article 4), and crimes against humanity (Article 5); The Chief Prosecutor of the ICTY, Justice Louise Arbour, stated on July 7, 1998, to the Contact Group for the former Yugoslavia that "[t]he Prosecutor believes that the na-
ture and scale of the fighting indicate that an 'armed conflict', within the meaning of international law, exists in Kosovo. As a
consequence, she intends to bring charges for crimes against humanity or war crimes, if evidence of such crimes is established.

Reports from Kosovar Albanian refugees provide detailed accounts of systematic efforts by Serbian troops, police, and paramilitary forces in detaining and summary execution of men of all ages, wanton destruction of civilian housing, forcing expulsions, mass executions in at least 60 villages and towns, as well as widespread organized rape of women and young girls.

These reports of atrocities provide prima facie evidence of war crimes, crimes against humanity, as well as genocide.

Any criminal investigation is best served by the depositions and interviews of witnesses as soon after the commission of the crime as possible.

The indictment, arrest, and trial of war criminals would provide a significant deterrent to further atrocities.

Investigative reporters have identified specific documentary evidence implicating the Serbian leadership in the commission of war crimes.

SEC. 2. It is the sense of Congress that— (1) the United States, in coordination with other United Nations contributors, should provide sufficient resources for an expedition and thorough investigation of allegations of the atrocities and war crimes committed in Kosovo; (2) the United States, through its intelligence services, should provide all possible cooperation in the gathering of evidence of sufficient specificity and credibility to secure the indictment of those responsible for the commission of war crimes, crimes against humanity, and genocide in the former Yugoslavia; (3) where evidence warrants, indictments for war crimes, crimes against humanity, and genocide should be issued against suspects for war crimes suspects that have yet to be served, despite knowledge of the suspects' whereabouts;

Vigorous prosecution of war crimes after the conflict in Bosnia may have prevented the ongoing conflict.

Mr. SARBANES submitted two amendments intended to be proposed by him to the bill, S. 1059, supra, as follows:

AMENDMENT NO. 386

On page 459, between lines 17 and 18, insert the following:

SC. 2844. MODIFICATION OF LAND CONVEYANCE

At the end of subtitle E of title XXVIII, add the following:

SEC. 2844. MODIFICATION OF LAND CONVEYANCE

At the end of title, and interest of the United States in (b) CONSIDERATION.—(1) In the event of

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

Mr. ROTH (for himself, Mr. BIDEN, Mr. THURMOND, and Mr. KENNEDY) proposed an amendment to the bill, S. 1059, supra, as follows:

In title V, at the end of subtitle F, add the following:

SEC. 582. POSTHUMOUS ADVANCEMENT OF REAR ADMIRAL THE (RETIRED) HUBBARD E. KIMMEL AND MAJOR GENERAL (RETIRED) WALTER C. SHORT ON RETIRED LIST.

(a) FINDINGS.—Congress makes the following findings:

(1) The late Rear Admiral (retired) Hubbard E. Kimmel, formerly serving in the grade of admiral as the Commander in Chief of the United States Fleet and the Commander in Chief, United States Pacific Fleet, had an excellent and unassailable record throughout his career in the United States Navy prior to the December 7, 1941 attack on Pearl Harbor.

(2) The late Major General (retired) Walter C. Short, formerly serving in the grade of lieutenant general as the Commander of the United States Army Hawaiian Department, had an excellent and unassailable record throughout his career in the United States Army prior to the December 7, 1941 attack on Pearl Harbor.

(3) Numerous investigations following the attack on Pearl Harbor have documented that then Admiral Kimmel and then Lieutenant General Short were not provided necessary and critical intelligence that was available, that foretold of war with Japan, that warned of imminent attack, and that would have alerted them to prepare for the attack, including such essential communiques as the Japanese Pearl Harbor Bomb Plot message of September 24, 1941, and the message sent from the Imperial Japanese Foreign Ministry to the Japanese Ambassador in the United States from December 6–7, 1941, known as the Fourteen-Point Message.

(4) On December 16, 1941, Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

Mr. THOMAS (for himself and Mr. ENZI) submitted an amendment intended to be proposed by them to the bill, S. 1059, supra; as follows:

AMENDMENT NO. 385

On page 459, between lines 17 and 18, insert the following:

SC. 2844. MODIFICATION OF LAND CONVEYANCE

At the end of title, and interest of the United States in (b) CONSIDERATION.—(1) In the event of

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.

The amendment that accused Admiral Kimmel and Lieutenant General Short were relieved of their commands and returned to their permanent ranks of rear admiral and major general.
maintaining that "these two officers were martyred" and "if they had been brought to trial, both would have been cleared of the charge".

(6) On October 19, 1944, a Naval Court of Inquiry

(A) exonerated Admiral Kimmel on the grounds that his military decisions and the disposition of his forces at the time of the December 7, 1941, attack on Pearl Harbor were proper— "by virtue of the information that Admiral Kimmel had at hand which indicated neither the probability nor the imminence of an air attack on Pearl Harbor";

(B) criticized the higher command for not sharing with Admiral Kimmel "during the very critical period of 26 November to 7 December 1941, important information—regarding the Japanese situation"; and

(C) concluded that the Japanese attack and its outcome was attributable to no serious fault on the part of anyone in the naval service.

(7) On June 15, 1944, an investigation conducted by Admiral T.C. Hart at the direction of the Navy produced evidence, subsequently confirmed, that essential intelligence concerning Japanese intentions and war plans was available in Washington, but was not shared with Admiral Kimmel.

(8) On October 20, 1944, the Army Pearl Harbor Board of Investigation determined that—

(A) Lieutenant General Short had not been kept "fully advised of the growing tenseness of the Japanese situation which indicated an increasing necessity for better preparation for war";

(B) detailed information and intelligence about Japanese intentions and war plans were available in "abundance", but were not shared with Lieutenant General Short’s Hawaii command; and

(C) Lieutenant General Short was not provided "on the evening of December 6th and the early morning of December 7th, the critical information indicating an almost immediate break with Japan, though there was amplification and accomplishment of this".

(9) The reports by both the Naval Court of Inquiry and the Army Pearl Harbor Board of Investigation were kept secret, and Rear Admiral Richardson (United States Navy, retired) and Major General (retired) Short were denied their requests to defend themselves through trial by court-martial.

(10) The joint committee of Congress that was established to investigate the conduct of Admiral Kimmel and Lieutenant General Short completed, on May 31, 1946, a 1,075-page report which included the conclusions of the committee that the two officers had not been guilty of dereliction of duty.

(11) The Officer Personnel Act of 1947, in establishing a promotion system for the Army and the Navy, provided a legal basis for the President to honor any officer of the Armed Forces of the United States who served his country as a senior commander during World War II with a placement of the highest wartime rank under that Act.

(12) On April 27, 1954, the then Chief of Naval Personnel, Admiral J.L. Holloway, Jr., recommended that Rear Admiral Kimmel be advanced in rank in accordance with the provisions of the Officer Personnel Act of 1947.

(13) On November 13, 1991, a majority of the members of the Board for the Correction of Military Records of the Department of Defense, the Army found that the late Major General (retired) Short "was unjustly held responsible for the Pearl Harbor disaster" and that "it should be equitable and just" to advance him to the rank of lieutenant general on the retired list.

(14) On October 19, 1994, the then Chief of Naval Operations, Admiral Carlisle Trost, withdrew his 1988 recommendation that the advancement of Rear Admiral (retired) Kimmel (By then deceased) and recommended that the case of Rear Admiral Kimmel be reopened.

(15) Although the Dorn Report, a report on the result of a Department of Defense study that was issued on December 15, 1995, did not provide support for an advancement of the late Rear Admiral (retired) Kimmel or the late Major General (retired) Short in grade, it did set forth as a conclusion of the study that "responsibility for the Pearl Harbor disaster should not fall solely on the shoulders of Admiral Kimmel and Lieutenant General Short, it should be broadly shared".

(16) The Dorn Report found—

(A) that "Army and Navy officials in Washington were privy to intercepted Japanese communications and had provided crucial confirmation of the imminence of war";

(B) that "the evidence of the handling of these messages indicates some ineptitude, some unwarranted assumptions and misinterpretations, limited coordination, ambiguous language, and lack of clarification and follow-up at higher levels"; and

(C) that "together, these characteristics resulted in failure ... to appreciate fully and to convey to the commanders in Hawaii the sensitivity that these intercepts should have engendered".

(17) On July 21, 1997, Vice Admiral David C. Richardson (United States Navy, retired) recommended his own and previously published study which confirmed findings of the Naval Court of Inquiry and Army Pearl Harbor Board of Investigation and established, among other facts, that the war effort in 1941 was undermined by a restrictive intelligence distribution policy, and the degree to which the commanders of the United States forces in Hawaii were not alerted about the impending attack on Hawaii was directly attributable to the withholding of intelligence from then Admiral Kimmel and Lieutenant General Short.

(18) Rear Admiral (retired) Kimmel and Major General (retired) Short are the only two officers eligible for advancement under the Officer Personnel Act of 1947 as senior World War II commanders who were excluded from the list of retired officers presented for advancement on the retired lists to their highest wartime ranks under that Act.

(19) This singular exclusion from advancement of Rear Admiral (retired) Kimmel and Major General (retired) Short from the Navy retired list and the Navy retired list, respectively, serves only to perpetuate the myth that the senior commanders in Hawaii were derelict in their duty and responsible for the success of the attack on Pearl Harbor, and is a distinct and unacceptable expression of dishonor toward two of the finest officers who have served in the Armed Forces of the United States.

(20) Major General (retired) Walter Short died on September 23, 1949, and Rear Admiral (retired) Husband E. Kimmel died on May 14, 1988, and the Department of Defense awarded the honor of being returned to their wartime ranks as were their fellow veterans of World War II.

(21) The Veterans of Foreign Wars, the Pearl Harbor Survivors Association, the Pearl Harbor Commemorative Committee and other associations and numerous retired military officers have called for the rehabilitation of the reputations and honor of the late Rear Admiral (retired) Kimmel and the late Major General (retired) Short and for the opening of the advancement on the retired lists to their highest wartime grades.

(b) Request for ADVANCEMENT ON RETIRED LISTS.—(1) The President is requested—

(A) to advance the late Rear Admiral (retired) Husband E. Kimmel to the grade of admiral on the retired list of the Navy; and

(B) to advance the late Major General (retired) Walter C. Short to the grade of lieutenant general on the retired list of the Army.

(2) Any advancement in grade on a retired list requested under paragraph (1) shall not increase or otherwise modify the compensation or benefits from the United States to which any person is now or may in the future be entitled based upon the military service of the officer advanced.

(c) Sense of Congress.—It is the sense of Congress that—

(1) the late Rear Admiral (retired) Husband E. Kimmel performed his duties as Commanding General, United States Fleet, sufficiently and professionally, and, therefore, the losses incurred by the United States in the attacks on the naval base at Pearl Harbor, Hawaii, and other targets on the island of Oahu, Hawaii, on December 7, 1941, were not a result of dereliction in the performance of those duties by the then Admiral Kimmel; and

(2) the late Major General (retired) Walter C. Short performed his duties as Commanding General, Hawaiian Department, sufficiently and professionally, and, therefore, the losses incurred by the United States in the attacks on Hickam Army Air Field and Schofield Barracks, Hawaii, and other targets on the island of Oahu, Hawaii, on December 7, 1941, were not a result of dereliction in the performance of those duties by the then Lieutenant General Short.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON INDIAN AFFAIRS

Mr. SMITH of New Hampshire. I would like to announce that the Senate Committee on Indian Affairs will meet during the session of the Senate on Wednesday, May 26, 1999, at 9:30 a.m. to conduct a hearing on American Indian Youth Activities and Initiatives. The hearing will be held in room 805, Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CRIMINAL JUSTICE OVERSIGHT

Mr. SMITH of New Hampshire. Mr. President. I ask unanimous consent that the Senate Committee on Criminal Justice Oversight, of the Senate Judiciary Committee, be authorized to meet during the session of the Senate on Monday, May 24, 1999, at 3 p.m. to hold a hearing in room 226, Senate Dirksen Office Building, on "Bureau of Prisons Oversight: The Importance of Federal Prison Industries."

The PRESIDING OFFICER. Without objection, it is so ordered.
REMEMBERING THE NAVAJO CODE TALKERS ON MEMORIAL DAY

- Mr. RUDEN. Mr. President, as our nation gratefully remembers the deceased men and women of our military, I have a special commemoration for this Memorial Day, 1999. This year, as brave American patriots willingly put themselves in “harm’s way” to defend the values and national interests of all Americans in places like the Balkans and the Persian Gulf, I rise to remind my colleagues here in the United States Senate and the American people of one distinguished group of patriots who gave so unselshishly at a time when their rights of citizenship were restricted—the Navajo Code Talkers of World War II. For them, democracy here at home.

- Mr. Samuel Billison, the Navajo legislator, Mr. President, I rise today to bring to everyone’s attention the issue of lamb imports. These imports are being sold well below the price of identical domestic products and have created a slow motion, chain reaction collapse of the lamb market that continues through this day.

- This industry also suffers from severe and consistent price undercutting by importers.

- Evidence of the price disparity can be found in the report prepared by the U.S. International Trade Commission. The Commission made dozens of product-to-product comparisons. In 8 out of 10 comparisons, the Commission found imports undercutting domestic products by margins of 20 percent to 40 percent.

- Other comparisons have found disparities reaching as high as 70 percent. This gulf is directly related to global economic conditions. In Asia, the widespread economic crash left traditional buyers unable to pay for new shipments of lamb meat from Australia and New Zealand—those products had to go somewhere.

- It couldn’t go to the European market. The European Union has absolute quotas in place to protect its own suppliers and the lamb feeder.

- And so it went, with domestic producers hoping the surge would slow of its own accord. Hoping the importers would realize the costs.

- As 1945 unfolded, all six divisions of America’s Marines—Bougainville, Tarawa, Cape Gloucester, the Marshall Islands, Saipan, Guam, and Peleliu.

- As in 1945, the Navajo Code Talkers were serving with the occupation forces in Japan and China.

- The historical accomplishments and story of the Navajo Code Talkers must be preserved and retold for future generations. These Native American communications experts used their native tongue to thwart the enemy: to expedite military operations for critical defensive and offensive initiatives in combat. Learning their story and repeating it is more than a matter of historical accuracy and completeness, or even a matter of just recognition and gratitude. As my friend Tom Weyant pointed out—speaking, I believe, for all Delawareans—it is also critical that Americans enter the New Millennium understanding the community ethos and deep patriotism of the Navajos who fought in World War II. The Navajos saw that “pulling together” was a matter of national survival. They gave selflessly to defend ideals that even today, all we Americans still have not fully realized here in the United States, because the Navajos had faith that America would always continue to move toward the realization and fulfillment of those ideals.

- Mr. President, we in Delaware salute the Navajo Code Talkers of World War II. They are unsung heroes who played a vital role in our ultimate success in the Pacific by providing a code which the Japanese never could decipher. While many knew that Native Americans faithfully served in the war, including Navajos, it was not until 1968 that the existence of this top-secret code was finally declassified and made public. Our entire country is indebted to Mr. Billison, to all the Navajo Code Talkers, and to the thousands of Native Americans from various tribes who served so loyally and selflessly in both the Pacific and European theaters of World War II. We must never forget the ultimate sacrifice these Native Americans were willing to make at a time when they and their families were not even allowed to vote or participate in the full fruits of American citizenship in their state.

- Mr. Samuel Billison, the Navajo legacy of patriotism, the Navajo contribution of their unique skills, the Navajo heritage of heroism, and the Navajo example of love for America must be carried forward by us all. You and we stand to enjoy the full blessings and rights of citizenship were re-established for all Americans.

- It is only fitting, therefore, that Post Commander Mark Newman sees that “pulling together” is a matter of just recognition and gratitude. As my friend Tom Weyant pointed out—speaking, I believe, for all Delawareans—it is also critical that Americans enter the New Millennium understanding the community ethos and deep patriotism of the Navajos who fought in World War II. The Navajos saw that “pulling together” was a matter of national survival. They gave selflessly to defend ideals that even today, all we Americans still have not fully realized here in the United States, because the Navajos had faith that America would always continue to move toward the realization and fulfillment of those ideals.

- Mr. President, we in Delaware salute the Navajo Code Talkers of World War II. They are unsung heroes who played a vital role in our ultimate success in the Pacific by providing a code which the Japanese never could decipher. While many knew that Native Americans faithfully served in the war, including Navajos, it was not until 1968 that the existence of this top-secret code was finally declassified and made public. Our entire country is indebted to Mr. Billison, to all the Navajo Code Talkers, and to the thousands of Native Americans from various tribes who served so loyally and selflessly in both the Pacific and European theaters of World War II. We must never forget the ultimate sacrifice these Native Americans were willing to make at a time when they and their families were not even allowed to vote or participate in the full fruits of American citizenship in their state.

- Mr. Samuel Billison, the Navajo legacy of patriotism, the Navajo contribution of their unique skills, the Navajo
But the onslaught from imports was relentless. From the processors and packers to the feeders, the domestic market crash now reaches all the way to farms and ranches that have stood for generations—an entire industry teeters on the edge of financial ruin.

Last fall, some producers with sheep to sell couldn’t find a single buyer. For the second Easter-Passover row, the market’s traditional high point and the largest holiday marketing period of the year—live lambs were selling in the 60-cent per pound range. Few producers in the country can remain in business at those prices.

Let me add my voice to those urging the President to fashion strong, effective import relief for the U.S. lamb industry. This relief must do two things, curb this unprecedented surge of imports and level the playing field.

RECOGNITION OF EDGAR LEE NEWTON

Mr. LEVIN. Mr. President, I rise today to pay tribute to a remarkable person from my home state of Michigan, Mr. Edgar Lee Newton. On May 23, 1999, Mr. Newton will be honored upon his retirement after 18 years as the president of the Bay City branch of the NAACP.

As president of the Bay City NAACP, Edgar Newton has fought many difficult battles for equality and civil rights. Although his tireless efforts on behalf of the NAACP are worthy of recognition in their own right, Mr. Newton has not confined his community service to the NAACP. He has also served with distinction in leadership roles with organizations like the American Red Cross, the United Way, Habitat for Humanity and the Kiwanis Club.

Edgar Newton’s departure from the NAACP will mark a new chapter in his life. I can only hope it is as successful as his civil rights career. Though I am sure he will remain active in the Bay City community, he will enjoy spending more time with his wife Shirley and his two children and grandchild. I am pleased to join his colleagues, friends and family in offering my thanks for all he has done.

Mr. President, Edgar Newton can take pride in the many important achievements of his tenure with the NAACP. He has truly exhibited dedication to justice and equality for all people. I know my colleagues will join me in saluting his commitment to civil rights and in wishing him well in his retirement.

MELISSA YORK, WINNER OF JAMES MADISON MEMORIAL FOUNDATION FELLOWSHIP

Mr. GORTON. Today, I would like to recognize Melissa York, a teacher from Tyee High School in Seatac. She has won Washington State’s 1999 James Madison Memorial Foundation Fellowship which will pay for her graduate school program.

James Madison was perhaps the hardest working and most widely respected man of his day. Commonly hailed as the Father of our Constitution, Madison had more to do with its conception than any other man. He was the driving force in organizing the convention and in establishing the tone and ironing out each obstacle that threatened the success of the Constitution.

Because of Madison’s tremendous contributions to the creation of the Constitution, Congress decided to establish the Memorial Foundation Fellowship to recognize Americans who teach American history and the Constitution to our young people.

Each day teaches eleventh and twelfth graders about the Constitution and how it is used in everyday life and how it is reflected in our society. The future of our country depends on today’s students and on their knowledge and appreciation of our Constitution and government.

She not only gives her students greater understanding of our country, but she also inspires her students to achieve more through her example. By continuing her own education, Melissa is showing her students that the educational process should never end.

I applaud Melissa for her hard work and dedication to her profession and for her commitment to her students and to learning.

SALUTE TO ALEX XUE

Mr. LEAHY. Mr. President, on May 14th, MATHCOUNTS held its national competition in Washington, D.C.—the culmination of local and national competition involving 350,000 students. It gives me great pleasure to inform my colleagues that Alex Xue, a resident of Essex Junction, VT finished second in this competition and received a $6,000 college scholarship.

In a day and age where we are bombarded by reports of failing school systems and apathetic young people, I believe it is extremely important to recognize Alex’s tremendous accomplishments. His success is a tribute not only to his own intelligence and hard work, but also to his family, his teachers and his school community.

In addition to meeting with Alex and his MATHCOUNTS teammates on the Senate steps prior to the competition, by coincidence, I was on Alex’s flight back to Vermont on the Sunday following his competition. I had a chance to talk with Alex and compliment him on his tremendous achievement. He was holding the trophy he had received and when I admired it, although it was clear that he was happy with it, he was especially pleased with the college scholarship. I praised him as any Vermonter would, but I was impressed with his modesty and his pride in his family and school. This is a young man who does remarkably well in life and we Vermonters should be proud that he is one of us.

I ask that the editorial detailing Alex’s achievement, which appeared in the Burlington Free Press, be printed in the Record.

The article follows:

[From the Burlington Free Press, May 19, 1999]

WHAT ALEX KNOWS

Imagine a 13-year-old boy who finished second in the nation in an athletic event.

Vermont would know exactly how to celebrate: His parents and coaches would be praised, he would be held up as a role model for other kids, his community would be proud.

Alex Xue of Essex Junction deserves the same response, for scoring second in a nationwide math contest involving 350,000 students.

This remarkable performance is a tribute to his school, though schools are rarely praised these days. This success requires effective instruction year after year, and it begins with the families who care enough to make sure their children’s academics as they do on their sports.

The high finish is also a sign that he is a smart kid, very smart, and that is worth a great deal in the life Alex and his classmates have ahead of them.

Of course, schools cannot fix their attention solely on top students, because they must serve everyone who enters their doors. But they can recognize talent and reward performance, because it motivates other students, and because it serves as a reminder of what school is for: to learn, to strive, to fail at times and gain by the experience, and to achieve.

For his knowledge of math, statistics, geometry and more, Alex receives a $6,000 college scholarship—a fitting prize. Learning offers rewards for every student, though, not just the smartest, and education level is the clearest indicator of a person’s wages.

Wont’ it be fun to see what becomes of Alex and his abilities? Wouldn’t it be something if society thought of every child’s potential that way?

FRIENDS OF ROMAN LEE Hruska

Mr. HAGEL. Mr. President, I ask that the attached comments made by the Honorable Charles Thome at the memorial service for former Senator Roman Lee Hruska, be printed in the Record for Monday, April 26, 1999, immediately following my remarks entitled “Tribute to U.S. Senator Roman L. Hruska.”

The comments follow:

FRIENDS OF ROMAN LEE Hruska

Friends all:

First, let me, and all of you here today, recognize two special people, Millie and Carl Curtis. Sen. Curtis served all 22 years with Roman, and Senator Hruska always acknowledged that no U.S. Senator ever had a more caring, a better and more cooperative colleague anywhere—anytime. Thank you, Senator Curtis.
CONGRESSIONAL RECORD—SENATE

INTRODUCTIONS

It seems only fitting to also recognize all public officials present. It is from the Senate, that Roman sprung. He epitomized public service at its best. He lived it! He loved it! He honored it!

He has been pleased to know that, at the outset here, all Judges, current & past, all Federal, State and County officials, current and past, are asked to stand for a brief silent recognition. I also want to especially recognize Governor Mike Johanns; Former Governor Kay Orr and Bill; Former Governor Ben Nelson, Former Governor and U.S. Senator Jim Exon; and; former Congressman John Y. McCollister and Nan; Nebraska Supreme Court Chief Justice John Hendry; Congressman Doug Bereuter and Louise; and Congressman Lee Terry. Also, a special salute to former chair of the Lancaster County Board and the lifelong Douglaus Theatre skit business partner of Roman, Bill Brehm of Lincoln and his charming wife Louise Brehm. Also, Attorney General Don Stenberg, a former Huskers staff member.

It was the British iconoclast, George B. Shaw who once wised opine, “No remarks from a former Governor are all that bad” — if they are underwritten by Good stuff, but be honest. The work in remembering Roman, I’m inclined to want to cover everything, filibuster a bit, if you please, and exhaust both your goodwill and patience, so I’m going to cheat! I can! He was so special to me and many of you, too.

His Work Ethic

Roman’s work was always his total recreation—Oh, occasionally he would superfically get involved in later years, perhaps the mighty Cornhuskers on to victory! Early on, I must concede, he would have easily accepted the specious thought that “a quarterback was a refund on the ticket.”

Many here will remember genial Dean Pohlenz, the Senator’s long time and wonderful AA. He and I once seriously conspired against Roman and another very studious and important top aide to Roman, Bob Kutak. (Kutak and Harold Rock later organized Kutak-Rock, a very successful national law firm with which Roman proudly associated after leaving the Senate.) Kutak’s interest and knowledge of sports made Roman a huge fan. They stayed down in history as a sports classic—of sorts. He was the Senate architect of its Interstate Commerce Committee and consistently ‘sounded out’ as the Senate’s Commerce Committee Chair. He advised on finalizing a professional football league. He tried to persuade Stengel to advise on finalizing a professional baseball league. It didn’t happen, but it was a near miss.

The Campaigner

Roman was never happier nor better showcased than when he was on those early day political campaigns. Ruth and I were visiting the other day about a particular stump speech he once made—with a partially eaten kolache in his left hand—on a Main Street corner at Schuyler during the Nebraska Republican caravan. It was indeed a powerful speech, spiced with Czech phrases and when he finished his remarks, the audience acknowledged him as if he were truly the “second coming.” The same result happened a couple of weeks later in a Hotel Ballroom in Broken Bow where the usually very reserved Roman began his remarks with a five minute standing ovation on his inspiring message and brilliant delivery. Oh, he could be a spell-binder deluxe, given the proper occasion.

A Near Miss

In the late 50’s, a national search was on for a new leader of the Republican Party. The conservative kingmakers didn’t publicize it, of course. A short list came down to the two U.S. Senators with safe seats, Roman Hruska and Barry M. Goldwater of Arizona. Goldwater was ultimately designated somewhat on geography, but mostly because they determined that the TV cameras showcased Goldwater better. The rest, as they say, is history.

The Honored Law

Most importantly, Roman Hruska’s entire life revolved around the law. He lived by this creed once enunciated by Patrick Henry, “Always honor the law because the law has honored you.”

Roman spent his first two law years studying at the University of Chicago Law School. Then he attended the Creighton Law School from which he graduated in 1929, just before the great depression hit with all its fury. He then, in the next 20 or so years, built up a substantial law practice, and from there was appointed to the Douglas County Court. He was also a tremendous beneficiary of his Senate Appointments. He was from Ed Owen, Morrie Jacobis, Art Storz, Don Ross, John McCollister, Peter Kiewit, Cliff and Ann Batchelder were notables as his early Omaha Betterment Co-Conspirators.

The World-Herald Respect

He always thought the Omaha World-Herald was easily the country’s best newspaper and frequently checked in with then publisher, Walt Christensen and editor, Fred Buehner. There was also a brilliant, hard working Statehouse and Douglas County Court House Reporter named Harold Ander- sen, whom he respected very much. World-Herald-wise, we wonder what ever happened to Harold.

Family Love

Family was most important to Roman. His wife and life-long partner, Victoria Kuncel Hruska was simply the best. A special wife and mother—and a political associate in a very effective low-key way—no film-flam, no nonsense, just honest—beautiful Victoria. He married Victoria in 1942. The last visit of the late and vivacious daughter, Jana at the David City Library Dedication Ceremony. She has been suffering terribly from a dread disease, Gehrig’s disease. He loved his family, Charlie, Paul, is here from Maryland. Son Quentin came home several years ago and carefully cared so well for his parents, the “Big Guy”, eldest son, Roman Jr., earlier on this program—his wife is the former Mary Ann Behlen of Columbia. Many grandchildren, nieces and nephews are also here today. Ultimately, family was first for Roman—as it is with all of us.

The Campaigner

Roman was never happier nor better showcased than when he was on those early day political campaigns. Ruth and I were visiting the other day about a particular stump speech he once made—with a partially eaten kolache in his left hand—on a Main Street corner at Schuyler during the Nebraska Republican caravan. It was indeed a powerful speech, spiced with Czech phrases and when he finished his remarks, the audience acknowledged him as if he were truly the “second coming.” The same result happened a couple of weeks later in a Hotel Ballroom in Broken Bow where the usually very reserved Roman began his remarks with a five minute standing ovation on his inspiring message and brilliant delivery. Oh, he could be a spell-binder deluxe, given the proper occasion.

A Near Miss

In the late 50’s, a national search was on for a new leader of the Republican Party. The conservative kingmakers didn’t publicize it, of course. A short list came down to the two U.S. Senators with safe seats, Roman Hruska and Barry M. Goldwater of Arizona. Goldwater was ultimately designated somewhat on geography, but mostly because they determined that the TV cameras showcased Goldwater better. The rest, as they say, is history.

The World-Herald Respect

He always thought the Omaha World-Herald was easily the country’s best newspaper and frequently checked in with then publisher, Walt Christensen and editor, Fred Buehner. There was also a brilliant, hard working Statehouse and Douglas County Court House Reporter named Harold Andersen, whom he respected very much. World-Herald-wise, we wonder what ever happened to Harold.

Family Love

Family was most important to Roman. His wife and life-long partner, Victoria Kuncel Hruska was simply the best. A special wife and mother—and a political associate in a very effective low-key way—no film-flam, no nonsense, just honest—beautiful Victoria. He married Victoria in 1942. The last visit of the late and vivacious daughter, Jana at the David City Library Dedication Ceremony. She has been suffering terribly from a dread disease, Gehrig’s disease. He loved his family, Charlie, Paul, is here from Maryland. Son Quentin came home several years ago and carefully cared so well for his parents, the “Big Guy”, eldest son, Roman Jr., earlier on this program—his wife is the former Mary Ann Behlen of Columbia. Many grandchildren, nieces and nephews are also here today. Ultimately, family was first for Roman—as it is with all of us.
Herald editorial writer noted: “The standards for integrity and service that Sen. Hruska set for himself, will long stand as his most fitting memorial”.

A quick postscript paraphrasing beautiful Ecclesiastes, Chapter III, “to everything there is a season and a time for every purpose under heaven … A time to plant, and a time to harvest, a time to be born and a time to die.”

Roman, you had a long and superlative life, and we’re all a little better because you cared and touched us.

Mr. Czeh—Nas Dar—Good Bye—Dear Rome…

RETIREMENT OF MAJOR GENERAL DAVID W. GAY

Mr. LIEBERMAN. Mr. President, I rise today to bring to the attention of the Senate the retirement of Major General David W. Gay, Adjutant General of the Connecticut National Guard, after a military career that has spanned more than 40 years.

The recipient of many military awards and honors, including the Army Distinguished Service Medal, the Legion of Merit Award, and the National Guard’s Eagle Award, General Gay has been a valuable friend to me and all the people of Connecticut. His experience and dedication have helped make the Connecticut National Guard the exemplary organization that it is today.

General Gay’s contributions to the state go far beyond his command of both the Army and Air National Guard. His record of community service equals his record of military service and his participation in such activities as the Nutmeg State Games and the Connecticut Counts State Advisory Board demonstrate his love for the community he calls home.

Even in retirement, General Gay will continue to work for the people of Connecticut as the state’s Year 2000 Coordinator. I am happy to extend my thanks to General Gay for his years of distinguished service and offer my best wishes in his retirement.

SUPPORT FOR S. RES. 99

Mr. REID. Mr. President, I ask that the attached letter of support from the American Psychological Association be printed in the Record in support of S. Res. 99.

The letter follows:

AMERICAN PSYCHOLOGICAL ASSOCIATION.

Hon. Harry Reid,
U.S. Senate,
Washington, DC.

Dear Senator Reid: On behalf of the 159,000 members and affiliates of the American Psychological Association (APA), I want to express support for your proposed Senate Resolution that would designate November 20, 1999, as “National Survivors for Prevention of Suicide Day.”

The APA is concerned that suicide rates among young adolescents, African American males, American Indians/Alaskan Natives, and the elderly have increased dramatically in recent years. Since the 1950’s, suicide rates among youth have nearly tripled. Between 1980 and 1990, the suicide rate increased by 30 percent in the 10- to 19-year-old age group. Suicide is the second leading cause of death for 15- to 24-year-old American Indians and Alaskan Natives. For Americans ages 65 and older, the suicide rate increased by nine percent between 1980 and 1992. Elderly Americans comprise about 13 percent of the country’s population but account for about 20 percent of all suicides.

Suicide is the fourth leading cause of death in the United States—our country is in dire need of a national effort to prevent suicide. In response to that need, the Surgeon General has been working with mental health advocates to develop a National Strategy for the Prevention of Suicide and is expected to publish a final version of the coordinated strategy later this year.

Your proposed Senate resolution would serve to further the intent of S. Res. 84, which you successfully introduced in the last Congress as a national problem and declare suicide prevention as a national priority. The proposed resolution would acknowledge the trauma of those who have suffered have suffered from suicide (suicide survivors) and the support they derive from one another. Their active involvement individually and through organizations has been critical in efforts to reduce suicide through research, education, and treatment programs.

In closing, the APA lends its support to you and other proponents of Congress in securing passage of this resolution. We also look forward to learning more about the administration’s initiatives at the upcoming hearing on the National Strategy for the Prevention of Suicide before the Appropriations Subcommittee on Labor-Health and Human Services and Education.

With best regards,
RAYMOND D. FOWLER, Ph.D.,
Executive Vice President and Chief Executive Officer.

SMALL BUSINESS ADMINISTRATION’S PERSON OF THE YEAR: MR. GREGORY SULLIVAN

Mr. ASHCROFT. Mr. President, it is with great pride that I stand before this body today to congratulate a truly remarkable Missourian, Mr. Gregory Sullivan—the Small Business Administration’s Person of the Year. Mr. Sullivan exemplifies the “American Dream,” and is living proof that with hard work and dedication any one individual can succeed.

SALUTE TO LOIS BODOKY

Mr. LEAHY. Mr. President, I salute a longtime Vermont businesswoman, and a fixture on Burlington’s Church Street Marketplace, Mrs. Lois Bodoky.

Lois is affectionately known in Burlington as the “Hot Dog Lady” for her recently celebrated the 25th anniversary of her business running a hot dog cart in downtown Burlington.

Lois went into the hot dog business not long after her hair salon was lost in a fire. She started her business the same year she was running my first campaign for U.S. Senator. Back then, Church Street was a typical Vermont downtown, and Lois operated her cart on the sidewalk as a huge growth in information technology industry. At that point, she had to decide on his business’ future. In December 1992, he engaged with an aggressive business expansion program. He engaged an advertising agency, developed a business plan, designed a logo, hired a marketing consultant to build a sales staff and started aggressively recruiting technical talent. Since that time, sales have grown over 1,400 percent and he now employs nearly 175 people—his clear vision paid off.

While Greg’s custom software development services company provides leading edge information technology in the business arena—he personally is a leader in the community. He was recently appointed Vice Chairman of Science and Technology for the St. Louis Regional Commerce and Growth Association. I understand that he personally conducts workshops on resume writing skills, interviewing and networking to help students be competitive in the after-graduation job market.

Mr. Sullivan is the 36th recipient of this annual entrepreneurial award. He was selected from a field of 53 state small business owners representing the 50 states, the District of Columbia, Puerto Rico and Guam. The national entrepreneur award is the highlight of the Small Business Administration’s national Small Business Week celebration. Small Business Week honors contributions of the nation’s small business owners who are the backbone of this great nation. The SBA selects winners on their record of stability, growth in employment and sales, sound financial status, innovation, and the company’s response to adversity and community service.

It honors me to stand before you today to congratulate Mr. Sullivan as the Small Business Administration’s Person of the Year. Mr. Sullivan exemplifies the “American Dream,” and is living proof that with hard work and dedication any one individual can succeed.
May 24, 1999

CONGRESSIONAL RECORD—SENATE

10677

to amend the provisions of title 17, United States Code, and the Communications Act of 1934, relating to copyright licensing and carriage of broadcast signals by satellite.

The Honorable Peter G. Angelos, Senator for Maryland, do pass with the following amendment:

TITLE I—SATELLITE HOME VIEWERS IMPROVEMENTS ACT

SEC. 101. SHORT TITLE.

This title may be cited as the "Satellite Home Viewers Improvements Act".

SEC. 102. LIMITATIONS ON EXCLUSIVE RIGHTS; SECONDARY TRANSMISSIONS BY SATELLITE CARRIERS WITHIN LOCAL MARKETS.

(a) IN GENERAL—Chapter 1 of title 17, United States Code, is amended by adding after section 121 the following new section:

"§122. Limitations on exclusive rights; secondary transmissions by satellite carriers within local markets.

"(a) SECONDARY TRANSMISSIONS OF TELEVISION BROADCAST STATIONS BY SATELLITE CARRIERS.—A secondary transmission of a primary transmission of a television broadcast station into the station's local market shall be subject to statutory licensing under this section if—

"(1) the secondary transmission is made by a satellite carrier;

"(2) the secondary transmission is permissible under the rules, regulations, or authorizations of the Federal Communications Commission; and

"(3) the satellite carrier makes a direct or indirect charge for the secondary transmission to the public.

"(b) EACH SUBSCRIBER RECEIVING THE SECONDARY TRANSMISSION; OR

"(c) A DISTRIBUTOR THAT HAS CONTRACTED WITH THE SATELLITE CARRIER FOR DIRECT OR INDIRECT DELIVERY OF THE SECONDARY TRANSMISSION TO THE PUBLIC.

(b) REPORTING REQUIREMENTS.—

"(1) INITIAL LIST.—A satellite carrier that makes secondary transmissions of a primary transmission made by a network station under subsection (a) shall, within 90 days after commencing such secondary transmissions, submit to the network that owns or is affiliated with the network station a list identifying (by name and street address, including county and zip code) all subscribers to which the satellite carrier delivers any transmissions made by such network station.

"(2) SUBSEQUENT LIST.—After the list is submitted under paragraph (1), the satellite carrier shall, on the 15th of each month, submit to the network a list identifying (by name and street address, including county and zip code) all subscribers to which the satellite carrier delivers any transmissions made by such network station after the last submission under this subsection.

"(3) USE OF SUBSCRIBER INFORMATION.—Subscriber information submitted by a satellite carrier under this subsection may be used only for the purpose of monitoring compliance by the satellite carrier with this section.

"(4) REQUIREMENTS OF STATIONS.—The submission requirements of this subsection shall apply to a satellite carrier only if the network to which the submissions are to be made places on file with the Register of Copyrights a document identifying the name and address of the person to whom such submissions are to be made. The Register shall maintain for public inspection a file of all such documents.

"(c) NO ROYALTY FEE REQUIRED.—A satellite carrier whose secondary transmissions are subject to statutory licensing under subsection (a) shall have no royalty obligation for such secondary transmissions.

"(d) NO ROYALTY FEE WITH REPORTING REQUIREMENTS.—Notwithstanding subsection (a), the willful or repeated secondary transmission to the public by a satellite carrier into the local market of a television broadcast station of a primary transmission made by that television broadcast station and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided under sections 502 through 506 and 509, if the satellite carrier has not complied with the reporting requirements of subsection (b).

"(e) WILLFUL ALTERATIONS.—Notwithstanding subsection (a), the secondary transmission to the public by a satellite carrier into the local market of a television broadcast station of a primary transmission made by that television broadcast station and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and sections 509 and 510, if the content of the particular program in which the performance or display is embodied, or any commercial advertising or other announcement transmitted by the primary transmitter during, or immediately before or after, the transmission of such program, is in any way willfully altered by the satellite carrier through changes, deletions, or additions, or is combined with programming from any other broadcast station.

"(f) VIOLATION OF TERRITORIAL RESTRICTIONS ON STATUTORY LICENSE FOR TELEVISION BROADCAST STATIONS.—

"(1) INDIVIDUAL VIOLATIONS.—The willful or repeated secondary transmission to the public by a satellite carrier of a primary transmission made by a television broadcast station and embodying a performance or display of a work to a subscriber who does not reside in that station's local market, and is not subject to statutory licensing under section 119, is actionable as an act of infringement under section 501 and is fully subject to the remedies provided by sections 502 through 506 and 509, except that—

"(A) no damages shall be awarded for such act of infringement if the satellite carrier took corrective action by promptly withdrawing service from the ineligible subscriber; and

"(B) any statutory damages shall not exceed $5 for such subscriber for each month during which the violation occurred.

"(2) PATTERN OF VIOLATIONS.—If a satellite carrier engages in a willful or repeated pattern or practice of secondarily transmitting to the public a primary transmission made by a television broadcast station and embodying a performance or display of a work to subscribers who do not reside in that station's local market, and are not subject to statutory licensing under section 119, then in addition to the remedies under paragraph (1)—

"(A) if the pattern or practice has been carried out on a substantially nationwide basis, the court shall order a permanent injunction barring the secondary transmission by the satellite carrier of the primary transmissions of that television broadcast station, and if such television broadcast station is affiliated with such network, the court may order statutory damages not exceeding $250,000 for each 6-month period during which the pattern or practice was carried out; and

"(B) if the pattern or practice has been carried out on a local or regional basis with respect to more than one television broadcast station, the court may order statutory damages not exceeding $50,000 for each such television broadcast station, and if such television broadcast station is affiliated with such network, the court may order statutory damages not exceeding $250,000 for each 6-month period during which the pattern or practice was carried out.

"(g) ENFORCEMENT.—The provisions of this title may be enforced by the United States Attorney for the district in which the violation occurred; and

"(h) JURISDICTION.—The district courts of the United States shall have jurisdiction of all actions brought under this title.

SEC. 103. WRIT OF INJUNCTION.

The district courts of the United States shall have jurisdiction of all actions brought under this title.

SEC. 104. MEDIATION.

The district courts of the United States shall have jurisdiction of all actions brought under this title.

SEC. 105. CONSTRUCTION.

This title shall be liberally construed to carry out its purposes.

SEC. 106. SEVERABILITY.

If any provision of this title, or the application thereof to any person or circumstance, is held invalid, the validity of the remainder of this title, or the application of such provision to other persons or circumstances, shall not be affected thereby.
CONGRESSIONAL RECORD—SENATE
May 4, 1999

SEC. 102. EXCLUSION WITH RESPECT TO SECONDARY TRANSMISSIONS.—The statutory license created by this section shall apply to secondary transmissions to locations in the United States, and any commonwealth, territory, or possession of the United States.

SEC. 103. COMPLIANCE WITH FCC RULES AND REMEDIAL SERVICE.

SEC. 104. COMPUTATION OF ROYALTY FEES FOR SECONDARY TRANSMISSIONS.

(A) by adding at the end the following:

(9) SUPERSTATION.—The term ‘superstation’, means a household that cannot receive, through the use of a conventional outdoor rooftop receiving antenna, an over-the-air signal of grade B intensity (as defined by the Federal Communications Commission of a primary network station affiliated with that network or is not otherwise eligible to receive directly from a satellite carrier a signal of that television network (other than a signal provided under section 122)) in accordance with section 338 of the Communications Act of 1934.

(B) NETWORK.—The rate of the royalty fee in section 119(d)(4)(B) is reduced by 30 percent.

(C) The term ‘network service’ means an over-the-air, commercial or non-commercial television broadcast station licensed by the Federal Communications Commission relating to carriage of television broadcast signals by satellite carriers.

(D) The term ‘satellite carrier’ and ‘secondary transmission’ have the meaning given under section 119(d) for purposes of section 119.

(E) The term ‘subscriber’ means an entity that receives a secondary transmission service by means of a secondary transmission from a satellite and pays a fee for the service, directly or indirectly, to the satellite carrier or to a distributor.

SEC. 105. DEFINITIONS.

SEC. 202. FINDINGS.

The Congress makes the following findings:

(1) In the Cable Television Consumer Protection and Competition Act of 1992, Congress stated its policy of promoting competition in cable services and making available to the public a diversity of views and information through cable television and other video media.

(2) In the Telecommunications Act of 1996, Congress stated its policy of securing lower prices and higher quality service for American telecommunications consumers and encouraging the rapid deployment of new telecommunications technologies.

(3) In most places throughout America, cable television system operators still do not face effective competition from other providers of multichannel video service.

(4) Absent effective competition, the market power exercised by cable television operators enables them to raise the price of cable service to consumers, and to control the price and availability of cable programming services to other multichannel video service providers. Current Federal Communications Commission rules have been inadequate in constraining cable price increases.

(5) Direct-to-home satellite service has over 8 million subscribers and constitutes the most significant competitive alternative to cable television service.

(6) Some direct-to-home satellite service currently suffers from a number of statutory, regulatory, and technical barriers that keep it from being
(7) The most prominent of these barriers is the inability to provide subscribers with local television broadcast signals by satellite.

(8) The cost of direct-to-home satellite service, unlike cable television systems, cannot at this time carry all local television broadcast signals in all the local television markets they seek to serve.

(10) It would be in the public interest for providers of direct-to-home satellite service to fully comply with the mandatory signal carriage rules at the earliest possible date. In the interim, requiring full compliance with the mandatory signal carriage rules would substantially limit the ability of direct-to-home satellite service providers to offer multichannel video services and would not serve the public interest.

(11) Maintaining the viability of free, local, over-the-air television service is a matter of preeminent public interest.

(12) All subscribers to multichannel video services should be able to receive the signal of at least one station affiliated with each of the major broadcast television networks.

(13) Millions of subscribers to direct-to-home satellite service currently receive the signals of network-affiliated stations not located in these subscribers' local television markets. Where conventional rooftop antennas cannot provide satisfactory reception of local stations, distant network stations may be these subscribers' only source of network television service.

(14) The widespread carriage of distant network stations in local network affiliates' markets could harm the local stations' ability to serve their local community.

(15) Abrupt termination of satellite carriers' provision of distant network stations' signals could have a negative impact on the ability of direct-to-home satellite service to compete effectively in the provision of multichannel video services.

(16) A lack of test would be served by permitting direct-to-home satellite service providers to continue existing carriage of a distant network affiliate's signal where—

(A) a subscriber is unserved by the local station affiliated with that network affiliate;

(B) the local network affiliate cannot be adequately received off-air; or

(C) continued carriage would not harm the local network station.

SEC. 203. PURPOSE.

The purpose of this title is to provide competition in the provision of multichannel video services while protecting the availability of free, local, over-the-air television service, particularly for the 22 percent of American television households that do not subscribe to any multichannel video programming service.

SEC. 204. MUTUALITY FOR SATELLITE CARRIERS RETRANSMITTING TELEVISION BROADCAST SIGNALS.

Part I of title 1 of the Communications Act of 1934 (47 U.S.C. 301 et seq.) is amended by adding at the end thereof the following:

"SEC. 338. CARRIAGE OF LOCAL TELEVISION STATIONS BY SATELLITE CARRIERS.—(a) APPLICATION OF MANDATORY CARRIAGE TO SATELLITE CARRIERS.—The mandatory carriage provisions of sections 614 and 615 of this Act will apply in a local market no later than January 1, 2000 ...

(b) Costs.—A television broadcast station eligible for carriage under subsection (a) may be required to provide delivery of a good quality signal to the designated local receive facility of the satellite carrier. The selection of a local receive facility by a satellite carrier shall not be made in a manner that frustrates the purposes of this Act. The Commission shall implement the requirements of this section without imposing any undue economic burden on any person.

(c) Rulemaking.—The Commission shall adopt rules implementing paragraph (1) within 180 days after the date of enactment of the Satellite Television Act of 1999.

(d) Definitions.—In this section:

(1) TELEVISION BROADCAST STATION.—The term 'television broadcast station' means a television broadcast station that is owned or operated by, or affiliated with, a broadcasting network.

(2) BROADCASTING NETWORK.—The term 'broadcasting network' means a television network in the United States which offers an interconnected program service on a regular basis for 15 or more hours per week to at least 25 broadcast stations in 10 or more States.

(3) DISTANT TELEVISION STATION.—The term 'distant television station' means any television broadcast station which is not licensed and operating on a channel regularly assigned to the local television market in which a subscriber to a direct-to-home satellite service is located.

(4) LOCAL TELEVISION MARKET.—The term 'local television market' means the designated market area in which a station is located. For a noncommercial educational television broadcast station, the local television market shall be the community within the same designated market area as the noncommercial educational television broadcast station.

(5) LOCAL CARRIER.—The term 'local carrier' has the meaning given it by section 119(d) of title 17, United States Code.

SEC. 339. CARRIAGE OF DISTANT TELEVISION STATIONS BY SATELLITE CARRIERS.—(a) PROVISIONS RELATING TO NEW SUBSCRIBERS.—

(1) IN GENERAL.—Except as provided in subsection (b), direct-to-home satellite service providers shall be permitted to provide the signals of 1 affiliate of each television network to any household that initially subscribed to direct-to-home satellite service on or after July 10, 1998.

(2) ELIGIBILITY DETERMINATION.—The determination of a new subscriber's eligibility to receive the signals of one or more distant network stations as a component of the service provided pursuant to paragraph (a) shall be made by ascertaining whether the subscriber resides within the predicted Grade B service area of a local television station. The Individual Location Longley-Rice methodology described by the Commission in Docket 98-201 shall be used to make this determination. A direct-to-home satellite service provider shall provide the signal of a distant network station to any subscriber determined by this method to be unserved by a local station affiliated with that network.

(b) Rulemaking.—Within 90 days after the date of enactment of the Satellite Television Act of 1999, the Commission shall adopt rules that shall be consistent with rules adopted by the Commission in Docket 98-201.

(c) Penalty for Violation.—Any direct-to-home satellite service provider that knowingly and willfully provides the signals of 1 or more distant television stations to subscribers in violation of this section shall be liable for a forfeiture in the amount of $50,000 per day per violation.

(d) Certain Signals.—Providers of direct-to-home satellite service may continue to carry the signals of distant television stations to subscribers located outside the limits of the predicted Grade A and Grade B contours of a local network station who received those distant network signals before July 11, 1998.

(2) CONTINUING CARRIAGE.—Direct-to-home satellite service providers may continue to provide the signals of distant television stations to subscribers located between the outer limits of the predicted Grade A and Grade B contours of the corresponding local network stations after December 31, 1999, subject to any limitations adopted by the Commission under paragraph (2).

(3) Rulemaking.—(A) Within 180 days after the date of enactment of the Satellite Television Act of 1999, the Commission shall adopt rules providing for the waiver procedure specified in subsection (b) that are consistent with subchapter II of title 5, United States Code, to examine the extent to which any existing program exclusivity rules shall be imposed upon direct-to-home satellite service providers to subscribers under paragraph (2).

(B) The Commission shall not impose any program exclusivity rules on direct-to-home satellite service providers pursuant to subpara-
ORDERS FOR MAY 25, 1999

Mr. WARNER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 9:30 on Tuesday, May 25. I further ask consent that on Tuesday, immediately following the prayer, the Journal of the proceedings be approved to date, the morning hour be deemed to have expired, the time for the two leaders be reserved, and the Senate then resume consideration of S. 1059 as under that order.

I further ask unanimous consent that at the hour of 12:30 p.m. the Senate stand in recess until 2:15 p.m. in order for the party caucuses to meet.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I ask unanimous consent that no additional amendments be in order, other than the amendments agreed to in the previous consent, prior to the votes at 2:15 p.m. on Tuesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. WARNER. For the information of all Senators, the Senate will resume consideration of the Defense Authorization bill tomorrow. Under the order, the Senate will debate several amendments, with the votes on those amendments occurring in a stacked sequence beginning at 2:15 p.m. Tuesday afternoon. All Senators should, therefore, expect at least three votes occurring at 2:15. It is the intention of the majority leader to complete action on this bill as early as possible this week.
TAIWAN RELATIONS ACT

HON. MAURICE D. HINCHEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. HINCHEY. Mr. Speaker, on the occasion of the twentieth anniversary of the Taiwan Relations Act, I wish to take this opportunity to congratulate the Republic of China on Taiwan and its people on the progress they have made since that time. Taiwan has established itself as a stable political presence in Asia, an important economic power, and proof that democracy can work in Asia. At the time of its enactment, there were some who believed that this new foundation for relations between our countries would not work, that our friendship would dissipate, and that Taiwan would be weakened.

But that has not been the case. If anything, I believe our friendship and understanding has strengthened since that time. Taiwan’s determination not just to set its own course, but to develop and mature as a nation has grown. Its economic achievements in that time are especially impressive: no other Asian nation was as successful in withstanding the recent economic crisis on that continent. But I continue to believe that its most impressive achievement has been the development of a multi-party democracy, and its readiness to share power among its democratic parties.

I wish to extend my congratulations to President Lee Teng-hu—who once resided in my congressional district—on his achievements in office, and also to Representative Stephen S. F. Chen on the capable job he has done as Taiwan’s representative here under the Taiwan Relations Act.

TRIBUTE TO THE CHURCH OF SAINT ROSE OF LIMA

HON. ANTHONY D. WEINER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. WEINER. Mr. Speaker, I rise today to invite my colleagues to pay tribute to the Church of Saint Rose of Lima on the occasion of its Eighth Annual Dinner Dance.

The members of the Church of Saint Rose of Lima have long been known for their commitment to community service and to enhancing the quality of life for all New York residents. This year’s Dinner Dance is not only a festive happening, it is a chance for all of us to celebrate and pay tribute to a group of individuals who have dedicated their lives to helping others. This year’s honorees truly represent the best of what our community has to offer. Mario Russo and his wife, Diana, met in the Rockaways and were married at Saint Rose of Lima Church on November 30, 1941, by Rev. James Galvin. A carpenter by trade, Mario has worked on many of the Rockaway projects such as Hammels Houses, Arvene, Nordeck, Dayton and Surfside. Mario Russo has routinely worked on improving the quality of life of his friends and neighbors in the Rockaways. He has served as the head of the Somerville-Arvene Civic Association, President of the Arvene Civic Council and been a member of Community Board 14 for the last thirty years. In addition, Mario Russo, has been an active member of the American Legion, the Rockaway Civic Association, and his local Chamber of Commerce. For the last thirty-five years, Mario Russo has conducted a yearly campaign for Earth Day and Plant Up for Trees.

Jo Ann Francis Celeste Mullaney Shapiro, has been an active member of the Rockaway community for over fifteen years. Her involvement spans from graffiti removal projects, increasing our police protection, improving our children’s education, to fighting for our senior citizens. Jo Ann Shapiro is the Past President of the Rockaway Kiwanis Club and an active member of the Rockaway Beach Civic Association. She is a founding member of the Far Rockaway High School based Health Clinic and past Chairperson of its advisory board. She is an active member of the Business and Professional Women Club and the Peninsula Regular Democratic Club. Jo Ann has worked for the New York City Board of Education in Community School District 27 and served as her school’s U.F.T. Chapter Chairperson. She is an active member of the Saint Rose of Lima Parish and serves as Assemblywoman Audrey I. Pheffer’s Chief of Staff where she makes Rockaway’s issues, her issues.

Each of today’s honorees has long been known as innovators and beacons of good will to all those with whom they come into contact. Through their dedicated efforts, they have each helped to improve my constituents’ quality of life. In recognition of their many accomplishments on behalf of my constituents, I offer my congratulations on their being honored by the Church of Saint Rose of Lima.

RECOGNITION OF OSSABAW ISLAND FOUNDATION AND IMPORTANCE OF WORKING TO PRESERVE NATURAL HABITATS

HON. JACK KINGSTON
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. KINGSTON. Mr. Speaker, I rise today to recognize the Ossabaw Island Foundation and the Georgia Commissioner of Natural Resources for their efforts to preserve Ossabaw Island, Georgia’s first Heritage Preserve.

But that has not been the case. If anything, I believe our friendship and understanding has strengthened since that time. Taiwan’s determination not just to set its own course, but to develop and mature as a nation has grown. Its economic achievements in that time are especially impressive: no other Asian nation was as successful in withstanding the recent economic crisis on that continent. But I continue to believe that its most impressive achievement has been the development of a multi-party democracy, and its readiness to share power among its democratic parties.

I wish to extend my congratulations to President Lee Teng-hu—who once resided in my congressional district—on his achievements in office, and also to Representative Stephen S. F. Chen on the capable job he has done as Taiwan’s representative here under the Taiwan Relations Act.

RECOGNITION OF OSSABAW ISLAND FOUNDATION AND IMPORTANCE OF WORKING TO PRESERVE NATURAL HABITATS

HON. JACK KINGSTON
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. KINGSTON. Mr. Speaker, I rise today to recognize the Ossabaw Island Foundation and the Georgia Commissioner of Natural Resources for their efforts to preserve Ossabaw Island, Georgia’s first Heritage Preserve.

But that has not been the case. If anything, I believe our friendship and understanding has strengthened since that time. Taiwan’s determination not just to set its own course, but to develop and mature as a nation has grown. Its economic achievements in that time are especially impressive: no other Asian nation was as successful in withstanding the recent economic crisis on that continent. But I continue to believe that its most impressive achievement has been the development of a multi-party democracy, and its readiness to share power among its democratic parties.

I wish to extend my congratulations to President Lee Teng-hu—who once resided in my congressional district—on his achievements in office, and also to Representative Stephen S. F. Chen on the capable job he has done as Taiwan’s representative here under the Taiwan Relations Act.
Indiana. His praiseworthy efforts will be recog-
nized at Purdue University Calumet’s Com-
memoration Exercise as he will be receiving an
honorary doctor of humane letters degree.

Calvin Bellamy, a longtime resident of North-
west Indiana, has dedicated his life to public
service. In 1964, Mr. Bellamy graduated from
Indiana University and continued his educa-
tion at the University of Michigan where he
received his Juris Doctor cum laude and Order of
the Coif in 1967. He has continued his scholarly
work in law and has been nationally
recognized for his writing on constitutional
questions. Mr. Bellamy currently serves as the
chairman and chief executive officer of Bank
Calumet, with which he began his affiliation in
1975.

While Calvin Bellamy has dedicated consid-
erable time and energy to his work at the
bank, he has always made an extra effort to
give to the community. Some of the organiza-
tions for which he serves as the director of in-
clude: the Lake County Community Develop-
ment Committee, the Northwest Indiana World
Trade Council, the Hammond Historical So-
ciety, the Local Initiatives Support Corporation.
Additionally, he has served as president and
director of the Hammond Public Library, Lake
Area United Way, and the Legal Aid Society of
Greater Hammond. He has also been active
with the Hammond Historical Society, the Lake
County Bar Association, Northern Indiana Arts
Association, and the Indiana Bankers Associa-
tion.

Although his work and community service
put extraordinary demands on his time, Calvin
Bellamy has never limited the time he gives to
his most important interest, his family, espe-
cially his lovely wife, Cathy.

Mr. Speaker, I ask that you and my other
distinguished colleagues join me in com-
manding Calvin Bellamy for his lifetime of
dedication, service, and leadership in North-
west Indiana. His large circle of family and
friends can be proud of the significant con-
tributions this prominent individual has made.
Our community has certainly been rewarded
by the true service and uncompromising dedi-
cation displayed by Mr. Calvin Bellamy.

93RD ANNUAL MEETING OF THE
AMERICAN JEWISH COMMITTEE

HON. CHRISTOPHER H. SMITH
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. SMITH of New Jersey. Mr. Speaker, I
recently had the privilege of attending a forum
on “The Uprising of Anti-Semitism in Russia”
sponsored by the American Jewish Committee
at its 93rd annual meeting. This forum was at-
tended by several Members of Congress and
provided a useful opportunity for representa-
tives of the AJC and Members of Congress to
exchange their thoughts on the rise of anti-
Semitism in Russia and its responsibilities to
Congress.

In this connection, I distributed a statement
regarding the March 23 passage of H. Con.
Res. 37, a resolution that condemned the anti-

Semitic statements made by certain members
of the Russian State Duma, as well as com-
mending fair-minded members of the Duma
for their efforts to denounce such statements.
This resolution passed the House of Repre-
sentatives unanimously. As Chairman of the
Helsinki Commission, I was proud to have in-
cluded this resolution in the House, along with
every member of the Helsinki Commissi-
ion. A companion resolution in the Senate, S.
Con. Res. 37, was introduced by Com-
mission Co-Chairman Senator BEN
NIGHTHORSE CAMPBELL and Ranking Commissi-
ioner Senator FRANK LAUTENBERG.

Mr. Speaker, at this time, I submit this state-
ment for the RECORD.

STATEMENT OF THE HONORABLE CHRISTOPHER
H. SMITH

Good morning, ladies and gentlemen. It’s a
pleasure to meet with you today, at this 93rd an-
nual meeting of the American Jewish Commit-
tee and the forum on “Confronting
the New Upsurge of Anti-Semitism in Rus-
 sia.”

With the fall of the Soviet Union, many of
the “hidden” ills of that society that had been
“frozen” by a totalitarian regime de-
voted to superficial “order” re-emerged. One
of these was open anti-Semitism. Freedom of
the press has given rise to countless anti-Se-
mitic publications and leaflets. As you know,
two suspicious explosions took place in Mos-
cow recently near the Maria Roschina
and Chorale synagogues. These are only the most
recent instances of arson or suspected arson
against these two synagogues. Other syna-
gogues and Jewish cemeteries in the former
Soviet Union and Russia have been hit as
well.

In post-Soviet Russia, the residue of offi-
cial anti-Semitic propaganda of the Soviet
era—disguised by Moscow as “anti-Zion-
ism”—was bound to find a certain reception
among certain less-discriminating elements.
These attitudes, freed from the constraints of
the Iron Curtain and now fueled by the
Internet and an unrestrained press, and then
reinforced and cross-pollinated by neo-Nazi
and racists throughout the world. In their
fervent anti-communism, some extreme na-
tionalists have even resorted to a distorted
type of Jews as allies of communists
destroying Russia during the Soviet
period. In Russia today the communists
blame Jews for being allies of capitalists de-
stroying Russia. Finally, the economic mal-
aise experienced in Russia has engendered
hatred intolerance against not only Jews,
but toward many ethnic minorities, espe-
cially the so-called “dark people” from the
Caucasus.

It is deplorable when vandals and hate-
mongers attack and intimidate in any
society, but we must admit that such unfor-
tunate incidents do not take place only in
Russia. And, I have yet to meet any member
of the Russian Jewish community who wants
to return to the Soviet period. But I—and
know I can speak for other Members of the
House of Representatives—have been out-
raged by the antics and attitudes that have
been exhibited by some members of the Rus-
sian Duma, especially in the ranks of the
Communist Party.

In December of last year, Mr. Viktor
Ilyukhin, a Communist Party member and
Chairman of a Helsinki Commission
subcommittee, stated that Yeltsin’s “Jewish entourage” is
responsible for alleged genocide against the
Russian people. Another Communist Party
member, retired General Albert Makashov,
speaking at public rallies, referred to “the
Yids” and other “reforner and democrates” as
responsible for Russia’s problems and
threatened to make up a list of targets and
“send them to the other side.”

Incidentally, I have seen films of Mr.
Makashov’s performance. It is quite sober-
ing. I can only say, “Heaven help the Rus-
sian people and the world,” if he and his ilk
ever do triumph.

In fairness to the many conscientious
Russians inside and outside of the govern-
ment, these anti-Semitic statements were
were condemned in Russia. In response to the
public outcry, both in Russia and abroad, Com-

The U.S. Congress, though, has reacted
much differently. On March 23 of this year,
the House of Representatives passed unani-
mously H. Con. Res. 37, condemning anti-Semitic
statements made by members of the Russian Duma and
condemning actions taken by fair-minded
members of the Duma to censure the pur-
veyors of anti-Semitism within their ranks.

I was proud to have introduced this resolu-
tion in the House, along with every member
of the Helsinki Commission as original co-
sponsors. A companion resolution in the Sen-
ate, Senate Concurrent Resolution 19, has
been introduced by Commission Co-Chair-
man Senator BEN Nighthorse Campbell and
Ranking Commissioner Senator FRANK LAUT-
ENBERG.

In addition, several members of the Hel-
sinki Commission and I have written to Mr.
Zyuganov to express our dismay at his role
in the rise of anti-Semitism in Russia.

I am informed by the State Department
that in recent days at least, there have been
no more anti-Semitic statements emanating
from Duma members. However, as Elena
Bonner remarked earlier this year at Hel-
sinki Commission hearings, the para-

In any event, let me assure you that as
Chairman of the Helsinki Commission and as
Chairman of the Subcommittee on Interna-
tional Operations and Human Rights of
the House International Relations Com-
mittee, I will use every available oppor-
tunity to combat anti-Semitism and intoler-
ance in Russia.
TRIBUTE TO EDWARD A. KOZIARZ
HON. ANTHONY D. WEINER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. WEINER. Mr. Speaker, I rise today to invite my colleagues to pay tribute to Edward A. Koziarz on the occasion of his being honored for his twenty-five years of service to the members of Plumbers Local Union No. 1, U.A.

The members of the Plumbers Local Union No. 1 have long been known for their commitment to community service and to enhancing the quality of life for all New York City residents.

This gathering is not only a festive happening, it is a chance for all of us to celebrate and pay tribute to a man who has dedicated his life to helping others. Edward A. Koziarz, truly represents the best of what our community has to offer.

Edward A. Koziarz was born on November 13, 1936 in Ozone Park, New York. He and his loving wife, Annette, have three wonderful children and have taken great pride and joy in the successes of their four grandchildren.

Edward A. Koziarz was initiated into Plumbers Local #1 and appointed as a United Association Organizer in June of 1974. Since his election on July 1, 1978, Edward A. Koziarz has served as Local #1’s Business Agent, a post he holds to this very day. Edward A. Koziarz has also served his brothers in Local #1 by serving as a delegate to United Association Conventions in 1976, 1981, 1986, 1991 and 1996.

Edward A. Koziarz has been among the pre-eminent labor leaders of New York City Civil Service Skilled Tradersman since 1974 and is one of the Founding Fathers of the New York City Comptroller’s Prevailing Wage Council.

Edward A. Koziarz has long been known as an innovator and beacon of good will to all those with whom he has come into contact. Through his dedicated efforts, he has helped to improve our constituents’ quality of life. In recognition of his many accomplishments on behalf of my constituents, I offer my congratulations on his being honored by Plumbers Local Union No. 1, U.A. in recognition of his twenty-five years of service to the Union as an Organizer and Business Agent.

MONTELLO STUDENTS SPACE SEED PROJECT ON SPACE SHUTTLE DISCOVERY
HON. THOMAS E. PETRI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. PETRI. Mr. Speaker, this past year, students from Montello, Wisconsin worked on a project that entailed an international experiment which was included on last fall’s historic Discovery space shuttle flight.

The experiment involved vials of lettuce seeds from Wisconsin and chicory seeds from Italy being subjected to micro gravity, extreme heat and cold during the NASA flight. While in space, the project was tended by astronaut John Glenn. The seeds are being studied to determine the effects of space travel. Early results indicated that the space seeds did as well as the control seeds despite not being fertilized. This unexpected finding could have far-reaching implications for the environment.

The school-wide project included students of different ages and the central theme allowed all types of classes to be involved, such as English, history, and agriculture. The seed project, “Growing Montello Transglobally” is a joint effort with students from the II Montello region of Italy. The students communicated over the Internet using an Italian translator program.

During a visit to Montello High in January, I had the opportunity to discuss the project with the students and was impressed by their interests and abilities. I toured classes where students had participated in computer portions of the project, from sharing and tracking information with their sister school in Montello, Italy, to downloading and sending digital photographs. I was also impressed by a video documentary of the project and related activities that was made in conjunction with the Experimental Aircraft Association.

The Wisconsin students were able to go to Florida to view the Discovery launch in October. They raised their own money for the trip through a variety of fund-raisers which included selling cookies and T-shirts and hosting a spaghetti dinner.

Seventh and eighth grade students in the Montello School system are co-authoring a children’s picture book. The students developed their own ideas for the characters, plot settings, and illustrations featuring children from Montello, Italy and Montello, Wisconsin. The book will feature NASA projects as seen from the children’s perspective. They will be submitting the book to a professional publisher. A literacy quilt was created to highlight the success of the NASA Project.

Catherine Ellenbecker, teacher, has been asked to have the students do a multimedia presentation on the seed project at the Naval Academy in Annapolis in September.

The time and effort the students of Montello, Wisconsin and II Montello of Italy put into this project was phenomenal and their achievements and successes should be recognized. I believe these students deserve a full measure of praise for all they have accomplished.

A TRIBUTE TO DR. MICHAEL G. WEISS
HON. JERRY LEWIS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention today the fine work and outstanding contributions of Dr. Michael G. Weiss. Congregation Emanu El of San Bernardino, CA, will honor Dr. Weiss on June 5 as this year’s recipient of the Rabbi Norman F. Feldheym Award for distinguished service as a member of the board of directors as well as treasurer, vice president, and, from 1996-98, president of the congregation. Over the years, Dr. Weiss has been a tremendous inspiration to others through his love for Judaism and his commitment and devotion to the synagogue.

Dr. Weiss is also a widely recognized and highly respected member of the faculty of the Department of Psychology at California State University at San Bernardino. He is a psychotherapist in private practice as well as a consultant to numerous mental health facilities throughout the Inland Empire. A prolific author, Dr. Weiss has conducted research and written extensively on parenting, sexual awareness, and foster parenting.

Dr. Weiss has also given generously of his time to numerous civic and community-based organizations including Mothers Against Sexual Abuse, San Bernardino Child Advocacy Program, the Children’s Network of San Bernardino County, and the Center for Counseling and Parenting. In addition, he has been particularly active as an educator before numerous civic, religious, and professional groups at the local and national level.

Mr. Speaker, I ask that you join me and our colleagues in recognizing the tremendous contributions of Dr. Michael Weiss as he is presented with the Rabbi Norman F. Feldheym Award. Dr. Weiss, along with his wife, Ellen, and children, Emily and Zachary, provide an outstanding example of faith and family. It is especially appropriate that this honor is being bestowed at a ceremony also marking the 108th anniversary of the founding of Congregation Emanu El.

CONGRATULATIONS TO W. KEN MASSENGILL
HON. PETER J. VISCLOSKY
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. VISCLOSKY. Mr. Speaker, it gives me great pleasure to pay tribute to an outstanding citizen of Indiana’s First Congressional District, W. Ken Massengill. On Saturday, June 5, 1999, Mr. Massengill, along with his friends and family, will celebrate his retirement from United Steelworkers of America (USWA), District 7. The celebration will take place at St. Elijah Serbian-American Hall in Merrillville, Indiana.

Ken Massengill has dedicated a substantial portion of his life to the betterment of union members and the community of Northwest Indiana, as well as the entire state.

Mr. Massengill’s distinguished career in the labor movement has made his community, state, and nation a better place in which to live and work. For more than twenty-five years,
Mr. Massengill has served as an important figure as a member of the United Steel Workers of America. He has held several positions throughout his tenure, but none as important as Assistant Director of District 7, USWA, a position from which he retired in February of 1999.

As a union representative, Ken Massengill has held a variety of offices, ranging from union steward to Sub-District Director. In addition to his service to the union, he has devoted much of his time to community initiatives. Some of the activities Mr. Massengill has been involved with include: board member for both the Porter County and Michigan City United Way, Chairman of the Lake Area United Way Board of Trustees, member of the Indiana University Labor Studies Advisory Board, and President of the Indiana Unemployment Insurance Board. Additionally, he serves as the Indiana Steelworkers PEC Legislative Director, PAC Coordinator, and in 1994 was appointed by Former Governor Evan Bayh to the Indiana Port Commission where he currently served as the Chairman of the Port Commission.

On this special day, I offer my heartfelt congratulations to Ken Massengill. His large circle of family and friends can be proud of the contributions this prominent individual has made. His work in the labor movement provided union workers in Northwest Indiana opportunities they might not have otherwise had. Mr. Massengill’s leadership kept the region’s labor force strong and helped keep America working. Those in the movement will surely miss Mr. Massengill’s dedication and sincerity. I sincerely wish Ken Massengill a long, happy, and productive retirement.

CONGRATULATIONS TO MICHAEL R. NELSON, CHIEF DEPUTY U.S. MARSHAL FOR EASTERN DISTRICT OF CALIFORNIA

HON. ROBERT T. MATSUI
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. MATSUI. Mr. Speaker, I am honored to rise today in tribute to Michael R. Nelson, Chief Deputy U.S. Marshal for the Eastern District of California. As he celebrates his retirement, I ask all of my colleagues to join with me in saluting his outstanding public service career.

Mr. Nelson has been the Chief Deputy U.S. Marshal for the Eastern District of California for the past 10 years. He has overall responsibility for all operations and administrative programs within this major judicial district.

With almost 30 years of experience within the Marshals Service, Mr. Nelson has brought a vast range of knowledge, experience, and management skills to his current position as chief deputy.

His tenure in this position has been highlighted by his proactive approach to negotiating with local law enforcement agencies and jails. He has worked hard to eliminate most federal prison housing shortfalls within the Eastern District.

Mr. Nelson has always been concerned first and foremost with the safety of his deputy U.S. Marshals. He has initiated several programs within the district to ensure that all personnel are properly trained and given the tools necessary to prevent a hostile confrontation or critical incident.

He has worked hard to implement policies which provide for greater survival, firearms, and simulation training for the deputy U.S. Marshals in his district. Mr. Nelson also created an award winning Special Response Team in the district. This team, with all of its special training, has won numerous competitions against other local, state, and federal agencies.

The district’s Critical Response Team is another example of Chief Deputy Nelson’s extraordinary management capabilities. This team works closely with the Marshals Human Resources Division and Employee Assistance Program to ensure that the needs of Marshals personnel are met following any critical incident.

In 1989, Mr. Nelson received the Marshals Service Director’s Award for Outstanding Manager based on his innovative approach and great management skills. He has always been highly regarded by the local law enforcement community, the federal judiciary, and fellow employees alike.

I especially commend Mr. Nelson for his outstanding handling of the difficult logistics associated with the Unabomber Trial in Sacramento. U.S. Marshal Jerry Enomoto and Chief Deputy Nelson managed complex security arrangements with exceptional professionalism during this period.

While the new Federal Courthouse was being constructed in Sacramento, Mr. Nelson took an active role in making sure that the special requirements of the Marshals Service were included throughout the building. His thorough knowledge of the relevant security needs and on-site weekly inspections proved invaluable to the overall construction process.

Since taking over as Chief Deputy in 1990, Mr. Nelson has proved to be an excellent manager and budget officer. His prudent approach to budgeting limited resources is especially noteworthy.

Mr. Speaker, Chief Deputy U.S. Marshal Michael Nelson has been a great public servant in the Eastern District of California. I ask all of my colleagues to join with me in thanking him for his exceptional service and wishing him every success in all of his future endeavors.

TRIBUTE TO CHACELLA NEWTON

HON. DAVID E. BONIOR
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. BONIOR. Mr. Speaker, today I would like to congratulate Ms. Chacella Newton upon her retirement from her position as Food Service Director for the Macomb Intermediate School District. Her friends and colleagues will honor her with a retirement party at the Macomb Intermediate School District on May 26, 1999.

Chacella Newton has dedicated her career to health and good nutrition. For nearly 40 years, Chacella has worked in the field of Dietetics. In 1960, she accepted her first position as the Director of Dietetics at Detroit’s St. John Hospital. In 1967, Chacella took the position of Director of Dietetics at Alexander Blair Memorial Hospital. She worked there until 1978, when she accepted her current position as Food Services Director for the Macomb ISD.

Through her position with the Macomb Intermediate School District, Chacella has become known for her commitment to children’s health. She has led a number of state and national programs to improve services offered in school lunch rooms. Chacella has also provided valuable advice to others. Personally, I have relied on Chacella many times for her trustworthy opinions. Similarly, the food safety manual, when she wrote, has been sold in 16 states and used by the U.S. Department of Agriculture.

Chacella Newton is also a person dedicated to her community. She currently serves on the boards of the Macomb Essential Transport Services, the Comprehensive Youth Services and the Mount Clemens Public Library. In addition, Chacella was the first African American woman to take a seat on the Mount Clemens School Board. She has also served as the President of the Michigan School Food Service Association.

It is my honor and my privilege to congratulate Chacella Newton on her retirement from the Macomb Intermediate School District, and wish her the best of luck for the future.

TRIBUTE TO TEMPLE BETH AHAVATH SHOLOM

HON. ANTHONY D. WEINER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. WEINER. Mr. Speaker, I rise today to invite my colleagues to join with me in honoring Beth Ahavath Sholom on the occasion of its Annual Journal Luncheon. The members of Temple Beth Ahavath Sholom have long been known for their commitment to community service and to enhancing the quality of life for all New York City residents.

This year’s luncheon is not only a festive happening, it is a chance for all of us to celebrate and pay tribute to a group of individuals who have dedicated their lives to helping others. This year’s honorees truly represent the best of what our community has to offer.

Fran Arnowitz and her husband Manny have continuously surrounded themselves and their children in the warmth of Judaism through their involvement with Beth Sholom People’s Temple and Temple Beth Ahavath Sholom. Following Beth Shalom People’s Temple’s consolidation with Temple Ahavath Sholom, Fran Arnowitz became the Temple’s Treasurer, a post she still holds. Fran is widely regarded as a hard worker who has dedicated herself to addressing the needs of the Temple and its members.

Myron Klein, a long time member of Temple Ahavath Sholom prior to the consolidation, is a man who has distinguished himself through his service to the Temple that he loves. Myron
Klein has long been an active member of Temple Beth Ahavath Sholom’s Brotherhood and serves as its Treasurer. In addition, Myron has taken a leading role in the Temple’s fund-raising efforts and serves as the Chairman of the Goods and Services Auction which has raised thousands of dollars for the Temple.

Each of today’s honorees has long been known as innovators and beacons of good will to all those with whom they come into contact. Through their dedicated efforts, they have each helped to improve my constituents’ quality of life. In recognition of their many accomplishments on behalf of my constituents, I offer my congratulations on their being honored by Temple Beth Ahavath Sholom.

STEPHEN M. BARROUK HONORED

HON. PAUL E. KANJORSKI
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. KANJORSKI. Mr. Speaker, I rise today to pay tribute to a distinguished community leader and my good friend, Mr. Stephen M. Barrouk. In June, Leadership Wilkes-Barre will honor Steve with the group’s 1999 Distinguished Leadership Award. I am pleased and proud to have been asked to participate in this richly-deserving celebration.

A native of Wilkes-Barre, Steve graduated from E.L. Meyers High School. He earned a B.A. degree in Urban Studies/Economics and a Master’s Degree in Public Administration from the University of Pittsburgh. Steve went on to serve in the Department of City Development in Pittsburgh and later as the Deputy Director of the Allegheny County Department of Development. He also served as Executive Director of the Allegheny County Industrial Hospital and Higher Education Authorities.

Steve returned to Northeastern Pennsylvania to become the President/CEO of the Greater Wilkes-Barre Chamber of Business and Industry and its affiliates, the Greater Wilkes-Barre Industrial Fund and the Greater Wilkes-Barre Chamber of Commerce. He is also a member of the Luzerne County Convention Center Authority, the Pennsylvania Economic Development Association, the American Chamber of Commerce Executives, and the Industrial Development Research Council.

Steve serves on the board of the Economic Development Council of Northeastern Pennsylvania, the United Way of Wyoming Valley, the Ethics Institute, Blue Cross of Northeastern Pennsylvania, and the Downtown Task Force of Wilkes-Barre. Steve also serves on the board of the Earth Conservancy, a non-profit, charitable organization that is restoring, preserving, and developing more than 17,000 acres of land throughout Luzerne County previously owned by a bankrupt coal company. He also played an important role in helping to win an American Heritage River designation for the Upper Susquehanna-Lackawanna Watershed.

I have worked closely with Steve on countless projects to improve the quality of life for Northeastern Pennsylvania. Despite the enormity of the challenges he has faced on complex projects such as restoring the former Pomeroy’s building in downtown Wilkes-Barre, creating a new sports area/convention center, and the day-to-day work of attracting new industries to our area, Steve has always shown the utmost devotion to the community. He leads his organization with the highest level of professionalism.

Over the past several years, I have enjoyed working with Steve Barrouk to promote economic development in Northeastern Pennsylvania. Steve’s efforts have literally helped create thousands of jobs in the Wyoming Valley. I am pleased to join Leadership Wilkes-Barre in thanking Steve Barrouk for his efforts. Luzerne County will undoubtedly benefit from his further labors in the years ahead.

ANIMAL CRUELTY LEGISLATION

HON. ELTON GALLEGY
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. GALLEGY. Mr. Speaker, criminals should not profit from illegal acts. That is why I introduced H.R. 1887 last week that will ban illegal, disgusting acts that are occurring nationwide.

People around the country are making “crush videos.” The images feature women crushing small animals with their feet while wearing spiked heels. The videos are sold nationwide to people who enjoy this type of so-called “foot fetish.” and sellers of the video are making millions of dollars.

The acts of animals cruelty featured in the video are illegal under state law. However, according to District Attorney Michael Bradbury of Ventura County, California, it is difficult to prosecute these acts under state animal cruelty laws. First, a District Attorney must identify the individual in the video. This is a difficult task given the fact that most of the time, only the actress’ legs are shown. Second, it is difficult to prove that the act featured in the video occurred with the statue of limitations. Third, local animal cruelty laws do not prohibit the production, sale, or possession of the video. There are also no federal laws that could be used to prosecute the individuals.

Sick criminals are taking advantage of the loopholes in the local law and the lack of federal law on animal cruelty videos. This is a serious problem. Thousands of these videos are being sold. Thousands of dollars are being made. By not closing these loopholes and allowing this sick behavior, we are encouraging people to profit from violating the state animal cruelty laws. This must be stopped!

H.R. 1887 will put a stop to this offensive behavior. This legislation is narrowly tailored to prohibit the creation, sale or possession of a depiction of animal cruelty in interstate commerce for commercial gain. H.R. 1887 does not preempt state laws on animal cruelty. Rather, it incorporates the animal cruelty law of the state where the offense occurs.

I urge all of my colleagues to join me in pursuing this legislation which will put an end to profiling from these disgusting criminal acts. Please contact Wendy Wiseman of my staff at 5-5811 to cosponsor H.R. 1887.

WOMEN’S DEMOCRATIC CLUB OF MONMOUTH COUNTY PAYS TRIBUTE TO CHAIRMAN VICTOR V. SCUDIERY

HON. FRANK PALLONE, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. PALLONE. Mr. Speaker, on Sunday, May 23, the Women’s Democratic Club of Monmouth County, NJ, will pay tribute to Mr. Victor V. Scuderi, who for the past 10 years has served as the Monmouth County Democratic Chairman.

A native of Newark, NJ, Mr. Scuderi graduated from Seton Hall University. He served his country in the U.S. Army in both active and reserve duty. Since then, he has achieved the status of one of our most prominent citizens in the worlds of business and politics and in the civic life of our community. Scuderi is the President of Interstate Electronics in Hazlet and also oversees several other business ventures in New Jersey and Florida. But it is probably in his capacity as the Monmouth County Democratic Chairman that Vic Scudieri is best known.

As if his chairmanship didn’t keep him busy enough, Vic Scudieri devotes considerable time to many worthwhile causes. He serves on the boards of seven community organizations, and his energy, devotion and sincere commitment to giving something back to his community is felt in all of the endeavors that he is involved with. He is the chairman of the Bayshore Senior Day Center Board of Advisors, a lifeline to many area senior citizens, providing meals, companionship and daily activities. As chairman of the Buck Smith Memorial Foundation, he has overseen the granting of scholarships to deserving students. The Bayshore Hospital Health Care Center selected Mr. Scudieri as chairman of the Board of Trustees, where he is responsible for land acquisition and construction of facilities.

In recognition of all his hard work and generosity—and in spite of his natural sense of modesty—Vic Scudieri has received countless honors from civic and charitable organizations throughout New Jersey, including the Bayshore Senior Center, Brookdale College, Knights of Columbus, Society of St. Anthony of Padua, the NAACP, and various municipal and Democratic organizations.

On this occasion, Mr. Speaker, I am honored to join with the Women’s Democratic Club of Monmouth County, and the many friends of Victor Scudieri, in paying tribute to a great chairman and one of our most distinguished citizens.

COMMEMORATING THE LEADERSHIP OF EAST SIDE SCOUT-MASTER DAN NELSON

HON. BRUCE F. VENTO
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. VENTO. Mr. Speaker, we must recognize outstanding efforts by individuals that are...
The developer in possession of the 1,100 acres adjacent to Lake Phalen, Nelson joined in the neighborhood push for the sale of the property. Together the group was successful, eventually, in coming up with the developer’s price tag of $1.1 million, through private donations and appeals for funds to the Wisconsin Department of Natural Resources.

It’s for continued effort like that that the Boy Scouts of America Indianhead Council announced April 12 that Nelson has been awarded what is perhaps the most prestigious award in all of scouting, the William T. Hornaday Gold Medal.

“Rare is not an appropriate term (for the award). They are very, very extremely rare,” says Ron Phillips, chief executive of the Indianhead Council.

The award is given out to adult Scouting leaders such as Nelson who render a distinctive and unusual service to scouting and the legal profession. When he was a political science and international under-graduate at the University of Minnesota, Nelson learned about when he went to the camp as a Boy Scout.

All through that time, he never got tired of spending time at Beaver Valley Camp. For the last 23 years, Nelson has spent anywhere from five to 20 hours a week volunteering at the camp, teaching the activities such as soil conservation, trout pond repair and tree planting, the same things that he learned about when he went to the camp as an East Side youth.

Nelson, as he says, was “born, raised, and baptized on the East Side.” He grew up on Stillwater Avenue, and since then has moved only three miles, to his current home close to Lake Phalen, which he shares with his wife Sandy and three of his four children.

“He’s had many people recognized with our top award, the Eagle Scout award,” says Phillippo. For the kids to progress that far, he says, Scout leaders such as Nelson need to provide “hugs and opportunities” for them to work through the roughly 800 requirements necessary to get the badge.

Nelson’s love of teaching doesn’t stop at conservation practices. He’s a Big Brother, a Sunday school teacher, and a meet director for the local YMCA swim team. He’s also taught trial advocacy and been a Moot Court judge for Hamline and the Minnesota Bar Association.

While Nelson’s past accomplishments include being listed in the Hamline Law School’s Hall of Fame and four different Who’s Who books, and winning roughly a dozen scouting awards since 1990, he’s quite elated at having won the Hornaday Gold Medal.

“The Hornaday Gold Medal is awarded because of the regional or national impact,” he says. “I never thought I would get it, and I’m really delighted and surprised that I did get it.”

SOCIAL SECURITY AND MEDICARE SAFE DEPOSIT BOX ACT OF 1999

Mr. Packard. Mr. Speaker, I strongly support H.R. 1259, the Social Security and Medicare Safe Deposit Box Act of 1999.

Against attempts to raid the Social Security surpluses for more government spending by toughening budget procedures, this legislation will change the way the budget is presented so Social Security funds cannot be used for other purposes, including how we measure our Federal surplus.

Mr. Speaker, having paid into Social Security myself for over 40 years, I will never support hasty reforms that threaten the financial futures of those who have committed a lifetime of earnings to the system. As a father and a grandfather, I strongly believe it is time we take action to ensure Social Security will be available for generations to come.

I urge my colleagues to support H.R. 1259 and protect Social Security.

Mr. Packard. Mr. Speaker, I strongly support H.R. 1259, the Social Security and Medicare Safe Deposit Box Act of 1999.

The way I see it, we have to get Washington’s hands out of Social Security once and for all. We need to permanently prevent Washington from raiding the Social Security surpluses for wasteful spending programs. The simple truth is that the Social Security Trust Fund will go into the red in 14 years unless we act now to strengthen it. Under H.R. 1259, Washington would never be able to touch Social Security dollars again, as 100 percent will be saved for Social Security.

The Social Security and Medicare Safe Deposit Box Act of 1999 will help us guard against attempts to raid the Social Security surpluses for more government spending by toughening budget procedures. This legislation will change the way the budget is presented so Social Security funds cannot be used for other purposes, including how we measure our Federal surplus.

Mr. Speaker, having paid into Social Security myself for over 40 years, I will never support hasty reforms that threaten the financial futures of those who have committed a lifetime of earnings to the system. As a father and a grandfather, I strongly believe it is time we take action to ensure Social Security will be available for generations to come.

I urge my colleagues to support H.R. 1259 and protect Social Security.

Mr. Packard. Mr. Speaker, I strongly support H.R. 1259, the Social Security and Medicare Safe Deposit Box Act of 1999.

The way I see it, we have to get Washington’s hands out of Social Security once and for all. As a father and a grandfather, I strongly believe it is time we take action to ensure Social Security will be available for generations to come.

I urge my colleagues to support H.R. 1259 and protect Social Security.
Mr. KING. Mr. Speaker, I rise today to honor and recognize the 50th anniversary of the Kiwanis Club of Merrick which occurred on Sunday, May 23, 1999.

Known as “The Club With a Heart,” the work of the Kiwanis Club of Merrick has benefitted children, senior citizens, teachers, students, disabled youth, needy families and Merrick residents in general. By engaging in activities of fundamental importance to our community, the club has consistently shown itself to be a leader in civic service.

Whether it is the distribution of food baskets to needy families during the holidays, awarding scholarship funds to deserving high school graduates, picknicking with disabled youth or sponsoring geriatric home visits and sing-alongs, the dedicated members of the Merrick Kiwanis Club have played a crucial role in bettering the lives of countless members of New York’s third district since the club’s foundation in 1949.

Most recently, the club has undertaken efforts to donate pediatric trauma kits and portable emergency generators to local fire departments and distribute bicycle safety helmets free to all second and third graders in local elementary schools among many other laudable ventures.

As we prepare to enter the 21st century we must recognize those who have brought us to where we are today. For members of the Merrick extended community, the Kiwanis Club and its contributions on such a broad spectrum of initiatives has played an important role in the past half century and on behalf of the third district, I would add, that it is our sincere hope that their important work continues well into the next millennium.
go back to work, but they are caught in a Catch-22.

“Here’s the catch: “If you are disabled and Washington—via Social Security or Medicare—pays some of your health bills, you cannot work. Without a job, there’s a good chance you’ll end up on welfare.

“You want to work? Fine. You lose your benefits. Without benefits, there’s an outstanding chance you won’t make enough money to afford treatment.

“Today, roughly 9 million disabled Americans receive federal disability benefits. While many cannot work, others retain the ability and the desire.”

Mr. Speaker, Holly Caudill had the ability. She had the desire. She found the whole system aligned against her iron will to work. Yet she did work. She helped to make our system of justice work as an Assistant U.S. Attorney, while she so vigorously advocated for justice and dignity in work for persons with disabilities.

Before she reached her goal, of an American where people with disabilities could work and enjoy the fruits of their labors, our Heavenly Father brought her home. There are no wheelchairs there, Mr. Speaker.

Let the permanent RECORD of the Congress of the United States today note that Ms. Holly Caudill, Assistant U.S. Attorney in San Diego, California, was an inspiration to me and to many others, and a friend of America. May God rest her soul, and give peace to her family, the ability and the desire.”

INTRODUCTION OF THE E—MAIL USER PROTECTION ACT

HON. GENE GREEN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Mr. GREEN of Texas. Mr. Speaker, the internet is a communications medium that has significantly impacted our day-to-day lives. With the click of a button you can do just about anything. You can write to your family and friends. You can purchase clothes and groceries. You can even listen to music and watch videos. There is no doubt that the internet has become one of our civilizations most important innovations.

Unfortunately with these advancements come problems. One of the largest problems to face the internet is unsolicited bulk e-mail or spam. Today, I am introducing the E-Mail User Protection Act. Spam is a problem. It takes both time and money to wade through and delete these unsolicited messages. It is a problem which everyone agrees needs to be addressed immediately. This legislation attacks the problem by making the tools used fraudulently by spammers.

First, my legislation makes it illegal to falsify any identifying information such as e-mail addresses or routing information. Second, this bill makes a spammer for a spam message illegal to appropriate or take over an unsuspecting person’s e-mail account to spam others by subjecting the spammer to either a stiff financial penalty and/or possible jail time. Third, the legislation also requires spammers, upon the request of an individual, to remove them from their spam. Fourth, it makes it illegal to create, use, own or distribute software that is primarily designed to falsify e-mail identifying information. Fifth, any violations of these provisions incur a fine of either $50 per violating message or up to $10,000 a day the violation continues.

This is an excellent solution to the spam problem. The E-Mail User Protection Act of 1999 will start to weed out fraudulent spam and eliminate any hassle to internet users. By this, we will help to continue the growth, prosperity, and innovation of the internet.

AN ISSUE OF FUNDAMENTAL FAIRNESS

HON. LORETTA SANCHEZ
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 24, 1999

Ms. SANCHEZ. Mr. Speaker, I rise today to report to my colleagues the actions of the House Armed Services Committee. I regret the Committee’s failure to follow the recommendations of the Military Personnel Subcommittee to repeal the statutory prohibition on abortions in overseas military hospitals and to restore the law to what it was for many years.

If enacted, women stationed overseas would be permitted to use their own funds to obtain abortion services. No federal funds would have been used and health care professionals who are opposed to performing abortions as a matter of conscience or moral principle would not be required to do so.

This is an issue of fundamental fairness. Servicewomen and military dependents stationed abroad do not expect special treatment, only the right to receive the same legally protected medical services that women in the United States receive. We had the opportunity to finally put a stop to the misguided law that has endangered our servicewomen’s lives for far too long. It is unfortunate that the full committee did not follow the subcommittee’s direction.

The Department of Defense, the American Public Health Association, the American Medical Women’s Association, the American College of Obstetricians and Gynecologists, and the Planned Parenthood Federation of America have all indicated their support for the subcommittee’s decision.

If we are to attract the best and brightest of our nation’s young people to our Armed Forces we must act to restore this fundamental right. We cannot expect to attain our readiness and recruitment goals when potential soldiers know they will not have the same right to access to health care when they are stationed overseas.

It is our responsibility to restore the right of freedom of choice to women serving overseas in our nation’s Armed Forces. Members of the military and their families already give up many freedoms and risk their lives to defend our country. They should not have to sacrifice their privacy, their health or their basic constitutional rights because of a policy with no valid military purpose.
May 24, 1999

Finance
To resume hearings on Medicare reform issues, focusing on the work of the National Bipartisan Commission on the Future of Medicare.
SD–215
Banking, Housing, and Urban Affairs
Securities Subcommittee
To hold hearings to examine the private sector’s voluntary corporate bond price transparency initiative coordinated by the Bond Market Association (Corporate Traders 1).

CONGRESSIONAL RECORD—SENATE

SENATE—Tuesday, May 25, 1999

The Senate met at 9:30 a.m. and was called to order by the Honorable GEORGE V. VOINOVICH, a Senator from the State of Ohio.

The PRESIDING OFFICER. This morning we are privileged to have with us a guest Chaplain, Dr. Ronnie W. Floyd, of the First Baptist Church, Springdale, AR.

Pastor Floyd.

PRAYER

The guest Chaplain, Dr. Ronnie W. Floyd, First Baptist Church, Springdale, AR, offered the following prayer:

Let us pray together.

Holy God, I thank You that Your Word says in Romans 13:1, “For there is no authority except from God, and those which exist are established by God.” I am thankful the authority granted to these Senators today has not been granted simply by their constituencies but, most of all, that authority is given by You.

Therefore, O God, the responsibility is so great upon these men and women today. Every decision that is made has such a great impact all across the world.

So Lord, I ask for the Holy Spirit of God to empower these leaders in their decision making today. May the Word of God be their source of authority. May the Lord Jesus Christ be the only One they desire to please. May the people they represent in this country, whether rich or poor, male or female, or whatever race they may represent, be the benefactors of godly, holy, decision making today.

O Father, America needs spiritual revival, reformation, and awakening. So God, in the name of Your son, Jesus Christ, we close this prayer, asking You and believing in You to send a spiritual revival to our Nation that would change lives, renew churches, restore and refresh family relationships, provide hope to every American and, most of all, give You glory. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable GEORGE V. VOINOVICH, a Senator from the State of Ohio, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. VOINOVICH thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Senator from New Hampshire.

MR. SMITH of New Hampshire. Mr. President, I yield to the distinguished Senator from Arkansas.

Mr. HUTCHINSON, Mr. President, I thank the Senator for yielding.

DR. RONNIE W. FLOYD, GUEST CHAPLAIN

Mr. HUTCHINSON. Mr. President, I take a moment to express my appreciation to our guest Chaplain, Pastor Ronnie Floyd, Pastor of the First Baptist Church, Springdale, AR, who led the Senate in our opening prayer today. Chaplain Ogilvie was gracious enough to allow Pastor Floyd to lead us in prayer.

Pastor Floyd has been a dear friend of mine for many years; he has had a tremendous impact upon my family and my children. I have a son and daughter-in-law who today still worship in his church and have been greatly impacted by his ministry. Pastor Floyd has a national television ministry and has touched lives all across this country. It is a great privilege today to have him in our Nation’s Capitol ministering to us in the Senate.

I thank the Chair. I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from New Hampshire.

SCHEDULE

Mr. SMITH of New Hampshire. Mr. President, the leader has asked me to make a couple of announcements this morning.

The Senate, of course, will resume consideration of the defense authorization bill, and under the previous order the Senate will debate several amendments with the votes on those amendments occurring in a stacked sequence beginning at 2:15 today. Therefore, Senators can expect at least three votes occurring at 2:15 this afternoon. It is the intention of the majority leader to complete action on this bill as early as possible this week, and therefore Senators can expect busy sessions each day and evening.

I thank my colleagues for their attention to this matter.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2000

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1058, which the clerk will report. The legislative assistant read as follows:

A bill (S. 1059) to authorize appropriations for fiscal year 2000 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes.

Pending:

Roberts/Warner amendment No. 377, to express the sense of the Senate regarding the legal effect of the new Strategic Concept of NATO (the document approved by the Heads of State and Government participating in the meeting of the North Atlantic Council in Washington, D.C., on April 23 and 24, 1999).

Warner amendment No. 378 (to Amendment No. 377), to require the President to submit to the Senate a report containing an analysis of the potential threats facing NATO in the first decade of the next millennium, with particular reference to those threats facing a member nation or several member nations where the commitment of NATO forces will be “out of area”, or beyond the borders of NATO member nations.

Wellstone amendment No. 380, to expand the list of diseases presumed to be service-connected for radiation-exposed veterans.

Wellstone amendment No. 381, to require the Secretary of Defense to provide information and technical guidance to certain foreign nations regarding environmental contamination at United States military installations closed or being closed in such nations.

Wellstone amendment No. 382, to require the Secretary of Health and Human Services to provide Congress with information to evaluate the outcome of welfare reform.

Specter amendment No. 383, to direct the President, pursuant to the United

States Constitution and the War Powers Resolution, to seek approval from Congress prior to the introduction of armed forces from the United States Armed Forces in connection with the present operations against the Federal Republic of Yugoslavia or funding for that operation will not be authorized.

Roth amendment No. 388, to request the President to advance the late Rear Adm. (retired) Husband E. Kimmel on the retired list of the Navy to the highest grade held as Commander in Chief, United States Fleet, during World War II, and to advance the late Maj. Gen. (retired) Walter C. Short on the retired list of the Army to the highest grade held as Commanding General, Hawaiian Department, during World War II, as was done under the Officer Personnel Act of 1947 for all other senior officers as a result of investigations of command during World War II.

PRIVILEGE OF THE FLOOR
Mr. SMITH of New Hampshire. Mr. President, I ask unanimous consent that Maj. Clint Crosier, an Air Force fellow in my office, be granted floor privileges without the proceedings on the fiscal year 2000 authorization and appropriations bills.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The remarks of Mr. Smith of New Hampshire pertaining to the submission of S.J. Res. 25 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

AMENDMENT NO. 388

The ACTING PRESIDENT pro tempore. Under the previous order, there will be 30 minutes of debate, equally divided, with an additional 10 minutes under the control of the Senator from Texas, Senator Gramm, relative to the Roth amendment, No. 388.

Mr. ROTH. I yield 5 minutes to the distinguished Senator from Massachusetts.

The ACTING PRESIDENT pro tempore. Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I strongly support this amendment, which will at long last restore the reputations of two distinguished military officers who were unfairly scapegoated for the surprise attack on Pearl Harbor by Japan at the beginning of World War II—Admiral Husband E. Kimmel of the United States Navy and General Walter C. Short of the United States Army.

This amendment gives us an opportunity to correct a serious wrong in the history of that war. Admiral Kimmel and General Short were the Navy and Army in Hawaii under the command of Admiral Short had been properly positioned, given the information they had received, and that their superior officers had not given them vital intelligence that could have made a difference, perhaps all the difference, in America's preparedness for the attack. These conclusions of the wartime investigations were kept secret, in order to protect the war effort. Clearly, there is no longer any justification for ignoring these facts.

I first became interested in this issue when I received a letter last fall from a good friend in Boston who for many years has been one of the pre-eminent lawyers in America, Edward B. Hanify. As a young Navy lawyer and Lieutenant J.G. in 1944, Mr. Hanify was assigned as counsel to Admiral Kimmel. As Mr. Hanify told me, he is probably one of the few people that heard Kimmel's testimony before the Naval Court of Inquiry. He accompanied Admiral Kimmel when he testified before the Army Board of Investigation, and he later heard substantially all the testimony in the lengthy Congressional investigation of Pearl Harbor that followed by the Roberts Commission. In the 50 years since then, Mr. Hanify has carefully followed all subsequent developments on the Pearl Harbor catastrophe and the allocation of responsibility for that disaster.

I would like to quote a few brief paragraphs from Mr. Hanify's letter of last September, because it eloquently summarizes the overwhelming case for long overdue justice for Admiral Kimmel. Mr. Hanify writes:

The odious charge of 'dereliction of duty' made by the Roberts Commission was the cause of almost irreparable damage to the reputation of Admiral Kimmel, despite the fact that the finding was later repudiated and found groundless.

I am satisfied that Admiral Kimmel was subject to callous and cruel treatment by his superiors who were attempting to deflect the blame ultimately ascribed to them, particularly on account of their strange behavior on the evening of December 6th and morning of December 7th in failing to warn the Pacific Fleet and the Hawaiian Army Department that a Japanese attack on the United States was scheduled for December 7th, and that intercepted intelligence indicated that Pearl Harbor was a most probable point of attack. Washington had this intelligence and knew that the Navy and Army in Hawaii did not have it, or any means of obtaining it.

Subsequent investigation by both services repudiated the 'dereliction of duty' charge. The final report of the Naval Court of Inquiry found that his plans and dispositions were adequate and competent in the light of the information which he had from Washington—adequate and competent in the light of the information he had from Washington.

Mr. Hanify concludes:

The proposed legislation provides some measure of remedial Justice to a conscientious officer who for years unjustly bore the odium and disgrace associated with the Pearl Harbor catastrophe.

I have also heard from the surviving son of Admiral Kimmel. He and others in his family have fought for over half a century to restore their father's honor and reputation. As Edward Kimmel wrote:

Justice for my father and Major General Short is long overdue. It has been a long and hard struggle by the Kimmel and Short families to get to this point.

No public action can ever fully atone for the injustice suffered by these two officers. But the Senate can do its part by acting now to correct the historical record, and to restore the repudiated reputations of Admiral Kimmel and General Short.

I commend Senator BIDEN and Senator ROTH for their leadership on this amendment, and I urge the Senate to support it, and I ask unanimous consent that Mr. Hanify's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. EDWARD M. KENNEDY,
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR KENNEDY: I am advised that a Resolution known as the Hanify Amendment has been introduced in the Senate and that it has presently the support of the following Senators: Roth; Biden; Helms; Thurmond; Inouye; Stevens; Specter; Hollings; Faircloth; Cochran and McCain. The substance of the Resolution is to request the President to advance the late Rear Admiral Husband E. Kimmel to the grade of Admiral on the retired list of the Navy and to advance the late Major General Walter C. Short to the grade of Lieutenant General on the retired list of the Army.

Admiral Kimmel at the time of Pearl Harbor was Commander in Chief of the Pacific Fleet then based in Pearl Harbor and General Short was the Commanding General of the Hawaiian Department of the Army.

The reason for my interest in this Resolution is as follows: In early 1944 when I was a Lieutenant j.g. (U.S.N.R.) the Navy Department gave me orders which assigned me as one of counsel to the defense of Admiral Kimmel in the event of his promised court martial. As a consequence, I am probably one of the few living persons who heard the testimony before the Naval Court of Inquiry, accompanied Admiral Kimmel when he testified before the Army Board of Investigation and later heard substantially all the testimony before the members of Congress who carried on the lengthy Congressional investigation of Pearl Harbor. In the intervening fifty years I have followed very carefully all subsequent developments dealing with the Pearl Harbor catastrophe and the allocation of responsibility for that disaster.

On the basis of this experience and further studies over a fifty year period I feel strongly:

(1) That the odious charge of "dereliction of duty" made by the Roberts Commission was the cause of almost irreparable damage to the reputation of Admiral Kimmel despite the fact that the finding was later repudiated and found groundless;

CONGRESSIONAL RECORD—SENATE May 25, 1999
May 25, 1999

CONGRESSIONAL RECORD—SENATE

10693

(2) I am satisfied that Admiral Kimmel was subject to callous and cruel treatment by his superiors who were attempting to deflect the blame ultimately ascribed to them, particularly on account of their strange behavior on the evening of December 6th and morning of December 7th in failing to warn the Pacific Fleet and the Hawaiian Army Department that a Japanese attack on the United States was scheduled for December 7th at 8:00 p.m. Washington time (dawn at Pearl Harbor) and that intercepted intelligence indicated that Pearl Harbor was a most probable point of attack. Admiral Kimmel had this intelligence and knew that the Navy and Army in Hawaii did not have it or any means of obtaining it).

(3) Subsequent investigations by both services repudiated the “dereliction of duty” charge and in the case of Admiral Kimmel the Naval Court of Inquiry found that his plans and dispositions were adequate and comprehensive in light of the information which he had from Washington.

The proposed legislation provides some measure of remedial Justice to a conscientious officer for years unjustly bore the odium and disgrace associated with the Pearl Harbor catastrophe. You may be interested to know that a Senator from Massachusetts, Honorable Edward M. Kennedy, who as Chairman of the Senate Committee on the Naval Affairs Committee, was most effective in securing legislation by Congress which ordered the Army and Navy Departments to investigate the Pearl Harbor disaster—an investigation conducted with all “due process” safeguards for all interested parties not observed in other investigations or inquiries.

I sincerely hope that you will support the Roth/Biden Resolution.

Sincerely,

EDWARD B. HANIFY.

The ACTING PRESIDENT pro tem. Who yields time?

Mr. LEVIN addressed the Chair.

The ACTING PRESIDENT pro tem. The Senator from Michigan.

Mr. LEVIN. Mr. President, I yield myself 5 minutes.

On December 7, 1941, when Pearl Harbor was attacked by Japan, the commander in chief of the U.S. Fleet and commander in chief, U.S. Pacific Fleet. Major General Short was serving in the grade of lieutenant general as commander of the U.S. Army Hawaiian Department. Based on their performance at Pearl Harbor, both officers were relieved of their commands and were returned to their permanent ranks of rear admiral and major general on December 16, 1941.

The duty performance of Rear Admiral Kimmel and Major General Short has been the subject of numerous military and congressional inquiries since that time. The most recent examination was by Mr. President, the Under Secretary of Defense Edwin Dorn in 1995.

The Defense Department, after reviewing all of these inquiries, has concluded that the posthumous advancement in rank is not appropriate. In short, in this 1995 review, the Department of Defense concluded that Admiral Kimmel and General Short, as commanders on the scene, were responsible and accountable for the actions of their commands. Accountability as commanders is a core value in our Armed Forces.

Rear Admiral Kimmel’s and Major General Short’s superiors at the time determined that their service was not satisfactory and relieved them of their commands and returned them to their permanent grades. We should not, in my judgment, some 57 years later, substitute the judgment of a political body—the Congress—for what was essentially a military decision by the appropriate chain of command at the time.

Those who were in the best position to characterize their service have done so. Their superiors concluded that Rear Admiral Kimmel and Major General Short did not demonstrate the judgment required of people who serve at the three- and four-star level. I do not believe that this political body should now attempt to reverse that decision made by the chains of command in our military service. So I join the chairman of the Armed Services Committee in opposing this amendment.

I also note the letter from the Secretary of Defense to the then chairman of our committee, STROM THURMOND, saying the following:

While Under Secretary of Defense for Personnel and Readiness retired Rear Admiral Ed Dorn conducted a thorough review of this issue in 1996. He carefully considered the information contained in nine previous formal investigations, visited Pearl Harbor and personally met with the Kimmel and Short families. His conclusion was that responsibility for the Pearl Harbor disaster must be broadly shared, but that the record does not show that advancement of Admiral Kimmel and General Short on the retired list is warranted.

I appreciate the fact that the overwhelming consensus of the organizations and personnel mentioned in your letter recommends exoneration of Admiral Kimmel and Major General Short. However, information, however, I do not believe it appropriate to order another review of this matter.

Ed Dorn and I both agree that responsibility for this tragic event in American history must be broadly shared, yet I remain confident in the findings that Admiral Kimmel and General Short remain accountable in their positions as leaders.

To highlight very briefly the findings of the Under Secretary of Defense in the Dorn report, referred to by the Secretary of Defense, I will quote three or four of the findings.

Finding 1: Responsibility for the Pearl Harbor disaster should not fall solely on the shoulders of Admiral Kimmel and General Short; it should be broadly shared.

Finding 2: To say that responsibility is broadly shared is not to absolve Admiral Kimmel and General Short of accountability.

Military command is unique. A commander has the responsibility for the welfare of the people under his or her command, and is directly accountable for every thing the unit does or fails to do. . . . Commanders at the three- and four-star level involve daunting responsibilities. Military officers at that level operate with a great deal of independence. They have extraordinary skill, foresight and judgment, and a willingness and ability to accept responsibility for things about which they could not possibly have personal knowledge. . . . It was appropriate that Admiral Kimmel and General Short be relieved.

Then he goes into the information that he had.

I yield myself just 1 additional minute.

The PRESIDING OFFICER (Mr. ALBRIGHT). The Senator may continue.

Mr. LEVIN. Mr. President, finally in finding 3, the Dorn report says:

The official treatment of Admiral Kimmel and General Short was substantively temperate and procedurally proper.

Then finally:

There is not a compelling basis for advancing either officer to a higher grade.

Their superiors concluded that Admiral Kimmel and General Short did not demonstrate the judgment required of people who serve at the three- and four-star level. . . . * * * *

In sum, I cannot conclude that Admiral Kimmel and General Short were victims of unfair official actions and thus I cannot conclude that the official remedy of advancement on the retired list is in order.

Mr. President, I ask unanimous consent that portions of the Dorn report and the Secretary of Defense letter in opposition to the advancement of these two gentlemen be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Memorandum for the Deputy Secretary of Defense

ADVANCEMENT OF REAR ADMIRAL KIMMEL AND MAJOR GENERAL SHORT

1. Responsibility for the Pearl Harbor disaster should not fall solely on the shoulders of Admiral Kimmel and General Short; it should be broadly shared.

2. To say that responsibility is broadly shared is not to absolve Admiral Kimmel and General Short of accountability.

3. The official treatment of Admiral Kimmel and General Short was substantively temperate and procedurally proper.

There is not a compelling basis for advancing either officer to a higher grade.

His nomination is subject to the advice and consent of the Senate. A nominee’s errors and indiscretions must be reported to the Senate as adverse information.

In sum, I cannot conclude that Admiral Kimmel and General Short were victims of unfair official actions and thus I cannot conclude that the official remedy of advancement to the retired list is in order. Admiral Kimmel and General Short did not have all the resources they felt necessary. Had they been provided more intelligence and clearer guidance, they might have understood their situation more clearly and operated differently. Thus, responsibility for the magnitude of the Pearl Harbor disaster must be shared. But this is not a basis for contradicting the conclusions drawn consistently over several investigations, that Admiral Kimmel and General Short committed errors.
of judgment. As commanders, they were accountable.

The Secretary of Defense,
Washington, DC, November 18, 1997.
Hon. Strom Thurmond,
Chairman, Committee on Armed Services,
U.S. Senate, Washington, DC.

Dear Mr. Chairman: Thank you for your interest in exonerating the names of Admiral Kimmel and General Short. In the years since the fateful events at Pearl Harbor there have been numerous formal investigations into these issues up to this time, including sharp debate over our state of readiness at the time.

While Under Secretary of Defense for Personnel and Readiness, Mr. Edwin Dorn conducted a thorough review of this issue in 1995. He carefully considered the information contained in nine previous formal investigations, visited Pearl Harbor and personally met with the Kimmel and Short families. His conclusion was that responsibility for the Pearl Harbor disaster must be broadly shared, but that the record does not show that advancement of Admiral Kimmel and General Short on the retired list is warranted.

I appreciate the fact that the overwhelming consensus of the organizations and personnel in your letter recommend exoneration of Admiral Kimmel and General Short. Absent significant new information, however, I do not believe it appropriate to order another review of this matter.

Ed Dorn and I both agree that responsibility for this tragic event in American history must be broadly shared. I am confident in the findings that Admiral Kimmel and General Short remain accountable in their positions as leaders.

Sincerely,

William Cohen

Mr. ROTH. Mr. President, I yield myself 4 minutes.

I rise to address the Kimmel-Short resolution which I and Senators Duren, Thurmond, and Kennedy introduced to redress a grave injustice that haunts us from World War II.

That injustice was the scapegoating of Admiral Kimmel and General Short for the disastrous Pearl Harbor attack. This unjust scapegoating was given unjust permanence when these two officers were not advanced on the retirement list to their highest ranks of wartime command, an honor that was given to every other senior commander who served in wartime positions above his regular grade.

Our amendment is almost an exact rewrite of Senate Joint Resolution 19, that benefits from the support of 23 co-sponsors. It calls for the advancement on the retirement lists of Kimmel and Short to the grades of their highest wartime commands—as was done for every other eligible under the Officer Personnel Act of 1947.

Such a statement by the Senate would do much to remove the stigma of blame that so unfairly burdens the reputation of these two officers. It is a correction consistent with our military tradition of honor.

Allow me to review some key facts about this issue.

First, it is a fact that Kimmel and Short were the only two World War II officers eligible under the Officer Personnel Act of 1947 for advancement on the retired list who were not granted such advancement. No other officer or official paid a price for their role in the Pearl Harbor disaster. That fact alone unfairly perpetuates the scapegoating they endured for the remainder of their lives.

Second, there have been no less than nine official investigations on this matter over the last five decades. They include the 1944 Naval Court of Inquiry which completely exonerated Admiral Kimmel and the 1944 Army Pearl Harbor Board who found considerable fault in the War Department—General Short’s superiors. These investigations include that conducted by a 1991 Board for the Correction of Military Records which recommended General Short’s advancement on the retired list.

I can think of few issues of this nature that have been as extensively investigated and studied as the Pearl Harbor disaster. Nor can I think of a series of studies conducted over five decades where conclusions have been so remarkably consistent.

They include, first, the Hawaiian commanders were not provided vital intelligence they needed and that was available in Washington prior to the attack on Pearl Harbor.

Second, the disposition of forces in Hawaii were proper and consistent with the information made available to Admiral Kimmel and General Short.

Third, these investigations found that the handling of intelligence and command responsibilities in Washington were characterized by ineptitude, limited coordination, ambiguous language, and lack of clarification following.

Fourth, these investigations found that these failures and shortcomings of the senior authorities in Washington contributed significantly, if not predominantly, to the success of the surprise attack on Pearl Harbor.

The Presiding Officer. The 4 minutes have expired.

Mr. ROTH. Mr. President, I yield the floor.

Mr. GRAMM addressed the Chair.

The Presiding Officer. The Senator from Texas.

Mr. GRAMM. Mr. President, I understand under the previous order I have 10 minutes.

The Presiding Officer. The Senator is correct.

Mr. GRAMM. Mr. President, I have the highest regard for Senator Roth, our distinguished chairman of the Finance Committee. One can tell by looking at all the books on his desk that he has spent countless hours on research in this area. I have not done similar research in this area. But this is an issue that I have followed for my period of service in Congress, and I have followed it in part because of an interest in it, and in part because of my interest in the efforts of Dr. Samuel Mudd to exonerate this man. I am told that he is alleged to have played and in fact was convicted of playing in the post-assassination activities related to President Lincoln.

But I have come to the floor today to oppose this amendment because I strongly object to Congress getting into the business of rewriting history.

This is an old issue. There has been a lot of talk over the years about Admiral Kimmel and about General Short, and about the facts in the wake of the greatest military disaster in American history at Pearl Harbor. And there is no question about the fact that we were asleep on December 7th of 1941. There is no question about the fact that there were failures and shortcomings in that they did not talk to each other and put together the information they had. But there is probably no question about the fact that in the wake of that disaster, there was an effort to put the blame on someone, and it is also true that subsequent studies have concluded there was broad culpability.

But here is the point I want to make. We have a Board for the Correction of Military Records. We have an ongoing process within the Department of Defense to reevaluate decisions that have been made. This decision about Kimmel and Short bubbled all the way up to President Bush, who as you know, was the youngest naval aviator in American history in World War II.

President Bush decided to let contemporaries be the judge of historical events, and so he made the decision not to override the decision of military leaders at the time of Pearl Harbor. There was another vote passed on December 15th of 1995. That review was headed by Under Secretary of Defense for Personnel and Readiness, Edwin S. Dorn. Dorn concluded that, while it was clear that there was broad culpability, there was not sufficient evidence available now to override the previous decision, which did not include court-martial of these two military leaders; it simply included retiring them at their permanent rank.

Some of you will remember this issue because we went through it with a four-star admiral when there were questions about the abuse of women on his watch in the Navy. Some of you will remember that we actually had to cast a vote in that case. The issue was whether he should retire at his permanent rank, which was a two-star admiral, or as a four-star admiral. We had a very close vote on the decision to allow him to retire with his four-star rank, which he held on the day he left the military.

It is true that normally, military flag officers are allowed to retire above
May 25, 1999

CONGRESSIONAL RECORD—SENATE 10695

their permanent rank to the higher temporary rank held on the day they are severed from the military. But that is not always the case, and it is normally done as an indication that they have provided excellent service.

It was not an extraordinary thing in the wake of Pearl Harbor to, No. 1, retire the two officers in charge of the battle, No. 2, retire them at their permanent rank rather than elevating their rank upon retirement.

I urge my colleagues, with all due respect to Senator Roth, to let history be the judge of what happened at Pearl Harbor. We have a process within the Defense Department where recommendations can be made, where facts can be gathered on an objective basis, where the review can come up to the level of the Secretary of Defense and then come to the President, if necessary, to make a final decision. President Bush refused to override the judgment of history. The Clinton administration, through Under Secretary Dorn, has refused to override the judgment of history.

Now, there is no doubt about the fact that Senator Roth believes he is sufficiently knowledgeable about this case to override the judgment of history here. But I ask the other 99 Members of the Senate, are we sufficiently informed? Do we want to set a precedent here or build on precedents, bad precedents in my opinion, that have been set in the past of writing history on the floor of the Senate? I think we need to leave it to the official process. We need to leave it to historians to make these judgments.

I have been personally involved now for several years with the Dr. Mudd case. What has happened in that case is that Dr. Mudd has many influential heirs and they have set a goal of exonerating him. We now have gone through this extraordinary process where we literally are on the verge of rewriting history. We ask that the honor and reputations of the two officers in charge of the battle and the two officers in charge of the Navy be restored.

The Dorn report went through this tremendous research and on a great deal of fact. The point is, we are not the ones who should be making this judgment. There is a process underway. That process has come to the level of the President once; it has come to the level of the Under Secretary of Defense once; and in both cases, they have said they would allow the judgment of history to stand.

It is not as if these two military leaders were court-martialed. They were simply retired, something that happens every day in the military. And they were retired at their permanent rank, which is not ordinary but it is certainly not extraordinary.

What should be extraordinary is that retirement at temporary rank ought to be a reward for conspicuous service. And with an apparent judgment that we made about history that occurred in 1941, almost 58 years ago, I do not believe we have the ability, nor do I believe we have the moral authority as a political body, to go back and rewrite history. I ask my colleagues to oppose this amendment.

I yield back the remainder of my time.

Mr. ROTH. Mr. President, I yield myself 2 minutes.

We are not rewriting history. We are merely correcting the record. Just let me point out that the Dorn report, which has been mentioned time and again by those in opposition, specifically concluded that responsibility for the Pearl Harbor disaster should not fall solely on the shoulders of Admiral Kimmel and General Short; it should be broadly shared. Let me emphasize that: It should be broadly shared. In other words, there were others responsible, profoundly so in Washington. To place the blame on these two gentlemen, who had distinguished military careers, is wrong and is unfair. I believe we have a responsibility, a duty, to recommend to the President action that corrects this unfortunate misled.

In making this decision, let me point out that a number of endorsements of my resolution have been received from senior retired officers of the highest rank. For example, Arleigh Burke sent a letter in which he concluded that it is my conclusion that when all the circumstances are considered that you should approve this posthumous promotion and recommend it to the President.

The record contains important information, available to the Chief of Naval Operations in Washington, was never made available to Admiral Kimmel in Hawaii.

Lastly, the Naval Court of Inquiry, which exonerated Admiral Kimmel, concluded that his military decisions were proper based on the information available to him.

Let me now refer to a letter we received from several distinguished members of the Navy: Thomas Moore, Admiral, U.S. Navy; former Chairman, Joint Chiefs of Staff, William J. Crowe, Admiral, U.S. Navy; J.L. Holloway, Admiral, U.S. Navy; Elmo Zumwalt, Admiral, U.S. Navy. They wrote:

We ask that the honor and reputations of two fine officers who dedicated themselves to the service of their country be restored.

Admiral Husband Kimmel and General Walter Short were singularly scapegoated as responsible for the success of the Japanese attack on Pearl Harbor December 7, 1941. The time is long overdue to reverse this inequity and treat Admiral Kimmel and General Short fairly and justly. The appropriate vehicle for that is the current Roth-Biden Resolution.

Mr. President, I yield back the remainder of my time.

THE PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, last night the distinguished Senator Roth and I had an extensive debate on this issue, and we are basically covering much of the same ground this morning. I repeat, I just got off the phone with the Secretary of Defense Bill Cohen, his predecessor, Bill Perry.

The Dorn report went through this whole case very carefully. I recited the nine tribunals, including the Congress of the United States, that reviewed this matter, and certainly did not reach any conclusion that the action to which my good friend and colleague, the Senator from Delaware, asks the Senate to do today.

I associate myself with the remarks of our colleague from Texas.

But it is interesting. This is very extensive research performed by our colleague. I took the liberty of taking the book last night and going home to read it, which is a summary of the congressional hearings. What I find interesting is that the Congress absolutely put forward some of the most distinguished members of the Senate to form the Joint Committee on the Investigation of the Pearl Harbor Attack: Alben Barkley, Senator from Kentucky was the chairman; Jere Cooper, Representative from Tennessee, was the Vice Chairman. On the Senate side, just look at the names of the individuals. Based on my own personal knowledge but study of their careers in the Senate, they certainly were viewed as among the giants of the Senate during that critical period in history of World War II. Walter F. George, Senator from Georgia; Scott Lucas, Senator from Illinois; Owen Brewster, Senator from Maine; Homer Ferguson, Senator from Michigan. They were the elderly statesmen, the leaders of the Senate.

In their report, this is what the Committee on the Investigation of the Pearl Harbor Attack found. I refer to page 252. It says:

"Specifically, the Hawaiian commands failed to do the following. By "the Hawaiian commands," of course, they are referring to the Naval command under Admiral Kimmel and the Army command under General Short:
(a) To discharge their responsibilities in the light of the warnings received from Washington, other information possessed by them, and the principle of command by mutual cooperation.

The record astonishingly shows that these two senior officers, located on the principal islands of Hawaii, just did not collaborate together and share information and ideas as to how best to plan for the defense of the men and women of the Armed Forces, our interest in the islands at that time, and the critical assets; namely, Naval ships and aircraft that were located at that forward deployed area.

(b) To integrate and coordinate the facilities for defense and to alert properly the Army and Navy establishments in Hawaii, particularly in the light of the warnings and intelligence available to them during the period November 27 to December 7, 1941.

(c) To effect liaison on a basis designed to accommodate with the operations of the other, which was necessary to their joint security, and to exchange fully all significant intelligence.

I am going to repeat that—failure to exchange between the two of them and with their subordinate significant intelligence.

(d) To maintain a more effective reconnaissance within the limits of their equipment.

(e) To effect a state of readiness throughout the Army and Navy establishments designed to meet all possible attacks.

(f) To employ the facilities, material, and personnel, which were adequate at least to have greatly minimized the effects of the attack, in repelling the Japanese raiders.

(g) To appreciate the significance of intelligence and other information available to them.

In fairness, I will read another finding, and that is:

The errors made by the Hawaiian commanders were errors of judgment and not derelictions of duty.

Had there been dereliction of duty, these two men would have been court-martialed. But that was the decision made by the President of the United States, two successive Presidents—Roosevelt and Truman—not to do that. But they found them guilty of errors of judgment.

What we are asked to do is to put this body on notice that we are reversing the findings of the distinguished bipartisan panel of Senators and Members of the House of Representatives after taking all of this factual evidence into consideration. Look at the voluminous factual situation.

I asked my good friend last night: Are there any new facts on which the Senate could have as a predicate the conclusion that a court-martial was not to be held. But they were to be retired in the grades which they were in at permanent rank.

In this record is a request by these two officers to be retired, and the decision was made not to advance them at the time of retirement to the higher grade. The men were in the grades which they were in according to the findings of the distinguished bipartisan panel.

Mr. WARNER. The Clausen investigation, September 12, 1945; and, the joint congressional committee of May 1945. It is the joint congressional committee record—to now, after these many 50-plus years, go back and reevaluate the decisions of all of this work done by individuals, as the Senator from Vietnam be given an additional 5 minutes.

The PRESIDING OFFICER. The time of the Senator from Virginia has expired.

Mr. WARNER. Mr. President, I ask unanimous consent that the Senator from Virginia be given an additional 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. The Clausen investigation, September 12, 1945; and, the joint congressional committee of May 1945. It is the joint congressional committee record—to now, after these many 50-plus years, go back and reevaluate the decisions of all of this work done by individuals, as the Senator from Texas pointed out, with the authority to render such judgments would be to say to them: All of you are in error for not having done what the President and Congress of the time when history was least likely to have any benevolent intent. I am suggesting that history is best viewed with a little bit of distance. There was not any distance. I just ask everyone involved about what happened if something, God forbid, similarly happened today and this Senate, this body, and the administration decided they needed to investigate something immediately. My overwhelming instinct tells me there would be a need to find specific individuals who were responsible in order to satisfy our collective need for an answer.

I respectfully suggest that that is what happened here, and I respectfully suggest, as well, that we should not be fearful of the truth and we should not be fearful of going back in this open society of ours and not rewriting history, but setting the facts straight.

Ultimately, it is the President who must take action, but it is important that in the Senate we acknowledge that the historical truth matters and that it is never too late to acknowledge that the government did not treat the two commanding officers at Pearl Harbor on December 7, 1941, fairly. This committee took into consideration comes from our ability to honor truth and learn the lessons from our past.

If we lived in a closed society, fearful of the truth, then there would be no need for the President to take action. But we don’t. We live in an open society. Eventually, we are able to declasify documents and evaluate our past based on at least a good portion of the whole story. I believe sincerely that one of our greatest strengths as a nation comes from our ability to honor truth and learn the lessons from our past.

If we perpetuate the myth that Admiral Kimmel and General Short bear all of the blame for Pearl Harbor, then we miss the real story. We fail to look at the readiness shortfalls they were facing—the lack of adequate reconnaissance planes, pilots, spare parts, and
maintenance crews. We fail to look at the flawed intelligence model that was used—the disconnect between what was obtained and what got to the commanders in the field.

I mention these things in particular because there are some striking parallels to the problems facing today’s military. Today’s problems are of a different scope and scale, but it is important to see the parallels so that we can accurately judge our progress and our endemic problems.

The historic record is not flattering to our government in the case of the two commanding officers at Pearl Harbor and that is why it is our government’s responsibility to acknowledge its mistake. I want to emphasize that point, because it is important.

In last night’s debate over this amendment, that decision—and against it agreed on most of the facts. Where there was disagreement, it seems to me, was in what to do about the facts. I believe we should urge the President to take action, because government action in the past shrouded the truth and scapegoated Kimmel and Short.

I know Senator Roth and Senator Thurmond discussed some of the history last night, so I will just briefly review some of the critical parts.

In 1941, after lifetimes of honorable service defending this nation and its values, Admiral Kimmel and General Short were denied the most basic form of justice—a hearing by their peers. Instead of a proper court-martial, their ordeal began on December 18th with the Roberts Commission. A mere 11 months after the devastating attack at Pearl Harbor, this Commission was established to determine the facts.

In this highly charged atmosphere, the Commission conducted a speedy investigation, lasting little over a month. In the process, they denied both commanders counsel and assured both that they would not be passing judgment on their performance. That assurance was worthless. Instead, the Commission made highly judgmental findings and then immediately publicized those findings. The Roberts Commission is the only investigation held by our nation’s failure to treat them in the same manner with which we treated their peers. To reverse this wrong would be consistent with this nation’s sense of military honor and basic fairness.

As we honor those who have given their lives to preserve American ideals and national interests this coming Memorial Day, we must not forget two brave officers whose true story remains shrouded and singularly tarnished by official neglect of the truth.

We introduced this amendment as S.J. Res. 19 earlier this year and it now has 23 co-sponsors. As I know Senator Roth indicated last night, it has the support of numerous veterans organizations and retired Navy flag officers. These knowledgeable people and about a quarter of the Senate have already spoken up on behalf of justice and fairness.

I urge the rest of my colleagues to join us and support this amendment.

Mr. WARNER addressed the Chair
The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I cannot condone the premiership on which the distinguished Senator from Delaware addresses his case; that is, that there was a disposition among good and honest men not to accord fairness, equity, and justice to these two individuals. They were the subject of repeated inquiries. As a matter of fact, the Roberts Commission was headed by a Supreme Court Justice. Throughout the whole judicial history, in the common law of England, which we incorporated in our judicial history, speedy trials are the essence of our justice. The salutary procedure has to be speedier, proceed with some expedition. You cannot wait 50-plus years to address an issue such as this. What do you say to the congressional committee? Do you dispute the findings of this committee?

Mr. ROTH. Yes.

Mr. WARNER. We gave the names of some of the most revered elder statesmen of this body who presided, such as Alben Barkley. And, indeed, President Truman had to address, in 1947, as Senator Roth and I covered last night, the tombstone promotions, which were given to officers of this category, and deny them. Truman himself had to make that decision. I think it is my good friend, many fair-minded individuals have reviewed this case and have come up with the determination that they were not the only ones who had culpability, but certainly, as I read it, this commission of the Congress of the United States found a serious basis for holding the action and making the decision that they did.

Mr. LEVIN. Mr. President, will the Senator yield a minute?

Mr. WARNER. I yield such time as the Senator from Michigan needs.

Mr. LEVIN. Mr. President, let me just add to what the Senator from Virginia just said in response to our good friend from Delaware. What I really fear, perhaps the most, is the substitution of the judgment of a political body for the judgment and findings of the appropriate chain of command. We are a political body, we give the commands at the time, which has been reviewed by the Defense Department, repeatedly made findings and held these two officers accountable. For us now to substitute our judgment more than five decades later for that of the chain of command, it seems to me, is a very, very bad precedent in terms of holding officers accountable for events.

Mr. President, the Department of Defense recently reviewed this entire matter—the so-called Dorn report—and I have quoted these findings before, but I will pick out two of them, which seems to me to go to the heart of the matter.

This is a quote:

To say that responsibility is broadly shared is not to absolve Admiral Kimmel and General Short of accountability.

Of course, accountability should be widely shared, and maybe it wasn’t as broadly shared as it should have been, but the issue is whether or not this accountability, 57 years ago, is going to be set aside by a political body 57 years later.
Mr. WARNER. Mr. President, the admirals the Senator enumerated were ones I had the pleasure of knowing, serving with several, and for whom I have a great deal of respect. But I note the absence of any similar number of Army generals coming forward on behalf of General Short. Perhaps the Senator has something to be in the Record. But I think that silence speaks to authenticate the position that this Senator and others have taken.

To the very strong, forceful statement of my colleague who said it is implicit that all responsibility for this tragedy is assigned to these two individuals, that is not correct. The Dorn report said it is to be shared. In fact, General Marshall stepped forward with courage and accepted publicly, at the very time this was being examined, his share of responsibility.

So I say others, indeed, General Marshall and others, stepped forward. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. ROTH. Mr. President, I ask unanimous consent for 2 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ROTH. Mr. President, this is a rhetorical question. The report suggested that Generals Marshall and Stark were also partially responsible. My point is that the idea that the entirety of the blame, that the children and the children of the children of these two men will live forever thinking that they were the only two people responsible for this, is a historical inaccuracy, unfair, and a blemish that is not warrant to be carried by the two proud families whose names are associated with these officers. It is as simple as that.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. I ask unanimous consent for 2 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ROTH. Mr. President, what we are talking about today is a matter of justice and fairness, a matter that goes to the core of our military tradition and our Nation’s sense of military honor. Just let me point out once again the Dorn report says: Responsibility for the Pearl Harbor disaster should not fall solely on the shoulders of Admiral Kimmel and General Short. It should be broadly shared.

Unfortunately, it was not broadly shared. The only two people who were singled out for punishment, or not to be promoted to their wartime rank, were Admiral Kimmel and General Short. They were held singularly responsible for what happened in Pearl Harbor. That is not fair. That is not just. Just let me point out that we have had the essence of the tremendous number of endorsements we have received from senior retired officers of the highest rank. Once again, I point out that Admiral after Admiral—Burke, Zumwalt, Moorer and Crowe—have asked that this be corrected. All we seek today is justice and fairness to two officers who served their Nation with excellence.

The PRESIDING OFFICER. All time has expired.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. WARNER. Mr. President, I ask for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Virginia.

Mr. WARNER. Mr. President, the admirals the Senator enumerated were ones I had the pleasure of knowing, serving with several, and for whom I have a great deal of respect. But I note
have a price tag of $1 billion. These increased costs to the U.S. have occurred because the Russians have failed to fund its share of the costs of this project. I also understand that the chemical weapons destruction facility will not be open until 2006, in part due to Russian failure to provide the needed information about the chemical weapons to be destroyed.

The CTR program is becoming more and more one-sided. This program is also in the interest of the Russians. Matter of fact, much of the destruction of the Russian inventory, funded by the CTR program, enables Russia to meet its obligations under existing arms control treaties.

In addition, I am concerned with the daily press reports that the Russians are enhancing their military capabilities. For by our own statements by Yeltsin and other Russian officials.

Earlier this month, President Yeltsin reportedly ordered the Russian military to draw up plans for the development and use of tactical nuclear forces. On May 4, the Russian Defense Minister threatened to reconsider Russian support for the revision of the Conventional Forces in Europe (CFE) Treaty. On April 16, the Duma unanimously adopted a resolution calling for increased defense budgets.

Although I have serious concerns about this program, we included an authorization for CTR at the budget request of $475.5 million, an increase of $35 million over the FY 99 level. However, before FY 2000 funds may be obligated we require the President to re-certify that the Russians are foregoing any military modernization that exceeds legitimate defense requirements and are complying with relevant arms control agreements. The most recent certification by the Administration was completed before these numerous statements by Yeltsin and other Russian officials.

I am also concerned with the deficiencies in the management and oversight of the DOE programs in Russia—in particular, the Initiative for Proliferation Prevention (IPP) and the Russian Cities Initiative (NCI). If these programs are to succeed, we need to get past the implementation problems pointed out in the GAO report, in press reports by most House colleagues, and by the Russians. In addition, the Russian economic crisis and lack of infrastructure are making these programs more difficult to manage. I am afraid if we do not exercise strong oversight now we are in danger of losing these programs.

I have proposed a number of initiatives that I believe will go a long way towards correcting the deficiencies in the management of IPP and NCI programs, and ensuring that sufficient accountability exists. Further, I believe the U.S. nonproliferation goals and U.S. national security will be better served by these improvements.

I believe DOE will spend FY 2000 tightening up the implementation of IPP and NCI rather than broadening the program. Therefore, the committee authorized the IPP and NCI below the administration's request of $30 million for each program. The bill includes an authorization of $15 million for NCI and an authorization of $25 million for IPP, an increase of $2.5 million for each program over FY 99 levels. These are the only programs in the entire DOE nonproliferation budget that the committee authorized below the budget request. Overall, we authorized $266.8 million for DOE nonproliferation programs in the former Soviet Union countries—an increase of $13.4 million over FY 99.

I believe the bill before you takes significant steps to focus the Department of Defense's efforts to counter new and emerging threats to vital national security interests. I urge my colleagues to support this bill.

Once again, Mr. President, I am asking the support of my colleagues for a simple sense of the Senate that calls also for complete transparency on the part of the President and Senate consideration regarding the de facto editing of the original North Atlantic Treaty.

My sense of the Senate asks the President to certify whether the new Strategic Concept of NATO, the one adopted at the 50th anniversary of NATO in Washington about a month ago—this formalization of new and complicated United States responsibilities in Europe, as evidenced by the war in Kosovo and the possibility of future Kosovos around the world—is in fact a document that obligates the United States in any way, shape, or form.

If so, my sense of the Senate affirms that this body be given the opportunity to debate, to accept or to reject, the new blueprint for future NATO operations, these actions which will undoubtedly include substantial components of our own Armed Forces engaged completely outside the province of the original treaty.

Yesterday the distinguished Senator from Michigan, my colleague and my friend, Senator LEVIN, asked where the Congress was in 1990, in regard to the last Strategic Concept adoption. The Senator has rightly pointed out there were changes made in the Concept that particular time. Without question, that should have been an alarm bell of things to come. But there are key differences, I tell my friend, in the world today as opposed to the world in 1990.

Second, and just as important, there are significant differences regarding the Strategic Concept adopted in April of 1999, just a month ago, which is the document that I hope is still on the desk of all Senators, and the Concept that was adopted in 1990 as referenced by the Senator. First of all, Bosnia had not occurred and, more especially, Kosovo was not the proof of the direction that NATO intended to go. That direction is an offensive direction. That is not meant to be a pun.

The crafting of language in the new Strategic Concept was carefully done. Look, my colleagues, if you will, at the removal of the following wording of paragraph 35 of the 1991 Concept. I will repeat it:

The alliance is purely defensive in purpose. None of its weapons will ever be used except in self-defense.

That was removed. That removal was not an oversight. The current Strategic Concept sets in motion a new NATO that is inconsistent with article 1 of the North Atlantic Treaty, article 1:

The parties undertake as set forth in the Charter of the United Nations to settle any international dispute which they may be involved in by peaceful means, in such a manner that international peace and security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purpose of the United Nations.

That was in 1990, the reference to the United Nations, to settle any international dispute by peaceful means, not by military means.

The original wording and intent of article 4 of the North Atlantic Treaty is straightforward. The North Atlantic Treaty, article 4:

The parties will consult together when in the opinion of any of them the territorial integrity—

All the debate about whether we are conducting a military campaign and crossing borders of a sovereign state, I call it again.

The parties will consult together when in the opinion of any of them the territorial integrity or political independence or the security of any of the parties is threatened.

However, paragraph 24 of the new Concept significantly alters article 4 of the NATO treaty in the following way: Arrangements exist within the alliance for consultation among the allies under article 4 of the Washington Treaty—

My colleagues, pay attention to this, Mr. President, and, where appropriate, the coordination of their efforts including the responses to such risks.

The portion that includes the “coordination of their efforts including their responses to such risk,” it is new, and strongly suggests offensive action, i.e., Kosovo. It is a possible response to a threat, and that is a radical shift for NATO—not from 1949 but also from 1990.

The new Concept has significantly expanded the global coverage of NATO. For example, paragraphs 20, 21, and 22 clearly indicate a global reach for NATO.
Paragraph 20 states:
The resulting tensions could lead to crises affecting Euro-Atlantic stability, human suffering and to armed conflicts. Such conflicts could affect the security of the conference by spilling over to neighboring countries including NATO countries or in other ways, and could also affect the security of neighboring states.

The point is that NATO justifies action well beyond the original boundaries of NATO and now includes threats to states anywhere in the world. Is that what we want the NATO of the future to be?

I say to my friend from Michigan, he is right that Congress was asleep at the switch when the Strategic Concept of 1999 was adopted. But there is no reason for Congress to remain asleep in 1999. In fairness to my colleagues, no one envisioned that in less than 9 years the purely defensive alliance of NATO would have conducted offensive action out of area, against a sovereign nation, albeit a terribly oppressive nation, in an action that was not in our vital national interests.

Let me share some comments I have gleaned from the Foreign Media Reaction Daily Digest which all Members receive from the U.S. Information Agency. This is from the leading press around the world, as they view, in terms of their commentary, what this Strategic Concept means to them.

I know some critics, myself included, will say their views, some of the views, are unimportant or biased or that they are from state-run presses. I know that. But I think they are a valuable tool to understand how we and NATO are being perceived by non-NATO members—and some NATO members as well. Here is the summary—early May:

The Alliance’s adoption of a “new strategic concept”… has swung to the negative [in regard to Euro-Atlantic stability, human suffering and to armed conflicts]. Criticism of the Alliance’s vision of a “new world order”… many underscored the problems with NATO’s expanded purview and questioned the feasibility of trying to promote and impose—beyond European borders and “by force if necessary”—a “consistent” standard on human rights. The vast majority of media outside of Europe remained harshly critical of NATO’s [read the U.S.’s] new blueprint, with most reiterating their concerns that NATO is “transforming itself into a global police force, ignoring the role of the U.N.”… NATO is being enlarged—both spatially and doctrinally—in order to ensure U.S. military and political dominance over Europe, Russia and the rest of the world.

I don’t buy that, but it is important to understand that other countries certainly think that.

It goes on to say:
The most important part of the world, formed by the most “civilized” nations, can be responsible for the respect of human rights in the whole world—resorting, if necessary, to the use of force… is neither viable nor fair.

They are asking:
… whether Kosovo is an exception or a rule in NATO’s new strategy, and whether the Allies will be equally firm, but also consistent, with the Kosovo, Croatians, Palestinians, Tutsis, Hutus of Native Americans. Ethnic cleansing in Chechnya, Turkey, Colombia, Indonesia show that NATO is being forced to target randomly, that is only enemies and only those countries that don’t have any nuclear weapons.

Mr. President, several headlines—and I do not agree with all of these headlines—in May should be brought to the attention of the world.

The newspaper Reforma in Mexico:
What is the reason for the desire to impose a solution in defense of the Albanians in Yugoslavia while at the same time three ethnic groups that hate each other are forced to co-exist in Bosnia? What could happen in Mexico in the future? Within several months, NATO members (have now agreed) to intervene anywhere they see fit without the need to consult with the U.N. and to run the risk of a veto from Russia or China. This will be a two century jump backwards.

That is from Mexico. I am not saying it speaks for the entire country of Mexico, although President Zedillo said much the same thing.

Ethnos, a paper in Greece:
What occurred in Washington was the U.N.’s complete weakening. It is now a mere onlooker of NATO’s decisions and initiatives. What has taken place is the complete overthrow of the legal system.

A newspaper called Folha de S. Paulo in Brazil:
NATO celebrates its 50th anniversary and in practice formalizes the end of the U.N. As it has become clear this past month, the world’s power is, in fact, in NATO, meaning in the hands of the United States. And, almost no Government dares to protest against this.

The Economist in Great Britain, a respected newspaper:
Limping home from Kosovo would certainly oblige NATO to rethink its post-Cold War aims of intervention, not just for members of the Alliance but for the peace in the region. In particular, the humanitarian and international order. NATO might go into terminal decline. The Alliance needs to persist in explaining to other countries that sovereignty guarantees a country’s decision to intervene in Kosovo. This necessity is not so much to prove that this was a just cause but to reassure a suspicious world that NATO has not given itself the right to attack sovereign nations at whim.

Il Sole 24-Ore, of Italy:
We cannot say what emerged from the weird birthday-summit war council in Washington is a strategic concept. Indeed, NATO should have been more precise about its future. The war in Kosovo forces us to revise international law as we have known it.

This is from a newspaper in a country that is a NATO ally:
The concept suggests laying the foundation of an “ethical foreign policy.” A democratic West which tolerates ethnic and religious diversities, which is stable and economically sound, will show how to give theoretical values to other people. It is a very nice picture, but to impose freedom is a contradiction in terms.

Another headline: Al-Dustur in Jordan, the new King of which just paid a visit to this country:
The Anglo-American alliance imposed on NATO during the summit in Washington is a new orientation marked by imperialist arrogance and disregard for the rest of the world. These are probably strong words.

This is a serious danger that faces the world, and to overcome it all non-NATO countries should cooperate and seek to develop weapons of mass destruction.

Is that what the new Strategic Concept is leading to in the minds of some of the critics in foreign countries?

Al Watan in Kuwait, the country we freed in regard to Desert Storm:
NATO does not have a strategy for the next 50 years, except to remain the master, Europe the subordinate, Russia a marginalized state and the rest of the world secondary actors.

That is pretty tough criticism.

Asahi newspaper in Japan:
One such lesson is that members of an alliance often resort to their own military activities, paying scant attention to the trend of the U.N. Security Council, or international opinion. Another lesson is that the United States, the only superpower, often acts in accordance with its own logic or interests rather than acting as supporter for allies.

This newspaper sums it up:
This has relevance to the U.S.-Japanese military alliance.

The newspaper Hankyoreh Shinmun of South Korea, an ally:
The summit decision to give the Alliance an enlarged role in the future is a dangerous one in that it may serve in the long term to merely prop up America’s hegemonic endeavors. The talk of NATO’s expanded role confuses everyone and even threatens global peace. NATO’s new role could unify countries like Russia and China that oppose U.S. dominance, provoking a new global confrontation between them and the West.

In Taiwan, The China Times:
NATO’s new order requires different agents to act on the U.S.’s behalf in different regions and to share the peace-keeping responsibilities. In Brazil, the master, Europe the subordinate, Russia a marginalized state and the rest of the world secondary actors. In Africa, the new King of which just paid a visit to this country:
The Anglo-American alliance imposed on NATO during the summit in Washington is a new orientation marked by imperialist arrogance and disregard for the rest of the world. These are probably strong words.

This is a serious danger that faces the world, and to overcome it all non-NATO countries should cooperate and seek to develop weapons of mass destruction.

Is that what the new Strategic Concept is leading to in the minds of some of the critics in foreign countries?

I do not buy that. I do not think we are going to do that. Some of the warnings, some of the descriptions that I have been reading, my colleagues, I do not buy, but it shows you the attitude, it shows you how other people feel about the new Strategic Concept.

We have the same kind of commentaries from Argentina, from Canada, from Mexico again.

La Jornada, a newspaper in Mexico:

The decision by NATO leaders to turn that organization from a defensive into an offensive entity and to carry out military actions regardless of the U.N. is a defect of civilized mechanisms that were so painfully put in place after World War II. If the Alliance really wanted to impose democratic values by force, it should start by attacking some of its own members, like Turkey, which carries out systematic ethnic cleansing campaigns against the Kurds.

Tough words.

My point remains that this new Strategic Concept, a concept that radically alters the focus and direction of NATO, has been adopted without the consultation of the Senate. Are we willing, as Senators, to stand by and not debate, discuss, or reject a document that fundamentally alters the most successful alliance in history? What we discussed, what we ratified in regard to expansion is totally different than the new Strategic Concept. It has had no debate, it has had no discussion and, yet, it is a blueprint for our involvement in the future of NATO.

It is a document that fundamentally alters the most successful alliance in history and one that may cost the blood of our men and women and billions of dollars from our Treasury. We should at least debate it.

I urge my colleagues to support my sense-of-the-Senate amendment. I revere the remainder of my time.

Mr. WARNER. If the Senator will yield.

Mr. LEVIN. Mr. President, I will be voting for this amendment because it is worderd very differently from earlier versions. This version of the amendment simply requires the President to certify whether or not the new Strategic Concept of NATO imposes any new commitment or obligation on the United States.

In 1991, we had major changes in the alliance’s Strategic Concept. These were huge changes. Section 9 of the alliance’s new Strategic Concept in 1991, for instance, said:

Risks to allied security are less likely to result from calculated aggression against the territory of the allies but rather from the adverse consequences of instabilities that may arise from serious economic, social and political difficulties, including ethnic rivalries and territorial disputes which are faced by many countries in Central and Eastern Europe. They could lead to crises inimical to European stability even to armed conflicts which could involve outside powers or spill over into NATO countries.

Then in paragraph 12, it says:

Alliance security must—

This is 1991—not this new one, but the Strategic Concept that was adopted in 1991.

Alliance security must take into account the global context. Alliance security interests can be affected by other risks of a wider nature, including proliferation of mass destruction, disruption of the flow of vital resources, and actions of terrorism and sabotage.

The reason that this 1991 Strategic Concept was not sent over to the Senate for ratification was very straightforward, very simple, in my judgment; and that is that the Strategic Concept then did not contain new commitments or obligations for the United States. The Strategic Concept was adopted in 1991, there were no new obligations or commitments that required the Senate to ratify this document. And there are no new obligations or commitments now.

The President has already told us that. He has already sent a letter to Senator WARNER. The President has sent a letter to Senator WARNER dated April 14, 1999, that says:

The Strategic Concept will not contain new commitments or obligations for the United States.

So the certification, which is required in this amendment—and rightfully so, by the way, in my judgment—I has already been made. I see no reason it would not be done again.

So I do not believe that the Congress was asleep in 1991, the Congress was not asleep in 1991. The Congress was exactly right in 1991. When this Strategic Concept was adopted in 1991, there were no new obligations or commitments that required the Senate to ratify this document. And there are no new obligations or commitments now.

The timing of the letter is exactly as the chairman says it is. But the statement of the President is that “the Strategic Concept will not contain new commitments or obligations for the United States.”

The caption of the amendment by the Senator from Kansas is “Relating to the legal effect of [this] new Strategic Concept.” I think it is quite clear from our conversations with the State Department that the President can, indeed, and will, indeed, make this certification, and should—and should. I think it is an important certification.

I commend the Senate from Kansas. I think we need clarity on this subject. If there is a legally binding commitment on the United States in this new Strategic Concept, it ought to be sent to the Senate for ratification. But if this 1999 Strategic Concept is like the 1991 Strategic Concept—not a legally binding document but a planning document, a document setting out concepts, not legal obligations—that is a very different thing.

NATO has adopted strategic concepts continually during its existence. By the way, again, let me suggest there is nothing much broader than section 12 of the 1991 Strategic Concept which said: “Alliance security must take into account the global context.” Does that represent a binding commitment on the United States? It surely did not, in my judgment, and need not have been submitted to the Senate for ratification. I believe that the current Concept, which has been adopted, does not contain legally binding commitments.

Mr. WARNER. Would the Senator yield?

Mr. LEVIN. I would be happy to.

Mr. WARNER. The Senator points out that the letter was sent to me—correct—in response to a letter that I forwarded to the President. That is in last night’s Record.

At last night’s Record, I welcome the Senator’s support on this. But I think he would agree with me that that letter was written at the time when the language was still being worked, and of course it predates the final language as adopted by the 50th anniversary summit. That language is the object of this, I think, very credible inquiry by Mr. ROBERTS, myself, and others.

Mr. LEVIN. It is very appropriate.

Mr. WARNER. It is very well that the Senate may forward a letter that puts this matter to rest and, most importantly, clarifies in the minds of our other allies, the other 18 nations, exactly what this document is intended to say from the standpoint of America, accoach, the global context.” Does that—does that—that now contribute 25 percent of the cost to the NATO operations.

Mr. LEVIN. I think that is correct.

The reason that this 1991 Strategic Concept was not sent over to the Senate for ratification was very straightforward, very simple, in my judgment; and that is that the Strategic Concept then did not contain new commitments or obligations for the United States. The Strategic Concept was adopted in 1991, there were no new obligations or commitments that required the Senate to ratify this document. And there are no new obligations or commitments now.

The President has already told us that. He has already sent a letter to Senator WARNER. The President has sent a letter to Senator WARNER dated April 14, 1999, that says:

The Strategic Concept will not contain new commitments or obligations for the United States.

So the certification, which is required in this amendment—and rightfully so, by the way, in my judgment—I has already been made. I see no reason it would not be done again.

So I do not believe that the Congress was asleep in 1991, and it surely is not sleeping now. Senator ROBERTS is, as far as I am concerned, very appropriately saying to the administration, if this contains new commitments or obligations—if it contains new obligations or commitments—then you should send this to us as a treaty amendment.

Of course, I happen to think that is correct. This amendment does not find that there are new obligations and commitments. An earlier version of this amendment, by the way, did. This amendment does not do that. This amendment says to the President: Tell the people whether or not the new Strategic Concept—those are the precise words of this amendment—constitutes, involves, contains, new obligations or commitments.

Mr. WARNER. Would the Senator yield?

Mr. LEVIN. I would be happy to.

Mr. WARNER. The Senator points out that the letter was sent to me—correct—in response to a letter that I forwarded to the President. That is in last night’s Record.

At last night’s Record, I welcome the Senator’s support on this. But I think he would agree with me that that letter was written at the time when the language was still being worked, and of course it predates the final language as adopted by the 50th anniversary summit. That language is the object of this, I think, very credible inquiry by Mr. ROBERTS, myself, and others.
Mr. LEVIN. Mr. Chairman, I think it clearly means the legal effect of this. But let us, rather than arguing over what is in or not in this amendment—I understand that there was going to be an effort made here to clarify language on the certification. If there is going to be such an effort, I would ask that be made now and that we then ask for the yeas and nays so we are not shooting at a moving target here. Really, I think it would be useful, if in fact that change relative to the certification requirement is going to be sent to the desk, it be sent to the desk at this point; and then I am going to ask for the yeas and nays.

Mr. ROBERTS. If the Senator will yield?

Mr. LEVIN. I do yield.

AMENDMENT NO. 377, AS MODIFIED
(Purpose: Relating to the legal effect of the new Strategic Concept of NATO)

Mr. ROBERTS. I do have that clarification in the form of an amendment, which I send to the desk, and I ask unanimous consent that in title X, at the end of subtitle D, that this amendment would be added.

Mr. BIDEN. Reserving the right to object:

The PRESIDING OFFICER. Is there objection?

Mr. BIDEN. There is objection. I would like to reserve the right to object, if you let me explain; otherwise, I would like to reserve the right to object, if you let me explain; otherwise, I would like to reserve the right to object.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. I reserve the right to object because if, in fact, the Senator wishes to change his amendment, I ask that we consider on line 7 adding the word “legal” because failure to do so rewrite constitutional history here. Presidents make commitments all the time. Commitments and obligations do not a treaty make and do not require a supermajority vote under the Constitution by the Senate to ratify those commitments. I, at least for the time being, object and hope that after we finish this debate, before we vote, my colleague and I can have a few minutes in the well to see whether he will consider amending it to add the word “legal” on line 7 of his amendment. So I object.

The PRESIDING OFFICER. Objection is heard.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I will yield the floor in just 2 minutes. I read this document quite clearly as meaning any new commitment or obligation, because it uses the word “impose.” I know no other way to impose an obligation or a commitment other than legal. When you use the word “impose,” it seems to me it is quite clear that that means it is imposed. So that is the way I read this language. If other people read it in a different way, they may. But I think that the certification requirement, which the Senator from Kansas wants to move into the front of this amendment instead of in the sense-of-the-Senate part of it, is simply a clarification of what I always thought was a clear intent, which is that there be such a certification. And I think that that is more of a technical change than anything.

I have no objection to an amendment which moves the certification requirement to the front of the amendment before the sense-of-the-Senate language and imposes that as a certification requirement—not sense of the Congress but as a requirement on the President. It is, really, there is no doubt that it is only if there is a legally binding commitment or obligation that this would require a referral to the U.S. Senate, because no other requirement or obligation other than that that is imposed on us would rise to the dignity of a treaty.

I hope the Senator will have a chance to move the certification requirement to an earlier position in his amendment. If I could just ask one question of my friend from Kansas, as I understand, that is what the modification does provide and nothing more; is that correct?

Mr. ROBERTS. I say to the Senator, I am not sure. I had thought we had an agreement that there would not be an objection to the amendment by unanimous consent. That obviously is not the case. We are going to have to consider this. Let us work on this.

I will be happy to visit here on the floor with the Senator from Delaware and my good friend from Michigan. I am not entirely clear, after listening to the Senator, that his description of this amendment—on the one that I have that we work it out. I will put to us if push comes to shove, although I think it is entirely reasonable for a Senator to be allowed to amend his own amendment, if this has caused some concern on the part of both Senators, we can always bring this up as a separate amendment, which may be the best case. If, in fact, you say “legal,” you put the word “legal” in there, obviously I do not think the President is going to have any obligation to report on anything.

In terms of obligation, if I may say so, if the Senator will continue to yield, if Kosovo is not an obligation, I am not standing here on the floor of the Senate. That is my response.

Why don’t we visit about this if we can, and then, if necessary, we will just introduce an amendment at a later time as a separate amendment.

Mr. BIDEN. Mr. President, will the Senator from Michigan yield me 1 minute?

The PRESIDING OFFICER. The Chair recognizes the Senator from Delaware.

Mr. BIDEN. Just 1 minute and then afterwards I see others will seek recognition to speak. I want to make it clear, I do not know where the Senator got the impression that there would be no objection. I did not agree to that. What I suggested was that when asked me whether or not I objected, I asked him to withhold until after I made my talk and asked some questions. Then I would not object. We are getting the cart before the horse here. I want to make it clear, I may not ultimately object. I just want to have an opportunity to speak to this before he sends his amendment to the desk.

Mr. ROBERTS addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. ROBERTS. Mr. President, I ask unanimous consent that Senator SMITH of New Hampshire be added as an original cosponsor of Robert amendment No. 377.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERTS. I yield 5 minutes to the distinguished Senator from Texas.

The PRESIDING OFFICER. The Chair recognizes the Senator from Texas.

Mrs. HUTCHISON. I thank the Chair. I thank the Senator from Kansas for pursuing this, because I do think it is a very important amendment. I think it is very important that we ask the President to come forward and tell us if this new Strategic Concept we have all been reading imposes a new commitment or obligation on the United States.

The original NATO treaty, the whole treaty, is very clear. It is a defensive alliance. That has never been questioned until what is happening today in Kosovo, which is clearly not defensive.

If it is offensive, if we launch air strikes on a sovereign nation that is not a member of NATO. So I think it is, before our eyes, evolving into a new Strategic Concept for NATO, and I think we most certainly must have the right to approve it. It is an addition to a treaty obligation that was made 40 plus years ago.

Now, I am not necessarily against NATO having an offensive part of a treaty obligation, but I am absolutely certain that the Senate must approve this kind of added obligation and that we not walk away from the very important concept that a treaty sets out certain obligations and it is required to be ratified by Congress. And most certainly we must ratify the changing of a treaty obligation from a defensive alliance to an offensive alliance.

There is no question that the found- ers of our country chose to make it difficult to declare war. They chose to make it difficult to declare war by giving the right to Congress. They could have given it to the President, but they were going away from the English system, where the King declared war and
implemented the same war. They wanted a division of responsibility, and they wanted it to be difficult to put our troops in harm's way. Indeed, every President we have had has said that it should be difficult to put our troops in harm's way; perhaps until this President, that is.

So it is important that we pass this amendment and that the President certify that we either do have a new obligation or we do not. I think we do, and I think we need to debate it.

As I said, I am not against NATO having some offensive responsibilities. I do question that they have in our NATO treaty the right to do what they are doing right now. I think we need to debate it, and I think we need to clarify exactly what would be in a new offensive strategy that would be a part of a NATO treaty obligation of the United States of America.

I can see a role for NATO that would declare that we have security interests that are common and that we would be able to determine what those common security interests are and that we would fight them together, stronger than any of us could fight independently. I do not know that Kosovo meets that test, but I think others certainly do believe that. I do believe that a Desert Storm does meet the test or Kim Jong-II, with nuclear capabilities, does not meet that test.

Mr. President, I support the amendment, and I ask unanimous consent to be added as a cosponsor of the amendment. I think it is incumbent on the Senate to stand up for our constitutional responsibility and that is what this amendment does.

I thank the Chair.

Mr. ROBERTS. Mr. President, may I ask how much time I have remaining?

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. ROBERTS. I do not know if the Senator from Delaware would like to speak at this moment.

Mr. BIDEN. Mr. President, I would, if I may.

The PRESIDING OFFICER. The Chair recognizes the Senator from Delaware.

Mr. BIDEN. The distinguished Senator from Michigan indicated that I could yield myself such time as he has remaining.

Mr. President, I say to my friend from Kansas, I have no objection, after talking to him, if he wishes to send his amendment to the desk now, I will yield the floor.

Mr. ROBERTS. Mr. President, I send a modification to my amendment to the desk.

The PRESIDING OFFICER. The amendment will be so modified.

The amendment (No. 377), as modified, is as follows:

In title X, at the end of subtitle D, add the following:

SEC. 1061. LEGAL EFFECT OF THE NEW STRATEGIC CONCEPT OF NATO.

(a) CERTIFICATION REQUIRED.—Not later than 30 days after the date of enactment of this Act, the President shall determine and certify to the Senate whether or not the new Strategic Concept of NATO imposes any new commitment or obligation on the United States.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that, if the President certifies under subsection (a) that the new Strategic Concept of NATO imposes any new commitment or obligation on the United States, the President should submit the new Strategic Concept of NATO to the Senate as a treaty for the Senate's advice and consent to ratification under Article II, Section 2, Clause 2 of the Constitution of the United States.

(c) REPORT.—Together with the certification made under subsection (a), the President shall submit to the Senate a report containing an analysis of the potential threats facing NATO in the first decade of the next millennium, with particular reference to those threats from a non-member nation, or several member nations, where the commitment of NATO forces will be "out of area" or beyond the borders of NATO member nations.

(d) DEFINITION.—For the purpose of this section, the term "new Strategic Concept of NATO," as that term was approved by the Heads of State and Government participating in the meeting of the North Atlantic Council in Washington, D.C., on April 23 and 24, 1999, means:

Mr. ROBERTS. Mr. President, I ask unanimous consent that "in title X at the end of subtitle D" be added to my original amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. BIDEN. Mr. President, one of the things that we sometimes confuse here—I know I do—is what is a political obligation and what is a constitutional obligation. I respectfully suggest that there is no constitutional requirement for the President of the United States—the President or any future President—to submit to the Senate for ratification as, if it were an amendment to a treaty, a Strategic Concept that is a political document. We use the words interchangeably on this floor. A new commitment or obligation, as I said, does not a treaty make.

Our Strategic Concept has always been a political, not legal document. Before last month's summit, NATO had revised the Strategic Concept five times in the past and never once had required the Senate's advice and consent. Doing so now would gravely undermine NATO's alliance and our efforts, as well as being a significant overreach in terms of our constitutional authority.

Let's not be fooled by the fact that the Roberts-Warner amendment only expresses the sense of the Senate. My concern is that unless we know exactly its dimension, it will be read in other NATO capitals as much more than it is. Just as my friend from Kansas quoted from the headlines and editorials of other newspapers—I might have quoted from other newspapers, but other newspapers—I point out that people in other countries can misread actions taken by a country or group of countries. My concern is that in NATO capitals our actions will be misread.

NATO's Strategic Concept has always given political guidance to the alliance's members. To that extent, this sixth revision of the Strategic Concept imposes commitments. But contrary to the assertions made by my distinguished friend from Kansas, it in no way changes the fundamental purpose of the North Atlantic Treaty of 1949.

We should oppose this amendment for four reasons, but if we are not going to oppose it now that it has been changed from its original amendment, we should at least recognize four important points:

One, to suggest that—if it were to be suggested—the Strategic Concept should be treated as an amendment to the treaty would set a terrible precedent.

The second point I want to raise is that the United States of America, in sending a horrible signal at a time we are striving to maintain alliance unity.

It would signal our NATO allies that the United States will not implement the new Strategic Concept without formal Senate advice and consent.

If we pass this amendment, couldn't the British, French, or Germans say tomorrow that they are going to disregard NATO's operating procedures? Couldn't they say tomorrow that they are no longer going to be bound by their commitment to beef up their military capacity as they committed to in 1991?

Given that NATO's decisions require unanimity, and that all 19 NATO member parliaments might then assert that they would have to ratify each and every future change in an operating procedure, we would be building in chaos to the alliance. How could we operate under those circumstances?

The third point I want to make is that we should remember that there have been many other changes in the Strategic Concept, as my friend from Michigan has pointed out, and they were never considered the equivalent of a new international treaty.

As I mentioned, before this year, NATO's original 1949 Strategic Concept had been revised five other times. Included among those were three fundamental transformations.

In 1957, NATO adopted a new strategy, which would have shocked my friend from Kansas. It was called Massive Retaliation. Talk about a commitment—a commitment that was,
I might add, totally consistent with the provisions of the treaty. It was an operating procedure.

In 1997, NATO abandoned the doctrine of Massive Retaliation in favor of the doctrine of Flexible Response. And then, in 1991, to continue to make the treaty relevant operationally, NATO recognized that after the end of the Soviet threat, NATO would nonetheless be confronted by a series of new threats to the alliance’s security, such as ethnic rivalries and territorial disputes. It altered the Strategic Concept accordingly.

These were dramatic changes to the alliance strategy, yet not once did the Senate, notwithstanding the fact it was not asleep, believe it had to provide its advice and consent.

There was a great deal of discussion about the 1991 Strategic Concept. I participated in it, others participated in it, and it revolved around what was the purpose of NATO and how we were operationally going to function now that the worry was no longer having 50 Soviet divisions coming through the Fulda Gap in Germany—a recognition that the territorial integrity of member states was still threatened, and instead of Soviet divisions rolling through the Fulda Gap with Warsaw Pact allies, there was a different threat, nonetheless real, nonetheless warranting this mutual commitment made to defend the territorial integrity of member states.

We discussed it. We debated it. There were those who thought it didn’t go far enough. There are those who thought it went too far. But it wasn’t that we were asleep and didn’t pay attention. In fact, maybe it was because—and I am not being facetious—my friend was in the House where they don’t deal with treaties; where it is not the constitutional obligation, and where foreign policy is not the thing they spend the bulk of their time on. But we weren’t asleep over here. In fact, the current 1999 version of the Strategic Concept is much more similar to its 1991 predecessor than the 1991 document was to any of its predecessors.

My third point is simple. The revised Strategic Concept does not require advice and consent because it is not a treaty.

The rules under U.S. law on what constitutes a binding international agreement are set forth in the Restatement of Foreign Relations Law of the United States, as well as in the State Department regulations implementing the Case-Zablocki Act.

Under the Restatement, the key criterion as to whether an international agreement is legally binding is if the parties intend that it be legally binding and govern by international law. (Restatement, Sec. 301(1)). Similarly, the State Department regulations state that the “parties must intend their undertaking to be legally binding and not merely of political or personal effect.” (22 Code of Federal Regulations §181.2(a)(1)). Thus, those agreements that are not binding are essentially political statements. There is a moral and political obligation to comply in such cases, but not a legal one.

The most well-known example of such a political statement is the Helsinki Final Act of 1975, negotiated under the Ford administration and credited by most of us as the beginning of the end of the Soviet Union, the most significant political act that began to tear the Berlin Wall down. That was a political statement—commitments we made, but not of treaty scope requiring the advice and consent of the Senate.

The second key criterion is whether an international agreement contains language that clearly and specifically describe the obligations that are to be undertaken.

An international agreement must have objective criteria for determining the enforceability of the agreement. (22 C.F.R. §181.2(a)(3)).

Another criterion is the form of the agreement. That is, a formal document labeled “Agreement” with final clauses about the procedures for entry into force is probably a binding agreement. This is not a central requirement, but it does provide another indication that an agreement is binding. (22 C.F.R. §181.2(a)(5)).

A reading of the Strategic Concept clearly indicates that it is not a binding instrument of which treaties are made.

Rather, the Strategic Concept is merely a political statement with which my colleague from Kansas and others in this Chamber, I respect that, respect their disagreement with the political commitment that was made. But their political disagreement with a political commitment does not cause it to rise to the level of a binding treaty obligation requiring the advice and consent of the Senate, no matter how important each of them may be, no matter how relevant their objectives may be, no matter how enlightened their foreign policy may be.

Rather, the Strategic Concept is merely a political statement that outlines NATO’s military and political strategy for carrying out the obligations of the North Atlantic Treaty.

Nowhere in the Strategic Concept can you find binding obligations upon the members of NATO.

For, if that were the case, all of our European allies as of a year ago, with the exception of Great Britain, would have been in violation of their treaty obligations—would have been in violation of their treaty obligations because of the commitments they made to build up—I will not bore the Senate with the details—their military capacity. Yet no one here on the floor has risen to suggest over the past several years, even though we have decried their failure to meet their obligations, that they have violated their treaty obligations.

Instead, the language of the Strategic Concept contains general statements about how NATO will carry out its mission.

The most important question, as I stated, is the intent of the parties. As the President wrote to the Chairman of the Committee on Armed Services on April 14, “the Strategic Concept will not contain new commitments or obligations for the United States.”

Of course, the Strategic Concept creates a political commitment. And we take our political commitments seriously.

All member states, the United States included, assume political obligations when they take part in the alliance’s integrated military planning.

That is what target force goals are all about. And, Mr. President, that lies at the heart of burden-sharing, whose importance several of us continually stress to our NATO allies.

The 1999 Strategic Concept creates a planning framework for NATO to act collectively to meet new threats if they arise.

So I would summarize the key point in this way: the Strategic Concept imposes political obligations to create military capabilities, but it does not impose legal obligations to use those capabilities.

My fourth point is that I understand the concern that NATO’s core mission—alliance defense—not be altered. It has not been.

Our negotiators at last month’s NATO summit did exactly what the vast majority of Senators wanted.

They consciously incorporated the Senate’s concerns that NATO remain a defensive alliance when they negotiated the revised Strategic Concept.

The revised Strategic Concept duplicates much of the language contained in the Kyl amendment to the Resolution of Ratification on NATO Enlargement.

You all remember the Kyl amendment. We were not asleep at the switch. We were not falling to pay attention. We debated at length—my friend from Virginia, and I, and others—NATO enlargement. It is one of the few areas on which we have disagreed.

We debated at length the Kyl amendment. Let me remind my colleagues that the amendment was adopted by the Senate in April of 1998 by a 90–9 vote. Rather than reviewing the specifics of the document, because time does not permit, I think memories have to be refreshed that clearly, because everyone remembers, I ask unanimous consent that I be allowed to enter into the RECORD a document provided by
the Clinton administration that reviews paragraph by paragraph the similarity to the Kyl amendment and the 1999 Strategic Concept.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

**THE KYL AMENDMENT AND THE STRATEGIC CONCEPT**

(Document drafted for Assistant Secretary of the State Marc Grossman on April 29, 1999 and handed out by Secretary Grossman to Members of the Senate on May 5, 1999)

Assistant Secretary for European Affairs Marc Grossman in SFRC testimony on April 21: “During the NATO enlargement debate some 90 Senators led by Senator Kyl passed an amendment laying out clear criteria for NATO’s updated Strategic Concept. We heard your message and made the criteria established by Senator Kyl our own.”

Language from the Kyl Amendment: “The Senate understands that the policy of the United States is that the core concepts contained in the 1991 Strategic Concept of NATO, which adapted NATO’s strategy to the post-Cold War environment, remain valid. The United States is that the core concepts contained in NATO’s updated Strategic Concept. We heard your message and made the criteria established by Senator Kyl our own.”

I. FIRST AND FOREMOST, A MILITARY ALLIANCE

**Strategic Concept Paragraph 6:** “...safeguard freedom and security... by political and military means.”

**Strategic Concept Paragraph 25:** “a broad approach to security which recognizes the importance of political, economic, social and environmental factors in addition to the indispensable defense dimension.”

**II. PRINCIPAL FOUNDATION FOR DEFENSE OF SECURITY INTERESTS**

**Strategic Concept Paragraph 4:** “...must safeguard common security interests in an environment of further, often unpredictable change.”

**Strategic Concept Paragraph 8:** “... the Alliance enables them through collective effort to realize their essential national security objectives.”

**Strategic Concept Paragraph 13:** “...strong and dynamic partnership between Europe and North America...”

**IV. U.S. LEADERSHIP ROLE THROUGH STANDBY FORCES IN EUROPE, KEY COMMANDERS**

**Strategic Concept Paragraph 42:** “...presence of U.S. conventional and nuclear forces in Europe remains vital...”

**Strategic Concept Paragraph 52:** “...supreme guarantee of the security of Allies is provided by the strategic nuclear forces of the Alliance, particularly those of U.S.”

V. COMMON THREATS

a. potential re-emergence of hegemonic power

**Strategic Concept Paragraph 20:** “...large-scale conventional threat is highly unlikely, but the possibility of such a threat existing...”

b. rogue states and non-state actors with WMD

**Strategic Concept Paragraph 22:** “...can pose a direct military threat to Allies’ populations, territory, and forces...”

c. wider nature, including disruption of flow of vital resources, other transnational threats.

**Strategic Concept Paragraph 24:** “...a wider nature, including acts of terrorism, sabotage and organised crime, and by the disruption of the flow of vital resources...”

2. conflict stemming from ethnic and religious enmity, historic disputes, undemocratic leaders.

**Strategic Concept Paragraph 26:** “Ethnic and religious rivalries, territorial disputes, inadequate or failed efforts at reform, the abuse of human rights, and the dissolution of states...”

VI. CORE MISSION IS COLLECTIVE DEFENSE

**Strategic Concept Paragraph 27:** “…Alliance’s commitment to the indispensable Atlantic link and the collective defense of its members is fundamental to its credibility and to the security and stability of the Euro-Atlantic area.”

**Strategic Concept Paragraph 28:** “The maintenance of an adequate military capability and clear preparedness to act collectively in the common defense remain central to the Alliance’s security objectives.”

VII. CAPACITY TO RESPOND TO COMM THREATS

**Strategic Concept Paragraph 52:** “The size, readiness, availability and deployment of the Alliances military forces will reflect its commitment to defense and to conduct crisis response operations, sometimes at short notice, distance from home stations...”

**Strategic Concept Paragraph 57:** “They must be interoperable and... must be held at the required readiness and deployability, and be capable of... complex joint and combined operations, which may also include Partners and other non-NATO nations.”

VIII. INTEGRATED MILITARY STRUCTURE: COOPERATIVE DEFENSE PLANNING

**Strategic Concept Paragraph 43:** “…practical arrangements... based on... an integrated military planning and cooperative defense planning, common funding, common operational planning...”

IX. NUCLEAR POSTURE: AN ESSENTIAL CONTRIBUTION TO DETER AGGRESSION; U.S. NUCLEAR FORCES IN EUROPE; ESSENTIAL LINK BETWEEN EUROPE AND NORTH AMERICA ENSURE UNCERTAINTY IN MIND OF AGGRESSOR

**Strategic Concept Paragraph 42:** “presence of U.S. conventional and nuclear forces in Europe remains vital to the security of Europe, which is inseparably linked to that of North America.”

**Strategic Concept Paragraph 46:** “...remain essential to preserve peace...”

**Strategic Concept Paragraph 62:** “...fulfill an essential role by ensuring uncertainty in the mind of any aggressor...”

X. SURE-FRONT SHARING: SHARED RESPONSIBILITY FOR FINANCING AND DEFENDING

**Strategic Concept Paragraph 30:** “…Allies have taken decisions to enable them to assume greater responsibilities...” will enable all European Allies to make a more coherent and effective contribution to the missions... of the Alliance...”

**Strategic Concept Paragraph 42:** “The achievement of Alliance’s aims depends critically on the equitable sharing of the roles, risks and responsibilities...”

Mr. BIDEN. Mr. President, let me also remind my colleagues that the North Atlantic Treaty Organization, which I am sure is not the goal of my colleague from Kansas. One final comment. I know that my friend from Kansas is strongly opposed to the conduct of the current war in Yugoslavia, and, while disagreeing with him, I respect his views.

But, I would remind him and the rest of my colleagues that the 1999 revision of the Strategic Concept is neither the justification for, nor the driving force behind, NATO’s bombing campaign or actions in Kosovo.

NATO’s bombing campaign began a full month before the newest revision of the Strategic Concept was approved at the Washington Summit.

To sum up, there are no compelling political or legal arguments for the Roberts amendment, in terms of making this concept subject to treaty amendment. I urge my colleagues to join me in voting against this amendment.

I yield the floor. I thank my colleagues.

Mr. ROBERTS. Mr. President, might I inquire of the distinguished acting Presiding Officer how much time remains?

The PRESIDING OFFICER. Five minutes.

Mr. ROBERTS. I thank the Presiding Officer.

Mr. President, I ask unanimous consent that the Senator from Oklahoma, Mr. INHOFE, be added as an original cosponsor of the Roberts amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERTS. Mr. President, I yield to the distinguished Senator from Colorado, my friend and colleague, 3 minutes of the remaining time.

The PRESIDING OFFICER. The Chair recognizes the Senator from Colorado.

Mr. ALLARD. I thank the Senator from Kansas for yielding.

I ask unanimous consent that I be made a cosponsor of the Roberts amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLARD. Mr. President, I ask unanimous consent that Doug Flanders of my staff have floor privileges during the entire debate on the National Defense Authorization Act for fiscal year 1999.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLARD. Mr. President, I rise in support of the Senate’s amendments.

The reason I do that is I think that the North Atlantic Treaty Organization, which we refer to as NATO in this debate, is suffering from mission creep. I look at what has happened with the Strategic Concept. I look at the passing of the 1999 new Strategic Concept, and I think it becomes clear how mission creep is moving in.
In 1991, NATO established a new Strategic Concept which altered the concept dramatically from the original treaty. It is needed for more flexibility in the ability to get into a wide range of military operations. However, I add that it did maintain in part 4, under Guidelines for Defense, entitled “Principle of Alliance Strategy”—I want to quote specifically from that Strategic Concept.

The alliance strategy will continue to reflect a number of fundamental principles. The alliance—

And this is underlined—

The alliance is purely defensive in purpose. None of its weapons will ever be used except in self-defense. And it does not consider itself to be anybody’s adversary.

Then, if we look at the 1999 new Strategic Concept, it still says that their core purpose is the collective defense of NATO members. It adds that NATO:

... should contribute to peace and stability in the region.

But a lot of the debate here on the floor has been about what does the Concept say, the important point I want to make here is what is important is what it does not say. In the 1999 new Strategic Concept, there is no mention that the alliance will never use its weapons except in self-defense. So, in 1991 the new Strategic Concept said the alliance was purely defensive in purpose. In 1999, there is no mention that the alliance will never use its weapons except in self-defense. I think that is a real important distinction. That is why I think it is so important we have a debate on the mission of NATO.

The PRESIDING OFFICER. The Senator’s time has expired. The Chair recognizes the Senator from Oklahoma.

Mr. NICKLES. Mr. President, I compliment my colleague from Kansas for this amendment. I know there are additional perspectives on this side, at least one I would like to speak on in some detail, so I ask unanimous consent both sides have an additional 8 minutes to speak on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, will my colleague yield 3 minutes?

Mr. ROBERTS. I yield 2 minutes.

Mr. NICKLES. Mr. President, I thank the Senator from Kansas. Mr. NICKLES. Mr. President, I compliment my colleague from Kansas for this amendment. I know there are additional perspectives on this side, at least one I would like to speak on in some detail, so I ask unanimous consent both sides have an additional 8 minutes to speak on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, will my colleague yield 3 minutes?

Mr. ROBERTS. I am delighted to yield my distinguished colleague and friend 5 minutes.

Mr. NICKLES. Mr. President, I thank the Senator for this amendment. I think this is a very important amendment. I wish we would debate it at much greater length, because I am afraid of the things I have read, from comments made by the President of the United States, that he is expanding NATO’s role, commitment, obligation, frankly, far beyond the treaty we have signed, which has been so successful, the 50th anniversary of which we commemorated this year.

I look at the President’s statement he made on May 27, 1997. He did this in concert with French President Chirac and Russian President Yeltsin in France. He stated:

In 1991, NATO was building a new NATO. It will remain the strongest alliance in history, with smaller, more flexible forces, prepared to provide for our defense, but also trained for peacekeeping.

He goes on, and I will just read the last sentence:

... that is far more than that.

Now we are getting into something we all know this was an alliance that was set up to be a defensive alliance. We are moving into a entirely different approach to life, and the President is unilaterally expanding the commitments of this Nation under the guise of a new NATO that is involved in new missions, as the Senator from Oklahoma has just noted, committing us solemnly with the same depth of commitment that we put our lives, our fortunes, and our honor to preserve the integrity of democracy against totalitarian communism for all of these years.

That is what is being asked here. To have that done without full debate and full approval of this Congress is astounding and would represent a major legal erosion of the powers of the Senate and the Congress, particularly for the Senate, to review these matters. So I cannot express too strongly how important it is this Senate reassert its historic responsibility to advise and consent to involvement in these kind of foreign policies.

Once the President commits us, we pay for it. Right now this action in Kosovo amounts to 19 NATO nations meeting and deciding how to deploy the U.S. Air Force. We are paying for this war in our own backyard, and they are voting on how to conduct it. We simply have to get a better grip on it.

The PRESIDING OFFICER. The Senator’s 2 minutes have expired.

Mr. SESSIONS. I thank the Senator from Kansas.

Mr. ROBERTS. I yield 2 minutes to the Senator from Oklahoma.

Mr. WELSTON. I ask my colleague whether I could have 10 seconds to come follow the privilege of the floor? They have been waiting outside. May I do that without taking anybody’s time?

Mr. ROBERTS. Certainly.

Mr. WELSTON. Mr. President, I ask unanimous consent that Ben Highton, Rachel Gragg, John Bradshaw, and Michelle Vidovic, who are fellows, be granted the privilege of the floor for the duration of the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Oklahoma.

Mr. INHOFE. Mr. President, I know the Senator from Delaware, the Senator from Alabama, and others have been talking about the legal ramifications of what this amendment is all about. You can study the sections and subsections and sub-subsections and quote all of these things, but I think we all know this was an alliance that was set up to be a defensive alliance. Now we are getting into something that is far more than that.

But I would put out two things that have not been said. First of all, I just
Mr. WELLSTONE. Mr. President, I say to my colleague, I am committed to having a rollcall vote on the welfare tracking amendment, so that would not work out for me. I am pleased to go on with this debate, and I will come back later.

Mr. ROBERTS. Will the distinguishing Senator yield?

Mr. WARNER. Mr. President, this is the first time we have known of the Senator’s desire to have a rollcall vote on the third amendment. We are prepared to accept this. Mr. WELLSTONE. Mr. President, I say to my colleague from Virginia, I appreciate working with him on the other amendments. I have been down this path before with voice votes and then it is out in conference. I am committed to having a debate and vote on this. I am sorry my colleague is surprised by this. I am more than willing to wait. I think this debate is very important. I will come back later and do this.

Mr. WARNER. Mr. President, I want the opportunity to consult with the chairman of the committee that has jurisdiction over the subject matter of the third amendment and with the majority leader and presumably the minority leader, and set a time for the rollcall vote, which the Senator is entitled to have. For the moment, we are prepared to accept the two amendments and then allow the debate—

The PRESIDING OFFICER. Under the previous order, the time is set for the pending amendment, we immediately proceed to the first of the two Wellstone amendments, accept those before lunch, and then determine at that time whether to conclude the debate on the third. In any event, the rollcall vote on the third amendment will have to come after lunch under the existing unanimous consent agreement.

Mr. ROBERTS. If the Senator will yield, basically how much additional time to the time we have left has the Senator asked for? I am not sure there are any more Members who want to speak on the minority side. I can wrap up in 5 minutes or less. I am adding opponents upon sponsors up, so I am happy to stay here for a while.

Mr. WARNER. Mr. President, for the purpose of the party caucuses, we hope to complete all debate on the underling amendment circa 12:30, which is roughly a half hour. I wish to speak a few minutes on the amendment offered by the Senator from Kansas, as does the ranking member.

My suggestion is, if possible, while Senator WELLSTONE is on the floor, do the voice voting of his two amendments, reserving, of course, of scheduling the third, and then we can continue with this debate. It will not take but a minute on the two voice votes on the two Wellstone amendments.

Mr. ROBERTS. I will agree to that approach. The PRESIDING OFFICER. Is there objection?

Mr. WARNER. We have not put it in the form of a unanimous consent request.

Mr. WELLSTONE. Mr. President, I apologize. I was in a discussion with the staff on the majority side. What are we talking about here?

Mr. LEVIN. Mr. President, my amendment, the suggestion was we immediately take up the two Wellstone amendments that we are going to voice vote, then go back to the Roberts amendment, and then come back to the third amendment afterwards.

Mr. WELLSTONE. That will be fine with me.

AMENDMENT NO. 381, AS MODIFIED

Mr. WELLSTONE. Mr. President, first on amendment No. 381, I send a modification to the staff.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

On page 83, between lines 7 and 8, insert the following:

SEC. 229. PROVISION OF INFORMATION AND GUIDANCE TO THE PUBLIC REGARDING ENVIRONMENTAL CONTAMINATION AT U.S. MILITARY INSTALLATIONS FORMERLY OPERATED BY THE UNITED STATES THAT HAVE BEEN CLOSED.

(a) REQUIREMENT TO PROVIDE INFORMATION AND GUIDANCE.—The Secretary of Defense shall publicly disclose existing, available information relevant to a foreign nation’s determination of the nature and extent of environmental contamination, if any, at a site in that foreign nation where the United States operated a military base, installation, and facility that has been closed as of the date of enactment of this Act.

(b) LIMITATION.—The requirement to provide information and guidance under subsection (a) may not be construed to establish on the part of the United States any liability or obligation for the costs of environmental protection or remediation at any site referred to in subsection (a).

(c) NATIONAL SECURITY.—Information of the Secretary of Defense that could adversely affect U.S. National Security shall not be released pursuant to this provision.

Mr. WELLSTONE. Mr. President, I will take a very brief period of time on each amendment. Basically what this amendment says is—

The Secretary of Defense shall publicly disclose existing, available information relative to a foreign nation’s determination of

May 25, 1999

C O N G R E S S I O N A L R E C O R D — S E N A T E

came back from the Canada-United States interparliamentary meeting up there. It is very clear to me they are involuntarily being affected by a contribution, only because we are in there. I wonder how many of these countries are getting involved because we are providing that leadership.

No. 2, my concern about this is not a legalistic concern. It is what effect is this having on our state of readiness. I happen to be chairman of the Readiness Subcommittee. This is what is very frightening. We can remember in this Chamber in 1994, in 1995, talking about Bosnia; we were going to be sending people over to Bosnia. What was the main argument used? We have to protect the integrity of NATO. Then we have the same thing coming up on Kosovo. It has come up in other places, too.

These are areas where we do not have national strategic interests. What it has done is to put us in a position where we cannot carry out the minimum expectations of the American people or our national military strategy, which is to defend America on two fronts.

I want to tell you how proud I was of General Hawley the other day, Air Combat Command, who came out and said we, right now, are not in a position to respond in areas where we do have a national strategic interest such as North Korea or the Persian Gulf.

It is very, very important that we get to the bottom of this and we make a determination as to what our future commitments are going to be as far as NATO is concerned.

The PRESIDING OFFICER. The Senator’s time has expired. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I believe this debate is taking on excellent participation. I think we can allocate another 10 minutes to both sides—10 minutes under the control of the Senator from Kansas and 10 minutes under the control of my distinguished colleague from Michigan.

Mr. LEVIN. Reserving the right to object, and I do not plan to object, I wonder if the Chair can inform us as to how much time is remaining on both sides under the previous extension.

The PRESIDING OFFICER. Almost 3 minutes on this side and 8 minutes on the side of the Senator from Michigan.

Mr. LEVIN. I want to protect the rights of the Senator from Minnesota who has been waiting.

Mr. WELLSTONE. Mr. President, I say to my colleague, this is an important debate. I agree with both of the managers. We should go on with the debate. I ask the question whether or not I may yield the floor? I had been called upon to respond in areas where we do have a national strategic interest such as the control of my distinguished colleague from Michigan.

Mr. WELLSTONE. I say to my colleague, this is an important debate. I agree with both of the managers. We should go on with the debate. I ask the question whether or not I may yield the floor? I had been called upon to respond in areas where we do have a national strategic interest such as the control of my distinguished colleague from Michigan.

Mr. WARNER. Mr. President, I can address that and make a suggestion.
the nature and extent of environmental contamination at a site in that foreign nation where the United States operated a military base, installation, and facility that has been closed as of the date of the enactment of this Act.

I thank both colleagues, and I really hope these amendments will be supported in conference committee.

To make a long story short, when we leave a country, close our base, quite often what happens is that there is some environmental contamination. We want to make sure those countries have access to information as to the extent of what chemicals or substances are there which might pose a danger to their citizens.

It is a very reasonable amendment. It is important for our foreign relations with these countries. I believe it has strong bipartisan support. I thank Senator Levin and Senator Warner for their support and make the request—I think both Senators want to do this—that this be kept in conference committee. That is why I do not need a recorded vote.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. May I seek clarification of our colleague from Minnesota, on his third amendment: What number does he designate this being? He just mentioned he wanted to send an amendment—

Mr. WELLSTONE. I thought we were going to do two amendments right now: One is on environmental impact when we close bases, and the second amendment is on atomic vets, both of which the Senator is prepared to accept.

Mr. WARNER. Correct. Mr. WELLSTONE. The third amendment, No. 382, deals with tracking, reporting on what is actually happening in the country right now with welfare reform.

Mr. WARNER. President, I am familiar with that, and the Senator first wishes to amend the text of No. 382?

Mr. WELLSTONE. No; I just did—

Mr. WARNER. You just did it.

Mr. WELLSTONE. I modified amendment No. 381.

Mr. WARNER. Addressing No. 382, what amount of time will the Senator require for debate on No. 382?

Mr. WELLSTONE. The UC provides for an hour equally divided.

Mr. WARNER. And does the Senator wish to adhere to that previous order?

Mr. WELLSTONE. I say to my colleagues, yes. I have been trying to get this amendment on the floor for some time. I am talking to a good friend, my friend from Virginia, as I make my case. I believe my friend from Virginia will agree that this is well worth the focus of the part of the Senate.

Mr. WARNER. I am only addressing procedure.

Mr. WELLSTONE. One hour equally divided is the UC.

Mr. WARNER. We would like to complete that amendment by 1 o'clock. Will the Senator yield the rest of the time? In all likelihood, we will yield back the half hour reserved for us, because there is not likely to be any opposition.

Mr. WELLSTONE. Mr. President, I am delighted if there is not any opposition. If the Senator is going to yield back his time, clearly—I do need to go to the caucus, but I would rather not yield back time. I will try to shorten my presentation. If there is not a response, so be it; we will get a strong vote.

Mr. WARNER. For the convenience of the Senate, does the Senator think he can give us any estimate as to how he can shorten it from a half hour down to, say, 10 or 12 minutes?

Mr. WELLSTONE. Mr. President, I am not going to shorten this amendment to 10 or 12 minutes in any way, shape or form, because it is too important to have a chance to talk about what is happening to these women and children and make sure that we track what is happening.

Mr. WARNER. I am just seeking to try to accommodate the Senate.

Mr. WELLSTONE. We should stay with the UC agreement.

Mr. WARNER. Beg your pardon?

I have to address the Chair. There is a UC requirement of the expenditure of that time prior to the normal weekly recess today at 12:30?

The PRESIDING OFFICER. The Chair recognizes the Senator from Virginia.

Mr. WARNER. After we have addressed the Chair, it is appropriate that we add 8 minutes, along with the 30 minutes on the Senator's side; 8 minutes; is that not correct?

Mr. WELLSTONE. Mr. President, I would suggest that we try to conclude the Roberts amendment in 5 or 10 minutes. Then we will proceed to the Wellstone amendment, and then we can adhere to the time agreements.

Mr. ROBERTS. I yield to the distinguished chairman—what was the request, Mr. Chairman, 3 minutes, 5 minutes?

Mr. WARNER. I would suggest that we try to conclude the Roberts amendment in 5 or 10 minutes. Then we will proceed to the Wellstone amendment, and then we can adhere to the time agreements.

Mr. ROBERTS. I ask the distinguished chairman, how much time would the distinguished chairman like?

Mr. WARNER. Just 2 minutes.

Mr. ROBERTS. I yield the distinguished Senator from Delaware 2 minutes.

Mr. WARNER. Mr. President, I want to address the document that was submitted to the Senate by the Senator from Delaware entitled: The Kyl Amendment and the Strategic Concept of NATO. I went back and asked the Senator from Delaware to clarify the date, time, group, and when it was prepared and submitted to the Senate. He is doing that.

But I just wish to draw the attention to the Senate, as I read this document—and I have seen it before—it simply refers to those portions in the Kyl amendment that were incorporated into the final draft of the Strategic Concept. But it does not, on its face, nor do I believe it was intended to, say that it covered everything by the new Strategic Concept.

Indeed, I agree with the Senator from Kansas this document in no way intended to represent that it encompasses all of the new Strategic Concept. The Senator from Kansas is quite
properly pointing out there are those of us—the Senator from Kansas, myself, and others—who feel the Strategic Concept went beyond the Kyi amendment. I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. ROBERTS. Might I inquire of my distinguished friend from Michigan if he, the minority, seeks any additional time?

Mr. LEVIN. We are just using about 3 of our 8 minutes.

Mr. ROBERTS. I would be happy if the Senator would like to proceed at this time. I would like to close, if that is all right.

Mr. LEVIN. Sure.

The PRESIDING OFFICER. The Chair recognizes the Senator from Michigan.

Mr. LEVIN. Mr. President, I support this amendment for the reasons previously given. It does not reach any conclusion as to whether there are any additional obligations upon the United States. Unlike earlier versions, it simply asks the President to certify whether or not there are additional obligations imposed on the United States. I have read from what was called then the new Strategic Concept of NATO in 1991. At the heading of that Concept, it was stated that: 'The alliance recognizes that developments taking place in Europe would have a far-reaching impact on the way in which its aims would be met in the future.'

And, indeed, adopted language such as: 'Alliance security must also take account of the new strategic environment. It is very broad language.

That did not impose any new obligations. It is very broad language.

Listen to some of this language in this 1991 alliance new Strategic Concept:

The primary role of the alliance military forces to guarantee security and territorial integrity of member states remains unchanged [we said in 1991]. But this role must take account of the new strategic environment in which a single massive and global threat has given way to diverse and multidirectional risks. Allied forces have different functions to perform in peace, crises, and war.

That is section 40 in 1991. How about this one, section 41:

Allies could be called upon to contribute to global stability and peace by providing forces for United Nations missions.

Allies could be called upon to contribute to global stability and peace by providing forces for United Nations missions.

This was adopted in 1991 as a new Strategic Concept. That did not impose a thing on us. It was a new Strategic Concept adopted by NATO, not a legally binding commitment on the alliance.

It was not submitted to us then as a treaty change because it was not a treaty change, nor is this new Strategic Concept of 1999 legally binding upon us any more than the 1991 Strategic Concept was.

So I think we ought to adopt this amendment. It is something which is highly appropriate to ask the President whether or not the new Strategic Concept of NATO imposes any new commitment or obligation on the United States, the key word there to me being "imposes."

I ask, Mr. President, before I yield the floor, that the yeas and nays be ordered on this amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered.

Mr. LEVIN. Mr. President, I ask unanimous consent that the privileges of the floor be granted to the following Pearson Fellow on the staff of the Foreign Relations Committee, Joan Wadelton, during the pendency of the Department of Defense Authorization legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. I thank the Chair. Again, I will be supporting this amendment.

Mr. ROBERTS. With the debate we have had on the floor, although there is support—and the better part of judgment would be for me simply yield the floor—will the single one more time. The debate is centered around whether or not the new Strategic Concept adopted at the 50th anniversary of NATO is legally binding, a treaty, or different from the 1991 Concept, let alone the 1949 Concept.

Let me just say that the 1991 document really stressed that—as a matter of fact, it assured—no NATO weaponry will ever be used offensively. We are sure doing that now in regard to Kosovo. In addition, in terms of the 19 parties who met in Washington, I am sure that each one of them certainly thought it was binding. And if the men and women in the uniform of all our allies do not think it is binding, I think they had better look for a new definition.

I believe any document that contains even tacit commitment by the United States and other nations to engage in new types of NATO missions—and let me simply say that these missions are now described as problems with drugs, problems with social progress, with re-form, with ethnic strife; about the only thing that is not in there is don’t put gum in the water fountain—outside the domain of the original treaty, as well as a commitment to structure military forces accordingly, can be considered an international agreement.

I refer again to the U.S. Department of State Circular 175, the Procedure on Treaties, that sets forth eight considerations available for determining whether or not an agreement or an accord should be submitted to the Senate for ratification. Four of them I will repeat again: The extent to which the agreement involves commitments or risks affecting the Nation as a whole—if Kosovo is not a risk, I do not know what—is whether the agreement can be given effect without the enactment of subsequent legislation by the Congress; past U.S. practices as to similar agreements; the preference of Congress as to a particular type of agreement.

It seems to me, if I recall the debate and the two copies of the original 1949 document, and then the Strategic Concept document, No. 1, they said no offensive weapons. No. 2, they said we are going to stay with our own borders and we will meet with you before we go outside the borders and go wandering in the territory of a sovereign nation.

Then lastly, we are going to consult with the U.N. It is going to be in cooperation with the U.N. All that is different.

I think to say that it is not different in regard to 1991 is simply not accurate.

I don’t know. I suppose per se, legally—I am not a lawyer—that this Strategic Concept is not a treaty. But it sure walks like a treaty duck and it quacks like a treaty duck and it is wandering into different areas like a treaty duck. In the quacking and the walking, it is causing a lot of problems.

I simply say, in closing, I do respect the Senator from Michigan and his support and the Senator from Delaware for his accommodation. It is true that the Senator from Delaware said that I was in the House of Representatives, the other body, what Senator Byrd refers to as the lower body. In 1990 we were not asleep. We were not asleep at all. We admired the Senator from Delaware from afar. We were spellbound, as a matter of fact, by his oratorical skills, his sartorial splendor, and his ability to be heard above all in the Senate, regardless of whether the acoustical system was working or not. So I thank the Senator from Delaware for his comments.

I urge Senators to support this amendment and send a strong message that we are adhering to our constituencies. I think that is something that in effect directly affects the lives of our American men and women and our national security, that the Senate stepped up to the plate.

I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. Under the previous order, the Roberts-Warner
amendment No. 377 will be temporarily laid aside.

Mr. WARNER. And the vote will occur, Mr. President, if you continue to read the order.

The PRESIDING OFFICER. The vote will occur after the Roth amendment at 2:15.

Mr. WARNER. I thank the Chair.

Now, Mr. President, we are ready to receive the comments under the standing order for the day from our distinguished colleague from Minnesota. These comments will be relative to what I call the third amendment, No. 382. Perhaps we could take this time to vote the first two by voice.

Mr. WELLSTONE. Mr. President, besides the environmental assessment amendment, the second amendment we are taking deals with atomic veterans—is that service compensation for atomic vets? I am pleased to do so, and I thank both my colleagues for their help and comments.

Mr. WARNER. We are happy to be of accommodation. Would the Senator urge the adoption of the two amendments?

Mr. WELLSTONE. I urge the adoption of the two amendments.

The PRESIDING OFFICER. Without objection, the two amendments are agreed to.

Mr. WELLSTONE. These are amendments Nos. 380 and 383?

The PRESIDING OFFICER. Amendments 380 and 381.

Mr. WELLSTONE. I am sorry, 380 and 381.

Mr. LEVIN. As modified.

The PRESIDING OFFICER. As modified.

The amendments (No. 380 and No. 381) were agreed to.

Mr. LEVIN. Mr. President, I move to reconsider the vote.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 380

Mr. WELLSTONE. Mr. President, I rise today to speak on an amendment I offered that would remove some of the frustrating and infuriating obstacles that have too often kept veterans who were exposed to radiation during military service from getting the disability compensation they deserve. This amendment would add three radiogenic conditions to the list of presumptively service-connected diseases for which atomic veterans may receive VA compensation, specifically: lung cancer; colon cancer; and tumors of the brain and central nervous system. It is based on a bill I introduced during the last Congress, S. 1385, the Justice for Atomic Veterans Act.

At the outset, let me say that this amendment was accepted and adopted by the Senate just a few months ago as a part of S. 4, the Soldiers’, Sailors’, Airmen’s, and Marines’ Bill of Rights Act of 1999. Because that bill appears to be dead on arrival in the House, I am offering it on the Defense Authorization Amendment of 2001. This amendment was relevant to S. 4 and it is certainly relevant to this bill. But I mention the history of this amendment to my colleagues in the belief that what was acceptable to the Senate three months ago will be acceptable today.

I want to explain why this amendment is topical to the Defense Authorization bill. I believe that the way we treat our veterans does send an important message to young people considering service in the military. When veterans of the Persian Gulf War don’t get the kind of treatment they deserve, when the VA health care budget loses out year after year to other budget priorities, when veterans benefits claims take years to process, what is the message we are sending to future recruits?

How can we attract and retain young people in the service when our government fails to honor its obligation to provide just compensation and health care for those injured during service?

One of the most outrageous examples of our government’s failure to honor its obligations to veterans involves “atomic veterans,” patriotic Americans who were exposed to radiation at Hiroshima and Nagasaki and at atmospheric nuclear tests.

For more than 50 years, many of them have been denied compensation for diseases that the VA recognizes as being linked to their exposure to radiation—diseases known as radiogenic diseases. Many of these diseases are lethal forms of cancers.

I received my first introduction to the plight of atomic veterans from some first-hand stories from the members of the Forgotten 216th. The Forgotten 216th was the 216th Chemical Service Company of the U.S. Army, which participated in Operation Tumbler Snapper. Operation Tumbler Snapper was a series of eight atmospheric nuclear weapons tests in the Nevada desert in 1952.

About half of the members of the 216th were Minnesotans. What I’ve learned from them, from other atomic veterans, and from their survivors has shaped my views on this issue.

Five years ago, the Forgotten 216th contacted me after then-Secretary of Energy O’Leary announced that the U.S. Government had conducted radiation experiments on its own citizens. For the first time in public, they revealed what went on during the Nevada tests and the tragedies and trauma that they, their families, and their former buddies had experienced since then.

Because their experiences and problems typify those of atomic veterans nationwide, I’d like to tell my colleagues a little more about the Forgotten 216th. When you hear their story, I think you have to agree that the Forgotten 216th and other veterans like them must never be forgotten again.

They were sent to measure fallout at or near ground zero immediately after a nuclear blast. They were exposed to so much radiation that their Geiger counters went off the scale while they inhaled and ingested radioactive particles. They were given minimal or no protection. They frequently had no film badges to measure radiation exposure. They were given no information on the perils they faced.

Then they were sworn to secrecy about their participation in nuclear tests. They were often denied access to their own service medical records. And they were provided no medical follow-up.

For decades, atomic veterans have been America’s most neglected veterans. They have been deceived and treated shabbily by the government they served so selflessly and unquestioningly. Both the U.S. Government can’t be counted on to honor its obligation to these deserving veterans, how can young people interested in military service have any confidence that their government will do any better by them?

I believe the neglect of atomic veterans should stop here and now. Our government has a long overdue debt to these patriotic Americans, a debt that we in the Senate must help to repay. I urge my colleagues on both sides of the aisle to help repay this debt by supporting this amendment.

My legislation and this amendment have enjoyed the strong support of veterans service organizations. Recently, we endorsed the Independent Budget for FY 2000, which is a budget recommendation issued by AMVETS, Disabled American Veterans (DAV), Paralyzed Veterans of America (PVA), and the Veterans of Foreign Wars (VFW), endorsed adding these radiogenic diseases to VA’s presumptive service-connected list.

Let me briefly describe the problem that my amendment is intended to address. When atomic veterans try to claim VA compensation for their illnesses, VA almost invariably denies their claims. VA tells these veterans that their radiation doses were too low—below 5 rems.

But the fact is, we don’t really know that and, even if we did, that’s no excuse for denying these claims. The result of this unrealistic standard is that it is almost impossible for these atomic veterans to prove their case. The only solution is to add these conditions to the VA presumptive service-connected list, and that’s what my amendment does.

First of all, trying to go back and determine the precise dosage each of these veterans was exposed to is a futile undertaking. Scientists agree that
the dose reconstruction performed for the VA is notoriously unreliable.

GAO itself has noted the inherent uncertainties of dose reconstruction. Even VA scientific personnel have conceded its unreliability. In a memo to VA Secretary Togo West, Under Secretary for Health Kenneth Kizer has recommended that the VA reconsider its opposition to S. 1385 based, in part, on the unreliability of dose reconstruction.

Mr. President, I ask unanimous consent that the text of Dr. Kizer's memo be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. WELLSSTONE. In addition, none of the scientific experts who testified at the recent Senate hearing on S. 1385 on April 21, 1998, supported the use of dose reconstruction to determine eligibility for VA benefits.

Let me explain why dose reconstruction is so difficult. Dr. Marty Gensler on my staff has researched this issue for over five years, and this is what he has found.

Many atomic veterans were sent to ground zero immediately after a nuclear test with no protection, no information on the known dangers they faced, no badges or other monitoring equipment, and no medical followup.

As early as 1946, ranking military and civilian personnel responsible for nuclear testing anticipated claims for service-connected disability and sought to ensure that “no successful suits could be brought on account of radiological hazards.” That quotation comes from documents declassified by the President's Advisory Committee on Human Radiation Experiments.

The VA, during this period, maintained classified records “essential” to evaluating atomic veterans’ claims, but these records were unavailable to veterans themselves.

Atomic veterans were sworn to secrecy and were denied access to their own service and medical records for many years, effectively barring pursuit of compensation claims.

It’s partly as a result of these missing or incomplete records that so many people have doubts about the validity of dose reconstructions for atomic veterans, some of which are performed more than fifty years after exposure.

Even if these veterans’ exposure was below 10 rems [but] it is not known for certain whether doses below this level are detrimental to public health.”

Despite persistent doubts about VA’s and DoD’s dose reconstruction, and despite doubts about the science on which VA’s 5 rem standard is based, these dose reconstructions are used to bar veterans from compensation for disabling radiogenic conditions.

The effects of this standard have been devastating. A little over two years ago the VA estimated that less than 50 claims for non-presumptive diseases had been approved out of over 18,000 radiation claims filed.

Atomic veterans might as well even bother. Their chances of obtaining compensation are negligible.

It is impossible for many atomic veterans and their survivors to be given “the benefit of the doubt” by the VA while their claims hinge on the dubious accuracy and reliability of dose reconstruction and the health effects of exposure to low-level ionizing radiation remain uncertain.

This problem can be fixed. The reason atomic veterans have to go through this reconstruction at all is that the diseases listed in my amendment are not presumed to be service-connected. That’s the real problem. The VA already has presumptive diseases that are presumed service-connected, but these are not on it.

This makes no sense. Scientists agree that there is at least as strong a link between radiation exposure and these diseases as there is to the other diseases on that VA list.

You might ask why I’ve included these three diseases in particular—lung cancer; colon cancer; and tumors of the brain and central nervous system—in my amendment. The reason is very simple. The best, most current, scientific evidence available justifies their inclusion. A paper entitled “Risk Estimates for Radiation Exposure” by John D. Boice, Jr., of the National Cancer Institute, published in 1996 as part of a larger work called Health Effects of Exposure to Low-Level Ionizing Radiation, includes a table which rates human cancers by the strength of the evidence linking them to exposure to low levels of ionizing radiation. According to this study, the evidence of a link for lung cancer is “very strong”—the highest level of confidence—and the evidence of a link for colon and brain and central nervous system cancers is “convincing,” the next highest level of confidence. So I believe I can say with a great deal of certainty, Mr. President, that science is on the side of this amendment. And I ask unanimous consent that a copy of the table I just mentioned be printed in the RECORD at the conclusion of my remarks.

Last year, the Senate Veterans Affairs Committee reported out a version of S. 1385, the Justice for Atomic Veterans Act, which included three diseases to be added to the VA’s presumptive list. Two of these diseases, lung cancer and brain and central nervous system cancer, I have included in my amendment. The third disease included in the reported bill was ovarian cancer.

Mr. President, I’d like to explain why I substituted colon cancer for ovarian cancer. It is true that the 1996 study I just cited states that the evidence of a linkage for ovarian cancer to low level ionizing radiation is “convincing,” just as it is for colon cancer. But Mr. President, there are no female atomic veterans. The effect of creating a presumption of service connection for ovarian cancer is basically no effect—because no one could take advantage of it. However, the impact of adding colon cancer as a presumption for atomic veterans is significant; atomic veterans will be able to take advantage of that presumption.

The President’s Advisory Committee on Human Radiation Experiments agreed in 1995 that VA’s current list should be expanded. The Committee concluded that the Administration support S. 1385. Under Secretary for Health Kenneth Kizer cited the indefensibility of denying presumptive service connection for atomic veterans in light of the presumption for Persian Gulf veterans.

In 1993, the VA decided to make lung cancer presumptively service-connected for Agent Orange veterans. That decision was based on a National Academy of Sciences study that had found a link only where Agent Orange exposures were “high and prolonged,” but pointed out there was only a “limited” capability to determine individual exposures.

For atomic veterans, however, lung cancer continues to be non-presumptive. In short, the issue of exposure levels poses an almost insurmountable obstacle to approval of claims by atomic veterans, while the same problem is ignored for Agent orange veterans.

Persian Gulf War veterans can receive compensation for symptoms or illnesses that may be linked to their service in the Persian Gulf, at least until scientists reach definitive conclusions about the etiology of their health problems. Unfortunately, atomic veterans aren’t given the consideration or benefit of the doubt.

I believe this state of affairs is outrageous and unjust. The struggle of...
atomic veterans for justice has been long, hard, and frustrating. But these patriotic, dedicated and deserving veterans have persevered. My amendment would finally provide them the justice that they so much deserve.

Let me say this in closing. As I have worked with veterans and military personnel during my time in the Senate, I have seen a troubling erosion of the Federal Government’s credibility with current and former service members. No salary is high enough, no pension big enough to compensate our troops for the dangers they endure while defending our country. Such heroism stems from love for America’s sacred ideals of freedom and democracy and the belief that the nation’s gratitude is not limited by fiscal convenience but reflects a debt of honor.

This is one of those issues which test our faith in our Government. But the Senate can take an important step in righting this injustice. I urge my colleagues from both sides of the aisle to join me in helping atomic veterans win their struggle by supporting my amendment.

EXHIBIT 1
DEPARTMENT OF VETERANS AFFAIRS,
April 21, 1998.
From: Under Secretary for Health (10).
Subject: Request for Reconsideration of the Department’s Position on S. 385 (Wellstone).
To: Secretary (00).
1. I request that you reconsider the Department’s position on S. 385 (Wellstone), which would add a number of conditions as presumptive service-connected conditions for atomic veterans to those already prescribed by law. I only learned that the Department was opposing this measure last night on reading the Department’s prepared testimony for today’s hearing; I had no input into that testimony. Indeed, my views on this bill have not been obtained. I would strongly support this bill as a matter of equity and fairness.

2. I do not think the Department’s current opposition to S. 385 is defensible in view of the Administration’s position on presumed service-connection for Gulf War veterans, as well as its position on Agency Orange and Vietnam veterans.

3. While the scientific methodology that is the basis for adjudicating radiation exposure cases may be sound, the problem is that the exposure cannot be reliably determined for many individuals, and it never will be able to be determined in my judgment. Thus, no matter how good the method is, if the input is not valid then the determination will be suspect.

4. I ask that we formally reconsider and change the Department’s position on S. 385. I feel the proper and prudent position for the Department is to support S. 385.

KENNETH W. KIZER, M.D., M.P.H.

We will continue to have close military and political relations with countries such as the Philippines and Panama and we should not let this environmental issue fester and become an impediment to good relations.

The amendment as modified applies only to bases already closed. Initially I had intended to extend it to bases that would be closing in the future, which would include our facilities in Panama. However, since I understand that sensitive negotiations are underway on this very issue between the U.S. and Panama and I did not want this amendment to in any way interfere with the successful conclusion of those negotiations. But I want the record to show that I believe that we should be very forthcoming in releasing information on environmental conditions at the most disturbing bases. I would like to see the Pentagon avoid the long delays in providing information which we have seen in the Philippine case by following the spirit of this amendment. Of course, if we see a similar problem in the case of Panama we may have to revisit this issue next year and propose a similar proviso to require the Department of Defense to make information available publicly.

If we assist our strategic partners in their efforts to complete environmental baseline studies, it is quite likely that any clean-up which occurs down the road will be done by American companies, who are the leaders in this field. Without the information and the necessary studies these countries are unable to identify the scope of the problem and begin to move toward some type of amelioration. Once the studies are in hand they may be able to approach international lenders, such as the World Bank, for funding and subsequently some clean-up contracts may go to U.S. companies.

Mr. President, when we close our bases and leave behind environmental contamination, the people who suffer from various ailments attributed to those bases may not be able to move to another country because of the potential financial liability. We do not also need to contend with a toxic legacy left by the U.S. military. Just to highlight one of the most disturbing bases, the World Bank and the World Health Organization have said that the United States should pay for a clean-up of environmental contamination at those bases before leaving. What this amendment requires the Pentagon to do is simply to provide as much information as possible and to cooperate in interpreting that information so that nations such as the Philippines can complete environmental studies to tell them exactly what has been left behind.

So far the Pentagon has turned over substantial information to the Philippine government, but it has done so very slowly and clearly we need to be more forthcoming to help the Filipinos deal with this issue before the contamination in the Subic and Clark areas causes further health problems.

This amendment is intended to protect the legacy of the U.S. in those countries where we maintained bases. It does not look at the environmental issue as a legal issue but as a moral one. At a time when anti-Americanism may be growing in certain parts of the world I would like to encourage that in those countries that are our longtime allies, we do what we can to promote a positive image of the U.S. even after we leave our bases.
May 25, 1999

CONGRESSIONAL RECORD—SENATE

10713

It noted that 13 children aged one to seven “manifested signs and symptoms of birth defects and neurological disorder,” adding that “four females suffered spontaneous abortions and still births.”

“These can be attributed to mercury exposure,” the report said. It also reported “central nervous system disorder” among the persons at evacuation centers at Clark, ailments said can be traced to nitrates exposure.”

Earlier, the CHR forensic office collected water samples from the deep wells at the evacuation center in Clark and the Madapap resettlement site for volcano victims in Mabalacat, Pampanga.

The samples were later brought to the metals lab of the Environmental Management and Development (EMB) for analysis. In a report dated April 16, the EMB found 200 milligrams of mercury per liter of water and from 386 to 27 mg of nitrate per liter of water in the Clark area.

“These two chemicals, together with coliform for bacteria were found to be present in water in values exceeding the standard set by the WHO,” the report said.

The report recommended the immediate removal of the residents at Clark, and the thorough diagnosis and treatment of the patients.”

Among the victims identified in the report were Edmarie Rose Escoto, 5; Kelvin, 7; Martha Rose Pabalan, 4; 8-month-old Alexander; Sara Tolentino, and Abraham Taruc, who all had deformities to their lower limbs and cannot walk.

Rowell Borja, 5, and Sheila Pineda, 3, both had congenital heart ailments. Skin and kidney disorders were also found in other children, while cysts and kidney disorders were observed in adults.

The People’s Task Force for Bases Cleanup (PTFBC) has pointed out that “there is more than enough preliminary evidence of the toxic waste problem at the former U.S. bases in the Philippines.”

Among the documents that have confirmed the presence of toxic wastes at the former bases are pamphlets from the U.S. Government Accounting Office titled “Environmental Review of the Drawdown Activities at Clark Air Base” (September 1991) and “Potential Restoration sites on Board the U.S. Facility, Subic Bay.” (October 1992).

Mr. President, I recently received a letter from the Philippine Study Group of Minnesota expressing their concerns about the environmental contamination left by the U.S. military at the former Clark Air Base. They reported the results of a trip to the Philippines by two young Filipina-American women, Cherie Williams and Amy Toledo, who have been working with the affected populations near Clark field and have been meeting with my staff in Minnesota and here in Washington.

When these two women returned from the Philippines, they communicated the concern of the Filipino people about the problems of toxic waste remaining at both Clark and Subic. The problems are of sufficient concern to municipal governments near Clark that they tried to develop systems to deliver alternative water sources to the affected populations. However, they do not have the necessary resources. They said that the Department of Defense have been front page news in the Philippines and Philippine Senator Loren Legarda will soon hold hearings in this issue. The Philippine Study Group of Minnesota wrote to me, and I quote:

“These bases present problems that demand immediate attention. It is very unfortunate that the U.S. Department of Defense will not admit that they left polluted sites when they vacated the bases. Contrary to statements made by Secretary of State Albright, when she was in the Philippines last summer, the Department of Defense will not even release important documents needed by Philippine Development authorities.

We need at a minimum to see that all relevant documents are turned over to Philippine authorities. This includes key documents such as information on the construction of the wells and water supply system at Clark and hydrologic surveys for Clark which should be released to the Clark Development Corporation (CDC). Currently, the CDC does not have drawings or data on the water system and they are trying to improve their system without the data they need. The Philippine Study Group of Minnesota say they “are incredulous that the Defense Department will not even release those non-military technical documents that would be of great help to Philippine authorities.”

This amendment would require the Defense Department to do that. It is a simple, reasonable step toward improving the environmental situation for the people of the Philippines. It is a step in the direction of assuring our allies that when the U.S. closes a military base, it leaves behind a legacy of friendship, cooperation, and sensitivity to environmental justice—not a toxic legacy.

Mr. President, we have a long history with the Philippines. From the turn of the century until 1991, except for the period of Japanese occupation during WWII, U.S. military forces used lands in Central Luzon and around Subic Bay for the military bases which grew to be among the largest U.S. overseas bases in the world. The main purpose of Subic Bay Naval Base was to service the U.S. Navy Seventh Fleet. Forested lands were also used for training exercises. Clark Air Base served as a major operations and support facility during the Korean and Vietnam conflicts.

In 1991, more than 7,000 military personnel were stationed at Clark in addition to dependents and civilian support. Operations carried out on the bases included, but were not limited to: fuel loading, storage, distribution, and dispensing; ship servicing, repair, and overhaul; ammunition, assembly, destruction, and storage; aircraft servicing, cleaning, repair, and storage; base vehicle fleet servicing, cleaning, repair, overhaul, and operation; power generation; electricity transformation and distribution; steam generation; water treatment and distribution; sewage collection and treatment; hazardous waste storage and disposal; biotumen production; electroplating; corrosion protection; and weed and pest control.

These activities, for many years not conducted in a manner protective of the environment, lead to substantial contamination of the air, the ground, water, sediments, and coastal waters of the bases and their surroundings. This was not unique to the Philippines. Military and industrial activities in the U.S. and around the world have had similar effects. Contaminants include, but are not limited to, petroleum hydrocarbons, aromatic hydrocarbons, chlorinated hydrocarbons, pesticides, PCB’s, metals, asbestos, acids, explosives and munitions. Whether or not radioactive wastes are present is uncertain.

The Philippine Senate voted in 1991 to renew the lease between the two countries. In June of that same year, Mt. Pinatubo erupted hastening U.S. withdrawal from Clark Air Base. U.S. forces left Subic Naval Base in 1992, ending almost a century of occupation of these vast areas of Luzon. Notwithstanding initial Department of Defense protestations to the contrary, substantial amounts of hazardous materials and wastes were left behind at the time of the U.S. departure both on the surface and in various environmental media. According to a GAO report issued in 1992.

If the United States unilaterally decided to clean up these bases in accordance with U.S. standards, the costs for environmental cleanup and restoration could approach Superfund proportions.

Environmental officers at both Subic Bay Naval Facility and Clark Air Base have proposed a variety of projects to correct environmental hazards and remediate situations that pose serious health and safety threats.” None of these projects was undertaken prior to U.S. departure from the baselands. A study commissioned by the WHO in
1993, in order to assess potential environmental risks at Subic Bay, identified a number of contaminated and potentially contaminated sites on the bases and not only found evidence of environmental contamination but carefully documented the lack of existing capacity in the Philippines, whether in government, university, or private sectors, to assess and remediate this complex problem.

The health and safety issues are not theoretical or contingent on future development of the bases. At the present time rusting and bulging barrels of hazardous materials are sitting uncovered in the U.S. and in other compounds exposed asbestos insulation in buildings vacated by departing U.S. personnel. For years waste materials from the ship repair facility were dumped or discharged directly into Subic Bay, contaminating sediments and areas inhabited by thousands of residents from surrounding communities eat fish and shellfish harvested from this area. Thousands of evacuees displaced from homes destroyed by the eruption of Mt. Pinatubo and lava flows which followed have been temporarily housed in tents and makeshift wooden structures on Clark Air Base at a site previously occupied by a motorpool. They obtain drinking and bathing water from groundwater wells. Just beyond the Dau gate, about 300 yards from this evacuation center, is the permanent community of Dau where many thousands of residents routinely use groundwater for drinking, cooking, and bathing. Because of concerns about contamination of water from some of the wells in the evacuation area, including visible oily sheen, foul taste, and gastrointestinal illness, one sample was tested at the laboratories of the University of the Philippines in early 1994 and found to contain oil and grease. Limited by laboratory capability, the analysis did not include the wide range of volatile and semi-volatile organic compounds, fuels, fuel additives, and other compounds which commonly contaminate groundwater. Because of this, the U.S. military bases where similar military and industrial activities have taken place.

Many of these substances have important health effects when present even in extremely small amounts—health effects which may take years to become apparent—including cancer, birth and developmental abnormalities, and neurological or immunological damage. Moreover, there are numerous instances in the U.S. where contaminated groundwater at military bases has migrated off-base, sometimes for a distance of several miles, entering the drinking water of surrounding communities and posing a threat to public health. This is not only possible but likely at Clark Air Base, only one of numerous sites of concern at both bases and one which is beyond existing Philippine capacity to assess let alone to remediate.

When President Clinton visited the Philippines in November 1994 he acknowledged that the issue of base contamination would need to be further investigated. However, President Clinton stated that, “We have no reason to believe at this time that there is a big problem that we left unattended. We clearly are not mandated under treaty obligations to do more.” He went on to say “. . . we decided we should focus on finding the facts now, and when we find them, deal then with the facts as they are.”

Though there may be no treaty obligation to accept responsibility, there are obvious moral and public health arguments which should compel the U.S. to accept responsibility for environmental assessment and remediation of the former bases in the Philippines. There are other cases besides in, for example, Canada, Germany, Italy and Japan, where in response to host-country discovery and complaints of environmental contamination, the U.S. has provided assessment and clean-up. After nearly a century of occupation of these Philippine baselands, the obligation is no less. Meanwhile, as the political resolution of this issue unfolds, thousands of Filipinos, many of whom are living in marginal refugee conditions, and drinking and bathing in water which may be contaminated with hazardous substances resulting from U.S. military activities.

If these circumstances were to exist in the U.S. the groundwater would already have been sampled to test for a broad spectrum of substances and the public’s health protected, while resulting plumes of contamination were being mapped and remediation strategies executed. Until we can answer with certainty whether or not this water is safe for consumption, an answer which neither Philippine government, public health officials, nor academicians are able to provide without assistance, and eliminate any identified hazardous exposures, the U.S. may be viewed as not living up to its obligations which are contractual, political, moral, and not mandated under treaty obligations. When President Clinton visited the Philippines he acknowledged the need for investigation. The role of the U.S. military installations is to be investigated, the role of the U.S. military installations in the Philippines is to be assessed, let alone remediated.

AMENDMENT NO. 382

Mr. WARNER. Mr. President, I have done that, we now proceed to amendment No. 382, on which the Senator will address the Senate pursuant to the standing order, and then at a time later we will schedule the vote.

Mr. WELLSTONE. Mr. President, I will be ready to go, if I could have just 30 seconds to also say on the floor of the Senate, when I say “we,” I don’t mean as in me, I mean the collective us. This is for both Senator LEVIN and Senator WARNER. You also, in a bipartisan way, through your efforts, were able to put an amendment into this bill that deals with family violence. I thank you, I think this is an extremely important amendment.

The problem was that all too often, when a spouse usually a woman—would report violence, there was no real right of guarantee of confidentiality, which we needed. In other words, a woman could go to a doctor and then her report to a doctor could get out publicly. This really will enable women who are the victims of this violence to be able to go to someone and receive some support and help. It is extremely important. Both of you have supported this, I think there is similar language over in the House side, I thank the two of you. This is an amendment I am really proud of. I thank you.

Mr. WARNER. Once again, Mr. President, I am about to ask the vote on No. 382, the amendment the Senator is about to debate in the Senate under the standing agreement, can be voted as the third vote in sequence this afternoon.

Mr. WELLSTONE. That is correct.

Mr. WARNER. All right.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. WARNER. Have the yeas and nays been ordered on that amendment?

Mr. WELLSTONE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I wonder if it would be in order, if there would be any objection, to ask unanimous consent that the amendment be held between now and the recess so that people know there is not going to be any additional——

Mr. WARNER. Mr. President, I am not objecting, but I think we should just simply say that at 1, at which time the 30 minutes expires, the Senate will stand in recess until the first vote, which is scheduled for 2:15.

Mr. LEVIN. But for some of us who planned to actually leave here at 12:30, I think it is important, if there is an understanding to this effect, that there be no further amendments offered or any other business carried on between now and the time that we recess for the luncheons. Is that agreeable?

Mr. WARNER. Mr. President, I have no agreement, but let’s make it very clear that we will now begin to address amendment No. 382. As soon as that debate is concluded, the Senate will stand in recess until the hour of 2:15, when the first vote is to take place, and there would be no intervening business transacted.

Mr. ALLARD. Mr. President, just to clarify, I don’t have any objection to that unanimous consent request, but I
May 25, 1999

CONGRESSIONAL RECORD—SENATE 10715

want to make some general remarks in regard to the total bill. I just wanted to try—

Mr. WARNER. I am prepared to ac-

commodate the Senator. What about the hour of 4 today? You have 30 min-

utes.

Mr. ALLARD. That would be fine. I ap-

preciate that. I think if we set aside 20 minutes, that would be fine. I ap-

preciate that.

Mr. WARNER. We would be glad to do that and make it a part of the unan-
imous consent request which we are jointly propounding. Mr. Levin and myself. Is that agreeable?

Mr. LEVIN. I apologize.

Mr. WARNER. We just added, 4 to 4:20, this colleague may speak on the bill.

Mr. President, I am happy to restate it, but I think the Chair is—

The PRESIDING OFFICER. Is there objection?

Mr. LEVIN. I apologize.

The PRESIDING OFFICER. The Chair recognizes the Senator from Min-

nesota.

Mr. WELLSTONE. Mr. President,

this amendment speaks to the prior-

ities of the Senate or lack of priorities of the Senate.

We have here a bill that really talks about authorization, leading to appro-

priation of hundreds of billions of dol-

lars from the Pentagon. I will talk about the priorities of some low-income families in our coun-

try. Their priorities are how to keep a roof over their children's heads. Their priori-

ties are how to get food in their children's stomachs. Their priorities are how to earn a wage that pays their bills.

And their priorities are how to ob-

tain medical assistance when they are sick. What is their child care situa-

tion?

Mr. President, 2 years ago we passed a welfare bill, and as we start to see more and more families slide deeper and deeper into poverty, and as we see around the country some of these fami-

ties losing their benefits, I have not heard so much as a whisper of concern, let alone a shout of outrage, from the Senate.

So I rise to propose an amendment. It is an amendment that I hope will rec-

ieve the support of every Senator, Democrat and Republican alike. It is simple and it is straightforward.

Current law requires the Secretary of Health and Human Services to provide an annual report to Congress. My amendment requires the Secretary to include information about families who have moved off the welfare rolls. What kind of jobs do they have? What is their employment status? What kind of wages are they making? Is it a living wage? When their children are sick, can they afford care? How much is it costing their children? Have they been dropped from medical assistance? Do they have any health insurance cov-

erage at all?

Mr. President, like my colleagues, I had hoped that the welfare reform bill—what I voted against it because I had real reservations about how it would really take shape and form throughout the country—would work. But I have my doubts. On the basis of some of the evidence I present here today, I believe we need to find out with certainly happening to families, mainly women and children, when they no longer receive welfare assis-

tance in our country.

Since August of 1996, 1.3 million fami-

lies have left welfare. They are no longer receiving welfare assistance. That is 4.5 million recipients, and they are mainly women and children. The vast majority of these 4.5 million citi-

zens are children. On the basis of these numbers, too many people have deemed welfare reform a success. I am worried that they are trumpeting the ''victory'' of welfare re-

form without questioning whether or not the reformers' claim of success is pre-

mature?

What is going on here? What is hap-

pening to these women and children? Should we not know? The esteemed Gunnar Myrdal said, ''Ignorance is never random.'' Sometimes we don't know what we don't want to know.

This amendment says we ought to do an honest evaluation and have the Sec-

retary of Health and Human Services provide a report to us as to exactly what is happening with these women and children.

A story Friday from the New York Times suggests one explanation. One welfare recipient was told incorrectly that she could not get food stamps without welfare. Though she is scrapping by, raising a family of five children and sometimes goes hungry, she has never applied for food stamps. ''They re-

ferred me to the food pantry,'' she said. ''They don't tell you what you really need to know; they tell you what they want you to know.''

The truth of the matter is that there is an information vacuum at the na-

tional level with regard to welfare reform. What has happened to the moth-

ers and children who no longer receive any assistance? In a moment, I am going to talk about some findings from NETWORK, a national Catholic social justice organization—that should disturb each and every Senator. At the outset, let me read a brief ex-

cerpt from the report that outlines the problem:

Even though government officials are quick to point out that national welfare caseloads are at their lowest point in 30 years, they are unable to tell us for the most part what is happening to people after they leave the welfare rolls—and what is hap-

pening to people living in poverty who never received assistance in the first place.

I am especially concerned because the evidence we do have suggests that the goals of welfare reform are not being achieved. People are continuing to suffer and continuing to struggle to meet their basic needs, and I am talk-

ing primarily about women and chil-

dren. I challenge the Senate today with this amendment. At the very min-

imum I should come to the Secretary of Health and Human Services to give us a report on the status of those women and those children who no longer receive any welfare assistance.
Should we not at least know what is happening to these families? I have already mentioned the dramatic welfare caseloads. We must recognize that it is naive to assume that all of the 1.3 million of these families have found jobs and are moving toward a life of economic self-sufficiency. After all, the caseload decline has not been matched by a similar decline in poverty indicators. Moreover, since 1995, colleagues, what we have seen is an increase among the poorest and harshest poverty. This is when income is less than one-half of what the official definition of poverty is. We have found an increase of 400,000 children living among the ranks of the poorest of poor families in America. Could this have something to do with these families being cut off welfare assistance? We ought to at least know.

I have mentioned the NETWORK report. What this group did was collect data on people who visited Catholic social services facilities in 10 States with large numbers of people eligible for aid, and I will summarize these very dramatic findings. Nearly half of the respondents report that their health is only fair or poor; 43 percent eat fewer meals or less food per meal because of the cost; they can’t afford it. And 52 percent of soup kitchen patrons are unable to provide sufficient food for their children, and even the working poor are suffering as 41 percent of those with jobs experience hunger. The people who are working work almost 52 weeks a year, 40 hours a week, and they are still so poor that they can’t afford to buy the food for their children. I am presenting this evidence today because I want us to have the evidence.

In another study, seven local agencies and community welfare monitoring coalitions in six States compared people currently receiving welfare to those who stopped getting welfare in the last few months. The data show that people who stopped getting welfare were less likely to get food stamps, less likely to get Medicaid, more likely to go without food for a day or more, more likely to move because they couldn’t pay rent, more likely to have a child who lived away or was in foster care, more likely to have difficulty paying for and getting child care. And more likely to say “my life is worse” compared to 6 months ago.

Is that what we intended with this welfare reform bill? The National Conference of State Legislatures’ own assessment of 14 studies with good information about families leaving welfare. It found that:

Most of the jobs [that former recipients get] pay between $5.50 and $7 an hour, higher than minimum wage but not enough to raise a family out of poverty. So far, few families who leave welfare have been able to escape poverty.

This study was focused on the hardest hit. Let me just say that in some of the earlier State studies, what we are seeing is that as many as 50 percent of the families who lost welfare benefits do not have jobs. Can I repeat that? Close to 50 percent perhaps—that is what we want to study—of the families who have been cut off welfare assistance do not have jobs, much less the number of families where the parents—usually a woman—has a job, but it is $6 an hour and she can’t afford child care and her children don’t have the necessary child care. Now her medical assistance is gone and she is worse off and her children are worse off. They are plunged into deeper poverty than before we passed this bill.

Don’t we want to know what is happening in the country? How are these families surviving? I am deeply concerned and worried about them. They are no longer receiving assistance. And they don’t have jobs. They are literally falling between the cracks and they are disappearing. I want us to focus on the disappeared Americans.

What do we do about this? I want to have bipartisan support. I was a political science teacher before becoming a Senator. In public policy classes I used to talk about evaluation all the time. That is one of the key ingredients of good public policy. That is what I am saying today. We want to have some really good, thorough evaluation. We have some States that are doing some studies. But the problem is there are different methodologies and different studies that are not comprehensive.

Before we passed this bill, when we were giving States waivers—Minnesota was one example—43 of 50 States have been granted waivers. They were all required to hire an outside contractor to evaluate the impact of the program. After this legislation passed, we didn’t require this any longer of States. Now we are only getting very fragmentary evidence. As a result, we do not really know what is happening to these women. We don’t know what is happening to these children. The money that we have earmarked is Labor-HHS appropriations for Health and Human Services—$15 million to provide some money for some careful evaluation. That is what we need, policy evaluation. But the money has been rescinded.

Let me just say—I am skipping over some of the data—is at the very least, what we want to do is to make sure that we do some decent tracking and that we know in fact what is really going on here.

Let me just give you some examples that I think would be important just to consider as I go along. Let me read from some work that has been done by the Children’s Defense Fund.
Alaska: Applying for cash assistance has become difficult in many places. In one Alaska county, a professor worked to get public assistance applications to only 6 out of 27 undergraduate students who requested them despite State policy that says anyone who asks for an application should get one.

In other words, I know what was going on. This professor was saying to students, go out there as welfare mothers and apply and see what happens. They did. What they found out is that very few of them were even given applications.

Arizona: 60 percent of former recipients were taken off welfare because they did not appear for a welfare interview.

We are talking about sanctions. After holding families from 1990 to 1993, the number of meals distributed to Arizona statewide, Food Charity Networks, has since risen to 30 percent, and a 1997 study found that 41 percent of Networks' families had at least one person with a job.

Quite often what happens is the people who are off the rolls aren't off the rolls because they found a job, but because they have been sanctioned. The question is, Why have they been sanctioned? The question is, What happened to them? What has happened to their children?

California: Tens of thousands of welfare beneficiaries in California and Illinois are dropped each month as punishment. In total, half of those leaving welfare in these States are doing so because they did not follow the rules.

This was from an AP 50-State survey. It was also cited in the Salvation Army Fourth Interim Report. In an L.A. family shelter, 12 percent of homeless families said they had experienced benefit reductions or cuts that led directly to their homelessness.

One of the questions, colleagues, is this rise of homelessness and this rise of the use of food pantry shelves. Does it have something to do with the fact that many of these women have found jobs but they don't pay a living wage, or they haven't found work but the families have been cut off assistance?

Florida: More than 15,000 families left welfare during a typical month last year. About 3,600 reported finding work, but nearly 4,200 left because they were sanctioned. The State does not know what happened to almost 7,500 others.

Iowa: 47 percent of those who left welfare did so because they did not comply with requirements such as going to job interviews or providing paperwork.

Kentucky: 58 percent of the people who are sanctioned are removed for not following the rules.

Minnesota: In Minnesota, case managers found that penalized families were twice as likely to have serious mental health problems, three times as likely to have low intellectual ability, and five times more likely to have family violence problems compared with other recipients.

Mississippi Delta region: Workfare recipients gather at 4 a.m. to travel by bus for 2 hours to their assigned workplaces, work their full days, and then return to their homes each night. They are having trouble finding child care during these nontraditional hours and for such extended days.

I could give other reports of other States. Let me just say to every single Senator here, Democrat and Republican alike, you may have a different sense of what is going on with the welfare bill. That is fine. But what I am saying here is if you look at the NET- WORK study, if you look at the Conference of State Legislatures study, if you look at the Children's Defense Fund study, and if you just travel—I am likely to do quite a bit of travel in the country over the next couple of years to really take a look at what is happening—but if you just travel and talk to people, you have reason to be concerned. Right now we do not know and we cannot remain deliberately ignorant. We cannot do that.

Policy evaluation is important. So I challenge each and every Senator to please support this amendment which calls for nothing more than this, that every year when we get a report from the Secretary of Health and Human Services we get a report on what has happened to these women and children—that is the main population we are talking about—who no longer receive welfare assistance. Where are they? What kind of jobs do they have? Are they living-wage jobs? Is there decent child care? Do they have health care coverage? That is what we want to know.

I remember in the conference committee last year, and I will not use names because no one is here to debate me, I remember in a conference committee meeting last year we got into a debate. I wanted mothers to at least have 2 years of higher education and have that not counted against them. I was pushing that amendment. I remember, it was quite dramatic. In this committee, there were any number of different Representatives from the House, and some Senators, who said: You are trying to reopen the welfare reform debate and you are trying to change welfare policy. This has been hallmark legislation, the most important legislation we passed since Franklin Delano Roosevelt's legislation.

I said to them: Let me ask you a question. Shouldn't you give me any data from your States? I know the rolls have been cut substantially.

I hear my own President, President Clinton, talking about this. But, President Clinton, you have not provided one bit of evidence that reducing the welfare rolls has led to reduction of poverty. The real question is not whether or not people are off the rolls; the real question is, Are they better off? I thought the point of welfare reform was to move families, mainly women and children, from welfare to economic self-sufficiency, from welfare to a better life. I thought all Senators think it is important that people work, but if they work, they ought not to be poor in America.

We can no longer turn our gaze away from at least being willing to do an honest evaluation of what is happening. This amendment calls for that. I cannot see how any Senator will vote against this. I tried to bring this amendment to the juvenile justice bill. It would have been a good thing to do, because, frankly, there is a very strong correlation between poverty and kids getting into trouble and which kids get incarcerated. I think legislation is creating a whole new class of people—disappeared Americans. Many of them are children. That is my own view.

As that bill went along, I agreed I would not do it if I could introduce this amendment to the next piece of legislation, which is the DOD legislation right now. I hope there will be an up-or-down vote. I hope there will be strong support for it.

If colleagues want to vote against it—I do not know how you can. We ought to be willing to do an honest evaluation. I tell my colleagues, if you travel the country, you are going to see some pretty harsh circumstances. You are going to see some real harsh circumstances. I do not remember exactly, and I need to say it this way because if I am wrong I will have to correct the record, but I think in some States like Wisconsin, from welfare to self-sufficiency, from welfare to economic self-sufficiency, from welfare to economic self-sufficiency.

Do you all know that in every single State all across the country—and it depends upon which year, it is up to the State—there is a drop-dead date certain where families are going to be eliminated from all assistance? Shouldn't we know, before we do that, we shouldn't just say we are going over the cliff—shouldn't we know what is going on? Shouldn't we have some understanding of whether or not these mothers are able to find jobs? Shouldn't we know what is going on with their children? Shouldn't we know whether there are problems with substance abuse or violence in the homes? Shouldn't we make sure we do that before we eliminate all assistance and...
create a new class of the disappeared, of the poorest of the poor—of the poor who are mainly children? I have brought this amendment to the floor before, but this time around I do not want a voice vote. I want a recorded vote. If Senators are going to vote against this, I want that on the record. If they are going to vote for it, I will thank each and every one of them. Then, if there is an effort to drop this in conference committee because it is on the DOD bill, do you know what. Here is what I say: At least the Senate has gone on the record saying we are going to be intellectually honest and have an honest policy evaluation. That is all I want. That is all I want to see happen. If it gets dropped, I will be back with the amendment again, and again, and again and again—until I end this study. Until we are honest about being willing—I am sorry—until we are willing to be honest about what is now happening in the country and at least collect the data so we can then know.

I feel very strongly about this, colleagues, very strongly about this. I am going to speak on the floor of the Senate about this. I am going to do some traveling in the country. I am going to try to focus on what I consider to be really some very harsh conditions and some very harsh things that are happening to too many women and to too many children.

I also speak with some indignation. I can do this in a bipartisan way. I want us to have this evaluation. I say to the White House, to the administration—I ask unanimous consent I have 1 more minute. I actually started at 12:30, so I do not know how I could be out of time, I had a half hour.

The PRESIDING OFFICER. The official clock up here shows time expired, but without objection, 1 minute.

Mr. WELLSTONE, I thank the Chair. I don’t want to get into a big argument with the Chair. I can do it in 1 minute.

I think I have heard the administration, Democratic administration, I have heard the President and Vice President talk about how we have dramatically reduced the welfare rolls with huge success. Has the dramatic reduction in the welfare rolls led to a dramatic reduction in poverty? Are these women and children more economically self-sufficient? Are they better off or are they worse off? That is what I want to know. I say that to Democrats. I say that to Republicans. We ought to have the courage to call upon the Secretary of Health and Human Services to provide us with this data. As policymakers, we need this information.

Please, Senators, support this amendment. I yield the floor.

PRIVILEGE OF THE FLOOR

Mr. BURNS. Mr. President, I ask unanimous consent that Daniel J. Stewart, a fellow in my office, be granted the privilege of the floor during the debate on the defense authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until the hour of 2:15, at which time there will be three stacked votes.

Thereupon, at 1 p.m., the Senate recessed until 2:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. INHOFE).

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2000

AMENDMENT NO. 388

The PRESIDING OFFICER. Under the previous order, there are 2 minutes equally divided on the Roth amendment. Who yields time?

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. Mr. President, for 58 years, two distinguished commanders, Admiral Kimmel and General Short, have been unjustly scapegoated for the Japanese attack on Pearl Harbor. Numerous studies have made it unambiguously clear that Short and Kimmel were denied vital intelligence that was available in Washington. Investigations by military boards found Kimmel and Short had properly disposed their forces in light of the intelligence and resources they had available.

Investigations found the failure of their superiors to properly manage intelligence and to fulfill command responsibilities contributed significantly, if not predominantly, to the disaster. Yet, they alone remain singled out for responsibility. This amendment calls upon the President to correct this injustice by advancing them on the retired list, as was done for all their peers.

This initiative has received support from veterans, including Bob Dole, countless military leaders, including Admirals Moorer, Crowe, Halloway, Zumwalt, and Trost, as well as the VFW.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, on behalf of the managers of this bill, we vigorously oppose this amendment. Right here on this desk is perhaps the most dramatic reason not to grant the request. This represents a hearing held by a joint committee of the Senate and House of the Congress of the United States in 1946. They had before them live witnesses, all of the documents, and it is clear from this and their findings that these two officers were then and remain today accused of serious errors in judgment which contributed to perhaps the greatest disaster in this century against the people of the United States of America.

There are absolutely no new facts beyond those deduced in this record brought out by my distinguished good friend, the senior Senator from Delaware. For that reason, we oppose it.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to amendment No. 388. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Arizona (Mr. MCCAIN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 52, nays 47, as follows: [Rollcall Vote No. 142 Leg.]

NOT VOTING—1
McCain

The amendment (No. 388) was agreed to.

Mr. ROTH. Mr. President, I move to reconsider the vote.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 377

Mr. WARNER. Is the Senator from Virginia correct that the next vote will be on the amendment by the Senator from Kansas?
President has already written to us in obligations or commitments. The amendment. It says that the President will respond. Despite that technicality, it is a very important amendment, because the administration has already expressed a view that it has not gone beyond the Concept that it does not go beyond the foundations and objectives sought in the 1949 Washington Treaty, those in attendance, the 19 nations, the heads of state and government, adopted a new Strategic Concept.

The purpose of this amendment is to ensure that that Concept does not go beyond the confines of the 1949 Washington Treaty and such actions that took place in 1991 when a new Strategic Concept was drawn. A number of us are concerned, if we read the technical language, that it opens up new vistas for NATO. That is the case, then the Senate should have that treaty before it for consideration. This is a sense of the Senate, but despite that technicality, it is a very important amendment; it is one to which the President will respond.

I understand from my distinguished colleague and ranking member, in all probability, we will receive the assurance from the President that it does not go beyond the foundations and objectives sought in the 1949 Washington Treaty.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I support this amendment. It says that the President should say to us whether or not the new Strategic Concept imposes new commitments or obligations upon us. It does not that there are such new obligations or commitments. The President has already written to us in a letter to Senator WARNER that the Strategic Concept will not contain new commitments or obligations.

In 1991, the new Strategic Concept, which came with much new language and many new missions, was not submitted to the Senate. Indeed, much of the language is very similar in 1991 as in 1999. In my judgment, there are no new commitments or obligations imposed by the 1999 Strategic Concept. The President could very readily certify what is required that he certify by this amendment, and I support it.

Mr. WARNER. Mr. President, I ask unanimous consent that this vote be limited to 10 minutes and the next vote following it to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

All time has expired.

Mr. KYL. Mr. President, I believe that under the order 1 minute was reserved for anybody in opposition, is that correct?

Mr. KYL. I don’t think the Senator from Michigan spoke in opposition to the amendment, as I understand it. Therefore, would it not be in order for someone in opposition to take a minute?

The PRESIDING OFFICER. Yes. The Senator from Arizona is recognized for 1 minute.

Mr. KYL. Might I inquire of the Senator from Delaware—I am prepared to speak for 30 seconds or a minute.

Mr. KYL. If he can reserve 20 seconds for me, I would appreciate it.

Mr. KYL. I will take 30 seconds.

Mr. WARNER. Mr. President, I ask unanimous consent that both Senators be given 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KYL. Mr. President, I say to my colleagues that, as Senator LEVIN just pointed out, this is a totally unnecessary amendment, because the administration has already expressed a view that it has not gone beyond the Concepts this Senate voted for 90 to 9 when the new states were added to NATO. Those are the Strategic Concepts.

One might argue whether or not they are being applied correctly in the case of the war in Kosovo. That is another debate. But in terms of the Strategic Concepts themselves, this body voted on them, and I would hate for this body now to suggest to the other 18 countries in NATO that perhaps they should resubmit the Strategic Concepts to their legislative bodies as in the nature of a treaty so that the entire NATO agreement on Strategic Concepts would be subject to 19 separate votes of our parliamentary bodies. I don’t think that would be a good idea given the fact that, as Senator LEVIN already noted, the President has already said the Strategic Concepts do not go beyond what the Senate voted for 90 to 9. This amendment, I suggest my colleagues vote no.

Mr. KYL. Mr. President, the Strategic Concept does not rise to the level of a treaty amendment, and the Senator from Michigan has pointed that out. Therefore, it is a benign amendment, we are told, and in all probability it is. But it is unnecessary. It does mischief. It sends the wrong message. It is a bad idea, notwithstanding the fact that it has been cleaned up to the point that it is clear it does not rise to the level of a treaty requiring a treaty vote on the Strategic Concept.

But I agree with the Senator from Arizona. He painstakingly on this floor laid out in the Kyl amendment during the expansion of NATO debate exactly what we asked the President to consider in the Strategic Concept that was being negotiated with our allies. They did that. We voted 90 to 9.

This is a bad idea.

The PRESIDING OFFICER. The President requested a vote on the amendment. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NICKLES, I announce that the Senator from Arizona (Mr. MCCAIN) is necessarily absent.

The PRESIDING OFFICER (Mr. CRAPO). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 87, nays 12, as follows:

NOT VOTING—1

McCaIN

The amendment (No. 377), as modified, was agreed to.

The PRESIDING OFFICER. The Senator from Virginia.

AMENDMENT NO. 382

Mr. WARNER. Mr. President, the next amendment is in the jurisdiction of the Finance Committee. Therefore, I have consulted with Chairman ROTH.

Does Senator ROTH have any comments on this?

Mr. ROTH. No comments.

Mr. WARNER. We yield back such time as we may have.

The PRESIDING OFFICER. There are 2 minutes equally divided on the amendment.

The Senator from Minnesota is recognized.

Mr. WELLSTONE. I thank the Chair.

I have been trying to get this amendment on the floor. This is simple and straightforward. This requires the Department of Health and Human Services to provide us with a report on the status of women and children who are...
no longer on welfare. There are 4.5 million fewer recipients. We want to know what kinds of jobs, at what wages, do people have health care coverage. This is based on disturbing reports by Family U.S.A., Catholic Organization Network, Children’s Defense Fund, Conference of Mayors and, in addition, National Conference of State Legislatures.

Good public policy is good evaluation, and we ought to know what is going on in the country right now on this terribly important question that dramatically affects the lives of women and children, albeit low-income women and children. I hope to get a strong bipartisan vote. It will be a good message.

Mr. KENNEDY. Mr. President, I strongly support Senator WELLSTONE’s amendment, the Department of Health arrangements of former welfare recipients.

This information is essential. The most important indicator of welfare reform’s success is not just declining welfare caseloads. It is the well-being of these low-income parents and their children after they leave the welfare system. We do not know enough about how they have fared, and states should be required to collect this information. Millions of families have left the welfare rolls, and we need to know how they are doing now. We need information on their earnings, their health care, and other vital data. The obvious question is whether former welfare recipients are doing well, or barely surviving, worse off than before.

The data we do have about former welfare recipients is not encouraging. According to the Children’s Defense Fund and the National Coalition on the Homeless, most former welfare recipients earn below poverty wages after leaving the welfare system. Their financial hardship is compounded by the fact that many former welfare recipients do not receive the essential services that would enable them to hold jobs and care for their children. The cost of child care can be a crushing expense to low-income families, consuming over one-quarter of their income. Yet, the Department of Health and Human Services estimates that only one in ten eligible low-income families gets the child care assistance they need.

Health insurance trends are also troubling. As of 1997, 675,000 low-income people had lost Medicaid coverage due to welfare reform. Children comprise 62 percent of this figure, and many of them were still eligible for Medicaid. We need to improve outreach to get these children enrolled in Medicaid. We also need to increase enrollment in the State Children’s Health Insurance Program, which offers states incentives to expand health coverage for children with family income up to 200 percent of poverty. It is estimated that 4 million uninsured children are eligible for this assistance.

In addition to problems related to child care and health care, many low-income families are not receiving Food Stamp assistance. Over the last 4 years, participation in the Food Stamp Program has dropped by one-third, from serving nearly 28 million participants to serving fewer than 19 million. But this does not mean children and families are no longer hungry. Hunger and undernutrition continue to be urgent problems. According to a Department of Agriculture study, 1 in 8 Americans—or more than 34 million people—are at risk of hunger.

The need for food assistance is underscored by the phenomenon of increasing reliance on food banks and emergency food services. Many food banks are now overwhelmed by the growing number of requests they receive for assistance. The Western Massachusetts Food Bank reports a dramatic increase in demand for emergency food assistance. In 1997, it assisted 75,000 people. In 1998, the number they served rose to 85,000. Massachusetts is not alone. According to a recent U.S. Conference of Mayors report, 78 percent of the 30 cities surveyed reported an increase in requests for emergency food in 1998. Sixty-one percent of the people seeking this assistance were children or their parents; 31 percent were employed.

These statistics clearly demonstrate that hunger is a major problem. Yet fewer families are now receiving Food Stamps. One of the unintended consequences of welfare reform is that low-income, working families are dropping off the Food Stamps rolls. Often, these families are going hungry or turning to food banks because they don’t have adequate information about Food Stamp eligibility.

A Massachusetts study found that most people leaving welfare are not getting Food Stamp benefits, even though many are still eligible. Three months after leaving welfare, only 18 percent were receiving Food Stamps. After one year, the percentage drops to 6.5 percent. It is clear that too many eligible families are not getting the assistance they need and are entitled to.

Every state should be required to collect this kind of data. We need better information about how low-income families are faring after they leave welfare. Adequate data will enable the states to build on their successes and address their weaknesses. Ultimately, the long-term success of welfare reform will be measured state by state, person by person with this data.

I urge my colleagues to support this amendment. Ignorance is not bliss. We can’t afford to ignore the need that may exist.

The PRESIDENT OFFICIAL. The Senator’s time has expired.

Is there any Senator who wishes to speak in opposition? Mr. WARNER, Mr. President, we yield back our time.

Mr. NICKLES. I announce that the Senator from Arizona (Mr. MCCAIN) is necessarily absent.

The PRESIDENT OFFICIAL. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 49, nays 50, as follows:

The amendment (No. 382) was rejected.

Mr. WARNER. I move to reconsider the vote.

Mr. GRAMM. I move to lay that motion on the table.

The motion to table was agreed to.

Several Senators addressed the Chair.

The PRESIDENT OFFICIAL. The Senator from Minnesota. Mr. WELLSTONE. Thank you, Mr. President.

I have a colleague who is ready to go, Senator SPECTER, so I will not take much time. But I just want to make it clear to colleagues that on this vote I agreed to a time limit. I brought this amendment out to the floor. There could have been debate on the other side. Somebody could have come out here and debated me openly in public about this amendment.

I am talking about exactly what is happening with this welfare bill. I am
talking about good public policy evaluation. Shouldn't we at least have the information on whom and where these women are? Where these children are? What kind of jobs? What kind of wages? Are there adequate child care arrangements?

The Swedish sociologist Gunnar Myrdal once said, "Ignorance is never random." Sometimes we don't know what we don't want to know.

I say to colleagues, given this vote, I am going to bring this amendment out on the next bill I get a chance to bring it out on. I am not going to agree to a time limit. I am going to force people to come out here on the majority side and debate me on this question, and we will have a full-fledged, substantive debate. We are talking about the lives of women and children, albeit they are poor, albeit they don't have the lobbyists, albeit they are not well connected. I am telling you, I am outraged that there wasn't the willingness and the courage to debate me on this amendment. We will have the debate with no time limits next bill that comes out here.

I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I tried to accommodate the Senator early on on this matter. To be perfectly candid, it was a jurisdictional issue with this committee. I was not at the table with which this Senator had a great deal of familiarity. I did what I could to keep our bill moving and at the same time to accommodate my colleague. The various persons who have jurisdiction over it were notified, and that is as much I can say.

Now, Mr. President, I ask unanimous consent that there be 90 minutes equally divided in the usual form prior to a motion to table with respect to amendment 383 and no amendments be in order prior to that vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I further ask that following that vote, provided it is tabled, that Senator Gramm is notified, and that Senator Dole be advised, so that there is an option as to whether there is a motion to table or a vote on the amendment itself.

Mr. WARNER. Mr. President, we find no objection to that. I so amend the request.

The PRESIDING OFFICER. Is there objection to the request as amended? Without objection, it is so ordered.

Mr. WARNER. Mr. President, I see the Senator from Pennsylvania, and I yield the floor.

AMENDMENT NO. 383

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, this amendment provides that:

None of the funds authorized or otherwise available to the Department of Defense may be obligated or expended for the deployment of ground troops from the United States Armed Forces in Kosovo except peacekeeping personnel, unless authorized by declaration of war or a joint resolution authorizing the use of military force.

The purpose of this amendment, obvious on its face, is to avoid having the United States drawn into a full-fledged war without authorization of the Congress. This authorization is required by the constitutional provision which states that only the Congress of the United States has the authority to declare war and, the implicit consequence from that constitutional provision that only the Congress of the United States has the authority to involve the United States in a war. The Founding Fathers entrusted that grave responsibility to the Congress because of the obvious factor that a war could not be successfully prosecuted unless it was backed by the American people.

The first line of determination in a representative democracy, in a republic, is to have that determination made by the Congress of the United States.

We have seen the bitter lesson of Vietnam where a war could not be successfully prosecuted by the United States, where the public was not behind the war.

This amendment is being pressed today because there has been such a consistent erosion of the congressional authority to declare war. Korea was a war without congressional declaration. Vietnam was a war without a congressional declaration. There was the Gulf of Tonkin Resolution, which some said justified the involvement of the United States in Vietnam—military involvement, the waging of a war. But on its face, the Gulf of Tonkin Resolution was not really sufficient.

The Gulf War, authorized by a resolution of both Houses of Congress, broke that chain of the erosion of congressional authority to declare war. Korea was a war without congressional declaration. Vietnam was a war without a congressional declaration. There was the Gulf of Tonkin Resolution, which some said justified the involvement of the United States in Vietnam—military involvement, the waging of a war. But on its face, the Gulf of Tonkin Resolution was not really sufficient.

The Gulf War, authorized by a resolution of both Houses of Congress, broke that chain of the erosion of congressional authority to declare war. Korea was a war without congressional declaration. Vietnam was a war without a congressional declaration. There was the Gulf of Tonkin Resolution, which some said justified the involvement of the United States in Vietnam—military involvement, the waging of a war. But on its face, the Gulf of Tonkin Resolution was not really sufficient.

The Gulf War, authorized by a resolution of both Houses of Congress, broke that chain of the erosion of congressional authority to declare war. Korea was a war without congressional declaration. Vietnam was a war without a congressional declaration. There was the Gulf of Tonkin Resolution, which some said justified the involvement of the United States in Vietnam—military involvement, the waging of a war. But on its face, the Gulf of Tonkin Resolution was not really sufficient.

The Gulf War, authorized by a resolution of both Houses of Congress, broke that chain of the erosion of congressional authority to declare war. Korea was a war without congressional declaration. Vietnam was a war without a congressional declaration. There was the Gulf of Tonkin Resolution, which some said justified the involvement of the United States in Vietnam—military involvement, the waging of a war. But on its face, the Gulf of Tonkin Resolution was not really sufficient.

So on this state of the record, with the vote by the Senate and with the tie vote by the House, I find no reason to disagree with the Senate's decision to authorize forces to act in Iraq. I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. RICHARDSON. Mr. President, I rise to speak to this amendment. As we have seen with the events in Kosovo, the President of the United States made it plain in mid-March, at a news conference which he held on March 19, and at a meeting earlier that day with Members of Congress, that he intended to proceed with airstrikes. At a meeting with Members of Congress on March 23, the President was asked by a number of Members to come to Congress, and he did. The President sent a letter to Senator Daschle asking for authorization by the Senate. In a context where it was apparent that the airstrikes were going to be pursued with or without congressional authorization, and with the prestige of the United States on the line and with the prestige of the United States on the line, the Senate did authorize airstrikes, specifically excluding any use of ground troops. That authorization was by a vote of 58 to 41.

The House of Representatives had, on a prior vote, authorized U.S. forces as peacekeepers, but that was not really relevant to the issue of the airstrikes. Subsequently, the House of Representatives took up the issue of airstrikes, and by a tie vote of 213-213, the House of Representatives declined to authorize the airstrikes. That was at a time when the airstrikes were already underway.

I supported the Senate vote for the authorization of airstrikes. I talked to General Wesley Clark, the Supreme NATO Commander. One of the points which he made, which was telling on him, was there was no commitment by NATO forces to and with the prestige of NATO forces to the troops. The airstrikes were an ineptibility, as the President had determined, and it seemed to me that in that context we ought to give the authorization, again, as I say, expressly authorizing the issue not to have ground forces used.

So on this state of the record, with the vote by the Senate and with the tie vote by the House, I find no reason to disagree with the Senate's decision to authorize forces to act in Iraq. I yield the floor.
vote by the House of Representatives, you have airstrikes which may well, under international law, be concluded to be acts of war. The Constitution of the United States, to put it politely and not to articulate any doctrine of illegality, at a time when my country is involved in those airstrikes. But when we come to the issue of ground troops, which would be a major expansion and would constitute, beyond any question, the involvement of the United States in a war—although my own view is that the United States is conducting acts of war at the present time—the President ought to come to the Congress.

When the President met with a large group of Members on Wednesday, April 28, the issue of ground forces came up and the President made a commitment to the Senate in principle—although he was present—that he would not order ground troops into Kosovo without prior congressional authorization. He said he would honor that congressional authorization, reserving his prerogative to the President to say that he didn't feel it indispensable constitutionally that he do so. However, he said that he would make that commitment, and he did make that commitment to a large number of Members of the House and Senate on April 28 of this year. He said, as a matter of good faith, that he would come to the Congress before authorizing the use of ground troops.

So, in a sense, it could be said that this amendment is duplicative. But I do believe, as a matter of adherence to the rule of law, that the commitment the President made ought to be memorialized in this defense authorization bill. I have, therefore, offered this amendment.

It is a complicated question as to the use of ground forces, whether they will ever be requested, because unanimity has to be obtained under the rules that govern NATO. Germany has already said they are opposed to the use of ground forces. But this is a matter that really ought to come back to the Congress. I am prepared—speaking for myself—to consider a Presidential request for authorization for the use of ground forces. However, before I would vote on the matter, or give my consent or vote in the affirmative, I would be careful in the redrafting and would constitute, beyond any question, the involvement of the United States in a war—although my own view is that the United States is conducting acts of war at the present time—the President ought to come to the Congress.

Mr. SPECTER. Yes.

Mr. DURBIN. I thank the Senator. He and I are of the same mind in terms of the authority and responsibility of Congress when it comes to a declaration of war. It is interesting to note that last year when a similar amendment was called on the defense appropriation bill, offered by a gentleman in the House, David Skaggs, only 15 Members of the Senate voted in favor of it, including the Senator from Pennsylvania, the Senator from Delaware, myself, and a handful of others. It will be interesting to see this debate now in the context of a real ground force.

I have seen a copy of this amendment, and I want to understand the full clarity and intention of the Senator. As I understand it, there are two paragraphs in this amendment. They use different language in each paragraph. I wish the Senator would clarify.

Mr. SPECTER. If I may respond to the Senator, I would be glad to respond to the questions. I thank him for his leadership in offering a similar amendment in the past. When I undertook to send this amendment to the desk, I had called the Senator from Illinois and talked to him this morning and will consider this a joint venture if he is prepared to accept that characterization.

Mr. DURBIN. Depending on the response, I may very well be prepared to do so.

Would the Senator be kind enough to enlighten me? The first paragraph refers to the introduction of ground forces. The second paragraph refers to the deployment of ground troops. Could the Senator tell me, is there a difference in how the use of those two different terms?

Mr. SPECTER. Responding directly to the question, I think there would be no difference. But I am not sure the Senator from Illinois has the precise amendment I have introduced, which I lay out in one paragraph. I can read it quickly:

"None of the funds authorized or otherwise available to the Department of Defense may be obligated or expended for deployment of ground troops from the United States Armed Forces in Kosovo, except for peacekeeping personnel, unless authorized by a declaration of war or a joint resolution authorizing the use of military force."

Mr. DURBIN. The version I have—Mr. WARNER. If the Senator will yield, I am holding this draft amendment. You are referring to two paragraphs, and it appears to me that the first paragraph is the title; am I correct? I find that inconsistent with what I believe was paragraph 2. The first paragraph is the title, and there is really only one paragraph in the body of the amendment.

Mr. DURBIN. I thank the Senator from Virginia. If the Senator from Pennsylvania will yield, I will confine myself to the nature of the amendment. Could the Senator tell me why reference is only made to the deployment of ground forces from U.S. Armed Forces in Kosovo and not in Yugoslavia?

Mr. SPECTER. The amendment was drafted in its narrowest form. Perhaps it would be appropriate to modify the amendment.

Mr. DURBIN. I think it might be. I ask the Senator a second question. Would he not want to make an exception, as well, for the rescue of the NATO forces in Yugoslavia if we would perhaps have a downed flier and ground troops could be sent in for rescue, and that would not require congressional authorization. I think that would be consistent with the Senator's earlier statements about the emergency authority of the President as Commander in Chief.

Mr. SPECTER. I would be prepared to accept that exception.

Mr. DURBIN. The final question is procedural. The Senator from Pennsylvania has been here.

Mr. WARNER. If the Senator will yield, to amend it for a downed flier—we just witnessed ground troops being caught, and they have now been released. I would be careful in the redrafting and not just to stick to a downed flier. That is just helpful advice.

Mr. SPECTER. I thank the Senator.

Mr. DURBIN. A rescue of NATO forces in Yugoslavia was the question.

Mr. WARNER. The Senator from Pennsylvania has been here.
hands when it comes to committing ground troops, should we ever reach the point where that is necessary?

Mr. SPECTER. I respond to my colleague from Illinois by saying that with a declaration of war where the Senate has to join under the Constitution and there could be a filibuster requiring 60 votes, the same rule applies. To get the use of force, we have to comply with the rules to get an affirmative vote out of the Senate. Under those rules, if somebody filibusters, it requires 60 votes. So be it. That is the rule of the Senate and that is the way you have to proceed to get the authorization from the Senate.

Mr. DURBIN. I know I am speaking on the Senator's time. I thank him for responding to the question. I have reservations, as he does, about committing ground troops. I certainly believe, as he does, that the Congress should make that decision and not the President unilaterally. He has promised to come to us for that decision to be made. I hope Mr. Milosevic and those who follow this debate don't take any comfort in this. We are speaking only to the question of the authority of Congress, not to any actual decision of whether we will ever commit to ground troops. I think that is the sense of the Senator from Pennsylvania. I thank him for offering the amendment, and I support this important amendment.

Mr. WARNER. Mr. President, I will speak in opposition to the amendment. But I don't wish to interfere with the presentation of the Senator. At such time, perhaps, when I could start by propounding a few questions to my colleague and friend, would he indicate when he feels he has finished his presentation?

Mr. SPECTER. It would suit me to have the questions right now.

Mr. WARNER. I remind the Senator of the parliamentary situation. While I have given him some suggestions, if he is going to amend it, it would take unanimous consent to amend the amendment.

Mr. SPECTER. To modify the amendment?

Mr. WARNER. That is correct.

Mr. SPECTER. The yeas and nays have not been ordered.

Mr. WARNER. The time agreement has been presented under the rules. I will address the question to the Chair. I think that would be best.

The PRESIDING OFFICER. It would take unanimous consent to modify the amendment.

Mr. WARNER. Just as a friendly gesture, I advise my colleague of that.

Mr. SPECTER. Mr. President, I thank the Senator from Virginia for his friendly gesture.

Mr. WARNER. As the Senator reads the title and then the text, I have trouble following the continuity of the two.

For example, first it is directing the President of the United States pursuant to the Constitution and the War Powers Resolution, I have been here 21 years. I think the Senator from Pennsylvania is just a year or two shy of that. This War Powers Resolution has never been accepted by any President, Republican or otherwise. Am I not correct in that respect?

Mr. SPECTER. The Senator is correct.

Mr. WARNER. Therefore, we would not be precipitating in another one of those endless debates which would consume hours and hours of the time of this body if we are acting on the predicate that this President is now going to acknowledge that he, as President of the United States, is bound by what is in the law? But we have witnessed, over these 20-plus years that I have been here and over the years the Senator from Pennsylvania has been here, that no President will acknowledge that he is subservient to this body in acknowledging he feels that it is unconstitutional; that the Constitution has said he is Commander in Chief and he has the right to make decisions with respect to the Armed Forces of the United States on a minute's notice. Really, this is what concerns me about this amendment, among other things.

Mr. SPECTER. If the Senator will yield so I can respond to the question. Mr. WARNER. All right.

Mr. SPECTER. If it took hours and hours, I think those hours and hours would be well spent, at least by comparison to what the Senate does on so many matters. And we might convene a little earlier. We might adjourn a little later. We might work on Mondays and Fridays and maybe even on Saturdays. I would not be concerned about the hours which we would spend.

I think that, after the 18 years and 5 months that I have been here, has given proper attention to the constitutional authority of the Congress to declare and/or involve the United States in war, or to the War Powers Act. This is a matter which first came to my attention in 1983 on the Lebanon matter when Senator Percy was chairman of the Foreign Relations Committee and I had a debate, a colloquy, about whether Korea was a war, and Senator Percy said it was. Vietnam was a war.

At that time, I undertook to draft a complex complaint trying to get the acquiescence of the President—President Reagan—House at that time—which Senator Baker undertook to see if we could have a judicial determination as to the constitutionality of the War Powers Act.

It is true, as the Senator from Virginia says, that Presidents have always denied it. They have denied it in complying with it. They send over the notice called for under the act, and then they put in a disclaimer.

But I think the War Powers Act has had a profoundly beneficial effect, because Presidents have complied with it even while defying it.

But I think it is high time that Congress stood up on its hind legs and said we are not going to be involved in wars unless Congress authorizes them.

Mr. WARNER. Mr. President, perhaps when I said hours and hours, it could be days and days. But we would come out with the same result. Presidents haven't complying with the act. They have “complied with the spirit of the act.” I believe that is how they have acknowledged it in the correspondence with the Congress.

Mr. SPECTER. If I may respond, I think “complied with the act”—the act requires certain notification, certain statements of the President. They don't use the Queensberry rules.

Mr. WARNER. Mr. President, let me ask another question of my colleague. We are soon to be receiving a briefing from the Secretaries of State, Defense and the National Security Adviser and the Chairman of the Joint Chiefs. I will absent myself during that period, and the Senator from Pennsylvania will have the opportunity to control the floor. I hope there would be no unanimous consent requests in my absence. I hope that would be agreeable with my good friend, because I have asked for this meeting.

Mr. SPECTER. The Senator may be assured there will be no unanimous consent requests for any effort to do anything but to play by the Marquis of Queensberry rules.

Mr. WARNER. That is fine. I asked for this meeting and have arranged it for the Senate. So I have to go upstairs. But I point out: Suppose we were to adopt this, and supposing that during the month of August when the Senate would be in recess the President had to make a decision with regard to ground troops. Then he would have to, practically speaking, bring the Congress back to town. Would that not be correct?

Mr. SPECTER. That would be correct. That is exactly what he ought to do, the statute says: If they are to introduce ground troops, the Congress of the United States could interrupt the recess and come back and decide this important issue.

Mr. WARNER. But the reason for introducing ground troops, whatever it may be, might require a decision of less than an hour to make on behalf of the Chief Executive, the Commander in Chief, and he would be then shackled with the necessary time of, say, maybe 48 hours in which to bring the Members of Congress back from various places throughout the United States and throughout the world. To me, that imposes on the President something that was never envisioned by the Founding
Fathers. And that is why he is given the power of Commander in Chief. Our power as the power of the purse, to which I again direct the Senator’s attention in the text of the amendment. But it seems to me I find the title in conflict with the text of the amendment.

Mr. SPECTER. As I said during the course of my presentation, Mr. President, I think the Commander in Chief does have authority to act in an emergency. I made a clear-cut delineation as I presented the argument that when there is time for deliberation, as, for example, on the missile strikes in Iraq, or as, for example, on the gulf war resolution, it ought to be considered, debated and decided by the Congress.

Mr. WARNER. How do we define “emergency”? Where the President can act without approval by the Congress, and in other situations where he must get the approval, who makes that decision?

Mr. SPECTER. I think that our English language is capable of structuring a definition of what constitutes an emergency.

Mr. WARNER. Where is it found in this amendment?

Mr. SPECTER. I think the President has the authority to act as Commander in Chief without that kind of specification, and it is not now on the face of this amendment. However, it may be advisable to take the extra precaution, with modification offered and agreed to by unanimous consent in the presence of the Senator from Virginia, to spell that out as well, although I think unnecessarily so.

Mr. WARNER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.

Mr. WARNER. Mr. SPECTER. Mr. President, I must depart and go upstairs to this meeting. But I will return as quickly as I can. I thank the Senator for his courtesy of protecting the floor in the interests of the manager of the bill.

Mr. SPECTER. I thank the Senator from Virginia.
in school for 2 years before they actually go on active duty.

Many Senators have expressed their concerns about the operational tempo of the military. That is why this bill attempts to address this problem by requiring the services to closely manage the Personnel and Deployment Tempo of military personnel. We would require a general or flag officer to approve deployments over 180 days in a year; a four-star general or admiral to approve deployments over 200 days and would authorize a $100 per diem pay for each day a service member is deployed over 220 days. The briefings and hearings in the personnel subcommittee have found that the single most cited reason for separation is time away from home and families. At the same time, the services have not been effective in convincing the Personnel and Deployment Tempo for their personnel. I am confident that the provision will focus the necessary attention on the management of this problem.

Another important provision is the expansion of ROTC or JROTC programs. A number of members and the service Chiefs and personnel Chiefs told me that they believed Junior ROTC is an important program and that an expansion was not only warranted but needed. Thus we have added $39 million to expand the JROTC programs. These funds will permit the Army to add 114 new schools; the Navy to add 63 new schools; the Air Force to add 63 new schools; and the Marine Corps to exhaust their waiting list to 32 schools. This is a total of 272 new JROTC programs in our school districts across the country. I am proud to be able to support these important programs that teach responsibility, leadership, ethics, and assist in military recruitment.

In military compensation, our major recommendations are extracted from S. 4, the Soldiers', Sailors', Airmen's and Marines' Bill of Rights Act of 1999. First, this bill authorizes a 4.8-percent pay raise effective January 1, 2000 and a restructuring of the pay tables effective July 1, 2000. Another provision includes a Thrift Savings Plan for active forces and the ready reserves and a plan to offer service members who entered the service on or after August 1, 1986, the option to receive a $30,000 bonus and remain under the "Redux" retirement or to change to the "High-three" retirement system. In order to assist the active and reserve military forces in recruiting, there are a series of bonuses and new authorities to support the ability of our recruiters to attract qualified young men and women to serve in the armed forces. There are also several new bonuses and special pays to incentivize aviators, surface warfare officers, special warfare officers, air crewmen among others to remain on active duty. Two additional provisions from S. 4 are in this bill. A special retention initiative would permit a service member the right to decline the thrift savings contribution of service members in critical specialties in return for an extended service commitment. Also, thanks to the hard work of Senator McCain and Senator Roberts, another provision authorizes a special subsistence allowance for junior enlisted personnel who qualify for food stamps.

In health care, there are several key recommendations. There is a provision that would require the Secretary of Defense to implement a number of initiatives to improve delivery of health care under TriCare. Another provision would require each Lead Agent to establish a patient advocate to assist beneficiaries in resolving problems they may encounter with TriCare. Finally, there are a number of general provisions including one to enforce the reductions in management headquarters personnel Congress directed several years ago and several to assist the Departmental Dependents School System to provide quality education for the children of military personnel overseas.

Before I close, as a first-time Senator, I express my appreciation to Senator Cleland for his leadership and assistance throughout this year as we worked in a bipartisan manner to develop programs which enhance personal readiness and quality of life programs. I also thank the members of the subcommittee, Senator Thurmond, Senator McCain, Senator Snowe, Senator Kennedy, and Senator Reed, and their staffs. Their hard work made our job better and helped me focus on those issues which have the greatest impact on soldiers, sailors, airmen and marines.

Mr. President, I finish by thanking Chairman Warner for the opportunity to point out some of the highlights in the bill which the Personnel Subcommittee has worked and to congratulate him and Senator Levin on the bipartisan way this bill was accomplished and ask that all Senators strongly support S. 1059.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. ALLARD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The time is under control. If neither side yields time, time will simply run equally.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. Thank the Chair. The Senator from Delaware is here and I will be happy to yield—how much time do the opponents have?

The PRESIDING OFFICER. The opponents of the amendment have 36 minutes and 40 seconds.

Mr. LEVIN. Is that divided in some way or under the control of Senator Warner and myself? How is that?

The PRESIDENT PRO Tempore. The manager of the bill is designated to be in charge of the opposition.

Mr. LEVIN. I am happy to yield 5 minutes to the Senator from Delaware.

The PRESIDING OFFICER. The Senator from Delaware is recognized for 5 minutes.

Mr. BIDEN. Mr. President, I will be necessarily brief. It is not often I disagree with my friend from Pennsylvania, Senator Specter. I think he is right in the fundamental sense that if the President is going to send American ground forces into a war, it needs congressional authority.

Very honestly, this amendment is, in my view, flawed. First of all, it is clear that the President has to come to Congress to use ground forces and that the president has already stated—I will ask unanimous consent to print in the Record a copy of his letter dated April 28, 1999, to the Speaker of the House in which he says in part:

Indeed, without regard to our differing constitutional views on the use of force, I would ask for Congressional support before introducing U.S. ground forces into Kosovo into a non-permissive environment.

I ask unanimous consent that the President's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. J. DENNIS HASTERT, Speaker of the House of Representatives, Washington, DC.

DEAR MR. SPEAKER: I appreciate the opportunity to continue to consult closely with the Congress regarding events in Kosovo.

The unprecedented unity of the NATO Members is reflected in our agreement at the recent summit to continue and intensify the air campaign. Milosevic can have no doubt about the resolve of the NATO alliance to prevail. I am confident we will do so through use of air power.

However, were I to change my policy with regard to the introduction of ground forces, I can assure you that I would fully consult with the Congress. Indeed, without regard to our differing constitutional views on the use of force, I would ask for Congressional support before introducing U.S. ground forces into Kosovo into a non-permissive environment. Milosevic can have no doubt about the resolve of the United States to address the security threat to the Balkans and the humanitarian crisis in Kosovo. The refugees must be allowed to go home to a safe and secure environment.

Sincerely,

BILLY CLINTON.
The Senate resolution we adopted only authorizes the use of airpower. If Congress adopts this amendment, it seems to me we will imply the President has carte blanche to take offensive action, and anywhere else unless Congress makes a specific statement to the contrary in advance. In short, I think it will tender an invitation to Presidents in the future to use force whenever they want unless Congress provides a specific ban in advance.

Putting that aside, however, the amendment is flawed because its exceptions are much too narrowly drawn. The amendment purports to bar the use of Armed Forces in response to an attack against Armed Forces.

For example, we have thousands of soldiers now in Albania and Macedonia. Let’s suppose that ground forces in the face of an attack against the U.S. forces in Albania or in Macedonia. This amendment would bar the use of ground forces to respond by going into Kosovo.

The power to respond against such an attack is clearly within the power of the Commander in Chief. So, too, does the President have the power to launch a preemptive strike against an imminent attack. The U.S. forces do not have to wait until they take the first punch.

The second point I will make in this brief amount of time I am taking is that the amendment does not appear to permit the use of U.S. forces in the evacuation of Americans. Most constitutional scholars concede the President has the power to use force in emergency circumstances to protect American citizens facing an imminent and direct threat to their lives.

In sum, notwithstanding the fact that the amendment does not appear to permit the use of U.S. forces in the evacuation of Americans, the power to use force in circumstances such as this, is going to amend his own amendment, it does not, in my view, appear to be necessary and it unconstitutionally restricts recognized powers of the President.

This comes from a guy—namely me—who has spent the bulk of the last 25 years arguing that the President has to have congressional authority to use force in circumstances such as this, and he does. But to bar funds in advance, before a President even attempts to use ground forces in the face of an attack against him saying he will not use them and in the face of a letter in which he says he will not send them without seeking Congress’ authority, seems to me to not only be constitutionally unnecessary but sends an absolutely devasting signal to Mr. Milosevic and others.

For example, I, for one, have been encouraging the Secretary of Defense, our National Security Adviser, and the President of the United States to get about the business of prepositioning right now the 50,000 forces they say will be needed in a permissive environment. That is an environment where there is a peace agreement. If tomorrow peace broke out in Yugoslavia, if Mr. Milosevic yielded to the demands of NATO, there would be no force to put in place in order to ensure the agreement.

I worry that an amendment at this moment not only is unnecessary but sends a signal to suggest that we should not even be prepositioning American forces for deployment in a peaceful environment. I think it is unnecessary.

I thank the Chair for his indulgence and my colleague for the time. I oppose the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER (Mr. Gordon). Mr. Specter from Pennsylvania.

Mr. SPECTER. Before the distinguished Senator from Delaware leaves the floor, if I may have his attention. I say to Senator Biden, may I have your attention?

Mr. BIDEN. Surely.

Mr. SPECTER. The arguments which you have made stem from your stated position that the President really ought to have congressional authorization to use force. If the legislative approach is not to require him to come to Congress before the use of force, but to await his using force, then are we not really in a situation where we face the impossible predicament of seeking to cut off funds from the middle of a military operation which is untenable? Or to articulate the question more precisely: What would you suggest as a way to accomplish the constitutional principle you agree with, that only the Congress has the authority to authorize the use of force, with the current circumstances?

Mr. BIDEN. Mr. President, if I may respond, I think that is a fair question. I think it, quite frankly and bluntly, accomplished that. The way I did that—the Senator was in that same meeting. We were in the same meeting. I think it was the 28th, you said. I do not remember the exact date.

Mr. SPECTER. It was.

Mr. BIDEN. He may recall that I am the one who stood up and said: Mr. President, you do not have the authority to send ground troops in without congressional authorization. Since you have said, Mr. President, you have no intention of doing that, why don’t you affirmatively send a letter to the Speaker of the House of Representatives committing that you will not do that without their authority? He said: I will. And he did. I think we accomplished that.

To now say that we are going to add an action already taken, giving an action already taken, giving an overwhelming prejudice to the point of putting your signature on it; and we still don’t trust you. I am not prepared to vote for that.

Mr. SPECTER. Mr. President, I would disagree with the statement of my colleague from Delaware that we say, “we do not trust you, Mr. President,” by noting that the President might change his mind. He has been known to do that. Other Presidents have, and even the Senator from Delaware and the Senator from Pennsylvania have been known to change their minds.

The other concern is that if you have it on a personal basis, in a letter; it really does not have the force of law. And we are consistently moving in the Congress to where there has been an executive order, which is a good bit more formal than the letter that the President might change his mind. Other Presidents have, and even the Senator from Delaware and the Senator from Pennsylvania have been known to change their minds.

But let me articulate a question in a different context?

Is there a third alternative?

Mr. BIDEN. Yes, Mr. President. I think there is. If I may respond. There are several. There is a third and a fourth alternative. One of the alternatives would be, were the resolutions to pass, to make sure that it is governed by law as opposed to a personal commitment or what might be said.

But let me articulate a question in a different context?

Is there a third alternative?

Mr. BIDEN. Yes, Mr. President. I think there is. If I may respond.

There are several. There is a third and a fourth alternative. One of the alternatives would be, were the resolutions to pass, to make sure that it is governed by law as opposed to a personal commitment or what might be said. But let me articulate a question in a different context?

Is there a third alternative?
view that the President could never get the support to use ground forces. I understand from Pennsylvania—and I have said this before, and I mean it sincerely, there is no one in this body I respect more than him, but he has indicated that he would be amenable to a consideration of the use of ground forces if asked. But I suspect that is not how this will be interpreted in not only Belgrade but other parts of the world. I think it will be interpreted as the Senate saying they do not want ground troops to be put in under any circumstances. That is not what he is saying. But that is, I believe, how it will be interpreted.

So let me sum up my response to the Senator’s question: A, we could, in fact, say to the President: Mr. President, if you are going to use ground forces, come and ask us, with no funds cut off in terms of a resolution.

Secondly, we could say to the President: Mr. President, we have your letter in hand. We take you at your word, and expect that that is what you would do, memorializing the political context in which this decision was made, which Presidents are loath to attempt to overcome.

The bottom line is, the President of the United States can in fact go ahead and disregard this as easily as he could disregard the provisions of the Constitution. If a President were going to decide that he would disregard the constitutional requirement of seeking our authority to use ground forces, I respectfully suggest he would not be at all hesitant to overcome a prohibition in an authorization bill saying no funds authorized here could be used.

He would see that funds that have already been authorized have put force in place, with bullets in their guns, gasoline in their tanks, fuel in their aircraft; that he has the authority to move them, and disregard this prohibition.

I understand the intention of my friend from Pennsylvania. I applaud it. I think it is unnecessary in a very complex circumstance and situation in which the President of the United States has indicated he does not intend to do it anyway. And I just think it sends all the wrong messages and is unnecessary and is overly restrictive.

Mr. SPECTER. Mr. SPECTER. The Senator from Delaware has mentioned a third option to the two I suggested.

The third option is for us to send a resolution saying don’t do it unless we authorize it, but not binding him. Saying that would certainly impose a political restraint on the President—not doing all of our requisitioning him not to without our prior authorization. I understand his third alternative, but I do not draw much solace from it, just as a matter of my own response.

Mr. SPECTER. If the Senator would yield, I am not suggesting—

Mr. SPECTER. My time is running out. Let me finish my statement. Then you have quite a bit of time left. Let me just finish the thought.

I do not think it is fair enough to say: We request that you not do it unless we give you prior authorization. Because that kind of a gentle suggestion—and I can understand the gentility of my colleague from Delaware—would proceed at his peril to violate with this President or might not go very far with the Senator from Delaware or would not predetermine what the Senator from Pennsylvania would do.

When the Senator from Delaware talks about the President flying in the face of a cutoff of funds, I think that the President would be loath to do that. I think there he might really get into the Boland amendment or challenging the Congress on the power of the purse.

The Presidents have gotten away with disregarding the congressional mandate that only Congress can declare war. They have gotten away with it for a very long time. Presidents feel comfortable in doing that. But if the Congress said: No funds may be used, as this amendment does—maybe it needs to be a little tighter here or there—I think the President would proceed at his peril to violate that expressed constitutional authority in Congress to control the power of the purse. I am very much interested in my colleague’s response, but I hope it will be on his time.

Mr. LEVIN. Mr. President, will the Senator from Michigan yield me 2 minutes?

Mr. LEVIN. I would be happy to yield. May I inquire of the Chair how much time the opponents have?

The PRESIDING OFFICER. Thirty-two minutes 11 seconds.

Mr. LEVIN. I am happy to yield to the Senator.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. The Senator from Arizona, Mr. McCain, and I had an amendment to attempt to preauthorize the use of ground forces. The Congress debated, as the Parliamentarian can tell us, in the context of the War Powers Act, having been triggered by a letter sent by the President to the Congress. We have already spoken. We have already spoken as a Congress. We have made it clear to the President of the United States, unfortunately, in my view, that under the War Powers Act, we believe he should not at this moment be introducing ground forces because the McCain-Biden amendment has done a very commendable attempt to give him authority in advance to use ground forces. So we have already debated this issue of ground forces in the context of the War Powers Act, which was one of the two documents cited by the Senator from Pennsylvania, that which won the U.S. Constitution. I argue we have done that.

Second, I point out that I can’t imagine a modern-day President, in the face of an overwhelming or even majority congressional decision, saying you should not use force and having the political will or courage to do that and use it anyway. I do not think such a circumstance exists. If you think this President is likely to do that, then you have a view of his willingness to take on the Congress that exceeds that of almost anyone I know.

The idea that this President, in this context, having said so many times that he would not and does not want to use ground forces, would fly in the face of a majority of the Members of the Congress saying he should not do it without coming here, in what everyone would acknowledge would be a difficult political decision to make in any instance and difficult military decision to make, and then if, in fact, he is not immediately successful, I believe everyone in this Chamber would acknowledge it would probably effectively bring this Presidency down. I just can’t imagine that being the matter.

Let me conclude by saying, Professor Corwin is credited with having said that the Constitution merely issues an invitation to the President and the Senate does battle over who controls the foreign policy. Seldom will Presidents take action that is totally contrary to the expressed views of the Congress which risk American lives and clearly would result in American body bags coming home.

I wish he had a view different than the one I am asserting, because I think we need to have that option open and real. I am not sure it is. I am almost positive there is no reasonable prospect this President, or for that matter the last President, would have moved in the face of the Congress having already stated its views that it was not willing to support him that would have moved in advance, which is another way of saying: Mr. President, if you want this power, come and ask us.

So I think it is unnecessary. I think it is redundant. I think it has already been spoken to as it relates to the War Powers Act. I think it is a well-intended, mistaken notion as to how we should be limiting this President’s use of ground forces.

I thank the Senator from Michigan for yielding me that time.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I thank the Senator from Delaware for those comments. I think it all boils down to whether the President would feel compelled by a political situation, a statement by Congress, to not send in ground troops.

I acknowledge in my opening comments that he had made that commitment, which I heard and spoke about, on April 28. But I believe we ought to be bound by the rule of law, not be dependent upon a change of mind by the
President, and memorialize it in this statute. Congress ought to assert its authority to declare war and have the United States engaged in war and to do it with the force of law with this kind of an amendment, perhaps somewhat modified.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I oppose the amendment. It would send the worst possible signal, I believe, to Milosevic at this time. A kind of “don’t worry” signal, if you weather the storm, no matter how weakened your military is, the President isn’t going to be able to go in even in a semipermissive environment in order to return the refugees, because Congress has tied his hands, tied the purse to say that only if Congress affirmatively approves the expenditure of funds, then and only then could ground forces go in, even in a semipermissive environment.

Mr. President, how much time do the opponents have?

The PRESIDING OFFICER. Twenty-seven and a half minutes.

Mr. LEVIN. I yield myself 6 minutes.

I can’t think of a worse signal to send to Milosevic in the middle of a conflict than this amendment would send to him. Congressional gridlock is not unheard of around here. We have plenty of examples of Congress being unable to act. We had a recent example in the House where the House could not even agree to support an air campaign that is presently going on, a tie vote.

Under this funding cutoff approach, that air campaign presumably would not be able to continue under a comparable resolution applying to the use of military forces.

I know that only applies to ground forces and not to an air campaign, but that vote in the House of Representatives is a wonderful example of how Milosevic, when he looked at this resolution, would say, well, gee, this would require Congress to affirmatively act, and since the House can’t even get a majority to act to support an ongoing operation, I could comfortably rely, he would say to himself, on the fact that they would never authorize in advance a ground campaign, even in a semipermissive environment.

The President has been criticized for taking the possibility of ground troops off the table. The argument is that Milosevic doesn’t have to worry as much about that possibility, given the positive action of administration. I think we ought to want Milosevic to worry and to worry more, not less. This is a “worry less” amendment, not a “worry more” amendment. This says Congress would have to affirmatively approve ground forces in advance, even in the semipermissive environment, and it seems to me Milosevic could quite comfortably say to himself that is not a very strong likelihood.

There are a lot of practical problems with the wording of this amendment. For instance, what happens if U.S. interest in the area is endangered by Yugoslav forces in Albania or in Macedonia were about to be attacked by Yugoslav army forces and it was determined to be necessary for U.S. ground forces to conduct a preemptive attack into Kosovo in self-defense? We are just about ready to be attacked; can we hit the attacker? Not under this amendment. You have to come to Congress first.

Our military would be told, whoops, you are about to be attacked in Albania or Macedonia, but Congress passed a law saying they have to authorize the use of ground forces. Do we want to tie the hands of our commanders that way in the middle of a conflict, to tell our commanders that even in circumstances where they think they are about to be hit that they cannot preemptively go after the attackers in Kosovo with ground forces? They have to then just take it on the chin?

And what if U.S. forces in Albania or Macedonia were attacked by Yugoslav army forces, actually attacked in Macedonia or Albania. Would counterattacking U.S. forces have to stop at the Kosovo border, thereby giving the Yugoslav army a haven from which they could conduct ground attacks across the border but not be pursued by American ground forces? The commander would have to stop at the border and come to Congress? So it is the worst kind of signal we could give in the middle of a conflict to Mr. Milosevic, and it creates burdens on our commanders that are intolerable in the middle of a conflict.

We have been advised by the Department of Defense on this amendment that “it is so restrictive of U.S. operations that the final bill be vetoed if this language is included in the bill.” That is information we have just received from the Department of Defense.

Gridlock. Fifty votes in the House. Now, under this amendment, we have to affirmatively approve something. What happens if a majority of us want to approve it but we are filibustered? The Senator from Pennsylvania said, well, those are the rules.

Those are the rules. But under his amendment, it would mean that even if a majority of the Senate wanted to give approval to ground forces, a minority in the Senate could thwart that action.

I think this is the kind of tying of our hands in the middle of a conflict that would tell Milosevic this country is not serious about the NATO mission. We are just going through this in the context of the terms of the future of Europe; it is so critical in terms of the stability not only of Europe but of the North Atlantic community that for us to adopt language that in advance says you can’t do something without Congress acting, knowing, as we do, how difficult it is to get Congress to act even in the middle of a conflict, would be simply a terrible result for the success of our mission.

Mr. President, I yield myself an additional 3 minutes.

The PRESIDING OFFICER. The Senator may continue.

Mr. LEVIN. Mr. President, we want, I hope, to do two things. One is to tell the President, as we have, how important it is that there be consultation and that he seek support from the Congress, and he has committed to do so. But that is a very different thing from what this amendment provides. This is an advance funding cutoff, unless something happens that can be thwarted by gridlock.

We should not ever forget the likelihood of gridlock in this Congress. Even if a majority wanted to support the use of ground forces in a nonpermissive environment, a minority of the Senate could thwart that majority view. I believe the signal to Milosevic that he will be the beneficiary of gridlock, and only if gridlock can be overcome would he then have to fear the possibility of the use of ground forces, is a signal that would undermine the current mission in a very significant way.

I really find the information paper the Department of Defense has shared with us this afternoon:

The Department strongly opposes this amendment because it would unacceptably put at risk the lives of U.S. and NATO military personnel, jeopardize the success of Operation Allied Force, and inappropriately restrict the President’s options as Commander in Chief.

These are now the words of the information paper shared with us by the Department:

...effectively give Milosevic advance notice of ground action by NATO forces, should NATO commanders request consideration of this option.

While we have made no decision to use ground forces in a nonpermissive environment, it would be a mistake to hamstring this option with a legislative requirement for prior congressional approval. The Department says:

...would prohibit U.S. ground personnel from engaging the Yugoslav forces, actually attacked in Macedonia or Albania.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, in listening to the comments of the Senator from Michigan, every single objection and argument he has raised applies equally to the President's commitment by letter to come to the Congress before he would use ground forces.

When he says it would be the worst signal to Milosevic, the President gave that signal personally when he said it gives Milosevic advance notice. That is exactly what the President would be doing in coming to Congress. When he says there could be no intelligence or record, I think, that is exactly what would happen by the President's commitment by letter to come to the Congress before he would use ground forces.

When he says it would be the worst signal to Milosevic, the President gave that signal personally when he said it gives Milosevic advance notice. That is exactly what the President would be doing in coming to Congress. When he says there could be no intelligence or record, I think, that is exactly what would happen by the President's commitment by letter to come to the Congress before he would use ground forces.

The proponents have 11 minutes.

Mr. President, I commend the Senator from Wisconsin.

Mr. FEINGOLD. I thank the Chair, and I thank the Senator.

Mr. President, I commend the Senator from Wisconsin for what he is trying to do with his amendment, to protect the prerogatives of the Senate and the requirements of the War Powers Resolution with respect to the actions of our armed services abroad. Although I understand it may be modified, I think I will be able to support this amendment. I share the Senator's commitment to protecting the war powers granted to the Congress by the Founding Fathers and reaffirmed in the War Powers Resolution.

That said, I hope that, should this amendment be adopted, the conference will make an effort to better define the term "peacekeeping," for which the Senate has made an exception in his amendment. I believe that all military deployments, subject to the exceptions laid out in the War Powers Resolution including peacekeeping operations, should receive authorization of the Congress. And, since there currently is no peace to keep in Kosovo—and in fact NATO continues air strikes to this day—I hope that the Congress will define the scope of such an exception more specifically.

Mr. President, today is May 25, 1999, and in the context of the Senator's amendment I want to take the opportunity to remind the Senate of the significance of today's date. Exactly 62 days ago, U.S. forces, as part of a NATO force, began air strikes against the Federal Republic of Yugoslavia.

Today marks the expiration of the 60-day time period after which the President—under the provisions of the War Powers Resolution—is required to withdraw our Armed Forces from their participation in the air strikes against the Federal Republic of Yugoslavia.

Exactly 62 days after the air strikes began—the President was required under section 4(a)(1) of the War Powers Resolution to submit a detailed report to the Congress regarding the actions he ordered our troops to take.

No such report has been submitted. Rather, the Congress was notified of the U.S. participation in the NATO air strikes by a letter from the President that he says is—"consistent"—with the War Powers Resolution.

"Consistent" or not, I do not believe that the President's letter satisfies the requirements of the War Powers Resolution. Nevertheless, in my view, the War Powers Resolution stands as the law of the land, and the President should comply with it. So it follows, then, that if the President fails to withdraw our troops by midnight tonight—and of course it is clear that they will remain in the region long after the clock strikes twelve—the President will be in violation of the provisions of the War Powers Resolution.

I find it disturbing that this important date of May 25 will come and go with no action to remove our troops from the region. Indeed, I am afraid that this Congress is ignoring the significance of this date completely. In fact, I am not sure that the significance of this date has been noted by any of my colleagues during debate on this Special Session today.

The War Powers Resolution provides that the President shall terminate the use of our Armed Forces for the purpose outlined in the report required under section 4(a)(1) of the Act after 60 days unless one of the three things has happened:

The Congress has declared war or has enacted a specific authorization for the use of the military; the Congress has extended by law the 60-day time period; or the President is not able to withdraw the forces because of an armed attack against the United States.

In addition, the President may extend this time period by 30-days if he certifies in writing to the Congress that it is unsafe to withdraw the forces at the end of the 60 days.

Sixty days have come and gone, Mr. President, and none of these things has happened.

The Congress has not declared war, nor has it authorized this action.

The Congress has not extended the 60-day time period.

The United States has not been attacked.

The President has not certified in writing to the Congress that an additional 30 days are necessary to ensure the safe withdrawal of our troops.

As my colleagues know, I voted against the ongoing NATO air strikes against the FRY, and I am deeply troubled that U.S. participation in them continues despite the fact that Congress was divided on whether to authorize them. In addition, the resolution which this body adopted and on which the other body deadlocked was not a joint resolution that would have authorized the military action, by law.

Mr. President, this is a sense-of-the-Congress resolution that does not carry the force of law.

The Senate also considered a joint resolution offered by the Senator from Arizona [Mr. MCCAIN] which, if adopted by both Houses of Congress, would have given the President the specific statutory authorization required under the War Powers Resolution to continue the use of our Armed Forces in the action against the FRY. In fact, Mr. President, that sweeping resolution would have allowed the President to expand this participation as he saw fit. While I opposed this resolution, I am pleased that the Senate debated it and voted on it as we unequivocally were obliged to do under the War Powers Resolution.

I am afraid that the debate and votes on the participation of the United States in Kosovo both here in the Senate, as well as in the other body, reflect the fact that there is no consensus in the Congress or in the country with regard to what we have already done in Kosovo, let alone a consensus on whether to expand the U.S. mission there.

Sixty days have come and gone since the President failed to submit the required report regarding U.S. participation in the air strikes against the FRY. Despite this regrettable inaction, the War Powers Resolution clock began to tick 48 hours after the first bombs fell—the date on which the President's report under section 4(a)(1) of the Act was required to have been submitted.

That's right, Mr. President, the clock begins to tick whether the President fulfills his obligation to submit the report or not. The vitality of the War Powers Resolution is unmistakable because that law states that the troops must be removed "...within 60 calendar days after a report is submitted"
or is required to be submitted pursuant to section 4(a)(1), ..." unless one of the actions I mentioned earlier has occurred.

As the clock draws closer to midnight today, the sixtieth day, our troops are performing admirably under hostile conditions. But time has almost run out on the President to fulfill this legal obligation under the War Powers Resolution.

Despite the fact that many in Congress oppose the current air campaign, and despite the fact that our troops will soon be participating in this campaign in violation of the War Powers Resolution, members of this body last week adopted a massive spending package in support of a military action that many of them oppose. I support fully our efforts to give our men and women in the field everything they need to maximize their chances of success and to minimize the risks they face.

Still, I voted against that package, both because of my continuing concern over our unauthorized military involvement in the FRY and because of the nonemergency spending that was jammed into the so-called emergency bill.

So we are not at a critical juncture, Mr. President. The Congress has voted to fund a military mission that it has not authorized, and the President has signed this bill even though he knows, as we know, that the continued participation of our troops in this mission is in violation of the War Powers Resolution.

One way or the other, consistent with the safety of our troops, it is time for the President to comply with the War Powers Resolution by seeking—and gaining—the legal authorization of Congress to continue this war, or by withdrawing our forces.

The PRESIDING OFFICER. Who yields time? The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I have not had an opportunity to read the letter from the President to the Speaker. It goes far short of the kind of commitment that has been represented—honestly represented. But the letter says in pertinent part: "I can assure you that I will fully consult with the Congress, which doesn't mean anything, on a whole lot. And then another line, "I would ask for congressional support before introducing U.S. ground forces into Kosovo into a nonpermissive environment.

The language of support here again goes far short of committing to congressional authorization such as is contained in this amendment.

I yield the floor.

Mr. SPECTER. I thank the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, on that point, we have been conducting a meeting right now in S–407, attended by the Secretary of State, the Secretary of Defense, and the National Security Adviser to the President, Mr. Berger, and the Chairman of the Joint Chiefs. In the course of their presentations to senators, in response to questions and in direct presentation, they reiterated that the President will formally come before the Congress and ask for any changes he deems necessary involving ground troops before he would implement or agree to implement with other NATO nations such a plan. That has just been stated on two occasions up in S–407. There was no equivocation. It was very clear in their declaration on behalf of the President that he will come before the amendment which is now being debated on the floor of the Senate.

Earlier indications from the Secretary of Defense to me today were that should this amendment, as drawn now, appear in a conference report, it would be the recommendation of the Secretaries of State and Defense to veto.

I am pointing out to the Senate that again we revisit many, many times this whole war powers concept. We acknowledge that both Republican Presidents and Democrat Presidents have absolutely steadfastly refused to comply with the letter of the law, but they have complied with the spirit of the law.

In this instance, the President has indicated to the Senate in that letter—and just now in the briefings by his principal Cabinet officers—that he would formally—I use the word "formal" to clarify—come to the Congress and request their concurrence for any departure from his preposition. That preposition was just moments ago restated by Secretary Albright in response to my question, which was, question No. 1, to allow me to return to the floor with regard to any nonpermissive force being put in place, which I favor, by the way, to send a signal. They said that would not be done. The President has no intention of doing it, nor do the NATO allies. And should the President decide at some later date, for whatever reason, to begin to preposition such forces, then he should come before the Congress prior thereto and get legislative approval.

I believe very strongly that this amendment would put this bill in serious jeopardy and be the recommendation of the President and his principal advisers have in the past and again today advised the Congress that the President is prepared to deal with the spirit of this amendment and to come before the Congress and seek its formal concurrence by legislative action should he and other NATO allies in the future make a decision to depart from the present policy.

I have just been handed a modification. It is one that the Senator from Pennsylvania and I have discussed. I do not know if my colleague has had an opportunity to see it.

If there are other Senators who wish to speak, I need time within which to consider this modification. Unless other Senators seek recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBB. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. Who yields time?

Mr. WARNER. Mr. President, I yield to the Senator 3 or 4 minutes.

Mr. ROBB. I thank my distinguished senior colleague. One minute will be sufficient because I know the chairman of the committee is about to make a unanimous consent request.

I yield to my good friend from Pennsylvania, I am very much opposed to this amendment. I cannot imagine a modification of this amendment that would cause me to be supportive. We have already debated this essential question twice.

Congress has the power to declare war. If we are concerned about consultation with the executive branch, as we speak consultation is taking place up in S–407 in a classified briefing where the Secretary of Defense, the Secretary of State, the National Security Adviser and the Chairman of the Joint Chiefs of Staff have been briefing all Senators on what is taking place, what has taken place, what will take place and have again reaffirmed the position of the President and consult with the Congress before any change, particularly with respect to the implementation of any particular plan that might involve the commitment of ground troops, takes place.

With that, Mr. President, I ask our colleagues to look very seriously at the long-term implications. Think of the kind of message this sends to Milosevic. Think of the kind of message this sends to our 18 alliance partners, if we were to continue to try to take this type of action on the floor of the Senate.

Mr. President, I urge a rejection of this particular amendment and I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from Virginia.

Mr. WARNER. Mr. President, I thank my colleague for that strong statement. I am certainly of the same view. Mr. President, I ask unanimous consent that when all time is used on the pending Specter amendment, the amendment be temporarily set aside with a vote occurring on or in relation...
to the amendment—there will be a ta-
bling motion.
Mr. SPECTER. Reserving the right to
object, will the Senator repeat that?
Mr. WARNER. Let me repeat it in its
entirety. I have not asked unanimous
consent.
I ask unanimous consent that when all
time is used on the pending Specter
amendment, the amendment be tempo-
rarily set aside with a vote occurring
on or in relation to the amendment fol-
lowing the debate on the Gramm
amendment.
That is the time sequence. As I have
indicated, I will move to table the Se-
ator's amendment.
The PRESIDING OFFICER. Without
objection, it is so ordered.
Mr. WARNER. For the information of
all Senators, the Gramm amendment
will be completed within a 1½-hour time
agreement. Following that debate, the
Senate will proceed to two stacked
votes, first on the Specter amendment
—and we have to reserve in here the
amending of that amendment, which
would be amended—to be fol-
lowed by a vote on the Gramm amend-
ment.
So we just have the sequencing of the
debate, sequencing of the votes. And we
will momentarily, Senator LEVIN and I
—I am prepared to accept the amend-
ment as amended. The Senator is wait-
ing for just one Senator to get concur-
rence.
So we have the unanimous consent in
place. I have given information to the
Senate with respect to the sequencing of
the Gramm amendment.
Mr. SPECTER. Reserving the right to
object, I ask my colleague from Vir-
ginia to insert 2 minutes on each side
to argue in advance of the vote.
Mr. WARNER. I have certainly no ob-
jection to that.
The PRESIDING OFFICER (Mr. SMITH
of Oregon). Is there objection to the
request as modified? Without objec-
tion, it is so ordered.
The PRESIDING OFFICER. Do Sen-
ators yield back their time on the
pending amendment? Who yields time
on the pending amendment?
Mr. WARNER. Mr. President, does
Senator SPECTER want to reserve his
time, and I will reserve my time, and
then we can proceed to the Gramm
amendment and come back to Senator
SPECTER's amendment? I am sure he
will allow that.
Mr. SPECTER. That is agreeable. We
will take up the Gramm amendment
now and then come back with the time
I have reserved at that time.
Mr. WARNER. And the time under the
control of the Senator from Vir-
ginia, jointly shared with Senator
LEVIN.
Mr. SPECTER. May the Record show
I have made a request for a modifica-
tion of the amendment and I will send
a copy of the requested modification to
the desk. I have already provided it to
the Senator from Virginia and the Sen-
ator from Michigan.
The PRESIDING OFFICER. Is there
objection to the modification of the
time?
Mr. LEVIN. Reserving the right to
object and we will have to object——
The PRESIDING OFFICER. Modifi-
cy the time?
Mr. LEVIN. The Chair just asked if
there is objection to the modification.
The PRESIDING OFFICER. Modifica-
tion of the time. Is there objection to
the modification? Without objection, it
is so ordered.
Mr. GRAMM addressed the Chair.
The PRESIDING OFFICER. The Sen-
ator from Texas.
Mr. GRAMM. Mr. President, just so
everybody can figure out when we are
likely to vote, how much time remains
on the Specter amendment?
The PRESIDING OFFICER. The Sen-
ator from Pennsylvania has 5½ min-
utes, and the Senator from Virginia
has 3 minutes 20 seconds.
Mr. GRAMM. Mr. President, hope-
fully, we can beat this 90-minute time
limit and have this debate more quick-
lly.
Amendment No. 392
(Purpose: To delete language which the De-
partment of Justice has stated would
"... seriously undermine the safety and
security of America's federal prisons")
Mr. GRAMM. Mr. President, I send
an amendment to the desk for myself,
Senator HATCH, and Senator THURMOND
and ask for its immediate consider-
ation.
The PRESIDING OFFICER. The
clerk will report.
The legislative assistant read as fol-
lows:
The Senator from Texas (Mr. GRAMM),
for himself, Mr. HATCH, and Mr. T HURMOND,
proposes an amendment numbered 392.
Mr. GRAMM. Mr. President, I ask
unanimous consent that the reading of
the amendment be dispensed with.
The PRESIDING OFFICER. Without
objection, it is so ordered.
The amendment is as follows:
On page 284, strike all on line 7 through
line 14 on page 286.
Mr. GRAMM. Mr. President, Senator
LEVIN and I every year or two have this
debate. It is well known. We have de-
bated it before. People have voted be-
fore. In fact, 61 Members of the Senate
voted with me 2 years ago to substitute
a study for the Levin amendment.
Let me add, the amendment is a lit-
tle different than it was then. The
thrust of it is basically the same. Two
years ago, the Levin amendment ap-
plicable to all procurement related to the
prison industry system. This year, it
applies to only defense procurement.
But while its focus has narrowed, its
impact on the work system within our
prisons remains very broad.
I remind my colleagues that we took
up this issue on July 10 of 1997. There
was a vote at that time, and 62 Mem-
bers—61 of whom are still Members of
the Senate—voted on this issue on a
different day in a slightly different
version. But the thrust of the issue, in
terms of procurement from the Federal
prison industry system, is and was ba-
ically the same.
Let me set out what I want to do in
my opening statement. I want to try to
explain the problem in historical con-
text, and I want to begin with Alexis de
Tocqueville. Then I want to come to
the Depression, which was really fork
in the road with regard to prison labor
in America. I want to talk about how
the fork we took, the wrong fork in my
opinion. I want to talk about how the
Levin amendment fits into the system
which has evolved since then. I want
to talk about why this provision by Sen-
ator LEVIN, which Senator HATCH and
Senator THURMOND and I hope to strike
from the bill, is so devastating to the
prison industry system in America and
why that, in turn, is harmful to every
taxpayer, to every victim of crime, to
everyone who wants prisoners rehabili-
tated when they go back out on the
street. In fact, there is no good argu-
ment, it seems to me, when you fully
understand this issue, for the Levin
amendment. I then want to talk in
some detail about each of these items and
then, obviously, at that point we
will begin the debate.
Let me start with the Tocqueville. As
many of my colleagues will remember,
de Tocqueville came to America in the
1830s. He wrote a book that has become
the greatest critique of America ever
written—"Democracy in America." We
forget that de Tocqueville came to
America not to study democracy but to
study prisons. In fact, he wrote a book
on prisons, together with a fellow
named Beaumont. We have forgotten
Beaumont, but we remember de
Tocqueville.
In his analysis of American prisons,
which were very much studied in the
1830s because they were part of the
most enlightened prison system in the
world, de Tocqueville praised at great
length the fact that we required Amer-
ican prisoners to work. In that period,
prison labor of 12 hours a day, 6 days
a week was the norm. De Tocqueville
says in his analysis on American pris-
ons:
It would be inaccurate to say that in the
Philadelphia penitentiary labor is imposed.
We may say with more justice that the favor
of labor is granted. When we visit this peni-
tentiary, we successively conversed with all
its inmates. There was not a single one among
them who did not speak of labor with
kind of gratitude and who did not express this
idea that without the constant
occupation, life would be insufferable.
The principal characteristic of the
American prison system in the age that
Alexis de Tocqueville wrote that
prisons was that people did not
work hard. They helped pay for the
cost of incarceration by working,
and they produced things. Those prod-
ucts were sold on the open market in

May 25, 1999

10731

CONGRESSIONAL RECORD—SENATE
many cases. So the first obligation for feeding prisoners and incarcerating prisoners was not by the tax-payers but by the prison itself. As Tocqueville argues, I think quite impressively in the book and in the quote I used, prisoners actually benefited from labor because of the extreme boredom of being incarcerated with nothing to do. This was not the norm in America from the 1830s, when Alexis de Tocqueville wrote, for 100 years, until the 1930s.

What happened in the 1930s was that we passed a series of laws driven by special interests, principally labor and business, and you cannot get bigger special interests than that. These laws consisted basically of the following laws: the Hawes-Cooper Act which authorized States to ban commerce in prison products within the borders; the Summers-Ashurst Act which made it a Federal crime to transport prison-made goods across state lines; and then another provision that said not only can you not sell what prisoners produce, not only can you not transport it for sale, but if you do force prisoners to work, you have to pay them the union scale set by the local union.

Guess what the result of those three laws was. The result of those three laws was that we destroyed the greatest prison industry system that the world had ever known. We destroyed that prison system by eliminating our ability to force people in prison to work; and in doing so, force them to pay for part of the cost of their incarceration; and we eliminated our ability to collect from them part of what they would earn working in prison or what would be earned by their work to pay for restitution to victims of crime.

What we are traveling here is that the ability of American prisons to force prisoners to work was the ability of prisoners to produce things that were used by Government. As a result, we now find ourselves in a situation where we have, I believe, 1.1 million Americans in prison. They are almost all male. They are almost all of prime working age. We spend $22,000 a year keeping people in prison, which is nearly the cost of sending somebody to the University of Chicago or to Harvard, and the cost of keeping Americans in prison costs the average American taxpayer $200 a year in taxes—just to keep people in prison.

The impact of the Levin amendment—I am sure he is going to gild this lily with lots of gold around the edges—but the impact of his amendment is to take another major step in destroying prison labor in America. What his bill would do is, for all practical purposes, take away about 60 percent of the work that Federal prisoners do now.

There are, obviously, two sides to these arguments. You can argue that when people are working in prison that there is someone else who might benefit from getting the job if the prisoner were not working. It is hard to make that argument, however, when we have the lowest unemployment rate in 30 years and when, in towns like my hometown of College Station, college students go out and relax after classes and impression gangs come and virtually knock them in the head and drag them off to a factory. So if there ever was an argument here that we needed to take away prison work to protect American jobs, it is very hard to make that argument in May of 1999. But here is the system we have now. We have a system called Federal Prison Industries where the Federal Government has work programs for prisoners. It pays them a very small incen-

Under this amendment, about 60 percent of that work would be taken away. Not only do I oppose this amendment, but the administration, in its Statement of Administration Policy on this defense bill, on page 3, “Federal Prison Industries Mandatory Source Exemption,” opposes the Levin amendment.

I have a letter here from the Attorney General. Among other things, she says:

I am extremely concerned about this legislation. I believe it would have a negative impact on the Federal Prison Industries, which is the most important, efficient, and cost-effective tool for managing inmates and for preparing them to be productive, law-abiding citizens upon release from prison.

I also have a letter from the National Center for Victims of Crime. They say, among other things:

Dollars that go to the crime victims through the [Federal Prison Industries] program are coming out of criminal offenders’ pockets—the notion that the offender must be held accountable and pay for the harm caused by crimes he or she committed is at the heart of our justice system. Crime victims often tell us that the amount of restitution an offender pays is far less important to them than the fact that their offender is paying restitution. Financial assistance from offenders has a tremendous healing and restorative power for criminal victims.

So another strong argument against the Levin amendment is that we have hard data, not just from the Federal Government, but from many States, that indicate conclusions. For example, people work when they are in prison, the probability that they will go out and commit another crime that will get them sent back to prison is substantially, markedly lower if they work than if they do not work.

You are going to hear Senator Levin argue that, well, this is not price competition. And it is not. Let’s make it clear, this is not a competitive issue. I would defy anyone to pick up this defense authorization bill and say how much better it is than the competition as a paragon of virtue in terms of defense procurement efficiency. The defense procurement system is full of protectionism and special interests,
May 25, 1999

CONGRESSIONAL RECORD—SENATE

where we give all kinds of special deals to all kinds of producers in selling things to the Defense Department. I say competition in procurement is a good thing. I swear by it. I support it. But when you have page after page of acquisition rules that say we pay inflated prices to buy things domestically rather than buying them on the world market, it is hard to suddenly be concerned about competition in prices with regard to prison-made goods.

This is not about competition. This is about using a resource we have with 1.1 million people in prison.

Now, having said that, the GAO recently did a study of the Federal Prison Industries of 20 different products that were bought by the Defense Department. What the GAO concluded was the Federal Prison Industries prices were, for the most part, higher than the market price. The GAO concluded that the Defense Department was paying inflated prices. They concluded, the recommendations did they have as to changes we reached in the study.

Now, let me remind my colleagues—I know Senator THURMOND is here and is very busy; I want to give him an opportunity to speak—that 2 years ago, when we debated this same issue in a slightly different form with the thrust of the law as we have now, I offered a substitute amendment that mandated a study be done by the Department of Defense and the Department of Justice. That study has just been completed, and it was reported to the Armed Services Committee and then to the Senate. I draw my colleagues’ attention to page 4 of the executive summary to the conclusions that were reached in the study.

The question was what recommendations did they have as to changes we might make in current law with regard to the Defense Department buying things produced in Federal prisons. They concluded, the recommendations can be made within existing statutory authority and will not require legislative action. Department of Defense and Federal Prison Industries say they believe that implementing the recommendations will improve the efficiency and reduce the cost of procurement transactions between the two agencies. Implementation of the administrative actions should facilitate and enhance the working relationship between the Department of Defense and the Department of Justice.

In short, 2 years ago when we debated this issue and we decided to study the problem that was raised by Senator LEVIN, we had that study completed jointly by the Defense Department and the Department of Justice, and they have concluded that they should undertake a modernization system, but they do not need any legislative authority to do it.

I urge my colleagues to remember, if we adopt this amendment and we kill off 60 percent of the remaining prison labor in America, we are going to spend more money to incarcerate prisoners. We are going to have less money go to victims. We are going to have a higher percent of our people being done out of the prison and committing crimes again. And the net result will be that we will have taken work that was being done in prison, and we will have put it into the private sector. But in a period when we have an acute labor shortage and in a period when we have 1.1 million people in prison, 1 percent of the labor force, it makes absolutely no sense, it is destructive of our criminal justice system to destroy the remnants of prison labor.

Also, the Department of Defense Inspector General recently completed a study of the Federal Prison Industries prices and concluded that DOD could have saved hundreds of millions of dollars by buying more items from the Federal Prison Industries if it had bought more items from them rather than buying them in the open market.

Now, let me remind my colleagues—I know Senator THURMOND is here and is very busy; I want to give him an opportunity to speak—that 2 years ago, when we debated this same issue in a slightly different form with the thrust of the law as we have now, I offered a substitute amendment that mandated a study be done by the Department of Defense and the Department of Justice. That study has just been completed, and it was reported to the Armed Services Committee and then to Members of the Senate. I draw my colleagues’ attention to page 4 of the executive summary to the conclusions that were reached in the study.

The question was what recommendations did they have as to changes we might make in current law with regard to the Defense Department buying things produced in Federal prisons. They concluded, the recommendations can be made within existing statutory authority and will not require legislative action. Department of Defense and Federal Prison Industries say they believe that implementing the recommendations will improve the efficiency and reduce the cost of procurement transactions between the two agencies. Implementation of the administrative actions should facilitate and enhance the working relationship between the Department of Defense and the Department of Justice.

In short, 2 years ago when we debated this issue and we decided to study the problem that was raised by Senator LEVIN, we had that study completed jointly by the Defense Department and the Department of Justice, and they have concluded that they should undertake a modernization system, but they do not need any legislative authority to do it.

I urge my colleagues to remember, if we adopt this amendment and we kill off 60 percent of the remaining prison labor in America, we are going to spend more money to incarcerate prisoners. We are going to have less money go to victims. We are going to have a higher percent of our people being done out of the prison and committing crimes again. And the net result will be that we will have taken work that was being done in prison, and we will have put it into the private sector. But in a period when we have an acute labor shortage and in a period when we have 1.1 million people in prison, 1 percent of the labor force, it makes absolutely no sense, it is destructive of our criminal justice system to destroy the remnants of prison labor.

I remind my colleagues that when you bring Senator THURMOND, Senator HATCH and myself into an alliance with the administration, into an alliance with Janet Reno, the Attorney General, and then you have the support of victims’ rights groups all over the country, that is a pretty broad coalition. What each and every one of these entities is saying is, do not kill off prison labor.

Where have 130 million Americans who go to work every day and struggle to make ends meet, I do not understand what is wrong with forcing prisoners to work. I want prisoners to work. It is good for them. It is good for the taxpayer. It is good policy, and we should not allow that system to be destroyed.

I reserve the remainder of my time, but I yield whatever time he might need to our distinguished colleague, Senator THURMOND, who today was recognized for the 75th anniversary of being commissioned an officer and a gentleman in the U.S. Army. For 75 years, three quarters of a century, Senator THURMOND has borne that commission to uphold, protect and defend the Constitution against all enemies, foreign and domestic, and whether it was on D-Day in Normandy or whether it was on the Supreme Court of South Carolina or whether it was Governor or whether it is our most distinguished Member of the Senate, Strom Thurmond is truly a man to hold against the mountain and the sky.

I yield whatever time he might need to Senator THURMOND.
that we ordered in a previous Defense Authorization Bill. In a survey taken as part of the study, DoD customers generally rated FPI in the good to excellent or average ranges in all categories, including price, quality, delivery, and service. As the report states, the working relationship between FPI and DoD remains strong and vital.

The study concludes that no legislative changes are warranted in Defense purchases from FPI. It made some recommendations for improvements that are currently being implemented. We should give the study time to work.

Indeed, the Administration strongly opposes the Levin provision. The Statement of Administration Policy on S. 1059 explains that this provision "would essentially eliminate the Federal Prison Industries mandatory source with the Defense Department. Such action could harm the FPI program which is fundamental to the security in Federal prisons."

FPI does not have an advantage over the private sector. Although inmates make less money than other workers, FPI must deal with many hidden costs and constraints that do not apply to the private sector.

Working inmates must be closely supervised, adding to labor costs, and extensive time-consuming security procedures must be followed. For example, when inmates go to work, they must pass through a metal detector and check their tools in and out, even if they just leave for lunch.

While the private sector often specializes in certain products, FPI by law must diversify its product lines to lessen its impact on any one industry. Also, the private sector tries to keep labor costs low while FPI installations are not so labor-intensive as possible. Moreover, inmate workers generally have little education and training and often have never held a steady job. Indeed, the productivity rate of an employee with the background of an average inmate has been estimated at one-fourth that of a civilian worker.

FPI is not used for every Federal purchase. In fact, it only constitutes a small minority. If a customer does not feel that FPI can meet its delivery, price or technical requirements, then the customer can request a waiver of the mandatory source. Last year, 90 percent of waiver requests were approved, generally within four days.

Moreover, some private businesses depend on FPI for their existence. FPI purchased over $418 million in raw materials and component parts from private industry in 1998. Contracts for such purchases are awarded in nearly every state, and more than half go to small businesses.

Further, Prison Industries helps crime victims recover the money they are due. The program requires that 50 percent of all inmate wages be used for victim restitution, fines, child support, or other court-ordered payments. Last year, FPI collected nearly $2 million for this purpose.

The Levin provision falls within the jurisdiction of the Judiciary Committee and should be evaluated there. Indeed, my Judiciary Subcommittee on Criminal Justice Oversight held a hearing yesterday on Prison Industries. We discussed in detail the importance of the program and how damaging the changes we are considering in this bill could be.

FPI is a correctional program that is essential to the safe and efficient operation of our increasingly overcrowded Federal prisons. While we are putting more and more criminals in prison, we must maintain the program that keeps them occupied and working.

THE PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. BYRD. Mr. President, I am authorized by Senator LEVIN to speak at this time. But I am going to ask Mr. Gramm if he will yield me some time.

Mr. GRAMM. Mr. President, I yield 10 minutes to the distinguished Senator from West Virginia.

Mr. BYRD. I thank the Senator.

Mr. President, the distinguished ranking member, Mr. Levin, knew my position on this matter, but he accommodated me by suggesting that I might proceed at this time while he is away from his chair. I thank the distinguished Senator from Texas for yielding time to me.

I am strongly opposed to the inclusion of section 806 in the fiscal year 2000 Defense authorization bill. This section would substantially undermine Federal Prison Industries—the Bureau of Prisons' most important skill-developing program.

I believe that this matter should not be included in the defense authorization bill. It is a matter that is being considered by the Senate Judiciary Committee. I am advised that the Criminal Justice Oversight Subcommittee of the Senate Judiciary Committee, chaired by the senior Senator from South Carolina, Mr. Thurmond, conducted an oversight hearing on this matter on May 24—yesterday.

The Attorney General of the United States, in a letter addressed to the chairman of the Senate Judiciary Committee, has indicated that she is concerned about this legislative provision. The Attorney General's letter asserts that the legislative provision would have a negative impact on Federal Prison Industries.

... which is the Bureau of Prisons' most important, efficient, and cost-effective tool for managing inmates and for preparing them to be productive, law-abiding citizens upon release from prison.

I am also advised that the administration has taken a strong position in opposition to section 806 because of the harm it would do to the FPI program, which is fundamental to the security in Federal prisons. This administration believes that to eliminate Federal inmates who are employed in sufficient numbers, the current mandatory source requirement should not be altered until an effective alternative program is designed and put into place.

Mr. President, in the State of West Virginia there are three Federal prisons—the Federal prison at Alderson, the Robert C. Byrd Federal Correctional Institution at Beckley, and the Robert F. Kennedy Prison at Morgantown. And each of these has an FPI operation. At these three Federal prisons alone, the Bureau of Prisons is able to keep more than 500 inmates productively occupied, and employ nearly 40 staff at no cost to the taxpayer. How about that? That sounds like a good deal to me.

Mr. President, a somewhat similar amendment was offered to the Defense Authorization Bill for Fiscal Year 1998. The Senate instead adopted a substitute amendment offered by the distinguished senior Senator from Texas (Mr. Gramm), which required a joint study by the Department of Defense and FPI on this matter. That study has recently been completed and transmitted to the Senate Armed Services Committee. The joint study made several recommendations that should be accomplished within existing authority, without requiring legislative action.

In summary, I am opposed to section 806 to the Defense authorization bill because it is unwarranted, and not only is it unwarranted, but it would have a debilitating effect on Federal Prisons Industries. This is a matter within the jurisdiction of the Senate Judiciary Committee and should not be included in this bill.

Mr. President, I ask unanimous consent that the Statement of Administration Position on Section 806 of the Defense authorization bill be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF ADMINISTRATION POSITION ON SECTION 806 OF THE DEFENSE AUTHORIZATION BILL (S. 1059)

Mr. President, a somewhat similar amendment was offered to the Defense Authorization Bill for Fiscal Year 1998. The Senate instead adopted a substitute amendment offered by the distinguished senior Senator from Texas (Mr. Gramm), which required a joint study by the Department of Defense and FPI on this matter. That study has recently been completed and transmitted to the Senate Armed Services Committee. The joint study made several recommendations that should be accomplished within existing authority, without requiring legislative action.

In summary, I am opposed to section 806 to the Defense authorization bill because it is unwarranted, and not only is it unwarranted, but it would have a debilitating effect on Federal Prisons Industries. This is a matter within the jurisdiction of the Senate Judiciary Committee and should not be included in this bill.

Mr. President, I ask unanimous consent that the Statement of Administration Position on Section 806 of the Defense authorization bill be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF ADMINISTRATION POSITION ON SECTION 806 OF THE DEFENSE AUTHORIZATION BILL (S. 1059)

The Administration opposes Section 806 which would essentially eliminate the Federal Prison Industries (FPI) mandatory source with the Defense Department. Such a provision could harm the security which is fundamental to the security in Federal prisons. In principle, the Administration believes that the Government should support competition for the provision of goods and services to Federal agencies. However, to ensure that Federal inmates are employed in sufficient numbers, the current mandatory source requirement must be altered until an alternative program is designed and put in place. Finally, this provision would
only address mandatory sourcing for the Defense Department, without regard to the rest of federal government.

Mr. BYRD. Mr. President, I again thank the distinguished Senator from Texas, Mr. GRAMM, and I likewise express my appreciation to the distinguished Senator from Michigan, Mr. LIVSEY, for his leadership overall on this bill. He is very dedicated, very able, and he works very hard. I am proud to serve with him on the Armed Services Committee. But in this case, I regret that I have to oppose his position.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BYRD. Mr. President, I yield the remainder of my 10 minutes that was yielded to me from that side to Mr. HATCH, if I may ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I thank the President and I thank the Senator.

The PRESIDING OFFICER. The Senator has 4 minutes 20 seconds.

Mr. HATCH. Mr. President, I rise to speak in support of this amendment, which I am pleased to cosponsor. I congratulate Senators GRAMM, THURMOND, and BYRD for their excellent statements on this matter, and for their leadership on this issue.

The amendment strikes section 806 of the bill, a provision that would effectively eliminate the Department of Defense purchasing preference for products supplied by Federal Prison Industries (FPI), also known by its trade name of UNICOR.

FPI is the federal corporation charged by Congress with the mission of training and employing federal prison inmates.

For more than 60 years, this correctional program has provided inmates with the opportunity to learn practical work habits and skills. It has enjoyed broad, bipartisan support in Congress and from each Republican and Democrat administration. An important part of this support has been the cooperative relationship between FPI and the Department of Defense—a relationship that has helped supply our armed forces in every war since 1934.

FPI is an irreplaceable corrections program. FPI and its training programs at federal prisons across the nation have been credited with helping to lower recidivism and ensuring better job-related success for prisoners upon their release—a result that all of us applaud.

Finally, FPI is an essential tool for ensuring a safe and secure correctional environment for staff, guards, and inmates in the federal prison system. Simply put, FPI keeps inmates productively occupied. And since the limited number of FPI jobs are coveted by inmates, getting and keeping these jobs are important incentives for good behavior by inmates.

These are important considerations as the federal inmate population continues to rise. In the last ten years, the federal inmate population has more than doubled, from 51,153 in 1989 to 108,207 in 1998. As Philip Glover, President of the Council of Prison Locals, AFGE, testified before the Judiciary Committee yesterday, "We cannot afford to simply warehouse inmates." Any corrections officer will tell you that the most dangerous inmate is the idle inmate. Idleness breeds frustration, and provides ample time to plan mischief—a volatile combination. Yet, despite the references to the costs imposed by FPI by my colleagues who oppose this amendment, I have heard no one suggest how the taxpayers will pay for the new prison programs and the additional prison guards that might be needed if FPI factories are forced to close.

Section 806 of this bill, which our amendment strikes, puts the FPI program at substantial risk. It would certainly result in the shuttering of some FPI factories. Section 806 exempts from the FPI mandatory source requirement products priced below $2,500, products integral to or embedded in another product not made by FPI, or products which are components of a larger product used for military intelligence or weaponry. Together, these categories make up over 80 percent of DoD's purchases from FPI. In turn, depends on sales to the Pentagon for nearly 60 percent of its business.

Some may reasonably ask, why should there be a government procurement preference for FPI goods? The answer is simply this: when FPI was established, a government requirement was needed if FPI factories are forced to close.

Section 806 would remove this sales restriction, and I do not understand the Senator from Michigan to be supporting such a change.

To ensure that FPI has adequate work to keep inmates occupied, Congress created a special FPI "procurement preference," under which federal agencies are required to make their purchases of products made by other vendors, as long as FPI can meet price, quality, and delivery requirements.

Section 806 would remove this procurement preference, as it relates to the vast majority of sales to the Department of Defense. In perhaps an unnecessary effort ensure the program did not affect private sector jobs, FPI was barred from selling its products in the commercial market. This is still the law. Thus, under current law, FPI must sell its products only to the federal government. Section 806 does not alter this sales restriction, and I do not understand the Senator from Michigan to be supporting such a change.

Further, FPI is required to diversify its product line to minimize the impact on any one industry. Moreover, FPI can only enter new lines of business, or expand existing lines, after an exhaustive review has been undertaken to determine the effect on the private sector.

Finally, FPI is required to diversify its product line to minimize the impact on any one industry. Moreover, FPI can only enter new lines of business, or expand existing lines, after an exhaustive review has been undertaken to determine the effect on the private sector.

FPI operates under full competition for federal contracts, combined with market restrictions that may not be altered by the private sector. My colleagues should remember that the primary mission of FPI is not profit. The primary mission of FPI is the safe and effective incarceration and re habilitation of federal prisoners. Need less to say, FPI operates under constraints on its efficiency no private sector manufacturer must operate under. For example:

Most private sector companies invest in the latest, most efficient technology and equipment to increase productivity and reduce labor costs. Because of its different mission, FPI frequently must make its manufacturing processes as labor-intensive as possible—in order to keep as many inmates as possible occupied.

The secure correctional environment FPI operates under competitive disadvantages.

The average federal inmate is 37 years old, has only an 8th grade education, and has never held a steady legal job. Some studies have estimated that the productivity of a worker with this profile is about one-quarter of that of the average worker in the private sector.

The average federal inmate is 37 years old, has only an 8th grade education, and has never held a steady legal job. Some studies have estimated that the productivity of a worker with this profile is about one-quarter of that of the average worker in the private sector.

This is another disadvantage that, by and large, private companies do not have to operate under.

Finally, FPI is required to diversify its product line to minimize the impact on any one industry. Moreover, FPI can only enter new lines of business, or expand existing lines, after an exhaustive review has been undertaken to determine the effect on the private sector.

FPI has also begun operations such as a mattress recycling factory, a laundry, a computer repair factory, and a mail bag repair factory, among others, to diversify its operations and minimize its impact on the private sector.
FP I trained and employed 20,200 federal inmates at no expense to the taxpayer in FY 1998, and in FY 1999 FPI supported 4,600 jobs outside prison walls.

Every dollar FPI receives in revenue is recycled into the private sector. Out of each dollar, 76 cents goes to the purchase of raw materials, equipment, services, and overhead, all supplied by the private sector; 18 cents goes to salaries of FPI staff; and 6 cents goes to inmate pay, which in turn if passed along to pay victim restitution, child support, alimony, and fines. Incidentally, FPI inmates are required to apply 50 percent of their earnings to these costs.

Thus, while I have some sympathy for the intent of Senator Levin, who sponsored this provision in the bill, I must join Senator Gramm in offering this amendment to strike Section 806. I would like to remind my colleagues that the Senate has addressed this matter before. Two years ago, Senator Levin offered a similar amendment. Mr. President, 62 members of the Senate voted instead for an amendment offered by Senator Gramm and myself, requiring the Departments of Defense and Justice to undertake a joint study of the procurement and purchase processes governing FPI sales to the Department of Defense.

Just last month, this study was delivered to Congress. Interestingly, the report does not support the action proposed by section 806. To the contrary, the Departments of Defense and Justice jointly concluded that the report’s “recommendations can be made within existing statutory authority, and will not require legislative action.”

In fact, neither of the Departments affected by section 806 support its inclusion in the bill. The Administration’s official Statement of Administration policy is equally clear, stating that “the Administration opposes Section 806.”

In summary, either we want Federal inmates to work, or we do not. I believe that we do want inmates to work, and therefore I must oppose section 806. I say to my colleagues, if you believe in maintaining good order and discipline in prisons, or if you believe in the rehabilitation of inmates when possible, you should support this amendment.

I agree with those of my colleagues who believe that we must address the issues raised by prison industries nationwide. As I continue, appropriately, to incarcerate more serious criminals in both Federal and State prisons, productive work must be found for them. At the same time, we must ensure that jobs are not taken from law-abiding workers. Under the leadership of Senator Hatch, the Senate Judiciary Committee’s Subcommittee on Criminal Justice Oversight yesterday held a hearing on this issue. Witnesses at that hearing urged Congress not to gut FPI without addressing the broader need for productive prison work. Because FPI is a correctional program, it enhances the security of federal prisons, helps ensure that federal inmates work, furthers inmate rehabilitation when possible, and provides restitution to victims. Section 806 would not only do harm to this highly successful program, and I urge my colleagues to support our amendment to strike it.

I also ask unanimous consent a letter to me from the Office of the Attorney General, to be printed in the Record, with the accompanying documents.

There being no objection, the matter was ordered to be printed in the Record, as follows:

Hon. Orrin G. Hatch, Chairman, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Fiscal Year 2000 Defense Authorization bill that was recently reported out of the Armed Services Committee includes a provision regarding the Department of Defense’s pilot program with Federal Prison Industries (FPI). We believe that the statutory changes required by this provision are premature in light of the recommendations of the Congressionally mandated two-year study recently completed by the Department of Defense and FPI that explored the procurement relationship between the Department and FPI. The purposes stated in the Deputy Attorney General’s letter (copy attached), I am extremely concerned about this legislation because it could have a negative impact on FPI, which is the Bureau of Prisons most important, efficient, and cost-effective tool for managing inmates and for preparing them to be productive, law abiding citizens upon release from prison.

Federal Prison Industries is first and foremost a correctional program intended to train the Federal institutions and minimize adverse impact on the private sector business community. As such, it adheres to several statutorily mandated principles, including diversifying its product line to avoid hurting any particular industry and remaining as labor intensive as possible. These practices render FPI less competitive than private sector manufacturers. The mandatory source status (which would be effectively eliminated as a result of provision) helps ameliorate these circumstances by achieving customer contact which reduces competitive advertising costs. It also assists FPI in its efforts to partner with private sector manufacturers who are attracted to the steady work flow provided by this preference. These partnerships are essential to FPI since it cannot, on its own, produce many complicated products such as systems furniture.

This provision would alter the requirement that the Department of Defense purchase products from FPI, and it could require FPI to compete against far higher prices for sales of products that are components of products not produced by FPI, are part of a national security system, or the total cost of which is less than $2,500. Even with respect to other products, DoD is no longer required to purchase from FPI, rather the Secretary of Defense must “conduct market research” to determine whether a product is “comparable in price, quality, and time of delivery” to products available from the private sector before making purchases. If the Secretaries concludes the purchase is not comparable, the purchase may be made from any source.

Purchases by the Department of Defense account for almost 80% of FPI sales. Moreover, 78 percent of the DoD orders are for small purchases of less than $2,500, and much of the remaining 22 percent is made up of products or components of products made by other manufacturers and products used in national security systems. Accordingly, if this provision is enacted into law, the continued existence of FPI is largely dependent on its ability to compete with the private sector for the limited Department of Defense market.

A recently completed report conducted by the Department of Defense and FPI concluded that no legislative changes were warranted by the investigation of procurement transactions between these two entities. Rather, while the study, entitled “A Study of the Procurement, Procedures, Regulations and Statutes that Govern Procurement Transactions between the Department of Defense and Federal Prison Industries,” made a number of recommendations for facilitating and enhancing the working relationship between the two agencies that could be accomplished within existing statutory authority, the study recommends the FPI and DoD create a pilot program at eight DoD locations to test the effectiveness of administrative waivers for purchases of less than $2,500 where expedited delivery is required. Additionally, FPI will continue to monitor and evaluate delivery performance.

Issues surrounding FPI, such as the mandatory source status affect all agencies, not just the Department of Defense. Therefore, before this issue should be reviewed in the broader context.

If you should have any questions or if we may provide further information about FPI, please feel free to contact the Department. The Office of Management and Budget has advised us that from the perspective of the Administration’s program, there is no objection to submission of this letter.

Sincerely,

Janet Reno

OFFICE OF THE DEPUTY ATTORNEY GENERAL.

Hon. John Warner, Chairman, Committee on Armed Services, U.S. Senate, Washington DC.

Dear Mr. Chairman: We anticipate that an amendment will be offered to the Defense Authorization bill that would eliminate mandatory source status for Federal Prison Industries (FPI). We believe that the amendment would have a devastating impact upon FPI, a program that is critical to the safe and orderly operations of federal prisons. FPI is the Bureau of Prisons most important, efficient, and cost-effective tool for managing inmates. It keeps inmates productively occupied and reduces inmate idleness and the violence and disruptive behavior associated with it. Thus, it is essential to the security of the Federal Prison System, its stakeholders, and the communities in which they are located. By eliminating FPI’s mandatory source status, the amendment would dramatically reduce the number of inmate FPI would be able to employ. The inmate

1This study was mandated by Section 855 of the National Defense Authorization Act for Fiscal Year 1997, Public Law 104-106, and was released to the Senate and House Armed Services Committees several weeks ago.
idleness this would create would seriously undermine the safety and security of America’s federal prisons.

In addition to being a tool for managing the growing inmate population, FPI programs provide training and work experience that develop job skills and a strong work ethic. Bureau of Prisons’ research has confirmed the value of FPI as a correctional program. Findings demonstrate that inmates who work in FPI, compared to similar inmates who do not have FPI experience, have better institutional adjustment. Moreover, after release, more likely to be employed and significantly less likely to commit another crime. A long-term post-release employment study by the Bureau of Prisons has found that inmates who were released as late as 12 years after participated in industries work or vocational training programs were 24 percent less likely to be recommitted to federal prisons than a comparison group of inmates who had no such training. Clearly, the FPI program contributes to public safety by enhancing the eventual reintegration of offenders into the community after release.

Opponents of FPI have asserted that it is an unfair competitor and it is damaging the private sector. This is not accurate. Throughout its history, FPI has followed a number of practices deliberately designed to reduce its impact on the private sector, such as diversifying its product line to avoid hurting any particular industry and remaining as labor intensive as possible. Further, far from taking jobs from the private sector, FPI actually creates jobs in the private sector by purchasing over $418 million annually in supplies from the private sector.

It is important to explain why FPI’s status as a mandatory source is critical to FPI’s viability. The mandatory source status, if maintained, establishes as a means of creating a steady flow of work for the employment of inmates. FPI views the mandatory source status as a method of not only maintaining this work flow but also achieving customer contact which reduces competitive advertising costs. FPI does not abuse its mandatory source status. If a customer feels that FPI cannot meet the bidding requirements, the customer may request a waiver of the mandatory source. These waivers are processed quickly (an average of 4 days) and, in 1998, FPI approved over 80 percent of the requests from federal agencies for waivers.

FPI does not have the capability to produce many sophisticated products, such as systems furniture, independently. It relies on the private sector to provide space planning, design, engineering, installation and customer service. By entering into partnering relationships with private companies through the use of federal acquisition procedures, FPI vertically integrates the manufacturing of a company’s product, using inmate labor, in order to attract a private sector partner, there must be some incentive. That incentive is the mandatory source status. Without the mandatory source status, FPI would not be able to attract the private sector partners necessary for it to diversify its product offerings and to offer products which are contemporary and attractive to its federal customers.

Last week, the report of a congressionally mandated study conducted by the Department of Defense (DoD) and FPI concluded that no legislative changes were warranted by the investigation of procurement transactions between these two entities. The study, entitled “A Study of the Procure- ment, Procedures, Regulations and Statutes that Govern Procurement Transactions between the Department of Defense and Federal Prison Industries,” was mandated by Section 855 of the National Defense Authorization Act for Fiscal Year 1998 (P.L. 105–85), and released to the Senate and House Armed Services Committee last week. The report noted that some steps could be taken to improve the procurement relationship between DoD and FPI but most appropriately accomplished within the executive branch.

CONGRESSIONAL RECORD—SENATE

May 25, 1999

1The federal inmate population is growing at an unprecedented rate and crowding at secure institutions is already at critical levels and expected to increase in the near term.

1The federal inmate population is growing at an unprecedented rate and crowding at secure institutions is already at critical levels and expected to increase in the near term.
FPI is a law enforcement issue more than a government issue because it is essential to the management of federal prisons and because FPI is operated as a correctional program, not as a for-profit business. As a result, the government should develop pilot programs that will enable FPI to become more efficient and cost competitive source. We believe that the amendment would benefit from consideration by the Judiciary Committee to consider the mandatory source issue in the context of the full FPI program. Simply considering the amendment as affecting a source of goods, the private sector would completely overlook the law enforcement significance of FPI and threaten a program that is fundamental to public safety.

We are enclosing a copy of the study report conducted by DoD and FPI for your review. If you should have any questions or if we may provide further information about FPI, please feel free to contact the Department.

Sincerely,

Eric H. Holder, Jr.
Deputy Attorney General

STATEMENT OF ADMINISTRATION POSITION ON SECTION 806 OF THE DEFENSE AUTHORIZATION BILL (S. 1059)

FEDERAL PRISON INDUSTRIES MANDATORY SOURCE EXEMPTION

The Administration opposes Section 806 which would essentially eliminate the Federal Prison Industries (FYI) mandatory source with the Defense Department. Such action could harm the FPI program which is fundamental to the security in Federal prisons. In principle, the Administration believes that the Government should support competition for the provisions goods and services to Federal agencies. However, to ensure that Federal inmates are employed in sufficient numbers, the current mandatory source requirement should not be altered until an alternative program is designed and put in place. Finally, this provision would only address mandatory sourcing for the Defense Department, without regard to the rest of federal government.

The PRESIDING OFFICER (Mr. Brownback). The Senator from Michigan (Mr. Levin) is out filling time.

Mr. LEVIN. Mr. President, section 806 of the defense authorization bill which is before the Senate is a commonsense provision. It was adopted by the Armed Services Committee. Basically, it says the private sector ought to be allowed to bid on items that the Department of Defense is buying. If the Department of Defense declares that it is necessary that the private sector be allowed to bid.

That may sound so obvious that people may be scratching their heads saying, well, obviously the private sector ought to be allowed to bid if the Department of Defense believes the product which is offered by the private sector is needed by the Department of Defense. But that is not the way it is now. The way it is now is that Federal Prison Industries can make a unilateral decision that it is going to supply the Department of Defense with a product, and the private sector is people out there who want to just simply compete for a product can be prohibited from doing so. That, it seems to me, is the height of unfairness in a society which has a private sector, has private businesses, has labor that is working in those private businesses, and when someone says that product, produced by that private company, is a product that we want because it is a better product than FPI can give us or it is a product that can be given to us more cheaply than the prisons can provide it.

What an extraordinary way it is to run a Government, that we have agencies in this Government that want to buy a product, be it textiles or furniture or what have you, that are told they cannot compete that product with the private sector competing; they have to buy it from Federal Prison Industries even though it costs the agency more or it is of lower quality. What an extraordinary way to be inefficient, to waste taxpayers' money, and to force agencies that are supposed to be protecting taxpayers' money to spend it on lesser quality items or on more expensive items—just because Federal Prison Industries unilaterally has decided it is going to supply the Department of Defense. That is not fair. That is not fair and we have to eliminate it.

Section 806 simply says that the Department of Defense—not Federal Prison Industries—should determine whether or not a product manufactured by Federal Prison Industries meets the needs of the Department of Defense.

The approach that is taken by Section 806 is consistent with the basic tenet of how our whole procurement system works, which is the people who buy and use products should be the ones who decide whether the quality, price, and delivery of those products meet their needs. Yet amazingly enough, the FPI, Federal Prison Industries' current rules prohibit Federal Prison Industries from deciding which private sector products to determine whether they might be superior to what Federal Prison Industries has.

The regulations of Federal Prison Industries say:

A contracting activity should not solicit bids, proposals, quotations or otherwise test the market for the purpose of seeking alternative sources to the Federal Prison Industries. If that is not absolutely extraordinary, that Federal Prison Industries is telling the Department of Defense, when they go and buy textiles or shoes or whatever they are buying, that they may not even test the market, seeking alternative sources to Federal Prison Industries.

They may not solicit bids, proposals, quotations, or test the market for the purpose of seeking alternative sources to Federal Prison Industries. That kind of an upside-down situation is it that the Department of Defense cannot even solicit a quote from somebody to supply a product if Federal Prison Industries says they may not do so? Unilaterally, the seller is telling the buyer: You can't even go out and seek other quotes or see competition).

Boy, that sure turns the purchasing process of the Department of Defense and our other agencies right on its head.

What is going to happen to the Department of Defense is required to do, instead of doing what ordinary buyers do, which is to seek the best product at the best price, is to accept Federal Prison Industries' determination. Federal Prison Industries is the sole arbiter of whether its products meet the requirements of the Department of Defense.

Section 8104 of the Federal Acquisition Streamlining Act requires the Department of Defense and other agencies to conduct market research before soliciting a price that is competitive with that may be available in the commercial marketplace. They are supposed to solicit bids, but they do not do that. They are not allowed to do that. Under the FPI rules, they have to buy it from Federal Prison Industries. If the Industries on their own, unilaterally, decide they are going to force the Department of Defense to buy a product.

All that the provision does is to reverse the rule which prohibits the Department of Defense from conducting market research and permits the Department of Defense to look at what private sector companies have to offer, as it would do in the case of any other procurement.

If Federal Prison Industries offers a product that is comparable in price, quality, and time of delivery to products available from the private sector, the Department would still be required to purchase that product on a sole-source basis from Federal Prison Industries. But if the DOD determines that Federal Prison Industries' product was not competitive, then it would be permitted to conduct a competition and go to another source.

That seems to me to be the least that we can do to protect the taxpayers from the misuse of Federal funds on products that fail to meet the needs of the Department of Defense.

Federal Prison Industries has repeatedly claimed that it provides quality products at a price that is competitive with current market prices. The statute, indeed, is intended to do exactly that, provided Federal Prison Industries will provide the Federal agencies products that meet their requirements and prices that do not exceed current market prices. But the FPI is unwilling to permit agencies to compete their products at prices with those available in the private sector.

Under Federal Prison Industries' current interpretation of the law, it need not offer the best product at the best price. It is sufficient for it to offer an adequate product at an adequate price and insist on its right to make the
sale. When Federal Prison Industries sets the price, it then seeks to charge what it calls a market price, which means that at least some vendors in the private sector charge a higher price, and the FPI’s proposed regulation specifies that the determination of what constitutes the current market price is ultimately up to the Department of Defense to determine the current market price and the conclusion that a product of Federal Prison Industries does not exceed that price is—you got it—the sole responsibility of Federal Prison Industries.

That is the situation. They are supposed to buy at market price, but they make a determination as to whether or not, in fact, what they are forcing an agency to buy is being set at a market price.

The General Accounting Office reported in August of 1998:

The only limit the law imposes on Federal Prison Industries is that it may not exceed the upper end—of the current market price range.

Moreover, the manner in which Federal Prison Industries seeks to establish the current market price range appears calculated to result in a price far higher than the Department of Defense would pay under any other circumstances. According to the proposed regulation codifying FPI’s pricing policies, “a review of commercial catalog prices and prices from catalog prices, FPI appears to have difficulty even matching the undiscounted catalog prices. Last August, the General Accounting Office compared Federal Prison Industries’ prices for 20 representative products to private vendors’ catalog prices and prices from catalog prices and found that for four of these products, FPI’s price was higher than the price offered by any private vendor. That is 4 out of 20. In 4 out of 20 cases, GAO found that the price FPI charged was higher than the price offered by any private vendor. For five of the remaining products, the FPI price was at the “high end of the range.”

Those are the words of the General Accounting Office. FPI’s price was at the “high end of the range” of prices offered by private vendors—ranking sixth, seventh, seventh, eighth, and ninth of the 1 vendors reviewed. In other cases, the government employees who determined the current market price for Federal Prison Industries did, it had to be given to Federal Prison Industries. FPI won the bid at $45 per unit. My company bid $22 per unit. The way I see it, the Government, my tax dollars to the tune of $1,978. Do you seriously believe that type of procurement is cost-effective? I lost business, my tax dollars were misused because of unfair procurement practices mandated by Federal regulations. This is a prime example, and I’m certain not the only one, of how the procurement system is being misused and small businesses in this country are being excluded from competition with the full support of Federal regulations and the seeming approval of Congress.

far past time... to require [FPI] to be competitive for the benefit of all taxpayers. A third frustrated vendor, who had been driven out of business by FPI, told a House committee:

Is it justice? Is it good? Federal Prison Industries would step in and take business away from a disabled Vietnam veteran who was twice wounded fighting for our country... our funds and bankrupting that... business which the Veterans’ Administration suggested he enter?

There is a very fundamental unfairness which exists in this system. It is one that we need to correct. The Department of Defense took a survey recently of DOD customers for Federal Prison Industries’ products. The results are eye-opening. The survey provided DOD customers with five categories in which to rate Federal Prison Industries’ products: excellent, good, average, fair, or poor. According to the data reported jointly by the Department of Defense and the Federal Prison Industries, a majority of DOD customers rated FPI as average, fair, or poor in price, delivery, and overall performance.

On price: 70 percent of the Department of Defense’s electronics customers, 57 percent of DOD clothing and textile customers, 66 percent of DOD dorm and quarters furniture customers, 53 percent of DOD office case goods customers, 57 percent of DOD systems furniture customers rated FPI prices as average, fair, or poor. On delivery, the same kind of figures: 50 percent of DOD electronics customers rated FPI delivery as average, fair, or poor, 46 percent of DOD clothing and textile customers rated FPI delivery as average, fair, or poor. That did not make any difference. FPI said it was going to sell, and once FPI made that determination, the Department of Defense had no alternative. It does not make any difference whether the delivery is lousy, whether the price is too high, whether the overall performance is poor. It makes no difference. Forget competition, FPI said. We are going to sell. Forget fairness to a business with workers in the private sector, FPI said. Tough. You have to buy from us.

So the bottom line is that fully 35 percent of the Department of Defense customers indicated they had a problem with an FPI product delivered late or of inferior quality. The reason they are having problems is because there is a lack of competition.

We think, given the fact that such a small amount of money is paid to prisoners for their labor, that Federal Prison Industries could provide products much more cheaply than the private sector. But that is not the case. The case is that the private sector very often can supply these products to our agencies more cheaply than can the prison industries. But if the Federal Prison Industries decides in its unilateral, sole, exclusive judgment that it is going to supply the Department of Defense, that is it. That is it. This is an injustice to the people who have worked hard to put together a business. It is an injustice to the people who work for those businesses.

This is one of those weird cases where you have business and labor coming together before us on the same side of an issue. The American Federation of Labor, AFL-CIO, urges that this section remain in the bill. We have the alert from the Chamber of Commerce as well. Members of the Senate, business and labor—our good friend from Texas calls those special interests, business and labor. People who have worked hard to put together a business and people who work in those businesses are not being allowed to compete. FPI says you are going to buy that product. That is what they tell the DOD. You are going to buy it. You may not like the price, you may not like the delivery, you may not like the quality, but you are not going to let anybody else compete for that sale.

So that is the fundamental unfairness that this language would correct. It does not tell the Department of Defense they cannot buy it from Federal Prison Industries. It simply says that if the Department of Defense determines on price or quality that the private sector can do as well, then it— not the FPI; the Department of Defense—may compete and determine whether or not they can save the taxpayers any money.

I am going to close and then turn this over to my friend and my colleague from Michigan for his comments. But I just want to read one additional quote from the Master Chief Petty Officer of the Navy before the National Security Committee of the House a couple years ago. He said that the FPI monopoly on Government furniture contracts has undermined the Navy’s ability to improve living conditions for its sailors.

Master Chief Petty Officer John Hagan said:

Speaking frankly, the [FPI] product is inferior, costs more, and takes longer to produce. Federal Prison Industries, in my opinion, exploited their special status instead of making changes which would make...
them more efficient and competitive. The Navy needs need your support to change the law and have FPI compete with [private sector] furniture manufacturers. Without this change, we will not be serving Sailors or taxpayers in the most effective and efficient way.

Mr. President, I yield the floor. I am happy to yield time to my distinguished colleague from Michigan.

The PRESIDING OFFICER. The Senator from Michigan has 24 minutes 18 seconds.

Mr. LEVIN. How much time would the Senator wish?

Mr. ABRAHAM. No more than 10 minutes.

Mr. LEVIN. I am happy to yield 10 minutes to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 10 minutes.

Mr. ABRAHAM. Thank you, Mr. President.

I suspect I will not use all of the time that I have been allotted, but I do want to speak here today in opposition to the amendment before us offered by the Senator from Texas.

Especially in light of the grave concerns that all of us share about the readiness of our Armed Forces and the significant steps that Congress took in the supplemental appropriations bill to address this problem, as well as in the budget which we passed earlier this year, I strongly believe that section 806 of the defense reauthorization bill should be retained.

This is not because I think that having Federal prisoners working is not important. To the contrary, I think it is very important. I firmly believe that the development through work, self-discipline and other virtues that enable people to lead productive lives is probably the single greatest hope for rehabilitation in a prison setting. Indeed, it is disappointing that, according to the May 20 Wall Street Journal, only 17 percent of Federal prisoners work under the current Federal Prison Industries program.

But providing for national defense is the Federal Government's paramount responsibility. Given the very serious problems we are facing with respect to our military readiness, we need to take every possible step to rectify these problems as quickly and as effectively as possible.

There is no question in my mind that the requirement that the Department of Defense contract with FPI for certain products, and giving FPI a veto over the Defense Department's going elsewhere, is an obstacle to our efforts to fix these problems. The routine, significant failure by FPI to provide goods that the Defense Department has contracted for on a timely basis—almost half of the time in 1996, and over a third of the time in 1996—is simply unacceptable. To have the Defense Department depend on FPI for over 300 different products under these circumstances is also simply unacceptable.

Finally, in this era of tight budgets, to be spending precious defense resources on FPI goods that we could be obtaining at lower prices from the private sector is also unacceptable.

We should obviously address these problems by the Department of Defense to go elsewhere and to do so without getting advance permission from FPI. I am glad the Armed Services Committee, at the prompting of my colleague, the senior Senator from Michigan, Senator Levin, has so provided in the reauthorization bill that recently passed out of committee.

I would add that the provision adopted by the Armed Services Committee requires the Department of Defense to give FPI the opportunity to compete for contracts for almost all products and only permits the Department of Defense to go elsewhere if it determines that the product being offered is comparable in FPI's price, quality, and time of delivery to products available from the private sector.

The only exceptions are for national security systems, products integral to or embedded in a product not available from FPI, or products that cost less than $2,500. In those instances, under section 806, the Department of Defense does not have to seek a bid from FPI, but in all other instances DOD would continue to be required to do so.

It will be argued that we cannot follow this course without jeopardizing another important Federal policy, that of putting Federal inmates to work. But if that were really our only option, we would be facing a much harder choice, since we would arguably be having to choose between pursuing a course critical to securing tranquility abroad and a course important to securing domestic tranquility. I do not believe we are really faced with that dilemma.

Rather, I am convinced that the limits this legislation imposes on the FPI monopoly can plainly be offset by expanding other opportunities for prisoners to work. This could be done, for example, by having the FPI focus on products that we do not produce domestically and that we are now importing from abroad. Or it could be done by putting prisoners to work on functions that are currently being assigned to government entities such as recycling.

It will be argued that we should come up with the new opportunities first and then consider raising the lines in section 806 if the other options prove workable. I disagree. I believe we should put the needs of our national defense ahead of the needs of prisoners.

I have no real question that if we do so, we will discover that in fact we are able to devise policies that adequately address both sets of needs.

I will just close by restating what I said last year in a similar debate. None of us who are advocating a change in policy here are advocating the elimination of work requirements for Federal prisoners. But we must look at what prisoners in the work they do are taking jobs away from law-abiding Americans who have never committed a crime, then I think we have to reexamine our policy.

To me, it makes sense to devise a prison work policy that does not injure law-abiding citizens. I believe that requiring the FPI to be competitive in its bidding process and not granting it a monopoly are the right way to achieve this end. That way the taxpayers are protected from paying excessively for furniture or other items that are produced by the Prison Industries, and those individuals working in the private sector in competition with the Federal Government's paramount way, the competitive process.

To me, if the Federal Prison Industries can't be competitive in that setting, where it has had the luxury of the American way, the American way, the competitive process.

To me, that is the American way, the competitive process.

I hope that we will vote to retain in place section 806 and that, at least in the specific context of the Department of Defense, we will follow the lead that has already been laid out by Senator Levin in the authorization bill as it comes to the floor.

To me, that is a sensible course for us to pursue. It strikes the right balance. It by no means eliminates the work requirement for prisoners, but it does provide people who are law-abiding citizens, companies that are law-abiding companies, a chance to do business with the government in a very vocal and sensitive way, particularly that of national security. To me, that is a sensible middle ground. Therefore, I hope that our colleagues will vote in opposition to this amendment.

I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from Virginia.

Mr. WARNER. This is a matter which the Armed Services Committee considered with some care and considerable debate. It is not as if we just accepted it. There was discussion, and our former chairman spoke very strongly on behalf of the other side of the issue.

I am just astonished that we cannot seem to convince the prison group that competition would be good. It would raise the quality. That is what concerns so many of us on the committee.

It would provide incentives for the Federal Prison Industries to deliver quality goods in a timely fashion and at a competitive price. I believe that this whole country is predicated on.

This is interesting. The Department of the Air Force gets 2 million plus in launchers, guided-missile launchers,
fber optic cable assemblies. People think they are doing little, simple things, crafts and so forth, but there is a lot of high-tech equipment at the Department of Defense.

Here is the Army, another guided-missile remote control; the Army, launchers, rocket and pyrotech; the Army, fiber rope, cordage; the Army, radio and TV communications equipment; the Army, antennas, wave guides and related; the Army, fiber optic cable assemblies.

I mean, these are hardly simple matters. These are very complicated systems. We simply have to have quality for the Department of Defense. This is what concerns me.

I could go on into some of the Navy engine electrical systems, all kinds of high-tech stuff listed in here. You see the computer, furniture, the office supplies. Here is one for some armor. In other words, we are talking about serious business for the Department of Defense. It is very serious business. We cannot be giving the strong disadvantage to the private sector to compete with these systems. We simply have to have quality equipment. I strongly urge Senators to vote against this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, I have a unanimous consent request. I had the good fortune of having Senator BYRD, Senator HATCH and Senator THURMOND speak on behalf of my amendment, and those are riches you don't turn down. But there have been many points made that I have not had an opportunity to respond to. If the Senator is not going to use the rest of his time, I would like about 4 minutes to respond. I ask unanimous consent that I might have it.

The PRESIDING OFFICER. Is there objection?

Mr. LEVIN. Mr. President, I am sorry. I was discussing something with the chairman. I know that he is conscience of the time. I am wondering whether he might repeat the unanimous consent request so that we could both hear it.

Mr. GRAMM. I am sorry. I didn't hear.

Mr. LEVIN. I apologize. I was discussing something with the chairman. We didn't hear the unanimous consent request relative to time, at least I didn't.

Mr. GRAMM. I do not want to throw off the vote, but I made an opening statement. I had several other of my colleagues speak on behalf of my amendment more articulately than I was able to, and I am grateful, but I would like to have 4 minutes to sort of answer some of the points that have been made. It just turned out, because people that were for the amendment came to the floor, that they all spoke before any of those that were opposed to it had the opportunity to speak. So if it doesn't mess up our timetable, I would like to have 4 minutes to respond to some of the issues that have been raised.

Mr. WARNER. We certainly can accede to that. It is a perfectly reasonable request. I think my colleague and I will be just about ready to yield back the balance of our time. Then we will turn to the amendment by the distinguished Senator from Pennsylvania. The first order of business will be for him to amend the amendment that is at the desk. Then we will complete the debate on that, and we should meet the target of about 7:00 to have two stacked votes.

Mr. LEVIN. Reserving the right to object, how much time is left to the opponents of Senator GRAMM's amendment? The PRESIDING OFFICER. The opponents have 12 minutes 30 seconds. The proponents' time has been exhausted.

Mr. LEVIN. How many seconds?

The PRESIDING OFFICER. Thirty seconds. The Senator from Texas is recognized for 4 minutes.

Mr. GRAMM. Mr. President, first of all, let me make it clear, the Defense Department does not support this amendment. The Defense Department issued a joint report with the Department of Prisons, the Federal Bureau of Prisons, outlining ways of improving the system that required no legislation. The administration, on behalf of the Defense Department and the Department of Justice, opposes the Levin provision and supports the amendment that we have offered to strike it.

The Attorney General supports our motion to strike the Levin amendment, as do many groups such as the National Center for Victims of Crime. It is obviously a very strong argument with me to talk about, "why not competition?" The problem is, you have to understand the history that competition was the rule prior to the Depression. Prior to the Depression, virtually everyone in prison in America worked on average 12 hours a day, 6 days a week. But during the Depression, we passed three pieces of legislation, all of them driven by special interests, triggered by the Depression, which made it illegal for prisoners to work to sell goods in the market. There had been previous provisions so that they didn't glut the market in one area, but the problem is, now it is criminal for prisoners to work to produce anything to sell in America.

When my colleagues say why not have competition, my answer is, yes, let's have it. But you cannot have it without letting prison labor compete, and now that is prohibited all over America. The only thing left for prisoners today is to produce things that the Government uses. That is the only thing that we have not prohibited by law. As a result, we have 1.1 million prisoners and about 900,000 of them have no work to do.

If the amendment of Senator LEVIN passed, 60 percent of the prison labor at the Federal level in America would be eliminated because there would be no work for these people to do. So this is an argument about competition that sounds great until you understand that the Government, driven by the same groups that support this amendment, eliminated the ability to use prison labor to produce and sell anything.

When you are talking about the taxpayer, it sounds great. But what about the taxpayer that is spending $22,000 a year to keep somebody in prison and we are not allowing them to work? If taxpayers are working, why are they better than taxpayers? Why should the taxpayer have to work? Why can't we find things in the private sector for them to produce? If we can do that, I would support this amendment. I know that many of the people who support it would never do that.

The Defense Department is not for this amendment. They are not for the Levin amendment. They are not objecting to the provisions. In fact, they just put out a joint report saying the Defense Department supports the program with these reforms, which they can undertake without legislation.

And basically, I believe that this system is not perfect, but it is basically a good system where prices are negotiated and the Defense Department gets 90 percent of the waivers that they seek. If they don't think the quality is right or the price is right or the delivery is right, they can ask for a waiver. In 90 percent of the cases, they get the waiver.

This is basically an amendment. I am sorry to say, that would idle 60 percent of Federal prisoners. It would allow private companies to come in and take the business. But the point is, when we have full employment in America and we have a million prisoners idle, how can we say they have no work to do? The Defense Department is not for this amendment. Why seek it?
any kind of legislation for that to come about, but we do because under the current law and regulations, Federal Prison Industries has the sole, exclusive determining voice. If it says that its product is within a range in the market—maybe at the high end of that range, and they may be wrong—but once FPI says that, that is it; private business cannot compete.

In a hearing before the Senate Judiciary Committee earlier this week, the Deputy Under Secretary of Defense for Acquisition, David Oliver, described the results of the survey we referred to.

He said the following:

I think if you looked at the study, you would see that people were generally not satisfied with Federal Prison Industries as a provider. Essentially, with regard to efficiency, timeliness, and best value, they found that Federal Prison Industries was worse than the other people they bought from.

Now, we know that the administration has decided to oppose this change, to prohibit the private sector from bidding on things that Federal Prison Industries says it wants to supply exclusively. I want to understand what the Department of Defense's official position is. But I also understand what the testimony of their acquisition people is. The study shows that people were generally not satisfied with Federal Prison Industries as a provider with regard to efficiency, timeliness, and best value. They found that Federal Prison Industries was worse than the other people they bought from.

I don't believe for one minute that Federal Prison Industries is going to be able to sell anything to the Department of Defense just because they are going to have to compete. They have such a huge advantage in terms of cost and price of labor that they are going to be able to sell it at a huge amount. But they are going to have to compete. If a private company can outbid them or provide the same product at a cheaper price, then the private company is going to get it. But for the Senator from Texas to say, suddenly, that wipes out all of the sales to the Department of Defense, that is a terrible indictment about what Federal Prison Industries is now doing. That would mean they can't compete on anything they are selling to the Department of Defense. That is a huge exaggeration. It is not the case.

But it is the case that now they don't have to compete when they decide that the Department of Defense must buy that missile part. Senator WARNER referred to, that has to happen—even though a private contractor can sell a better quality at a better price, FPI, in its own judgment, says we can supply it within a price range of what the private sector can do, that is it, no competition. DOD can't bid it out—the opposite of what we should be doing in this free enterprise society of ours.

Mr. President, I have the language in the Senate bill will be retained and that the amendment of the Senator from Texas to strike that language will be defeated.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I join my colleague. Again, it was carefully considered by the committee. It has very fundamental objectives: competition, fairness, and to get quality. Mr. President, I am anxious to complete this amendment. I believe the Senator from Texas has finished his presentation?

Mr. GRAMM. Yes, I have.

Mr. LEVIN. I yield back our time.

Mr. WARNER. I yield back our time. The PRESIDING OFFICER. All time is yielded back.

AMENDMENT NO. 383

The PRESIDING OFFICER. The Senate returns to the amendment of the Senator from Pennsylvania. The Senator from Pennsylvania controls 5 minutes 30 seconds, and the Senator from Virginia controls 3 minutes 20 seconds.

Mr. WARNER. Mr. President, I note that will bring us very close, if not precisely, to the hour of 7 o'clock, at which time the managers represented to the leadership and other Senators that two back-to-back votes would commence.

The PRESIDING OFFICER. Who yields time?

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, this amendment provides, simply stated, that there shall be no funds expended for ground forces in Yugoslavia, except for peacekeeping personnel, unless authorized by a declaration of war or a joint resolution authorizing the use of military force.

(b) The prohibition in subsection (a) shall not apply to intelligence operations, or to missions to rescue United States military personnel, or citizens of the United States, or otherwise meet military emergencies, in the Federal Republic of Yugoslavia.

Mr. SPECTER. Mr. President, the main argument against this amendment has been that the President has said that he would come to Congress in advance of deploying ground troops. He made that commitment in a meeting at the White House on April 28. Then he sent a letter, which is substantially equivocal, saying that he will fully consult with the Congress, and that he would ask for congressional support before introducing U.S. ground forces into Kosovo, into a nonpermissive environment.

That doesn't go far enough.

The distinguished chairman has reported that the Secretary of Defense, the Secretary of State, and the Chairman of the Joint Chiefs of Staff have confirmed that there would be congressional authorization.

That doesn't go far enough.

We are a government of laws—not a government of men. And minds may be changed. We ought to be sure we have this nailed down.
This amendment is entirely consistent with what the Senate has here-tofore done to 41 to authorize air strikes but no ground forces. Seventy-seven Senators voted not to grant the President authority to use whatever force he chose. To remain consistent, those 77 Senators would have to say, we are not going to allow you to use ground forces unless you come to us for approval, just as we said we will not allow you to use whatever force you choose, in effect, without coming to us for prior approval. Consistency may be the hobgoblin of small minds, but consistency and the institutional prerogatives of the Congress and the Senate call for an affirmative vote, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

Mr. SPECTER. Mr. President, how much time remains for me?

The PRESIDING OFFICER. The Senator from Pennsylvania has 50 seconds.

Mr. SPECTER. I reserve the remainder of my time.

Mr. WARNER. Mr. President, the Senator from Michigan wishes to address the amendment. We are together on it in the strongest possible opposition.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, very briefly, this amendment would send the worst possible signal to Milosevic, which is don't worry, weather the storm—that even though there is going to be gridlock in Congress, you will be the beneficiary of any gridlock and any effort that authorizes in advance the use of ground forces. This is not the message which we should be sending to Milosevic—that he would be the beneficiary of the congressional gridlock, which would almost certainly occur before any such resolutions could be passed.

I hope we will not send that signal to Milosevic. I think our troops deserve better. Our commanders deserve better.

The administration believes so strongly in this that a veto would almost certainly occur. If this provision passes, if this provision is not changed, if this provision is not_gridlocked, the hands of our commanders in the field would be tied by this resolution. They would have to come to Congress to see whether or not the terms were met. That was not the way to fight either a war or to engage in combat.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. WARNER. Mr. President, in the course of the afternoon, as I said to my good friend and colleague, some 40 Senators have received the benefit of a full debate with the Secretaries of State and Defense, and the President's National Security Adviser, Mr. Berger, and with the Chairman of the Joint Chiefs. Three times—twice by this Senator, one by another Senator—this very issue was posed to the national security team. They said without any equivocation that the President would formally come to the Congress and seek legislation, not unlike what is described in this amendment prior to any change. In other words, the President of the United States is presently unchanged in the course of action that he is recommending to other leaders of the NATO nations, and the matter remains and will not be changed with respect to the use of ground troops unless the President comes up and seeks from the Congress of the United States formal legislative action.

I say to my good friend that I think we have achieved, in essence, what he seeks. As I pointed out in my first comment this morning and, indeed, in the title to the first amendment prior to the amending the Senator from Pennsylvania, he referred to the War Powers Act, this is precisely what this debate is—a debate over the War Powers Act. That debate has not in my 21 years in this body ever been resolved, and I doubt it is going to be resolved on this vote.

I yield the floor and yield back the time.

Mr. SPECTER. Mr. President, I reject the argument of the Senator from Virginia who wants to rely on assurances. This is a government of laws, and not men, and you get it done by this amendment.

I reject the argument of the Senator from Michigan who says it is a bad signal to Milosevic. Whatever signal goes to Milosevic from this amendment has already been sent by the assurances of the President.

It is a bad signal to America to tell the country that the Congress is delegating its authority to involve this Nation in war to the President. We don't have the authority to delegate our constitutional authority. Our job is to analyze the facts and let the President come to us to state a case for the use of ground forces, I am prepared to listen. But, on this record, we ought to maintain the institutional authority of Congress and uphold the Constitution.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, does any time remain on our side?

The PRESIDING OFFICER. Yes, 10 seconds.

Mr. LEVIN. Could I use the 10 seconds?

Mr. WARNER. The Senator from Michigan can use 5, and I will use 5. Take 5.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. Mr. President, the Department of Defense strongly opposes the amendment because it would unacceptably put at risk the lives of U.S. military personnel.

Mr. WARNER. Mr. President, a vote against this amendment is consistent with the provisions of the Constitution of the United States. I move to table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table amendment No. 383, as modified. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The result was announced—yeas 52, nays 48, as follows:

(Rollcall Vote No. 145 Leg.)

YEAS—52

Akaka  Harkin  McConnell  Mikulski  Moynihan
Bayh  Inouye  Kennedy  Mraz  Reed
Boxer  Kerry  Kohl  Robb  Rockefeller
Bryan  Kyl  Roth  Sarbanes  Schumer
Burns  Landrieu  Rohrabacher  Sessions  Shelby
Chafee  Lautenberg  Smith (OK)  Smith (OH)
Cochran  Leahy  Warner  Wyden

Mr. WARNER. Mr. President, a vote against this amendment is consistent with the provisions of the Constitution of the United States.

The motion was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote. The motion to lay on the table was agreed to.

VOTE ON AMENDMENT NO. 392

Mr. WARNER. Mr. President, we yield back time on both sides. The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment.

Mr. GRAMM. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 392. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.
The result was announced—yeas 49, nays 51, as follows:

[Roll Call Vote No. 146 Leg.]

YEAS—49

Ashcroft
Bennett
Biden
Boxer
Brownback

Enzi

The amendment (No. 392) was rejected.

Mr. GRAMM. Mr. President, I have a motion to reconsider. I enter a motion to reconsider the vote, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerks will call the roll to ascertain the presence of a quorum. The legislative assistant proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Virginia.

Mr. WARNER. Mr. President, to advise the Senate with regard to the important business remaining to be performed tonight, I ask unanimous consent that the Senate now proceed to an amendment to be offered by Senators McCAIN and LEVIN re: BRAC and that the Senate now proceed to an amendment to the BRAC amendment on Wednesday at 1:45 p.m. and no amendments be in order to the amendment prior to the 1:45 p.m. vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Now, Mr. President, in light of this agreement, there will be no reinstatement of a vote tonight. It is not the leader’s desire; I wish to make that clear.

Mr. GRAMM. My intention would be to try to have the reconsideration tomorrow.

Mr. WARNER. I thank the Senator.

Mr. LEVIN. Mr. President, I wonder whether or not we might be able to schedule an amendment earlier in the morning for Senator KERRY.

Mr. WARNER. We are working on that.

Mr. LEVIN. At 10:30; is that the effort?

Mr. WARNER. That is correct. Let me just finish this and then I think it will be clear.

Now, Mr. President, if I may continue, in light of this agreement, there will be no further votes this evening. Senators interested in the BRAC debate should remain this evening. The Senate will resume the DOD bill at 9:30 a.m. on Wednesday, and two amendments are expected to be offered prior to the 11:45 a.m. resumption of the BRAC debate. Therefore, at least one vote, if not more votes, will occur beginning at 1:45 p.m. on Wednesday.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. I wonder if I could inquire of the chairman as to the two amendments he is referring to.

Mr. WARNER. One under consideration is Senator BROWNBACK’s, and it relates to India and Pakistan and the current sanctions.

Mr. LEVIN. What was the other amendment?

Mr. WARNER. Senator ROBERT KERRY’s on strategic nuclear delivery systems.

Mr. LEVIN. And it is the hope of the chairman that both of those be debated in the morning?

Mr. WARNER. I would hope so, together with the remainder of BRAC.

Mr. LEVIN. I hope that during this evening we will be able to try to schedule time for those amendments, if possible.

Mr. WARNER. I would be happy to.

Mr. LEVIN. I do not know the status, particularly, of the first one, but I would like to work on that this evening.

Mr. WARNER. I yield the floor, Mr. President.

The PRESIDING OFFICER. Who seeks recognition?

AMENDMENT NO. 393

Mr. McCAIN. Mr. President, on behalf of Senator LEVIN, Senator BRYAN, Senator LEAHY, Senator KOHL, Senator LIEBERMAN, Senator ROBB, Senator KYL, Senator HAGEL, and Senator CHAFEE, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative assistant read as follows:
case of criteria published and transmitted under the preceding sentence in 2001” after “March 15, 1991”.

(3) DEPARTMENT OF DEFENSE RECOMMENDATIONS.—Subsection (c) of such section 2903 is amended—

(A) in paragraph (1), by striking “and March 1, 1995,” and inserting “March 1, 1995, and September 1, 2001,”

(B) by redesignating paragraphs (4), (5), and (6) as paragraphs (5), (6), and (7), respectively;

(C) by inserting after paragraph (3) the following paragraph (4):

“(4) In making recommendations to the Commission under this subsection in 2001, the Secretary shall consider any notice received from a local government in the vicinity of a military installation that the government would approve of the closure or realignment of the installation.

“(B) Notwithstanding the requirement in subparagraph (A), the Secretary shall make the recommendations referred to in that subparagraph based on the force-structure plan and final criteria otherwise applicable to such recommendations under this section.

“(C) The recommendations made by the Secretary by virtue of this subsection in 2001 shall include a statement of the result of the consideration of any notice described in subparagraph (A) that is received with respect to an installation covered by such recommendations. The statement shall set forth the reasons for the result.”; and

(D) in paragraph (7), as so redesignated:

(i) in the first sentence, by striking “para- graph (5)(B)” and inserting “paragraph (5)(B)”;

(ii) in the second sentence, by striking “24 hours and inserting “48 hours”.

(4) COMMISSION REVIEW AND RECOMMENDATIONS.—Subsection (d) of such section 2903 is amended—

(A) in paragraph (2)(A), by inserting “or by no later than February 1, 2002, in the case of recommendations in 2001,” after “pursuant to subsection (e)”;

(B) in paragraph (4), by inserting “or after February 1, 2002, in the case of recommendations in 2001,” after “under this subsection.”; and

(C) in paragraph (5)(B), by inserting “or by no later than October 15 in the case of such recommendations in 2001,” after “such recommendations.”

(5) REVIEW BY PRESIDENT.—Subsection (e) of such section 2903 is amended—

(A) in paragraph (1), by inserting “or by no later than February 15, 2002, in the case of recommendations in 2001,” after “pursuant to subsection (d)”;

(B) in the second sentence of paragraph (3), by inserting “or by no later than March 15, 2002, in the case of 2001,” after “the year concerned,”; and

(C) in paragraph (5), by inserting “or by April 1, 2002, in the case of recommendations in 2001,” after “under this part.”;

(c) CLOSURE AND REALIGNMENT OF INSTALLATIONS.—Section 2906(a) of that Act is amended—

(1) by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively; and

(2) inserting after paragraph (2) the following new paragraph (3):

“(3) carry out the privatization in place of a military installation recommended for closure or realignment by the Commission in a report in 2002 only if privatization in place is a method of closure or realignment of the installation specified in the recommendation of the Commission in that report and is determined to be the most cost effective method of implementation of the recommendation;”.

(d) RELATIONSHIP TO OTHER BASE CLOSURE ACTIVITIES.—Subsection (a) of that Act is amended by striking “December 31, 1996,” and inserting “September 30, 2002.”

(e) TECHNICAL AND CLARIFYING AMENDMENTS.—

(1) COMMENCEMENT OF PERIOD FOR NOTICE OF INTEREST IN PROPERTY FOR NON-MILITARY USE.-Section 2905(b)(7)(D)(i)(I) of that Act is amended by striking “that date” and inserting “the date of publication of such determination in a newspaper of general circulation in the communities in the vicinity of the installation under subparagraph (B)(i)(IV)”.

(2) OTHER CLARIFYING AMENDMENTS.—

(A) That Act is further amended by inserting “or realigned” after “closed” each place it appears in the following provisions:

(i) Section 2905(b)(3).

(ii) Section 2905(b)(4)(B)(ii).”

(iii) Section 2905(b)(5).

(iv) Section 2905(b)(7)(N).

(v) Section 2910(a)(2).

(B) That Act is further amended by inserting “or realigned” after “closed” each place it appears in the following provisions:

(i) Section 2905(b)(3).

(ii) Section 2905(b)(3)(D).

(iii) Section 2905(b)(3)(E).

(iv) Section 2905(b)(4)(A).

(v) Section 2905(b)(5)(A).

(vi) Section 3104(b).

(2) OTHER CLARIFYING AMENDMENTS.—

(A) That Act is further amended by inserting “or realigned” after “closed” each place it appears in the following provisions:

(i) Section 2905(b)(3).

(ii) Section 2905(b)(3)(D).

(iii) Section 2905(b)(3)(E).

(iv) Section 2905(b)(4)(A).

(v) Section 2905(b)(5)(A).

(vi) Section 3104(b).

(vii) Section 2910(a)(2).

(C) Section 2905(e)(1)(B) of that Act is amended by inserting “or realigned” after “closed”.

Mr. MCCAIN. Mr. President, this amendment authorizes a single round of U.S. military installation realignment and base closures to occur in the year 2001.

It is an argument and a debate that we have had several times in the past few years, but obviously the argument deserves to be ventilated again. I am reminded, in considering this amendment, of a point made by my old dear and beloved friend, Morris Udall, of my home State of Arizona, who once said after a long discussion of an issue that had been fairly well ventilated:

“Everything that could possibly be said on this issue has been said, only no one has said it.”

I think that, again, will be the case with this base closing amendment, because we have been around this track on several occasions. But I do have to credit the imagination and inventiveness of the opponents of the base closing round because they continue to invent new reasons to oppose a round of base closings. They are charming ideas. One of them you will probably hear is that base closings don’t save money.

That is a very interesting and entertaining one. I wish we had held to that argument after World War II was over, because we would still have some 150 bases in my State of Arizona, which I am sure would be a significant benefit to our economy.

Another aspect of this debate you will hear is that the issue of base closings has been politicized and, therefore, we can’t have one. I think my friend, the distinguished chairman, has come up with a new and entertaining argument that every time we go through a base closing, every town, city, and State goes through a very difficult period of time. I agree with him. I certainly agree with him as he will pose that argument. But that doesn’t in the slightest change the requirement that we need to close some bases.

I have to tell my friend, the chairman, it doesn’t ring true to stand and lament the state of the military, our declining readiness, our lack of modernization of the force, all of the evils, the recruitment problems, and the failure to fund much-needed programs, and then not support what is clearly most needed, according to the Chairman of the Joint Chiefs of Staff and according to the Secretary of Defense—and according, really, to every objective observer, the best equity establishment.

Why is it that it took us a month to get Apache helicopters from Germany to Albania? Why is it that we are now hearing if we decided tomorrow to prepare for ground troops—an idea which was soundly rejected by this body—but if finally the recognition came about that we are not really winning this conflict, that Mr. Milosevic is achieving all of his objectives, and we continue to hear great reports about how we have destroyed so much of their capability, yet, the ethnic cleansing is nearing completion and Mr. Milosevic has more troops now than less, why is it that it would take many, many weeks, if not months, to get a force in place in order to move into Kosovo to help right the atrocities that have been committed there? It is because we have not restructured our military establishment. It is that simple.

The military establishment in the cold war, very correctly, was structured for a massive tank war on the plains of Europe, the central plains of Europe. That was what our military was all about, and that was the major threat to our security. And now we have a military, which we have failed to restructure, we have failed to make mobile, we have failed to become capable to move anywhere in the world—in this case rather a short distance, from Germany to Albania—and, once there, decisively impact the battle equation. There are many reasons for this.

There was a great article in the Wall Street Journal a few weeks ago about how the Army had plans to restructure; yet, at the end of the day, they failed to do so for various reasons—by the way, the lesson being that the military will not restructure itself. It has to be done with an active role by the Congress.

But to sit here, as we are today, with all these shortages, where all of us are lamenting the incredible problems we have; yet, we then support a base structure which cannot be justified for any logical reason, is something that I
CONGRESSIONAL RECORD—SENATE  May 25, 1999

PARIS PRAISES BASE CLOSURES

As you are aware, the first three rounds of BRAC have already yielded $92 billion in net savings since FY 1999 and will generate more than $35 billion by year 2005. These savings have proven absolutely critical to sustaining ongoing operations and development and the life quality of our men and women in uniform. Even still, the General Accounting Office (GAO) points out that the Department of Defense continues to retain excess infrastructure, which we estimate at roughly 23 percent beyond our needs.

As you know, our military leaders have been aggressively reforming the Department’s business operations and support infrastructure to realize savings wherever possible. Nevertheless, no other reform even comes close to offering the potential savings afforded by even a single round of BRAC. There is simply no substitute for base closure and realignment.

The two additional rounds under consideration by the Committee will ultimately save $20 billion and generate $3.6 billion dollars annually. Both the Congressional Budget Office and the GAO confirm the reasonableness and credibility of our estimates for savings from BRAC. In exchange for property that we neither want nor need, we can direct $3.6 billion dollars into investments that give our troops a life-saving edge, into training that keeps our forces the finest in the world, and into the quality of life of military families.

I well appreciate both the difficult decision you and your colleagues now face, as well as the legitimate concerns of bases and communities potentially affected by additional base closures. At the same time, many success stories across the nation prove that base closure and realignment can actually lead to growth. In fact, the GAO recently noted that in most post-BRAC communities incomes are actually rising faster and unemployment rates are lower than the national average. Moreover, the Department continues to streamline the process, making it even easier for communities to dispose of base property and to create new jobs in the future.

The Department’s ability to properly support America’s men and women in uniform today and to sustain them into the future hinges on having a robust infrastructure and personnel. Simply stated, our military judgment is that further base closures are absolutely necessary.

Signed by all of the members of the Joint Chiefs of Staff

Mr. McCain. Mr. President, as I said at the beginning of my remarks, we have been over this many, many times. The annual net savings from previous BRAC rounds will grow from almost $4 billion this year to $5.67 billion per year by 2001. The savings are real. They are coming sooner and are greater than anticipated.

GAO recently noted that in most communities where bases were closed incomes are actually rising faster and unemployment rates are lower than the national average. Additionally, a provision in the bill allows for the no-cost transfer of property from the military to the community in areas that are affected by the closures.

Our Armed Services are carrying the burden of managing and paying for an estimated 23 percent of excess infrastructure that will cost $3.6 billion dollars. This year alone, $3.6 billion that could be spent in efforts to retrain our pilots who are getting out faster than we can train them. It could be spent on recruiting qualified men and women and on developing new skills, especially in the U.S. Navy. It could be spent on retaining the highly qualified men and women who are leaving the Armed Forces in droves. There are so many things we can do with the additional $3.6 billion. But it will probably not happen.

I want to tell my colleagues that occasionally we lose credibility around here because of some of the things we
Mr. President, I rise in support of this amendment that would authorize a single round of base closures during the year 2001. I commend both the Senator from Arizona and the Senator from Michigan for presenting this amendment to the Senate today.

I am well aware that we all recognize that this is a very sensitive issue, because it potentially impacts the constituents of each and every one of the Members of the Senate.

My home State of Rhode Island is no exception to this. We are the proud home to a significant presence of the U.S. Navy, both at the Naval War College and the Naval Undersea Warfare Center in Newport.

We have a tradition of Naval service in Rhode Island. As in every other State, we are sensitive to the potential vulnerabilities of another round of base closures. But I, for one, recognize the imperative nature of doing this, for many of the reasons that were so well outlined by the Senator from Arizona.

We have already in the past in Rhode Island—and I suspect in other places around the country—suffered from cutbacks. In fact, before the base closing process was established back in the early 1970s, one of our major bases, Quonset Point Air Station, was closed and, indeed, we lost effectively all of the surface ships that used to regularly be stationed in Newport. The result was traumatic to my home State.

Rhode Island is the smallest State in the country. Every family in Rhode Island either had some connection to the Navy or knew someone who worked there. Whole families had to leave the State. Many moved down to Wilmington, NC, where there was another naval aviation center. It caused great trauma and it set our economy back tremendously. In fact, we still are trying to reestablish and regenerate that site.

But despite all of that—despite the real costs to individuals, the real costs to families—we have to do this in order to maintain a national defense that will truly be efficient and effective.

It is difficult to talk about this issue and to tell constituents that there might be another round of base closings, but it is absolutely necessary. We are maintaining a cold war military structure in terms of bases. Yet, we know we need to reform and to reorganize. We will face new threats in the century beyond with a cold war military structure.

As the Senator from Arizona said, we organized so much of our military to support a huge landforce that was designed to counterattack a threat from the former Soviet Union. That threat has mercifully evaporated with the demise of the Soviet Union. The new threats to our national security are different. Yet, we still have the same cold war base infrastructure which we must reform, and the only practical way to do that is to organize another round of base closings.

It is a difficult decision, but it is a decision that we must make.

The numbers speak for themselves. This is almost a mathematical equation in terms of what we must do. We are maintaining approximately 23 percent extra capacity in the Department of Defense in terms of our bases. If you look at our force structure, the troops in the field, the men and women who are actually the war-fighters who defend the Nation every day, we have reduced those numbers by 36 percent since 1989. Yet, we have only been able to reduce our infrastructure by 21 percent. There is an imbalance. We have a smaller force structure. Yet we still have much of the old real estate that we accumulated from World War II all the way through the cold war.

We already embarked on limited base reductions in previous base closing rounds. We have saved approximately $3.9 billion to date. It is estimated that the base closing process that has already taken place will yield $25 billion by the year 2003.

Those are the significant savings. Yet, we hear lots of folks disputing the savings. I think everyone in America recognizes that when you close unnecessary bases, you save money. That is what corporate America has been doing now for the last 10 years. That is, in fact, one of the reasons why American productivity and American corporate profits are soaring and Wall Street is reflecting those results. It is because American businesses have the flexibility to close unwanted facilities, many times painfully so, to small communities.
But in the military establishment, we have denied our managers—the Secretary of Defense and the Chairman of the Joint Chiefs—and his colleagues—thatsame type of flexibility. We have done it in a way which has retarded our ability to save billions of dollars which we need for other priorities in the Department of Defense.

Another charge was raised in this discussion about why base closings shouldnt be pursued at this moment. It said that there is no effective audit of these savings. In many respects, what we have saved, if you will, are costs that would have been incurred. They are foregone. They wont be incurred. It is difficult to audit some things you wont spend money on, but those savings are equally real.

We have a situation where we know how is the fed money in previous base closing rounds—billions of dollars. And we know through estimates that we will save in this round additional money if we authorize an additional round of base closings. This is an estimate that has been agreed to by both the Congressional Budget Office and the General Accounting Office. They estimated there is excess capacity, that we can save money by another round of base closings.

There is another argument that has been raised to try to defeat the notion of a new round of base closings: That the environmental cleanup costs associated with closing bases eats up all the savings.

The reality, legally, is that the Department of Defense is responsible for these cleanup costs regardless of whether they keep the bases open or they close them. The only difference is an accounting difference. When you close more of an accelerated cleanup so the property can be turned over to civilian authority. In terms of the dollar responsibility, the contingent liabilities out there for cleanup of military bases remain the same, regardless of whether we have a base closing round or we just simply let these excess bases continue to operate. That, too, is not a reason to defeat the notion of a base closing round today.

As the Senator from Arizona pointed out, this is the top priority of the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, the Service Secretaries, the uniformed heads of our military services. They all know that they need additional dollars for higher priority items than some of these bases.

Last September, the Service Chiefs came to the Senate Armed Services Committee and said they needed more resources to do the job. We were quite forthcoming. In fact, we authorized $8.3 billion over the Presidents budget request. Yet, when they say they equally need the closing of excess bases, we ignore their plea—equally fervent, equally important, equally necessary for the success of the Department of Defense, yet we ignore this plea.

Some of this has been a result of claims that the last base closing round was politicized. This proposal is that the process be conducted in the year 2001, which is beyond the term of this administration. I think the argument of politicization is false because whatever confidence or lack of confidence you have in this current administration, this proposal, this amendment, would carry it beyond this administration into the next administration.

Mr. WARNER. Will the Senator yield?

Mr. REED. I am happy to yield to the Senator.

Mr. WARNER. That is the problem that troubles the Senator from Virginia. His state, California and Texas experiences. As I listened to my friend from Arizona, he made rational positions and I agree with him; the Senator from New Jersey made rational positions.

However, the practical thing that will happen if the Congress of the United States were to enact a base closure bill—that day the day after the signature is affixed by the President, the work begins in the Department of Defense down at the level of the services to work up the list of communities which, in the judgment of the Army, the Navy, the Air Force and certain DOD facilities is to be boarded up, and eventually it goes to the BRAC Commission.

True, the next President would appoint that BRAC Commission. But the staff work would have been done. The communities all across America, as my good friend from Arizona pointed out, the California and Texas experiences. If the Senator from Virginia pointed out, the California and Texas experiences. It is not just because of economic reasons and jobs. It is also, as the Senator well knows, because of the tradition in the community.

Does the Senator realize I was the Secretary of the Navy who closed the largest naval base and destroyer base in your State? Your predecessor, Senator Pastore, brought this humble public servant, the Secretary of the Navy, down to the caucus room of the Senate of the Russell Building before more cameras than I have ever seen and grilled me for hour after hour after hour, together with the Chief of Naval Operations. That convinced me that we had to have a process called BRAC.

I say with humility I was the co-author of the first BRAC statute, co-author of the second BRAC statute. Then I lost confidence in BRAC because of what the Senator just said— the politicization of the process as it related to decisions in California and Texas. If we were to pass this all over America, these communities would suddenly begin to wonder: Will politics play as the bureaucrats in the Department of Defense begin their assigned task, and do they go to the top and eventually to the BRAC Commission?

Mr. President, that is the problem. That is a problem shared by so many of our colleagues. That was the problem that was shared by the majority of our committee, the Armed Services Committee, on which we all serve with great pride. In two instances, that committee turned down the proposal which the Senators bring before the Senate tonight. That is the process.

Mr. MCCAIN. Will the Senator yield?

Mr. REED. I yield.

Mr. MCCAIN. If the Senator doesnt like the fact that it upsets the communities but believes that we need to compelling statements and letters. So if it is a new President that you want, there will be a new President.

If I get this right, what the distinguished chairman is saying is that we will just put everything on hold for a year or two until we get a new President, then we can start a process?

This amendment says there will be a new President, there will be a new Secretary of Defense. Obviously, the chairman doesnt trust or have confidence in the Secretary of Defense and the Chairman of the Joint Chiefs of Staff, both of whom sent over compelling statements and letters. So if it is a new President that you want, there will be a new President.

But that would be the moment that the bureaucracy begins to work up the list of the communities.

Mr. MCCAIN. May I just say with all due respect, if I may, the amendment calls for a base closing commission to be appointed in May of 2001. The election this place in November of the year 2000, as I seem to recollect; some 5 or 6 months later is when the commission is appointed.

The logic of the Senator from Virginia, in all due respect to my chairman, escapes me. There will be a new Secretary of Defense. Obviously, the chairman does not trust or have confidence in the Secretary of Defense and the Chairman of the Joint Chiefs of Staff, both of whom sent over compelling statements and letters. So if it is a new President that you want, there will be a new President.
First, I hope my good friend would amend it that the Secretary of Defense—perhaps he could stay on and I would join at that point; I have the highest confidence in the Secretary of Defense.

Mr. MCCAIN. The Senator has a strange way of displaying that confidence you don’t agree with his primary and most important recommendation.

Mr. WARNER. But, I say to my good friend, it is not the Secretary. The work begins literally down in the bowels of that building, in which I was privileged to remain for 5 1/2 years, down at the low level of the staff beginning to work up those lists. And that political problem that arose in California and Texas could begin to creep into those basement areas in the Pentagon, begin to influence those decisions which would gravitate to the top.

Mr. LEVIN. Will the Senator from Rhode Island yield?

Mr. REED. If I can retain my time.

Mr. McCAIN. In all due respect to my friend from Virginia, he knows where that California and Texas thing came from. It didn’t come from the bowels of the Pentagon; it came from the White House. That is why, as he knows, we are saying this Commission should only convene after there is a new President of the United States.

Mr. WARNER. I agree with that. That is precisely why I object, because that same White House could begin to communicate down with those good, honest, hard-working GS–14 employees of the Department of Defense. That is where it could start.

Mr. LEVIN. If the Senator will yield, the Senator from Virginia said how much confidence he has in the Secretary of Defense. Is the Senator suggesting that the Secretary of Defense is going to stand by while some political person from somewhere reaches around him into the bowels of the Pentagon to give a signal that some base should not be considered?

It is because our good friend from Virginia did not want there to be any possibility of any political involvement by anybody that we delayed the day for the Secretary of Defense to transmit the base closure recommendations to September 1, 2002.

The new President and the new Secretary of Defense—or the current one, if he is continued—will have until September 1 to transmit the base closure recommendation. We delayed it 6 months because the Senator, in committee, said he was concerned that the preliminary work could be done now and somehow or other, unbeknownst to an honest Secretary of Defense—who I think our good friend would concede is an honest one.

Mr. TAFTAFERI. Mr. President, I do.

Mr. LEVIN. This work would begin and somehow or other it would take hold.

So we delayed the transmission to September 1 of the year after the new President is elected. 6 months—more than that, 8 months after the new President is in office.

It seems to me at this point that the argument about politicization is now being used as an excuse not to act. We have done everything we possibly can to eliminate any possibility of that. The new President is not required to transmit names for a base closure commission. As the good Senator from Virginia knows, if the President does not want a base closing round, he or she need not have it. That is the law. All the new President has to do is not nominate anybody.

So you have total control in the new President. You have 9 months to submit the recommendations. At this point, the politicization argument, it seems to me—talking about reaching down? I think the good Senator, my good friend, Mr. McCAIN. Could I ask my friend from Virginia, would he agree to an amendment which had the base closing round begin in the year 2002?

Mr. WARNER. Mr. President, the answer is very simple: No. Because the moment the ink is dry and this becomes law—would the Senator not agree with me that the staff work begins on this the day it becomes law? The decisions begin to be made. The communities all across America go on full alert. The communities begin to hire expensive consultants to help them in the process, to prepare their case so that community is not struck. Am I not correct? Does any one of the three wish to dispute that the work begins at the bureaucratic level, by honest, conscientious individuals?

Mr. McCAIN. I ask my friend—

The PRESIDING OFFICER. The Chair reminds the Members of the Senate, the Senator from Rhode Island controls the time.

Mr. McCAIN. I ask unanimous consent that this colloquy and maybe, to make the sides even, the Senator from Maine would like to engage us as well.

Mr. WARNER. I would welcome the Senator from Maine. That resonant voice will reverberate through this Chamber with a reasonable approach to this.

Mr. LEVIN. May I suggest, if the Senator will yield, that the Senator needs the support and help of the Senator from Maine. But before that suggestion resonates through this Chamber, I will say just one other thing. Would the Senator accept an amendment that says no staff work can begin until January 2002? If we added that language in the bowels of the Pentagon, nobody—

Mr. WARNER. Or at any level.

Mr. McCAIN. There would be no movement.

Mr. LEVIN. I want the record to be clear, that comment came from the prime sponsor of this legislation.

That there would not be a computer keyboard touched in the bowels or any base in the Pentagon prior to January 21 of next year—will the Senator accept that amendment?

Mr. WARNER. Mr. President, in the course of the deliberation in the Armed Services Committee I came up with a phrase. I said there was no way to write into law the word "trust." Therefore, my answer to my good friend is: No.

The PRESIDING OFFICER. The Senator from Rhode Island controls the time.

Mr. REED. Briefly, because I know my colleagues are eager to continue in colloquy, but in response to the chairmen, most of what I think was the initiative, if you will, involved in the last base closing, came after the particular bases were identified by the Commission. It was not a question where political decisions were made to close bases. I think, rather, political decisions were made to try and go around the work of the Commission. So the Commission is, I think we would all agree, as unpolitical as you can get. The research in the bowels of the Pentagon is, I think, similarly nonpolitical. If it is not then, we have more worries than a base closing commission, if we have GS–14s doing political deeds for anyone rather than looking rationally and logically at the needs of the service and the infrastructure to support those needs.

If the administration was guilty of politicization, then shame on them. But we are running the risk of our, ourselves, politicizing this process. We are running the risk of rejecting the logic.

The overwhelming conclusion I think any rational person could draw is that if we have to start closing bases, the base closing mechanism is the best way to do that, and we are in a situation where, if we resist this, if we cannot find a formulation, we are going to politicize it worse than anything that is purported to have been done by the administration.

I strongly support the measure offered by the Senator from Arizona and the Senator from Michigan. We have an opportunity to align our force structure and our base structure to give resources to the Defense Department, to support the really pressing needs of our troops, to retain them, to train them, to provide them a quality of life they deserve.

When you go out to visit troops—I know everyone here on this floor today does that frequently—what those young troops are worried about is: Do they have the best training, best equipment, and are their families well taken care of? They do not worry about where we have a base in Oregon or a base in Texas or a base in Rhode Island. They worry about their training, their readiness for the mission, their weapons, and whether their families...
are taken care of. If we listen to them, we will support this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. McCAY. Mr. President, I thank the Senator from Rhode Island for the very strong and, I think, thoughtful statement that is a much valued member of the committee. I appreciate his efforts in this area.

I do not like to belabor my old and dear friend, the former Secretary of the Navy and chairman of the committee. Our respect and friendship is mutual. It has been there for many, many years.

Mr. WARNER. Mr. President, if I may say, it will be there for an eternity.

Mr. McCain. I thank my friend from Virginia.

I do have to mention one other aspect of this issue that is important, and then I know the Senator from Maine has been patiently waiting.

We do have a credibility problem here. We are asking these young people to do something of them right now are in harm’s way. We ask them to spend time in the middle of the desert and the middle of Bosnia under very difficult, sometimes nearly intolerable conditions. We have an Air Force that is half the size of what it was at the time of Desert Storm, and it has four times the commitments. We simply do not have a military that we can sustain under the present conditions.

If we are not willing to make a sacrifice of the possibility of a base closure in our home State, how in the world can we ask these young people to risk their lives? This is an issue of credibility. If we are going to make the kind of changes necessary to restructure there are going to have to be some very tough decisions made. Base-closing is just one of them. But if we cannot even make a decision to have a base-closing commission, on the recommendation of every expert inside and outside the defense establishment of the United States of America, then I do not think we have any credibility in other decisions that the committee or the Senate will make.

I realize that bases are at risk. I realize there can be economic dislocation. I recommend and I recognize all those aspects of a base-closing commission. But for us to tell these young men and women, whom we are asking to sacrifice and take risks, that we will not take the political risk of approving the bases of the base closing commission that would convene under the tenure of the next President of the United States under the most fair and objective process that we know how to shape, then, Mr. President, we deserve neither our credibility with them nor their trust.

I yield the floor.

The PRESIDING OFFICER (Mr. Smith of New Hampshire). The Senator from Maine is recognized.

Ms. Snowe. Mr. President, I rise in opposition to the amendment that has been offered by Senator McCain and Senator Levin concerning the establishment of another base-closing commission in the year 2001.

It is not a matter of when it is established. It is not a matter by whom it is appointed. I think the question is whether or not the Department of Defense and this administration has answered the questions that have been raised on time and time again in the committee and on the floor of this Senate with respect to a number of issues that justify having another base-closing round. Having been involved in the four previous rounds, I can tell you it raises a number of issues with respect to the efficiency and the effectiveness of base closings.

We are seeing already with our commitment in Kosovo the defense department cannot continue to decide which installations to downsize or close by making arbitrary comparisons to personnel reductions. Just since the hostilities began in March, we have seen the Pentagon divert a carrier battle group to the Adriatic leaving the western Pacific without a carrier for the first time in decades.

It has contributed more than 400 aircraft to the NATO campaign against Yugoslavia.

It has nearly depleted the Nation’s air-launched precision missile stocks, exhausted our tanker fleet, and called up 33,000 reservists.

Now we have a situation where we are conducting a campaign regarding Kosovo and it has been revealed that the air and sea bridges required to “swing” forces into one major theater war to support a second conflict makes the latter engagement too high because of the operational strains on personnel, weapons, and maintenance schedules. Yet, the Pentagon persists with the position that we must close more bases. But who is really making these assumptions about the volatile and complex nature of warfare as we approach the 21st century?

The standard the administration is putting forth is personnel reductions; that closing 36 percent of our bases is absolutely essential. If 36 percent of all our people have left the military since the peak of the cold war. But the standard must remain if we are to be truly honest about what kinds of assumptions and determinations we must make. We should be making a decision of adapting our infrastructure to the mix of security threats that we anticipated into the 21st century. I do not think that we have to project that far out to recognize what we can expect for the types of conflicts that we will be facing in the future.

As it did last year and in 1997, the administration rests its argument for more base closings primarily on the claim that facility cuts have lagged behind personnel reductions by more than 15 percent. I do not happen to think that the Pentagon planners thought that the Nation’s two simultaneous conflicts would likely occur in Asia and the Persian Gulf.

What depots can provide competition for the private sector?

What shipyards can provide the Navy with a diversified industrial base to sustain the next generation of submarines that will maneuver in our waters?

What airbases must stay active to support long-range power projection capabilities we now have with the diminished forward presence overseas?

What configuration of domestic bases does the country require to project a smaller force over long distances that we now lack because we have a diminished presence in Asia and Europe?

This fact means at a minimum the country has to stabilize a number of domestic facilities to prepare forces once deployed abroad for long-range projections from this country. How has DOD calculated the vulnerability of political uncertainties of gaining access to our Middle Eastern military assets in the event of another regional crisis?

These are the unanswered questions. These are the questions that need answers, not some isolated percentages that should determine the size and the shape of our basing network. These are the questions that we must answer.

We have discrepancies in the numbers that have been provided to us by the Department of Defense. We do not have the assessments. We do not have the matching infrastructure to the security threat. We have not made a determination with respect to the assets, and even the national defense plan indicated in its own report that it was necessary to make that determination based on a report. In fact, the panel said it strongly urges Congress and the Department to look at these issues.

They talked about if there is going to be a next round, it might be preceded by an independent, comprehensive inventory of all facilities and installations located in the United States. This review would provide the basis for a long-term installation master plan that aligns infrastructure assets with future military requirements and provides a framework for investment and reuse strategies.

We raised this issue time and time again in the committee and in the Senate over the last 2 years to those individuals who are pronouncing this amendment and raising the fact that
May 25, 1999

CONGRESSIONAL RECORD—SENATE

10751

we should have another base closing round. Yet, how can we make those decisions and on what basis are we making them? Are these decisions based on an arithmetic calculation, or is there another way? Are these decisions arbitrary determinations? Are they going to be politicized?

I know people argue: Oh, this is a de-politicized process in the Base Closing Commission procedure. I argue to the contrary. Having been through this procedure on four different occasions since 1988, I can tell you we just moved politics from one venue to another.

I think we have to very carefully consider whether or not we want to initiate another base closing round for the future. absent the kinds of decisions and determinations that need to be made in order to make a reasonable decision.

Even in the Department’s own report in April of 1998, it exposed the apparent base closure savings as a frustrating mystery rather than a confirmed fact. To its credit, the Department actually admitted in its own study that there was no audit trail for tracking the end use of the savings generated through the BRAC process. They admitted in their own report that they did not have a procedure for determining the actual savings that they projected from the base closing rounds and how they were used, so that we could not correlate the savings and whether or not they were used for any purpose or, in fact, were there any savings.

So now the Department of Defense has said: Yes, there are savings from the four previous base closing rounds; and, yes, we are using them for readiness and modernization; and that is what we will do in the future. But they never established a process that we could document those savings that ostensibly occurred in the four previous rounds, and that they were invested in modernization and in the readiness accounts. The fact is, it never happened.

The General Accounting Office, in fact, recommended, in their 1997 report, and, in fact, documented what the DOD report said, that there is no process by which to track the savings which the Department of Defense claims occurred as a result of the base closings over the last 10 years. So we have no way of knowing if, in fact, we have realized real savings.

The Department claims that over the last four rounds there were savings of $21 billion, $22 billion. Yet, in their 1999 report, they admitted that the cost of closing bases was $22.5 billion. Their savings, in their 1999 report, from the four previous rounds is $21 billion. So they have $1.5 billion more than the estimated savings through 2015. So that is what we are talking about here. The Department of Defense is spending more to close these bases than they are actually saving. They have had more costs as a result of environmental remediation. In fact, they project to spend $3 billion more.

They said they would realize $3 billion from the first base closing round, to give you an example, from the sale of the property to the private sector, when in fact they only realized $65 million. That gives you an idea of the discrepancy that has occurred from their projected savings to the actual revenue that was realized through their sale process.

So that is the problem we have. We have been given promises by the Department of Defense that we will have the savings, and yet these savings have not really materialized. So we do not have a picture of what we need for the future in terms of domestic bases because we have closed so many abroad as well as at home.

Because we do not have the presence in other countries, it is all the more important that we have the necessary domestic bases to do the kinds of things we have to do, as we have seen in Kosovo.

It is interesting that back in 1991, when we went through a base closing round, we had Loring Air Force Base up in northern Maine. It was a B-52 base. We were told at the time B-52s were going to go out. They were old. They were aging. They were going to be rapidly removed from the defense program.

What are we seeing? B-52s are being used in Kosovo. No, we do not have the base in northern Maine that is closest to Europe, to the Middle East, to the former Soviet Union, to Africa. We are having to launch those B-52s from other bases that are not as close as Europe. So that is the problem we are seeing, because of the miscalculations and the underestimation of what we might need for the future. It has not been the kind of documentation that I happen to think is necessary.

In fact, it was interesting to hear—when talking about B-52s—what a former Air Force Secretary said a few weeks ago, that the current crises are proving the enormous value of the Nation’s long-range bomber force of B-52s. That is what it is all about.

So what we were told in 1991: No; they are going to be out of commission because they are simply too old, we find is not the case.

So I think we have to be very circumspect about how we want to proceed. That is why I think we have to be reticent about initiating any base closing process for the future until we get the kinds of answers that are necessary to justify proceeding with any additional base closing rounds.

We have had the miscalculations of the costs in the Balkans. In fact, that is why there is such great pressure within the Pentagon to try to find additional monies to make up for the cost of the four previous base closing rounds, because of the basis of what we have currently from the Pentagon, they cannot suggest in any way that they have
made any savings. If anything, it has cost them more money.

Then when you look at what we are facing in Kosovo, what we can project in the future for additional asymmetric threats, we may want to be very careful about closing down any more bases in this country without knowing whether or not they are going to be necessary for the future, because once you lose that infrastructure, it is very difficult to recoup.

So I hope the Senate will reject this amendment.

I yield the floor.

POSITION ON LANDRIEU-SPECTER AMENDMENT
NO. 384

Mr. FEINGOLD. Mr. President, had I been present for the vote on the Landrieu-Specter amendment No. 384 to the FY 2000 Defense Authorization, S. 1009, bill regarding the need for vigorous prosecution of war crimes and crimes against humanity in the former Yugoslavia, I would have voted in favor of the amendment. My vote would not have changed the outcome of the vote on the amendment which passed by a vote of 90–0.

I was unable to reach the Capitol in time for the vote because of air travel delays due to weather conditions. I am disappointed that, though I and other Members notified the Senate leadership about our travel difficulties hours before the vote began, they were unwilling to reschedule the time of the vote.

AVAILABILITY OF CLASSIFIED ANNEX

Mr. SHELBY. Mr. President, I ask unanimous consent to have printed in the RECORD a letter to the Honorable Trent Lott dated May 17, 1999, signed by myself and Senator Kerrey.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. Trent Lott,
U.S. Senate, Washington, DC.

Dear Senator: The Select Committee on Intelligence has reported a bill (S. 1009) authorizing appropriations for U.S. intelligence activities for fiscal year 2000. The Committee cannot disclose the details of its budgetary recommendations in its public report (Senate Report 106-2), because our intelligence activities are classified. The Committee has prepared, however, a classified annex to the report which describes the full scope and intent of the Committee’s actions.

In accordance with the provisions of Section 8(c)(2) of Senate Resolution 400 of the 94th Congress, the classified annex is available to any member of the Senate and can be reviewed in room SH-311. If you wish to do so, please have your staff contact the Committee’s Director of Security, Mr. James Wolfe, at 224-1753 to arrange a time for such review.

Sincerely,

Richard C. Shelby,
Chairman.
J. Robert Kerrey,
Vice Chairman.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Monday, May 24, 1999, the federal debt stood at $5,597,942,875,397.10 (Five trillion, five hundred ninety-seven billion, nine hundred forty-two million, eight hundred seventy-five thousand, three hundred ninety-seven dollars and ten cents).

Five years ago, May 24, 1994, the federal debt stood at $4,591,881,000,000 (Four trillion, five hundred ninety-one billion, eight hundred eighty-one million).

Ten years ago, May 24, 1989, the federal debt stood at $2,781,133,000,000 (Two trillion, seven hundred eighty-one billion, one hundred thirty-three million).

Fifteen years ago, May 24, 1984, the federal debt stood at $1,505,563,000,000 (One trillion, four hundred fifty-six billion, one hundred thirty-three million).

Twenty-five years ago, May 24, 1974, the federal debt stood at $471,902,000,000 (Four hundred seventy-one billion, nine hundred twenty-six billion, forty million).

Mr. BIDEN. Mr. President, I want to take this opportunity today to salute a distinguished servant of the legislative branch of the U.S. Congress in the field of foreign affairs. In June 1999, Dr. Robert Sutter will leave the Congressional Research Service after 22 highly productive years as a source of expertise on China and the Asia-Pacific region.

Dr. Sutter is resigning from his current position as a Senior Specialist in Asia and International Politics in the Foreign Affairs, Defense, and Trade Division of CRS to become the National Intelligence Officer for East Asia, a critical intelligence community assignment.

Since 1977, when he first came to work at CRS as a China specialist, Dr. Sutter has provided Members of Congress and their staffs with authoritative, in-depth analysis and policy options covering a broad range of foreign policy issues involving China, East Asia, and the Pacific. It should be a source of pride to this body to know that Dr. Sutter is well known both here and in the Asia-Pacific region as one of the most authoritative and productive American Asia hands.

HONORING ROBERT SUTTER

Mr. BIDEN. Mr. President, I want to take this opportunity today to salute a distinguished servant of the legislative branch of the U.S. Congress in the field of foreign affairs. In June 1999, Dr. Robert Sutter will leave the Congressional Research Service after 22 highly productive years as a source of expertise on China and the Asia-Pacific region.

Dr. Sutter is resigning from his current position as a Senior Specialist in Asia and International Politics in the Foreign Affairs, Defense, and Trade Division of CRS to become the National Intelligence Officer for East Asia, a critical intelligence community assignment.

Since 1977, when he first came to work at CRS as a China specialist, Dr. Sutter has provided Members of Congress and their staffs with authoritative, in-depth analysis and policy options covering a broad range of foreign policy issues involving China, East Asia, and the Pacific. It should be a source of pride to this body to know that Dr. Sutter is well known both here and in the Asia-Pacific region as one of the most authoritative and productive American Asia hands.

In his government career to date of over 30 years, Dr. Sutter has held a variety of analytical and supervisory positions including service with the Foreign Broadcast Information Service and temporary details with the Senate Foreign Relations Committee, the Central Intelligence Agency, and the Department of State. It is in service to Congress, however, specifically with the Congressional Research Service, that Dr. Sutter has spent most of his distinguished career. I want to make a few comments that illustrate the strengths and great contributions of both the institution and the man himself.

The first point to make concerns one of the great institutional strengths that CRS offers to the congressional clients it serves, and one in which Dr. Sutter’s tenure and contributions here epitomize perfectly: institutional memory. Dr. Sutter’s first published report at CRS was entitled U.S.-PRC Normalization Arguments and Alternatives. Published first as a CRS Report for Congress, on August 3, 1977, it soon became a Committee Print of the House International Relations Committee’s Subcommittee on Asian and Pacific Affairs. The report and subsequent Committee Print addressed a number of highly controversial issues arising out of President Carter’s decision to normalize relations with China. Congressional concern about the consequences of derecognition of the Republic of China, and dissatisfaction with the terms of the agreement negotiated with the People’s Republic of China, directly led to the landmark Taiwan Relations Act, which still governs our policy decisions today, and which continues in 1999 to be a factor in debates in this very chamber.

Besides Bob Sutter, only 48 Members of Congress serving today, in the 106th Congress, were here in 1977 and 1978 to witness these initial steps of U.S.-China relations. In the more than 20 years since then, both U.S.-China relations and the U.S. Congress itself have undergone tremendous change, both for the better and for worse. Bob Sutter has been an active participant in congressional deliberations on China policy, and in the U.S. national debate over these issues, from normalization of relations, to the Tiananmen Square crackdown, to the recent tragic bombing of the Chinese Embassy in Belgrade. Dr. Sutter’s two decades of service spanned the tenures for four U.S. presidents and some ten Congresses. Despite several shifts of party control in the Senate, and one in the House, Dr. Sutter continued to deliver timely, accurate, objective, and non-partisan analysis. The institutional memory represented by CRS analysts, which Dr. Sutter so perfectly exemplifies, is of incalculable value to the work of the Congress.
The second point I want to make concerns Dr. Sutter himself. He has, for one thing, consistently demonstrated an ability and a capacity for sheer output of written work—productive analysts in CRS. In the last 5 years alone, Dr. Sutter has been called on for advice from Members of Congress and their staffs nearly 6,000 times—an average of 1,140 times each year. He has regularly served on special advisory groups in CRS and the U.S. private and official community of Asian analysts and scholars.

Even more to the point, Dr. Sutter has always understood the powers and special needs of Congress, including its legislative and oversight responsibilities, and our obligation to represent the interests of our constituents. In his research and writing, Dr. Sutter never forgets the unique role of Congress and the importance of reflecting the full range of competing viewpoints.

Reflecting his commitment to service and cheerful willingness to assume responsibility, Dr. Sutter has fulfilled a number of roles in the CRS. He has served as Chief of the Foreign Affairs Division in CRS, as well as Chief of the Governance Division, in which cases maintaining a full research work load for Congress in the midst of significant management duties. He has frequently conceived, coordinated, and moderated Asia policy seminars and workshops, and has dealt with Members of Congress and their staffs. He routinely serves on special advisory groups in CRS and the Library of Congress. As a well-known and respected analyst, he has been a sought-after speaker at dozens of foreign policy seminars, panels, and conferences in Washington and around the world.

In recent years, he has maintained this outstanding record of productivity for the Congress while managing in his spare time to teach several college courses per year at Washington area universities. He has also found time to write more than a dozen books on foreign policy issues during his tenure at CRS.

Finally, Dr. Sutter’s simple decency, modesty, engaging manner, and professionalism set a high standard for others and make it a great pleasure to work with him. He cheerfully volunteers for onerous tasks. He is pleasant and good-humored. Moreover, in the midst of the public activity of Washington and Capitol Hill, he has always found time to serve as a mentor, counselor, and friend to others, whether they be his own students, younger colleagues, or new congressional staff.

And, a fact known only to close friends is, he has a record of community service, including Church work and teaching of English to native Spanish speakers, that is nearly as impressive as his professional contribution.

Dr. Sutter will be greatly missed, but the loss of his service to the Congress will be partly compensated for by bringing to the Executive branch his knowledge of the Congress and its special role in the making and oversight of U.S. foreign policy.

I been able to return to vote, I would vote on the amendment.

Mr. LIEBERMAN. Mr. President, I wanted to indicate to the Senate why I was unavoidably absent, as was recorded in yesterday’s RECORD, at the time of the vote on amendment 394 to S. 1059. I was in Connecticut yesterday. Because of serious thunderstorm and wind conditions my flight from Connecticut to Washington was delayed for several hours, causing me to miss the vote on the amendment.

As yesterday’s RECORD indicates, had I been able to return to vote, I would have voted for the amendment, which passed 90 to 0.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–3255. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Accidental Release Prevention Requirements: Risk Management Programs Under Clean Air Act Section 112(r); Amendments to the Worst-Case Release Scenario Analysis for Flammable Substances (FRL# 6348–2)”, received May 18, 1999; to the Committee on Environment and Public Works.

EC–3255. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Accidental Release Prevention Requirements: Risk Management Programs Under Clean Air Act Section 112(r); Amendments to the Worst-Case Release Scenario Analysis for Flammable Substances (FRL# 6348–2)”, received May 18, 1999; to the Committee on Environment and Public Works.

EC–3255. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Accidental Release Prevention Requirements: Risk Management Programs Under Clean Air Act Section 112(r); Amendments to the Worst-Case Release Scenario Analysis for Flammable Substances (FRL# 6348–2)”, received May 18, 1999; to the Committee on Environment and Public Works.

EC-327. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, transmitting, pursuant to law, the report of a rule entitled “Approval and Promulgation of Implementation Plans; State of New Mexico; and County of Bernalillo; New Mexico; State Boards (FRL # 6350–1)”, received May 24, 1999; to the Committee on Environment and Public Works.

EC-328. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Approval and Promulgation of Implementation Plans; State of Missouri (FRL # 6350–3)”, received May 24, 1999; to the Committee on Environment and Public Works.

EC-329. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Approval and Promulgation of Implementation Plans; State of Vermont (FRL # 6350–4)”, received May 24, 1999; to the Committee on Environment and Public Works.

EC-336. A communication from the Program Support Specialist, Aircraft Certification Service, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: McDonnell Douglas Model DC–10 and KC–10 (Military) Airplanes; Dock-
of a rule entitled “Approval and Promulgation of Air Quality Implementation Plans; Wisconsin (FRL # 6336–3)”, received May 24, 1999, to the Committee on Environment and Public Works.

EC–3288. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Approval and Promulgation of Air Quality Implementation Plans; Kentucky; Revised Format for Materials Being Incorporated by Reference (FRL # 6345–3)”, received May 24, 1999, to the Committee on Environment and Public Works.

EC–3289. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Approval and Promulgation of Air Quality Implementation Plans; Wisconsin (FRL # 6336–3)”, received May 24, 1999, to the Committee on Environment and Public Works.

EC–3290. A communication from the Director, Office of Regulatory Management and Information, Office of Policy, Planning and Evaluation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Finding of Failure to Submit Required State Implementation Plans for Ontario Nonattainment Area (FRL # 6349–3)”, received May 24, 1999, to the Committee on Environment and Public Works.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–134. A concurrent resolution adopted by the Legislature of the State of Arizona relative to Medicare reimbursement rates; to the Committee on Finance.

SENATE CONCURRENT MEMORIAL 1001

Whereas, access to affordable health care services has been greatly reduced for Medicare health maintenance organization recipients in thirty states due to cutbacks in Medicare reimbursement by the federal government; and

Whereas, because of recent changes by the federal government, the Medicare reimbursement rates in rural areas are lower than those in urban areas. This results in HMOs reimbursing physicians at the lower rates, which in turn causes the physician networks to disintegrate and many HMOs to stop offering service in those areas; and

Whereas, although health insurance will remain available to seniors in rural areas through traditional Medicare coverage, the cutbacks will significantly restrict their options for health care coverage, the number of services covered and the affordability of those services in general; and

Whereas, two major HMOs have withdrawn service altogether in six rural Arizona counties. This leaves thousands of elderly individuals with only one or two HMOs from which to choose; and

Whereas, individuals who previously were covered under HMOs may have received greater benefits not covered by Medicare, including additional services and lower copayments that offered seniors thorough and comprehensive services at levels that many will be left with the more expensive Medicare system as their primary health insurance option, low-income and disabled seniors may be forced to pay more out-of-pocket; and others may be forced to forego receiving these services because they are unable to afford the higher payments; and

Whereas, the financial and health problems that many rural seniors around the country are likely to face as a result of the Medicare reimbursement cuts are directly attributable to the Medicare reimbursement rates differential between rural and urban areas.

Wherefore your memorialist, the Senate of the State of Arizona, concurring, prays:

1. That the Congress of the United States take steps to address the problem of the Medicare reimbursement rates differential between urban and rural areas and attempt to establish a reimbursement system that will result in more equitable health care coverage for seniors in rural areas of the country.

2. That the Secretary of State of the State of Arizona transmit a copy of this Memorial to the Congress of the United States, the Speaker of the United States House of Representatives, and to each Member of Congress from the State of Arizona.

POM–135. A concurrent resolution adopted by the Legislature of the State of Arizona relative to the 2000 census; to the Committee on Governmental Affairs, the Senate concurring, prays:

Whereas, the Constitution of the United States requires an enumeration of the population every ten years and entrusts the Congress with overseeing all aspects of each decennial census; and

Whereas, the sole constitutional purpose of the decennial census is to apportion the seats in Congress among the several states; and

Whereas, an accurate and legal decennial census is necessary to properly apportion the United States House seats among the fifty states and to create legislative districts within the states; and

Whereas, the United States and legal decennial census is necessary to enable states to comply with the constitutional mandate of drawing state legislative districts within the states; and

Whereas, to ensure an accurate count and to minimize the potential for political manipulation, article I, section 2 of the United States Constitution mandates an “actual enumeration” of the population, which requires a physical head count of the population and prohibits statistical sampling to enumerate the population and bar the use of statistical procedures to adjust census numbers that have been determined in whole or in part by the use of random sampling techniques or other statistical methodologies that add or subtract persons to or from the census counts based solely on statistical inference; and

Whereas, consistent with these principles, new census data should be made to obtain the fullest and most accurate possible count of the population, including appropriate funding for state and local census outreach and education as well as provisions for post-census local review; and

Whereas, the members of the Forty-fourth Legislature oppose census numbers for state legislative redistricting that have been determined in whole or in part by the use of random sampling techniques of other statistical methodologies that add or subtract persons to or from the census counts based solely on statistical inference.

Wherefore your memorialist, the House of Representatives of the State of Arizona, the Senate concurring, prays:

1. That the United States Bureau of the Census conduct the 2000 census consistent with the United States Supreme Court’s ruling and establishing constitutional and legal mandates, which require a physical head count of the population and bar the use of statistical sampling to create or in any way adjust the count.

2. That Public Law 94–171 data not be used for state legislative redistricting if it is based on census numbers that have been determined in whole or in part by the use of statistical inferences derived by means of random sampling techniques or other statistical methodologies that add or subtract persons to or from the census counts; and

3. That it receive Public Law 94–171 data for legislative redistricting that is identical to the census tabulation data used to apportion the seats in the United States House consistent with the United States Supreme Court ruling and constitutional mandate that require a physical head count of the population and bar the use of statistical sampling to create or in any way adjust the count.

Whereas, the Congress of the United States, as the branch of government assigned with the responsibility of overseeing the decennial census, take any steps necessary to ensure that the 2000 census is conducted fairly and legally.

5. That the Secretary of the State of Arizona transmit a copy of this Memorial to the Congress of the United States, the Speaker of the United States House of Representatives, the President of the United States Senate, the Director of the United States Census Bureau, and each Member of Congress.
Resolved by the Legislature of the State of Ar-

1. That the policy of the State of Arizona, its governor and the legislature is to pre-
serve and protect our way of life, our herita-
ges and our important economic and economic base of the rural areas of this state.

2. That the endangered species act must be modi-
fied to: (a) Recognize, protect and con-
serve human interests at the same time and on the same priority level as environmental interests. (b) Provide for a more flexible and accommodating administration and enforce-
ment system, based on sound scientific anal-

Whereas, the industries that depend on
harvesting, extracting or otherwise using
natural resources are particularly endan-
gered by massive reductions in federal grazing al-
locations, and enforcement of the endangered species act provides for no consid-
eration or accommodation of human activi-
ties, requirements or interests; and

Whereas, the United States fish and wild-
life service of the department of the interior has shown little regard or willingness to
make administrative adjustments to accom-
modate human activities, requirements or interests in administering and enforcing the
endangered species act; and

Whereas, much of the enforcement pursu-
ant to the endangered species act is based on dubious scientific research and outcome-orien-
ted analysis; and

Whereas, the Arizona game and fish de-
partment has recommended against the list-
ing of several species of animals as threat-
ened or endangered based on sound biological information, but have a rec-
ognition ignored by the United States
fish and wildlife service and the secretary of
the interior; and

Whereas, the endangered species act allows the courts discretion in imposing the re-
quirements of the act over all human activity
that may remotely affect the species; and

Whereas, the result of the implementation
and enforcement of the endangered species act is to threaten and endanger the economy and way of life throughout the west, and
the western counties of the state in particular;

Whereas, harvesting trees for timber and
pulp wood is threatened throughout the western states and has been all but elimi-
nated in Arizona, except on Indian reserva-
tions, thereby eliminating much needed rural employment and causing a dangerous buildup of wildfire fuel; and

Whereas, livestock ranching is endangered by
massive reductions in federal grazing al-
locations leaving ranches and ranch families near bankruptcy with no option but that of
selling their private land for development
thereby losing the traditional responsible stewardship for the land and other resources; and

Whereas, the mining industry is endan-
ergized to the brink of extinction and the loss of quality employment for thousands of mine
workers an unacceptable loss to the economi-
component of the economy of the state of
Arizona and other western states; and

Whereas, certain single issue special inter-
est groups are able to abuse the endangered
species act to achieve their narrow personal agenda by litigating against productive econo-
ic activities, as well as hunting, fishing and other activities, all to the detriment of our heritage, our culture and our society; therefore be it

Resolved by the Legislature of West Vir-
ingia: the United States Air Force to the

tional funding to complete the Coalfields Ex-
pressway from the Highway Trust Fund; there-
fore, be it

Resolved by the Legislature of West Virginia: that the members of the West Virginia
delegation to the United States Congress are hereby authorized to use all possible efforts to
support and assist the incorporation of the Coalfields Expressway into the Appa-
lachian Development Highway System; and, be it

Further Resolved, That the Clerk of the House of Delegates is hereby directed to for-
ward a copy of this resolution to all mem-
bers of the West Virginia delegation to the
United States Congress, to the Clerk of the United States House of Representatives, to
the Clerk of the United States Senate and to
the Executive Director of the Coalfields Ex-
pressway.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STEVENS, from the Committee on Appropriations: Special Report entitled “Re-
vised Allocation to Subcommittees of Budg-
et Totals for Fiscal Year 2000” (Rept. No. 106-52).

By Mr. STEVENS, from the Committee on Appropriations, without amendment:

S. 1122: A original bill making appropri-
ations for the Department of Defense for the fiscal year ending September 30, 2000, and for other purposes (Rept. No. 106-52).

By Mr. STEVENS, from the Committee on Appropriations, with amendments and an
amendment to the title:

H.R. 1864: A bill making emergency supple-
mental appropriations for military opera-
tions, refugee relief, and humanitarian as-
sistance relating to the conflict in Kosovo,
and for military operations in Southwest
Asia for the fiscal year ending September 30, 1999, and for other purposes.

EXECUTIVE REPORTS OF A COMMITTEE

The following executive reports of a committee were submitted:

By Mr. WARNER, for the Committee on Armed Services:

Ikram U. Khan, of Nevada, to be a Member
of the Board of Regents of the Uniformed
Services University of the Health Sciences
for a term expiring May 1, 1999.

Ikram U. Khan, of Nevada, to be a Member
of the Board of Regents of the Uniformed
Services University of the Health Sciences
for a term expiring May 1, 2005. (Reappoint-
ment)

(The above nominations were re-
ported with the recommendation that
they be confirmed, subject to the nomi-
nees’ commitment to respond to re-
quests to appear and testify before any duly constituted committee of the Sen-
ate.)

IN THE AIR FORCE

The following named officer for appoint-
ment in the United States Air Force to the
grade indicated while assigned to a position of
importance and responsibility under title
16, U.S.C., section 601:

To be lieutenant general
Maj. Gen. Paul V. Hester, 2071

Rear Adm. (lh) Clifford J. Starek, 3517

Mr. WARNER. Mr. President, for the Committee on Armed Services, I also report favorably nomination lists which were printed in full in the RECORDS of March 18, 1999 and May 12, 1999, at the end of the Senate proceedings, and ask unanimous consent, to save the expense of reprinting on the Executive Calendar that the nominations lie at the Secretary's desk for the information of Senators.

In the Navy nomination of Don A. Fraser, which was received by the Senate and appeared in the Congressional Record of March 16, 1999.

In the Air Force nomination of Donna R. Shu, which was received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Army nomination of Timothy P. Edinger, which was received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Army nominations beginning Joseph B. Hines, and ending * Peter J. Mollkin, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Army nominations beginning Robert B. Howanie, James H. Mills, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Army nominations beginning Robert B. Howanie, James H. Mills, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Navy nominations beginning Paul B. Little, Jr., and ending John M. Shepherd, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Marine Corps nominations beginning Dale A. Crabtree, Jr., and ending Kevin P. Toomey, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Marine Corps nominations beginning James C. Andrus, and ending Philip A. Wilson, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Navy nomination of Norberto G. Jimenez, which was received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Navy nominations beginning Neil R. Bourassa, and ending Steven D. Tate, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

In the Navy nominations beginning Basilio D. Bena, and ending Harold T. Workman, which nominations were received by the Senate and appeared in the Congressional Record of May 12, 1999.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

BY MR. ASHCROFT:
S. 1113. A bill to amend title XXIV of the Revised Statutes, relating to civil rights, to prohibit discrimination against governmental organizations and certain individuals on the basis of religion in the distribution of government funds to provide government assistance and the distribution of the assistance, to allow the organizations to accept the funds to provide the assistance to the individuals without impairing the religious character of the organizations or the religious freedom of the individuals, and for other purposes; to the Committee on Governmental Affairs.

BY MR. ENZI:
S. 1114. A bill to amend the Federal Mine Safety and Health Act of 1977 to establish a more cooperative and effective method for rulemaking that takes into account the special needs and concerns of smaller miners; to the Committee on Health, Education, Labor, and Pensions.

BY MR. SPECTER:
S. 1115. A bill to require the Secretary of Veterans Affairs to establish a national cemetery for veterans in the Pittsburgh, Pennsylvania, area; to the Committee on Veterans Affairs.

BY MR. NICKLES:
S. 1116. A bill to amend the Internal Revenue Code of 1986 to exclude income from the transportation of oil and gas by pipeline from subpart F income; to the Committee on Finance.

BY MR. LOTT (for himself, Mr. COCHRAN, Mr. ROHR, and Mr. JEFFORDS):
S. 1117. A bill to establish the Corinth Unit of Shiloh National Military Park. In the vicinity of the city of Corinth, Mississippi, and in the State of Tennessee, and for other purposes; to the Committee on Energy and Natural Resources.

BY MR. SCHUMER (for himself, Mrs. FEINSTEIN, Mr. CHAFEE, Mr. GREGG, Mr. SANTORUM, and Mr. MONTGOMERY):
S. 1118. A bill to amend the Agricultural Market Transition Act to convert the price support program for sugarcane and sugar beets into a system of solely recourse loans to provide the gradual elimination of the program; to the Committee on Agriculture, Nutrition, and Forestry.

BY MR. BREAUX:
S. 1119. A bill to amend the Act of August 9, 1950, to continue funding of the Coastal Wetlands Planning, Protection and Restoration Act; to the Committee on Environment and Public Works.

BY MR. TERRICHELLI (for himself, Mr. REED, Mr. LUTTENBERG, Mr. BRYAN, and Mr. LUTTENBERG):
Mrs. BOXER, Mrs. FEINSTEIN, Mr. DODD, Mr. ROCKEFELLER, Mr. BIDEN, Mr. SCHUMER, Mrs. MURRAY, Mr. DURBIN, and Mr. KERRY:

S. 1120 A bill to ensure that children enrolled in medicaid and other Federal means-tested programs at highest risk for lead poisoning are identified and treated, and for other purposes; to the committee on Finance.

Mr. LEAHY:

S. 1121. A bill to amend the Clayton Act to enhance the authority of the Attorney General to prevent mergers and acquisitions that would unreasonably limit competition; to the committee on the Judiciary.

By Mr. STEVENS:

S. 1122. An original bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2000, and for other purposes; from the Committee on Appropriations; placed on the calendar.

By Ms. COLLINS (for herself, Mr. FRIST, Mr. ABRAHAM, Ms. SNOWE, Mr. Jeffords, and Mr. COVERDALE):

S. 1123. An original bill of the Federal Food, Drug, and Cosmetic Act to improve the safety of imported food, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SMITH of New Hampshire (for himself, Mr. FRIST, Mr. BOND, Ms. LANDREIUK, Mr. ROBB, Mr. HAGEL, Mr. Breaux, Mr. TERRICELLI, Mr. HELMS, Mr. INHOFE, Mr. DURBIN, and Mr. EDWARDS):

S. J. Res. 25. A joint resolution expressing the sense of Congress with respect to the court-martial conviction of the late Rear Admiral Charles Butler McVay, III, and calling upon the President to award a Presidential Unit Citation to the final crew of the U.S.S. Indianapolis; to the Committee on Armed Services.

By Mr. SMITH of New Hampshire (for himself, Mr. FRIST, Mr. BOND, Ms. LANDREIUK, Mr. ROBB, Mr. HAGEL, Mr. Breaux, Mr. TERRICELLI, Mr. HELMS, Mr. INHOFE, Mr. DURBIN, and Mr. EDWARDS):

S. J. Res. 26. A joint resolution expressing the sense of Congress with respect to the court-martial conviction of the late Rear Admiral Charles Butler McVay, III, and calling upon the President to award a Presidential Unit Citation to the final crew of the U.S.S. Indianapolis; read the first time.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SPECTER:

S. Con. Res. 34. A concurrent resolution relating to the observance of “In Memory” Day; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ASHCROFT:

S. 1113. A bill to amend title XXIV of the Revised Statutes, relating to civil rights, to prohibit discrimination against faith-based organizations and certain individuals on the basis of religion in the distribution of government funds to provide government assistance and the distribution of the assistance, to allow the organizations to accept the funds to provide the assistance to the individuals without impairing the religious character of the organizations or the religious freedom of the individuals, and for other purposes; to the Committee on Governmental Affairs.

CHARITABLE CHOICE EXPANSION ACT OF 1999

Mr. ASHCROFT. Mr. President, America’s best ideas for helping the poor have come from grassroots communities and private organizations of people who know and care about their neighbors. These groups see people and their life experiences, not theories or statistics. We have known for years that government solutions have failed miserably in moving people from dependency and despair to responsibility and independence. For years America’s churches and charities have been leading the way in helping the poor achieve dignity and self-sufficiency. This is why I have been advocating that government should find ways to help these organizations unleash the cultural remedy our society so desperately needs.

Therefore, it was with great interest that I heard about Vice President Gore’s statement Monday in Atlanta expressing his support for Charitable Choice. The Vice President’s interest in Charitable Choice is welcome news. Governor Bush is in the forefront of Charitable Choice solutions. Truly, where one sees crisis and division, and the other sees compromise and debate, there now is swelling bipartisan agreement on the promise of Charitable Choice.

Congress has been in the forefront of encouraging the type of faith-based solutions that the Vice President was promoting yesterday in Atlanta. The 1996 welfare reform law contains the Charitable Choice provision I authored, which encourages states to partner with the faith-based community to serve welfare recipients with federal dollars.

Last fall, we expanded Charitable Choice to cover services provided under the Community Services Block Grant program, which provides funds to local agencies to alleviate poverty in their communities. And just last week, the Senate approved a juvenile justice bill containing Charitable Choice for services provided to at-risk juveniles, such as counseling for troubled youth.

The Charitable Choice provision in the 1996 welfare reform law was one way to achieve the goal of inviting the greater participation of charitable and faith-based organizations in providing services to the poor. The provision allows charitable and faith-based organizations to compete for contracts and voucher programs on an equal basis with all other non-governmental providers when the state or local government chooses to use private sector providers for delivering welfare services to the poor under the Temporary Assistance for Needy Families (TANF) program.

In the past three years, we have begun to hear about how Charitable Choice is opening doors for the government and citizens of faith to work together to help our nation’s poor and needy gain hope and self-sufficiency. For example, shortly after passage of the federal welfare law, Governor George Bush of Texas signed an executive order directing all pertinent executive branch agencies to take all necessary steps to implement the ‘charitable choice’ provision of the federal welfare law.” Cookman United Methodist Church, a 100 member parish in Philadelphia, received a state contract to run its “Transitional Journey Ministry,” which provides life and job skills to welfare mothers and places them into jobs with benefits. In less than a year, the church placed 22 welfare recipients into jobs. Payne Memorial Church of a Baltimore church, has helped over 450 welfare recipients find jobs under a state contract.

In light of these success stories around the nation, more and more states and counties are beginning to see what a critical role the faith-based community can play in helping people move off of welfare. They are eager to put the Charitable Choice concept into action in their communities.

We have always known that Charitable Choice is truly bipartisan in nature, and has the support of over 35 organizations that span a wide political and social spectrum. Members from both sides of the aisle here in the Senate have voted in support of this provision. And now, with the Vice President’s support for Charitable Choice, I am reintroducing legislation that I introduced in the 105th Congress, the “Charitable Choice Expansion Act,” which would expand the Charitable Choice concept across all federally funded service programs.

The substance of the Charitable Choice Expansion Act is virtually identical to that of the original Charitable Choice provision of the welfare reform law. The only real difference between the two provisions is that the new bill covers many more federal programs than the original provision.

While the original Charitable Choice provision applies mainly to the new welfare reform block grant program, the Charitable Choice Expansion Act applies to all federal government programs in which the government is authorized to use nongovernmental organizations to provide federally funded services to beneficiaries. Some of the programs that would be covered under this legislation include housing, substance abuse prevention and treatment, seniors services, the Social Services Block Grant, adoption education and child welfare services.

With this recent expression of bipartisan support for Charitable Choice from the Vice President, now is the...
time for Congress to move quickly to pass the Charitable Choice Expansion Act, so that we can empower those organi-
izations that are best equipped to in-
still hope and transform lives to ex-
 pand their good work across the na-
 tion.

Mr. President, I ask unanimous con-
 sent that the bill be printed in the RE-
 CORD.

There being no objection, the bill was
 ordered to be printed in the RECORD, as
 follows:

S. 1113
Be it enacted by the Senate and House of Repre-
 sentatives of the United States of America in
 Congress assembled,

SECTION 1. PROVISION OF ASSISTANCE UNDER
GOVERNMENT PROGRAMS BY RELI-
GIOUS ORGANIZATIONS.

Title XXIV of the Revised Statutes is ame-
 nded by inserting after section 1990 (42
 U.S.C. 1994) the following: "SEC.
 24. CHARITABLE CHOICE.
 "(a) SHORT TITLE.—This section may be
cited as the 'Charitable Choice Expansion Act of 1999.'

"(b) PURPOSE.—The purposes of this sec-
tion are—

"(1) to prohibit discrimination against
nongovernmental organizations and certain
individuals on the basis of religion in the dis-
tribution of government funds to provide
 government assistance and distribution of the
assistance, under government programs described in subsection (c) and

"(2) to allow the organizations to accept
the funds to provide the assistance to the in-
dividuals without impairing the religious char-
acters of the organizations or the reli-
gious freedom of the individuals.

"(c) RELIGIOUS ORGANIZATIONS INCLUDED AS
NGOVERNMENTAL PROVIDERS.—For any pro-
gram carried out by the Federal Govern-
ment, or by a State or local government with Federal funds, in which the Federal, State, or local government is authorized to use nongovernmental organizations, through contracts, grants, certificates, vouchers, or other forms of disbursement, to provide as-
sistance to beneficiaries under the program, the government shall consider, in the same basis as other nongovernmental organiza-
tions, religious organizations to provide the assistance under the program, so long as the program is implemented in a manner con-
sistent with the Establishment Clause of the first amendment to the Constitution. Nei-
 ther the Federal Government nor a State or
local government receiving funds under such program shall discriminate against an organi-
 zation that provides assistance under, or applies to provide assistance under, such pro-
 gram, on the basis that the organization has a religious character.

"(d) EXCLUSIONS.—As used in subsection
(c), the term 'program' does not include activ-
cities carried out under—

"(1) Federal programs providing education
to children eligible to attend elementary schools or secondary schools, as defined in section 1401 of the Elementary and Sec-
 ondary Education Act of 1965 (20 U.S.C. 7901)
(except for activities to assist students in ob-
taining the recognized equivalents of sec-
 ondary education);

"(2) the Higher Education Act of 1965 (20
U.S.C. 1001 et seq.);

"(3) the Head Start Act (42 U.S.C. 9831 et seq.);

"(d) Child Care and Development Block
Grant Act of 1990 (42 U.S.C. 9838 et seq.).

"(e) RELIGIOUS CHARACTER AND INDEPEND-
ENCE.—

"(1) IN GENERAL.—A religious organization
that provides assistance under a program de-
scribed in subsection (c) shall retain its inde-
pendence from Federal, State, and local gov-
ernments, including such organization's con-
 trol over the definition, development, prac-
tice, and expression of its religious beliefs.

"(2) ADDITIONAL SAFEGUARDS.—Neither the Federal
Government nor a State or local
 government shall require a religious organi-
 zation—

"(A) to alter its form of internal govern-
ance;

"(B) to remove religious art, icons, script-
ture, or other symbols;

"(C) to alter its financial practices and
require that its employees providing assist-
ance under such program adhere to the reli-
gious character of the organization.

"(f) EMPLOYMENT PRACTICES.—

"(1) TENETS AND TEACHINGS.—A religious
organization that provides assistance under a
 program described in subsection (c) may
 require that its employees providing assist-
 ance under such program adhere to the reli-
gious beliefs and practices of the organi-
 zation, and such organization may require that those employees adhere to rules forbidding the use of drugs or alcohol.

"(2) EMPLOYMENT PRACTICES.—The exemption
of a religious organization provided under section 702 or 706 of (2) the Civil Rights Act of 1964 (42 U.S.C. 2000e-1, 2000e-2) regard-
ing employment practices shall not be af-
 fected by the religious organization's provi-
sion of assistance under, or receipt of funds
from, a program described in subsection (c).

"(g) RIGHTS OF BENEFICIARIES OF ASSIST-
ANCE.—

"(1) IN GENERAL.—If an individual de-
described in paragraph (3) has an objection
from which he or she would have been
eligible for such assistance) within a
reasonable period of time after the date of
such objection, the organization shall

"(A) is from an alternative organization that is accessible to the individual; and

"(B) has a value that is not less than the value of the assistance that the individual would have received from such organization.

"(2) NOTICE.—The appropriate Federal,
State, or local governmental entity shall en-
sure that notice is provided to individuals described in paragraph (3) of the rights of such individuals under this section.

"(3) INDIVIDUAL DESCRIBED.—An individual
described in this paragraph is an individual
who receives or applies for assistance under a
program described in subsection (c).

"(b) NONDISCRIMINATION AGAINST BENEFI-
CIARIES.—

"(1) GRANTS AND CONTRACTS.—A religious
organization providing assistance through
a grant or contract under a program described in subsection (c) shall not discriminate, in carrying out the program, against an indi-
 vidual described in subsection (g)(3) on the
basis of religion, a religious belief, a refusal to hold a religious belief, or refusal to ac-
tively participate in a religious practice.

"(2) INDIRECT FORMS OF DISBURSEMENT.—A religious
organization providing assistance through a grant or contract or other form of indirect disbursement under a program de-
described in subsection (c) shall not deny an in-
dividual described in subsection (g)(3) admis-
sion into such program on the basis of reli-
gion, a religious belief, or a refusal to hold a religious belief.
that this rule prohibits small operators from supplying miners with personal protective equipment, such as ear plugs. After buying the equipment, operators have tried to lower the noise level by buying new and "quieter" machines at incredible cost, tinkering with old machines, rotating employees around to different stations, and implementing all other "feasible" engineering and administrative controls. All this despite the fact that many routinely-used machines can never be made to run as quietly as MSHA mandates no matter how much money is spent, and that miners will have to be rotated outside their areas of training and expertise.

This proposed rule is in strict opposition to both MSHA's and OSHA's current rules which allow miners to wear ear plugs in the first instance. It also totally abandons logic. It's like proposing a rule outlawing employees from using steel-toed shoes and instead regulating that nothing may ever fall on a worker's foot. It just doesn't make any sense.

By disregarding this rule with small operators early in the rulemaking process, cooperative approaches could have been flushed out and solutions achieved which satisfy both MSHA's regulatory objectives and minimize the burden on small operators. As evidenced by this proposed rule, it is clearly insufficient to have a one time "comment period" or even hold public hearings, because the small operator's perspective is so noticeably absent from the rulemaking process. It is not enough to claim that safety is paramount while simultaneously operating in a vacuum to pump out regulations that no one can understand or implement. Compliance must be based on an effective working relationship where the goals set by the regulation are understood and achievable by the industry being regulated. If operators are responsible for complying with MSHA's regulations, then there is no excuse for failing to include them in the process from Day One. By passing the "Small Mine" bill, operators and MSHA would be responsible for working together to craft rules that will actually improve safety.

Mr. President, I ask unanimous consent that the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

SEC. 2. PURPOSE. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE. This Act may be cited as the "Small Mine Advocacy Review Panel Act".

SEC. 3. AMENDMENT TO FEDERAL MINE SAFETY AND HEALTH ACT OF 1977

(a) IN GENERAL.—Section 101(a)(2) of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 811(a)(2)) is amended by inserting before the last sentence the following: "The procedures for gathering comments from small entities as described in section 609 of title 5, United States Code, shall apply under this section and small mine operators shall be considered to be small entities for purposes of such section. For purposes of the preceding sentence, the term 'small mine operator' has the meaning given the term 'small business concern' under section 3 of the Small Business Act (including any rules promulgated by the Small Business Administration as such term relates to a mining operation)."

(b) CONFORMING AMENDMENT.—Section 609(d) of title 5, United States Code, is amended by striking "Agency and" and inserting "Agency, the Mine Safety and Health Administration and".

By Mr. SPECTER.

S. 1115. A bill to require the Secretary of Veterans Affairs to establish a national cemetery for veterans in the Pittsburgh, Pennsylvania, area; to the Committee on Veterans' Affairs.

NATIONAL CEMETARY IN WESTERN PENNSYLVANIA

Mr. SPECTER. Mr. President, today I introduce legislation which will direct the Secretary of Veterans Affairs (VA) to establish a national cemetery in the Pittsburgh area of Western Pennsylvania.

As chairman of the Committee on Veterans' affairs, I make it my responsibility to see that our nation's veterans are cared for after serving honorably in the Armed Forces. Part of this care involves honoring the memory of their service upon death. Our nation's veterans are an aging population. At present, 46% of the veteran population is over age 65. The General Accounting Office (GAO) has estimated that by the year 2008, the number of veterans' deaths will peak and remain at a high level for years afterward. To anticipate the increased demand for burial space and to accommodate family and friends wanting nearby cemeteries at which to honor and remember their loved ones, the Congress and VA must act now.

The legislation that I introduce today will alleviate the long overdue wait for a national cemetery which the veterans in the western Pennsylvania area have had to endure. Such a cemetery is necessary due to the over 750,000 veterans who reside in the area, including veterans in the neighboring states of Ohio, Maryland, and West Virginia. I should also point out that Pennsylvania, a state with the fifth highest veteran population in the country, has only one national cemetery within its borders, open for new burials. This cemetery, at Indiantown Gap, serves veterans in the eastern portion of the Commonwealth and is more than 225 miles from Pittsburgh.

May 25, 1999

10760
In 1987, VA ranked the Pittsburgh-area among the top ten population centers in need of a national cemetery. In 1988, VA began the process of cemetery site-selection and Congress appropriated $250,000 for an Environmental Impact Statement. Four potential sites were identified in the Pittsburgh area. Despite this headway, construction on a national cemetery never commenced.

The high veteran population of this region has waited far too long to see the creation of this national cemetery. Our nation’s veterans, having given so much for us, deserve a proper burial site in the proximity of their homes. Veterans elsewhere around this country take for granted the availability of a nearby national cemetery. If passed, this legislation will ensure that what began over a decade ago will now become reality.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTABLISHMENT.

(a) In General.—The Secretary of Veterans Affairs shall establish, in accordance with chapter 24 of title 38, United States Code, a national cemetery in the Pittsburgh, Pennsylvania, area to serve the needs of veterans and their families.

(b) Consultation in Selection of Site.—Before selecting the site for the national cemetery established under subsection (a), the Secretary shall consult with appropriate officials of the State of Pennsylvania and local officials of the Pittsburgh, Pennsylvania area.

(c) Report.—As soon as practicable after the date of the establishment of this act, the Secretary shall submit to Congress a report on the establishment of the national cemetery under subsection (a). The report shall set forth a schedule for the establishment of the cemetery and an estimate of the costs associated with the establishment of the cemetery.

By Mr. NICKLES:

S. 1116. A bill to amend the Internal Revenue Code of 1986 to exclude income from the transportation of oil and gas by pipeline from subpart F income, to the Committee on Finance.

THE FOREIGN PIPELINE TRANSPORTATION INCOME ACT

Mr. NICKLES. Mr. President, I rise today to introduce legislation which will right a wrong that has been in the tax code for too long. This legislation will clarify the U.S. tax treatment of foreign pipeline transportation income. This legislation is needed because current tax law causes active foreign pipeline transportation income to be unintentionally trapped within the anti-abuse tax rules of Subpart F. These anti-abuse rules were originally established to prevent companies from avoiding payment of U.S. tax on easily movable and passive income. Pipeline transportation income, however, is neither passive nor easily movable. Pipes are located where the natural resources and energy needs are—there cannot be placed just anywhere. Further, one a pipe is in the ground, it is tough to move.

Referring to the legislative history, we find that Congress did not intend these anti-abuse rules to target foreign pipeline transportation income. Rather, these rules were intended to reach the significant revenues derived by highly profitable oil related activities that were sourced to a low-tax country as opposed to the country in which the oil or gas was extracted or ultimately consumed. Furthermore, it is important to note that when these anti-abuse rules were considered and then put into place, pipeline companies were not engaged in international development activities, rather they were focused solely on domestic infrastructure development.

Today, pipeline companies are continuing to actively pursue all development opportunities domestically, yet they are somewhat limited. The real growth for U.S. pipeline companies, however, is in the international arena. These new opportunities have arisen from fairly recent efforts by foreign countries to privatize their energy sectors.

Enabling U.S. pipeline companies to engage in energy infrastructure projects abroad will result in tremendous benefits back home. For example, more U.S. employees will be needed to craft and close deals, to build the plants and pipelines, and to operate the facilities. New investment overseas also will bring new demands for U.S. equipment. Yet before any of these benefits can be realized, U.S. companies must be able to defeat their foreign competitors and win projects. Unfortunately, current U.S. tax laws significantly hinder the ability of U.S. companies to win such projects.

We must act now if we are to ensure that U.S. companies remain competitive players in the international marketplace. There are incremental, low cost, reforms that we can and must make. My legislation—to clarify that U.S. tax treatment of foreign pipeline transportation income—is one such low-cost reform.

I urge my colleagues to join me in this effort to bring current U.S. tax law in line with good tax policy. It is up to us to do all we can to keep America competitive in the global economy.

By Mr. LOTT (for himself, Mr. COCHRAN, Mr. ROBB, and Mr. PAXTON):

S. 1117. A bill to establish the Corinth Unit of Shiloh National Military Park, in the vicinity of the city of Corinth, Mississippi, and in the State of Tennessee, and for other purposes; to the Committee on Energy and Natural Resources.

CORINTH BATTLEFIELD PRESERVATION ACT OF 1999

Mr. LOTT. Mr. President, 137 years ago today, Major General Henry W. Halleck and his 120,000 man strong Union Army commenced the siege of Corinth, Mississippi. Throughout the six month battle between General Halleck’s federal troops and General P. G. T. Beauregard’s 53,000 Confederate defenders marked a turning point in the war between the states. It was a fierce engagement over a mere 16 square feet parcel. This small piece of real estate was of critical strategic importance to both the North and the South.

It was in Corinth, Mississippi that historic sites and important roads and railroads crossed paths. This vital east-west and north-south railroad junction served as a passageway for troops and supplies moving from Illinois to Alabama and from Tennessee to points further east such as South Carolina and Virginia.

Ed Bearss, Chief Historian Emeritus of the National Park Service, stated that “during the Spring of 1862, Corinth was the most important city in the Confederacy and almost the length of the War, because of the railroads.” In fact, because of its status as a vital rail hub, the town was occupied by either Confederate or Union forces from 1861 to 1865. It also served as a springboard for the careers of over 200 leading Confederate and Federal generals who were stationed in Corinth at one time or another. A figure matched by few other locations.

Corinth is a city that exemplifies the trials and tribulations experienced by soldiers and civilians throughout the Civil War. A town whose rail lines lay at the center of a grand military chess match. An area, like many others north and south of the Mason-Dixon line, racked by the ravages of war.

Even with its new status as a National Historic Landmark, Corinth is still considered a “Civil War Landmark At Risk.” The Civil War Sites Advisory Commission, chartered by Congress to assess threats to America’s premier historic sites, identified Corinth as a priority one battlefield in critical need of coordinated nationwide action by the year 2000. Local, state, and national preservation groups agree. And, so do I.

Mr. President, today, I am proud and honored to introduce the Corinth Battlefield Preservation Act of 1999. This much needed legislation would provide further protection for one of America’s most important Civil War sites by establishing the Corinth Unit of the Shiloh National Military Park.

The 106th Congress needs to add the Corinth Battlefield and its surrounding sites to the National Park System
given the area’s pivotal role in American history. It is also appropriate for Congress to designate Corinth as a unit of the Shiloh National Military Park. As these two sites were indelibly linked during the Civil War. The 1862 battle of Shiloh was actually the first strike in the Union forces’ overall Corinth Campaign. It was in April 1862, that federal and southern forces competing for control over Corinth first struggled in the Battle of Shiloh/Pittsburg Landing. The battle for Corinth also had international implications. As a result of the Union’s victory, the British government chose not to officially recognize the Confederacy. The conflict in and around Corinth eventually included the Battles of Iuka, Tupelo, and Brices’ Crossroads, as well as engagements in Booneville, Rienzi, Contraband Camp, and numerous skirmishes in southwest Tennessee and northeastern Alabama. In 1862, Union General Halleck said “Richmond and Corinth . . . are the greatest strategic points of the war, and our success at these points should be insured at all hazards.” Halleck’s subordinate, General Ulysses S. Grant, regarded Corinth as “the great strategic position in the west between the Tennessee and Mississippi Rivers and between Nashville and Vicksburg.” In arguing for the defense of Corinth, Confederate General Beauregard stated to General Samual Cooper, Adjutant and Inspector General of the Confederate States Army that, “if defeated here [in Corinth] we lose the Mississippi Valley and probably our cause, whereas we could even afford to lose for a while Charleston and Savannah for the purpose of defeating Buell’s army, which would not only insure us the valley of the Mississippi, but our independence. Corinth is the key to the position of both armies led to some of the bloodiest battles in the Western Theater. Tens of thousands of soldiers were killed or wounded in this bitter offensive. It was also here that thousands of war refugees, mostly African-Americans from Mississippi, Tennessee, and Alabama, sought shelter with the Union Army in Corinth. After President Lincoln’s Emancipation Proclamation, the federal army created a model “Contraband Camp.” By the Spring of 1863, the camp housed around 4,000 freedmen. Almost half of these freedmen joined the “First Alabama Infantry of African Descent” which later became the “55th Colored Infantry.” Corinth is also one of the few existing Civil War sites that boasts extraordinary earthworks and fortifications—many of which remain in pristine condition. A National Park Service study and survey stated that, “the surviving [Corinth] earthworks are one of the largest and best preserved groups of field fortifications, dating to 1862 in the United States.” Unfortu- nately, many of these historic resources, undisturbed for over 130 years, are now threatened. For example, a 500-foot-long section of earthworks was specifically sold for development. These earthworks are important to our national heritage because they helped shape the face of war from the 1860’s to today. In fact, trench warfare evolved from the battle of Corinth. These earthworks and fortifications are symbolic reminders of the epic struggle that ensued between friends and neighbors and the Civil War’s lasting impact on modern warfare.

Although, the Battle of Shiloh has been etched into American history as part of the Shiloh National Military Park, a number of important historic sites and resources relating to the pre-battle and the rest of the Corinth Campaign have been either unprotected or interpreted. Establishing the Shiloh National Military Park as the nation’s second National Military Park back in 1894 was a good start. Now it is time for the 106th Congress to complete the preservation effort. Corinth needs to have a lasting presence to the Corinth Battlefield, a key component of the historic Shiloh-Corinth Corridor. Corinth remains a central transportation gateway. It serves as a junction intersecting Highways 72, running east and west, and Highway 45, which runs north and south. It is also a mecca for dedicated history buffs given the town’s close proximity to Shiloh and other Civil War sites and its connection to the Corinth Campaign. I am sure that my colleagues will agree that the sixteen Corinth Civil War sites designated as National Historic Landmarks are far too important to be relegated solely to review in history books or by professional historians, Americans need it. The 106th Congress can and must highlight the importance of the Siege and Battle of Corinth for the millions of adults and children, both American and foreign, interested in learning about an essential facet of America's history. For over one hundred years, the United States Congress has advanced the notion that our national interest is best served by preserving America's historic treasures. Not only by ensuring the proper interpretation of important historic events, but also the places—the properties where pivotal military milestones occurred. As Ed Bearss proclaimed, “the Battle of Corinth was the bloodiest battle in the State of Mississippi. Troops were brought from New Orleans, Mobile, Texas and Arkansas because Corinth was such an important place. With the fall of Corinth, Perryville, Kentucky, and Antietam, Maryland the Confederacy was imperiled. The destruction to our ancestors and to future generations to protect Corinth and the wealth of Civil War history that exudes from this small town.

Mr. President, the measure offered today is vital to the successful interpretation and preservation of Corinth. It builds upon previous efforts and gives Corinth its proper status as one of America’s most significant Civil War sites.

Mr. President, I ask my colleagues to join with me in support of the Corinth Battlefield Preservation Act of 1999. A bipartisan measure which is widely supported by local, state, regional, national, and international preservation organizations. Along with the strong local support shown by the residents and local officials of Corinth and Alcorn County as well as assistance from several Civil War preservation groups, I would also like to take a moment to thank Rosemary Williams of Corinth, Woody Harrel, Superintendent of the Shiloh National Military Park, and Anne Thompson, Manager of the Interim Corinth Civil War Interpretive Center. They were instrumental in assisting with the preparation of this important historic preservation legislation.

Mr. President, I also want to thank my colleagues, Senator Cochran, Senator Robb, and Senator Jeffords, for their formal support of this pro-parks, pro-history measure. I hope that the rest of my colleagues will join with us in taking this necessary step to protect our heritage so that our children and grandchildren can gain an understanding of the struggles of this great nation. Struggles that have helped shape our American democracy and transformed our diverse states and peoples into a cohesive and prosperous union better prepared to meet the challenges and opportunities of the next millennium. Corinth has a story to tell America and in the future, Corinth merits inclusion in the Shiloh National Military Park.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE. This act may be cited as the “Corinth Battlefield Preservation Act of 1999”. SEC. 2. FINDINGS AND PURPOSES. (a) FINDINGS.—Congress finds that—

(1) in 1862, Congress authorized the establishment and construction of a center to facilitate the interpretation of the Siege and Battle of Corinth and other Civil War actions in the area in and around the city of Corinth, Mississippi, and

(2) the Corinth Battlefield was ranked as a priority 1 battlefield having critical need for
May 25, 1999

CONGRESSIONAL RECORD—SENATE

coordinated nationwide action by the year 2000 by the Civil War Sites Advisory Commission in its report on Civil War Battlefields of the United States;

(3) there is a national interest in protecting and preserving sites of historic significance associated with the Civil War; and

(4) the States of Mississippi and Tennessee and their respective local units of government—

(A) have the authority to prevent or minimize adverse uses of these historic resources; and

(B) can play a significant role in the protection of the historic resources related to the Civil War battles fought in the area in and around the city of Corinth.

(b) PURPOSES.—The purposes of this Act are—

(1) to establish the Corinth Unit of the Shiloh National Military Park—

(A) in the city of Corinth, Mississippi; and

(B) in the State of Tennessee;

(2) to direct the Secretary of the Interior to recommend to the President for approval under section 602 of the Omnibus Parks and Public Lands Management Act of 1996 (16 U.S.C. 439f et seq.) the boundaries of the Civil War Siege and Battle of Corinth that occurred in and around the city of Corinth, in cooperation with—

(A) the State of Mississippi;

(B) the State of Tennessee;

(C) the city of Corinth, Mississippi;

(D) other public entities; and

(E) the private sector; and

(3) to authorize a special resource study to identify other Civil War sites in and around the city of Corinth that—

(A) are consistent with the themes of the Siege and Battle of Corinth;

(B) meet the criteria for designation as a unit of the National Park System; and

(C) are considered appropriate for including in the Unit.

SEC. 3. DEFINITIONS.

In this Act:

(1) MAP.—The term “Map” means the map entitled “Corinth Unit”, numbered 304/80,007, and dated October 1998.

(2) PART.—The term “Part” means the Shiloh National Military Park.

(3) SECRETARY.—The term “Secretary” means the Secretary of the Interior.

(4) Unit.—The term “Unit” means the Corinth Unit of Shiloh National Military Park established under subsection 4.

SEC. 4. ESTABLISHMENT OF UNIT.

(a) IN GENERAL.—There is established in the States of Mississippi and Tennessee the Corinth Unit of the Shiloh National Military Park.

(b) COMPOSITION OF UNIT.—The Unit shall be comprised of—

(1) the tract consisting of approximately 20 acres generally depicted as “Park Boundary” on the Map, and containing—

(A) the Battery Robinett; and

(B) the site of the Federal interpretive center authorized under section 602 of the Omnibus Parks and Public Lands Management Act of 1996 (16 U.S.C. 439f-5); and

(2) any additional land that the Secretary determines to be suitable for inclusion in the Unit that—

(A) is under the ownership of a public entity or nonprofit organization; and

(B) has been identified by the Siege and Battle of Corinth National Historic Landmark on subd. January 8, 1991.

(c) AVAILABILITY OF MAP.—The Map shall be on file and available for public inspection in the office of the Director of the National Park Service.

SEC. 5. LAND ACQUISITION.

(a) IN GENERAL.—The Secretary may acquire land and interests in land within the boundary of the Park as depicted on the Map by—

(1) donation;

(2) purchase with donated or appropriated funds; or

(3) exchange.

(b) EXCEPTION.—Land may be acquired only by donation from—

(1) the State of Mississippi (including a political subdivision of the State); and

(2) the State of Tennessee (including a political subdivision of the State).

(2) S ECRETARY.—The term “Secretary” means the Secretary of the Interior.

(3) MAP.—The term “Map” means the map entitled “An Act to establish a National Park Service, and for other purposes”, approved August 25, 1916 (16 U.S.C. 1 et seq.); and

(4) Act.—The term “Act” means an Act entitled “An Act to provide for the preservation of historic American sites, buildings, objects, and antiquities of national significance, and for other purposes”, approved August 21, 1936 (16 U.S.C. 461 et seq.).

(b) DUTIES.—In accordance with section 602 of the Omnibus Parks and Public Lands Management Act of 1996 (16 U.S.C. 439f-5), the Secretary shall—

(1) commemorate and interpret, for the benefit of visitors and the general public, the Siege and Battle of Corinth and other Civil War actions in the area in and around the city of Corinth within the larger context of the Civil War and American history, including the significance of the Civil War Siege and Battle of Corinth in 1862 in relation to other operations in the western theater of the Civil War; and

(2) identify and preserve surviving features from the Civil War era in the area in and around the city of Corinth, including both military and civilian themes that include—

(A) the role of railroads in the Civil War; and

(B) the story of the Corinth contraband camp; and

(C) the development of field fortifications as a tactic of war.

(3) identify potential partners that might support efforts by the Secretary to carry out this Act, including—

(A) State entities and their political subdivisions;

(B) historical societies and commissions;

(C) civic groups; and

(D) nonprofit organizations;

(4) identify alternatives to avoid land use conflicts; and

(5) include cost estimates for any necessary activity associated with the alternatives identified under this subsection, including—

(A) acquisition; and

(B) development.

(c) REPORT.—Not later than 1 year and 180 days after the date on which funds are made available to carry out this section, the Secretary shall submit a report describing the findings of the study under subsection (a) to—

(1) the Committee on Energy and Natural Resources of the Senate; and

(2) the Committee on Resources of the House of Representatives.

SEC. 6. PARK MANAGEMENT AND ADMINISTRATION.

(a) IN GENERAL.—The Secretary shall administer the Unit in accordance with this Act and the laws generally applicable to units of the National Park System, including—

(1) the Act entitled “An Act to establish a National Park Service, and for other purposes”, approved August 25, 1916 (16 U.S.C. 1 et seq.); and

(2) the Act entitled “An Act to provide for the preservation of historic American sites, buildings, objects, and antiquities of national significance, and for other purposes”, approved August 21, 1936 (16 U.S.C. 461 et seq.).

(b) DUTIES.—In accordance with section 602 of the Omnibus Parks and Public Lands Management Act of 1996 (16 U.S.C. 439f-5), the Secretary shall—

(1) identify the full range of resources and historic themes associated with the Civil War Siege and Battle of Corinth in 1862, including the relationship of the campaign to other operations in the western theater of the Civil War that occurred in—

(A) the area in and around the city of Corinth; and

(B) the State of Tennessee;

(2) identify alternatives for preserving features from the Civil War era in the area in and around the city of Corinth, including both military and civilian themes involving—

(A) the role of the railroad in the Civil War;

(B) the story of the Corinth contraband camp; and

(C) the development of field fortifications as a tactic of war; and

(3) develop a strategic plan for conducting activities described in subsections (a) and (b).
solely recourse loans to provide for the gradual elimination of the program; to the Committee on Agriculture, Nutrition, and Forestry; the Sugar Program Phase Out Legislation

Mr. SCHUMER. Mr. President, today I join with my colleagues Senators FEINSTEIN, CHAFEE, GREGG, and SANTORUM to introduce legislation that phases out the federal sugar program. Remember that old story, if you believe this, I’ve got some swampland to sell you in Florida? Boy, I wish I bought some of that swampland and became a sugar grower.

It is a can’t miss, can’t lose proposition where all of the risk is absorbed by the federal government and all of the reward goes to the sugar barons. It is one of the last vestiges of a centralized, subsidized U.S. farm sector which has mostly gone by the wayside.

For the past decade, the sugar program has mostly gone by the wayside. For the past decade, the sugar program has mostly gone by the wayside.

Four years ago, when we came within votes in the House of terminating the sugar program, the world market price for sugar was about ten cents and the U.S. price about twenty cents. Today the world price is less than a nickel and the U.S. price is almost a quarter. In other words, the Gulf between the free market and the sugar program is getting wider.

Under any reasonable and rational measure the sugar program should be repealed. If the issue is jobs, the environment or the consumer—then we have no choice but to repeal. At all ends of the political spectrum the answer is the same—it’s time to repeal the sugar program.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1118

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. RECOURSE LOANS FOR PROCESSORS OF RAW CANE SUGAR AND SUGAR BEETS AND REDUCTION IN LOAN RATES.

(a) GRADUAL REDUCTION IN LOAN RATES.—

(1) SUGAR LOANS.—Section 156(a) of the Agricultural Market Transition Act (7 U.S.C. 7272(a)) is amended by striking “equal to 18 cents per pound for raw cane sugar,” and inserting the following: “per pound for raw cane sugar, equal to the following:

(1) In the case of raw cane sugar processed from the 1996 crop, $0.18.

(2) In the case of raw cane sugar processed from the 1999 crop, $0.17.

(3) In the case of raw cane sugar processed from the 2001 crop, $0.16.

(4) In the case of raw cane sugar processed from the 2003 crop, $0.14.

(5) In the case of raw cane sugar processed from the 2005 crop, $0.13.

(2) SUGAR BEET PROCESSOR LOANS.—Section 156(b) of the Agricultural Market Transition Act (7 U.S.C. 7272(b)) is amended by striking “equal to 22 cents per pound for refined beet sugar,” and inserting the following: “per pound of refined beet sugar, that reflects—

(1) an amount that bears the same relation to the loan rate in effect under subsection (a) for a crop as the weighted average of producer returns for sugar beets bears to the weighted average of producer returns for sugarcane, expressed on a cents per pound basis for refined beet sugar and raw cane sugar, for the most recent 5-year period for which data are available; and

(2) an amount that covers sugar beet processor fixed marketing expenses.”

(b) CONVERSION TO PRIVATE SECTOR FINANCING.—Section 156(e) of the Agricultural Market Transition Act (7 U.S.C. 7272(e)) is amended—

(1) in paragraph (1), by inserting “only after this section”; and

(2) by striking paragraphs (2) and (3) and inserting the following:

(2) NATIONAL LOAN RATES.—Recourse loans under this section shall be made available at all locations nationally at the rates specified in this section, without adjustment to provide for regional differentials.”

(c) CONVERSION TO PRIVATE SECTOR FINANCING.—Section 156 of the Agricultural Market Transition Act (7 U.S.C. 7272) is amended—

(1) by redesignating subsection (i) as subsection (j);

(2) by inserting after subsection (h) the following:

(1) CONVERSION TO PRIVATE SECTOR FINANCING.—Notwithstanding any other provision of law—

(1) no processor of any of the 2003 or subsequent crops of sugarcane or sugar beets shall be eligible for a loan under this section with respect to the crops; and

(2) the Secretary may not make price support available, in the form of loans, payments, purchases, or other operations, for any of the 2003 and subsequent crops of sugar beets and sugarcane by using the funds of the Commodity Credit Corporation or other funds available to the Secretary; and

(3) in subsection (j) (as redesignated by paragraph (1)) by striking “subsection (f)” and inserting “subsection (f) and (i)”;

(d) TERMINATION OF MARKETING QUOTAS AND ALLOTMENTS.—

(1) TERMINATION.—Part VII of subtitle B of title III of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359aa et seq.) is repealed.

(2) CONFORMING AMENDMENT.—Section 348(f)(2) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358a(a)(2)) is amended by striking “sugar cane for sugar, sugar beets for sugar,”.

(e) OTHER CONFORMING AMENDMENTS.—

(1) PRICE SUPPORT FOR NONBASIC AGRICULTURAL COMMODITIES.—

(A) DESIGNATED NONBASIC AGRICULTURAL COMMODITIES.—Section 201(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359a) is amended by inserting “‘_milk, sugar beets, and sugar cane’” and inserting “, and milk”.

(B) OTHER NONBASIC AGRICULTURAL COMMODITIES.—Section 301 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359a) is amended by inserting “‘other than sugarcane and sugar beets’” after “title II”.

(2) POWERS OF COMMODITY CREDIT CORPORATION.—Section 5(a) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714a(a) is amended by inserting “except for the 2003 and subsequent crops of sugarcane and sugar beets” after “agricultural commodities”.

(3) SECTION 32 ACTIVITIES.—Section 32 of the Act of August 24, 1935 (7 U.S.C. 62u), is amended in the second sentence of the first paragraph by inserting “‘other than sugar cane and sugar beets’” after “commodity” that last place it appears.

(4) ASSURANCE OF ADEQUATE SUPPLIES OF SUGAR.—Section 902 of the Food Security Act of 1985 (7 U.S.C. 166g note; Public Law 99-198) is amended by inserting subsection (a) and inserting the following:

(a) IN GENERAL.—Beginning with the quota year for sugar imports that begins after the 1996/1997 quota year, the President shall use all authorities available to the President as may be necessary to enable the Secretary of Agriculture to ensure that adequate supplies of raw cane sugar are made available to the United States market at prices that are not greater than the higher of—

(1) the world sugar price (adjusted to a delivered basis); or

(2) the raw cane sugar loan rate in effect under section 156 of the Agricultural Market Transition Act (7 U.S.C. 7272), plus interest.”.

Mrs. FEINSTEIN. Mr. President, I rise in support of legislation sponsored by Senator SCHUMER to phase out the antiquated sugar subsidy. The sugar program is nothing more than a system of import restrictions, subsidized loans, and price supports that benefit a limited number of sugar growers.

I find it incredible that the federal government continues to support a subsidy program that is driving the domestic refinery industry out of existence and costing thousands of good jobs. The US Department of Agriculture restricts the amount of sugar available to domestic refiners. Without sugar, a sugar refinery cannot operate and that is the result of this misguided program.

It is clear that the U.S. sugar policy has served to strangle this country’s sugar refining industry. By limiting the amount of raw cane sugar available for production, the 1970s’ per cent decline in jobs in the sugar-cane refining industry. Since 1982, nine out of twenty one cane sugar refineries in the U.S. have been forced out of business. Those that have remained open are struggling to survive under onerous import restrictions.

I first became involved with this issue in 1994 when David Koncelik, the President and CEO of the California
and Hawaiian Sugar Company, informed me that his refinery was forced to temporarily cease operations because its cane sugar was not competitive with that of more efficient producers.

This 93 year old refinery is the nation’s largest refinery and the only facility on the West Coast. C&H refines about 15 percent of the total cane sugar consumed in the U.S. C&H is capable of producing and selling 700,000 tons of refined sugar annually. Therefore, the company requires in excess of 700,000 tons of raw cane sugar to meet its sales demand.

Hawaii is C&H’s sole source for its domestic raw cane sugar needs, but Hawaii’s cane sugar industry has been in decline for over 10 years. This has meant that C&H is forced to cover over half its annual consumption through imports from other countries.

The major import system forces C&H to pay an inflated price for raw sugar from both domestic and foreign suppliers. Even more devastating, however, the quota system limits the amount of sugar available to the refinery. C&H is then unable to get enough sugar to refine it and has been forced to close its doors on several occasions.

The reduced production capacity has resulted in a severe downsizing of the workforce. As recently as 1987, C&H employed over 1,400 people. These are not minimum wage jobs we are talking about: the average employee in the cane refining industry earns nearly $45,000 a year. In 1995, C&H had to eliminate 30 percent of its workforce just to remain viable under the quota system mandated by the sugar program.

C&H now employees just over 500 people. These jobs and many others around the country are at risk if reforms are not made to the sugar program.

The overly restrictive manner that the USDA administers the sugar program has a number of other flaws. The sugar program’s existing quota system was put in place in 1982, using trading patterns dating as far back as 1975. The system has remained largely unchanged over the past 17 years despite major alterations in the international sugar market. As a result, the current import quota system assigns export rights to countries that don’t grow enough sugar to export or, in some cases, are not importers themselves.

For example, the Philippines are granted one of the largest export privileges under the sugar import quota system. It, however, does not even grow enough sugar to meet its own domestic needs. What this means is that the Philippines sell their homegrown sugar crop to the United States at around 22 cents a pound. It then buys raw sugar on the world market at around 5 cents a pound. This is ridiculous. We are in effect giving money to foreign countries and forcing domestic consumers to pay the price.

Beginning in September of 1994, I have asked the Administration on eight separate occasions to reform the sugar program. Simply increasing the amount of sugar available through the import program would provide immediate relief to C&H and the other domestic refiners. To date, no such permanent reform of the program has been made.

In addition to choking off the refiners’ access to sugar, the US sugar policy also has an adverse impact on US consumers. The General Accounting Office has found that the program costs sugar users an average of $1.4 billion annually. That equates to $3.8 million a day in hidden sugar taxes.

The report found that “Although the sugar program is considered a no-net-cost program because the government only makes payments directly to producers, it places the cost of the price supports on sweetener users—consumers and manufacturers of sweetener-containing products—who pay higher sugar and sweetener prices.”

What this means is that unlike traditional subsidy programs, the funds do not come directly from the Treasury. Instead, the sugar program places the cost consumers by restricting the supply of available sugar which causes higher prices in the market.

The legislation I’m introducing will eliminate the sugar subsidy program by 2002. This is a simple, straightforward, and fair way to end a program that has not worked for U.S. consumers or workers.

Congress has had opportunities in the past to kill this program and we have not taken them. As a result, workers have lost jobs and consumers have lost money. I am pleased to join my colleagues in urging the Administration to take permanent action.

Congress has had opportunities in the past to kill this program and we have not taken them. As a result, workers have lost jobs and consumers have lost money. I am pleased to join my colleagues in urging the Administration to take permanent action.

By Mr. TORRICELLI (for himself, Mr. REED, Mr. LAUTENBERG, Mr. BRYAN, Mrs. BOXER, Mrs. FEINSTEIN, Mr. DODD, Mr. ROCKEFELLER, Mr. BIDEN, Mr. SCHUMER, Mrs. MURRAY, Mr. DURBIN, and Mr. KERRY):

S. 1120. A bill to ensure that children enrolled in the Federal means-tested programs at highest risk for lead poisoning are identified and treated, and for other purposes; to the Committee on Finance.

CHILDREN’S LEAD SAFE ACT

• Mr. TORRICELLI. Mr. President, today I rise with Senator REED to introduce legislation that will ensure that children enrolled in federal health care programs receive screening and appropriate care for lead poisoning. Our bill, the “Children’s Lead SAFE Act of 1999” would go a long way to eliminate childhood lead poisoning.

We know lead exposure is one of the most dangerous health hazards for young children because their nervous systems are still developing. Lead poisoning in children causes damage to the brain and nervous systems, which can lead to impaired physical development and behavioral problems. High levels of exposure can cause comas, convulsions, and even death.

Despite our success over the past twenty years to reduce lead poisoning in the U.S., it continues to be the number one environmental health threat to children, with nearly one million preschoolers affected. Poor and minority children are most at-risk because of diet and exposure to environmental hazards such as old housing. These children frequently live in older housing which contains cracked or chipped lead paint, where children primarily contract lead poisoning by ingesting paint chips or lead dust.

In fact, only half the States have screening policies consistent with federal law. In my own state of New Jersey, the GAO report showed that only 39 percent of Medicaid children have been screened. Despite federal requirements, for whatever reason—insufficient outreach, lax government oversight or parental ignorance, too many kids are not getting screened.

The “Children’s Lead SAFE Act” would address this problem by establishing clear and consistent standards for screening and treatment and by involving all relevant federal health programs in this battle. Our legislation is modeled on the recommendations made by the GAO.

It requires all federal programs serving at-risk kids to be involved in screening. It requires State Medicaid contracts (HMO’s) to follow federal rules for screening and treatment. It expands Medicaid coverage to include treatment services and environmental investigations to determine the source of the poisoning. WIC centers (with 12 percent of the at-risk population) will be required to assess whether a child has been screened and if they have not to provide the necessary referral and follow-up to ensure that screening occurs. Head Start facilities would similarly be required.

In addition, our legislation would improve data so we can identify problems and use that information to educate
providers about the extent of the problem. CDC would develop information-sharing guidelines for State and local health departments, the labs that perform the test and federal programs. It would also require each State to report on the percent of the Medicaid population they are screening.

Finally, our legislation would make sure agencies have sufficient resources to do screening by reimbursing WIC and Head Start for costs they incur in screening. The legislation would also create a bonus program whereby a state will receive a per child bonus for every child it screens above 65 percent of its Medicaid population.

Mr. President, the health and safety of our children would be greatly enhanced with the passage of this important legislation. Childhood lead poisoning is easily preventable, and there is no excuse for not properly screening and providing care to our kids. Our bill would accomplish this and ensure adequate care. I ask my colleagues to join me in solving this problem and supporting its solution.

Mr. REED. Mr. President, I rise today to introduce legislation with Senator Torricelli that would ensure that children enrolled in federal health care programs receive screening and appropriate follow-up care for lead poisoning. Our bill, the “Children’s Lead SAFE Act of 1999” is an effort to eliminate a disease that continues to wreak irreparable damage upon our nation’s children.

Despite our success over the past twenty years to reduce lead poisoning in the U.S., it continues to be the number one environmental health threat to children. One million schoolers are affected. This problem is particularly severe among African American children who are at five times higher risk than white children and low-income children are at eight times higher risk than children from well-to-do families.

Minorities and low-income children are disproportionately affected by lead poisoning because they frequently live in older housing which contains cracked or chipped lead paint, where children primarily contract lead poisoning by ingesting paint chips or lead dust.

If undetected, lead poisoning can cause brain and nervous system damage, behavior and learning problems and possibly death.

Research shows that children with elevated blood-lead levels are seven times more likely to drop out of high school and six times more likely to have reading disabilities. It costs an average of $10,000 more a year to educate a lead-poisoned child. We will continue to pay for our failure to eradicate this preventable tragedy through costs to our education and health care system, and losses in lifetime earnings, unless we act now to protect our children.

As I mentioned, this disease is entirely preventable, making its prevalence among children all the more frustrating. We do have solutions—parents who are aware, housing that is safe, and effective screening and treatment for children who are at risk—to name a few.

Unfortunately, our current system is not adequate for protecting our children. In January 1999, the General Accounting Office reported that children in federally funded health care programs such as Medicaid, Women Infant and Child (WIC) and the Health Centers program, are five times more likely to have elevated blood lead levels. The report also found that despite long-standing federal requirements, two-thirds of the children in these programs—more than 400,000—have never been screened and, consequently, remain untreated.

Early detection of lead poisoning is critical to ensure that a child is removed from the source of exposure and to determine whether other children, such as siblings or friends, have also been exposed. Screening is also important to determine whether a child’s lead poisoning is so severe as to require medical management to mitigate the long-term health and developmental effects of lead.

Mr. President, our comprehensive legislation is designed to make sure no child falls through the cracks, by establishing clear and consistent standards for screening and treatment and by holding accountable those who are responsible for carrying out the requirements. The legislation supports improved information systems to provide state- and community-level information about the extent to which children have elevated blood lead levels. It also expands and coordinates lead screening and treatment activities through other federal programs such as WIC, Early Head Start, and the Maternal and Child Health Block Grant programs. Finally, the bill ties incentives for screening to additional federal funding for cleaning up lead-contaminated houses.

Mr. President, we propose this legislation in an effort to rid children of the detrimental effects of lead poisoning. Every child has a right to screening and follow-up care. This bill will significantly increase the number of poisoned children who are screened and treated and help communities, parents, and physicians to take advantage of every opportunity that they have to detect and treat lead poisoning before its irreversable effects set in.

I ask by unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

The bill was not available for printing. It will appear in a future issue of the RECORD.

By Mr. LEAHY:

S 1121. A bill to amend the Clayton Act to enhance the authority of the Attorney General to prevent certain mergers and acquisitions that would unreasonably limit competition; to the Committee on the Judiciary.

ANTitrust IMPROVEMENTS ACT OF 1999

Mr. LEAHY. Mr. President, we are living in a time of mega-mergers, and they are coming from all directions. Chrysler and Daimler-Benz automobile companies finalized their merger last year. In the computer world, AOL completed its purchase of Netscape just a few months ago. And in the largest corporate merger ever, Exxon Corporation announced its plan to acquire Mobil at a price tag of over $75 billion, thus creating the world’s biggest private oil company, Exxon Mobil Corporation.

While these mega-mergers have cut a swath across a number of industries, the consolidations that continue to raise the most questions in my mind are those that involve incumbent monopolies. For example, the mergers among Regional Bell Operating Companies, which continue to have a virtual stranglehold on the local telephone loop, pose a great threat to healthy competition in the telecommunications industry.

Indeed, incumbent telephone companies still control more than 99% of the local residential telephone markets. As I said last Congress, and it is still the case today, at my farm in Virginia, I have only one choice for dial-tone and local telephone service. That “choice” is the Bell operating company or no service at all.

The Telecommunications Act of 1996 passed with the promise of bringing competition to benefit American consumers. However, this promise has yet to materialize.

Since passage of the Telecommunications Act, Southwestern Bell has merged with PacTel into SBC Corporation. Bell Atlantic has merged into Nynex, and AT&T has acquired IBM’s Global Network, just to name a few. Just last week it was reported that U.S. West reached an agreement to merge with the telecommunications company Global Crossing.

The U.S. Justice Department didn’t spend years dividing up Ma Bell just to see it grow back together again under the guise of the 1996 Telecommunications Act.

I am very concerned that the concentration of ownership in the telecommunications industry is proceeding faster than the growth of competition. Old monopolies are simply regrouping after getting bigger and bigger.

Before all the pieces of Ma Bell are put together again, Congress should revisit the Telecommunications Act. To
ensure competition between Bell Operating Companies and long distance and other companies, as contemplated by the Commerce Committee, we need clearer guidelines and better incentives. Specifically, we should ensure that Bell Operating Companies do not gain more concentrated control over huge percentages of the telephone access lines of the country through mergers, but only through robust competition.

Today I am reintroducing antitrust legislation that will bar future mergers between Bell Operating Companies or QTE, unless the federal requirements for opening the local loop to competition have been satisfied in at least half of the access lines in each State.

The bill provides that a "large local telephone company" may not merge with another large local telephone company, unless the Attorney General finds that the merger will promote competition for telephone exchange services and exchange access services. Also, before a merger can take place, the Federal Communications Commission must find that each large local telephone company has for at least one-half of the access lines in each State served by such carrier, of which at least one-half are residential access lines, fully implemented the requirements of sections 251 and 252 of the Communications Act of 1934.

The bill requires that each large local telephone company that wishes to merge with another must file an application with the Attorney General and the FCC. A review of these applications will be subject to the same time limits set under the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

The bill also provides that nothing in this Act shall be construed to modify, impair, or supersede the applicability of the antitrust laws of the United States, the regulatory authority of the Federal Communications Commission, or any authority of the States with respect to mergers and acquisitions of large local telephone companies.

The bill is effective on enactment and has no retroactive effect. It is enforceable by the Attorney General in federal district courts.

This bill has the potential to make the 1996 Telecommunications Act finally live up to some of its promises.

Mr. President, I do not support the consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 2. PURPOSE.

The purpose of this Act is to enhance the authority of the Attorney General to prevent certain mergers and acquisitions that would unreasonably limit competition in the telecommunications industry in any case in which certain Federal requirements that would enhance competition are not met.

SEC. 3. RESTRAINT OF TRADE.

The Clayton Act (15 U.S.C. 12 et seq.) is amended—

(1) by redesignating section 27 (as designated by section 2 of Public Law 96–495) as section 29; and

(2) by inserting after section 27 (as added by the Curtis Flood Act of 1996 (Public Law 104–207)) the following:

"SEC. 28. (a) In this section, the term 'large local telephone company' means a local telephone company that, as of the date of a proposed merger or acquisition, owns or controls, directly or indirectly, at least 0.5 of the access lines in each State.

"(b) Notwithstanding any other provision of law, a large local telephone company, including any affiliate of such a company, shall not merge with or acquire a controlling interest in another large local telephone company unless—

"(1) the Attorney General finds that the proposed merger or acquisition will promote competition for telephone exchange services and exchange access services; and

"(2) the Federal Communication Commission finds that each large local telephone company that is a party to the proposed merger or acquisition, with respect to at least 0.5 of the access lines in each State served by that company, of which at least 0.5 are residential access lines, has fully implemented the requirements of sections 251 and 252 of the Communications Act of 1934 (47 U.S.C. 251, 252), including the regulations of the Commission and of the States that implemented those requirements.

"(c) Not later than 10 days after the Attorney General makes a finding described in subsection (b)(1), the Attorney General shall submit to the Committee on the Judiciary of the Senate and the Committee on the Judiciary of the House of Representatives a report on the findings, including an analysis of the effect of the merger or acquisition on competition in the United States telecommunications industry.

"(d)(1) Each large local telephone company or affiliate of a large local telephone company proposing the merger with or acquire a controlling interest in another large local telephone company shall file an application under this section with respect to the merger or acquisition with the Attorney General and the Federal Communications Commission on the same day.

"(2) The Attorney General and the Federal Communications Commission shall issue a decision regarding the application within the time period applicable to review of mergers under section 7.

"(e)(1) The district courts of the United States are authorized with jurisdiction to prevent and restrain any mergers or acquisitions described in subsection (d) that are inconsistent with a finding under paragraph (1) or (2) of subsection (b).

"(2) The Attorney General may institute proceedings in any district court of the United States in which the defendant resides or is found or has an agent and that court shall order such injunctive, and other relief, as may be appropriate if—

"(A) the Attorney General makes a finding that a proposed merger or acquisition covered by an application under subsection (d) does not meet the condition specified in subsection (b)(1); or

"(B) the Federal Communications Commission makes a finding that 1 or more of the parties to the proposed merger or acquisition do not meet the requirements specified in subsection (b)(2)."

SEC. 4. PRESERVATION OF EXISTING AUTHORITY.

(1) IN GENERAL.—Nothing in this Act or the amendment made by section 3(2) shall be construed to modify, impair, or supersede the applicability of the antitrust laws, or the authority of the Federal Communications Commission under the Communications Act of 1934 (47 U.S.C. 151 et. seq.), with respect to mergers, acquisitions, or affiliations of large local exchange carriers.

"(b) ANTITRUST LAWS DEFINED.—In this section, the term 'antitrust laws' has the meaning given that term in the first section of the Clayton Act (15 U.S.C. 12).

SEC. 5. APPLICABILITY.

This Act and the amendment made by section 3(2) shall apply to a merger or acquisition of a controlling interest of a large local telephone company (as that term is defined in section 27 of the Clayton Act, as added by such section 3(2)), occurring on or after the date of the enactment of this Act.

By Ms. COLLINS (for herself, Mr. FRIST, Mr. ABRAM, Ms. SNOWE, Mr. JEFFORDS, and Mr. COVERDELL):

S. 1123. A bill to amend the Federal Food, Drug, and Cosmetic Act to improve the safety of imported food, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

IMPORTED FOOD SAFETY IMPROVEMENT ACT

Ms. COLLINS. Mr. President, food safety is a serious and growing public health concern. According to the General Accounting Office (GAO), as many as 81 million cases of foodborne illness and 9,000 related deaths occur in the U.S. every year. Most at risk are the very old, the very young, and the very ill. While these statistics refer to all cases of foodborne illness, recent outbreaks demonstrate that tainted imported foods have increased the incidence of illness and have exposed American consumers to new pathogens. The volume of imported foods continues to grow, yet our current food import system is riddled with holes which allow unsafe food to penetrate our borders. Contaminated food imports have caused illnesses rarely seen in the United States and can be extremely difficult, if not impossible, for consumers to detect.

I first became interested in this issue when I learned that fruit from Mexico and Guatemala had spread with three multi-state outbreaks of foodborne illnesses—one of hepatitis A and two of Cyclospora infection—that sickened thousands of Americans. Two of these multi-state outbreaks of Cyclospora infection—the first of which occurred in 1996 in the United States and can be extremely difficult, if not impossible, for consumers to detect.

I first became interested in this issue when I learned that fruit from Mexico and Guatemala had spread with three multi-state outbreaks of foodborne illnesses—one of hepatitis A and two of Cyclospora infection—that sickened thousands of Americans.

In my State’s grocery stores, as in any typical American grocery store, the fresh fruit and vegetables that are available during the winter months come from many other countries. In many ways, imported food is a blessing for American consumers. Fruit and vegetables that would normally be unavailable in our local grocery stores...
during the winter months are now available all year long, making it easier and more enjoyable to eat the five servings of fruit and vegetables a day the National Cancer Institute recommends. But, it’s only a blessing if the food is safe. Even one serving of tainted food can cause sickness and even death.

The Food and Drug Administration (FDA) reports that the increasing importation of produce is a trend that is expected to continue. In 1996, the U.S. imported $7.2 billion worth of fruit and vegetables from at least 90 different countries, a dramatic increase from the 1990 level of $4.8 billion. Total food imports have increased from 1.1 million shipments in 1992 to 2.7 million in 1997. And, of all the fish and shellfish consumed in the U.S., more than half is imported.

Yet, the FDA annually inspects less than 2 percent of the 2.7 million shipments of food that arrive in the U.S. And of the small number of shipments that are inspected, only about a third are tested for some of the most significant pathogens. What’s more, even when the FDA does catch contaminated food, the system often fails to dispose of it adequately. Indeed, according to one survey conducted by the Customs Service in 1997, as many as 70 percent of the imported food shipments the FDA ordered re-exported or destroyed may have ended up in U.S. commerce any way. Unscrupulous food importers can easily circumvent the inspection system.

Mr. President, to respond to these problems, I am introducing the Imported Food Safety Improvement Act, with Senator Frist, Senator Abraham, Senator Coverdell, Senator Jeffords, and Senator Snowe as original cosponsors.

Our legislation is an effort designed to strengthen the existing food import system to help ensure that unsafe food does not enter the United States. Our goal is to reduce the incidence of foodborne illnesses and to ensure that American families can enjoy a variety of foods year-round without the risk of illness when they sit down to the dinner table.

This legislation is the product of an extensive investigation by the Permanent Subcommittee on Investigations, which I chair. During the 106th Congress, the Subcommittee undertook a 16-month, in-depth investigation into the safety of food imports. During five days of Subcommittee hearings, we heard testimony from 29 witnesses, including scientists, industry and consumer representatives, government officials, the General Accounting Office, and two persons with first-hand knowledge of the other side of the imported food industry, a convicted Customs broker and a convicted former FDA inspector. As a result of the compelling testimony that we heard, I have worked with my colleagues in drafting the legislation we introduce today—the Imported Food Safety Improvement Act—reflecting the Subcommittee’s concerns uncovered during the Subcommittee’s investigation.

My Subcommittee’s investigation has revealed much about the food we import into this country and the government’s flawed food safety net. Let me briefly recount some of our findings which make it clear why this legislation is so urgently needed:

In the words of the GAO, “federal efforts to ensure the safety of imported food are inconsistent and unreliable.” Federal agencies have not effectively targeted their resources on imported foods posing the greatest risks;

Weaknesses in FDA import controls, specifically the ability of importers to control products from the port to the point of distribution, makes the system vulnerable to fraud and deception;

The bonds required to be posted by importers who violate food safety laws are so low that they are considered by some unscrupulous importers at the cost of doing business;

Maintaining the food safety net for imported food is an increasingly complex task, made more complicated by previously unknown foodborne pathogens, like Cyclospora, that are difficult to detect;

Because some imported food can be contaminated by organisms that cannot be detected by visual inspection or laboratory tests, placing additional federal inspectors at ports-of-entry alone will not protect Americans from unsafe food imports; and

Since contamination of imported food can occur at many different places throughout the chain-of-custody, the ability to trace-back outbreaks of foodborne illnesses to the source of contamination is a complex process that requires a more coordinated effort among the federal, state, and local agencies as well as improved education for health care providers so that they can better recognize and treat foodborne illnesses.

The testimony that I heard during my Subcommittee’s hearings was troubling. The United States Customs Service told us of one particularly egregious situation that I would like to share. It involves contaminated fish and illustrates the challenges facing federal regulators who are charged with ensuring the safety of our nation’s food supply.

In 1996, federal inspectors along our border with Mexico opened a shipment of seafood destined for sales to restaurants in Los Angeles. The shipment was dangerously tainted with life-threatening contaminants, including botulism, Salmonella, and just plain filth. Much to the surprise of the inspectors, this shipment of frozen fish had been inspected before by federal authorities. Alarmingly, in fact, it had arrived at our border two years before, and had been rejected by the FDA as unfit for consumption. Its importers then held this rotten shipment for two years before attempting to bring it into the country again, by a different route.

The inspectors only narrowly prevented this poisoned fish from reaching American plates. And what happened to the importer who tried to sell this deadly food to American consumers? In effect, nothing. He was placed on probation and asked to perform 50 hours of community service.

I suppose we should be thankful that the perpetrators were caught and held responsible. After all, the unsafe food might have escaped detection and reached our tables. But it worries me that the importer essentially received a slap on the wrist. I believe that forfeiting the small amount of money currently required for a bond, which importers now consider no more than a “cost of doing business,” does little to deter unscrupulous importers from trying to slip tainted fish that is years old past overworked Customs agents.

All too often, unscrupulous importers are never discovered. The General Accounting Office testified about a special operation known as Operation Bad Apple, conducted by Customs at the Port of San Francisco in 1997, identified 23 weaknesses in the controls over FDA-regulated imported food. For example, under current law, importers retain custody of their shipments from the time they arrive at the border. The importers must also put up a bond and agree to “redeliver” the shipment to Customs, for re-export or destruction, if ordered to do so or forfeit the bond. However, Operation Bad Apple revealed a very disturbing fact. Of the shipments found to violate U.S. standards, thereby requiring re-delivery to Customs for destruction or re-export, a full 40 percent were never returned. The Customs Service believes an additional 30 percent of shipments that the FDA required to be returned contained good products that the importers had subsequently sold the public.

Carelessly, Customs further believes that the violative products were on their way to the marketplace. This means that a total of 70 percent of products ordered returned, because they were unsafe, presumably entered into U.S. commerce.

Weak import controls make our system all too easy to circumvent. After all, FDA only physically inspects about 17 of every 1,000 food shipments and, of the food inspected, only about a third is actually tested. That is why we have worked with the FDA, the Customs Service, and the Centers for Disease Control and Prevention to develop the Imported Food Safety Improvement Act, which our colleagues in the House have also introduced.
Control (CDC) to ensure that our legislation addresses many of the issues explored in the course of the subcommittee’s investigation and hearings. Let me describe what this bill is designed to accomplish.

Our legislation will fill the existing gaps in the food import system and provide the FDA with certain stronger authorities to protect American consumers against tainted food imports. First and foremost, this bill gives the FDA the authority to stop such food from entering our country. This authority allows the FDA to deny the entry of imported food that has caused repeated outbreaks of foodborne illnesses, presents a reasonable probability of causing serious adverse health consequences, and is likely without systemic changes to cause disease again.

Second, this legislation includes the authority for the FDA to require secure storage of shipments offered by repeat offenders prior to their release into commerce, to prohibit the practice of “pick-and-mix” and to mark boxes containing volatiles as “U.S.—Refused Entry.” This latter authority, which would allow the FDA to clearly mark boxes containing contaminated foods, is currently used with success by the U.S. Department of Agriculture, and has been requested specifically by the FDA. Our bill also will require the destruction of certain imported foods that cannot be adequately reconditioned to ensure safety. Third, the legislation directs the FDA to develop criteria for use by private laboratories used to collect and analyze samples of food offered for import. This will ensure the integrity of the testing process.

Fourth, the bill will give “teeth” to the current food import system by establishing two strong deterrents—the threats of high bonds and of debarment—for unscrupulous importers who repeatedly violate U.S. law. No longer will the industry’s “bad actors” be able to profit from endangering the health of American consumers.

Finally, our bill will authorize the CDC to award grants to state and local public health agencies to strengthen the public health infrastructure by updating essential items such as laboratories and electronic-reporting equipment. Grants will also be available for universities to develop new and improved tests to detect pathogens and for professional schools and professional societies to develop programs to increase the awareness of foodborne illnesses among healthcare providers and the public.

We believe the measures provided for in this legislation will help to curtail the risks that unsafe food imports currently pose to our citizens, particularly our elderly, our children and our sick. I appreciate the advice and input we have received from scientists, industry and consumer groups, and the FDA, the CDC and the U.S. Customs Service in drafting this legislation.

We are fortunate that the American food supply is one of the safest in the world. But, our system for safeguarding our people from tainted food imports is flawed and poses needless risks of serious foodborne illnesses. I believe it is the responsibility of Congress to provide our federal agencies with the direction, authority, and resources necessary to keep unsafe food out of the United States and off American dinner tables.

By Mr. SMITH of New Hampshire (for himself, Mr. Frist, Mr. Bond, Ms. Landrieu, Mr. Robb, Mr. Hagel, Mr. Breaux, Mr. Torricelli, Mr. Helms, Mr. Inhofe, Mr. Duren, and Mr. Edwards).

S.J. Res. S. 25. A joint resolution expressing the sense of Congress with respect to the court-martial conviction of the late Rear Admiral Charles Butcher, Jr. [V.C.].

I urge the President to award a Presidential Unit Citation to the final crew of the U.S.S. Indianapolis; to the Committee on Armed Services.

Mr. SMITH of New Hampshire. Mr. President, I rise today to share with my colleagues a brief story from the closing days of World War II, the war in the Pacific.

It is a harrowing story, with many elements. Bad timing, bad weather, heroism and fortitude, negligence and shame. Bad luck. Above all, it is the story of some very special men whose will to survive shines like a beacon decades later.

I should point out that it is because of the efforts of a 13 year old boy in Florida that I introduce this bill today. Hunter Scott, working for nearly two years on what started as a history project, compiled a mountain of clippings, letters, and interviews that ultimately led Congressman Joe Scarborough to introduce this bill in the House, and for me to do so in the Senate. Hunter, on behalf of the survivors of the U.S.S. Indianapolis, the family of Captain McVay, and your country, I thank you for your courageous efforts.

Mr. President, we have the opportunity to redeem the reputation of a wronged man, and salute the indomitable will of a courageous crew. I had the distinct honor and privilege of hosting two distinguished members of that courageous crew just this morning: Richard Paroubek, of Williamsburg, VA, who was a Yeoman 1st Class, and Woodie James of Salt Lake City, UT, who was a Coxswain. The bill I introduce today will honor these two men, and their fellow shipmates of the U.S.S. Indianapolis, and redeem their Captain, Charles McVay.

A 1920 graduate of the U.S. Naval Academy, Charles Butler McVay III was a career naval officer with an exemplary record, including participation in the landings in North Africa and award of the Silver Star for courage under fire earned during the Solomon Island campaign. Before taking command of the Indianapolis in November 1944, Captain McVay was chair of the Joint Intelligence Committee of the Combined Chiefs of Staff in Washington, the Allies’ highest intelligence unit.

Captain McVay led the ship through the invasion of Iwo Jima, then the bombardment was Okinawa during spring of 1945 during which Indianapolis’ anti-aircraft guns shot down seven enemy planes before the ship was severely damaged. McVay returned the ship safely to Mare Island in California for repairs.

In 1945, the Indianapolis delivered the world’s first operational atomic bomb to the island of Tinian, which would later be dropped on Hiroshima by the Enola Gay on August 6. After delivering it, McVay carried it to Guam, then reported to the naval station at Guam for further orders. She was ordered to join the battleship U.S.S. Idaho in the Philippines to prepare for the invasion of Japan.

It was at Guam that the series of events ultimately leading to the sinking of the Indianapolis began to unfold. Hostilities in this part of the Pacific had long since ceased. The Japanese surface fleet was no longer considered a likely threat, and attention instead had turned 1,000 miles to the north where preparations were underway for the invasion of the Japanese mainland. These conditions led to a relaxed state of alert on the part of those who decided to send the Indianapolis across the Philippine Sea unescorted, and consequently, Captain McVay’s orders to “zigzag at his discretion.” Zigzagging is a naval maneuver used to avoid torpedoes, generally considered most effective once the torpedoes have been launched.

The Indianapolis, unescorted, departed Guam for the Philippines on July 26. Just after midnight on 30 July 1945, midway between Guam and the Leyte Gulf, she was hit by two torpedoes fired by the “I-58,” a Japanese submarine. The first blew away the bow, the second struck near mid-ship on the starboard side adjacent to a fuel tank and a powder magazine. The resulting explosion split the ship in two.

Of the 1,196 men aboard, about 900 escaped the sinking ship and made it into the water in the twelve minutes before ship sank. Few lives were lost. Shark attacks began at sunrise on the first day, and continued until the men were physically removed from the water, almost five days later.

Shortly after 11:30 A.M. of the fourth day, the survivors were accidentally discovered by an American bomber on routine antisubmarine patrol. A patrolling seaplane was dispatched to lend
assistance and report. En route to the scene the pilot overflew the destroyer U.S.S. Cecil Doyle (DD-368), and alerted her captain to the emergency. The captain of the Doyle, on his own authority, decided to divert to the scene.

Arriving hours ahead of the Doyle, the seaplane’s crew began dropping rubber rafts and supplies. While doing so, they observed men being attacked by sharks. Disregarding standing orders not to land at sea, the plane landed and began taxiing to pick up the stragglers and lone swimmers who were at greatest risk of shark attack.

As darkness fell, the crew of the seaplane waited for help to arrive, all the while continuing to seek out and pull survivors of the plane’s crew rescued 56 men that day.

The Cecil Doyle was the first vessel on the scene, and began taking survivors aboard. Disregarding the safety of his own vessel, the Doyle’s captain pointed his largest searchlight into the night sky to serve as a beacon for other rescue vessels. This beacon was the first indication to the survivors that their prayers had been answered. Help had at last arrived.

Of the 900 who made it into the water only 317 remained alive. After almost five days of constant shark attacks, starvation, terrible thirst, and suffering from exposure and their wounds, the men of the Indianapolis were at last rescued from the sea.

Curiously, the Navy withheld the news of the sunken ship from the American people for two weeks, until the day the Japanese surrendered on August 15, 1945, thus insuring minimum press coverage for the story of the Indianapolis.

Also suspicious, conceding that they were “starting the proceedings without having available all the necessary data,” less than two weeks after the sinking of the Indianapolis, before the sinking of the ship had even been announced to the public, the Navy opened an official board of inquiry to investigate Captain McVay and his actions. The board recommended a general court-martial for McVay.

Admiral Nimitz, Commander in Chief of Pacific Command, did not agree—he wrote the Navy’s Judge Advocate General that at worst McVay was guilty of an error in judgment, but not gross negligence worthy of court-martial. Nimitz recommended a letter of reprimand.

Overriding both Nimitz and Admiral Raymond Spruance who commanded the Fifth Fleet, Secretary of the Navy James Forrestal and Admiral Ernest King again in chief into the night, directed that court-martial proceedings against Captain McVay proceed.

Captain McVay was notified of the pending court-martial, but not told what specific charges would be brought against him. The reason was simple. The Navy had not yet decided what to charge him. Even before the trial began they did decide on two charges: the first, failing to issue orders to abandon ship in a timely fashion; and the second, hazard his vessel by failing to zigzag during good visibility.

It is difficult to understand why the Navy brought the first charge against McVay. Explosions from the torpedo attacks had knocked out the ship’s communications system, making it impossible to give an abandon ship order to the crew except by word of mouth, which McVay had done. He was ultimately found not guilty on this count.

That left the second charge of failing to zigzag. Perhaps the most egregious aspect of the phrasing of the charge itself. The phrase was “during good visibility.” According to all accounts of the survivors, including written accounts only recently declassified and not made available to McVay’s defense at the trial, the visibility that night was severely limited with heavy cloud cover. This is pertinent for two reasons. First, no Navy directives in force at that time or since recommended, much less ordered, zigzagging at night in poor visibility. Secondly, as Admiral Nimitz pointed out, the rule requiring zigzagging would not have applied in any event, since McVay’s orders gave him discretion on that matter and thus took precedence over all other orders. Thus, when he stopped zigzagging, he was simply exercising his command authority in accordance with Navy directives. Unbelievably, this point was never made by McVay’s defense counsel during the subsequent court-martial.

Captain McVay’s defense attorneys ultimately found guilty on the charge of failing to zigzag, and was discharged from the Navy with a ruined career. In 1946, at the specific request of Admiral Nimitz who had become Chief of Naval Operations, Secretary Forrestal, in a partial admission of injustice, remitted McVay’s sentence and restored him to duty. But, Captain McVay’s court-martial, and personal culpability for the sinking of the Indianapolis continued to stain his Navy records. The stigma of his conviction remained with him always, and he ultimately took his own life in 1968. To this day Captain McVay is recorded in history as negligent in the deaths of 870 sailors.

We need to restore the reputation of this honorable officer. In the decades since World War II, the crew of the Indianapolis has worked tirelessly in defending their Captain, and trying to ensure that his memory is properly honored. I have received numerous requests of the survivors of the U.S.S. Indianapolis that I introduce this resolution.

Since McVay’s court-martial, a number of factors, including once classified documents not made available to McVay’s defense, have surfaced raising significant questions about the justice of his conviction.

Although naval authorities at Guam knew that on July 24, four days before the Indianapolis departed for Leyte, the destroyer escort U.S.S. Underhill had been sunk by a Japanese submarine within range of the Indianapolis’ path, McVay was not told.

Although a code-breaking system called ULTRA had alerted naval intelligence that a Japanese submarine (the I-58, which ultimately sank the Indianapolis) was operating in his path, McVay was not told. Classified as top secret until the early 1990s, this intelligence—and the fact it was withheld from McVay before he sailed from Guam—was suppressed during his career.

Although the routing officer at Guam was aware of the ULTRA intelligence report, he said a destroyer escort for the Indianapolis was “not necessary” and, unbelievably, testified at McVay’s court-martial that the risk of submarine attack along the Indianapolis’ route was “very slight.”

Although McVay was told of “submarine sightings” along his path, he was told none had been confirmed. Such sightings were commonplace throughout the war and were generally ignored by Navy commanders unless confirmed. Thus, the Indianapolis set sail for Leyte on July 26, 1945, sent into harm’s way with its captain unaware of dangers which shore-based naval personnel knew were in his path.

The U.S.S. Indianapolis was not equipped with submarine detection equipment, and therefore Captain McVay requested a destroyer escort. Although no capital ship without submarine detection devices had sailed between Guam and the Philippines without a destroyer escort throughout all of World War II, McVay’s request for such an escort was denied.

The Navy failed to notice when the ship did not show up in port in the Philippines. U.S. authorities intercepted a message from the I-58 to its headquarters in Japan informing them that it had sunk the U.S.S. Indianapolis. This message was ignored and the Navy did not initiate a search. The Indianapolis transmitted three distress calls before it sank, and one was received at the naval base in the Philippines. Again, no search was initiated and no effort was made to locate any survivors. It was not until four days after the ship had sunk, when a bomber inadvertently spotted sailors being eaten by sharks in the water below, that a search party was dispatched.

Although 700 navy ships were lost in combat in World War II, McVay was the only captain to be court-martialed as the result of a sunken ship.

Captain McVay was denied both his first choice of defense counsel and a
delay to develop his defense. His counsel, a line officer with no trial experience, had only four days to prepare his case.

Incredibly, the Navy brought Mochittura Hashimoto, the commander of the Japanese I-58 submarine that sank the Indianapolis to testify at the court-martial. Hashimoto testified that just before midnight the clouds cleared long enough to see and fire upon the Indianapolis. He also implied in pretrial statements that zigzagging would not have saved the Indianapolis because of his clear view, but this point was not raised by McVay’s defense during the trial itself.

Another witness in the trial, veteran Navy submariner Glynn Donaho, a four-time Navy Cross winner was asked by McVay’s defense counsel whether “it was possible for you to attain the proper firing position” if the Indianapolis had been zigzagging under the conditions which existed that night. His answer was, “No, not as long as I could see the target.” This testimony was either deliberately ignored by, or passed over the heads of, the court-martial board, and it was not pursued further by McVay’s defense.

Many of the survivors of the Indianapolis believe that a decision to convict McVay was made before his court-martial began. They are convinced McVay was made a scapegoat to hide the mistakes of others. McVay was court-martialed and convicted of “hazarding his ship by failing to zigzag” despite overwhelming evidence that the Navy itself had placed the ship in harm’s way, despite testimony from the Japanese submarine commander that zigzagging would have made no difference, despite the fact that although 700 Navy ships were lost in battle in World War II McVay was the only captain to be court-martialed, and despite the fact the Navy did not notice when the Indianapolis failed to arrive on schedule, thus costing hundreds of lives unnecessarily.

I urge my colleagues to support this resolution and I am proud to offer it on behalf of Captain McVay and the wonderful and honorable men of the U.S.S. Indianapolis, two of whom are sitting with us in the gallery today, Mr. President.

Mr. DURBIN. Will the Senator yield for a question?

Mr. SMITH of New Hampshire. I will certainly yield to the Senator from Illinois.

### Notes

- F2: Full-Fledged
- S2*: Second Class
- F1*: First Class
ADDITIONAL COSPONSORS

S. 42

At the request of Mr. HELMS, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 42, a bill to amend title X of the Public Health Service Act to permit family planning projects to offer adoption services.

S. 171

At the request of Mr. MOYNIHAN, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 171, a bill to amend the Clean Air Act to limit the concentration of sulfur in gasoline used in motor vehicles.

S. 242

At the request of Mr. JOHNSON, the name of the Senator from Nebraska (Mr. KERRY) and the Senator from Iowa (Mr. HARKIN) were added as cosponsors of S. 242, a bill to amend the Federal Meat Inspection Act to require the labeling of imported meat and meat food products.

S. 327

At the request of Mr. HAGEL, the name of the Senator from North Dakota (Mr. CONRAD) was added as a cosponsor of S. 327, a bill to exempt agricultural products, medicines, and medical products from U.S. economic sanctions.

S. 455

At the request of Mr. DURBIN, the name of the Senator from Illinois (Mr. FITZGERALD) was added as a cosponsor of S. 455, a bill to amend the Immigration and Nationality Act with respect to the requirements for the admission of nonimmigrant nurses who will practice in health professional shortage areas.

S. 465

At the request of Mr. BREAUX, the names of the Senator from Michigan (Mr. LEVIN) and the Senator from Indiana (Mr. BAYH) were added as cosponsors of S. 465, a bill to amend the Internal Revenue Code of 1986 to increase the State ceiling on private activity bonds.

S. 472

At the request of Mr. GRASSLEY, the name of the Senator from West Virginia (Mr. BYRD) was added as a cosponsor of S. 472, a bill to amend title II of the Social Security Act to provide certain medicare beneficiaries with an exemption to the financial limitations imposed on physical, speech-language pathology, and occupational therapy services under part B of the medicare program, and for other purposes.

S. 485

At the request of Mr. BOND, the names of the Senator from Kentucky (Mr. BUNNING) and the Senator from Florida (Mr. MACK) were added as cosponsors of S. 485, a bill to amend the Internal Air Act to repeal the highway sanctions.

S. 506

At the request of Mrs. MURRAY, her name was added as a cosponsor of S. 506, a bill to amend the Internal Revenue Code of 1986 to permanently extend the provisions which allow non-refundable personal credits to be fully allowed against regular tax liability.

S. 512

At the request of Mr. GORTON, the name of the Senator from Rhode Island...
(Mr. REED) was added as a cosponsor of S. 512, a bill to amend the Public Health Service Act to provide for the expansion, intensification, and coordination of the activities of the Department of Health and Human Services with respect to research on autism.

S. 514

At the request of Mr. COCHRAN, the name of the Senator from Rhode Island (Mr. REED) and the Senator from Ohio (Mr. DeWine) were added as cosponsors of S. 514, a bill to improve the National Writing Project.

S. 635

At the request of Mr. MACK, the name of the Senator from New Mexico (Mr. Bingaman) was added as a cosponsor of S. 635, a bill to amend the Internal Revenue Code of 1986 to more accurately codify the depreciable life of printed wiring board and printed wiring assembly equipment.

S. 676

At the request of Mr. CAMPBELL, the name of the Senator from Wisconsin (Mr. Feingold) was added as a cosponsor of S. 676, a bill to locate and secure the return of Zachary Baumel, a citizen of the United States, and other Israeli soldiers missing in action.

S. 694

At the request of Ms. COLLINS, the name of the Senator from Massachusetts (Mr. Kerry) was added as a cosponsor of S. 694, a bill to amend title 11, United States Code, to provide for family fishermen, and to make chapter 12 of title 11, United States Code, permanent.

S. 693

At the request of Mr. HELMS, the name of the Senator from Mississippi (Mr. Lott) was added as a cosponsor of S. 693, a bill to assist in the enhancement of the security of Taiwan, and for other purposes.

S. 718

At the request of Ms. MIKULSKI, the name of the Senator from Maryland (Mr. Sarbanes) was added as a cosponsor of S. 718, a bill to amend chapters 83 and 84 of title 5, United States Code, to extend the civil service retirement provisions of such chapter which are applicable to law enforcement officers, to inspectors of the Immigration and Naturalization Service, inspectors and canine enforcement officers of the United States Customs Service, and revenue officers of the Internal Revenue Service.

S. 800

At the request of Mr. BURNS, the names of the Senator from Colorado (Mr. Allard) and the Senator from Louisiana (Mr. Breaux) were added as cosponsors of S. 800, a bill to promote and enhance public safety through the use of 9–1–1 as the universal emergency assistance number, further deployment of wireless 9–1–1 service, support of States in upgrading 9–1–1 capabilities and related functions, encouragement of construction and operation of seamless, ubiquitous, and reliable networks for personal wireless services, and for other purposes.

S. 820

At the request of Mr. CHAFFEE, the name of the Senator from Minnesota (Mr. Gramm) was added as a cosponsor of S. 820, a bill to amend the Internal Revenue Code of 1986 to repeal the 4.3-cent motor fuel excise taxes on railroad and inland waterway transportation which remain in the general fund of the Treasury.

S. 870

At the request of Ms. COLLINS, the name of the Senator from Alaska (Mr. Stevens) was added as a cosponsor of S. 870, a bill to amend the Inspector General Act of 1978 (5 U.S.C. App.) to increase the efficiency and accountability of Offices of Inspector General within Federal departments, and for other purposes.

S. 879

At the request of Mr. CONRAD, the names of the Senator from New Jersey (Mr. Torricelli) and the Senator from Utah (Mr. Hatch) were added as cosponsors of S. 879, a bill to amend the Internal Revenue Code of 1986 to provide a shorter recovery period for the depreciation of certain leasehold improvements.

S. 881

At the request of Mr. BENNETT, the name of the Senator from Kentucky (Mr. McConnell) was added as a cosponsor of S. 881, a bill to ensure confidentiality with respect to medical records and health care-related information, and for other purposes.

S. 908

At the request of Mr. DORGAN, the names of the Senator from Illinois (Mr. Durbin) and the Senator from Iowa (Mr. Harkin) were added as cosponsors of S. 908, a bill to establish a comprehensive program to ensure the safety of food products intended for human consumption that are regulated by the Food and Drug Administration, and for other purposes.

S. 1017

At the request of Mr. MACK, the name of the Senator from Utah (Mr. Hatch) was added as a cosponsor of S. 1017, a bill to amend the Internal Revenue Code of 1986 to increase the State ceiling on the low-income housing credit.

S. 1023

At the request of Mr. MOYNIHAN, the name of the Senator from Maryland (Mr. Sarbanes) was added as a cosponsor of S. 1023, a bill to amend title XVIII of the Social Security Act to carve out from payments to Medicare+Choice organizations amounts attributable to disproportionate share hospital payments and pay such amounts directly to those disproportionate share hospitals in which their enrollees receive care.

S. 1025

At the request of Mr. MOYNIHAN, the name of the Senator from Virginia (Mr. Bond) was added as a cosponsor of S. 1025, a bill to amend title XVIII of the Social Security Act to ensure the proper payment of approved nursing and allied health education programs under the medicare program.

S. 1053

At the request of Mr. BOND, the name of the Senator from Texas (Mr. Gramm) was added as a cosponsor of S. 1053, a bill to amend the Clean Air Act to incorporate certain provisions of the transportation conformity regulations, as in effect on March 1, 1999.

S. 1063

At the request of Mr. BOND, the name of the Senator from Tennessee (Mr. Grassley) was added as a cosponsor of S. 1063, a bill to amend the Internal Revenue Code of 1986 to simplify certain provisions applicable to real estate investment trusts.

S. 1076

At the request of Mr. BOND, the name of the Senator from Tennessee (Mr. Frist) was added as a cosponsor of S. 1076, a bill to require the Secretary of Labor to wait for completion of a National Academy of Sciences study before promulgating a standard, regulation or guideline on ergonomics.

SENATE JOINT RESOLUTION 21

At the request of Ms. SNOWE, the names of the Senator from New Mexico (Mr. Domenici), the Senator from Montana (Mr. Burns), the Senator from Mississippi (Mr. Lott), the Senator from Tennessee (Mr. Baucus), the Senator from Mississippi (Mr. Cochran), the Senator from Alabama (Mr. Sessions), the Senator from Tennessee (Mr. Grassley), the Senator from West Virginia (Mr. Byrd), and the Senator from Hawaii (Mr. Akaka) were added as cosponsors of Senate Joint Resolution 21, a joint resolution to designate September 29, 1999, as “Veterans of Foreign Wars of the United States Day.”

SENATE RESOLUTION 59

At the request of Mr. LAUTENBERG, the names of the Senator from Massachusetts (Mr. Kennedy), the Senator from Michigan (Mr. Levin), and the Senator from Indiana (Mr. Bayh) were added as cosponsors of Senate Resolution 59, a bill designating both July 2, 1999, and July 2, 2000, as “National Literacy Day.”

SENATE RESOLUTION 103

At the request of Mr. HUTCHINSON, the name of the Senator from North Carolina (Mr. Helms) was added as a cosponsor of Senate Resolution 103, a
Whereas 633 Americans have met the criteria for eligibility to be honored by the "In Memory" Program; and

Whereas the Americans who have been named by the "In Memory" Program are honored each year during a ceremony at the Vietnam Veterans Memorial: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring). That it is the sense of Congress that "In Memory" Day should be observed on the third Monday in April each year, the day on which Patriots Day is also observed, in honor of the men and women of the United States whose deaths had a basis in their service in Vietnam during the Vietnam War and who are thereby true examples to the Nation of patriotism and sacrifice.

Mr. SPECTER. Mr. President, today I submit a concurrent resolution which would express the Sense of the Congress that the third Monday in April be designated "In Memory Day." In Memory Day will be a time for family and friends to gather and commemorate the supreme sacrifice made by their loved ones as their names are read from the In Memory Honor Roll at the Vietnam Veterans Memorial, as was done most recently on April 19, 1999. I feel this to be a small yet fitting tribute to those whose lives were ultimately claimed by the war in Vietnam.

The Vietnam Veterans Memorial is a solemn reminder that the defense of liberty is not without loss. The 58,214 servicemembers who gave their lives in Vietnam will forever be memorialized in a most fitting manner. Their names, inscribed in granite walls, symbolize the reality that our nation's military personnel protects America behind walls built with the blood of patriots. We must keep them in our memory always.

Not all of those who died, however, are commemorated on the Vietnam Veterans Memorial. Unaccounted for are those succumbed to the ravages of psychological wounds upon their return home. Unaccounted for are all those who died after war's end, yet whose deaths were intrinsically linked to wartime service. Their family members and loved ones have no wall to go to; no names to touch; no memorial to share.

The Vietnam Veterans Memorial Fund (VVMF) runs an "In Memory Program" to honor these silent fallen. As part of this program the VVMF keeps an "In Memory Honor Roll" to commemorate those who served and died prematurely, but whose deaths do not fit the parameters for inclusion upon the Wall. It is time for Congress to do its part in honoring these brave soldiers and their families.

WHEREAS to date 633 Americans have met the criteria for eligibility to be honored by the "In Memory" Program; and

WHEREAS the Americans who have been named by the "In Memory" Program are honored each year during a ceremony at the Vietnam Veterans Memorial: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring). That it is the sense of Congress that "In Memory" Day should be observed on the third Monday in April each year, the day on which Patriots Day is also observed, in honor of the men and women of the United States whose deaths had a basis in their service in Vietnam during the Vietnam War and who are thereby true examples to the Nation of patriotism and sacrifice.

Mr. SPECTER. Mr. President, today I submit a concurrent resolution which would express the Sense of the Congress that the third Monday in April be designated "In Memory Day." In Memory Day will be a time for family and friends to gather and commemorate the supreme sacrifice made by their loved ones as their names are read from the In Memory Honor Roll at the Vietnam Veterans Memorial, as was done most recently on April 19, 1999. I feel this to be a small yet fitting tribute to those whose lives were ultimately claimed by the war in Vietnam.

The Vietnam Veterans Memorial is a solemn reminder that the defense of liberty is not without loss. The 58,214 servicemembers who gave their lives in Vietnam will forever be memorialized in a most fitting manner. Their names, inscribed in granite walls, symbolize the reality that our nation's military personnel protects America behind walls built with the blood of patriots. We must keep them in our memory always.

Not all of those who died, however, are commemorated on the Vietnam Veterans Memorial. Unaccounted for are those succumbed to the ravages of psychological wounds upon their return home. Unaccounted for are all those who died after war's end, yet whose deaths were intrinsically linked to wartime service. Their family members and loved ones have no wall to go to; no names to touch; no memorial to share.

The Vietnam Veterans Memorial Fund (VVMF) runs an "In Memory Program" to honor these silent fallen. As part of this program the VVMF keeps an "In Memory Honor Roll" to commemorate those who served and died prematurely, but whose deaths do not fit the parameters for inclusion upon the Wall. It is time for Congress to do its part in honoring these brave soldiers and their families.

CONGRESSIONAL RECORD—SENATE

10777

(c) REPORT REQUIREMENT.—
(1) Not later than July 30, 1999, the President shall submit to the Committee on Armed Services of the Senate and the Committee on National Security of the House of Representatives, and to the Committees on Appropriations of both Houses, a report on the basis for terminating the ongoing global missions to the United States is contributing troops.

The President shall include in the report:
(I) a proposal for shifting resources from low priority missions in support of higher priority missions;
(II) a proposal for consolidating or reducing U.S. troop commitments where possible;
(III) a proposal to reduce U.S. troop commitments worldwide;
(IV) a proposal for ending low priority missions.

FRIST AMENDMENT NO. 390

(Ordred to lie on the table.)

Mr. FRIST submitted an amendment intended to be proposed by him to the bill, S. 1059, supra; as follows:

On page 254, between lines 3 and 4, insert the following:

SEC. 767. PARTICIPATION OF ADDITIONAL MEMBERS OF THE MARYLAND MONTGOMERY GI BILL PROGRAM.

(a) PARTICIPATION AUTHORIZED.—(1) Subchapter II of chapter 30 of title 38, United States Code, is amended by inserting after section 3018(b) the following new section:

"§ 3018D. Opportunity to enroll: certain VEAP participants; active duty personnel not previously enrolled

(a) Notwithstanding any provision of law, an individual who—

"(1) either—

"(A) is a participant on the date of the enactment of this section in the educational benefits program provided by chapter 32 of this title; or

"(B) has made an election under section 3011(c)(1) or 3012(d)(1) of this title not to receive educational assistance under such section; and has not withdrawn that election under section 3011(a)(1) of this title as of such date;

"(2) is serving on active duty (excluding periods referred to in section 3011(c)(1)(A)) on such date; and

"(3) before applying for benefits under this section, has completed the requirements of a secondary school diploma (or equivalency certificate) or has successfully completed the equivalent of 12 semester hours in a program of education leading to a standard college degree;

"(4) if discharged or released from active duty on the date on which the individual makes the election described in paragraph (3), is discharged with an honorable discharge or released with service characterized as honorable by the Secretary concerned; and

"(5) during the one-year period beginning on the date of the enactment of this section, makes an irrevocable election to receive educational assistance under chapter II of chapter 30 of that title is amended by inserting after the item relating to section 3018C '3018D.'

(b) CONFORMING AMENDMENT.—Section 3018D of this title shall be inserted into section 3018C and section 3018D of this title.

(c) SENSE OF CONGRESS.—It is the sense of Congress that any law enacted after the date of enactment of this Act which includes provisions terminating or reducing the contributions of members of the Armed Forces for basic educational assistance under subchapters II of chapters 31 and 32 of the United States Code, should terminate or reduce by an identical amount the contributions of the Armed Forces for basic educational assistance under subchapter II of chapter 32 of this title, as added by subsection (a).

(d) TERMINATION OF TRIANA PROGRAM OF NASA.—(1) The Administrator of the National Aeronautics and Space Administration shall terminate the Triana program.

(2) Notwithstanding any other provision of law, no funds authorized to be appropriated for the National Aeronautics and Space Administration fiscal year 2000 may be obligated or expended for the Triana program, except $2,500,000 which shall be available for obligations and expenditures in that fiscal year only for the costs of termination of the program.

THURMOND (AND OTHERS)

AMENDMENT NO. 391

(Ordered to lie on the table.)

Mr. THURMOND, Mr. MZCOIL, Mr. MCCAIN, Ms. COLLINS, Mr. HUTCHINSON, Mr. CLELAND, Mr. COCHRAN, Mr. BURNS, Mr. LOTT, Mr. MACK, and Ms. SNOWE) submitted an amendment intended to be proposed by them to the bill, S. 1059, supra, as follows:

In title VI, at the end of subtitle D, add the following:

"SEC. 659. COMPUTATION OF SURVIVOR BENEFITS.

(a) INCREASED BASIC ANNUITY.—(1) Subsection (a)(1)(B)(i) of section 1451 of title 10, United States Code, is amended by striking "35 percent of the base amount," and inserting "the product of the base amount and the percent applicable for the month." The percent applicable for a month is 35 percent for months beginning on or before the date of the enactment of the National Defense Authorization Act for Fiscal Year 2000, 40 percent for months beginning after such date and before October 1, 2004, and 45 percent for months beginning after September 30, 2004.

(2) Subsection (a)(3)(B)(i) of such section is amended by striking "35 percent" and inserting "the percent specified under subsubsection (a)(1)(B)(i) as being applicable for the month".

(c) SUBSEQUENT PAYMENTS.—Subsection (c)(1)(B)(i) of such section is amended—

(A) by striking "35 percent" and inserting "the percent specified under subsubsection (a)(1)(B)(i) as being applicable for the month"; and

(B) by adding at the end the following:

"(c) SENSE OF CONGRESS.—It is the sense of Congress that any law enacted after the date of the enactment of this Act which includes provisions terminating or reducing the contributions of members of the Armed Forces for basic educational assistance under subchapter II of chapter 32 of the United States Code, should terminate or reduce by an identical amount the contributions of members of the Armed Forces for basic educational assistance under subchapter II of chapter 32 of this title, as added by subsection (a).
SEC. 2822. AUTHORITY TO CARRY OUT BASE CLOSURE ROUND COMMENCING IN 2001.

(a) COMMISSION MATTERS.

(1) APPOINTMENT.—Subsection (c)(1) of section 2902 of the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101–510; 10 U.S.C. 2677 note) is amended—

(A) in paragraph (2), by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively; and

(B) by inserting after paragraph (3) the following new paragraph (4):

“(4) In making recommendations to the Commission under this subsection in 2001, the Secretary shall consider any notice received from a local government in the vicinity of a military installation that the government would approve of the closure or realignment of such installation under subparagraph (B) of paragraph (2) of section 2905(b) of that Act and determine to be the most cost-effective method of implementation of the recommendation.”;

(2) CLOSURE AND REALIGNMENT OF INSTALLATIONS.—Section 2904(a) of that Act is amended—

(A) by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively; and

(B) by inserting after paragraph (3) the following new paragraph (4):

“(4) In making recommendations to the Commission under this subsection in 2001, the Secretary shall consider any notice received from a local government in the vicinity of a military installation that the government would approve of the closure or realignment of such installation under subparagraph (B) of paragraph (2) of section 2905(b) of that Act and determine to be the most cost-effective method of implementation of the recommendation.”;

(3) DEPARTMENT OF DEFENSE RECOMMENDATIONS.—Subsection (c) of such section 2903 is amended—

(A) in paragraph (1), by striking “and by no later than March 1, 2001, for purposes of activities of the Commission under this part that commence in 2001,” after “December 31, 1990,” and

(B) in paragraph (2)(A)—

(i) in the first sentence, by inserting “or after April 15, 2001, for purposes of activities of the Commission under this part that commence in 2001,” after “February 1, 2000, in the case of recommendations in 2000,”;

(ii) in the second sentence, by inserting “or before March 30, 2001,” after “before the election, may not exceed 20 percent for months beginning after that date,”;

(iii) by striking “before October 2004, and 10 percent for months beginning after September 2004.”;

(c) RECOMPUTATION OF ANNUITIES.—(1) Effective on the first day of each month referred to in subsection (a), and is payable for that month shall be recomputed so as to be equal to the amount that would be in effect if the percent applicable for that month under that provision, as so amended, had been used for the initial computation of the annuity; and

(2) The requirements for recomputation of annuities under paragraph (1) apply with respect to the following:

(A) each annuity under section 1450 of title 10, United States Code, that commenced before that month, is computed under a provision of section 1451 of that title amended by subsection (a), and is payable for that month shall be recomputed so as to be equal to the amount that would be in effect if the percent applicable for that month under that section, as amended by this section, had been used for the initial computation of the annuity; and

(B) each supplemental survivor annuity under section 1457 of such title that commenced before that month and is payable for that month shall be recomputed so as to be equal to the amount that would be in effect if the percent applicable for that month under that section, as amended by this section, had been used for the initial computation of the supplemental survivor annuity.

(3) TRANSMITTAL.—Subsection (c) of section 1460 of title 10, United States Code, as so amended, had been used for the initial computation of the annuity; and

(4) ELECTIONS.—Subsection (e) of that section is amended by striking “and” and inserting “or” in paragraphs (6) and (7), and (8), respectively.

(5) REVIEW BY PRESIDENT.—Subsection (e) of such section 2903 is amended—

(A) in paragraph (1), by inserting “or by no later than May 1, 2001, in the case of recommendations in 2001,” after “pursuant to subsection (c),”;

(B) in paragraph (4), by inserting “or after February 1, 2002, in the case of recommendations in 2001,” after “under this subsection,”;

(C) in paragraph (5)(B), by inserting “or by no later than October 15 in the case of such recommendations in 2001,” after “such recommendations,”;

(6) TECHNICAL AND CLARIFYING AMENDMENTS.—Subsection (d) of such section 2903 is amended—

(A) in paragraph (2)(A), by inserting “or by no later than March 15, 2002, in the case of recommendations in 2001,” after “the year concerned,” and

(B) in the second sentence of paragraph (3), by inserting “or by no later than March 15, 2002, in the case of recommendations in 2001,” after “the year concerned,”.

(G) The recommendations made by the Secretary and submitted to this Congress under this subsection in 2001, shall include a statement of the result of the consideration of any notice described in subparagraph (A) that is received with respect to an installation covered by such recommendation, the statement shall set forth the reasons for the result; and

(H) In paragraph (7), by redesignating—

(i) in the first sentence, by striking “paragraph (5)(B)” and inserting “paragraph (6)(B);” and

(ii) in the second sentence, by striking “24 hours” and inserting “48 hours.”

(G) The recommendations made by the Secretary and submitted to this Congress under this subsection in 2001, shall include a statement of the result of the consideration of any notice described in subparagraph (A) that is received with respect to an installation covered by such recommendation, the statement shall set forth the reasons for the result; and

(H) In paragraph (7), by redesignating—

(i) in the first sentence, by striking “paragraph (5)(B)” and inserting “paragraph (6)(B);” and

(ii) in the second sentence, by striking “24 hours” and inserting “48 hours.”

(G) The recommendations made by the Secretary and submitted to this Congress under this subsection in 2001, shall include a statement of the result of the consideration of any notice described in subparagraph (A) that is received with respect to an installation covered by such recommendation, the statement shall set forth the reasons for the result; and

(H) In paragraph (7), by redesignating—

(i) in the first sentence, by striking “paragraph (5)(B)” and inserting “paragraph (6)(B);” and

(ii) in the second sentence, by striking “24 hours” and inserting “48 hours.”
Mr. ROBERTS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, May 25, 1999 at 2:15 p.m. to hold a hearing.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. ROBERTS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, May 25, 1999 at 10 a.m. in room 226 of the Senate Dirksen Office Building in Washington, DC.

The purpose of this hearing is to receive testimony on the report of the National Recreation Lakes Study Commission.

Those wishing to testify or who wish to submit written statements should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510. For further information, please call Kelly Johnson at (202) 224-457.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. ROBERTS. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be granted permission to meet during the session of the Senate on Tuesday, May 25, for purposes of conducting a full committee hearing which is scheduled to begin at 10 a.m. The purpose of this hearing is to receive testimony on State Progress in Retail Electricity Competition.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. ROBERTS. Mr. President, I ask unanimous consent that the full Committee on Environment and Public Works be granted permission to conduct a hearing on reauthorization of the Comprehensive Environmental Response, Liability and Compensation Act of 1980, Tuesday, May 25, 10 a.m., Hearing Room (SD–406).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. ROBERTS. Mr. President, the Finance Committee requests unanimous consent to conduct a hearing on Tuesday, May 25, 1999 beginning at 10 a.m. in room 215 Dirksen.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL MISSING CHILDREN’S DAY

Mr. GRAMS. Mr. President, I rise today to promote awareness of missing children and honor those who selflessly work to search and rescue the thousands of children who disappear each year. As my colleagues may know, today is recognized as “National Missing Children’s Day.”

According to a recent U.S. Department of Justice study, annually there are over 114,000 attempted abductions of children by nonfamily members, 4,500 child abductions reported to police, and 438,200 children who are lost, injured, or otherwise missing. These numbers are truly cause for concern by all Americans.

As a parent, I believe local communities, schools, faith-based organizations and law enforcement should be encouraged to work together to protect the most vulnerable members of our society—children. From a federal perspective, I am proud to be a cosponsor of legislation to reauthorize the National Center for Missing and Exploited Children and the Runaway and Homeless Youth Program through the next five years. The National Center for Missing and Exploited Children operates under a Congressional mandate and works in conjunction with the U.S. Department of Justice’s Office of Juvenile Justice on Delinquency Prevention. I know my colleagues would agree that the Center has an outstanding record of safely recovering missing children across the country, and most recently achieved a 91 percent recovery rate.

Mr. President, as we remember the many missing children across the nation today, I want to especially recognize the relentless work and effort to protect our nation’s children by Minnesota’s Jacob Wetterling Foundation.

The Foundation was established by Jerry and Patty Wetterling after their son, Jacob, was abducted by a masked man at gunpoint near the Wetterling home in St. Joseph, Minnesota. Today, the Jacob Wetterling Foundation is a national, non-profit foundation committed to preventing the exploitation of children through educating, raising awareness and responding to families who are victims of abduction.

Mr. President, our children represent our future and we must continue our work to keep them safe. Again, I commend the numerous volunteers, organizations, and government agencies who all work on a daily basis to find missing children and prevent others from disappearing.
TRIBUTE TO RUTH A. GELLER

Mr. LIEBERMAN. Mr. President, I rise today to pay a well-deserved tribute to Ruth A. Geller, MSW on the occasion of her retirement from the Connecticut Mental Health Center after 25 years of service as a psychiatric social worker supervisor.

Ruth has demonstrated exceptional compassion, dedication, and professionalism in caring for the severely, chronically mentally impaired of Connecticut. As a mentor and teacher, Ruth has trained a generation of mental health professionals with the same devotion she has brought to her clinical work. As a result, Ruth has instilled in them the ability to become respectful, empathetic mental health providers.

I am proud to stand before the Senate to congratulate Ruth Geller upon her retirement and thank her for an outstanding career which has enhanced the lives of so many. I wish her continued success in the years ahead.

TRIBUTE TO IRENE AUBERLIN

Mr. ABRAHAM. Mr. President, I rise today to pay tribute to the late Irene Auberlin, the “Mother Teresa” of Detroit.

Mrs. Auberlin is the founder of World Medical Relief (WMR), an organization which, to date, has distributed more than $500 million worth of medical goods both in Detroit area, where she lived, and abroad.

Mrs. Auberlin was a quiet homemaker until she saw a television program about orphans in Korea in 1953. She provided supplies to the nuns who ran the orphanage, thus beginning over 46 years of service to the poor. Since then, WMR has sent food, medical equipment, and supplies throughout the United States and to over 120 countries. In 1966, WMR began a monthly prescription program that still exists today, providing medicine to elderly poor in the Detroit area.

Mrs. Auberlin received over 60 awards and commendations, including The President’s Volunteer Action Award and Silver Medal, presented to her by President Reagan.

On behalf of the residents of Michigan, the United States, and elsewhere, I want to thank Irene for all that she did to help those in need.

NATIONAL BLUE RIBBON SCHOOLS IN MARYLAND

Mr. SARBAKES. Mr. President, I am pleased to announce that ten elementary schools throughout Maryland have been named Blue Ribbon School Award winners by the United States Department of Education. These schools are among only 266 elementary schools nationwide to be honored with this award, the most prestigious national school recognition for public and private schools.

The designation as a Blue Ribbon School is a ringing endorsement of the successful techniques which enable the students of these schools to succeed and achieve. Over the past few years, I have made a commitment to visit the Blue Ribbon Schools and have always been delighted to see first hand the interaction between parents, teachers, and the community, which strongly contributed to the success of the school. I look forward to visiting each of these ten schools and congratulating the students, teachers and staff personally for this exceptional accomplishment.

According to the Department of Education, Blue Ribbon Schools have been judged by being particularly effective in meeting local, state and national goals. These schools also display the qualities of excellence that are necessary to prepare our young people for the challenges of the next century. Blue Ribbon status is awarded to schools which have strong leadership; a clear vision and sense of mission that is shared by all connected with the school; high quality teaching; challenging, up-to-date curriculum; policies and practices that ensure a safe environment conducive to learning; a solid commitment to family involvement; evidence that the school helps all students achieve high standards; and a commitment to share the best practices with other schools.

After a screening process by each State Department of Education, the Department of Defense Dependent Schools, the Bureau of Indian Affairs, and the Council for American Private Education, the Blue Ribbon School nominations were forwarded to the U.S. Department of Education. A panel of outstanding educators from around the country then reviewed the nominations, conducted site visits, and made recommendations to Secretary of Education Richard Riley.

The ten winning Maryland elementary schools are as follows:

- Ashburton Elementary School, located in Bethesda, is home to 515 students and 64 staff members which provide for a richly diverse school community with an exemplary record of student achievement and an outstanding academic program. This award also credits the SHINE Program—Successful, Helpful, Imaginative, Neighborly, and Enthusiastic—with recognizing students who participate positively in the school community.
- Brook Grove Elementary School, located in Olney, not only has a commendable academic strategy, but also is recognized as a school that encourages excellence in the arts and in athletics, and values individuality and diversity as critical to the well-being of the student body.
- Our Lady of Mercy School is a co-educational Catholic school in Poto-

CONGRESSIONAL RECORD—SENATE

REMARKS BY RICHARD D. FAIRBANK, VIRGINIA CHAMBER OF COMMERCE CONGRESSIONAL DINNER, APRIL 29, 1999

Mr. ROBB. Mr. President, Richard D. Fairbank, Chairman and Chief Executive Officer of Capital One Financial Corporation, delivered remarks at the Virginia Chamber of Commerce Congressional Dinner last month. Capital One, headquartered in Falls Church, Virginia, is one of the fastest growing private employers in my state. Mr. Fairbank’s remarks offered invaluable insight into the challenges and opportunities the technology revolution is producing in both the private and public sectors, and I ask that they be printed in the RECORD.

The remarks follow:

REMARKS BY RICHARD D. FAIRBANK, VIRGINIA CHAMBER OF COMMERCE CONGRESSIONAL DINNER, APRIL 29, 1999

Mr. Fairbank delivered remarks at the Virginia Chamber of Commerce Congressional Dinner, April 29, 1999.

Members of Congress, distinguished guests, ladies and gentlemen. Let me first take the opportunity to thank the Virginia Chamber for supporting Virginia’s business community. It is an honor to join you this evening to share a bit of the Capital One story and give you my thoughts about the challenges facing the Virginia business community as we move into the 21st Century.

First, a comment about Virginia. What a wonderful state we live in! I am reminded of that everyday. The irony is, Virginia was never a state I was supposed to live in. I grew up in California, and thought I would always live in California. When I graduated from business school, I applied only to California firms, except for one company in D.C., and only because they were just about to start a San Francisco office. When my wife and I came out here, we fell in love with Virginia, and never left. Virginia has a wonderful climate and culture. So now we’ve been Virginians for 18 years, and we’re here to stay. My wife and I and our four children live right here in Fairfax County.

And our larger family—our Capital One family—now numbers 8,000 associates in Virginia—In Richmond, Chesterfield, Fredericksburg and Northern Virginia. Our associates have a wonderful blend of Southern charm and tradition mixed with a very positive spirit that believers in possibility. It’s a magical combination. It is amazing to know that for a capital one employee, the top 100 companies have exploited opportunities that we would have never found. It’s a wonderful blend of Southern charm and tradition.

The greatest challenge for Virginia’s rapidly growing companies is to attract and retain the most talented employees. When making critical decisions about investing in future, the first step is to convince Virginia’s companies to invest in the state’s school system. Schools are critical to the future prosperity of any state. The economic success of any state is closely linked to the quality of its workforce. Washington, D.C., is leading the way in improving the quality of its public schools. Virginia has a state-of-the-art online school. There are nearly 25,000 fully trained technology related jobs in Northern Virginia.

Mr. Fairbank. Mr. President, Richard D. Fairbank. Chairman and Chief Executive Officer of Capital One Financial Corporation, delivered remarks at the Virginia Chamber of Commerce Congressional Dinner last month. Capital One, headquartered in Falls Church, Virginia, is one of the fastest growing private employers in my state. Mr. Fairbank’s remarks offered invaluable insight into the challenges and opportunities the technology revolution is producing in both the private and public sectors, and I ask that they be printed in the RECORD.

The remarks follow:

REMARKS BY RICHARD D. FAIRBANK, VIRGINIA CHAMBER OF COMMERCE CONGRESSIONAL DINNER, APRIL 29, 1999

Mr. Fairbank delivered remarks at the Virginia Chamber of Commerce Congressional Dinner, April 29, 1999.

Members of Congress, distinguished guests, ladies and gentlemen. Let me first take the opportunity to thank the Virginia Chamber for supporting Virginia’s business community. It is an honor to join you this evening to share a bit of the Capital One story and give you my thoughts about the challenges facing the Virginia business community as we move into the 21st Century.

First, a comment about Virginia. What a wonderful state we live in! I am reminded of that everyday. The irony is, Virginia was never a state I was supposed to live in. I grew up in California, and thought I would always live in California. When I graduated from business school, I applied only to California firms, except for one company in D.C., and only because they were just about to start a San Francisco office. When my wife and I came out here, we fell in love with Virginia, and never left. Virginia has a wonderful climate and culture. So now we’ve been Virginians for 18 years, and we’re here to stay. My wife and I and our four children live right here in Fairfax County.

And our larger family—our Capital One family—now numbers 8,000 associates in Virginia—In Richmond, Chesterfield, Fredericksburg and Northern Virginia. Our associates have a wonderful blend of Southern charm and tradition mixed with a very positive spirit that belief
And new economic realities lead to new political policies. Our public policies must give this new technology and way of doing business time to develop. For example, as the Internet revolution is exploding, some states have already imposed a tax on Internet transactions. I believe that would be a big mistake. I know that Governor Gilmore is currently leading a Commission to study e-commerce and Internet taxation issues on the national level. Their decisions can have a lot of impact on a rapidly growing industry still in its infancy. With sound legislation, such as restrictive policies, we have the leadership companies are better positioned to grow and attract consumers into this new business channel.

All these new technologies also bring a need to act responsibly with our customers’ privacy. That means proper privacy policy to ensure that our customers’ personal information is used appropriately with very clear limitations.

While we must be vigilant about consumers’ privacy, I believe that restrictive legislation can’t predict the future. But, I believe that companies like Capital One, who use it to tailor products for the individual consumer at the best possible price. It’s why we have been able to help bring down the cost of credit cards and other products—and simplify the process of obtaining them. The same is true for the Richmond-based grocery store, UKROPs. Getting the thousands of other companies. We must find a balance between the clear economic benefits that derive from access to information and the responsibilities we all owe to our customers to safeguard their personal information. Companies need to lead the way. Like many companies, Capital One has developed a comprehensive privacy policy to ensure that our customers’ personal information is used appropriately with very clear limitations.

We must find a balance between the clear economic benefits that derive from access to information and the responsibilities we all owe to our customers to safeguard their personal information. Companies need to lead the way. Like many companies, Capital One has developed a comprehensive privacy policy to ensure that our customers’ personal information is used appropriately with very clear limitations.

We also must be prepared to meet the basic day-to-day demands that a fast-growing economy will place on our nation and its communities. While technology and e-commerce are making the world a smaller place, the reality is that people will still need to get to work. With a healthy national economy and low unemployment, our workers have choices. If they cannot get to and from their place of work, they and the highly skilled individuals will relocate. You can read the survey results or simply talk to your employees: transportation is most often cited as the number one quality-of-life issue by the workers thinking about relocating to Northern Virginia. Thanks to the hard work of the Virginia Delegation more Federal dollars are flowing to Virginia than ever before for transportation. We must continue to work together to address this issue.

So those are a few of my thoughts of the biggest challenges and opportunities we face as we move into the 21st century. The world is changing so fast, it’s hard to make sense of it all, and to know where we all fit in. We can’t predict the future. But, I believe that one can identify a few trends that are absolutely inexcusable. The story of Capital One is an example of doing that. The key for Capital One has been to see a few of those inexcusable trends and try to get them first. No matter what it took, Whether or not we had the skills or market portion to make it happen. Because we had destiny on our side.

Many people and many companies and many politicians don’t think this way. They tend to think incrementally. That’s a risky cause of action in a world that’s changing so fast. Virginia is in a great position to lead the way. The Internet is at the desk, and I ask that it be read the first time.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 26) expressing the sense of Congress with respect to the court-martial conviction of the late Rear Admiral Charles Butler McVay, III, and calling upon the President to award a Presidential Unit Citation to the final crew of the U.S.S. Indianapolis.

Ms. SNOWE, Mr. President, I now ask for its second reading and object to my own request.

The PRESIDING OFFICER. Objection is heard.

The joint resolution will be read for the second time on the next legislative day.

Faster QUALITY ACT
AMENDMENTS ACT OF 1999

A bill (H.R. 1183) to amend the Fastener Quality Act to strengthen the protection against the sale of mislacked, misrepresented, and counterfeit fasteners and eliminate unnecessary requirements, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Ms. SNOWE, Mr. President, I ask unanimous consent that the Senate now proceed to consider H.R. 1183, which is at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1183) to amend the Fastener Quality Act to strengthen the protection against the sale of mislacked, misrepresented, and counterfeit fasteners and eliminate unnecessary requirements, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Ms. SNOWE, Mr. President, I ask unanimous consent that the bill be considered read a third time and passed, the motion to reconsider be laid upon the table, and that any statements relating to the bill be printed in the Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1183) was read the third time and passed.

ORDERS FOR MAY 26, 1999

Ms. SNOWE, Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 9:30 a.m. on Wednesday, May 26. I further ask that the morning hour be deemed to have expired, and the time for the two leaders be reserved for the two leaders to consider the bill.

Ms. SNOWE. Mr. President, I ask unanimous consent that the Senate then resume the DOD authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.
Ms. SNOWE. Mr. President, for the information of all Senators, the Senate will resume consideration of the Department of Defense authorization bill at 9:30 a.m. and expect to debate an amendment by Senator BROWNBACK regarding Pakistan, to be followed by an amendment by Senator KERREY of Nebraska regarding the strategic nuclear development system. Under a previous consent, at 11:45 a.m., the Senate will resume consideration of the BRAC amendment. At least one vote will occur in relation to the BRAC amendment at 1:45 p.m. Therefore, Senators should expect the next vote to occur at 1:45 p.m. on Wednesday. Senators who have amendments are urged to notify the two managers. It is the intention of the leadership to complete action on this bill prior to the scheduled Memorial Day recess.

Ms. SNOWE. Mr. President, if there is no further business to come before the Senate, I now ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 8:52 p.m., adjourned until Wednesday, May 26, 1999, at 9:30 a.m.
The House met at 9 a.m.

MORNING HOUR DEBATES

The SPEAKER. Pursuant to the order of the House of January 19, 1999, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to 25 minutes, and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes each, but in no event shall debate be continued beyond 9:50 a.m.

THE JUVENILE JUSTICE BILL

The SPEAKER pro tempore (Mr. CHABOT). Under the Speaker's announced policy of January 19, 1999, the gentleman from Illinois (Mr. HASTERT) is recognized during morning hour debates for 5 minutes.

Mr. HASTERT. On behalf of the elected entire Republican leadership, I rise today to talk about the efforts of the House to respond to the national crisis surrounding violence in our schools.

Last week's shooting in Conyers, Georgia, only reinforced the fears of many parents about the safety of the schools which their children attend. Studies show that our Nation's schools on average are safer than ever, but average means nothing to the mothers and fathers who send their children to school every day. They want more from us, and we will provide more.

Last week the other body passed legislation that responded in part to the situation in our schools. Part of that legislative response included gun control legislation.

We support commonsense legislation that keeps guns out of the hands of unsupervised children. We support tightening laws to bring uniformity between gun shows and gun shops. We support instant background checks at gun shows.

We intend to bring these measures to the floor of the House, and I believe they will pass, but passing these measures is only part of the solution.

As I said on this floor last week, our children need to learn the differences between right and wrong. They need moral instruction, and they need a culture that reinforces positive values that help create a safer and more secure society.

What happened in Littleton, Colorado, and Conyers, Georgia, are genuine national tragedies. It is natural that they should spur us to action, but it is wrong for anyone to simply try to score political points as a result of these tragedies.

I take a back seat to no one in this Congress when it comes to a desire to make our schools safer. I specifically spoke about our schools from this well in my first speech as Speaker.

I taught high school for 16 years before entering public life. My two boys graduated from public high school not that long ago. My wife goes to work every day in a public school, just as she has for the last 33 years. I want her and the children she teaches to be safe.

Last week, in consultation with the minority leadership, we developed a timetable for consideration of a juvenile justice bill that would make our schools safer. It was a very constructive meeting. I thought we had mapped out a very responsible, straightforward approach to handling this issue by prompt action of the authorizing committee, not riders on unrelated appropriation bills.

Unfortunately, it appears that despite the best efforts at the leadership level, more partisan elements are continuing to press for quicker, ill-considered action this week. We continue to believe, just as we proposed last week, that we should consider this bill in a timely yet responsible way.

In order to responsibly expedite matters, I asked the Committee on the Judiciary to move up its hearing on this issue by 3 weeks. They agreed, and will start hearings this Thursday.

I asked the gentleman from Illinois (Mr. HYDE) to be prepared to mark up legislation the first week we get back from the Memorial Day district work period so it could be ready for the floor the following week. Again, this was much faster than originally proposed. He has agreed to do so.

Later today he and the chairman of the Subcommittee on Crime, the gentleman from Florida (Mr. McCOLLUM) will announce an outline of our youth violence legislation.

This legislation will focus on making our schools and our streets safer by prosecuting those who break the current gun laws. It will keep lawbreakers in jail longer. It will enact a zero tolerance policy for children who bring guns to school, and it will make sure that dangerous juveniles will not be able to buy guns lawfully when they become adults, and that we have open and complete juvenile records to help us keep guns out of their hands.

When we consider this legislation, the House will be able to work its will regarding certain provisions from the Senate package, just as I had assured the minority leader last week.

The House will vote on trigger locks, background checks at gun shows, and closing the gun purchasing loophole. We will expedite this legislation, but we will not force it through the system without the proper consideration of the Committee on the Judiciary.

Some of my colleagues, sensing an advantage, may try to go outside of the rules of the House and attach ill-considered riders to legislation not relevant to the juvenile justice issue. That would be a mistake. I know emotions are running high, but let us be honest about this. Even if we did pass legislation this week, it would still be the middle of June at the earliest before we could send a bill to the White House.

 Pretending otherwise, and promising the victims of these terrible tragedies something else, does a tremendous disservice not only to us and to our institution, but to the very people we are trying to protect.

Our Nation's schoolchildren deserve to attend the safest, most secure schools that we can provide, and the parents of our children should rest secure in the knowledge that everything is being done within our powers, both as citizens and legislators, to create precisely that environment.

This is not the time to play on the fears of our most vulnerable. This is the time for aggressive yet responsible leadership, one in which we can think carefully and examine all of the issues before we go off half-informed, searching for the snappiest sound bite rather than working together to develop the best legislation that we can.

This is one of those rare times when the national consensus demands that we act, but it does not require us to rush to judgment, to risk compounding the situation by stampeding toward what sounds like the best way to score points against each other. We can do better than that, and I am determined to see that we will.

By cooperating, we can get a bill to the White House promptly, while making sure that the policies are ready to be enforced when schools reopen in September. The Nation's eyes have turned towards us, looking for responsible leadership. We must resist the temptation to score political points at the expense of the lives and families of our Nation's children.
THE FUTURE OF SOCIAL SECURITY

The SPEAKER pro tempore (Mrs. MYRICK). Under the Speaker's announced policy of January 19, 1999, the gentleman from Puerto Rico (Mr. ROMERO-BARCELÓ) is recognized during morning hour debates for 5 minutes.

Mr. ROMERO-BARCELÓ. Madam Speaker, when the House of Representatives debated legislation on Puerto Rico's self-determination, opponents argued that Puerto Ricans had a different culture, too alien from the rest of the Nation to become a partner. But they were wrong. The ones that are not mainstream are those that subscribe to a nationalist mindset. Have they listened to the radio? Have they watched a ballgame? Have they checked out who is doing art for the Treasury Department, or have they read Time Magazine lately?

Last week's cover of Time featured Puerto Rican pop star Ricky Martin, who boasts the number one song in America. The same article highlighted two other Puerto Rican pop culture superstars, salsa singer Mark Anthony and actress-singer Jennifer Lopez.

Last year, baseball's American League recognized Puerto Rican Juan "Igor" Gonzalez of the Texas Rangers as its most valuable player, and 11-year-old Laura Hernandez from Puerto Rico is this year's First Place National Winner of the United States Savings Bond Poster Contest.

Right here next to Washington, D.C., in the Goddard Space Center, there are over 40 engineers and scientists who have come from Puerto Rico. They graduated from MIT; not Massachusetts Institute of Technology, but the Mayaguez Institute of Technology.

Time's May 24th cover story states, "We have seen the future. It looks like Ricky Martin. It sings like Mark Anthony. It dances like Jennifer Lopez. Que bueno." I, too, have seen the future, and I saw our flag with 51 stars. Que bueno.

THE FUTURE AMERICAN FLAG WILL HAVE 51 STARS

The SPEAKER pro tempore (Ms. DELAURO). Madam Speaker, I rose today to talk about an important issue for everyone in this country. It is social security. Everybody that is now receiving social security is concerned when Congress starts talking about changes in social security, because the fact is that one-third of the individuals that are now receiving social security depend on that social security check for 90 percent or more of their retirement income, a huge dependency. So it is easy to understand why seniors get nervous.

Everybody that is near retirement age is concerned, because they have planned their retirement and the fact is that social security is running out of money. Individuals under 55 years of age are the generation most at risk, because they may be asked to spend a lot more paying for the retirement benefits of those that retired before them.

This week we are going to discuss what has been called a lockbox for social security. It does not fix social security, but it provides that Congress promises not to spend the social security trust fund surpluses for other government programs. It is a good start, but make no mistake, it does nothing to change the fundamentals of the programs and fix social security in the long run.

Briefly, let me describe, what the problems of social security are. When we started the social security program in 1934, it was developed as a pay-as-you-go program, where existing current workers paid in their social security tax for the benefits of existing current retirees, so essentially no savings. The social security program went in one week, and by the end of the week they were sent out in benefits to retirees.

The system worked very well in the early stages because there were 42 people working for every 1 retiree receiving the social security check. But by 1956, the number of people working went down to 17 people working, sending in their social security taxes for every one retiree. Today it is 3 people working, sending in their social security taxes, for every retiree.

The estimate is that by 2030, there are only going to be 2 people working. So what we are asking those 2 people to do, without changes in the social security structure, without changes in the system, we are asking those two workers to try to earn and produce enough for their families plus one retiree; almost impossible.

The Federal Government, since it continues to raise taxes, and it has raised social security taxes 36 times since 1976, more often than once a year. Today 75 percent of our workers pay more in the social security tax than they do in income tax.
To delay this issue is politics. That is what this is about.

We have 13 children in the United States who die every single day because of gun violence. If this is not an emergency, I do not know what is an emergency. This House of Representatives has risen to occasions where there have been crises in this country. We can move on a dime. We can pass legislation in 24 hours or less if we have the will to do it.

The juvenile justice bill has been sitting in committee for the last 3 to 4 weeks. It is a bipartisan piece of legislation. It can be passed in a heartbeat if we have the will to do it. We have to pass gun safety legislation in our country if we are going to meet the pleas and the cries of American families today.

I saw a grandmother yesterday in my district in Connecticut. She lives in Connecticut, her family is in Indiana. And she said to me, “Ms. DeLauro, when you go back, please pass gun safety legislation. My two grandchildren were evacuated from their schools just last week.” And I am not the only one who is hearing the plea of the American public. Let us do what is responsible, let us respond to American families.

Last week the other Chamber did the right thing. They passed common-sense gun safety legislation. The House of Representatives this week has that opportunity. Let us take up this legislation and pass fair and sensible measures that we, in fact, know will save lives.

There are some who want to wait until mid-June. I say we have waited too long. We have done nothing despite repeated tragedies in our schools, and we sit idly by while, as I said, 13 children are killed by guns every single day.

Youth violence is a complex problem. It requires several answers. We need parental involvement, safe schools, guidance counselors, mental health services, and less violence in our media. But gun safety laws that protect children are part of a sensible response to a crisis that is killing our kids in the United States.

I call upon the Republican leadership, I call upon the Speaker of the House, to schedule that vote this week. Like the other Chamber, we must ensure that firearms are sold with child safety locks, that we have background checks at gun shows, and that a person is 21 years old before he or she buys a gun.

Let us take these steps. Our families, our children are relying on us, those of us who have been sent here to do the people’s business. Let us take the people’s House and let us be responsive to the American public this week, when they are in need of knowing that, in fact, we can represent them and their families and their children in this body. That is what our responsibility is.

My God, I hope that we are up to the task in this body.

In the last Congress we pleaded just to act on the child access protection legislation. Give us a chance to vote on it. Fifteen States have enacted it, including the State of Florida, the home State of the Chair of the Subcommittee on Violence, and it has made a difference in terms of making children safer.

I would think that, at a minimum, the Members of this body ought to come forward and demand that we vote at least on the three elements that are in the Senate legislation, pass those things out today, make that progress real; then we can come back after the recess and deal with the Speaker’s more deliberative approach on a longer-range term.

We have legislation introduced by the gentlewoman from New York (Mrs. McCarthy) that a number of people on both sides of the aisle, Republicans and Democrats, people of conscience, have signed that could be the vehicle that would deal comprehensively with these concerns.

I have legislation that I will be advancing that deals with making sure that the Product Safety Commission spends as much attention with real guns as it does with toy guns; that we would extend the prohibition against criminals having access to weapons under the Brady bill to others who have demonstrated a consistent pattern of violent behavior. This is overwhelmingly supported by the American public.

And last, but not least, that the Federal Government become a leader in personalizing guns to make sure that, for example, they cannot be used, the law enforcement service revolvers cannot be used against that man or woman in uniform. The Federal Government has a chance to make a huge difference in advancing this technology.

I find it a little ironic that the Speaker takes to the well of this Chamber urging caution and arguing against extraneous riders when we just passed an absolute abomination of a spending bill that was supposedly for the defense of our troops in Kosovo and, instead, included everything from reindeer to mining regulations. When it comes to special interests, we are willing to make exceptions, but not when it comes to our children.

I think our children ought to be the special interests. We ought to come forward with comprehensive legislation and we ought to do it now.
Pledge of Allegiance.

Mr. FOLEY led the Pledge of Allegiance.

Nuclear Secrets Stolen Under Our Nooses While Administration Does Nothing

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, today we will release the Cox report on Chinese spying activities and the impact on national security. But I say today, rather than blame the Chinese, we should reflect on our own lax standards and security.

Do the initials “CIA” ring a bell? We spend billions on similar activities around the world, but we should be more concerned with protecting our own vital national security.

If I were the White House today reading some of the headlines, “China Stole Nuclear Secrets for Bombs, White House Seeks to Minimize That Type of Problem,” then I would want to change the subject, too. I would want to talk about campaign finance reform. I would want to talk about gun control in America. I would want to do anything to change the tone and tenor of what has occurred in the United States under this administration.

We have given up valuable secrets, valuable technology, right under our noses. We were informed about it. Yet, the President denied anybody even told him anything relative to these secrets being stolen. Wake up, America. Fool me once, shame on you. Fool me twice, shame on me.

BRING JUVENILE JUSTICE BILL TO THE FLOOR NOW

(Mr. MENENDEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MENENDEZ. Mr. Speaker, sending one’s child to school should not take an act of courage. When children have died, when students have been shot sitting in class or studying at the library, when schools and communities have been torn apart, and when every American parent now worries when they send their children off to school, it is time for us to act. Not tomorrow. Not next week. Not next month. Now. Today.

There is a juvenile justice bill ready for us to consider that at least begins to address the school violence issue. Why will the Speaker not take up this bill? Is it because the NRA does not want him to? Is it because the far right in his party will not let him?

Whatever the reason, Mr. Speaker, it is not good enough. With 13 children dying each day from guns and with that gun violence spilling into our schools, his reasons are not good enough.

SUPPORT MISSING, EXPLOITED AND RUNAWAY CHILDREN’S ACT

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, in this National Missing Children’s Week, I urge my colleagues to support S. 249, the Missing, Exploited and Runaway Children’s Act.

In my own district, Jimmy Ryce and Shannon Melendi were preyed upon by monsters.

Jimmy was abducted, raped, killed, and dismembered as he walked home from his school bus stop. Jimmy’s parents channeled their grief into the establishment of the Jimmy Ryce Center.

Shannon disappeared from a softball field and was never seen again. Shannon’s parents have taken their daughter’s case to the public, pushing for stronger laws to keep sexual predators off the streets.

Shannon’s father, Luis, said, “What happened to us cannot be changed, but because of what happened to us, changes can be made.”

Passage of this bill will help protect our children from the predators who prey on our most innocent victims.

AMERICANS INSIST ON PEACEFUL NEGOTIATIONS, NOT CONTINUED BOMBING

(Mr. KUCINICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KUCINICH. Mr. Speaker, NATO’s deliberate bombing and knocking out of electric systems and water systems throughout Serbia takes the war to a new low.

NATO is assigning collective guilt to the entire population of Serbia. NATO is then exacting retribution against that civilian population. Violence cannot be redemptive.

NATO, whoever NATO is, does not represent this Congress, which voted against the bombing. The American people are opposed to this bombing. People want to know what they can do. On Sunday night in Cleveland, 400 people marched in a driving rain along the city’s largest bridge, a mile and a half procession for peace, to protest the bombing; to protest the ethnic cleansing; and to make a strong statement that we believe that the only way to resolve this is through peaceful negotiations. I say it is time to continue to insist that is the way that we resolve this war.

COX REPORT RELEASED: IT IS ABOUT TIME

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, “The Phantom Menace” is the title to the new popular Star Wars movie. But it might also be an apt description of the Chinese espionage efforts against the United States as outlined in the Cox Report.

Unlike this popular movie, however, this Chinese espionage is not fiction,
and it may have far-reaching national security consequences long into the future.

It has taken nearly 5 months of struggle and arguing with the Clinton administration to release the Cox Report. Mr. Speaker, for myself and the many concerned Nevadans that I represent, all I can say is, it is about time. It is about time that the American people found out if China's nuclear arsenal was built from the genius of the American people, on the backs of the American taxpayer. It is about time that the Americans learn if the U.S. nuclear weapons labs will meet even minimum security standards some time next year.

But it is ultimately about time that this administration accepts responsibility for its years of inaction in this unfortunate situation, and has the intestinal fortitude to make the appropriate changes.

I yield back this Chinese spy menace, Mr. Speaker, and hopefully today the phantoms will be revealed. It is about time.

**CALLING FOR RESIGNATION OF SANDY BERGER**

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, the fact is Sandy Berger is our national security advisor. The fact is Sandy Berger was once China's chief lobbyist in America. The fact is now there is a hole in our national security so big we could throw Berger and all our secrets all the way to China nonstop. Beam me up.

I am not accusing Sandy Berger of any wrongdoing. But for the good of America, Sandy Berger should resign as our national security advisor. Sandy Berger should resign very close to China. In Washington, perception becomes reality.

Mr. Speaker, I yield back any secrets we have left.

**MORE QUESTIONS ARISE ABOUT WHO KNEW WHAT REGARDING CHINESE ESPIONAGE**

(Mr. WICKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WICKER. Mr. Speaker, the long-awaited Cox Report on Chinese espionage becomes public today, and we already know many of the stunning details about the loss of our most sensitive nuclear secrets.

The President's press secretary says this goes back 20 years and there is no Democrat or Republican face on it. He is using the "everybody does it" defense. The Energy Secretary has cautioned us not to overreact.

But how should we react to the worst spy case in American history? It is clear that Clinton-Gore administration did not react at all after this was discovered, and the President briefed on this in 1995, in 1996, 1997, 1998 or 1999? If he was, why was nothing done?

Attorney General Janet Reno is being set up to be the scapegoat in this scandal, but there are a lot more questions which the Clinton administration must answer about who knew it and when they knew it.

**NATIONAL MISSING CHILDREN'S DAY**

(Mr. FARR of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FARR of California. Mr. Speaker, there is an opportunity about there being a special God for children. Certainly we would like to think that someone is watching over our young people, protecting them from harm. But, tragically, we know this is not the case.

Our community in the central coast of California lost a beautiful 13-year-old girl last year. That forever changed the lives of the Williams family and the thousands of local volunteers who donated thousands of hours searching for us.

As innocently as many of our children do every day, Christina took the family dog for a walk on June 2, 1998. Seven months later, her parents’ worst nightmare came true when her body was discovered January 12, 1999 three miles from the Williams home. The day Christina Williams’ body was found was one of the darkest days I have seen on the central coast of California.

Her family and friends said good-bye and vowed not to her daughter, sister, and friend. We had to learn to turn our anger and pain into a mission to make our community a safer place to raise our children. From our effort can hopefully come a larger recognition of the potential that a child had to offer that society.

I wear this ribbon as we observe National Missing Children's Day. I am wearing this white ribbon as a symbol as we observe National Missing Children's Day. I extend my heartfelt condolences to the family of Christina Williams and to each and every parent and family who has lost a child and pledge my efforts to be a protector of our nation's children.

**CHINESE THEFT OF NUCLEAR TECHNOLOGY HAS ADVANCED THREAT BY A GENERATION**

(Mr. CHABOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHABOT. Mr. Speaker, the Rosenbergs were executed for giving the former Soviet Union secret information which allowed them to advance their atomic weapons program by 5 years.

The Chinese theft of nuclear weapons technology which has recently occurred under this administration has advanced the threat to our Nation by a generation.

This administration loves to say we have to do this, we have to do that for the children. Think of how much American children’s lives have been endangered by this administration because of its lax security measures.

Campaign contributions from the head of the Chinese military intelligence to the Clinton administration; and this administration’s response, we need campaign finance reform. They do not even follow the laws in the books that we have now.

Now the Clinton administration seeks a war for gun control. Yet, they invite Chinese arms dealers to coffees at the White House, yes, for campaign donations. Unbelievable.

**SUPPORT SAFE PARKS ACT OF 1999**

(Mr. GREEN of Wisconsin asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREEN of Wisconsin. Mr. Speaker, our national parks are not as safe as we would expect them to be. In 1997, there were over 550 reported sex offenses in our national parks. Even more disturbing, 1997 saw 33 forceful rapes and 11 attempted rapes in those same national parks. That is a rape or attempted rape about every 8 days on Federal lands that are supposed to be safe havens for our families.

That is why I am introducing the Safe Parks Act today. It is a simple bill, barring any convicted sex offender from entering our U.S. parks.

Mr. Speaker, in honor of National Missing Children's Day, please join me in supporting this measure to help defend the sanctity of our Federal parks for our kids.

**NATIONAL SMALL BUSINESS WEEK**

(Mr. KNOLLENBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KNOLLENBERG. Mr. Speaker, this week is National Small Business Week. I rise in recognition of the important role that small businesses play in our Nation. Small businesses are vital to our economy and our communities. Just listen to some of these facts...
They account for 99.7 percent of the employers in our Nation; they employ 53 percent of the private work force and are responsible for 50 percent of the private gross domestic product in America.

Despite these enormous contributions, small businesses have to struggle under the weight of excessive taxation and unnecessary regulation handed down by the Federal Government. Clearly, I believe the time has come for Congress and the President to provide some relief to small business owners by cutting taxes and reining in overzealous regulators.

Mr. Speaker, I stand to work with both sides, all my colleagues, to promote an agenda that strengthens small business and creates new economic opportunities for the American people.

SCORE
(Mr. HEFLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HEFLEY. Mr. Speaker, I am pleased that my colleague who just spoke is emphasizing Small Business Week. This is Small Business Week. It is a time to celebrate the entrepreneurs that make the Nation's engine run. I want to take this opportunity to recognize a group of people that serve as that engine's mechanics, the Service Corps of Retired Executives, known as SCORE, which is celebrating their 35th anniversary this year.

SCORE is made up of a group of retired business executives. They volunteered their time and business expertise to counsel and advise our Nation's small business and entrepreneurs-to-be. With well over 50 percent of all new businesses failing within the first 6 years, counseling early on can make a difference between success and failure of a new business. SCORE's free counseling service does that job and it does it well.

In particular, I want to recognize the 166 SCORE volunteers in Colorado. Colorado SCORE counselors worked nearly 15,000 hours last year in support of the Colorado business community. Their support for Colorado's businesses are appreciated, and I encourage them to keep up the good work.

Milk Prices in Minnesota Should Be Set by Market
(Mr. GUTKNECHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUTKNECHT. Mr. Speaker, shortly after the hammer and sickle came down for the last time over the Kremlin, a business publication ran a column entitled, "Markets Are More Powerful Than Armies" and the 75-year experiment with government-fixed prices came to an end. But, Mr. Speaker, for 60 years we have had a convoluted milk marketing order system whereby a farmer's milk is priced based on how far they are from Eau Claire, Wisconsin. The closer they are, the less they get. It makes no economic sense. Prices are fixed based on what the milk goes into and where it comes from.

Mr. Speaker, if the Russians are willing to let the market set the price of milk in Moscow, maybe we should try it in Minnesota.

WILL CHINESE ESPIONAGE SCANDAL BE DISMISSED?
(Mr. SCHAEFFER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHAEFFER. Mr. Speaker, on March 19th of this year, the President responded, in response to a question, "To the best of my knowledge, no one has said anything to me about any espionage which occurred by the Chinese against the labs, during my presidency." Sorry, to have to ask this, but is that true? Chinese espionage was discovered in 1995.

Was the President not briefed on this in 1995?
Did no one tell him in 1996?
Was the President not told about this in 1997?

During all of 1998, did no one brief the President about these extremely grave matters?

Why did the President not read the November 1998 report on Chinese espionage at the Energy Department labs?
Did the President not see the Cox report delivered to him in January of this year?

Why did he forget that, in fact, he had been briefed about the most serious espionage case since the Rosenbergs many, many times?

Why the denial?

Will the other side simply dismiss this scandal too, saying, "Hey, everybody lies about national security"?

INTRODUCTION OF SCHOOL SAFETY HOTLINE ACT OF 1999
(Mr. TANCREDO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TANCREDO. Mr. Speaker, I rise today not to talk about the horrible tragedies of the Columbine shootings, though they linger in all of our minds. Rather I would like to speak of the good that has come from the ashes of this horrid event.

All around my home community of Littleton, Colorado, we have seen a spirit of coming together. In Littleton our churches have been crowded to the walls with those turning to their faith for answers. Across my district, people of all colors, classes and backgrounds have embraced in the comfort of a mutual loss.

Unfortunately, many children still do not feel safe to go to school. As the school year ends, attendance rates across the district are still horribly low. Students and parents feel helpless in controlling the safety of their learning environment.

In Denver, on Friday, we announced another coming together. We brought together leaders from business, State and local governments into a partnership to create the School Safety Hotline, an anonymous hotline for students, parents and teachers to report violent or threatening behavior to authorities.

It is my sincere hope that this initiative will give our students a sense they control the safety of their environment by calling in to report threatening behavior. For that reason, I would like to offer the School Safety Hotline Act of 1999.

This bill will allow state and local agencies all across the country to apply for federal grants to help create and maintain public-private partnership hotlines similar to ours in Colorado. Furthermore, Mr. Speaker, I would like to encourage all of my colleagues from both sides of the aisle to support this modest, but important, legislation.

I ask my colleagues to use this legislation as the first step to reach out to your own community and business leaders, so that we may give back to our young students the feeling that they can do something to ensure a safe and healthy learning environment.

WHY IS ADMINISTRATION DENYING KNOWLEDGE OF NUCLEAR ESPIONAGE?
(Mr. KINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINGSTON. Mr. Speaker, I am very disturbed today. If we go back to, I guess, the 1976 presidential debates between President Ford and President Carter, one of the questions asked of Jimmy Carter was what he thought was the biggest issue, at which point he quoted his daughter, Amy, and said, "nuclear war."

Well, I am here to say Amy Carter was right, nuclear war is, because we are giving nuclear warheads and secrets to China, which has not exactly been our staunchest ally over the years.

The W-88, which is one of the most powerful nuclear warheads in history, is now in the hands of the Chinese Communists despite the fact that the Deputy Intelligence Security Officer at the Department of Energy, as long as 3 years ago, warned the administration this was going on.
Sandy Berger, National Security Advisor, was told in April 1996. The President was informed July 1997. The President was not informed again in November 1998, and then in January this year. And yet, as late as March, he was denying it and saying nothing happened on his watch.

There are two big issues here: Number one, what happened? Which should scare the death out of any American. And number two is, why did the administration deny this? This is not a partisan debate. This is a scary debate. And I was glad when Democrat liberal Senator Torricelli called for the resignation of Janet Reno.

It is time for bipartisan support, and I hope the Democrats will join us on this one because America and America’s children depend on it.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SUNunu). Pursuant to the provisions of clause 6, rule XX, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Suspensions, if postponed, will be taken later today.

MISSING, EXPLOITED, AND RUNAWAY CHILDREN PROTECTION ACT

Mr. CASTLE. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 249) to provide funding for the National Center for Missing and Exploited Children, to reauthorize the Runaway and Homeless Youth Act, and for other purposes.

The Clerk reads as follows:

S. 249

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

SEC. 1. SHORT TITLE.

This Act may be cited as the “Missing, Exploited, and Runaway Children Protection Act”.

SEC. 2. NATIONAL CENTER FOR MISSING AND EXPLOITED CHILDREN.

(a) FINDINGS.—Section 402 of the Missing Children’s Assistance Act (42 U.S.C. 5771) is amended—

(1) in paragraph (7), by striking “and” and at the end;

(2) in paragraph (8), by striking the period at the end and inserting a semicolon; and

(b) DUTIES AND FUNCTIONS OF THE ADMINISTRATOR.—Section 403 of the Missing Children’s Assistance Act (42 U.S.C. 5772) is amended—

SEC. 4. ANNUAL GRANT TO NATIONAL CENTER FOR MISSING AND EXPLOITED CHILDREN.

“(1) IN GENERAL.—The Administrator shall annually make a grant to the Center, which shall be used to—

“(A) operate a national 24-hour toll-free telephone line by which individuals may report information regarding the location of a missing child, or other child 13 years of age or younger whose whereabouts are unknown to such child’s legal custodian, and request information pertaining to procedures necessary to reunite a child with such child’s legal custodian; and

“(B) coordinate the operation of such telephone line with the operation of the national communications system referred to in part C of the Runaway and Homeless Youth Act (42 U.S.C. 5714–11); and

“(C) provide to State and local governments, public and private nonprofit agencies, and individuals, information regarding—

“(i) free or low-cost legal, restaurant, lodging, and transportation services that are available for the benefit of missing and exploited children and their families; and

“(ii) the existence and nature of programs being carried out by Federal agencies to assist missing and exploited children and their families.

“(D) coordinate public and private programs that locate, recover, or reunite missing children with their families;

“(E) coordinate technical assistance and training to law enforcement agencies, State and local governments, elements of the
criminal justice system, public and private nonprofit private agencies, and individuals in the prevention, investigation, prosecution, and treatment of cases involving missing and exploited children; and

(2) provide assistance to families and law enforcement agencies in locating and recovering missing and exploited children, both nationally and internationally.

(2) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Administrator to carry out this subsection, $10,000,000 for each of fiscal years 2000, 2001, 2002, 2003, and 2004.

(c) NATIONAL INCIDENCE STUDIES.—The Administrator, either by making grants to or entering into contracts with public agencies or nonprofit private agencies, shall—

(1) periodically conduct national incidence studies to determine for a given year the actual number of children reported missing each year, the number of children who are victims of abduction by strangers, the number of children who are the victims of parental neglect, and the number of children who are recovered each year; and

(2) provide to State and local governments, public and private nonprofit agencies, and interested persons the information to facilitate the lawful use of school records and birth certificates to identify and locate missing children.

(d) NATIONAL CENTER FOR MISSING AND EXPLOITED CHILDREN.—Section 405(a) of the Missing Children’s Assistance Act (42 U.S.C. 5777) is amended by striking “The Secretary shall” and inserting “The Secretary, with the assistance of the Federal Bureau of Investigation, shall establish and operate (including renovation) local centers to provide services for runaway and homeless youth and for the families of such youth.”

(g) COORDINATION.—Section 341 of the Runaway and Homeless Youth Act (42 U.S.C. 5714) is amended—

(1) in conjunction with the Attorney General, shall coordinate the activities of agencies of the Department of Health and Human Services with activities under any other Federal programs and juvenile offender accountability program and with the activities of other Federal entities; and

(2) shall coordinate the activities of agencies of the Department of Health and Human Services with the activities of other Federal entities and with the activities of entities that are eligible to receive grants under this title.

(h) AUTHORITY TO MAKE GRANTS FOR RESEARCH, EVALUATION, DEMONSTRATION, AND SERVICE PROJECTS.—Section 343 of the Runaway and Homeless Youth Act (42 U.S.C. 5714-23) is amended—

(1) in the section heading, by inserting “EVALUATION,” after “RESEARCH,”; and

(2) in subsection (a), by inserting “evaluation,” after “research,”.
(3) in subsection (b)—
(A) by striking paragraph (2); and
(B) by redesignating paragraphs (3) through (10) as paragraphs (2) through (9), respectively.

(1) PART.—Part D of the Runaway and Homeless Youth Act (42 U.S.C. 5731 et seq.) is amended by adding after section 344 the following:

**SECTION 345. STUDY.**

The Secretary shall conduct a study of a representative sample of runaways to determine the percent who leave home because of sexual abuse. The report on the study shall include—

"(1) in the case of sexual abuse, the relationship of the assailant to the runaway; and

"(2) recommendations on how Federal laws may be changed to reduce sexual assaults on children.

The study shall be completed to enable the Secretary to make a report to the committees of Congress with jurisdiction over this Act, and the Workforce of the House of Representatives and the Committee on the Judiciary of the Senate, a report on the status, activities, and accomplishments of entities that receive grants under parts A, B, C, D, and E, with particular attention to—

"(1) in the case of centers funded under part A, the ability or effectiveness of such centers in—

"(A) alleviating the problems of runaway and homeless youth;

"(B) capable and appropriate, reuniting such youth with their families and encouraging the resolution of intrafamily problems through counseling and other services;

"(C) promoting family relationships and encouraging stable living conditions for such youth; and

"(D) assisting such youth to decide upon a future course of action; and

"(2) in the case of projects funded under part B—

"(A) the number and characteristics of homeless youth served by such projects;

"(B) the types of activities carried out by such projects;

"(C) the effectiveness of such projects in alleviating the problems of homeless youth;

"(D) the effectiveness of such projects in preparing homeless youth for self-sufficiency;

"(E) the effectiveness of such projects in assisting homeless youth to decide upon future education, employment, and independent living;

"(F) the ability of such projects to encourage the resolution of intrafamily problems through counseling and development of self-sufficient living skills; and

"(G) activities and programs planned by such projects for the following fiscal year.

"(b) CONTENTS OF REPORT.—The Secretary shall include in each report submitted under subsection (a) the following:

"(1) the evaluations performed by the Secretary under section 386; and

"(2) descriptions of the qualifications of, and training provided to, individuals involved in carrying out such evaluations.

"(l) EVALUATION.—Section 384 of the Runaway and Homeless Youth Act (42 U.S.C. 5732) is amended by adding the following:

**SECTION 386. EVALUATION AND INFORMATION.**

"(a) IN GENERAL.—If a grantee receives grants for 3 consecutive fiscal years under part A, B, C, D, or E (in the alternative), then the Secretary shall evaluate such grantee on-site, not less frequently than once in the period of such 3 consecutive fiscal years, for purposes of—

"(1) determining whether such grants are being used for the purposes for which such grants are made by the Secretary;

"(2) collecting additional information for the report required by section 384; and

"(3) providing such information and assistance to such grantee as will enable such grantee to improve the operation of the centers, projects, and activities for which such grants are made.

"(b) COOPERATION.—Recipients of grants under this title shall cooperate with the Secretary's efforts to carry out evaluations, and to collect information, under this title.

"(m) AUTHORIZATION OF APPROPRIATIONS.—Section 385 of the Runaway and Homeless Youth Act (42 U.S.C. 5751) is amended to read as follows:

**SECTION 385. AUTHORIZATION OF APPROPRIATIONS.**

"(a) IN GENERAL.—

"(1) AUTHORIZATION.—There is authorized to be appropriated to carry out this title (other than part E) such sums as may be necessary for fiscal years 2000, 2001, 2002, and 2003.

"(2) ALLOCATION.—

"(A) PARTS A AND B.—From the amount appropriated under paragraph (1) for a fiscal year, the Secretary shall reserve not less than 90 percent to carry out parts A and B.

"(B) PART B.—Of the amount reserved under subparagraph (A), not less than 20 percent, and not more than 30 percent, shall be reserved to carry out part B.

"(C) PARTS C AND D.—In each fiscal year, after reserving the amounts required by paragraph (2), the Secretary shall use the remaining amount (if any) to carry out parts C and D.

"(b) SEPARATE IDENTIFICATION REQUIRED.—No funds appropriated under any other Act if the purpose of combining such funds is to make a single discretionary grant, or a single discretionary payment, unless such funds are separately identified in all grants and contracts and are used for the purposes specified in this title.

**SECTION 386. SEXUAL ABUSE PREVENTION PROGRAM.**

"(1) AUTHORITY FOR PROGRAM.—The Runaway and Homeless Youth Act (42 U.S.C. 5701 et seq.) is amended—

"(A) by striking the heading for part F;

"(B) by redesignating part E as part F; and

"(C) by inserting after part D the following:

"**PART E—SEXUAL ABUSE PREVENTION PROGRAM**

**SECTION 351. AUTHORITY TO MAKE GRANTS.**

"(a) IN GENERAL.—The Secretary may make grants to nonprofit private agencies for the purpose of providing street-based services to runaway and homeless, and street youth, who have been subjected to, or are at risk of being subjected to, sexual abuse, prostitution, or sexual exploitation.

"(b) PRIORITY.—In selecting applicants to receive grants under subsection (a), the Secretary shall give priority to nonprofit private agencies that have experience in providing services to runaway and homeless, and street youth.

**SECTION 352. AUTHORIZATION OF APPROPRIATIONS.**

Section 388(a) of the Runaway and Homeless Youth Act (42 U.S.C. 5751), as amended by subsection (m) of this section, is amended by adding after section 383 the following:

**SECTION 383. CONSOLIDATED REVIEW OF APPLICATIONS.**

"(1) With respect to funds available to carry out parts A, B, C, D, and E, nothing in this title shall be construed to prohibit the Secretary from—

"(i) announcing, in a single announcement, the availability of funds for grants under 2 or more of such parts; and

"(ii) reviewing applications for grants under 2 or more of such parts in a single, consolidated application review process.

**SECTION 387. DEFINITIONS.**

"In this title:

"(1) DRUG ABUSE EDUCATION AND PREVENTION SERVICES.—The term 'drug abuse education and prevention services'—

"(A) means services to runaway and homeless youth to prevent the illicit use of drugs by such youth; and

"(B) may include—

"(i) individual, family, group, and peer counseling;

"(ii) drop-in services;

"(iii) assistance to runaway and homeless youth in rural areas (including the development of community support groups);

"(iv) information and training relating to the illicit use of drugs by runaway and homeless youth, to the extent involved in providing services to such youth; and

"(v) activities to improve the availability of local drug abuse prevention services to runaway and homeless youth.

"(2) HOME-BASED SERVICES.—The term 'home-based services'—

"(A) means services provided to youth and their families for the purpose of—

"(i) preventing such youth from running away, or otherwise becoming separated, from their families; and

"(ii) assisting runaway youth to return to their families; and

"(B) includes services that are provided in the residences of families (to the extent practicable), including—

"(i) intensive individual and family counseling; and

"(ii) training relating to life skills and parenting.

**SECTION 353. HOMELESS YOUTH.**

"The term 'homeless youth' means an individual—

"(A) who is—

"(i) not more than 21 years of age; and

"(ii) for the purposes of part B, not less than 16 years of age;

"(B) for whom it is not possible to live in a safe environment with a relative; and

"(C) who has no other safe alternative living arrangement.

**SECTION 354. STREET-BASED SERVICES.**

"(A) means services provided to runaway and homeless youth, and street youth, in...
areas where they congregate, designed to assist such youth in making healthy personal choices regarding where they live and how they behave; and

(ii) in-cludes—

(i) identification of and outreach to runaway and homeless youth, and street youth;

(ii) crisis intervention and counseling;

(iii) information and referral for housing;

(iv) information and referral for transitional living and health care services;

(v) advocacy, education, and prevention services related to—

(I) alcohol and drug abuse;

(II) sexual exploitation;

(III) sexually transmitted diseases, including human immunodeficiency virus (HIV); and

(IV) physical and sexual assault.

(5) STREET YOUTH.—The term ‘street youth’ means an individual who—

(A) is—

(i) a runaway youth; or

(ii) indefinitely or intermittently a homeless youth; and

(B) spends a significant amount of time on the street or in other areas that increase the risk to such youth for sexual abuse, sexual exploitation, prostitution, or drug abuse.

(6) TRANSMITTED YOUTH PROJECT.—The term ‘transitional living youth project’ means a project that provides shelter and services designed to promote a transition to self-sufficient living and to prevent long-term dependency on social services.

(7) YOUTH AT RISK OF SEPARATION FROM THE FAMILY.—The term ‘youth at risk of separation from the family’ means an individual—

(A) who is less than 18 years of age; and

(B)(i) who has a history of running away from home or has lived in a runaway situation; or

(ii) whose parent, guardian, or custodian is not willing to provide for the basic needs of such individual; or

(iii) who is at risk of entering the child welfare system or juvenile justice system as a result of the lack of services available to the family to meet such needs.

(c) TECHNICAL AMENDMENTS.—Sections 371, 372, 381, 382, and 383 of the Runaway and Homeless Youth Act (42 U.S.C. 571b–581 et seq.), as amended by this Act, are redesignated sections 380, 381, 382, 383, and 384, respectively.

(d) TECHNICAL AMENDMENTS.—(The Runaway and Homeless Youth Act (42 U.S.C. 571 et seq.) is amended—

(1) in section 331, in the first sentence, by striking “With” and all that follows through “the Secretary”; and

(2) in section 34(a)(1), by striking “With” and all that follows through “the Secretary”; and inserting “The Secretary”.}

SEC. 4. STUDY OF SCHOOL VIOLENCE.

(a) CONTRACT FOR STUDY.—Not later than 60 days after the date of the enactment of this Act, the Secretary of Education shall enter into a contract with the National Academy of Sciences for the purposes of conducting a study regarding the antecedents of school violence in urban, suburban, and rural schools, including the incidents of school violence that occurred in Pearl, Mississippi; Paducah, Kentucky; Jonesboro, Arkansas; Springfield, Oregon; Edinboro, Pennsylvania; Fayetteville, Littleton, Colorado; and Conyers, Georgia. Under the terms of such contract, the National Academy of Sciences shall appoint a panel that will—

(1) conduct research about adolescent violence in general and school violence in particular, including the existing longitudinal and cross-sectional studies on youth that are relevant to examining violent behavior;

(2) relate what can be learned from past and current research and surveys to specific incidents of school shooting;

(3) interview relevant individuals, if possible, such as the perpetrators of such incidents, their families, their friends, their teachers, mental health providers, and others;

and

(4) give particular attention to such issues as—

(A) the perpetrators’ early development,

(B) the relationship between perpetrators and their victims;

(C) how the perpetrators gained access to firearms;

(D) the impact of cultural influences and exposure to the media, video games, and the Internet; and

(E) such other issues as the panel deems important or relevant to the purpose of the study.

The National Academy of Sciences shall utilize professionals with expertise in such issues, including psychiatrists, social workers, behavioral and social scientists, practitioners, epidemiologists, statisticians, and methodologists.

(b) REPORT.—The National Academy of Sciences shall submit a report containing the results of the study required by subsection (a), to the Speaker of the House of Representatives, the President pro tempore of the Senate, the Chair and ranking minority Member of the Committee on Health, Education, Labor, and Pensions of the Senate, not later than January 1, 2001, or 18 months after entering into the contract required by such subsection, whichever is earlier.

(c) APPROPRIATION.—Of the funds made available under Public Law 105-277 for the Department of Education, $2.1 million shall be made available to carry out this section.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Delaware (Mr. CASTLE), and the gentleman from Michigan (Mr. KILDEE) each will control 20 minutes. The Chair recognizes the gentleman from Delaware (Mr. CASTLE).

Mr. CASTLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of the Missing, Exploited and Runaway Children’s Protection Act. This legislation authorizes the Runaway and Homeless Youth Act and the Missing Children’s Assistance Act. It provides an authorization for the National Center for Missing and Exploited Children and it directs the National Academy of Sciences to conduct a study of the cultural influences on youth.

Mr. Speaker, the National Missing Children’s Day, and obviously, we have had a great number of hardships in America in recent weeks that all of us want to address. Hopefully, what we are going to do today will in some small part start to address these problems.

This legislation authorizes the Runaway and Homeless Youth Act to provide services for the 0.5 million to 1.5 million youth estimated to run away annually. The legislation continues the runaway and homeless youth programs found in current law, including the basic center grants and the transitional living grants.

These effective programs protect young people keeping them off the streets, away from criminal activities and out of desperate circumstances. These programs provide assistance to homeless and other youth who are without adult support so they learn to live independently and become productive adults.

This legislation also provides for the continuation of services under the Missing Children’s Assistance Act. For instance, this act authorizes grants for research, demonstration projects and service programs in areas such as abduction prevention education.

The provision of this bill that I particularly want to focus my colleagues’ attention on is its authorization of an appropriation for the Runaway and Homeless Youth Act. The National Center for Missing and Exploited Children helps families who have a missing child locate that child. Since 1984, the Center has worked with law enforcement on the cases of 67,173 missing children, resulting in the recovery of 46,031 children. In 1998 alone, it assisted in finding 5,835 missing children.

The Center works with the families of 80 missing children in my own State of Delaware. The Center services, including its National Missing Child Hotline, are essential to all families of missing children.

Recognizing the Center’s substantial success rate in recovering missing children and its annual designation as the national clearinghouse for information on missing children, the legislation authorizes a $10 million yearly appropriation for fiscal year 2003 for the Center. This authorization ensures that for the next 4 years the Center can focus on providing assistance to families without interruption.

Some of my colleagues may remember that I have been working to get this legislation passed since the 105th Congress. I am pleased we are one step closer to completing this effort. The Runaway and Homeless Youth Act, the Missing Children’s Assistance Act and the National Center for Missing and Exploited Youth provide much needed services to children.

Finally, I would like to mention an important study contained in this legislation. As Members may know, my subcommittee has held hearings on the issue of school violence in response to the tragic shootings that have traumatized our Nation’s schools. The gentleman from Pennsylvania (Mr. GREENWOOD), an active member of the subcommittee, has crafted legislation to help us obtain information on why students commit such violent acts.
A great deal of blame has been spread around, and I believe it is important that we really understand the causal factors that place youth at risk for school violence.

Before I conclude, I would like to thank several Members for their assistance on this legislation. I would like to thank the chairman of the committee, the gentleman from Pennsylvania (Mr. GOODLING), the distinguished chairman of the Committee on Education and the Workforce.

Mr. Speaker, I believe this legislation is worthy of Members' support, and I urge its adoption.

Mr. Speaker, I would also like to thank the gentleman from Virginia (Mr. SCOTT) for their hard work on the school violence study.

Mr. Speaker, this is good legislation and it deserves the support of the House on an bipartisan basis. The Senate has already passed comparable legislation. We would like to pass our legislation and proceed to conference as quickly as possible. It has been far too long that these important programs have been in place without an authorization.

Mr. Speaker, I reserve the balance of my time.

Mr. KILDEE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 249, the Missing, Exploited and Runaway Children Protection Act makes vital improvements to the National Center for Missing and Exploited Children and the Runaway and Homeless Youth Act and deserves the strong support of all the Members here today.

This legislation will streamline and refocus the existing basic Center grants, the transitional living grants and the drug education program into one reauthorization, while maintaining the flexibility of each program. I believe this is an important improvement that will strengthen the ability of localities to provide services to the vulnerable populations of runaway and homeless children.

Mr. Speaker, S. 249 also requires a National Academy of Sciences study to examine which factors contribute to violence around and in our schools. This study will better enable us to understand what leads our young people to commit such tragic acts as those in Littleton, Colorado, and other places that have shared the unfortunate experience of having school violence touch its teachers, parents, students and communities.

This study, which has been a cooperative effort between the gentleman from Delaware (Mr. CASTLE), the gentleman from Pennsylvania (Mr. GREENWOOD), the gentleman from Virginia (Mr. SCOTT), the gentleman from Pennsylvania (Mr. GOODLING), and myself is necessary so we can gain a better understanding of the profile of those most likely to commit violence and provide them with appropriate interventions and supportive services.

It is my hope we can constructively use the results of this study to lessen the violence which presently is troubling our schools.

Mr. Speaker, I believe this legislation is worthy of Members' support, and I urge its adoption.

Mr. Speaker, I yield the balance of my time.

Mr. CASTLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. GOODLING), the distinguished chairman of the Committee on Education and the Workforce.

Mr. GOODLING. Mr. Speaker, I thank the gentleman for yielding me the time.

I, too, rise in support of the Missing, Exploited and Runaway Children's Protection Act. The programs and activities under this legislation aim to improve the well-being of our Nation's runaway, homeless, and missing children. This includes the Runaway and Homeless Youth Act. And one program under this Act is the Transitional Living Project for ages 16 to 21, children who cannot safely live at home.

I share the enthusiasm of the gentleman from Delaware (Mr. CASTLE) for the National Center for Missing and Exploited Children. The Center has trained at least 42 law enforcement officers in Pennsylvania on how best to handle missing children's cases, a service available to law enforcement officers across the country.

Additionally, on its web site and through other avenues, the Center provides actual photographs of missing children along with age progression computerized images of the missing children. Currently, the Center's web site includes a photograph and computerized image of 51 missing children from Pennsylvania. I must commend the Center on its extraordinary success rate in finding missing children.

Another key provision of the legislation will address an issue that has weighed heavily on our minds over the past few months. In a hearing held by the Subcommittee on Early Childhood, Youth and Families last week, we heard firsthand testimony from students who have been the victims of violent acts in their schools. We heard loud and clear the fear in their voices and their concerns about future violence in their schools.

But we still have no clear answers to the core causal factors of school violence. This legislation includes a study to be performed by the National Academy of Sciences which will explore the causes of school violence. Information gathered through this study will help us to improve the effectiveness of our current violence prevention efforts.

I would like to thank members of the committee for their hard work and their staffs, particularly the gentleman from Delaware (Mr. CASTLE) for his leadership. Also, I would like to thank the gentlemen from Pennsylvania (Mr. GREENWOOD), the gentleman from Michigan (Mr. KILDEE) and the gentleman from Virginia (Mr. SCOTT) for their guidance on the School Science Study. The result is a quality piece of legislation.

I encourage my colleagues to support the legislation.

Mr. KILDEE. Mr. Speaker, I yield such time as she may consume to the gentlewoman from New York (Mrs. McCARTHY).

Mrs. McCARTHY of New York. Mr. Speaker, I thank the gentleman for yielding me the time.

Mr. Speaker, I rise in support of the House amendments to the Missing, Exploited and Runaway Children Protection Act. I want to thank the chairman and ranking member of the Committee on Education and the Workforce for their bipartisan work on this legislation.

I also want to thank the gentleman from Delaware (Mr. CASTLE) for his excellent work as a sponsor of this legislation and the gentleman from Michigan (Mr. KILDEE), my dear colleague.

The bill before us today provides the resources for families to deal with the terrible issue of missing, exploited and runaway children. The National Center for Missing, Exploited and Runaway Children operates a National Resource Center and a toll-free hot line to provide assistance to state and local governments in finding missing children and preventing the exploitation of children.

I believe this is important, Mr. Speaker. This legislation utilizes all of the tools once a child is missing, but the legislation also is designed to prevent the terrible occurrence of a missing, exploited or runaway child. I am glad that we are addressing this bill today.

In the last 6 weeks, I have had a personal experience. I got a call late one Saturday night and it was my girlfriend of over 30 years. She said, "Carolyn, I do not know what I am going to do. My daughter's two children have been kidnapped." I gave her the information only because I have learned about this through Congress. I gave her the phone numbers to call. And within hours, the photos of the missing children were put out across this country.

I am happy to say that one child has been recovered. The other one is still missing. But with all the resources coming together, I am grateful that we, hopefully, will find the other child.

Also, since being in Congress, one of the provisions of this bill is also helping with children that have nowhere else to go. I have been privileged to meet and work with a number of groups on Long Island; and I have to
tell my colleagues, I was shocked on how many homeless children we have just on Long Island alone.

We have found that we can give them shelter. We have found that if they turn their lives around and become productive citizens. This is something that can help our children and save our children across this Nation. It is something that we should be working on more and more. It shows, when we work together, we can make a difference here in Congress.

I am glad that we are addressing this bill today, and I urge my colleagues to support this important bill. I thank the Committee on Education and the Workforce for their bipartisan work.

I believe the true measure of our Government’s efficiency can be found in the way we treat our children, the extent to which we protect our children. The legislation before us today demonstrates there is an important role our Federal Government can play in serving our children and saving our children’s lives. I thank everyone for the work that they have done, and may we continue to do this.

Mr. CASTLE. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. GREENWOOD), another distinguished gentleman from the Commonwealth of Pennsylvania who has worked hard in the Congress of the United States on the issues of children.

Mr. GREENWOOD. Mr. Speaker, I thank the gentleman for yielding me the time.

Mr. Speaker, I also rise in support of the Missing, Exploited and Runaway Children’s Protection Act; and I do so with a deep sense of gratitude. As a former caseworker who worked with abused and neglected children, I understand the importance of this legislation.

I would like to focus my remarks on that part that I worked on, and that is the study that we are asking the National Academy of Science to conduct with regard to school violence.

Mr. Speaker, the Nation has been horrified and people have been saddened and perplexed and to some extent we have been divided over the issues of these school shootings. America asks the question, “Why? Why would children take firearms to their schools and shoot their classmates and shoot their teachers?” America then quickly responds with the command, “Do something. Somebody do something.” And, as policymakers, that is part of our responsibility.

I believe, for the most part, the short-term efforts to prevent school violence must be community based and they must be school based and they must be home based. But there are some things that the Congress can do and there are things that we need to do in terms of a long-run strategy.

This legislation will direct the National Academy of Sciences to do a study on the antecedents of school violence. Researchers, the best social scientists and child psychologists that we can find, will literally travel to Pearl, Mississippi, to Paducah, Kentucky, to Jonesboro, Arkansas, to Springfield, Oregon, to Edinboro, Pennsylvania, to Fayetteville, Tennessee, indeed to Littleton, Colorado, and most recently we have had to amend this language to include Conyers, Georgia.

The scientists will interview, when they can, the perpetrators, the actual shooters. They will interview their parents, their siblings, their neighbors, their classmates, their teachers, their guidance counselors, any professionals that have dealt with these young people, to try to find out what were the early childhood experiences of these kids, what were their school experiences, what were the relationships between the perpetrators and the victims, how did the perpetrators gain access to firearms, and what were the impact of cultural influences and exposure to the media, video games and the Internet.

They will report back to America about their findings. And, hopefully, in a sober and thoughtful and disciplined way, America will understand how some of our communities impacted some of our children in ways that made them so inexplicably violent.

Mr. Speaker, it is my experience that the left-most of our political spectrum tends to look at this issue and turn immediately and almost exclusively to guns and the right-most of our political spectrum tends to look exclusively at the cultural impacts.

It is my belief that we need to look at the children. We need to understand how our children are affected by experiences in our schools and runaways and in their communities and how we as a society can value our children more than we do so that all of our children are uplifted by our actions.

I would like to thank the chairman, the gentleman from Pennsylvania (Mr. GOODLING), for his help and cooperation with this. I would like to thank the subcommittee chairman, the gentleman from Delaware (Mr. CASTLE), the gentleman from Michigan (Mr. KILDEE), the gentleman from Virginia (Mr. SCOTT) and the Speaker for his condolences, his help as well.

Mr. KILDEE. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. KLINK).

Mr. KLINK. Mr. Speaker, I thank the ranking member for yielding me the time.

Mr. Speaker, I think a lot of good work has been done on this bill; and I would like to laud Members on both sides of the aisle for this bipartisan effort. The National Center for Missing and Exploited Children is a private, non-Federal corporation that was founded back in 1984; and they have helped over the last 15 years to recover over 40,000 missing children. I first worked with them back in 1985. They were one year in existence at that time. And it was a news reporter working back in Pennsylvania.

One afternoon after getting off the school bus near the town of Cabot, Pennsylvania, 8-year-old Cherrie Mahan disappeared, never to be seen or heard from again. And it was not just this young girl who had thought about her abduction. People in the community worked together. They searched. They looked for clues. They put out every kind of feeler they could trying to find out who knew about this young girl’s abduction. And they collected money for the family. All told, they collected from their hard earned dollars $58,000.

Last October, when it was determined that Cherrie was not going to come back and she was declared legally dead, that $58,000 was presented by me along with those people, the friends and neighbors of Cherrie Mahan, a $58,000 check, to the National Center for Missing and Exploited Children so that that money could be used as a resource to help establish computer networks across this country to find runaway kids, to find kids who have been abducted, and to help fight against violence in our schools.

In return, the National Center for Missing and Exploited Children gave an $8,000 TRAC system, called Technology to Recover Abducted Kids, back to the Butler State Police Barracks in Butler, Pennsylvania. And they hoped that if they ever have to see another sad situation like the tragic disappearance of Cherrie Mahan, that the community will be better prepared, that they will be better armed with this new technology, and that we in the Federal Government can be a partner in that, making sure that the resources are there so that the sadness that the Mahan family has had to live with will never be felt by other families across this Nation.

Mr. CASTLE. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding me the time.
Mr. Speaker, this measure, S. 249, focuses on the terrible problem confronting all too many American families: missing, exploited and runaway children. I commend the sponsors of the House and Senate resolution, the gentleman from Delaware (Mr. CASTLE) and the distinguished senator from Utah (Mr. HATCH), for their diligence in bringing this to the Congress.

As a parent, few things can be more painful than the uncertainty and anxiety that arises when a child becomes missing. The void of not having a loved one present, plus the fear and anxiety of what that loved one may be undergoing, are cruel hardships that no one should ever have to endure.

Although this measure focuses primarily upon the domestic aspect of this problem and improves the way our Government addresses the problems that may be associated with missing or exploited children, I want to highlight an issue that I have become increasingly involved with, the problem of internationally abducted children.

In an interdependent world, we are finding American citizens often marrying and having children with foreign nationals and a corresponding increase in the number of children that are taken to or illegally retained in another country.

This measure highlights the excellent work of our National Center for Missing and Exploited Children. I join in commending that organization and add my voice to those who feel that the role of NCMEC should be strengthened in the cases of international parental abductions. Our citizens deserve an able advocate for their rights as parents, and I am confident that NCMEC is the appropriate organization to serve this vital function.

The measure also underlies, in some parts of our Government to curtail NCMEC’s role in assisting our citizens recover their illegally abducted or wrongfully retained children from other countries. I urge that all supporters of this measure exercise their vigilance to make certain that does not occur. Our citizens who are victims of child abduction deserve to have an organization such as the NCMEC to support them.

I thank the gentleman from Delaware (Mr. CASTLE) for his courtesy in yielding, and I urge our colleagues to fully approve S. 249 on behalf of our missing, exploited and runaway children.

Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. LAMPSON).

Mr. LAMPSON. Mr. Speaker, I wish to associate my remarks with those of the gentleman from New York (Mr. GILMAN) Regarding his work with the international effort to return children who are taken from our country, and I look forward to working with the gentleman from New York on that issue.

I rise today to encourage all of my colleagues to cast their votes in favor of S. 249, the Missing, Exploited, and Runaway Children Protection Act. Two years ago when I first joined all of you in Congress, I wanted to address all of the problems that we face here, education, Social Security and health care. But unfortunately in April, right after my first swearing-in, all of my plans drastically changed when a 12-year-old little girl, Laura Kate Smither from Friendswood, Texas, was abducted and savagely murdered. After seeing the faces of the Smither family and the outpouring of support from the community, I knew that I wanted to work on behalf of our children and their families.

After meeting Ernie Allen, the President of the National Center for Missing and Exploited Children, and his dedicated staff, I worked diligently to establish the first-ever Congressional Missing and Exploited Children’s Caucus with my colleagues the gentleman from Alabama (Mr. CRAMER) and the gentleman from New Jersey (Mr. FRANK) to provide a unified and loud voice for missing and exploited children here in Congress.

I am pleased to report, as of today, this bipartisan caucus now has 126 members. We work on legislation to impose tougher penalties on those who commit sexual offenses against children and to make sure our communities are notified when convicted sex offenders move into their neighborhoods.

The caucus would not be nearly as effective in producing innovative legislation and helpful district safety workshops without the advice and programs offered at the National Center. The Center’s outreach programs help chiefs of police and sheriffs to develop fast response plans through the Jimmy Ryce Law Enforcement Training Program, to comb neighborhoods and streets for our children who have been reported as missing. The Center also focuses its educational outreach programs toward children so that they protect themselves from the dangers that they face in today’s world. I am proud to have helped the Center unveil a national-wide program called “Know the Rules.” It was a public service campaign that was started here in Washington just a couple of years ago.

“Know the Rules” is a set of simple rules all children, but especially teenage girls between the ages of 12 and 17, should use in their everyday lives to avoid danger and help them escape potentially dangerous situations.

I have two daughters and will become a grandfather for the first time in November. I am convinced that funding the National Center is as good an investment of taxpayer dollars as can be made to ensure the safety of our Nation’s children.

Mr. Speaker, I ask all of our colleagues from Oregon to Ohio and California to Connecticut to support the National Center for Missing and Exploited Children on this National Missing Children’s Day by voting for S. 249.

Mr. CASTLE. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Colorado (Mr. TANCREDO) who is not only from Colorado, but has been through a difficult 5 weeks living in the shadow of Columbine High School.

Mr. TANCREDO. I thank the gentleman for yielding me this time.

Mr. Speaker, it is a fact that we have now had to deal with for quite some time, but it has been brought home to us more dramatically in the last few weeks than perhaps anytime in the recent past. That fact is that we are a violent country.

The character of the American people, unfortunately, we have a violent character. The history of this Nation is replete with violence. It is not a good thing that I say but it is unfortunately a true thing.

What is completely unusual, what is not at all to be explained by our history, however, is the violence we see now in schools and with children. Because although we have always had a violent society, the fact is we have never in the history of this country had a situation where children were participants to the extent that they are today in that violent nature.

Something has happened. Something has changed. This is one thing we know for sure, that this is a brand new phenomenon. We have to figure out why this is occurring.

There was a recent study that was a fascinating study I commend to my colleagues. It was done by an individual who works for the armed forces. His task really is to desensitize members of the armed forces to the actual act of killing another human being because, as he says, this is a very difficult thing. People do not do it naturally.

Taking the life of another member of your own species is not natural and yet we do it in the armed forces under controlled circumstances, you use technology to desensitize members of the armed forces to actually taking a life. But that is in a very controlled environment.

What has happened is that some of the same technology that is used by the armed forces, in particular a computerized game called Doom, is a game...
Mr. CASTLE. Mr. Speaker, I yield myself the balance of my time.

I would just point out a couple of things. One, we have spoken to various parts of this legislation, but I think we all in this House of Representatives need to understand the importance and the components of what we are dealing with here. It first authorizes, as I said in my opening, the Runaway and Homeless Youth Act and Missing Children's Assistance Act. It also provides an authorization, which we heard about very eloquently from several speakers for the National Center for Missing and Exploited Children; and it does, as we also heard from the gentleman from Connecticut (Mr. Gruenewald) and others, direct the National Academy of Sciences to conduct a study of the cultural influences on youth violence.

These things, in and of themselves, may not prevent all the problems of youth in this country, it will not; but it may in some small way start the mending process which we consider to be so important.

I would just like to thank all of those who took the time to come to the floor to speak to this today and all the Members of the House, who I believe will be supportive of what we consider to be very significant legislation to help with these problems.

Mr. PAUL. Mr. Speaker, organizations like the Center for Missing and Exploited Children should be commended and supported for their work on this critical issue. However, I must oppose this legislation as it is outside the proper Constitutional role for the federal government to spend money in this way; such spending is more appropriate coming from the states and private donations. As always, I am amased that Members of Congress are so willing to be generous with their constituent's tax dollars, yet do not seem willing to support such causes out of their own pockets.

This legislation would spend more than $268 million on issues that are simply outside the constitutional jurisdiction of the federal government. In addition, legislation like this blurs the lines between public and private funds, and opens good organizations to needless regulatory control. The legislation even opens the door to public money being used to support sectarian organizations, in direct violation of the First Amendment.

The moral decay of our nation is a serious issue that must be addressed. However, after some forty years of federal meddling in education and other social issues, it is clear politicians on Capitol Hill have made matters worse for our children, not better.

Mr. PACKARD. Mr. Speaker, today is National Missing Children's Day. Fitting enough, today we will also be voting on legislation to help locate missing, exploited and runaway children in our society.

Congress first established Missing Children's Day in 1982 to increase public awareness regarding the thousands of children who disappear each year. Through the hard work of organizations such as the National Center for Missing and Exploited Children, we have had some success.

For parents who have missing children, every day is a struggle. I urge my colleagues to help families stricken with this awful tragedy by supporting S. 249.

Ms. WOOLSEY. Mr. Speaker, this legislation is very important, and it is particularly significant to me due to the tragic murder of Polly Klaas that occurred in my home town of Petaluma in 1993.

Polly Klaas was taken from her home at knife point during a slumber party while her mother slept in the next room. Richard Allen Davis, the brutal kidnapper, was later stopped by police in a nearby community. The officers did not know that there was a suspect being sought at that moment, so unfortunately they let him go. Could Polly have been saved if a more sophisticated computer system had been in place allowing different police jurisdictions to communicate? We'll never know.

What I do know is that—thanks to a COPS grant recently awarded to the Sonoma County Police Consortium—such a computer system will soon be in place. This $6.2 million grant will permit the agencies in my district to upgrade dispatch systems, connect mobile police units, and increase the efficiency in filing incident reports. This is just one important step in improving our safely net for children.

I am forever heartbroken that we were not able to save Polly, but I know that the best way we can honor Polly and other missing children is by doing our utmost to prevent such atrocities from happening to another child, another family, another community.

This bill today, the Missing, Exploited, and Runaway Children Protection Act, will allow such vital assistance programs as the Center for Missing and Exploited Children and the national toll-free hotline to continue. Without such resources, it is nearly impossible to conduct a responsive, nationwide search that could be the key to the missing child's survival.

I am also proud to be a Member of the Missing and Exploited Children's Caucus in Congress, because it heightens awareness that we must continue to make progress in protecting our children. We cannot let our guard down. Saving the lives of the most vulnerable in our population should be our most important priority. Children are 25% of our population, but they are 100% of our future.

Mr. DEUTSCH. Mr. Speaker, I rise to encourage my colleagues to support the Missing, Exploited, and Runaway Children Protection Act. Today I would like to focus on one specific facet of this Act, the authorization of Congressional support for the National Center...
CONGRESSIONAL RECORD—HOUSE
May 25, 1999

TITLE—OF THE UNITED STATES TRADE REPRESENTATIVE
Sec. 201. Authorization of appropriations.

TITLE III—UNITED STATES INTERNATIONAL TRADE COMMISSION
Sec. 301. Authorization of appropriations.

TITLE I—UNITED STATES CUSTOMS SERVICE
Subtitle A—Drug Enforcement and Other Noncommercial and Commercial Operations
SEC. 101. AUTHORIZATION OF APPROPRIATIONS FOR NONCOMMERCIAL OPERATIONS, COMMERCIAL OPERATIONS, AND AIR AND MARINE INTERDICTION.
(a) NONCOMMERCIAL OPERATIONS.—Section 301(b)(1) of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075(b)(1)) is amended—
(1) in subparagraph (A) to read as follows:—
(A) $999,563,000 for fiscal year 2000.
; and
(2) in paragraph (2) to read as follows:
(B) $996,464,000 for fiscal year 2001.

(b) COMMERCIAL OPERATIONS.—
(2) IN GENERAL.—Section 301(b)(2)(A) of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075(b)(2)(A)) is amended—
(A) in clause (i) to read as follows:
(i) $1,154,359,000 for fiscal year 2000.
; and
(B) in clause (ii) to read as follows:
(iii) $1,194,534,000 for fiscal year 2001.

(2) REPORTS.—Not later than 90 days after the date of the enactment of this Act, and not later than each subsequent 90-day period, the Commissioner of Customs shall prepare and submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report demonstrating that the deployment and establishment of the automated commercial environment computer system is being carried out in a cost-effective manner and meets the modernization requirements of title VI of the North American Free Trade Agreements Implementation Act.

(c) AIR AND MARINE INTERDICTION.—Section 301(b)(3) of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075(b)(3)) is amended—
(1) in subparagraph (A) to read as follows:
(A) $109,413,000 for fiscal year 2000.
; and
(2) in subparagraph (B) to read as follows:
(B) $113,789,000 for fiscal year 2001.

SUBTITLE B—CHILD CYBER-SMUGGLING CENTER OF THE CUSTOMS SERVICE
Sec. 111. Authorization of appropriations for program to prevent child pornography/child sexual exploitation.

CHAPTER 1—PERSONNEL PROVISIONS
Sec. 121. Correction relating to fiscal year cap.
Sec. 122. Correction relating to overtime pay.
Sec. 123. Correction relating to premium pay.

CHAPTER 2—MISCELLANEOUS PROVISIONS
Sec. 131. Study and report relating to personnel practices of the Customs Service.
CONGRESSIONAL RECORD—HOUSE

(a) Authorization of Appropriations.—There is authorized to be appropriated to the Customs Service $10,000,000 for fiscal year 2000 to carry out the program to prevent child pornography/child sexual exploitation established by the Child Cyber-Smuggling Center of the Customs Service.

(b) Use of Amounts for Child Pornography Cyber Tipline.—Of the amount appropriated under subsection (a), the Customs Service shall provide such amount to the National Center for Missing and Exploited Children for the operation of the child pornography cyber tipline of the Center and for increased public awareness of the tipline.

Subtitle C—Personnel Provisions

CHAPTER 1—OVERTIME AND PREMIUM PAY OF OFFICERS OF THE CUSTOMS SERVICE

Sec. 121. Correction Relating to Fiscal Year Cap.

Section 5(c)(1) of the Act of February 13, 1911 (19 U.S. Code 2075(b)(1)(A)), as amended by section 101(a) of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075(b)(1)(B)), as amended by section 101(a) of this Act, $304,000,000 shall be available for acquisition of equipment other than the equipment described in subsection (a). (c) Acquisition of Superior Equipment; Transfer of Funds.—(1) In general.—The Commissioner of Customs may use amounts made available for fiscal year 2000 under section 301(b)(1)(B) of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075(b)(1)(B)), as amended by section 101(a) of this Act, for the purpose of making available for purchase or lease, or through technological or other means, equipment described in subsection (a) or any other type of equipment which that equipment will be used to support the equipment described in subsection (a). (2) Transfer of Funds.—Notwithstanding any other provision of this section, the Commissioner of Customs may reallocate an amount not to exceed 10 percent of—(A) the amount specified in any of subparagraphs (A) through (K) of subsection (a); (B) the amount specified in any of subparagraphs (A) through (B) of subsection (a); (C) the amount specified in any of subparagraphs (A) through (C) of subsection (a); (D) the amount specified in any of subparagraphs (A) through (D) of subsection (a); (E) the amount specified in any of subparagraphs (A) through (E) of subsection (a); (2) the amount specified in any of subparagraphs (A) through (A) of subsection (a); (G) $100,000,000 for 10 narcotic vapor and particle detectors to be distributed among ports where the current allocations are inadequate. (3) Florida and Gulf Coast Seaports.—For the Florida and Gulf Coast seaports, the following: (A) $4,500,000 for 6 Vehicle and Container Inspection Systems (VACIS). (B) $11,800,000 for 5 mobile truck x-rays with transmission and backscatter imaging. (C) $13,000,000 for the upgrade of 8 fixed-site truck x-rays from the present energy level of 450,000 electron volts to 1,000,000 electron volts (MeV). (D) $7,200,000 for 8 1–MeV pallet x-rays. (E) $1,000,000 for 200 portable contraband detectors (bustes) to be distributed among ports where the current allocations are inadequate. (F) $600,000 for 50 contraband detection kits to be distributed among all southwest border ports based on traffic volume. (G) $500,000 for 25 ultrasonic container inspection units to be distributed among all ports receiving liquid-filled cargo and to ports with a hazardous material inspection facility. (H) $2,450,000 for 7 automated targeting systems. (I) $300,000 for 30 rapid tire deflator systems to be distributed to those ports where port runners are a threat. (J) $600,000 for 20 portable Treasury Enforcement Communications Systems (TECS) terminals to be moved among ports as needed. (K) $1,000,000 for 20 remote watch surveillance camera systems at ports where there are suspicious activities at loading docks, vehicle queues, secondary inspection lanes, or areas where visual surveillance or observation is obscured. (L) $1,254,000 for 57 weigh-in-motion sensors to be distributed among the ports with the greatest volume of outbound traffic. (M) $180,000 for 36 AM traffic information radio stations, with 1 station to be located at each border crossing. (N) $1,940,000 for 260 inbound vehicle counting systems to be installed at every inbound vehicle lane. (O) $950,000 for 38 spotter camera systems to counter the surveillance of customs inspection personnel. (P) $950,000 for 38 spotter camera systems to counter the surveillance of customs inspection personnel. (Q) $390,000 for 69 inbound commercial truck transponders to be distributed to all ports of entry. (R) $1,600,000 for 40 narcotics vapor and particle detectors to be distributed to each border crossing. (S) $400,000 for 50 mobile truck x-rays with transmission and backscatter imaging. (T) $3,500,000 for 41–MeV pallet x-rays. (U) $300,000 for 25 contraband detection kits to be distributed among ports based on traffic volume. (V) $340,000 for 10 portable Treasury Enforcement Communications Systems (TECS) terminals to be moved among ports as needed.
SEC. 122. CORRECTION RELATING TO OVERTIME PAY.

Section 5(a)(1) of the Act of February 13, 1911 (19 U.S.C. 267(a)(1)), is amended by inserting after the first sentence the following new sentences: “Overtime pay provided under this subsection shall not be paid to any customs officer unless such officer actually performed work during the time corresponding to such overtime pay. The preceding sentence shall not apply with respect to the payment of an award or settlement to a customs officer who was unable to perform similarly-situated personnel.”

SEC. 123. CORRECTION RELATING TO PREMIUM PAY.

(a) In General.—Section 5(b)(4) of the Act of February 13, 1911 (19 U.S.C. 267(b)(4)), is amended by adding after the first sentence the following new sentences: “Premium pay provided under this subsection shall not be paid to any customs officer unless such officer actually performed work during the time corresponding to such premium pay. The preceding sentence shall not apply with respect to the payment of an award or settlement to a customs officer who was unable to perform similarly-situated personnel.”

(b) Corrections Relating to Night Work Differential Pay.—Section 5(b)(1) of such Act (19 U.S.C. 267(b)(1)) is amended to read as follows:

“(1) NIGHT WORK DIFFERENTIAL.—

“(A) 6 P.M. TO MIDNIGHT.—If any hours of regularly scheduled work of a customs officer occur during the hours of 6 p.m. and 12 a.m., the officer is entitled to pay for such hours of work (except for work to which paragraph (2) or (3) applies) at the officer’s hourly rate of basic pay plus premium pay amounting to 15 percent of that basic rate.

“(B) MIDNIGHT TO 6 A.M.—If any hours of regularly scheduled work of a customs officer occur during the hours of 12 a.m. and 6 a.m., the officer is entitled to pay for such hours of work (except for work to which paragraph (2) or (3) applies) at the officer’s hourly rate of basic pay plus premium pay amounting to 15 percent of that basic rate.

“(C) MIDNIGHT TO 8 A.M.—If the regularly scheduled work of a customs officer is 12 a.m. to 8 a.m., the officer is entitled to pay for work during such period (except for work to which paragraph (2) or (3) applies) at the officer’s hourly rate of basic pay plus premium pay amounting to 20 percent of that basic rate.”

SEC. 124. USE OF SAVINGS FROM PAYMENT OF OVERTIME AND PREMIUM PAY FOR ADDITIONAL OVERTIME ENFORCEMENT ACTIVITIES OF THE CUSTOMS SERVICE.

Section 5 of the Act of February 13, 1911 (19 U.S.C. 267), is amended—

(1) by redesignating subsection (e) as subsection (f); and

(2) by inserting after subsection (d) the following:

“(e) USE OF SAVINGS FROM PAYMENT OF OVERTIME AND PREMIUM PAY FOR ADDITIONAL OVERTIME ENFORCEMENT ACTIVITIES.—

“(1) USE OF SAVINGS.—For fiscal year 1999 and each subsequent fiscal year, the Secretary of the Treasury—

“(A) shall determine under paragraph (2) the amount of savings from the payment of overtime and premium pay to customs officers; and

“(B) shall use an amount from the Customs User Account equal to such amount determined under paragraph (2) for additional overtime enforcement activities of the Customs Service.

“(2) DETERMINATION OF SAVINGS AMOUNT.—For each fiscal year, the Secretary shall calculate an amount equal to the difference between—

“(A) the estimated cost for overtime and premium pay that would have been incurred during that fiscal year if this section, as in effect on the day before the date of the enactment of this Act, and section 122 of the Trade Agency Authorization, Drug Free Borders, and Prevention of On-Line Child Pornography Act of 1999, had governed such costs; and

“(B) the actual cost for overtime and premium pay that is incurred during that fiscal year under this section, as amended by sections 122 and 123 of the Trade Agency Authorization, Drug Free Borders, and Prevention of On-Line Child Pornography Act of 1999.”

SEC. 125. EFFECTIVE DATE.

This chapter, and the amendments made by this chapter, shall apply with respect to pay periods beginning on or after 15 days after the date of the enactment of this Act.

CHAPTER 2—MISCELLANEOUS PROVISIONS

SEC. 131. STUDY AND REPORT RELATING TO PERSONNEL PRACTICES OF THE CUSTOMS SERVICE.

(a) Study.—The Commissioner of Customs shall conduct a study of current personnel practices of the Customs Service, including an overview of personnel standards and the effect and impact of the collective bargaining process on drug interdiction efforts of the Customs Service and a comparison of duty rotation policies of the Customs Service, the Office of the U.S. Trade Representative, and other Federal agencies that employ similarly-situated personnel.

(b) Report.—Not later than 120 days after the date of the enactment of this Act, the Commissioner of Customs shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report containing the results of the study conducted under subsection (a).

TITLe III—UNITED STATES INTERNATIONAL TRADE COMMISSION

SEC. 301. AUTHORIZATION OF APPROPRIATIONS.

(a) In General.—Section 330(e)(2) (A) of the Tariff Act of 1930 (19 U.S.C. 1330(e)(2)) is amended—

(1) in clause (1) to read as follows:

“(1) $47,200,000 for fiscal year 2000;”;

(2) in clause (2) to read as follows:

“(2) $49,750,000 for fiscal year 2001.”

(b) Submission of Out-Year Budget Projections.—Section 330(e) of the Tariff Act of 1930 (19 U.S.C. 1330(e)) is amended by adding at the end the following:

“(3) By no later than the date on which the President submits to the Congress the budget of the United States Government for a fiscal year, the United States Trade Representative shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate the projected amount of funds for the succeeding fiscal year that will be necessary for the Office to carry out its functions.”

TITLE III—UNITED STATES INTERNATIONAL TRADE COMMISSION

SEC. 301. AUTHORIZATION OF APPROPRIATIONS.

(a) In General.—Section 330(e)(2) (A) of the Tariff Act of 1930 (19 U.S.C. 1330(e)(2)) is amended—

(1) in clause (1) to read as follows:

“(1) $47,200,000 for fiscal year 2000;”;

(2) in clause (2) to read as follows:

“(2) $49,750,000 for fiscal year 2001.”

(b) Submission of Out-Year Budget Projections.—Section 330(e) of the Tariff Act of 1930 (19 U.S.C. 1330(e)) is amended by adding at the end the following:

“(3) By no later than the date on which the President submits to the Congress the budget of the United States Government for a fiscal year, the Commission shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate the projected amount of funds for the succeeding fiscal year that will be necessary for the Commission to carry out its functions.”

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. CRANE) and the gentleman from New York (Mr. RANGEL) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. CRANE).

Mr. CRANE. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 1833.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CRANE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1833, the Trade Agency Authorizations, Drug Free Borders, and Prevention of On-Line Child Pornography Act of 1999 contains budg- et authorizations for the United States Customs Service, the Office of the United States Trade Representative and the International Trade Commission. H.R. 1833 also reforms Customs inspectors' overtime and shift differential pay. H.R. 1833 passed the committee unanimously by a vote of 36–0. H.R. 1833 authorizes the President's budget request for USTR and the ITC, but goes beyond the President's request for the Customs Service in order to provide more funding for drug interdiction, child pornography prevention initiatives and Customs automation.
Illegal drugs are killing our youths. Sex predators stalk our children on the Internet. We must protect our children from the scourge of illegal drugs and on-line sex predators. H.R. 1833 aims to do just that.

Today is Missing Child Day. It is tragic that we need to recognize such a day. H.R. 1833 would authorize $10 million for the Customs Cyber-smuggling Center so that customs can step up protection of our children from on-line predators and pedophiles. Part of this authorization would go to the National Center for Missing and Exploited Children's cyber tipline that handles calls and on-line reports of sexual exploitation of children.

While I am on this portion of the bill, I would like to pay tribute to the distinguished gentlewoman from Connecticut (Mrs. JOHNSON) because she was the one that was in the vanguard of incorporating these provisions dealing with trying to monitor pornography on the Internet. She deserves the overwhelming of one and all on a bipartisan basis for her work. She will elaborate more fully later.

H.R. 1833 also includes more than $400 million over the President's budget request for drug interdiction in fiscal year 2000 and fiscal year 2001. This funding would allow Customs to purchase drug detection equipment and hire additional inspectors to keep illegal drugs from crossing our borders into our children's hands.

Customs must also keep our trade moving smoothly. Customs current Automated Commercial System, ACS, is 16 years old and on the brink of continual brownouts and shutdowns. This costs the American taxpayer millions of dollars. Customs has begun building a new system, Automated Commercial Environment, ACE, but the President did not see fit to request funding for ACE for fiscal year 2000. Instead, the President gave a fee that the administration did not justify. The American public cannot wait for the President, so Congress must take action.

H.R. 1833 also makes common-sense changes to Customs officers overtime pay and nighttime pay. The legislation maintains, and even increases, some benefits to Customs inspectors in recognition of their hard work and the valuable services they perform.

The revisions also correct some anomalies in Customs officers' overtime and differential pay. Under H.R. 1833, officers would be paid overtime only for overtime hours worked. Also, officers would be paid shift differential only for night work instead of daily work in a representative system. This saves the American taxpayer money.

In short, this legislation will help prevent illegal drugs from crossing our borders, prevent on-line child pornography, prevent waste of taxpayers' dollars and prevent delays in moving our trade.

Finally, I note that at the request of the chairman of the Committee on Government Reform and Oversight we had to drop a provision in the bill that would put the Commissioner of Customs at the same pay level as other Treasury Department bureau heads. That provision is the only provision within the jurisdiction of that committee.

In conclusion, Mr. Speaker, I urge my colleagues to support this package and pass this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. RANGEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am concerned with a procedure that we use in the House is supposed to be reserved for bills that are not controversial. Where there is controversy in the committee or subcommittee, members of the minority and the majority have an opportunity to at least discuss those issues and vote on those issues.

Today we see a violation, a real violation, of that principle, because here we find a good bill, a bill there that is supposed to support the United States Trade Representative's Office, the International Trade Commission, a bill that the gentlewoman from Connecticut (Mrs. Johnson) worked so hard on to prevent child pornography, which all of us find repugnant to everything that we believe in as Americans, as human beings, and we find a real attack against drug trafficking by providing sophisticated equipment for those men and women who have dedicated themselves to protect our borders against these drugs coming into the United States.

Why in God's name then, Mr. Speaker, do we find on the suspension calendar, incorporated in this bill, that prevents us from debating, prevents us from voting for it, a provision that nobody wants except one or two people in the majority on the committee? Where did it come from? Where did it start? Where were the hearings? Where was the report? Where is the evidence that Customs inspectors were overpaid?

It certainly did not come from hearings which we had on this issue before we voted on this, and even when we were marking up the bill, the only evidence we had was a staff member from the majority giving us information that was not available through any official report. Here we have Customs officials that put their lives on the line each and every day protecting our borders; three were killed in the line of duty. They fight every day, they struggle every day, and the commissioner and the unions were never discussed on this issue, but somebody knew better than them on the committee and revised it because they did not like the wording of it in the regulation.

I yield the floor, Mr. Speaker, and it comes almost close to being illegal, to fold something like that, a controversial subject like that, into a bill that no one politically is prepared to vote against on the suspension calendar for fear that we would be supporting child pornography, that we would be supporting drug trafficking, that we would not support the USTR and the ITC.

There is no excuse for this being included in this bill. It divided our committee, it divides our subcommittee, and it is things like this that cause divisions in the House of Representatives.

We knew why these people were paid overtime, we know the reasons the American taxpayer must support the United States. Mr. Speaker, I yield myself such time as I may consume.

Mr. CRANE. Mr. Speaker, I yield my time.

Mr. Speaker, I would like to say Ray Kelly is the Commissioner of Customs, and I am really disappointed that my committee would see fit to fold a controversial subject into a suspension bill and deny us the opportunity to be able to vote on this issue singularly, like it should be.

I know that the Committee on Ways and Means has traditionally enjoyed closed rules when it comes to the House, but this is not a tax issue, and this is not an issue that is coming to the House in regular form. It comes to us as a suspension bill, and I am really disappointed that my committee would see fit to fold a controversial subject into a suspension bill and deny us the opportunity once again to debate it.

I would just like to say Ray Kelly is the Commissioner of Customs, and I oppose it. The union opposes it, the Secretary of Treasury opposes it, the administration opposed it, and almost half of the members of the Committee on Ways and Means opposed it, but we will not get an opportunity to vote on that issue.

Mr. Speaker, I reserve the balance of my time.

Mr. CRANE. Mr. Speaker, I yield myself such time as I may consume, and I would like to say Ray Kelly is the Commissioner of Customs, and I do not get a whole lot registered, and I can certainly sympathize with our distinguished colleagues, but I do think that we have put together here a good bill, and it is one
that in committee the total package enjoyed the support of both sides of the aisle overwhelmingly. But we are, I think, doing just that. These revisions are identical to those that this committee and the full House passed overwhelmingly last year.

The night pay reform still keeps Customs officers in a better position than other federal employees, and the bill does not change some of the other special benefits that Customs officers receive. For example, Customs officers receive twice the hourly rate for overtime while FEPA employees receive only so and a half the hourly rate. The night pay reform is not meant to penalize our hard-working Customs officers. Instead, it is designed to advance common sense.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Illinois (Mr. WELLER), our colleague who serves on the Committee on Ways and Means.

Mr. WELLER. Mr. Speaker, I rise in support of this important legislation today, and first, let me begin by commending my friend and colleague from Illinois (Mr. CRANE), chairman of the Subcommittee on Trade, putting forward a good bill, a bill which was endorsed by unanimous bipartisan vote, the Committee on Ways and Means just this past week. I rise in support of this legislation, the Trade Agency Authorizations, Drug-free Borders, Prevention of On-line Pornography Act of 1999. It is important legislation designed to protect children from drugs and child pornography. Under the important provisions of H.R. 1833, the bill authorizes $10 million for the Child Cyber Smuggling Center to provide the U.S. Customs Service with the necessary tools to prevent child pornography and child sexual exploitation initiated over the Internet. I also want to commend my friend and colleague, the gentlewoman from Connecticut (Mrs. JOHNSON) for her leadership on this issue as she authored the original legislation that was included in this bill today.

Protecting children from Internet predators is an issue that is important to the folks back home in the south suburbs of Chicago. This last year I received a phone call from a mother asking for help in responding to a situation affecting her 9-year-old daughter. An Internet predator posted her child's name on several pornographic Internet sites and in chat rooms and advertised for certain favors. To protect their daughter, their family was forced to move from their home and to hide from those they feared would contact them as a result of this Internet advertising. When they sought the help of local police, they were told there was no law preventing predators from doing this to young children. I am proud that legislation was passed last year, the Protecting Children From Internet Predators Act which made it illegal to use the Internet to target an individual under the age of 16 for sexually explicit messages or contact, is now law, and I want to thank this House for the bipartisan support.

Let me explain very clearly with some startling facts and statistics why this legislation is so important and deserves bipartisan support, because we should all care about kids, and we should all care about child pornography and its impact on children. It is estimated that by the year 2002 more than 45 million children will be on-line with access to the Internet. The number of cyber predators and pedophiles sites is impossible to determine, but the Center for Missing Children estimates that are 10,000 web sites maintained by pedophiles while the CyberAngles organization estimates 17,000 web sites available via the Internet. The United States alone law enforcement has confiscated more than 500,000 indecent images, photos of children, some as young as 2 years of age, and since January 1 of 1998 federal law enforcement has arrested over 460 adults for Internet-related child sexual exploitation offenses.

Mr. Speaker, we need to do more to protect kids from child pornography, to protect children from being exploited by those who would prey on them via the Internet. This legislation gives the United States Customs Service the tools they need. It deserves bipartisan support. Let us protect the kids from pornographers.

Mr. RANGEL. Mr. Speaker, I yield 4 minutes to the gentleman from Michigan (Mr. LEVIN).

Mr. LEVIN. Mr. Speaker, I strongly support the objective of H.R. 1833 to provide the U.S. Customs Service with the resource it needs to safeguard our borders and to put a stop to the spread of child pornography on-line. The men and women of the U.S. Customs Service perform vital functions with respect both to law enforcement and preserving the integrity of U.S. trade with foreign nations there on the front line.

Much of this bill is devoted to authorizing the appropriation of funds for the acquisition of sophisticated narcotics detection equipment by the Customs Service. Ironically, however, Section 122 (b) would cut the pay of some of the very people who will be operating that equipment. The current pay structure for Customs inspectors and officers was put into place in 1993. It was designed to reflect the unusual demands of inspectors' and officers' jobs. For example, over the odd hours, the unpredictability of schedules, the physical safety risk. Under this system, if a majority of the hours in an inspector officer's shift falls within the window from 3 p.m. to 8 a.m., the inspector officer is paid at a premium rate for the shift. 1833 would change it. Let me just give my colleagues an example.

For example, take the Customs inspector who regularly works the 3 a.m. to 11 a.m. shift. Assuming that that inspector earns $19.25 per hour as base pay, his or her premium pay under the current system is $154 per week. Under H.R. 1833, the premium pay would be reduced by $96.25 per week, and assuming that shift would work throughout the year, it would amount to a reduction in pay of $5,000 a year.

Why this provision? It was introduced without adequate consideration of the adverse impact it would have on actual Customs inspectors and officers.

The sponsors of this provision relied on a report that did nothing more than calculate the absolute increase in night pay differential over a 3-year period since enactment of the current arrangement.

The report did not study the cause of that increase, nor did it purport to find that that increase was unjustified. It was simply an accounting of the size of the increase.

So what happens? The majority decides to bring this bill under suspension, with no ability for us to present an amendment. This is a distortion of the suspension process. The chair of the subcommittee and others have said this passed unanimously. True, after an amendment was introduced to strike it, it was debated. We lost it on a straight party vote, but we had a chance to raise it.

What the majority is doing here is pushing forth a bill that is good in almost all of its provisions and tying in a provision that is not justified and, I think, is not justifiable. They essentially trapped the minority, saying if you want to vote against a bill that is generally good because of one provision and it is a serious one, go ahead and do it.

Mr. Speaker, bipartisanship should have some meaning in this place. There is no excuse whatsoever for this procedure. It was tried last session, the same thing was tried, and what happened? The bill died in the Senate because of provisions that are not related to the important work of the Customs force and had nothing to do with child pornography, which we obviously must be very concerned about.

This is not a tax bill. There is no reason to have this bill brought on suspension or in any other way that prevents an amendment.

Mr. Speaker, we talk about common sense. Common sense and common decency in a legislative body mean giving people a chance to present an amendment and debating it. This is not a defensible procedure.
May 25, 1999  

I suggest that we vote “aye,” because the bill, in all but one of its major provisions, is a strong bill that should pass. But it is also true that the majority here needs to understand that we resent this procedure. There is no reason for it. It undermines the bipartisanship that the majority sometimes says it believes in. We will do what happened last time. We will march over to the Senate and ask it to extricate this House from an unfair procedure.

My colleagues may think they are being politically clever, but they are going to pay for it in terms of feelings between the majority and the minority.

Mr. CRANE. Mr. Speaker, I yield myself such time as I may consume.

Last year in committee we considered identical provisions on reforming pay, a lot of provisions in bills that are not moved to strike. I find it difficult now for them to say that we are being unfair today.

The irony of the current system is that one can receive night pay for the entire 4 a.m.-to-noon shift, even for those hours between 4 a.m. and 6 a.m., and that makes no sense. This bill would fix this problem.

Our goal is not to penalize Customs officers, but to correct an anomaly in the law.

Mr. Speaker, I reserve the balance of my time.

Mr. RANGEL. Mr. Speaker, I yield myself such time as I may consume.

I do not think there is any controversy about the facts between the majority and the minority. It was opposed last year by the Democrats; it was opposed by the Commission of Customs. It was opposed by the union; it was opposed by the employees, and it is still being opposed, and it has no place in this bill.

Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. CARDIN).

Mr. CARDIN. Mr. Speaker, I thank the gentleman from New York (Mr. RANGEL) for yielding me this time.

Mr. Speaker, there is much good in this bill. As the gentleman from Michigan (Mr. LEVIN) has pointed out, there are a lot of provisions in here that are extremely important to the Customs Service. H.R. 1833 provides additional resources needed for the U.S. Customs Service to combat illegal drug activities across our border; it will provide additional equipment with the latest technology for the antidrug enforcement provisions. It provides additional funds for the Child Cyber-Smuggling Center to assist in our efforts to prevent child pornography.

So there is a lot of good in this bill. We are going to support it. I think it is going to get a large vote.

But there is bad in this bill. There are provisions that should not be in here. It amends existing laws concerning the payment of night-shift pay for our Customs officers.

Let me sit about what this Congress did before, why we put shift pay differential in the law. Congress found that these odd hour shifts that Customs officials are assigned, they do not volunteer, are assigned as part of their work, have an adverse impact on the quality of life of Customs officials who are required to work regularly scheduled shifts at night, on Sundays or holidays. We found, as a body, that the shift differential compensation levels are substantially greater than applied generally to other Federal employees for such regularly scheduled work. So what this legislation is doing is altering the balance that we took in 1993, and that is just wrong.

U.S. Customs performance—keeping drugs and other contraband out of our country—stresses vital functions of both law enforcement and preserving the integrity of U.S. trade laws with foreign nations. The current compensation structure was designed to take account of the unusual stresses of their job, both off-job safety risks and irregular work hours. We should honor that, and I agree with the gentleman from Michigan (Mr. LEVIN), the process should provide us an opportunity as a body to express our will on the subject. But the process that has been used by the majority will deny that opportunity today.

Yes, we will support the bill because of the important provisions in it, but the provision concerning pay differential is wrong; it should be removed from the bill.

This bill alters the balanced approach crafted in 1993 in two ways. First, the provision restricts the hours that qualify for the night shift differential to hours between 6 p.m. and 6 a.m., and a process which compensates Customs officers at the differential rate only for those hours that occur between 6 p.m. and 6 a.m. (with one limited exception), and not the entire shift. Effectively, these changes will mean that a Customs officer who works a shift starting at 3 a.m. and ending at 11 a.m. will receive the shift differential for only 3 hours of that shift.

To offset some of the loss in pay likely to occur, section 121 of the bill adjusts the overtime cap that, under current law, restricts the amount of overtime pay a Customs officer may earn in one year. One effect this adjustment would allow Customs officers to work more overtime to compensate for lost wages, or put another way, Customs officers will have to work more to get the same pay. Such a result seems unfair, given that no one, including OIG and Customs, has alleged that Customs employees are overpaid. Third, OIG did not find any evidence of abuse in this system. In fact, to the contrary, the OIG report specifically states that Customs management did not change work schedules to allow employees to earn more shift differential pay. Rather, Customs management continued to schedule shifts to fit customer demand.

We are not opposed to considering amendments to Customs officers pay, if a credible study evaluates and recommends that legislative changes be made. However, we are opposed to cutting someone’s wages based on a report that shows nothing. The men and women of the U.S. Customs Service perform vital functions with respect to border enforcement—keeping drugs and other contraband from crossing our borders—and preserving the integrity of U.S. trade with foreign nations. Their current compensation structure was designed to take account of the unusual stresses of their job—both the on-the-job safety risks and the irregular hours. We do not believe that there is clear evidence that those aspects of a Customs officer’s job have changed in a way that would justify reducing their pay, which is precisely what H.R. 1833 will do.

It’s too bad, Mr. Speaker. We have a good bill here. We found a flaw and I believe there would have been a way to address this issue that would have made both sides of the Congress happy and would have been supported by the men and women who will actually be affected by our vote today. I am sorry we missed an opportunity.

Mr. RANGEL. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. Becerra).

Mr. BECERRA. Mr. Speaker, I thank the gentleman from New York (Mr. RANGEL) for yielding me this time.

Second, the OIG report did not assess the impact on Customs employees’ salaries. As discussed above, the 1993 changes to the methods of calculating premium night shift differential payments was part of a comprehensive package of reforms intended to ensure that Customs officers would receive pay adequate compensation for the risks of their work, which is often dangerous, work they perform. Altering the carefully drafted package Congress created in 1993 without assessing the impact on Customs officers’ overall pay is irresponsible, and could result in an unwarranted pay cut for many of these officers. Such a result seems unfair, given that no one, including OIG and Customs, has alleged that Customs employees are overpaid.

We will march over to the Senate and do what happened last time. We will do what happened last time. We will do what happened last time.
There is good news, obviously, and some bad news in regard to H.R. 1833. The good news, as we have heard, is that the Speaker, with regard to the customs authorization for funds which are desperately needed for drug interdiction, to combat child pornography, and to help the Customs Department automate its very antiquated computer system.

By the way, with regard to that computer system, which is about 15 years old, it has browned out on several occasions. That means it has come close to actually blacking out completely. The 6-hour lapse of that brown-out caused the Customs caseload to increase not 6 hours, but by 2 weeks. Businesses across the country were thrown off their schedule for months.

We are desperately in need of updating our computer system at the Customs Department. I believe in the Customs and it does a very good job, but it is desperately in need of more resources. Unfortunately, we have very few resources at the Customs Department because of the controversy of Jingle Bells and Silent Night.

The good news, as we have heard, is that this bill contains authorizations for drug interdiction, to combat child pornography, to help prevent the spread of drugs, it helps prevent the spread of child pornography, it supports the administration fighting that they have been waiting for, and we want to be able to go over to the Senate and say it is a good bill and that this provision should be reconsidered.

I hope the majority might consider excluding this provision or reconsidering this provision in conference, because it is a good piece of legislation.

Mr. Speaker, I know how difficult it is for the majority to rule with just six votes in the majority, but I think that is the reason why now more than ever we should try to work together on those things that we agree on, because that is what the American people want.

They do not want to see us coming down here each and every day fighting each other over things that deal with procedure while they are working for substantive issues to be passed.

There is no need for us to have had to discuss this provision today. Mr. Speaker, because it had no place in this bill. In certain Republicans wanted it that badly, they should have brought it to the floor and had debate on it. It is just wrong to fold this into the suspension calendar, which says that it is not a controversial position.

We can hear what we want from the other side, we can examine the Record, but no one challenges that the employees did not want this, the union did not want this, the Commissioner of Customs did not want this, the President of the United States and his administration did not want this.

There is not one scintilla of evidence that substantiates the need for changing this except somebody on the other side of the aisle, somebody whose name is not in the record, wanted this change, and waited until the middle of the night on the suspension calendar to fold it into basically a good bill. It is wrong to do this, and I hope it does not happen again.

Mr. CRANE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Department of the Treasury Inspector General issued a very rigorous recommendation to end the night pay anomaly back in 1996. The Inspector General went further and asked for a 10 percent pay differential. Our bill does not go so far and preserves a 15 to 20 percent differential, better than any other Federal employee, in recognition of the hard work by these Federal employees.

Mr. Speaker, I include for the Record the recommendation of the Inspector General, since my colleague on the other side of the aisle thinks this came from us.

The Assistant Secretary (Enforcement) should direct Customs to seek legislation that would lessen the number of hours available for Customs officers to earn night differential pay.
and reduce the night work differentials to a 10 percent premium on base pay.” As I said, that is in contrast to our 15 to 20 percent.

“The change to the COPRA should create a night differential payment package that would more accurately reimburse Customs officers for hours actually worked, and, according to some previously under the FEPA. We believe guidance similar to the FEPA would accomplish this purpose.”

So this is not new. That was 1996 when that recommendation was made. Mr. Speaker, I just want to quickly recite some other facts of the Customs bill that deals with trying to curb the abuses by pedophiles on the Internet.

In the United States alone, law enforcement has confiscated more than 500,000 indecent images of children, some as young as 2 years old. Since January 1 of last year, Federal law enforcement has arrested over 460 adults for Internet-related child sexual exploitation and, according to some police estimates, as many as 80,000 child pornography files are traded online every week.

Mr. Speaker, I yield the balance of my time to the gentlewoman from Connecticut (Mrs. JOHNSON), our distinguished colleague who is responsible for that precious component of this legislation.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I rise in strong support of this legislation and its many provisions to improve the effectiveness of the Customs Office, but I will focus my comments on the provisions of this bill that strengthen Custom’s ability to combat cyber predators.

The Internet has revolutionized the way we learn, communicate, and even shop. It is making a reality of equal opportunity by providing truly equal access to knowledge confers. But there is a dark side to the Internet that we must confront. Parents need to know that just as there are dangerous areas in every city, there are dangerous sites on the Internet. We need to do a better job of protecting our children from entering a website or chatroom that could lead them to harm.

The old question of “Do you know where your child is” has a whole new meaning in the age of cyberspace. Most people are not aware that the Internet is now the number one choice, the number one choice, of predators as a means of preying on children and trafficking in child pornography.

There are an estimated 10,000 websites maintained by pedophiles. Trading in images of child pornography on the Internet takes place 24 hours a day, 7 days a week. Let us make no mistake about it, these people are out there lurking in cyberspace, and any child who is on the Internet could fall prey to these pedophiles.

Roughly 12 million children use the Internet every day, spending an average of 8 hours a week in chatrooms where they can come into contact with online pedophiles. The danger of these chatrooms is that they provide sex predators with a forum to prey on unsuspecting kids who cannot see who is behind the screen on the other end of the line.

“We should go into fifth grade classrooms, I ask those kids, what does your mom tell you about talking to strangers? And they all know the answer. What do your folks tell you about getting into the cars of strangers? And their little faces just light up, because they know they should not do that and they will not do that, and that I can count on them, that they will not do that.

It is a new world. We have to understand the new rules, and just as our kids will not go to a stranger or get in the car of a stranger, we have to teach them not to go into the chatrooms, where everyone is a stranger.

These cyber predators use their anonymity to lure our children out of their homes to meet people solely for the purpose of sexual assault. Sexual predators used to lurk around the schoolyard. Now they lurk in our living rooms, they lurk in our children’s bedrooms, they lurk wherever we have our computer terminal.

Listen to the Hartford Current of February 18, 1999: “A 31-year-old Enfield man was arrested Wednesday on charges that he sexually assaulted a 12-year-old East Hartford girl he met on America Online chatroom.

She told the police, and I am skipping forward, she told them that she had met Ed in the chatroom on America Online, and that they had graphic sexual discussions over the Internet. She identified herself to him as Veronica; which was not her real name. They would talk for hours at night while the girl’s mother was away and she was babysitting for her younger sister.

On February 4, they arranged to meet in the parking lot of the East Hartford apartment complex so her mother would not know.

Kids think this is a game, like so many other games they play on television. This did not turn out to be a game for this kid. This turned out to be a terrible experience.

These cyber predators use their anonymity to lure our children out of our homes for the sole purpose of sexual assault. This legislation will help the Customs Service expand their work in combating cyber predators and purveyors of child pornography.

They have done a phenomenal job. They have gotten a conviction of every single one of these cases. But they need better funding, they need more people, and they need more authority. This Congress is working on all three of these fronts.

This bill authorizes better funding of the child pornography and child sexual exploitation program that is designed to capture online pedophiles, and it would also better fund the operation of the child pornography cyber tip line run by the National Center for Missing and Exploited Children that helps identify and locate online predators.

As more kids go online every day, we need to ensure their safety. It is time to let online pedophiles know that they can no longer hide behind our computer screens. I urge support of this legislation and full funding of the needed $10 million in the appropriations process.

I thank the chairman of the subcommittee for his long work on this and for his leadership.

Mr. NUSSLE. Mr. Speaker, I ask unanimous consent to speak for 1 minute in support of this bill.

The SPEAKER pro tempore (Mr. SUNUNU). Is there objection to each side being granted an additional 1 minute for debate?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. LAMPSOn) is recognized to control 1 minute.

Mr. LAMPSOn. Mr. Speaker, I rise for 2 reasons: First, to applaud the gentlewoman from Connecticut (Mrs. JOHNSON) for her efforts to help the U.S. Customs Service battle against child exploitation on the Internet, and second, to support the provisions of her legislation included in H.R. 1838.

Child pornography was a worldwide industry that was all but eradicated in the 1980s, but the explosive growth of computer technology via e-mail, chatrooms, and news groups have created a bigger demand for pornographic pictures of our children on the information superhighway.

Congress must step up to the plate and take some action against the growing tide of child exploitation on the Internet. In February, I introduced a bill to authorize $5 million to appropriate each year for the next 4 fiscal years to fund the Cyber Smuggling Center.

Until that bill reaches the floor, I would ask Members’ complete support for H.R. 1838, which contains provisions championed by the gentlewoman from Connecticut (Mrs. JOHNSON), including the addition of $100,000 for the Cyber Smuggling Center for fiscal year 2000.

I urge all of the Members, on this National Missing Children’s Day, to support the Customs Service’s fight against child pornography on the Internet by voting in favor of H.R. 1838.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. CRANE) is recognized for 1 minute in closing.

Mr. CRANE. Mr. Speaker, I yield my final 1 minute to my distinguished colleague, the gentleman from Iowa (Mr. NUSSLE).

Mr. NUSSLE. I thank the chairman for yielding time to me, Mr. Speaker.
Mr. Speaker, I rise in support of this commonsense legislation. It is about time that we have the opportunity here today to restore the morale of our Customs agents and impede our ability to enforce our laws. H.R. 1833 contains a provision which restricts the new night shift differential pay to between 6 p.m. and 6 a.m. Currently, Customs agents earn night shift differential pay between the hours of 3 p.m. and 8 a.m. The Customs Agency is the only federal agency where employees work a constantly changing shift. For example, employees work days for two weeks, then evenings, then nights. Night shift differential pay is a standard law enforcement benefit and one of the few federal law enforcement benefits extended to Customs agents. If this bill passes the House, we will reduce the amount of pay at Customs agent earns by an average of $96.00 a week or $5,000.00 a year. A Customs agent making $40,000 a year will face a reduction in pay of nearly 12%. Do we really want to tell Customs agents that we are only willing to spend more money on desperately needed equipment to fight the war on drugs if they give up a portion of their yearly salary? I think not, this provision sends entirely the wrong message to these brave men and women.

Moreover, I have serious concerns that this provision says to Customs agents that they can make up for the lost night shift differential pay due to enhancements in overtime benefits. But in order to earn back lost pay, an individual would be required to work more than forty hours a week. This is simply wrong. What we would be telling the individuals who play a significant role in protecting our border and our entire nation from shipments of illegal drugs.

During the week of May 10th, a Customs Agent was shot on his way home from work by an individual who had targeted him as a law enforcement official. The Federal Government does not extend most law enforcement officer benefits to Customs Agents. This bill would limit one of the few law enforcement benefits that Customs Agents receive. I greatly disappointed that H.R. 1833 is on the Suspension Calendar today, and that we do not have the opportunity to even offer an amendment that would remove section 123(b), the new night shift differential pay provisions. I think that Members of this House deserve the opportunity to support this important bill while also supporting our U.S. Customs Agents.

Mr. Speaker, again, I would like to thank my colleague, Representative CRANE, for all of his work in bringing H.R. 1833 forward and express my profound disappointment in the currently included night shift differential pay provisions. I believe we need to strengthen the Customs Agency if we are going to stop illegal drugs from entering our country and we must do all that we can to protect our children. However, we must not say to Customs Agents that their tireless efforts are insufficient, and that equipment counts more than the personnel. I firmly hope that we can work our differences out when this bill goes to Conference with the Senate.

Mr. FILNER. Mr. Speaker, here we go again. We all oppose child pornography. We all want to fight it. How can you cut provisions to cut our Customs officers’ pay in this important bill?

This does not make sense! How can you ask Customs employees—those who enforce more laws than any other federal officers—to be part of the successful drug interdiction efforts. How does cutting Customs employees pay for working their regular night shifts help bolster our War on Drugs?

I support the provisions of H.R. 1833 that would increase the number of Customs Service employees along the border and provide Customs with state-of-the-art drug detection equipment. I support the $10 million to prevent the imports of on-line child pornography. But I reject the provisions that cut Customs hazardous pay for essential nighttime shifts.

I support the frontline soldiers in the War on Drugs—our Customs personnel—and urge for support for legislation that enhances, rather than detracts, from their good work.

Mr. MILLER of Florida. Mr. Speaker, I take this opportunity to rise in support of H.R. 1833. This bill reauthorizes the U.S. Trade Representative and Custom offices as well as increase efforts to patrol our borders and protect the Internet from online predators.

H.R. 1833 affects agricultural trade with its authorization of the United States Trade Representative. I support this bill and I believe this bill is an opportunity to urge the Ways and Means Committee to work with me to reform our sugar subsidy problem. I have introduced with Congressman GEORGE MILLER (D-CA) H.R. 1850, the Sugar Program Reform Act. The Miller-Miller bill would phase out the sugar program by the end of 2002.

As a result, the sugar program imposes a “sugar tax” on consumers, forcing them to more than $1 billion in higher prices for food and sugar every year.

It devastates the environment, particularly the fragile Everglades in my home State of Florida. Higher prices for sugar have encouraged more and more sugar production in the Everglades Agricultural Area, leading to high levels of phosphorus-laden agricultural runoff flowing into the Everglades, which has damaged the ecosystem. This robs many Americans their jobs because it has restricted the supply of sugar that is available on the American market, resulting in the closure of a dozen sugar refineries across the country.

Finally, it hampers our ability to expand trade opportunities for America’s farmers. It is hypocritical for the United States to protect domestic sugar production while urging other countries to open their agricultural markets. America loses leverage in trade negotiations as a result.

I am not here to talk about my bill, but to raise the issues of trade in H.R. 1833. This bill reauthorizes funding for the United States Trade Representative. The USTR is charged with helping to enforce trade laws and to break down barriers around the world. As a matter of fact, there will be important trade talks in Seattle later this year to discuss eliminating trade barriers. However, the USTR will head into Seattle with little credibility as long as the U.S. sugar program is in existence.

At Seattle, our USTR will try to have foreign nations lower their subsidies claiming that subsidies are unfair to consumers, taxpayers and trading nations. At the same time, the U.S. will greatly impair the ability of foreign sugar to come into this huge market because of our crazy sugar policy. This double standard will...
CONGRESSIONAL RECORD—HOUSE

May 25, 1999

greatly affect our ability to argue the benefits of no trade barriers. All countries will try to protect their favorite subsidy or tariff as long as the United States maintains its indefensible defense of the sugar barons. I am hopeful that this passage of legislation will give the USTR the resources necessary to break down foreign barriers while educating all policy makers on the importance of lowering our own barriers on sugar.

The sugar program is an archaic, unnecessary government handout to corporate sugar producers at the expense of consumers, workers, and the environment. It is truly deserving of reform. I hope the USTR will work to eliminate the double standard of the sugar program.

Mr. SHAW. Mr. Speaker, I rise today in support of H.R. 1833.

While this bill contains many worthy provisions, there are a number of provisions contained in H.R. 1833 of particular importance to my constituents in South Florida. For example, the bill directs the following additional resources to Florida and Gulf Coast ports: $4.5 million for 6 vehicle and container inspection systems; $11.8 million for 5 mobile truck x-rays; $7.2 million for 8 1-MeV pallet x-rays; $0.25 million for portable contraband detectors; and $0.3 million for 25 contraband detection kits.

The bill also authorizes a net increase of 40 inspectors at southeastern Florida seaports (Port of Miami, Port Everglades, and Port of Palm Beach) to process and screen cargo.

In sum, this bill renews Congress’s commitment to interdict drugs in Florida. For too long, Customs resources have been diverted to the southwestern border and Puerto Rico while drugs have poured into Florida. This bill begins to rectify that situation.

Mr. Speaker, H.R. 1833 is an excellent bill, and I urge my colleagues to support it.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New York (Mr. GILMAN) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from New York (Mr. CRANE).
regarding the massacre in Tiananmen Square.

But coming to grips with reality is not just a problem facing Beijing. For too long, we have failed to respond adequately to the challenge of the People’s Republic of China represents.

We hope that with the release of the Cox Report today, our Nation will begin to address this serious issue. Accordingly, I urge my colleagues to support this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me at the outset commend the gentleman from San Francisco, California (Ms. PELOSI), for her leadership on this issue, as well as the gentleman from Virginia (Mr. WOLF), the gentleman from New Jersey (Mr. SMITH), the gentleman from Illinois (Mr. PORTER), and many others.

Mr. Speaker, it is important to take a moment to remember Tiananmen Square. Ten years ago on the 4th of June, hundreds and thousands of democratically inclined students and citizens of China demonstrated peacefully. On that fateful day, the full force of the Chinese military and security apparatus came down on them with brutality and fercity of incredible proportions.

Thousands were killed. Tens of thousands were injured. Thousands were imprisoned. There came a dark night in China for all who were hoping for some measure of human rights.

When we introduced this legislation to commemorate the 10th anniversary of this outrage against all standards of civilized conduct, we merely wanted to do just that, to call attention to the fact that 10 years ago, this outrage occurred.

But there is an additional outrage that occurred just a few weeks ago which I believe is highly relevant to this resolution. When the United States, by mistake, bombed the Embassy of China in Belgrade, the Chinese Government engaged in a degree of cynical and hypocritical manipulation of both its own public opinion and global public opinion.

They never told the Chinese people that NATO’s air strikes were in response to the killing and mass rape and expulsion of over a million and a half ethnic Albanians. When this mistake occurred, for which the United States apologized at the highest levels, they claimed that the hit on the Embassy of China in Belgrade was not a mistake but a deliberate act of atrocity.

This, Mr. Speaker, underscores the obvious fact. This Communist totalitarian dictatorship has not changed since that fateful day on June 4, 1989. It continues to lie, to fabricate to its own people and to the rest of the world.

By this attempt, it tries to equate morally the deliberate killing of thousands of democracy-loving Chinese citizens at Tiananmen Square with the inadvertent killing of three innocent journalists at the embassy in Belgrade. The civilized world will not allow this attempt at moral equivalence to succeed.

The Chinese Communist government stands today under the court of global public opinion, both for what it did at Tiananmen Square 10 years ago and what it has been doing the last few weeks, attempting to destroy the functioning Embassy of the United States in Beijing, encouraging mobs of Chinese to attack the embassy, to keep its staff and our ambassador captive, and to engage in the most cynical manipulation of its media and the media of the world.

We are here to commemorate the fallen heroes of Tiananmen Square. When my colleagues come to my office, Mr. Speaker, in the entry hall there is that forever to be remembered poster of a single unarmed Chinese student facing down tanks, the most poignant reminder of human courage and dignity against overwhelming odds.

While that student may have been killed, as were thousands of others, the cause of freedom has not been extinguished in China. The future belongs to the students and citizens of China who, even under these impossible conditions, are insisting on freedom of speech, freedom of press, freedom of religion, the right to make their own decisions about their own future.

I strongly urge my colleagues to vote for this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. GILMAN. Mr. Speaker, I yield the balance of my time to the gentleman from New Jersey (Mr. SMITH), and I ask unanimous consent that he be permitted to control that time.

The SPEAKER pro tempore (Mr. SUNUNU). Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SMITH of New Jersey. Mr. Speaker, I yield the balance of my time to the gentleman from New Jersey (Mr. SMITH), who has been a leader on this issue for many years in the Congress.

Ms. PELOSI. Mr. Speaker, I thank the gentleman from California for yielding me this time and for his very generous comments. They are reciprocated by me in terms of his leadership on this issue for the past 10 years, really for his whole life, as a champion of human rights throughout the world.

I want also to thank the distinguished gentleman from New York (Mr. GILMAN), chairman of the Committee on International Relations, for his steadfastness.

Ten years have gone by, and we have been working on this issue a very, very long time. I wish the outcome, this 10 years later, would be a better one to report on human rights in China. But I thank the gentleman from New York (Mr. GILMAN) for his leadership over the years and in the recent days in moving this legislation out of the committee. We appreciate that very much.

Mr. GILMAN. Mr. Speaker, will the gentlewoman yield?

Ms. PELOSI. I am pleased to yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, we cannot thank the gentlewoman from California (Ms. PELOSI) enough for her continued, diligent effort in reminding the entire Congress of the violations of human rights in China, particularly when we discussed most favored nation with China. I hope our colleagues will be reminded of that in our next debate on most favored nation for China.

Ms. PELOSI. Mr. Speaker, reclaiming my time, one of the most enduring images of the 20th Century is the picture of the lone man before the tank in Tiananmen Square. The distinguished gentleman from San Francisco, California (Mr. LANTOS) mentioned it as an icon that is in the entrance of his office.

It is a constant reminder to all of us of the courage of the young people in Tiananmen Square, and of course of the sadness that the human rights situation has not improved in China these many years.

In fact, the policy of our country which was to provide trickle down liberty. If economics goes well and trade goes well, then the political freedom will follow. That simply has not happened. In fact, for all of our concessions to the Chinese, our trade deficit has gone from $2 million when we started this debate, to this year when it could be well over $60 billion with China.

The proliferation of weapons of mass destruction by China still continues, no matter what anyone tells us. Of course we are witnessing the abuse of the good nature of our President with the violations by the Chinese on proliferation, trade, and the continuing violations of the human rights of people there.

As a tribute to the brave dissidents who gave their lives, risked their personal security, and continue to do so in China, and in commemoration of the 10-year anniversary of the Tiananmen Square massacre, I was pleased to join the other colleagues, some of whom are represented here, the gentleman from Virginia (Mr. WOLF), the gentleman from New Jersey (Mr. SMITH), the gentleman from California (Mr. LANTOS), the gentleman from New York (Mr. GILMAN), the gentleman from Missouri (Mr. GERRHARDT), the gentleman from California (Mr. COX), the gentleman from Michigan (Mr. BONIOR), the gentleman from
planning to distribute leaflets seeking redress for the massacre. The location of the political and economic activists is still unknown. The same day, a member of the banned China Democratic Party was beaten and stripped of his clothes by the police for merely speaking about democracy in a public park.

At the same time, the regime, speaking through a slickly worded article in the People’s Daily, the official Chinese newspaper, claimed that overseas dissidents, exiles, and escapers are “crowding” at the “murder” of their compatriots who died in the NATO bombing of the Chinese Embassy in Belgrade.

What a pathetic commentary on the Beijing regime, that it feels threatened by dissidents in China and abroad!

□ 1200

The regime has the power of their military and security forces at home and they have their economic partners abroad and supporters, including the U.S. government, looking to their every whim, and yet they are still frightened.

And speaking of the U.S. Government, while we have bowed to their every whim, sad to say, the Chinese have not returned our friendship to the Clinton administration.

As the gentleman from California (Mr. LANTOS) pointed out, when the stupid mistake of bombing the embassy occurred, the President apologized and apologized and apologized and apologized, but his friends in the regime whom he visited and gave great face to last year, would not even let the Chinese people know that the President had apologized. And they participated in the orchestration of rocks being thrown at our embassy for 3 days, one of our consulates being set on fire, and the ambassador, in his own words, being a hostage in the embassy. This, after we have, as a government, catered to their every whim.

And I might say that the President’s apology was exceptional, because we usually do not apologize when we do not do something intentional. This was a mistake; it was not intentional.

It might be of interest to our colleagues to know that when 20 Europeans were killed in a Belgrade accident, which occurred in Italy, the United States of America expressed regret. And when we had the problem in Iran, when we mistakenly killed Iranian civilians, President Reagan expressed regret. So an apology is an intensified response to this accidental and mistaken bombing. The Chinese Government would not even accept what the President of the United States was stooping to in this case.

I certainly think the Chinese people deserve to be apologized to or have our regrets extended to them. We should make reparations, we should investigate how the bombing took place, but we should not extend any favors to them on the economic front like previous treaties. We are interested in the Chinese market only under commercially viable terms, and we should not ignore their continued violations of human rights in China.

Our President went to China last year. He went to the extreme step of leading the People’s Liberation Army band with a baton. He gave face to the regime and came back with a message that this was going to help improve democratic freedoms in China. It has not. It has not.

On the heels of the President’s visit, people who supported the China Democratic Party felt emboldened, spoke out, and they are now in prison.

I know I have taken a great deal of time, but with the Chairman’s indulgence, I would like to read some of the names of the people still in prison right now. Xu Wenli, for example, a leader of the China Democratic Party was arrested immediately upon speaking out. In addition we are futurology people who are still in prison 10 years later for their activities at the time of the 1989 Tiananmen Square massacre. Cao Yingyuan, Chang Jingqiang, Chang Yongjie, Chen Dongxiang, Chen Qiuqiong, Chen Yanlin. And there is a very long, long, long list, Mr. Speaker, and I am going to submit it for the RECORD. It is a list compiled by Human Rights in China, an organization dedicated to freeing the prisoners arrested at that time.

HUMAN RIGHTS IN CHINA
BEIJING CITIZENS STILL IN PRISON IN CONNECTION WITH 1989 JUNE FOURTH CRACKDOWN

Ten years after the Beijing Massacre and subsequent crackdown, hundreds remain in prison for their role in the 1989 pro-democracy movement. The list below contains the names of 144 individuals from Beijing alone who are serving lengthy prison sentences for their participation in the 1989 democratic movement.

This information was primarily compiled by Li Hai, a former Beijing student who was arrested in 1989 for public. He was subsequently sentenced to a nine-year prison term for “prying into and gathering ‘state secrets.’”

The individuals listed below include a wide variety of Beijing residents—from peasants, security guards and factory workers to engineers and cadres in the State Planning Commission. At the time of their arrest, they ranged in age from 17 to 71. In the official propaganda, these demonstrators were called “rioters,” and were charged with “hooliganism,” “disturbing social order,” and other criminal offenses. For the most part they are people who were seen on television screens around the world in May 1989, marching in the streets, blocking the path of the troops entering the city with improvised barricades, running through the streets on the night of June 3 and 4, hurling rocks and paving stones at tanks and armed personnel carriers. Many are thought to have been detained merely because they were out on the streets. In general, they were brought to trial more quickly and received more severe sentences than did the prominent students and intellectuals who were arrested. The average sentence of those not given life terms is approximately thirteen years.
Li Hai, the persons on this list, and the many other “nameless” individuals jailed throughout China in connection with the 1989 crackdown might not be as internationally well-known as some dissidents, but their lives are significantly affected by their incarceration.

Human Rights in China submits the following list to President Clinton for presentation to Prime Minister Zhu Rongji during his visit.

Human Rights in China urges the Chinese government to demonstrate its commitment to making genuine improvements in the human rights situation by releasing all of the prisoners on this list, as well as the thousands of other political and religious detainees throughout China.

List of Beijing citizens still in prison in connection with the 1989 Tiananmen Square crackdown

Beijing No. 2 Prison: Name, Age—Sentence, Charge (see key below for charge name).

Cao Yinguang, 40—10 years, #6; Chang Jingguo—Life, #5; Chang Yongjie, 31—Susp. death, #9, #13; Chen Dongjia, 32—12 years, #2; Chen Guang—28, worker—13 years, #3; Chen Yubin, 23—15 years, #7; Liang Zhaoshan, 33—20 years, #14 (life support); Liang Zhenyuan, 32, auto-mechanic—12 years, #11; Liang Zhixiang, 25, worker—10.5 years, #4; Liang Quan, 34—15 years, #13; Liang Chunlin, 25, worker—11 years, #3; Liang Hualidong, 31, cadre—13 years, #10; Liu Jianwen, 29, worker—20 years, #1; Liu Jinlan, 31, worker—Susp. death, #4, #5; Liu Kunlin, 34, cadre—13 years, #4; Liu Quan, 45—15 years, #4, #13; Liu Xu, 26, worker—15 years, #4; Lu Zhentong, 36, worker in Beijing No. 2 auto plant—17 years, #9; Lu Xiaojun, 36, worker—13 years, #10; Ma Guochun, 35—11 years, #9, #11.

Ma Lianxi, 44—15 years, #11; Ma Shimin, 26—11 years, #4; Meng Fanjun, 29, worker—13 years, #11; Mi Yuping, 29, worker—13 years, #4; Niu Shuliang, 26, worker—12 years, #4; Niu Zhaping, 43, worker—12 years, #12; Peng Xinggui, 41—15 years, #4; Qiao Hongqi, 38, worker—12 years, #11; Shan Hui, 28, worker—14 years, #9; Shi Xuexi, 58—Life, #4; Song Shihui, 24, worker—11 years, #10; Su Gang, 23, teacher—15 years, #4; Sun Chuanhuo, 30, worker—Reduced to 20 years, #2; Sun Hong, 27, worker—Susp. death, #4; Sun Yancai, 32—Life, #9; Sun Yuan, 27—13 years, #4; Sun Zhengang, 33, worker—14 years, #4; Wang Chunsheng, 23—13 years, #13; Wang Lianhui, 31—Life, #8, #9; Wang Lianxi, 43, worker—Life, #4; Wang Xian, 30, worker—Life, #4; Wang Yonglu, 30, worker—11 years, #1; Wang Yueming, 32—13 years, #4; Wang Chunuo, 34—11 years, #9; Wang Dongming, 37, worker—13 years, #4; Wu Ruijun, 23, cadre—13 years, #9, #10; Xi Haoliang, 27, worker—Susp. death, #4, #5; Xu Ning, 26, worker—12 years (reduced by 2 years), #4; Yan Jinxian, 30, worker—11 years, #9, #10; Yang Guanghui, 25—12 years, #4; Yang Jianhua, 38, worker—individual life, #4; Yang Pu, 34—Susp. death, #4; Yang Yupo, 33—15 years, #4; Yu Wen, 29, worker—12 years, #10; Zhang Baojun, 27—13 years, #4, #9; Zhang Baoku, 29, worker—12 years, #4; Zhang Baocun, 32—Life, #4; Zhang Fukun, 39—Life, #14; Zhang Guodong, 27—Life, #4; Zhang Kun, 28, worker—11 years, #4, #9; Zhang Maosheng, 30—Susp. death, #4; Zhang Qiye, 32, Susp. death, #9, #10, concealing a weapon; Zhang Zun, 27, worker—Life, #4; Zeng, #8—Organizing a counterrevolutionary group; #8—Conspiring to subvert the government #9—Robbery; #10—Stealing or sedition; #12—Disturbing social order; #13—Disrupting traffic.

Notes: (1) Some of the ages of prisoners in China are not available at the date of arrest; (2) Sentences marked with an asterisk * could have been subject to reduction or supplementation; (3) “Susp. death” means a death sentence with a two-year reprieve. This means that if the prisoner has behaved well during the two-year period, the sentence is normally commuted to life.

I want to call the attention of my colleagues to the Global Petition Campaign for the 10th anniversary of the June 4th massacre. It is an open letter to the Government of the People’s Republic of China calling upon the regime to reverse the verdict of Tiananmen Square. So we are associating ourselves in the Congress today with the aspirations of those brave people, including Wang Dan who was imprisoned for his political beliefs and his participation at the time of Tiananmen and after; and we are also associating ourselves with those many other people who are still imprisoned.

Free the prisoners. It is 10 years later. What do you have to be afraid of?

And then in closing, Mr. Speaker, I want to say that not for this Congress, we really would not have much to talk about today. But year in and year out we keep this on the front burner. There is no story written about China that doesn’t talk about the disagreement we have between at least the Congress of the United States and the Chinese regime about promoting democratic freedoms.

We do not in this body subscribe to the principle of trickle-down liberty. We subscribe to what our Founding Fathers established this country on.

Those words of our Founding Fathers of our Constitution are words that Republicans and Democrats stand by. They are words that those brave people, including Tiananmen Square. So we are associating ourselves in the Congress today with the aspirations of those brave people, including Wang Dan who was imprisoned for his political beliefs and his participation at the time of Tiananmen and after; and we are also associating ourselves with those many other people who are still imprisoned.

Mr. Speaker, I yield the balance of my time and I thank the gentleman from Ohio for allowing me to make a few comments. I want to call to the attention of my colleagues the Chinese activists detained in recent crackdown around June 4th—Yao Tao—Detained May 5, 1999; Present situation unknown. Mr. Yao, 29, is a former student leader of the 1989 Democracy Movement. He was detained by the police at Tiananmen Square on May 25, 1999.

Mr. Speaker, I include for the RECORD the material I referred to earlier. I want to call to the attention of my colleagues the Chinese activists detained in recent crackdown around June 4th—Yao Tao—Detained May 5, 1999; Present situation unknown. Mr. Yao, 29, is a former student leader of the 1989 Democracy Movement. He was detained by the police at Tiananmen Square on May 25, 1999.
northeastern China, they are persecuting the Buddhist monks there. In jail; they have plundered church and the persecution in Tibet is not new. We know that the persecution of the West cared and was emboldened them and let them speak out on behalf of him and other.*

Perm Camp 35, he told us he knew Sharansky. When Sharansky was in prison in his attempts to promote human rights not just in China but around the world.

Mr. WOLF. Mr. Speaker, I rise in strong support of H. Res. 178, a resolution concerning the massacre at Tiananmen Square on June 3 and June 4 of 1989. Next week marks the 10th anniversary of that historic tragic event, and so the Chinese Government ought to know we are not going to forget about it. But more importantly, we want the men and women who are still in jail to know.

And I thank the gentleman from New Jersey (Mr. SMITH). He and I visited Beijing Prison Number One, where we saw 40 Tiananmen Square prisoners working on trucks to export to the United States. Also, by us doing this and the Congress voting this way, it sends a message the same way we did to Sharansky. When Sharansky was in Perm Camp 35, he told us he knew every time the United States Congress spoke out on behalf of him and other Soviet dissidents. It encouraged them and emboldened them and let them know that the West cared and was going to stand with them no matter what.

So it has been a decade since the crackdown, but we are not going to forget.

Also, Mr. Speaker, it is important to know that the persecution of the church and the persecution in Tibet still continues unabated in China. They have Catholic priests in jail, Catholic bishops in jail; they have plundered Tibet, they are persecuting the Buddhist monks there; they are persecuting the Muslims in the northwest portion of the country. So in addition to commemorating the 10th anniversary, to letting the Tiananmen Square demagoguists know we stand in solidarity, it also sends a message that this government cannot last much longer. I am convinced they will go the way of the Ceausescu administration. In fact, they must have found Ceausescu's playbook because everything Ceausescu did against the church, they are doing against the church. Everything Ceausescu did against the demonstrators in Tiananmen Square in Bucharest, they are doing.

And so this government and all of us here, all of us in this body, will live to see the day that they fall. And one day in China, in the not too distant future, the good people of China, and they are good people, will be free, able to choose their leaders in democracy and free elections from candidates of their choice, the press and have freedom of worship.

Until then, we applaud all those fighting inside China to keep the struggle for human rights and democracy alive. We call on the Chinese Government to show its respect for human rights by releasing all of the prisoners of conscience. If we were to wake up tomorrow or in celebration of the anniversary and were to see they were to release all of the prisoners of conscience, that may make a big difference in the country. But until they do that, we will remember.

Lastly, for the administration and Members of Congress on both sides of the aisle to talk about giving this country Most Favored Nation trading status is absolutely crazy. And after the Cox report, released today, if we have a vote on MFN, it ought to go down overwhelmingly. And, quite frankly, the administration ought not even send anything up. But more importantly, back to the brave young men and women and their families, we will remember and stand with them in solidarity and will celebrate in victory in Tiananmen Square when freedom comes to China.

Mr. SMITH of New Jersey. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to associate myself strongly with the remarks of all the previous speakers, the gentleman from Virginia (Mr. WOLF), the gentleman from California (Mr. LANTOS), the gentleman from New York (Mr. GILMAN), and the gentleman from California (Ms. FLORES). And I want to thank the gentleman for her leadership in drafting this legislation. I am very proud to be a cosponsor of it.

Mr. Speaker, I urge a “yes” vote on H. Res. 178, which many of us want to see passed unanimously today. Ten years ago, Mr. Speaker, the ground was made by the people of China in an act of blood of thousands of peaceful democracy advocates. Those Chinese patriots were slaughtered by a Communist regime that remains defiantly unapologetic for its actions and that continues to deny the very truth of what happened.

I was gravely disappointed last year when the President of the United States and our country, which more than any other in the world ought to bear the standard of freedom and democracy, and so did my Committee, and I, quite diligently, met at that very site with the dictators who continued to lie about the murders committed less than a decade ago. In December of 1996, Mr. Speaker, General Chi Haotian, the Defense Minister of the People’s Republic of China and the operational commander of the forces that attacked the pro-democracy demonstrators, we call him the “Butcher of Beijing,” was invited to the United States by the Clinton administration.

During his visit he was given full military honors, a 21-gun salute, visits to several military bases and a tour of Sandia Nuclear Laboratory. And I would just say perhaps the Cox report suggests that that visit probably was not needed. He even had a personal meeting, Mr. Speaker, with the President of the United States at the White House.

He also stated in what he called a responsible and serious manner, and I quote this, “Not a single person lost his life in Tiananmen Square.” He claimed that on June 4th, 1989, the People’s Liberation Army did nothing more violent than pushing. General Chi Haotian said the only thing they did in Tiananmen Square was push people that he called hooligans. General Chi’s remarkable “big lie” statement about Tiananmen Square helped the American people and the world to understand what he and his government are really like.

Mr. Speaker, my Subcommittee on International Operations and Human Rights of the Committee on International Relations has had more than a dozen hearings on China and its repressive human rights regime, and during one of those, when we heard those outrageous remarks, we very quickly put together a hearing with people who were there on the ground–students—and we also had a man that was a journalist from the People’s Daily, who was actually arrested for his honest reporting as to what had occurred, a Time magazine correspondent, and nothing more violent than pushing. General Chi Haotian said the only thing they did in Tiananmen Square was push people that he called hooligans. General Chi’s remarkable “big lie” statement about Tiananmen Square helped the American people and the world to understand what he and his government are really like.

The gentleman from California (Mr. LANTOS) and I, then the ranking member of the Committee on International Operations and Human Rights, wanted to give the Chinese an opportunity to give an account for Tiananmen Square. The General was mouthing off to audiences here in the United States that nobody died. We offered that he come without delay before the people’s body and give an account, because we happened to have evidence that would prove contrary. General Chi didn’t make it. He didn’t show up.
We offered it to a representative of his government and we also invited Ambassador Lee for a roundtable discussion. At the very last minute, he opted out. C-SPAN, everybody was there to cover it and there was another empty chair because they do not want to be held accountable for the atrocities.

Perhaps General Chi, perhaps the ambassador, perhaps any representative of the government could tell us that there are no persecuted Christians in China. Perhaps they could tell us there is no ethnic and religious persecution in Tibet or Xinjiang. Perhaps they could tell us there is no forced abortions or forced sterilization, no dying rooms for unwanted children, usually baby girls and usually handicapped children.

They also perhaps could tell us there is no political suppression or dissent and no torture. Of course, we would know that is a lie, but it is about time we held them to account.

At one of our hearings recently, Mr. Speaker, Amnesty International issued a report card and on every one of the items 0.5 was the conclusion that there was a total failure by the dictatorship. For example, release of all Tiananmen Square prisoners and other prisoners of conscience. Amnesty's response, total failure. Not one Tiananmen Square prisoner has been released since President Clinton's visit. Review all counterrevolutionary prison terms, about 2,000 of them; total failure. Not one counterrevolutionary prisoner sentence has been reviewed.

There has been no indication by Chinese authorities that they will undertake a systematic review of such cases; according to Amnesty. Allow religious freedom; continued strong repression, says Amnesty.

There has been no indication of improvement since the President's visit. On the gross violation of coercive family planning and the harvesting of organs, again, Amnesty International reports no progress whatsoever. Those are crimes against humanity.

The information concerning the practice of coercive population control is "unequivocal". And the Chinese authorities have announced no steps to stop it.

Review of the system and reeducation through labor; total failure says Amnesty. Chinese authorities have made no changes in the system, nor have they announced any plans to do so.

End police and prison brutality. Amnesty reports total failure in these two areas as well. Chinese authorities continue to use torture and beatings.

Mr. Speaker, as indicated, General Chi did not respond to our invitation. Nor has the ambassador. And we reissue it again to them. Come and speak before the House, through our subcommittee or any other forum, because we think that there is much to be held accountable for.

What happened on Tiananmen Square? I think Ms. Pelosi put it so well. There were people there on the ground who reported. Let us not forget the very images we saw. It was captured on videotape. And yet, they still lie right through their teeth.

Nicholas Kristoff of the New York Times, who was in the Square on that night, reports, and this is his reporting. "The troops began shooting. Some people fell to the ground wounded or dead. Each time the soldiers fired again and more people fell to the ground."

When he went to the Xiehe Hospital, the nearest to the Square, "It was a bloody mess with hundreds of injured lying on the floors. I saw bullet holes in the ambulances." Jan Wong of The Toronto Globe and Mail, looking down from a balcony in Beijing, "watched in horror as the army shot directly into the crowds. People fell with gaping wounds."

Later she heard the soldiers strafed ambulances and shot medical workers trying to rescue the wounded. "In all," she reported, "I recorded eight long murderous volleys. Dozens died before my eyes."

General Chi said this was just pushing. What an outrageous lie, reminiscent of what the Nazis did during their terrible reign of terror.

This is what Tiananmen Square means to the people of China. Mr. Speaker, and to the world. We should mark the tenth anniversary of that tragedy by remembering those who lost their lives in Tiananmen Square and by publicly committing ourselves to the cause for which they died, freedom for the people of China.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume. The Congress is always at its best when we speak with a bipartisan voice. There is no issue on which we speak with a stronger, clearer, more articulate bipartisan voice than the issue of human rights violations in China and in Tibet. All of my colleagues who have spoken and all who will vote for this resolution express our determination that we shall not rest until China becomes a free and open and democratic society.

The Chinese people deserve no less, one of the most talented people with an incredible record in science, literature, music, art, in every aspect of human endeavor, who are suffering under the yoke of an unspeakable totalitarian communist dictatorship. The day of the Chinese people will come.

I call on all my colleagues to vote for this resolution.

Mr. BEREUTER. Mr. Speaker, following the death of Mao and the end of the chaotic Cultural Revolution in 1976, China embarked down the path of significant economic and political reform, comparatively speaking. With Deng Xiaoping's Reform and Opening Policy, trends for a foreign investment expanded and rigid communist economic policies were relaxed. As a result, the Chinese people were exposed to new standards of living, access to information and commercial freedoms never before realized. These progressive economic reforms stimulated the desire for increased political freedom and democratization, especially among students in China.

Unfortunately, while the Chinese Communist Party leadership acknowledged that economic reform was necessary and encouraged it, these initiatives fearfully viewed even modest political liberalization as a serious threat to the Communist Party's monopoly on power. Thus, when Chinese students peacefully demonstrated for democratic change, hard-line Communist leaders responded with tanks, bullets, and mass arrests. The most visible and brutal incidents occurred on June 3rd and 4th in Tiananmen Square. Many people were killed by the People's Liberation Army and other security forces. A great many more were wounded. It is reported that more than 10,000 people were nationwide suspected of taking part in the democracy movement were arrested and sentenced without trial or labor camps. Hundreds of these individuals remain incarcerated today.

As the Chairman of the House International Relations Subcommittee on Asia and the Pacific, this Member follows developments in China as closely as possible and believes that it is certainly in America's national security interests to integrate China into the international community. Yet, it is clear that Sino-American relations are complex and comprehensive, and have become increasingly problematic. Our concerns continue to multiply in scope and seriousness: espionage, illegal campaign contributions, weapons proliferation, abortion, Tibet, Taiwan, unfair trade and human rights. Each of these issues needs to be addressed by the appropriate means in the appropriate fora.

In some cases we will find ourselves in concert with the views of China. For example, we have a shared interest in supporting a sustainable recovery from the Asian financial crisis. In other matters, such as to what constitutes a respect and proper actions on matters relating to human rights, we strongly disagree. Responsible engagement does not equate to appeasement. It is a comprehensive approach focusing on both areas of agreement and disagreement.

Freedom and democracy are the very foundation of the United States and are principles the American people cherish. Americans were outraged watching Chinese students whose only apparent crime was asking for more political freedom being crushed by PLA tanks and shot in the back as they tried to flee Tiananmen Square. Our consciences will not allow us to quietly misrepresent a government towards its people. While Tiananmen Square may have been cleared of protesters ten years ago, the aftermath of that violence remains.

Over the past decade since the tragic incident in Tiananmen Square, the human rights situation in China gradually began to improve, relatively speaking. Unfortunately, that encouraging progress was reversed six months ago.
when hundreds of prodemocracy activists, journalists, labor union leaders, religious believers, and others labeled by the Communist Party as dissidents began to be exiled, imprisoned or harassed.

Therefore, as part of our policy of responsible engagement, this Member supports H. Res. 178, the resolution before the House concerning the tenth anniversary of the Tiananmen Square massacre of June 4, 1989, in the People’s Republic of China. This is an appropriate and measured way to send a message to the Communist leadership in Beijing and to the Chinese people at large that Americans are understandably and as a matter of principle and conscience very much concerned about human rights and democratic reform in China.

If China is to be integrated and welcomed into the international community as a responsible member and positive force, China ultimately must respect the rule of law. H. Res. 178 serves as a strong reminder that, in the opinion of the House of Representatives, very significant actions still need to be taken by Beijing to achieve that standard.

Mr. Speaker, with the 10th anniversary of the Tiananmen Square massacre just a week away, this Member urges his colleagues to join him in supporting H. Res. 178.

Mr. PORTER. Mr. Speaker, I rise today to commemorate a group of courageous individuals and their commitment to freedom and democracy—the thousands of Chinese students and activists who took part in the Tiananmen Square demonstration in May and June of 1989.

I want to thank the chairman of the Congressional Working Group on China, the gentleman from Virginia (Mr. WOLF) and the gentle lady from California (Ms. PELOSI) for bringing this resolution to the floor of the House so quickly and in such a timely fashion.

Days after the June 4th massacre, the Congressional Human Rights Caucus, held a briefing on this topic. The pictures we saw, and the stories we heard, are some of the most disturbing pictures of brutality and barbarity I have ever been exposed to.

And yet, ten years later the perpetrators of this massacre have not been brought to justice. Hundreds of people are still held in prison for their involvement. Thousands more have been jailed since for similar reasons. Far too much time has passed for these cries of democracy to go unheard.

The Chinese leadership remains unapologetic about the events of June 4, 1989, they continue to vilify, imprison and exile these and other brave democracy activists. As recently as the beginning of this month, Yang Tao, a student leader of Tiananmen Square, was picked up from his house and arrested for calling on the government to “re-evaluate” its position on the events of June 1989. Other leaders have been put under house arrest for calling on the government to apologize for the murders and compensate the victims’ families. Radio Free Asia reports in the days following the bombing of the Chinese Embassy, over half of the callers to their talk show were critical of the Chinese Government.

The time has come for the Chinese government to take a close look at what happened ten years ago and to apologize to its people. The government cannot continue its harassment and imprisonment of its citizens who exercise their rights of freedom of speech, expression and religion. The hope and desire for democracy is still alive. We must do all we can to support it. I stand in strong support of H. Res. 178.

Mr. GEPPERT. Mr. Speaker, today, I honor the hundreds, if not thousands of Chinese students that were brutally slain on June 4, 1989, by the Communist Chinese authorities. On that fateful day ten years ago, the best and brightest of a generation perished needlessly and the lives of countless Chinese families were forever disrupted.

I commend my colleague NANCY PELOSI for her continuing leadership on China issues and for introducing H. Res. 178, to commemorate the Tenth Anniversary of the Tiananmen Square massacre. Her efforts insure that the leadership of the U.S. House of Representatives and the American people will never forget.

To all the activists in China fighting today for the freedom of their country, I vow never to forget Tiananmen Square. I remind you that your allies across the globe continue to fight for your universal cause; to attain freedom, democracy and human rights for the Chinese people.

The Chinese leaders say that they want to bring China into the modern world economy. I say to the Chinese leaders, you can’t have capitalism without democracy and human rights. Capitalism and democracy go hand in hand, you can’t have one without the other.

The democratic rights advocated by these slain students ten years ago are universal, not uniquely western values as the Chinese leadership would have us believe. Indeed the blossoming of full democracy in Taiwan, Korea, South Africa, Eastern Europe, Russia and many other countries since 1989 proves the universality of democracy and human rights.

Ultimately, the values of the Universal Declaration of Human Rights will prevail. As that document states, all human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.” Until that day I will join NANCY PELOSI, many of my colleagues here in the House, and countless others around the world in fighting for this just cause.

Mr. LANTOS. Mr. Speaker, I yield back the balance of my time.

Mr. SMITH of New Jersey. Mr. Speaker, in the direction of the Committee on Rules, I call up House Resolution 185 and ask for its immediate consideration.

Mr. DIAZ-BALART. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 185 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 185

Resolved. That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 1906), making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2000.

Mr. DIAZ-BALART. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 185 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 185

Resolved. That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 1906), making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2000.
and shall not exceed one hour equally di-
vided and concluded by the chairman and
ranking minority member of the Committee
on Appropriations. After general debate the
bill shall be considered for amendment un-
der the following points of order: (1) that
provisions in the bill for failure to comply
with clause 2 of rule XXI are waived. Dur-
ing consideration of the bill for amendment, the
Chairman of the Committee of the Whole
may accord priority in recognition on the
basis of whether the Member offering an
amendment has caused it to be printed in the
portions of the Congressional Record des-
ignated for that purpose in clause 8 of rule
XVIII. Amendments so printed shall be con-
sidered as read. The chairman of the Com-
mittee of the Whole may: (1) postpone until
a time during further consideration in the
Committee of the Whole a request for a re-
corded vote on any amendment; and (2) re-
duce to five minutes the minimum time for
electronic voting on any postponed question
that follows another electronic vote without
intervening business, provided that the min-
imum time for electronic voting on the first
in any series of questions shall be 15 min-
utes. At the conclusion of consideration of the
bill for amendment the Committee shall
rise and report the bill to the House with
such amendments as may have been adopted.
The previous question shall be considered as
ordered on the bill and amendments thereto
to final passage without intervening ques-
tions except one motion to recommit with or
without instructions.

Mr. DIAZ-BALART. Mr. Speaker, for
the purposes of debate only, I yield the
customary 30 minutes to the gentle-
man from Ohio (Mr. HALL), pending
which I yield myself such time as I
may consume. During consideration of
this resolution, all time yielded is for
the purpose of debate only.

House Resolution 185 is an open rule,
providing for the consideration of H.R.
10614, the Agriculture, Rural Develop-
ment, and Related Agencies Appropriations
Bill for Fiscal Year 2000.

The rule waives clause 2(a) of rule 13,
requiring a 3-day layover of the com-
mittee report, and Section 306 of the
Congressional Budget Act, prohibiting
consideration of legislation within the
Committee on the Budget’s jurisdic-
tion, unless reported by the Committee
on the Budget, against consideration of
the bill. Further, the rule waives clause 2 of rule XXI, prohibiting una-
thorized and legislative provisions in an
appropriations bill, against provi-
sions in the bill.

As has become standard practice since
the 104th Congress, Mr. Speaker, the
members went with preprinted their amendments in the
Congressional Record prior to their consideration priority in recognition to offer their
amendments.

The Chairman of the Committee of
the Whole may postpone votes during
consideration of the bill and reduce
voting time to 5 minutes on a post-
poned question if the vote follows a 15-
minute vote.

Finally, the rule provides for one mo-
tion to recommit, with or without in-
structions. I would like to urge my colleagues to
support this open rule on our first ap-
propriations measure to come to the
floor in the 106th Congress, Agriculture
Appropriations.

I commend the subcommittee chair-
man, the gentleman from New Mexico
(Mr. SKEEN), and the ranking member,
the gentlewoman from Ohio (Ms. KAPTUR),
for their hard work in producing this
year’s bill, which provides signifi-
cant assistance for agriculture. I know
that spending levels are extremely
tight, and I believe they did a good job
of working within their limits.

The Agriculture Appropriations bill
fund programs that help benefit each
of us every single day. From improving
the nutrition and food safety and to
offering nutritious food to put on America’s
tables, the funds in this bill make it pos-
sible for less than 2 percent of the
American population to provide food
that is safe, nutritious, and affordable
for all 272 million people in the United
States of America, as well as others
throughout the world.

I have consistently been an admirer
and supporter of American agriculture,
and I commend the hard work and effi-
ciency of the American farmer. I am
pleased to support both this open rule
providing the means to bring forth this
legislation today and the underlying
bill. I urge my colleagues to support
this rule.

Mr. Speaker, I reserve the balance of
my time.

Mr. HALL of Ohio. Mr. Speaker, I
yield myself such time as I may con-
sume.

Mr. Speaker, I want to thank the
gentleman (Mr. DIAZ-
BALART) for yielding me the
time.

This is an open rule on the Agri-
culture Appropriations bill. As my col-
league has described, this rule provides
for one hour to be equally divided
and controlled by the chairman and rank-
ing minority member of the Committee
on Appropriations.

The rule permits amendments under
the 5-minute rule, which is the normal
amending process in the House. Mem-
bers on both sides of the aisle will have
the opportunity to offer amendments
which are germane and which follow
the rules for appropriations bills.

The Agriculture Appropriations bill
is one of the most important measures
that we consider. It funds programs that
feed hungry people in the United
States and around the world. It sup-
ports the American farmers, who are so
important to the U.S. economy.

This bill represents a compromise. I
wish that some of the funding levels
could be higher. However, I recognize
that appropriators were working under restraints
and they faced many diff-
cult decisions. Overall, this is a
worthwhile bill.

I appreciate the efforts of the Appro-
priations subcommittee chairman, the
gentleman from New Mexico (Mr.
SKEEN), and the gentlewoman from
Ohio (Ms. KAPTUR), ranking
minority member, in crafting the
bill. They did a good job. They had to
work under difficult constraints, but
they did a very, very good job and
funded some very important programs.

The committee restored $50 million
cut by the administration for Title 2 of
the P.L. 480 “Food for Peace” program.
This program donates crops grown by
American farmers to hungry people in
impoverished and war-torn countries.
This is the cornerstone of America’s
humanitarian assistance around the
world.

The bill provides $4 billion for the
WIC program, which provides nutrition
benefits to women, infants, children.
This is $81 million more than the current
level of funding but $100 million less
than the administration’s request.

Mr. Speaker, I note that once again
the Committee on Rules has been
forced to waive the 3-day layover for
committee reports. This rule guaran-
tees that all Members have at least 3
to examine a bill before the com-
mittee files a report with the House.

By waiving this rule, the House risks
that some Members will not have
enough time to study a bill before it is
considered on the House floor.

This is the 13th time this year the
Committee on Rules had to waive this
rule. But it is an important bill and we
need to act quickly, so I will support
the rule and the bill. I think it is vital,
important, and we need it.

Mr. Speaker, I reserve the balance of
my time.

Mr. DIAZ-BALART. Mr. Speaker, I
yield 7 minutes to the gentleman from
Oklahoma (Mr. COBURN).

Mr. COBURN. Mr. Speaker, I come to
the floor today to talk about where we
are going in this country. This rule is
symptomatic of the problem that we
face. There are two Members of the
House who honestly agreed that we
would not be able to live within the
1997 budget agreement with the Presi-
dent. Those two Members voted for a
budget that would actually spend So-
cial Security money. Everybody else
that is a Member of this House voted
for one budget or another that would
preserve 100 percent of the Social Secu-
ritv surplus this year. This bill is the
first among many bills that will do ex-
actly the opposite of that. The Appro-
priations subcommittee chairman, the
Chairman of the Committee on Agri-
culture, Rural Development, Food and
Drug Administration, and Related
Agencies states that this bill is a cut.
That is an untruthful statement. This
May 25, 1999

CONGRESSIONAL RECORD—HOUSE

bill actually increases spending around $250 million. That money will come from the Social Security surplus. It is not about Social Security money. It is not about being true to our word. It is about the foundational structure of our country and whether or not we are going to operate on the principles that we want our children to have, that we are going to reinforce the positive aspects of honor, of commitment to your word. Are we going to set an example for our children in high school that we are going to do? Are we going to be true to the founding principles of this country? I am in my last term, and I must say that I am very much discouraged as a Member of this body whether or not we have a great future when in fact we say one thing and mean another. I hope that you will check your heart, not just your mind, especially not your political mind, but that you will check your heart. Do we really mean it when we say we protect Social Security, or do we not? I believe we do not mean it.

Mr. HALL of Ohio. Mr. Speaker, I yield 4 minutes to the gentleman from Vermont (Mr. SANDERS). Mr. Speaker, I thank the gentleman for yielding me this time. I rise in strong support of this rule, and I congratulate the chairman and the ranking member for their work. I think there are a lot of very positive aspects to this bill. I wanted to highlight, though, at this moment two amendments that I will be offering with support from different members from both political parties. Mr. Speaker, it is important to note that in the United States of America today, at a time when we are far and away the wealthiest country in the history of the world, hunger, h-u-n-g-e-r, remains a very serious problem for senior citizens and for children in this Nation. At a time when this Nation possesses so much wealth, there is absolutely no excuse, none at all, that one American citizen is hungry. And yet hospitals are admitting that many of the senior citizens who come into their hospitals are suffering. If you can believe this, from malnutrition. Malnutrition. That is not what should be going on in the United States. I along with Democrats and Republicans will be offering an amendment to increase by $10 million funding for the Commodities Supplemental Food Program which comes close, therefore, to the level that the President requested. That amendment will be offset by cutting the Agricultural Research Service which received a $50 million increase this year, bringing it up to $830 million. So they received a $50 million increase up to $830 million whereas numbers of senior citizens in this country going hungry. And while agriculture research is important and there is much in that bill that is important, we should not be increasing funds to develop red snapper aquaculture when senior citizens and children in America are going hungry. The second amendment that I will be introducing will be a very small amount of money which would go to help develop agritourism in the United States. It is no secret that all over this country, family farmers, whether it is chicken, whether it is in other commodities, are fighting for their lives, and there are States such as New Mexico and Massachusetts with an agritourism program, a program by which tourists could come visit family farms, perhaps to bed-and-breakfast or other types of activities and get cash into the pockets of family farms who are struggling. There are some very good programs all over this country that have been established in New Mexico, established in Massachusetts. I think it is important for a small sum of money to be appropriated at the Federal level to allow innovative programs to be developed throughout this country. I would hope that for those of us who are concerned about preserving family farm, we support that amendment as well.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. DIAZ-BALART. Mr. Speaker, I yield myself such time as I may consume.

I would simply request support for this rule. It is an open rule. Any concerns or opposition that Members may have with regard to the underlying legislation can be dealt with through amendments. If there are colleagues who believe there is too much spending, they can propose amendments to cut spending. All of that is permitted under a totally open rule. And so I would ask all of my colleagues to support this rule so that the process can go on and so precisely debate on the legislation, including any disagreements, may also go on and take place in this House today.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. LATOURETTE). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes had it.

Mr. COBURN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The Chair announces that proceedings will resume immediately following this first 15-minute vote on the three postponed suspension motions and that each of those will be 5-minute votes.

The vote was taken by electronic device, and there were—yeas 402, nays 10, not voting 21, as follows:
ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the Senate bill, S. 249, as amended.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Delaware (Mr. Castle) that the House suspend the rules and pass the Senate bill, S. 241, as amended, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 414, nays 1, not voting 19, as follows:

1301 1301

<table>
<thead>
<tr>
<th>Yeas</th>
<th>Nays</th>
</tr>
</thead>
<tbody>
<tr>
<td>414</td>
<td>1</td>
</tr>
</tbody>
</table>

So the resolution was agreed to.

The vote was announced as above recorded.

A motion to reconsider was laid on the table.

MISSING, EXPLOITED, AND RUN-AWAY CHILDREN PROTECTION ACT

[S. 249. by the yeas and the nays; H.R. 1833, by the yeas and nays; and House Resolution 78, by the yeas and nays.

The Chair will reduce to 5 minutes the time for each vote in this series.
Mr. DAVIS of Virginia changed his vote from "nay" to "yea."
CONGRESSIONAL RECORD—HOUSE
May 25, 1999

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ELECTION OF MEMBERS TO COMMITTEE ON SMALL BUSINESS
Mr. FROST, Mr. Speaker, by direction of the Democratic Caucus, I offer a privileged resolution (H. Res. 188) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 188
Resolved, That the following named Members be, and are hereby, elected to the following standing committee of the House of Representatives:

Committee on Small Business: Mrs. BERKLEY of Nevada; Mr. UDALL of Colorado

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMUNICATION FROM HON. RICHARD A. GEPHARDT, DEMOCRATIC LEADER
The SPEAKER pro tempore (Mr. LA TOTTEURE) laid before the House the following communication from the Honorable Richard A. Gephardt, Democratic leader:

HOUSE OF REPRESENTATIVES,
OFFICE OF THE DEMOCRATIC LEADER,

Hon. J. DENNIS HASTERT,
Speaker of the House, House of Representatives,

WASHINGTON, DC.

DEAR MR. SPEAKER: Pursuant to Title 44 of the U.S.C. 2702, I hereby appoint the following individual to the Advisory Committee on The Records of Congress:

Dr. Joseph Cooper of Baltimore, MD.

Yours Very Truly,

RICHARD A. GEPHARDT.

GENERAL LEAVE
Mr. SKEEN, Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and that I may include tabular and extraneous materials on the bill (H.R. 1906) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for the fiscal year ending September 30, 2000, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Mexico?

There was no objection.
The SPEAKER pro tempore. Pursuant to House Resolution 185 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1906) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for the fiscal year ending September 30, 2000, and for other purposes, with Mr. PEASE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, this hearing is declared as having been read the first time.

Under the rule, the gentleman from New Mexico (Mr. SKEEN) and the gentlewoman from Ohio (Ms. KAPTUR) each will control 30 minutes.

The Chair recognizes the gentleman from New Mexico (Mr. SKEEN).

Mr. SKEEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today I have the honor to present to the House the fiscal year 2000 bill appropriating funds for Agriculture, Rural Development, Food and Drug Administration and Related Agencies. The bill we are taking up today has a total discretionary budget authority of almost $13.99 billion. This is $296 million above the current level and $531 million below the request.

In mandatory spending, this bill has $47 billion for fiscal year 2000, about $4.8 billion over current levels and $850 million below the request. Almost two-thirds of the mandatory spending in this bill is for food stamps, child nutrition, and most of the rest goes to support basic farm programs. This bill is within the allocations required by the Committee on Appropriations.

This bill is truly a bipartisan product, Mr. Chairman, constructed from hearings that began on February 10 and ended on March 18. The Committee on Appropriations has produced seven volumes of hearing records containing thousands of pages of information on the hearings, the detailed budget requests, and the answers to questions asked by Members and the public as well.

The Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies and the Committee on Appropriations held markups on May 13 and May 19 respectively, and these were public meetings with which the Members participated actively in shaping the bill.

Many Members would like to spend more than is in the bill, and so would I. We have about 250 letters to date, many of them with multiple requests, but only a handful ask for reduced spending.

Once again this year the administration proposed to pay for requested increases in food and drug expenditures, with user fees that require legislation. Once again the administration has favored budget gimmicks over reality because the main component of this legislation, user fees on meat and poultry inspection, has been strongly opposed by consumer groups, industry, and the authorizing committee for several years.

This bill does a lot of good in many areas. Farm Service Agency salaries and expenses are increased by $80 million; and user fees are increased by $56 million. FDA has an increase of $13 million. Rural housing programs are increased over last year's level and rural telephone and electric loans are increased or held at last year's levels.

Once again, the Food Safety and Inspection Service gets the full request, a $36 million increase. FDA has an increase of $115 million. Funding for the Food Safety Initiative is provided throughout the bill.

Child nutrition programs have been increased by $570 million, and the WIC bill by $81 million. P.L. 480, Titles I and II, the two main food aid titles, are restored to last year's levels, and the full request is provided for the Foreign Agricultural Service.

I would also like to say to my colleagues that the bill so far does not have any significant provisions that would bring objections from authorizing committees, and I would strongly urge that we keep it that way.

Mr. Chairman, I want to thank the gentleman from Florida (Chairman Young) and the gentleman from Wisconsin (Mr. OBEY), the distinguished ranking member of the Committee on Appropriations, and the gentlewoman from Ohio (Ms. Kaptur), our even more distinguished ranking member on the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, for their help in putting this bill together.

I would like to recognize the gentlewoman from Missouri (Mrs. Emerson), the gentleman from New York (Mr. Hinchey), the gentleman from California (Mr. Farr), and the gentlewoman from Florida (Mr. Boyd), our new subcommittee members who have brought a great deal of enthusiasm and creativity to this bill. I look forward to their participation on the floor today and in the conference.

Mr. Chairman, I say to all my colleagues that this is a bill that will benefit every one of our constituents every day of their lives, no matter where they live in this great country.

Mr. Chairman, I reserve the balance of my time.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to acknowledge the hard work of the gentleman from New Mexico (Mr. SKEEN), the chairman of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, members of our subcommittee, as well as the staff for their leadership, including our new staff director, Hank Moore, who has worked so hard this year.

This bill makes a reasonable effort to apportion the limited resources available to our subcommittee to keep our Nation at the leading edge for food, fiber, new fuels, and forest production, as well as the counts relating to research, trade and food safety.

I begin by saying to my colleagues that this is a bill that will benefit the local grocery store. There is no question that agriculture and food processing are America's leading industries. Our farmers and our agricultural sector remain the cornerstone on the face of the Earth. They well understand, as we do, how difficult it is to maintain our Nation's commitment to excellence in agriculture in tight budgetary times.

While on balance this bill seems like a reasonable effort to stretch a limited sum of money as far as possible, and I would encourage my colleagues to vote for this bill, we simply disagree on the levels of support needed for priority programs, including the Women, Infants and Children feeding program; the Natural Resource Conservation Service, the primary conservation operation in this country; and other programs like farm credit which are currently not funded at all by this bill, nor was the school breakfast pilot program that the administration requested.

We must also keep in mind that this bill simply does not do enough to address the Depression-level conditions affecting many sectors of rural America from coast to coast, whether we are talking about the Salinas Valley, cattle country in Florida, hog producing country in the Midwest, cotton fields in Texas, the list goes on and on. This is an exceedingly limited response to an extremely serious situation afflicting many sectors of the farm economy across our Nation.

As we consider this bill today, I would urge my colleagues to think about what is going on in rural America, as farmers continue to experience significant decreases in commodity prices. It started with wheat and with cattle, and it spread to the feed grains, to oil seeds, to cotton, to pork, and even now to dairy sectors.

At the same time, the costs of production are not decreasing. In fact, they are increasing. Total farm debt has risen now to over $170 billion at the
end of last year, up nearly 9 percent over the last 2 years. Thats means people are borrowing against their accumulated equity to make up for their lack of ability to receive a price for their product in the market. In fact, farmland values began declining in 1998, not a good sign.

What is really happening in our country, as more bankruptcies occur in rural America, is the average age of farmers has now risen to 55. People are making live decisions out there about whether or not they are going to hold on to the farm or sell it off for another suburban development. This is not a good sign for America in the 21st Century. People really should not be selling off their seed corn for the future.

Let me just mention that in the discretionary appropriations, which in this bill total $13.9 billion for the next fiscal year, if we just take a look at the Farm Credit and the Farm Service Agency people, the people doing the work, administering the programs in our Farm Service Agency offices, and the loans and so forth that are being made, there is an increase of less than one-fifth of 1 percent over the prior year.

If we really take a look at what it is taking to hold agricultural America together today in this severely depressed economy in the rural countryside, we will find that the amounts in this bill are one-third below what was spent during this fiscal year and the last fiscal year as we attempted to prop up the disasters going on out there with the emergency bills that we were forced to pass outside the regular budget process.

So this a very lean bill that truly will not meet the needs of rural America. We may be forced again into one of these extra budgetary sessions to try to figure out how we are going to prop up rural America in the months ahead.

Let me also mention that the bill does try to meet the administration's request for the Food and Drug Administration drug approvals and to increase the safety of our food supply, with all the additional imports that are coming in here as well as pathogens found in food.

We increased funding for the Food Safety and Inspection Service, very important to the health of the American people, and to some rural housing and rural development accounts, as well as for agricultural research and pest and disease control through the Animal and Plant Health Inspection Service as well as the Natural Resources Conservation Service.

But, more importantly, on the minus side there is no provision in this bill for any of the emergency assistance provided to rural America during this fiscal year. We do not continue any support for market support, nor any of the subsidies for the crop insurance premiums or the extra funds we provided to the Secretary of Agriculture to lift surplus commodities off the marketplace to try to get prices to rise in this country.

So the situation facing our farmers in this bill is that, well, we really do not take care of them. We sort of continue things the way they were, and we may be forced to come back later in the year in order to deal with the hemorrhage that is occurring across this country.

Let me also mention that in this bill we will probably be forced to reduce county office staff by another 650 staff positions. I think this is truly tragic, because we have got backlogs around the country of farmers waiting to receive payments after months and months because of disasters that have occurred from coast to coast.

So reducing these staffing levels really does not make much sense, and yet it is the truth that is buried inside this bill.

Further, the bill reduces funding for food aid programs, which are so important to support people around the world who live at the edge of hunger, but also to aid rural America. In fact, we lift surplus during this year that was sent to Russia; we have tried to assist the Kosovo refugees in the emergency supplemental that just passed, but there is nothing in this bill that continues that kind of additional surplus purchase. In fact, it will be reduced.

So the gentleman from New Mexico (Mr. SKEEN) and our subcommittee have certainly tried to do what was best under the hand that we were dealt, but the bill fails short of what is needed to address the urgent problems facing farmers across America.

One thing is certain, no matter what forum or legislative vehicle is chosen, it is essential that Congress act today at least to move this bill forward and to move the first appropriation bill through this session of Congress. We are now approaching Memorial Day.

Mr. Chairman, I reserve the balance of my time.

Mr. SKEEN. Mr. Chairman, I yield 3 minutes to the gentlewoman from Missouri (Mrs. EMERSON).

Mrs. EMERSON. Mr. Chairman, I want to take a moment to express my appreciation to the gentleman from New Mexico (Mr. SKEEN) for the hard work he has done in putting together this piece of legislation before us today.

Given the tight budget constraints that we face, the chairman has had to make difficult decisions and balance a lot of different needs. He knows, and I think all of our colleagues agree, that we know, that this bill will not, as the gentlewoman from Ohio (Ms. KAPTUR) said, address all of the many urgent needs that are there out on the farm right now. Funds are desperately needed for farm programs because of the low prices and tough market conditions for farmers and ranchers all over the country.

However, I think the gentleman from New Mexico has worked with the numbers that he was given and done a tremendous job and the best job possible to meet the many needs of farmers and ranchers, and I just want to thank him for the outstanding job he has done.

Let me just take a minute too to highlight some of the aspects of this bill that are critically important to agriculture. Total dollars for agriculture research are up by $61 million. The bill rejects the cuts in Hatch Act and extension research funding that were proposed in the administration. Export programs, such as P.L. 480, Titles I and II, are funded at or near last year's levels, again rejecting large cuts by the administration.

Many farm State Members of Congress have expressed a concern, as I have, about increased concentration in agriculture markets, and I am pleased this bill includes a $636,000 increase for packer competition and industry concentration, as well as $750,000 strictly for poultry compliance activities.

There is much needed enforcement money to ensure our beef, pork, and poultry producers are treated fairly.

Now, I personally believe that we should do more and have mandatory price reporting for livestock, but this is a function of the authorizing committees, not the Committee on Appropriations, and I will look forward to working with my colleague from Ohio (Ms. KAPTUR) on this legislation later on this year.

Our bill also increases farm loan accounts, such as farm ownership, farm operating, and emergency loans from $2.3 billion to $3 billion. Not enough,
May 25, 1999

CONGRESSIONAL RECORD—HOUSE

and we will probably need more later, but because there is an increasing demand for these loans due to the hardships in our economy, we need the money now and, as I said, we will need more later.

For soybean producers in Missouri and around the country there is continued funding needed to fight the cyst nematode pest. Continued research will help develop soybean varieties that are resistant to the yield and profit endangering pest.

I would simply add this is an extremely tough time for our farmers and ranchers. As the gentlewoman from Ohio noted, this is an issue of national security. My farmers tell me that it is as bad as it has been in decades. Not years ago, but decades. And while this bill does not address all of the problems that school breakfast should be offered by schools as a learning tool, just like a book, just like a computer. It may be that some of my colleagues are too concerned with keeping our schools just the way they have always been, so they fight against any proposals for change. Or it may be that children just do not count enough.

Mr. Chairman, as this Nation, as this body searches for ways to make our schools safer and better for our children, surely we want to consider all reasonable ways to improve students’ behavior. The school breakfast program would help us with that, so I will continue to fight, I will continue to work with my colleagues in support of the school breakfast program on the appropriations committee.

Ms. KAPURT. Mr. Chairman, will the gentlewoman yield?

Ms. WOOLSEY. I yield to the gentlewoman from Ohio.

Ms. KAPURT. Mr. Chairman, I wanted to thank the gentlewoman for fighting so hard for this school breakfast program and to say that with her leadership the members of the subcommittee and the full committee have attempted to do what was necessary.

Unfortunately, the administration did not provide us with some of the information that we were expecting. The gentlewoman from Connecticut (Ms. DeLAURO) worked with us at the subcommittee and full committee levels, and it was her idea to try to take this issue into conference to see if we cannot do something to move this pilot project forward.

But I just want to say to the gentlewoman that without her interest and representation that she has shown, we would not be this far. I know we are not where the gentlewoman wants us to be yet, but without her leadership we would not be anywhere. We hope that as we move towards conference we might be able to accommodate some of this.

Ms. WOOLSEY. I thank the gentlewoman.

Mr. SKEEN. Mr. Chairman, I yield 7 minutes to the gentleman from Georgia (Mr. KINGSTON).

Mr. KINGSTON. Mr. Chairman, I stand in support of the agriculture appropriations bill. I serve on the subcommittee and can say on a firsthand basis that the staff, on a bipartisan basis, went through this legislation, thoroughly to be sure that we have balanced the needs of the American farm, agricultural community, and the American grocery consuming public.

Last year’s bill was $61.7 billion. This year the legislation is down to $60.8 billion. A lot of this goes back. Mr. Chairman, to the 1997 bipartisan budget agreement, which was pushed by Democrat and Republican leaders alike with the full support of the President. And to get back to that budget agreement, it had some good and it had some bad, as my colleagues can imagine in any huge piece of legislation which Democrats and Republicans come together on.

Now, unfortunately, we are seeing from both sides of the aisle people who are peeling away from the agreement, people who voted for the budget agreement that are now lamenting the fact that it actually does call for some belt tightening here and there and they are beginning to walk away from it.

But the staff on this subcommittee, and again on a bipartisan basis, tried to put together the actual requests of 280 Members asking for specific projects in their districts or of national scope. And it was quite a balancing act, do have to certain amount of institutional schizophrenia. We have, on one hand, people who say I want to cut the budget and I want it cut now, but oh, no, not in my district, not in the district that I happen to represent. And, by the way, I want to fund this particular project, which of course is not pork, it is just that it is economic development when it is in my district. So this bill, like all appropriation bills, is a balancing act.

Mr. Chairman, the American farmer is facing probably unprecedented challenges. They have challenges getting credit. Businesses in America, small businesses to Fortune 500 companies, have to have credit. They have to borrow short and long-term money. Yet for farmers, they cannot get long-term money any more. Banks, and rightfully so, facing the realities of making a profit on the farm, they will not lend them money any more. So the farmers are scrambling, and that is one of the huge challenges that is facing farmers today.

A second challenge is international competition. I represent Milen, Georgia, little Jenkins County, Georgia, and farmers there can grow oats and do it very inexpensively and very efficiently. And yet at the end of the season, they can still go down to Brunswick, Georgia, and buy imported oats cheaper than they can grow it in America. And that is just one commodity.

That is the story with so many of our imports now. And one reason is that our foreign competitors are heavily, heavily subsidized in comparison to the American farmers, where we have about $3.9 billion of this $60 billion bill that is spent on actual commodity-type programs.

People say, oh, let us cut out the farm subsidies”, yet most of these are not true subsidies. But even so, it is impossible to compete against foreign competitors, even with the modern technology and all the farming techniques we know.

A third challenge that our farmers are facing is that simply of the weather. We do not get the rain that we need in every growing season. Last year Screven County, Georgia, town seat of Sylvania, lost $17 million because of the drought; $17 million in farm losses.

Now, that is not much for a big country like America, but tell that to somebody in Sylvania, Georgia, and tell that to a third generation farmer who is going to lose his farm because of that drought.

Unfortunately, in Georgia this year, we are facing possibly another bad season because of the lack of rain. We need to help our farmers on all these challenges. Mr. Chairman, and this bill tries to do that. It is not going to do it all the way. It will not do it as well as we would like, but it takes a step in the right direction.
There are a lot of things in this bill, though. There is some money for water projects, there is money for conservation programs, one billion dollars in Title II, that I want to try to work with the majority and the majority representatives on, is giving some tax credit for precision agriculture. Because if we can move our farmers towards obtaining precision agriculture equipment, then they would know exactly how much fertilizer to apply, exactly how much water to use, and exactly what their profits are per acre so that they can make Ag production as absolutely efficient as possible.

I would also like to see more tax credits for farmers in other areas. I would like to see them taxed more on the use of their land rather than on the potential use of their land. I represent Coastal Georgia, it is a huge growth area. Bulloch County last year, 17 percent; Effingham County, 42 percent; Bryan County, 52 percent. All these are traditionally agricultural counties and now they are becoming urban or suburban counties. There are few family farms left, but they are being taxed out of existence.

I would like to see some tax help for farmers in that direction. I would like to see land taxed on its actual use and not its percentage use. And I of course, Mr. Chairman, would love to see some estate tax or death tax relief so that family farms can be passed from one generation to the other.

This is not going to happen in this bill but this bill takes us in the right direction. Right now, Mr. Chairman, less than 2 percent of the American population is feeding 100 percent of the American population and a substantial portion of the world. Does our ag policy work? I would say yes, it does. Americans spend about 11 cents on the dollar earned on food and groceries. We spend more than that on entertainment, jet skis, CDs, movies, vacations. We are spending more on recreation than we do on food and groceries.

So the ag policy is working. It has a lot of good potential in it for improvements. We are going to continue to work on that on a bipartisan basis. I urge my colleagues to support the bill.

Ms. KAPTUR. Mr. Chairman, I yield to the gentleman from New York (Mr. HINCHEY), a distinguished member of the subcommittee who has put in long hours on this bill.

Mr. HINCHEY. Mr. Chairman, I want to express my appreciation to the gentleman from New Mexico (Mr. SKEEN), the chairman of our subcommittee, for the care and craftsmanship with which he worked to put this bill together. It has been a pleasure to work with him as a member of the Subcommittee on Agriculture.

Unfortunately, the constraints within which we have had to operate, constraints imposed by the leadership here in the Congress and traceable directly back to the agriculture bill of 1996, the so-called Freedom to Farm bill, have made it impossible to put together an agriculture appropriations bill here that meets the needs of the agriculture community, the needs of our farmers and the needs of our consumers across the country.

As I said, this is directly attributable to the constraints that flow from the so-called Freedom to Farm bill, which is not in fact a Freedom to Farm bill, but in many cases it has been a freedom to fall bill, almost a guarantee of failure. Farm prices in the farm belts all across our country are at near Depression prices. Farmers are finding themselves in situations that verge on the desperate and in many cases they are in situations where farmers are being forced out of business because they cannot sell their crops at a price that is higher than the cost that they had to incur for putting those crops in the ground. It is an absolutely impossible situation.

We cannot have an agriculture that is sustained in a global economy where other countries are subsidizing their agriculture and making certain creating circumstances within which agricultural people are going to prosper. We have to do that. In fact, we have taken all the safeguards that our agricultural community has had away from them. We did so in that Freedom to Farm bill in 1996. We need to go back and correct those mistakes, and we need to do so soon. The longer we wait, the more desperate the circumstances will become.

Are we committed to family farms, or do we want farms that are corporate in nature exclusively across this country? Do we want farmers to make a living, or do we want it all to be processors? Do we want to have an agricultural community that is healthy and strong and providing the food and fiber that our people need domestically here to sustain their lives?

These are the basic questions that are before us. And, unfortunately, this bill, not through any fault of the chairman or members of the subcommittee, but only because of the constraints imposed on us. Fee and constraints in the Freedom to Farm bill have made it impossible to meet these needs this year. We need to go back and meet them and we need to do so soon, intelligently, and thoroughly.

Mr. SKEEN. Mr. Chairman, I yield 2½ minutes to the gentleman from Michigan (Mr. UPTON).

Mr. UPTON. Mr. Chairman, I would wish to engage in a colloquy with my good friend from New Mexico (Mr. SKEEN).

Mr. SKEEN. I appreciate your willingness to discuss the Department of Agriculture Plant Protection Center located in Niles, Michigan. I know that you share my belief that this center has a very important mission, finding natural means to combat pests. The research done at these plant protection centers is important to American agriculture and of enormous value to the agriculture industry throughout the Midwest.

The work the employees do in Niles is particularly important in light of the probable loss of pesticides as a result of the implementation of the Food Quality Protection Act. In fact, just this past year the Michigan Department of Agriculture and Michigan State University have formed partnerships with the laboratory at Niles aimed at promoting biological control options. This is a prime example of partnering and cost-sharing between State and Federal agriculture interests on the better strengths of both partners to benefit agriculture.

I am greatly troubled that within the past 2 years the budget of this facility has been cut by 26 percent, the staff reduced from 45 to 19 employees. Especially troubling is the fact that this facility receives its funding through the biocontrol line item, which tends to receive increased funding and is scheduled to get a 22 percent increase in fiscal year 2000. I firmly believe that any further reductions in the budget at this Niles facility would be a serious error and would jeopardize the strength of agriculture throughout the Midwest.

Mr. Chairman, I yield to my friend the gentleman from New Mexico (Mr. SKEEN) for a response.

Mr. SKEEN. Mr. Chairman, I share the gentleman’s concern for the future of the critical work that is being done at the Niles Protection Center.

As I understand it, the USDA has not made a final decision and of course, we have a long way to go before we produce a conference report with a final number for APHIS. We have provided the account in question with a significant increase for fiscal year 2000 at a time of a very tight budget, and I hope the USDA will take note of our efforts and our concerns for the Niles facility.

Mr. Chairman, I thank the gentleman for his efforts, and I promise to continue working with him in conference on this important issue.

Mr. SKEEN. Mr. Chairman, I yield to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I want to say to the chairman of our subcommittee, and to the gentleman from Michigan (Mr. UPTON) that we so much support the efforts that he is making for this Niles Center, also on behalf of the gentleman from Indiana (Mr. ROEMER). We have that special situation where Michigan, Indiana, and Ohio all meet. And the services provided through the Center serve the entire country certainly, especially the Midwest. And I want to compliment the
gentleman for drawing our attention to it and placing it in the debate today.

Ms. KAPTUR. Mr. Chairman, yield 3½ minutes to the gentleman from Salinas Valley, California (Mr. FARR), another member of our committee who represents the area that really feeds America, a hard working and dedicated member of our subcommittee.

Mr. FARR. Mr. Chairman, I thank the gentlewoman for yielding me the time.

I rise as a new member of the Committee on Appropriations and of the Subcommittee of Agriculture, first of all to tell them how much I appreciate the leadership that was given in this markup by the chairman, the gentleman from New Mexico (Mr. SKEEN) and also by our ranking member, the gentlewoman from Ohio (Ms. KAPTUR).

I represent a State that produces about 43 crops, which no other State in the United States produces that many as are produced in my district, about $2.5 billion in agricultural sales. And most of it does not receive any help from the Federal Government. But they are interested in research and they are interested in sort of cutting-edge issues.

I would just like to point out, for those that are interested in these budgetary issues, that this markup is about a 1.8 percent increase over last year’s discretionary money. Now, remember, last year we had a lot of agricultural debate on the floor because we were putting money into supplemental, into emergency aid. If we take the total amount that was spent last year on agriculture and we look at the amount that was spent this year, we are $6.4 billion below what Congress spent last year, or about a 31 percent cut. And this is a very, very tight budget.

And I might add, as tight as it is, it still ranks number four of all the appropriation committees in the amount of spending it does. Why? Because in America we created the Department of Agriculture when President Lincoln was here, and he indicated that we needed a department that essentially had a little bit for everybody in America, kind of a consumers department.

So the department has all the rural America, issues, which are as true today as they were a hundred years ago. Rural America always needs more help. We have all the commodities programs. We have all the foreign sales programs, whether we are going to have commodities abroad. And I know there will be Members up here attacking the fact we put taxpayers’ money into foreign sales.

But my colleagues, wake up and smell the coffee. Every day we have Juan Valdez telling us to drink Colombian coffee, and we do. Why? Because that country puts money in advertising in America and Americans buy it. So we do a little quid pro quo in the same way. We take money here and we take products and try to get them to sell abroad. Why? Because it is a labor-intensive industry that is the heart of our country, and it has been the number one production in America historically and today more than ever.

So, with this tough budget that we have adopted, we also left many programs on the table, the conservation program, farm land protection. There is no money in here. We have got to get that before this is over. Also left on the table, we cut wetlands reserves. We left on the table, more importantly, about $120 million to fully fund all the nutritional programs we need in America.

This is a very tight appropriation. Too tight for many people and not tight enough for others. But I do not think we will ever find an appropriation that has had more bipartisan support than this one does, and I think that is attributable to both the leadership on the other side of the aisle and on our side.

Mr. SKEEN. Mr. Chairman, I yield 5 minutes to the gentleman from Oklahoma (Mr. COBURN).

Mr. COBURN. Mr. Chairman, I want to say from the outset, I come from a farm district of rural northeastern Oklahoma that has a great deal of farmers. And I believe, overall, that the appropriators have done a good job on this bill. But they have not done good enough.

We passed two supplemental emergency bills for farmers in this last Congress, almost $12 billion, and I am not objecting to the fact that we did that. What I am objecting to is the fact that that money was paid for out of Social Security receipts. There is no question about it. And what I want to focus on is, where is the money going to come for the increase in this year over the true baseline last year? It is going to come from Social Security.

I want to do more than just showing everybody the kind of problems we have. Most young people under 35 believe in UFOs before they believe they are going to get their Social Security money. And do my colleagues know what they are? They are probably right. This is the Social Security 1999 Trust Report. And what we see in black is the amount of money that is coming into the government in excess of what is being paid out, and my colleagues will note as of 2014 that starts to turn red.

Last year we spent approximately $29 billion of that money. The Congress appropriated $29 billion of excess Social Security money for appropriation bills.

Twenty-nine billion was taken out of the money that was coming in supposedly dedicated for Social Security.

There is another thing that I would like to discuss is we do not have a real surplus. What we have is a Washington surplus, because if we exclude Social Security money, last year we ran a $29 billion deficit. The debt to our children and our grandchildren is rising at the rate, as we speak, of $275 million a day. So it is not about whether we should do the right things for our farmers. We should, and probably we should spend more money on our farmers than what we are spending. The question is, how do we spend that money?

If we look at what is about to happen this year, the surplus for the year 2000, as estimated by the Social Security Administration, is $141 billion. Based on what they have projected, a conservative estimate that $45 billion of that will be spent. That is Social Security money that are working every day putting into that, with the trust to think that that money is going to be there for them when they retire. And that does not even address the issue, can they live on their Social Security payment now?

In my practice in Muskogee, Oklahoma, when I see seniors, I have seniors who are totally dependent on Social Security. And do my colleagues know what they do? They do not buy their medicine because they do not have enough money. They buy food before they buy medicine.

So not only do we have a problem in taking the money that is supposed to be for Social Security, the benefit that we have out there in many instances are not enough for our seniors to live on, let alone live healthily on.

Finally, the point I would make is that we have 102,000 Agricultural Department employees. We have another 87,000 contract employees for the Department of Agriculture. That comes to 189,000 employees in the United States. If we take 260 million people, it is pretty quick you can come up, for every 1,500 people in the United States, we have at least one Agricultural Department employee. Do we need all those employees? What we have said is we cannot cut the number of employees in the Agriculture Department, we cannot have less employees, and we cannot get more money directly to the farmers, because we are chewing up a vast majority of the money trying to give them the money. It is not about not taking care of our farmers. If we expect to protect Social Security money, which on both sides of the aisle, save two Members of this body, voted for budgets that said they would protect 100 percent of Social Security, then we have to bring this bill back to the level of spending last year. What that requires is about $260 million worth of
tracing amendments to be able to do that. I propose to offer offsetting amendments that will bring us down to last year’s level. When we get to a two-level, then I will stop offering amendments. Until we get to that level, I plan on continuing to offer amendments. This is not done in any precipitous fashion. My intention is to help us all do what we all voted, save two Members, to do, and, that is, to preserve Social Security. The best way I know of doing that is the first appropriation bill, to make a first start on that.

Mr. SKEEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the reason we have a 1-year appropriations bill is so that the Congress can look at the spending each year and adjust accordingly as the Constitution do to the administration’s request and we do not automatically approve last year’s level of spending. This bill has a modest increase in spending over fiscal year 1999, and it is about 30 percent of the increase requested by the administration. I have heard several hundred requests for more spending by my colleagues, both Republicans and Democrats. Frankly this bill does not come near to paying for all those requests. But we did the best we could and I certainly hope that no one who wrote us asking for spending will support this amendment.

In this bill, there is additional money for food safety, for conservation, for rural housing, and for a lot of programs that benefit all our constituents. Our bill funds about 130 accounts with many more subaccounts and individual projects. It is always possible to find fault with individual items in the bill, but this bill is a cooperative effort. I believe the kind of legislation that a majority of our Members want to see for their constituents.

Mr. Chairman, I would like to remind all my colleagues that although we refer to this as the agricultural appropriations bill, the majority of funding goes to nonproduction agricultural programs. This bill pays for badly needed housing, water and sewer, and economic development in rural America. It pays for conservation programs that benefit watersheds in urban and rural areas. It pays for food safety and medical device inspection programs that are literally life and death matters. That is why I oppose this amendment and why I ask my colleagues to do the same.

Mr. Chairman, I reserve the balance of my time.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume. I also want to make a couple of comments about the prior gentleman’s remarks. No department percentagewise inside this government of the United States has been cut more than the U.S. Department of Agriculture. In 1993, there were 129,500 employees. Today the request of the department would fund 107,700. This is a reduction of over 21,800 positions. I would like any other department of the United States based on the amount of funds that it receives through the taxpayers to take this kind of cut. There have been over 35,000 positions cut in the U.S. Forest Service, battling forest fires. Look what has happened across this country over the last several years. In meat inspection, so vital to the health of this country, over 9,700 meat inspectors have been cut. I would say to the gentleman, we have had over a 30 percent cut in the staffing levels at the U.S. Department of Agriculture. So if you are looking for cuts, believe me, this agency is hemorrhaging. Part of the damage being caused in Oklahoma and other places is because we are not paying attention to the production side of the equation inside the United States in rural America, and that is a true tragedy.

Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. STENHOLM), a very respected member of the authorizing committee.

Mr. STENHOLM. Mr. Chairman, I thank the gentlewoman for yielding me this time. I rise in support of this bill. I commend the chairman and the ranking member for the hard work they have done under some very difficult circumstances.

We come here today with a situation in agriculture that is worse than it was a year ago. Farm income stress is only intensifying from last year. To those that are worried about the spending level on agriculture, let me make this point. In 1990, net farm income was $14.7 billion, but this year it is $43.6 billion, which includes all of the $12 billion in subsidies that have been written. At the same time look at what has happened to the Dow Jones average. It has gone up 230 percent. My colleague from Oklahoma that spoke, I want to commend him for his honesty and his forthrightness and his persistence. He voted for the Blue Dog budget. Had the Blue Dog budget passed, we would have been talking about increased funding for agriculture today. We would have been talking about meeting the needs of the cotton step-2 program, meeting the additional needs of research in agriculture, paying the $100 million the WIC program needs in order to meet all of the human need. The gentleman from Oklahoma voted for it of which I deeply appreciate. A majority of my colleagues on this side of the aisle voted for it. If we had only gotten a majority on both sides, we could have been doing a much more adequate job of meeting the true needs of agriculture.

Now, we have got a lot of problems that need to be solved. They should not be attempted to be solved on this bill. It needs to be done in the House Committee on Agriculture. We have got work to do on crop insurance, opening up our markets, and I look forward to an opportunity to do that. Coordinated policies, working together with USDA in this Congress. We really cannot afford to wait much longer. I hope and expect that this year under the leadership of the gentleman from Texas (Mr. COMBEST), the chairman of the House Committee on Agriculture and those on both sides of the aisle that we will be able to take up in an orderly fashion those things that need to be done in order to make sure that agriculture will continue to be for all of America what it is today.

Mr. Chairman, I submit the following correspondence for printing in the RECORD:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON AGRICULTURE,

Hon. DON GLICKMAN,
Secretary, U.S. Department of Agriculture,
Washington, DC.

DEAR MR. SECRETARY: We are writing to urge you to give careful consideration to the development of new programs to enhance the competitiveness of U.S. wheat exports by improving the cleanliness and uniformity of grain delivered to foreign buyers.

Over the past decade, competition in the wheat export trade has intensified. The domestic wheat industry believes that cleaner US wheat will be more competitive in foreign markets. We ask you to develop a program that would provide assistance to export elevators for the financing of high speed cleaning equipment.

In recent months, we have had some very strong reminders of just how important exports are to US agriculture, along with the recognition that we need to make our products as competitive as possible. We believe that improvement of the domestic cleaning infrastructure is a worthwhile investment that will help US wheat share a growing market share in the years to come. Capital investments made now will ensure the future competitiveness of the US grain industry.

Thank you for your consideration of this proposal, and we look forward to working with you in developing and implementing a program that will enhance US grain competitiveness in world markets.

Sincerely,

CHARLES W. STENHOLM.
JERRY MORAN.

Ms. KAPTUR. Mr. Chairman, I yield 2½ minutes to the esteemed gentlewoman from Connecticut (Ms. DELAURA) who has spent so many hours and weeks working on this bill.

Ms. DELAURA. Mr. Chairman, let me thank the gentleman from New Mexico (Mr. SKEEN) and the gentlewoman from Ohio (Ms. KAPTUR) for their hard work in what has been a difficult feat to balance the important priorities of this bill given the budget constraints that the subcommittee faces. I am concerned that we could not do more to support vital programs, however, that improve the day-to-day lives of hard-working American families; providing a safety net for farmers in crisis, reducing smoking among young people,
ensuring high quality nutrition for parents and their children. These are issues not receiving enough attention. First there is the issue of children’s food. Farmers today. From low grocery store food prices to safe food on the dinner table, the benefits of U.S. agriculture are immeasurable to each and every American family. Farmers across this country are faced with issues that do something and, by God, we must do something.

This bill does not do enough to address the depression level prices our farmers face. A serious issue before this Nation is tobacco use among America’s youth. Each day an astounding 3,000 teenagers take up the smoking habit. The loss to America equals 420,000 lives. This year the President requested a $30 million increase to expand his partnership with the FDA and States to enforce the laws prohibiting tobacco sales to minors. The additional funding would have enlarged this successful and business-friendly program that would have been expanded to 50 States. Sadly, this bill does not provide this important investment, made even more essential because States like Connecticut, my own State, are not investing their money from the tobacco settlement into educating the public about the dangers of smoking. I am concerned about the little over $4 billion allocated for the WIC program in that it may not be able to cover all of its participants. WIC guarantees that 7.4 million women and their children receive solid nutrition and health advice, preventing future illness and serious health problems. I am disappointed that funds could not be found to take the first steps toward a study of the benefits and the costs of a universal school breakfast program, a study already been authorized by the Goodling Act. Regional studies have linked school breakfast programs with higher test scores, better behavior and improved attendance. But a truly rigorous and a comprehensive study is necessary to nail down and to solidify the proof of that relationship.

This is an unfunded mandate. If the Congress is going to require this study, it must provide the funding. I again applaud my colleagues for facing these restrictions. These issues deserve our highest commitment.

Mr. SKEEN. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. BOYD).

Mr. BOYD. Mr. Chairman, I want to thank the gentleman from New Mexico (Mr. SKEEN) for yielding me this time and for his leadership in putting this appropriations bill together, and also to the gentlewoman from Ohio (Ms. KAPTUR) for her leadership with the gentleman from New Mexico.

As many of my colleagues know, Mr. Chairman, I have spent all of my productive life in agriculture and have followed these proceedings in Congress for many, many years as related to a national agricultural policy. In 1996, this Congress decided to write a new farm bill which many have described as called Freedom to Fail. Prior to that time, many of us came to Washington and asked the Congress to take a long, hard look before it changed national ag policy. We had a policy in this country that worked. Obviously there was a consolidation of farming over the years like there has been in every industry that weeded out some of the less efficient operators. But certainly if you were efficient and a good operator, under the policy that existed, you could make a living in agriculture. It established and kept a strong agricultural economy for our Nation. I stand today speaking in support of the bill that is brought this floor by the gentleman from New Mexico and the gentlewoman from Ohio. They are working within the confines of the Balanced Budget Agreement that we put in place in 1997. Actually I think we were treated very well, given the confines of the budget that we are working under. As the gentleman from Texas (Mr. STENHOLM) said earlier, had we passed the Blue Dog budget which many of the folks on both sides of the aisle voted for, we would have a few more bucks to play with here. But I think really the debate today is not about whether this appropriations bill is good or bad, because it is absolutely the best that we can do under the circumstances that we have been presented with. But it has to do with a larger picture, and, that is, what is the national agricultural policy of this Nation?

I just want to throw out a couple of things for Members’ consideration. Number one is, in 1996 when that farm bill was written, the farmers were promised if they would give up their safety net, they were promised in exchange a loosening of regulations and, secondly, open markets. Well, they gave up the safety net, but in both cases they did not get what they were promised. They did not get a loosening of regulations and they certainly have not gotten an opening of the world markets.

Now many people want to blame the administration. I do not think the administration is to be blamed here. It was the Congress that wrote this piece of legislation, and it is the Congress that ought to go revisit it.

I think, Mr. Chairman, that I would like to strongly encourage the Members to support this piece of legislation, and I want to thank the gentleman from New Mexico (Mr. SKEEN) and the gentlewoman from Ohio (Ms. KAPTUR) for the work that they did.

Ms. KAPTUR. Mr. Chairman, I yield 2 minutes to the gentleman from Arkansas (Mr. BERRY), the hard-working member of the authorizing committee.

Mr. BERRY. Mr. Chairman, I thank the gentlewoman from Ohio (Ms. KAPTUR) for yielding this time to me, and I want to thank the Ranking Member of this Committee for the hard work that they have done.

Mr. Chairman, America is the greatest Nation that has ever been today because of our ability to domestically produce safe, affordable and abundant agriculture commodities. The American farmer is the most productive ever anywhere in the world. The American farmer only asks for a chance. If we will just give him a chance, he will do the rest.

A combination of factors have contributed to historically low commodity prices that are being received by our American farmers today. We have got a crisis in rural America, and we need to work with the President and Congress to fund the Department of Agriculture, to fund the Food and Nutrition Service, to fund the Food and Drug Administration, and to fund the Agriculture Research Service. This bill is a good effort to begin that. It is a shame that we do not have more money in this bill for America’s farmers, but I know that it is the best that the appropriators could do with what they had to work with.

I firmly believe, Mr. Chairman, that the further we get from our rural agrarian roots that Thomas Jefferson envisioned, the more social problems we have, and it is something that is of great concern to me. But this is just another reason why we should do the best we can to fund the Department of Agriculture and support America’s farmers.

Mr. SKEEN. Mr. Chairman, I yield 1 minute to the gentleman from Iowa (Mr. LATHAM).

Mr. LATHAM. Mr. Chairman, as a member of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, I rise in support of this bill and, first of all, would like to thank the gentlewoman from Ohio (Ms. KAPTUR) and the gentleman from New Mexico (Mr. SKEEN) for their very hard work. The subcommittee enjoys a bipartisan cooperation, and I have really enjoyed working with all the colleagues to get this bill on the floor today.

This bill feeds our schoolchildren, ensures the safety of prescription drugs and medical devices, protects our environment to water and soil conservation, restores Congress’ commitment to agricultural research and rejects the President’s cut to the science. It helps expand our increasingly important export markets, and most importantly, it protects the taxpayer.
Just as importantly, this bill does not include some of the President's proposals. Perhaps the most egregious is the fact that in the President's budget he had a $504 million new increase in fees on struggling livestock producers. These are the folks who have undergone some of the worst prices in history, and again, another increase in fee for graziers to the tune of $20 million that the President wanted to put on those farmers.

I would like to engage the gentleman from New Mexico in a colloquy, if I may.

Mr. Chairman, my intention is to clarify the committee to provide not less than $27,656,000 for the National Plant Germplasm System for Fiscal Year 2000. With this funding, our best and brightest scientists working throughout the country will serve our farmers by providing a variety of moneys for farm service, research, and food fiber to help moderate prices for our farmers, provide abundant, safe, nutritious, and affordable supplies of food fiber.

Mr. Chairman, is it the committee's intention to name that funding level in the conference report?

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. LATHAM. I yield to the gentleman from New Mexico.

Mr. SKEEN. Mr. Chairman, I would like to tell the gentleman that the committee will work hard to meet that funding level.

Mr. LATHAM. I thank the gentleman, Mr. Chairman.

Ms. KAPTUR. Mr. Chairman, I yield 2 minutes to the gentlewoman from North Carolina (Mrs. CLAYTON) from the authorizing committee, who has worked with us every step of the way on this bill.

Mrs. CLAYTON. Mr. Chairman, I thank the gentlewoman from Ohio (Ms. KAPUTR) has 2 minutes remaining, and the gentleman from New Mexico (Mr. SKEEN) has 30 seconds remaining.

Ms. KAPTUR. Mr. Chairman, I yield our remaining time to the distinguished gentleman from Vermont (Mr. SANDERS) who has fought for agriculture not only in Vermont, but throughout our country.

The CHAIRMAN. The gentleman from Vermont is recognized for 2 minutes.

Mr. SANDERS. Mr. Chairman, I thank the gentlewoman for yielding this time to me, and I want to congratulate the chairman and the ranking member for the outstanding work they have done on this bill. I think, however, there is no disagreement that the committee is forced to operate under very severe budget constraints, and as soon as this quarter, and I would simply want to remind every Member of the U.S. House of Representatives that in this great country, in this country which is wealthier than any other country in the history of the world today there are millions and millions of Americans who are hungry, who are hungry, and what does it say about our national priorities that we see a proliferation of millionaires and billionaires, that we see a situation when some want to provide over a trillion dollars in tax breaks over the next 15 years, and yet hospital administrators tell us that when senior citizens go to the hospital, they are finding many seniors who are suffering from malnutrition? What does it say about our country when school administrators tell us that when kids get to school in the morning many of these kids come from families which do not have enough money to provide them with adequate breakfast or adequate lunches, that we are unable to do the school work that they otherwise would be able to do? They fall off the wagon, and they get into trouble.

Is that what America is about? I think not.

Now I understand the limitations that there are in this bill because of the overall budget, but I would hope that every Member of Congress understands that the day has got to come, that this country of ours, that wipes out the disgrace of having hungry people within our wonderful Nation.

Second of all, Mr. Chairman, within that context we must be aware of the plight that family farmers in rural America are suffering from one end of this country to the other. Other people have made this point, and I want to repeat it. If we do not stand up and protect the small family farmer, we are going to lose that important aspect of what makes this country great.
Mr. BONILLA. Mr. Chairman, I would like to commend the chairman and ranking member of the subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies for facing a very difficult task head on and doing the absolute best they could in dealing with our agriculture needs this year. With the falling commodity prices and drought, it was a very difficult task that we faced, and the gentleman from New Mexico has taken care of research activities, conservation funding, distance learning and tele-medicine programs, PSIS programs, and it is amazing actually that we were able to get through this as efficiently as possible and deal with these important problems.

I just hope that every Member of this body understands how important it is to support this bill as it is.

Mr. BEREUTER. Mr. Chairman, this Member rises in support of H.R. 1906, the Agriculture Appropriations bill for fiscal year 2000. This Member would like to commend the distinguished gentlewoman from Ohio (Ms. KAPU), the chairman of the Agriculture Appropriations Subcommittee, and the distinguished gentlewoman from Ohio (Ms. KAPU), the ranking member of the Subcommittee for their hard work in bringing this bill to the Floor.

Mr. Chairman, this Member certainly recognizes the severe budget constraints under which the full Appropriations Committee and the Agriculture Appropriations Subcommittee operated. In light of these constraints, this Member is grateful and pleased that this legislation includes funding for several important projects of interest to the State of Nebraska.

First, this Member is pleased that H.R. 1906 provides $423,000 for the Midwest Advanced Food Manufacturing Alliance. The Alliance is an association of leading research universities and corporate partners. Its purpose is to develop and facilitate the transfer of new food manufacturing and processing technologies.

The Alliance awards grants for research projects on a peer review basis. These awards must be supported by an industry partner willing to provide matching funds. During its fifth year of competition, the Alliance received 23 proposals requesting $892,374 but it was limited to funding 9 proposals for a total of $350,000. Matching funds from industry partners totaled $475,549 with an additional $82,000 from in-kind contributions. These figures convincingly demonstrate how successful the Alliance has been in leveraging support from the food manufacturing and processing industries.

Mr. Chairman, the future viability and competitiveness of the U.S. agricultural industry depends on its ability to adapt to increasing world-wide demands for U.S. exports of intermediate and consumer good exports. In order to meet these changing world-wide demands, agricultural research must also adapt to provide more emphasis on adding value to our basic farm commodities. The Midwest Advanced Food Manufacturing Alliance can provide the necessary cooperative link between universities and industries for the development of competitive food manufacturing and processing technologies. This will, in turn, ensure that the United States agricultural industry remains competitive in a increasingly competitive global economy.

This Member is also pleased that this bill includes $250,000 to fund a drought mitigation technology project at the Geographic Research Laboratory at the University of Nebraska-Lincoln. This level of funding will greatly assist in the further development of a national drought mitigation center. Such a center is important to Nebraska and all arid and semi-arid states. Although drought is one of the most complex and least understood of all natural disasters, no centralized source of information currently exists on drought assessment, mitigation, response, and planning efforts. A national drought mitigation center would develop a comprehensive program designed to reduce vulnerability to drought by promoting the development and implementation of appropriate mitigation technologies.

Another important project funded by this bill is the Alliance for Food Protection, a joint project between the University of Nebraska and the University of Georgia. The mission of this Alliance is to assist the development and modification of food processing and preservation technologies. This technology will help ensure that Americans continue to receive the safest and highest quality food possible.

This Member is also pleased that the legislation has agreed to fund the following ongoing Cooperative State Research, Education, and Extension Service (CSREES) projects at the University of Nebraska-Lincoln:

- Food Processing Center $42,000
- Non-food agricultural products $42,000
- Sustainable agricultural systems $50,000
- Rural Policy Research Institute (RUPRI) (a joint effort with Iowa State University and the University of Missouri) $44,000

Also, this Member is pleased that H.R. 1906 includes $100 million for the Section 538, the rural rental multi-family housing loan guarantee program. The program provides a Federal guarantee on the loans made to private lenders. Developers will bring ten percent of the cost of the project to the table, and private lenders will make loans for the balance. The lenders will be given a 100% Federal guarantee on the loans they make. Unlike the current Section 515 direct loan program, where the full costs are borne by the Federal Government, the only costs to the Federal Government under the 538 Guarantee Program will be for administrative costs and potential default losses.

Mr. Chairman, this Member appreciates the Subcommittee’s support for the Department of Agriculture’s 502 Unsubsidized Loan Guarantee Program. The program has been very effective in rural communities by guaranteeing loans made by approved lenders to eligible income households in small communities of up to 20,000 residents in non-metropolitan areas and in rural areas. The program provides guarantees for 30-year fixed-rate mortgages for the purchase of an existing home or the construction of a new home.

Mr. Chairman, in conclusion, this Member supports H.R. 1906 and urges his colleagues to approve it.

Mr. UDALL of Colorado. Mr. Chairman, I rise today in support of H.R. 1906, Agriculture Appropriations for FY 2000. In particular, I would like to draw my colleague’s attention to the valuable work being done by the Ultraviolet-B (UV-B) Monitoring Program at Colorado State University.

This program provides information on the geographical distribution and temporal trends of UVB radiation in the United States. This information is critical to the assessment of the potential impacts of increasing ultraviolet radiation levels on agricultural crops and forests. Specifically, it provides information to the agricultural community and others about the climatological and geographical distribution of UVB irradiance.

In a broader sense, the monitoring program supports research that increases our understanding of the factors controlling surface UVB irradiance and provides the data necessary for assessing the impact of UVB radiation on human health, ecosystems and materials.

Beginning in 1992, Congress appropriated two million dollars per year in support of this research effort. At that level of funding, the program was able to get underway and to carry forward some money each year. Recently, appropriations have been at $1,000,000 annually, which, with the carry over amounts have been adequate. As of FY 1999, the carry-over funds have been exhausted. The President’s budget calls for $1,750,000 to simply continue this program at current funding levels. H.R. 1906 appropriates $1,000,000 for this program, but I remain hopeful that the goal of $1,750,000 can be accommodated during the upcoming conference committee with the other body.

Mr. Chairman, since the discovery of the Antarctic ozone hole in 1985, I have been personally very concerned about the impact of UVB radiation on all of earth’s living systems. This program is surely a step toward understanding and monitoring this significant threat to all of our ecosystems.

Mr. BISHOP. Mr. Chairman, after experiencing one weather-related disaster after another, the future of production agriculture and farmers farming in the middle and south Georgia faces a threat of almost unprecedented proportions.

This is not a sudden, overnight crisis. Farmers, bankers, and communities dependent on production agriculture have been in a crisis mode for some time.

Our farmers have faced a threatening situation that has now become even more severe. I have visited farms to meet with farmers all across the Second District and to see firsthand the destruction that has been wrought by the droughts and other disasters which have struck our area. Indeed, the University of Georgia has estimated farmgate value lost during the past crop year at over $767 million.

The bill contains many of the crucial programs which are needed to restore a vibrant farm economy.

It provides $2.3 billion for direct and guaranteed farm operating loans, $647 million more than the current fiscal year.

It contains $559 million for direct and guaranteed farm operating loans, $49 million more than the current year.

Research is the backbone of ag production, and it would be irresponsible for the federal
government to abdicate its role in this area. This is why we need to leave all this partisan bickering behind and get on with the business of providing the $83.86 million for the Agricultural Research Service that is in this bill.

For the extension service that is so important to our farmers, this bill has $916 million for Cooperative State Research, Education and Extension Service activities.

There is $71 million for USDA’s Risk Management Agency, which manages the federal crop insurance program. How else will the Congress ensure that insurance products that can effectively protect against risk of loss are developed? How will we ever get to the point where farmers can adequately recover their costs of production following a disaster and pay premiums that are affordable?

The bill will fund the $654 million needed for operation of USDA’s Natural Resource Conservation Service. This agency helps farmers conserve, improve, and sustain the soil and water on their land for future generations.

This bill includes a $300,000 allocation to expand research into ways to protect the few consumers that allergic to peanuts, and thereby to prevent misguided efforts to ban or reduce peanut consumption.

Prices for southeast timber are at a record low, and it would be financially damaging to force growers facing thinning-out deadlines to sell their harvested timber on the current market. This is why this good bill includes language giving farmers an extension until January 1, 2003 for thinning out and selling their timber under the Conservation Reserve Program.

I ask my colleagues to let this House do the work expected of us by our farmers.

Mr. BLILEY. Mr. Chairman, I rise to address some language contained in the Committee report on the FY 2000 Agriculture Appropriations bill. The language “directs” that the FDA not proceed with a highly controversial rulemaking on ephedrine-containing products. The inclusion of this report language is an attempt to subvert regular order. The proper course for the proponents of the language to address this issue is to go before the Commerce Committee, which exercises primary jurisdiction over FDA matters. I therefore urge the House-Senate conferences to drop the language in conference.

Further, I intend to closely monitor the regulatory proceeding at issue to ensure that FDA meets all of its legal obligations.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the bill shall be considered for amendment under the 5-minute rule.

During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the Congression.

The Chairman of the Committee of the Whole may postpone a request for a recorded vote on any amendment and may reduce to a minimum of 5 minutes the time for a vote on any postponed question that immediately follows another vote, provided that the time for voting on the first question shall be a minimum of 15 minutes.

Government to abdicate its role in this area. This is why we need to leave all this partisan bickering behind and get on with the business of providing the $83.86 million for the Agricultural Research Service that is in this bill.

The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2000, and for other purposes, namely:

TITLE I
AGRICULTURAL PROGRAMS
PRODUCTION, PROCESSING, AND MARKETING
OFFICE OF THE SECRETARY
(INCLUDING TRANSFERS OF FUNDS)
For necessary expenses of the Office of the Secretary of Agriculture, and not to exceed $75,000 for employment under 5 U.S.C. 3109, $2,836,000: Provided, That not to exceed $1,000 of this amount, along with any unobligated balances of representation funds in the Foreign Agricultural Service, shall be available for official reception and representation expenses. Not to exceed $1,000 for travel, subsistence, and other necessary expenses of personnel of the Department of Agriculture to carry out section 793(c)(1)(C) of Public Law 104-127: Provided further, That none of the funds appropriated or otherwise made available by this Act may be used to pay the salaries and expenses of personnel of the Secretary of Agriculture:

Mr. SKEEN. As they say in our country, igualmente, equally.

Mr. MORAN of Kansas. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise today to commend the chairman and the ranking member for their efforts inappropriations in this appropriation bill related to agriculture. Obviously a Member of Congress who comes from the district I come from is very concerned about the agriculture economy, and the impact of the farm policy that is before us today is significant, and I commend the committee for its efforts.

I do want to raise a topic that is of great concern to me and to the many small businesses that I represent within the agribusiness community of Kansas. I have an amendment to be offered later today that would allow small meat processors with sales under $2.5 million and less than 10 employees to have an additional year before their compliance with USDA’s HACCP, the Hazard Analysis and Critical Control Points Inspection System would take effect. And I think this amendment is appropriate.

This amendment would apply only to the smallest local meat processors and would in no way change the inspection system in our large nationwide plants.

There are significant problems out there. The Small Business Administration has concluded in its letter to USDA that something must be done. Their conclusion in their letter to USDA, dated July 5 of 1995, says, “The Office of Advocacy at the SBA remains concerned about the small- and medium-sized processors’ ability to comply with the Hazard Analysis and Critical Control Point System (HACCP) on small businesses.” Requires, among other things, that an agency tailor its regulations to impose the least burden on businesses of differing sizes.

There are many alternatives which USDA could pursue which have been either rejected or overlooked by FSIS and which would reduce the compliance burden on our smallest businesses.

This is Sam’s Locker across the country in the smallest communities of our Nation, and many of them are going out of business, really on a weekly basis. I pick up the paper and the local locker plant in one of my communities across Kansas is closing its doors because of the cost and burden of compliance with this rule which will take effect January 1 of the year 2000.

The Small Business Administration says that the smallest firms face the greatest burden in both absolute and per-unit costs and suggests that there are a number of alternatives which USDA has not explored. So I intend later today to offer an amendment that would delay the implementation for approximately 9 months of this last phase of HACCP regulations.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. MORAN of Kansas. I yield to the gentleman from New Mexico.

Mr. SKEEN. Mr. Chairman, I thank the gentleman for his concern and his remarks. It is good to know that someone is looking out for the small businessperson.

As it happens, the committee has commissioned a GAO study of the HACCP process, and if possible, I will try to include the gentleman’s concern in that study, or work with him during the conference on the issues that he has just raised.

Mr. SKEEN. As the chair in our country, igualmente, equally.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

EXECUTIVE OPERATIONS
CHIEF ECONOMIST
For necessary expenses of the Chief Economist, including economic analysis, risk assessment, cost-benefit analysis, energy and new uses, and the functions of the World Agricultural Outlook Board, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1622g), and including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $5,000 is for employment under 5 U.S.C. 3109, $5,620,000.

NATIONAL APPEALS DIVISION
For necessary expenses of the National Appeals Division, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $25,000 is for employment under 5 U.S.C. 3109, $11,718,000.

OPPERATION OF BUDGET AND PROGRAM ANALYSIS
For necessary expenses of the Office of Budget and Program Analysis, including employment pursuant to the second sentence of
Mr. COBURN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Coburn:

Page 3, line 23, after dollar amount insert "(reduced by $463,000)."

Ms. KAPTUR. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentlewoman reserves a point of order.

Ms. KAPTUR. We do not have the amendment on this side and have not seen it.

The CHAIRMAN. The Clerk will distribute copies of the amendment.

Mr. COBURN. Mr. Chairman, the purpose of this amendment is that the $463,000 represents over a 7 percent increase in this department, Office of Budget and Program Analysis. Again, I will restate the obvious.

I believe that the money that we spend on agricultural programs ought to be going to our farmers, and I object to the fact that we are increasing overhead and bureaucratic expense, and that this money is not available to the farmers in my district. This money is not available to put the FSA offices back close to the farmers instead of having it 90 miles away from my farmers.

So what we have done by this increase over the baseline from last year is spend money in Washington and not spend money on our farmers.

The purpose of this amendment is to bring us back to last year.

I again want to go back. Any dollar that is spent that should not be spent is a dollar of Social Security money stolen from our grandchildren. The Social Security Administration estimates that in the year 2020 to 2022, to stay even with Social Security, despite no other changes, that we will have an effective FICA tax rate, a Social Security tax rate of somewhere between 22 and 24 percent, somewhere double where we are today. So if we continue to have this kind of spending, which we know, if it is not absolutely necessary, will be taking money from our grandchildren, our grandchildren will repay this money. Any money that is spent in this bill for a service that is not absolutely necessary is a dollar stolen from our Social Security.

What does that mean? That means, number one, that the Social Security surplus is less. Number two, that means the debt, external debt that we hold today will not decrease by that amount, and that is what we have been doing with the excess Social Security money; we have been paying off bank- ers and foreign governments who own our Treasury notes and Treasury bills and putting an IOU in the Social Security system. So that also is a lost opportunity for savings on external debt.

Number three, it pretends to be a situation that rationalizes that in hard times, like we are in today spending money on ourselves, we can afford to have a 7-plus percent increase in bureaucratic overhead.

It is my feeling that the people in my district are best represented when the money that is spent for agriculture goes to our farmers, not to the bureaucratic administration of that aid to our farmers.

So, therefore, Mr. Chairman, I would make the point again that we are going to have close to $149 billion in excess Social Security payments in the year 2000, and that this one small area, this one small amount of $463,000 is enough to supply Social Security in the future for several of our grandchildren, especially if it is not spent and compounded and earned.

Mr. Chairman, one of our colleagues, the gentleman from South Carolina (Mr. Sanford) took 6 years, the years from 1944 to 1950, and took the amount of money that was put into Social Security, had that amount interest, and not spent and invested at a rate of 6 percent return, there would be $3 trillion from those 6 years in Social Security today. So by spending money, rather than saving money as it was initially intended, what we are doing is losing opportunity for our children.

Mr. Chairman, I plan on offering this amendment. I am in hopes that people will support the fact that we do not need to have this much of an increase to be able to accomplish this as the purpose of this budgetary office. It is my hope that we can have an acceptance of this amendment, that the chairman will look favorably on this amendment, knowing that the dollars to pay for this will come not only from the seniors who have trouble getting by today, will come from the commitment that we made not to touch one penny of Social Security.

The CHAIRMAN. Does the gentlewoman insist on her point of order?

Mrs. MYRICK. Mr. Chairman, I move to strike the last word.

Mr. COBURN. Mr. Chairman, we have been provided now with copies of this amendment, so I withdraw my point of order.

Mrs. MYRICK. Mr. Chairman, I move to strike the last word.

Mr. COBURN. Mr. Chairman, I rise in support of the Coburn amendment because I just believe it is time to keep our promise, and this is one place we have to start. We have told the American people that we balanced the budget, and I really believe that now we need to stick to our word, because otherwise we are not being true to them.

I understand and sympathize with the American farmers; I understand the committee's concerns and problems. In fact, we just passed a supplemental bill that added additional dollars for farmers.

But since this year's budget resolution calls for $10 billion in discretionary spending cuts, we have to make the cuts to stick to the balanced budget agreement and protect and preserve Social Security, and the time to start is now.

There is never a good time. That is the difficult thing about this place, because it is always hard not to spend money in a culture that is set up to spend, spend, spend. That is what Washington does and does well. It is always easy to stick pork in bills to spend more money; it happens every day. I think that is wrong.

Mr. Chairman, we have to stand up for our principles of lowering taxes and protecting 100 percent of Social Security for our children and our grandchildren. They are depending on that. They look to us to be responsible, and as we do our bills, as this whole appropriations process goes forward, we have to be really conscious of that.

It is time to put the good of the country ahead of personal ambition and tighten our belts. Without cuts now, and this is a relatively non-controversial issue, how in the world are we going to reduce spending in the other 12 appropriations bills?

Mr. Chairman, for years, Congress has raided Social Security and funded pork barrel spending, and I believe it needs to stop; and today is a good time to stop it. I support the Coburn amendment, and I support fiscal responsibility.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma (Mr. Coburn).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. COBURN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

Pursuant to the provisions of clause 6 of rule XVIII, the Chair announces that he will reduce to a minimum of 5 minutes, the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call.

PARLIAMENTARY INQUIRY

Mr. COBURN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN: The gentleman will state it.

Mr. COBURN. Mr. Chairman, is there a planned quorum call at this time? Can the Chair advise as to the planned quorum call?

The CHAIRMAN. There is a quorum call at the point of order request of the gentleman from Oklahoma.

Mr. COBURN. And will that be granted?

The CHAIRMAN. It will be. It has been.

The call was taken by electronic device.

Mr. COBURN. Mr. Chairman, this is my understanding: The result of the vote was announced as above recorded.

Mr. EHRLICH and Mr. SESSIONS changed their vote from "no" to "aye." So the amendment was rejected.

The CHAIRMAN. Does the gentleman from Oklahoma yield for an inquiry?

Mr. COBURN. Mr. Chairman, having the House, with 137 Members, I believe, agree that we should freeze this spending, given the fact that the increase in spending is going to be above this last year's fiscal year and will come from Social Security trust funds. The purpose of this amendment is to decrease by one-half the amount of increase in the Department at this level.

I have before me a sample of what most seniors probably think is going on right now, a check from the Social Security Administration that is going to be $231,000. This still gives that department in that area an increase two-and-a-half times the rate of inflation. Very few people in our districts and within the private sector are seeing increases in their operating and overhead expenses or their salaries going up at two-and-a-half times the rate of inflation.

It is estimated by the Congressional Budget Office and the Office of Management and Budget that the Social Security surplus this year will be $149 billion. On track, the first appropriation bill to meet this House, has an increase over last year. The purpose of this amendment is to reduce spending in Washington and that I felt we should not spend any money that comes from Social Security. Well, I would portend just the opposite of that. I think that is a good reason to vote for people with term limits. The fact is that we are spending $260 million more in this appropriation bill than we did last year. The purpose of this amendment is to trim some of that. It is not to inhibit what we do with our farmers, it is to make sure that the money that we put into the Department of Agriculture gets to the very people that we want it to. By having an 8 percent increase in this office, a portion of that money could be saved, could be preserved in Social Security, could be used to lower the FICA taxes that our children and grandchildren are going to have to pay so they will be able to have Social Security. It is not anything but incumbent on Members of this body to try to spend the taxpayers' money in the way that they believe is in the best interest of the country and in the best interest of the long-term security for this Nation. I want to be measured by how I left our country. I want to be measured when my grandchildren, who are now 3 and 1, look at their income tax statements and look at their payroll slips and know that we were not responsible for raising the FICA payments from 12 percent to 25 percent. And that is the estimate from the Social Security Administration that is going to be required by the year 2022. We can change what happens in Washington. We do not have to spend more money. The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma (Mr. COBURN). The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. COBURN. Mr. Chairman, I demand a recorded vote. A recorded vote was ordered.
Mr. COBURN. I yield to the gentleman from North Dakota.

Mr. POMEROY. Mr. Chairman, I thank the gentleman for yielding.

I am informed that the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies has brought this bill to the floor within their 302(b) allocation and therefore am of the opinion that it is funded by general fund revenues and has nothing to do with the Social Security funds the gentleman is speaking to.

Mr. COBURN, Mr. Chairman, re-claiming my time, that is a literal statement that in fact at the end of the day will not be true. Because by saying that this is within the 302(b) means that you also would agree that Labor HHS could be cut $4.9 billion and that is the fact that the 302(b) for Labor HHS.

So the amendment was rejected.

The results of the vote were announced as above recorded.

The amendment offered by Mr. COBURN.

Mr. COBURN. Mr. Chairman, I offer an amendment.

The Clerk reads as follows:

Amendment offered by Mr. COBURN.

Mr. COBURN. Mr. Chairman, the purpose of this amendment is to address the increase that was given to the Office of the Chief Information Officer. What we have heard through the general debate on this bill is that this is a fairly tight bill, and I agree with that. It is a fairly tight bill. I also agree that there is also an area where if we spend a certain amount, $61 billion, that we ought to make sure that that money is allocated, that money is going to the taxpayers, actually gets to the end people that we want it to get to, i.e., the farmers, i.e., the people that are going to help those people, those dollars are going with the budget process this year. They are not an accurate reflection of where we are going with the budget process this year. They are in terms of total dollars, and I would agree with the gentleman in terms of total dollars, but what they are in front-end-loaded and at the tail end is the very things that most people are going to need besides our farmers, those that are most dependent on us, the veterans, those that do not have housing, those that are not medicare and the supplemental things that we do to help those people, those dollars are not going to be available. So what we are going to do is we are either going...
to pass a bill that cuts those severely, which neither of us I would surmise would vote for, or we are going to go into ultimately spend seniors' money, the President and bust the budget caps and in fact spend Social Security money. So I will stick with my argument that this bill, because it is above last year and is not below last year, will in the end ultimately spend seniors' money. The President and bust the budget caps and in fact spend Social Security money.

Mr. POMEROY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want us to look very closely at what is going on here. This is an appropriations bill brought up pursuant to the budget plan passed by this House. The chairman of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies was given a 302(b) allocation and he has brought his bill forward under that allocation. That is not about extra allocation spending. This is a chairman that has done everything right, operating under the 302(b) allocation and he has brought his bill forward under that allocation. And that is not about emergency spending. This is not about extra allocation spending. This is a chairman that has done everything right, operating under the 302(b) allocation the Committee on Appropriations and under the budget plan passed by the majority. So I simply do not believe that it is rooted in fact that we need to look at this for other than it is, spending for agriculture.

Mr. COBURN. Mr. Chairman, will the gentleman yield?

Mr. POMEROY. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, I guess if we were to ask the seniors who are on Social Security in Oklahoma and those from your State if they believe it is appropriate that this office get a 9 percent increase this year and what did they get in terms of their Social Security increase, I think most of them would say that the fact that we cannot be more efficient. That is the point I am making.

Mr. POMEROY. Reclaiming my time, I was respectful to the gentleman in his 5 minutes and I want to make a couple of points. The farmers of this country are in a world of hurt. I have lived all my life in North Dakota and I have never seen it as bad as it is today. We have prices that do not cover the cost of production. This body made a decision that we were not going to protect the farmer when prices collapsed and prices have collapsed below the cost of production. As a result, we have got farmers going bankrupt all over the country. We have got auction sales in North Dakota that do not quit. Now, this Congress because we have got a farm bill that is not working has tried to do a lot of things. Members will remember last year, we passed increasing the AMTA payments, we passed accelerating the AMTA payments, more money to payment, to somehow tide them through this situation. We passed a disaster bill that has proven to be the most confusing disaster bill ever passed and the U.S. Department of Agriculture did not even get it all fully available until June of this year. Now, through that all, the farmer understands this. He is losing money, he is about out of time. He does not understand all these relief measures that we are trying to pass because they are confusing, they are haphazard, they have been passed in a happenstance way and an ad hoc way. The Public Information Office of the U.S. Department of Agriculture has never been more important. And if you think everyone gets it in terms of what is available for them, you just call one of your farmers right this afternoon and ask them. It is chaos out there and confusion. They do not know what is available. The U.S. Department of Agriculture needs to do a better job. Secondly, it needs the resources so that it can do the job we expect them to do. We have changed the farm program. We have ended the price support that has been part of farm policy for four decades. We are now operating under ad hoc, give them some money here, get them some money there, build a program, try to tide us through, and all of that is very confusing. This public information function is vital. When we pass a response to farmers, that just does not mean that money appears in the bank account. You have got to run the program. That means have the people understand it, have them come in, have it administered in the field offices and get the checks out. This is an essential part of that bargain. This is under the absolute legitimate function of the Appropriations Subcommittee on Agriculture operating under their allocation bringing this money to the floor.

I notice that all of the Republican leadership voted for the last Coburn amendment. Republican leadership not understand the crisis that we have in farm country? We have an absolutely deadly threat to our farmers. We are going to lose family farming as we know it today without responding. And so I do not want this to be a Republican or Democrat majority-minority thing. This is a bill for farmers at a time when they have never ever needed it more. So let us save those arguments about these unrelated matters, make them in special orders, make them another time, but let us today, this afternoon, stand for our farmers. They desperately need the help.

Mr. SALMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to compliment the gentleman from Oklahoma. While I know that the debate, as we go forward, might get just a little bit heated or a little more, the discussion of apples and oranges, the fact is, the gentleman from Oklahoma recognizes this, that last year we made a solid, ironclad promise to the seniors in this country; and that was that we, as a Congress, would do everything within our power in a bipartisan way, to protect the solvency of Social Security.

The fact is, the gentleman from Oklahoma has recognized, I think, as many of us do, that within this total budgetary process, he sees that train wreck coming. The fact is, by the end of the day, after it is all done, if we fund government, if we fund the bureaucracies at the level that all of these proposals are coming in at, we will end up having to rob Social Security to cover up the difference. Frankly, I am not going to be a party to that. I know the gentleman has risked a lot to put forth, what, close to 100 amendments today because he believes so strongly in the sanctity, the sacredness of making that promise to the seniors in our country, the seniors in this land. Every amendment that he offers, you are going to hear arguments why the bureaucracy that they are defending is more important than the promise and the commitment, the sacred commitment, that we made to our senior citizens. Frankly, I am going to side with the gentleman from Oklahoma on this one.

Mr. NETHERCUTT. Mr. Chairman, I move to strike the requisite number of words.

I have listened to well-meaning people here today. The sponsor of the amendment certainly is, and the last speaker certainly was; my friend from North Dakota certainly is. But let us make sure we understand what we are really talking about here.

All this discussion about senior citizens being hurt by something that we might or might not do relative to emergency spending or busting the budget caps or whatever the spending argument might be is just false. Nobody is going to hurt any senior citizens. Senior citizens are not going to be touched in this debate on Social Security.

It is my generation that is going to be hurt. And the younger people who are baby boomers are going to have to face this Social Security issue. It is not going to affect senior citizens. We are not going to cut Social Security that affects their lives. We are talking about out to 2032, for goodness sakes. So I think that is a false argument as we talk about agriculture.

My friend from North Dakota, as a strong advocate of agriculture and rural agriculture, like I am because I come from a district that depends on it, is mistaken relative to the farm bill of 1996 somehow causing the low prices around the world. That is nonsense in my judgment.

What is happening is, we are in a world market economy that has some price depressions. It is not the farm bill
that has caused problems for our farmers; it is the fact that we do not have markets, for crying out loud.

My argument is we ought to be lifting sanctions on those countries which have we previously traded with that have been good customers of our farmers, in a free market system, not more government control or more government regulations. In a free country and control farming for the government in our system. This free market system is a good one.

Ask farmers. I have asked them, and they have told me: We like the system, but we have to have freedom to market our products overseas, and we do not have it right now, and we need less regulation at the Federal level, at the USDa level. That is what is going to save and help our farmers.

So I am all in favor of making cuts wherever we can, but as my colleagues know, the chairman here has worked hard on our budget allocation to do what is right for agriculture. Most of this money in this ag budget goes for food stamps. WIC programs, as my colleagues know, food safety and other social sides of spending relative to agriculture. It is not the farmers that are getting some great windfall. The farmers are hurting. So the biggest part of this budget goes to the social spending side of agriculture which is lumped into the ag appropriations bill.

So we are not going to hurt senior citizens in this process where certainly our farmers are needing help, but I think it can be done better in the market economy rather than in more government control. As my colleagues know, more regulations and rules at the USDA level. That is what is going to cause problems for our farmers. So the biggest part of this money in this bill, and the Committee passed, too.

Mr. Chairman, we cannot just not pass something. This, as my colleagues know, we can fight this bill until the cows come home, but we got to get something passed, and that is the chairman’s motivation. The chairman of the full Appropriations Committee on Appropriations’ motivation, and as my colleagues know, we can look downstream and figure out what we are going to have to face. But let us face it, but let us pass these bills or else we are going to have nothing to pass until the end of the day.

Mr. BOSWELL. Mr. Chairman, I move to strike the requisite number of words.

It has been an interesting discussion going on here, and it does not take really a rocket scientist to figure out what is going on when we see this many amendments on this particular bill, and if we want to do something about Social Security, let us bring it out here and get on with it. But if we are going to talk about agriculture, let us say it like it really is.

Agriculture is in a world of hurt. The last speaker, the gentleman from Iowa, and I just met in the Rayburn Room with some of my bankers from rural Iowa, and they are talking about the foreclosures that are starting to take place. It is really happening, it is really happening; reflections for me, having come out of the State legislature, of what went on in the 1980s, and it is not a very pretty sight and it is not good for our country.

Now we might ought to reflect on this a little bit. As my colleagues know, we are pretty unusual in the world of things at 14, 15 percent, Mr. Chairman, of disposable income spent on food compared to anywhere else in the world. Most countries, wherever, 25 or whatever, to undeveloped countries that take everything, and we have got the most plentiful, safest food and the least expensive. Now we do not feel that way when we go to the grocery store, but the truth of it is this is the way. Now we are messing with our machinery, if my colleagues will, with our factory, if my colleagues will, that produces this food and fiber.

Now some of these things said need to be expanded on a little bit. The Secretary told us in our Committee on Agriculture here 3 months ago, something like that, unprecedented, unprecedented worldwide, that we have got overproduction. So when we go somewhere else to make a trade or to want to sell, they say: “Excuse me. We want to sell to you.”

So, Mr. Chairman, we got a tough situation, and to get the word out and to make sure that, as my colleagues know, those of them that are aware of what is going on in the Farm Service Agency offices and so on, to be able to get the word out as to what is there for them, we need this to be done. We probably need it more than what we are appropriating.

And I want to compliment the chairman and I want to compliment the ranking member for the work they have done within these targets that were established. Pretty tough. I know they have had a tough assignment, but they worked hard and put the hours in, and we thank them for it, and we appreciate it. But we need to pass an ag bill. We need to tell the farmers out there that provide the food and fiber for all of us that we know what is going on and that we want to help them and we want to pass this bill.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take the time first to compliment my friend and colleague from Oklahoma (Mr. COBURN) for speaking out so strongly for those who rely on Social Security, because I have the great privilege of representing more Social Security recipients than almost every Member of this House of Representatives. They are good customers and they appreciate the strong work and the strong messages, and I am glad that Congress recognizes that it is important to keep our commitment to those on Social Security. And to do that we did adopt a budget resolution that provided the appropriators with a certain amount of money for discretionary spending.

Now in that amount of money, we suballocated that money based on what we refer to as section 302(b) suballocations. Now this is the first of the 13 regular appropriation bills to come before the House. We have already done two supplemental bills, one conference report on the supplemental bills, and now this is the fourth appropriations vehicle that we have seen for the year. It is within the section 302(b) suballocation, and the section 302(b) suballocations are within the budget numbers set by the budget resolution and also within the budget caps established in 1997.

It is a matter of fact, during the work of the full committee there were numerous amendments that were offered to dramatically increase the amount of money in this bill, and the Committee
on Appropriations, determined to stay within the suballocation, the budget ceiling number, resisted those amendment-ments.

So, Mr. Chairman, we bring to our colleagues a bill that has been looked at extremely closely by both sides of the House, both parties, and we came to a workable bill that will meet the requirements of America's farmers for this fiscal year, and as has been pointed out, that is important. It is important that America's farmers stay alive and stay well because while we do import some food, 75 percent of our nutrition comes from what the American farmer produces.

So again, Mr. Chairman, to my colleagues I would say this bill is within the section 302(b) suballocations, which are within the budget resolution number, which are the budget caps that all of the leaders of both political parties in the House, both political parties in the Senate and the President in the White House have all said we are going to live within. This bill lives within those budget caps and within its section 302(b) suballocation, and I would hope that we could resist these amendments and get on to passing this bill, and get to conference with the other body and get the funding to the agriculture community where it is really needed.

Mr. COBURN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, I have the utmost respect for the gentleman. I believe his heart is right.

As my colleagues know, when 1997 was agreed to, we did not have a war in Bosnia, we did not have $13 billion that we are going to spend on an action over there. Where are we going to get the money for that? Where did that money come from? That money comes from Social Security.

So the debate really is, is the climate in Washington going to change? Are we going to talk to the President? Are we going to bring things down and say: We are spending this $13 billion because we got to fight a war, and there is probably going to be more where that comes from. We want to plus up defense, I agree with that, but are we going to live within those budget caps as we do that?

Mr. YOUNG of Florida. Mr. Chairman, I would respond to the gentleman that that is a decision that neither he nor I will make. That is a decision that will be made by the leadership of the House and the leadership of the Senate. Then the Congress will work its will and decide if they want to agree or disagree with the decision made by the leadership.

But I would also respond to the gentleman that for the last 4 years I had the privilege of chairing the Subcommittee on Defense of the Committee on Appropriations. Now last year alone, from the time that I submitted the bill to the subcommittee to the day it went to conference with the Senate, I had my section 302(b) suballocation, it was section 602(b) back then, but now it is section 302(b), I had my suballocation changed three times during that process.

So it is certainly possible that, as we go through the consideration of the 13 appropriations bills, we will re-look at adjustments under the section 302(b)s. But the section 302(b) suballocations that we have before us today are the best job that we could do based on where we are and what the budget resolution provides for and what monies are available and identifying those important items that need to be identified.

The CHAIRMAN. The time of the gentleman from Florida (Mr. YOUNG) has expired.

(On request of Mr. McINTOSH, and by unanimous consent, Mr. Young of Florida was allowed to proceed for 2 additional minutes.)

Mr. McINTOSH. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Indiana.

Mr. McINTOSH. Mr. Chairman, I want to say I also appreciate the chairman's hard work in this area. It cannot be emphasized enough how difficult the task is.

I think the real question is: Do you think, as chairman of the committee, when we are finished with all 134 bills we will have met that overall cap, that section 302, and not have had to go above that?

Mr. YOUNG of Florida. I would respond to the gentleman that we will probably spend every nickel and every dime that is provided for in that budget resolution because, as the gentleman knows because I have told him this many, many times, if we just froze every account at last year's level we would be $17 billion over those '97 budget caps, and that tragedy that we experienced last year, the end of the year so-called omnibus appropriations bill, if we did everything that that bill committed us to do, we would be $30 billion over those budget caps that the gentleman is talking about.

But let me close out this conversation on this subject because Social Security was Mr. Coburn's original discussion. No one will fail to receive their Social Security check if this bill passes. No one Social Security check will be late unless the Y2K problem exists, and that is something else that we have to worry about.

And I have heard these arguments in this Congress for many years in an attempt to, whatever the attempt was, and I will not suggest what the attempt was, to frighten people into thinking that if we did not do this or that, their Social Security check would not be coming. That did not happen. The Social Security checks go out, they go on time, they are deposited electronically on time, and this bill's passage is not going to affect the outcome of anyone's Social Security check 1 hour, 1 minute or 1 second or $1.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have had difficulty figuring out where I am today. When I came over here, I thought that I was attending a session of the House of Representatives. I did not know that I was really attending a session of the Republican Caucus.

It has been very interesting. I am not quite sure what to say about it. Let me simply suggest that the gentleman from Florida (Mr. Coburn) and the chairman of the Committee on Appropriations has, on three occasions, tried to produce legislation which would meet with bipartisan approval in this House. Each time, it is interesting to note that he has run into its roadblock.

That roadblock has not been constructed by members of our party, the minority; that roadblock has been placed in his way by members of the majority party, the Committee on Appropriations chairman's own party.

I think all of us know that the gentleman from Florida (Mr. Young) is trying to do the right thing both for his party and for this institution, and for this country. And I, for one, make no apology, and I do not think he does either for the level at which this bill is funded.

I know of no group in the country that has suffered a larger erosion of income over the past decade or two decades than have American farmers. I know that we hear a lot about urban poverty, but the fact is, I can take my colleagues into communities where poverty is just as excruciating in rural areas. It is just a little bit more anonymous and it is a little bit further away from the television reporters who are located in the urban centers of this country.

So I think, given that fact and given the fact that American farmers are now being exposed to the crunch of world markets as never before, I do not think we have to apologize for the high funding level in this bill. This bill, if we compare it to what we appropriated last year, out of all spigots including emergency appropriations and the famous Omnibus Appropriations bill, this bill represents a 31 percent cut from last year.

Now, I would simply say this: We have tried on this side of the aisle. I did not vote for the budget 2 years ago.
I thought that it was ill-conceived for this Congress to pass it; I thought it was ill-conceived for this President to sign it.

There are a lot of things that this Congress and this President have done that I think are ill-conceived. That was the most spectacular, in my view. But nonetheless, even though I have disagreed with that budget, I tried to cooperate with the committee, because that is our institutional responsibility. But sooner or later, we are going to have to face the fact that we either make some compromises or nothing further will get done this year.

This is, as I say, the third time that we have seen a different play called after the committee brought its legislation, or tried to bring its legislation, out of subcommittee.

On my side, I understand virtually all of the Republican leadership voted for the amendment that eliminated the funds contained in the original committee bill. I make no apology for supporting this bill, but I want to say on my side that we are listening. I do not believe that we have any greater obligation to stick to the committee product than does the majority party. And if the leadership of the majority party is going to vote for amendments which are admitted by the author to be part of a tactical filibuster, then I would say the leadership of the House on the Republican side is cooperating in the destruction of its own ability to produce any progress on appropriation bills for the rest of the year.

Now, if they want to do that, that is up to them, but I do not think that it is going to be healthy for the House or, in the end, healthy for their record come October.

Mr. GILCHREST. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to tell the gentleman from Wisconsin just my perspective on roadblocks by one member or another member. My perspective is that we do not have roadblocks, we do not have partisan politics. Basically, we have differences of opinion. We come here as Members of Congress to exchange information, for the most part, have a sense of tolerance for someone else’s opinion, and then we vote. And what I see here from the gentleman from Oklahoma and those who support his position, they have a strongly held conviction that we need to reduce various budget items for the purpose of saving Social Security, all of which we would agree with.

I would also say that this is not the Republican Caucus on the House floor right now; this is the Congress, and we are speaking to various issues. I know the gentleman from Massachusetts is going to strike some very humorous comment about that, and I am going to wait around to listen, because I would appreciate it.

What I do want to say, however, is that I strongly disagree with the gentleman from Oklahoma on this issue; and I would like to do it within part of the committee bill and then give my opinion on the need to enhance and preserve and save agriculture and not talk about agriculture like it is General Motors and we are producing cars out there, or Westinghouse producing light bulbs.

This is an industry that produces life-needed food for this country, and we are, for the most part, the warehouse for foodstuffs for the world. They are doing this on less and less land.

This is what the committee bill says. This bill “provides funding for research to strengthen our Nation’s food supply to make American exports competitive in world markets, to improve human nutrition and to help ensure food safety. Funds in this bill make it possible for less than 2 percent of the population to provide a wide variety of safe, nutritious and affordable food for more than 272 million Americans and many more people overseas.”

What we are seeing in agriculture is, we are losing 1 million acres of ag land a year. That is not a million acres of ag land 10 years ago or over the decade, that is every single year we lose 1 million acres or more of agricultural land for a variety of reasons, but we are losing it.

So that means, because the population continues to increase, we need to produce more poultry on less land. We need to produce more milk on less land. We need to produce more vegetables and more agricultural products on less land with fewer farmers, and in order to do that, we need the best technology.

There is all kinds of technology out there, but not all of it is the best, and not all of it is environmentally safe. Not all of it is going to work within the confines of what we understand to be the mechanics of natural processes. One might be able to create genetically safe corn from the southern boil weevil, but what other forms of life are going to be damaged in the process? This is an intricate, very complex, scientific undertaking that we are doing here today.

Now, I would say that Social Security is safe. This has nothing to do with Social Security. We are going to preserve Social Security not only for seniors today, but for future generations.

This bill is about how we, as people, will understand how we are going to provide food for a growing population on less land; and I would urge my colleagues to vote for the bill of the gentleman from New Mexico (Mr. SKEEEN). It is a good one.

As the chairman of the gentlewoman from Ohio (Ms. KAPTUR).

In conclusion, on the House floor, we have various differences of opinions. We do not see these arguments in Cuba or North Korea or Iraq. This is the way we do business in this country. We come down here, sometimes in a very volatile atmosphere, but we discuss, debate, argue, disagree. We have a sense of tolerance of someone else’s opinion, and then we vote. And that is the final say.

Mrs. CLAYTON. Mr. Chairman, I move to strike the requisite number of words.

That is the hope, Mr. Chairman, that we will have a chance to vote.

Mr. Chairman, if I recall, the Committee on the Budget, and as I recall, the Committee on the Budget set certain limits, and my understanding is that agriculture being the first out is under its 302(b) allocation. So the issue about spending more monies than allocated that are out of compliance of the budget resolution is not directed at appropriations of agriculture. It is only directed because it is a convenient model to discuss this issue.

But although this may be a worthy issue to talk about, saving Social Security, not spending it, and I would entertain the gentleman’s argument that it is a worthy issue, it is misdirected. It should not be directed here. We should not make agriculture the scapegoat for the gentleman’s worthy discussion. I think it is misplaced.

I do not know what the issue is with agriculture. The gentleman says he is from an agriculture community. Oklahoma, the last time I heard, has a lot of issues that are equally as pressing as Social Security. This agriculture bill takes no more from Social Security than if it had not passed. It will take a lot from Oklahoma farmers, however, if it does not pass.

Mr. COBURN. Mr. Chairman, will the gentlewoman yield?

Mrs. CLAYTON. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, we just heard the chairman of the Committee on Appropriations say that if we come through with last year’s spending, just if we came through with last year’s spending, we would bust the caps from 1997 by $17 billion.

Mrs. CLAYTON. Mr. Chairman, reclaiming my time, that is my point, if we came through the whole process.

We are just starting this process, and thegentleman is attacking the beginning of the process as if we were the culprit in making that happen. We are not. So why not apply this theory to the whole?

It is inappropriate to say, if we go through the 13 appropriations bills, the likelihood is that we will bust the caps, that may happen. That is not the case; it is inappropriate.

So I would urge my colleagues, and I know the gentleman’s strategy is indeed to prolong this. If, indeed, he wants to have this discussion, this discussion is an appropriate discussion, but it is ill-placed directed at the agriculture appropriation.
In fact, I would suggest that it may be better when we talk about the lockbox. We are going to have that opportunity. First, let see the gentleman planning to do that.

We are talking about the subject of Social Security. Here the gentleman is applying Social Security safety on an agriculture appropriation as if they are in conflict with each other, and they are not. The gentleman is making the conflict. The gentleman is placing it as if the appropriation for agriculture is breaking the caps. It is not doing that. The whole process may do that, but why make us the scapegoat for what the gentleman thinks may be an eventuality in that process.

Mr. FRANK of Massachusetts. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I understood that the leadership on the other side had brought this bill up because this was the easy appropriations bill. I know we are not supposed to address the audience watching this on television, but my guess is that some of them may be eagerly anticipating the fun they will have watching the hard appropriations bills if this is what we do with the easy one. Were it possible to sell tickets to this circus, we could probably do something about the revenues, but of course we cannot.

But what I want to talk about is what I think is, in fact, the real issue here. The real issue is that of the signal achievements of the Republican Party, the 1997 Balanced Budget Act, is an unmitigated disaster. Now, there are efforts going on to mitigate it. But let us be very clear. That is the unspoken premise of this whole debate.

What a terrible mistake this House made in 1997. What a terrible mistake the other body and the President in 1997. Everybody gets up and says, oh, those budget caps, what a terrible thing they were, sort of. Some people are saying, we are going to hold you to them, and the suggestion that we are being held to them is considered to be an unfortunate one.

But everybody acts as if the budget caps fell down from the heavens like the rains or the hail. People have forgotten. Those budget caps are not a force of nature. They were the vote of this House, and they were, as I understand it, one of the great achievements of the Republican Party.

I also agree, by the way, that Social Security is not at risk here. What is at risk is Medicare. Because that same wonderful 1997 Balanced Budget Act, which is the greatest orphan in history since it does not appear to have any parent left, that 1997 Budget Act cut Medicare very substantially. It cut home and hospital, it cut prescription drugs in my State; it has cut hospital reimbursements.

And what do we have now? Surprise, surprise, the 1997 budget caps which said spending would be the same in 2002 as in 1997. People are shocked that it is inadequate.

People are shocked at having voted to cut $115 billion out of Medicare to pay for a capital gains tax cut, and Medicare is suffering. What is all the shock coming from? Were Members in a coma when they voted for the 1997 budget act? Did people not think that voting to keep spending at the exact level 5 years later was going to cause problems? Did people think cutting $115 billion out of Medicare would have meant there would be a shortage of monopoly money the next time they sat down at the game.

Never in the history of humanity have so many people professed surprise at the foreseeable consequences of their own actions. Members ran for office on this budget in 1998. They bragged about it. Now they are acting as if it was some terrible act of God that we have to live with.

Everybody in here is Job; Oh, look what has happened to us, and we will have to live with it.

Mr. COBURN, Mr. Chairman, will the gentleman yield?

Mr. FRANK of Massachusetts. I yield to the gentleman from Oklahoma.

Mr. COBURN. Mr. Chairman, I thank the gentleman for yielding.

Mr. FRANK of Massachusetts. I yield to the gentleman from Oklahoma. I yield to the gentleman from Oklahoma. I yield to the gentleman from Oklahoma. I yield to the gentleman from Oklahoma.

Mr. COBURN. I will answer when I have my own time, because I am not sure I am going to get to answer the way I want to.

Mr. FRANK of Massachusetts. Yes, the gentleman can. I just wanted to make sure I understood it.

Mr. COBURN. Wonderful.

Mr. Chairman, what the American people are looking for from this body is honesty, integrity, and truthfulness about what our situation is. We can have debates about where our priorities should be, but the fact is that we did have an agreement. I did not happen to vote for the 1997 budget agreement, but we did have an agreement with this President, with the Congress of the United States, that said we are going to live within this agreement.

What the American people are wondering is are we really going to do it, or is Washington going to continue to do what it has done the last 40 years, to say one thing and do something completely other, and at the same time spend their pension money?

Mr. FRANK of Massachusetts. Mr. Chairman, I will take my back my time. I would only make one edit. When the gentleman said "Washington," I read for that, "The Republican Congress." That is what he means by "Washington," because the Republicans control the House and control the Senate.

So my friend, the gentleman from Oklahoma, says the issue is, is this Republican-controlled Congress going to try to live up to this Republican accomplishment of 1997. And I think the answer is, they are looking for a way not to. He may not like the implications of what he said, but that is what he said.

And here is the issue. This Republican Congress willing to live up to this Republican 1997 budget act. And I think here is the problem with the American people.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has expired.

Mr. FRANK of Massachusetts. Mr. Chairman, I ask unanimous consent to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. SMITH of Michigan. I object, Mr. Chairman.

Mr. Chairman, I withdraw my objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. FRANK of Massachusetts. Mr. Chairman, I have been here too long to believe that the House is in a position where they favor a whole area that is smaller than the sum of the parts they favor, and that is what we have to grapple with.

Mr. GILCHREST. Mr. Chairman, will the gentleman yield?

Mr. FRANK of Massachusetts. I yield to the gentleman from Maryland.

Mr. GILCHREST. Mr. Chairman, I would just like to make a comment about the first Republican President, Abraham Lincoln, and this is with regard to the caps, and I say this with all sincerity.

Mr. FRANK of Massachusetts. I knew Lincoln was a pretty smart fellow, but if the guy that was around in 1865 has made a comment about 1997, he was
Mr. GILCHREST. Mr. Chairman, here is what I think he would say, that he would restate his comment that the foolish and the dead alone never change their minds.

Mr. FRANK of Massachusetts. I guess he would say that, but I do not know why.

If the gentleman is saying, "change your mind," okay, but let us be clear what "change your mind" means. If it means he admits that this great accomplishment of 1997, this Balanced Budget Act that has been the basis for so much that they have taken credit for, they are really ready to throw it over the side, I do not blame the Members. I never liked it in the first place.

The one thing the Members are not entitled to express is that the entirely foreseeable consequences of their action. They are not entitled, having done it in 1997 and taken credit for it in the 1998 election, to throw it over the side and say, what do you guys think this is, term limits, a promise one makes and then forgets about?

Mr. SMITH of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, agriculture is very important to me. I am a farmer. Agriculture has been shortchanged. We need to pay attention to agriculture and the survival of the family farm as other countries protect and subsidize their farmers.

But I think that is one reason that this is the first of the appropriation bills where we are faced with the decision of overspending. Are we going to start inching our way into a situation where we have to break our word on keeping our commitment on the caps that we set in 1997.

Just to make it clear, synonymous with sticking to the caps under the current CBO projections is whether or not we spend the social security trust fund surpluses to accommodate that extra spending.

For most every year in the last 40 years, we have used the social security surpluses to mask the deficit; in other words, we have spent the social security surpluses for other government programs. A lot of people here say, well, do not worry about it, somehow social security is going to take care of itself.

I disagree. The easy step, the easiest possible thing that we can do, is say that we are going to stop spending the social security surpluses for other government programs. That is a baby step. That is so easy compared to the program changes that are going to have to be implemented to change social security so it can stay solvent.

So when we are faced with a situation that we inch our way into overspending and using Social Security surpluses on this important Agricultural budget, which is so difficult for so many of us to vote against, we set the pattern. Then the next budget, tax plan is also important and faced with more overspending. Then a situation at the end is that we cannot possibly stay within our caps and not spend the social security surpluses.

Look, if the spending is so important, have the guts, the fortitude, to say, we are going to increase taxes to accommodate this kind of spending. Do not say, we are simply going to reach under the table, take the social security surpluses that are coming in because current workers are being overtaxed, and use that money, because few will notice the abuse. Nobody is going to see it or realize it until it runs out of money.

We have ground this country into a $5.5 trillion debt. We are increasing that debt on a daily basis. Sometime we are going to have to face up to the fact that we are transferring our short-sighted desire for more overspending to our kids and our grandkids and future generations.

Not only will they be asked to come up with additional income taxes but also social security taxes to pay for our overindulgence. I just give the Members a couple of situations. Germany did not pay attention to this early on, and now they are spending almost 50 percent of their wages in taxes to accommodate their senior retirement programs.

I am very concerned that we are going down, if you will, the primrose path of thinking all of these expenditures are necessary and important.

I would just like to encourage my colleagues to face up to the consequences. If spending is so important, let us increase taxes to accommodate that spending. Let us reduce other expenditures to accommodate that spending. But let us raise taxes and not spend social security surpluses.

Ms. KAPTUR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just wanted to remind my colleagues that we are actually debating an amendment. Now, we have heard speeches here on social security, we have gotten into Abraham Lincoln's life, and everything else. But I become increasingly angered as I see the irresponsibility of the majority party inside this institution.

I am a loyal Member of this House, and I am rarely as partisan as some of my colleagues on this side of the aisle. But I get partisan now, because a bill that I have major responsibility for is being held up on this floor because of disarray inside the Republican Party. Who it is hurting is the farmers across this country.

Mr. Chairman, I will not yield until I finish my statement to any Member on the other side of the aisle, since they are the reason for the continuing delay here today.

I have served in this Congress now for 9 terms and I have the highest respect for my colleagues on this committee, the gentleman from New Mexico (Mr. SKEEN), who has worked under enormous pressures of various types as we have moved this bill to the floor, the first appropriation bill to arise on the floor, and right so for rural America, because no sector of this country is hurting more than rural America today.

But as I look at the record of the Republican Congress during my tenure over the last several years, last year they could not clear a bill to assist rural America. We had to end up with that omnibus atrocity at the end of the year where we threw in some help for rural America, because they could not deal with their appropriation bills on time.

And then just last week, 6 months late, they appropriated more money under an emergency basis to try to help rural America. The defense supplemental appropriated more for rural America, Hurricane Mitch victims and all of the rest. They did not do it under regular order. The only part of the bill that they required to be offset for budget purposes was the agriculture piece, the part that affected citizens of the United States of America who have paid taxes.

Now today I come down here, and what do I see? I see delay by a Member who is not up for reelection. I see a Member who is not up for reelection. I see a Member who is not up for reelection. Let us put the cards on the table. They have taken credit for $400 billion, and according to what we have been told, between 100 and 200 amendments to an agriculture bill which is very important to rural America. So what I see today is delay tactics.

And do not understand what is going on on the Republican side of the aisle. They can check my whole career, I probably have not used the word "Republican" in speeches on the floor 10 times in 17 years, but I am sick of it and what they are doing on agriculture. They are holding up our bill.

I would just beg of the leadership; I will say to the leadership of their side of the aisle who voted with the gentleman from Oklahoma (Mr. COBURN), if this is any indication of what is about to happen over the next several days as we string this agony out and they make rural America wait again, I would just say, why do they not go back into their own caucus and figure out what they are really for, because we have worked very hard for several months to produce this bill, and the people of America, particularly rural America, are waiting, and they are continuing to do this.

I will specifically say to their leadership, the gentleman from Texas (Mr. ARMEEY), the gentleman from Texas (Mr. DELAY), those who voted with the gentleman from Oklahoma (Mr. COBURN), why are they doing this? There are over 100 to 200 more amendments yet to come, and they are going to delay this bill?
If these Members want a vote on social security, bring up a social security bill. They are in the majority. They can do anything they want. But why do they continue to take it out of the hide of rural America?

I have a real problem here. I would just beg of the leadership to treat their committee chairs with respect, bring their bills to the floor in regular order, and do not nitpick us to death.

Thank God we are not the other body. We are not supposed to have filibusters here. We are supposed to move the people’s business. I am here to do that as a Democrat, and I wish they were here to do that as Republicans.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. Members are reminded that their remarks are to be directed to the Chair, not to other persons.

Mr. SHAYES. Mr. Chairman, I move to strike the requisite number of words.

I would like to say that I have tremendous respect for the gentlewoman from Ohio (Ms. KAPTUR) who just spoke. I would like to think that later she will regret some of the intensity that she feels, because this is the first day of a debate on the agriculture appropriation bill.

We have a right, even in the majority, to amend majority bills, just as the minority has a right to offer amendments to these bills. That is what we are doing, and the gentleman from Oklahoma (Mr. COBURN) in my judgment, is showing a lot of courage and integrity.

I was sitting in my office and I was thinking, he is speaking the truth. We all need to have this dialogue, and if Members disagree with it, they disagree with it.

The fact is, when we set the 302(b) allocations, we decided to give more to agriculture than to HUD. That is what we are doing, and the gentleman from Oklahoma (Mr. COBURN) in my judgment, is showing a lot of courage and integrity.

We have a right, even in the majority, to amend majority bills, just as the minority has a right to offer amendments to these bills. That is what we are doing, and the gentleman from Oklahoma (Mr. COBURN) in my judgment, is showing a lot of courage and integrity.

I was sitting in my office and I was thinking, he is speaking the truth. We all need to have this dialogue, and if Members disagree with it, they disagree with it.

The fact is, when we set the 302(b) allocations, we decided to give more to agriculture than to HUD. That is what we are doing, and the gentleman from Oklahoma (Mr. COBURN) in my judgment, is showing a lot of courage and integrity.

We have a right, even in the majority, to amend majority bills, just as the minority has a right to offer amendments to these bills. That is what we are doing, and the gentleman from Oklahoma (Mr. COBURN) in my judgment, is showing a lot of courage and integrity.

I was sitting in my office and I was thinking, he is speaking the truth. We all need to have this dialogue, and if Members disagree with it, they disagree with it.

The fact is, when we set the 302(b) allocations, we decided to give more to agriculture than to HUD. That is what we are doing, and the gentleman from Oklahoma (Mr. COBURN) in my judgment, is showing a lot of courage and integrity.
couraged to do is take the high ground and try to see if we can figure out where the end of this road is going to be.

I will tell my colleagues where the end of the road is. It is a box canyon. It is a dead end. That is where we are headed.

An old Chinese proverb says, "The longest journey begins with the first step." This is the first step, and it is a step in the wrong direction. If we continue down this path, we will end up with another disaster like we had at the end of the last Congress.

So what the gentleman from Oklahoma (Mr. COBURN) is doing, he is not railing against agriculture, he is railing against this process. Sure, my colleagues are right, this is a problem within the Republican conference; and leadership is what is needed.

We need to talk about what is the end game, not agriculture. What is the end game? Where are we going? Are we going to the same disaster that we had last year, where we end up spending billions of dollars above the budget caps, $17 billion if we freeze all spending right now? That is the point that the gentleman from Oklahoma (Mr. COBURN) is trying to make.

I was always taught, say what you mean and mean what you say. Nowadays what you mean is a communication issue, and I hear that wherever I go, speaking across the country on behalf of the Republican Party: What is the problem with your communication?

One of the problems is we do not say what we mean. We are trying to do a better job of that. Do my colleagues know what we are saying? We are the party that is to save Social Security first, not 62 percent of the surplus, as the President said from that lectern not long ago, but 100 percent.

Mean what you say is an integrity issue. That is what this issue is about. It is an integrity issue of this party. Because if my colleagues are going to ask me to go around the country and rail the Republican Party and say we are the party that is to save Social Security first, then my colleagues better mean what they say, because I want to mean what I say. If we do not mean what we say, then I am going to quit saying it.

That is the issue, are we going to mean what we say when we say we are going to save Social Security first? This bill is the first test on that issue.

Again, the gentlemen from Oklahoma (Mr. COBURN) has had the foresight to take that issue ground and look ahead and say, if we continue down this path, we have a disaster coming in the form of VA-HUD and Labor-HHS that none of my colleagues will vote for under the 302(b) allocations. Not one of my colleagues will vote for a $4 billion cut in VA-HUD and $5 billion cut in Labor-HHS. Not one of my colleagues will vote for it, not one.

So that is the problem. It is a leadership issue. I agree with the gentlewoman from Ohio (Ms. KAPTUR). It is a leadership issue that we have to deal with. I will tell my colleagues that this was our last resort, was to come to the House floor, because we hit dead end after dead end in trying to carry on this family discussion inside our own house.

Mr. ETHERIDGE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had not planned to come and speak on this bill today. As I was over in my office and watching it, I was thinking I am sure my farmers are out in the field this afternoon, and I hope they are, working, and not seeing what was going on that would have such a dramatic impact on their lives. We are having conditioned building and, as my friend the gentleman from Oklahoma (Mr. LARGENT) said who just spoke from the majority side, we are in an air-conditioned building, well-lighted and comfortable; and they are not home, they are just living on the line. As he said, and he put it correctly, we are having a family fight.

I am not going to get in the middle of the family fight. I am going to let my colleagues all fight it out. But I hope my colleagues will settle it, because this bill has a significant impact on the farmers in my State and the farmers all across this country.

Yes, there are other bills to come that will affect the children. But this bill does, too, because it affects the quality of family life.

I am proud to be a Member of the United States Congress. I am not proud when we bring our dirty laundry to the floor. There is nothing wrong with offering to go to the problem with that. But, I want to be about making it better rather than just to stop the process, to make a point. That is not what legislation is all about.

I am only in my second term in Congress. I served 10 years in the General Assembly in my State. I understood stalling tactics, but it ought not to be about that. It ought to be about making it better and providing a better opportunity for people in America and specifically about our family farmers, because they are hurting.

Our small farmers are going out of business. They are going broke. I have had farmers tell me, and I met with bankers, I met with someone earlier today and they said to me, "If you do not have crop insurance, I will not make a loan. If you do not get a program, if you have a program, we are going to quit lending money."

If that should happen, I pray to God it does not, but if that should happen, it will not happen with my vote. I trust the majority party will come to their senses and make sure it does not happen with their vote either, because we have been blessed, as no other country in the world, to have a bountiful food supply.

Oh, sure, there are children that do not have as much food as they should have; but over the years we have tried to do a good job. We have not done as much as we should to make sure that they are fed with the child nutrition program and other programs like that.

But, Mr. Chairman, we have a job to do. We are paid to do it. So let us get on and pass this bill and get on to the other appropriations bills and get the people’s business done.

Mr. SANFORD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wrote down a few different thoughts here that we have all heard. Rome was not built in a day. The first step is the hardest step. The gentleman from Oklahoma (Mr. LARGENT) just mentioned the Chinese proverb, which was the longest journey begins with the first step. Do not do tomorrow what you can do today. To me, this is what the amendment of the gentleman from Oklahoma (Mr. COBURN) is all about.

As has already been stated numerous times on the House floor, we have a train wreck coming unless we go out and basically reroute this little train. So it is a family fight. It is an internal discussion. But it is a conversation that really has to take place now because the gentlewoman from Ohio (Ms. KAPTUR) mentioned the 302(b) numbers. There is no way we are going to cut $3 billion from VA-HUD. There is no way we are going to cut $2 billion from Labor-HHS. If we are going to get ahead of this curve, we have simply got to do it now.

So I would just commend the gentleman from Oklahoma (Mr. COBURN). I would say that farmers that I talk to are the most straightforward people in the world. What we are dealing with, again, goes back to what the gentleman from Oklahoma (Mr. LARGENT) was talking about in terms of the word "integrity". What we have is a budget plan that cannot work.

When we talk about this idea of a surplus, last year we borrowed $100 billion from Social Security to give us a surplus of about $70 billion. Most folks I talk to say basically we are still $30 billion in the hole if that is the math.

A family, if one had to go out and borrow against one’s retirement reserves to put gas in the car and food on the table, one would say that family was not running a surplus. In the business world, if one borrowed against one’s pension fund assets to pay for the current operation of the company, one would go to jail. That is how we are getting to this surplus.
Mr. COBURN. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. Mr. Chairman, I move to strike the requisite number of words.

Mr. COBURN. Mr. Chairman, I want to go back and make a couple of points. This amendment is about cutting a 9 percent increase in an office that is full of computers for an Office of Public Information for the Department of Agriculture. And here we have people saying that we have to have 9 percent when every other aspect of our economy is not seeing any kind of increases near that.

It is sacrosanct because of what has to continue; the way we used to do it, we always have to do it that way in the future. It is a process that needs to be shaken up.
