

rest of us are forgotten. And that, I would argue, is exactly the way things are supposed to be.●

A HEROIC GIFT OF LIFE

● Mr. JOHNSON. Mr. President, I rise today to inform my colleagues of a recent act of great charity by one of my constituents, Ms. Debbie Laakso of Sioux Falls, South Dakota.

In an astonishing act of kindness, the single mother of four donated a kidney to her friend and former boss, Verle Jucht. The odd twist is that Debbie and Verle met at John Morrell and Company where Verle was Debbie's supervisor. Though they separated as colleagues in 1993, they surprisingly remained friends for the last six years. When Verle's kidney began to fail last year, Debbie gave him hers. Knowing her jovial nature, Verle and his wife, Colleen, thought their old friend was kidding when she first offered to donate.

Luckily, Debbie and Verle were a match, and after surgery last November, both are doing well. This story, Mr. President, is a great testament to the truly good and giving nature of people. I rise today to thank Debbie Laakso for her good nature and good humor and to congratulate her and Verle Jucht on their bravery and courage. Debbie serves as a model of goodness and friendship for all Americans, and their story is an account for all of the importance of the "Gift of Life."●

RELEASE OF SONG YONGYI

● Mr. SANTORUM. Mr. President, I rise today to celebrate the safe return of Song Yongyi to his home and family in Carlisle, Pennsylvania. Mr. Song, Librarian at Dickinson College, was recently freed from a Chinese detention center after a detainment of 172 days.

Mr. Song was born on December 15, 1949 in Shanghai where he attended elementary and middle school. During the Chinese Cultural Revolution, his education was interrupted and Mr. Song became a dockworker. In 1971 he was detained and labeled a "counter-revolutionary" for organizing a book club with four other young people interested in discussing political ideas. Mr. Song spent five years in detention under harsh conditions, where he was severely beaten, resulting in permanent damage to his health. After the Cultural Revolution, he was completely exonerated of all criminal charges.

In 1977 Mr. Song was part of an elite group of students who entered university as a result of a competitive, nationwide examination. He graduated from Shanghai Normal University in 1981. He taught Chinese literature for Shanghai educational television until 1987, at which time he became a full-time literary critic and widely recog-

nized researcher. Mr. Song moved to the United States in 1989 and enrolled in graduate school at the University of Colorado, where his wife Helen (Xiaohua) and daughter Michelle (Xiaoxiao) joined him in 1990. After obtaining a second masters degree in library information science from Indiana University, the Song family moved to Carlisle, Pennsylvania, where Song Yongyi is employed as Librarian at Dickinson College.

Mr. Song's deep interest in the 1966-1976 Cultural Revolution and growing prominence as an expert in the field led him to make research trips to China in the summers of 1998 and 1999. As part of his research, Mr. Song collected documents concerning the Cultural Revolution, which are widely available in markets and curio shops. It was during this most recent visit to China that state security officials detained Mr. and Mrs. Song in Beijing on August 7. For about one month, Yongyi and Helen were held in a detention center in Beijing and interrogated. They were not allowed to see each other or communicate with the outside world. Later they were moved to a facility where conditions were less harsh and were finally permitted to speak with each other. Helen was released from custody on November 16 and allowed to return home to Carlisle, but Yongyi remained in detention. On December 24, Song Yongyi was arrested and charged with the "purchase and illegal provision of intelligence to foreign people."

Mr. Song's arrest generated an outpouring of support from scholars in the United States and abroad, as well as from politicians. As of result of the vigorous campaign to secure Mr. Song's release, the Chinese government announced their decision to free Song Yongyi.

On behalf of the many Pennsylvanians who diligently kept the Song family in their thoughts and prayers, I would like to extend my heartfelt congratulations and warmest wishes on the safe return of Song Yongyi.●

HATS OFF TO THE ALL-STAR RESEARCH TEAM AT NORTH DAKOTA STATE UNIVERSITY

● Mr. DORGAN. Mr. President, well over a decade ago, plant pathologists at North Dakota State University's Agricultural Experiment Station observed signs of a plant disease called Fusarium Head Blight—more commonly known as scab—in a few of the region's wheat fields. Upon this discovery, the researchers swung into action, not knowing they were about to do battle with an insidious plant disease which would eventually devastate wheat fields across the Northern Plains during the 1990s. Since 1993, scab has been an ever present scourge. Losses to the region's farmers from this cereal crop disease have been estimated to be

as high as \$2.6 billion during the last decade, the most costly plant disease outbreak ever in the United States.

Earlier this month, though, some good news was delivered on this front by those researchers who have battled this disease for so long. The North Dakota State University Agricultural Experiment Station announced the release of a new scab resistant spring wheat variety named Alsen. The new variety is named after the town of Alsen, located on route 66 in northeastern North Dakota, an area which was particularly hard hit by this disease.

The researchers say that while this variety is not immune to scab, it can fight off the disease. This is excellent progress and welcome news. And, while this is the first spring wheat variety to exhibit scab resistance, it certainly won't be the last.

My hat is off to these researchers from North Dakota State University! There are many long, tedious, and unglamorous hours involved in crossbreeding wheat plants. The farmers of the region will be served well by this research, and it is proper and fitting that we recognize the dedicated efforts of those who have contributed their life's work to combat this disease which threatens the livelihood of our producers.

On behalf of all who are involved with, or impacted by, the agricultural economy of the Northern Plains—which includes just about everyone living in the region—I am proud to be able to take this opportunity to say thank you for a job well done to the researchers and support staff of the North Dakota State University Agricultural Experiment Station.●

TRIBUTE TO BARBARA BUSCH

● Mr. COVERDELL. Mr. President, I rise today to pay tribute to an American who has given graciously and unselfishly to her country. For over 36 years, Barbara Busch served this nation with great distinction in her many different capacities at the U.S. Peace Corps: from a staff assistant when she first began in 1964, to Executive Officer of the Recruitment and Communications Division, to Chief of Operations of Volunteer Recruitment and Selection, to Acting Director of the Peace Corps. It is truly a story of hard work and dedication.

Barbara retired from public service just under one month ago. Mr. President, I wanted to take this opportunity to congratulate her for a remarkable career and wish her well as she moves on to the next stage of her life. She leaves the Peace Corps with a better understanding of its importance and its role in the world than anyone that comes to mind. She will be greatly missed.

When I had the privilege to serve as Peace Corps Director, Barbara was

working in the Office of Planning, Budget, and Finance. She was a diligent worker, excellent manager, and had a wonderful rapport with Peace Corp volunteers and returned volunteers alike. She was one of the few, courageous supporters of World Wise Schools, an innovative global education program that provides students in the United States with a view of life in countries around the globe. Since its inception in 1989, more than a million students in all 50 states have "put a face on a place" through World Wise Schools.

Back in 1964, when Barbara began her service, the Peace Corps was operating in 48 countries. Today, after her 36 years, the Peace Corps has 7,000 volunteers in 78 countries around the globe. It is because of dedicated public servants like Barbara that the Peace Corps continues to build on its distinguished record of service and continues to provide unique leadership around the world. There is no doubt that Barbara embodies the very spirit of the Peace Corps: a strong work ethic, generosity of spirit, and a commitment to service—the finest characteristics of the America people.

The Peace Corps continues to be the most successful program of its kind precisely because of its commitment to serving others. It is this legacy of service and commitment to others that Barbara leaves behind and for which she will be remembered.●

THE HONORABLE IKRAM U. KHAN, M.D.

● Mr. JOHNSON. Mr. President, I rise today to honor my good friend, the Honorable Ikram U. Khan, M.D.

I have had the honor of knowing Ikram for several years and I am fortunate we have developed a good friendship. Because of that friendship, I am doubly pleased that Ikram has been appointed by President Clinton to the Board of Regents for the Uniformed Services University of the Health Sciences.

This is an extremely prestigious appointment, one that Ikram richly deserves. During his twenty-one years of private practice, he has served not only his patients and the institution of medicine, but also his community and state. He has been honored by his hometown of Las Vegas and various local organizations for his community service and achievements. He has been nominated to serve on Nevada's State Board of Medical Examiners and on the state Legislature's Health Care Cost Containment committee. On the national scene, Congresswoman Barbara Vucanovich, in 1993, asked Ikram to advise her on health care delivery issues specific to Medicare, and President Clinton, in 1995, recognized Ikram for his health care reform efforts. He is a very fine man, and his years of dedica-

tion to military medicine and to the health industry in general ensures he will perform a great service in this position.

Mr. President, I would like to again congratulate my friend, Dr. Ikram Khan, on his appointment to the Board of Regents and wish him the best on his new challenges managing the Uniformed Services University of Health Sciences. I trust the University and Secretary Cohen will find him a valuable asset and a skilled adviser.●

NATIONAL HEART FAILURE AWARENESS WEEK

● Mr. SANTORUM. Mr. President, on February 10th, I phoned in a request to become a cosponsor of S. Res. 256, a resolution designating the week of February 14 through 18, 2000, as "National Heart Failure Awareness Week". Unfortunately, my name was inadvertently not included in the list of cosponsors at that time. Hence, I ask unanimous consent that the RECORD reflect my support and cosponsorship of the resolution.

Mr. President, I cosponsored this important resolution because it will help to promote research related to all aspects of heart failure and enhance the quality and duration of life for those with heart failure. With that in mind, I was pleased that S. Res. 256 passed the Senate by unanimous consent.●

TRIBUTE TO AMERICA'S HOSPITALIZED VETERANS

● Mr. ABRAHAM. Mr. President, I rise today to recognize and to salute our Nation's Veterans. The Department of Veterans Affairs has designated the week of February 13-19 as "National Salute to Hospitalized Veterans Week." I take this opportunity to pay special tribute to those veterans who are currently hospitalized, especially those hospitalized in the Battle Creek, MI, VA Medical Center.

These brave people served their country in time of need. Many of them were wounded. Many of them knew others who never came home from battle. It is only right, then, that our nation help them in time of physical need.

The Battle Creek VA Medical Center provides an excellent example of how our nation can repay some of the debt it owes our brave veterans. This facility has provided quality care for up to 325 residents at a time for over 75 years. It is an important part of our system of 172 VA Medical Centers across the United States, and an important part of the Battle Creek community.

I know that a festive schedule of special events has been planned for the week long salute. Our veterans, and particularly those who are currently hospitalized, certainly deserve every tribute we can give to them. And the

same goes for the dedicated men and women who care for them.

The American people will be forever indebted to our veterans and their families. Without their sacrifice, dedication, and unwavering commitment to our nation and its ideals, America would not be the beacon of freedom it is today. I ask that you and my colleagues join me in saluting the veterans at the Battle Creek VA Medical Center and each and every individual who has served with distinction in the U.S. Armed Forces. Let us say to them: We salute you and we thank you.●

HONORING MARY FORD, MAYOR OF NORTHAMPTON

● Mr. KERRY. Mr. President, I rise today to recognize and celebrate the public service of Mary Ford, who recently stepped down as the Mayor of Northampton, Massachusetts. Throughout her 8 years in office, Mayor Ford has elevated the City to one of the jewels of New England, and I join all of her friends, family, and constituents in honoring her today.

As Mayor of Northampton, Ms. Ford oversaw the improvement of the school system, conducted comprehensive infrastructure improvements, modernized city services, and restored fiscal discipline. Perhaps the largest measure of her contributions to the city rests in the fact that, in the course of managing an annual budget of \$55 million dollars, she erased a \$3.2 million deficit. This financial turn-around allowed the city to entertain larger goals; the renovation and expansion of Northampton High School, the establishment of an innovative trust to preserve Section 8 assistance, and establishing Northampton as an attractive place to start new businesses.

Her leadership on the budget, which includes the general fund, schools, and enterprise funds, has been complemented by computerizing all the city office's and raising hiring standards. She set the policy priorities for all the city's administrative departments, including; housing, health and safety inspection services, planning, culture and arts, finance, as well as economic and community development. Mayor Ford orchestrated all of these elements into a cohesive, focused set of services that was delivered in an effective and efficient manner, thus improving the lives of all residents.

Due to Mary Ford's leadership, The City of Northampton is now one of the state's thriving, growing cities.

The list of her accomplishments on behalf of the city's revitalization is varied and extensive; she improved the city's emergency response capabilities by allotting \$5.5 million for a state-of-the-art firehouse, renovated one third of the city's roads, and conducted comprehensive traffic re-designing for increased safety. Her accomplishments in
