

In 1778, after the Revolution, Mr. Adams eventually supported Massachusetts' ratification of the U.S. Constitution, although at first he refused to do so.

He served as governor of Massachusetts from 1793 to 1797 then retired from public service altogether.

GLORY

At the end of his life on earth, Samuel Adams made a final statement of his beliefs in his will:

"Principally and first of all, I recommend my soul to that Almighty Being who gave it and my body I commit to the dust, relying upon the merits of Jesus Christ for a pardon of all my sins."

He died in 1803 at the age of 82, a Founding Father, "Firebrand of the Revolution," and most important, a Christian man.

OSHA AWARD FOR SPRINGFIELD
REMANUFACTURING

HON. ROY BLUNT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 25, 2000

Mr. BLUNT. Mr. Speaker, today I congratulate the vision, and commitment of the officers, administrative staff and employees of the Springfield Remanufacturing Corporation in Springfield, Missouri as they attain the highest status available in OSHA's Voluntary Protection Program.

The company located in Missouri's Seventh Congressional District employs 370 people in the remanufacturing of diesel engines for trucking, agriculture and heavy equipment industries. With this award from the Occupational Safety and Health Administration, the company joins a select group of only 15 other firms in the state, four in Springfield, with the designation of Star Sites. Nationally there are only 550 sites which have attained this level of commitment to worker safety.

The certification was granted after an intensive self study of safety policies, procedures and practices by employees at all levels followed by a rigorous comprehensive review visit by OSHA inspectors who found the workplaces to be fully in compliance with all regulations.

According to OSHA this designation means that the health and safety practices and procedures developed by the company are models within their industry, and that the company is achieving the highest levels of health and safety compliance.

I would also point out that this outstanding achievement is the result of a cooperative effort between public and private entities rather than a unilateral regulatory effort on the part of a lone federal agency. To quote OSHA "This concept recognizes that compliance enforcement alone can never fully achieve the objectives of the Occupational Safety and Health Act. Good safety management programs that go beyond OSHA standards can protect workers more effectively than simple compliance."

Springfield Remanufacturing Corporation, apart from this award, is a success story on its own. In 1983 employees of the Remanufacturing Division of International Harvester purchased the operation from the parent company and established it as an employee owned company. The firm has since established a number of its own subsidiaries and has been named as one of the "The 100 Best Companies to Work for in America".

I express my appreciation, and that of all my colleagues, to President Jack Stack, Plant Manager Marty Callison and Safety Director
