

Mr. President, I hope my colleagues will join me, Senator WELLSTONE, the Minnesota Congressional Delegation, the Society of German-American Studies, the Steuben Society of America, the City of New Ulm, and the people of Minnesota in supporting this Resolution recognizing the contributions of German Americans and the national significance of New Ulm's Hermann Monument.

SENATE CONCURRENT RESOLUTION 107—EXPRESSING THE SENSE OF THE CONGRESS CONCERNING SUPPORT FOR THE SIXTH NONPROLIFERATION TREATY REVIEW CONFERENCE

Mr. AKAKA (for himself, Mr. BAUCUS, Mr. KERRY, Mr. ROTH, and Mr. BINGAMAN) submitted the following concurrent resolution, which was referred to the Committee on Foreign Relations:

S. CON. RES. 107

Whereas the Treaty on the Nonproliferation of Nuclear Weapons (in this concurrent resolution referred to as the "Treaty") entered into force 30 years ago on March 5, 1970;

Whereas the original 43 signatories have increased to 187 parties;

Whereas in 1995 the signatories agreed to extend the Treaty indefinitely;

Whereas the Treaty institutionalizes the commitment of the nonnuclear weapons states not to acquire nuclear weapons;

Whereas the United States, the United Kingdom, France, the Russian Federation, and China have committed themselves to a reduction of nuclear weapons;

Whereas the testing of nuclear weapons in South Asia by two of the five countries in the world that have not adhered to the Treaty is cause for renewed attention to the dangers of nuclear proliferation; and

Whereas the Sixth Nonproliferation Treaty Review Conference will take place in New York from April 24 to May 19, 2000: Now, therefore, be it

*Resolved by the Senate (the House of Representatives concurring), That Congress—*

(1) reaffirms its support for the objectives of the Treaty on the Nonproliferation of Nuclear Weapons and expresses support for taking all appropriate measures to strengthen the Treaty and attain its objectives;

(2) expresses support for strengthening the international inspection system operated by the International Atomic Energy Agency and for the new Additional Safeguards Protocol to the International Atomic Energy Agency Safeguards Agreement that the International Atomic Energy Agency is negotiating with each adhered to the Treaty; and

(3) calls on all parties participating in the Review Conference to make a good faith effort to ensure the success of the Conference.

• Mr. AKAKA. Mr. President, I rise today to submit a Concurrent Resolution expressing the sense of the Congress concerning support for the Sixth Nonproliferation Treaty Review Conference.

The Sixth Nonproliferation Treaty Review Conference will begin on April 24th in New York City. For the first time since the member parties agreed five years ago to a permanent exten-

sion to this important arms control agreement, states will be meeting to discuss additional efforts to strengthen the treaty.

Thirty years ago, this treaty entered into force with 43 signatories. The number of parties to the agreement has increased to 187. Only four states—India, Pakistan, Israel, and Cuba—are not members.

At the time of the last review conference in 1995, members agreed to hold review meetings every five years to assess progress in implementing efforts to attain the treaty's objectives.

The resolution that I am introducing today, along with Senators BAUCUS, KERRY, ROTH and BINGAMAN, reaffirms Congressional support for the objectives of the Nonproliferation Treaty (NPT) and calls on all parties participating in the review conference to make a good faith effort to ensure the conference's success. A similar resolution is being introduced in the House of Representatives.

Many states have called into question American commitment to the control of nuclear weapons because of the Senate vote last year on the Comprehensive Test Ban Treaty and because of fears that the American development of a national missile and theater missile defense systems are efforts to negate the Anti Ballistic Missile Treaty (ABM).

I believe that Congressional support for the NPT and for other workable arms control agreements that achieve serious reductions in weapons of mass destruction is as strong as ever. The Congress will be looking very closely at this conference for reassurance that the other parties to the NPT, most especially the other nuclear weapons states such as China and Russia, share an equal commitment to attaining the objectives of the NPT.

There have been suggestions that states will attempt to disrupt the conference by walking out or by proposing resolutions critical of the United States and other states. Such efforts will damage the treaty and give satisfaction only to those countries, such as Iraq and Iran, who still appear to desire nuclear weapons.

Our resolution also expresses support for strengthening the international verification system operated by the International Atomic Energy Agency (IAEA). When the NPT was negotiated in 1970, the IAEA safeguards system was designated as its global verification mechanism. IAEA inspectors review the nuclear programs of all non-nuclear weapon members and, while the five legally recognized nuclear weapons states—Britain, France, China, Russia, United States—are not obligated to permit inspections, in practice IAEA has some access to their facilities.

The Gulf War revealed inadequacies in the IAEA safeguard system. The dis-

covery of Iraq's secret nuclear program demonstrated the need for additional IAEA powers of information collection and inspection. Efforts are now underway to develop a Strengthened Safeguards system of which a critical part will be a new inspection protocol providing IAEA inspectors additional authority to collect more information about a wider range of activities. This new information and access will be critical to detecting states, such as Iraq and Iran, who may try to develop secretly a nuclear weapon.

There is no greater threat to America's security than the proliferation of weapons of mass destruction. The Nonproliferation Treaty and the role of the IAEA are essential parts of our efforts to prevent nuclear catastrophe. I urge my colleagues to join in supporting this resolution and ensuring its speedy consideration. •

SENATE RESOLUTION 291—EXPRESSING THE SENSE OF THE SENATE REGARDING THE REPROGRAMMING OF FUNDS FOR THE DRUG ENFORCEMENT ADMINISTRATION FOR FISCAL YEAR 2000 IN ORDER TO ASSIST STATE AND LOCAL EFFORTS TO CLEAN UP METHAMPHETAMINE LABORATORIES

Mr. HUTCHINSON (for himself, Mr. GRASSLEY, Mr. HATCH, Mr. CRAIG, Mr. THOMAS, Mr. FRIST, and Mr. THOMPSON) submitted the following resolution; which was referred to the Committee on Appropriations:

S. RES. 291

Whereas the participation of the Drug Enforcement Administration in the seizures of methamphetamine laboratories has increased drastically since 1994;

Whereas in 1994, the Drug Enforcement Administration participated in the seizure of only 306 clandestine laboratories, 86 percent of which were methamphetamine laboratories;

Whereas in 1999, a total of 6,325 methamphetamine and amphetamine laboratories were seized in the United States, and the Drug Enforcement Administration participated in 1,948 of those seizures;

Whereas the Drug Enforcement Administration and State and local law enforcement agencies spend millions of dollars every year cleaning up the pollutants and toxins created and left behind by operators of clandestine methamphetamine and amphetamine laboratories;

Whereas methamphetamine manufacturing poses serious dangers to human life and the environment;

Whereas the chemicals and substances used in methamphetamine manufacturing are unstable, volatile, and highly combustible, and the smallest amounts of such chemicals, when mixed improperly, can cause explosions and fire;

Whereas most clandestine methamphetamine and amphetamine laboratories are situated in residences, motels, trailers, and vans, thereby increasing the danger posed by such explosions and fire;

Whereas for every pound of methamphetamine that is produced, more than five
