

In Belmont, Massachusetts, several teachers have received local and national accolades for their outstanding dedication to their jobs: Janice Rosenberg was selected to join the National Science Foundation's Teachers Experiencing Antarctica and the Arctic; Kimberley Mayer received a Teacher Award in the 2000 Space Settlement Design Contest sponsored by the NASA Research Center; and Eleanor Palais was honored by the Belmont School Committee for the success of 15 students in B.C. Calculus, all of whom received a perfect score of 5 on the AP Exam.

In Somerville, Massachusetts, two teachers, John O'Keefe and Barbara Marder, were recognized by the Department of Education for completing the National Board for Professional Teaching Standards Certification; and Alice Comack was recently honored by the Massachusetts Teachers Association for her work in the area of human rights.

Since becoming a Member, I have visited schools all over my district. In Watertown, Massachusetts, I toured the Cunniff Elementary School and viewed how they are wiring their school and upgrading their computers. In Boston, Massachusetts, I visited the Winship Elementary School and discussed the Constitution with fifth graders. I am always amazed at the warm greeting I receive from students, and from teachers. For them, it does not matter who the visitor is, but rather that someone cares and recognizes the hard work they do.

Mr. Speaker, almost 5,000 teachers in over 176 schools educate approximately 86,000 students in the 8th district; far too many teachers to mention everyone by name. However, I would like to take a moment to thank all the teachers in Belmont, Boston, Somerville, Cambridge, Chelsea and Watertown for tirelessly giving of themselves to educate our future leaders.

Mr. Speaker, as we prepare to debate the reauthorization of the Elementary and Secondary Education Act, I hope each Member of Congress will reflect upon the valuable contributions of teachers in their respective districts, and work to pass legislation that helps our nation's teachers provide the best possible education for our children.

EQUAL PAY DAY

**HON. JOE BACA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 2000

Mr. BACA. Mr. Speaker, today is equal pay day. We should recognize women and pay them equally. They are our grandmothers, mothers, wives, colleagues, teachers, caregivers, citizens and leaders.

Women's role in the home and work place is critical. That's why I am pleased to co-sponsor H.R. 541, the Paycheck Fairness Act, and H.R. 1271, the Fair Pay Act. And I am pleased to sponsor the 8th annual women's event on August 4th at Cal Sate University San Bernardino.

Many working women lack the basic benefits they need to care for their families. So we have kids with illnesses going to school; kids

who have not eaten breakfast; and kids hanging out on the street because their mothers work two or three jobs.

We need laws to improve child care and after-school care. On the job, working women are looking for higher pay, better benefits and most of all the "3-R's": respect, recognition and reward for a job well done. Working women want a stronger voice—not only in decisions on the job but in the policy making area.

Women deserve our support.

TRIBUTE TO THE 21ST CENTURY  
COMMUNITY SCHOOL HOUSE

**HON. DARLENE HOOLEY**

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 2000

Ms. HOOLEY. Mr. Speaker, in honor of H. Con. Res. 310—which was passed by the House last week—to Commend the Charter School Movement, I rise to pay tribute to a new PUBLIC charter high school in Salem, Oregon, the heart of my district.

The 21st Century Community Schoolhouse is a small high school where no student is anonymous. With a curriculum that integrates ALL subjects, it is founded on the belief that students' work must be relevant to them, incorporate high academic standards, and include extensive community service.

These students, who formerly have been alienated because of whatever differences make them special, will now become connected to each other, to their teachers, and to adult mentors in the community. I believe that we cannot afford to let one high school student slip through the cracks in the public school system, and the 21st Century Community Schoolhouse provides a model for school districts across the country to follow.

This resolution represents a national commemoration of the charter school movement and the contribution charter schools have made to improving the nation's public school system. But we are not only here to applaud charter schools today—this resolution will continue to express our appreciation of charter schools by designating a National Charter Schools Week.

Often times, we forget to celebrate the parts of our education system which are working. The 21st Century Community Schoolhouse in my district works and I wish to celebrate them.

NATIONAL TEACHER APPRECIATION DAY—RECOGNIZING THE  
REMARKABLE ACHIEVEMENTS  
OF LOCAL EDUCATORS

**HON. BRIAN BAIRD**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 11, 2000

Mr. BAIRD. Mr. Speaker, this week we celebrate National Teacher's Appreciation Day, and today I personally recognize some of the remarkable educators who have had a profound affect on the lives of children throughout

my district. I have had the opportunity to visit over 200 classrooms in my district since my election to Congress, and I can tell you the teachers I recognize today are just a small sampling of the innovative teaching, academic leadership, energy, and enthusiasm I have seen from educators in so many of the schools in my Southwest Washington district.

For educators, teaching at a small, rural, and often underfunded school poses particularly difficult challenges. In the case of 5th and 6th grade teacher Timothy Davis, he has worked tirelessly for sixteen years at Mount Pleasant School in Washougal to overcome the obstacles faced by the school district. During two years when the school district faced financial difficulties and could not afford to keep a full staff, Mr. Davis stepped forward to serve in a dual role of teacher, principal, and superintendent. Tim Davis never puts in less than 12 hours a day, devoting his free time to applying for grants and creating a challenging curriculum for his students. Mr. Davis is praised by his peers for his patience, consideration, and good judgment.

Students at Centralia High School are truly lucky to have an enthusiastic science teacher by the name of Henri Weeks. After graduating from Centralia High School, Mr. Weeks returned in 1989 to take the job of his former science teacher. Since that time, Henri Weeks has worked tirelessly to make science fun and interesting for his students. In his spare time, Mr. Weeks has taken part in summer internships at Fred Hutchinson Cancer Research Center and has incorporated DNA testing in the schools science lab projects. His students are currently involved in the human genome project (DNA mapping) which is being coordinated by the University of Washington. Henri Weeks is described by his peers a self-less educator that cares a great deal about inspiring his students to achieve greatness.

At South Bend High School, Mr. Steve Lazelle is credited for being an outstanding teacher who is in high demand as a presenter on his unique Aquaculture curriculum locally, regionally, and nationally. In 1990, the district was chosen as one of six test sites in the nation to pilot an aquaculture curriculum provided by the National Council for Agricultural Education. Mr. Lazelle is one of the original teaching team members to infuse aquaculture into Agricultural education beginning in a one-room facility with ten students. Today, thanks to Steve's leadership, the program is located at the Port of Willapa Harbor's Port Dock facility with Steve as the only instructor and manager whose enrollment topped out at 83 students. The program raises and sells tilapia fish to the markets of Seattle, and works with the local gill-netters association to raise and release salmon into the Willapa River. Steve Lazelle is acknowledged by his peers as a man who has changed the lives of many of the students who come into contact with him.

Jim Van Fleet, a former skilled millwright who worked for Reynolds Aluminum Company in Longview for nearly twenty years, now devotes his life to school children. Mr. Van Fleet has been a volunteer coach for kids in various levels of softball and basketball for all of his life, but recently returned to school and earned a masters in teaching. In 1997, Jim began his teaching career at Caste Rock Middle School
