□ 2000

So the bill was not passed.
The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. NUSSLE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 853, the legislation just considered.

The SPEAKER pro tempore (Mr. LAHOOD). Is there objection to the request of the gentleman from Iowa?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 1654, NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT FOR FISCAL YEARS 2000, 2001, AND 2002

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees on H.R. 1654, to authorize appropriations for the National Aeronautics and Space Administration for fiscal years 2000, 2001, and 2002:

Messrs. SENSENBRENNER, ROHR-ABACHER, WELDON of Florida, HALL of Texas, and GORDON.

There was no objection.

REPORT ON H.R. 4461, DEPARTMENT OF AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS, 2001

Mr. SKEEN, from the Committee on Appropriations, submitted a privileged report (Report No. 106-619) on the bill (H.R. 4461) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies for fiscal year 2001, which was referred to the Union Calendar and ordered to be printed.

The SPEAKER pro tempore. Pursuant to clause 1, rule XXI, all points of order are reserved on the bill.

APPOINTMENT OF MEMBERS TO CANADA-UNITED STATES INTER-PARLIAMENTARY GROUP

The SPEAKER pro tempore. Without objection and pursuant to the provisions of 22 U.S.C. 276d, the Chair announces the Speaker's appointment of the following Members of the House to the Canada-United States Inter-parliamentary Group, in addition to Mr. Houghton of New York, chairman, appointed on February 16, 2000:
Mr. UPTON of Michigan,

Mr. STEARNS of Florida,
Mr. MANZULLO of Illinois,
Mr. PAYNE of New Jersey,
Mr. PETERSON of Minnesota, and
Ms. DANNER of Missouri.
There was no objection.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 1999, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

RESPONSE TO ARGUMENTS AGAINST PNTR FOR CHINA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. STENHOLM) is recognized for 5 minutes.

Mr. STENHOLM. Mr. Speaker, I want to take this 5 minutes to respond to one of the arguments that I have heard against permanent normal trade relations with China.

The argument is that China, its 1.3 billion citizens, and only 7 percent of the world's arable land, does not need United States' agricultural products. USDA's Economic Research Service and private agricultural commodity groups believes China will continue to be a major market for U.S. agricultural products and that China's accession to the WTO will expand that market.

For cotton, China committed to a tariff-rate quota of 743,000 tons for cotton in the Year 2000, increasing to 894,000 tons in 2004. The within-quota duty would be 4 percent and the over-quota duty would decline from 69 percent in 2000 to 40 percent by 2004. Nonstate trade companies get two-thirds of that quota, which means we help avoid the problem we have sometimes had in the past with quotas going unfilled.

The ERS projects that if China did not join the WTO, it would import cotton worth \$565 million in 2005. If China does join, ERS projects that its cotton imports would increase to \$924 million by 2005.

For corn, China committed to establish a 4.5 million ton tariff rate quota in 2000, rising to 7.2 million by 2004. Here again, ERS projects that China's net imports of corn in 2005 will increase by \$587 million if China joins the WTO.

U.S. corn exports to China have averaged about 47 million over the past 5 years. This will increase.

For wheat, China committed to a tariff rate quota of 7.3 million tons in 2000, rising to 9.64 million in 2004. ERS projects that China's net imports of wheat in 2005 will increase from \$231 million per year to \$773 million if it joins the WTO.

For soybean products, the story goes on. ERS projects that China's net imports of soybean products in 2005 will increase by \$180 million if China joins the WTO.

Now, ERS is not alone in the view that China will have to be buying agricultural commodities. According to Worldwatch's Lester Brown, China's water supplies in its grain-producing areas are falling at a high rate. He sees massive grain imports and growing dependence on U.S. grain.

The Farm Bureau also expects great benefits from China's accession to the WTO. U.S. exports to the Asian region as a whole are expected to increase in the next few years.

I would like to conclude my remarks tonight by putting all of these facts and figures into context. For years, we in agriculture have complained about the use of unilateral sanctions to change the behavior of various governments around the world. Recently, we have made some progress on this front, with some restrictions lifted last year that have resulted in sales of some corn to Iran and wheat to Libya.

If we look at what USDA estimates that we in agriculture lost because of the United States' own decision not to trade with certain countries, the total in 1996 was about \$500 million. The estimates for this year have to be considerably more than \$500 million. That is less than a third of the \$1.7 billion we will lose in 2005 if we do not grant China permanent normal trade relations.

All six of the countries currently under sanctions, Cuba, Iran, Iraq, Libya, Sudan and North Korea, together, import only \$7.7 billion in food and agricultural products each year. That is about half the \$14 billion China imports today annually.

We need to make the right decision on China and stop giving away agricultural markets to our competitors. That is what those of us who support treating China as our competitors do. What sense does it make today for the United States to unilaterally say to any country that we will not sell them our food and medicine, when our "friends" sell to that country? That is something that I have failed to understand in some of the arguments against PNTR. It is one thing if we multilaterally, if all of our "friends" also agree to use food and medicine as a weapon. That would be a powerful tool. But to do it unilaterally, it seems to me, only punishes our own producers, in this case farmers and ranchers, and it hurts the people of which we are trying to help, and it strengthens the governments of which we are trying to change.

I hope that this and other statements we will hear over the next few days will convince at least 218 of us in this body to do the right thing, to grant permanent normal trade relations with China, to allow them to come into the WTO, and, for the first time in history, have them subjected to the same laws that apply to the rest of the free world. It sure cannot hurt to try it.

FINDING A CURE FOR AUTISM

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Florida (Ms. ROS-LEHTINEN) is recognized for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, every morning Miami-Dade County Commissioner Jimmy Morales helps his 6-year-old daughter get ready for school. Like many 6-year-old kids, Nora sings along to Britney Spears, N-Sync or Cristina Aguilera. Once at school, she introduces her dad to all of her classmates, gives daddy a kiss and a hug, and sends him off to work.

While to most people this may sound like a normal day in the life of a 6-year-old for Nora, many of these achievements have come only as a result of hard work. Unlike most little girls, Nora would not like to wear ribbons or clips in her hair. She could not look her parents in the eye nor tell them about her day with her grandparents. In fact, Nora's parents were not even sure she recognized her own name.

The reason: 4 years ago, Nora was diagnosed with autism; a neurological disorder which impacts a half a million people in America.

The world through the eyes of an autistic child is a complex puzzle with no solution. Autism affects the normal development of the brain and it impacts in the area of social interaction and communication skills. As a result, children living with autism have a difficult time responding appropriately to their environment. This includes playing with friends and forming relationships, even with their own parents.

Autism is four times more prevalent in boys than in girls, but it does not discriminate. It knows no racial, ethnic, or social boundaries. And family income, life-style and educational level do not affect the chances of autism's occurrence. In fact, according to the Centers for Disease Control and Prevention, no one knows exactly why autism strikes approximately 1 in every 500 individuals.

Autism not only has no known cause, but it has, sadly, no known cure. Sadly enough, the national rates of children being diagnosed with autism are increasing dramatically. For example, in the State of California, the numbers have increased 237 percent in the last 10 years. In my home State, 50 percent of the children diagnosed with autism reside within my community of south Florida.

The pictures that I would like to show to my colleagues and to the viewers tonight that we see here are of Bonnie and Willis Flick, two autistic children residing in my Congressional District who are fortunate enough to receive treatment and intervention therapy to help them cope with every day life.

A good day for Bonnie is similar to the one we just heard about Nora.

Bonnie is a high functioning autistic child who attends a very special school, The Learning Experience in Miami. And because autism is a spectrum disease that is manifested in a variety of forms, some children are not as high functioning as Bonnie.

□ 2015

For example, life for Bonnie's autistic brother, Willis, is a bit more difficult. Willis is mostly nonverbal and is not able to tell his mother that he is hungry or sleepy or not feeling well. He is unable to verbally express his joy, anger, or frustration; and that makes life all the more difficult for those around him.

Bonnie and Willis receive professional assistance to help them optimize their potential and learning capabilities. But there are many autistic children who are less fortunate.

As if families of autistic children did not suffer enough distress, one of the biggest challenges facing them is finding health coverage for treatment and therapy of this condition.

Fortunately, Nora's parents, as well as Bonnie and Willis' parents, have been able to work through obstacles to ultimately find the care that their families so desperately need.

Many families, however, are not as fortunate. We must continue to work so that all health insurance and health maintenance organizations include coverage for services to treat autism.

In my Congressional district, the University of Miami operates the Center for Autism and Related Diseases, CARD, which helps hundreds of children and their families whose lives are impacted with autism.

The CARD centers operate throughout the State of Florida and provide free individual and family assistance services as well as training programs for the parent and the professional. These centers focus on finding ways to change the behaviors and perceptions of individuals with autism in a way that will allow them to successfully learn, work, and communicate.

Mr. Speaker, we need to continue to support centers like CARD whose services benefit families struggling through the ordeal of autism.

Last week, the House passed the Children's Health Act, which contains a provision to establish centers of research and expertise. It is establishments like these that will help families of autistic children.

I hope that, on behalf of the Bonnies and the Willis and the Noras in their districts, my colleagues will continue to pass legislation like the Children's Health Act and provide funding to research the causes for this disorder. With continued research, every day we are one day closer to finding a cure for this debilitating disability.
