Whereas, in the last eight years, the nation's demand for petroleum products has grown by 14 percent while domestic production was declined by 17 percent; and

Whereas, by 2020, the United States expects to be 64 percent dependent on other countries to fuel its industry, transportation, and homes; and

Whereas United States consumers are paying the price, with home heating oil costs in the Northeastern states surpassing 41.70 a gallon, while gasoline prices have climbed to \$2 a gallon for mid-range gasoline in California; and

Whereas some airplane passengers are currently paying a \$20 fuel surcharge on tickets; and

Whereas the nation's growing reliance on foreign oil is strengthening the aggressive pricing policies of the Organization of the Petroleum Exporting Countries (OPEC); and

Whereas the United States is currently receiving 44 percent of its imported oil from OPEC countries, including 1,400,000 barrels a day from Saudi Arabia and 700,000 barrels a day from Iraq; and
