Forty-four years ago in Montgomery, Alabama the modern civil rights movement began when Rosa Parks refused to give up her seat to accommodate a white passenger and move to the back of the bus. The strength and spirit of this courageous woman captured the consciousness of not only the American people but the entire world. The boycott which Rosa Parks began was the beginning of an American revolution that elevated the status of African Americans nationwide and introduced to the world a young leader who would one day have a national holiday declared in his honor, the Reverend Martin Luther King Jr.

We have come a long way toward achieving justice and equality for all. But we still have work to do. In the names of Rosa Parks, Sojourner Truth, Dr. Carter G. Woodson, Dr. Martin Luther King Jr., and many others, let us rededicate ourselves to continuing the struggle on Civil Rights and to human rights.

MULTI-YEAR PROCUREMENT FOR THE F/A–18 E/F SUPER HORNET

Mr. ASHCROFT. Mr. President, I want to announce my unqualified support for the recent signing of the Multi-Year Procurement contract on Boeing’s F/A–18 E/F Super Hornet. This is a good day for U.S. national defense, the Navy, the American taxpayers, and the city of St. Louis.

This announcement secures the production of the Super Hornet, which is in St. Louis, for the next 5 years. Valued at $8.9 billion for a total of 222 aircraft over 5 years, this contract will ensure that the Navy will have these planes and, in addition, U.S. taxpayers will save over $700 million. It is definitely a “win-win” situation.

The U.S. Navy’s award winning Super Hornet Program continues to be recognized throughout the Department of Defense and industry as the standard by which all other tactical aviation programs should be evaluated. Since the program’s inception, the Super Hornet has met or exceeded all cost, weight and schedule goals and requirements.

The Boeing Corporation, which is the prime contractor, in partnership with the Navy has introduced a 21st Century strike fighter that will ensure the Navy’s carrier airwing is more than able to defeat today’s threat and the projected threats of the first 30 years of this century. A balanced approach to survivability, revolutionary methods of design and manufacture, and a very cost-conscious approach to achieving and maintaining multi-mission superiority over the threat has given the Navy a new tactical aircraft that supports Navy budget realities.

Mr. President, in addition to affordability, comparable performance, enhanced range, carrier bring back, more weapons stations, future growth and better survivability were major considerations for the next generation of carrier-based strike fighters. The Super Hornet to express met the muster in every category.

The Navy has not been shy about its support for this project, and I wholeheartedly agree with my good friend Admiral Jay Johnson, the Chief of Naval Operations, who recently stated: “The F/A–18E/F Super Hornet is the cornerstone of the future of Naval aviation. . . . It will provide twice the sorties, a third the combat losses and forty percent greater range. We can’t wait to get it to the fleet!”

This contract is also a testimony to the excellent job the workers of St. Louis do every day. Without their dedication and commitment to quality, the Super Hornet would not be able to win such an important milestone.

In conclusion, I thank the people who made this contract a reality—namely the people of St. Louis, the Boeing Corporation, the U.S. Navy, and my fellow Senators who joined me in my support of this wonderful project.

HOURS OF SERVICE PROVISIONS IN H.R. 4475

Mr. CLELAND. Mr. President, I rise today to address the Hours of Service provision in H.R. 4475, the Department of Transportation Appropriations bill. As directed by Congress, the Department of Transportation, and most recently the new Federal Motor Carrier Safety Administration (FMCSA), set out to examine the hours of service standard for motor carrier drivers that had been in effect since the 1930s.

As I stated in the Surface Transportation Subcommittee’s hearing in September, lead by the efforts of the FMCSA, we had to reexamine established regulations for commercial drivers on the road. The fatigue related accident I profiled at this hearing occurred August 31, 1999 in Atlanta, and resulted in deadly consequences for the drivers of the truck. The accident occurred in the early morning hours and thankfully, no other automobiles were directly involved. However, daily commuters felt the effects during morning and afternoon rush hours, and the tragedy and frustration from incidents such as this accident resulted in Congress directing DOT to examine hours of service regulations.

Admittedly, I have concerns about the effects of the proposed rule, but I do not believe that the appropriations bill is the proper vehicle through which to express concerns. I would like to remind my colleagues that the DOT has only issued a proposed rule. DOT is still accepting comments on this rule through October 31, 2000—extension of the original date—and continues to hold hearings on the issue throughout the country. I believe these hearings have brought, and will continue to bring, potential problems to the attention of DOT officials. For example, during emergencies, utility drivers must restore service to customers. How do these rules apply to such drivers in their special situations?

Congress directed DOT to evaluate the hours of service rules. Is this the best proposal? I am not convinced so, but I do believe DOT should be able to move forward with the prescribed process. The American driving public deserves the continuation of the hours of service reform process. The truck drivers want this collaborative process to continue. As this point, why should the Senate attempt to short-circuit the efforts of the FMCSA to reform the hours of service rule as directed by Congress?

I do not support the prohibition on moving forward with the hours of service process, and I urge the conference on H.R. 4475 to remove the hours of service provision from the final bill. Let’s work together in thoroughly considering the best way to ensure the safety of automobile and truck drivers traveling America’s roads.

ADDITIONAL STATEMENTS

NONCOMMISSIONED OFFICER OF THE YEAR AWARD

Mr. MURKOWSKI. Mr. President, it is with great honor today that I rise to recognize one of the finest men in the Alaska Army National Guard, Sergeant Edwin D. Irizarry. Sergeant Irizarry’s hard work and dedication to the Army National Guard in Alaska have earned him the title of the “Noncommissioned Officer of the Year.” Mr. President, this is no small award. It is only awarded to those who show outstanding leadership and extraordinary accomplishments in their duty. Sergeant Irizarry epitomizes the commitment and unselfish honor of the men and women in Alaska’s Army National Guard.

This is a great honor for Alaska. The commitment to be in the Guard requires an individual to work hard and sacrifice their own personal time to protect the very communities where they live. Sergeant Irizarry lives and works in Ketchikan, with his wife and family. Ketchikan is a beautiful town in southeast Alaska where I was fortunate to have been raised. I know the terrain that the Guard uses is no walk in the park. Mountains and a channel of water hug the town in this great place. To be stationed in Ketchikan, one must learn to adapt to the fast changing climate and diverse environment that exists in this region. Ketchikan and Alaska are truly indebted to the many fine soldiers like Sergeant Irizarry who protect and assist in communities throughout the last frontier.

Sergeant Irizarry serves as role model and inspiration to the over 300,000 men and women in our country’s
