CONGRESSIONAL RECORD—HOUSE

July 23, 2001

This scenario is not science fiction. The CBS news show “60 Minutes” detailed that train accidents due to track failure are happening at a rate of nearly one every 24 hours. That is a train accident once every day.

The Department of Energy wants to ship nuclear waste on our railways, past our schools, past our hospitals, through our neighborhoods and communities, and past schools and farms.

Madam Speaker, our responsibility is to protect the American public, not endanger them. We cannot allow the DOE to threaten the lives of our constituents.

The Pope went on to say, “A free and virtuous society which America aspires to be must reject practices that devalue and violate human life at any stage from conception until natural death.”

EMBRYONIC STEM CELL RESEARCH

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

The Pope went on to say, “A free and virtuous society which America aspires to be must reject practices that devalue and violate human life at any stage from conception until natural death.”
