

Now, with the cranberries and the cyclamates and the alar, it just hurt various farmers. But if we buy on to the global warming theory, it is going to hurt all of us. It is going to bring down our standard of living.

Thank God we have a President of the United States that is willing to say this does not hold water; we need a lot more scientific research before we make such decisions; I am not going to go along with this global warming Kyoto Protocol. I commend him for that, and I would hope that the American people understand his wisdom and his courage and that he is standing there to protect us and to protect our standard of living.

With that, I would ask my colleagues to join me in recognizing that George W. Bush is doing this kind of job and that he is a good man, and wish him well.
