Mr. GILLMOR. Mr. Speaker, it is with great pleasure that I rise today to express congratulations to employees of the Davis-Besse Nuclear Power Station for having achieved a significant safety milestone. On August 9, 2001, the employees of the Davis-Besse Nuclear Power Station will have worked five million hours without a lost-time accident.

As the first nuclear power plant in Ohio, the Davis-Besse Nuclear Power Station, since beginning operation in 1977, has generated more than 110 billion kilowatt-hours of electricity, enough power to supply about 20 million homes with electricity for an entire year. The plant produces enough electricity to meet the demand of about half the people in northwestern Ohio.

Not only have Davis-Besse employees operated the plant reliably, they have observed the highest standards of safety, as well. So, again, it is my pleasure to recognize this important safety milestone. Five million hours without a lost-time accident means that, for more than three years, no employee has missed work due to a work-related illness or accident.

Employees and managers at Davis-Besse have been able to achieve this and other milestones by paying close attention to detail and striving for excellence in even minor daily activities. Because of this operating philosophy, Davis-Besse has been recognized within the nuclear industry as a top performing plant.

In addition to being an important power producer, the plant also is an important asset to the local community. It is one of the largest local employers, conducts business with more than 800 other businesses in Ohio and is a strong supporter of such causes as United Way, Ohio Reads, Boy Scouts of America, numerous wildlife and environmental organizations, and other charities.

The economy of Ohio, and the country, is driven in part by safe, reliable energy, particularly electricity. The Davis-Besse plant has proved itself a valuable asset in meeting our energy needs. And I ask all of my colleagues of the 107th Congress to join me in recognizing the excellent work of the employees at the Davis-Besse Nuclear Power Plant.

In Special Recognition of the Five Million Hour Safety Milestone Achieved at the Davis-Besse Nuclear Power Station Oak Harbor, Ohio

Hon. Paul E. Gillmor
Of Ohio
In the House of Representatives
Thursday, September 6, 2001

Mr. GILLMOR. Mr. Speaker, it is with great pleasure that I rise today to express congratulations to employees of the Davis-Besse Nuclear Power Station for having achieved a significant safety milestone. On August 9, 2001, the employees of the Davis-Besse Nuclear Power Station will have worked five million hours without a lost-time accident.

As the first nuclear power plant in Ohio, the Davis-Besse Nuclear Power Station, since beginning operation in 1977, has generated more than 110 billion kilowatt-hours of electricity, enough power to supply about 20 million homes with electricity for an entire year. The plant produces enough electricity to meet the demand of about half the people in northwestern Ohio.

Not only have Davis-Besse employees operated the plant reliably, they have observed the highest standards of safety, as well. So, again, it is my pleasure to recognize this important safety milestone. Five million hours without a lost-time accident means that, for more than three years, no employee has missed work due to a work-related illness or accident.
