SEC. 335. DEPARTMENT OF DEFENSE MOST EFFICIENT ORGANIZATION BID-TO-GOAL AND BEST-VALUE PURCHASING PILOT PROGRAM.

(a) REQUIREMENT FOR PROGRAM.—The Secretary of Defense shall carry out a pilot program to demonstrate an alternative to the Office of Management Budget Circular A-76 approach for achieving cost-effective performance of Department of Defense commercial activities.

(b) ELIGIBLE ACTIVITIES.—(1) The Secretary shall provide under the pilot program for each of not more than five continuing or recurring commercial activities of the Department of Defense to be performed by an organization of the department that is to be configured as the most efficient organization for the performance of that activity.

(2) A commercial activity may be covered by the pilot program if, at the time that the activity is designated for performance under the pilot program—

(A) the commercial activity is an activity of a defense agency or a military department that is being performed by employees of the United States numbering not less than 150 employees and not more than 750 full-time employees or the equivalent number of full-time and part-time employees; and

(B) the head of the agency concerned has not issued to the public (in either draft or final form) a request for proposals for a contract for the performance of the activity by a commercial source as an action initiated under Office of Management and Budget Circular A-76 to determine whether to convert the activity to contractor performance.

(c) PROJECTS.—The Secretary shall consider whether to carry out the pilot program in several projects, as follows:

“(1) One project that involves a group of 600 to 750 employees.

“(2) Four projects, each of which involves 150 to 599 employees.

“(3) At least one project undertaken within the Defense Logistics Agency, Defense Finance and Accounting Service, or any other defense agency not performing base operations.

(d) PERFORMANCE-BASED CHARTER.—(1) The performance of a commercial activity under the pilot program shall be covered by a performance-based memorandum of understanding that is entered into by the head of the agency concerned and the subordinate of that official who is the head of the organization designated to perform the activity.

(A) Achievement of the following cost and performance objectives:

(i) The total amount of the cost savings estimated, as of the beginning of the pilot program, to be achievable by use of the most efficient organization.

(C) Any other performance standards determined appropriate by the head of the agency.

(D) Rigorous use of technology-based solutions, performance measurements, and quality of service standards that will be subject to past and future performance.

(3) Each memorandum of understanding under the pilot program shall, to the maximum extent practicable, be consistent with contracts used to procure the same performance from a commercial source and shall clearly define performance goals, standards, rewards, and penalties.

(4) Each memorandum of understanding shall be in effect for five years, except that the head of the agency concerned may terminate the memorandum of understanding earlier on the basis of a failure to achieve a performance standard provided in the memorandum during the five-year period.

(5)(A) After the first year of the performance of a memorandum of understanding under the pilot program, the head of the agency concerned shall take the actions described in subparagraph (B) if the head of the agency determines, through quarterly reviews, that the most efficient organization has failed to achieve a performance standard that is determined critical and a cause for default.

(i) Termination of the memorandum of understanding.

(e) DETERMINATION OF MOST EFFICIENT ORGANIZATION.—(1) The Secretary of Defense shall ensure that, for the purposes of the pilot program under this section, the most efficient organization for the performance of a Department of Defense commercial activ-

(2) Before initiating the determination of the most efficient organization for performing a Department of Defense commercial activity pursuant to a memorandum of understanding under the pilot program, the head of the agency concerned shall—

(A) define the scope of the services that comprise the performance of the activity;

(B) provide for an entity independent of the Department of Defense to estimate, for the 5-year period to be covered by the memorandum of understanding, the costs that would be incurred for the continued performance of the activity by employees of the United States without a conversion to performance by the most efficient organization;

(C) estimate the cost to the United States of private sector performance of the activity for that 5-year period; and

(D) determine appropriate cost and other performance objectives for the performance of the activity under the pilot program on the basis of comparable performance, innovation, and costs, which may not exceed 110 percent of potential costs of performance by a private sector source.

(g) MORATORIUM ON APPLICABILITY OF OMB CIRCULAR A-76.—During the period that a memorandum of understanding is in effect for a Department of Defense commercial activity under subsection (d), no action may be initiated under Office of Management and Budget Circular A-76 regarding the acquisition of performance of that commercial activity.

(h) QUARTERLY REPORT TO HEAD OF AGENCY.—Promptly after the end of each quarter of a year, the head of an organization performing a Department of Defense commercial activity under the pilot program shall submit a report on the performance of that activity during that quarter to the head of the agency concerned. The report shall include an assessment of the performance in terms of the performance standards provided in the memorandum of understanding applicable to the activity under subsection (d).

SEC. 3172. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds the following:

(1) The Federal Government, through the Atomic Energy Commission, acquired the Rocky Flats site in 1951 and began operations there in 1952. The site remains a Department of Energy facility. Since 1992, the mission of the Rocky Flats site has changed from the production of nuclear weapons components to cleanup and closure in a manner that is safe, environmentally and socially responsible, physically secure, and cost-effective.

(2) The site has generally remained undisturbed since its acquisition by the Federal Government.

(3) The State of Colorado is experiencing increasing growth and development, especially in the metropolitan Denver Front Range area in the vicinity of the Rocky Flats site. That growth and development reduces the amount of open space and thereby diminishes for many metropolitan Denver communities the vistas of the striking Front Range mountain backdrop.

(4) Some areas of the site contain contamination and will require further response action. The national interest requires that the ongoing cleanup and closure of the entire site be completed safely, effectively, and without unnecessary delay and that the site thereafter be retained by the United States and managed so as to preserve the value of the site for open space and wildlife habitat.

(5) The Rocky Flats site provides habitat for many wildlife species, including a number of threatened and endangered species, and is marked by the presence of rare xeric tallgrass prairie plant communities. Establishing the site as a unit of the National Wildlife Refuge System will promote the preservation and enhancement of those resources for present and future generations.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to provide for the establishment of the Rocky Flats site as a national wildlife refuge following cleanup and closure of the site;

(2) to create a process for public input on refuge management before transfer of administrative jurisdiction to the Secretary of the Interior; and

(3) to ensure that the Rocky Flats site is thoroughly and completely cleaned up.

SEC. 1232. FINDINGS.

Congress makes the following findings:

(1) United States nonproliferation efforts in the independent states of the former Soviet Union have achieved important results in ensuring that weapons of mass destruction, weapons-usable material and technology, and weapons-related knowledge remain beyond the reach of terrorists and weapons-proliferating states.

(2) Although these efforts are in the United States national security interest, the effectiveness of these efforts suffers from a lack of coordination within and among United States Government agencies.

(4) Increased spending and investment by the United States private sector on nonproliferation efforts in the independent states of the former Soviet Union require the establishment of a coordinating body to ensure that United States public and private efforts are not in conflict, and to ensure that public spending on nonproliferation efforts by the independent states of the former Soviet Union is maximized to ensure efficiency and further United States national security interests.

interdependent systems, and to underpin policy recommendations, so as to achieve the continuous viability and adequate protection of the critical infrastructure of the nation.

(b) POLICY OF UNITED STATES.—It is the policy of the United States—

(1) that any physical or virtual disruption of the operation of the critical infrastructures of the United States be rare, brief, geographically limited in effect, manageable, and minimally detrimental to the economy, essential human and government services, and national security of the United States;

(2) that actions necessary to achieve the policy stated in paragraph (1) be carried out in a public-private partnership involving corporate and non-governmental organizations; and

TITLE XXXV—COMMERCIAL REUSABLE IN-SPACE TRANSPORTATION

SEC. 3501. SHORT TITLE.

This title may be cited as the “Commercial Reusable In-Space Transportation Act of 2001”.

SEC. 3502. FINDINGS.

Congress makes the following findings:

(1) It is in the national interest to encourage the utilization of cost-effective, in-space transportation systems, which would be developed and operated by the private sector on commercial basis.

(2) The use of reusable in-space transportation systems will enhance performance levels of in-space operations, enhance efficient and safe disposal of satellites at the end of their useful lives, and increase the capability and reliability of existing ground-to-space launch vehicles.

(3) Commercial reusable in-space transportation systems will enhance the economic well-being and national security of the United States by reducing space operations costs for commercial and national space programs and by adding new space capabilities to space operations.

(4) Commercial reusable in-space transportation systems will provide new cost-effective space capabilities (including orbital transfers from low altitude orbits to high altitude orbits and return, the correction of erroneous satellite orbits, and the recovery, refurbishment, and refueling of satellites) and the provision of upper stage functions to increase ground-to-orbit launch vehicle payloads to geostationary and other high energy orbits.

(5) Commercial reusable in-space transportation systems can enhance and enable the

space exploration of the United States by providing lower cost trajectory injection from earth orbit, transit trajectory control, and planet arrival deceleration to support potential National Aeronautics and Space Administration missions to Mars, Pluto, and other planets.

(6) Satellites stranded in erroneous earth orbit due to deficiencies in their launch represent substantial economic loss to the United States, estimated at as much as \$3,000,000,000 to \$4,000,000,000 in a recent 12-month period, and present substantial concerns for the current backlog of national space assets valued at \$20,000,000,000.

(7) Commercial reusable in-space transportation systems can provide new options for alternative planning approaches and risk management to enhance the mission assurance of national space assets.

(8) Commercial reusable in-space transportation systems developed by the private sector can provide in-space transportation services to the National Aeronautics and Space Administration, the Department of Defense, the National Reconnaissance Office, and other agencies without the need for the United States to bear the cost of development of such systems.

(9) The availability of limited direct loans and loan guarantees, with the cost of credit risk to the United States paid by the private-sector, is an effective means by which the United States can help qualifying private-sector companies secure otherwise unattainable private financing for the development of commercial reusable in-space transportation systems, while at the same time minimizing Government commitment and involvement in the development of such systems.

SEC. 3503. LOANS AND LOAN GUARANTEES FOR DEVELOPMENT OF COMMERCIAL REUSABLE IN-SPACE TRANSPORTATION.

(a) **AUTHORITY TO MAKE LOANS AND LOAN GUARANTEES.**—The Administrator may make loans, and may guarantee loans made, to eligible United States commercial providers for purposes of developing commercial reusable in-space transportation systems.

(e) **OTHER TERMS AND CONDITIONS.**—

(1) **AMORTIZATION PERIOD.**—A loan made or guaranteed under this section shall be amortized over the shorter, as determined by the Administrator, of—

(2) **FORBEARANCE.**—The Attorney General may, with the approval of the parties concerned, forebear from enforcing any right of the United States under a loan made or guaranteed under this section for the benefit of a United States commercial provider if such forbearance will not result in any cost, as defined in section 502(5) of the Federal Credit Reform Act of 1990, to the United States.

(3) **UTILIZATION OF PROPERTY.**—Notwithstanding any other provision of law and subject to the terms of a loan made or guaranteed under this section, upon the default of a United States commercial provider under the loan, the Administrator may, at the election of the Administrator—

(B) complete, reconition, reconstruct, renovate, repair, maintain, operate, or sell the physical asset.
