

variety of efforts in the month of October—including a Student Council penny drive and a PTA sponsored fundraising dinner—the students of North Elementary managed to gather an amazing sum: \$1,668, over five times what our President requested. The remainder of the money, it was decided, will go to the Red Cross to aid victims of the September 11th tragedy here in the United States.

The students, parents, faculty, and members of the Taylorville community should be recognized for their fine efforts. The terrorists believed they could accomplish their goals with the murder of American innocents; but the American citizens have responded with aid to the innocents of Afghanistan. Nothing else could better show how utterly Al Qaeda has failed.

Mr. Speaker, as President Bush said in his announcement of the Fund for Afghan Children, "One of the truest weapons that we have against terrorism is to show the world the true strength of character of the American people." The children of North Elementary have shown that character, and they deserve our thanks. May God bless them, and may God bless the United States of America.

TRIBUTE TO DR. CLARENCE
ROMERO

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. CALVERT. Mr. Speaker, it is an honor today to rise and pay tribute to Doctor Clarence Romero, associate professor of psychology, at Riverside Community College upon being named the 2001 United States Professor of the Year. My congressional district is privileged to have Dr. Romero teaching our young adults as he is one of only four awardees recognized each year for extraordinary dedication to undergraduate teaching.

Skillful, enthusiastic and innovative teachers change the lives of countless students for the better by encouraging curiosity and understanding and by contributing to the development of mind and spirit.

The United States Professors of the Year program, presented by The Carnegie Foundation for the Advancement of Teaching and directed by the Council for Advancement and Support of Education, is the nation's most highly respected program to recognize outstanding faculty. The Professor of the Year represents the thousands of dedicated university and college instructors throughout the nation who serve their students, their community and their state with vigor and talent.

Mr. Speaker, the United States has long supported excellence in undergraduate teaching through competitively funding faculty salaries and other initiatives making our system of higher education the envy of many nations. The quality of life and the scope of opportunity for many future citizens will be determined by the quality of teaching in the classroom.

Therefore, I join with all of the citizens in my district in thanking and congratulating Dr. Clarence Romero as he is honored for his devotion to teaching the young minds of our future generations.

HONORING DANIEL S. GOLDIN AS
THE LONGEST SERVING ADMIN-
ISTRATOR OF THE NATIONAL
AERONAUTICS AND SPACE AD-
MINISTRATION

HON. BART GORDON

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. GORDON. Mr. Speaker, I rise today to commend Dan Goldin, who is leaving his position as administrator of the National Aeronautics and Space Administration. Dan, who was appointed on April 1, 1992, is the longest-serving administrator in the history of NASA. On March 5, 2001, his time in office surpassed that of James Fletcher, who held the previous record of nearly nine years during two separate terms.

As ranking member of the Committee on Science's Subcommittee on Space and Aeronautics, I have worked with Dan for many years. I have learned that his passion is not limited to the exploration of space. He also cares deeply about the possibilities of science and space to inspire life on Earth. I certainly know that many students in Middle Tennessee have been encouraged and inspired by Dan's vision for space exploration.

Dan initiated his tenure at NASA by leading an agency-wide process to define a NASA Strategic Plan as the consensus definition of the agency's mission and goals. The core guidance in this document states: "NASA's mission success starts with safety. A commitment to safety permeates everything we do." Dan has not wavered in enforcing this priority in every aspect of the agency on the ground and in space.

During Dan's tenure, the International Space Station went from the drawing boards to a fully functional, permanently staffed orbital research laboratory. He directed the Space Station re-design, holding together the coalition of international participants while incorporating the former Soviet Union hardware elements into the design. By developing the cooperative Mir research program with Russia, he enabled Space Station partners to conduct long-term space flight research even before the International Space Station was operational.

Dan's comprehensive strategy for space exploration is exemplified by the "Origins Program." He initiated this program with objectives to understand how the universe has evolved, to learn how life began on Earth, and to see if life exists elsewhere. He formulated a rescue plan for the installation of a "contact lens" on the Hubble Space Telescope, leading to startling discoveries of the cosmos. Dan has challenged the Origins scientists to search for Earth-like planets within 100 light years of Earth. He also has laid the foundation to complete the first scientific census of the solar system and to send the first probe into Interstellar space.

Dan has been a vigorous proponent for increased exploration of Mars. He has established a series of robotic missions that will visit the planet every two years for the next decade and has assured that the public will share in the excitement of Mars exploration. His direction to provide Internet access for the Mars

Pathfinder mission resulted in more than three-quarters of a billion "hits" from people tuning in to the site.

In 1998, Aviation Week & Space Technology magazine honored Dan with the Laurel Award for outstanding achievement in aviation and aerospace. The award was presented along with the commentary that Dan has "delivered on his promise to reshape NASA into a model government agency."

This year Dan was awarded one of one of France's highest and most distinguished honors: the "Officer of the Legion of Honor." This award recognized his contribution to the development and broadening of American-French civil space cooperation through cooperative ventures including the International Space Station, Mars exploration, Earth observations, and the flight of French astronauts aboard the Space Shuttle.

Under Dan's leadership NASA has reached out to honor the victims of last month's terrorist attacks in New York. The next mission of the Space Shuttle Endeavour will carry "Flags for Heroes and Families." Thousands of American flags will be carried into space by Endeavor and its seven member crew and, upon return to Earth, will be distributed to the victims' families and survivors of the September 11 attacks.

Dan always recognized NASA's potential to inspire students to elect careers in science mathematics and engineering. His personal leadership and the NASA programs that he supported have involved hundreds of students in hands-on research experiences. NASA's Summer High School Apprenticeship Research Program not only allows the students to actually participate in research, but it also pays them a salary as well. This intensive science and engineering apprenticeship program is specifically designed to attract and increase under-represented students' participation and success rates in mathematics, science, technology and engineering courses.

Mr. Speaker, the nation is fortunate to have such outstanding public servants as Administrator Goldin. He has led NASA and its international partners in exploring the frontiers of space and inspiring benefits to life on Earth. Accordingly, it is appropriate today that we recognize and highly commend Daniel Goldin as the longest serving administrator of NASA and that we express our appreciation for his leadership of the nation's space program.

ECONOMIC SECURITY AND
RECOVERY ACT OF 2001

SPEECH OF

HON. BILL LUTHER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 24, 2001

Mr. LUTHER. Mr. Speaker, the events of September 11th have transformed the policy agenda for our Nation. Over the past six weeks, we have witnessed truly heroic acts by individuals and organizations on behalf of the victims and their families. We have also seen this body work in a truly remarkable bipartisan fashion. In short, the nation has united behind a cause in a manner we have not seen in over a generation.

Our global campaign to root out terrorism will be a long-term commitment requiring patience and, most importantly, sacrifices from all involved. Previous generations have endured and prevailed in unified international efforts in the name of freedom and democracy—and they all required patience and sacrifices from the American people. In this vein, I believe any economic stimulus package passed by this Congress should reflect the reality that our top priority must be to drive the war effort while improving security and maintaining prosperity at home.

Unfortunately, H.R. 3090 is not that kind of package. \$10 billion is devoted to reducing the capital gains tax, a proposal that Alan Greenspan recently told Congress would have virtually no stimulative economic value. In addition, not one dollar goes to important infrastructure improvements to secure our airports, seaports, dams and power plants, or to protect us from bioterrorism. A responsible stimulus package should include meaningful provisions to improve security for the American people. This would, in turn, contribute to consumer confidence and create a positive ripple effect through the economy.

This Congress needs to continue the bipartisan approach of the past few weeks and develop a stimulus package that truly serves the interests of our country. This is not the time to be passing legislation that is little more than a grab bag of goodies for special interests. Rather, this is the time to be appealing to the greater good of the American people. They are willing to do what it will take to win this war—we just need leadership in Congress that measures up to the courage and will of the American people.

TRIBUTE TO ROBERT
ROUMIGUIERE

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Ms. WOOLSEY. Mr. Speaker, I rise today to honor Robert Roumiguere, a Marin County political leader who served on the Board of Supervisors for 22 years. Mr. Roumiguere died on November 5, 2001, of a heart attack.

Mr. Roumiguere will be remembered especially for his role in creating parks in Central Marin and preserving open space on the County's ridgelines. He was also instrumental in securing acquisition of the Northwestern Pacific railroad right of way in hopes of creating commuter rail service and fought for improvements to the Highway 101 Freeway and use of Hamilton Field as a business hub.

As a fiscal watchdog, Mr. Roumiguere sought to curb county spending. His tenacious negotiating style focused on bringing stakeholders together to find common ground. He was able to work with both Marin business community and environmentalists to achieve consensus.

After his 22 years as Supervisor, Mr. Roumiguere served on the county employees' retirement board. He had a background in the real estate business in Marin County and often shared the products of Roumiguere Vineyards

(Big Red), which he purchased in Lake County in 1980. His involvement with civic groups includes the Man'n Council of Boy Scouts of America, Marin Board of Realtors, Marin Shakespeare Festival, San Rafael High School PTA, and the Louise A. Boyd Marin Museum.

Mr. Speaker, I am proud to recognize Robert Roumiguere for his many contributions to our community. His vision for Marin County will continue to inspire all of us—and he will be sorely missed.

RECOGNIZING PETER VANG

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to recognize Peter Vang for receiving the Portraits of Success Award presented by KSEE-24 and Companies that Care. This award pays tribute to Mr. Vang's involvement in the Asian-American community. Peter's active involvement has made him a role model for the members of his local community.

Mr. Vang is currently a staff analyst for the Fresno County Human Services System, acting as a community liaison between the refugee community and the Human Services System. He also coordinates and hosts the Southeast Asian Talk Show series on Radio KVIF 900 AM.

Mr. Vang has served the Southeast Asian community through his innumerable undertakings. He has served in many different Southeast Asian organizations and is the founder of the Hmong American Citizens Alliance and Co-founder of the Laotian Chamber of Commerce.

His accomplishments have earned him a Portraits of Success Award, presented by KSEE-24 and Companies that Care in recognition of Asian-American Heritage Month.

Mr. Speaker, I rise to recognize Peter Vang for his commitment to improving the lives of the people in the community, I urge my colleagues to join me in wishing Mr. Vang many more years of continued success.

HONORING PASTOR JOSEPH W.
AND JOYCE ELLWANGER

HON. THOMAS M. BARRETT

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. BARRETT of Wisconsin. Mr. Speaker, I am honored to recognize the work of Pastor Joseph and Joyce Ellwanger as they retire from Cross Lutheran Church after more than thirty years of service to both their congregation and the people of Milwaukee.

Pastor Joe began his ministry at St. Paul Lutheran Church in Birmingham, Alabama, during the era of the civil rights movement. It was at this time that he became committed to serving the poor and supporting social justice issues, this mission would become the framework for his life. In 1965, he joined the Rev-

erend Martin Luther King Jr., and several members of the Southern Christian Leadership Conference in meeting with then—President Lyndon B. Johnson and petitioned him to swiftly pass the Voting Rights Act.

The Ellwangers came to Milwaukee in 1967 to serve Cross Lutheran Church. They strengthened the faith and ministry of the Church and reached out to outlying communities. Through their leadership and vision, the congregation has become one known for its racial diversity, social justice, and emphasis on youth ministry.

Both Pastor Joe and his wife, Joyce, saw the necessity of working ecumenically with others to obtain justice ministry in the life of the faith community. Pastor Joe's commitment is made evident through the creation of MICAHA (Milwaukee Innercity Churches Allied for Hope), and participation in AODA Treatment Committee and the Education Committee. Joyce's dedication to serving others has been made visible through her coordination of outreach programs in community organizations, such as the World Food Day for Hunger Task Force, and the Hope House.

During their 34 years in Milwaukee, Pastor Joe and Joyce have impacted our community in many positive ways, and they will be sorely missed. I am proud to join the members of Cross Lutheran Church in thanking them for their service to the people of Milwaukee, Wisconsin. Please join me in honoring Pastor Joseph and Joyce Ellwanger for their enormous contributions and wishing them well in the future.

125TH ANNIVERSARY OF THE
AMERICAN CHEMICAL SOCIETY

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. HOLT. Mr. Speaker, "Some 2,500 years ago, the Greek philosopher Aristotle postulated that all matter is comprised of four basic elements: earth, water, air, and fire. The idea dominated science until the late 18th century, when revolutionaries from rival nations transformed chemistry from a jumble of medieval alchemy into a true science."

This quotation, from the American Chemical Society's Frontiers of Knowledge, provides us with a perspective on chemistry's birth and its role as a cornerstone of modern science. I rise today to congratulate the American Chemical Society on the 125th anniversary of their establishment. The ACS has been both a symbol and active advocate for basic and applied research and the promotion of the benefits of a healthy and active chemical industry.

The interaction between science, government, and the vitality of our nation are closely linked. Developments in chemistry are reflected in policy and public priorities throughout the world. This was probably far from the thoughts of the founders when they first met in New York on April 6, 1876 to organize the Society. As late as 1901, one of ACS' past presidents predicted a membership of nearly 10,000 chemists on their 100-year anniversary in 1976. In fact, membership in ACS reached
