

support based at institutions of higher education designed to improve the security of networked information systems. This research program is authorized for a 10-year period, growing from \$25 million in the 1st year to \$85 million by the 5th year. Although awards are to universities, the research projects may involve collaborations with for-profit companies that develop information security products.

The bill establishes a flexible management approach for the research program. It is based upon a management style that has been used effectively by the Defense Advanced Research Projects Agency to spur advances in high technology fields. Specifically, management of the research program will rely on program managers who are both knowledgeable about computer security issues and needs and familiar with the research community. These program managers will be responsible for identifying and nurturing talented researchers and for generating innovative research proposals. Although program managers will have considerable freedom in managing their individual research portfolios, each will be reviewed periodically by NIST senior managers and by outside computer security experts. To ensure its relevance and continued need, the overall research program will be reviewed in its 5th year for scientific merit and relevance by the National Academy of Sciences.

An expanded university-based research program will train new graduate students and post-doctoral research assistants, as well as attracting seasoned researchers to the field. The result will be a larger and more vibrant basic research enterprise in computer-related security fields. A separate set of awards will be available to support post-doctoral research fellowships and senior research fellowships both at universities and at NIST. The bill also increases support for on-going, in-house computer security research at NIST.

The Computer Security Enhancement and Research Act of 2001 builds on the long experience of NIST in developing computer security standards and practices by placing new responsibilities on the agency for building up the nation's basic research enterprise in information security. By enlarging and strengthening the research enterprise we can generate the ideas and approaches needed to provide for future cyber security in an insecure world.

**HARRY & IKE, THE PARTNERSHIP THAT REMADE THE POSTWAR WORLD—A HISTORY LESSON FOR ALL TO ENJOY**

**HON. WILLIAM O. LIPINSKI**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, November 16, 2001*

Mr. LIPINSKI. Mr. Speaker, I rise tonight to recommend a new book by Chicago Sun Times political editor Steve Neal, entitled *Harry & Ike The Partnership That Remade the Postwar World*. Mr. Neal is a trained historian and an experienced political journalist. Mr. Neal's fascinating insight and careful attention to detail bring these two extraordinary figures in American history, Presidents Harry S. Truman and Dwight D. Eisenhower, to life. I found

this book to be a highly readable history of the relationship of two great Americans.

Dr. Henry Kissinger said, "Harry & Ike sheds important new light on a relationship founded on friendship and a similar heritage, bitterly shattered by politics and reknit by mutual respect at the end of their lives. Drawing on their letters, diaries and memoirs and on personal recollections of associates, Neal gives us fascinating insights into these two 'giants that saved the West.'"

Former Senator Bob Dole stated that, "Harry & Ike is a fair, balanced, and compelling study of two great American presidents. Steve Neal brings both men vividly to life and does justice to his subjects."

This is a book that you will find interesting, informative and enjoyable. Read it, Harry & Ike, by Steve Neal. You won't be sorry; you'd be educated.

REGARDING NOBEL LAUREATE DR.  
LEE HARTWELL

**HON. DOC HASTINGS**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Friday, November 16, 2001*

Mr. HASTINGS of Washington. Mr. Speaker, I rise today to recognize and honor Dr. Lee Hartwell, the 2001 Nobel Prize winner in the field of medicine.

Each year the Nobel Prize for Medicine is awarded to those who have made important discoveries within the domain of physiology or medicine with the greatest benefit on mankind. I would like to take this opportunity to congratulate the 2001 award winner Dr. Lee Hartwell, President and Director of the Fred Hutchinson Cancer Research Center located in Washington state. I'm proud that innovative research, like that done by Dr. Hartwell, is being conducted in my home state.

Dr. Lee Hartwell, a pioneering geneticist, was awarded the Nobel Prize for Medicine for his discoveries concerning control of the cell cycle. For three decades Dr. Hartwell has conducted research on cell division and has identified molecules that regulate cell division. It's this kind of knowledge that is key to understanding how cancer cells mutate and developing approaches to reverse or prevent that mutation.

With an estimated 24,800 new cancer cases in Washington state alone this year, it's clear that many people will benefit from the hard-work and commitment of Dr. Hartwell.

Thank you for this opportunity to recognize Dr. Hartwell. His discoveries have tremendous implications for life saving cancer therapies and will have an impact on cancer patients and their families for generations to come.

IN HONOR OF BEN TRAINA UPON  
HIS RETIREMENT FROM 8 YEARS  
ON LOMITA CITY COUNCIL

**HON. JANE HARMAN**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, November 16, 2001*

Ms. HARMAN. Mr. Speaker, I rise today in honor of my constituent and good friend, Ben

Traina, who retires this month from the Lomita City Council after years of exceptional service to his community, including two terms as Mayor.

I have known Ben since I first ran for Congress in 1992. Ben was often my host in the City of Lomita, a small town in the true sense of the phrase, nestled in the hustle and bustle of the South Bay of Los Angeles. Ben barely knew me then, but he enthusiastically escorted me to small coffees and community events so that I could meet the residents of his city. We had a great time.

Since then, we have worked closely together on an issue that is a high priority for me. The Lomita Little League is the cornerstone of the Lomita community. Virtually every kid in Lomita plays in the Little League, and the parents are great fans. Baseball is simply what the town does on Saturdays.

For years, the League played on otherwise unusable Navy property, but had to renegotiate the agreement annually. The uncertainty was hard on the community. It was reluctant to make investments in vital capital improvements—such as a new clubhouse and functioning restrooms—or making the infield free of bad hops.

Ben and I worked hard together to develop a system that would serve the League's interest better yet comply with Navy regulations on land use. After months of meetings with Navy personnel, Ben and I negotiated a ten-year license agreement, beginning in 1995, under which the League would be able to use the land for its primary mission—playing baseball.

But a problem remained: the League also needed a way to raise money. For years it had been selling Christmas trees on the lot as its primary source of revenue. But the Navy objected to the procedures for selling the trees and for the past several years, those sales were stopped.

Once again, Ben and I launched a months-long process to re-negotiate the terms of the license agreement and convince the Navy that the League should be able to do its fundraising. With the help of Assistant Secretary of the Navy, H.T. Johnson, I am happy to report that the Traina-Harman partnership has prevailed, and the Christmas tree sale was approved just in time for this year's Christmas season.

Mr. Speaker, I will miss working with Ben in his capacity as an elected official. But I know we will continue to work together to preserve the ability of Lomita kids and families to enjoy the spirit of baseball.

I am proud of Ben's efforts, and I join the citizens of Lomita in thanking him for exceptional service and wishing him well.

BEST PHARMACEUTICALS FOR  
CHILDREN ACT

SPEECH OF

**HON. BENJAMIN A. GILMAN**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, November 13, 2001*

Mr. GILMAN. Mr. Speaker, I rise today in strong support of H.R. 2887, the Best Pharmaceuticals for Children Act. I urge my colleagues to join in supporting this important measure.
