out of more than 542,000 high school boys basketball players to be named the 2001 Gatorade National High School Boys Basketball Player of the Year. This is one of the highest awards conferred upon a high school student athlete. In addition to both academic and athletic excellence, recipients must also maintain high moral character. Kelvin is an outstanding young man who personifies the criteria, and I am proud to be honoring him here today.

Kelvin has a strong sense of teamwork and can play any position on the court. His remarkable athletic skills have made him the highest scorer in Northwestern's history, with a record 1,978 points. As a four year starter on the varsity team, he has been the recipient of numerous honors and awards including McDonalds All-American, Parade Magazine All-American, three time 1st team All-State player, and most recently, the Mr. Basketball award, given to the state’s best player by the Basketball Coaches Association of Michigan.

Not only is Kelvin an exceptional athlete, but he has also maintained 3.1 GPA. He is an active member of student government, demonstrating leadership qualities in school extending well into the Flint community. Successfully balancing academics with athletics, he will be an asset to the student body at Michigan State University next fall. He is an outstanding example of the teamwork and high moral character stressed in Flint public schools.

Constantly maintaining high standards for himself, Kelvin has become a role model for younger students, working with young people at the local Boys and Girls Club and at summer basketball camp. He teaches them the importance of teamwork and dedication on the court and its implications throughout life.

Mr. Speaker, I am happy to honor an exemplary individual like Kelvin Torbert, and the contributions he has made to his team. He is an example of the accomplishments, encouragement and reinforcement of a student's talents, and belief in his or her ability to excel.

THE HERO OF CHESTNUT HILL

HON. BARNEY FRANK
OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 2001

Mr. FRANK. Mr. Speaker, on April 17, one of the leading educational institutions in America, Boston College, will honor Dr. Francis B. Campanella as he prepares to retire this year from his job as Executive Vice President. Dr. Campanella has been an extraordinary asset not just to Boston College, but to the Greater Boston community, and to higher education in America through his extraordinarily creative and diligent work at Boston College. Last September, David Warsh appropriately described Dr. Campanella's work in an excellent article in the Boston Globe. I am delighted to have this chance to join in honoring this very distinguished educational leader on the occasion of his well earned second retirement, and I ask that Mr. Warsh's column about him be printed here as an example of what commitment at its best means to our broader community.

EXTENSIONS OF REMARKS

[From the Boston Globe, Sept. 12, 2000] The Hero of Chestnut Hill

Anyone strolling across the densely built and sparkling campus of Boston College would find it hard to believe that there was a time when the school was nearly bankrupt. Yet in the early 1970s, Boston College came very close to falling. The school had run major deficits for five years in a row. Its net worth was negative. Its endowment was a paltry $5 million.

BC had a sympathetic banker in Waltham, Giles Mosher. But only by temporarily dipping into the pension fund for Jesuit professors were the lines able to keep doors open from year to year. In a memorable report, economist Edward Kane warned the faculty that BC soon might find that its then spacious campus had become the University of Massachusetts at Chestnut Hill.

It was about that time that the trustees hired Donald Monan, S.J. Within a year Monan persuaded professor Frank Campanella to leave the faculty where he had been teaching finance and take over the school's internal management instead. The rest is history.

Boston College took off like a rocket and the University of Massachusetts built its new campus at Columbus Point.

Last week Campanella, 64, said he would return to teaching at the end of the current academic year. That $5 million endowment has grown to $1.1 billion, the 55th largest in the country. (In contrast, Boston University says the market value of its endowment currently is about $880 million.)

Faculty salaries, which in 1973 had been at the 50th percentile of category I institutions, are in the 90th percentile. Undergraduate applications, which had totaled 8,400, last year were 21,000 for 2,100 places—making BC the fifth most heavily applied-to university in the country.

And on the 1991 list of BC's top 12 application overlaps—meaning those schools to which a prospective BC student also had applied—the names of Fairfield University, Providence University, and UMass had been excised by 1997 by Harvard, Penn, and Brown.

Campanella was a logical, if not an obvious choice for executive vice president. He had been raised in Jamaica Plain, then graduated from Boston College High School in 1954. After earning an engineering degree at Rensselaer Polytechnic Institute and serving three years as a Marine Corps lieutenant he worked for five years in the construction industry.

Low margins and chronic uncertainty led him to retool as a finance professor, beginning as a night school MBA at Babson College, then as a doctor of business administration at Harvard Business School. (He tested Harry Markowitz's portfolio theory for his dissertation; Rober Glauber was his supervisor). He had been teaching for three years when Monan took him by the arm in 1973. He had the confidence of the faculty.

Campanella's strategy from the first was to run a surplus. He established a depreciation account—a standard business practice but among the first in the nation at a university—which freed up cash for investment. Then he set out to build the college's balance sheet.

He borrowed as much money as possible, taking advantage of the bargain rates available to tax-exempt institutions. He used it for bricks and mortar, budgeting debt service as an expense. With the physical plant growing, he lifted the faculty to increase enroll-

A TRIBUTE TO CARMELA C. RODRIGUEZ

HON. EDOLPHUS TOWNS
OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 2001

Mr. TOWNS. Mr. Speaker, I rise today to honor Carmela C. Rodriguez of Brooklyn, New York. Ms. Rodriguez is a deeply religious person who has dedicated herself to serving her church, her community and her native culture.

Ms. Rodriguez was born and raised in Panama City, Panama. She migrated to the United States in 1963. Nevertheless, she remains proud of her Panamanian roots. She has expressed this pride through service. She is the President of the Day of Independence Committee of Panamanians in New York and she organized the first Panamanian Independence Day Parade.

Ms. Rodriguez is also committed to her religion and her community. She is a Eucharistic Minister of Service at Our Lady of Charity Church; she is the First African American woman to be inducted as a Franciscan Friar in the Immaculate Conception Province, and she is the Grand Lady of the Knights of Peter Claver Ladies Auxiliary. In addition, she serves her community by conducting AIDS education workshops and donating food as well as clothing for needy children.

Mr. Speaker, Ms. Carmela C. Rodriguez is a woman of deep conviction whose religious and community involvement illustrate that she does not believe it is enough simply to live in a community, but rather one must serve that community as well. As such, she is more than worthy of receiving our recognition today and I hope that all of my colleagues will join me in honoring this truly remarkable woman.

MAKE SUBPART F LAW PERMANENT

HON. JIM MCCRERY
OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 3, 2001

Mr. MCCCRERY. Mr. Speaker, today I am pleased to introduce a bill on behalf of myself,
