President Bush won by 271 electoral votes, according to the nearly complete electoral vote count. The Florida recount is the most recent of several recounts in battleground states that have been the subject of intense political debate and legal wrangling.

The results of the recount have been closely watched by the media and the public, as they determine the outcome of the presidential election. The Florida recount has been the subject of intense legal battles, with both sides seeking to have their ballots counted. The outcome of the recount has been widely anticipated and will likely have a significant impact on the course of American politics.

In addition to the Florida recount, recounts have also been held in other states, including Ohio and Michigan. The results of these recounts have been closely watched by the media and the public, as they determine the outcome of the presidential election. The recount process has been complicated by legal challenges and the need to verify the authenticity of ballots.
