Orange County Compact Program, the largest mentoring program in the State of Florida. I also had the privilege of serving as a mentor myself to two students at Boone High School in Orlando, where I attended. I have been a big believer in mentoring programs since I was a small child. When I was in elementary school, my mom, who was a single parent, thought it would be a good idea for me to have a mentor. She went down to the Big Brothers Big Sisters organization and arranged for me to have a mentor. My mentor throughout my childhood was a man named Tom Luke. Tom has worked for the Orlando Sentinel, which is a local paper in Orlando, Florida, for the past 26 years as their manager of the consumer services department.

Tom, along with my mom, played a very key role in mentoring me as a child. They are, in large part, responsible for whatever success I may have today.

Mr. Speaker, I would now like to address the educational benefits of the Mentoring for Success Act, particularly as it relates to preventing children from dropping out of high school. In my home State of Florida, we had a big problem: Only 53 percent of our children were graduating from high school. So we in the Orlando area decided to do something about it. We created what is known as the Orlando-Orange County Compact Program. That is a mentoring program that matches up students who are at risk of dropping out of public high schools with mentors from the business community who work with these young people 1 hour a week. It is sort of like a Big Brothers Big Sisters program.

The results from this mentoring program have been dramatic. Over the past 10 years, 98 percent of the children in the Compact Program in Orlando have graduated from high school, the number one graduation rate in the United States. Let me give just one example of how this program is successful, because this is exactly the type of program that the Mentoring for Success Act seeks to create.

There was a young 18-year-old African American man named Lenard who was attending Jones High School, which is an inner city school in Orlando. Lenard was struggling in school. He was making Ds and Fs. He was skipping school. He had been arrested for selling drugs. He announced that he was intending to drop out of school.

Lenard's mentor developed a friendship with him, and met with him every week. By Lenard's senior year, he went on to become Orange County's student of the year.

In his senior year, Lenard won a raffle at Jones High School. The winner got two tickets to the Orlando Magic basketball game, great seats. He called his mentor and said, 'Hey, I just won two tickets to the Orlando Magic game tonight.' His mentor replied, 'That is great. Why don’t you ask your best friend?' Lenard said, 'That is why I called you.' Mentoring makes a difference, one child at a time.

Finally, I would like to discuss the crime prevention benefits of this important legislation. In Florida, 70 percent of the inmates in our jails and prisons are high school dropouts. It costs the taxpayers $25,000 a year for each of these prisoners in our Federal prisons, compared to only $5,000 a year to educate a child in the public schools.

Clearly, making this small investment in the children will save us hundreds of millions of dollars down the road in reduced prison and welfare costs.

In summary, the Mentoring for Success Act sponsored by Coach Osborne and myself will make a meaningful difference in the lives of young people, will improve education, will prevent crime, will save us money, and I urge my colleagues to cosponsor this legislation and vote yes on this important bill.

APPOINTMENT OF MEMBER TO PERMANENT SELECT COMMITTEE ON INTELLIGENCE

The SPEAKER pro tempore (Mr. GRAVES). Without objection, and pursuant to clause 11 of rule X and clause 1 of rule I, the Chair announces the Speaker's appointment of the following Member of the House to the Permanent Select Committee on Intelligence to fill the existing vacancy thereon:

Mr. PETERSON of Minnesota.

There was no objection.

SHIPBUILDING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. SKELTON) is recognized for 5 minutes.

Mr. SKELTON. Mr. Speaker, events are once again turning the world's eyes to the Pacific. Indonesia continues to be unsettled. North Korea is abandoning its move towards conciliation. And every American is aware of the provocative actions recently undertaken by China in holding 24 Americans captive.

Secretary Rumsfeld has stated that this administration will put a new emphasis on the Pacific. That is wise. But to carry out that intention across such a broad expanse of water will require ships not just now, but ships not just after the decade is out, on a course for Davy Jones’ locker. We are already missing missions today. How dire will the situation be without our ships?

I am not much given to dramatic statements, Mr. Speaker, but let me say this clearly: America should rebuild its Navy, and we should begin now.

To rebuild requires far more than simply stabilizing the size of the fleet. The Navy does not get anywhere by treading water. Instead, we have to reverse the trend in shipbuilding. A wise man used to say that the Navy is moving to a smaller fleet to meet its worldwide commitments, but the world is just as wide. That man’s name was Norman Siskioky, and nobody in this House, nobody was more dedicated to reversing the trend in shipbuilding than our good friend from Virginia.

By the way, I believe that ‘‘Norman Siskioky’’ would make an excellent name for a capital ship. Why build more ships? Because it is presence, American presence, that helps avoid war: presence in peacetime, at pierside, showing our allies tangible proof of American support; and presence in the theater, exercising, working with allied navies, and serving notice to all that America is not thousands of miles away, it is just over the horizon. Naval presence is an open hand that can quickly become an iron fist.

We can focus on the Pacific all we like, but maintaining a strong naval presence there requires more ships than we have now. Then, what of our commitment to Europe, the Atlantic, the Mediterranean, the Middle East?

Ships require sailors. Sea duty is hard and challenging. It can be heartbreaking. The sailor is the backbone of the Navy. While some question whether sea duty is still that service’s highest calling, there is no question in the mind of this son of a sailor that it should be.

It is not just the duties at sea that make the sailors so valuable, it is their presence in foreign ports, showing citizens around the world that Americans are open, friendly, and interested in their country. That is as much a benefit of naval presence as the speedy response to crises that may emerge.

A rebuilt Navy should be able to operate from shoreline to shoreline on the surface, above, and below. That will require a range of ships: small ships, to operate in close; medium ships, to provide cover for the smaller ships in shore, but able to keep station with battle groups as needed; submarines, capable of operation in all waters and able to carry land attack missiles and support special operations forces; and heavy capital ships, to maintain freedom of the seas.

We do not just happen, we must build them. We must equip them. That takes resources and commitment, resources from Capitol Hill and a
commitment, beginning with the CNO and including every sailor in the fleet. That is why a larger Navy must be in the budget this year. The Navy cannot rely on Congress to add money above the top line to make up for its own budget shortcomings. For years, we in Congress added money to the administration's defense budget. I do not believe that we will so readily revise the new administration's plans.

But I do not doubt that with support in the administration budget, Congress will follow. As Members of Congress, the purse is our responsibility. Without a doubt, ships are expensive. Building more ships is more expensive, but not being where we are needed when we are needed there is the most costly of all.

I believe in my heart that one ship flying the American flag alongside one foreign pier makes friends, warns enemies, and ultimately reduces the need to send many more ships out on the high seas.

To provide presence, we need hulls. To engage in littoral, we need hulls. To do the job we ask the Navy to do, we need hulls.

URGING MEMBERS TO SUPPORT LEGISLATION TO CLARIFY LAW REGARDING FUNDRAISING BY NONPROFIT ORGANIZATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. Ehrlich) is recognized for 5 minutes.

Mr. EHRLICH. Mr. Speaker, I rise today to announce the introduction of legislation that would help clarify the law regarding fund-raising by nonprofit organizations.

I want to first recognize and thank the gentleman from Indiana (Chairman BURTON) and I am sponsoring is to clarify ambiguities existing in both law and postal service regulations with respect to fund-raising.

The bill clarifies the law so the postal service does not read the statutory “ownership” test so literally as to disqualify fund-raising mail sent by otherwise eligible nonprofit organizations that negotiate a risk-sharing agreement with respect to their fund-raising mail.

In my view, Mr. Speaker, it is imperative that otherwise qualified nonprofit organizations be able to secure donations at the lowest possible cost. When nonprofits conduct activities that further purposes enumerated in the statute, for example, to provide safety net social services, they ease the burden on taxpayers and deliver high quality services to all Americans.

This Congress is asking nonprofits to provide services the government has traditionally been ineffective and inefficient in providing. Given this purpose, it would be irrational for Congress to limit use of the nonprofit bill rate only to fund-raising campaigns that raise donations sufficient to pay mailing costs.

It is important to point out that our bill is not a back door to allow unauthorized parties to mail at the nonprofit rate. Current law restricts an otherwise qualified organization from utilizing the nonprofit rate to sell goods or services; a different standard, however, is different from promoting the sale of a product or service.

Furthermore, Mr. Speaker, Congress has instituted reforms limiting a nonprofit’s use of the special mail rate to sell products and services. This bill does not affect the reforms Alaska Senator Ted Stevens set in motion in the 1980s in that regard.

This bill also recognizes the subsequent reform Congress enacted to require sales promoted at the nonprofit rate to be substantially related to the purpose for which the nonprofit qualified for the nonprofit rate.

More importantly, Mr. Speaker, this bill does not limit the postal service’s authority to enforce any other section of the Federal postal statutes. Accordingly, the postal service retains all of its tools to discover and prosecute fraud, a mission I strongly support.

The problem addressed by this bill is the postal service’s present interpretation of the statutory “ownership” standard, which is causing litigation and inconsistent application in nonprofit fund-raising cases.

Respectfully, I ask my colleagues to join me in supporting this important legislative measure.

MANAGED CARE REFORM, PATIENT ACCESS TO SPECIALTY CARE

The SPEAKER pro tempore (Mr. GRAVES). Under a previous order of the House, the gentleman from Texas (Mr. GREEN) is recognized for 5 minutes.

Mr. GREEN of Texas. Mr. Speaker, I rise today to continue what is a series of speeches or Special Orders on the need to reform our Nation’s managed care industry. In the past I have discussed external and internal appeals processes, medical necessity, and the need for accountability. Today I would like to discuss patient access to specialty care.

Specialists fill an invaluable role in our Nation’s health care system. And many of us have sought the services of a specialist because of high blood pressure, a broken arm, or migraine headaches. But oftentimes, HMOs refuse patients access to specialists because they do not have such specialists in their network or they are across town or literally unavailable.

Such is the case of Sarah Peterson from San Mateo, California. She was born with a brain tumor that required her to see a physician who specialized in brain tumors. But her HMO, which was obtained through her father’s employer, told her mother that she would not be able to see a neurosurgeon. She was told, what difference does it make, cancer is cancer.

Well, it does make a difference if you are the parent of a child with a potentially deadly tumor. While Sarah was fighting for her life, her parents were fighting an HMO to get her the quality health care they were paying for. For this situation could have had dire consequences; but fortunately for Sarah, her parents changed plans during the middle of this medical crisis. Sarah is now 8 years old and is doing well. But she still has a tumor and will still need to see a specialist. Hopefully, her health insurance will let her continue to see that specialist.

The prognosis is not as promising for young Kyle of Bakersfield, California. Kyle began having ear problems when he was 6 months old. After months of corrective measures, antibiotics, infections, and finally a ruptured eardrum, Kyle’s HMO referred him to an ENT. The ENT performed surgery to put tubes in Kyle’s ears which would allow for the drainage of the infected fluids, but that surgery was too little too late. After 10 days, Kyle’s ears began to bleed. Had the HMO followed the advice of the ENT, they would have given Kyle a CAT scan to provide evidence of cholesteatoma, a severe infection that destroys the bone in the inner ear. But again, the HMO denied this vital test. And Kyle’s ear problems continued along, undiagnosed.

Finally, after losing all patience with the HMO, his parents changed plans.
