The funds raised at the "Chez Nicole" event will be used to reach even more high school students and purchase supplies for the "breast health for teens" program. The money also is needed to train school nurses and health teachers on how to help young women maintain breast health throughout their life time.

I am proud to commend the generosity of Nicole Testa and Joe Cannatelli and their "Chez Nicole" team for their commitment to helping the Biden Breast Health Initiative educate more young women about breast cancer.

HIGHER EDUCATION AND TECHNOLOGY

Mr. TORRICELLI. Mr. President, I rise today to bring to your attention an editorial written by Dr. Harold (Hal) Raveche, president of Stevens Institute of Technology that appeared in the Boston Sunday Globe on February 18, 2001. Dr. Raveche is a highly respected academician. His recent Boston Globe editorial discusses the need to change our higher education system to reflect the changing dynamics of a high technology driven New Economy. Stevens is already teaching its students in a unique, different way called Technogenesis.

I ask unanimous consent that Dr. Raveche's editorial be printed in the RECORD and urge my colleagues to give it thoughtful consideration.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IF HIGH SCHOOLS CAN CHANGE, THEN WHY NOT COLLEGES? HIGHER EDUCATION LARGELY THE SAME, DESPITE TECHNOLOGY ADVANCES

(By Harold J. Raveche)

College freshmen right out of high school are diametrically opposed in two ways. Once they cross the threshold into higher education: Colleges are far more expensive to attend, yet offer an education style that is out of date and not even up to par with what these kids experienced in high school.

President Bush’s first week in office was dedicated to the promotion of educational excellence for all Americans. Whether or not these goals are reached will have a major impact on the future of America. My administration should see that out of date and not even up to par with what these kids experienced in high school.

President Bush’s first week in office was dedicated to the promotion of educational excellence for all Americans. Whether or not these goals are reached will have a major impact on the future of America. We should encourage and promote higher education to provide our students with the skills necessary to succeed in today’s economy.

I am proud to commend the generosity of Nicole Testa and Joe Cannatelli and their “Chez Nicole” team for their commitment to helping the Biden Breast Health Initiative educate more young women about breast cancer.
