care physicians in an era marked by the growth of managed care. Overall, more than 100 million patient visits are made each year in the United States, and the approximately 630 students at Midwestern University-Chicago College of Osteopathic Medicine, and the 47,000 D.O.s represented by the American Osteopathic Association for their contributions to the good health of the American people.

RECOGNIZING THE WORK OF DR. THOMAS E. STARZL
• Mr. SANTORUM. Mr. President, it is my privilege to rise today to recognize the accomplishments of a living legend. Transplant pioneer Thomas E. Starzl performed the world’s first liver transplant in 1963 and the first successful series of kidney transplants between nonidentical twins between 1963 and 1964, and he has for four decades continued to break many extraordinary advancements in the field of organ transplantation.

This coming April 27, Dr. Starzl’s former students and colleagues, representing the span of those 40 years, will confer upon him the title he earns emeritus status at the University of Pittsburgh. It will be a celebration much to Dr. Starzl’s liking—an academic gathering in order to share important scientific information.

Dr. Starzl is a pioneer. His work has had lasting influence and utility in the field of transplantation and on other fields of medicine as well. His legacy has and will continue to make an impact on us all.

In 1980 he developed a combination of drugs that transformed transplantation of the liver and heart from an experimental procedure to a standard treatment for patients with end-stage organ failure. In 1989, his development of another drug markedly improved survival rates for all kinds of transplants and made possible for the first time successful transplantation of the small intestine.

When Pittsburgh welcomed him 20 years ago, we had no idea the incredible contributions this man would make to medicine and mankind. Indeed, the city has enjoyed an enhanced reputation because he chose to make the University of Pittsburgh his academic home. This year marks the 20th anniversary of the first liver transplant he performed in Pittsburgh. Since then, surgeons at the University of Pittsburgh and the UPMC Health System have performed nearly 6,000 liver transplants and more than 11,300 transplants of all organs. These numbers set the world standard, by far.

But Dr. Starzl’s work goes far beyond Pittsburgh—he is truly a national treasure. He is one of history’s greatest surgeons, someone who made saving a life routine. Even patients who have not been under his direct care have benefitted from his work. In fact, most of the world’s transplant surgeons and physicians have been trained by Dr. Starzl or by those trained by him. By this standard alone his impact is immeasurable and permanent. He has forever changed and improved health care delivery as we know it.

Dr. Starzl, please know that every American is indebted to you for your hard work, your refusal to take no for an answer, and most of all, for your genius and skill as a surgeon and a researcher. The world is a better place because you chose to make Pittsburgh your home.

HONORING BILL RADIGAN
• Mr. JOHNSON. Mr. President, I am saddened to report the passing of one of South Dakota’s most exceptional public leaders, and a life-long friend in my home town of Vermillion, SD. Bill Radigan led a full life, committed to his family, his nation and his community.

Bill answered America’s call to the military during World War II as a member of the Army Air Corps. He served the Vermillion region during his 35 years with the U.S. Postal Service, while simultaneously coordinating Vermillion’s school bus system. He served as secretary of South Dakota teener baseball program for over 30 years and provided needed leadership through the American Legion and VFW. Bill was secretary-treasurer of the Vermillion Volunteer Fire Department for 55 years, and served as city councilman and mayor of Vermillion, where he oversaw the development of progressive new projects in our home town.

I had the privilege of working with Bill on issues ranging from veterans’ benefits to the Vermillion-Newcastle Bridge, which will span the Missouri River by the end of this summer. But for all of Bill Radigan’s commitment to public service, nothing was more important in his life than his family. He and his wife Susie made a dynamic pair in our community, and their 11 children and many grandchildren were of utmost importance to them. Bill’s national, state, and community leadership achievements were extraordinary, but the strong family values he and Susie lived out every day of their marriage serves as well as an inspiration for all.

I had the privilege of attending Bill’s funeral this past week, and the outpouring of love and respect from the entire community was extraordinary. Our Nation and South Dakota are far better places because of Bill’s life, and while we miss him very much, the best way to honor his life is to emulate his commitment to public service and family.

HAPPY BIRTHDAY, MARY SAMSON LEFEVRE
• Mr. ROCKEFELLER. Mr. President, today is a special day in our office. We
