alive. They have been born. They are living today. They are going to retire, and they are going to be eligible. And it is going to cost the Government a lot of money, much more than we are currently having to pay out.

So let’s be cautious. Yes, let’s be conservative. The conservative thing to do is emphasize more debt reduction and to curtail our appetite to spend and curtail our appetite to have tax cuts, which are both living for the moment. It is fun to live for the moment; especially if you are a politician, there is nothing better than to have tax cuts and spending. That is the best of all worlds. The problem with that is that we have a need to be responsible to future generations. Our generation ran it up. We ought to be doing is shoving this debt and spending. That is the best of all worlds. The problem with that is that we have a need to be responsible to future generations. Our generation ran it up. We ought to be doing is shoving this debt on to our kids. We ran it up. We ought to retire it.

Mr. President, with that, I yield the floor.

Mr. DOMENICI. Mr. President, I have nothing further to say, I do not think there is anyone on our side who wishes to speak. If the Senator is ready, we can yield back our time.

Mr. CONRAD. Yes. We are prepared to yield back our time on our side.

Mr. DOMENICI. I yield back any time we have reserved under the previous order.

Mr. CONRAD. I do as well.

The PRESIDING OFFICER. Under the previous order, the motions are agreed to.

The PRESIDING OFFICER (Mr. NELSON of Florida) appointed Mr. DOMENICI, Mr. GRASSLEY, Mr. NICKLES, Mr. GRAMM, Mr. BOND, Mr. CONRAD, Mr. HOLLINGS, Mr. SARBANES, and Mrs. MURRAY conferees on the part of the Senate.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. VOINOVICH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. VOINOVICH. Mr. President, I ask unanimous consent that there now be a period of morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPRECIATION OF SERVICE BY THE DRUG ENFORCEMENT ADMINISTRATION, UNITED STATES CUSTOMS SERVICE, UNITED STATES COAST GUARD, AND THE NATIONAL GUARD

Mr. GRASSLEY. Mr. President, as chairman of the Senate Caucus on International Narcotics Control, I rise to highlight some of the recent interdiction successes by the men and women of the Drug Enforcement Administration, DEA, the United States Customs Service, the United States Coast Guard, and the National Guard.

These men and women, and their agencies, are dedicated professionals committed to protecting our great nation from the devastating affects of the illegal drug trade. They are frequently called to place their lies in harm’s way in an effort to keep our national secure.

As announced by the Attorney General in January 2001, DEA successfully concluded a 10-month narcotics trafficking investigation named Operation White Horse, that involved the movement of heroin by “swallowers” from Colombia to the United States via the cities of Philadelphia and New York. Sixty-five members of the organization, from the Colombia headquarters to the street level, were arrested in what was described as a “wholesale dismantling” of the smuggling organization.

The United States Customs Service also launched an impressive spring 2001, including a recent week on the South-west border that netted 61 drug seizures, yielding 5,449 pounds of marijuana and 82 pounds of cocaine, as well as 16 export violations, 6 seizures of prohibited medications, and additional seizures of marijuana, stolen vehicles, counterfeit credit cards, and illegal fireworks. The Customs Service is rapidly distinguishing itself with the front-line use of X-ray, Gamma-ray, and other non-intrusive technologies at their inspection stations and ports of entry. Customs also completed major domestic and international child pornography cases involving Germany and Russia, as well as continued interdiction of large amounts of the drug Ecstasy.

Coast Guard successes, supported by the Department of Defense, include a 6-day period in February 2001 when it seized 28,845 pounds of cocaine and arrested 24 smugglers, on numerous vessels in both the Caribbean and Eastern Pacific. To date, the Coast Guard has seized 60,636 pounds of cocaine, 20,194 pounds of marijuana, as well as interdicted 1,681 illegal migrants at sea, all in a period of 10-percent operational reduction due to government constraints.

Finally, I appreciate the superb job the National Guard does in operating the four domestic counterdrug training schools, and hopefully soon a fifth one in Iowa, throughout the country that provide much needed training of Federal, State, local, and community personnel in various counterdrug topics.

I am extremely proud of these successes and the personnel involved. As we consider the budgets for these agencies in the weeks ahead, we need to remind ourselves from time to time that it is real, flesh-and-blood individuals out there on the front lines and not bland numbers on spreadsheets and in our briefing books. Their commitment does us all proud.

NURSING SERVICES QUALITY IMPROVEMENT ACT

Mr. DORGAN. Mr. President, on April 6 my colleagues and I introduced the Medicare and Medicaid Nursing Service Improvement Act of 2001. This legislation is intended to help address a problem currently facing nursing homes in North Dakota and Wisconsin and potentially other nursing homes across the country.

I know that many nursing homes nationwide are facing a looming staffing crisis that is expected to worsen as the baby boomers reach retirement. An American Health Care Association report, entitled “Staffing of Nursing Services in Long Term Care,” estimates that the need for registered nurses will grow 66 percent between 1991 and 2020 and the number of licensed practical nurses needed will grow by nearly 72 percent over the same time. Likewise, the number of nurse aides who will be necessary is projected to grow by 69 percent.

In my State, nursing home administrators have a thousand open nurse aide positions that they have been unable to fill. A number of nursing home administrators in North Dakota have told me that they have had to refuse patients because they do not have adequate staff to care for them.

Unfortunately, a problem has arisen in my State that will exacerbate this staffing shortage. By way of background, North Dakota nursing homes have been using trained resident assistants—called feeding assistants in North Dakota—to help feed nursing home patients. This has been the practice for the last decade with positive results. The data in North Dakota indicates that our nursing home patients experience less weight loss and dehydration than patients nationally, and nursing home officials in North Dakota attribute this to the use of resident assistants.

The problem, however, is that the Health Care Financing Administration has told North Dakota and other nursing homes that they can no longer continue to use these trained resident assistants because they lack certification. In North Dakota, this means that hundreds of resident assistants may need to be laid off later this year.
even while my State’s nursing homes are experiencing difficulty finding cert-
ified staff.

The bill that I introduced along with Senators KOHL and CONRAD would allow North Dakota and Wisconsin to con-
tinue using resident assistants for feeding and hydration, while a demonstration project is conducted in our states and others to evaluate what kind of impact the use of these staff has on the quality of feeding and hydration serv-
ices provided to nursing home patients and on the recruitment and retention of nursing staff. If after the three-year demonstration project, the Secretary of Health and Human Services deter-
mines that the use of resident assistants does not result in a reduction in the quality of feeding and hydrating of nursing home residents or in a decrease in the recruitment and retention of nursing staff, other nursing homes around the country would be allowed to use resident assistants to help with feeding and hydration tasks.

This legislation includes a number of safeguards. A demonstration project would be established to protect nursing home patients. For instance, nursing homes are prohibited from using resident assistants to replace existing nursing staff, other nursing homes staff in North Dakota nursing homes, which is what will happen if long-term care facilities can no longer use resident assistants, then patients in North Dakota will suffer.

One resident assistant in North Da-

kota told me about a patient she feeds who has difficulty holding her head up when she eats. The resident assistant said that when she was on vacation, her patient lost seven pounds. Fortu-

ately, after a few weeks back on the job, the resident assistant got her pa-

tient’s weight back up to where it needed to be. However, if this resident assistant was forced to leave her post permanently, that weight loss may have been long-term and ultimately life-threatening.

I believe the Medicare and Medicaid Nursing Services Quality Improvement Act is a step that Congress can take to address both the staffing shortage and the malnutrition of patients. This is not the only solution and it may not be the best solution, but I hope my col-

leagues will work with Senator KOHL, Senator CONRAD and me to tackle these serious issues confronting long-term care facilities and their patients.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business Friday, April 20, 2001, the Federal debt stood at $5,713,631,148,647.61, Five trillion, seven hundred thirteen billion, six hundred thirty-one million, one hundred forty-eight thousand, four hundred eighty-eight hundred forty-eight dollars and sixty-one cents.

One year ago, April 20, 2000, the Federal debt stood at $5,707,061,000,000.

Fifteen years ago, April 20, 1986, the Federal debt stood at $1,962,745,000,000.

Twenty-five years ago, April 20, 1976, the Federal debt stood at $604,399,000,000.

Fifteen years ago, April 20, 1986, the Federal debt stood at $5,707,061,000,000.

In addition to the Medical School’s ac-
tivities in community health pro-
motion, Morehouse School of Medicine provides about 25,000 patient encoun-
ters for approximately 10,000 people per year in community clinics throughout metropolitan Atlanta area. The student body of Morehouse School of Med-
icine continues to excel and 100 percent of the institution’s family medicine and surgery residents passed their board exams in their first sitting for 2 years in a row.

These accomplishments stem in part from the strong leadership of More-
house School of Medicine’s founding dean and president, Louis W. Sullivan, M.D., who has been with the Medical School since its inception. Aside from his years in Washington as U.S. Sec-
retary of Health and Human Services, Dr. Sullivan has dedicated his life’s work to producing top-quality physi-
cians. During his tenure, Morehouse School of Medicine established several programs. These include a 4-year un-
dergraduate medical education pro-
gram, seven residency programs and several centers of excellence including the National Center for Primary Care, the Neuroscience Institute, the Cardio-
vascular Institute and the NASA/Space Medicine and Life Science Research Center, the first of its kind at a minor-

ity medical institution.

Mr. Sullivan has worked tirelessly to provide vision and direction for the in-
stitution’s future, while continuing to preserve the very best traditions of its past. Morehouse School of Medicine,

ADDITIONAL STATEMENTS

MOREHOUSE SCHOOL OF MEDICINE

Mr. CLELAND. Mr. President, 25 years ago the National Medical Asso-
ciation and other prominent organiza-
tions endorsed the development of the

overworked certified nurse aides gen-
erally don’t have time for. I am con-
tinued to receive a number of letters from North Dakota nursing homes, which is what will happen if long-term care facilities can no longer use resident assistants, then patients in North Dakota will suffer.

One resident assistant in North Da-

kota told me about a patient she feeds who has difficulty holding her head up when she eats. The resident assistant said that when she was on vacation, her patient lost seven pounds. Fortu-
