

Two will be victims of child abuse;
 Three will be regular drug users;
 Three of them will have been born out of wedlock;
 And half of them will have experienced at least one divorce in their family.

Now, if you look at that list, it must occur to even the greatest critic of public schools that educators didn't do it—we didn't introduce them to drugs, or break up their families, or force them onto public assistance, or get them pregnant, or any of the other myriad problems they pack with them to school. So, it's no good to say, "That's your problem, Mr. Superintendent; I pay my taxes and that's enough." Well, today's social dynamite piling up in the nation's school is tomorrow's headache for all of us, including the business community.

Among other consequences, the link between the social ills that plague many young children and early school failure, later high school dropouts, and ultimately a functionally illiterate or marginally literate, unskilled work force is an inexorable progression.

And to paraphrase that oil filter commercial, we can deal with it now, or we can deal with it later. But we have a problem. It was captured very nicely about a year ago in a cover article in Time magazine with the rather sharp title, "A Nation of Finger Pointers."

The major premise of the article was that we are becoming a nation of passive crybabies. People who absolve themselves of any individual responsibility, sit on their duffs, and assume the status of victims as a result of someone else's incompetence or even malevolence.

I get it from both ends. Some teachers and administrators want to blame it on the absentee parents who are sending us all these undisciplined kids who do not value education and are loaded down with problems created by those parents. It's the ill-prepared raw material argument: "How can we teach kids like that?"

On the other end of the process, I get it from the business community who says much the same thing, but substitutes "educators" for "parents." Educators are sending us all these undisciplined kids who do not value work and are loaded down with problems created by the schools. It's the same ill-prepared raw material argument: "How can we hire kids like that?"

So, what we have here is a problem in which everyone is either a victim or a scapegoat. If we have a problem, don't join hands anymore, point fingers. What we don't have is that old-fashioned American interdependency, shared responsibility, mutual understanding, the common ground where people meet and solve problems. And that is what this is about today.

We need community people—business people—to support us in our efforts to elevate academic excellence and good character—to convey to the young that we value the qualities we pay lip-service to. We need businesspeople who can stimulate interest in career development and training. Students have heard it all before from teachers and counselors. They need to see it and hear it from the people who will be doing the hiring and firing.

And finally, we just need more adults who will spend time with these kids; kids who haven't had many caring adults in their lives. Someone to read to them, to listen to them read, to treat them like they are somebody.

I can't tell you how many people tell me, "I feel so sorry for those kids." Well, frankly, that's not good enough.

There is a revealing exchange between the great Englishman Samuel Johnson and his friend and biographer James Boswell in the greatest biography ever written. Boswell confesses, "I have often blamed myself for not feeling for others as sensibly as many say they do." Johnson replies, "Don't be duped by them anymore. You will find these very feeling people are not ready to do any good. They pay only by feeling."

He's right. When the young have grown to adulthood, they will not think kindly of those adults who have given them sympathy without help.

TRIBUTE TO HOLLI DUNAYER

HON. CAROLYN MCCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 24, 2001

Mrs. MCCARTHY of New York. Mr. Speaker, I proudly recognize the academic and personal achievements of Holli Dunayer of East Meadow, New York.

Holli is a spirited and dedicated woman who has triumphed through life's continual ups and downs.

Although Holli gave her all to the North Bellmore Hair Salon family business, she always wanted to contribute to the community. While managing the salon, Holli helped the neighborhood's homeless, organizing a benefit for the poor from her store.

But times were difficult for Holli. In the early 1990s, she lost her home, was divorced, and went on public assistance so she could care for her daughter, Samantha, then seven.

But Holli bounced back.

In 1996, she enrolled in Nassau Community College, where she received an Associate's Degree in sociology. Holli was awarded a partial scholarship to Adelphi University, where she received a Bachelor's Degree in social work last year. On Sunday, May 20, 2001, Holli received a Master's Degree in social work from Adelphi University.

While Holli pursued her Master's Degree, she interned in my Hempstead District office. I was impressed by her commitment, and I hired her as a full-time legislative aide to handle education, IRS, grants and passports. I'm excited to have a second social worker on my staff.

Holli is a recipient of a \$5,000 Maurice Paprin Memorial Fellowship given to students who demonstrate commitment to social change through past or present work.

Holli calls her employment "poetic justice" since she has gone from the government taking care of her to being a government employee helping others in tough situations. Holli is proof that hard work and dedication is all you need to make your dreams come true.

I congratulate Holli and her daughter, Samantha, now 15, on their achievements and Holli's graduation.

I am honored to have her as a member of my staff and as my friend.

INTERNATIONAL MIGRATORY BIRD DAY

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 24, 2001

Mr. BORSKI. Mr. Speaker, I rise today in recognition of International Migratory Bird Day (IMBD), which was officially celebrated on Saturday, May 12, with hundreds of events across the country including one at Philadelphia Zoo.

International Migratory Bird Day celebrates the annual return of millions of birds from wintering habitats in Latin America and emphasizes that the continued enjoyment of these birds depends upon our actions as consumers, homeowners, and citizens. At least 200 species of birds migrate to, from and through Philadelphia each year.

In addition to the sheer enjoyment of watching them, migratory birds are important biological indicators of ecosystem health as well as sentinels for potential human health risks. Their populations are declining dramatically due to the destruction and degradation of their habitat throughout the Americas. Making small changes to some of our daily habits can contribute to the conservation of migratory birds and their habitats, as well as the planet's overall health.

One small change is drinking shade-grown coffee, which helps protect habitat for migratory birds. According to experts at the U.S. Fish and Wildlife Service, the way coffee is grown can have a direct effect on many of the birds we see in our neighborhoods each spring. Coffee farms or plantations that leave a canopy of shading trees ("shade-grown coffee") benefit migratory birds by providing habitat for their wintering grounds in Mexico, Central and South America, and the Caribbean. The Wilson's warbler, scarlet tanager, northern oriole, indigo bunting, and wood thrush are among the dozens of migratory birds that spend part of their lives in the U.S. and that winter in the coffee-growing regions of Latin America.

Encouraging our local coffee shop or grocery store to carry shade-grown coffee is one way that each of us can make a difference. Another way is becoming more informed about migratory birds and the threats to their habitats through involvement in bird watching and other programs such as those at Philadelphia Zoo. The Zoo's involvement in avian conservation dates to before the opening of its original Bird House in 1916. More recently, scientists at Philadelphia Zoo have played a major role in the conservation of the American bald eagle. Once on the brink of extinction due to the use of the pesticide DDT, which was banned in the 1970s, the bald eagle is a national conservation success story. The Zoo's pair of eagles was brought to the Zoo by wildlife rehabilitators when it became clear that neither could be reintroduced to the wild. Over the years, this pair has bred successfully and, through collaboration with the Pennsylvania Game Commission, their offspring have been placed in the nest of wild eagles. At least two of these offspring successfully fledged from their foster parents, contributing
