New Jersey. On Wednesday, June 27, 2001, the City of Jersey City will honor Mr. Martin during a special recognition ceremony to reopen Vroom Court the William E. Martin Way. A luncheon in honor of Mr. Martin will follow the ceremony.

William Martin began his distinguished career with the United Way Foundation in 1956, serving as President of the United Way in Hudson County, New Jersey. During his tenure, Mr. Martin was instrumental in establishing over 30 Tri-State United Way agencies. As a result of his hard work and dedication, United Way now provides social services in over 700 communities throughout the Tri-State area, lending assistance to over 8 million people a year.

Beyond his administrative duties, William Martin has also served as an ambassador for the United Way Foundation. In 1988, he was chosen by his peers to set up United Way services in Beijing, China and Hong Kong. In addition, he has assisted in the implementation of United Way services in Vietnam, Pakistan, Egypt, and the Philippines.

Youth outreach and community service initiatives have also been top priorities in William Martin’s life. Prior to his tenure with United Way, he was Director of Human Services at Camp Crowder in Missouri and served as Athletic Director at the CYO Center in Jersey City, New Jersey for nine years.

Today, I ask my colleagues to join me in honoring William Martin for his distinguished service on behalf of the United Way of America and the residents of New Jersey.

MARVIN OLINSKY: VISIONARY, PUBLIC SERVANT, AND HUMANITARIAN

HON. TONY P. HALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. HALL of Ohio. Mr. Speaker, I rise to pay tribute to Marvin Olinsky, who is retiring after serving 14 years as chief executive of the Five Rivers MetroParks, a regional park system in Dayton and the Miami Valley, Ohio. Marvin has been an extraordinary steward of the park system and a tireless advocate for clean, safe parks for us and future generations.

Ten years ago, the park district managed 6,900 acres. Under Marvin’s leadership, MetroParks has grown to an 11,000 acre system with an annual attendance of 5.6 million visitors. He increased law enforcement within the parks, expanded educational programs and recreational facilities, and made the parks cleaner. These improvements have made the park system enormously popular among residents of the Miami Valley.

Marvin has been more than a park system director to the community. He has been a true visionary, helping to make the physical surroundings in the Dayton area more attractive and friendly. He was a moving force behind the current downtown Dayton renaissance and he has actively participated formally and informally in a broad range of civic activities.

Beyond Dayton and this country, Marvin’s spirit of helping stretches to the war-torn West African nation of Sierra Leone. As a private citizen, he has visited the country on a regular basis to bring much needed books, medicine, cloth, food. He has traveled with him to Sierra Leone on a humanitarian mission. It has been an honor to work with him in the struggle for justice in that country.

I have had the privilege of working with Marvin on other projects, including the Hope Foundation, which he chairs. This group supports needy citizens in Africa and around the world.

For me, Marvin is more than just a partner in public service. I am proud that he is my friend.

Dayton is fortunate that Marvin plans to stay in the area and continue his civic involvement. His creativity, vision, and energy can always be used here.

TRIBUTE TO THE REV. DAVID KALKE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. BACA. Mr. Speaker, I rise to salute a constituent of mine, the Reverend David Kalke, recipient of a 2001 Robert Wood Johnson Community Health Leadership Award, for his work in creating a “safe zone” for our youth. The award is the nation’s highest honor for community health leadership and includes a $100,000 program grant.

The Reverend Kalke has done remarkable work with teen health and education programs in an area of San Bernardino, CA, known to have the state’s highest teen pregnancy and STD rates and marked incidents of violence. The original core of 12 teens has since grown to over 100 youths a year.

Because of these efforts, he is one of 10 outstanding individuals selected this year to receive a $100,000 Robert Wood Johnson Community Health Leadership Program award.

You know, Mr. Speaker, it is important that we give the children hope. That we give them a chance. A helping hand up. A chance to have a mentor, to have someone believe in them. Because through that confidence in them comes confidence in themselves. The Reverend Kalke has done that. I think we must all remember the role models in our lives, and remember those who inspired us to see the possibilities. So we can all understand what it is for a child to have the sort of opportunities, the sort of chance that the Reverend Kalke has given them.

The Reverend Kalke has a long history of public service and involvement with serving our youth. His deeply held beliefs that the church should be actively involved in the community began with a mission to Chile during the 1970s. He eventually returned to New York City where he led a Lutheran church congregation and initiated a broad array of community programs in the South Bronx.

In 1996, he was asked by the Lutheran church to revive a struggling church in a poverty-stricken section of San Bernardino, CA, known to have the State’s highest teen pregnancy and sexually transmitted disease rates, as well as one of the highest incidences of gang-related violence.

From the beginning, his vision faced obvious risks. His church, the Central City Lutheran Mission (CCLM), was abandoned with no established community ties and a regular risk of violence from area youth gangs. To gain the neighborhood’s trust, Kalke hired local teens to help clean up the site, offering to pay small salaries while they undertook peer HIV/AIDS health educator training. The original core of 12 teens has since grown to over 100 youths a year, working, learning and volunteering in what has become a gang-free, safe space in the midst of a devastated neighborhood.

Admirers have observed: “Not since Escalante worked his magic in teaching calculus to poor minority kids in East Los Angeles has anyone witnessed the dedication, caring, knowledge and skills of David Kalke in assisting ‘throw away’ kids in a ‘throw away’ neighborhood to learn ways to improve their own and the neighborhood’s existence.”

CCLM’s youth programs now include: an adolescent health program which employs peer educators to teach HIV, STD and teen pregnancy prevention; an after school program for 50 children between the ages of 5–12 to help with homework and nutrition; and, a teen day school for suspended, expelled or home-study students. CCLM’s cultural programs include art, writing and photography. Teens publish a newsletter of poems, drawings and photographs on the realities of inner city life.

The Reverend Kalke has also raised federal and city funding to rehabilitate abandoned homes and turn them into transitional housing for homeless HIV+ persons.

In order to create these programs he has effectively pulled together numerous partners including other churches, California State University at San Bernardino (Cal State) and the city council. Cal State’s Social Work, Public Health and Communications Departments regularly send interns and nursing students to conduct 9-month internships at CCLM.

The CCLM programs have transformed hundreds of individual lives, giving food, shelter, education, safety and hope where there was none.

And so we honor the Reverend Kalke, and we salute him, for his achievement and his commitment to our youth.

TRIBUTE TO HUGO NEU
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. PALLONE. Mr. Speaker, I would like to ask my colleagues to join me in congratulating Hugo Neu Schitzer East, one of the largest scrap metal recyclers in New Jersey, for their proactive efforts to improve industrial recycling.

The Hugo Neu Schitzer East Company has been operating in Port Liberté, New Jersey for the last 40 years. They have invested several million dollars in research and development, attempting to find new and better ways to...
mine and recycle waste metal. They have done so with the goal of reducing the amount of scrap metal that needs to be disposed of in landfills. Hugo Neu is working to dispose of these waste materials in a more environmentally conscious manner, as well as find ways to recycle and reuse a larger portion of scrap material.

I ask to submit an article from the Business News New Jersey that better outlines Hugo Neu's efforts on behalf of the environment.

[From the Business News New Jersey, Jersey City, N.J., June 5, 2001]

SCRAPPING OLD WAYS AND LOOK FOR NEW ONES

(By Geeta Sundaramoorthy)

John Neu and Robert Kelman like to say jokingly that they are still trying to figure out how, after being in the scrap metal recycling business for 40 years, as part owner and general manager, respectively, of Hugo Neu Schnitzer East, one of the biggest scrap dealers in the region, they may only be half joking.

Jersey City-based Hugo Neu buys scrap metal from auto dealers and construction companies, then shreds, processes and ships it to customers for use as raw material in making steel. With international prices of scrap funding to historic lows and costs going up, scrap metal recyclers, including Hugo Neu, are finding it hard to keep the revenue flowing in from their core business.

The company has annual revenues of about $170 million, 225 employees, and handles 1.3 million tons of scrap annually in the New York metro region. It says it is the region's largest exporter of processed scrap.

According to Kelman, in the last 18 months scrap prices have dropped from about $130 per gross ton to less than $80, a 38% falloff.

International demand for scrap has also fallen, says Kelman, who adds that an even bigger hit has been the result of European Union and Russian demand decreased as cheap imports of steel poured in.

International demand for scrap has also fallen, says Kelman, who adds that an even bigger hit has been the result of European Union and Russian demand. It is imperative that we look for new ways to "mine" the waste metal it produces. About 25% of every automobile that is shredded can't be recycled and has to be disposed of at an environmentally approved landfill, an expensive proposition for many recyclers.

Hugo Neu Schnitzer East in 1998—as a 50% joint venture with Schnitzer Steel Industries of Portland, Oregon. It is now Hugo Neu's largest operation, and is run by Kelman, 38, who is Neu's brother-in-law.

Kelman concurs that the scrap business is dusty and noisy and some neighbors have a legitimate gripe about noise. Port Liberty is about 1,000 feet from Hugo Neu's Claremont terminal, an after-bake channel, where the results of that research in the next two years.
