IT IS TIME TO PASS A REAL PATIENTS’ BILL OF RIGHTS

(Mr. DAVIS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAVIS of Illinois. Mr. Speaker, emergency room nurses are in town, and I commend and congratulate them for the outstanding work they do. This is also a great time to pass a real Patients’ Bill of Rights, one like the Ganske-Dingell bill that ensures that medical decisions come before business decisions, one that ensures that doctors and patients and nurses have the opportunity to decide what kind of treatment there ought to be. It ensures that external review of individuals who do not have a self-interest are the ones making the decisions and recommendations.

Mr. Speaker, it is not like the bill that was introduced yesterday, that allows HMOs to do their own reviewing, to have their own internal reviews to determine whether or not what they are doing is good and right. That is like having the fox guard the chicken house.

Mr. Speaker, if we want to be real, we will pass the Ganske-Dingell bill for real patients’ rights.

AMERICA HAS RESPONSIBILITY TO MEET MORE OF OUR OWN ENERGY NEEDS

(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, even though President Bush inherited the energy problem, I appreciate that he is shooting straight with the American people about what it will take to have reliable, affordable and environmentally clean energy for our country.

America, we do have the responsibility to meet more of our own energy needs. Common sense tells us we will need a balanced game plan based on conservation, on new technology and new supply. There are no shortcuts, no Band-Aids, no steps that we can skip.

The discharge petition Members see today is, more Hollywood theatrics, more Band-Aids, and we simply cannot afford it. If we work together, Republican and Democrat, CEO and environmentalist, we are capable, and we can achieve energy independence.

Mr. Speaker, this issue is more than economics, it is one of national security. As long as America relies on OPEC and foreign countries for more than half of our daily energy needs, we are vulnerable. And there is no need why the most prosperous Nation in the world cannot take responsibility for our own energy needs. It is time for America to take responsibility for America’s energy.

THE PHARMACEUTICAL INDUSTRY IS AT IT AGAIN

(Mr. SANDERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SANDERS. Mr. Speaker, the pharmaceutical industry is at it again. This industry, which has spent $200 million in the last 3 years to defeat all efforts to limit the cost of prescription drugs, this industry which has 300 paid lobbyists here on Capitol Hill, continues to charge the American people by far the highest prices in the world for the same exact prescription drugs.

Mr. Speaker, American women should not have to go over the Canadian border to buy tamoxifen, a breast cancer drug, for one-tenth the price that it is charged in the United States. Seniors should not have to go to Mexico or Europe to pick up the same drugs for a fraction of the price.

Mr. Speaker, in a globalized economy, prescription drug distributors and pharmacists should be able to purchase and sell FDA safety-approved medicines at the same prices as in other countries. The passage of reimportation will lower the cost of medicine in this country by 30 to 50 percent. Let us pass the Sanders-Crowley-DeLauro amendment in the agriculture appropriations bill, which will allow Americans to get fair prices for their prescription drugs.

AMERICA NEEDS TO BE NET EXPORTER OF POWER, NOT NET IMPORTER

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, to my colleagues out West, I want to remind them the best way to get to a most efficient market is allow the market to work. If this country wants low-cost, reliable electricity, we must have a diverse energy portfolio. We must have coal, nuclear, hydro, renewables, and expand our base load generating capacity. If we want low-cost fuel, we need to drill for it and transport it and refine it. States need to be net exporters, not net importers of power generation. Our country needs to be a net exporter of power, not a net importer of power.

Mr. Speaker, I applaud the State of Illinois and Governor Ryan for passing and signing the Empower Illinois Act, which will incentivize clean coal technology and generation in southern Illinois, and I applaud my colleague, the gentleman from Virginia (Mr. Bouché) and the gentleman from Kentucky (Mr. Whitfield), and support the Energy and Commerce Committee with a national energy policy, that we will push through the Committee on Energy and Commerce on the floor of Congress later on this fall.

OBLIGATIONS TO SOLVE ENERGY PROBLEMS

(Mr. HAYWORTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYWORTH. Mr. Speaker, if we could harness some of the wind power this morning, we could solve our energy problem. If we could take the blame game and convert it to Btus, we would have energy to last for a long time.

Mr. Speaker, we ought to bring in a lot of different people and put them under oath in front of the Committee on Resources, in front of our various oversight committees, and get the answer. I do not countenance any misconduct by anyone, but I will tell you what is interesting: when the Governor of California had a chance to put emergency generators online, he said, Oh, no. If those folks are not going to be union employees, I do not want to see those generators.

When the Governor of California had a chance to work out these problems, he took $1 million from the same utility companies my friend from Oregon
