AMERICA HAS RESPONSIBILITY TO MEET MORE OF OUR OWN ENERGY NEEDS

(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, even though President Bush inherited the energy problem, I appreciate that he is shooting straight with the American people about what it will take to have reliable, affordable and environmentally clean energy for our country.

America, we do have the responsibility to meet more of our own energy needs. Common sense tells us we will need a balanced game plan based on conservation, on new technology and new supply. There are no shortcuts, no Band-Aids, no steps that we can skip.

The discharge petition Members see today is more Hollywood theatrics, more Band-Aids, and we simply cannot afford it. If we work together, Republican and Democrat, CEO and environmentalist, we are capable, and we can achieve energy independence.

Mr. Speaker, this issue is more than economics; it is one of national security. As long as America relies on OPEC and foreign countries for more than half of our daily energy needs, we are vulnerable. And there is no need why the most prosperous Nation in the world cannot take responsibility for our own energy needs. It is time for America to take responsibility for America’s energy.

THE PHARMACEUTICAL INDUSTRY IS AT IT AGAIN

(Mr. SANDERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SANDERS. Mr. Speaker, the pharmaceutical industry is at it again. This industry which has spent $200 million in the last 3 years to defeat all efforts to lower the cost of prescription drugs, this industry which has 300 paid lobbyists here on Capitol Hill, continues to charge the American people by far the highest prices in the world for the same exact prescription drugs.

Mr. Speaker, American women should not have to go over the Canadian border to buy tamoxifen, a breast cancer drug, for one-tenth the price that it is charged in the United States. Seniors should not have to go to Mexico or Europe to pick up the same drugs for a fraction of the price.

Mr. Speaker, in a globalized economy, prescription drug distributors and pharmacists should be able to purchase and sell FDA safety-approved medicines at the same prices as in other countries. The passage of reimportation will lower the cost of medicine in this country by 30 to 50 percent. Let us pass the Sanders-Crowley-DeLauro amendment in the agriculture appropriations bill, which will allow Americans to get fair prices for their prescription drugs.

AMERICA NEEDS TO BE NET ExportER OF POWER, NOT NET ImPOrTER

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, to my colleagues out West, I want to remind them the best way to get to a most efficient market is allow the market to work. If this country wants low-cost, reliable electricity, we must have a diverse energy portfolio. We must have coal, nuclear, hydro, renewables, and expand our base load generating capacity. If we want low-cost fuel, we need to drill for it and transport it and refine it. States need to be net exporters, not net importers of power generation. Our country needs to be a net exporter of power, not a net importer of power.

Mr. Speaker, I applaud the State of Illinois and Governor Ryan for passing the Empower Illinois Act, which will incentivize clean coal technology and generation in southern Illinois, and I applaud my colleague, the gentleman from Virginia (Mr. Bouché) and the gentleman from Kentucky (Mr. Whitfield), and support the Need for Energy and Commerce on the floor of the House later on this fall.

CONGRESS NEEDS TO TAKE A STAND AGAINST PRICE GOUGING

(Mr. DeFAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DeFAZIO. Mr. Speaker, from the other side of the aisle we hear platitudes about choice, which consumers do not want, and competition, which does not exist. For months, the mounting evidence of manipulation in the energy markets has been piling up and piling up while the Bush administration, and their hand-picked appointees to the Federal Energy Regulatory Commission, have taken a hands-off attitude.

The reaction on that side of the aisle is, oh, let us not make this a partisan issue. Oh, let us be nice.

Mr. Speaker, consumers are being fleeced. It is time for real action. Sign the discharge petition, and this Congress will take a stand for consumers against the price gouging.  

SOLVING ENERGY PROBLEMS

(Mr. HAYWORTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYWORTH. Mr. Speaker, if we could harness some of the wind power this morning, we could solve our energy problem. If we could take the blame game and convert it to Btus, we would have energy to last for a long time.

Mr. Speaker, we ought to bring in a lot of different people and put them under oath in front of the Committee on Resources, in front of our various oversight committees, and get the answer. I do not countenance any misconduct by anyone, but I will tell you what is interesting: when the Governor of California had a chance to put emergency generators online, he said, Oh, no. If those folks are not going to be union employees, I do not want to see them generate.

When the Governor of California had a chance to work out these problems, he took $1 million from the same utility companies my friend from Oregon
