HIV/AIDS, we must also focus our attention on the Caribbean, as the second largest population to become infected with this devastating disease. As you can see from the front pages of the Washington Post on June 19, 2001, for those who may have missed it, I submit it for the record.

Two-thirds of all those diagnosed with the AIDS virus in the Caribbean are dead within two years. What is even more outrageous is that AIDS is the leading cause of death in the Caribbean for those aged 15 to 45 and the numbers are growing.

About one in every 50 people in the Caribbean, or 2% of the population has AIDS or is infected with HIV, the virus which causes AIDS; more than 4% in the Bahamas, and 13% among urban adults in Haiti.

The UN estimates that there were 9,600 children infected in the Caribbean. Further, the Caribbean Epidemiology Centre (CAREC) as well estimates that the overall child mortality rate will increase 60% by 2010 if treatment is not improved.

Clearly, there is a need not only for the United States government's assistance but also for those major private foundations that provide AIDS money for Africa to also develop programs that will come to the aid of those in the Caribbean.

I proudly commend Congresswoman Donna Christensen and her efforts to raise awareness in the community, as this disease is kept silent. I also commend the government of the Bahamas as being the only country in the region that has offered universal antiretroviral treatment over the last several years.

While we simply take medical services and treatment for granted in this country, as the number of AIDS cases decreases per year in North America and increases in the Caribbean; it is our obligation to help provide assistance to these governments in order for them to provide a simple service to their people, enabling them to live prosperous and healthy lives.

ACKNOWLEDGING ALL THOSE SUFFERING WITH THE DEADLY DISEASE OF HIV/AIDS IN THE CARIBBEAN

HON. CHARLES B. RANGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 28, 2001

Mr. RANGEL. Mr. Speaker, while we take into account the millions who die each year in Africa from this deadly disease we know as
