

JUNIOR ACHIEVEMENT

HON. JOEL HEFLEY

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HEFLEY. Mr. Speaker, I rise to speak today about an organization, which is headquartered in my district and has had an immeasurable impact on America. The history of Junior Achievement is a true testament to the indelible human spirit and American ingenuity. Junior Achievement was founded in 1919 as a collection of small, after-school business clubs for students in Springfield, Massachusetts.

As the rural-to-city exodus of the populace accelerated in the early 1900s, so too did the demand for workforce preparation and entrepreneurship. Junior Achievement students were taught how to think and plan for a business, acquire supplies and talent, build their own products, advertise, and sell. With the financial support of companies and individuals, Junior Achievement recruited numerous sponsoring agencies such as the New England Rotarians, Boy Scouts, Girl Scouts, Boys & Girls Clubs the YMCA, local churches, playground associations and schools to provide meeting places for its growing ranks of interested students.

In a few short years JA students were competing in regional expositions and trade fairs and rubbing elbows with top business leaders. In 1925, President Calvin Coolidge hosted a reception on the White House lawn to kick off a national fundraising drive for Junior Achievement's expansion. By the late 1920s, there were nearly 800 JA Clubs with some 9,000 Achievers in 13 cities in Massachusetts, New York, Rhode Island, and Connecticut.

During World War II, enterprising students in JA business clubs used their ingenuity to find new and different products for the war effort. In Chicago, JA students won a contract to manufacture 10,000 pants hangers for the U.S. Army. In Pittsburgh, JA students developed a specially lined box to carry off incendiary devices, which was approved by the Civil Defense and sold locally. Elsewhere, JA students made baby incubators and used acetylene torches in abandoned locomotive yards to obtain badly needed scrap iron.

In the 1940s, leading executives of the day such as S. Bayard Colgate, James Cash Penney, Joseph Sprang of Gillette and others helped the organization grow rapidly. Stories of Junior Achievement's accomplishments and of its students soon appeared in national magazines of the day such as TIME, Young America, Colliers, LIFE, the Ladies Home Journal and Liberty.

In the 1950s, Junior Achievement began working more closely with schools and saw its growth increase five-fold. In 1955, President Eisenhower declared the week of January 30 to February 5 as "National Junior Achievement Week." At this point, Junior Achievement was operating in 139 cities and in most of the 50 states. During its first 45 years of existence, Junior Achievement enjoyed an average annual growth rate of 45 percent.

To further connect students to influential figures in business, economics, and history, Jun-

ior Achievement started the Junior Achievement National Business Hall of Fame in 1975 to recognize outstanding leaders. Each year, a number of business leaders are recognized for their contribution to the business industry and for their dedication to the Junior Achievement experience. Today, there are 200 laureates from a variety of businesses and industries that grace the Hall of Fame.

By 1982, Junior Achievement's formal curricula offering had expanded to Applied Economics (now called JA Economics), Project Business, and Business Basics. In 1988, more than one million students per year were estimated to take part in Junior Achievement programs. In the early 1990s, a sequential curriculum for grades K-6 was launched, catapulting the organization into the classrooms of another one million elementary school students.

Today, through the efforts of more than 100,000 volunteers in the classrooms of America, Junior Achievement reaches more than four million students in grades K-12 per year. JA International takes the free enterprise message of hope and opportunity even further . . . to more than 1.5 million students in 111 countries. Junior Achievement has been an influential part of many of today's successful entrepreneurs and business leaders. Junior Achievement's success is truly the story of America—the fact that one idea can influence and benefit many lives.

Mr. Speaker, I am proud to have Junior Achievement in my district and proud of its many successes over the years. It is my hope this great organization continues to prosper and benefit many in the years to come.

FHA-INSURED HOSPITAL CONVERSION AND REINVESTMENT ACT

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. LaFALCE. Mr. Speaker, today I am introducing the "FHA-insured Hospital Conversion and Reinvestment Act." This legislation authorizes HUD to reinvest profits from FHA loan insurance programs, including those for health care, in FHA-insured hospitals.

The Department of Housing and Urban Development (HUD) insures billions of dollars of loans for hospitals under the FHA Section 242 hospital loan program. According to the Administration's fiscal year 2002 budget, FHA hospital and health care loan insurance programs are projected to make a profit for federal taxpayers of some \$32 million next year. In addition, all FHA loan programs combined will make a profit of over \$2.7 billion next year for the federal taxpayer.

Currently, all of these FHA profits are used to increase the federal budget surplus. The legislation I am introducing today would authorize HUD to use some of these profits generated by FHA to pro-actively assist FRA-insured hospitals, either for the purpose of converting excess hospital capacity to related health care use or for the purpose of paying debt service for FHA-insured hospitals.

Conversion of excess capacity helps the hospital which converts and the community it

serves. It allows better use of hospital space in a way that is more responsive to the needs of the local community. Conversion also improves the ability of all hospitals in the local area to meet community health needs by reducing over-capacity and allowing some flexibility in the use to which the existing infrastructure can be put. Under my proposed legislation, conversion of excess hospital capacity is authorized for a range of purposes, including supportive housing for the elderly, assisted living, and nursing home beds—health care needs that may be more substantial for many communities than in-hospital care.

The authority under by legislation to use FHA surplus to pay debt service for FHA-insured hospitals is intended to safeguard FHA's pre-existing investment. Such use is contingent on a determination by HUD that such assistance would reduce the risk of default and loss on the FHA-insured loan, and would improve the financial soundness of the hospital assisted. This new authority has the effect of giving HUD similar loss mitigation tools to those it currently has with respect to single-family and multi-family FHA-insured loans.

Congress has long recognized that pro-active loss mitigation is of financial benefit to the FHA insurance fund. For example, HUD gives wide latitude to servicers of FHA-insured single-family loans to restructure debt, including making partial claims, in order to forestall foreclosures. This can be financially advantageous to the FHA fund, since foreclosures typically create a much larger loss to the fund.

The ability to conduct loss mitigation with respect to hospital loans is further complicated by the fact that many FHA-insured hospital loans are structured as public bond offerings. This makes it very difficult to restructure loans, without calling the bonds. Allowing HUD to advance funds to pay debt service obviates the need to call bonds, while allowing HUD to pro-actively address looming financial problems, and avert foreclosure.

This legislation would help FHA-insured hospitals nationwide, but would be of particular benefit to hospitals within the state of New York, which has one of the highest percentages of FHA-insured hospitals nationwide.

Hospitals within our state have adapted to a wide range of challenges, including Medicare cuts, squeezed reimbursement rates from private insurers, and the transition to a de-regulated environment. Community hospitals, with their lack of access to capital, face particular challenges. The least we can do is reinvest profits from federal hospital loans in the hospitals which have generated these profits.

This legislation does precisely that. I urge Congress to adopt it and would welcome the support of my colleagues.

TRIBUTE TO LIMERICK TOWNSHIP

HON. JOSEPH M. HOEFFEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 28, 2001

Mr. HOEFFEL. Mr. Speaker, I rise today to congratulate Limerick Township in Montgomery County, Pennsylvania on its 275th Anniversary. Native Americans of the Delaware
