and I would like to for a couple of minutes discuss, number one, the seriousness of the agricultural problem; but, secondly, the policies that we have tomorrow that deals with how we distribute some of this Federal money to farmers.

There are a lot of us that would hope that these extra funds go to help support the traditional family farmers in this country. However, our farm programs since we started them back in 1934 have tended to favor the large farmer. And so what has happened over the years is the small farmer has been forced out because of the advantages of Federal farm policy to the middle-sized and larger farmer; and the middle-sized farmer, figuring that they might survive, have bought out the small farmer and become bigger.

Specifically, we have legislation that says the price support for farmers in this country through the Federal Government should be limited to $75,000. If a farmer wants to include their spouse or usually their wife for a separate producer payment, then they have to jump through all kinds of hoops to borrow money in the spouse’s name and then document that it was invested in the farm operation, then the farm operation can pay it back. It is a disadvantage.

My amendment tomorrow does essentially three things: it says automatically the wife is included as a producer without jumping through these bureaucratic hoops, eligible for an additional $75,000 payment limitation. The average size of a farm in this country now, Mr. Speaker, is about 448 acres. But some farms, some huge, giant corporation-type farms are up to 80,000 acres and 100,000 acres; and there is no payment limitation on those farms. So as you can see millions of dollars go out to those huge farming operations.

My amendment tomorrow says that we stick to our guns of the historic $75,000 limitation but automatically include spouses. That would move it up to $150,000. And let us make sure that there is no loophole such as forfeiting a nonrecourse loan or such as certificates that can be issued by the Federal Government in lieu of forfeiture of that particular loan, because those certificates, the alternative of those forfeitures of that loan, has resulted in approximately $400 million extra payment going to those giant farmers.

Mr. Speaker, I request that my colleagues look at this amendment, that we face the decision of what should the farm programs try to do in this country; and I would suggest humbly that part of what we should be trying to do is help the smaller family farmers. The large farmer already has a competitive advantage, simply because of the size of their operation. We expand that advantage as we pay them on the bushels produced on each acre or the tons produced. Whether it is rice or corn or soybeans or cotton, we help that large farmer.

I feel it is important that we look at this policy, and I would request that my colleagues look at my amendment that will reaffirm the historical provision of limiting those payments to $75,000 rather than the $150,000 per producer that was passed out on a suspension vote late in June when the House went through that particular legislation without the opportunity for any amendments.

ELECTRICITY CRISIS IN CALIFORNIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. FILNER) is recognized for 5 minutes.

Mr. FILNER. Mr. Speaker, the electricity crisis continues 1 year later in San Diego, in California and the West. Scores of businesses in my hometown of San Diego have closed up shop, because the lights were off, at a time when elevators had people stuck in them. Yet the biggest generator in our county was turned off, as I said, not by the need of California or of San Diego, but by the price that could be gotten. So Duke Energy has stolen $800 million from the citizens of San Diego and of California. They have charged up to $4,000 a megawatt hour for something that cost $30 only a year ago. That, Mr. Speaker, is not the free enterprise system at work; that is stealing from people who could not afford the cost.

Now, to add insult to injury, Mr. Speaker, that theft took place from a power plant which the citizens of San Diego own. Yes, Mr. Speaker, we own that plant through the San Diego Unified Port District, a public agency; and that public agency, at very, very good terms for the lessee, leased the plant to this Duke Energy Corporation to operate, as the lease says, in the public interest. Well, that lease has not been operated in the public interest. That lease has allowed Duke Energy Corporation to steal hundreds of millions of dollars from the people of San Diego.

Mr. Speaker, since the public owns the South Bay Power Plant, I call upon the San Diego Unified Port District to take back that plant and to operate the lease in the public interest.

IN MEMORY OF SANDY POLICE CHIEF SAM DAWSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. MATHESON) is recognized for 5 minutes.

Mr. MATHESON. Mr. Speaker, it is with great sadness that I come before the House today to memorialize the death of Police Chief Sam Dawson of Sandy, Utah. Chief Dawson, who served faithfully for 7 years as the head of the police department of Utah’s fourth largest city, passed away July 2, 2001, doing what he loved best, riding his Harley-Davidson motorcycle.

Chief Dawson lived up to the sign he had on his desk that said, “Lead, follow, or get out of the way.” Chief Dawson was a leader for 30 years in Utah law enforcement. He started as a Salt Lake County sheriff’s deputy in 1971. He became the chief police investigator for the Salt Lake County attorney’s office after that and became the head of Sandy City’s police department in 1994.
