SEC. 1. AMENDMENTS TO H.R. 2217;

(a) FUNDINGS.—Congress finds that—

(1) the United States continues to be reliant on fossil fuels (including crude oil and natural gas) as a source of most of the energy consumed in the country;

(2) this reliance is likely to continue for the foreseeable future;

(3) about 65 percent of the energy needs of the United States are supplied by oil and natural gas;

(4) the United States is becoming increasingly reliant on clean-burning natural gas for electricity generation, home heating and air conditioning, agricultural needs, and essential chemical processes;

(5) a large portion of the remaining crude oil and natural gas resources of the country are on Federal land located in the western United States, in Alaska, and off the coastline of the United States;

(6) the Gulf of Mexico has proven to be a significant source of oil and natural gas and is predicted to remain a significant source in the immediate future;

(7) many States and counties oppose the development of Federal crude oil and natural gas resources within or near the coastline, which opposition results in congressional, Executive, State, or local policies to prevent the development of those resources;

(8) actions that prevent the development of certain Federal crude oil and natural gas resources do not lessen the energy needs of the United States or of those States and counties that object to exploration and development for fossil fuels;

(b) SENSE OF CONGRESS.—It is the sense of Congress that Congress should provide a significant portion of the Federal offshore mineral revenues to coastal States that permit the development of Federal mineral resources located offshore, that authorizes the sharing of a portion of the annual revenues generated from Federal offshore crude oil and natural gas resources with adjacent coastal States that—

(A) serve as the platform for that development;

(B) suffer adverse effects on the environment and infrastructure of the States.
