WALK FAR FOR NATIONAL ALLIANCE FOR AUTISM RESEARCH

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, these posters portray two beautiful, happy children, Bonnie and Willis Flick. With these pictures do not portray is that Bonnie and Willis cannot effectively communicate with their parents or their playmates because they live with autism.

In recent years autism has risen dramatically across our Nation, and although it typically affects 1 in every 500 children, in my hometown of Miami-Dade County, the rate of autism in young children has jumped to about 1 in every 256.

On Saturday, November 3, I will participate in Walk Far for NAAR, the National Alliance for Autism Research. This will raise funds for research projects and fellowships to fight this devastating disorder.

I ask my colleagues to join me in congratulating the chair of this year's walkathon, Patricia Cambo, and the co-chairs, Rene Vega and Dr. Michael Alessandri, as well as last year's co-chairs, Michelle Cruz and Marie Irene Whitehurst.

Due to the success of Walk Far, the National Alliance for Autism Research more than doubled its level of funding for this year, and we hold promise that a cure for autism is just around the bend for Bonnie and Willis Flick and many other children with autism.

SUPPORT USE OF FEDERAL FUNDS FOR STEM CELL RESEARCH

(Ms. DeGETTE asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DeGETTE. Mr. Speaker, why should we use Federal money for embryonic stem cell research? While it is a difficult medical-ethical decision to make sure we put controls in place, embryonic stem cell research promises new breakthroughs in science that will help literally tens of millions of Americans.

There are three reasons why we need to make sure this research is federally funded and federally supervised. First, medical breakthroughs of underestimated value are available through funding of this research. A large body of successful work with mouse embryonic stem cells shows these cells are superior to adult stem cells in the development of what may be cures for diabetes, Parkinson's disease, Alzheimer's and other chronic diseases.

Second, Federal funding provide necessary oversight of stem cell research. This is the new frontier, and we need to make sure we keep control of it.

Finally, America has the greatest health, medical and science community in the world. Federal funding will help U.S. scientists keep pace with international researchers. We need to find the cure for diabetes, we need to find the cure for Parkinson's, for Alzheimer's and so many other diseases. Let us keep this research going.

FUND ADULT STEM CELL RESEARCH GENEROSLY

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, we must have stem cell research. Alzheimer's, Parkinson's and diabetes, these are all very serious diseases that have no cures. But our research must be ethical. Adult stem cell research holds the most promise for finding cures.

We should fund adult stem cell research and fund it generously, not embryonic stem cell research. Creating human embryos for research, experimentation, harvesting and destruction is not ethical. Killing one human life, even though very tiny, on the off chance of maybe one day saving another, is not ethical, moral, and I should add, even legal to do with taxpayer money.

Since 1996, our laws ban government funding of research that involves killing human embryos. We should keep that ban. Now we have a study that shows that embryonic stem cells may be too unstable to be of much use anyway, unless they are produced in huge numbers. But there is no such evidence that adult stem cells are unstable.

Adult stem cell research holds great promise. Adult stem cell research promises to help us find cures to diseases that have plagued mankind for centuries. Let us fund adult stem cell research and fund it generously.

CHINA DOES NOT DESERVE TO HOST 2008 OLYMPIC GAMES

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, China has executed 1,781 citizens in the last 90 days. That is more executions than the entire world performed over the last 3 years. China is now even executing citizens for pimping and prostitution. It is getting so bad that Chinese citizens, Chinese lovers, in fact, are afraid to be seen in public. Meanwhile, China says it is necessary to ensure "social stability."

Now, if that is not enough to power surge your electric chair, China is in line to host the 2008 Olympic games.

Beam me up. The Olympic games are designed to be a celebration of life, not death. China does not deserve to host these games.
