

Marrero was credited for cutting back a rash of car thefts that plagued our city in the mid-1990s.

To her friends and family, Marrero will be remembered as a caring person who was always ready to lend a helping hand. In the words of one neighbor, Lois Marrero was "the kind of person you could count on."

For those of us who never had the privilege of getting to know Officer Marrero, it is our duty to remember Lois for the ultimate sacrifice that she made to keep our community safe. This terrible tragedy reminds us that law enforcement officers put their lives on the line every day to protect us and our families, friends and neighbors. In honoring Lois Marrero, we show our gratitude to the entire law enforcement community.

So today, on behalf of the citizens of Tampa Bay, who came together this week in an outpouring of sympathy, prayers and tributes, I thank Officer Marrero and Tampa's Police Department for their commitment to our neighborhoods and I send our deepest sympathies to Lois' family, friends and colleagues for this great loss.

TRIBUTE TO DR. RICHARD W.
MCDOWELL

HON. JOE KNOLLENBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. KNOLLENBERG. Mr. Speaker, today I pay tribute to Dr. Richard W. McDowell, the longest-serving President in Schoolcraft College's history. He will be retiring on June 30, 2001. Dr. McDowell has been a great asset to his students, and served the Michigan educational community with diligence and excellence. In addition to his tenure as president, he has served on numerous educational and commerce boards, including the Livonia Chamber of Commerce, American Association of Community Colleges, and Council of North Central Two-year Colleges.

After completing his tenure as vice-president and acting-president at two community colleges in Pittsburgh and Florida respectively, Richard McDowell joined Schoolcraft College in 1981, and helped guide the college through a 20-year period of academic growth and brilliance. On this end, he achieved high standards in increasing staff development, employee recognition, and provided the necessary direction to establishing the Business Development Center that has generated a billion dollars in grants to various local companies.

The increased funds have enabled Schoolcraft College to be expanded considerably, which has made for a livelier and richer educational environment for students. On May 16th, 2001 the college broke ground on a \$27 million facility that will house a state-of-the-art information technology center, and it's culinary arts department, which is recognized nationally.

Through his dedication and hard work to Schoolcraft College and the Michigan educational community, Dr. McDowell is a prime example of the kind of people that we need

running the affairs of colleges and universities dedicated to providing the best environment and education possible to our students. I congratulate Richard on his fine achievements and wish nothing but the best in his future endeavors.

A TRIBUTE TO KELLY AIR FORCE
BASE

HON. CIRO D. RODRIGUEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. RODRIGUEZ. Mr. Speaker, on Friday, July 13, 2001, after 85 years the flag will be brought down for the final time at Kelly Air Force Base in San Antonio, Texas. In recognition of this momentous occasion I offer the following tribute of Kelly AFB and its lasting legacy to the United States Air Force, the nation, and the San Antonio community.

Seventy-four years after Travis, Crockett and Bowie manned the battlements at the Alamo, a different kind of warrior made his appearance over the South Texas City of San Antonio. He rode on wings of wood and fabric. In January 1910, on orders from Major General James Allen, Chief of the Army Signal Corps, Lieutenant Benjamin Foulois established a flying field at Fort Sam Houston, Texas. Foulois arrived at the Fort with a Wright flyer, the only airplane in the air service. In April 1911, three young Army officers joined Foulois fresh from Glenn Curtiss' Flying School at San Diego. Among them was a thirty-year-old lieutenant from London, England, George Edward Maurice Kelly. Kelly immigrated to America, enlisted in the United States Army and eventually received his citizenship and gained a commission. Volunteering for duty in the Air Service, he trained briefly with Curtis and then joined Foulois at San Antonio. Lieutenant Kelly's aviation career would be short lived. On May 10, 1911, he crashed his Curtis Type-4 Pusher into the brush near Fort Sam Houston's Drill Field. Lieutenant Kelly became the first American military aviator to die in the crash of a military aircraft. Six years later, one of the nation's premier flying fields would bear the name of this brave young aviator.

Lieutenant Kelly's death caused the Commander at Fort Sam Houston to call a halt to flying at the Post. Aviation didn't return to the Alamo City until November 1915, when the First Aero Squadron arrived from Fort Sill, Oklahoma. It did not stay long. In March 1916, the Mexican Revolutionary leader, Pancho Villa, attacked Columbus, New Mexico, and the First Aero Squadron, commanded by Foulois, joined a punitive expedition commanded by General John J. Pershing. Within months all its few aircraft were grounded. With World War I raging in Europe, it was clear that American military aviation needed to expand. Foulois, now a major, was called upon to form new squadrons and find a training site. In November 1916, he returned once again to San Antonio. Lacking space to expand at Fort Sam Houston, Foulois looked for another site for an aviation camp, choosing a 700-acre track of land southwest of San Antonio. The land was

leased in January 1917. What was once cotton, cabbage, mesquite and cactus, was overrun with men and machines clearing the way for a landing field. On April 5th 1917, the first four planes slid out of the sky to land at the new field. The United States entered World War I the next day. Named Kelly Field in July, the new field was seen training aviators, mechanics, and support personnel destined for duty in France. Within 18 months, Kelly was the largest aviation training, classification and reception center in the United States. With the end of the war to end all wars, Kelly Field was consumed by the lethargy that follows most armed conflicts. The United States adopted an isolationist attitude and military aviation lapsed into a period of near hibernation. Aircraft that has been built for war were now turned to barnstorming and amusement. Throughout the nation aviation camps and depots were closing, but at Kelly Field the pace had merely slowed not stopped. For a time, all the active flying groups were stationed at Kelly. Then in 1922, the Air Service restructured its training program, making Kelly home to the Air Service Advanced Flying School. For the next two decades, Kelly would become famous as the alma mater of the Air Corps. during these years, some of aviation's greatest names pressed the rudder pedals of Kelly trainers. Early graduates of the Advanced Flying School include "long eagle" Charles Lindbergh; General Curtis LeMay, cigar chopping advocate of strategic air power; and future Air Force Chiefs of Staff Hoyt S. Vandenberg, Thomas D. White, John McConnell and George S. Brown.

With the acquisition of more land west of Frio City Road in 1917, Kelly Field was divided into two areas, Kelly Number 1 and Kelly Number 2. While Kelly Number 2 was busy turning out dashing aviators, Kelly Number 1, renamed Duncan Field in 1925, was engaged in a less glamorous task of aviation supply and maintenance. This humble stepchild spawned out of necessity would eventually thrive and go on to become an Air Force logistical giant. By 1935, most world powers were struggling to free themselves from the grip of worldwide depression. In Germany, Adolph Hitler had seized the reigns of power. On the other side of the globe, Japan was running rampant through Manchuria. The clouds of depression were clearing, but clouds of war were rapidly taking their place. Aircrew training at Kelly was stepped up; courses were conducted in nearly every form of military aviation including attack, pursuit, observation and bombardment. Paved runways and permanent facilities sprouted throughout the installation. When Japanese bombs rained on Pearl Harbor on December 7th, 1941, Kelly Field was ready to take its place as a major cog in America's war machine. Midway through World War II, Kelly's logistical role came to the forefront. Pilot training moved to Randolph and other new airfields while an organization known as the San Antonio Air Service Command sought to repair and supply the nation's aerial fighting force. In two short years, the workforce expanded from 1,000 to over 20,000. Many were women, Kelly Katies, the Kelly equivalent of Rosie the Riveter. Peace came in August 1945. Kelly Katy went home. The base paused, caught its breath, and then

put itself to the task of supporting the most powerful Air Force in the world. One September 18, 1947, president Harry S. Truman signed the national Security Act. Among the articles contained in this legislation was one establishing the Air Force as an independent military service. Duncan Field and Camp Normoyle had been absorbed during World War II, and in January 1948, the field became Kelly Air Force Base. Within a year, the base would once more respond to an international challenge. The Russian bear was putting paw prints all over Eastern Europe. When the Soviets attempted to slam the door on West Berlin, allied air power came to its rescue. Kelly engine maintenance shops operated night and day. Pratt and Whitney R2000 engines rolled off the production lines destined for installation on C-54 aircraft flying the Berlin Airlift. The Russian bear hug on Berlin was broken after 11-months of Herculean effort by crews, aircraft and dedicated support by San Antonio Air Materiel Area workers. Less than a year later, the outbreak of the Korean War dropped the temperature of Cold War even further. Kelly personnel labored around the clock to prepare B-9 bombers and Mustang fighters for service overseas. The outdoor lighting lit up the sky at night and became famous as San Antonio's "Great White Way". Nuclear deterrent was the "watch word" and Kelly's people worked in support of the intercontinental B-36 bomber, the first capable of flying anywhere in the world, dropping its nuclear payload and returning home. Its Pratt and Whitney R4360 engines monopolized Kelly's overhaul facilities for over a decade. A proud yet poignant story revolves around the cargo version of the B-36. The XC-99 transport was the largest cargo aircraft ever built until the advent of the massive C-5A. The huge bird nested at Kelly and from this base of operations set numerous cargo hauling records, but logistics theorists at the time balked at having too many eggs in one basket. Cost of maintaining this one-of-a-kind aircraft grew prohibitive. It not sits next to Kelly's runway; silently watching the C-5s fly the role it pioneered.

In the early '50s, propeller whine was replaced by jet roar. Boeing B-47s, first operational all jet strategic bombers, began to line Kelly ramps awaiting their turn to pass through the overhaul and modification lines in building 375, at that time the world's largest hangar. They would be followed by a succession of aerial armament including the B-58 Hustler, the F-102 Delta Dagger, and now the venerable B-52 Stratofortress. For over forty-five years the B-52 filled the role of manned strategic bombers; and for thirty-six of those years, the San Antonio Air Materiel Area and its successor, the San Antonio Air Logistics Center, strengthened its airframe and modified its offensive and defensive capabilities. In January 1970, a cavern with wings shared the maintenance area with the camouflaged B-52s. It is the world's largest aircraft, the Lockheed C-5. This enormous cargo and troop carrier, longer than the area covered by the Wright brothers' first flight, was the most ambitious workload ever assumed by this or any other Air Logistics Center. From the tip of its liftable nose, to the top of its five-story tail, the C-5 was a Kelly management responsibility

for over 35 years. Less visible was the vital support given to other aircraft and weapon systems. Kelly personnel managed over half of the Air Force engine inventory, repairing and managing the C-5's TF39 engine and the F100 engine, which powers the F-15 and F-16 aircraft. Kelly personnel also managed engines for the T-37 and T-38 trainers, the A-10 Attack aircraft and C-130 transport. Other members of the Kelly team manage all the fuel used by the Air Force and NASA and monitor all Air Force nuclear weaponry.

Although the Berlin Wall came down in 1989, Kelly AFB remained a vital part of American defense of freedom. During Operation JUST CAUSE in December 1989, Kelly was a staging area for troops on their way to Panama and was a reception point for wounded Americans. Less than a year later Kelly's people worked 24-hour days in support of American and Allied efforts to drive Iraqi invaders from Kuwait in Operations DESERT SHIELD/DESERT STORM. By March 1991, Kelly had sent nine million pounds of munitions to the theatre of operations along with 7,400 tons of other supplies and 4,700 passengers. In April 1999, Kelly employees again were called upon to perform their "logistical magic." Engines were surged to support NATO's efforts to end brutal ethnic cleansing in Kosovo.

Even before the end of the Cold War, America's military services saw their budgets grow smaller, and by the early 1990s, people expected to see a "peace dividend" to help reduce the budget deficit and pay for soaring costs of social services. Continuing efforts to cut defense spending by relocating some missions and closing some bases put Kelly and the San Antonio Air Logistics Center at risk. In May 1993, the Base Realignment and Closure Commission added the San Antonio ALC and three other air logistics centers to its list of places to consider for closure. While Kelly escaped the bullet in 1993, it did not do so again. In 1995 the BRAC was determined to close one, or possibly, two of the Air Force's giant depots. Once again, the city and the base marshaled its forces to persuade the commission that this depot was too important to close. Despite heroic efforts, on June 22, 1995, the commission voted first to close the Sacramento ALC at McClellan AFB in California and then voted to close the San Antonio ALC and realign Kelly AFB west of the landing strip to the adjoining Lackland AFB. The ALC would close July 31, 2001.

The center had the maximum of six years to relocate its missions and turn over a going concern to the city's redevelopment authority. Center officials used three guiding principles in its planning: the first was continued support to maintain Air Force readiness; the second was taking care of the Kelly work force; and finally, minimizing the impact on the San Antonio Community.

Both the city and the Air Logistics Center were determined to make this transition a success. Kelly created the Privatization and Realignment Directorate, headed by Tommy Jordan, to handle the Air Force side of the operation. The city created the Greater Kelly Development Corporation (later Authority) to carry out the strategies and plans to redevelop the base. The group went right to work, sign-

ing its first lease for a portion of East Kelly to Rail Car Texas for a rail car repair facility. Less than a month later, aircraft engine giant Pratt & Whitney signed a lease to perform upgrades on the F100 engines. And in November 1997, Ryder International Logistics, Inc. signed a lease for warehouse space.

However, the dream to keep all of the Center's workload at Kelly never materialized. The Air Force ran public-private competitions for Kelly's workload. The first went to another ALC. In September 1997, the Air Force announced that Warner Robins ALC won the C-5 depot maintenance contract. Only 200 Kelly workers moved to the Georgia base, but thousands upon thousands of pounds of equipment necessary for C-5 maintenance were loaded on 18-wheelers for the trek to south Georgia. Over the next year, as workers finished maintenance on the C-5s, Kelly's giant aircraft hangar got emptier and emptier. On 15 September 1998, the last C-5 to undergo PDM at Kelly lifted off the runway, ending nearly eight decades of aircraft depot maintenance.

But building 375 didn't remain empty for long. On 20 February 1998, representatives from Boeing, GKDC, and the city of San Antonio signed letters of intent for the lease of five buildings. Workloads at the new Boeing Aerospace Support Center included C-17s, KC-10s and KC-135s for the Air Force and MD-10s for commercial companies like Federal Express. By May 1999, this new center had over 1,300 employees with prospects of more workload and more workers every day.

Kelly's other large workload, the Propulsion Business Area, went on the bidding block in March 1998. In February 1999, the Air Force announced that Oklahoma City ALC and its bidding partner Lockheed Martin had won the contract. The news for Kelly and San Antonio was not all bad, however. Early on, Oklahoma City ALC announced it was only interested in Kelly's F100 workload, which left in December 1999. Work on the TF39 and T56 engines, and about 1,400 former Kelly federal workers, would stay at Kelly in building 360 under contract with Lockheed.

The rest of Kelly's depot maintenance workload, automatic test equipment, gas turbine engines, and ICBM reentry vehicles for example, moved to the other ALCs between 1997 and 2000. The remaining three ALCs picked up Kelly's materiel management responsibilities beginning with ICBM reentry vehicle items in August 1997 and ending with secondary power systems in June 2001. In the intervening four years, millions of pounds of equipment needed to perform Kelly's various missions left the base for their new homes across the country.

Kelly's remaining base operating support transitioned to Lackland AFB, beginning with the 76th Medical Group in October 1999. The final realignment of base support and Kelly's major tenant units to Lackland was completed by April 2001. Meanwhile, the GKDA's vision of a "new Kelly" had taken off. The city-appointed authority renamed the base KellyUSA as a way to convey the nonmilitary focus of the burgeoning 2,000-acre industrial and commercial park. By 2000, GKDA was already well on its way to its goal of replacing the civil service jobs lost at Kelly.

Although the flag came down on the San Antonio Air Logistics Center on July 13, 2001, it was not the end of Kelly's story. Kelly's legacy will live on for generations. Kelly was a place where people from all backgrounds came together to roll up their sleeves and work for a united cause—our country's freedom. For 85 years Kelly AFB made major contributions to the military strength of the United States and the prosperity of San Antonio. Kelly was the largest single employer in San Antonio and South Texas for over 50 years, and year-after-year Kelly was the largest contributor to the Combined Federal Campaign within the city. Kelly was a place where the workers prospered, purchased better homes, and provided family members the resources to pursue more education and more opportunities. Kelly Field provided tens of thousands of civil service jobs, and was the birth and backbone of the Hispanic middle class in the Alamo City. Generations of Hispanic families were employed at Kelly throughout its history, and, today many of the city business leaders and even congressional members have their roots as Kelly families.

For decades the men and women of Kelly AFB dedicated their hearts and lives to the service of their country. From its beginnings as a farmer's cotton field in 1916, Kelly became the largest recruit and aviation training camp in the United States during World War I. In the interwar years, Kelly served as the Alma Mata of the Air Corps while its neighbor Duncan Field provided repair and supply support for America's small air arm.

Following World War I, Kelly became one of the country's largest logistical supermarkets, supporting the Air Force around the globe. During the most recent conflicts of JUST CAUSE, DESERT SHIELD/DESERT STORM, and Kosovo, the Kelly employees had the greatest logistical support of all the ALCS, shipping more components, more engines, and more munitions. From the beginning of Kelly Field to the end of the San Antonio Air Logistics Center, the logistical impact and support of Kelly and its employees were vital for the United States to be successful in completing the mission. Today, Kelly transitions again, becoming KellyUSA, an industrial, commercial park for the 21st century. But, throughout this tradition of service remains and will continue to be—Kelly Forever!

HONORING EDWARD PAELTZ

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. SHIMKUS. Mr. Speaker, I rise today to honor Mr. Edward Paeltz of Godfrey, Illinois. Mr. Paeltz is a veteran of World War II and was recently awarded the "General William C. Westmoreland Award" from the National Society of the Sons of the American Revolution for his distinguished service to veterans.

Since he was discharged from the Army 55 years ago, Edward Paeltz has spent countless hours helping veterans in need of care. With the help of his wife, Nancy, he frequently visits veterans in hospitals, nursing homes, and vet-

erans homes throughout Illinois. During the Christmas season, he brings them cookies and other gifts to put a smile on their faces. In addition, Mr. Paeltz helps transport veterans from the Veterans Hospital in Marion, Illinois, to a lodge and retreat center in Carbondale so they can participate in recreational activities.

Edward Paeltz is a former commander of Alton American Legion Post 126. He recently fulfilled his dream by designing and organizing the construction of a Veterans' Memorial in Alton, Illinois, to honor the veterans of all branches of the armed forces. Mr. Paeltz is an inspiration to us all.

A TRIBUTE TO HERB OBERMAN

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Ms. SOLIS. Mr. Speaker, I rise today to recognize the retirement of Mr. Herb Oberman, who will step down from his job as a Los Angeles County social worker on July 12, 2001. A dedicated public servant, Herb has served the people of Los Angeles County for the past 35 years.

Herb has proven that he truly cares about protecting children's rights. He received his Master's Degree of Social Work from the University of California Los Angeles in 1966 and spent seven years dedicating himself as a Children's Service Worker in the Foster Care Program. In 1973, he participated in the formation of Community Service Centers.

Herb has served on the board of directors of several social service organizations. He is the past president of the Santa Clarita Valley Girls and Boys Club and served on the board of directors of the Los Angeles Regional Foodbank between 1973–1993.

Herb Oberman's contributions have received recognition for his programs, which include the Los Angeles Efficiency and Productivity Program administration of the Los Angeles Citizenship Assistance Campaign; the Ford Foundation's "Innovations in State and Local Government" award in 1986 for his administration of the county's Federal Food Commodities Distribution Program; and the Parents Fair Share Project, a national demonstration project which helps noncustodial parents find employment and pay.

As Herb moves on to new pursuits, I would like to thank him for his remarkable work. I ask my colleagues to join me in honoring his hard work and extraordinary contributions and wish him luck on his retirement.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

SPEECH OF

HON. TOM UDALL

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

The House in Committee of the Whole House on the State of the Union had under

consideration the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes:

Mr. UDALL of New Mexico. Mr. Chairman, I would like to explain my position on the Kucinich amendment that would reduce funding for the National Ignition Facility at Lawrence Livermore National Laboratory and move some of the NIF money into the nonproliferation programs of the national Nuclear Security Administration. There is clearly a need to avoid the damage that would occur to our nonproliferation programs if funding is not increased. The President made a mistake in his budget when he made deep cuts in the nonproliferation programs. The cuts make little sense in a world where many nations have the capability and desire to develop weapons of mass destruction including nuclear, chemical and biological weapons. We must therefore increase our capability to monitor developments around the globe in this area.

The President's budget already cuts the NIF programs. I support that cut given the troubling history of this program. I am very concerned about the recent GAO report findings, which concluded that not only will NIF cost at least \$1 billion more than planned and take six years longer than expected to begin operations, but also that the program poses a serious number of unresolved technical problems. Moreover, because of the critical nature of the GAO findings, the agency reportedly is doing a follow-up report, which it intends to submit to Congress.

Mr. Speaker, furthermore, in an article in the Albuquerque Tribune, the Director of Sandia National Laboratory, Mr. Paul Robinson, criticized NIF suggesting there be a reduction in its design and cost to protect other nuclear weapons program components. Moreover, a report by Dr. Robert Civiak, a physicist and former OMB Program Examiner for the Department of Energy, spells out the need to cancel NIF before any further spending occurs.

For these reasons and others, Congress needs to closely examine the NIF program and determine whether it warrants future funding. That is why I am voting NO on the Kucinich amendment.

PROJECT VOTE SMART

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. HYDE. Mr. Speaker, I was recently informed of the efforts of an organization called Project Vote Smart—a group of dedicated individuals who work tirelessly in a non-partisan fashion to develop dependable facts about various national and state issues affecting all Americans while encouraging eligible citizens to vote. I am pleased to share some background information about the organization, which I hope my colleagues will find interesting and beneficial.

PROJECT VOTE SMART

A few years ago a handful of people, a mixture of young energetic students and retired
