Dr. Height, chair and president emerita of the National Council of Negro Women (NCNW) in Washington, D.C., is a legendary figure in the civil rights movement. In 1989, President Reagan acknowledged her achievements by presenting her with the Citizens Medal Award. In 1993, the NAACP awarded her its prestigious Spingarn Medal. That was followed by the Presidential Medal of Freedom Award, bestowed by President Clinton in 1994. Last August, a feature story on Dr. Height in the Cincinnati Enquirer declared that every president since Eisenhower has called on her for advice. In their book, The African American Century, Connel West and Henry Louis Gates, Jr., cited her as one of the 100 most influential African-Americans of the 20th century.

Dr. Height was born in Richmond, Virginia, in 1912, but grew up near Pittsburgh in a household where volunteerism prevailed. In those days, blacks from the southern states were migrating north to jobs in the steel mills. Height's mother and father, a nurse and building contractor respectively, helped these families settle in, thus instilling in her a sense of responsibility and integrity. Dr. Height earned both bachelor's and master's degrees in educational psychology from New York University in four years and graduated in 1933—the height of the Depression. She then turned her attention to social work in New York City, later working for the Young Women's Christian Association (YWCA). During those years, she also was active in community service and religion, and eventually became one of the first leaders of the United Christian Youth Movement.

From her position in the church and at the YWCA in Harlem, she spanned caps between the city's impoverished ethnic groups and the government, spotlighting the plight of unemployed domestic workers for national figures such as Eleanor Roosevelt and Langston Hughes.

Dr. Height's successes did not escape notice by the leadership of the NCNW. In 1937, she was approached to conduct committee work for the organization, an affiliation of civic, education, labor, community, church, and professional institutions headquartered in Washington. By 1957, she was her president. Under the guidance of educator and NCNW founder Mary McLeod Bethune, she organized voter registration drives in the South, testified repeatedly before Congress on social issues, and worked tirelessly on the more mundane tasks of the civil rights movement, such as jobs programs. She became an international leader in the burgeoning field of humanitarianism, working closely with Martin Luther King, Jr., Roy Wilkins, and a host of other legendary leaders.

Dr. Height, who has been called the "grande dame" of the civil rights movement, has served in the leadership of dozens of organizations devoted to social change, most notably as president of Delta Sigma Theta sorority from 1947 to 1956. In 1986, she founded and organized the Black Family Reunion Celebration, a national coming together of African-American families designed to promote historic strengths and traditional values. The Frederick Douglass Award will be presented to Dr. Height at Westminster Hall, in Baltimore, adjacent to the University of Maryland School of Law. Those in attendance will include Governor Parris N. Glendenning, USM Board of Regents Chairman Nathan A. Chapman, Leronia A. Josey, member of the USM Board of Regents, Thelma T. Daley, past national president of Delta Sigma Theta sorority, and USM Chancellor Donald N. Langenberg. Frederick Douglass IV, professor at New York University and a direct descendent of Douglass, will provide a dramatic reading from the latter's work. David J. Ramsay, president of the University of Maryland, Baltimore, will welcome the audience.

The Frederick Douglass Award was established in 1995 by the USM Board of Regents to honor individuals "who have displayed an extraordinary and active commitment to the ideals of freedom, equality, justice, and opportun	
ty exemplified in the life of Frederick Douglass." Previous recipients include the Honorable Patricia E. Mitchell, a member of Congress for the 7th District of Maryland (1996); Benjamin Quarles, scholar at Morgan State University (1997, posthumously); Samuel Lacy, Jr., sports writer for the Baltimore Afro-American (1998); the Hon. Kwesi M'tume, president of the National Association for the Advancement of Colored People (1998); and Beatrice "Bea" Gaddy, advocate for the poor and homeless and a member of the Baltimore City Council (2000).

Statesman, publisher and abolitionist Frederick Douglass was the leading spokesman of American blacks in the 1800s. Born a slave in 1817 in Tuckahoe, MD, he devoted his life to the abolition of slavery and the fight for black rights. Douglass's name at birth was Frederick Augustus Washington Bailey, but he changed it when he fled from his master in Baltimore in 1838. He ended up in New Bedford, Mass., where he attempted to ply his trade as a ship caulker, but settled for collecting garbage and digging cellars. In 1841, at a meeting of the Massachusetts Anti-Slavery Society, Douglass delivered a lecture on freedom that so impressed the audience they invited him to talk publicly about his experiences as a slave. He then began a series of protests against segregation, and published his autobiography, Narrative of the Life of Frederick Douglass, in 1845.

Mr. Speaker, I know the Members of the House take great pride in joining me in congratulating Dr. Dorothy Irene Height on this very special day for her lifelong work. She is truly deserving of the Frederick Douglass Award and I rise to congratulate her on this esteemed award.

TRIBUTE TO JENNIFER ARVER OF BRONSON, MICHIGAN, LEGRAND SMITH SCHOLARSHIP WINNER

HON. NICK SMITH
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. SMITH of Michigan. Mr. Speaker, it is with great respect for the outstanding record of excellence she has compiled in academics, leadership and community service, that I am proud to salute Jennifer Arver, winner of the 2001 LeGrand Smith Congressional Scholarship. This award is made to young adults who have demonstrated that they are truly committed to playing important roles in our Nation's future.

As a winner of the LeGrand Smith Congressional Scholarship, Jennifer is being honored for demonstrating that same generosity of spirit, intelligence, responsible citizenship, and capacity for human service that distinguished the late LeGrand Smith of Somersett, Michigan.

Jennifer Arver is an exceptional student at Bronson High School and possesses an impressive high school record. Jennifer has received numerous awards for her involvement in 4-H, as well as high school athletics. She has participated in student government and is a member of the Youth Advisory Council. Jennifer is active in her community, volunteering as a mentor with the Big Brothers Big Sisters Program, and as a member of the Branch County Finance Board.

Therefore, I am proud to join with her many admirers in extending my highest praise and congratulations to Jennifer Arver for her selection as a winner of a LeGrand Smith Congressional Scholarship. This honor is also a testament to the parents, teachers, and others whose personal interest, strong support and active participation contributed to her success.

To this remarkable young woman, I extend my most heartfelt good wishes for all her future endeavors.

THE NEW DETROIT SCIENCE CENTER

HON. CAROLYN C. KILPATRICK
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. Speaker. I rise today to congratulate The New Detroit Science Center on its grand opening. I am pleased to say that The New Detroit Science Center will be partnering with Marshall Field's in its grand opening festivities which will be attended by Governor and Mrs. John Engler on July 28. The celebration, "Marshall Field's Wonderland of Wonder at The New Detroit Science Center—32 Hours of Exploration," will kick off at 10 AM on July 28 and continue around the clock until 6 PM on July 29.

The Detroit Science Center was founded by Detroit businessman and philanthropist Dexter Ferry nearly 30 years ago. In 1998, plans were made to transform the Detroit Science Center into a leading center for science education. The Center broke ground on its expansion and renovation in 1999. The New Detroit Science Center will serve as a vehicle to educate our children and their families in the areas of science and technology. Detroit is known as a technological hub, and this new Center will involve our children and expose them to the resources that our Community Center will serve as a tremendous resource for teachers, children, and families across the State of Michigan. Its exciting programs, which include an IMAX theater, five hands-on laboratories, the DaimlerChrysler Science Stage and Sparks Theater, the Ford Learning Center, and the Digital Dome Planetarium, will create an interest in science, engineering, and technology. The New Detroit
