would have difficulty sustaining population growth without them. The process feeds on itself. Newcomers who become citizens (or legal residents) are in turn entitled to serve as sponsors for relatives’ applications. And so it goes. The faces change somewhat. The goals and dreams do not.

Nearly everyone who comes here and becomes part of the American matrix is seeking essentially the same things the Founders were taking about 225 years ago. Americans are all in this together. They draw strength for new blood, new ideas. That’s the indisputable past, and it is the inevitable future.

IN MEMORY OF STANLEY KRAMER

HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 12, 2001

Mr. KUCINICH. Mr. Speaker, I rise today to honor the memory of an exceptional film maker, Stanley Kramer.

During his lifetime, Stanley Kramer produced dozens of films. They included such classics as Guess Who’s Coming to Dinner, Judgment at Nuremberg and Inherit the Wind.

Stanley Earl Kramer was born and raised in New York City’s Hell’s Kitchen neighborhood, where he later attended New York University. Before he left for the military service in World War II, he established himself in the movie industry as a researcher, editor and writer. His first film, So This Is New York, was released in 1948.

Working in the 1950s and 60s, Kramer stood for things in which he believed and intertwined them into his works. For example, he highlighted issues such as race in Guess Who’s Coming to Dinner and The Defiant Ones, Nazi war crimes in Judgment at Nuremberg, fundamentalism vs. modern science in Inherit the Wind and nuclear holocaust in On the Beach. He also depicted his courageous demeanor and, at times, his own self-revelation, by creating characters who fought against fear while others stayed behind.

Even though Kramer was known as a “message director”, his friends and beloved ones knew him as much more. Steven Spielberg once said that Kramer was one of the greatest filmmakers due to the impact he made on the ethical world, and not solely based on the art and passion he conveyed on screen.

Eighty of his films were nominated for Oscars, 16 of them which won and six were nominated for Best Picture. Three of his finest films made the American Film Institute’s list of 100 Best Movies of All Time. Kramer himself was nominated as Best Director three times, and in 1962, he was presented the prestigious Irving B. Thalberg Memorial Award for Outstanding Work. He also received the Producers Guild of America’s David O. Selznick Life Achievement Award.

My fellow colleagues, please join me in honoring the memory of Stanley Kramer for all of his achievements in the movie industry. His love and dedication in portraying significant films has touched the hearts of all.

IN RECOGNITION OF DR. JESUS CARREON

HON. GRACE F. NAPOLITANO
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 12, 2001

Mrs. NAPOLITANO. Mr. Speaker, I rise today to recognize Dr. Jesus Carreon for his unfailing leadership and his dedication to the Southern California community. Dr. Jesus “Jess” Carreon, current President of Rio Hondo College, will be leaving the district to assume a new position as President of Portland Community College in Portland, Oregon.

Dr. Carreon has been an active contributor to the Southern California community for quite some time. After spending his childhood in the San Diego area, he pursued his Bachelor’s Degree from the University of San Diego. He later earned his Master’s of Science Degree from the University of California, Irvine, and his Doctorate in Education from the University of Southern California.

After completing his own education, Dr. Carreon immediately became a teacher. Since then, he has been involved in the educational process at nearly every level. He served as Assistant Dean of Instruction at Laney College in Oakland and as Assistant Dean of Vocational Education at San Bernardino Valley College.

Dr. Carreon later served as Vice President of Instruction at El Camino Community College and, most recently, as President of Ventura College.

Jess has made immense strides during his tenure as President of Rio Hondo Community College. In addition to greatly improving the school’s image, Dr. Carreon has worked tirelessly to increase Rio Hondo’s involvement in the community. Under his leadership, members of the school’s management team were awarded seats on Chambers of Commerce in each of Rio Hondo’s sending districts. In addition, Dr. Carreon pioneered the creation of the school’s first satellite campuses in the towns of El Monte and Santa Fe Springs.

Still, Dr. Carreon’s involvement reaches far beyond the classroom. When not teaching, he serves on local community boards and acts as an advocate for economic development. He sits on the Board of Directors for both the American Association of Community Colleges and the Presbyterian Intercommunity Hospital.

Dr. Carreon is active in economic councils and, in 1999, was named President of the National Community College Hispanic Council.

Dr. Carreon’s expansive knowledge and considerable expertise have made him a popular speaker at the regional, state and national levels. He lectures frequently on a host of topics, including economic development, workforce preparation, and leadership.

Dr. Carreon has devoted his life to improving education throughout Southern California and the 34th Congressional District. He is a model citizen, active throughout the community. I want to personally congratulate Jess for all his contributions and wish him success in his new position.

IN STRONG SUPPORT OF THE FISCAL YEAR 2002 AGRICULTURE APPROPRIATIONS LEGISLATION

HON. KEN BENTSEN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 12, 2001

Mr. BENTSEN. Mr. Speaker, I rise to express my strong support for the Fiscal Year...
I am particularly pleased that this legislation includes $75 million in additional federal funding for the Agriculture Research Service (ARS), a division of the U.S. Department of Agriculture. The ARS conducts and funds a variety of research projects, including nutrition research. The ARS provides funding for six human nutrition research centers, including the Children’s Nutrition Research Center (CNRC) at Baylor College of Medicine in Houston, Texas. The CNRC is the only human nutrition research center which focuses primarily on pediatric nutrition and helps to make recommendations about childhood diets.

As the representatives for the CNRC, I applaud the innovative pediatric nutrition research which the CNRC conducts each year. I am also pleased that this bill includes an additional $500,000 for the CNRC so they can expand their pediatric nutrition research next year. I believe that this investment will not only save lives but also reduce health care costs as we learn more about what is the best, most nutritional food for our children to eat. This additional funding will fund valuable research which will help families to provide nutritional food for their children so that these children will live longer, healthier lives.

There are many examples of CNRC’s research which will have a direct impact on our lives. For instance, CNRC researchers are currently examining the metabolic, hormonal and dietary factors that affect the body’s absorption and utilization of essential mineral nutrients such as calcium and zinc. Lack of adequate calcium intake in childhood can predispose children, especially females to fractures and osteoporosis. By understanding how our bodies absorb and utilize calcium and other nutrients, the CNRC will be able to make important recommendations on how to help children to prevent osteoporosis. Another CNRC study is working to identify the factors that influence children’s eating habits and how best to help children and families to adopt healthier habits to avoid the long-term health problems linked to poor nutrition, such as obesity, diabetes, stroke, and osteoporosis. The CNRC is also doing research on the nutrition of mothers and their infants during pregnancy and lactation. These studies will examine the optimal dietary caloric, protein, and mineral requirements for maternal health during pregnancy and lactation. With this study, mothers and their infants will learn more about the necessary nutrients they need to maintain optimal health during pregnancy and lactation.

I will continue to work with the House Appropriations Committee to ensure that the CNRC gets sufficient federal funding to conduct pediatric nutritional research. I urge my colleagues to support this legislation which provides necessary funding for agriculture and nutrition research programs.
