The Senate met at 10 a.m. and was called to order by the Presiding Officer, the Honorable MARK DAYTON, a Senator from the State of Minnesota.

PRAYER
The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Dear God, we belong to You. You gave us our talents, nurtured us by parents and teachers and friends, opened doors of opportunity we could never have pried open without You, and gave us creative vision of what we were to accomplish. You have been the author of our insights and the instigator of solutions to problems. We praise You for all that You have provided us so we can serve our Nation.

We thank You for the people You have sent to the Senate. Today we especially thank You for Gary Sisco as he completes his time of service as Secretary of the Senate. We thank You for his deep faith, his commitment to the work of Government through the Senate, and his loyalty to all of us as friends. We humbly thank You for all that we have and are because of Your incredible generosity. Amen.

PLEDGE OF ALLEGIANCE
The Honorable Mark Dayton led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Senator from Minnesota, the Honorable MARK DAYTON, a Senator from the State of Minnesota, to perform the duties of the Chair.

ROBERT C. BYRD, President pro tempore.

Mr. DAYTON thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond the hour of 10:30 a.m. with Senators permitted to speak therein for up to 10 minutes each.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

ORDER OF PROCEDURE

Mr. REID. Mr. President, I ask unanimous consent that the Senator from Pennsylvania be given his full 15 minutes. The two 15-minute spots would take us probably to 10:35 or whereabouts. I ask unanimous consent that Senator SPECTER control the first 15 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—S. 2217

Mr. REID. Mr. President, I further ask unanimous consent that the Senate proceed to H.R. 2217 at 10:35 this morning. I note to anyone within the sound of my voice, we have been in touch with Senator Craig and Senator KYL who had some suggestions last night in moving to this bill. Their questions have been answered.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Pennsylvania.

NOMINATION OF ROBERT MUELLER

Mr. SPECTER. Mr. President, I have sought recognition this morning to comment about the confirmation hearings which are scheduled later this month for Mr. Robert Mueller to be Director of the Federal Bureau of Investigation. That position arguably is as important as any position in the United States of America, perhaps even the most powerful position.

The statutory 10-year term is 2 years longer than the maximum a President may serve under the Constitution. The Director of the FBI has power over the largest investigative organization in the world, global in its exposure.

There are an enormous number of problems which have befallen the agency in recent years. The confirmation hearing will provide a unique opportunity for oversight for the U.S. Senate to seek to establish standards as to what the FBI should be doing in cooperation with congressional oversight.

The FBI is a well-respected organization. I have had very extensive opportunities to work with the FBI. After graduation from college, I was in the Air Force Office of Special Investigations for 2 years and had training from the FBI. The commanding officer of the OSI was a former top aide to Director J. Edgar Hoover. I worked with the FBI on the prosecution of the Philadelphia Teamsters, an investigation which was conducted by the McClellan Committee with the counsel, Robert Kennedy, and saw their very fine work. Then, as Assistant Counsel to the Warren Commission, I worked with the FBI; then as district attorney of Philadelphia and for the last 20 years extensively on the Judiciary Committee.

I have great respect for the Federal Bureau of Investigation. At the same time, my experience has shown me that there is an over concern by the personnel of the FBI with their so-called institutional image and that there cannot be a concession of any problems, which is really indispensable if problems are to be corrected.

(Disturbance in the visitors’ galleries.)

The ACTING PRESIDENT pro tempore. Will the Sergeant at Arms restore order in the galleries.

Mr. SPECTER. We have a nominee who has been put forward by the President who has very impressive credentials: United States Attorney in Boston, United States Attorney in San Francisco, 3 years as Assistant Attorney General in the Justice Department, where I had contacts and saw his impressive work.

He will be succeeding a man, Director Louis Freeh, who came to the Bureau with extraordinary credentials and overall did a good job, although he presided over the Bureau at a time when there were many institutional failures. I analyzed Director Freeh to the little boy on the Netherlands dike running around putting his finger in all the holes to try to stop the water from coming through. With so many holes and so many problems, it was not possible.

I believe similarly that the Congress, including the Senate and the Senate Judiciary Committee, has not been sufficiently active on oversight. These hearings will give us an opportunity to set standards as to what the FBI

● This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
should be doing in response to oversight activities by the Senate Judiciary Committee.

I have an opportunity to talk for the better part of an hour yesterday to FBI Director-designee Mueller and went over quite a number of issues that I intend to ask him in the public forum.

I comment about these today because the Senate ought to be preparing for this hearing with unique care for this very important position.

One of the matters I intend to discuss with Mr. Mueller in the confirmation hearings is the failure of the FBI to turn over for congressional Senate oversight a memorandum dated December 9, 1996, which was written at a time when there was a question as to whether Attorney General Reno was going to be reappointed by President Clinton. At that time, the campaign finance investigation was just being started. There was a conversation by a top FBI official Esposito, with a top Department of Justice official Lee Radek, and FBI Director Freeh wrote this memorandum to the file to Mr. Esposito in December. Referring to a meeting that he had with the Attorney General on December 6, Director Freeh wrote this memo December 9:

I also advised the Attorney General of Lee Radek’s comment to you that there was a lot of “pressure” on him and the Public Integrity Section regarding this case because the “Attorney General’s job might hang in the balance” (or words to that effect).

This memorandum did not come to the attention of the Judiciary Committee until April of 2000, some 3½ years later, when, in my capacity as chairman of the subcommittee on Department of Justice oversight, a subpoena was issued for all of the FBI records relating to the campaign finance investigation. When this memo was discovered, Director Freeh was questioned as to why he hadn’t turned it over for Judiciary Committee oversight, because it was the view of many that it absolutely should have been done.

Director Freeh defended his inaction on the ground that it would have compromised his relationship with Attorney General Reno. But notwithstanding that fact, it is my view that this is another of the issues that the Judiciary Committee must undertake. This will be the subject of my questioning of Mr. Mueller during the confirmation hearing.

Director Freeh declined to appear voluntarily before the Judiciary Committee or the subcommittee to comment about this memorandum, and the committee decided not to issue a subpoena, which I thought should have been done.

It is my view that when a matter of this importance comes to light there ought to be a public inquiry as to what happened between the Attorney General and the Director of the FBI. It takes a congressional committee to get to the bottom of that. When Attorney General Reno testified, she said, “I don’t recall that, but if that had come to my attention, I certainly would have done something about it.” In my view, anybody who is going to be confirmed for FBI Director has to have a commitment to making this sort of information available to Senate oversight.

Another matter which I intend to question Mr. Mueller about is the insistence of the FBI on not cooperating with Senate oversight where there is a pending criminal investigation. Now, I understand the sensitivity of a pending criminal investigation, having some experience as a prosecutor myself, but the case law is plain that congressional oversight is so fundamental and so important that it may proceed even as to pending criminal investigations. But that has not been honored by the Department of Justice or by the FBI. And in the case involving Dr. Wen Ho Lee, the subcommittee on Department of Justice oversight was permitted at every turn by the FBI refusing to make available information, citing a pending criminal investigation.

Now, the chairman of the committee and the ranking member, or chairman and the ranking member of the subcommittee, have standing, it seems to me, on a discrete inquiry, carefully controlled, where the prosecution would not be compromised. That is the role of oversight. But when Wen Ho Lee was indicted on December 11, 1999, immediately, the FBI used that as a reason to resist any further Senate oversight. And there was a real question of why the FBI and the Department of Justice allowed Dr. Lee to remain at large after a search of his premises in March of 1999, and then he was at liberty, at large, until December when an arrest warrant was issued. Suddenly, he became more problematic than public enemy No. 1, when he was put in manacles and solitary confinement, in a situation which had all the earmarks of an effort at the top of the Justice Department and FBI to coercer a guilty plea.

After the guilty plea was entered, Judiciary Committee oversight had been thwarted by the refusal of the FBI to allow access to what was going on because Dr. Lee was still being debriefed. Here again, I believe the Judiciary Committee is entitled to a commitment that oversight will be respected, and the case law will be respected, and that there may be oversight even on pending criminal investigations.

In the case of Hanssen, who has just entered a guilty plea on an arrangement to cooperate, that raises some very fundamental questions that need to be answered as to procedures in the Federal Bureau of Investigation. Although this matter did not come to light until very recently, in August of 1986, Hanssen’s voice was recorded by an FBI wiretap on his Soviet contact’s telephone. In 1992, Hanssen improperly accessed his supervisor’s computer. In 1997, Hanssen began to search the FBI computerized case database for his name, his home address, and for terms referring to espionage activities.

A question arises, what steps have been taken by the FBI to detect a spy such as Hanssen? There was a very long report issued by the inspector general of the CIA after Aldrich Ames was detected as a spy, and the inspector general of the CIA, Fred Hitz, wrote this in the report:

We have no reason to believe that the directors of Central Intelligence who served during the relevant period were aware of the deficiencies described in this report.

That relates to Aldrich Ames.

But directors of Central Intelligence are obligated to ensure that they are knowledgeable of significant developments relating to crucial agency missions. Sensitive human source reporting on the Soviet Union and Russia during and after the collapse of the Soviet Union was such a mission, and certain directors of Central Intelligence must therefore be held accountable for serious shortcomings in that reporting.

Now, what that does essentially is to say that the Directors are at fault, even though they didn’t know about Aldrich Ames, or have reason to know about Aldrich Ames, because the presence of spies in the Central Intelligence Agency so threatens national security that the Directors have an obligation to find out about it. If you make it an absolute responsibility, that, according to the CIA inspector general, would put the pressure on the Directors to find out about it.

The three Directors of the Central Intelligence Agency who were in office during the time Aldrich Ames functioned—Judge Webster, Gates, and Woolsey—responded with a very hot letter denying responsibility and saying that the standard set by the CIA inspector general was too high. Well, this is a subject I have discussed preliminarily with Mr. Mueller and intend to ask him about.

It is a very tough standard to say that a public official is liable for matters that he didn’t know about or didn’t have reason to know about. But if our Nation’s secrets are to be safeguarded, and if we are to be secure from spies such as Ames and Hanssen, this is a matter that we are going to have to determine as to what is the appropriate standard for those who would be in the White House.
McVeigh case, for example, the FBI had reason to know as early as January of this year that all of the documents related to McVeigh had not been turned over to McVeigh's lawyers. Yet those documents were not made available until May. And then there was the issue about the fairness to McVeigh. No doubt he was guilty; he had confessed to the most horrendous crime in American history, where 168 people were killed in a Federal building in Oklahoma City—women, children, men, going there for official business, blameless, and it was done in a cold, calculated way.

There was no doubt as to guilt or as to the justification for the death sentence which was imposed, but there was an obligation on the part of the prosecution to turn over all the papers. There had been some resistance to turning there were documents. Here you had a 5-month delay where the Federal Bureau of Investigation had reason to know that all those documents were not turned over.

The question is: What is to be done in the management of the Federal Bureau of Investigation to avoid this sort of an error? In an age of computerization and mechanization, we search for an answer and really must find a way that the FBI will correct these kinds of problems.

A similar issue was confronted in the Waco matter. It was an incident which occurred on April 19, 1993, where the compound was attacked and where so many people lost their lives in one of the most controversial incidents in American history, but it was not until August of 1999 that the FBI suddenly found a whole ream of records. Here again, management responsibilities require something much, much better than that.

The incident at Waco is really a very sad chapter in American history for many reasons: The confrontation, the deaths, the failure of congressional oversight, the failure of candid disclosure by the officials who were in charge.

On April 28 of 1993, Attorney General Reno and then FBI Director William Sessions testified before Congress that no pyrotechnic tear gas rounds were used in the event. The hostage rescue team commander, Richard Rogers, who was present for their testimony but who did not testify, did not correct them.

Regrettably, that is an occurrence which has happened too often where there is a concern about the FBI institutional image which blinds people who ought to be coming forward and who ought to be making a disclosure as to what the facts were when there is congressional oversight and you have critical information from the FBI at the United States and by the Director of the FBI.

When Mr. Mueller and I talked yesterday, we discussed at some length the culture of the Federal Bureau of Investigation and the difficulties of even the Director finding out what is going on in the field. This is a challenging task which Robert Mueller is going to have to confront.

In the context of what has happened with Wen Ho Lee, Waco, McVeigh, Hanssen, and the campaign finance investigation, there are issues which need to be very thoroughly explored in the confirmation hearing, and we ought to come to some common understanding between those of us who have oversight responsibilities on the Judiciary Committee and the Director of the FBI as to what his standard will be and what we think the standard should be so that we can come to a meeting of the minds or so that we may not confirm a Director who does not measure up to what we feel to be a matter of legitimate oversight.

At the same time, as I suggested before, Congress has not done its job on oversight. We had the incident at Waco on April 19 of 1993. In my view, there should have been a prompt, detailed, piercing oversight investigation of what went on there. It was not until former Senator Danforth undertook that investigation in 1999 that anything really was done.

Who can say as to the bombing of the Oklahoma City Federal building 2 years to the day after the Waco incident, when the Oklahoma City bombing occurred on April 19, 1995, whether that was related to the Waco incident or whether it might have been prevented had there been vigorous congressional oversight?

In 1995, I served as the chairman of the Subcommittee on Terrorism and moved to have oversight hearings at that time on both Waco and Ruby Ridge and I thought that much more needed to be done. Finally, the subcommittee was permitted to have oversight as to Ruby Ridge.

That was an incident where Randy Weaver was on the mountain and refused to come down. There was a veritable army which approached him and had a firefight, and a U.S. marshal was killed in the process.

The oversight in which the Terrorism Subcommittee got to the bottom of the matter was in my view the most damaging to the FBI. Director Louis Freeh, the FBI changed the rules of engagement related to the use of deadly force in what was a very important matter.

When we finished the hearings, Mr. Weaver said in the hearing room, had he known there was going to be this kind of congressional oversight, he would have come down from the mountain if he had believed there would be an inquiry and an appropriate resolution.

It was at that time that militia were springing up in some 40 States across the United States. If Congress exercises appropriate oversight, it is my view that there will do a great deal to quell public unrest and public doubts as to what is happening with Federal action in a place such as Waco and Federal action in a place such as Ruby Ridge.

In summary, these are matters which are of the utmost importance when we will be confirming the next Director of the FBI, an occurrence which happens only once every 10 years because it is a 10-year turn, although a Director may leave earlier. Louis Freeh is leaving after 8 years, a term of office longer than the maximum a President may serve under the Constitution. The Justices of the Supreme Court have enormous power on 5–4 decisions establishing the law of the land, but there are four others who go with the one deciding vote.

The FBI, with all of its power—most of what it does is necessarily confidential, secret—are we prepared for very profound changes in FBI management on the items which have been mentioned and an attitude that will not emphasize the institutional image to the sacrifice of not having appropriate congressional disclosure of the memorandum referred to, having appropriate congressional disclosure when a matter is pending, even if it is a criminal matter.

Mr. President, I ask unanimous consent that the full text of the memorandum from Director Freeh, dated December 9, 1996, be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DECEMBER 9, 1996.

To: Mr. Esposito.

From: Director, FBI.

Subject: Democratic National Campaign Matter.

MEMORANDUM

As I related to you this morning, I met with the Attorney General on Friday, 12/6/96, to discuss the above-captioned matter.

I stated that DOJ had not yet referred the matter to the FBI to conduct a full, criminal investigation. It was my recommendation that this referral take place as soon as possible.

I also told the Attorney General that since she had declined to refer the matter to an Independent Counsel it was my recommendation that she select a first rate DOJ legal team from outside Main Justice to conduct the inquiry. In fact, I said that these prosecutors should be ‘‘junk-yard dogs’’ and that in my view, DOJ was not capable of conducting the thorough, aggressive kind of investigation which was required.

I also advised the Attorney General of Lee Radeke’s report to you that there was a lot of ‘‘pressure’’ on him and PIS regarding this case because the ‘‘Attorney General’s job might hang in the balance’’ (or words to that effect). I stated that PIS would be enough for me to take him and the Criminal Division off the case completely.

I also stated that it didn’t make sense for PIS to call the FBI the ‘‘lead agency’’ in this matter while operating a ‘‘task force’’ with DOC 1Gs who were conducting interviews of
July 11, 2001

CONGRESSIONAL RECORD—SENATE

12857

key witnesses without the knowledge or participation of the FBI.

I strongly recommend that the FBI and hand-picked DOJ attorneys from outside Main Justice run this case as we would any matter of such importance and complexity.

We left the conversation on Friday with arrangements to discuss the matter again on Monday. The Attorney General and I spoke today and she asked for a meeting to discuss the "investigative team" and hear our recommendations. The meeting is now scheduled for Wednesday, 12/11/96, which you and Bob Dole will also attend.

I intend to repeat my recommendations from Friday's meeting. We should present all of our recommendations for setting up the investigation—both AUSAs and other resources. You and I should also discuss and consider whether on the basis of all the facts and circumstances—including Huang's recently released letters to the President as well as Radek's comments—whether I should recommend that the Attorney General reconsider referral to an Independent Counsel.

It was unfortunate that DOJ declined to allow the FBI to play any role in the Independent Counsel referral deliberations. I agree with you that based on the DOJ's experience this is a matter—which was only referred to an Independent Counsel because the FBI and I intervened directly with the Attorney General—it was decided to exclude FBI participation from the initial process.

Nevertheless, based on information recently reviewed from PIS/DOC, we should determine whether or not an Independent Counsel referral should be made at this time. If so, I will make the recommendation to the Attorney General.

Mr. SPECTER. Mr. President, I ask unanimous consent that an extract of a report from CIA Inspector General Frederick Hitz be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

We have no reason to believe that the DCIs who oversaw the relevant periods were aware of the deficiencies described in this report. But DCIs are obligated to ensure that they are knowledgeable of significant developments related to crucial Agency missions. Sensitive human source reporting on the Soviet Union and Russia during and after the Cold War clearly was such a mission, and certain DCIs must therefore be held accountable for serious shortcomings in that reporting.

Mr. SPECTER. I thank the Chair and yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Michigan.

PRESCRIPTION DRUGS

Ms. STABENOW. Mr. President, I rise to express grave disappointment and concern.

Yesterday the Secretary of Health and Human Services, Tommy Thompson, indicated he would not implement a bipartisan law passed by this Congress last session. This legislation would open the borders of our country so that American citizens, who pay for a good share of the research done on prescription drugs in this country, to support the development of medications that are desperately needed, could get the best price for American-made, FDA-safety-approved medications from other countries such as Canada.

Last year, Congress passed a bill that says we will no longer protect the prices charged in this country that disadvantage our citizens by stopping us from free commerce across the border. I supported this effort in the House of Representatives. I find it ironic, at a time when our President talks about wanting free trade authority and expanding free trade, that we stop our citizens at the border from being able to benefit from free trade regarding the purchase of prescription drugs.

Yesterday, the Secretary of Health and Human Services said he was concerned about the safety of reimported prescription drugs. We addressed those concerns in the recently approved bipartisan legislation. Further, I have introduced legislation called the Medication Equity and Drug Savings Act, S. 215, the MEDES Act, that addresses the safety concerns expressed by former Secretary Shalala. It guarantees in the clearest terms that American labels will be used on the wholesale products that come from another country and that there will be complete safety precautions to make sure Americans will be receiving American-made, safe, FDA-approved drugs.

What is the difference in cost for prescription drugs? The difference is clear when I stand in Detroit, MI, and I look across the river, I know that prices for American-made prescription drugs can be cut in half for my constituents with a quick 5 minute drive across the bridge to Canada. In some cases, the savings are even greater. Tamoxifen, a breast cancer treatment drug, is $136 a month in Michigan. Last year, we opened access to this group of seniors to purchase the exact same medicine; the price was only $15. There is something wrong with this picture.

The bill the Secretary chose not to implement would have begun to address this price difference by opening the borders, to make sure our hospitals, our businesses, and our pharmacists, could develop business relationships with wholesalers in other countries to bring back drugs at a lower cost and make sure our citizens could get medication at lower prices.

Today I urge my colleagues to join together again in a bipartisan way to act. We must guarantee that this law will be put into effect this year, whether it be by passing my legislation, making changes on another bill, or including it in Medicare prescription drug legislation which is so critical. We must act now. Over and over again I hear from families in my State and across the country. Families, seniors, individuals with disabilities, and working people with ailments are all concerned about the high costs of prescription drugs. People are having to choose between paying the electric bill, getting their food, or getting their medicine. In the great United States of America, this great country, that should not be happening.

I express grave concern and disappointment about the decision and the information released yesterday by the Secretary. I urge him and invite all my colleagues to join with me to address this issue in a way that will allow opening of the borders to reaffirm competition for the best, lowest price for the safest prescription drugs that are manufactured in this country, that our citizens help to subsidize. Whether through the R&D tax credit, through funding the Federal labs, or through other efforts, taxpayers help to develop these prescriptions. We helped fund the development of the medication, and Americans pay top dollar compared to anybody in the world for these same prescription drugs. It is not right.

It is time now to act to make sure we can truly reduce the costs of one of the most important parts of the health care system today—medicines for our people, for the families of America. We deserve a break. Unfortunately, the roadblock was maintained yesterday. It is time to take down the barrier at the border and allow our people to buy prescription drugs wherever they can get the best price. I urge we act as quickly as possible.

Mr. BURNS. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BURNS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will begin consideration of H.R. 2217, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2217) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30th, 2002, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes, namely:

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, acquisition of easements and other rights, and performance of any of other functions, including maintenance of facilities, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, including the general administration of the Bureau, and assessment of mineral potential of public lands pursuant to Public Law 96–487 (16 U.S.C. 1830); of which not to exceed $19,774,000 shall be for wildfire suppression by the Department of the Interior for fire protection activities related to Section 1833 of Title 43, U.S.C., et seq., protection of United States property, may be credited to the appropriation from which funds were expended to provide that protection, and are available without fiscal year limitation: Provided further, That such funds shall be available only to the extent an appropriation is designated by the Secretary of the Interior for fire protection activities related to Section 1833 of Title 43, U.S.C., et seq., protection of United States property, may be credited to the appropriation from which funds were expended to provide that protection, and are available without fiscal year limitation.

For expenses necessary for the purposes of such Act: Provided, That notwithstanding 31 U.S.C. 3302, sums recovered from or paid by a party in advance of or as reimbursement for remedial action or response activities conducted by the Department pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), $9,978,000, to remain available until expended: Provided further, That such funds shall be available only to the extent an official budget request for a specific dollar amount, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, is transmitted to the Congress by the Secretary and which shall be credited to this account.

For construction of buildings, recreation facilities, roads, trails, and appurtenant facilities, $12,976,000, to remain available until expended.

For expenses necessary to implement the Act of October 20, 1976, as amended (31 U.S.C. 6901–6907); of which not to exceed $400,000 shall be available for administrative expenses and of which $50,000,000 is for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That no payment shall be made to other fund or account to which such funds may be transferred and merged with this appropriation.

For conservation of Bureau lands and such funds appropriated under this head may be used for the administration of the mining claim fee program, to remain available until expended, to be reduced by amounts collected by the Bureau and credited to this appropriation.

For a sum grant without regard to when expenses are incurred; in addition, $32,298,000 for Mining Basin Land Grants, to remain available until expended, of which $50,000,000 is for wildfire suppression and $20,000,000 is for burned areas rehabilitation and fire suppression by the Department of the Interior, $775,962,000, and $2,000,000, to remain available until expended, for the renovation or improvement of public lands pursuant to Public Law 96–487 (16 U.S.C. 4001–4005).

For expenses necessary to implement the Act of October 20, 1976, as amended: (i) to be deposited to and merged with the Forest Stewardship Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E)(i) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

For expenses necessary for management, protection, and development of resources and for construction, operation, and maintenance of access roads, reforestation, and other improvements on the reserved Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing connecting roads on or adjacent to such grant lands; $106,061,000, to remain available until expended: Provided, That 25 percent of the aggregate of all receipts during the current fiscal year from the reserved Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California Railroad Grant Lands Fund and shall be deposited to the General Fund in the Treasury in accordance with the second paragraph of subsection (b) of section 215 of the Act of August 29, 1937 (30 Stat. 876).

For expenses necessary for fire preparedness, suppression operations, fire science and research, emergency rehabilitation, hazardous fuels reduction, and rural fire assistance by the Department of the Interior, $589,421,000, to remain available until expended, of which not to exceed $19,774,000 shall be for the renovation or improvement of public lands pursuant to Public Law 96–487 (16 U.S.C. 4001–4005).

For expenses necessary for fire preparedness, suppression operations, fire science and research, emergency rehabilitation, hazardous fuels reduction, and rural fire assistance by the Department of the Interior, $32,298,000, to remain available until expended, for the renovation or improvement of public lands pursuant to Public Law 96–487 (16 U.S.C. 4001–4005).

For expenses necessary for fire preparedness, suppression operations, fire science and research, emergency rehabilitation, hazardous fuels reduction, and rural fire assistance by the Department of the Interior, $32,298,000, to remain available until expended, of which not to exceed $19,774,000 shall be for wildfire suppression and $20,000,000 is for burned areas rehabilitation and fire suppression by the Department of the Interior, $775,962,000, and $2,000,000, to remain available until expended, for the renovation or improvement of public lands pursuant to Public Law 96–487 (16 U.S.C. 4001–4005).

For expenses necessary for fire preparedness, suppression operations, fire science and research, emergency rehabilitation, hazardous fuels reduction, and rural fire assistance by the Department of the Interior, $32,298,000, to remain available until expended, of which not to exceed $19,774,000 shall be for wildfire suppression and $20,000,000 is for burned areas rehabilitation and fire suppression by the Department of the Interior, $775,962,000, and $2,000,000, to remain available until expended, for the renovation or improvement of public lands pursuant to Public Law 96–487 (16 U.S.C. 4001–4005).
mineral leasing receipts from Bunkhead-Jones lands, Department of the Interior pursuant to law, but not less than $10,000,000, to remain available until expended: Provided, That not to exceed $600,000 shall be available for administrative expenses.

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for costs of providing copies of official public land documents, for monitoring construction, operation, and termination of leases in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under Public Law 94–579, as amended, and Public Law 93–153, to remain available until expended: Provided, That notwithstanding any provision to the contrary of section 305(a) of Public Law 94–579 (43 U.S.C. 1735(a)), any moneys that have been or will be received pursuant to that section, whether as a result of forfeiture, compromise, or settlement, if not appropriated for refund pursuant to section 305(c) of that Act, shall be immediately available and may be expended under the authority of this Act by the Secretary to improve, protect, or rehabilitate any public lands administered through the Bureau of Land Management which have been damaged by the action of a resource developer, purchaser, permittee, or any unauthorized person, without regard to whether all moneys collected from each such action are used on the exact lands damaged which led to the action: Provided further, That any such moneys that are in excess of amounts needed to repair damage to the exact land for which funds were collected may be used to repair other damaged public lands.

MISCELLANEOUS TRUST FUNDS

In addition to amounts authorized to be expended under existing laws, there is hereby appropriated such amounts as may be contributed under section 307 of the Act of October 21, 1976 (43 U.S.C. 1701), and such amounts as may be advanced for administrative costs, surveys, appraisals, and costs of making conveysances of omitted lands under section 211(b) of that Act, to remain available until expended.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, or improvement of temporary facilities, and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; up to $100,000 for payments, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Bureau; miscellaneous and emergency expenses of enforcement activities authorized or approved by the Secretary and to be accounted for solely on her certificate, not to exceed $10,000: Provided, That notwithstanding 44 U.S.C. 501, the Bureau may, under cooperative cost-sharing and partnership arrangements authorized by law, procure printing services from cooperators in connection with jointly produced publications for which the cooperators share the cost of printing, either in cash or in services, and the Bureau determines the cooperator is capable of meeting accepted quality standards: Provided further, That section 2(b) of title 30, United States Code, is amended:

(1) In section 282(a), by striking the first sentence and inserting, "The holder of each unpatented mining claim, mill, or tunnel site, located and patented pursuant to the mining laws of the United States, whether located before, on or after the enactment of this Act, shall pay to the Secretary of the Interior, such sum for each year for years 2002 through 2006, a claim maintenance fee of $100 per claim or site;" and

(2) In section 289, by striking "and before Sep- tember 30, 2006." and inserting "and before September 30, 2006.":

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

For necessary expenses of the United States Fish and Wildlife Service, by direct expenditure and economic studies, conservation, management, investigations, protection, and utilization of fishery and wildlife resources, except whealies, seals, and sea lions, maintenance of the herd of Iowahorned cattle on the Wichita Mountains Wildlife Refuge, general administration, and for the performance of other authorized functions related to the management of fishery and wildlife resources, contracts, grants, cooperative agreements and reimbursable agreements with public and private entities, $845,714,000, to remain available until September 30, 2001, except as otherwise provided herein, of which $31,000,000 is for conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, and to be for the purposes of such Act: Provided, That balances in the Federal Infrastructure Improvement account shall be transferred to the Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That the amount provided herein is for a Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That amounts provided herein are for a Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

STEWARDSHIP GRANTS

For expenses necessary to carry out the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460l–4 through 11), including administrative expenses, and for private conservation efforts to be carried out on private lands, $9,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That the amount provided herein is for a Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

NATIONAL WILDLIFE REFUGE FUND

For expenses necessary to carry out the provisions of the North American Wetlands Conservation Act, Public Law 101–233, as amended, $1,414,000. NORTH AMERICAN WILDLANDS CONSERVATION FUND

For expenses necessary to carry out the provisions of the Endangered Species Act, Public Law 103–153, as amended, $91,000,000, to be derived from the Cooperative Endangered Species Conservation Fund, to remain available until expended, and to be for the purposes of such Act.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND

For expenses necessary to implement the Act of October 17, 1978 (16 U.S.C. 1451a), $14,414,000. NORTHERN MEXICAN WILDLANDS CONSERVATION FUND

For expenses necessary to carry out the provisions of the North American Wetlands Conservation Act, Public Law 101–233, as amended, $42,000,000, to remain available until expended, and to be for the purposes of such Act:

LAND ACQUISITION

For expenses necessary to carry out the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460l–4 through 11), including administrative expenses, for the acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the United States Fish and Wildlife Service, $9,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

LAND AcQUISITION

For expenses necessary to carry out the Act of February 5, 1966 (16 U.S.C. 661a), to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

MULTINATIONAL SPECIES CONSERVATION FUND

appropriations acts for rhinoceros, tiger, and Asian elephant, conservation activities on properties owned by States, and for the conservation of migratory birds that are exempt from any sanctions imposed against any country under section 102 of the Arms Export Control Act (22 U.S.C. 279aa–1).

STATE WILDLIFE GRANTS

EXCLUDING RECESSIONS

For wildlife conservation grants to States and to the District of Columbia, Puerto Rico, Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa, under the provisions of the Fish and Wildlife Coordination Act, for the development and implementation of programs for the benefit of wildlife and their habitat, including species that are not hunted or fished, $100,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 205(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That the Secretary shall, after deducting administrative expenses, apportion the amount provided herein in the following manner: (A) to the District of Columbia and to the Commonwealth of Puerto Rico, each a sum which is less than one-half of 1 percent thereof; and (B) to Guam, American Samoa, the U.S. Virgin Islands, and the Commonwealth of the Northern Mariana Islands, each a sum which is less than one-fourth of 1 percent thereof: Provided further, That the Secretary shall apportion the remaining amount in the following manner: 30 percent based on the ratio to which the land area of such State bears to the total land area of all such States; and 70 percent based on the ratio to which the population of such State bears to the total population of all such States, based on the most recent U.S. Census; and the amounts so apportioned shall be adjusted equitably so that no State shall be apportioned a sum which is less than one percent of the total amount available for apportionment or more than 10 percent: Provided further, That the Federal share of planning grants shall not exceed 75 percent of the total cost of such projects and the Federal share of implementation grants shall not exceed 50 percent of the total costs of such projects: Provided further, That the non-Federal share of such projects may not be derived from Federal grants: Provided further, That the Secretary may accept donated aircraft as replacements for existing aircraft: Provided further, That notwithstanding any other provision of law, the Secretary of the Interior may not spend any of the funds appropriated in this Act for the purchase of lands or interests in lands to acquire any unit of the National Wildlife Refuge System unless the purchase is approved in advance by the House and Senate Committees on Appropriations in complex reprogramming procedures contained in Senate Report 105–56.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

For expenses necessary for the management, operation, and maintenance of areas and facilities administered by the National Park Service (including special road maintenance service to truciking perinnittees on a reimbursables basis), and for the general administration of the National Park Service, $1,171,399,000, of which $10,881,000 for research, planning and inter-agency coordination in support of land acquisition for Everglades restoration shall remain available until expended; and of which $17,181,000, to remain available until September 30, 2003, is for maintenance repair or rehabilita-

ion projects for constructed assets, operation of National Park Service automated facility condition assessment, management software system, and comprehensive facility condition assessments; and of which $2,000,000 is for the Youth Conservation Corps, $39,142,000 is for the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act, for high priority projects: Provided, That the amounts provided above may be made available to support United States Park Police are those funds approved for emergency law and order incidents pursuant to established National Park Service procedures, those funds needed to maintain and repair United States Park Police administrative facilities, and those funds needed to reimburse United States Park Police account for the unbudgeted over-time and travel costs associated with special events for an amount not to exceed $10,000 per event subject to approval of the Secretary of the Interior: Provided further, That the amounts provided above may be made available to support United States Park Police are those funds approved for emergency law and order incidents pursuant to established National Park Service procedures, those funds needed to maintain and repair United States Park Police administrative facilities, and those funds needed to reimburse United States Park Police account for the unbudgeted over-time and travel costs associated with special events for an amount not to exceed $10,000 per event subject to approval of the Secretary of the Interior:

CONSTRUCTION

For construction, improvements, repair or replacement of physical facilities, including the modifications authorized by section 104 of the Everglades National Park Protection and Expansion Act of 1989, $338,585,000, to remain available until expended, of which $60,000,000 is for conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

LAND AND WATER CONSERVATION FUND (RESCISSION)

The contract authority provided for fiscal year 2002 by 16 U.S.C. 4601–10a is rescinded.

LAND ACQUISITION AND STATE ASSISTANCE

For expenses necessary to carry out the provisions of the Land and Water Conservation Act of 1965, as amended (16 U.S.C. 460l–4 through 11), including administrative expenses, and for acquisition of lands and interests in lands, not otherwise provided for, $65,806,000, to remain available until expended and to be for the conservation activities defined in section 250(c)(4)(E)(iii) of the Balanced Budget and

CONGRESSIONAL RECORD—SENATE

July 11, 2001

12860
Emergency Deficit Control Act of 1985, as amended, of $64,000,000 is for the State assistance program including $4,000,000 to administer the State assistance program, and of which $11,000,000 shall be for grants, not covering more than 50 percent of the cost of any acquisition to be made with such funds, to States and local communities for purposes of acquiring lands or interests therein, within the Everglades watershed; and $16,000,000 may be used to conduct new surveys on private property, unless specifically authorized in writing by the Geological Survey to perform surveys, investigations and research covering topography, geology, hydrology, biology, and the mineral and water resources of the United States, including its territories and possessions, and other areas as authorized by 43 U.S.C. 31, 1322, and 1340; classify lands as to theirs mineral and water resources; give engineering supervision to power permits, and Federal Energy Regulatory Commission licenses; administer the minerals exploration program (30 U.S.C. 641); and publish and disseminate data relative to the foregoing activities; and to conduct inquiries into the economic conditions affecting mining and materials processing industries (30 U.S.C. 3, 21, and 1605; 50 U.S.C. 90g(1)) and related purposes as authorized by law and to publish and disseminate data relative to the foregoing activities; and of which $16,000,000 shall remain available until expended for conducting inquiries into the economic conditions affecting mining and materials processing industries, and of which $8,000,000 shall remain available until expended for satellite operations; and of which $23,226,000 shall be available until September 30, 2003 for the operation of satellite centers; and deferred maintenance; and of which $164,424,000 shall be available until September 30, 2003 for the biological research activity and the operation of the Cooperative Research Units; Provided, That none of these funds provided for the biological research activity shall be used to conduct new surveys on private property, unless specifically authorized in writing by the property owner; Provided further, That of the amount provided herein, $25,000,000 is for the conservation activities defined in section 250(c)(4)(E)(viii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided further, That no part of this appropriation shall be used to pay more than one-half the cost of topographic mapping or water resources data collection and investigations carried on in cooperation with States and municipalities.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed 335 passenger motor vehicles, of which 335 shall be for replacement only, including not to exceed 237 for police-type use, 11 buses, and 8 ambulances; Provided, That none of the funds appropriated for National Park Service purposes may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1953; Provided further, That none of the funds appropriated for National Park Service purposes may be used to implement an agreement for the redevelopment of the southern end of Ellis Island until such agreement has been submitted to the Congress and shall not be implemented prior to the expiration of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) from the receipt by the Speaker of the House of Representatives and the President of the Senate of a full and comprehensive report on the development of the southern end of Ellis Island, including the facts and circumstances relied upon in support of the proposed project.

None of the funds in this Act may be spent by the National Park Service for activities that are in direct response to the United Nations Biodiversity Convention.

The National Park Service may distribute to operating units based on the safety record of each unit the cost of programs designed to improve workplace and employee safety, and to encourage employees receiving workers’ compensation benefits pursuant to chapter 81 of title 31, United States Code, to return to private positions for which they are medically able.

For expenses necessary for the United States Geological Survey to perform surveys, investigations and research covering topography, geology, hydrology, biology, and the mineral and water resources of the United States, including its territories and possessions, and other areas as authorized by 43 U.S.C. 31, 1322, and 1340; classify lands as to their mineral and water resources; give engineering supervision to power permits, and Federal Energy Regulatory Commission licenses; administer the minerals exploration program (30 U.S.C. 641); and publish and disseminate data relative to the foregoing activities; and to conduct inquiries into the economic conditions affecting mining and materials processing industries (30 U.S.C. 3, 21, and 1605; 50 U.S.C. 90g(1)) and related purposes as authorized by law and to publish and disseminate data relative to the foregoing activities; and of which $16,000,000 shall be available until expended for conducting inquiries into the economic conditions affecting mining and materials processing industries, and of which $8,000,000 shall remain available until expended for satellite operations; and of which $23,226,000 shall be available until September 30, 2003 for the operation of satellite centers; and deferred maintenance; and of which $164,424,000 shall be available until September 30, 2003 for the biological research activity and the operation of the Cooperative Research Units; Provided, That none of these funds provided for the biological research activity shall be used to conduct new surveys on private property, unless specifically authorized in writing by the property owner; Provided further, That of the amount provided herein, $25,000,000 is for the conservation activities defined in section 250(c)(4)(E)(viii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided further, That no part of this appropriation shall be used to pay more than one-half the cost of topographic mapping or water resources data collection and investigations carried on in cooperation with States and municipalities.

The amount appropriated for the United States Geological Survey shall be available for the purchase of not to exceed 335 passenger motor vehicles, of which 335 shall be for replacement only; reimbursement to the General Services Administration for security guard services; contracting for the furnishing of topographic maps and for the making of geological or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for gauging stations and observation wells; expenses of the United States National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Survey duly appointed to represent the United States in the negotiation and administration of interstate compacts; Provided, That activities funded by appropriations herein made may be accomplished through the use of contracts, grants, or cooperative agreements as defined in 31 U.S.C. 6302 et seq.

For expenses necessary for the Surface Mining Reclamation and Enforcement Act of 1977; Public Law 89-497, as amended, including the purchase of not to exceed 10 passenger motor vehicles, for replacement only; $102,144,000: Provided, That the Secretary of the Interior, pursuant to regulations, may use directly or through grants to States, moneys collected in fiscal year 2002 for civil penalties assessed under the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1268), to reclaim lands adversely affected by coal mining practices after August 3, 1977, to remain available until expended: Provided further, That appropriations for the Office of Surface Mining Reclamation and Enforcement may provide for the travel and per diem expenses of State officials serving in the Office of Surface Mining Reclamation and Enforcement sponsored training.
ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, as amended, including the purchase of not more than 10 parcels for reclamation and replacement purposes in the amount of $203,171,000, to be derived from receipts of the Abandoned Mine Reclamation Fund and to remain available until expended; of which up to $10,000,000 shall be made available for work associated with the Appalachian Clean Streams Initiative; and shall be available only to the Secretary of the Interior for implementing Indian land and water claim settlements pursuant to Public Laws 101-618 and 102-575, and for implementation of other enacted water rights settlements; of which $24,870,000 shall be available for the construction of the Navajo Indian Irrigation Project, the Secretary shall follow the requirements contained in 25 U.S.C. 2503(f); provided further, that any disputes between the Secretary and any tribe shall be subject to the disputes provision in 25 U.S.C. 2508(e). INDIAN LAND AND WATER CLAIM SETTLEMENTS AND MISCELLANEOUS PAYMENTS TO INDIANS

For necessary expenses to carry out Indian land and water claim settlements and payments to individuals and for necessary administrative expenses, $69,949,000, to remain available until expended; of which $24,870,000 shall be available for the construction of the Navajo Indian Irrigation Project, the Secretary shall follow the requirements contained in 25 U.S.C. 2503(f); provided further, that any disputes between the Secretary and any tribe shall be subject to the disputes provision in 25 U.S.C. 2508(e).

CONGRESSIONAL RECORD—SENATE
July 11, 2001

ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, as amended, including the purchase of not more than 10 parcels for reclamation and replacement purposes in the amount of $203,171,000, to be derived from receipts of the Abandoned Mine Reclamation Fund and to remain available until expended; of which up to $10,000,000 shall be made available for work associated with the Appalachian Clean Streams Initiative; and shall be available only to the Secretary of the Interior for implementing Indian land and water claim settlements pursuant to Public Laws 101-618 and 102-575, and for implementation of other enacted water rights settlements; of which $24,870,000 shall be available for the construction of the Navajo Indian Irrigation Project, the Secretary shall follow the requirements contained in 25 U.S.C. 2503(f); provided further, that any disputes between the Secretary and any tribe shall be subject to the disputes provision in 25 U.S.C. 2508(e). INDIAN LAND AND WATER CLAIM SETTLEMENTS AND MISCELLANEOUS PAYMENTS TO INDIANS

For necessary expenses to carry out Indian land and water claim settlements and payments to individuals and for necessary administrative expenses, $69,949,000, to remain available until expended; of which $24,870,000 shall be available for the construction of the Navajo Indian Irrigation Project, the Secretary shall follow the requirements contained in 25 U.S.C. 2503(f); provided further, that any disputes between the Secretary and any tribe shall be subject to the disputes provision in 25 U.S.C. 2508(e).
funds available to the Bureau shall be used to support expanded contractual or institutional arrangements that exceed the Bureau’s capability beyond the grade structure in place or approved by the Secretary of the Interior at any school in the Bureau school system as of October 1, 1999. Funds made available pursuant to this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 116 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 30, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school employees of a charter school and per- forming functions related to the charter school’s operation and employees of a charter school shall not be treated as Federal employees for purposes of title 28, United States Code (commonly known as the “Federal Tort Claims Act”).

DEPARTMENTAL OFFICES

INSULAR AFFAIRS

ASSISTANCE TO TERRITORIES

For expenses necessary for assistance to terri- tories under the jurisdiction of the Department of the Interior, $75,450,000, of which: (1) $71,922,000 shall be available until expended for technical assistance, including maintenance as- sistance, disaster assistance, insular manage- ment controls, coral reef initiative activities, and special projects as determined by the Secretary; grants to the judiciary in American Samoa for compensation and expenses, as authorized by law (48 U.S.C. 1661(c)); grants to the Govern- ment of American Samoa, in addition to current local revenues, for construction and support of governmental functions; grants to the Govern- ment of the Virgin Islands as authorized by law; grants to the Government of Guam, as au- thorized by law; and grants to the Government of the Northern Marianas as authorized by law (Public Law 94-241; 90 Stat. 272); and (2) $4,528,000, to remain available until expended for salaries and expenses of the Office of Insular Affairs: Provided, That all financial transactions of the territorial and local governments herein provided for, including such transactions of all agencies or in- strumentalities established or used by such govern- ments, may be audited by the General Ac- counting Office, at its discretion, in accordance with Federal accounting procedures: Provided further, That Northern Mariana Is- lands Covenant grant funding shall be provided according to terms of the Agreement of the Special Representatives on Future United States Financial Assistance for the Northern Mariana Islands approved by Public Law 104-134: Pro- vided further, That of the amounts provided for technical assistance, not to exceed $2,000,000 shall be made available for transfer to the Dis- aster Assistance Direct Loan Financing Account of the Federal Emergency Management Agency for the purpose of meeting the cost of repairs and maintenance of the repair obligation of the Government of the Virgin Islands on Community Disaster Loan 441, as required by section 504 of the Congres- sional Accountability Act, as amended hereby (25 U.S.C. 266l(c)): Provided further, That of the amounts provided for technical assistance, sufficient funding shall be made available for a grant to the Commonwealth of the Northern Mariana Islands working group to reimburse the Commonwealth for technical assistance efforts for the program of operations and maintenance improvement are appropriated to institutionalize routine operations and main- tenance improvements to the infrastructure in American Samoa, Guam, the Virgin Islands, the Commonwealth of the Northern Mariana Is- lands, the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia: Provided further, That of the funds for trust management improvements may be used as non-Federal matching funds for the purpose of hazard mitigation grants provided pursuant to section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 570c).

COMPACT OF FREE ASSOCIATION

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For necessary expenses for management of the Department of the Interior, $67,541,000, of which not to exceed $5,500 may be for official reception and representation purposes, of which up to $1,000,000 shall be available for workers com- pensation payments and unemployment com- pensation payments associated with the orderly closure of the United States Bureau of Mines.

OFFICE OF THE SOLICITOR

SALARIES AND EXPENSES

For necessary expenses of the Office of the Soli- citor, $44,074,000.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

For necessary expenses of the Office of In- spector General, $23,245,000, of which $3,827,000 shall be for procurement by contract of inde- pendent auditing services to audit the consoli- dated Department of the Interior annual finan- cial statement and the annual financial state- ment of the Department of the Interior bureaus and offices funded in this Act.

OFFICE OF SPECIAL TRUSTEE FOR AMERICAN INDIANS

FEDERAL TRUST PROGRAMS

For operation of trust programs for Indians by direct expenditure, contracts, cooperative agree- ments, compacts, and grants, $99,224,000, to re- main available until expended: Provided, That funds for trust management improvements may be transferred, as needed, to the Bureau of In- dian Affairs “Operation of Indian Programs” account and to the Departmental Management “Salaries and Expenses” account (section 404 of the Balanced Budget and Emer- gency Deficit Control Act of 1985, as amended), for expenses of the Department of the Interior for emer- gencies which shall have been exhausted: Provided further, That all funds used pursuant to this authority shall be considered to be “emergency requirements” pursuant to section 251(b)(2)(A) of the Balanced Budget and Emer- gency Deficit Control Act of 1985, and must be replenished by a supplemental appropriation which must be requested as promptly as pos- sible.
SECT. 102. The Secretary may authorize the expending of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of fires upon or threatening lands under the jurisdiction of the Department of the Interior; for the emergency rehabilitation of burned-over lands under its jurisdiction; for emergency actions related to potential or actual earthquakes, floods, volcanoes, storms, or other unavoidable causes; for contingency planning subsequent to actual oil spills; for response and natural disasters; the assessment of actual oil spills; and for the prevention, suppression, and control of actual or potential grasshopper and Mormon cricket outbreaks on lands under the jurisdiction of the Department of the Interior pursuant to the section in 177(b) of Public Law 99-198 (99 Stat. 1658); for emergency reclamation projects under section 410 of Public Law 95-47; and shall transfer, from any no year funds available to the Office of Surface Mining Reclamation and Enforcement, such funds as may be necessary at the discretion of the Secretary to carry out the authority in the event a primary State is not carrying out the regulatory provisions of the Surface Mining Act: Provided, That appropriations made for wildfire fire operations shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for wildfire fire operations, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: Provided further, That for wildfire fire operations, no funds shall be made available under this authority until the Secretary determines that funds appropriated for wildfire fire operations will be exhausted within thirty days: Provided further, That all funds used pursuant to this section are hereby designated by Congress to be "emergency requirements" pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, and must be replenished by a supplemental appropriation which must be requested as promptly as possible: Provided further, That such replenishment funds shall be used to reimburse, on a pro rata basis, accounts from which funds were transferred: Provided further, Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever considered necessary to contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections 1353 and 1356 of title 31, United States Code: Provided, That reimbursements for costs and supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received: SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed $500,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and apprenticeships, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price fixed lower than to subscribers who are not members: SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses of officers, employees, agents, and services for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204). SEC. 106. Annual appropriations made in this title for the current fiscal year and in previous years may be expended for the purpose of releasing unexpended contracts for services or rentals for periods not in excess of 12 months beginning at any time during the fiscal year: Provided further, That funds provided in this title may be expended by the Secretary for the conduct of offshore leasing and related activities placed under restriction in the President's moratorium statement of June 12, 1988, in the areas of northern, central, and southern California; the North Atlantic; Washington and Oregon; and the eastern Gulf of Mexico south of 26 degrees north latitude and east of 86 degrees west longitude: SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the conduct of offshore oil and natural gas preleasing, leasing, and related activities, on lands within the North Aleutian Basin planning area: SEC. 109. No funds provided in this title may be expended by the Department of the Interior to conduct offshore oil and natural gas preleasing, leasing, and related activities in the eastern Gulf of Mexico south of 26 degrees north latitude and east of 86 degrees west longitude: SEC. 110. No funds provided in this title may be expended by the Department of the Interior to conduct oil and natural gas preleasing, leasing and related activities in the Mid-Atlantic, and South Atlantic planning areas: SEC. 111. Advance payments made under this title to Indian tribes, tribal organizations, and tribal consortia pursuant to the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.) or the Tribally Controlled Schools Act of 1988 (25 U.S.C. 2501 et seq.) may be invested by the Indian tribe, tribal organization, or consortium before such funds are expended for the purposes of the grant, compact, or annual funding agreement so long as such funds are: (1) invested by the Indian tribe, tribal organization, or consortium only in obligations of the United States, or in obligations or securities that are guaranteed or insured by the United States, or in obligations or securities that are compatible with the use of the lands as a cemetery, or are for the conduct of offshore oil and natural gas preleasing, leasing, and related activities, on lands within the North Aleutian Basin planning area; (2) deposited only into accounts that are insured by an agency or instrumentality of the United States, or are fully collateralized to ensure protection of the funds, even in the event of a bank failure: SEC. 112. Appropriations made in this Act for the conduct of offshore oil and natural gas preleasing, leasing, and related activities, on lands within the North Aleutian Basin planning area: SEC. 113. A grazing permit or lease that expires (or is transferred) during fiscal year 2002 shall be renewed under section 402 of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1757), if applicable, section 510 of the California Desert Protection Act (16 U.S.C. 418aa-50). The terms and conditions contained in the expiring permit or lease shall be carried over into the new permit or lease until such time as the Secretary of the Interior completes processing of such permit or lease in compliance with all applicable laws and regulations, or the permit or lease may be canceled, suspended or modified, in whole or in part, to meet the requirements of such applicable laws and regulations. Nothing in this section shall be deemed to alter the Secretary's statutory authority: SEC. 114. Notwithstanding any other provision of law, for the purpose of reducing the backlog of Indian probate cases in the Department of the Interior, the Secretary may: (1) transfer from chapter 10 of title 25, United States Code, are deemed satisfied by a proceeding conducted by an Indian probate judge, appointed by the Secretary under the provisions of title 5, United States Code, governing the appointments in the competitive service, for such period of time as the Secretary determines necessary: Provided further, That the basic pay of an Indian probate judge so appointed may be fixed by the Secretary without regard to the provisions of chapter 51, and subchapter III of chapter 53 of title 5, United States Code, governing the classification and pay of General Schedule employees, except that no such Indian probate judge may be paid at a level which exceeds the maximum rate payable for the highest grade of the General Schedule, including locality pay: SEC. 115. Notwithstanding any other provision of law, the Secretary of the Interior is authorized to distribute tribal priority allocation funds, including tribal base funds, to alleviate tribal funding inequities by transferring funds to address identified, unmet needs, dual enrollment, overlapping service areas or inaccurate distribution methodologies. No tribe shall receive a transfer from Tribal Priority Allocation funds of more than ten percent in fiscal year 2002, and after circumstances are compatible with the use of the lands as a cemetery, or (2) as a burial ground: SEC. 116. Funds appropriated for the Bureau of Indian Affairs for postsecondary schools for fiscal year 2002 shall be allocated among the schools proportionate to the unmet need of the schools as determined by the Postsecondary Funding Formula adopted by the Office of Indian Education Programs: SEC. 117. (a) The Secretary of the Interior shall take such action as may be necessary to ensure that the lands comprising the Huron Cemetery in Kansas City, Kansas (as described in section 123 of Public Law 106-291) are used only in accordance with the following provisions: (1) for the benefit of the National Wildlife Refuge System within the State of Minnesota; and (2) for activities authorized by Public Law 106-696; 16 U.S.C. 460aa: SEC. 118. Notwithstanding any other provision of law, in conveying the Twin Cities Regional Center under the authority provided by Public Law 104-134, as amended by Public Law 104-208, the Secretary may accept and retain land and other forms of reimbursement: Provided, That the Secretary may retain and use any such reimbursement until expended and without further appropriation: (1) for the benefit of the National Wildlife Refuge System within the State of Minnesota; and (2) for all activities authorized by Public Law 106-696; 16 U.S.C. 460aa: SEC. 119. Section 412(b) of the National Parks Omnibus Management Act of 1998, as amended (16 U.S.C. 5961) is amended by striking "2001" and inserting "2002": SEC. 120. Notwithstanding other provisions of law, the National Park Service may authorize, through cooperative agreement, the Golden Gate National Parks Association to provide (fee-based) educational and interpretative services and facilities within the Crissy Field and Fort Point Special Purpose Areas of the Presidio: SEC. 121. Notwithstanding title 31, United States Code, provisions for fees and services for uniformed or non-uniformed personnel, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204), cümleler ve metinlerin doğrudan okunması için kullanılmaktadır.

Flood Control Act of 1946, as amended (43 U.S.C. 1701 et seq.).

in the “White River Oil Shale Mine” and described as follows:

T. 10 S., R 24 E., Salt Lake Meridian, sec-

sections 14 through 19, through 30, 33, and 34.

(2) T. 16 S., R. 25 E., Salt Lake Meridian, sec-

sections 18 and 19.

(3) E FFECT OF GRANT.—A grant received under this section shall be in addition to any other funds received by an Indian tribe under any other provision of law. The receipt of a grant under this section shall not affect the elig-

ibility of an Indian tribe receiving funding, or the amount of funding received by the Indian tribe, under the Tribally Controlled Schools Act of 1988 (25 U.S.C. 2501 et seq.) or the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.).

(2) DESCRIPTION OF IMPROVEMENTS AND EQUIPMENT.—The improvements and equipment referred to in subsection (a) are the following:

(1) Mine Service Building,

(2) Sewage Treatment Building,

(3) Water Treatment Building-Plant.

(4) Ventilation/Fan Building.

(5) Water Storage Tanks.

(6) Mine Hoist Cage and Headframe.

(7) Miscellaneous Mine-related equipment.

(8) DESCRIPTION OF LAND.—The land referred to in subsection (a) is the land located in Utah, known as the “White River Oil Shale Mine” and described as follows:

(1) T. 10 S., R 24 E., Salt Lake Meridian, sec-

sections 14 through 19, through 30, 33, and 34.

(2) T. 16 S., R. 25 E., Salt Lake Meridian, sec-

sections 18 and 19.

(9) USE OF PROCEEDS.—The proceeds of the sale under subsection (a)—

(1) shall be deposited in a special account in the Treasury of the United States; and

(2) shall be available until expended, without further Act of appropriation—

(1) to reimburse the Administrator for the direct costs of the sale; and

(2) to reimburse the Bureau of Land Management for any service for the costs of closing and rehabilitating the Mine.

(10) MINE CLOSURE AND REHABILITATION.—The closing and rehabilitation of the Mine (including closing of the mine shafts, site grading, and surface revegetation) shall be conducted in accordance with—

(2) the regulatory requirements of the State of Utah, the Mine Safety and Health Administration, and the Occupational Safety and Health Administration; and

(3) other applicable law.

SEC. 124. The Secretary of the Interior may use or contract for the use of helicopters or motor vehicles on the Sheldon and Hart Na-

tional Wildlife Refuges for the purpose of cap-

turing and transporting horses and burros. The provisions of subsection (a) of the Act of Sep-

ber 8, 1959 (73 Stat. 470; 18 U.S.C. 47(a)) shall not be applicable to such use. Such use shall be in accordance with standard procedures pre-

scribed by the Secretary.

SEC. 125. Upon application of the Governor of a State, the Secretary shall (1) transfer not to exceed 25 percent of that State's formula allocation under the heading “National Park Service, Land Acquisition and State Assistance” to increase State's allocation under the heading “United States Fish and Wildlife Service, State Wildlife Grants” or (2) transfer not to exceed 25 percent of the State's formula allocation under the heading “United States Fish and Wildlife Service, State Wildlife Grants” to increase the State's formula allocation under the heading “National Park Service, Land Acquisition and State Assistance”.

SEC. 126. Section 819 of Public Law 106–568 is hereby repealed.

SEC. 127. Moore’s Landing at the Cape Romain National Seashore in South Caro-

lina is hereby named for George Garris and shall hereafter be referred to in any law, document, or records of the United States as “Garris Landing”.

TITLE II—RELATED AGENCIES

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

FOREST AND RANGELAND RESEARCH

For necessary expenses of fire protection, $242,822,000, to remain available until expended.

STATE AND PRIVATE FORESTRY

For necessary expenses of cooperative work and providing technical and financial assistance to States, territories, possessions, and other

ers, and for forest health management, cooperativa-

conformity, and education and conservation activi-

ties and conducting an international program as authorized, $287,331,000, to remain available until expended, as authorized by law, of which not less than $175,000,000 shall be for the United States Fish and Wildlife Service, Service-wide, and $40,000,000 for Urban and Community Forestry, defined in sec-

SION 250(c)(4)(E)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act. Pro-

vided that none of the funds provided under this heading for the acquisition of lands or in-

terests in lands shall be available until the Senate Committee on Appropriations provide to the Senate Committee, in writing, a list of specific acquisi-

tions to be undertaken with such funds: Pro-

vided further, That notwithstanding any other provision of law, of the funds provided under this heading, $5,000,000 shall be made available to Kake Tribal Corporation as an advance direct lump sum payment to implement the Kake Tribal Corporation Land Transfer Act (Public Law 106–283).

NATIONAL FOREST SYSTEM

For necessary expenses for the Forest Service, not otherwise provided for, for management, protection, improvement, and utilization of the National Forest System, $1,324,491,000, to remain available until expended, of which not more than 50 percent of all moneys received during prior fiscal years as fees collected under the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 4601–4606), are provided for vegetation and watershed manage-

ment, the Secretary may authorize the expendi-

ture or transfer of such sums as necessary to the Department of the Interior, Bureau of Land Management for removal, preparation, and adoption of excess wild horses and burros from National Forest System lands: Provided further, That the funds provided under this heading for Forest Products, $5,000,000 shall be allocated to the Alaska Region, in addition to its normal annual allocation, for the purposes of such Act: Pro-

vided further, That the amount of unobligated balances available at the start of fiscal year 2002 shall be displayed by extended budget line item in the fiscal year 2003 budget justification: Provided further, That funds provided for the Wildlife and Fish Habitat Management, $600,000 shall be provided to the State of Alaska for wildlife monitoring activities.

WILDFIRE MANAGEMENT

For necessary expenses for forest fire presumpession activities on National Forest System lands, for emergency fire suppression on or adjacent to such lands or other lands under fire protection agreement, and for emergency re-

habilitation of burned-over National Forest Sys-

tem lands and water, $1,115,594,000, to remain available until expended: Provided, That such funds including unobligated balances under this heading and available for repayment of advances from other appropriations accounts previously transferred for such purposes: Provided further, That not less than 50 percent of any unobli-

gated balances remaining (exclusive of amounts for hazardous fuels reduction) at the end of fis-

cal year 2001 shall be transferred, as repayment for past advances that have not been repaid, to the fund established pursuant to section 3 of the Water Reclamation Act (7 U.S.C. 171–314) for the purposes of such Act. Provided further, That notwithstanding any other provision of law, $4,000,000 of funds appro-

priated under this appropriation shall be used to fund the 2001 Science Reserves Joint Fire Science Program: Provided further, That all authorities for the use of funds, including
the use of contracts, grants, and cooperative agreements contained in the Rangeland Research appropriation, are also available in the utilization of these funds for Fire Science Research: Provided further, That funds provided hereunder may be available for emergency rehabilitation and restoration, hazard reduction activities in the urban-wildland interface, support to federal emergency response, and wildfire suppression activities of the Forest Service: Provided further, That amounts under this heading may be transferred as specified in the report accompanying this Act to the “State and Private Forestry” projects in the Forest Service” and “Capital Improvement and Maintenance”, and “Capital Improvement and Maintenance”的 accounts to fund state fire assistance, volunteer fire assistance, and forest health management, vegetation and watershed management, heritage site rehabilitation, wildlife and fish habitat management, trails and facilities maintenance and restoration; Provided further, That transfers of any amounts in excess of those specified shall require approval of the House and Senate Committees on Appropriations in compliance with reprogramming contained in the Act, and NEA. Provided further, That the costs of implementing any cooperative agreement between the Federal government and any non-Federal party may be shared, as mutually agreed on by the affected parties: Provided further, That in entering into such grants or cooperative agreements, the Secretary may consider the enhancement of local and small business employment opportunities for rural communities, and that in entering into procurement contracts under this section on a best value basis, the Secretary may take into account the ability of an entity to enhance local and small business employment opportunities in rural communities, and that the Secretary may award procurement contracts or cooperative agreements under this section to entities that include local non-profit entities, Youth Conservation Corps or related partnerships with State, local or non-profit youth groups, or small or disadvantaged businesses: Provided further, That:

(1) In expending the funds provided with respect to this Act for hazardous fuels reduction, the Secretary of the Interior and the Secretary of Agriculture may conduct fuel reduction treatments on Federal lands using any contracting and hiring authorities available to the Secretaries of the Interior and Agriculture, and any other authorities that may be available under this Act and any other applicable authority to the Forest Service, $128,977,000 to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

ACQUISITION OF LANDS FOR NATIONAL FORESTS AND RANGELAND RESEARCH

For the purposes of range rehabilitation, protection, and improvement, 30 percent of all moneys received during the prior fiscal year, as fees for grazing domestic livestock on lands in National Forests in the Western States, pursuant to section 404(b)(1) of Public Law 94–579, as amended, to be for the purposes of such Act.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

For administrative expenses of the Forest Service for the current fiscal year shall be available for: (1) purchase of not to exceed 132 passenger motor vehicles of which eight will be used primarily for law enforcement purposes and of which 130 shall be for replacement; acquisition of 25 passenger motor vehicles from excess sources, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed 100 (categories of sufficient aircraft from excess sources to maintain the operable fleet of 195 aircraft for use in Forest Service wildland fire programs and other Forest Service programs); (2) the replacement of existing aircraft being replaced may be sold, with proceeds derived or trade-in value used to offset the purchase price for the replacement aircraft; (3) purchases pursuant to 7 U.S.C. 2225, and not to exceed $100,000 for employment under 5 U.S.C. 3109; (4) purchase, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed $100,000 for employment under 5 U.S.C. 3109; (5) purchase, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed $100,000 for employment under 5 U.S.C. 3109; (6) the cost of uniforms as

For the purposes of range rehabilitation, protection, and improvement, 30 percent of all moneys received during the prior fiscal year, as fees for grazing domestic livestock on lands in National Forests in the Western States, pursuant to section 404(b)(1) of Public Law 94–579, as amended, to be for the purposes of such Act.

ACQUISITION OF LANDS FOR NATIONAL FORESTS AND RANGELAND RESEARCH

For the purposes of range rehabilitation, protection, and improvement, 30 percent of all moneys received during the prior fiscal year, as fees for grazing domestic livestock on lands in National Forests in the Western States, pursuant to section 404(b)(1) of Public Law 94–579, as amended, to be for the purposes of such Act.
Notwithstanding any other provision of law, any appropriations or funds available to the Forest Service not to exceed $500,000 may be used to reimburse the General Counsel (OGC), Department of Agriculture, for travel and related expenses incurred as a result of OGC assistance or participation requested by the Forest Service at meetings, training sessions, management reviews, land purchase negotiations and similar non-litigation related matters.

Future budget justifications for both the Forest Service and the Department of Agriculture should clearly display the sums previously transferred and the requested funding transfers.

The Forest Service shall fund indirect expenses, that is expenses not directly related to specific programs or to the accomplishment of specific work on-the-ground, from any funds available to the Forest Service: Provided, That the Forest Service shall implement and adhere to the definitions of indirect expenditures established pursuant to Public Law 105–277 on a nationwide basis without flexibility for modification by any organizational level except the Washington Office, and when changed by the Washington Office, such changes in definition shall be promptly communicated to the affected entities.

Any appropriations or funds available to the Forest Service may be used for assistance to or through the Agency for International Development and the Foreign Agricultural Service in connection with forest, rangeland research, technical information, and assistance in foreign countries, and shall be available to support forestry and related natural resource activities outside the United States in territories and possessions, including technical assistance, education and training, and cooperation with United States and international organizations.

None of the funds available to the Forest Service under this Act shall be subject to transfer pursuant to sections 14(c)(1) and (2), and section 14(a)(2) of the Smith River Landmark: Provided, That, subject to such amounts shall not exceed $750,000.

The Secretary of Agriculture is authorized to enter into grants, contracts, and cooperative agreements as appropriate with the Pinchot Institute for Conservation, as well as with public and private agencies, organizations, institutions, and individuals, to provide for the development, administration, maintenance, or restoration of land, facilities, or Forest Service programs, at the Grey Towers National Historic Landmark: Provided, That, subject to such amounts shall not exceed $750,000.

Funds appropriated to the Forest Service under this Act shall be available for payments to counties within the Columbia River Gorge National Scenic Area, pursuant to sections 14(c)(1) and (2), and section 16(a)(2) of Public Law 89–663.

The Secretary of Agriculture is authorized to enter into grants, contracts, and cooperative agreements as appropriate with the Pinchot Institute for Conservation, as well as with public and private agencies, organizations, institutions, and individuals, to provide for the development, administration, maintenance, or restoration of land, facilities, or Forest Service programs, at the Grey Towers National Historic Landmark: Provided, That, subject to such amounts shall not exceed $750,000.

The Secretary of Agriculture may authorize the sale of excess buildings, facilities, and other properties owned by the Forest Service and located on the Green Mountain National Forest, the revenues of which shall be retained by the Forest Service and may be spent from appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds. Changes between estimated and actual indirect expenditures shall be reported in subsequent budget justifications: Provided, That during fiscal year 2002 the Secretary shall limit total annual indirect obligations from the Brush Disposal, Knutson–Vandenberg, Reclamation, Salvage Sale, Roads and Trails, and other percent of the total obligations from each fund. Obligations in excess of 20 percent which would otherwise be charged to the above funds may be charged to appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds.

The Secretary of Agriculture may authorize the sale of excess buildings, facilities, and other properties owned by the Forest Service and located on the Green Mountain National Forest, the revenues of which shall be retained by the Forest Service and may be spent from appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds. Changes between estimated and actual indirect expenditures shall be reported in subsequent budget justifications: Provided, That during fiscal year 2002 the Secretary shall limit total annual indirect obligations from the Brush Disposal, Knutson–Vandenberg, Reclamation, Salvage Sale, Roads and Trails, and other percent of the total obligations from each fund. Obligations in excess of 20 percent which would otherwise be charged to the above funds may be charged to appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds.

The Secretary of Agriculture may authorize the sale of excess buildings, facilities, and other properties owned by the Forest Service and located on the Green Mountain National Forest, the revenues of which shall be retained by the Forest Service and may be spent from appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds. Changes between estimated and actual indirect expenditures shall be reported in subsequent budget justifications: Provided, That during fiscal year 2002 the Secretary shall limit total annual indirect obligations from the Brush Disposal, Knutson–Vandenberg, Reclamation, Salvage Sale, Roads and Trails, and other percent of the total obligations from each fund. Obligations in excess of 20 percent which would otherwise be charged to the above funds may be charged to appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds.

The Secretary of Agriculture may authorize the sale of excess buildings, facilities, and other properties owned by the Forest Service and located on the Green Mountain National Forest, the revenues of which shall be retained by the Forest Service and may be spent from appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds. Changes between estimated and actual indirect expenditures shall be reported in subsequent budget justifications: Provided, That during fiscal year 2002 the Secretary shall limit total annual indirect obligations from the Brush Disposal, Knutson–Vandenberg, Reclamation, Salvage Sale, Roads and Trails, and other percent of the total obligations from each fund. Obligations in excess of 20 percent which would otherwise be charged to the above funds may be charged to appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds.

The Secretary of Agriculture may authorize the sale of excess buildings, facilities, and other properties owned by the Forest Service and located on the Green Mountain National Forest, the revenues of which shall be retained by the Forest Service and may be spent from appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds. Changes between estimated and actual indirect expenditures shall be reported in subsequent budget justifications: Provided, That during fiscal year 2002 the Secretary shall limit total annual indirect obligations from the Brush Disposal, Knutson–Vandenberg, Reclamation, Salvage Sale, Roads and Trails, and other percent of the total obligations from each fund. Obligations in excess of 20 percent which would otherwise be charged to the above funds may be charged to appropriated funds and the Knutson–Vandenberg, Brush Disposal, Cooperative Work–Other, and Salvage Sale funds.

INDIAN HEALTH SERVICE
INDIAN HEALTH SERVICES

For expenses necessary to carry out the Act of August 5, 1954 (68 Stat. 674), the Indian Self-Determination Act, the Indian Health Care Improvement Act, and titles II and III of the Public Health Service Act with respect to the Indian Health Service, $2,388,614,000, together with payments received during the fiscal year pursuant to 42 U.S.C. 280b for services furnished by the Indian Health Service: Provided, That funds made available to tribes and tribal organizations through contracts, grant agreements, or any other agreements or compacts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 450), shall be deemed to be obligated at the time of the grant contract awarded, and shall remain available to the tribe or tribal organization without fiscal year limitation: Provided further, That $15,000,000 shall remain available until expended for the Indian Astronautic Health Emergency Fund: Provided further, That $430,776,000 for contract medical care shall remain available for obligation until September 30, 2003: Provided further, That the amounts received by tribes and tribal organizations under title IV of the Indian Health Care Improvement Act shall remain available until expended for the purpose of achieving compliance with the applicable conditions and requirements of标题 XVIII and XIX of the Social Security Act (exclusive of planning, design, or construction of new facilities): Provided further, That funding contained herein shall not be expended in any earlier appropriations Acts for scholarship programs under the Indian Health Care Improvement Act (25 U.S.C. 1613) shall remain available for obligation until September 30, 2003: Provided further, That funding contained herein shall be used, as needed, to carry out activities typically responsible to the receiving tribes and tribal organizations under the authority of title IV of the Indian Health Care Improvement Act shall be reported and accounted for and available to the receiving tribes and tribal organizations until expended: Provided further, That, notwithstanding any other provision of law, the amounts provided herein, not to exceed $288,234,000 shall be for payments to tribes and tribal organizations for contract or grant support costs associated with contracts, grants, self-governance compacts or annual funding agreements made between the Service and a tribe or tribal organization pursuant to the Indian Self-Determination Act of 1975, as amended, prior to or during fiscal year 2002, of $40,000,000, and such costs shall be payable to the States under contracts or grants, self-governance compacts or annual funding agreements: Provided further, That funds provided in this Act for expenses to carry out the requirements of the Indian Health Care Improvement Act for the construction of buildings, equipment, and other contributions from public and private sources, to be used, as needed, to carry out activities typically associated with the Navajo Nation’s new public health facility in Shiprock, New Mexico, and such the amounts reported by the Secretary of Health and Human Services under the authority of title IV of the Indian Health Care Improvement Act shall be used, as needed, to carry out activities typically associated with the Navajo Nation’s new public health facility in Shiprock, New Mexico, and such Indian Health Service INDIAN HEALTH FACILITIES

For construction, repair, maintenance, improvement, and equipment of health and related
auxiliary facilities, including quarters for personnel, medical equipment, site and warehouse drawings; acquisition of sites, purchase and erection of modular buildings, and purchases of trailers; and for provision of domestic and community navigation facilities for Indians, as authorized by section 114 of the Act of August 5, 1954 (42 U.S.C. 2004a), the Indian Self-Determination Act, and the Indian Health Care Improvement Act, and for expenses necessary to carry out such Acts and titles II and III of the Public Health Service Act with respect to environmental health and facilities support activities of the Indian Health Service, $263,854,000, to remain available until expended: Provided, That notwithstanding any other provision of law, funds appropriated for the planning, design, construction or renovation of health facilities for the benefit of an Indian tribe or tribes may be used to purchase land for sites to construct, improve, or enlarge health or related facilities: Provided further, That from the funds appropriated herein, $5,000,000 shall be designated by the Indian Health Service as a contribution to the Yukon-Kuskokwim Health Corporation (YKHC) for priority projects for the acquisition of land, planning, design and construction of 79 staff quarters at Bethel, Alaska, pursuant to the negotiated project agreement between the Department of Health and Human Services and the YKHC: Provided further, That this project shall not be subject to the construction provisions of the Indian Self-Determination and Education Assistance Act, but may be removed from the Indian Health Service priority list upon completion: Provided further, That the Federal Government shall not be liable for any property damages or other construction claims that may arise from the YKHC undertaking this project: Provided further, That the land shall be owned or leased by the YKHC and title to quarters shall remain vested in the YKHC: Provided further, That no more than $5,000,000 shall remain available until expended for the purpose of funding joint venture health care facility projects authorized under the Indian Health Care Improvement Act, as amended: Provided further, That priority, by rank order, shall be given to tribes with outlying projects on the existing Indian Health Services priority list that have an approved planning document and, can demonstrate by March 1, 2002, the financial capability necessary to provide an appropriate facility: Provided further, That not to exceed $500,000 shall be used by the Indian Health Service to purchase TRANSM equipment from the Department of Defense for distribution to the Indian Health Service and tribal facilities: Provided further, That not to exceed $500,000 shall be used by the Indian Health Service to obtain ambulances for the Indian Health Service and tribal facilities: Provided further, That not to exceed $500,000 shall be used by the Indian Health Service to provide an appropriate facility pursuant to the Indian Health Service and the General Services Administration: Provided further, That not to exceed $500,000 shall be used for equipment or furnishings in a single level position contract authorized under title I of the Indian Health Service and the General Services Administration Act of 1975, as amended, may be used rather than grants to fund small ambulatory facility construction projects: Provided further, That if a contract is used, the IHS is authorized to im- prove municipal, private, or tribal lands, and the funds authorized under this Act for the purpose of building, constructing or expanding, in whole or in part, sanitary and convenience facilities, subject to charges, and the proceeds from the Department of Housing and Urban Development to the Indian Health Service shall be administered under Public Law 86–121 (the Indian Sanitation Facilities Act) and Public Law 93–638, as amended: Funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to the limitations and restrictions that curtail Federal travel and transportation: Notwithstanding any other provision of law, funds previously or hereinafter made available to a tribe or tribal organization through a contract, grant, or agreement authorized by title I or title III of the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 450), may be deobligated and reobligated for services as authorized by 5 U.S.C. 5901–5902; for expenses of attendance at meetings which are concerned with the functions or activities which will contribute to improved conduct, supervision, or management of those functions or activities: In accordance with the provisions of the Indian Health Care Improvement Act, non-Indian patients may be extended health care at all tribally administered ambulatory health care facilities subject to charges, and the proceeds from the Department of Housing and Urban Development to the Indian Health Service shall be administered under Public Law 86–121 (the Indian Sanitation Facilities Act) and Public Law 93–638, as amended: None of the funds made available in this Act are to be used for the purpose of relocating single Tribal members to the land acquired pursuant to 25 U.S.C. 640d–10. INSTITUTE OF AMERICAN INDIAN AND ALASKA NATIVE CULTURE AND ARTS DEVELOPMENT PAYMENT TO THE INSTITUTE For payment to the Institute of American Indian and Alaskan Native Culture and Arts Development, as authorized by title XV of Public Law 99–458, as amended (20 U.S.C. 56 part A), $4,490,000. SMITHSONIAN INSTITUTION SALARIES AND EXPENSES For necessary expenses of the Smithsonian Institution, as authorized by law, including research in the fields of art, science, and history; development, preservation, and documentation of the National Collections; presentation of public exhibits and performances; collection, preparation, dissemination, and exchange of information; publication of conduct of education, training, and museum assistance programs; maintenance, alteration, operation, lease (for terms not to exceed 30 years), and protection of buildings, facilities, and approaches; not to exceed $100,000 for services as authorized by 5 U.S.C. 3109; up to five replacement passenger vehicles; purchase, rental, repair, and cleaning of equipment, vehicles, and vessels; which not to exceed $43,713,000 for the instrumentation program, collections acquisition, exhibition reinstallation, the National Museum of the American Indian, the Native American program, research equipment, information management, and Latino programming shall remain Continue...
available until expended, and including such funds as are used to support American overseas research centers and a total of $125,000 for the Council of American Overseas Research Centers: Provided, That funds appropriated herein are also available for advance payments to independent contractors performing research services or participating in official Smithsonian presentations: Provided further, That the Smithsonian Institution may expend Federal appropriated designations in this Act for lease or rent payments for long term and swing space, as rent payable to the Smithsonian Institution, and such payments shall be deposited in a general trust fund of the Institution to the extent that federally supported activities are housed in the Smithsonian science programs, including damage, monitor structure movement, or provide unless identified as repairs to minimize water National Zoological Park in Washington, D.C., may be used for the Holt House located at the District of Columbia: Provided further, That this use of Federal appropriations shall not be construed as debt service, a Federal guarantee of, a transfer of risk to, or an obligation of, the Federal Government: Provided further, That no appropriated funds may be used to service debt which is incurred to finance the costs of acquiring the 900 H Street building or of planning, designing, and constructing improvements to such building.

REPAIR, RESTORATION AND ALTERATION OF FACILITIES

For necessary expenses for maintenance, repair, restoration, and alteration of facilities owned or occupied by the Smithsonian Institution, by contract or otherwise, as authorized by section 2 of the Act of August 22, 1949 (63 Stat. 626), including not to exceed $30,000 for services as authorized by 5 U.S.C. 3109, $67,900,000, to remain available until expended of which $10,000,000 is provided for maintenance, repair, rehabilitation and alteration of facilities at the National Zoological Park: Provided, That contracts awarded for environmental systems, protection systems, and repair or renovation of buildings owned or occupied by the National Gallery of Art, by contract or otherwise, as authorized, $14,200,000: Provided, That contracts awarded for environmental systems, protection systems, and repair or renovation of buildings of the National Gallery of Art may be negotiated with selected contractors and awarded on the basis of contractor qualifications as well as price.

CONSTRUCTION

For necessary expenses for construction, $25,000,000, to remain available until expended.

ADMINISTRATIVE PROVISIONS, SMITHSONIAN INSTITUTION

None of the funds in this or any other Act may be used to initiate the design for any proposed expansion of current space or new facility without consultation with the House and Senate Appropriations Committee on Commerce.

None of the funds in this or any other Act may be used for the Holt House located at the National Zoological Park in Washington, D.C., unless identified as repairs to minimize water damage, monitor structure movement, or provide interim structural support.

None of the funds in this or any other Act may be used to make any changes to the existing Smithsonian science programs, including closure of facilities, relocation of staff or redefinition of functions and programs, without approval of the Board of Regents of recommendations received from the Science Commission.

None of the funds available to the Smithsonian may be reprogrammed without the advance written approval of the House and Senate Committees on Appropriations in accordance with the procedures contained in House Report No. 105-163.

NATIONAL GALLERY OF ART

SALARIES AND EXPENSES

For the upkeep and operations of the National Gallery of Art, the protection and care of the works of art therein, and administrative expenses, as authorized by the National Gallery of Art Act of March 24, 1937 (50 Stat. 51), as amended by the public resolution of April 13, 1939 (Public Resolution 9, Seventy-sixth Congress), including personnel services for the operation of the National Endowment for the Humanities, in a total of $210,000, to remain available in advance when authorized by the treasurer of the Galleries for membership in library, museum, and art associations or societies whose publications or services are available to members only, or for authorized staff at a price lower than the general public; purchase, repair, and cleaning of uniforms for guards, and uniforms, or allowances therefor, for employees as authorized by law (5 U.S.C. 5901-5902); purchase or rental of devices and services for protecting buildings and contents thereof, and maintenance, operation, and repair of buildings, grounds, and grounds; purchase of services for restoration and repair of works of art for the National Gallery of Art by contracts made, without advertising, with individuals, firms, or organizations at such rates or prices and under such terms and conditions as the Gallery may deem proper, $68,967,000, of which not to exceed $3,026,000 for the special exhibition program shall remain available until expended.

REPAIR, RESTORATION AND RENOVATION OF BUILDINGS

For necessary expenses of repair, restoration and renovation of buildings, grounds and facilities owned or occupied by the National Gallery of Art, by contract or otherwise, as authorized, $12,200,000: Provided, That contracts awarded for environmental systems, protection systems, and exterior repair or renovation of buildings of the National Gallery of Art may be negotiated with selected contractors and awarded on the basis of contractor qualifications as well as price.

JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

For necessary expenses for the operation, maintenance and security of the John F. Kennedy Center for the Performing Arts, $15,000,000.

CONSTRUCTION

For necessary expenses for capital repair and restoration of the existing features of the building and site of the John F. Kennedy Center for the Performing Arts, $19,000,000, to remain available until expended.

WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARSHIPS

For expenses necessary in carrying out the provisions of the Woodrow Wilson Memorial Act of 1968, to include hire of passenger vehicles and services as authorized by 5 U.S.C. 3109, $7,796,000.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

For expenses necessary in carrying out the provisions of the Arts and Humanities Act of 1965, as amended, of which not to exceed $7,000,000 shall be available to the National Endowment for the Arts for the support of projects and productions in the arts through assistance to organizations and individuals pursuant to sections 5(c) and 5(g) of the Act, for program support, and for administering the functions of the Act, to remain available until expended.

NATIONAL ENDOWMENT FOR THE ARTS

GRANTS AND ADMINISTRATION

For necessary expenses to carry out the National Endowment for the Arts and the Humanities Act of 1965, as amended, $98,234,000 shall be available to the National Endowment for the Arts for the support of projects and productions in the arts through assistance to organizations and individuals pursuant to sections 5(c) and 5(g) of the Act, for program support, and for administering the functions of the Act, to remain available until expended.

CHALLENGE AMERICA ARTS FUND

For necessary expenses as authorized by Public Law 89-209, as amended, $1,174,000 for support for arts education and public outreach activities to be administered by the National Endowment for the Arts, to remain available until expended.

ADMINISTRATIVE PROVISIONS

None of the funds appropriated to the National Endowment for the Arts and the Humanities may be used to process any grant or contract documents which do not include the text of 16 U.S.C. 1903: Provided, That none of the funds appropriated to the National Endowment for the Arts and the Humanities may be used for official representation and representation expenses: Provided further, That funds from nonappropriated sources may be used as necessary for official representation and representation expenses.

COMMISSION OF FINE ARTS

SALARIES AND EXPENSES

For expenses necessary by the Act establishing a Commission of Fine Arts (40 U.S.C. 104), $1,174,000: Provided, That the Commission is authorized to charge fees to cover the full costs of its publications, and such fees shall be credited to this account as offsetting collections, to remain available until expended without further appropriation.

NATIONAL CAPITAL ARTS AND CULTURAL AFFAIRS (52 Stat. 1037) including budgetary or other estimates of revenue to be credited to this account as offsetting collections, to remain available until expended without further appropriation.

For expenses necessary for the operation of the Arts and Humanities Act of 1965, as amended, $109,882,000, shall be available to the National Endowment for the Arts for the support of projects and productions in the arts through assistance to organizations and individuals pursuant to sections 5(c) and 5(g) of the Act, for program support, and for administering the functions of the Act, to remain available until expended.

NATIONAL Capital Planning Commission

SALARIES AND EXPENSES

For necessary expenses as authorized by the National Capital Planning Commission Act of 1982 (40 U.S.C. 71-71i), including services as authorized by 5 U.S.C. 3109, $7,253,000: Provided, That all appointed members of the Commission will be compensated at a rate not to exceed the daily equivalent of the annual rate of pay for positions at level IV of the Executive Schedule for each day such member is engaged in the actual performance of duties.

UNITED STATES HOLOCAUST MEMORIAL MUSEUM

For expenses of the Holocaust Memorial Museum, as authorized by Public Law 106-292 (36 United States Congress, Senate. CONGRESSIONAL RECORD—SENATE July 11, 2001 12870
under the general mining laws.

SEC. 306. No assessments may be levied against anyone purchasing on Federal lands. The Secretaries shall have the sole responsibility to choose the party contractor to be selected by the Bureau of Land Management to conduct a mineral examination of the mining claims or mill sites contained in a patent application as set forth in subsection (b). The Bureau of Land Management shall have the sole responsibility to choose and pay the third-party contractor in accordance with the standard procedures employed by the Bureau of Land Management in the retention of third-party contractors.

SEC. 310. Notwithstanding any other provision of law, amounts appropriated to or earmarked in committee reports for the Bureau of Indian Affairs and the Indian Health Service by Public Laws 103-138, 103-312, 104-134, 104-208, 105-83, 105-277, 106-113, and 106-281 for payments to tribes may be used for tribal contracts as authorized by the Indian Tribal Contract Reform Act of 1994. Funds for costs of lawsuits may be paid by the donor or the representative of the donor to the Chairman. The Chairman shall enter the proceeds in a special interest-bearing account to the credit of the appropriate endowment for the purposes specified in each case.

SEC. 311. (a) In providing services or awarding financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, funds appropriated by such Act, the Chairperson of the National Endowment for the Arts shall ensure that priority is given to providing services or awarding financial assistance for projects, productions, workshops, or programs that serve underserved populations.

(b) In this section:

(1) The term “underserved population” means a population of individuals, including urban minorities, who have historically been outside the purview of arts and humanities programs due to factors such as a higher rate of poverty, lack of access to the arts, or geographic isolation.

(2) The term “poverty line” means the poverty line (as defined by the Office of Management and Budget, and revised annually in accordance with section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))) applicable to a family of the size involved.

(c) In providing services and awarding financial assistance under the National Foundation on the Arts and the Humanities Act of 1965 with funds appropriated by such Act, the Chairperson of the National Endowment for the Arts shall ensure that priority is given to providing services or awarding financial assistance for projects, productions, workshops, or programs that are of national impact or availability or are able to tour several States.

(2) The Chairperson shall not make grants except in the aggregate of 15 percent, in the aggregate of such funds to any single State, excluding grants made under the authority of paragraph (1).

(3) The Chairperson shall report to the Congress annually and by State and/or program, grants awarded by the Chairperson in each grant category under section 5 of such Act; and
CONGRESSIONAL RECORD—SENATE

July 11, 2001

SEC. 318. No part of any appropriation contained in this Act shall be expended or obligated to complete and issue the 5-year program under the Forest Service Rangeland Renewable Resources Planning Act.

SEC. 319. None of the funds in this Act may be used to support Government-wide administrative functions unless such functions are justified in the budget process and funding is approved by the House and Senate Committees on Appropriations.

SEC. 320. None of the funds in this Act may be used for planning, design or construction of improvements to Pennsylvania Avenue in front of the White House without the advance approval of the House and Senate Committees on Appropriations.

SEC. 321. Amounts deposited during fiscal year 2001 in the roads and trails fund provided for in the fourteenth paragraph under the heading “FOREST SERVICE” of the Act of March 4, 1913 (37 Stat. 843; 16 U.S.C. 501), shall be used by the Secretary, without regard to the State in which the amounts were derived, to repair or reconstruct roads, bridges, and trails on National Forest System lands or to carry out other projects to improve forest health conditions, which may include the repair or reconstruction of roads, bridges, and trails on National Forest System lands in the wildlife community interface where there is an abnormally high risk of fire. The projects shall emphasize reducing risks to human safety and public health and property and enhancing ecological functions, long-term forest productivity, and biological integrity. The projects may be completed in a subsequent fiscal year. Funds shall not be expended under this section to replace public facilities which would otherwise be expended from the timber salvage sale fund. Nothing in this section shall be construed to exempt any project from any environmental law.

SEC. 322. Other than in emergency situations, none of the funds in this Act may be used to operate telephone answering machines during core business hours. Each answering machine shall include an option that enables callers to reach promptly an individual on duty with the agency being contacted.

SEC. 323. The timber sale in Region 10 shall be advertised if the indicated rate is deficit when appraised under the transaction evidence appraisal system using domestic Alaska values for western red cedar. Provided, That sales which are deficit when appraised under the transaction evidence appraisal system using domestic Alaska values for western red cedar may be advertised upon receipt of a written request by a prospective, informed bidder, who has the opportunity to review the Forest Service’s cruise and harvest cost estimate for that timber. Program accomplishments shall be based on volume sold. Should Region 10 sell, in fiscal year 2002, the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan in sales which are not deficit when appraised under the transaction evidence appraisal system using domestic Alaska values for western red cedar, the volume of western red cedar shall be ascertained at the time each sale is awarded. Western red cedar shall be deemed “surplus to the needs of domestic processors in Alaska” when the timber sale holder has presented to the Forest Service documentation of the inability to sell western red cedar logs from a given sale to domestic Alaska processors at price equal to or greater than the log selling value stated in the contract. All additional domestic processors considered to be surplus to Alaska or contiguous U.S. domestic processors may be exported to foreign markets at the election of the timber sale holder. All Alaska processors (domestic and international) that are authorized to export western red cedar shall be given priority for export prices at the election of the timber sale holder.

SEC. 324. None of the funds appropriated by this Act shall be used to propose or issue rules, regulations, decrees, or acts, for real property acquisition or maintenance, or in preparation for implementation, or in preparation for implementation, of the Kyoto Protocol which was adopted on December 11, 1997, in Kyoto, Japan at the Third Conference of the Parties to the United Nations Framework Convention on Climate Change, which has not been submitted to the Senate for advice and consent to ratification (see article II, section 2, clause 2, of the United States Constitution, and which has not entered into force pursuant to article 25 of the Protocol.

SEC. 325. The Forest Service, in consultation with the Department of Labor, shall review Forest Service campground concessions policy to determine if modifications can be made to Forest Service campground concessions so that such concessions fall within the regulatory exemptions of 29 CFR 4.122(b). The Forest Service shall offer in fiscal year 2002 such concession prospectuses under section 324. To the extent that any prospectus that does not meet the requirements of the regulatory exemption shall be offered as a service contract in accordance with the requirements of 41 U.S.C. 351–358.

SEC. 326. A project undertaken by the Forest Service under the Recreation Fee Demonstration Program as authorized by section 315 of the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1996, as amended, shall not result in—

(1) the displacement of the holder of an authorization to provide commercial recreation services on Federal lands. Prior to initiating any project, the Secretary shall consult with potentially affected holders to determine what impacts the project may have on the holders. Any modifications to the authorization shall be made within the terms and conditions of the authorization and authorities of the impacted agency.

(2) the return of a commercial recreation service to the Secretary for operation when such services have been provided in the past by a private sector provider, except when—

(A) the private sector provider fails to bid on such opportunities;

(B) the private sector provider terminates its relationship with the agency;

(C) the agency permit for non-compliance with the terms and conditions of the authorization.

In such cases, the agency may use the Recre
cation Fee Demonstration Program to provide for operations until a subsequent operator can be found through the offering of a new prospectus.

SEC. 327. The authority to enter into stewardship and end result contracts provided to the Forest Service in accordance with section 347 of title III of section 101(e) of division A of Public Law 105–277 is hereby expanded to authorize the Forest Service to enter into an additional 28 contracts subject to the same terms and conditions as provided in that section. Provided, That the additional contracts authorized by this section shall be allocated to Region 1 and at least 3 to Region 6.

SEC. 328. Any regulations or policies promulgated or adopted by the Departments of Agriculture or the Interior regarding recovery of costs for processing authorizations to occupy and use Federal lands under their control shall adhere to and incorporate the following principle arising from Office of Management and Budget Circular, A–25: no charge should be made for a service when the identification of the specific beneficiary is obscure, and the service can be economically and appropriately by the general public.

SEC. 329. Notwithstanding any other provision of law, for fiscal year 2002, the Secretary of Agriculture shall authorize the Secretary of the Treasury to issue, without regard to section 9004 of the Stewart-Like bill, permits as a service contract in accordance with section 1002 of the Public Law 105–277, Division A, section 101(e), is amended by striking “2002” and inserting “2004”.

SEC. 330. The Secretary of Agriculture, acting through the Chief of the Forest Service shall:

(1) extend the special use permit for the Sioux County Campground in the Absaroka Beartooth Wilderness Area, Montana, held by Montana State University—Billings for a period of 50 years; and

(2) solicit public comments at the end of the 50 year period to determine whether another extension should be granted.

SEC. 333. LOCAL EXEMPTIONS FROM FOREST SERVICE DEMONSTRATION PROGRAM FEES, Section 6906 of Title III, United States Code, is amended—

(1) by inserting “(a) IN GENERAL.—” before “Necessary”; and

(2) by adding at the end following:

(b) LOCAL EXEMPTIONS FROM DEMONSTRATION PROGRAM FEES.—

“IN GENERAL.—Each unit of general local government that lies in whole or in part within the White Mountain National Forest and persons residing within the boundaries of that unit of general local government shall be exempt during that fiscal year from any requirement to pay a Demonstration Program Fee (parking permit fee) imposed by the Secretary of Agriculture for access to the Forest.

(2) ADMINISTRATION.—The Secretary of Agriculture shall establish a method of identifying persons who are eligible for exemption under paragraph (1). This method may include valid form of identification including a drivers license.

This Act may be cited as the “Department of the Interior and Related Agencies Appropriations Act, 2002”. 
Mr. REID. I suggest the absence of a quorum.

The Acting President pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent the order for the quorum call be terminated.

The Acting President pro tempore. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I am very honored to join with my colleague, the distinguished Senator from Montana, Mr. BURNS, in bringing before the Senate H.R. 2217, the Interior and related agencies bill for fiscal year 2002, as amended, by the Senate Appropriations Committee.

This is the first of the 13 annual appropriations measures to be considered by the Senate this year. In my opinion, this is a well-crafted bill. It balances both the needs of the American people and the resources available to the committee. We only have so much money available, and we aren't going to spend what we ain't got.

That being the situation then, I urge my colleagues to adopt this bill in a timely fashion so we can proceed to conference with the House of Representatives. We have gotten a late start to this year and we have to work hard and long to catch up. Darkness may have fallen, from time to time, before we catch up on these appropriations bills.

H.R. 2217 provides more than $1.2 billion in much-needed funding to attack the deferred maintenance problems at our national parks, our national wildlife refuges, our national forests, and other federal recreational facilities across the country. The bill would provide $480 million to the National Park Service, $108 million to the Fish and Wildlife Service, $78 million to the Bureau of Land Management, and $541 million to the Forest Service for literally hundreds, hundreds and hundreds of important maintenance projects.

In addition, the bill restores $35 million in abandoned mine clean-up funds that were unwisely proposed to be cut by the administration. We are not going down that road, Mr. President. It restores nearly $80 million in proposed cuts to the budget of the U.S. Geological Survey, a matter of great importance to many of our colleagues. The bill fully funds the construction needs of the next six schools on the priority list of the Bureau of Indian Affairs, while increasing funding for the Indian Health Service. It increases funding for important energy research programs overseen by Department of Energy, another issue of particular importance to those from the West. Finally, this bill provides nearly $895 million in funding for various cultural agencies: agencies such as the Smithsonian Institution, the National Gallery of Art, the Kennedy Center for the Performing Arts, the National Endowment for the Arts, the National Endowment for the Humanities, and the Office of Museum Services.

I am proud of the fact that the committee has kept its previous commitment and has fully funded the Conservation Spending Category established in title VIII of last year's Interior appropriations bill. Included in that amount is $406 million for federal land acquisition; $221 million for State and other conservation programs such as endangered species programs and wetland conservation programs; $137 million for historic preservation programs; an additional $50 million for the Payment-In-Lieu-of-Taxes program; and $180 million for Federal infrastructure improvements.

This is a well-balanced bill, given the demands placed on the committee as a result of 1,799 Member requests versus the resources available to it. Despite that, I know there are Members who are passionate about some of the programs funded in this bill, and they would like to increase funding in one area or another. I appreciate that. I respect the right of every Member to come to the floor and offer such an amendment. But let me unfurl the warning flag. As reported by the Appropriations Committee, this bill is fully consistent with the 302(b) allocation provided to the Interior Subcommittee.

In short, in plain, simple, mountain language, that means there is no extra money on the table waiting to be spent—none, no extra money waiting on the table, waiting to be spent.

Friends, Romans, countrymen, lend me your ears: There is no extra money on the table. Any amendment proposing to increase spending in one area of the bill will have to be offset with a cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area. Any Senator who wishes to add money may have to cut in some other area.

But when I ran for the office of United States Senator for the eighth consecutive 6-year term, I didn’t say just sign me up for 3 days a week. I didn’t tell the majority whip when I was sworn in here, don’t count on me on any Fridays or Saturdays. I didn’t say that. I hope this is mere rumor that I hear.

But when I ran for the office of United States Senator for the eighth consecutive 6-year term, I didn’t say just sign me up for 3 days a week. I didn’t tell the majority whip when I was sworn in here, don’t count on me on any Fridays or Saturdays. I didn’t say that. I hope this is mere rumor that I hear that certain Senators have been complaining that they have been working...
too long, too late, too many days a week. I hope the majority leader will keep us in late tonight, and with votes, if we don't finish this bill today. And if we aren't finished by Saturday, I hope the leader will say: Let's go at it, boys. We will be in Saturday.

But if there is a Senator who is complaining about working too hard, Mr. Majority Whip, tell them where my office is. While we are on this bill, I am for working. I want to get this bill finished. We have 12 more appropriations bills behind this bill.

I urge my colleagues to come to the floor today to offer any amendment they may have and to allow us to conclude debate on this measure no later than 7:00, but we might forward in a non-controversial and bipartisan way. I was pleased to learn, when the hearings on the bill, and for his fairness.

Mr. President, at this time, my colleague, Mr. Burns, for his steady hand and for the leadership he has demonstrated in the markup, in the hearings on the bill, and for his splendid cooperation, for his always charitable attitude toward other Senators, and for his fairness.

I yield the floor. The PRESIDING OFFICER. The Senator from Montana.

Mr. Burns. Mr. President, I thank my good friend and colleague from West Virginia, the chairman of the Interior Appropriations Subcommittee. I am recommending that this body pass the Interior appropriations bill for fiscal year 2002.

I join my colleague in what he said in relation to folks who would complain about working too much. I come from an agricultural background. I was raised on a small farm in northwest Missouri. My dad always had a little saying: When you look like a mule, you've got to work like one. So I guess I have hired on for the duration.

We will get this bill completed. I was lucky enough to hold the chairmanship of this Interior Subcommittee earlier this year, and I made it a priority to move this bill forward in a non-controversial and bipartisan way. I was extremely pleased to learn, when the Senator from West Virginia took control of the gavel, that he also shared this vision. He and his staff have been extremely gracious in dealing with all the requests before the subcommittee.

The bill up for consideration is a delicate balance of meeting our Nation's needs while remaining fiscally responsible. Not everyone will be happy with every portion of this bill—it has never happened with this particular piece of legislation since I have been in the Senate for the last 12 years—but I can guarantee you, the bill is extremely fair. We had to make some tough choices, but I believe those who have worked with us to put this bill together will agree that the chairman has done an exemplary job in dealing with the resources we had available to us in the subcommittee.

The bill before us provides over $18.5 billion in budget authority. This number is $343 million above the President's request; however, it is over $470 million less than has been requested by the House of Representatives and almost $290 million below last year's appropriations for the same activities.

The unprecedented and unsustainable increases of previous years have been checked, but we have still upheld our commitments as stewards to our public lands.

If time will allow, I would like to highlight some of the accomplishments in this bill.

The Bureau of Land Management receives a substantial increase in funding to help address our Nation's energy needs while balancing these needs with the ongoing maintenance necessary to keep our public lands healthy.

Initiatives of which I am especially proud include an increase in excess of $15 million over last year's level for energy and minerals management to help address the current backlog in energy-related permitting, an increase above the budget request for noxious weed research, control, and outreach, and the highest funding level ever for the payments in lieu of taxes account.

Let me tell you, I am especially thankful to our chairman. Noxious weeds is not a great—for the lack of another word—'sexy' issue. When you start talking about things around Washington, DC, folks do not think a lot about weeds, but they are something that we deal with across this Nation. And these payments in lieu of taxes, which means in the areas of counties that have a big preponderance of BLM land, they are paid, as if taxes will be collected on that land, by the Government. In other words, if the Federal Government has made the choice they want to own that land, then they have to pay taxes like everybody else—county taxes—that go to support schools, public services, roads, and other demands of local government.

Our commitment to the Nation's wild spaces is continued in the U.S. Fish and Wildlife Service budget, which has received a $52 million increase over last year's level to address habitat needs while working with private landowners through brand new initiatives such as the Landowner Incentive Program. These new initiatives will allow us to focus on a new area of working across land-ownership lines to do what is best to help the species and their needs.

The National Park Service remains one of my top priorities. After all, I have two of the really crown jewels of the National Park System in my State: Yellowstone Park, of which part is in the State of our friends to the south, in Wyoming, and Glacier National Park. It receives an increase of almost $161 million above a year ago. This funding helps address our crumbling infrastructure in our most treasured public areas while increasing our assistance to States to protect the areas that are high on their priority lists.

I am also pleased the bill provides $11 million for grants to preserve Civil War battlefields.

Also, within the Bureau of Indian Affairs, no other priority is higher on my list than the education of our Native American children. We have been able to continue our aggressive attack on the construction backlog of schools in Indian country by providing funds to replace the next six schools on the Bureau of Indian Affairs' replacement list. Again, the chairman has done an admirable job in attempting to meet the request for the increase in the operating funds available to tribally controlled community colleges. It remains one of my top priorities, and I hope to work with the chairman to increase the funding level even further in future years.

We have seen great strides made, especially in the 2-year colleges on our reservations. In fact, the gentleman who operates one of the tribal colleges in our State is probably one of the best educators I have ever known, and the impact he has had on his people on that reservation has been tremendous. Additionally, I am pleased that we have been able to match the President's request for trust reform and management issues. And there are many.

The Forest Service's largest initiative in recent years is the new Interagency Fire Plan. The Forest Service has continued to support the efforts of the Bureau of Land Management and the Forest Service to address the dangerous buildup of fuel in our national forests and adjacent lands.

Fire operations will continue to drain hundreds of millions of dollars again this year as we enter another historic fire year, but the investment in hazardous fuel reductions will pay off tenfold in future years.

Last year was a devastating fire year in the West. We are still experiencing drought in those areas. We can expect fires again this year.

Unfortunately, the Department of Energy received massive proposed cuts in this year's budget request. However, I believe the chairman has restored these accounts in a very responsible manner. Working with the rest of the committee and me, he has focused the energy accounts toward technologies that will increase efficiency and the cleanliness of our aging power infrastructure, while addressing the negative impacts of power generation.
We have started a new clean fuels initiative and increased our research in methods to control and capture greenhouse gases. The conservation accounts under the Department of Energy also receive substantial increases over last year, including an addition of over $60 million from last year’s weatherization assistance, and large increases to make our buildings and transportation methods more efficient.

Finally, the conservation spending category created in last year’s final appropriations negotiations has been retained, and the compromise of last year has been upheld both in the spirit and in the execution. The bill contains $1.32 billion for the conservation spending category, continuing our focus on protecting our wild areas while taking care of our publicly owned facilities.

Clearly, a bill of authority and outlays is difficult to craft, especially considering the volume of requests that we field in this subcommittee every year and those with which we have to deal. I thank the chairman for his willingness to accommodate the requests of all Members to the best of his ability. I urge our colleagues to recognize his generosity and take a hard look at the bottom line prior to attempting to amend this bill.

I also ask our colleagues to respect our collective request that legislative riders be avoided so we can get this bill to the President as soon as possible.

Mr. CONRAD. Mr. President, I am pleased to rise today in support of H.R. 2217, the Interior and Related Agencies Appropriations Act for Fiscal Year 2002.

The Senate provides $18.5 billion in nonemergency discretionary budget authority including an advance appropriation into 2002 of $36 million, which will result in new outlays in 2002 of $11.5 billion. When outlays from prior-year budget authority are taken into account, discretionary outlays for the Senate bill total $17.6 billion in 2002. Of that total, $1.32 billion in budget authority and $1.03 billion in outlays falls under the new cap for conservation spending. The remaining amount counts against the general purpose cap for discretionary spending. The Senate bill is within its Section 302(b) allocations for both general purpose and conservation spending.

In addition, the Senate bill provides new emergency spending authority of $235 million for wildland fire management, which will result in outlays of $167 million. In accordance with standard budget practice, the budget committee will adjust the appropriations committee’s allocation for emergency spending at the end of conference.

I commend Chairman Byrd and Senator Stevens for their bipartisan effort in moving this and other appropriations bills quickly, in order to meet our responsibilities to maintain an effective federal government. Their bills limit the use of the contentious legislative riders that have hampered its predecessors, and provides vital funding to manage our nation’s natural resources, to support better and more efficient use of our energy supplies, and to meet our commitments to Native American tribes.

I urge the adoption of the bill.

Mr. President, I ask for unanimous consent that a table displaying the budget committee scoring of this bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Notes: Details may not add to totals due to rounding.

I have seen some great chairmen of this committee, the Appropriations Committee in the Senate, to whom I have no hesitancy in saying, he was the best chairman of the Appropriations Committee that I have seen in my 43 years in the Senate, including Robert Byrd. I have no hesitancy, not a bit, in lauding a Republican. I have no hesitancy in saying, “He is a better man than I am, Gunga Din.”

Zama?" Hannibal thought for a moment, and then said, "I would have been first.

I did have the good fortune to chair this committee for 6 years. But Ted Stevens I salute. He is a Republican, yes, but a great one, a fine gentleman, a gentleman always, somebody who keeps his word. And he doesn't put politics at the apex of all things that matter. Well, with his assistance and his leadership, on yesterday we passed the supplemental appropriations bill. The President requested $6.5 billion and that bill did not exceed that request one thin dime.

The Senators' amendments were offset. The amendments that Senators offered and were considered, if they were adopted, if they had to do with money, were offset. Senators had offsets—meaning offsets, not "waste, fraud and abuse." There is no doubt but that there is some waste, fraud, and abuse in the budget in every department, I would say, in this Government. But we don't offset with false offsets. We had everything appropriately offset.

There wasn't a single amendment designated as an "emergency" in this Senate. The President had complained about the use of "emergencies." Mr. Stevens and I believe there is a time and place for emergencies, yes, but there is no question but that the designation of "emergency" has been overdone in both Houses. And in the supplemental appropriations bill that passed the House, there are $473 million in emergencies. Not $1 in the bill that passed the Senate was designated as an emergency.

Where is the President going to stand on this when it would be brought up. So I hope we have that offset. I hope he will let us know. What is his position going to be with the Republicans in the House bill? Mr. President, Senator Stevens and I had cooperation of the Senators on both sides of the aisle. I could not resist the opportunity to work with Ted Stevens and his help, his assistance, his leadership on that bill, the cooperation of Senators and staff on both sides, the help of our distinguished Democratic whip, and our leaders, we could not have accomplished that. So I take this opportunity to compliment our colleagues.

**AMENDMENT NO. 877**

Mr. BYRD. Mr. President, I send a technical amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senate from West Virginia. [Mr. BYRD] proposes an amendment numbered 877.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To make a technical correction)

On page 152, line 4, strike "$72,640,000" and insert "$72,680,000."

Mr. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the amendment and that it be adopted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 877) was agreed to.

Mr. BYRD. Mr. President, Senator Burns and I are here. We are at our posts of duty. We are ready to entertain any requests for an amendment by any Senator. The clock is running.

Mr. BURNS. We are open for business.

Mr. BYRD. The sign is out: Open for business. Senator Burns and I join in urging the leadership and all Senators to let us know of any amendments Senators intend to offer by no later than 4 p.m. today, and it will be my hope that at 4 p.m. we can close out the window for amendments. I hope all Senators within the sound of my voice and all staffs within the reach of our joint voice will be alerted to the fact that when the clock strikes 4 this afternoon, we expect to close out the window on all amendments.

Mr. REID. Will the Senator from West Virginia yield for a comment?

Mr. BYRD. Absolutely; gladly.

Mr. REID. As directed by the two managers of this bill, we have asked both Cloakrooms to clear their request: that there be a filing of amendments by 4 o'clock today, which gives people ample time, many hours. It was announced even prior to the break that the Interior bill would be the first bill brought up, and we even indicated when it would be brought up. So I hope we can get this cleared right away.

I say to my friend, the junior Senator from Montana, who has done such a good job in getting this bill to this point, the beginning of this session, that if we go into a quorum call Senator Burns will be gracious enough to see if he can move this along. Until that happens, my experience is this bill is in a flounder.

Mr. BYRD. I thank the distinguished whip.

Mr. BURNS. Mr. President, it is my hope that we can do this by 4 o'clock this afternoon. There is no need for us to dillydally around here when we have other things to do. I only have one thing I have to do at 2 o'clock this afternoon. I have to introduce a couple of judges who have been nominated to the Montana district court system. By the time I get that done, 4 o'clock slams around the corner.

We should be talking about amendments right now. There is no reason why we cannot move this bill to final conclusion tomorrow.

Mr. REID. I believe the Senator from West Virginia still has the floor, if I can make another comment.

Mr. BYRD. Surely.

Mr. REID. It is my thought, if the two managers agree, that at 12:30 p.m., if there is still a problem with hotlining, a unanimous consent request be made and if anybody objects to it, they are going to have to come here in person to object to it. That is my suggestion. On a bill as important as this, we need to have the Senators, not the staff lurking in some of these rooms around the Capitol complex making objections for their Senators.

After we go into a quorum call, upon consulting with the two managers, I make the suggestion that perhaps that is what we should do.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Nevada, the majority whip, for his suggestion. I like it. We have just heard Senator Burns voice his opinion.

Mr. BURNS. We will do everything we can to get that taken care of. We do not want to close anybody out either, understanding the sensitivity of that. I believe we have made a reasonable request. I thank the chairman.

I suggest the absence of a quorum.

Mr. REID. The quorum call be rescinded.

Mr. BYRD. We will do everything we can to get that taken care of. We do not want to close anybody out either, understanding the sensitivity of that. I believe we have made a reasonable request. I thank the chairman.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, there being no Senators seeking recognition and having discussed the following request with the distinguished majority whip and the distinguished manager on
the other side of the aisle, it appears it might be best if the Senate stood in re-
cess until 12:15 p.m., during which time some work may be done hopefully that will speed up the entire process to some extent.

I, therefore, ask unanimous consent that the Senate stand in recess until the hour of 12:15 p.m. today.

There being no objection, at 11:39 a.m., the Senate recessed until 12:15 p.m. and reassembled when called to order by the Presiding Officer (Ms. STABENOW).

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—Continued

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. With the consent of Sen-
ator BYRD, I ask unanimous consent all first-degree amendments to H.R. 2217, the Interior appropriations bill, be filed at the desk by 4 p.m. today, Wednesday, July 11.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 880

Mr. BYRD. Madam President, I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 880.

Mr. BYRD. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 157, line 7, insert “Protection” after the word “Park”.

Mr. BYRD. Madam President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

AMENDMENT NO. 879

Mr. DURBIN. Madam President, I have an amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DURBIN], for himself and Mr. DAYTON, proposes an amendment numbered 879.

Mr. DURBIN. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. The amendment is as follows:

(Purpose: To prohibit the use of funds for the conduct of preleasing, leasing, and related activities within national monuments established under the Act of June 8, 1906)

On page 194, between lines 9 and 10, insert the following:

SEC. 1. PRELEASING, LEASING, AND RELATED ACTIVITIES.

None of the funds made available by this Act shall be used to conduct any preleasing, leasing, or other related activity under the Mineral Leasing Act (30 U.S.C. 181 et seq.) or the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) within the boundary (in effect as of January 20, 2001) of a national monument established under the Act of June 8, 1906.

What it boils down to is, there are certain lands in the United States which have been designated as important national treasures. We call them national monuments. Virtually every President in the last century, save three, decided to designate certain areas of land in America that were so important they wanted to preserve them so that future generations could enjoy the bounty which God has left us.

There are those, of course, who see these treasures that don’t know the difference between parties, the treasurers which our children and future generations should enjoy. Roosevelt said this at one point, and his words I think tell the story: “We must ask ourselves if we are leaving for future generations an environment that is as good or better than what we found.”

That is simple. That inspired him in 1906 to create the first national monument at Devils Tower, WY. Unfortunately, not every President has been inspired by Teddy Roosevelt. Sadly, I come to the floor today because of threats by this new administration in Washington to at least consider the option of drilling for oil and gas in these national monuments across the United States.

Some leaders in Washington lack the foresight of our Founding Fathers and pioneers. They hide today behind the shield of an “energy crisis”—an energy crisis, which they believe, that we have to change all the rules, saying we can no longer keep this land at least protected so future generations can enjoy it. They say because of our need for energy we have to break a lot of rules; we have to start drilling in the Arctic National Wildlife Refuge: we have to start drilling in the national monuments; we have to start looking for oil and gas in places that a lot of Americans honestly believed we had declared a bipartisan idea. These are treasures that don’t know the difference between parties, the treasurers which our children and future generations should enjoy. Roosevelt said this at one point, and his words I think tell the story: “We must ask ourselves if we are leaving for future generations an environment that is as good or better than what we found.”

not going to solve America’s energy crisis, but it could cause a crisis in conservation. Americans are rightfully concerned about energy security. But I don’t think that most Americans believe that we are in such dire straits that we should invite the big oil and gas producers into these protected lands.

My amendment would simply prohibit new mineral leases from being issued in designated national monuments. My amendment does not affect any valid existing rights or prevent leasing in any area that was authorized for mineral activity when the monument was established. I want to make that point clear. Some will come before us and say: You are going to shut down oil and gas drilling and mining in these monuments, and it has been going on for years. It took place before if it is existing, if it has been approved, this amendment has no impact whatsoever. But it is the new drilling, the new mining, this new exploration in these national monuments that would be prohibited by this amendment.

When a President issues a proclamation designating a national monument, it is not unusual for existing rights to drill to be maintained. The real intent of this amendment is to preserve the existing boundaries of monuments so this administration can’t shrink them to make even more lands available for energy exploration.

Since 1906—the day of Teddy Roosevelt that I noted earlier—14 of the next 17 Presidents of the United States, Democrat and Republican alike, unapologetically and proudly designated national monuments under the Antiquities Act, for a total of 118 national monuments. Only three Presidents—Reagan, one did not have the authority to designate national monument territory—Presidents Nixon, Reagan, and the elder George Bush.

People say, well, I have heard of national parks and national forests. What is a national monument? Half of our national parks started out as national monuments. Let me tell you what they include. The Grand Canyon was designated as a national monument; Glacier Bay; Zion; and Acadia National Park. The national monument is the first designation of a piece of land in America that can have lasting values as part of our national heritage. Can you imagine, for a moment, if those who preceded us did not have the foresight to protect those lands, what America would have given up not to have these resources available, so that families of today and tomorrow can take their children and look out at that magnificent expanse of the Grand Canyon and stand in awe and wonder of God’s creation? Thank God, someone had the foresight to think ahead and believe it was worth designating that, first, as a national monument and then as a national park, to be protected.

This amendment is addressing a new mindset that says when it comes to today’s national monuments, it is a different story. They are up for grabs. We are involved in an energy crisis. People can drill for oil and gas on these new monuments designated by President Clinton. That is so shortsighted. It loses vision when it comes to what our country is all about and should be all about.

The Bureau of Land Management has the responsibility of managing public lands across the United States, and we have thousands and thousands of acres. I see Senator BARRY REID from Nevada is here. I don’t know what percentage of his home State is Federal land—

Mr. REID. It is 87 percent.

Mr. DURBIN. It is 87 percent. Many Western States have similar percentages. That Federal land within their boundaries. In the earliest days of our country, of course, there wasn’t a great hue and cry to have private ownership in this land. The Federal Government owned it, and some of it may never have been of real value, but when it comes to residential or commercial development. But the Federal Government took the responsibility under an agency known as the Bureau of Land Management. This is kind of the landlord for America’s public lands. The Bureau of Land Management has determined that 95 percent of the lands they manage across the United States are already available for oil and gas leasing. If you hear an argument from the other side that we now have to go and drill into the national monument lands because we have nowhere else to look for oil and gas and precious minerals, that is just not the fact. Ninety-five percent of the Federal lands managed by the Bureau of Land Management are already available for oil and gas leasing.

Instead of hopping onto the drilling bandwagon, we should first focus on energy exploration in existing areas before we turn to these precious national monuments. I am afraid that the President and many of the people in the energy industry talk about oil and gas development as though it were the cure for all of our energy woes in America—drill and burn, drill and burn, drill and burn. There is much more to the challenge that faces our Nation.

The President has to acknowledge that the longstanding supply and demand and balance in the United States will not be solved overnight, and it won’t be solved with 19th and 20th century thinking. Our Nation consumes 9.1 million barrels of oil a day. We import about half of that—more than half, frankly. Oil production from Federal lands—all Federal lands—supplies about 1 percent of our total oil needs. This isn’t enough to bring U.S. energy independence or significantly meet the U.S. demand. It is interesting that the Wilderness Society—

Mr. REID. Will the Senator from Illinois yield for a question?

Mr. DURBIN. Yes.

Mr. REID. First, I ask the Senator to list me as a cosponsor.

Mr. DURBIN. Madam President, I ask unanimous consent that that be the case.

The PRESIDING OFFICER (Mrs. CARNANAH). Without objection, it is so ordered.

Mr. REID. I say to my friend, is the Senator aware that the U.S. Geological Survey has estimated that the reserves within the 15 national monuments designated since 1996 would produce 15 days’ worth of oil and 7 days’ worth of natural gas for our country? Is the Senator aware of that?

Mr. DURBIN. The Senator is right. Those are the numbers I was about to put to the record. Mr. REID. I am sorry.

Mr. DURBIN. I am happy to have the Senator add that to the debate. Frankly, if we are talking about energy needs in America and drilling in places we are not sure about, we should go back before, whether in the Arctic National Wildlife Refuge or national monuments, certainly someone has to make a compelling argument there is so much energy there that America cannot turn its back. The Senator from Nevada has quoted and an analysis by the Wilderness Society come to the same conclusion.

The total economically recoverable oil from the monuments that I protect in this amendment is the equivalent of 15 days. 12 hours, 28 minutes’ worth of energy for the United States. Economically recoverable gas, as a portion of total U.S. consumption, is 7 days, 2 hours, 11 minutes.

Where would we give up for that small opportunity to bring that much energy into the picture in the United States? Frankly, we would be drilling in areas which have been designated as special and important treasures that the United States should preserve.

I am glad we are having this national debate about energy conservation and energy efficiency. It is important that we have it, but it is also important that we do not believe the answer to all of our energy problems is to find new places to drill.

Just last week I joined my colleagues, Senator FITZGERALD of Illinois and Senator DEBBIE STABENOW of Michigan, at a press conference on the banks of Lake Michigan on a rainy Tuesday before the Fourth of July. As hard as it is to believe, there is one Governor of a State adjoining Lake Michigan who now believes we should drill for oil and gas in Lake Michigan and the Great Lakes. There are those of us who think that, too, is a rash judgment and one we can come to regret.

A lot of people say: It would only be a small little derrick or a small drill
CONGRESSIONAL RECORD—SENATE

July 11, 2001

out there. I had the experience, I guess it has been over 15 years ago or close to it, of going up to Alaska after the Exxon Valdez spill. Exxon Valdez, if I remember correctly, was about the size of three football fields. It was a long vessel. When it ran ashore and when its tanks and all its crude oil spread out across the area, it devastated wildlife and left contamination for decades to come.

When we talk about drilling for oil and gas, we have to be careful that we do it in a responsible environmental way so that we do not run the risk of contamination or ruination of important national treasures, such as the Great Lakes, the Arctic National Wildlife Refuge, or the national monuments designated by President Clinton.

As we can see from the situation in California, we had the great national parks. When they saw the high prices, they reduced their consumption by over 11 percent in a short period of time. It is a lesson to all of us. We can all do better, every single one of us. Before we start drilling into these pristine areas, should we not have a national policy that talks about sustainable, renewable fuels and energy conservation? I am afraid this administration focuses on drilling and drilling and drilling, and that just is not the answer to all of our challenges.

This land is protected as national monuments because we realize all of the Nation's public landscapes are not appropriate for oil and gas drilling. These lands have intrinsic value. Just because there may be some energy there, even if it is very limited, does not mean we need to drill for it and run the risk of contamination and ruining these great national treasures.

The national monuments belong to the American people. The Government has agreed to hold these lands in trust for our generation and future generations to appreciate. The President of the United States, as a successor to George Washington, as a successor to previous Presidents, was given the responsibility of protecting these lands—first and foremost, protect our national natural heritage—not destroy them.

This energy crisis should not be used as an excuse for us to conserve. It will not work in the days and years to come. Exploiting our national monuments for a tiny bit of mineral resources will not ease energy prices today, tomorrow, or even next year.

Let's not be misguided. Let's focus the energy debate on responsible energy development, renewable energy, efficiency, and conservation efforts. I urge my colleagues to support my amendment.

I have heard some people suggest that we do things we will regret in the days and years to come. Exploiting our national monuments for a tiny bit of mineral resources will not ease energy prices today, tomorrow, or even next year.

Let's not be misguided. Let's focus the energy debate on responsible energy development, renewable energy, efficiency, and conservation efforts. I urge my colleagues to support my amendment.

Conservation means development as much as it does protection. I recognize the right hand duty of this generation to develop and use the natural resources of our land, but I do not recognize the right to waste them or to rob by wasteful use the generations that come after us.

Madam President, I yield the floor. The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Madam President, I oppose this amendment. It seems we want to make a blanket assertion on what we should do with our monuments. We have to remind ourselves that we are energy deficient.

As for Montana, where there was a national monument created, there are 77,000 acres of privately held land. Even the former Secretary of the Interior, Bruce Babbitt, recommended that oil and gas production in that area should be sustained.

There was a public process. The resource advisory committees in each of these areas made the same recommendation: Gas and oil production could be sustained without harming the land in that national monument.

These areas have also been studied. They have been studied by different committees whose members live in the area. They understand that land and the recommendations that were made.

We in Montana want to contribute something to the energy situation in this country. So far, no one has come up with any solid replacement to oil and gas production for transportation or power generation.

I, therefore, urge my colleagues to oppose this amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Mrs. MURRAY. I thank the Chair.

Madam President, I rise today to support the amendment that will protect our national monuments from energy exploration. I am pleased to be a cosponsor of this important amendment, and I thank Senator DURBIN from Illinois for his work and tremendous efforts on behalf of our national heritage and our national monuments.

The truth is, we should not need an amendment to protect our country's national monuments from energy exploration. These unique landscapes, including the Hanford Reach National Monument in my home State of Washington, were designated as national monuments because they are important in their own right and they deserve to be protected.

We should not need an additional amendment to keep oil derricks out of these lands, but unfortunately that is where we find ourselves today. The Bush administration has proposed exploring for energy even in our national monuments.

When I go home every weekend and talk to my friends and neighbors and go to the grocery store, my constituents come up to me and ask: Is nothing sacred anymore? Drilling in our national monuments is just wrong. This amendment says the Federal Government should not promote energy exploration into our most precious lands, on our heritage.

I recognize the need to find new sources of energy. The Federal Government has always actively promoted the extraction of new energy resources. This can and will continue. During the Clinton administration, thousands of new drilling permits were actually issued for Federal lands. Since the early 1980s, the projection of natural gas on Federal lands has been increasing steadily. Efforts to find energy on our Federal lands must continue. But attempts to find energy in our national monuments must never begin.

Today, 95 percent of Bureau of Land Management lands in the Western States are open to coal, oil, and gas leasing. We do not need to open up our national monuments, as well. I realize this is a challenging time because we are facing an energy crisis. In my home State of Washington, we are experiencing drought and too little energy production and a spike in gas prices.

Thousands of my constituents are out of work because of high energy costs. No one needs to tell anyone in Washington State we have to increase energy production. We know we need to increase capacity and that is what we are doing. We are working to site new generation capacity. On the Oregon and Washington border, we are constructing the country's largest wind farm. We have natural gas plants going up. We have a proposal for a coal-fired plant. We are upgrading our transmission system to deliver new generation supplies. We know what we need to do and we are taking action. But we know we don't need to drill for natural gas in our national monuments.

The Hanford Reach National Monument is a national treasure. It includes the last free-flowing stretch of the Columbia River. It is the most productive spawning ground for threatened salmon in the entire Columbia River Basin. It is home to threatened sage grouse and 2 plant and 40 insect species that are brand-new to science.

The monument also includes and borders important historic and cultural features. The area is rich in important Native American, early pioneer, and nuclear production history. The Hanford Reach National Monument may be the most unique monument in the entire country.

I have heard some people suggest that the national monument designations made by President Clinton were done quickly, with little public involvement, and without consideration of energy production values. That is simply not true. I have been working since my first year in the Senate, 9
years ago, to protect the Hanford Reach. I introduced legislation in the previous three Congresses to protect that area. We held numerous public meetings, we got lots of local input from local leaders, local folk, and we debated a lot of different proposals.

The administration had 8 years of knowledge gained by the consideration of various protection proposals. The plans considered irrigation, farming, and the potential for gas outside the monument's boundaries. The plan considered commercial development of lands by ports and cities. In fact, the final designation even included a provision ensuring a new right-of-way for energy transmission lines to go across the Hanford Reach. All of those considerations helped define the final boundaries of that national monument. So for some to suggest now that we never thought about our future energy needs is just plain wrong.

In the end, the final decision was that the historical and historical values of the Hanford Reach mandated protection as a national monument. We knew what we were doing by that designation. We knew we were choosing to protect the unique and vital habitats. We knew we were honoring important cultural sites, and we intended to leave this legacy to future generations.

Protecting certain areas for generations to come is an admirable goal. These designations were made after full public consideration. This Congress should not now in any way undermine those legacies in favor of the energy industry. We should not have to fight back these attacks on our very limited protected lands.

I believe we should preserve these ecological and historic treasures for future generations. These lands belong to all of us. We are responsible for protecting them. That is why the Durbin amendment is so important. I urge my colleagues to accept it. I thank my colleague from Illinois.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. FEINGOLD. Madam President, I rise today to support also the amendment offered by my colleague from Illinois, Mr. DURBIN. I am proud to join him in this effort and to be an original cosponsor of his amendment. My colleague from Illinois seeks to make certain that amendment language offered by the Congressman from West Virginia, Mr. RAHALL, which would prohibit drilling for oil and gas and mining in our national monuments is included in the Senate bill. The Rahall amendment passed the House overwhelmingly by a vote of 242-173.

Madam President, I support this amendment because I believe that to not speak loudly against the Bush administration's proposals to re-open many of these monuments under the guise of our present energy concerns is a dereliction of responsibility for this body and this Senator.

It is the responsibility of this body to review areas designated as national parks—have the Senate do it or not additional designations should be conferred—such as creating a national park or a wilderness area out of lands administratively protected as a monument.

Presidents have designated about 120 national monuments, totaling more than 70 million acres, and given that Congress has done its review, most of this acreage is no longer in monument status. For instance, Grand Canyon National Park initially was proclaimed a national monument but was converted by Congress into a national park.

Congress should responsibly exercise its authority, and be clear about its intent, which this amendment does. This amendment prohibits the administration from proceeding with drilling for oil and gas and mining in our national monuments. This amendment will prevent these activities which are incompatible with federal land use designations Congress might confer until we truly examine these areas. Monument designations create expectations on behalf of our constituents, Madam President, that these areas are protected and we should work to make certain that is so.

I am aware that Presidential establishment of national monuments under the Antiquities Act of 1906 has protected valuable sites but also has been contentious. President Clinton used his authority 22 times to proclaim 19 new monuments and to enlarge 3 others. The monuments were designated during his last year in office, with one exception, and I will speak about that exception.

President Clinton’s 19 new and 3 enlarged monuments comprise 5.9 million Federal acres. Only President Franklin Delano Roosevelt used his authority more often—28 times—yet only President Jimmy Carter created more monument acreage—56 million acres in Alaska.

The monument actions, regardless of one’s position on them, were needed because Congress had not acted quickly enough to protect these Federal lands. The best response to concerns about the monument process is to support my colleague from Illinois, Mr. DURBIN, and not allow modifications to the monuments that some perceive were created unfairly to be made in an equally concerning fashion.

My constituents do not support expansion of oil and gas drilling and mining in lands designated by Presidential declarations. I personally know the value of wild areas, and the threats that mineral, coal and oil and gas exploration pose. Though I have not been to all the monuments designated by President Clinton, I have hiked the Grand Staircase-Escalante National Monument, an area that the Senator from Illinois and I believe should be designated as wilderness.

I hiked down a 65-degree slope to Upper Calf Creek Falls in the Grand Staircase. It was a challenging and delightful trip. Calf Creek meanders along a shallow valley with several deep clear pools before the upper falls, where the creek drops 88 feet over a cliff face at the head of Calf Creek Canyon. This deepens gradually for 2.5 miles south then doubles in size below the 126-foot lower falls. The path to the falls is down a steep slope of white slickrock marked by cairns of dark, volcanic pebbles then across flatter sandy ground to the canyon edge, with a total elevation loss of almost 600 feet. My experience is that this monument is a spectacular place and one with now tremendous recreational value and use. I should be preserved that way.

I use my Upper Calf Creek trip as an example of why the Senator’s amendment is needed. We should be preserving our options with these lands, not opening them for development. I support this amendment and urge my colleagues to do so as well.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. I don’t know if any Senators are here to speak in opposition. If there are, I will yield to them. I would like to speak and close debate, but I want to make certain that the other side has ample opportunity to express its point of view.

Mr. BURNS. I ask the Senator from Illinois, as I understand it, the amendment prevent any further drilling, or does it bar all drilling, even though there are rights there in the first place?

Mr. DURBIN. The amendment clearly states if there is existing drilling, existing rights, it does not in any way interfere with those. It speaks to a lot of new drilling, new leasing in these areas.

Mr. BURNS. If that resource is there and it can be done in an environmentally sensitive way, why is that bad?

Mr. DURBIN. I say to the Senator from Montana, I don’t believe either of us would consider drilling on the Capital Mall or perhaps in the Grand Canyon or near it. There are certain things we’re more than happy to do and say we know there may be energy resources, but if we are so desperate in this country that we have to reach that point, we have gone too far.

I think when you look at the estimated resources available in these monuments, they are so miniscule in terms of our national energy picture, many of us believe it is far better to say to future generations: Listen, we know there may be another way to find energy, to conserve energy. We didn’t spoil something that future generations will treasure.

Mr. BURNS. We had the Secretary of the Interior up in Montana. In the
upper Missouri, which was designated as a national monument, I tell my good friend from Illinois, we asked the Secretary, we find the gold well and then find the pipeline that carried the gas from the wellhead into the main pipeline. He could not find it. He could not find either one of them—he tried by air and by land—until we showed him where they were.

What I am saying is we should consider the new technologies and how we regard our lands, especially the big open lands. I am not talking about a monument such as The Mall; I am talking about land that is in bigger country that is very seldom ever walked upon by the people who probably own the grazing lease. We still allow grazing in national monuments. Very seldom are those lands ever walked on by anybody else.

We have an area in Montana that is going to demand some more attention in the next 2 or 3 years because it is along the Missouri River and that was the route of Louis and Clark. Of course, this will be the 200th anniversary of the Louisiana Purchase, and the trek of Louis and Clark will draw a little more attention to that area. But tell me why we would completely close out the possibility, even under emergency conditions, in areas where we could develop that energy—and especially natural gas, which is the cleanest of all energy that is coming from the fossil fuels we take from the Earth—why we would close out that possibility.

Mr. DURBIN. I say this to the Senator from Montana, whom I respect. We come at this with a different attitude towards national monuments and national lands. I think we do have a genuine difference of opinion. I am aware, and I am sure my colleague is, too, that 95 percent of the Federal public lands are currently open for oil and gas drilling. I do believe it is not unreasonable to say that 5 percent of the Federal lands that we own are so important to our national heritage that we are not going to go in and drill.

No matter whether you can sneak in there and come out again and folks say, ‘We were not even sure they were there,’ every time you do that you run a risk—I am sure the Senator from Montana knows that—that it will not be as clean an operation as you want it to be. You run a risk you will change the ecological balance in an area that will not be as clean an operation as you want it to be. You run a risk—you will change the ecological balance in an area that will not be as clean an operation as you want it to be.

Mr. BURNT. I tell my good friend, it is that kind of mind-set that I think we are going to save the suckerfish in Klamath Falls, OR, and it takes precedence over 1,500 families and their future and our ability to provide food and fiber for this country with a trash fish. That is going on right now in that basin. That is what I am saying. When we take a look at what our attitude is about a certain thing and hide behind the screen of green and throw out all logic on the management of those lands, then we may have to reassess how we look at all lands, even those that exist in the State of Illinois. That is what I am saying. It is something that creeps into the mind-set, that it is all right to disrupt our lives and our families—even though we do it right and in an environmentally sensitive manner—because of a mind-set. I think that is where we have a basic philosophical difference on how we manage land.

I look at it much differently. I know you come from down there not too far from where I was raised. I was raised in Missouri. I never thought about water rights until I went west, where there wasn’t any. There wasn’t any water. Those things become very important. But they never entered our life when I lived in the lower Midwest. I just think it is a mistake whenever we close up an area because of a mind-set that we cannot do it right and we here in Washington, DC, are basically in a better position to make the decision, more than having the decision made locally. The Senator from Washington says we had local input. We did the boundaries originally. We looked at the land that was sensitive, and we set it aside.

I agree with that. There are areas in the Missouri Breaks that I think should be set aside and even made wilderness. The river is already a protected river. I agree with that. But whenever you take one broad swipe across a huge amount of land, especially when you have 77,000 acres of in-holdings and you have to cross public lands just to get to them, then we make a decision here that impacts people’s lives in a real way. Those people have homes. That is why I oppose this amendment. I am not calling for the repeal of the Antiquities Act. What I am saying is we are impacting some of our own Nation’s ability to produce food and fiber and energy because of a mind-set that sounds so green, and fuzzy.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. I thank the Senator from Montana. I know his opinions are heartfelt. He and I have talked about this on the floor on previous occasions. But I hope we can put this in some perspective.

America is a great nation. God has blessed us with resources that many nations around the world envy. Fortunately leaders in this country with foresight decided long ago that there were certain treasuries, national treasuries in America, that needed to be protected and preserved.

Mark my words, when they made those suggestions they were not always popular. There were people who had ideas that something else could be done with that national park or that national monument. But those leaders stood their ground and said, We can find other ways to provide for the occupations and professions of people living in these States. We can find other sources of energy. We do not have to spoil a national asset, part of our national heritage that we can never, ever reclaim.

The Senator from Montana talked about national monuments, and, I guess, the energy potential that they offer to the United States. Here is a summary from the U.S. Geological Survey about the economically recoverable oil and gas from national monuments.

I might remind those following the debate that it is now President Bush who wants to initiate new drilling for oil and gas in national monuments—those lands under the management of the Bureau of Land Management. This is a beautiful span of land that is not trash. This is a national monument. This is a beautiful span of land set aside for future generations by the previous President.

President Bush, if you still, in this rare piece of real estate in America, oil and gas drilling. Have we reached that point? This is not trash. This is a treasure. We shouldn’t take it lightly when it comes to oil and gas drilling in America’s treasures.

Let me give you an example of some of the national monuments and what the geological survey estimates is available there if we follow President Bush’s recommendation to go ahead and keep drilling; let’s find new areas for oil and gas drilling in these national monuments.

In the Upper Missouri River Breaks in Montana, which the Senator from Montana made reference to earlier, the economically recoverable oil from that entire national monument is the equivalent of one hour’s worth of gas consumption in the United States.

I didn’t take those numbers because the Senator mentioned his own State as a base but just to put this in some perspective.

We are going to go drilling in these national monuments to try to recover one hour’s worth of energy for our
country. And what do we leave behind? If we are lucky, not much—maybe a few footprints in the soil. But we can never be sure, that they haven’t spoiled or changed that forever.

All of the economically recoverable oil from all of the national monuments—where President Bush now wants to go drill—is the equivalent of 15 days, 12 hours, and 28 minutes of America’s energy consumption. All of the economically recoverable gas as a portion of the total U.S. consumption from these monuments where the President now wants to go drilling is the equivalent of 7 days, 2 hours, and 11 minutes’ worth of America’s energy.

I listened to the news this morning. I hear there is a bill over in the House of Representatives on energy, and they are talking about perhaps for the first time in our history we are going to start raising fuel-efficient standards for SUVs and trucks in this country. That is not radical thinking. I think it is sensible. I voted for it in the Senate. Just a little bit of energy conservation and a little bit of fuel efficiency makes this debate totally meaningless. With just a little change in Detroit we can save more oil than we can possibly derive from monuments. But the oil and gas companies want to get in there, and they want to make a profit. They have put these national treasures in the United States on the altar of greed and profit and the bottom line. That is just plain wrong.

I don’t think I will prevail on this amendment. But I tell you that, as Senator FEINGOLD from Wisconsin, Senator MURRAY from Washington, and Senator REID from Nevada said, this is worth a fight. You don’t get many opportunities to cast a vote while on the floor of the Senate and have a lasting impact for future generations to come. This is worth a fight. This is worth a vote.

I hope some of the Republican Members who come to the floor will remember one of the greats in their political party, Teddy Roosevelt, whose bust is right outside this door—who really defended conservation for America and made his party the proud patriarch for conservation in America. I hope they will remember when they come to the floor to make a lasting impact for generations to come. This is worth a fight. This is worth a vote.

I recently talked to a young man who is the president of a new technology company out in California. We know what has gone on out in California, and we can pick losers and winners and those to blame. I will tell you what was wrong with that young man. He had not made any bad choices. He was not opposed to drilling or if he is opposed to exploration, that is correct. And I lose, if I am for it being based on 30-year-old technology. If you want the technology of today and tomorrow, my guess is that it is a bit of a tossup.

We have preserved and protected the environment. But most importantly, we haven’t forced mom to go to the gas pump and double her prices.

First, the Bush administration is not advocating drilling in all of the monuments of the lower 48 States. That is a falsehood. What is important to say is that the Bush administration is proposing an energy policy that would open up public lands to be explored for the purpose of finding additional energy resources to determine whether or not they ought to be developed. That is a very real and different statement than the one my colleague from Illinois just made.

What is important about this debate is a choice that we are asking the American people to make. I think it is an important choice. I think it is worthy of the debate that we are having.

Energy security, the right of the family to know that their energy is secure, that their lights won’t go out, or the cost of driving their minivan or their SUV is going to double or triple over the next couple of years, or the risk and the power of big oil and OPEC to dictate that because policymakers were asleep at the switch or used false arguments to cause fear amongst the American people—if that is true, then shame on those policymakers. But brave to the policymaker that is willing to stand up for the security of our nation and the security of the American family.

That is what is important. Should the mom have to pay three or four times what she is paying now to drive her son or her daughter to a soccer game? Well, her costs have doubled in the last year. The reason they have doubled is because this country has not had a national energy policy. We had to go begging to the thieves in the Middle East, the OPEC crowd. That was the policy of the past administration—grab my tin cup and beg and let mom pay at the gas pump.

Was it the right policy? I don’t think it was. I am not even going to suggest that drilling or allowing exploration in monuments is it. But it is.

But what I will suggest to you today and to my colleague from Illinois is, do we have to make very hard-line choices in a world of modern technology and the talent that we possess today? Can we not shape an environment and shape a national economy that are compatible?

I agree with my colleague from Illinois. If you want to step back 30 years and use the argument of 30 years ago, you win. If he is opposed to drilling or if he is opposed to exploration, that is correct. And I lose, if I am for it being based on 30-year-old technology. If you want the technology of today and tomorrow, then my guess is that it is a bit of a tossup.

We have preserved and protected the environment. But most importantly, we haven’t forced mom to go to the gas pump and double her prices.
Mr. DURBIN. Madam President, I thank my colleague, the Senator from Idaho. We clearly have a different point of view. If you listened to his argument, you would think the Durbin amendment would prohibit oil and gas exploration on Federal public lands saying that we can only use 5 percent for that purpose. Exactly the opposite is true.

Currently, we can explore for oil and gas on 95 percent of lands under the Bureau of Land Management—Federal public lands which are open to find energy resources to serve our Nation's needs. I am not arguing with that. I accept that.

This amendment says that for 5 percent—1 acre out of 20—we are going to treat it differently. These are national monuments. These are special lands. These are not your run-of-the-mill pieces of real estate. These are lands designated by President Clinton, and monuments that have been designated by previous Presidents, that are being protected and treated differently.

The Durbin amendment says: No oil and gas drilling or mining in the new national monuments designated by the previous administration—including a small piece of real estate that has special important value.

The Senator from Idaho has said I am trying to come up with a hard-line choice. It is a hard-line choice. It is a choice that says there are certain real estate in America worth fighting for and worth protecting and worth saying to private industry—whether it is big oil or big gas—keep your hands off. You have plenty of other real estate to look at. Don't go up to the Arctic National Wildlife Refuge and don't go into the national monuments designated by President Clinton because I want to be able to take my grandson one day to take a look at them and see the beauty that God created and not have to duck the pipelines and the trucks and all the economic activity of people trying to make a buck off Federal public lands.

Ninety-five percent of the Federal public lands are open to this exploration. For 5 percent there should be a different standard. Yes, there should be a hard-line choice.

Let me address for a second the issue that has been brought up over and over again: What about our energy crisis? We do face an energy challenge. There is no doubt about it. In my home State of Illinois, and across the United States, in the last calendar year we have seen some terrible examples. Home heating bills have gone up dramatically in my home State of Illinois, and other places; electric bills in the State of California; gasoline prices between Easter and Memorial Day—that has now become the play period for big oil companies. They run the gasoline prices up a buck a gallon between Easter and Memorial Day, and then after every politician gets a head of steam and starts screaming at them, they bring them back down. I would like to believe this has something to do with whether or not we are going to drill for oil in a national monument, but honestly I do not.

We are victims of oil companies now that are making decisions that have little or nothing to do with supply and demand. This is the only industry I know that can consistently guess wrong in terms of the supply available to sell and make record profits. And they have done it consistently for 2 straight years.

So to argue that the only way to deal with our energy challenge and the OPEC strangulation is to start drilling for oil and gas in precious lands set aside as national monuments is so shortsighted. Are we so bereft of original and innovative ideas in Congress and in Washington that we cannot think of another way to help provide modern, sustainable, reliable energy to America other than to drill for oil and gas in our national monument lands? I do not think so.

I think there are other ways—sustainable energy—preventing nuclear fuels, conservation; things that work, things you will be proud of, 21st century thinking—not the drill-and-burn thinking of the 20th century and the 19th century that has will never go up much more than they have gone up now, and we will work collectively to build a national policy that includes conservation and modernization and technology, and that we build a national security that says we can produce our own energy and we do not have to ask the world at large to provide it for us.

That is a part of this debate. It really is a part of what we ought to be considering today when we decide whether we are going to deny the right to explore on public lands in this country. I think that is a worthy debate. I thank my colleague from Illinois for bringing the issue to this Chamber because it is important for all of us to understand: 20 years ago, you bet, lock it up to protect it; today, modernization and technology says—and I think America believes—that we have come a long way and we can do a better job of balancing the environment and the economy and the use of it all together in an effective manner. And today's debate is just a little bit about a lot of things.

I am concerned about the families of America and their energy security. I do not want them paying more and more of their hard-earned money on energy. But I am not sure that the kind of policy that is being advocated today in this amendment will guarantee that. And I am not at all confident that the Senator from Illinois can assure it. But that is the crux of the debate.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Madam President, there is an absolute right: If we take all of these monuments off the table and we do not drill in them, we will not feel it tomorrow, and we will not feel it the next day, and our dependency on foreign oil will grow from 50 percent to 60 percent to 70 percent. If we can play games with the OPEC boys and we can keep them at about $28 a barrel, then we are OK—probably.

Now your gas prices have doubled. For a family making $15 to $25,000 a year, that means 30 percent of their income gets spent on energy. But for somebody such as the Senator from Illinois or myself—we are making pretty good money—it probably will not affect our lives very much because it is a smaller percentage of our total spendable income.

Shove on a country today that understands technology and understands the environment and isn't willing to try to make both of them work together. The Senator from Illinois and I want clean air, we want clean water, and we are going to insist on it because we think that is the right public policy. And we want to preserve the crown jewels of our Nation because that is the right public policy.

But when a President comes to my State and carves out 250,000 acres, it is not the Washington Monument; it is 250,000 acres of sagebrush land with a few rocks on it and a few unique geologic features. Interestingly enough, there is no hydrocarbon because it is a volcanic formation, and they were all burnt out about 2½ million years ago. So the argument does not apply to Idaho.

But my guess is, the Senator from Illinois has picked something that is very popular. If you argue it only on one side, you lose. My guess is that Senator from Illinois to tell the American household and the American mom that they will forever be secure in that the lights will never go out or the gas bills are going up and that this is the right choice. But there is a certain group that is going to say, but honestly, it does not make any difference in the near term.

We are all of us: Can we live together compatibly in an environment in which we can apply new technologies to have abundant energy at affordable prices? We have to pick winners and losers?

I totally disagree with him on his using Teddy Roosevelt as a facade to argue. Yes, you are right, Teddy Roosevelt, in 1908, created the great forest preserves of our country. I know. I am a bit of a student of Teddy Roosevelt. I do not use him when it is comfortable. I study him, and I believe in him. And he went on to create some of the grand national parks. But my guess is, he would not have run around the country in his last 5 years creating all kinds of monuments for the sake of developing environmental votes. He did it because he saw the need to create and protect the true jewels of our country's environment. Teddy Roosevelt also knew was that you had to have something that was in balance.

I will tell you, the Senator from Illinois is absolutely right: If we take all of these monuments off the table and we do not drill in them, we will not feel it tomorrow, and we will not feel it the next day, and our dependency on foreign oil will grow from 50 percent to 60 percent to 70 percent. If we can play games with the OPEC boys and we can keep them at about $28 a barrel, then we are OK—probably.

My guess is that Senator from Illinois to tell the American household and the American mom that they will forever be secure in that the lights will never go out or the gas bills
inspired this administration to decide that, unlike President Teddy Roosevelt, this Republican President is ready to start exploring and looking for oil and gas in these national monuments.

We can end our dependence on foreign oil, but we don't have to do it at the expense of America's national and natural treasures. I urge my colleagues in both political parties to agree with me that setting aside 5 percent of Federal lands, keeping them separate and sacred, is worth the investment. We can find another answer, an answer that preserves those lands for future generations and still meets the energy needs of America.

If there are other Senators seeking recognition on this amendment, I yield the floor.

The PRESIDING OFFICER (Mr. INHOFE). The Senator from Utah.

Mr. BENNETT. Mr. President, there has been a lot of historic revision going on with respect to the creation of national monuments. I rise to set the record straight.

The record is available for those who will research it, but for those who may have been listening to this debate, it needs some accuracy in terms of what happened.

I was involved in it right from the public beginning, but I cannot say I was involved in it from the real beginning because the creation of the Grand Staircase-Escalante National Monument was done in the dark. It was done without consultation with any member of the Utah delegation. And when members of the Utah delegation called the administration and asked what was going on, we were told: It is not happening.

To be very specific, in one example, let me describe to the Members of the Senate and to the Chair an exchange I had with Katie McGinty, chairman of the Council on Environmental Quality.

First, to put this in historic context, a story appeared in the Washington Post saying that President Clinton was considering a major national monument in the State of Utah. Immediately after that story appeared, the administration denied it and said it was just a consideration, just an idea, and under no circumstances were they that far along in serious consideration of a national monument.

Understand that the law required, under NEPA and appropriate environmental laws, that there be full public examination and consultation. The administration knew that. So they said, no, there will be no consultation because this is just an idea.

I had had experience. I called Bruce Babbitt, Bruce Babbitt and I had a very frank relationship. Even though we disagreed on many things, we could be honest with each other. I called Bruce Babbitt. He was appropriately professional; he didn't let out any secrets. But he let me know that it was perhaps more than just an idea.

I said: What should we be worried about? He told me some things we should be worried about in a theoretical sense. In case this was a real monument, we should be worried about the following. I wrote him a letter about them.

Finally he called me. He said: Come on down to the Department of the Interior and we will talk about this. And with the other members of the Utah delegation, Senator Hatch and Congressman Hansen, I went down to Department of the Interior. It was on a Saturday morning when there was nobody else around. We sat in his conference room. Katie McGinty was there, along with a large number of his staff.

I asked him repeatedly and directly: Mr. Secretary, will the President announce the creation of a national monument on Wednesday of this coming week, as the press is speculating that he will?

Bruce Babbitt, being a careful lawyer, looked at me and said: No decision has been made. He didn't say yes and he didn't say no. He just said: No decision has been made.

I took that, from my experience with the Clinton administration, to mean “yep, it is a done deal; I can't tell you about it, but it is done.”

So convinced that the monument was going to be created, on Monday morning, in my office, Katie McGinty was there as the leading administration spokesperson on this issue. And I said: Ms. McGinty, you say this is under consideration but no decision has been made. Given the consideration, can you give me a copy of the map so that I can see what lands are under consideration?

She looked me in the eye and said: Senator, there is no map. We are not that far along. This is just an idea. There is no map.

I said: As soon as there is a map, can I have a copy?

Oh, yes, Senator, as soon as we have a map, but we are not that far along.

That was Monday morning. On Wednesday morning I get a phone call from Leon Panetta, Chief of Staff to President Clinton.

Leon Panetta said: Senator, I am calling to tell you that this afternoon in Arizona, President Clinton will announce the formation of the Grand Staircase-Escalante National Monument, the details of where it will be and everything with respect to it.

I held my anger because Mr. Panetta obviously had nothing to do with this. This was a done deal outside even the office of the Chief of Staff of the White House.

I said: National monuments require—and I listed all of the things that were involved in the creation of a national monument.

He said: Yes, national monuments require all those things. There will be a 3-year period after the creation of the monument in which we will deal with those issues.

Every one of those issues should have been dealt with publicly and openly prior to the creation of the national monument, but all of them had been held in secret.

I expressed my disappointment in that. Mr. Panetta, in a moment of candor said: Well, Senator, we have 3 years in which to try to clean it all up.

When Katie McGinty appeared before the appropriations subcommittee, I sat with the subcommittee and I said to her: I want to see all of the documents relating to this decision. You didn't create this out of whole cloth in a 24-hour period.

I made very clear that I did not believe her earlier statement that there was no map and no consideration if, in less than 48 hours, the President made a complete public disclosure of it. Presidents don't do things in 24-hour periods. Something that doesn't just happen overnight. It isn't an immediate decision. It is staffed out somewhere.

I said to her: I want to see all of the documents relating to the decision to create this national monument.

Oh, yes, Senator, I will provide this. It was a completely open process.

And then we got a map. I discovered, by the way, that the map had been in circulation among environmental groups for 3 months prior to the time when I asked her for a copy, and she told me none existed.

We looked at the map to see how carefully drawn the boundaries were of this national treasure we were hearing about. In one of the towns in Utah, the high school football field was in the national monument. The map was drawn in secret. The map was drawn with people who would not consult with those who knew what was going on, and they had drawn the line so wildly that they had picked up the football field of a high school, thinking that was part of the national monument.

One of my constituents found his front driveway in the national monument. He had to drive across national monument lands to get to his house because they had ignored the procedures so fully, they were so anxious to do this in secret and not consult with anybody so that they would have a political coup to announce in the middle of a Presidential campaign, that they made those kinds of mistakes.

Is it now so sacred a land that we cannot take the football field out and turn it back to the high school?

Is it so sacred a piece of land that we can't give the man his driveway back?

I ask those questions rhetorically because we did that. In one of the previous Congresses, we redrew the boundaries and took out the football field...
and the driveway and some other mistakes that were made. I got my first set of documents from Katie McGinty, which were made when she was the staff person and a travel bureau brochure. I went back to the Appropriations subcommittee meeting. It is not usually my style, but I am afraid I embarrassed her by holding these up and saying, "You are suggesting that these are the basis of a decision to lock up 1.7 million acres in my home State? You are saying this is the complete record? I am sorry, I cannot accept that."

Finally, at a later time, we got the complete file that she had with respect to the creation of this monument. I will say this in her defense. She did not shred any documents. When she turned the documents over to me, the file was complete. It contained the following documents but not the one cited in young age before, where she says, "We will have to abandon the project of trying to find lands in Utah that qualify for a national monument because it is clear there are none that do. Let's forget the Utah project because we can't find any lands that will qualify." And then, what I consider the smoking gun, there was a 5% by 8½ piece of paper in which she had written in her own hand a note to the Vice President. The Vice President had been her boss. She was on his staff while he was a Senator. That would explain the familiarity of the note. It said: Al, the enviros have $500,000 to spend on this campaign, either for us or against us, depending on what we do in Utah. Signed, Katie.

I can't vouch for that being the exact language, but that is close enough. I read and reread that note many times. The national monument was being created in southern Utah in the dark to stimulate the expenditure of $500,000 of campaign activity on behalf of the Clinton-Gore ticket in 1996. There was the entire motivation following on the earlier document where she said there aren't any lands that qualified.

Now, the Senator from Illinois has said these are special lands and that they cannot be explored by oil or gas on 95 percent of the public lands. This is reminiscent of a statement President Clinton made when he announced that monument. He said, "Mining jobs are good jobs" but in this case, we can't find any lands that will qualify. So we will set this land apart so there won't be any mines here."

If I had been there and had the opportunity to have an exchange with President Clinton, I would have said: President Clinton, you are exactly right. We cannot have mines everywhere. We can only have mines where there are minerals. Sure, you say 95 percent of the land is open for exploration. But nobody explores land where there is nothing to look for. Nobody wants to explore lands where there are no mineral resources. Why was this land set aside in a national monument?

The Senator from Illinois says he wants to take his grandson out some day to look at the beauty of the land. I suggest to his grandson to look at it right now. You will have the same reaction we are getting from tourists who are coming. We were told when this was created that we would have an economic bonanza of tourists coming to look at this magnificent piece of scenery. I have gone to the county commissioners of the counties around there and said, "How much tourism have you had?" They said, "None." None? This has had so much publicity, surely people have come from all over the world to see this scenic wonder. Yes, they come—once. They say we have come to see this magnificent scenery President Clinton talked about on the rim of the Grand Canyon. We don't need a backdrop to make the announcement. That is scenic and it is worth coming from all over the world to see. That was his visual aid when he talked about the land in Utah. The folks show up from Germany and Japan ands elsewhere to look at the land in Utah, but they say: This doesn't look any different than any of the other BLM land we can see. What is the big deal?

They don't come back. We have seen two counties be destroyed economically since the creation of the Grand Staircase-Escalante Monument, as people were afraid to invest in those counties. They were not very viable to begin with and have no tourism. With all of the publicity, there is no tourism.

All right. I suggest to the Senator from Illinois, if he wants to take his grandson to see this grand scene, he can do it, and it will be there in the future. If anyone will look like all the rest of the scenery around it. Why was this monument created? It was created for one purpose, and one purpose only, and the documents I got from Katie McGinty that are made part of the public record make this abundantly clear, along with the smoking gun saying we are going to have $500,000 spent on our behalf if we do this, or spent against us if we don't.

The reason the environmental groups were so anxious to see to it that this monument was created was because of the coal on the Kaiparowits Plateau. Let me describe to you how much coal there is there. It is not available on any of the other 95 percent of public lands. It is only available on the Kaiparowits Plateau. The average coal seam is about 4 to 6 feet high. You go into a mine that has a coal seam in West Virginia—and I see the senior Senator from West Virginia here, and he knows more about coal than any of the rest of us—and I think you have a pretty good seam if it is 6 feet high. The coal seam in Kaiparowits is 16 feet high. It runs from back where the mine mouth will be, over 160 miles. There is enough energy in that coal to heat and light the city of San Francisco for 300 years. And we are told—President Clinton had said—"We don't have to explore this. You don't have to look for it. People have known about it.

Over and above the coal generated by that incredible seam of coal is a pool of methane gas—coal methane gas, which, if tapped, would produce even more energy than the coal itself. There are no reliable estimates as to how much coal-based methane gas there is, other than "huge."

Now, neither the coal nor the coal methane gas can be used to deal with America's energy crisis. Instead, we are told: Go look someplace else. You have 95 percent of the public lands to look for. Don't look here where the resource is called Kaiparowits. Here I go way back in history and share with you this insight: When my father was here—he came here in 1951, elected in 1950—the No. 1 issue facing the West was water. One of the proposals that was made during the Eisenhower administration was that we build a dam on the Colorado River that would be known as the Glen Canyon Dam and would create behind it Lake Powell. The predecessors of today's environmental groups came and testified against the building of the Glen Canyon Dam.

One of their arguments was: We will never, ever, need that much power. You have Boulder Dam—or Hoover Dam. It was called Boulder Dam in those days; it's called Hoover Dam. We have all the power we will ever need for southern California, Arizona, Nevada, and Utah. To build the Glen Canyon Dam to produce that power will give us a glut of power, and we absolutely do not need it and never will need it. However, they said—and here is the point—if by some possible chance we are wrong and we do need that power, you still do not need the dam because there is all that coal at Kaiparowits. Let's burn the coal at Kaiparowits.

One of their arguments was: We will never, ever, need that much power. You have Boulder Dam—or Hoover Dam. It was called Boulder Dam in those days; it's called Hoover Dam. We have all the power we will ever need for southern California, Arizona, Nevada, and Utah. To build the Glen Canyon Dam to produce that power will give us a glut of power, and we absolutely do not need it and never will need it. However, they said—and here is the point—if by some possible chance we are wrong and we do need that power, you still do not need the dam because there is all that coal at Kaiparowits. Let's burn the coal at Kaiparowits.
when members of the Utah delegation ask us about our plans, we will lie to them.

I am sorry to be that strong, but that is what happened because I asked the question directly, and I was given the answer directly, and the answer was a lie, demonstrable, provable in the Record. The answer I got was a lie.

Now we are being told: Oh, these are special lands that we must preserve for our grandchildren, when in fact the genesis of this monument makes it clear these are special lands primarily because of the mineral resources that are in them, the energy sources that are there, the low-sulfur coal which, by the way, if mixed with more traditional coal, would lower emissions at every powerplant where it was used.

For those who are concerned about green energy—green Interior Department spokespeople in the public, clamoring to open Kaiparowits to lower the emissions of greenhouse gases. If you say let’s not do the coal, the coal is too bad, how about the coal-based methane gas? How about getting that put in these tremendous quantities? Oh, no, no, that would involve building a pipeline; we can’t build a pipeline over these lands.

That is the history, Mr. President. This is not as it has been painted to be. And I do not impugn the motives of those who are painting it differently because they were not there. They do not understand the degree of duplicity that went into the creation of this monument.

If I sound angry, it is because, frankly, I was, as was everyone else associated with it, everyone else who was involved with the chicanery that was employed to create this monument.

Are there portions of the Kaiparowits Plateau truly belonging in a national monument status? The answer to that is yes, there are. Am I and the other members of the Utah delegation in favor of preserving those lands in national monument status? The answer is yes, we are, but it should be done in the kind of open process that the Congress decreed when they created NEPA. It is too late for that now.

As Leon Panetta said to me, we have 3 years to pick up the pieces. The 3 years have passed and, quite frankly, the Interior Department spokespeople in the public at the BLM have, indeed, come up with what I consider to be an acceptable and logical management plan for the monument. But the fact is that all of those marvelous qualities for preservation in a national monument can be preserved and the coal can still be taken out.

I have been to the site where the mine mouth will be, and I say mine mouth singularly because you can get that entire seam that I described through a single mine entrance. It would not require multiple entrances.

As luck would have it, or as nature has created it, that particular mine mouth is at the bottom of a circular canyon, which means it cannot be seen unless you are standing at the edge of the canyon looking down on it. It could not possibly get away. They would look right over the top of it on to the other side of the canyon and not even know it is there.

The entire facility to take the coal out of the Kaiparowits mine could be on 50 acres at the bottom of that circular canyon. We are not talking about a huge environmental disaster that will spread over several square miles. We are not talking about a visual blight that could be seen for hundreds of miles. We are talking about a mine mouth at the bottom of a circular canyon that could go right into a sheer cliff, into the seam of coal, and bring out enough coal to light and heat the city of San Francisco for 300 years, and not a single strip mining, no open pits, no oil derricks. It can all be done in such a way that people who want a wilderness experience can have it unless somebody tells them: There is a pipeline 40 miles away from you. Oh, well, that spoils my experience to know there is a pipeline there.

You cannot see it. It does not affect you in any way. You cannot hear it. But the fact that it was put in there somehow will spoil the experience.

I am not suggesting we need to automatically go in there and start mining the coal right now, nor am I suggesting that we need to start putting down the initial wells to start getting the methane gas right now, because that would be an precipitously going in there and start creating the monument in the first place. That would be a political action rather than an intelligent examination of this resource and what needs to be done.

I am saying let’s give the President the authority to do the studies, make the examination, receive the public comment, go through the process that should have been done in the first place; then, with all of the facts on his plate, make a decision that I hope will not be driven by political considerations. I hope that nowhere in the files will be a note that says: There is $500,000 for the campaign if we act this way, and $500,000 against us if we act that way.

To summarize: I, the other Members of the Utah delegation, and the citizens of my State are as proud of the national heritage that we have received as anyone in this country. We take no back seat to anyone in our determination. It is indicative of the way the people of Utah feel about our State. We are making plans now to preserve our lands for future generations. It is too late for that now.

To me, this is not a repeat of what Katie McGinty and others in the Clinton administration did, of creating something in the dark, cramming it down people’s throats without any opportunity for comment, and then declaring that it is forever and ever inviolate. That process only breeds ill will. That process only creates bad feelings. There is no place for that kind of process to ever be repeated.

My objection to the amendment by the Senator from Illinois is—and he would enshrine the results of that process—not the process; he had nothing to do with the process. He didn’t know what was going on. He had, given his sense of fair play, he probably would have objected to it, but he would enshrine the results of that process into law forever. That, frankly, doesn’t make sense. It is a process that does not deserve to be rewarded with that kind of perpetual reference. We need to deal with our lands in a way that is good for the lands, a way that is good for the people, a way that is good for
our posterity, and enshrining what was done in the case of the Grand Staircase-Escalante Monument is not the way and manner I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, I ask unanimous consent that Senators Feinstein and Boxer be added as cosponsors to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURBIN. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DURBIN. I ask the majority whip if this is appropriate, we have a unanimous request that this amendment be scheduled for 2:45.

Mr. REID. We will work on the exact time.

Mr. DURBIN. I will suspend a unanimous consent request on a specific time.

I will respond to my colleague and friend, the Senator from Utah, Mr. BENNETT. I have heard him speak before about the Grand Staircase-Escalante National Monument. He is a man of great control and moderation. I can tell it brings his blood pressure to a high level to recall the creation of this particular monument. He has heartfelt feelings about this process and he has expressed them, hopefully, in private.

I do say in fairness that one of the people he mentioned several times on the floor is someone I respect very much and worked with for many years, Miss Katie McGinty, who worked for the Governor of Utah, Mike Leavitt. I found her to be entirely professional and ethical, with the highest integrity and great skill. I want to make certain that is part of the record.

I also do want to make note of the following for the record, as well. With regard to the Grand Staircase-Escalante National Monument, the Bureau of Land Management has utilized an extensive process to develop a management plan to administer the new monument. The planning team included five representatives nominated by the Governor of Utah, Mike Leavitt. Over 28 meetings were held and over 9,000 comments considered prior to finalizing the monument management plan in February of 2000. In addition, following establishment of the monument, the Department of the Interior worked closely with the State of Utah to negotiate a major land exchange that traded State and Federal land so as to help maximize the value of State lands for the benefit of Utah's schoolchildren and provided a $50 million payment to the State.

My amendment addresses whether or not we will drill for oil and gas and mine minerals, particularly coal in this case, in the Grand Staircase-Escalante National Monument. I make the following comments for the record: According to the U.S. Geological Service, all of the recoverable oil in the Grand Staircase-Escalante National Monument would provide for America's energy needs for a total of 4 hours. All of the recoverable gas in the Grand Staircase-Escalante National Monument would provide for America's energy needs for 1 hour.

On the issue of coal, fortunately, we are not at the mercy of anything like OPEC when it comes to coal in the United States. The U.S. Department of the Interior has estimated we have 250 years worth of coal reserves right here in the United States. The Senator has said repeatedly that the coal in this nation to set aside all land, say all the lights in San Francisco for a long period of time. I suggest all the coal in the United States could light the lights of most of the western civilization for a pretty substantial period of time. We proved it has been done and we do. I have three times more coal in my State of Illinois than the Senator from Utah believes he has in his State, at least by estimates from the Department of Energy.

The Interior Department bought back all of the Federal coal leases within the Grand Staircase at a cost to taxpayers of $20 million. There are no existing leaseholders, no coal development taking place in this national monument. So those who were there were compensated when they left.

Let me go back to what this amendment is all about and why I have offered it. The Bush administration said they are prepared to explore the possibility of drilling for coal and gas in national monuments. When visiting Washington, D.C., and you hear the words "national monument" you think of the Washington Monument and the Lincoln Memorial. But national monuments under Federal lands are tracts of land set aside by Presidents over the history of this country to be preserved for future generations.

Beginning with Republican President Teddy Roosevelt, 14 of the 17 Presidents who served since 1906 have used their power to set aside land saying this is special land and is part of our national heritage that should not be developed and should be protected. In all, these Presidents, Democrats and Republicans alike, have established 122 national monuments. After the Presidents did that, Congress came in and agreed with the President in at least 30 different instances, saying these national monuments should be national parks, the next stage of the process.

We are talking about the Grand Staircase-Escalante National Monument in Arizona, the Giant Sequoia National Monument in California, Craters of the Moon National Monument in Idaho, Vermillion Cliffs National Monument in Arizona. The Grand Canyon was once a national monument that became a national park.

The President and the amendment believe we ought to take this special real estate in America and treat it in a special way. We ought to say that for a small percentage of the land that we call America, that God has given us, we are going to protect it from economic exploitation.

But not President Bush. President Bush and his administration says no; we are prepared to drill for oil and gas and mine coal in these lands.

You cannot protect the special character of these lands and use them economically. You cannot hope to say to your children, grandchildren, and their children and grandchildren, that they will be able to see something spectacular, a special unique sight, if you allow this kind of economic exploration.

This is a photograph taken of one of these national monuments. It is a beautiful piece of land. I am sure we find it hard to believe that a simple so future generations can come to see it, visit it, and know it is to be protected. Mr. President, 95 percent of all the Federal lands we own in America—and we own millions of acres—and we are not going to sacrifice something that is really special. My amendment says that for 5 percent, 1 acre out of 20, special rules will apply: No drilling for oil and gas, no mining for coal.

I hope those who have followed this debate will understand that existing leaseholders on these lands will not be disadvantaged. In fact, all we are saying is that this heritage, to be left to future generations, should be protected.

At the end of consideration of this amendment, there will be some people watching the final vote very carefully. They will be people who work for the big oil companies and the drilling companies, some coal mining companies out west, who really think if they can get their hands on this land there is money to be made.

There will be others watching, too: People across America who understand a special responsibility which elected officials have today in the Senate and in the House of Representatives and, yes, in the White House as well, to preserve this national heritage.

I encourage all my colleagues to join me in voting for this amendment. It had a strong bipartisan vote in the House of Representatives: Democrats and Republicans and an Independent alike, believing it was important we stand with one voice when it comes to something as basic as this.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.
Mr. REID. Mr. President, I ask unanimous consent that beginning at 4 p.m., second-degree amendments are relevant to the first-degree amendments under the previous order already entered.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant bill clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CARPER). Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I listened with great attention to the debate concerning the amendment that is before us. I would like to specifically identify the amendment in some detail because I think Members should have an understanding of just what the intention of the Senator from Illinois is.

In the amendment, the specific purpose is to prohibit the use of funds for the conduct of preleasing, leasing, and related activities within national monuments established under the Act of June 8, 1906. It is further appropriate to reflect on the conclusion of the amendment, which states:

"... a national monument established under the Act of June 8, 1906 (16 U.S.C. 431 et seq.), except to the extent that such a preleasing, leasing, or other related activity is allowed under the Presidential proclamation establishing the monument."

So one has to question just what the purpose of the amendment is. It says, on one hand, no funds will be allowed for preleasing within national monuments, and then it concludes by saying: "except to the extent that such preleasing, leasing, or other related activity is allowed under the Presidential proclamation establishing the monument."

What we have here, in the establishment of a monument, in the normal course of events, is a Presidential proclamation. And in that proclamation it is specifically addressed as to what can occur within the monument.

I really question the necessity of the amendment. I question the applicability of the amendment. I question the application of the amendment. I question the purpose and objective of the amendment.

I am not one of the managers of the bill, but one of the more expedient alternatives would be to accept the amendment because the amendment does not do a thing. It implies that you are not going to have any funds for preleasing and related activities—and I assume we mean oil and gas or mineral exploration in national monuments—but then it goes on and says: "except to the extent that such preleasing . . . or other related activity is allowed under the [authority of the President]."

Which basically states the authorization for the proclamation establishing the monument. Hopefully, that is clear.

I assume there are some out there who would say, we do not want oil and gas or mineral exploration occurring in national monuments. We have heard from Senators who have had some experience with national monuments, the creation of these monuments under the Antiquities Act. Certainly one of the more recent States is the State of Utah and the case of the Grand Staircase-Escalante episode where a monument was created with very significant acreage. It took off the development scenario of some coal leases that the Senator was going to use to fund their educational system. I think, unfortunately, the application of the Antiquities Act in that particular case was inappropriate.

Our previous President took that action without the knowledge of the Governor of Utah, and without the knowledge of the congressional delegation of Utah. Furthermore, he did not have the compassion to even make the announcement in the State of Utah. I believe it was made in Arizona.

So the application of the Antiquities Act, traditionally, on national monuments is well established. But the criteria of what can be done in those national monuments are ordinarily left up to the Presidential proclamation establishing the monument, which certainly is the case in the amendment pending before this body. I hope Senators, upon reflection, will recognize that this particular amendment really accomplishes no purpose.

One of the things that concerns me, however, is the implication and the lack of understanding of terminology associated with the designation of public land.

We have all seen the concern expressed on the floor—both in the House and in the Senate—as to the issue of developing resources offshore or within our States or within specific designated areas. But I would like to share with you a chart that shows the designation of areas that have been taken off limits in recent years by State and Federal action. It is kind of interesting to note the entire east coast—from Maine to Florida—has been removed from any OCS (Outer Continental Shelf) activity. And the merits of those action speak for themselves. These States simply do not want any activity off their shore.

We saw an agreement on lease sale 181 in Florida the other day where a significant portion of the lease was removed. Yet the inconsistency is, Florida wants very much to receive a portion of the energy that would come from exploration offshore in the gulf. It is kind of hard to have it both ways, but some would like that.

The chart also shows the Pacific coast—the entire area from Washington State to California—is off limits. In other words: NIMBY, Not In My Backyard. We have in the overthrust belt the States of Wyoming, Colorado, Utah, and Montana. These are States that have oil and gas development and production. As a consequence of the roadless area promulgated by the previous administration, we have seen a significant area of prospects for oil and gas, particularly natural gas, taken off limits. There were estimated to be about 22 to 23 trillion cubic feet of natural gas in this overthrust area. We have taken it off limits. That means basically no resource development.

There you have it. With the exception of Texas, Mississippi, Louisiana, and Alabama, that support OCS leasing—we find ourselves in a position where we have an energy crisis. We find ourselves in a position where we are becoming more and more dependent on sources overseas coming into the United States.

We debate the merits of the inconsistency in our foreign policy where we find ourselves dependent on 750,000 barrels of oil a day from Iraq, from our old friend Saddam Hussein, where we fought a war in 1991 and 1992. We lost 148 U.S. lives in that war. And now we are importing oil from that country. We buy Iraq's oil, put it in our airplanes, and then go bomb him while enforcing a no-fly zone, basically a blockade in the air. We risk U.S. lives in doing that. We have flown over 230,000 individual sorties over Iraq.

So here we are putting our own area off limits, going overseas, not really where we want to be.

Whether it comes from a scorched-earth refinery or a scorched-earth oil field in OPEC, we find ourselves subject to the cartel of OPEC. Cartels are illegal in the United States. We would not even pass the test associated with that type of business in this country because we have antitrust laws, but we are, in effect, supporting the viability of the OPEC cartel by becoming more and more dependent.

I am sure the Presiding Officer remembers back in 1985, we had gas lines going around the block in this country. We had the Arab oil embargo at the Yom Kippur war. We had the public indignant, outraged because there were gas lines around the block. We were 37-percent dependent on imported oil at that time. Today, we are 57-percent dependent. The Department of Energy says the way we are going, we are going to be 63- or 64-percent dependent by the year 2007 or 2008. Where is it going to be?
you really think about it, most of these sources are for stationary power generation. But they do not move America. They do not move the world. Mr. President, you, and I, and others, do not fly in and out of Washington, DC, on hot air. Somebody has to produce the oil, refine it, and put the kerosene in the jet. Only then do you take off. Whether it is your planes or your trains or your automobiles or your boats, America and the world are dependent on oil. And we are becoming more and more dependent on one source, and that is OPEC.

We are sacrificing our national security interests; there is no question about it. To give a recent example, just a few weeks ago, Saddam Hussein didn’t get his way with the U.N. So he cut his oil production. He pulled 2% million barrels of oil a day off the world market. We thought OPEC would make up that difference. They took one look at it and said: No, we are going to hold off. So we were short that month. This month, about 60 million barrels were held off the world market. It kept the price up.

Look at what happened in this last year with OPEC in developing their internal discipline. They developed a floor and a ceiling on oil: $22 was the floor; $28 was the ceiling. It has gone over that. They have a discipline. We are becoming more and more dependant on that source, and we are becoming more and more exposed from the standpoint of our national security.

Where is it going? We are debating an amendment that doesn’t do a thing to address supply. We should be debating an energy bill at this time in a timely manner to address the crisis ahead. As we saw out in California, it can happen very fast. When we look at the concern the American people are exposed to over the coming blackouts, how does that do to increase crime? These are exposures that real people have and does that mean? It might mean in the minds of some, a place for wildlife, but it is not. National monuments are created by the Antiquities Act. The Antiquities Act can preclude oil and gas or mineral exploration. These refuges are determined at the time that the national monument is established. That is why the application of this amendment has no meaning because, again, it says: No money for preleasing within national monuments except to the extent that such preleasing or other related activity is allowed under Presidential proclamation establishing the monument.

There we have it. Let me just take my colleagues for a little walk into the wildlife refuges. What is a refuge? What does that mean? It might mean in the minds of some, a place for wildlife, but we have oil production in many refuges. We have mineral production in many refuges. We have gas production in many refuges. We have coal production. We have salt water conversion. We have many activities in this particular nomenclature of refuges.

Here are the States. We have 17 refuges in Louisiana, Mississippi, California, Montana, Michigan, my State of Alaska. These are activities that are authorized under the terminology of refuges.

This is a white chart. This chart shows where these refuges are. It is important that the public understand the difference between national monument designation under proclamation by the President and what is allowed in them by the proclamation and refuges. In Alabama, there is the Choctaw National Wildlife Refuge. In Alabama, the National Wildlife Refuge and wetlands management districts is a concept that has long been fostered by the Congress. It is specifically the balanced use of Federal funds and the reality that it is accepted and is commonplace.

This is oil and gas activity in 30 refuges, and there are 118 refuges from coast to coast where we are safely exploring for oil and gas. We have over 400 wells in Louisiana refuges alone. And we have them in Montana, North Dakota, South Dakota, Oregon, Kansas, Louisiana, Texas, Alabama—on the Kenai National Wildlife Refuge—North Dakota, Mississippi, Michigan, and Montana.

I am not going to get into a presentation of the merits of ANWR. What makes it any different than any of the other national monuments? Certainly not from the establishment of the terminology “refuge.” ANWR is included as a refuge, therefore oil and gas activity is allowed, subject to the authority of the Congress. That is what that debate is all about.

But as we look at the reality associated with the energy crisis, we have to recognize we are going to have to look for relief. You are not going to get it from alternatives. You are not going to get it from renewables. In spite of the fact that I support the technology, I support the subsidy, I support continued taxpayer support of these, they still constitute less than 4 percent of the total energy mix. We have expended over 20 years, $6 billion in the last 10 years. It has been money well spent, but it is not going to replace our dependence on conventional sources of energy.

How did we get into this thing? Why are things different now? I could talk about oil and gas, but if we look at foreign oil dependence—now at 56 percent, up to 66 percent by the year 2010—the national security interest of this country is in jeopardy. What are we going to use as leverage?

In 1973, we created the Strategic Petroleum Reserve. Some people say that can be our defense. Do you know what we found out when the previous administration took 30 million barrels out of the Strategic Petroleum Reserve? We didn’t have the refining capacity to refine it into the heating oil that was needed to meet the crisis at that time in the Northeast Corridor. We were genuinely concerned.

We took those 30 million barrels, we simply found we had to offset what we would ordinarily import. We didn’t have the refining capacity. I think we achieved, out of that 30 million barrels, somewhere in the area of a 1-day supply of heating oil for the Northeast Corridor. It just won’t work. If you don’t have the refining capacity, you can have all the oil in the ground you want, it isn’t going to do the job. You are not going to be able to increase, if the need is there, any more than the extent of the crisscrossed about 35 billion.

The reason things are different this time is we have natural gas prices that have soared. They have gone up as high as $10. They are down now, thank God, but we are still using our reserves faster than we are finding them. We haven’t had a new nuclear plant licensed in this country in 10 years. We haven’t had a new coal-fired plant of any consequence built in this country since 1995, and coal is our most abundant domestic resource. We have technology for clean coal. Nothing has been done in that area. Why? It isn’t because the supply isn’t adequate; it is because we haven’t had

### Congressional Record—Senate

**12889**

**July 11, 2001**
the conviction to come to grips with the reality of the law of supply and demand. Even Congress can’t reverse the law of demand and increase the supply or reduce the demand.

Demand has gone up and supply hasn’t. That is why it is different this time. I indicated that there have been no new gas stations in 10 years. So if we look at our increased dependence on foreign oil, increased price of natural gas, no nuclear plants—nuclear is 22 percent of our stationary energy—no new gasoline refineries, no new coal-fired plants, and to top it off, we find our capacity to transmit our natural gas and electricity is inadequate. Why? Because we have become more of an electronic society. We leave our computers on; we leave our air-conditioners on. We certainly, perhaps, are using a more fuel-efficient refrigerator and use half of the energy, but if the old one isn’t worn out, you won’t do it.

The point is that the “perfect storm” has come together in the sense of energy. We have an energy crisis. As a consequence of that crisis, I would have hoped that we would be debating how to address this energy situation as opposed to debating the merits of a national monument determination that isn’t going to result in any significant activity, other than some of the media might be misled that it is going to terminate any activity in areas of national monuments, which it will not. We have skyrocketing energy prices, gas shortages, and I guess I will conclude with a reference to, again, how important energy is, how we have a tendency to take it for granted.

You know, the American standard of living is based on one thing: affordable and adequate supplies of energy. That is why if we don’t keep up with the increased demand by increasing the supply by conservation, alternatives, renewables, we are going to jeopardize that standard of living. And with it goes our economic security, and with it goes our national security.

I think we all feel exposed to the potential of being held hostage by a foreign leader such as Saddam Hussein. We have our job security at risk—to keep Americans working and create more jobs, increase our workplace. It moves the economy—moves it forward and brings each of us along with it, giving us personal security and flexibility to live our lives as we choose. We saw in California what happens when stoplights don’t work and when the elevators become jammed.

I think we have to focus in on what we must do for American families—the consumers—and address the reality that we do have a crisis. I am going to conclude with a reference to something that I think America sells itself short on in times such as this, and that is America’s technology and ingenuity.

We have the capability to meet the challenges associated with a responsible environmental sensitivity and the reality that there can be things better. But there is no magic to it. Somebody has to produce this energy. It has to come from some identifiable source. I am speaking primarily of what moves America, and right now that is oil. I wish we had another alternative, but for the foreseeable future, we simply do not.

As a consequence of that reality, we have before us an energy plan. I intend to work cooperatively with Senator Bingaman toward a chairman’s mark. We have an outline given by the President and the Vice President and their energy task force report. So I guess events will dictate if you will, on the process in the Senate. It is moving in the House. The House is moving on an energy bill. We should be moving on it here. I am very pleased to see that it is now in the Democratic leadership’s recommendations of activities. We haven’t gotten a schedule on it at this time, but I hope we will in the very near future.

So, again, let’s get back to the debate at hand with regard to the amendment, prohibiting preleasing-related activities within national monuments by disallowing any funding and, yet, recognizing in the amendment to the extent that such a preleasing or other related activities is allowed under the Presidential proclamation establishing the monument, would seem that the amendment is neutral to the issue of supply, neutral to the issue of whether or not there is any authority for oil or gas and mineral activity within any new national monuments that might be created in the future is certainly not applicable to those already in existence.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I believe all debate on this amendment is completed, and the yeas and nays have been ordered.

The PRESIDING OFFICER. That is correct, the yeas and nays have been ordered.

Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the vote on or in relation to the Durbin amendment occur at 4:10 p.m. today.

The PRESIDING OFFICER. Is there objection?

Mr. BURNS. Mr. President, I move to table the Durbin amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Reserving the right to object, I ask the Senator to allow an amendment to his motion to table—that there be no second-degree amendments allowed to the amendment prior to the vote.

The PRESIDING OFFICER. Is there objection?

Mr. BURNS. Without objection, it is so ordered.

Is there objection to the request to have the vote occur at 4:10 p.m.?

Mr. BURNS. I move that the Durbin amendment be tabled, and I ask for the yeas and nays, which vote will occur at the agreed time.

The PRESIDING OFFICER. First, the Senate needs to address the request raised by the Senator from Nevada of having the vote at 4:10 p.m. He pronounced a unanimous consent request to have the vote at 4:10 p.m. Is there objection?

Mr. BYRD. Reserving the right to object, what is the request?

Mr. REID. Mr. President, I say to my friend, the manager of the bill, we will have a motion to table the amendment at 4:10 p.m. today, and prior to the vote there will be no second-degree amendments to the Durbin amendment.

Mr. BYRD. A vote on the motion to table would occur at 4:10 p.m. today.

Mr. BURNS. Yes.

The PRESIDING OFFICER. The Senator from Nevada asked unanimous consent the vote occur at 4:10 p.m. There has been no objection. The Senator from Montana has moved to table and asked for the yeas and nays at 4:10.

Mr. BURNS. And the vote occur at the agreed time at 4:10.

Is there a sufficient second?

Mr. BYRD. What was the request, “and then 4:15”? Mr. BURNS. The meeting with the President and the group downtown was not in until 4:15. We are going to begin the vote at 4:10 and they will have time to vote; 4:15 had nothing to do with it. We agreed at 4:10 to table the Durbin amendment.

Mr. BYRD. I remove my reservation.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second on the motion to table. The yeas and nays were ordered.

Mr. REID. I ask unanimous consent the Senator from New Jersey be allowed to speak for up to 10 minutes as if in morning business.
When you look at former national monuments, they include the Grand Canyon—two national monuments—Glacier Bay, Zion National Park, and Acadia National Park. So though I have the term "national monument," most Americans are familiar with the term "national park." Although they are not the same legally, the fact is that many of our national parks began as national monuments.

We have taken great care when it comes to these national monuments to say that they are so special and important that we will be careful what we do with them once we have designated them as treasures for our Nation to protect. The reason I have offered this amendment is that we have had a clear indication that public land, such as the White House—President George W. Bush and his Secretary of the Interior, Gale Norton—that they are now going to explore the options of drilling for oil and gas and mining minerals in such national monuments as were designated by the previous administration.

The House of Representatives, when they considered this, on a strong bipartisan rollcall, agreed with my amendment and said we should prohibit this administration and this White House from drilling for oil and gas in national monument tracts across America. This land is too valuable to our Nation; it is too valuable to our national heritage, to say to any oil company or gas drilling company or mining company: Please come take a look at our national monuments as a possible place to drill and to make a profit.

Some will argue—and they have in this Chamber—that it is shortsighted for us to limit any drilling for oil and gas or the mining of minerals at a time when our Nation faces a national energy crisis or an energy challenge. I disagree. Of all of the Federal land owned in the United States by taxpayers, 95 percent of it is open to oil and gas drilling and mining. We have said, if you can find those resources on that public land, we believe it will not compromise the environment nor jeopardize an important national treasure to go ahead and drill, but for five—per cent—one acre out of 20—of Federal public lands which we have designated as special lands—monuments; some may someday be a national park—in those lands we do not want to have that kind of exploration and economic exploitation.

If some step back and say: You must be turning your back on a great amount of energy resources if the Durbin amendment is enacted and prohibits gas drilling on these national monument lands, in fact, that is not the case at all. The U.S. Geologic Service did a survey of these national monument lands to determine just how much oil and gas there would be available. After they had done their survey, they established that all of the monuments combined have economically recoverable oil as a portion of total U.S. consumption that amounts to 15 days, 12 hours, and 28 minutes of energy. When it comes to gas, 7 days, 2 hours, and 12 minutes in terms of our national energy consumption. It is a tiny, minuscule, small part of the energy picture.

I have listened to some of my colleagues from other States talk about our energy crisis. You would believe that the only way we could keep the price of a gallon of gasoline under control is to allow the oil companies to go in and drill on lands that have been set aside by administrations to be protected. The bill clerk proceeded to call the roll.

Mr. DURBIN. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

Mr. DURBIN. Mr. President, 10 minutes or so, the Senate will be voting on my pending amendment. I believe the Senator from Montana has been given authority to offer a motion to table the amendment. But I want my colleagues who come to this Chamber to understand what the nature of this amendment is because it is very simple and straightforward. My amendment will simply prohibit new mineral leases from being issued in designated national monuments. It does not affect any existing, valid right, or prevent leasing in any area that was authorized for mineral activity when the monument was established.

That description is pretty legal. Let me try to translate it so that those who have not followed this debate will understand what is at issue. We have designated, in this country, various national monuments. These are tracts of land which Presidents of the United States, since Teddy Roosevelt, have set aside saying that they have special importance and value to the future of our country. These tracts of land have been set aside by all but three Presidents since President Roosevelt. President Nixon, President Reagan, and former President Bush did not establish national monuments. Virtually every other President—Democrat and Republican alike—made these designations. And, of course, this national monument land occasionally will mature into something which Congress decides is of great value.

The Senator from Montana has offered a motion to table my amendment. He opposes it. He has stated his position very effectively. But I would implore my colleagues on both sides to understand that this is a bipartisan amendment. It is an amendment which was supported by Democrats and Republicans in the House of Representatives because when it comes to conservation and the protection of our natural resources, why in the world should this be a partisan issue?

Teddy Roosevelt was a great Republican. Franklin Roosevelt was a great Democrat. All of these Presidents set aside land that was important for future generations. I am certain that some Republican President—no other President in the future—will do the same. And I hope that Democratic Members of Congress will respect it. But if we are going to show respect for these national monuments,
we have to understand that allowing for the drilling of oil and gas runs the risk of spoiling a national treasure.

I have spoken before, as have many of my colleagues, that drilling for oil and gas will not only destroy the beauty of our national monuments but will also destroy the wildlife that lives there. The President of the United States has a responsibility to protect our national monuments and the wildlife that lives there. But he has failed to do so.

This amendment makes it very clear that if there is a national monument designated somewhere where they have established that oil and gas drilling is to proceed, that amendment does not affect it. The only impact it will have is on the national monument space designated by the previous administration.

One of my colleagues from the State of Utah came to this Chamber and was clearly disappointed, to say the least, by the designation of a national monument in his State. The fact is, the national monument is there. We are saying, with this amendment: Keep the oil companies, keep the gas companies, keep the mining companies off of that national monument land.

In 1906, Teddy Roosevelt established Devils Tower in Wyoming as our first national monument. I take great pride in pointing out that the Senate will carry on in our tradition of standing up to special interest groups which, frankly, want to make a profit; they want to come in and drill on Federal public land, land owned by all of us as tax-payers to make a profit. They are in business to make a profit. But I invite them to make that profit in other places, not on these lands that have a special import and a special significance for all of Americans living today and for future generations.

This administration has been challenged for the last 6 months on environmental issues. They have not been as sensitive as they should have. The American people have said, overwhelmingly, they want an administration in the White House that understands that though energy is important, we cannot compromise important values in this country such as environmental protection and protecting our national monument lands.

I hope that this Senate, on a strong bipartisan vote, will reject the motion to table offered by the Senator from Montana and will enact the Durbin amendment which protects these lands and says to the Bush White House: Help us find other sources of energy, other sources of energy that do not compromise important and pristine areas in this country.

There are things we can and should do as a nation to deal with energy: Sustain energy by using clean energy; finding ways to conserve; having Congress accept its responsibility when it comes to fuel efficiency in the vehicles that we drive.

These are the things that are going to help us be a better nation in the 21st century. To stick with the philosophy and notion of the 19th and 20th centuries, to drill and burn our way into the future is so shortsighted. To think we would even consider going to lands such as national monument land that has such special value to every American citizen would be a serious mistake.

I urge all of my colleagues to vote against the motion to table and, once it has been defeated, to support the passage of the Durbin amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Mr. President, I ask unanimous consent that I may summarize my argument.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. Reserving the right to object, Mr. President.

Mr. BURNS. I will be very short.

Mr. DURBIN. I have no objection.

Mr. BURNS. The figures the Senator cited are from a USGS survey taken in 1995. Those figures have changed and moved up. No. 2, if he doesn’t want people to drill there, where can they drill?

How many people in this body or in this town drove an automobile or rode something here that required energy? How many? Do we close off the whole Nation because somebody is making a profit? Do we take the same mindset into agriculture, into production agriculture, as they have in Klamath Falls where 1,500 farmers cannot irrigate because of a suckerfish? It is a mindset.

I move to table this amendment for the simple reason that it will impact the country. You say only 5 percent or 2 percent of the population opposes it. Do we have a right to close off the whole Nation because somebody is making a profit? Do we take the same mindset?
The amendment (No. 879) was agreed to.

Mr. DASCHLE. Mr. President, we have been working with the distinguished managers of the bill. I would like to propose a unanimous consent request. I think it has the agreement of both sides. I have consulted with the managers of the bill.

I ask unanimous consent the Nelson amendment be the next order of business; that it be debated for a period of 3 hours, equally divided, and that the vote occur following the expiration of the 3 hours tonight.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. I do not object. Would the distinguished majority leader make that verbiage “not to exceed 3 hours”?

Mr. DASCHLE. Mr. President, I would so ask, that it not exceed 3 hours; that the time be equally divided, and that there be no second-degree amendments.

The PRESIDING OFFICER. Is there objection?

Mr. NICKLES. Reserving the right to object, I ask the majority leader, I think there were two Nelson amendments, one was a 1-year and one is a permanent ban. Would you tell us which one this is?

Mr. REID. One is a year and one is 6 months.

Mr. NELSON of Florida. It is the 6-month amendment identical to the House provision, amendment No. 893.

Mr. NICKLES. I shall not object.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 893

Mr. NELSON of Florida. Mr. President, I call up amendment No. 893.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida (Mr. NELSON) proposed an amendment numbered 893.

Mr. NELSON of Florida, I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose of amendment: to prohibit the use of funds to execute a final lease agreement for oil and gas development in the area of the Gulf of Mexico known as “Lot 181”)

SEC. 1. LEASE SALE 181.

None of the funds made available by this Act shall be used to execute a final lease agreement for oil or gas development in the area of the Gulf of Mexico known as “Lot 181”, as identified in the Outer Continental Shelf 5-Year Oil and Gas Leasing Program, before April 1, 2002.

Mr. BYRD. Will the distinguished Senator yield for a unanimous consent request without losing his right to the floor?

Mr. NELSON of Florida. Of course, I yield.

Mr. BYRD. I ask unanimous consent the committee amendment be agreed to, that the bill as thus amended be considered original text for the purpose of further amendment, and that no points of order be waived by this request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The committee amendment was agreed to.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Florida.

Mr. DASCHLE. Mr. President, in offering this amendment, let me frame the amendment so everyone understands the context of the amendment. In the House of Representatives’ discussion of the Interior appropriations bill some 3 or 4 weeks ago, a bipartisan amendment was offered by two Members of Congress from Florida.

The amendment that was attached by an overwhelming vote in the House of Representatives was with regard to a proposed lease sale, designated as 181, in the Gulf of Mexico, for the purpose of drilling for oil and gas. The House of Representatives, in a fairly substantial bipartisan vote passed a prohibition of that sale. It became law 6 months. Specifically, this amendment tracks the House amendment identically, in essence saying no money appropriated under this act, the Interior appropriations bill, can be used for the purpose of offering for oil and gas drilling lease sale 181.

Lease sale 181 was originally proposed as a tract of some 6 million acres. It is in the eastern planning area of the gulf, an area that heretofore has not been violated with any drilling.

When the White House saw that there was considerable opposition, almost unanimous, from the Florida congressional delegation, the White House scaled back the proposal to approximately 6 million acres to some 1.5 million acres. It is in a location that starts to violate the eastern planning area of the gulf by some 1.5 million acres, in which drilling for oil and gas could occur.

Why am I opposed to that? I could say that clearly the people of Florida have expressed their opinion over and over and over again, in huge numbers, with huge majorities, whether that be in the expressions through previous bills in previous years, by both the Senate and the House delegations from Florida, or whether that has been in the body in which I last served as an elected, statewide cabinet official of the State of Florida, in resolutions by the Governor and the cabinet of Florida opposing offshore oil drilling off Florida.

Why is there such intensity in Florida about not having drilling in the eastern planning area of the gulf?

It is simply this: We have a $50 billion-a-year industry of tourism. A lot of that tourism is concentrated along the coast of Florida. The Good Lord has given us the beneficent sugary white, powdered sand beaches. The beauty of those beaches has attracted, over decades and decades—indeed, over the last century—people to come to Florida to enjoy our beautiful environment.

It is without question in most Floridians’ minds that they see the possibility of oil spills from drilling off of Florida in the eastern gulf planning area, and it would be a devastating economic blow—a spike right to the heart in our $50 billion-a-year tourism industry.

Floridians happen to have another reason for not wanting drilling. That is the fact that we are very sensitive about our environment. As a matter of fact, so much of our tourism is intricably intertwined with preserving our environment and protecting it. The bottom line is that Floridians simply do not want waves of oil lapping onto the beaches.

I think we will hear testimony today by those who are on the opposite side of the issue who will say that drilling for oil and gas in the offshore Outer Continental Shelf has become much safer. That may well be the case.

But the fact is that according to the Minerals Management Service, the chance of an oil spill in lease sale 181 is all the way up to a 37-percent chance. Floridians simply do not want to take the risk of a 37-percent chance of an oil spill and that slick floating across the waters of the Gulf of Mexico and washing up onto the beaches of Florida where so much of our prized environment is displayed for the wonderful people who come to enjoy the natural bounty and beneficence of Florida.

I want to draw your attention to this map of the Gulf of Mexico. This map is very revealing with regard to the Florida story. I have talked to Senators in this Chamber who have had the White House tell them their side of the story. When they see this map, they say: I had no idea it was like that.

This map tells a completely different story. The story they are being told by the White House is that a compromise has been made that is acceptable, a compromise in which originally lease sale 181 included 6 million acres, part of which was that stovepipe that came
up close to the Alabama shoreline, which was, in fact, within about 30 miles of Perdido Key, which is our westmost beach in the State of Florida.

What they are being told by the White House is that the compromise of shrinking lease sale 181 is acceptable because it narrows it down, as represented here by the yellow, to a tract of 1.5 million acres instead of 6 million. They point out that it is 100 miles from Pensacola Beach, and that it is some 280 miles from Clearwater and St. Petersburg. Whereas, the original lease sale 181 was 213 miles from the west coast of Florida, and still 100 miles from here up at the top of the stovepipe. Of course, it was much closer.

But what they are not telling is the full story, and that is what I wanted to show down some.

The green color indicates the existing drilling leases in the Gulf of Mexico. Beyond this boundary is the eastern planning area in which there is no drilling for the simple reason that Florida has insisted each year that the threat is too great and the risk is too great to despoil our beaches and our environment.

As well as that, the estimated future reserves were expected to be very little. In all of the Outer Continental Shelf, which includes not only the Atlantic seaboard, all of the gulf, as well as the Outer Continental Shelf off of the west coast of the United States, California, Oregon, and Washington, 80 percent of the future gas reserves are estimated to be in the area that is already being drilled in the Gulf of Mexico—not in the eastern gulf planning area. And 60 percent of the future oil reserves are estimated to be in that area that is already being drilled know as the eastern gulf planning area and the central planning area—not in the eastern planning area.

We come to the table quite naturally to make our case to the Senate, having had the case overwhelmingly made to the House already that if the future reserves are mostly off the States of Texas, Louisiana, Mississippi, and Alabama, the area already being drilled, and the future reserves are not here, why take the risk of an oil spill that would destroy some of the world’s most beautiful beaches that support the economy of Florida. To repeat myself, the Minerals Management Service says the chance of a spill in lease sale 181 is up to 37 percent. That is a risk simply not worth taking.

I think this map tells the whole story. This area has not been violated—an area called the eastern planning area. Now in the attempt at a so-called compromise, the White House is pushing 1.5 million acres that now go eastward into this area that has not been violated in the past.

As you can see, with all of this drilling activity, that yellow spot right there on this map of the Gulf is what I call the proverbial camel’s nose under the tent. You can see that dirty little camel pushing underneath the edge of that tent.

What is going to happen in the future? That camel is going to start crawling into that tent, and that drilling is going to proceed in an inevitable march eastward straight for Tampa Bay. The people of Florida think that is too much of a risk.

We could talk about energy and a lot of the things that we ought to be doing that are not the subject of this particular amendment, but I am compelled to bring up the fact that, goodness gracious, if we but improve the miles per gallon for new automobiles manufactured—and there is another very controversial lease sale, the Arctic National Wildlife Refuge—by 3 miles per gallon on all new vehicles—not the existing vehicles, new vehicles—it would save the equivalent amount of energy that would be produced by all of the oil to be drilled in the Arctic National Wildlife Refuge.

So as we approach an energy crisis, and I am looking forward to having a debate when the Department of Energy authorization bill comes to this Chamber—what Senator Graham of Florida and I will probably be offering at that point is a complete moratorium. But for purposes of this Interior appropriations bill, I am offering an amendment that is identical to what was adopted in the House so that if adopted here this will not be an issue in the conference committee but, rather, would be accepted in the conference committee and would become a 6-month moratorium on the offering of this lease sale.

So perhaps what we ought to do is to rethink what White House’s energy policy of drill, drill, drill. Drill in the areas where the future reserves are already proven. Drill in the areas where the States do not object to the drilling off their shore. Drill in the area where a State such as Louisiana really does not have the God-given beaches, the white sand beaches that we have in Florida that are so much a part of our economy.

Save energy by conservation. Use our technological prowess to produce an automobile that will have a much higher miles per-gallon average.

I had the pleasure of riding in one of these hybrids. I could not believe it. It was just as comfortable. The car was just as roomy. The car had just as much pickup. In the hot summer Floridians have insisted each year that the threat is too great and the risk is too great to despoil our beaches and our environment.

it by saying that this line is not over the Alabama line. Where is the Alabama line? The Alabama-Florida line is up here on their map. These are the waters of the Gulf of Mexico. And this line right here is the line of demarcation, the beginning of the eastern gulf planning area that has never been violated by drilling.

So do not listen to the arguments that this is not over the line. This is over the line, 1½ million acres over the line. That simply is not worth the risk to us.

There are others who have a similar set of circumstances. I want to remind the Senators, the Senators of the Great Lakes, they do not want drilling off their shores. The Senators of New England, especially off of Maine, and that great lobster industry, do not want the drilling there. The Senators off the west coast of the United States don’t want the drilling there.

The fact is, the drilling has not occurred here for years because the future reserves are simply not there.

I am expecting others and I expect to be joined by my senior Senator, Mr. Graham. What I will do is reserve the remainder of my time.

I yield the floor.

Mr. BREAUX. Madam President, parliamentary inquiry: What is the time sequence and who is in control of the time?

The PRESIDING OFFICER. There are 3 hours evenly divided on this amendment, and the Senator from Florida has used 25 minutes. There is an hour and a half remaining on the opposing side.

Mr. BREAUX. I yield myself 10 minutes from the time in opposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana is recognized.

Mr. BREAUX. Madam President, the subject matter is energy. I just came from a meeting with the Vice President and a group of Senators, both Republican and Democrats, who are trying to see what we can do as a Congress to come up with an energy policy that makes sense for this country.

It is very clear that the United States at this time is in dire circumstances with regard to where we get energy, how much we get, and how much it costs. Over the last several weeks and the last couple of months, we have seen the price of gas go up. We have seen people panicking because they cannot afford their electricity bills because of the high price of natural gas. We see the uncertainty of areas of this country suffering blackouts and businesses having to close and suffer economic damage because they don’t have enough energy.

At the same time, we import 57 percent of the energy we consume every day from foreign sources. Many of these foreign sources are undependable. They are not our allies, and they certainly do not have the best interests of the United States as the premise for their operations. Yet 57 percent of our energy comes from overseas. It comes from organized cartels that regularly do things for which, if done in this country, they would go to the penitentiary.

What they do every day is fix prices of energy that we have to buy from them. They tell us how much we are going to have to pay by controlling the amount they produce. Yet we as a nation, in the year 2001, have been compromised, both congressionally and because of our energy policy to govern how we exist when it comes to energy supplies.

If we imported 57 percent of the food we eat, people would be marching on the capital of this country saying that is an unacceptable condition. Because food obviously is important to our national security and the way we live in America. That is absolutely true. But it is no less true that when we import 57 percent of the energy, that is an unacceptable set of circumstances we must address.

How do we address it? Unfortunately, one of the ways that we have, over the years and over several administrations and over several Congresses, was to say what we were not going to do. We have said that we are not going to look for oil in the Outer Continental Shelf, which has some of the most promising resources of any place in the world off the coast of the United States; that we are not going to do anything from Canada to the Arctic; that we want those areas too valuable and should not be touched; and through congressional moratoriums and through Presidential moratoriums, basically everything from Key West to the border of Canada is off limits: Don’t touch it.

In addition to that, when we look over to the west coast, which happens to have some of the States that consume by far the greatest amount of energy per capita, we have said, through moratoriums and Presidential, that we are not going to do anything from Canada on the west coast all the way to Mexico on our southern border because those areas are pristine, they are nice, we should not have the potential for having an oil spill.

The only area of our Outer Continental Shelf in which we have had production, which produces the greatest amount of natural gas, the greatest amount of oil and gas, and has done so for the last 60 years, of the offshore areas is the Gulf of Mexico.

We have said we are not going to touch ANWR. We are not going to touch the Arctic National Wildlife Refuge. We will not touch the monuments. We will not touch the east coast. We are not going to drill off the west coast. But go drill for oil and gas in the Gulf of Mexico.

I represent Louisiana. I am happy with that policy because it provides jobs. It provides energy. We make a contribution to solving the energy policy of this country. We understand it. We have developed the industry. We know its faults. We know what it can do and what it cannot do, and we have done it for 60 years. The technology that has been developed in the Gulf of Mexico is the technology that is used worldwide.

Less than 2 percent of the oil that is spilled in the oceans of the world comes from offshore exploration and gas they use. Yet now they say: Where does it come from? It comes from seepage, which is natural. It comes from ballast discharges from ships. And it comes from rusty, leaky tankers that import oil from all over the world.

The Senator from Florida mentioned the Exxon Valdez. That was not a drilling accident, that was a ship accident. That was a tanker delivering oil, as they do every day to the ports of the United States, where we import 57 percent of the oil that we use, coming to this country in tankers that have a far greater risk than any risk that possibly could occur from drilling activities in the offshore waters of the United States.

The State of Florida, under a Democratic Governor, Lawton Chiles, our good friend and our former colleague with whom I served in the Senate, and a Democratic President of the United States—at that time, President Clinton—bought an agreement, an lease 181. It was sold under a Democratic administration, and it was agreed to by a Democratic Governor. The original sale has the potential to supply Florida with as much as 7 years of the natural gas they use. Yet now they say: We are going to object to a sale that has been worked out, carefully crafted, proposed by a Democratic administration, approved by a previous Democratic Governor, because it has the potential to damage their coastline.

We have done that in Louisiana for 60 years. While the beaches of Florida may be prettier than the beaches of Louisiana, I argue that the value of the coastal estuarial area is less valuable in Louisiana than the state of Florida. In fact, I argue that the coastal estuaries of Louisiana are far more important in the sense that...
they are the habitat for waterfowl, for ducks, and for geese, and for finfish, and for shrimp, and for oysters, and for fur-bearing animals that are important to our economy. We have been able to preserve those areas and to do so while producing the largest amount of oil and gas for our neighbors in the other 49 States in the history of this country. We have done so successfully. We have done so in a balanced fashion, and we have done so with a minimum impact. Is it perfect? Of course not, but nothing is perfect.

It is fine to drive around in battery-operated cars. I am all for that. It is great to have windmills, and it is great to have geothermal power. What is not great is to import 57 percent of our energy from foreign sources which are underground and only allow 25 percent. And if we start blocking the Gulf of Mexico? Are we going to fight to open up California? Are we going to fight to open up George's Banks? That is not going to happen.

I do not make a very serious mistake to say: Oh, let them do it over there, but not in my backyard. We will consume; we want it cheap; we want a plentiful supply; but, by golly, don't do it in my backyard. Do it somewhere else. We are too good to have oil and gas production off our coast because our beaches are clean.

Well, my beaches and coastline are also very valuable, but we also show that it can be done in a compatible fashion to produce energy needs for this country and at the same time preserve and protect the environment and wetlands.

The Democratic bill offered by the chairmen, Senator Bingaman, calls for going forward with lease sale 181. A Democratic President proposed lease sale 181, and a previous Democratic Governor of the State of Florida approved lease sale 181. I don't know what has happened, and I don't understand the politics of it, but something has changed. The administration, in an effort to say, all right, we are going to do something—I think that was terrible. They took sale 181 and cut it by 75 percent. They said we are going to cut out 75 percent of the size of this lease sale, and only allow 25 percent. I think that was a terrible decision. I told them that.

For them to now say Congress has to come in and postpone all of that—even the 25 percent remaining—is absolutely, in my opinion, unacceptable. If we are going to have an energy policy in this country that makes sense, we are going to have to have a balanced policy. I suggest that saying "not in my backyard, never, ever, don't want to see it, let's get it from somebody else" is unacceptable, not prudent, and is bad public policy. I think it is something that should not be adopted. At the appropriate time, I am sure we will have a vote on this. I hope colleagues will join with me in saying that at least in the Gulf of Mexico we can have energy exploration and be willing to have a reasonable exploration program in an area where we have already done it for the past 60 years. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. NICKLES. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. NICKLES. I ask unanimous consent that the time be equally divided. The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NICKLES. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 10 minutes.

Mr. NICKLES. Madam President, I listened to my colleague and friend from Florida on his amendment that would basically block any production in a large area of waters, not only off the coast of Florida, but also off Alabama, Mississippi, and Louisiana.

I have great respect for State sovereignty and for listening to Senators who are dealing with areas surrounding their States. When they talk about the Everglades, I want to listen. I want them to listen to me when I talk about Oklahoma. I have a tendency to give great deference to Senators from their home States. I think the Senators from Alaska know Alaska much better than we do, and we should listen when they have recommendations to make about their lands, the development of it, and the balance of policies.

I also think we should listen to Governors. I know this lease sale 181 was somewhat controversial. I was kind of disappointed. I know originally Governor Bush of Florida was opposed to it. He is not opposed to the modification. The amendment of the Senator from Florida would stop any lease in this entire area. This lease, as modified, has been reduced by 75 percent. The lease that we now have, which the administration has negotiated with the Governors of Florida, Alabama, Mississippi, and Louisiana, has been agreed to by all of the Governors, including the Governor of Florida.

So I am thinking, wait a minute, I want to listen to the Senator from Florida and give him some deference, but this is not just off the coast of Florida. This is not even close to the coast of Florida. This is 285 miles from Tampa—285 miles. If someone visits the coast of California, they will see a lot of oil rigs that are in calm water. Bullied water. That is within 3 miles of the coast of California, which also prides itself on beautiful beaches and shoreline. They don't want those desecrated in any way. Neither do I. I happen to be a fan of the beaches, and I want to keep them as pristine as possible. But I want to use common sense, too—285 miles from Tampa, 138 miles from Panama City, 100 miles from Pensacola.

I heard my colleague say, "This is in Florida waters." It is not in Florida waters. This actually goes down the borderline, and it is on the Alabama side. The negotiated deal—and maybe this was to get the Governor of Florida to support this deal, but all of the lands directly south of Florida were taken it permanently.

I agree with my colleague from Louisiana; I think the administration gave up too much in the negotiation. They took a lot of potential area—area that is well beyond the boundaries—and did not get anything for those lands. I heard my colleague from Florida say that there is not much there. Well, we don't know because there hasn't been any exploration. There is not simultaneous desecration of the beaches because somebody happens to be exploring to find out whether there is any potential for gas.

I am bothered by the fact that maybe there are people saying, yes, we know this is an energy problem, but don't touch it in my backyard. I understand that. But this is not somebody's backyard when it is 285 miles away or it is 100 miles from the closest point to someone's State. That is not in their backyard; that is a long way away. And I agree with my colleague from California, which also prides itself that share royalties and lands that are offshore areas that are close to lands and get a higher royalty. This is not close; this is in Federal waters a long way from the State of Florida. The very fact that the Governors of Alabama, Mississippi, Louisiana, and Florida support this modified sale tells me it is a reasonable compromise and one that should not be vitiated or postponed indefinitely.

I know one amendment says to postpone indefinitely and another says for a certain period of time. It basically says: We don't want to drill or explore or have oil and gas, but, incidentally, we would like to have a pipeline to run from Mobile, AL, down to southern Florida because we are going to need gas.

As a matter of fact, the State of Florida is the third largest consumer of petroleum products in the country. Yet they are saying don't drill or touch or explore anywhere to have a look at 285 miles from our coast. I find that to be inconsistent. Are we going to say you don't get to use natural gas or oil? Don't they use oil and gas? Yes, they are the
third largest consumer of petroleum products in the country. It is a growing State and an awful State. There is nothing inconsistent with having some exploration off the gulf coast.

If you listen to my colleagues from Louisiana, Mississippi, and Alabama, there is a lot of drilling off the coast of Louisiana. If you look at the map in the Venice area, and so on, there is a lot of activity in those areas. They have been able to do it in ways that preserve the beautiful environment of southern Louisiana and Mississippi. Southern Mississippi and southern Alabama also have a coast, and they have a lot of tourism in those areas. They are concerned about them. It can be done in an environmentally safe and compatible manner and in a way that provides energy resources onshore who need to keep the lights on, to keep the economy growing, to keep the tourists renting cars and visiting the beaches and enjoying the Florida coast.

To say we want to have a moratorium on any exploration this far removed—285 miles from Tampa or 100 miles from the coastal point in Florida—I think goes way too far. At some point, somebody is going to have to say, wait a minute; use a little common sense. I do not think, with all due respect, this amendment should be adopted. I understand the intention. I do not question the motivation of my colleagues from Florida for offering the amendment, but when the Florida Governor supports this modified lease, when the other Governors who are logistically much closer to this potential lease support it, I say let this go forward; let’s not block it; let’s not block it indefinitely; let’s not make this dependence on unreliable sources even greater.

That is exactly what we are doing. Some people are asking the question: How did we get into this energy crisis? Why are we importing 56, 57 percent of our gas needs? And that number will increase as the years go by, especially if we adopt these kinds of amendments.

If my colleagues want to increase our dependence on unreliable sources, such as in the Middle East, on Saddam Hussein, people need to keep their agendas directly contrary to ours, then support this amendment. It is very shortsighted for energy policy; it is very shortsighted for the well-being and future national security of our country; and it is very shortsighted for the people of Florida who need energy, who happen to live in one of the growing, thriving economies in our country which needs energy—oil and gas.

This amendment is a serious mistake. I urge my colleagues to support it. When we make a motion to table the amendment, I urge our colleagues to support that motion. Madam President, I yield the floor.

Mr. BREAUX. Madam President, I am not sure who controls the time in opposition. I yield whatever time the Senator needs. Ten minutes?

Mr. MURKOWSKI. I am looking for the brilliant staff to plead my case.

The PRESIDING OFFICER. The Chair recognizes the Senator from Louisiana.

Mr. BREAUX. I will take 5 minutes off the time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BREAUX. Madam President, so that people who may be watching on their monitors in their offices can understand a couple things about the lease sale 181, this lease sale did not happen in 1996. It happened in 1997. It was lopped off 75 percent of the natural gas fields are flowing off the coast of Louisiana, moving in a northeast way. All the activity has been in that area. That is where the natural gas is. Unfortunately, it has already been removed. That is where most of the natural gas potential is.

As I indicated, the Minerals Management survey said if you have wholesale gas, that could supply as much as 14 years of the natural gas needs for the State of Florida. We have been drilling in the eastern Gulf for three decades. I suggest it has been done without any problems, without any spills or anything of that nature.

We have a compromise based on a compromise based on a compromise. Yet today we have an effort to say even those compromises are unacceptable. If you have a State that imports 99 percent of the natural gas they consume, they, too, have an obligation to help contribute to the supply of something that is clearly the cheapest burning fuel in the world.

Unfortunately the area they knocked off, the top area, is the area that has the greatest potential for natural gas because the natural gas fields are flowing off the coast of Louisiana, moving in a northeast way. All the activity has been in that area. That is where the natural gas is. Unfortunately, it has already been removed. That is where most of the natural gas potential is.

Unfortunately the area they knocked off, the top area, is the area that has the greatest potential for natural gas because the natural gas fields are flowing off the coast of Louisiana, moving in a northeast way. All the activity has been in that area. That is where the natural gas is. Unfortunately, it has already been removed. That is where most of the natural gas potential is.

As I indicated, the Minerals Management survey said if you have wholesale gas, that could supply as much as 14 years of the natural gas needs for the State of Florida. We have been drilling in the eastern Gulf for three decades. I suggest it has been done without any problems, without any spills or anything of that nature.

We have a compromise based on a compromise based on a compromise. Yet today we have an effort to say even those compromises are unacceptable. If you have a State that imports 99 percent of the natural gas they consume, they, too, have an obligation to help contribute to the supply of something that is clearly the cheapest burning fuel in the world.

All the activity has been in that area. That is where the natural gas is. Unfortunately, it has already been removed. That is where most of the natural gas potential is.
I do not want it to happen either. I argue the wetlands in Louisiana, which are about 25 percent of all the wetlands in North America, with the wildlife—the birds, the ducks, the geese, fish, shrimp, oysters, fur-bearing animals, alligators—all of that ecosystem which is probably the most complicated anywhere. It has been a part of the history of Florida. What is the true understanding of what this risk is? What are we talking about developing? We are talking about developing, in this lease sale, a significant, known deposit of natural gas. When you take natural gas out of the reserve and you take it ashore and condition it, basically you are taking out the impurities, the wet gas. You are taking the oil that happens to be mixed in it, you are taking it ashore, conditioning it, and then moving the clean gas, in theory, to Tampa where it would be utilized for the benefit of Floridians. What is the risk associated with that conditioned gas? It is pretty minimal. If you had some kind of fracture of that pipeline, you are not talking about unconditioned gas, which includes oil and various components associated with hydrocarbons; you are not talking about pure, conditioned gas. It would bubble up and dissipate. You are not talking about moving crude oil or the risks associated with crude oil from a pipeline.

I have heard of the NIMBY theory: not in my backyard. I think that has been pretty well exercised. But one of the things that is frustrating—obviously, I do not have a constituency in Florida, but I am sensitive to the concern of my friend from Florida relative to what is good for his State. But at what point do we have a reasonable definition of what is offshore of my State or the State of Louisiana or any other State? This is 285 miles, in one case, to this area which is now the alternative that has been agreed upon. According to my understanding, it has been agreed upon by basically all the parties concerned.

The Secretary of the Interior modified the boundaries of the lease sale in response to the concerns of the State of California, the Governor of California. The indication by this agreement is there will be absolutely no new leases off the coast of Florida. They have modified the sale to one-fourth of the original lease area. What constitutes a reasonable determination of what is offshore? We used to have the 3-mile limit. We have the 12-mile limit. We have the economic zone. Now we are 285 miles offshore, and we are saying that is offshore. I think we have to be reasonable.

Therefore, the amendment proposed by my colleague from Florida that would cancel the authorization for new leases, if the lease sale is to state in my own opinion, is rather unrealistic. I want to show another chart because I think it reflects a reality that is occurring. That is the NIMBY theory: not in my backyard. We have taken the entire east coast off limits for oil and gas exploration. We have taken an area of the over-thrust belt in Montana, Colorado, Wyoming, a number of States known to have significant deposits of natural gas. As I recall, it is about 23 trillion cubic feet of natural gas that was found in this area, known to exist, available for commercial recovery, and with the last administration banning road access into these areas we made these areas off limits. Where is the energy going to come from in this country?

If we look at realities associated with the status of the OCS leasing program as evidenced by the next chart, I think we are going to get a better understanding of just what is happening. These are various provinces. These estimates show oil and gas potential reserves; whether you start in Washington-Oregon or northern California or central California, in southern California, you note and identify reserve estimates of considerable merit. The only problem is the areas were withdrawn from leasing through January 30, 2012. These were done, for the most part, without any public hearing process before congressional bodies. These were done at the request of individual Members, attaching riders to legislation moving on the floor. So they really have not been subject to any debate. Some have been included in previous Interior appropriations bills. If you look at the entire east coast, you will look at the North Atlantic, the mid-Atlantic area, the South Atlantic area, all with considerable oil and gas potential that I am sure—estimated reserves. They, too, are off limits—everything in the buff color. If we go down to Florida the same thing is true in the eastern Gulf of Mexico; it is off limits. The remaining area, the blue area, is off the coast of Texas, Louisiana, Mississippi, and Alabama. The occupant of the chair is well versed, obviously, in the significance of what oil and gas development does in the State of Louisiana. But why should Louisiana alone, and to a degree Texas and Alabama and Mississippi, have to bear the brunt of the requirements of the rest of the Nation when they do not have to share in any of the impact?

The occupant of the chair was very active in CARA legislation last year, which was to suggest that, indeed, these States impacted deserve some consideration associated with the impact of activity off the shores of Louisiana, Texas, Alabama, and Mississippi—and justifiably so. That was not resolved to the satisfaction of those of us who supported it. That was, indeed, unfortunate. We are going to come back again. Because if you are
looking to just a few States to support the rest of the Nation, those States that have to bear that impact are entitled to some consideration. The consideration was to come from the Federal account associated with oil and gas funding that came into the Treasury.

I think we have, if you will, an obligation to address the responsibility of those States that have to bear this burden and have not been given the courtesy, or the consideration of any sharing of funds that go into the general fund, a portion of which should certainly go to these States.

As we look at reality, again the red indicates existing leases; the buff color is the national marine sanctuaries; we have my State of Alaska here, an area off the Aleutian Islands in Bristol Bay that has ramifications of but we have 31,000 miles of coastline in the State of Alaska.

What has happened over an extended period of time is not much credit has been given to the capability of the industry to deliver oil and gas and protect our coastline. In its defense of the Lease Sale 181 areas off the coast of Florida really they are drilling now in 3,000 feet of water. They have developed the technology to have lease sales on 6,000 feet of water.

When you have an agreement put together, you have to respect it. What do you say to the Secretary of Energy about the Secretary’s decision? My understanding is that he supports it. The statement by Governor Jeb Bush regarding Lease Sale 181 is that today’s unprecedented decision reflects a significant problem in Florida’s fight to protect our coastline. In its defense of Florida’s coastal waters, the Department of Interior’s proposal under President Bush goes far beyond any previous proposals contemplated by past administrations, including the Clinton and Chiles administrations.

As a result, there will be no new drilling in the Lease Sale 181 areas off the coast of Florida. That is a statement of the Governor of Florida.

There is an agreement. It has been developed as a compromise between the Secretary of Interior, the Governor, and certainly it is beyond the reasonable consideration of what point are we going to put our body, so to speak, in front of the reality that we have to develop energy in this country. You can say, if 285 miles is too close, why don’t we go 500 miles? Where is the limit? This is truly beyond the limit of reasonableness.

I think the amendment by the Senator from Florida really is unnecessary. You have an agreement now. It appears that most parties are happy.

Again, if the argument of the Senator from Florida prevails, then to what extent are we going to limit, if you will, reasonableness in determining where a lease sale offshore can take place, if one can’t take place as proposed in the amendment between 213 and 285 miles offshore?

For the time being, that pretty well accounts for my opinion on the necessity of recognizing where energy comes from and the reality that we have a workable compromise which certainly seems fair and equitable.

When you consider reasonableness on the distance from the coast of Florida, the reality that Florida will benefit in the event of successful drilling from this lease sale and the practicality that if it doesn’t go to Florida, Floridians are going to be paying a higher transportation cost at least for their gas because that gas will have to come over land from either Louisiana, Mississippi, or Alabama, then across country and down into Florida. Floridians will then be paying undoubtedly a higher price. But the most efficient way to transport their gas is through a pipeline to Tampa.

I yield the floor.

The PRESIDING OFFICER (Mr. REED). Who yields time?

Ms. LANDRIEU. Mr. President, I do.

The PRESIDING OFFICER. Without objection, the request of the Senator from Louisiana may proceed under the time in opposition.

Ms. LANDRIEU. Mr. President, my colleague from Florida wishes to speak at this time. I will reserve my time for him to make 10 minutes of introductory remarks and will speak in opposition to the amendment. But in all fairness to the proponents, I would be happy to allow him to go first.

Mr. Breaux. Mr. President, how much time remains on both sides?

The PRESIDING OFFICER. The sponsor has 64 minutes. The opponent has 45 minutes.

Without objection, the request of the Senator from Louisiana is agreed to.

The Senator from Florida.

Mr. Nelson of Florida. Mr. President, I want to respond to some of the things that have been said on the floor. The Senator from Alaska has referred to the proponents of this amendment putting their bodies in front of the train, a vehicle, or whatever. I gladly do so because of the stakes that are in this for the State of Florida.

I would like to point out that according to the statistics compiled by the Department of Interior, during the period between 1980 and 1999—almost two decades—some 3 million gallons of oil was spilled from Outer Continental Shelf oil and gas operations in 73 incidents. In addition, in one incident in April of this year, more than 90,000 gallons of saltwater and crude oil spilled out of a pipeline in Alaska’s North Slope, becoming the fourth major incident there.

I point out the Department of Interior statistics simply to counter the perception that all of the Senators who have spoken in opposition to this amendment, of invading the eastern Gulf by drilling in an area which heretofore has been off limits to drilling, come from an oil-producing State.

What do you expect? They articulate the interests of the economic engines of their State. But when they give the impression that, in fact, offshore oil drilling is so safe, that there is no risk,
and say instead the risk is in tankers, indeed, we know the risk in tankers be-
cause we saw what happened with the
Exxon Valdez. But when they point out
the fact that oil drilling and gas drill-
ing is so safe and there are no spills,
that is not what the facts say as com-
plied by the Department of the Inte-
rior.

Some 3 million gallons of oil from
Outer Continental Shelf have been
spilled in 73 incidents in time period

I want to clear up another statement
that was made. It is stated there is all
this oil out there. That is contrary to
all of the engineering and the tech-
nology we have seen.

Indeed, let me tell you what has been
estimated is in this lease sale 181. It is
not some huge find. In this new lease
sale, it all of whom are from oil days' worth—10 days, T-E-N, 1-0—of
energy for this country. Is that worth
the risk to an industry that needs to
protect its beaches and its environ-
ment? I say that it is not worth the
tradeoff.

As a matter of fact, the Natural Re-
sources Defense Council has stated
that in the eastern Gulf of Mexico,
where the oil and gas industry has been
pressing to drill—this area that, as you
can see, is not violated, including this
area shown on the map that is shaded
in yellow, which is the subject of the
lease sale we are trying to block—inde-
ed, it said 60 percent of the Nation's
undiscovered economically recoverable
Outer Continental Shelf oil and 80 per-
cent of the Nation's undiscovered eco-
onomically recoverable Outer Conti-
ental Shelf gas is located in the cen-
tral and western Gulf of Mexico.

So protecting this area that for years
we have protected on the basis of its
sensitivity to the ecology and economy of the surrounding areas—
protecting that area will still leave a
vast majority of the Nation's Outer
Continental Shelf oil and gas available
to the industry.

According to one study that even
minimizes the risk of an oil spill, the
chance of an oil spill in this area is as
high as 37 percent. That is according to
the Minerals Management Service.

So I want to respond to my col-
leagues from all parts of the country.
States, I want to make it very clear to
them, this is not a NIMBY amendment
that we are offering. We are not saying:
Not in my backyard because oil rigs
might spoil the view from our famous
beaches. Indeed, we acknowledge that
the latest plan—not the former one but
the latest—would keep them out of
sight. But Florida is unique in its de-
pendence on those beaches, and it is
unique on its dependence on the visi-
tors who come to those beaches. Ex-
dering is so safe and there are no spills,
that is not what the facts say as com-
piled by the Department of the Inte-
rior.

Some 3 million gallons of oil from
Outer Continental Shelf have been
spilled in 73 incidents in time period

I want to clear up another statement
that was made. It is stated there is all

tors who come to those beaches. Ex-
}

Tourism is the lifeblood of that econ-
omy. It is in the range of $50 billion a
year. Nothing could wreck our tourist
development more than waves of black
oil lapping up on our white-sand beach-
es, regardless of whether the spill oc-
curred 30 miles offshore or whether it
is 100 miles offshore.

By the administration's own reck-
oning, the new leases would provide
only enough oil and natural gas to
meet just a few days of our Nation's
needs. Is that worth the risk? Of course
not. This is a commonsense approach.
It is not worth the risk—not to Flor-
ida, not to the Nation—and it is not
worth the risk to an area whose econ-
omy is so intertwined with a lot of the
population that do not want this drill-
ing.

My amendment would prohibit the
Interior Department from selling new
oil and gas leases anywhere in this
eastern gulf planning area for 6 months
from the time of enactment of this
bill—only 6 months. It is intended to be
a first step toward what I hope Senator
Graham and I will be able to offer—and
I think we have assurances of offering
an amendment to the Energy Depart-
ment authorization bill for a continu-
uation of this moratorium. For the sake
of Florida, and for the sake of our Na-
tion, I ask for your support.

I reserve the remainder of our time
and yield the floor.

Mr. DASCHLE. Mr. President, we
have been consulting with Senators on
both sides of the aisle. I appreciate
very much the help and cooperation of
both our managers. I am now at a point
where I can make a unanimous consent
request.

I ask unanimous consent that the
vote in relation to Senator NELSON'S
amendment No. 893 occur tomorrow
morning following the cloture vote on
the motion to proceed to the House
bankruptcy bill, H.R. 333, and that there be 4 minutes of debate
equally divided between the votes.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. DASCHLE. Mr. President, in
light of this agreement, there will be
no further votes today. We will resume
consideration of the bill tomorrow
after the cloture vote. The managers
have indicated to me that they believe
we can finish the bill tomorrow. If we
finish the bill tomorrow and dispose of
the Griles nomination tomorrow, then
we will have no other rollcall votes
on Friday or on Monday. There will be
tomorrow, as I noted in the unanimous
consent request, a debate for a period
of 3 hours, beginning at 9 o'clock, on
the House bankruptcy bill, H.R. 333.

Following that, we will then come
back to the Nelson amendment on
which there will be 4 minutes of debate
equally divided.

The PRESIDING OFFICER. Under
the previous agreement, the Senator from Louisiana is recognized.

Ms. LANDRIEU. Thank you, Mr.
President.

Mr. President, I have the greatest re-
spect for my colleague who has rec-
ently joined us in the Senate from the
great State of Florida. I have so en-
joyed working with him on many
issues that are important to us, such as
education and health care, issues on
which our constituencies have a great
deal in common. I look forward to
working with him in the future as well.
But I am unwilling to support his
amendment on this particular issue
for, I think, many good reasons.

I urge my colleagues to vote against
this amendment because not only is it
not the right thing for Florida or for
Louisiana or the gulf coast, it is not
the right direction we need to take for
our Nation. It will not put us on the
right path for a sound energy policy,
self-sufficiency, or necessarily for a
cleaner environment in this world that
we need to treasure more.

I associate myself with the remarks
of my senior colleague from Louisiana,
who has been a wonderful and very elo-
quent spokesperson, displaying a lot of
expertise in this particular area both
during his years in the House and now
in the Senate. He continues to bring
this Congress, both Democrats and Re-
publicans, to some reasonable arrange-
ments regarding the energy needs for
our Nation.

I also associate myself with the re-
marks of the ranking member of the
Energy Committee, Senator MUR-
kowski, and acknowledge his leader-
ship in this area.

Mr. President, as the Scripture says:
"Come, let us reason together." If
there was ever a time when Members of
the Senate—both Democrats and Re-
publicans—need to work together on
our issues that are important to us, such
as education and health care, issues on
which our constituencies have a great
deal in common. I look forward to
working with him in the future as well.

To answer some of the points raised
by the Senator from Florida, first, it is
important to say that one of the pro-
ponents of this argument in the House
said that people such as myself, or
those of us who are trying to make the
argument that if you want to consume
more energy, you need to be willing to
produce it as well, said if that was the
case, then it goes to say, if you don't
raise pigs in your backyard, you
shouldn't eat bacon.
That might make some sense initially in its first blush. However, the fact is, every State produces some food product commonly consumed by the public. We have corn, tobacco, rice, and soybeans. Some of us grow wheat. Some of us grow cotton. Some of us grow soybeans. Some produces wonderful oranges. I have enjoyed them every year. Louisiana produces some as well. The State of the Presiding Officer has commodities of which it is proud. Some of us grow cotton. Some of us grow soybeans. Some of us grow wheat. Some of us run cattle. Some of us grow other food products. We all contribute to the overall food supply of this Nation.

While we don’t all grow the same crop, while we don’t all run the same kind of cattle or livestock, every State in the Union contributes to the food supply of this Nation. That is the way it should be.

Every State should also contribute to the energy supply of the Nation. We have great resources in oil and natural gas. In addition, there is clean coal, nuclear and hydropower. We have a diversity of fuels to choose from. We should make use of all of them.

This attitude of “I want to consume the power, but I refuse to produce the power” has got to come to an end. It is not fair. It is not right. It is not smart. If we get caught up in this hysteria, we are going to lose this Nation into a dangerous place where our businesses are hurt and our economy cannot survive.

Let me talk about the State of Florida.

The State of Florida is the third largest consumer of petroleum products in the Nation. The State of Florida only produces, however, roughly 2 percent of the petroleum that it consumes and a very small percentage of the natural gas.

From 1960 to 1994, Florida electrical demand increased 700 percent. It is not the only State that has increased its demands, but it has been one of the fastest growing States. We are all happy and proud of the development in Florida and want Florida to continue to grow and expand, as we want all of our States in this Union to grow and prosper but it must hold up it’s end of the bargain as well.

From 1960 to 1994, Florida’s fossil fuel use for electrical generation, made necessary by this extraordinary growth in population and electrical demand, has increased 551 percent. More than 80 percent of Florida’s electrical demand is met today by fossil fuels.

Right now Florida, as every State, uses energy produced by fossil fuels. In south Florida, the natural gas demand for electricity generation purposes is expected to double by the year 2008. However, there are no increases in the number of coal plants or nuclear plants or hydroelectric power foreseen in Florida to supplement this need.

There is rising demand in Florida but it makes it quite difficult for those of us from Alabama and Florida to want to help in Florida when they are not willing to help themselves. It makes it very difficult for us to help Florida when they are not willing to help themselves.

There is not yet the significant increase in solar or wind production in Florida or generally in the United States, to adequately take the place of fossil fuels. Although those technologies are very promising we have not made the adjustment yet. I disagree with the President’s decision to cut funding for those kinds of research and development projects. We need to increase funding.

In addition, from 1995 to 2002, a minimum of 24 new electric generating plants will be added to Florida’s power grid, and 21 out of the 24 new plants that are being designed today have to run by natural gas.

This amendment doesn’t make sense for Florida. It doesn’t make sense for Louisiana, Alabama, Texas, Mississippi, or the Nation but it certainly does not make sense for Florida. Florida needs more natural gas, not less.

I grew up on the beaches of Florida and appreciate their beauty. My family vacations all over the gulf coast. The compromise announced by the Administration, which is threatened by this amendment, allows us to salvage almost half of the natural gas and oil resources from the original lease sale area and is more than 100 miles from any part of Florida’s coast.

It is not just Louisiana or Florida waters where there is gas and oil but the waters of the United States. In this day and age we can drill with minimal footprints and minimal risk to not only the Florida coast, but the entire gulf coast, such as Florida, Mississippi, Alabama and Georgia with the power we need to grow.

I want to talk about that growth for a minute. When we talk about growth, we are talking about jobs, about people creating wealth, about people having a dream to start a business, about a new family buying their first home, and the electricity they need to run that home. This is about people who need to get to work, and the transportation they need to get there. This isn’t about mere statistics. If we can’t power our economy, how can people feed their children and families?

Let me talk about risk for a moment. We have had people come on the floor and say we can’t risk the beaches. However, in reality there is minimal risk. As the senior Senator from Louisiana pointed out, there is minimal risk associated with drilling. There is more risk from the possibility of oil spills when tankers have to transport the oil to our country.

This amendment, and others like it, will not decrease the risk, it will increase the risk because we will have more tankers coming into this Nation. The environmental leaders should be strong enough in this Nation to stand up and admit this fact.

There are also other risks to consider. The risk of a recession. I want the President to know I strongly disagree with his decision to modify this lease sale. He should have held his ground. We should be exploring for oil and gas in this entire lease sale area as originally proposed. If we do not supply states such as Ohio, California, Illinois or Louisiana, with the oil and natural gas to generate the power they need, we risk jeopardizing the economic future for our Nation. So if we are going to talk about risk, let’s not just talk about environmental risk, let’s talk about other risks to this Nation.

Another important risk to consider is that of our dependence on oil from the Mid- east is well known. I don’t mean to be overly dramatic, but I want this Senate to know that this is not just a fight between Alabama and Florida or a fight between Louisiana and Florida; this issue involves the entire country. I urge my colleagues to vote against this amendment.

Let me talk about a more parochial issue as a Senator from Louisiana. We are proud of the contribution we have made to the oil and gas production in this country. However, the people in Louisiana also want a clean environment. The industry that operates off our coast has made great strides in making sure we can produce the oil and gas necessary to support the electricity needs of this nation while doing so in an environmentally responsible manner.

Louisiana and other gulf coast States have insured for some time now that if we are going to continue to drill in the central and western gulf there should be reasonable compensation not only for the environmental impact, but also for the infrastructure necessary to produce this oil and gas that is crucial to our nation.

Louisiana, Alabama, Mississippi, Texas and other States are asking to share more equitably in the revenues that are produced from this offshore development. Currently, if $2 billion in royalties is collected from the production in the Gulf of Mexico, all of it goes into the Federal Treasury and is being spent in a variety of different ways. However, the states that permit production off their shores should be compensated fairly for their contribution to the nation as well as the impacts they incur. Whatever we decide and however we can come to terms, as reasonable people can agree, I hope one thing we will agree on is that, because independent States are responsible for advising the President to keep 50 percent of the revenues from development in their states, the States that are serving as a platform for offshore production will be fairly compensated as well.
In conclusion, we do not want to drive this industry off the shores of our Nation to other places in the world. We need the industry there for economic as well as national security reasons.

I urge my colleagues to vote against this amendment. With all due respect to my good friend, the Senator from Florida, this is not the right direction in which to lead our Nation.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. LOTT. Mr. President, this is not related to the issue at hand, although I want to speak on that under whatever time I am yielded. This is under leader time on a resolution. I believe Senator Daschle will be joining me momentarily. We want to be sure to do this when we both can be here.

COMMENDING GARY SISCO FOR HIS SERVICE AS SECRETARY OF THE SENATE

Mr. LOTT. Mr. President, I ask unanimous consent that the Senate now proceed to the immediate consideration of S. Res. 127, which is at the desk, and ask that the resolution be read in toto.

The PRESIDING OFFICER. The clerk will report the resolution.

The legislative clerk read as follows:

A resolution (S. Res. 127) commending Gary Sisco for his service as Secretary of the Senate:

S. Res. 127

Whereas, Gary Sisco faithfully served the Senate of the United States as the 29th Secretary of the Senate from the 104th to the 107th Congress, and discharged the difficult duties and responsibilities of that office with unfailing dedication and a high degree of competence and efficiency; and

Whereas, as an elected officer, Gary Sisco has upheld the high standards and traditions of the United States Senate and extended his assistance to all Members of the Senate; and

Whereas, through his exceptional service and professional integrity as an officer of the Senate of the United States, Gary Sisco has earned the respect, trust, and gratitude of his associates and the Members of the Senate: Now, therefore, be it

Resolved, That the Senate recognizes the notable contributions of Gary Sisco to the Senate and to his Country and expresses to him its deep appreciation for his faithful and outstanding service, and extends its very best wishes in his future endeavors.

Sick. 2. The Secretary of the Senate shall transmit a copy of this resolution to Gary Sisco.

There being no objection, the Senate proceeded to consider the resolution.

Mr. LOTT. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 127) was agreed to.

The preamble was agreed to.

Mr. LOTT. Mr. President, I wanted the entire resolution to be read in the Record. I did want a complete record of the appreciation of the entire Senate for Gary Sisco who has served so capably over the past 5 years as the Secretary of the Senate.

I appreciate Senator Daschle joining me for this time because he knows, as I know, that we have some very dedicated officers of the Senate and other employees of our floor staff who put in long hours and do a great job in making this institution function the way it should. We do not say thank you enough to those who serve in the Chamber with us who make it possible for us to do our job, and we do not say thank you enough to the officers of the Senate, people such as the Secretary of the Senate, the Chaplain, the Sergeant at Arms, the Clerk, the Chaplain, and others who work every day to help make this place function.

I have a very personal warm feeling for Gary Sisco. He is from Tennessee. He was born in Bolivar, TN, a small town. He grew up in strictly a blue-collared family. I believe his father did serve for a period of time as sheriff in that county in Tennessee.

I got to know him way back in, I guess, 1962 or 1963 at the University of Mississippi. We became friends. I managed to even talk him into joining the fraternity to which I belonged. We developed a very close friendship.

He wound up having a blind date with his now wife, thanks to the arrangement of my wife, Mary Sue Sisco is from Pascagoula, MS.

He went on to work with IBM after graduation and was involved in gubernatorial campaigns in Tennessee. He served Gov. Lamar Alexander, and then wound up in Washington and worked for Gary Sisco, who had the title. It happened because he worked for Howard Baker reaching the position of executive assistant. He then returned to Tennessee and had a very successful business life.

Five years ago, I called on him and said: We need somebody who understands computers, somebody who understands how to manage a pretty good size operation, somebody who knows how to keep the books straight, somebody who has political instinct and knows and loves the Senate. You are the man.

He left his business in Nashville, TN, and came to Washington and has been in the position of Secretary of the Senate for 5 years. He has done a wonderful job.

The only thing I ever asked of him is: Gary, when we have a few things in progress, you have to stay, but you have to get up in the morning and come to the Senate. He has done that.

I believe Gary Sisco has achieved that goal. To show you the kind of man he is, Senator Daschle had agreed, frankly, that the officers of the Senate could stay on through this session of Congress. Even that might change. So I know he would have kept his word and Gary could have stayed, but he submitted his resignation, and I agreed that I think the majority leader should have officers of the Senate of his selection. It was the right thing to do, but it was his idea; it was not mine.

Senator Daschle has been very gracious in the way he has treated the employees in the Office of the Secretary of the Senate. He has selected an outstanding, capable, experienced person and one who also understands the Senate very well, Jeri Thomson. I know she will continue the great legacy Gary Sisco has built.

To my colleagues in the Senate, I thank them all for the courtesies and support they have given to Gary Sisco, and I wish my friend the very best in his next career.

Some of us, as Senator Daschle and myself, have been in the Congress for many, many years now, in my case 28 years. I have to confess, in a way, I am a little envious of a guy who was in the business sector, in the political arena, in the congressional arena, back in the business world, back in the Senate arena, and is now going out to the next stage of his life. I am sure it will be an outstanding one.

I again extend my best wishes to Gary Sisco, his wife Mary Sue, and their children. I know they will always have a special feeling in their hearts for the Senate, and I believe the Senate also has that feeling for them.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. DASCHLE. Mr. President, first, I compliment the distinguished minority leader on his remarks. I appreciate very much the opportunity to address the resolution this afternoon.

Five years ago, Gary Sisco came to Washington and came to the job as Secretary of the Senate with the full confidence of then-majority leader Trent Lott. Today he leaves the Senate, leaves his job as Secretary of the Senate, having earned the full confidence of now-majority leader Tom Daschle.

That did not just happen because he had the title. It happened because he worked at it. It happened because, in spite of the long tradition that he had of working for very able Members of the Senate on the Republican side in the Senate and the House and Governor, he came leaving his Republican credentials at home. He came working with us as Democrats and Republicans, some serving his country and serving this institution as ably as anyone can.

As Senator Lott has noted, the mark of a good and able public servant is one who leaves his job in a better position.
July 11, 2001

CONGRESSIONAL RECORD—SENATE 12903

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—Continued

AMENDMENT NO. 893

Mr. LOTT. Mr. President, I rise to speak against the pending amendment. My question is, if we are not going to have exploration in the Gulf of Mexico in a limited area for oil and gas, where are we going to do it? Not in the Atlantic along the coast. Not in the Pacific along the coast. Some people say not in Alaska in the area that has been pur- sued. Then I believe we can do it effectively, efficiently, responsibly, and productively in the Gulf of Mexico.

For years, exploration in the Gulf and, in fact, drilling activity occurred primarily in Texas and Louisiana waters. Then in more recent years it has moved over under Mississippi and Alabama. It has been very productive.

This is an interesting map to which others have referred. The Florida coastline goes to Pensacola, Alabama with Mobile, Biloxi, and New Orleans. I live right here; that is where my house sits. I can step off my front porch and put a rock in the Gulf of Mexico. I can sit out on my front porch and I can see a natural gas well working right in this area. In the daytime you can see it. It is clear. And at night sometimes they flare it off. It has never been a problem and it is producing natural gas. As a matter of fact, it is closer to my front doorstep, literally, than it is to Panama City, Florida, or Pensacola, or Biloxi. I am perfectly comfortable with this. There is no risk.

Those who live in the gulf area know that some of the most effective drilling and exploration drilling anywhere in the world is done in the gulf. It has become more efficient, with greater accuracy. If there has ever been a spill in the gulf, it must have been very minor and certainly never affected my State, I don’t believe, since we have had the drilling off the coast of Alabama and Mississippi. I don’t believe we have ever had one.

It also is a wonderful place to fish around the oil rigs. We take old liberty ships out and sink them in the gulf so they will form fishing mounds. It is very effective. The rig serves the same purpose.

But now we have people who say we should not have it in the Gulf of Mexico, or we should delay it even further, even though there has been a com- promise. I think this whole area should be opened up for lease. But now it is down to just this green area, a very small area. The Governors of the States that are involved—Louisiana, Mississippi, Alabama, and I believe this compromise provision is supported every one of our leaders with all of the people who live in this area support this.

What are we going to do? We are de- pending on foreign oil for 56 percent of our energy needs, and it is going up. It will be 60 percent. Can we get every- thing we need just from wind and sun? If we triple what we got from those areas, it wouldn’t get us at 6 percent.

As I said before, maybe we will have to harness some of the speeches around here to produce more energy needs in this country. But we need exploration for oil and gas. We need to look at greater use of nuclear power. We need to take advantage of clean coal tech- nology. We do need alternative sources of energy—wind, solar, hydro. We need to move over under Mississippi and Alabama, and have exploration in the Gulf of Mexico to supply the people who say they don’t want us to explore and produce. The peoples to do is to build this pipeline and lay it across the Gulf of Mexico to supply the natural gas for people who say they don’t want us to explore and produce. That goes no sense.

The people have to decide. Are we going to continue to go down this trail of not producing for our energy needs? Are we going to have this national se- curity risk, facing the danger of loss of freedoms in America? Who thinks gaso- line prices will not go up again next summer? They are. And so will diesel fuel prices. The families won’t be able to afford to drive to their vacation spots. The small business men and women are going to have to pay- ing their electricity bills. The farmers will have difficulty paying for the cost of diesel fuel for their tractors. It will ripple through the economy.

This is probably the most serious problem this country faces today. Meanwhile, we fiddle in Washington while the country has a heat stroke and is threatened with not having the energy to keep the economy growing. I think the American people realize this is a very serious problem. Some people shy away from calling it a crisis. OK, don’t use that word. There is no immi- nent danger now. But there could be tomorrow, there could be next week.
OPEC countries could say: We will cut you off. We could have rolling brown-outs in California, blackouts in New York City. They will run short of power in south Florida.

This is the least we can do. We should do it now, not later. We have been wrestling around over this for months—in fact, years. This can be done safely, effectively. I understand it is projected this area could produce enough natural gas to provide 1 million families in America with the supply of natural gas they need for 15 years. I don’t know whether that is accurate. It has been very productive in this part of the gulf. It is done efficiently and in very targeted ways. They know now where the oil and gas is. They can probably put a pin on it—and from long distances.

I urge my colleagues, this may be the only real vote we have on energy production in America this summer. Senator Daschle said we will focus on appropriations bills. He is right for doing that. We should try to help him move the other bills. We will not get to a free-standing energy bill probably until the fall. But we should do it.

In the meantime, we should not take this step of prohibiting or delaying exploration and development of the resources that we know are in the Gulf of Mexico.

My beach is closer to this area than the beaches in Florida. I say, bring it on. I am worried about the future of my country and my children’s economic future. I urge my colleagues, this should be an overwhelming bipartisan defeat on an amendment that really, in view of all that has gone on, should not be passed.

I thank my colleague from Louisiana for yielding me this time.

The Speaker pro tempore. The Senator from Florida.

Mr. Nelson of Florida. I yield to my colleague, the senior Senator from Florida, such time as he consumes.

Mr. Graham. Mr. President, I am proud to join my colleague from Florida, Senator Bill Nelson, as we offer this amendment to help assure that America will have a policy of energy that is also a policy for our economic future and for the protection of important environmental treasures.

Let us clearly understand what the amendment we offer will do. It will provide for a short, 6-month delay, in the leasing of property in the area that is known as lease sale 181. This short delay, 6 months from the time the bill is enacted, will allow time to make some important decisions before we are committed to an option that may not be in the best interests of our Nation.

This is also an issue, while it is today in the northern Gulf of Mexico, the exact same issues which I will speak about are relevant to other areas of the country which share a similar concern, whether or not it is on the Atlantic coast. I heard this weekend of concerns off the northeast coast regarding a proposal for drilling in an area which have been very significant parts of the American tradition and history of commercial fishing for hundreds of years.

We know our friends who live in the area off the great lakes are concerned about proposals for drilling in Lake Huron and Lake Superior again, areas that have in the past been off limits for drilling. California is another area that has expressed concern about the proposals for drilling under the rules as they currently exist.

While this may be characterized as a Gulf of Mexico issue, or even more specifically a Florida issue, it raises important implications for the Nation. Let me discuss two of those issues with which the 6-month delay we are requesting through this amendment.

First, the current laws that govern Outer Continental Shelf drilling in my judgment are imbalanced. They do not take into account to other factors in addition to energy production, factors such as economic and environmental needs. We are all aware that America has needs for increased energy production. We are not insensitive to that. But we also are not myopic, that that is the only issue America needs to take in the balance in making these judgments. We believe balanced legislation on Outer Continental Shelf drilling would include the other factors that might be affected by that drilling.

Let me give, as an example, what is happening today as a result of our law. A number of years ago, leases were granted in these areas that are within 40 miles of the coast of Florida. Those are depicted on this map in the light pink and blue. The blue area is what is called Destin Dome. It is an area that is approximately 35 miles south of Pensacola. That lease has been outstanding for a number of years but was dormant. Then a few years ago the owner of that lease, the Chevron Oil Company, made an application for a drilling permit, to start production on that property. What was discovered was that basic environmental analysis, which in my judgment should have preceded the lease being granted in the first place, had not been done and it was deferred until the drilling permit was requested. As an example of those basic studies, one of them is the Coastal Zone Management Act. The Coastal Zone Management Act is administered in a joint program between the U.S. Department of Commerce and the various coastal states affected. The result of that analysis of the Coastal Zone Management Act was a determination by the State of Florida that it was a violation of the act and of the management plan, which had been approved by the U.S. Department of Commerce, to drill on this Destin Dome. That has now precipitated a series of litigation and administrative actions which have drawn this process out for many years.

In my judgment, the lesson of Destin Dome is let’s do the environmental surveys before we grant the lease, before we create the expectations that a lease carries with it, before people apply for the permit to drill, so we have satisfied ourselves on environmental, economic, and the other considerations that this is a property which will be appropriate to drill should a lease be granted.

One of the things we could do during this 6 months of deferral, would be to do an analysis of our current law to see if it is appropriately representing the wide range of interests that should be considered. We know we are going to be doing a major energy bill sometime in the next few months. Our Republican leaders have indicated he thinks that will be on the Senate floor sometime this fall. I know the chairman of the Energy Committee is driving a schedule that would have it in the committee this month. So we are not talking about long delays. We are talking about legislation that is viable at this moment and would be the appropriate means by which to raise these issues as to whether our current laws are adequate to represent the range of interests.

The second point I would make, that in my opinion justifies the 6-months delay, which the House of Representatives has voted by an overwhelming margin, is the very fact of these existing leases outstanding. If we were looking at a map, not a current map but a map as recent as the early 1990s, we would also have seen lots of these little pink squares in this area adjacent to the Florida Keys. What happened there was that there was great concern about the potential adverse effects on one of the most fragile environmental areas in the world, the Florida Keys and their adjacent coral reefs. The President, George Herbert Walker Bush, announced in his judgment that danger should be eliminated by the Federal Government reacquiring those leases in the vicinity of the Florida Keys. Over a period of less than 10 years, an aggressive program of reacquisition of those leases has, in fact, eliminated those leases.

I believe today we should be entering into negotiation during this administration of George W. Bush to do the same thing in the northern Gulf of Mexico, to eliminate those inappropriate leases that have been granted in years past, that now threaten the beaches of the Palm Coast, Florida. Again, the 6-months delay would give us the opportunity, would give us the time to undertake exactly that type of analysis.

This idea is an idea which has been long under consideration. When some of the initial proposals were being made for lease site 181, our former colleague and then Governor of Florida,
When voting, I ask my fellow Members to consider the planning area, I am pretty familiar with the facts in this case and what happened.

First, I have to say I am a little bit disappointed. The President of the United States, in my view, made a mistake when he cut back huge portions of this lease that is on that map to accommodate and appease the political leaders in Florida. What did he get? They still opposed the sale and are still opposing it right on this floor.

Yet this map shows a dotted line from my hometown of Mobile, AL, over to Tampa, FL. I wonder if anybody knows what those dotted lines reflect. They reflect a pipeline. That pipeline is being built at this moment. It started in June. The pipeline is to take natural gas produced in the western Gulf to Tampa, FL, and to south Florida to meet their surging demands for natural gas. Yet when it comes time for them to transport that gas over to Florida. What is that going to do to the price of natural gas for the homeowners in Alabama and electricity users in Alabama?

They are going to bid it up. This demand on the limited supply in the western Gulf of Mexico is going to drive up the price of natural gas for the people in Alabama; and, at the same time, Florida refuses to allow any production in Federal waters 100 or more miles from their shore.

This is a national issue. One reason, in my view, we have an economic slowdown—and I do not think anybody can dispute it—is an increase in energy prices. This oil and gas comes out of that Land and Water Conservation Fund, it is interesting that, Members who have submitted healthy requests for money out of the Land and Water Conservation Fund for some of their projects. It is also interesting to note that in this very bill, Florida has approximately $22 million in items that are funded under the Land and Water Conservation Fund. It is likely that State has been the single largest draw on the Land and Water Conservation Fund in the last 5 years. That money is derived from royalties from offshore drilling and production. It is ironic to note that the State of Florida is actually the third largest consumer of petroleum products. However, it only produces about 2 percent of the petroleum that it consumes.

Basically, this amendment on the surface appears to be one of those "not in my backyard" kinds of situations or games. To top it off, this amendment totally ignores the fact that last week the administration announced that it decided to reduce the size of the lease sale and in particular decided to make sure that the lease sale is much further away from Florida's shores.

A while ago, we had the amendment of the Senator from Illinois. Now we have the proponents of this amendment pleading with us to heed the local concerns for the protection of Florida's beaches, of which I would concur. I will say right now that I think the offshore drilling probably does less damage than the tankers that go up and down and unload in the Gulf of Mexico every day. They want those decisions to be made locally. But when it comes to voting on an issue that affected the West, they disregarded that.

When voting, I ask my fellow Members to consider the fact that this is a legislative rider that could ultimately reduce the amount of funds contributed to the Land and Water Conservation Fund, and it might interfere with our country's ability to produce its own oil and gas during a time when the country is facing a very serious energy crunch.
prices. Fifty-seven percent of our fossil fuels comes from outside the country. And that amount is growing. What does that mean? Where is the money going? We keep American wealth is going overseas to Saudi Arabia, to Venezuela, to Iraq and other foreign countries, to pay for oil and gas that we have right here off our coast. Whom do we pay when we produce it here? We pay us. We pay the United States. We keep American wealth.

The oil companies agreed to pay $136 million just for the right to bid on this property and are projected to pay $70 million, at least, per year of royalty. More than that will probably go into the Treasury.

A big chunk of offshore royalty goes to the Land and Water Conservation Fund. The Land and Water Conservation Fund funds the purchase of parks and recreation areas. These areas have protect environmentally sensitive areas that need to be preserved.

So the question is really simple for Americans: Whom are we going to pay? Are we going to transfer our wealth overseas? Keep it within the United States? Or are we going to send it abroad?

Make no mistake, people act as if the price of energy makes no difference. But when a family had a $100-a-month gasoline bill several years ago, and now has a $150-a-month gasoline bill, they have $50 less per month to spend for things their family needs. It is right out of their pocket. When that $50—or a big portion of it—is sent over to Saudi Arabia or Iraq and Saddam Hussein, for their oil and gas, we are not helping America.

Let me tell you, we do not just have oil and gas wells off the Alabama, Mississippi, Texas, and Louisiana coast 100 miles away, we have them right up in Mobile Bay. In some instances less than a mile from homes. I drove over to Gulf Shores right near Pensacola this Saturday to visit my brother-in-law, and he was there with his grandson. They were so proud. They had a picture of a 40-pound ling, a great fish. Where did they catch it? Under an oil rig about 1 mile off the gulf shore's coast—1 mile.

We have never had a problem with these oil and gas wells. Offshore oil and gas production in state waters has protect environmentally sensitive areas that need to be preserved. Fund. The proposed lease sale is in Federal waters. It is not in State waters. But we have produced oil in State waters—right off the beaches, right in the bay here, and we have had no problems. People fish around it on a regular basis. It has created a steady flow of income and has been good for America.

The President, in trying to be accommodating, agreed to cut back this lease sale to less than one-quarter of the original area proposed by President Clinton. He tried to do that. He moved it off on the Alabama side—nothing in the Florida waters—to try to accommodate Florida. And the Florida politicians are still not happy. But they want this pipeline built. They want this pipeline built so they can get natural gas. And why do they want the natural gas? Because it is needed to fuel the new cleaner burning electricity plants they need to heat and cool their homes, shops and offices.

What is particularly valuable in the Gulf are the huge reserves of natural gas. The wells in the remaining lease area are going to be a mixture of oil and gas. But the neck, the “stovepipe”, that the President shut off as part of his compromise to appease Florida’s political leaders was virtually all natural gas.

So I think the Senators from Florida are asking a bit much. I would ask them to think about this. Is not this the philosophy that got California in the fix they are in today? For decades California was facing the question of offshore drilling: No. Nuclear power: No. Coal plants: No. Electric plants: No. Offshore drilling: No. No. Electric plants: No. And why do they want the pipelines? Because they won’t blame themselves.

But energy is going to come from somewhere. It is either going to come from foreign sources or our own sources. We should not threaten our economy. We should not press down on the American working men and women, with the burden of paying 20, 30, 40, cents more a gallon for gasoline, or twice as much for natural gas to heat their homes to accommodate some sort of political fear that exists out there.

So what I think is important is that we, as America, just relax a little bit. Let’s be rational. Let’s think this thing through. Let’s ask ourselves: What real threat is there? And what are the benefits from producing out there? We simply cannot allow people in Canada to produce $2, $3, $4 million each, worrying about running their air-conditioners all the time to dictate national energy policy.

Do you know how you generate electricity for air-conditioners in south Florida? They use natural gas because it is efficient and clean burning, much better than coal. So they want that natural gas. They just do not want it 213 miles or 260 miles away. “Oh, no, we can’t do that. We say they really do not think they know what has happened. I think they have been misled by some politicians and environmentalists who are not responsible.

This is an extreme position. I hate to say that. This is an unhealthy position to have this Senate take. We ought not to adopt this amendment that would stop us from producing oil and gas in one-quarter of the previously approved area. It is going to hurt us in America. It is going to hurt us economically.

The demands in Florida are significant. Thirty percent of all natural gas produced in America comes out of the gulf, and Florida will consume huge amounts. Their demand is going to double in the next 15 years, and increase over 142 percent in the next 20 years, according to experts.

Yes, we should conserve. Yes, I hope people will use those hybrid automobiles. I would like to have one myself. I don’t know why everybody doesn’t buy one. There must be some reason they don’t buy them. If they are so wonderful, why doesn’t everybody go out and buy one, if you get 50 miles to the gallon? But I think they have potential. I am interested in looking at them and support the efforts of our automakers to improve efficiency. But it is a free country. Are we going to make everybody go out and buy one?

The PRESIDING OFFICER. The Senator’s time has expired.

Mr. SESSIONS. Mr. President, I ask unanimous consent for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, I will just say that I believe the President has submitted a scaled-down, fair, and reasonable proposal—too scaled down, frankly. It ought to have satisfied those who would object. Unfortunately, it has not. We have had to have this debate. And though it is healthy to have the debate, I am confident that the amendment will be defeated and that this small production area will be opened for the benefit of American taxpayers and the American economy. I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. NELSON of Florida. Mr. President, how many minutes remain in opposition?

The PRESIDING OFFICER. The opposition’s time has expired.

Mr. NELSON of Florida. How many minutes remaining do I have as the proponent?

The PRESIDING OFFICER. Forty-one minutes twenty-one seconds.

Mr. NELSON of Florida. I do not intend to take that. I see all of the staff smiling at me.
I would like to summarize. I would like to see if I can bring to closure the debate on a part setting any energy policy in this country that is very important not only to us along the Gulf coast but to the Nation as a whole.

I want to mark the contrast in the debate that you have heard: Every Senator who has spoken in opposition to this amendment to stop oil drilling off Florida in the eastern Gulf of Mexico planning area is from an oil State.

That is the beauty of the United States of America. We come, each State represented by two Senators, and bring all of our different interests and constituencies here. But it is an interesting contrast that every opponent to us trying to prevent oil drilling in the eastern Gulf of Mexico is from an oil State.

Senator GRAHAM, my senior colleague from the State of Florida, has eloquently pointed out a number of things. He pointed out in his summary that these light-colored areas are active leases but no drilling has occurred. Senator GRAHAM and I have offered a bill to buy back these leases, just as President George Herbert Walker Bush had proposed buying back a bunch of leases off the Ten Thousand Islands off of Naples, off of Port Myers that occurred about a decade ago. We want to get rid of these, including the lease called the Destin Dome, where Chevron has an active permit to drill.

Let me give you some statistics about Chevron and its offshore rigs in the Gulf of Mexico and what they have experienced between 1956 and 1995.

There were 10 gas blowouts and an additional 5 blowouts of oil and a combination of gas. There were 65 fires and explosions at least 28 originated from natural gas, 14 significant pollution incidents, and 40 major accidents, resulting in at least 19 fatalities.

There were five pipeline breaks or leaks.

I don’t have any particular reason to cite this with regard to Chevron, except that Chevron came up because they have an active lease that is ready to be drilled 30 miles off of some of the world’s most beautiful beaches called the Destin Dome. What Senator Graham and I would like to do is to see us buy back that lease so that drilling, with a safety record and a blowout record as has been shown by the facts—and remember, facts are stubborn things—so that that won’t occur right off of the sugary white sand beaches of Destin, FL.

We would like to reacquire that lease, just as the first President Bush had acquired so many leases down here threatening the 10,000 islands of the Florida Keys.

That is not the issue here today. The issue today is taking these active drilling leases in the central and western planning areas of the Gulf of Mexico and thrusting eastward toward the coastline of Florida with a new sale of 1.5 million acres.

They had 1 million acres in this original lease sale 181. They knew they were not going to pass it. They knew there was too much political opposition. So what they have done is they have scaled it back to 1.5 million acres, thinking they can get it through.

It is, in fact, the eastward inevitable march of drilling into the eastern planning area, an area that heretofore has not been violated with this drilling.

Let me cite some more statistics as we wrap up this debate. The Department of the Interior, on the day that the Senate and the House goes home for the Fourth of July, on Monday, July 2, announces this deal, that they are shrinking 181. In the course of that announcement, out in a news bulletin: Secretary Norton announces area of proposed 181 lease sale on Outer Continental Shelf. And in that, the release states: The area also contains 185 billion barrels of oil. You have heard the statistics of how much oil is there. The fact is, it is not 185 billion barrels of oil; it is 185 million barrels of oil that MMS, a part of the Department of the Interior, estimates is in this lease sale 181.

So I raise the question again, since this equates to about 10 days’ worth of oil and gas energy for this country, is it worth the risk to the beaches of Florida and to the environment of Florida, this eastward march that will inexorably, inexorably happen, is it worth the risk? It is not.

I said earlier in my remarks, if ever I have seen anything that looks like the nose of a camel suddenly under the tent, it is that yellow-colored, 1.5 million acres of eastern planning area that has no drilling.

Back in the middle 1980s, I was a junior Congressman from the east coast of Florida. The Reagan administration had a Secretary of the Interior named James Watt. James Watt was absolutely intent on drilling for oil off the entire eastern coast of the United States and was offering for lease sale leases from as far north as Cape Hatteras, NC, all the way south to Fort Pierce, FL. I went to work, as the Congressman from the middle eastern coast of Florida, to try to defeat that. And we defeated it in the appropriations bill, in an appropriations subcommittee on this very same Interior Department appropriations.

They left me alone. And 2 years later, they came back. This time they had worked the full Appropriations Committee in the House so that they thought they had the votes. And they were running that train down the track for oil drilling from North Carolina to south Florida. The only way that we beat it was to finally get NASA and the Department of Defense to own up to the fact that off the east coast of Florida, where we were launching the space shuttle, you couldn’t have oil rigs out there where you were dropping the solid rocket boosters from the space shuttle launches and where you were dropping off the first stages of the expendable booster rockets that were going out of the Cape Canaveral Air Force Station.

They have left us alone on oil drilling until now. That was almost 16, 17 years.

What we happened to do was call the Pensacola Naval Air Station.

Fast forward 17 years. We decided to call one of the greatest military installations in the world, the naval air station at Pensacola, the place where almost every naval aviator has learned to fly, and we asked if this lease sale 181 were to have a spill—remember, I cited statistics earlier that the Minerals Management Service says this lease sale has up to a 37-percent possibility of having an oil spill—we said to the executive officer at the Naval Air Station Pensacola: What would happen to Pensacola Naval Air Station and to the Air Force installations at Eglin Air Force Base at Fort Walton and Hurlburt Air Force Base near Fort Walton Beach?

No. 1, for both of those military complexes, virtually all testing, training, and operations over water would cease until the oil slick was completely cleaned up.

No. 2, flights would cease due to the hazards to pilots if they had to eject over oily water.

No. 3, water training and equipment testing would cease.

No. 4, test firing of weapons would cease over and into oily water.

In other words, the Pensacola Naval Air Station would virtually cease to operate as one of our greatest national assets.

We have not even talked about something that is a natural phenomenon in the State of Florida. Look at this peninsula. It is a land that I call paradise, but paradise happens to be a peninsula that sticks down into something known as hurricane highway, for in the course of the summer and into the early fall, because the Lord designed the Earth this way, hurricanes spring up in the gulf, they spring up in the Atlantic, and they go from the Atlantic into the gulf. It is an additional reminder of the additional hazards of Florida offshore oil drilling.

As we bring to a close this 3-hour debate, the risk of spill, according to the Department’s own recognition, is only going to have about 10 days of oil and gas for the entire country. It is not going to lessen the dependence on foreign oil.

My goodness, the United States has 5 percent of the world’s population, 3 percent of the reserves, but we consume 25 percent of the world’s oil. We
cannot drill our way out of dependence on foreign oil. We have to have a balanced energy policy which includes the use of technology to get cleaner, lower-per-gallon in our transportation, as well as conservation, as well as being balanced with drilling.

I recite the statistic I cited that of all the future reserves, they are not in the eastern gulf planning area. Sixty percent of the Nation’s undiscovered economically recoverable Outer Continental Shelf oil is in the central and western gulf area where they are already drilling, and for natural gas, of the entire Outer Continental Shelf, 80 percent of the future reserves are from the central and western areas, not from the eastern area.

I come back to the point at which we began 3 hours ago: Is it worth the risk? Is it worth the tradeoff: Little oil and gas, and yet the first invasion of the eastern planning area, a huge invasion, a million and a half acres? Is it worth the risk to an economy of a State that has some of the most beautiful beaches on which its economy is so dependent because of a $50 billion-a-year tourism economy? Is it worth it to the estuaries of Apalachicola, the Big Ben, and the Ten Thousand Islands, Tampa Bay, and the Caloosahatchee River, and the sandy beaches from Tampa all the way to Marco Island? It is not worth the risk. It is not worth the tradeoff.

That is why for years we see, as depicted by the green color, the active drilling leases off Texas, Louisiana, Mississippi, and Alabama, but not off Florida in the eastern planning area of the gulf.

I know the White House is putting on a full-court press. I know the oil and gas industry, through all of their innumerable lobbyists, are putting on a full-court press. We heard the Senators from each of the oil States. Not one non-oil-producing State spoke against this. Yet we have our hands full because the full court lobbying press by every special interest involved in drilling in oil and gas is going to be working this issue as hard as it can before our vote that is going to occur sometime late tomorrow morning.

I ask my colleagues to consider the risk to their Outer Continental Shelf and to consider what is in the best interest of the Nation.

I am deeply honored that this is one of the first great debates in which I have engaged, in which I have joined so many of those with whom I argued in many of the other debates, such as budget, education, and the Patients’ Bill of Rights. This, however, is one of the great debates that will take place, and it is an honor for me to have participated in it.

Mr. President, I yield the floor.

Mr. DOMENICI. Mr. President, OCS Lease Sale 181 is an essential element of a national energy policy that will provide affordable and secure supply of energy.

Sale 181, the most promising domestic opportunity for newly-available leases in many years is a resource rich area for supplies of natural gas and oil. It will play an important role in meeting the Nation’s energy needs.

Sale 181 is the work-product of more than five years of planning and preparation by the Federal Government, affected States, and industry, and should proceed as scheduled in December 2001. The Nation’s demand for natural gas is expected to grow significantly.

According to a 1999 National Petroleum Council study, the nation’s demand for natural gas is expected to increase by 32 percent to 29 trillion cubic feet by 2010 and by 41 percent to 31 trillion cubic feet by 2015. Current demand is 22 trillion cubic feet. Natural gas is essentially a North American commodity.

If the Nation is to meet its growing natural gas demand, access to gas resource rich areas like the Sale 181 area is an indispensable element of the energy policy agenda.

Major reserves of oil and natural gas are believed to exist in the eastern gulf. According to a study conducted in conjunction with the 1999 National Petroleum Council study, the Sale 181 area may hold 7.8 trillion cubic feet of natural gas and 1.9 billion barrels of oil.

This is enough natural gas to supply 4.6 million households for 20 years and enough oil to fill the Strategic Petroleum Reserve for three and one-half years or make enough gasoline to fuel 3.1 million cars for 20 years.

This is also three and one-half times the amount of oil currently in the Strategic Petroleum Reserves.

Sale 181 was recently modified to ensure a balance between state and federal interest.

Key affected constituencies including Alabama, Florida, and the Department of Defense were consulted during development of the current five-year plan to ensure that all concerns were addressed.

For example, the sale area was drawn to insure it was consistent with the State of Florida’s request for no oil and gas activities within 100 miles of its coast, including limiting the number of tracts offered for lease.

In 1996, Florida Governor Lawton Chiles expressed appreciation to MMS for developing a program that recognized the need to exclude any tracts within 100 miles of Florida’s coasts.

The sale area, with full recognition by Florida, including Florida congressional delegation, was specifically excluded from current leasing moratoria language under both Congressional action and President Clinton’s 1996 Executive order.

Other tracts are expected to be deferred to assure smooth operations when the military and industry operate in the same area.

Sale 181 is a regional opportunity that impacts 5 Gulf States; all 5 Gulf States were consulted. Mississippi, Alabama, Louisiana, and Texas support Sale 181.

These States will enjoy significant economic benefits as a result of exploration and production activities in the area.

In addition, the coastal area of Louisiana will be the most heavily impacted of the five States.

The impact on Florida will be minimal. Many tracts in the sale area are closer to Louisiana, Mississippi, and Alabama than to Florida. In fact, Cuba is closer to Florida shore than is this lease.

Parts of the sale area come within about 40 miles of Mississippi, 64 miles of Louisiana, and about 18 miles of Alabama.

Florida could benefit significantly from Sale 181. Florida’s population is expected to grow by 29 percent between now and 2020.

Florida’s natural gas demand for natural gas is expected to grow by 142 percent during the same period.

About two-thirds of this growth in demand is for natural gas to generate electricity.

Some of the potential 7.8 trillion cubic feet of natural gas that could be produced from Sale 181 could help meet the State’s significant demand for natural gas during this time.

Making more natural gas available to Florida utilities for electricity generation should lead to better air quality in the state.

Mr. MCCAIN. Mr. President, I would like to clarify for the RECORD why I voted to table the Durbin amendment to H.R. 2217, the Interior Appropriations bill for fiscal year 2002.

First of all, once national monuments are designated, similar to other federal designations, those lands are withdrawn from any further mining activity, with exception to existing leases. My understanding is that nearly all of the recent monuments designated by the prior Administration are protected in this manner. Only one of the newly established monuments in Colorado has specific provisions in its proclamation that could potentially allow some type of oil or gas mining development.

Unless the Congress or the President by executive action changes the terms of the original proclamation that established these monuments, these lands areas are protected. I would imagine that such changes would be difficult to approve.

The second reason I opposed this amendment is that I object to the process by which many of these monuments were designated by the previous Administration. If important land use issues like this one had been thoroughly evaluated during an open and fair public process prior to the monument designation, the Senate would
not have to vote on this type of amendment. The use of the 1960 Antiquities Act can not only appropriate any unilaterally set aside millions of acres of land from public use by fiat nor does it allow for the type of open and fair input to those living and working on and near those lands. Our democratic process should promote such procedural fairness and consultation.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that there now be a period for morning business with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

CAMPAIGN FINANCE REFORM

Mr. TORRICELLI. Mr. President, no matter what other issues are discussed in this Senate, what other concerns are brought before the body, the Nation's attention is turned again to the issue brought before the body, the Nation's fiscal integrity to this process and change the Nation's campaign finance laws.

In March, the Senate passed a comprehensive and workable piece of legislation; it required 2 weeks and 22 amendments. One of those amendments I offered together with my colleagues, Senator CORZINE, Senator DURBIN, and Senator ENZICH. It was the other part I offered together with my colleagues, having integrity to this process and change the Nation's campaign finance laws.

H-2A REFORM

Mr. BURNS. Mr. President, I rise today to express my support of the Agriculture Job Opportunity, Benefits, and Security Act of 2001. I am proud to join my colleague Senator CRAIG as a cosponsor of this important legislation. I am a strong believer that American workers should have the first chance to have American farm and ranch jobs. However, when there are not enough American workers, our agricultural producers should be able to find farmworkers elsewhere. Under the current H-2A, agricultural program, producers are required to go through a lengthy, uncertain, and undoubtedly costly process to demonstrate to the Federal Government that American workers are not available in order to gain authorization for guest workers. During this long process, Montana crops are not being harvested and cattle and sheep herds are not being tended to the degree they require. A General Accounting Office study recently found that the Government's inefficiency in processing such claims discourages use of the program. As a result, the Federal Government estimates that only half of this country's 1.6 million agricultural workers are authorized to work in the U.S., and the figure may be higher since the estimate is based on self-disclosure by illegal workers.

Let me give you an example of how H-2A reform will benefit real producers. We have a number of large sheep ranchers in Montana. All of these sheep need to be sheared in the spring of the year, and as any sheep rancher will tell you, this is a job that needs to be done quickly, safely, and accurately. Shearers need to pay close attention to detail, lest sheep could be severely injured. With the number of sheep ranches in this country dwindling, there are few Americans who shear professionally, so guest workers from countries such as Argentina must be brought in to do the job. Reform of the H-2A program would make this process easier for our sheep producers. It is high time we reformed the H-2A program. This legislation will replace the current system with a more efficient process for certification of H-2A workers. It will also replace the current, unrealistic premium wage mandated for H-2A employers with the standard, minimum wage. Employers will continue to furnish housing and transportation to H-2A workers. This bill makes sense for producers in Montana, Senator CRAIG's home State of Idaho, and other agricultural States across the country. It also provides a better environment for our guest workers. I look forward to working with my colleagues on this important legislation.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred January 14, 1999 in El Dorado, AR. Thomas Gary, 38, was run over by a truck he owned after he suffered a blow to the head and shotgun injuries that killed him. Chuck Bennett, 17, who has been charged with the crime, claimed that Gray made a sexual advance toward him.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Tuesday, July 10, 2001, the Federal debt stood at $5,710,436,329,428.99, five trillion, seven hundred ten billion, four hundred thirty-six million, three hundred twenty-nine thousand, four hundred twenty-eight dollars and ninety-nine cents.

One year ago, July 10, 2000, the Federal debt stood at $5,662,950,000,000, five trillion, six hundred sixty-two billion, nine hundred fifty million.

Fifteen years ago, July 10, 1986, the Federal debt stood at $3,639,222,329,428.99, three trillion, seven hundred twelve million, three hundred thirty-three billion, seven hundred twelve million.

Ten years ago, July 10, 1991, the Federal debt stood at $3,533,712,000,000, three trillion, five hundred thirty-three billion, seven hundred twelve million.

Fifteen years ago, July 10, 1986, the Federal debt stood at $2,071,214,000,000, two trillion, seven-one billion, two hundred fourteen million, which reflects a debt increase of more than $3.5 trillion, $3,639,222,329,428.99, three trillion, six hundred sixty-two billion, nine hundred twenty-eight million, two hundred twenty-two million, three hundred twenty-nine thousand, four hundred twenty-eight dollars and ninety-nine cents during the past 15 years.
PAYING TRIBUTE TO THE KNOLL MOTEL IN BARRE, VERMONT

Mr. LEAHY. Mr. President, I rise today to pay tribute to the Knoll Motel in Barre, VT, a pioneer establishment of the VT tourism industry.

In April 2000, the Knoll Motel celebrated its 50th anniversary of offering warm and courteous hospitality to visitors of the Green Mountain State. Founded in April of 1950, it is the State’s first and longest operating motel.

During the period following World War II, the number of Americans traveling for recreational purposes increased dramatically. As more and more citizens traveled the country’s expanding network of highways, the touring public were in need of economical and conveniently located overnight accommodations. Responding to this trend, the Knoll Motel’s many tourist industry-based motels that catered to the needs of family highway travelers.

Recognizing the economic potential associated with the growing tourist industry in Vermont, Stanley and Minnie Sabens established the Knoll Motel on 1015 North Main Street in Barre. Located near the State Capital, Montpelier, and what eventually became Interstate 89, the original eight-room facility became a model for the motel industry in Vermont, where tourism is vital to the success of the state’s economy.

Keeping with Vermont’s proud tradition of family-owned businesses, Stanley Sabens has assumed the management of the Knoll Motel, ensuring that future generations of visitors to Vermont will be able to enjoy the Sabens’ hospitality for years to come.

I congratulate the Sabens family and the Knoll Motel for their many years of service to Vermont and its visitors, and I wish them success in the future.

IN MEMORY OF ROSEMARIE MAHER

Mr. MURKOWSKI. Mr. President, I rise today to speak in remembrance of a wonderful Alaskan, Mrs. Rosemarie Maher, the President and Chief Operating Officer of the Doyon Native Regional Corp. based in Fairbanks, Alaska.

On Monday, I attended the moving memorial service in Fairbanks in Rosemarie’s Maher’s honor, who tragically died quite suddenly last week at far too young an age—53. Along with my wife Nancy, I want to express my deepest sympathies to Rosemarie’s husband, Terry J. Maher, their children: Malinda and husband Jim Holmes, Warren J. and wife Angela Westfall, and Kerry Rose and Kim Maher, and all other family members.

I also want to express my condolences to the employees and all of the nearly 14,000 shareholders of Doyon Ltd. upon the death of a very dedicated and talented woman, who successfully advanced the causes of both Doyon members and of all Alaska Natives.

Rosemarie Maher showed uncommon grace and perseverance during her three decade career working on behalf of Alaska Natives. For 21 years, she served as a member of the Doyon corporation’s board of directors and assumed the role of daily leadership of the corporation under such difficult circumstances in winter 2000.

Rosemarie Maher began her involvement in Alaska Native organizations and public service while still in her 20’s. As a devoted wife and mother, she helped to steer development of several organizations, including the Interior Village Association and the Tanana Chiefs Conference. She was first elected to the Doyon Ltd. Board of Directors. Seven years later, she was elected Chairman of the Board, a position she held until her appointment as President and Chief Executive Officer after the tragic plane crash death in January 2000 of long-time Doyon President Morris Thompson.

Mrs. Maher was born in a fish camp on the Nabesna River near her home of Northway along the Alaska Highway in Central Alaska. As a child she was raised as a traditional Athabascan Indian, but as a young teen she was educated at Sheldon Jackson School in Sitka and later at East High School in Anchorage. After graduating from high school, she trained at Alaska Business College and in 1969 moved to Fairbanks, working for several U.S. Government agencies.

During the mid 1970s, Mrs. Maher moved back to Northway where she was elected President of the Northway Village Council and helped form the Upper Tanana Alcohol Program in the Tok area. She also played a key role in the incorporation of Greater Northway Inc., the non-profit organization formed to administer local infrastructure and economic development projects in the region. She was a shareholder of Northway Natives Inc., the Alaska Native Claims Settlement Act Village Corporation for Northway, serving as the first President of that organization. She also was President of Naahla Nigen, a Northway Native subsidiary.

From 1976 to 1984 she entered government public service as a member of the Alaska Gateway School District Board and was a director of the Northway Regional Education Lab, a non-profit, federally and privately funded educational research organization based in Portland, Ore. She also was a member of the Teamsters Union, working summers in road construction and hazardous waste cleanup between 1992 and 2000.

At the statewide level, Rosemarie served as Co-Chair of the Alaska Federation of Natives from 1997–2000 and was a member of the Alaska Board of Game. She also served as a member of the Governor’s Commission on Local Governance and Empowerment and on the Governor’s Highway and Natural Gas Policy Council.

Rosemarie truly did commit her life to the success of Alaska Native corporations and to the betterment of her neighbors and of all Alaska Natives. Her death is a great loss, not just to Doyon and her native culture, but to all who knew and loved her. Again our deepest sympathies to her family and friends. She will always be remembered with great fondness.

MESSAGES FROM THE HOUSE

At 12:15 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 170. Concurrent resolution encouraging corporations to contribute to faith-based organizations.

MEASURES REFERRED

The following bill was read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2131. An act to reauthorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004, and for other purposes; to the Committee on Foreign Relations.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 168. Concurrent resolution expressing the sense of Congress in support of victims of torture; to the Committee on Banking, Housing, and Urban Affairs.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with...
accompanying papers, reports, and documents, which were referred as indicated:

EC–2711. A communication from the Assistant General Counsel for Regulatory Law, Office of Procurement and Assistance Policy, Department of Energy, transmitting, pursuant to law, a report of a rule entitled “Employee Retirement Income Security Act of 1974; Rules and Regulations for Administrative and Enforcement; Claimant (RIN1210-AA61) received on July 9, 2001; to the Committee on Energy and Natural Resources.

EC–2712. A communication from the Director of the Office of Regulations Management, Veterans Health Administration, Department of Veterans Affairs, transmitting, pursuant to law, the report of a rule entitled “Payment or Reimbursement for Emergency Treatment Furnished at Non-VA Facilities” (RIN2000–AK08) received on July 10, 2001; to the Committee on Veterans’ Affairs.

EC–2713. A communication from the Acting Administrator of the Small Business Administration, Department of Commerce, transmitting, pursuant to law, a report concerning Minority Small Business and Capital Ownership Development for Fiscal Year 2003; to the Committee on Small Business and Entrepreneurship.

EC–2714. A communication from the Counsel for Legislation and Regulations, Office of the Chairman, Department of Housing and Urban Development, transmitting, pursuant to law, the report of a rule entitled “Designation of Round III Urban Empowerment Zones and Renewal Communities” (RIN2506–AC09) received on July 9, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2716. A communication from the Counsel for Legislation and Regulations, Office of the Secretary, Department of Housing and Urban Development, transmitting, pursuant to law, the report of a rule entitled “Prohibited Purchasers in Foreclosure Sales of Multifamily Projects with HUD–Held Mortgages and Sales of Multifamily HUD–Owned Projects” (RIN2506–AC08) received on July 9, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2717. A communication from the Acting Chief Administrative Officer/Secretary of the Postal Rate Commission, transmitting, pursuant to law, the report of the Office of the Inspector General for the period from October 1, 2000, through September 30, 1999; to the Committee on Governmental Affairs.

EC–2718. A communication from the Acting Deputy Secretary of Defense, transmitting, pursuant to law, a report relative to sexual harassment complaints and sexual misconduct for Fiscal Year 1998; to the Committee on Armed Services.

EC–2719. A communication from the Secretary of Defense, transmitting, pursuant to law, the report of a retirement; to the Committee on Armed Services.

EC–2720. A communication from the Secretary of the Navy, transmitting, pursuant to law, a report relative to the Administration/Management Support function at Naval Air Systems Command, Naval Air Warfare Center Aircraft Division at Lakehurst, Ocean County, New Jersey; to the Committee on Armed Services.

EC–2721. A communication from the Assistant Secretary of the Pension and Welfare Benefits Administration, Department of Labor, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Dornier Model Dornier 120 Series Airplanes” (RIN2120–AA64)(2001–0268) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2722. A communication from the Assistant Secretary for Administrative and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Acting Assistant Secretary for Administration and Management, Department of Labor, transmitting, pursuant to law, the report of
and second times by unanimous consent, and referred as indicated:

By Mrs. FEINSTEIN (for herself and Mr. KORETZ):
S. 1162. A bill to repeal the requirement relating to specific statutory authorization for increases in judicial salaries, to provide for automatic annual increases for judicial salaries, to provide for a 6 percent increase in judicial salaries, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. EDWARDS:
S. 1164. A bill to provide for the enhanced protection of the privacy of location information of users of location-based services and applications, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BIDEN (for himself, Mr. KOHL, and Mr. REED):
S. 1163. A bill to increase the mortgage loan limits under the National Housing Act for multifamily mortgage insurance; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CORZINE (for himself, Mr. CARPER, and Mr. SCHUMER):
S. 1163. A bill to increase the mortgage loan limits under the National Housing Act for multifamily mortgage insurance; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DASCHLE (for himself, Mr. STEVENS, Mr. REID, Mr. CONRAD, Mr. HARKIN, Mr. DORGAN, and Mr. BURBANK):
S. Res. 126. A resolution expressing the sense of the Senate regarding observance of the Olympic Truce; to the Committee on Foreign Relations.

By Mr. LOTT (for himself, Mr. DASCHLE, Mr. BYRD, and Mr. THURMOND):
S. Res. 127. A resolution commending Gary Sinise for his service as Secretary of the Senate; conveyed and agreed to.

By Mr. TORRICELLI (for himself, Mr. CORZINE, Mr. KERRY, Mr. ALLEN, Mr. WELLSSTONE, Mr. THOMAS, and Mr. BROWNBACK):
S. Res. 128. A resolution calling on the Government of the People’s Republic of China to immediately and unconditionally release Li Shaomin and all other American scholars of Chinese ancestry being held in detention, calling on the President of the United States to continue working on behalf of Li Shaomin and the other detained scholars for their release, and for other purposes; to the Committee on Foreign Relations.

ADDITIONAL COSPONSORS

S. 170
At the request of Mr. REID, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 170, a bill to amend title 10, United States Code, to permit retired members of the Armed Forces who have a service-connected disability to receive both military retired pay by reason of their years of military service and disability compensation from the Department of Veterans Affairs for their disability.

S. 322
At the request of Mr. LANDRIEU, the name of the Senator from Georgia (Mr. CLELAND) and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 356, a bill to establish a National Commission on the Bicentennial of the Louisiana Purchase.

S. 358
At the request of Mr. BREAUD, the name of the Senator from Delaware (Mr. CARPER) was added as a cosponsor of S. 358, a bill to amend the Social Security Act to establish a Medicare Prescription Drug and Supplemental Benefit Program and for other purposes.

S. 356
At the request of Ms. LANDRIEU, the name of the Senator from Arkansas (Mr. HURST) was added as a cosponsor of S. 356, a bill to establish a National Commission on the Bicentennial of the Louisiana Purchase.

S. 358
At the request of Mr. BREAUX, the name of the Senator from Delaware (Mr. CARPER) was added as a cosponsor of S. 358, a bill to amend the Social Security Act to establish a Medicare Prescription Drug and Supplemental Benefit Program and for other purposes.

S. 392
At the request of Mr. SARBANES, the name of the Senator from New Hampshire (Mr. SMITH) was added as a cosponsor of S. 392, a bill to grant a Federal Charter to Korean War Veterans Association, Incorporated, and for other purposes.

S. 537
At the request of Mrs. HUTCHISON, the name of the Senator from Arkansas (Mr. HUTCHISON) was added as a cosponsor of S. 537, a bill to amend the Internal Revenue Code of 1986 to exempt State and local political committees from duplicative notification and reporting requirements made applicable to political organizations by Public Law 106–230.

S. 654
At the request of Mr. TOTTICELLI, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 537, a bill to amend the Internal Revenue Code of 1986 to exempt, in increase, and make permanent the exclusion from gross income for amounts received under qualified group legal services plans.

S. 694
At the request of Mr. LEAHY, the name of the Senator from Florida (Mr. GRAHAM) was added as a cosponsor of S. 694, a bill to amend the Internal Revenue Code of 1986 to provide that a deduction equal to fair market value shall be allowed for charitable contributions of literary, musical, artistic, or scholarly compositions created by the donor.

S. 706
At the request of Mr. KERRY, the name of the Senator from Washington (Ms. CANTWELL) was added as a cosponsor of S. 706, a bill to amend the Social Security Act to establish programs to alleviate the nursing shortage, and for other purposes.

S. 721
At the request of Mr. HUTCHISON, the name of the Senator from Washington (Ms. CANTWELL) was added as a cosponsor of S. 721, a bill to amend the Public Health Service Act to establish a Nurse Corps and recruitment and retention strategies to address the nursing shortage, and for other purposes.

S. 742
At the request of Mr. COCHRAN, his name was added as a cosponsor of S. 742, a bill to provide for pension reform, and for other purposes.

S. 744
At the request of Mrs. HUTCHISON, the name of the Senator from Arkansas (Mr. HUTCHISON) was added as a cosponsor of S. 744, a bill to amend section 527 of the Internal Revenue Code of 1986 to eliminate noninclusion and return requirements for State and local candidate committees and avoid duplicate reporting by certain State and local political committees of information required to be reported and made publicly available under State law.

S. 778
At the request of Mr. HAGEL, the name of the Senator from Iowa (Mr. HARKIN) was added as a cosponsor of S. 778, a bill to expand the class of beneficiaries who may apply for adjustment of status under section 245(i) of the Immigration and Nationality Act, and to extend the deadline for classification petition and labor certification filings.

S. 780
At the request of Mr. EDWARDS, his name was added as a cosponsor of S. 778, supra.

S. 805
At the request of Mr. WELLSSTONE, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 805, a bill to amend the Public Health Service Act to provide for research with respect to various forms of muscular dystrophy, including Duchenne, Becker, limb girdle, congenital, facioscapulohumeral, myotonic, oculopharyngeal, distal, and emery-dreifuss muscular dystrophies.

S. 834
At the request of Mr. MURkowski, the name of the Senator from Tennessee (Mr. THOMPSON) was added as a cosponsor of S. 834, a bill to provide duty-free treatment for certain steam or other vapor generating boilers used in nuclear facilities.
At the request of Mr. Craig, the name of the Senator from Delaware (Mr. Carper) was added as a cosponsor of S. 836, a bill to amend part C of title XI of the Social Security Act to provide for coordination of implementation of administrative simplification standards for health care information.

At the request of Mr. Dodd, the names of the Senator from New Jersey (Mr. Corzine) and the Senator from Delaware (Mr. Carper) were added as cosponsors of S. 838, a bill to amend the Federal Food, Drug, and Cosmetic Act to improve the safety and efficacy of pharmaceuticals for children.

At the request of Mr. Reid, the name of the Senator from New Mexico (Mr. Domenici) was added as a cosponsor of S. 896, a bill to amend the Public Health Service Act to provide for a national media campaign to reduce and prevent underage drinking in the United States.

The request of Mr. Smith of New Hampshire, the name of the Senator from Texas (Ms. Hutchison) was added as a cosponsor of S. 870, a bill to amend the Internal Revenue Code of 1986 to provide additional tax incentives for public-private partnerships in financing of highway, mass transit, high speed rail, and intermodal transfer facilities, and for other purposes.

At the request of Ms. Snowe, the name of the Senator from Rhode Island (Mr. Rockefeller) was added as a cosponsor of S. 913, a bill to amend title XVIII of the Social Security Act to provide for coverage under the medicare program of all oral anticancer drugs.

At the request of Ms. Collins, the name of the Senator from West Virginia (Mr. Rockefeller) was added as a cosponsor of S. 917, a bill to amend title XVIII of the Social Security Act to provide for the transfer of entitlement to educational assistance the Montgomery GI Bill by members of the Armed Forces, and for other purposes.

At the request of Mr. Cleland, the name of the Senator from Georgia (Mr. Miller) was added as a cosponsor of S. 937, a bill to amend title 38, United States Code, to permit the transfer of entitlement to educational assistance the Montgomery GI Bill by members of the Armed Forces, and for other purposes.

At the request of Mr. Murkowski, the name of the Senator from Colorado (Mr. Allard) was added as a cosponsor of S. 972, a bill to amend the Internal Revenue Code of 1986 to improve electric reliability, enhance transmission infrastructure, and to facilitate access to the electric transmission grid.

At the request of Mr. Durnin, the name of the Senator from Maryland (Mr. Sarbanes) was added as a cosponsor of S. 979, a bill to amend United States trade laws to address more effectively import crises, and for other purposes.

At the request of Mr. Bingaman, the name of the Senator from Maine (Ms. Collins) was added as a cosponsor of S. 989, a bill to amend title 16, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

At the request of Mr. Levin, the name of the Senator from New York (Mrs. Clinton) was added as a cosponsor of S. 1018, a bill to provide market loss assistance for apple producers.

At the request of Mr. Lugar, the name of the Senator from New Jersey (Mr. Corzine) was added as a cosponsor of S. 1041, a bill to authorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004.

At the request of Mr. Smith of Oregon, the name of the Senator from Arkansas (Mrs. Lincoln) was added as a cosponsor of S. 1098, a bill to amend the Food Stamp Act of 1977 to improve food stamp informational activities in those States with the greatest rate of hunger.

At the request of Mr. Hatch, the name of the Senator from New Mexico (Mr. Domenici) was added as a cosponsor of S. 1140, a bill to amend chapter 1 of title 9, United States Code, to provide for greater fairness in the arbitration process relating to motor vehicle franchise contracts.

At the request of Mr. Hagel, the name of the Senator from Indiana (Mr. Lugar) was added as a cosponsor of S. Con. Res. 53, concurrent resolution encouraging the development of strategies to reduce hunger and poverty, and to promote free market economies and democratic institutions, in sub-Saharan Africa.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. Feinsteins (for herself and Mr. Thompson):
S. 1162. A bill to repeal the requirement relating to specific statutory authorization for increases in judicial salaries, to provide for automatic annual increases for judicial salaries, to provide for a 9.6 percent increase in judicial salaries, and for other purposes; to the Committee on the Judiciary.

Mrs. Feinsteins. Mr. President, I rise, along with Senator Thompson, to introduce legislation to restore pay equity for our Federal judges. This legislation would guarantee judges automatic and annual cost-of-living adjustments, COLAs, just like other rank-and-file Federal employees.

In addition, the legislation would end a decade of Federal judicial salary neglect by giving judges a one-time salary increase of 9.6 percent. In the past decade, Congress has denied COLAs for judges in four separate years, in 1994, 1995, 1996, and 1998. This bill would restore to Federal justices the four COLAs they have lost.

In his year-end report on the state of the Federal Judiciary, Chief Justice William Rehnquist called the "the need to increase judicial salaries" the most pressing issue facing the Federal judiciary.

Simply put, while government service offers its own rewards, we should not create financial disincentives to service on the Federal bench.

Federal judges bear enormous responsibility as they preside over the most pressing legal issues. Often, they must render life-or-death decisions or preside over cases with millions of dollars at stake. For this vitally important work, they deserve appropriate compensation.

Recently, Congress took some action to restore equity in Federal salaries by doubling the salary of the President of the United States from $200,000 to $400,000.

Congress should now consider an appropriate pay adjustment for the Federal judiciary. As of January 2001, Federal district judges receive an annual salary of $145,000. If judges had received the COLAs to which they were entitled, a Federal District judge's salary would actually be $164,700, nearly $20,000 higher.

Now, $145,000 is a lot more money than the salary of a typical worker but it is not so high when you compare it to equivalent positions of authority in the private sector. For example, the average partner in a major national law firm earns well over $500,000 per year.

It is even more striking to note that major national law firms are offering first-year associates salaries topping $125,000 a year. With bonuses, some of these newly minted lawyers are earning more than appellate judges.

The bottom line is that we cannot expect to keep our country's best lawyers in service on the Federal bench if we continue to denigrate the salary of the post. Just since 1993, the salary of Federal judges, adjusted for inflation, has declined by 13 percent.
Not surprisingly, more and more judges are leaving the Federal bench. Between 1999 and 2000, 52 Federal judges resigned their seats, many of them for the purposes of returning to private practice. These 52 judges represent 40 percent of the 125 Federal judges who have left the bench since 1965.

Attorneys should not expect to become wealthy through an appointment as a Federal judge. Neither should judges expect to have their salaries eroded by Congress’ failure to give them Cost-of-Living Adjustments. Preserving judicial salaries is vital to maintaining the high quality of our Federal judiciary. I look forward to working with my colleagues in the Senate to restore fairness to judicial compensation.

By Mr. CORZINE (for himself, Mr. CARPER, and Mr. SCHUMER):

S. 1163. A bill to increase the mortgage loan limits under the National Housing Act for multifamily housing mortgaged to the Committee on Banking, Housing, and Urban Affairs.

Mr. CORZINE. Mr. President, I am pleased to join with my distinguished colleague, Senator CARPER, in introducing legislation, the FHA Multifamily Housing Loan Limit Adjustment Act, that would improve access to affordable housing.

Our Nation currently faces a critical housing shortage. A report released recently by the Center for Housing Policy, “Housing America’s Working Families,” documented the overwhelming need for affordable housing. The report indicates that in 1997, nearly 14 million families had a critical housing need, meaning they either lived in substandard housing conditions or spent more than half their monthly income on the cost of housing. The FHA Multifamily Housing Loan Limit Adjustment Act would provide America’s working families with increased access to affordable rental housing.

The bill is simple; it increases by 25 percent the statutory limits for multifamily project loans that can be insured by the FHA. This increase reflects the increased costs associated with the production of multifamily units since 1992, when these limits were last revised. The bill also would index the loan limits for inflation and increases to the Annual Construction Cost Index, which is published by the Census Bureau.

Rising construction costs have resulted in a shortage of moderately priced affordable rental units. Rent increases now exceed inflation in all regions of the country, and new affordable rental units have become increasingly harder to find. Because of the current dollar limits on loans, FHA insurance cannot be used to help finance construction in high-cost urban areas such as the New York/New Jersey metropolitan area, Philadelphia and San Francisco.

By increasing the limits on loans for rental housing we will create more incentives for public/private investment in communities through America and spur the new production of cooperative housing projects, rental housing for the elderly, or new construction or substantial rehabilitation of apartments by for- and non-profit entities.

Late last year, Congress sought, through a number of initiatives, to implement programs aimed at increasing the production of affordable housing for the millions of Americans who currently face critical housing needs. For example, we expanded the Low Income Housing Tax Credit, the one Federal program designed to produce new housing. We also expanded the supply of housing vouchers. However, these programs were targeted largely at families with very low incomes. Currently, there are no programs designed specifically to provide access to affordable housing for working-class, middle-class, the people who serve as the engine of our nation’s economy. Far too many of these individuals, including vital municipal workers like teachers, nurses and police officers, are struggling to gain access to affordable housing even remotely near where they work.

Without this much-needed adjustment to the FHA multifamily loan limits, access to affordable housing for our working-citizens will continue to lag. Thousands of more families will join the 14 million people who currently face severe housing needs and our nation’s economy will suffer.

This bill is modeled after bipartisan legislation introduced in the House by my colleague from New Jersey, Congresswoman MARGE ROUKEMA, and Congressman BARNEY FRANK of Massachusetts. The bill is supported by housing and community advocates and has also been endorsed by the National Association of Home Builders, the National Association of Realtors, and the Mortgage Bankers Association.

I hope my Senate colleagues will support the legislation and help us ensure that America’s working families have access to affordable housing.

Mr. CARPER. Mr. President, I am very pleased to join today with my distinguished colleague from New Jersey to introduce the FHA Multifamily Housing Mortgage Loan Limit Adjustment Act of 2001.

A recent report published by the National Housing Conference’s Center for Housing Policy found that in 1997, nearly 14 million families either lived in substandard housing or spent more than half of their income on housing costs. This affordable housing shortage also comes at a time of limited resources. Thus, we have to find the best use of each dollar at our disposal, as well as the most effective use of existing Federal programs to stimulate new production and substantial rehabilitation.

The Federal Housing Administration’s, FHA, multifamily mortgage insurance is an important financing device for housing production. Unfortunately, production through this public/private partnership has been low in recent years. One of the reasons for FHA’s absence from the rental housing market is that the multifamily loan limits have not been increased since 1992. While the annual Construction Cost Index, published by the Census Bureau, has increased over 23 percent since 1992, FHA’s multifamily loan limits have remained static.

These rising construction costs have contributed to FHA’s inability to be a significant participant in the production of multifamily housing. Increasing these loan limits by 25 percent, as this legislation does, is something Congress can do today to address immediately the shortage of affordable rental housing. This bill modifies a current Federal program, FHA’s mortgage insurance, to make that program more effective. Importantly, this legislation also indexes the loan limits to the Annual Construction Cost Index.

I ask my colleagues to join with Senator CORZINE and me to increase these multifamily loan limits so that more working families will have access to affordable rental housing.

By Mr. EDWARDS:

S. 1164. A bill to provide for the enhanced protection of the privacy of location information of users of location-based services and applications, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. EDWARDS. Mr. President, I rise today to introduce much-needed legislation to protect the privacy of consumers who use technologies that can pinpoint their location. Under my bill, the Location Privacy Protection Act, any company that monitors consumers’ physical location will be prohibited from using or disclosing that information without express permission from the consumer. And third parties that gain access to the information cannot use or disclose it without the individual’s permission first.

Within the next few years, new technologies will allow companies to know our location any time of day or night. Our cell phones, pagers, cars, palm pilots and other devices will enable companies to constantly track where we go and how often we go there. These services can have enormous advantages. For example, public safety and rescue teams can save lives with systems that enable them to quickly locate crash victims. Imagine being able to ask your cell phone for directions to the nearest Italian restaurant. Or imagine...
you are traveling in a new city and your pager alerts you when you are without a block of your favorite coffee shop, which happens to be running a sale on coffee. The possibilities for location-based services and application are endless.

But these new technologies also raise serious privacy issues. Location information is very private, sensitive information that can be misused to harass consumers with unwanted solicitations or to draw inaccurate or embarrassing inferences about them. And in extreme cases, improper disclosure of location information to a domestic abuser or stalker could place a person in physical danger.

The wireless industry is unique in that it has worked with Congress to guarantee some privacy protections in the past, and it is the industry that is best positioned for recognizing the sensitivity of location information. However, although these laws are a good first step, we need to build on them and strengthen them. For example, although under the law customers must give their permission before wireless carriers can use or disclose their location information, the law does not require carriers to clearly notify consumers about how their location information will be used. If they do not, consumers also have no control over what happens to their information once third parties gain access to it. These parties are free to share it with anyone they please. And shockingly, there are no laws that protect the privacy of users of new technologies like telematics, services that allow drivers to get directions at the push of a button in their cars, and global positioning systems.

My legislation puts control over location information in the hands of the consumer. It requires the FCC to issue new regulations prohibiting all providers of location-based services and applications from collecting, using, disclosing, or retaining location information without the customer’s permission. And customers must be given clear and conspicuous notice about what the company is going to do with their location information. Customers also will have the right to ensure the accuracy of the information that is collected and companies will be required to keep that information safe from unauthorized access.

Third parties will not be able to use or disclose location information without prior authorization from the customer. In this regard, my bill makes an exception if the third party is an emergency service. I believe that the FCC must be very careful not to interfere with the laws that have been carefully crafted to allow emergency medical response, safety, firefighting services, hospital emergency facilities and other emergency services to respond to the user’s call for help. These laws are critical to saving lives and I believe we should do everything we can to make sure they work.

I would also like to point out that while my bill requires that the FCC rules not interfere with the ability of law enforcement to obtain location information pursuant to an appropriate court order, it does not provide the FCC with the ability to use or access this information. Although I have concerns about unnecessary and surreptitious government surveillance, I believe that this issue is best addressed either separately or at a later date. The purpose of my bill is primarily to lay down guidelines for when private persons, such as businesses, are able to use and disclose consumers’ location information.

The law needs to be strengthened, and we have the opportunity to do so while these location-based technologies are in their infancy. We have a unique opportunity to give consumers power over their location information before its commercial value becomes so great that it is impossible for consumers to prevent the buying and selling of this very personal information.

In sum, I believe the Location Privacy Protection Act is a common sense measure offered at an ideal time. I know that wireless carriers and many companies such as OnStar, ATX, Qualcomm and others care deeply about privacy. I applaud them for their efforts and I look forward to continuing working with them on this issue.

I ask unanimous consent that the text be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE. This Act may be cited as the “Location Privacy Protection Act of 2001”.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) Location-based services and applications allow customers to receive services based on their geographic location, position, or known presence. Telematics devices, for instance, permit subscribers in vehicles to obtain emergency road assistance, driving directions, or other information with the push of a button. Other devices, such as those with Internet access, support position commerce in which notification of points of interest or promotions can be provided to customers based on their known presence or geographic location.

(2) There is a substantial Federal interest in safeguarding the privacy right of customers of location-based services or applications to control the collection, use, retention of, disclosure of, and access to their location information. Location information is non-public information that can be misused to commit fraud, harass consumers with unwanted messages, to draw embarrassing or inaccurate inferences about them, or to discriminate against them. Improper disclosure or access to location information could also place a person in physical danger. For example, location information could be misused by stalkers or by domestic abusers.

(3) The collection of unnecessary location information magnifies the risk of its misuse or improper disclosure.

(4) Congress has recognized the right to privacy of location information by classifying location information as customer proprietary network information subject to section 222 of the Communications Act of 1934 (1934, 47 U.S.C. 222), thereby preventing use or disclosure of that information without a customer’s express prior authorization.

(5) There is a substantial Federal interest in promoting fair competition in the provision of wireless services and in ensuring the consumer confidence necessary to ensure continued growth in the use of wireless services. These goals can be attained by establishing a set of privacy rules that apply to wireless information, regardless of its location.

SEC. 3. PROTECTION OF LOCATION INFORMATION PRIVACY.

(a) RULEMAKING REQUIRED.—Not later than 180 days after the date of the enactment of this Act, the Federal Communications Commission shall complete a rulemaking proceeding for purposes of further protecting the privacy of location information.

(b) ELEMENTS.—(1) IN GENERAL.—Subject to the provisions of paragraph (2), the rules prescribed by the Commission under subsection (a) shall—

(A) require providers of location-based services and applications to inform customers, with clear and conspicuous notice, about their policies on the collection, use, disclosure of, retention of, and access to customers’ location information;

(B) require providers of location-based services and applications to obtain a customer’s express authorization before—

(i) collecting, using, or retaining the customer’s location information; or

(ii) disclosing or permitting access to the customer’s location information to any person who is not a party to, or who is not necessary to the performance of, the service contract between the customer and such provider;

(C) require that all providers of location-based services or applications—

(i) restrict any collection, use, disclosure of, retention of, and access to customer location information to the specific purpose that is the subject of the express authorization of the customer concerned; and

(ii) not subsequently release a customer’s location information for any purpose beyond the purpose for which the customer provided express authorization;

(D) ensure the security and integrity of location data, and give customers reasonable access to their location data for purposes of verifying the accuracy of, or deleting, such data;

(E) be technologically to ensure uniform privacy rules and expectations and provide the framework for fair competition among similar services;

(F) require that aggregated location information not be disaggregated through any...
means into individual location information for emergency services, and otherwise provide for—
(G) not impede customers from readily utilizing
location-based services or applications.
(2) PERMITTED USES.—The rules prescribed
under subsection (a) may permit the collection,
use, retention, disclosure of, or access to a customer’s location information
without prior notice or consent to the extent neces-
tary to—
(A) provide the service from which such in-
formation is derived, or to provide the loca-
tion-based service that the customer is ac-
cessing;
(B) initiate, render, bill, and collect for the
location-based service or application;
(C) protect the rights or property of the
provider of the location-based service or ap-
plication, or protect customers of the service or
application from fraudulent, abusive, or
unlawful use of, or subscription to, the ser-
vie or application;
(D) produce aggregate location informa-
tion; and
(E) comply with an appropriate court order.
(3) ADDITIONAL REQUIREMENT.—Under the
rules prescribed under subsection (a), any
third party receiving, or receiving access to,
a customer’s location information from a
provider of location services or applications
pursuant to the express authorization of the
customer, shall locate, disclose or permit access
to such information to any other person
without the express authorization of the cus-
tomer.
(4) EXPRESS AUTHORIZATION.—
(A) FORM.—For purposes of the rules pre-
scribed under subsection (a) and section
222(f) of the Communications Act of 1934 (47
U.S.C. 222), the Commission shall specify
the appropriate methods, whether techno-
ological or otherwise, by which a customer
may provide express prior authorization.
Such methods may include a written or elec-
tronically signed service agreement or other
contractual instrument.
(B) MODIFICATION OR REVOCATION.—Under
the rules prescribed under subsection (a), a
customer shall have the power to modify or
revoke at any time an express authorization
given by the customer under the rules.
(c) TERMINATION AUTHORIZATIONS.—The rules
prescribed by the Commission under subsection
(a) shall apply to any person that provides a
location-based service or application, wheth-
er or not such person is also a provider of
commercial mobile service (as that term is
defined in section 332(d) of the Communica-
tions Act of 1934 (47 U.S.C. 332(d)).
CONGRESSIONAL RECORD—SENATE
July 11, 2001
Mr. KOHL and Senator REED, the Juvenile
Justice and Drug Policy Subcommittee on
the Judiciary, Senate Committee on the
appropriation of funds needed to suppress
crime; and
(a) MAKE AVAILABLE.—Under the
rules prescribed under subsection (a), a
customer shall have the power to modify or
revoke at any time an express authorization
given by the customer under the rules.
(2) PREEMPTION.—Any law, regulation, or
requirement that applies to the term “aggre-
gate location information” is preempted and
superseded by the rules prescribed under
subsection (a).
(3) ADDITIONAL REQUIREMENT.—Under
the rules prescribed under subsection (a),
any third party receiving, or receiving access to,
a customer’s location information from a
provider of location services or applications
pursuant to the express authorization of the
customer, shall locate, disclose or permit access
to such information to any other person
without the express authorization of the cus-
tomer.
(4) EXPRESS AUTHORIZATION.—
(A) FORM.—For purposes of the rules pre-
scribed under subsection (a) and section
222(f) of the Communications Act of 1934 (47
U.S.C. 222), the Commission shall specify
the appropriate methods, whether techno-
ological or otherwise, by which a customer
may provide express prior authorization.
Such methods may include a written or elec-
tronically signed service agreement or other
contractual instrument.
(B) MODIFICATION OR REVOCATION.—Under
the rules prescribed under subsection (a), a
customer shall have the power to modify or
revoke at any time an express authorization
given by the customer under the rules.
(c) TERMINATION AUTHORIZATIONS.—The rules
prescribed by the Commission under subsection
(a) shall apply to any person that provides a
location-based service or application, wheth-
er or not such person is also a provider of
commercial mobile service (as that term is
defined in section 332(d) of the Communica-
tions Act of 1934 (47 U.S.C. 332(d)).

Title V funds have been used to sponsor programs to reduce school violence.
provide transition counseling to students returning to their local school from alternative school placement, reduce rates of violent and delinquent behavior, and teen pregnancy, and provide services to the children of incarcerated adult offenders. Prevention is the key to keeping our juvenile crime rate down, and we need to extend Title V to guarantee that these funds continue to flow to States and localities.

The bill also reauthorizes the Formula Grant Program for the next six years at $200,000,000 per year. I have included provisions for the past three eligible uses of these funds so as to make clear that employment training, mental health treatment, and other effective programs that meet the needs of children and youth in the juvenile system could be funded. The bill reauthorizes funding to the extent of a reporting requirement that focuses on once every three years. It also includes funds for grants to States to upgrade and enhance their juvenile felony criminal record histories.

My bill includes important provisions to continue the core protections for incarcerated youths that were included in the original Juvenile Justice and Delinquency Prevention Act of 1974. It continues the Act’s function of protecting children from abuse and assault by adults in jails by prohibiting any contact between juveniles and adult inmates. The bill ensures that children are not detained in any jail or lockup for adults, except for very limited periods of time and under very limited circumstances. And it continues current law’s requirement that States address the disproportionate number of minority children in confinement.

The bill authorizes $500,000,000 per year over the next six years for the Juvenile Accountability Block Grant program. In the last several years, this program has never been authorized. Its purpose is to strengthen State juvenile justice systems. States would receive funds as long as they implement or consider implementing graduated sanctions, though this condition can be removed through a reporting requirement. The language I have included in my bill is drawn from H.R. 863, a measure which is currently working its way through the other body. I am supportive of that measure, as it will provide much needed funds for States to hire additional prosecutors, juvenile court judges, probation officers, and court-appointed defenders and special advocates. In years past, my State has used these funds to establish a Serious Juvenile Offender program through the Delaware Division of Youth Rehabilitative Services, which provides an immediate secure placement of violent youth offenders who have violated the terms of their probation. Delaware has also used these funds to expand diversionary programs through the youth court, thus reducing the time between arrest and disposition of juvenile offenders, and to add psycho-forensic evaluators in the Delaware Office of the Public Defender to identify and address mental illness as a cause for delinquent conduct. This is a good program and it needs to be authorized.

My bill also reauthorizes the Violent Crime Reduction Trust Fund. The Trust Fund, created in the 1994 Crime Bill, has been the key to our successful fight against crime over the past several years. Unfortunately, it expired in 2000. The Violent Crime Reduction Trust Fund was the vehicle for providing billions of dollars to State and local governments to implement a variety of law enforcement and crime-fighting initiatives, from the COPS program to the Violence Against Women Act to youth violence programs. Without the Trust Fund, I fear we may not have the resources necessary to continue our struggle to keep our streets safe. I am pleased to include provisions in this bill that will extend the Fund through fiscal year 2007.

Finally, the bill I am introducing today includes several common sense gun safety provisions. First, it incorporates Senator REED’s Gun Show Background Check Act. This language will ensure that criminals cannot purchase guns at gun shows, and I applaud Senator REED for his leadership in this area. Second, I have included Senator Kohl’s Child Safety Lock Act. This moderate provision would require handguns to be sold with government-certified trigger locks. Studies indicate trigger locks can save lives: I was pleased to see the Administration’s endorsement of this idea in its budget request for the upcoming fiscal year; and I thank Senator Kohl, for including his bill in this larger measure today. Third, the bill would extend the Brady Law to dangerous juvenile offenders. This provision would make it unlawful for any person adjudicated a juvenile delinquent for serious drug offenses or violent felonies to possess firearms. This is an important step toward getting guns out of the hands of criminals, and its enactment will prevent violent juveniles from accessing weapons and thus make it difficult for them to commit gun crimes as adults.

This is not a perfect bill, and I am not wedded to each and every line. I welcome comments from my colleagues, the juvenile justice community, and anyone interested in preventing and controlling juvenile crime. I am committed, however, to renewing our efforts to keep our children and our communities safe from crime and violence. I am committed to protecting our kids through meaningful prevention and intervention programs, to cracking down on drugs and the violence that accompanies them, and to ensuring that meaningful, appropriate, and swift punishment is imposed on all juvenile offenders. I believe the Juvenile Crime Prevention and Control Act that I introduce today is an important step toward accomplishing these goals.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the “Juvenile Crime Prevention and Control Act of 2001”.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 101. Findings; declaration of purpose; definitions.
Sec. 102. Juvenile crime control and prevention.
Sec. 103. Juvenile offender accountability.
Sec. 104. Extension of violent crime reduction trust fund.

TITLE I—JUVENILE CRIME PREVENTION AND CONTROL

Sec. 101. Findings; declaration of purpose; definitions.

Title I of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5601 et seq.) is amended to read as follows:

TITLE I—JUVENILE CRIME PREVENTION AND CONTROL

SEC. 101. FINDINGS; DECLARATION OF PURPOSE; DEFINITIONS.

Title I of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5601 et seq.) is amended to read as follows:

SEC. 101. FINDINGS. "Congress finds that—

“(1) the juvenile crime problem should be addressed through a 2-track common sense approach that addresses the needs of individual juveniles and society at large by promoting—

“(A) quality prevention programs that—

“(i) work with juveniles, their families, local public agencies, and community-based organizations, and take into consideration such factors as whether juveniles have ever been the victims of family violence (including child abuse and neglect); and

“(ii) are designed to reduce risks and develop competencies in at-risk juveniles that will prevent, and reduce the rate of, violent delinquent behavior; and
"(B) programs that assist in holding juveniles accountable for their actions, including a system of graduated sanctions to respond to each delinquent act, requiring juveniles to make restitution, or perform community service for the damage caused by their delinquent acts, and methods for increasing victim satisfaction with respect to the penalties imposed on juveniles for their acts; and

"(2) action is required now to reform the Federal juvenile justice program by focusing on juvenile delinquency prevention programs that hold juveniles accountable for their acts.

**SEC. 102. PURPOSES.**

"(1) to support State and local programs that prevent juvenile involvement in delinquent behavior;

"(2) to assist State and local governments in promoting public safety by encouraging accountability for acts of juvenile delinquency;

"(3) to assist State and local governments in developing sustainable systems that provide the prevention of juvenile crime or juvenile delinquency, including efforts to achieve the long-term result of the prevention of juvenile crime or delinquency.

**SEC. 103. DEFINITIONS.**

"(1) ADMINISTRATOR means the Administrator of the Office of Juvenile Crime Control and Prevention, appointed in accordance with section 201.

"(2) ADULT INMATE means an individual who

"(A) has reached the age of full criminal responsibility under applicable State law; and

"(B) has been arrested and is in custody for, awaiting trial on, or convicted of criminal charges.

"(5) COLLOCATED FACILITIES means facilities that are located in the same building, or are part of a related complex of buildings located on the same grounds.

"(6) COMBINATION means as applied to States or units of local government means any grouping or joining together of States or units of local government for the purpose of preparing, developing, or implementing a juvenile crime control and delinquency prevention plan.

"(7) COMMUNITY-BASED means a facility, program, or service means a small, open group home or other suitable place located near the home or family of the juvenile and programs of community supervision and service that maintain community and consumer participation in the planning, operation, and evaluation of those programs which may include, medical, educational, vocational, social, and psychological counseling, training special education, counseling, alcoholism treatment, drug treatment, and other rehabilitative services.

"(8) COMPREHENSIVE AND COORDINATED SYSTEM MEANS a system that—

"(A) ensures that services and funding for the prevention and treatment of juvenile delinquency are consistent with policy goals of preserving families and providing appropriate services in the least restrictive environment, and in which the program or initiative supports and maintains public safety;

"(B) identifies, and intervenes early for the benefit of, young children who are at risk of developing emotional or behavioral problems because of physical or mental stress or abuse, and for the benefit of their families;

"(C) increases interagency collaboration and family involvement in the prevention and treatment of juvenile delinquency; and

"(D) encourages private and public partnerships in the delivery of services for the prevention and treatment of juvenile delinquency.

"(9) CONSTRUCTION means erection of new buildings or acquisition, expansion, remodeling, and alteration of existing buildings, and initial equipment of any such buildings, or any combination of such activities (including architects' fees but not the cost of acquisition of land for buildings).

"(10) FEDERAL JUVENILE CRIME CONTROL, PREVENTION, AND JUVENILE OFFENDER ACCOUNTABILITY PROGRAM means any Federal program a primary objective of which is the prevention of juvenile crime or reduction of the incidence of arrest, the commission of criminal acts or acts of delinquency, violence, the use of alcohol or illegal drugs, or the involvement in gangs among juveniles.

"(11) GENDER-SPECIFIC SERVICES means services designed to respond to the gender of the individual to whom such services are provided.

"(12) GRADUATED SANCTIONS means an accountability-based juvenile justice system that protects the public, and holds juvenile delinquents accountable for acts of delinquency, provided by graduated and appropriate sanctions that are graduated in such a manner as to reflect (for each act of delinquency or offense) the severity or repeated nature of that act or offense, and in which there is sufficient flexibility to allow for individualized sanctions and services suited to the individual juvenile offender.

"(13) HOME-BASED ALTERNATIVE SERVICES means services provided to a juvenile in the home of the juvenile as an alternative to incarcerating the juvenile, and includes home detention.

"(14) INDIAN TRIBE means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (48 U.S.C. 161 et seq.), that is recognized as eligible for Federal recognition or made eligible under section 211 of the Indian Claims Settlement Act of 1978 (25 U.S.C. 787 et seq.), and which the tribe or Indian organization is the legal representative of.

"(15) JUVENILE means a person who has not attained the age of 18 years and who is subject to delinquency proceedings in accordance with applicable law; and

"(16) JUVENILE POPULATION means the population of a State under 18 years of age.

"(17) JAILS AND DETENTION FACILITIES FOR ADULTS means—

"(A) a drug and alcohol abuse program;

"(B) any program or activity that is designed to improve the juvenile justice system; and

"(C) any program or activity that is designed to reduce known risk factors for juvenile delinquency behavior, by providing activities that build on protective factors for, and develop competencies in, juveniles to prevent and reduce the rate of juvenile delinquency behavior.

"(18) LAW ENFORCEMENT AND CRIMINAL JUSTICE. means the term ‘law enforcement and criminal justice’ means any activity pertaining to crime prevention, control, or reduction or the enforcement of the criminal law, including police efforts to prevent, control, or reduce crime or to apprehend criminals, activities of courts having criminal jurisdiction and related agencies (including prosecutorial and defender services), activities of correctional probation, parole agencies, and programs relating to the prevention, control, or reduction of juvenile delinquency or narcotic addiction.

"(20) OFFICE means the Office of Juvenile Crime Control and Prevention established under section 201.

"(21) OFFICE OF JUSTICE PROGRAMS means the term ‘Office of Justice Programs’ means the Bureau of Justice Assistance.

"(22) OFFICE OF THE ATTORNEY GENERAL means the Office of the Attorney General.

"(24) OUTCOME OBJECTIVE means the term ‘outcome objective’ means an objective that relates to the impact of a program or initiative, that measures the reduction of high risk behaviors, such as, incidence of arrest, the commission of criminal acts or acts of delinquency, failure in school, violence, the use of alcohol or illegal drugs, involvement in youth gangs, violent and unlawful acts of animal cruelty, and teenage pregnancy, among youth in the community.

"(25) PROCESS OBJECTIVE means the term ‘process objective’ means an objective that relates to the manner in which a program or initiative is carried out, including—

"(A) an objective relating to the degree to which the program or initiative is being carried out in accordance with the target population.

"(B) an objective relating to the degree to which the program or initiative is being carried out in accordance with the target population.

"(26) PROHIBITED PHYSICAL CONTACT means the term ‘prohibited physical contact’ means—

...
"(A) any physical contact between a juvenile and an adult inmate; and

"(B) proximity that provides an opportunity for physical contact between a juvenile and an adult inmate.

"(2) RELATED COMPLEX OF BUILDINGS.—The term ‘related complex of buildings’ means 2 or more buildings that share—

"(A) physical features, such as walls and fences, or services beyond mechanical services (heating, air conditioning, water and sewer); or

"(B) the specialized services that are allowable under section 31.303(e)(3)(i)(C)(3) of title 28, Code of Federal Regulations, as in effect on December 10, 1996.

"(3) SECURE DETENTION FACILITY.—The term ‘secure detention facility’ means any public or private residential facility that—

"(A) includes construction fixtures designed to physically restrict the movements and activities of juveniles or other individuals held in lawful custody in such facility; and

"(B) is used for the placement, after adjudication and disposition, of any juvenile who has been adjudicated as having committed an offense or any other individual convicted of a criminal offense.

"(4) SECURE DETENTION.—The term ‘secure detention’ means any public or private residential facility that—

"(A) includes construction fixtures designed to physically restrict the movements and activities of juveniles or other individuals held in lawful custody in such facility; and

"(B) is used for the temporary placement of any juvenile who is accused of having committed an offense or of any other individual accused of having committed a criminal offense.

"(5) SERIOUS CRIME.—The term ‘serious crime’ means—

"(A) murder or nonnegligent manslaughter, forcible rape, or robbery; and

"(B) aggravated assault committed with the use of a firearm.

"(6) YOUTH.—The term ‘youth’ means an individual who is not less than 6 years of age and not more than 17 years of age.

"PART A—OFFICE OF JUVENILE CRIME CONTROL AND PREVENTION

"SEC. 201. ESTABLISHMENT OF OFFICE.

"(a) National Juvenile Crime Control, Prevention, and Juvenile Offender Accountability Program.—

"(1) IN GENERAL.—The Attorney General shall establish, consolidate, alter, or discontinue such organizational entities in that Office as may be necessary or appropriate.

"(b) OFFICERS.—The Administrator may select, appoint, and employ not to exceed 4 officers at rates not to exceed the maximum rate payable under section 5376 of title 5, United States Code, to carry out the functions of the Office.

"(c) DETAIL OF FEDERAL PERSONNEL.—Upon the request of the Administrator, the head of any Federal agency may detail, on a reimbursable basis, any of its personnel to the Administrator to assist the Administrator in carrying out the functions of the Administrator under this title.

"(d) SERVICES.—The Administrator may obtain services as authorized by section 3109 of title 5, United States Code, at rates not to exceed the maximum rate payable under section 5376 of title 5, United States Code.

"SEC. 202. PERSONNEL, SPECIAL PERSONNEL, EXPERTS, AND CONSULTANTS.

"(a) National Juvenile Crime Control, Prevention, and Juvenile Offender Accountability Program.—

"(1) IN GENERAL.—The Administrator may select, employ, and fix the compensation of such personnel, including attorneys, who are necessary to perform the functions vested in the Administrator and to prescribe the functions of those officers and employees.

"(b) OFFICERS.—The Administrator may select, appoint, and employ not to exceed 4 officers at rates not to exceed the maximum rate payable under section 5376 of title 5, United States Code, to carry out the functions of the Office.
(1) advise the President through the Attorney General of the United States, in coordination with the Federal Juvenile Justice Office, the rationale for the decision to discontinue a joint Federal program, the reasons for the decision, and the history of the program.

(2) provide technical and financial assistance to the States, localities, and private entities for purposes of providing information, data, standards, advanced techniques, and program models developed through the Institute and through programs funded under section 291.

(3) direct the Administrator with respect to particular functions or aspects of the work of the Office; and

(4) provide technical and financial assistance to the States and localities that administers a Federal juvenile crime control, prevention, and juvenile offender accountability program, and Federal policies relating to juveniles prosecuted or adjudicated in the Federal courts.

(5) implement and coordinate Federal juvenile crime control, prevention, and juvenile offender accountability programs and activities, including proposals for joint funding to be coordinated by the Administrator.

(6) provide a detailed summary and analysis of the most recent data available regarding the number of juveniles taken into custody, the rate at which juveniles are taken into custody, the time served by juveniles in custody, and the trends demonstrated.

(7) provide a description of the activities for which amounts are expended under this title.

(8) provide specific information relating to the attainment of goals set forth in the plan, including specific, measurable standards for assessing progress toward national juvenile crime reduction and juvenile offender accountability goals; and

(9) provide for the coordination of Federal, State, and local initiatives for the reduction of youth crime, preventing delinquency, and ensuring accountability for juvenile offenders.

(10) summarize and analyze—

(11) the types of offenses with which the juveniles were charged;

(12) the ages of the juveniles;

(13) the number of juveniles who died or suffered that injury.

(14) define the term ‘serious bodily injury’.—In this paragraph, the term ‘serious bodily injury’ means bodily injury involving extreme physical pain or the impairment of a function of a bodily member, organ, or mental faculty that requires medical intervention such as surgery, hospitalization, or physical rehabilitation.

(15) annual review.—The Administrator shall annually—

(A) review each plan submitted under this subpart, and

(B) revise the plan, as the Administrator considers appropriate; and

(C) not later than March 1 of each year, present the Committee on the Judiciary of the Senate and the Committee on Education and the Workforce of the House of Representatives.

(D) duties of Administrator.—In carrying out this title, the Administrator shall—

(1) conduct an annual conference of member representatives of the State advisory groups appointed under section 222(b)(2) to assist that eligible organization in—

(a) conducting an annual conference of member representatives of the State advisory groups for purposes relating to the activities of those groups; and

(b) disseminating information, data, standards, advanced techniques, and program models developed through the Institute and through programs funded under section 291.

(2) provide technical and financial assistance to the States, units of local government, and private entities for purposes of providing information, data, and analyses as the Administrator may require and shall include an analysis of the extent to which the program of the Federal agency submitting such development statement conforms with and furthers Federal juvenile crime control, prevention, and juvenile offender accountability development statement

(3) coordination of functions of Administration and agencies or departments that operate such programs to be considered Federal juvenile accountability effort including, in consultation with the Director of the Office of Management and Budget listing annually those programs and activities that the Administrator determines may have an important bearing on the success of the entire national juvenile crime reduction, juvenile offender accountability effort including, in consultation with the Director of the Office of Management and Budget listing annually those programs and activities that the Administrator determines may have an important bearing on the success of the entire national juvenile crime reduction, juvenile offender accountability programs and activities for the following fiscal year.

(4) serve as a single point of contact for States, units of local government, and private entities for purposes of providing information, data, and analyses as the Administrator may require and shall include an analysis of the extent to which the program of the Federal agency submitting such development statement conforms with and furthers Federal juvenile crime control, prevention, and juvenile offender accountability development statement.

(5) coordination of functions of Administration and agencies or departments that operate such programs to be considered Federal juvenile accountability effort including, in consultation with the Director of the Office of Management and Budget listing annually those programs and activities that the Administrator determines may have an important bearing on the success of the entire national juvenile crime reduction, juvenile offender accountability programs and activities for the following fiscal year.

(6) annual juvenile delinquency development statement.

(1) in general.—Each Federal agency administering a joint Federal program for purposes of providing information, data, and analyses as the Administrator may require and shall include an analysis of the extent to which the program of the Federal agency submitting such development statement conforms with and furthers Federal juvenile crime control, prevention, and juvenile offender accountability development statement.

(2) contents.—Each development statement submitted under paragraph (1) shall contain such information, data, and analyses as the Administrator may require and shall include an analysis of the extent to which the program of the Federal agency submitting such development statement conforms with and furthers Federal juvenile crime control, prevention, and juvenile offender accountability development statement.
"SEC. 204. COMMUNITY PREVENTION GRANT PROGRAM.

(a) PURPOSES.—The Administrator may make grants to a State, to be transmitted through the State advisory group to units of local government that meet the requirements of subsection (b), for delinquency prevention programs and activities for youth who have had contact with the juvenile justice system or who are likely to have contact with the juvenile justice system, including the provision to children, youth, and families of—

(1) recreation services;
(2) tutoring and remedial education;
(3) assistance in the development of work awareness skills;
(4) child and adolescent health and mental health services;
(5) alcohol and substance abuse prevention services;
(6) marriage development activities; and
(7) the teaching that people are and should be held accountable for their actions.

(b) ELIGIBILITY.—The requirements of this subsection are met with respect to a unit of general local government if—

(1) the unit is in compliance with the requirements of part B of title II;
(2) the unit has submitted to the State advisory group a 3-year plan outlining the local front end plans of the unit for investment for delinquency prevention and early intervention activities;
(3) the unit has included in its application to the Administrator for formula grant funds a summary of the 3-year plan described in paragraph (2);
(4) pursuant to its 3-year plan, the unit has appointed a local policy board of no fewer than 15 and no more than 21 members with representation of public agencies and private, nonprofit organizations serving children, youth, and families and business and industry;
(5) the unit has, in order to aid in the prevention of delinquency, included in its application a plan for the coordination of services to at-risk youth and their families, including such programs as nutrition, energy assistance, and housing;
(6) the local policy board is empowered to make all recommendations for distribution of funds and evaluation of activities funded under this title; and
(7) the unit or State has agreed to provide a 50 percent match of the amount of the grant, including the value of in-kind contributions, to fund the activity.

(c) PRIORITY.—In considering grant application under this section, the Administrator shall give priority to applicants that demonstrate ability to—

(1) develop and maintain a comprehensive multi-agency plan for the coordination of services for at-risk youth;
(2) design, develop, and carry out collaborative approaches to the development of public and private agencies for the development of more effective education, training, and treatment programs for juvenile delinquency and programs to improve the juvenile justice system;
(3) provide innovative ways to involve the private nonprofit and business sector in delinquency prevention activities; and
(4) develop or enhance a statewide substance abuse prevention system that is dedicated to early intervention and delinquency prevention.

SEC. 205. GRANTS TO INDIAN TRIBES.

(a) IN GENERAL.—In each fiscal year, the Administrator shall make grants to Indian tribes for programs pursuant to the purposes under section 204 and part B of title II, which grants shall—

(1) provide evidence that the Indian tribe performs law enforcement functions (as determined by the Secretary of the Interior); (2) identify the juvenile justice and delinquency problems and juvenile delinquency prevention needs to be addressed by activities conducted by the Indian tribe in the area under title II of the Indian tribe with assistance provided by the grant; (3) provide for fiscal control and accounting procedures that—

(A) are necessary to ensure the prudent use, proper disbursement, and accounting of funds received under this section; and
(B) are consistent with the requirements of subparagraph (B).

(b) APPLICATIONS.—

(1) In general.—To be eligible to receive a grant under this section, an Indian tribe shall submit to the Administrator an application in such form and containing such information as the Administrator may by regulation require.

(2) Plans.—Each application submitted under paragraph (1) shall include a plan for conducting projects described in section 204(a), which plan shall—

(A) provide evidence that the Indian tribe performs law enforcement functions (as determined by the Secretary of the Interior); (B) identify the juvenile justice and delinquency problems and juvenile delinquency prevention needs to be addressed by activities conducted by the Indian tribe in the area under title II of the Indian tribe with assistance provided by the grant; (C) provide for fiscal control and accounting procedures that—

(i) are necessary to ensure the prudent use, proper disbursement, and accounting of funds received under this section; and
(ii) are consistent with the requirements of subparagraph (B).

(D) comply with the requirements of section 222(a) (except that such subsection relates to consultation with a State advisory group) and with the requirements of section 222(c); and
(E) contain such other information, and be subject to such additional requirements, as the Administrator may reasonably prescribe to ensure the effectiveness of the grant program under this section.

(c) FACTORS FOR CONSIDERATION.—In awarding grants under this section, the Administrator shall consider—

(1) the resources that are available to each applicant that will assist, and be coordinated with, the tribal juvenile justice system of the Indian tribe; and
(2) for each Indian tribe that receives assistance under such a grant—

(A) the reliability of the population; and
(B) who will be served by the assistance provided by the grant.

(d) GRANT AWARDS.—

(1) IN GENERAL.—

(A) COMPETITIVE AWARDS.—Except as provided in paragraph (2), the Administrator shall—

(i) annually award grants under this section on a competitive basis; and
(ii) enter into a grant agreement with each grant recipient under this section that specifies the terms and conditions of the grant.

(B) PERIOD OF GRANT.—The period of each grant awarded under this section shall be 2 years.

(2) EXCEPTION.—In any case in which the Administrator determines that a grant recipient under this section has performed satisfactorily in the preceding year in accordance with an applicable grant agreement, the Administrator may—

(A) waive the requirement that the recipient be subject to the competitive award process described in paragraph (1)(A); and
(B) renew the grant for an additional grant period (as specified in paragraph (1)(B)).

(3) MODIFICATIONS OF PROCESSES.—The Administrator may prescribe requirements to provide for appropriate modifications to the application and approval process specified in subsection (b) for an application for a renewal grant under paragraph (2)(B).

(e) REPORTING REQUIREMENT.—Each Indian tribe that receives a grant under this section shall be subject to the fiscal accountability provisions of section 5(f)(1) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450c), relating to the submission of a single-agency audit report required by chapter 75 of title 31, United States Code.

(f) MATCHING REQUIREMENT.—Funds appropriated by Congress for the activities of any agency of an Indian tribal government for the development of law enforcement functions on any Indian lands may be used to provide the non-Federal share of any program or project with a matching requirement funded under this section.

SEC. 206. ALLOCATION OF GRANTS.

(a) IN GENERAL.—Subject to subsections (b), (c), and (d), the amount allocated under section 261 to carry out section 264 in each fiscal year shall be allocated to the States as follows:

(1) The amount allocated to any State shall not be less than $200,000.
(2) Not less than 75 percent of the funds made available under Part A of this title shall be used to carry out section 265.

(b) RESERVATION OF FUNDS.—Notwithstanding any other provision of law, from the amounts allocated under section 261 to carry out section 264 and part B in each fiscal year the Administrator shall reserve an amount equal to the amount which all Indian tribes that qualify for a grant under section 235 would collectively be entitled, if such tribes were collectively treated as a State for purposes of subsection (a).

(c) EXCEPTION.—The amount allocated to the Commonwealth of the Northern Mariana Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Marianas Islands shall be less than $75,000 and not more than $100,000.

(d) ADMINISTRATIVE COSTS.—A State, unit of local government, or eligible unit that receives funds under this part may not use more than 5 percent of those funds for administrative costs.

PART B—FEDERAL ASSISTANCE FOR STATE AND LOCAL PROGRAMS

SEC. 221. AUTHORITY TO MAKE GRANTS AND CONTRACTS.

(a) IN GENERAL.—The Administrator may make grants and contracts for the development of more effective education, training, research, prevention, diversion, treatment, and rehabilitation programs that are designed to reduce juvenile delinquency and programs to improve the juvenile justice system.

(b) TRAINING AND TECHNICAL ASSISTANCE.

(1) IN GENERAL.—With not to exceed 2 percent of the funds available in a fiscal year to carry out this part, the Administrator shall make grants to and contracts with public and private agencies, organizations, and individuals to provide training...
with State plan requirements.

(c) ANNUAL REPORTS.—The State shall

submit annual performance reports to the

Administrator, each of which shall describe

progress in implementing programs con-

tained in the original State plan, and amend-

ments necessary to update the State plan,

and shall describe the status of compliance

with State plan requirements—

(d) CONTENTS OF PLAN.—In accordance

with regulations that the Administrator shall

prescribe, a State plan shall—

''(1) designate a State agency as the sole

agency for supervising the preparation and

administration of the State plan;

''(2) contain satisfactory evidence that the

State has developed and implemented in accordance with paragraph (1) has or will have authority, by

legislation if necessary, to implement the

State plan in conformity with this part;

''(3) provide for the active consultation

with and participation of units of local gov-

ernment in the development of a State plan that

adequately takes into account the needs

and requests of units of local government,

except that nothing in the State plan re-

quirements, or any regulations promulgated to

carry out such requirements, shall be con-

strued to prohibit or impede the State from

making grants to, or entering into contracts

with, local private agencies, including reli-

gious organizations;

''(4) to the extent feasible and consistent

with paragraph (5), provide for an equitable

distribution of the assistance received with the

State, including rural areas;

''(5) require that the State or unit of local

government that is a recipient of amounts

under this part distribute the amounts in-

tended to be used for the prevention of juve-

nile delinquency and delinquency programs that

create new learning situations; and

''(6) that may prescribe the complete treat-

ment of the juveniles and the preservation of

their families;
(O) programs that utilize multidisciplinary, multi-agency, case management and information sharing, that enable the juvenile justice and law enforcement agencies, schools, and social service agencies to make more informed decisions regarding early identification, case control, supervision, and treatment of juveniles who repeatedly commit violent or serious delinquent acts; 

(P) programs designed to prevent and reduce hate crimes committed by juveniles; 

(Q) court supervised initiatives that address the illegal possession of firearms by juveniles; 

(B) programs for positive youth development that provide delinquent youth and youth at-risk of delinquency with—

(i) an ongoing relationship with a caring adult (such as a mentor, tutor, coach, or shelter youth worker); 

(ii) safe places and structured activities during nonschool hours; 

(iii) a healthy start; 

(iv) a marketable skill through effective education; and 

(v) an opportunity to give back through community service; 

(S) programs and projects that provide comprehensive post-placement services that help juveniles successfully transition back into the community, including mental health services, substance abuse treatment, counseling, education, and employment training; 

(T) programs and services designed to identify and address the health and mental health needs of youth; and 

(U) programs that have been proven to be successful in preventing delinquency, such as Multi-Systemic Therapy, Multi-Dimensional Treatment Foster Care, Functional Family Therapy, and the Bullying Prevention Program.

(ii) provide that—

(A) a juvenile who is charged with or who has committed an offense that would not be criminal if committed by an adult shall not be placed in a secure detention facility or secure correctional facility unless the juvenile

(i) was charged with or committed a violation of section 922(x)(2) of title 18, United States Code, or of a similar State law; or

(ii) was charged with or committed a violation of a valid court order; or

(iii) was held in accordance with the Interstate Compact on Juveniles as enacted by the State; and

(B) a juvenile shall not be placed in a secure detention facility or secure correctional facility if the juvenile

(i) was not charged with any offense; and

(ii) is—

(i) an alien; or

(ii) alleged to be dependent, neglected, or abused.

(ii) provide that—

(A) a juvenile who is alleged to be or found to be delinquent or a juvenile who is described in paragraph (i) will not be detained or confined in any institution in which prohibited physical contact or sustained oral and visual contact with an adult inmate occurs; and

(B) there is in effect in the State a policy that requires an individual who works with both juveniles and adult inmates, including in correctional facilities to be trained and certified to work with juveniles;

(iii) provide that no juvenile shall be detained or confined in any jail or lockup for a period not to exceed 6 hours—

(i) for processing or release; 

(ii) while awaiting transfer to a juvenile facility; or 

(iii) in which period such juveniles make a court appearance; 

(B) juveniles who—

(i) are accused of nonstatus offenses; 

(ii) are awaiting an initial court appearance that will occur within 48 hours after being taken into custody (excluding Saturdays, Sundays, and legal holidays); and

(iii) are accused of committing a status offense that will occur within 48 hours after being taken into custody (excluding Saturdays, Sundays, and legal holidays) so that a brief (not to exceed an additional 48 hours) delay is excusable; or

(C) that within 48 hours of the juvenile being taken into custody, an authorized representative of the public agency shall interview the juvenile in person; and

(D) that the appropriate representative of the public agency shall interview the juvenile in person; and

(E) provide that if a juvenile is taken into custody for violating a valid court order issued for committing a status offense—

(A) an appropriate public agency shall be promptly notified that the juvenile is being taken into custody for violating the court order; 

(B) that within 24 hours of the juvenile being taken into custody, an authorized representative of the public agency shall interview the juvenile in person; and

(C) that within 48 hours of the juvenile being taken into custody—

(i) the authorized representative shall submit an assessment regarding the immediate needs of the juvenile to the court that issued the order; and

(ii) the court shall conduct a hearing to determine—

(I) whether there is reasonable cause to believe that the juvenile violated the order; and

(II) the appropriate placement of the juvenile pending disposition of the alleged violation;

(iii) specify a percentage, if any, of funds received by the State under section 221 that the State shall reserve for expenditure by the State to provide incentive grants to units of local government to reduce the case load of probation officers within those units;

(iv) provide that the State, to the maximum extent practicable, shall implement a system to ensure that if a juvenile is before a court in the juvenile justice system, public child welfare records (including child protective services records) relating to that juvenile that are on file in the geographical area under the jurisdiction of that court will be made known to that court;

(v) unless the provisions of this paragraph are waived at the discretion of the Administrator for any State in which the services are inconsistent with the State plan, except that direct funding of any local private agency by a State shall be permitted only if the local private agency requests direct funding and the agency has applied for and been denied funding by a unit of general local government;
(24) provide for the establishment of youth centers, schools, or those jurisdictions known as 'juvenile justice centers' in school districts in the State to promote zero tolerance policies with respect to misdemeanor offenses, acts of juvenile delinquency, and other antisocial behavior occurring on school property, including truancy, vandalism, underage drinking, and underage tobacco use;

(25) provide for projects to coordinate the delivery of adolescent mental health and substance abuse services to children at risk by coordinating councils composed of public and private service providers;

(26) provide assurances that—

(A) any assistance provided under this title will not impair an existing collective bargaining relationship, contract for services, or collective bargaining agreement; and

(B) any assistance provided under this title would be inconsistent with the terms of a collective bargaining agreement shall not be undertaken without the written concurrence of the labor organization(s) with which the State was in a labor relationship, contract for services, or collective bargaining agreement; and

(27) address efforts to reduce the proportion of juveniles detained or confined in secure detention facilities, secure correctional facilities, jails, and lockups who are members of minority groups, if such proportion exceeds the proportion such groups represent in the general population.

(a) IN GENERAL.—Subject to subsections (b), (c), and (d), of the amount allocated under section 261 to carry out this part in each fiscal year that remains after reservation under section 260(b) for that fiscal year—

(1) no State shall be allocated less than $750,000; and

(2) the amount remaining after the allocation under paragraph (1) shall be allocated proportionately based on the juvenile population in the eligible States.

(1) FAMILY AND COMMUNITY GRANTS.—The State Advisory Group shall—

(i) provide for the establishment of—

(A) centers that provide treatment to juveniles who are or may become members of gangs so that such youth would otherwise seek to have met counseling, including a provision of life skills training and preparation for living independently, which shall include cooperation with educational services, welfare, and health care programs;

(ii) education, recreation, and social services designed to address the social and developmental needs of juveniles; and

(iii) activities that involve families and community groups to work closely with parents, schools, law enforcement, and other public and private agencies in the community; and

(2) direct grant awards and other support to develop, test, and demonstrate new approaches to improving the juvenile justice system and reducing, preventing, and abating delinquent behavior, juvenile crime, and youth violence;

(3) for research and evaluation efforts to discover and test methods and practices to improve the juvenile justice system and reduce, prevent, and abate delinquent behavior, juvenile crime, and youth violence; and

(4) information, including information on best practices with the purposes authorized under sections 203, 204, and 221;

(iv) an organization of neighborhood and community-based organizations to work closely with parents, schools, law enforcement, and other public and private agencies in the community; and

(v) training and assistance to adults who have significant relationships with juveniles who are or may become members of gangs so that they may provide constructive alternatives to participating in the activities of gangs.

(2) direct grant awards and other support to develop, test, and demonstrate new approaches to improving the juvenile justice system and reducing, preventing, and abating delinquent behavior, juvenile crime, and youth violence;

(3) for research and evaluation efforts to discover and test methods and practices to improve the juvenile justice system and reduce, prevent, and abate delinquent behavior, juvenile crime, and youth violence; and

(4) information, including information on best practices with the purposes authorized under sections 203, 204, and 221;

(c) EXCEPTION.—The amount allocated to the Virgin Islands of the United States, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Micronesian Federated States, the Commonwealth of the Northern Mariana Islands shall be not less than $75,000 and not more than $100,000.

(d) ADMINISTRATIVE COSTS.—A State, unit of government, or eligible unit that receives funds under this part may not use more than 5 percent of those funds to pay for administrative costs.
(B) expand the availability of prevention and treatment services relating to the illegal use of controlled substances and controlled substance analogues (as defined in paragraphs (6) and (32) of section 102 of the Controlled Substances Act (21 U.S.C. 802)); by juvenile justice agencies that—

(A) provide services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity;

(B) provide services authorized in this section and comment on the application and to summarize the responses of that State planning agency to the request; and

(C) support activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.

(2) RESEARCH AND EVALUATION.—From not more than 15 percent of the total amount appropriated to carry out this part in each fiscal year, the Administrator may make grants to and enter into contracts with public agencies and private nonprofit agencies, organizations, and institutions to carry out evaluations, including technology transfer, to disseminate information on research and on effective programs and activities funded under paragraph (1); and

(C) to increase the knowledge of the public (including public and private agencies that operate in order to operate gang prevention and intervention programs) by disseminating information on research and on effective programs and activities funded under paragraph (1);

(3) APPROVAL OF APPLICATIONS.—

(a) IN GENERAL.—Any agency, organization, or institution that seeks to receive a grant or a contract under this section shall submit an application at such time, in such manner, and containing such information as the Administrator may prescribe.

(A) set forth a program or activity for carrying out 1 or more of the purposes specified in subsection (a), and specifically identify the public agencies and private nonprofit agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the program or activity;

(B) to develop regional task forces involving State, local, and community-based organizations to coordinate the disruption of gangs and the prosecution of juvenile gang members and to curtail interstate activities of gangs;

(C) to facilitate coordination and cooperation among—

(a) local education, juvenile justice, employment, recreation, and social service agencies; and

(b) community-based programs with a proven record of effectively providing intervention services to juvenile gang members for the purpose of reducing the participation of juveniles in illegal gang activities; and

(4) to support programs that, in recognition of varying degrees of the seriousness of delinquency behavior and the corresponding gradations in the responses of the juvenile justice system in response to that behavior, are designed to—

(A) encourage courts to develop and implement a continuum of post-adjudication restraints that bridge the gap between traditional probation and confinement in a correctional setting (including expanded use of probation, mediation, restitution, community service, treatment, home detention, intensive supervision, electronic monitoring, and secure community-based treatment facilities linked to other support services such as health, mental health, remedial and special education, job training, and recreation); and

(B) assist in the provision by the Administrator of information and technical assistance to States, in the design and utilization of risk assessment mechanisms to aid juvenile justice personnel in determining appropriate sanctions for delinquent behavior.

(4) ELIGIBLE PROGRAMS AND ACTIVITIES.—Programs and activities for which grants and contracts are to be made under this section may include—

(A) the hiring of additional State and local prosecutors, and the establishment and operation of programs, including multi-jurisdictional task forces, for the disruption of gangs and the prosecution of gang members;

(B) developing within the juvenile adjudicatory and correctional systems new and innovative means to address the problems of youth who are convicted of serious drug-related and gang-related offenses;

(C) providing treatment to juveniles who are members of gangs, including members who are accused of committing a serious crime and members who have been adjudicated as being delinquent;

(D) the involvement of juveniles in lawful activities in geographical areas in which gangs commit crimes;

(E) expanding the availability of prevention and treatment services relating to the illegal use of controlled substances and controlled substance analogues (as defined in paragraphs (6) and (32) of section 102 of the Controlled Substances Act (21 U.S.C. 802)), by juveniles, provided through State and local health and social services agencies;

(F) providing services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity; or

(G) supporting activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.

(c) APPROVAL OF APPLICATIONS.—

(1) IN GENERAL.—Any agency, organization, or institution that seeks to receive a grant or a contract under this section shall submit an application at such time, in such manner, and containing such information as the Administrator may prescribe.

(2) APPLICATION CONTENTS.—In accordance with guidelines established by the Administrator, each application submitted under paragraph (1) shall—

(A) set forth a program or activity for carrying out 1 or more of the purposes specified in subsection (a), and specifically identify the public agencies and private nonprofit agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the program or activity;

(B) community-based programs with a proven record of effectively providing intervention services to juvenile gang members for the purpose of reducing the participation of juveniles in illegal gang activities; and

(C) to facilitate coordination and cooperation among—

(A) local education, juvenile justice, employment, recreation, and social service agencies; and

(B) community-based programs with a proven record of effectively providing intervention services to juvenile gang members for the purpose of reducing the participation of juveniles in illegal gang activities; and

(4) to support programs that, in recognition of varying degrees of the seriousness of delinquency behavior and the corresponding gradations in the responses of the juvenile justice system in response to that behavior, are designed to—

(A) encourage courts to develop and implement a continuum of post-adjudication restraints that bridge the gap between traditional probation and confinement in a correctional setting (including expanded use of probation, mediation, restitution, community service, treatment, home detention, intensive supervision, electronic monitoring, and secure community-based treatment facilities linked to other support services such as health, mental health, remedial and special education, job training, and recreation); and

(B) assist in the provision by the Administrator of information and technical assistance to States, in the design and utilization of risk assessment mechanisms to aid juvenile justice personnel in determining appropriate sanctions for delinquent behavior.

(4) ELIGIBLE PROGRAMS AND ACTIVITIES.—Programs and activities for which grants and contracts are to be made under this section may include—

(A) the hiring of additional State and local prosecutors, and the establishment and operation of programs, including multi-jurisdictional task forces, for the disruption of gangs and the prosecution of gang members;

(B) developing within the juvenile adjudicatory and correctional systems new and innovative means to address the problems of youth who are convicted of serious drug-related and gang-related offenses;

(C) providing treatment to juveniles who are members of gangs, including members who are accused of committing a serious crime and members who have been adjudicated as being delinquent;

(D) the involvement of juveniles in lawful activities in geographical areas in which gangs commit crimes;

(E) expanding the availability of prevention and treatment services relating to the illegal use of controlled substances and controlled substance analogues (as defined in paragraphs (6) and (32) of section 102 of the Controlled Substances Act (21 U.S.C. 802)), by juveniles, provided through State and local health and social services agencies;

(F) providing services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity; or

(G) supporting activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.

(d) APPROVAL OF APPLICATIONS.—

(1) IN GENERAL.—Any agency, organization, or institution that seeks to receive a grant or a contract under this section shall submit an application at such time, in such manner, and containing such information as the Administrator may prescribe.

(2) APPLICATION CONTENTS.—In accordance with guidelines established by the Administrator, each application submitted under paragraph (1) shall—

(A) set forth a program or activity for carrying out 1 or more of the purposes specified in subsection (a), and specifically identify the public agencies and private nonprofit agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the program or activity;

(B) provide that the program or activity shall be administered by or under the supervision of the applicant;

(C) provide for the proper and efficient administration of the program or activity;

(D) provide for regular evaluation of the program or activity;

(E) provide an assurance that the proposed program or activity will supplement, not supplant, similar programs and activities already available in the community;

(F) describe how the program or activity is coordinated with programs, activities, and services available locally under part B of this title and under chapter 1 of subtitle B of title III of the Anti-Drug Abuse Act of 1988 (42 U.S.C. 11081–11080);

(G) certify that the applicant has requested the State planning agency to review and comment on the application and to summarize the responses of that State planning agency to the request;

(H) provide that regular reports on the program or activity shall be submitted to the Administrator and to the State planning agency;

(I) provide for such fiscal control and fund accounting procedures as may be necessary to ensure prudent use, proper disbursement, and accurate accounting of funds received under this section.
The purposes of this part are to, through the use of mentors for at-risk youth—

(1) reduce juvenile delinquency and gang participation;

(2) improve academic performance; and

(3) reduce the dropout rate.

**SEC. 252. DEFINITIONS.**

In this part—

(1) AT-RISK YOUTH.—The term ‘at-risk youth’ means a youth at risk of educational failure, dropping out of school, or involvement in criminal or delinquent activities.

(2) MENTOR.—The term ‘mentor’ means a person who works with an at-risk youth on a one-to-one basis, provides a positive role model for the youth, and builds a supportive relationship with the youth, and provides the youth with academic assistance and exposure to new experiences and examples of opportunity that enhance the ability of the youth to become a responsible adult.

**SEC. 253. GRANTS.**

(a) LOCAL EDUCATIONAL GRANTS.—The Administrator shall make grants to local education agencies and nonprofit organizations to establish and support programs and activities for the purpose of implementing mentoring programs. To be eligible to receive assistance pursuant to this subsection, an applicant—

(1) are designed to link at-risk children, particularly children living in high crime areas and children experiencing educational failure, with responsible adults such as law enforcement officers, persons working with local businesses, elders in Alaska Native villages, and adults working for community-based organizations and agencies; and

(2) are intended to—

(A) provide general guidance to at-risk youth;

(B) promote personal and social responsibility among at-risk youth;

(C) increase participation by at-risk youth in, and the ability of at-risk youth to benefit from, elementary and secondary education;

(D) discourage the use of illegal drugs, violence, and dangerous weapons by at-risk youth, and discourage other criminal activity;

(E) discourage involvement of at-risk youth in gangs; or

(F) encourage at-risk youth to participate in community service and community activities.

(b) FAMILY-TO-FAMILY MENTORING GRANTS.—

(1) DEFINITIONS.—In this subsection:

(A) FAMILY-TO-FAMILY MENTORING PROGRAM.—The term ‘family-to-family mentoring program’ means a mentoring program that—

(i) utilizes a 2-tier mentoring approach that matches volunteer families with at-risk families allowing parents to work directly with their children; and

(ii) has an after-school program for volunteer and at-risk families.

(B) POSITIVE ALTERNATIVES PROGRAM.—The term ‘positive alternatives program’ means a positive youth development and family-to-family mentoring program that emphasizes drug and gang prevention components.

(C) QUALIFIED POSITIVE ALTERNATIVES PROGRAM.—The term ‘qualified positive alternative program’ means a program that has established a family-to-family mentoring program, as of the date of enactment of the Juvenile Crime Prevention and Control Act of 2001.

(2) AUTHORITY.—The Administrator shall make and enter into contracts with a qualified positive alternative program.

**SEC. 254. REGULATIONS AND GUIDELINES.**

(a) PROGRAM GUIDELINES.—To implement this part, the Administrator shall issue program guidelines which shall be effective only after a period for public notice and comment.

(b) MODEL SCREENING GUIDELINES.—The Administrator shall develop and distribute to program participants specific model guidelines for the screening of prospective program mentors.

**SEC. 255. USE OF GRANTS.**

(a) PERMITTED USES.—Grants awarded under this part shall be used to implement mentoring programs, including—

(1) the hiring of mentoring coordinators and support staff;

(2) the recruitment, screening, and training of adult mentors;

(3) the reimbursement of mentors for reasonable incidental expenditures, such as transportation, that are directly associated with mentoring; and

(4) such other purposes as the Administrator may reasonably prescribe by regulation.

(b) PROHIBITED USES.—Grants awarded pursuant to this part shall not be used—

(1) as direct support of any kind; or

(2) for any other purpose reasonably prohibited by the Administrator by regulation.

**SEC. 256. PRIORITY.**

(a) IN GENERAL.—In making grants under this part, the Administrator shall give priority for awarding grants to applicants that—

(1) serve at-risk youth in high crime areas;

(2) have 60 percent or more of the youth eligible to receive funds under the Elementary and Secondary Education Act of 1965; and

(3) have a considerable number of youths who drop out of school each year.

(b) OTHER CONSIDERATIONS.—In making grants under this part, the Administrator shall give consideration to—

(1) the geographic distribution (urban and rural) of applications;

(2) the quality of a mentoring plan, including—

(A) the resources, if any, that will be dedicated to providing participating youth with opportunities for job training or post-secondary education; and

(B) the degree to which parents, teachers, community-based organizations, and the local community participate in the design and implementation of the mentoring plan; and

(3) the capability of the applicant to effectively implement the mentoring plan.

**SEC. 257. APPLICATIONS.**

An application for assistance under this part shall include—

(1) information on the youth expected to be served by the program;

(2) a provision for a mechanism for matching youth with mentors based on the needs of the youth;

(3) an assurance that no mentor or mentoring family will be assigned a number of youths that would undermine the ability of the mentor to be an effective mentor and ensure a one-to-one relationship with mentored youths;

(4) an assurance that projects operated in secondary schools will provide the youth with a variety of experiences and support, including—
risk youth.

Congressional Record—Senate
July 11, 2001

12930

‘‘(6) establishing and maintaining training programs, law enforcement, and other court personnel with respect to preventing and controlling juvenile crime;

‘‘(7) establishing juvenile gun courts for the prosecution and adjudication of juvenile firearm offenses;

‘‘(8) establishing drug court programs for juvenile offenders that provide continuing judicial supervision over juvenile offenders with substance abuse problems and the integrated administration of other sanctions and services for such offenders;

‘‘(9) maintaining a system of juvenile records designed to promote public safety;

‘‘(10) establishing and maintaining interagency information-sharing programs that enable the juvenile and criminal justice system, schools, and social services agencies to make more informed decisions regarding the early identification, control, supervision, and treatment of juveniles who repeatedly commit serious delinquent or criminal acts;

‘‘(11) establishing and maintaining accountability-based programs designed to reduce recidivism among juveniles who are referred by law enforcement personnel or agencies;

‘‘(12) establishing and maintaining programs to conduct risk and need assessments of juvenile offenders and provide for a system of graduated sanctions described in subsection (c);

‘‘(13) establishing and maintaining accountable-based programs that are designed to enhance school safety;

‘‘(14) establishing and maintaining restorative justice programs;

‘‘(15) establishing and maintaining programs to enable juvenile courts and juvenile probation officers to be more effective and efficient in holding juvenile offenders accountable and reducing recidivism; and

‘‘(16) hiring detention and corrections personnel, and establishing and maintaining training by such personnel to improve facility practices and programming.

(c) DEFINITION.—In this section the term ‘restorative justice program’ means—

‘‘(1) a program that emphasizes the moral accountability of an offender toward the victim and the affected community; and

‘‘(2) may include community reparations boards, restitution (in the form of monetary payments or service to the victim or, where no victim can be identified, service to the affected community), and mediation between victim and offender.

SEC. 1802. GRANT ELIGIBILITY.

(a) STATE ELIGIBILITY.—To be eligible to receive a grant under this part, a State shall submit to the Attorney General an application at such time, in such form, and containing such assurances and information as the Attorney General may require by guidelines, including—

‘‘(1) information about—

‘‘(A) the activities proposed to be carried out with such grant; and

‘‘(B) the criteria by which the State proposes to assess the effectiveness of such activities on achieving the purposes of this part;

‘‘(2) assurances that the State and any unit of local government to which the State provides funding under section 1803(b), has in effect (or shall have in effect, not later than 1 year after the date that the State submits such application) laws, or has implemented (or shall implement, not later than 1 year after the date that the unit submits such application) laws, or has implemented policies and programs that provide for a system of graduated sanctions described in subsection (c).

(b) LOCAL ELIGIBILITY.—To be eligible to receive a subgrant, a unit of local government shall—

‘‘(1) establish and maintain—

‘‘(I) a local injection system to provide for juvenile courts and juvenile probation officers with substance abuse problems and the integrated administration of other sanctions and services for such offenders;

‘‘(II) a system of graduated sanctions to enable juvenile courts and juvenile probation officers to be more effective and efficient in holding juvenile offenders accountable and reducing recidivism; and

‘‘(III) a system of graduated sanctions that are de-

‘‘(2) conduct risk and need assessments of such offenders;

‘‘(3) the criteria by which the unit proposes to manage and monitor the provision of such services for such offenders;

‘‘(4) the criteria by which the unit proposes to achieve the purposes of this part; and

‘‘(5) the criteria by which the unit proposes to manage and monitor the provision of such services for such offenders;

‘‘(6) maintain a system of juvenile records designed to promote public safety;

‘‘(7) establish and maintain program to conduct risk and need assessments of such offenders and provide for a system of graduated sanctions described in subsection (c);

‘‘(8) establish and maintain accountability-based programs designed to reduce recidivism among juveniles who are referred by law enforcement personnel or agencies;

‘‘(9) establish and maintain programs that enable juvenile and criminal justice system, schools, and social services agencies to make more informed decisions regarding the early identification, control, supervision, and treatment of juveniles who repeatedly commit serious delinquent or criminal acts;

‘‘(10) establish and maintain interagency information-sharing programs that enable the juvenile and criminal justice system, schools, and social services agencies to make more informed decisions regarding the early identification, control, supervision, and treatment of juveniles who repeatedly commit serious delinquent or criminal acts; and

‘‘(11) establish and maintain program to conduct risk and need assessments of such offenders and provide for a system of graduated sanctions described in subsection (c).

(c) SPECIAL RULE.—The requirements of paragraph (1) shall apply to a specially qualified unit that receives funds from the Attorney General under section 1803(e), except that information that is otherwise required to be submitted to the Attorney General shall be submitted to the Attorney General.

(d) GRADUATED SANCTIONS.—A system of graduated sanctions, which may be discretionary as provided in subsection (d), shall ensure, at a minimum, that—

‘‘(1) sanctions are imposed on a juvenile offender for each delinquent offense;

‘‘(2) sanctions escalate in intensity with each subsequent, more serious delinquent offense;

‘‘(3) there is sufficient flexibility to allow for individualized sanctions and services suited to the individual juvenile offender; and

‘‘(4) appropriate consideration is given to public safety and victims of crime.

(e) DISCRETIONARY USE OF SANCTIONS.—

‘‘(1) IN GENERAL.—Except as provided in paragraph (2), each State which receives funds under paragraph (1) shall equal the percentage determined by subtracting the State percentage from 100 percent, if a State submits an annual report that explains why such court did not impose graduated sanctions.

‘‘(2) REPORTING REQUIREMENT IF GRADUATED SANCTIONS NOT USED.—

‘‘(A) IN GENERAL.—A State or unit of local government in which the imposition of graduated sanctions is discretionary shall require each juvenile court within its jurisdiction—

‘‘(i) which has not implemented a system of graduated sanctions, to submit an annual report that explains why such court did not impose graduated sanctions; and

‘‘(ii) which has implemented a system of graduated sanctions but has not imposed graduated sanctions in all cases, to submit an annual report that explains why such court did not impose graduated sanctions in all cases.

‘‘(B) UNITS OF LOCAL GOVERNMENT.—Each unit of local government, other than a specially qualified unit which such data is available bears to the amount of remaining funds described in this section.

‘‘(3) the Attorney General shall allocate—

‘‘(II) the average juvenile justice expenditures by the State and its eligible units of local government to each grantee.

‘‘(II) the percentage from 100 percent, if a State submits an annual report that explains why such court did not impose graduated sanctions.

‘‘(II) the criteria by which the unit proposes to achieve the purposes of this part; and

‘‘(II) the average juvenile justice expenditures by the State and its eligible units of local government to each grantee.

‘‘(II) the percentage from 100 percent, if a State submits an annual report that explains why such court did not impose graduated sanctions.

‘‘(II) the average juvenile justice expenditures by the State and its eligible units of local government to each grantee.

‘‘(II) the percentage from 100 percent, if a State submits an annual report that explains why such court did not impose graduated sanctions.

‘‘(II) the average juvenile justice expenditures by the State and its eligible units of local government to each grantee.

‘‘(II) the percentage from 100 percent, if a State submits an annual report that explains why such court did not impose graduated sanctions.

‘‘(II) the average juvenile justice expenditures by the State and its eligible units of local government to each grantee.

‘‘(II) the percentage from 100 percent, if a State submits an annual report that explains why such court did not impose graduated sanctions.
the 3 most recent calendar years for which such data is available, as the case may be.

(ii) the product of—

(I) one-quarter; multiplied by

(II) the average annual number of part 1 violent crimes in such unit of local government that are not affected by such operation in accordance with this subsection.

(c) Unavailability of Data for Units of Local Government.—If the State has reason to believe that the reported rate of part 1 violent crimes or juvenile justice expenditures for a unit of local government is insufficient or inaccurate, the State shall—

(1) in consultation with the methodology used by the unit to determine the accuracy of the submitted data; and

(2) if necessary, use the best available comparable data, regardless of the number of part 1 violent crimes or juvenile justice expenditures for the relevant years for the unit of local government.

(d) Local Government With Allocations Less Than $10,000.—If under this section a unit of local government that receives funds under this part may not exceed 90 percent of the total program costs.

(e) Direct Grants to Specially Qualified Units.—The Attorney General shall establish and convene an advisory board to review the proposed use of funds made available under this part.

(f) Awards for Construction.—The Attorney General may award, any amount that is not expended by such State or unit.

(g) Penalty for Failure to Pay.—If the amount required to be repaid is not repaid, the Attorney General shall reduce payment in future payment periods accordingly.

(h) Non-Supplanting Requirement.—Funds made available under this part may not use more than 5 percent of such funds to pay for administrative costs.

(i) Construction of Facilities.—Notwithstanding paragraph (1), with respect to the cost of constructing juvenile detention or correctional facilities, the Federal share of a grant received under this part may not exceed 50 percent of approved costs.

(j) Utilization of Private Sector.—Funds or a portion of funds allocated under this part may be used by a State or unit of local government that receives funds under this part may use not more than 5 percent of such funds to pay for administrative costs.

(k) Construction of Facilities.—Notwithstanding paragraph (1), with respect to the cost of constructing juvenile detention or correctional facilities, the Federal share of a grant received under this part may not exceed 50 percent of approved costs.

(l) Utilization of Private Sector.—Funds or a portion of funds allocated under this part may be used by a State or unit of local government that receives funds under this part may use not more than 5 percent of such funds to pay for administrative costs.

(m) Construction of Facilities.—Notwithstanding paragraph (1), with respect to the cost of constructing juvenile detention or correctional facilities, the Federal share of a grant received under this part may not exceed 50 percent of approved costs.

(n) Utilization of Private Sector.—Funds or a portion of funds allocated under this part may be used by a State or unit of local government that receives funds under this part may use not more than 5 percent of such funds to pay for administrative costs.
under this part only in accordance with section 1801(b) of 2000, June 30, 2000.

"(3) STATE.—The term 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands, except that American Samoa, Guam, and the Northern Mariana Islands shall be considered as 1 State and that, for purposes of section 1801(a), 33 percent of the amounts allocated shall be allocated to American Samoa, Guam, and 17 percent to the Northern Mariana Islands.

"(4) JUVENILE.—The term 'juvenile' means an individual who is 17 years of age or younger.

"(5) JUVENILE JUSTICE EXPENDITURES.—The terms 'juvenile justice expenditures' means expenditures in connection with the juvenile justice system, including expenditures in connection with such system to carry out—

"(A) activities specified in section 1801(b); and

"(B) other activities associated with prosecution, services and corrections as reported to the Bureau of the Census for the fiscal year preceding the fiscal year for which a determination is made under this part.

"(6) PART 1 VIOLENT CRIMES.—The term 'part 1 violent crimes' means murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault as reported to the Federal Bureau of Investigation for purposes of the Uniform Crime Reports.

SEC. 1810. AUTHORIZATION OF APPROPRIATIONS.

"(a) OVERSIGHT ACCOUNTABILITY AND ADMINISTRATION.—

"(1) IN GENERAL.—Of the amount authorized to be appropriated under section 261 of this title, that is available to the Attorney General, for each of the fiscal years 2002 through 2007, as applicable, there shall be made available to the Attorney General for research, evaluation, and demonstration consistent with this part;

"(2) with respect to fiscal year 2002—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,025,000,000 in new budget authority and $6,169,000,000 in outlays;

"(3) with respect to fiscal year 2003—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,020,000,000 in outlays;

"(4) with respect to fiscal year 2004—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $5,759,000,000 in outlays;

"(5) with respect to fiscal year 2005—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,458,000,000 in outlays;

"(6) with respect to fiscal year 2006—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,316,000,000 in outlays;

"(7) with respect to fiscal year 2007—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,020,000,000 in outlays;

"(8) with respect to fiscal year 2008—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $5,759,000,000 in outlays;

SEC. 301002. DISCRETIONARY LIMITS.

"For the purposes of allocations made for the discretionary category pursuant to section 302(a) of the Congressional Budget Act of 1974 (2 U.S.C. 653(a)), the discretionary spending limit means—

"(1) not more than 2 percent of that amount necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(2) for the violent crime reduction category: $6,025,000,000 in new budget authority and $5,759,000,000 in outlays;

"(3) with respect to fiscal year 2003—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $5,759,000,000 in outlays;

"(4) with respect to fiscal year 2004—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,458,000,000 in outlays;

"(5) with respect to fiscal year 2005—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,316,000,000 in outlays;

"(6) with respect to fiscal year 2006—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,020,000,000 in outlays;

"(7) with respect to fiscal year 2007—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,020,000,000 in outlays;

"(8) with respect to fiscal year 2008—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $5,759,000,000 in outlays;

SEC. 301003. DISCRETIONARY LIMITS.

"For the purposes of allocations made for the discretionary category pursuant to section 302(a) of the Congressional Budget Act of 1974 (2 U.S.C. 653(a)), the discretionary spending limit means—

"(1) not more than 2 percent of that amount necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(2) for the violent crime reduction category: $6,025,000,000 in new budget authority and $5,759,000,000 in outlays;

"(3) with respect to fiscal year 2003—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,458,000,000 in outlays;

"(4) with respect to fiscal year 2004—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,316,000,000 in outlays;

"(5) with respect to fiscal year 2005—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(7) with respect to fiscal year 2007—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;

"(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $5,759,000,000 in outlays;

"(8) with respect to fiscal year 2008—

"(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Attorney General;
(A) at which 50 or more firearms are offered for sale, transfer, or exchange, if 1 or more of the firearms has been shipped or transported in, or otherwise affected, interstate or foreign commerce; and

(B) at which—

(i) more than 20 percent of the exhibitors are firearm exhibitors; and

(ii) there are not less than 10 firearm exhibitors;

(iii) 50 or more firearms are offered for sale, transfer, or exchange.

(36) GUN SHOW PROMOTER.—The term ‘gun show promoter’ means any person who organizes, plans, promotes, or operates a gun show.

(37) GUN SHOW VENDOR.—The term ‘gun show vendor’ means any person who exhibits, sells, offers for sale, transfers, or exchanges 1 or more firearms at a gun show, regardless of whether or not the person arranges with the gun show promoter for a fixed location from which to exhibit, sell, offer for sale, transfer, or exchange 1 or more firearms.

(b) REGULATION OF FIREARMS TRANSFERS AT GUN SHOWS.

(1) IN GENERAL.—Chapter 44 of title 18, United States Code, is amended by adding at the end the following:

"§931 Transfers of firearms at gun shows

(a) Registration of gun show promoters.—It shall be unlawful for any person to organize, plan, promote, or operate a gun show unless that person—

(1) registers with the Secretary in accordance with regulations promulgated by the Secretary; and

(2) pays a registration fee, in an amount determined by the Secretary.

(b) Responsibilities of gun show promoters.—It shall be unlawful for any person to organize, plan, promote, or operate a gun show unless that person—

(1) before commencement of the gun show, verifies the identity of each gun show vendor participating in the gun show by examining a valid identification document (as defined in section 102(d)(1) of the vendor consistent with the fixed location of the gun show); and

(2) before commencement of the gun show, requires each gun show vendor to sign—

(A) a ledger with identifying information concerning the vendor; and

(B) a notice advising the vendor of the obligations of the vendor under this chapter; and

(3) notifies each person who attends the gun show of the requirements of this chapter, in accordance with such regulations as the Secretary may prescribe; and

(4) maintains a copy of the records described in paragraphs (1) and (2) at the permanent place of business of the gun show promoter for such period of time and in such form as the Secretary shall require by regulation.

(c) Responsibilities of transferees other than licensees.—

(1) IN GENERAL.—If any part of a firearm transaction takes place at a gun show, it shall be unlawful for any person who is not licensed under this chapter to receive a firearm from another person who is not licensed under this chapter, unless the firearm is transferred through a licensed importer, licensed manufacturer, or licensed dealer to the designated transferee.

(2) Criminal background checks.—A person who is subject to the requirements of paragraph (1) shall not transfer the firearm to the transferee unless that person—

(A) is a licensed importer, licensed manufacturer, or licensed dealer through which the transfer is made under subsection (e); or

(B) notwithstanding subparagraph (A), shall not transfer the firearm to the transferee if the transferee is not a licensed importer, licensed manufacturer, or licensed dealer through which the transfer is made under subsection (e); and

(3) Absence of recordkeeping requirements.—Nothing in this section shall permit or authorize the Secretary to impose recordkeeping requirements on any nonlicensed vendor.

(d) Responsibilities of transferees other than licensees.—

(1) IN GENERAL.—If any part of a firearm transaction takes place at a gun show, it shall be unlawful for any person who is not licensed under this chapter to receive a firearm from another person who is not licensed under this chapter, unless the firearm is transferred through a licensed importer, licensed manufacturer, or licensed dealer to the designated transferee in accordance with subsection (e). The term 'transferee' means any person who receives a firearm from another person who is not licensed under this chapter.

(2) Criminal background checks.—A person who is subject to the requirements of paragraph (1) shall not receive the firearm from the transferee until the licensed importer, licensed manufacturer, or licensed dealer through which the firearm is transferred makes the notification described in subsection (e).

(e) Responsibilities of licensees.—A licensed importer, licensed manufacturer, or licensed dealer who agrees to assist a person under section 931(a); and

(f) Records of licensee transfers.—If any part of a firearm transaction takes place at a gun show, each licensed importer, licensed manufacturer, or licensed dealer who transfers 1 or more firearms to a person who is not licensed under this chapter shall, not later than 10 days after the date on which the transfer occurs, submit to the Secretary a report of the transfer, which report shall—

(i) be in a form specified by the Secretary; and

(ii) be required to include the name and address of the transferee, and the date of the transfer or exchange of the firearm.

(g) FIREARM TRANSACTION DEFINED.—In this section, the term 'firearm transaction'—

(1) includes the offer for sale, sale, transfer, or exchange of a firearm; and

(2) does not include the mere exhibition of a firearm.

(2) PENALTIES.—Section 924(a) of title 18, United States Code, is amended by adding at the end the following:

"(A) Whoever knowingly violates section 931(a) shall be fined under this title, imprisoned not more than 2 years, or both; and

(B) Whoever knowingly violates subsection (b) or (c) of section 931, shall be—

(i) fined under this title, imprisoned not more than 5 years, or both; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both; and

(C) Whoever willfully violates section 931(d), shall be—

(i) fined under this title, imprisoned not more than 2 years, or both; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both.

(E) In addition to any other penalties imposed under this paragraph, the Secretary may, with respect to any person who knowingly violates any provision of section 931—

(i) if the person is registered pursuant to section 921(a), after notice and opportunity for a hearing, suspend such registration for more than 6 months or revoke the registration of that person under section 921(a); and

"(B) Whenever knowingly violates section 931(b) or (2) of section 931 shall be—

(i) fined under this title, imprisoned not more than 5 years, or both; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both.

(E) In addition to any other penalties imposed under this paragraph, the Secretary may—

(1) if the person is registered pursuant to section 921(a), after notice and opportunity for a hearing, suspend such registration for more than 6 months or revoke the registration of that person under section 921(a); and

"(D) Whoever knowingly violates subsection (e) or (2) of section 931 shall be—

(i) fined under this title, imprisoned not more than 5 years, or both; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both.

(F) In addition to any other penalties imposed under subsection (b), the Secretary may—

(1) if the person is registered pursuant to section 921(a), after notice and opportunity for a hearing, suspend such registration for more than 6 months or revoke the registration of that person under section 921(a); and

"(2) if the person is a licensed importer, licensed manufacturer, or licensed dealer assists a person other than a licensee in securing, at 1 time or during any 5 consecutive business days, 2 or more pistols for nonlicensees, or any combination of pistols and revolvers totaling 2 or more, to the same nonlicensed persons, in addition to the reports required under paragraph (4), prepare a report of the multiple transfers, which report shall be—

(i) prepared on a form specified by the Secretary; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both.

(G) In addition to any other penalties imposed under this paragraph, the Secretary may—

(1) if the person is registered pursuant to section 921(a), after notice and opportunity for a hearing, suspend such registration for more than 6 months or revoke the registration of that person under section 921(a); and

"(2) if the person is a licensed importer, licensed manufacturer, or licensed dealer assists a person other than a licensee in securing, at 1 time or during any 5 consecutive business days, 2 or more pistols for nonlicensees, or any combination of pistols and revolvers totaling 2 or more, to the same nonlicensed persons, in addition to the reports required under paragraph (4), prepare a report of the multiple transfers, which report shall be—

(i) prepared on a form specified by the Secretary; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both.

(H) In addition to any other penalties imposed under this paragraph, the Secretary may—

(1) if the person is registered pursuant to section 921(a), after notice and opportunity for a hearing, suspend such registration for more than 6 months or revoke the registration of that person under section 921(a); and

"(2) if the person is a licensed importer, licensed manufacturer, or licensed dealer assists a person other than a licensee in securing, at 1 time or during any 5 consecutive business days, 2 or more pistols for nonlicensees, or any combination of pistols and revolvers totaling 2 or more, to the same nonlicensed persons, in addition to the reports required under paragraph (4), prepare a report of the multiple transfers, which report shall be—

(i) prepared on a form specified by the Secretary; and

(ii) in the case of a second or subsequent conviction, such person shall be fined under this title, imprisoned not more than 5 years, or both.
CONGRESSIONAL RECORD—SENATE
July 11, 2001

Subtitle C—Child Safety Locks

SECTION 221. SHORT TITLE.

This subtitle may be cited as the “Child Safety Lock Act of 2001”.

SECTION 222. REQUIREMENT OF CHILD HANDGUN SAFETY LOCKS.

(a) DEFINITIONS.—Section 922(a) of title 18, United States Code, is amended by adding at the end the following:

“(38) The term ‘locking device’ means a device or mechanism to prevent the firearm from being discharged without first deactivating or removing the device by means of a key or mechanically, electronically, or electromechanically operated combination lock, designed to prevent the firearm...”.

(b) UNLAWFUL ACTS.—

(1) IN GENERAL.—Section 922 of title 18, United States Code, is amended by inserting after subsection (y) the following:

“(y) LOCKING DEVICES.—

(A) the transfer to, or possession by, a railroad police officer under the laws of a State for purposes of law enforcement (whether on or off duty); or

(B) the transfer to, possession by, a law enforcement officer employed by an entity referred to in clause (1) of a firearm for law enforcement purposes (whether on or off duty); or

(C) the transfer to, or possession by, a law enforcement officer under the laws of a State for purposes of law enforcement (whether on or off duty).”.

(c) EFFECTIVE DATE.—Section 922(y) of title 18, United States Code, as added by this subsection, shall take effect 180 days after the date of enactment of this Act.

(b) AUTHORIZATION OF APPROPRIATIONS.—

(1) LIABILITY.—Nothing in this section shall be construed to—

(A) create a cause of action against any firearm dealer or any other person for any civil liability; or

(B) establish any standard of care.

(2) EVIDENCE.—Notwithstanding any other provisions of law, evidence of the firearm’s compliance or noncompliance with the amendments made by this section shall not be admissible.
as evidence in any proceeding of any court, agency, or other entity, except with respect to an action to enforce this section.

(3) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to bar a government official from imposing a penalty under section 2924(p) of title 18, United States Code, for a failure to comply with section 2922(y) of that title.

(d) Civil Penalties.—Section 2924 of title 18, United States Code, is amended—

(1) in subsection (a)(1), by striking “or (f)” and inserting “(f), (p)”; and

(2) by adding at the end the following:

“(p) Penalties relating to locking devices.—

(1) In general.—

(A) Suspension or revocation of license; civil penalties.—With respect to each violation of section 2922(y)(1) by a licensee, the Secretary may, after notice and opportunity for a hearing—

(i) suspend or revoke any license issued to the licensee under this chapter; or

(ii) subject that licensee to a civil penalty in an amount equal to not more than $10,000.

(B) Review.—An action of the Secretary under this paragraph may be reviewed as provided in section 2922(f).

(2) Administrative remedies.—The suspension or revocation of a license or the imposition of a civil penalty under paragraph (1) shall not preclude any administrative remedy that is otherwise available to the Secretary.

SEC. 223. AMENDMENT OF CONSUMER PRODUCT SAFETY ACT.

(a) In General.—The Consumer Product Safety Act (15 U.S.C. 2051 et seq.) is amended by adding at the end the following:

“Sec. 38. Child handgun safety locks.

(a) Establishment of Standard.—

(1) Child.—The term ‘child’ means an individual who has not attained the age of 13 years.

(2) Locking Device.—The term ‘locking device’ has the meaning given to that term in clauses (i) and (ii) of section 2922(a)(30)(A) of title 18, United States Code.

(b) Conforming Amendment.—Section 1 of the Consumer Product Safety Act is amended by adding at the end of the table of contents the following:

“(d) Definitions.—In this section:

(1) Child.—The term ‘child’ means an individual who has not attained the age of 13 years.

(2) Locking Device.—The term ‘locking device’ has the meaning given to that term in clauses (i) and (ii) of section 2922(a)(30)(A) of title 18, United States Code.

(3) Rule of Construction.—Nothing in this section shall be construed to bar a government official from imposing a penalty under section 2924(p) of title 18, United States Code, for a failure to comply with section 2922(y) of that title.

(d) National Environmental Policy Act.—The National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) does not apply to this section.

(2) Effect of State Law.—Notwithstanding subsection (a), this section does not apply to any activity described in section 7(a).

(3) Enforcement.—Notwithstanding subsection (a), the consumer product safety standard promulgated by the Consumer Product Safety Commission under this section shall be enforced consistent with section 2921 of title 18, United States Code.

(d) Definitions.—In this section:

(1) Child.—The term ‘child’ means an individual who has not attained the age of 13 years.

(2) Locking Device.—The term ‘locking device’ has the meaning given to that term in clauses (i) and (ii) of section 2922(a)(30)(A) of title 18, United States Code.

Law enforcement officials appreciate the importance of juvenile crime prevention programs and crave more. Last year, I surveyed every sheriff and chief of police in Wisconsin and found that 100 percent of Wisconsin’s sheriffs and 100 percent of the police chiefs of Wisconsin’s largest cities who responded to the questionnaire believe more Federal money needs to be spent on crime prevention programs. Similarly, more than 80 percent of the police chiefs of small and mid-size cities in Wisconsin want more prevention funding.

When asked how much of Federal juvenile crime funding should go to prevention, these same law enforcement officials answer that close to 40 percent should be spent on prevention programs, far more than the current level of prevention funding. The Juvenile Crime Prevention and Control Act of 2001 listens to what local law enforcement experts have been telling us for years and addresses their concerns. Of course, prevention is not the sole answer to juvenile crime. Indeed, we need a comprehensive crime-fighting strategy aimed at juvenile offenders and potential offenders, from violent

CONGRESSIONAL RECORD—SENATE 12935

July 11, 2001
predators to children at-risk of becoming delinquent. This legislation understands that tough law enforcement probably the last desperate. Certain violent juveniles should be incarcerated, and hopefully rehabilitated, and this bill provides the States with sufficient funds to get them off the streets and safeguard our communities.

Finally, no sensible juvenile crime fighting strategy is complete if it does not address the toxic combination of children and guns. This bill does that as well by mandating the sale of child safety locks with every handgun and insisting that those locks are designed well enough to work as intended.

Each year, teenagers and children are involved in more than 10,000 accidental shootings in which close to 800 people die. In addition, every year 1,300 children use firearms to commit suicide. Safety locks can be effective in detering some of these incidents and in preventing others.

The sad truth is that we are inviting disaster every time an unlocked gun is stored, but is still easily accessible to children. The guns are kept in 43 percent of American households with children. In 23 percent of the gun households, the guns are kept loaded. And, in one out of every eight of those homes the guns are left unlocked.

During the last decade, crime rates, including juvenile crime rates, have decreased. Since 1994, the juvenile arrest rate for violent crime has dropped 36 percent. Nonetheless, the public perceives that juvenile crime is a growing problem, especially school violence.

We need to remain vigilant and think creatively about how to maintain this trend in falling juvenile crime. This measure provides a comprehensive approach. Prevention, enforcement, and keeping guns out of the hands of children are three essential elements to a common sense juvenile crime strategy.

By Mr. BINGAMAN (for himself and Mr. DeWINE):

S. 1166. A bill to establish the Next Generation Lighting Initiative at the Department of Energy, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. BINGAMAN. Mr. President, I rise today with Senator DeWINE to introduce a bill authorizing the Secretary of Energy to lead the United States into the next generation of lighting technology. If this bill is enacted, I believe it will allow us not only to maintain a world leadership role that Thomas Edison invented towards, but also to promote efficiency advances in a market which consumes 19 percent of our electrical energy supply.

Lighting is a 40-billion-dollar global industry. The United States occupies roughly one-third of that market. It's an extremely competitive industry whose technology has been well established over the course of 80 years. Today's lighting market primarily consists of two technologies. The first technology is incandescent lighting. The one Thomas Edison invented in the 1880s. Incandescent lighting relies on running a current through a wire to heat it up and illuminate your surroundings. Only 5 percent of the electricity in a conventional bulb is converted into visible light. The remainder of the energy is converted into chemical vapors, mainly mercury, to discharge light when current is passed through it. Fluorescent lights are six times more efficient than a light bulb.

As I have mentioned, today's lighting uses up about 19 percent of our electricity supply. In 1998, lighting electricity cost about $37 billion dollars which accounted for about 100 million tons of carbon equivalent from fossil energy use. The next decade has the potential to double lighting energy use. That's why Senator DeWINE and I are proposing this legislation, because some scientists recently made a leap ahead in lighting research. Technology leaps far too quickly, very quickly, traditional markets. We know the stories. These days you phoned, the horse courier, the telegraph, the telephone, the Internet.

That is why Senator DeWINE and I are proposing this legislation, because some scientists recently made a leap ahead in lighting research. Technology leaps far too quickly, very quickly, traditional markets. We know the stories. These days you phoned, the horse courier, the telegraph, the telephone, the Internet.

Let me describe solid state lighting. The heart of every light emitting diode, or “LED’s”, is found in digital clocks. LED's produce only one color but they do not burn up a wire like a bulb and are seven times more efficient.

Until recently LED’s were limited to yellow or red. That all changed in 1995. In 1995, some Japanese researchers developed a blue LED. Soon other bright colors started to emerge, such as green. That is when things started to change. Because, white light is a combination of color but they do not burn up a wire like a bulb and are seven times more efficient.

If this initiative is successful, then by 2025, it can reduce our energy consumption by roughly 17 billion watts of power or the need for 17 large electricity generating plants. That's as much as 17 million homes consume in a single day. That's more homes than in California, Oregon, and Washington combined. Therefore, we conclude that the Next Generation Lighting Initiative will carry the U.S. lighting industry into the twenty first century. It capitalizes on technologies that have emerged
only five years ago but have the potential to quickly displace our lighting industry. This Initiative will reduce our national energy consumption and greenhouse gas emission. The research necessary to advance this technology requires a national investment that must be in partnership with industry.

I encourage my colleagues to review this bill, offer their comments, and, join Senator DeWine and me in its bipartisan support. I ask unanimous consent that the text of the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 1166

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. SHORT TITLE. This Act may be cited as "Next Generation Lighting Initiative Act".

SEC. 2. FINDING. Congress finds that it is in the economic and energy security interests of the United States to encourage the development of white light emitting diodes by providing financial assistance to firms, or a consortium of firms, and supporting research organizations in the lighting development sectors.

SEC. 3. DEFINITIONS. In this Act:

(1) CONSORTIUM.—The term "consortium" means the Next Generation Lighting Initiative Consortium established under section 5(b).

(2) INORGANIC WHITE LIGHT EMITTING DIODE.—The term "inorganic white light emitting diode" means a semiconducting compound that produces white light using externally applied voltage.

(3) LIGHTING INITIATIVE.—The term "Lighting Initiative" means the Next Generation Lighting Initiative established by section 4(a).

(4) ORGANIC WHITE LIGHT EMITTING DIODE.—The term "organic white light emitting diode" means an organic semiconducting compound that produces white light using externally applied voltage.

(5) PLANNING BOARD.—The term "planning board" means the Next Generation Lighting Initiative Planning Board established under section 5(a).

(6) RESEARCH ORGANIZATION.—The term "research organization" means an organization that performs or promotes research, development, and demonstration activities with respect to white light emitting diodes.

(7) SECRETARY.—The term "Secretary" means the Secretary of Energy, acting through the Assistant Secretary of Energy for Energy Efficiency and Renewable Energy.

(8) WHITE LIGHT EMITTING DIODE.—The term "white light emitting diode" means—

(A) an inorganic white light emitting diode; and

(B) an organic white light emitting diode.

SEC. 4. NEXT GENERATION LIGHTING INITIATIVE.

(a) ESTABLISHMENT.—There is established in the Department of Energy a lighting initiative to be known as the "Next Generation Lighting Initiative" to research, develop, and conduct demonstration activities on white light emitting diodes.

(b) OBJECTIVES.—The objectives of the Lighting Initiative shall be to develop, by 2011, white light emitting diodes that, compared to incandescent and fluorescent lighting technologies, are—

(A) longer lasting;

(B) more energy-efficient; and

(C) cost-competitive.

(2) INORGANIC WHITE LIGHT EMITTING DIODE.—The objective of the Lighting Initiative with respect to inorganic white light emitting diodes shall be to develop an inorganic white light emitting diode that has an efficiency of 160 lumens per watt and a 10-year lifetime.

(3) ORGANIC WHITE LIGHT EMITTING DIODE.—The objective of the Lighting Initiative with respect to organic white light emitting diodes shall be to develop an organic white light emitting diode with an efficiency of 100 lumens per watt with a 5-year lifetime that—

(A) illuminates over a full color spectrum;

(B) covers large areas over flexible surfaces; and

(C) does not contain harmful pollutants typical of fluorescent lamps such as mercury.

SEC. 5. ADMINISTRATION.

(a) PLANNING BOARD.

(1) IN GENERAL.—The Secretary shall establish a planning board, to be known as the "Next Generation Lighting Initiative Planning Board", to assist the Secretary in developing and implementing the Lighting Initiative.

(2) COMPOSITION.—The planning board shall be composed of—

(A) 4 members from universities, national laboratories, and other individuals with expertise in white lighting, to be appointed by the Secretary;

(B) 3 members nominated by the consortium and appointed by the Secretary.

(3) STUDY.—

(A) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the planning board shall complete a study on strategies for the development and implementation of white light emitting diodes.

(B) REQUIREMENTS.—The study shall—

(i) develop a comprehensive strategy to implement, through the Lighting Initiative, the use of white lighting emitting diodes to increase energy efficiency and enhance United States competitiveness; and

(ii) identify the research and development, manufacturing, and market development barriers that must be overcome to achieve a goal of a 25 percent market penetration by white light emitting diode technologies into the incandescent and fluorescent lighting markets by the year 2012.

(C) IMPLEMENTATION.—As soon as practicable after the study is submitted to the Secretary, the Secretary shall implement the Lighting Initiative in accordance with the recommendations of the planning board.

(b) CONSORTIUM.

(1) IN GENERAL.—The Secretary shall solicit the establishment of a consortium, to be known as the "Next Generation Lighting Initiative Consortium", to initiate and manage basic and manufacturing related research contracts on white light emitting diodes for the Lighting Initiative.

(2) COMPOSITION.—The consortium may be composed of firms, national laboratories, and other entities so that the consortium is representative of the United States solid state lighting industry as a whole.

(3) COST SHARING.—The consortium shall be funded by—

(A) membership fees; and

(B) grants provided under section 6.

SEC. 6. GRANT PROGRAM.

(a) IN GENERAL.—The Secretary shall make grants to firms, the consortium, and research organizations to conduct research, development, and demonstration projects related to white light emitting diode technologies.

(b) REQUIREMENTS.—To be eligible to receive a grant under this section, a consortium shall—

(1) enter into a consortium participation agreement that—

(A) is agreed to by all members; and

(B) describes the responsibilities of participants, membership fees, and the scope of research activities; and

(2) develop a Lighting Initiative annual program plan.

(c) ANNUAL REVIEW.—

(1) GENERAL.—The annual independent review of firms, the consortium, and research organizations receiving a grant under this section shall be conducted by—

(A) a committee appointed by the Secretary under the Federal Advisory Committee Act (5 U.S.C. App.); or

(B) a committee appointed by the National Academy of Sciences.

(2) REQUIREMENTS.—Using clearly defined standards established by the Secretary, the review shall assess technology advances and commercial applicability of—

(A) the activities of the firms, consortium, or research organizations during each fiscal year of the grant program; and

(B) the annual program plan developed under subsection (b)(2).

(d) ALLOCATION AND COST SHARING.—

(1) IN GENERAL.—The amount of funds made available for any fiscal year to provide grants under this section shall be allocated in accordance with paragraphs (2) and (3).

(2) RESEARCH PROJECTS.—Funding for basic and manufacturing research projects shall be allocated to the consortium.

(3) DEVELOPMENT, DEPLOYMENT, AND DEMONSTRATION PROJECTS.—Funding for development, deployment, and demonstration projects shall be allocated to members of the consortium.

(e) TECHNICAL AND FINANCIAL ASSISTANCE.—The national laboratories and other parties may, with the Federal agencies, cooperate with and provide technical and financial assistance to firms, the consortium, and research organizations conducting research, development, and demonstration projects carried out under this section.

(f) AUDITS.—

(1) IN GENERAL.—The Secretary shall retain an independent, commercial auditor to determine the extent to which funds made available under this Act have been expended in accordance with the objectives under section 4(b) and the annual operating plan of the consortium developed under subsection (b)(2).

(2) REPORT.—The auditor shall submit to Congress, the Secretary, and the Comptroller General of the United States an annual report containing the results of the audit.

(g) APPLICABLE LAW.—The Lighting Initiative shall not be subject to the Federal Acquisition Regulation.
SEC. 8. INTELLECTUAL PROPERTY.

MEMORANDUM

MEMBER OF THE CONGRESSIONAL RECORD.

MEMBER OF THE CONGRESSIONAL RECORD—SENATE

SEC. 9. APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to carry out this Act—

(1) $30,000,000 for fiscal year 2002; and

(2) $50,000,000 for each of fiscal years 2003 through 2001.

(b) AVAILABILITY.—Amounts made available under this section shall remain available until expended.

By Mrs. FEINSTEIN (for herself and Mr. HAGEL).

S. 1167. A bill to amend the Immigration and Nationality Act to permit the substitution of an alternative close family sponsor in the case of the death of the person petitioning for an alien’s admission to the United States; to the Committee on the Judiciary.

Mr. FEINSTEIN, Mr. President, I am pleased to introduce on behalf of myself and Mr. HAGEL, the Family Sponsor Immigration Act of 2001. This legislation would address the situation of those whose U.S. sponsor dies while they have the chance to adjust status or receive an immigrant visa.

Under current law, a family member who petitions for a relative to receive an immigrant visa must sign a legally binding affidavit of support promising to provide for the support of the immigrant. This is the last step before a green card is issued. If the family sponsor dies while the green card application is pending, the applicant is forced to find a new sponsor and restart the application process, usually a 7- to 8-year process, or face deportation.

The legislation I have introduced today would correct this anomaly in the law by permitting another family member to stand in for the deceased sponsor and sign the affidavit. Without this legislation, another relative who qualifies as a family sponsor would have to file a new immigrant visa petition on behalf of the relative and the relative would have to go to the end of the line if the visa category is numerically limited. Thus, the beneficiary would lose his priority date for a visa based on the filing of the first petition, and in some cases, face deportation.

With the passage of this legislation, even though there may be a different sponsor, the beneficiary would not lose his or her priority date to be admitted as a permanent resident of the United States. Nor will the beneficiary be subject to deportation even though they meet all the requirements for an immigrant visa.

A classic example of this situation was presented to my office just recently. Earlier this year I introduced a private bill on behalf of Zhenfu Ge, a 73-year-old grandmother whose daughter died before the Immigration and Naturalization Service, INS, was able to complete the final stage of application process: her interview. As a result, her immigration application is no longer valid and she is now subject to deportation. Unless I introduced legislation to allow her to adjust her status, given that she has met all the requirements for a visa.

In previous years, I have introduced other private bills which eventually became law. One bill was on behalf of Suchanda Kweli whose husband was killed in a car accident just weeks before her final interview with the INS. In 1997, I introduced a private bill on behalf of Jasmin Salehi, a Korean immigrant who became ineligible for permanent residency after her husband was murdered at a Denny’s in Reseda, California, where he worked as a manager.

In all of these cases, a family’s grief was compounded by the prospect of deportation of a family member, who had met all the requirements for a green card. This legislation is an efficient way to alleviate the need for private legislation under these circumstances by making the law more just for those who have chosen to become immigrants in our country through the legal process.

We introduce the “Family Immigration Act of 2001,” in the hopes that it will go further to alleviate some of the hardships families face when confronted by the untimely death of a sponsor. Similar legislation has gained bipartisan support in the House of Representatives. I look forward to working with my colleagues to move it quickly through the Senate.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE.

This Act may be cited as the “Family Sponsor Immigration Act of 2001”.

SEC. 2. SUBSTITUTION OF ALTERNATIVE SPONSOR IF ORIGINAL SPONSOR HAS DIED.

(a) PERMITTING SUBSTITUTION OF ALTERNATIVE CLOSE FAMILY SPONSOR IN CASE OF DEATH OF PETITIONER.—

(1) RECOGNITION OF ALTERNATIVE SPONSOR.—Section 213A(f)(5) of the Immigration and Nationality Act (8 U.S.C. 1183a(f)(5)) is amended to read as follows:

“(5)(B) of such section)''.

(b) CONFORMING AMENDMENTS.—Section 213A(f) of such Act (8 U.S.C. 1183a(f)) is amended in each of paragraphs (2) and (4) by striking “(and any additional sponsor required under paragraph 213A(f)(B) of such section)’’ and inserting “(and any additional sponsor required under section 213A(f) or any alternative sponsor permitted under paragraph 213A(f)(B) of such section)’’.

(3) ADDITIONAL CONFORMING AMENDMENTS.—Section 213A(i) of such Act (8 U.S.C. 1183a(i)) is amended, in each of paragraphs (2) and (4) by striking “(ii)’’ and inserting “(ii)’’.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to deaths occurring before, on, or after the date of the enactment of this Act, except that, in the case of a death occurring before such date, such amendments shall apply only if—

(1) the sponsor died—

(A) requests the Attorney General to reinstatement of the classification petition that was filed with respect to the alien by the deceased sponsor and approved under section 204 of the Immigration and Nationality Act (8 U.S.C. 1154) before such death; and

(B) demonstrates that he or she is able to satisfy the requirement of section 213A(f)(5)(B) of such Act (8 U.S.C. 1183a(f)(5)(B)) by reason of such amendments; and

(2) the Attorney General reinstates such petition after making the determination described in subsection (a) apply with respect to deaths occurring before, on, or after the date of the enactment of this Act, as early as 776 B.C., observed an “Olympic Truce” whereby all warring parties ceased hostilities and laid down their weapons for the duration of the games and in-law, brother-in-law, sister-in-law, grandparent, or grandchild of a sponsored alien or a legal guardian of a sponsored alien, meets the requirements of paragraph (1) (other than subparagraph (D)), and executes an affidavit of support with respect to such alien in a case in which—

“(i) the individual petitioning under section 204 for the classification of such alien died after the approval of such petition; and

“(ii) the Attorney General has determined for humanitarian reasons that revocation of such petition under section 205 would be inappropriate.”

(2) CONFORMING AMENDMENT PERMITTING SUBSTITUTION.—Section 212(a)(4)(C)(ii) of such Act (8 U.S.C. 1118(a)(4)(C)(ii)) is amended by striking “(including any additional sponsor required under section 213A(f))’’ and inserting “(and any additional sponsor required under section 213A(f) or any alternative sponsor permitted under paragraph 5(B) of such section)’’.

S. RES. 126—EX-PRESSING THE SENSE OF THE SENATE REGARDING OBSERVANCE OF THE OLYMPIC TRUCE

Mr. DASCHLE (for himself, Mr. STEVENS, Mr. REID, Mr. CONRAD, Mr. HARKIN, Mr. DORGAN, and Mr. SARBANES) submitted the following resolution; which was referred to the Committee on Foreign Relations.

Whereas the Olympic Games are a unique opportunity for international cooperation and the promotion of international understanding; Whereas the Olympic Games bring together embattled rivals in an arena of peaceful competition; Whereas the Olympic Ideal is to serve peace, friendship, and international understanding; Whereas participants in the ancient Olympic Games, as early as 776 B.C., observed an Olympic ‘‘Truce’’ whereby warring parties ceased hostilities and laid down their weapons for the duration of the games and

SEC. 10. CONGRESSIONAL RECORD— SENATE

July 11, 2001

CONGRESSIONAL RECORD— SENATE
Whereas the Government of the People’s Republic of China has reported that some of the scholar detainees have “confessed” to their “crimes” of “spying”, but it has yet to formally charged with spying for Taiwan on May 15, 2001, and is expected to go on trial on July 14, 2001;

Whereas Dr. Li Shaomin has been deprived of his basic human rights by arbitrary arrest and detention, and has not been allowed to contact his wife, and detention, has not been allowed to contact her husband and child (both United States citizens) or Department of State consular personnel in China, and was prevented from seeing his lawyer for an unacceptably long period of time;

Whereas Dr. Gao Zhan has been deprived of her basic human rights by arbitrary arrest and detention, has been denied access to lawyers and family members, and has yet to be formally charged with any crimes;

Whereas Qin Guangguang is a permanent resident of the United States and researcher who has been detained by the Government of the People’s Republic of China on suspicions of “leaking state secrets”, has been deprived of his basic human rights by arbitrary arrest and detention, has been denied access to lawyers and family members, and has yet to be formally charged with any crimes;

Whereas Wong Chunyan is a permanent resident of the United States and businessman who has been arrested and detained in Inner Mongolia in March 2001 by the Government of the People’s Republic of China.
People’s Republic of China, has been deprived of human rights by being denied any access to family members and by being denied regular access to lawyers, is reported to be suffering from severe health problems, was accused of tax evasion and other white collar crimes, and has been denied his request for medical parole;

Whereas because there is documented evidence that the Government of the People’s Republic of China uses torture to coerce confessions from suspects, because the Government has thus far presented no evidence to support its claims that the detained scholars and intellectuals are spies, and because spying is vaguely defined under Chinese law, there is reason to believe that the “confessions” of Dr. Li Shaomin and Dr. Gao Zhan may have been coerced; and

Whereas the arbitrary imprisonment of United States citizens and residents by the Government of the People’s Republic of China, and the continuing violations of their fundamental human rights, demands an immediate and forceful response by Congress and the President of the United States; Now, therefore, be it

Resolved, That

(1) the Senate—

(A) condemns and deplores the continued detention of Li Shaomin, Gao Zhan, Wu Jianmin, Qin Guangguang, Teng Chunyan, and other scholars detained on false charges by the Government of the People’s Republic of China, and calls for their immediate and unconditional release;

(B) condemns and deplores the lack of due process afforded to these detainees, and the probable coercion of confessions from some of them;

(C) condemns and deplores the ongoing and systemic violations of human rights violations by the Government of the People’s Republic of China, of which the unjust detentions of Li Shaomin, Gao Zhan, Wu Jianmin, Qin Guangguang, and Teng Chunyan, are only important examples;

(D) strongly urges the Government of the People’s Republic of China to consider carefully the implications to the broader United States-Chinese relationship of detaining and coercing confessions from United States citizens and permanent residents on unsubstantiated or suspicious allegations;

(E) urges the Government of the People’s Republic of China to consider releasing Liu Yaping on medical parole, as provided for under Chinese law; and

(F) believes that human rights violations inflicted on United States citizens and residents by the Government of the People’s Republic of China will reduce opportunities for United States-Chinese cooperation on other matters; and

(D) should immediately send a special, high ranking representative to the Government of the People’s Republic of China to reiterate the deep concern of the United States regarding the continued imprisonment of Li Shaomin, Gao Zhan, Wu Jianmin, Qin Guangguang, Teng Chunyan, and Liu Yaping, and to discuss their legal status and immediate humanitarian needs.

AMENDMENTS SUBMITTED AND PROPOSED

SA 877. Mr. BYRD proposed an amendment to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes.

SA 878. Mr. CRAPO (for himself, Mr. MURKOWSKI, and Mr. KENNEDY) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 879. Mr. DURBIN (for himself, Mrs. MURRAY, Mr. DAYTON, Mr. REID, Mr. FINKGOLD, and Mrs. BOXER) proposed an amendment to the bill H.R. 2217, supra.

SA 880. Mr. DURBIN (for himself) submitted an amendment to the bill H.R. 2217, supra.

SA 881. Mr. KYL submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 882. Mr. KERRY submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 883. Mr. KERRY submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 884. Mr. KERRY submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 885. Mr. MURKOWSKI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 886. Ms. BOXER submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 887. Ms. BOXER submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 888. Mr. HARKIN (for himself and Mr. GRASSLEY) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 889. Mr. ENZI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 890. Mr. BREAUX (for himself and Ms. LANDRIEU) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 891. Mr. CORZINE (for himself and Mr. TORRICELLI) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 892. Mr. STEVENS submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 893. Mr. NELSON, of Florida (for himself and Mr. GRAHAM) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 894. Mr. NELSON, of Florida submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 895. Mr. KERRY (for himself, Ms. SNOWE, Ms. COLLINS, Mr. KENNEDY, and Mrs. BOXER) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 896. Mr. NICKLES submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 897. Mr. ENZI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 898. Mr. SESSIONS submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 899. Mr. SMITH, of Oregon submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 900. Mr. ALLARD submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 901. Mr. DURBIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 902. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 903. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 904. Mr. MCCAIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 905. Mrs. ROY ally submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 906. Ms. CANTWELL (for herself, Mr. RINGAMAN, and Mrs. BOXER) submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 907. Ms. LANDRIEU (for herself, Mr. SMITH, of New Hampshire, Mr. BREAUX, and Mr. CRAPO) submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 908. Ms. LANDRIEU (for herself, Mr. BREAUX, Mr. LOTT, and Mr. SESSIONS) submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 909. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 910. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 911. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 912. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 913. Mr. RINGAMAN submitted an amendment intended to be proposed by him
to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 914. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 915. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 916. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 917. Mr. LEVIN (for himself and Ms. STABENOW) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 918. Mr. CRAIG submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 919. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 920. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 921. Ms. COLLINS submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 922. Ms. COLLINS submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 923. Mr. TORRICELLI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 877. Mr. BYRD proposed an amendment to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 152, line 4, strike "$17,181,000" and insert "$72,640,000".

SA 878. Mr. CRAPO (for himself, Mr. MURKOWSKI, and Mr. CRAIG) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. 1. PRELEASING, LEASING, AND RELATED ACTIVITIES.

None of the funds made available by this Act shall be used to conduct any preleasing, leasing, or other related activity under the Mineral Leasing Act (30 U.S.C. 161 et seq.) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) within the boundary (in effect as of January 20, 2001) of a national monument established under the Act of June 8, 1906 (16 U.S.C. 431 et seq.), except to the extent that such a preleasing, leasing, or other related activity is allowed under the Presidential proclamation establishing the monument.

SA 880. Mr. BYRD proposed an amendment to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 157, line 7, insert "Protection" after the word "Park".

SA 881. Mr. KYL submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 10, line 4, before "";" insert the following:

"(v) routinely manipulates the petroleum export market to ensure that the United States and its allies in the Persian Gulf and surrounding regions.

(iii) has failed to adequately draw down upon the amounts received in the Escrow Account established by the United Nations Security Council Resolution 661 in exchange for military equipment and materials to be used in pursuit of its program to develop weapons of mass destruction in order to threaten the United States and its allies in the Persian Gulf and surrounding regions.

(iv) conducts a periodic and systematic campaign to harass and obstruct the enforcement of the United States’ legal rights under the United Nations Security Council Resolution 661 in exchange for humanitarian products required by its citizens, resulting in massive humanitarian suffering by the Iraqi people.

(v) routinely manipulates the petroleum export market to ensure that the United States and its allies in the Persian Gulf and surrounding regions.

(iii) has failed to adequately draw down upon the amounts received in the Escrow Account established by the United Nations Security Council Resolution 661 in exchange for military equipment and materials to be used in pursuit of its program to develop weapons of mass destruction in order to threaten the United States and its allies in the Persian Gulf and surrounding regions.

(iv) conducts a periodic and systematic campaign to harass and obstruct the enforcement of the United States’ legal rights under the United Nations Security Council Resolution 661 in exchange for humanitarian products required by its citizens, resulting in massive humanitarian suffering by the Iraqi people.

(v) routinely manipulates the petroleum export market to ensure that the United States and its allies in the Persian Gulf and surrounding regions.

(iii) has failed to adequately draw down upon the amounts received in the Escrow Account established by the United Nations Security Council Resolution 661 in exchange for military equipment and materials to be used in pursuit of its program to develop weapons of mass destruction in order to threaten the United States and its allies in the Persian Gulf and surrounding regions.

(iv) conducts a periodic and systematic campaign to harass and obstruct the enforcement of the United States’ legal rights under the United Nations Security Council Resolution 661 in exchange for humanitarian products required by its citizens, resulting in massive humanitarian suffering by the Iraqi people.
with the national security and foreign policy interests of the United States and should be eliminated until such time as they are not so inconsistent.

(b) **Prohibition on Iraqi-Origin Petroleum** —Direct or indirect import from Iraq of Iraqi-origin petroleum and petroleum products is prohibited, notwithstanding an authorization by the Committee established by UNSC Resolution 686 or its designee, or any other order to the contrary.

(c) **Termination/Presidential Certification** —This prohibition shall remain in effect until such time as the President, after consultation with the relevant committees in Congress, certifies to the Congress that—

(1) the United States is not engaged in active military operations in—

(A) enforcing “No-Fly Zones” in Iraq;

(B) support of United Nations sanctions against Iraq;

(C) preventing the smuggling of Iraqi-origin petroleum and petroleum products in violation of UNSC Resolution 986, and

(D) otherwise preventing threatening action by Iraq against the United States or its allies and

(2) resuming the importation of Iraqi-origin petroleum and petroleum products would not be inconsistent with the national security and foreign policy interests of the United States.

(d) **Humanitarian Interests** —It is the sense of the Senate that the President should take all appropriate efforts to ensure that the humanitarian needs of the Iraqi people are not negatively affected by this Act, and should encourage through public, private, domestic and international means the direct or indirect sale, donation or other transfer to appropriate non-governmental health and humanitarian organizations and individuals within Iraq of food, medicine and other humanitarian products.

(e) **Definitions**

1. **661 Committee** —The term “661 Committee” means the Security Council Committee established by UNSC Resolution 661, and persons acting for or on behalf of the Committee under its specific delegation of authority for the relevant matter or category of activity, including the overseers appointed by the Secretary-General to examine and approve agreements for purchases of petroleum and petroleum products from the Government of Iraq pursuant to UNSC Resolution 986.

4. **Effective Date** —The prohibition on importation of Iraqi-origin petroleum and petroleum products shall be effective 30 days after enactment of this Act.

SA 886. Mr. Sessions submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. 6. GULFSTREAM NATURAL GAS PROJECT.

Notwithstanding any other provision of this Act, none of the funds made available under this Act shall be used to authorize or carry out the construction of the Gulfstream Natural Gas Project.

SA 887. Ms. Collins submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 195, line 3, strike “Act.” and insert “Act (of which $1,000,000 shall be available for the Tumbledown/Mount Blue conservation project, Maine).”

SA 888. Mr. Harkin (for himself and Mr. Grassley) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, add the following:

(1) The National Park Service shall make further evaluations of its significant, suitability and feasibility for the Glenwood locality and each of the twelve Special Land-Scape Areas (including combinations of such areas) as identified by the National Park Service in the course of undertaking the Special Resource Study of the Loess Hills Landform Region of Western Iowa.

(2) The National Park Service shall provide the results of these evaluations no later than January 15, 2002, to the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Energy and Natural Resources of the Senate, and the Committee on Resources of the House of Representatives.

SA 889. Mr. Enzi submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the Land and Water Conservation Fund, insert: “$3,000,000 shall be made available for the purchase of land for the United States Forest Service’s Bearlodge Ranger District Work Center (Old Stoney) in Sundance, Wyoming.”

And, at the appropriate place in the report, insert: “$33,000,000 for the design of historic office renovations of the Bearlodge Ranger District Work Center (Old Stoney) in Sundance, Wyoming.”

SA 890. Mr. Breaux (for himself and Ms. Landrieu) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. 1. LEASE SALE 181.

None of the funds made available by this Act shall be used to execute a final lease agreement for oil or gas development in the area of the Gulf of Mexico known as “Lease Sale 181”, as identified in the Outer Continental Shelf 5-Year Oil and Gas Leasing Program, before April 1, 2002.

SA 894. Mr. Nelson of Florida submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:
None of the funds made available by this Act shall be used to execute a final lease agreement for oil or gas development in the area of the Gulf of Mexico known as "Lease Sale 181", as identified in the Outer Continental Shelf 5-Year Oil and Gas Leasing Program.

SA 895. Mr. KERRY (for himself, Ms. SNOWE, Ms. COLLINS, Mr. KENNEDY, and Mrs. BOXER) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 183, line 11, after "offshore", insert "preleasing".

SA 896. Mr. NICKLES submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 220, line 9 strike "$2,388,614,000" and insert "$2,408,614,000".

On page 235, line 14 strike "$98,234,000" and insert "$78,234,000".

SA 897. Mr. ENZI submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 202, line 5, after 205 insert "of which, $244,000 is to be provided for the design of historic office renovations of the Bearlodge Ranger District Work Center (Old Stoney) in Sundance, Wyoming, and"

SA 898. Mr. SESSIONS submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 145, strike line 4 and all that follows through page 153, line 22 and insert "$109,501,000, to be derived from the Land and Water Conservation Fund, of which $4,000,000 shall be made available for land acquisition for the establishment of the Cabanatuan River National Wildlife Refuge, authorized by PL 106-331, to remain available until expended, and to be for the activities described in section 259(c)(4)(E)(iv) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

LANDOWNER INCENTIVE PROGRAM For expenses necessary to carry out the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 661–4 through 11), including administrative expenses, and for private conservation efforts to be carried out on private lands, $50,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That the amount provided herein is for the Secretary to establish a Landowner Incentive Program that provides matching, competitive awards to States for the establishment of private conservation efforts to be carried out on private lands, $14,414,000.

STATE WILDLIFE GRANTS (INCLUDING RESCISSION) For wildlife conservation grants to States and to the District of Columbia, Puerto Rico, Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa, under the provisions of the Fish and Wildlife Act of 1956 and the Fish and Wildlife Coordination Act, for the development and implementation of programs for the benefit of wildlife and their habitat, including species that are not hunted or fished, $100,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That the Secretary shall, after deducting administrative expenses, apportion the amount provided herein in the following manner: (A) to the District of Columbia and to the Commonwealth of Puerto Rico, $14,414,000; (B) to Guam, American Samoa, and the Northern Mariana Islands, $14,414,000; (C) to the U.S. Virgin Islands, $14,414,000; and (D) to American Samoa, $14,414,000.

STEWARDSHIP GRANTS For expenses necessary to carry out the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 661–11), including administrative expenses, and for private conservation efforts to be carried out on private lands, $100,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That the amount provided herein is for the Secretary to establish a Private Stewardship Grants Program to provide grants and other assistance to individuals and groups engaged in private conservation efforts that benefit federally listed, proposed, or candidate species, or other at-risk species.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND For expenses necessary to carry out section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), as amended, $91,000,000, to be derived from the Cooperative Endangered Species Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E)(v) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act:

NATIONAL WILDLIFE REFUGUE FUND For expenses necessary to implement the Act of October 17, 1976 (16 U.S.C. 758a), $14,414,000.

NORTH AMERICAN WETLANDS CONSERVATION FUND For expenses necessary to carry out the provisions of the North American Wetlands Conservation Act, Public Law 101-233, as amended, $42,000,000, to remain available until expended and to be for the conservation activities described in section 250(c)(4)(E)(iv) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act:

MULTINATIONAL SPECIES CONSERVATION FUND For expenses necessary to carry out the Multinational Species Conservation Act (16 U.S.C. 4201–4205, 4211–4215, 4221–4225, 4241–4245), and the Multinational Species Conservation Fund Act of 2000 (16 U.S.C. 6301), $1,000,000, to remain available until expended: Provided, That funds made available under this Act, together with funds appropriated in prior years and hereafter in annual appropriations acts for rhinoceros, tiger, Asian elephant, and great ape conservation programs are exempt from any sanctions or prohibitions on transactions with any country under section 102 of the Arms Export Control Act (22 U.S.C. 279aa–1).

STATE WILDLIFE GRANTS (INCLUDING RESCISSION) For wildlife conservation grants to States and to the District of Columbia, Puerto Rico, Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa, under the provisions of the Fish and Wildlife Act of 1956 and the Fish and Wildlife Coordination Act, for the development and implementation of programs for the benefit of wildlife and their habitat, including species that are not hunted or fished, $100,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That the Secretary shall, after deducting administrative expenses, apportion the amount provided herein in the following manner: (A) to the District of Columbia and to the Commonwealth of Puerto Rico, $14,414,000; (B) to Guam, American Samoa, the U.S. Virgin Islands, and the Commonwealth of the Northern Mariana Islands, $14,414,000; (C) to the U.S. Virgin Islands, $14,414,000; and (D) to American Samoa, $14,414,000.

Provided further, That the Secretary shall apportion the remaining amount in the following manner: 30 percent based on the ratio to which the land area of such State bears to the total land area of all such States; and 70 percent based on the ratio to which the population of such State bears to the population of the United States, based on the 2000 U.S. Census; and the amounts so apportioned shall be adjusted equitably so that no State shall be apportioned a sum which is less than one percent of the total amount available for apportionment or more than 10 percent: Provided further, That the Federal share of planning, administration, and other assistance to individuals and groups engaged in private conservation efforts that benefit federally listed, proposed, or candidate species, or other at-risk species.

In the manner provided herein.

ADMINISTRATIVE PROVISIONS Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed 74 motor vehicles for replacement only (including 32 for police-type use); repair of damage to public roads.
within and adjacent to reservation areas caused by the Service; any options for the purchase of land at not to exceed $1 for each option; facilities incident to such public recreational uses on reservation areas; those facilities consistent with their primary purpose; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the Service and to which the United States has title, and which are used pursuant to law in connection with management and investigation of fish and wildlife resources: Provided, That notwithstanding section 501, the Service may, under cooperative cost sharing and partnership arrangements authorized by law, procure printing services from cooperators in accordance with the provisions for the purchase of printing services from cooperators contained in section 3113(d) of title 31, United States Code. Provided further, That the Service may accept donated aircraft as replacements for existing aircraft: Provided further, That the Service is authorized to acquire any funds available from the proceeds of the sale of any unit of the National Wildlife Refuge System unless the purchase is approved in advance by the House and Senate Committees on Appropriations, with the reprogramming procedures contained in section 3113(d) of title 31, United States Code.

SA 899. Mr. SMITH of Oregon submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows: At the appropriate place in the bill, insert: "None of the funds made available under this Act shall be available to provide any flows from the Klamath Project other than those set forth in the 1992 biological opinion for Lost River and shortnose suckers and the July 1999 biological opinion on project operations issued by the National Marine Fisheries Service and the Fish and Wildlife Service takes the following actions identified or discussed in the April 1993 recovery plan for Lost River suckers and shortnose suckers: (a) establishes at least one stable refuge population with a minimum of 500 adult fish for each unique stock of Lost River and shortnose suckers; (b) secures refugial sites for upper Klamath Lake suckers; (c) uses aeration for improving water quality and to expand refugial areas for relatively good water quality within Upper Klamath Lake; (d) implements the most effective strategy for larval rearing and refuge habitat in the lower Williamson and Wood Rivers through increased vegetative cover; (e) extirpates exotic species that are predators of the suckers; (f) assesses the need for captive propagation and the potential for improving sucker stocks through supplementation, and the Secretary has submitted a report, including recommendations, to the Congress; (g) implements a plan to monitor relative abundance of all life stages for all sucker populations; (h) develops a plan to reduce losses of fish due to water diversions; (i) determines the distribution and abundance of suckers in all waterbodies in the Upper Klamath Basin; (j) implements the plan for wetland rehabilitation pilot project; and (k) implements the most effective strategy to provide fish passage upstream of the Sprague River Dam.

SA 901. Mr. DURBIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows: On page 194, between lines 9 and 10, insert the following: "SEC. 5. CONSOLIDATION.—(a) No funds provided in this Act may be used for conducting preleasing, leasing, and related activities under either the Mineral Leasing Act (30 U.S.C. 181 et seq.) or the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) within the boundaries of a National Monument established pursuant to the Act of June 8, 1906 (16 U.S.C. 431 et seq.) as such boundary existed on January 20, 2001, except where such activities are allowed under the Presidential proclamation establishing such monument.

SA 902. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows: On page 145, line 9, before the period at the end, insert the following: "of which $500,000 shall be available to acquire land for the Don Edwards National Refuge, California."
the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table, as follows:

On page 256, between lines 7 and 8, insert the following:

SEC. 2. FOREST LEGACY PROGRAM.

Section 7(i) of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2180c(i)) is amended by adding at the end the following:

"(3) STATE AUTHORIZATION.—Notwithstanding any other provision of this Act, a State may authorize a local government, or any qualified organization (as defined in section 170(h)(3) of the Internal Revenue Code of 1986) that is organized for 1 or more purposes described in clause (1), (2), or (3) of section 170(h)(4)(A) of the Internal Revenue Code of 1986, to acquire land and interests in land to carry out the Forest Legacy Program in the State."

SA 904. Mr. McCAIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 153, line 22, before the period, insert "the following: "$23,363,000, of which $3,363,000 shall be derived by transfer from the Department Management fund."

SA 905. Mrs. BOXER submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 153, line 26 strike "$30,000,000" and insert the following: "$23,363,000, of which $3,363,000 shall be derived by transfer from the Department Management fund."

SA 906. Ms. CANTWELL (for herself, Mr. BINGAMAN, and Mrs. BOXER) submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 216, line 25 strike "$870,805,000" and insert "$882,805,000".

On page 217, line 7, strike the period and insert: "Provided further, That $25,300,000 shall be available for the Federal Energy Management Program and $20,788,000 shall be available for the Community partnerships."

On page 217, line 17 through line 19 and insert: "$157,009,000, to remain available until expended," of which $8,000,000 shall be available for maintenance of a Northeast Home Water Conservation and Restoration Account (including reversion).

For transfer to the Wildlife Conservation and Restoration Account established by section 3(a)(2) of the Pittman-Robertson Wildlife Restoration Act (16 U.S.C. 669a(a)(2)), $100,000,000, to be derived from the Land and Water Conservation Fund and to remain available until expended.

SA 908. Ms. LANDRIEU (for herself, Mr. BREAX, Mr. LOTT, and Mr. SESSIONS) submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. 1. SENSE OF CONGRESS CONCERNING COASTAL IMPACT ASSISTANCE.

(a) FINDINGS.—Congress finds that—

(1) the United States continues to rely on fossil fuels (including crude oil and natural gas) as a source of most of the energy consumed in the country;

(2) this reliance is likely to continue for the foreseeable future;

(3) about 65 percent of the energy needs of the United States are supplied by oil and natural gas;

(4) the United States is becoming increasingly reliant on clean-burning natural gas for electricity generation, industrial, commercial, and residential heating and air conditioning, agricultural needs, and essential chemical processes;

(5) a large portion of the remaining crude oil and natural gas needs of the country are on Federal land located in the western United States, in Alaska, and off the coastline of the United States;

(6) the Gulf of Mexico has proven to be a significant source of oil and natural gas and is predicted to remain a significant source in the immediate future;

(7) many States and counties oppose the development of Federal crude oil and natural gas resources within or near the coastline, which opposition results in congressional, Executive, State, or local policies to prevent the development of those resources;

(8) actions that prevent the development of certain Federal crude oil and natural gas resource do not lessen the energy needs of the United States or those States and counties that object to exploration and development for fossil fuels;

(9) actions to prevent the development of certain Federal crude oil and natural gas resources focus development pressure on the remaining areas of Federal crude oil and natural gas resources located onshore or offshore Alaska, certain onshore areas in the western United States, and the central Gulf of Mexico off the coasts of Alabama, Alaska, Louisiana, Mississippi, and Texas;

(10) the development of Federal crude oil and natural gas resources is accompanied by adverse effects on the infrastructure services, public services, and the environment of States, counties, and local communities that host the development of those Federal resources;

(11) States, counties, and local communities do not have the power to tax adequately the development of Federal crude oil and natural gas resources, particularly when those development activities occur off the coastline of States that serve as platforms for that development, such as Alabama, Alaska, Louisiana, Mississippi, and Texas;

(12) the Mineral Leasing Act (30 U.S.C. 181 et seq.), which governs the development of Federal crude oil and natural gas resources located onshore, provides, outside the budget and appropriations processes of the Federal Government, payments to States in which Federal crude oil and natural gas resources are located in the amount of 50 percent of the direct revenues received from the Federal Government for those resources; and

(13) there is no permanent provision in the Outer Continental Shelf Lands Act (30 U.S.C. 181 et seq.), which governs the development of Federal crude oil and natural gas resources located offshore, that authorizes the sharing of a portion of the annual revenues generated from Federal offshore crude oil and natural gas resources with adjacent coastal States that—

(A) serve as the platform for that development;

(B) suffer adverse effects on the environment and infrastructure of the States.

(b) SENSE OF CONGRESS.—It is the sense of Congress that Congress should provide a significant portion of the Federal offshore mineral revenues to coastal States that permit the development of Federal mineral resources located off the coast of the United States, including the States of Alabama, Alaska, Louisiana, Mississippi, and Texas.

SA 909. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 11 and 11, insert the following:

SEC. 1 MODIFIED LEASE SALE 181.

Notwithstanding any other provision of this Act, not later than December 31, 2001, the Secretary of the Interior shall use such funds made available by this Act as are necessary to proceed with the sale of the area known as "Modified Lease Sale 181", located in the eastern portion of the Gulf of Mexico, consisting of 256 lease blocks for a total of approximately 1,470,000 acres, as designated on the map entitled "Eastern Gulf of Mexico and Sale 181 Area", dated June 29, 2001.

SA 910. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. 1 LEASE SALE 181.

Notwithstanding any other provision of this Act, not later than December 31, 2001, the Secretary of the Interior shall use such
funds made available by this Act as are necessary to proceed with the sale of the area known as ‘‘Lease Sale 181’’, located in the eastern portion of the Gulf of Mexico, modifying the sale by excluding from Lease Sale 181 the area comprised of 120 blocks that form a narrow strip beginning 15 miles south of the coast of Alabama.

SA 911. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

AGENCY FOR INTERNATIONAL DEVELOPMENT

CHILD SURVIVAL AND DISEASE PROGRAMS FUND (INCLUDING RECESSION)

For an additional amount for “Child Survival and Disease Programs Fund”, $190,600,000, to remain available until expended: Provided, That this amount may be made available, notwithstanding any other provision of law, for United States contribution to a global trust fund to combat HIV/AIDS, malaria, and tuberculosis. Of the funds made available under this heading in the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2001, (as contained in section 101(a) of Public Law 106–429) which are designated for a contribution to an international HIV/AIDS fund, $10,000,000 are rescinded.

GENERAL PROVISION—THIS CHAPTER

SEC. 2501. The final proviso in section 526 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2000 (as enacted into law by section 1006(a)(2) of Public Law 106–113), as amended, is hereby repealed, and the funds identified by such proviso shall be made available pursuant to the authority of section 526 of Public Law 106–429.

CHAPTER 6

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES (INCLUDING TRANSFERS OF FUNDS)

For an additional amount to address increased permitting responsibilities related to energy needs, $3,000,000, to remain available until expended, and to be derived by transfer from the Miscellaneous Trust Fund: Provided, That such amount shall be provided as direct lump sum payments within 30 days of enactment of this Act.

NATIONAL FOREST SYSTEM

For an additional amount for “National Forest System” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended.

For an additional amount for “State and Private Forestry”, $750,000 to be provided to the Kenai Peninsula Borough Spruce Bark Beetle Task Force for emergency response and communications equipment and $1,750,000 to be provided to the Municipality of Anchorage for emergency fire fighting equipment and response to respond to wildfires in spruce bark beetle infested forests, to remain available until expended: Provided, That such amounts shall be provided as direct lump sum payments within 30 days of enactment of this Act.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM (INCLUDING RESCISSION)

Of the amounts made available to the National Park Service under this heading in Public Law 106–291, $200,000 for completion of a wilderness study at Apostle Islands National Lakeshore, Wisconsin, are rescinded.

For an additional amount for “Operation of the National Park System”, $4,000,000, to remain available until expended, for completion of a wilderness study at Apostle Islands National Lakeshore, Wisconsin: Provided, That these funds shall be made available under the same terms and conditions as authorized for the funds in Public Law 106–291.

Of the amounts transferred to the Secretary of the Interior, pursuant to section 311 of chapter 3 of division A of appendix D of Public Law 106–554 for maintenance, protection, or preservation of the land and interests in land described in section 3 of the Minuteman Missile National Historic Site Establishment Act of 1999, $4,000,000 are rescinded.

For an additional amount for “Operation of the National Park System”, $4,000,000, to remain available until expended, for maintenance, protection, or preservation of the land and interests in land described in section 3 of the Minuteman Missile National Historic Site Establishment Act of 1999: Provided, That these funds shall be made available under the same terms and conditions as authorized for the funds pursuant to section 311 of chapter 3 of division A of appendix D of Public Law 106–554.

BUREAU OF INDIAN AFFAIRS

OPERATION OF INDIAN PROGRAMS (INCLUDING TRANSFERS OF FUNDS)

For an additional amount for “Operation of Indian Programs”, $50,000,000, to remain available until September 30, 2002, for electric power operations at the San Carlos Irrigation Project, of which amounts such necessary may be transferred to other appropriations accounts for repayment of advances previously made for such power operations.

RELATED AGENCY

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

STATE AND PRIVATE FORESTRY

For an additional amount for “State and Private Forestry” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended.

For an additional amount for “State and Private Forestry”, $750,000 to be provided to the Kenai Peninsula Borough Spruce Bark Beetle Task Force for emergency response and communications equipment and $1,750,000 to be provided to the Municipality of Anchorage for emergency fire fighting equipment and response to respond to wildfires in spruce bark beetle infested forests, to remain available until expended: Provided, That such amounts shall be provided as direct lump sum payments within 30 days of enactment of this Act.

NATIONAL FOREST SYSTEM

For an additional amount for “National Forest System” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended.

CAPITAL IMPROVEMENT AND MAINTENANCE

(INCLUDING RESCISSION)

Of the funds appropriated in Title V of Public Law 105–83 for the purposes of section 502(e) of that Act, the following amounts are rescinded: $1,000,000 for now required payment preservation and $4,000,000 for pavement rehabilitation.

For an additional amount for “Capital Improvement and Maintenance”, $5,000,000, to remain available until expended, for the purposes of section 502(e) of Public Law 105–83.
CONGRESSIONAL RECORD—SENATE
July 11, 2001

For an additional amount for “Capital Improvement and Maintenance” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $4,000,000, to remain available until expended.

GENERAL PROVISIONS—THIS CHAPTER
(INCLUDING TRANSFER OF FUNDS)
SEC. 2601. Pursuant to title V of the Steens Mountain Cooperative Management and Protection Act, Public Law 106–399, the Bureau of Land Management may transfer such sums as are necessary to complete the individual land exchanges identified under title VI from unobligated land acquisition balances.

SEC. 2003. Section 2 of Public Law 106–558 is amended by striking subsection (b) in its entirety and inserting in lieu thereof:

“(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of enactment of this Act.”

SEC. 2004. Federal Highway Administration emergency relief for Federally owned roads, made available to the Forest Service as Federal-aid highways funds, may be used to reforest Forest Service lands for expenditures previously completed only to the extent that such expenditures would otherwise have qualified for the use of Federal-aid highways funds.

SEC. 2005. Notwithstanding any other provision of law, $2,000,000 provided to the Forest Service for expenditures previously completed only to the extent that such expenditures would otherwise have qualified for the use of Federal-aid highways funds.

SEC. 2006. Section 122(a) of Public Law 106–291 is amended by:

(1) inserting “hereafter” after “such amounts”; and

(2) striking “June 1, 2000” and inserting “June 1, 2001”.

SEC. 2008. Sudden Oak Death Syndrome. In addition to amounts transferred under section 442(a) of the Plant Protection Act (7 U.S.C. 7772c), the Secretary of Agriculture shall transfer to the Forest Service, pursuant to that section, an additional $1,400,000 to be used by appropriate offices within the Forest Service that carry out research and development activities to arrest, control, eradicate, and prevent the spread of Sudden Oak Death Syndrome, to be derived by transfer from the unobligated balance available to the Secretary of Agriculture for the acquisition of land and interests in land.

CHAPTER 7
DEPARTMENT OF LABOR
EMPLOYMENT AND TRAINING ADMINISTRATION
TRAINING AND EMPLOYMENT SERVICES
(INCLUDING RESCissions)
For an additional amount to carry out chapter 1 of the Workforce Investment Act, $45,000,000 to be available for obligation for the period April 1, 2001 through June 30, 2002.

Of the funds made available under this heading in the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106–558), $25,000,000 are rescinded.

For an additional amount for “Capital Improvement and Maintenance” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $4,000,000, to remain available until expended.

(1) the aggregate amount specified shall be deemed to be $139,853,000; and

(2) the provision specifying $1,275,000 for one-to-one computing shall be deemed to read as follows: “$1,275,000—NetSchools Corporation, to provide one-to-one e-learning pilot programs for K–12 students;”
Devere Elementary School in San Pablo, California; Menlo Park Magnet School in New Haven, Connecticut; Reid Elementary School in Searchlight, Nevada; and McDermott Combined School in McDermott, Nevada.

GENERAL PROVISIONS—THIS CHAPTER

SEC. 2701. (a) Section 117 of the Carl D. Perkins Vocational and Technical Education Act of 1998 (20 U.S.C. 2272) is amended—

(1) in subsection (a), by inserting "that are not receiving Federal support under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)", after "institutions";

(2) in subsection (b), by adding "institutional support of" after "for";

(3) in subsection (d), by inserting "that is not receiving Federal support under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)", after "institution"; and

(4) in subsection (e), by adding the following:

"(2) in subsection (b), by adding "institutional support of" after "for";

"(3) in subsection (d), by inserting "that is not receiving Federal support under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)", after "institution"; and

"(4) in subsection (e), by adding the following:

"(D) institutional support of vocational and technical education for institutions of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)", after "institution"; and

(5) by inserting after subparagraph (C) the following:

"(B) areas under-served by public broadcasting facilities;

"(C) rural or remote areas;

"(D) areas where the conversion to, or establishment of primary digital public broadcasting services is made necessary to carry out the purposes of subsection (n);

"(E) areas where the conversion to, or establishment of primary digital public broadcasting services is made necessary by an insufficient availability of private funding for that purpose by reason of the small size of the population or the low average income of the residents of the area.

(b) AUTHORIZATION OF APPROPRIATIONS.—Subsection (b)(1) of section 396 of the Commu-
For an additional amount for “Salaries and Expenses” to reimburse any agency of the Department of the Treasury or other Federal agency for costs of providing operational and perimeter security at the 2002 Winter Olympics in Salt Lake City, Utah, $59,956,000, to remain available until September 30, 2002.

FEDERAL MANAGEMENT SERVICE

For an additional amount for “Salaries and Expenses”: $49,576,000, to remain available through September 30, 2002.

INTERNAL REVENUE SERVICE

For an additional amount for “Processing, Assistance, and Management”: $66,200,000, to remain available through September 30, 2002.

FEDERAL PAYMENT TO MORRIS K. UDALL SCHOLARSHIP AND EXCELLENCE IN NATIONAL ENVIRONMENTAL POLICY FOUNDATION

Of the funds made available under this heading in H.R. 5658 of the 106th Congress, as incorporated by reference in Public Law 106–554, $1,000,000 shall be transferred and made available for necessary expenses incurred pursuant to section 67(b) of the Morris K. Udall Scholarship and Excellence in National Environmental Policy Act of 1992 (20 U.S.C. 5004(7)), to remain available until expended.

GENERAL PROVISION—THIS CHAPTER

SEC. 21001. Section 413 of H.R. 5658, as incorporated by reference in Public Law 106–554, is amended to read as follows:

“SEC. 413. DESIGNATION OF THE PAUL COVERDELL BUILDING.

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed without objection to the substitute amendment.

FEDERAL EMERGENCY MANAGEMENT AGENCY

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), $1,000,000 to remain available until expended for costs related to the tsunami.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

HUMAN SPACE FLIGHT

Notwithstanding the proviso under the heading, “Human Space Flight”, in Public Law 106–74, $40,000,000 of the amount therein shall be available for preparations necessary to carry out future research supporting life and microgravity science and applications.

TITLE III—GENERAL PROVISIONS

SEC. 3003. Designation of Engineering and Management Building at Norfolk Naval Shipyard, Virginia.

The engineering and management building (also known as Building 1500) at Norfolk Naval Shipyard, Portsmouth, Virginia, shall be known as the Norman Sisisky Engineering and Management Building.

This Act may be cited as the “Supplemental Appropriations Act, 2001”.

UNANIMOUS CONSENT AGREEMENT—H.R. 333

Mr. REID. Mr. President, I ask unanimous consent that the previously ordered debate with respect to the Nelson of Florida amendment No. 893 occur immediately following the vote on cloture on the motion to proceed to H.R. 333, the offering of the substitute amendment, and clause 1 to be out of order on that amendment, as under the previous order; further, that no amendments be in order to the substitute amendment to H.R. 333 prior to the cloture vote on the substitute amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZING USE OF THE ROTUNDA OF THE CAPITOL

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 174 just received from the House.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 174) authorizing the Rotunda of the Capitol to be used on July 26, 2001, for a ceremony to present Congressional Gold Medals to the original 29 Navajo Code Talkers.
There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. Mr. President, I ask unanimous consent that the resolution be agreed to, the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 174) was agreed to.

EXECUTIVE SESSION

NOMINATION OF OTHONEIL ARMENDARIZ TO BE A MEMBER OF THE FEDERAL LABOR RELATIONS AUTHORITY

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations reported earlier today by the Government Affairs Committee:

Othoniel Armendariz, to be a member of the Federal Labor Relations Authority;
Kay Coles James, to be the Director of the Office of Personnel Management;
that the nominations be confirmed, the motions to reconsider be laid upon the table, that any statements thereon appear at the appropriate place in the RECORD, and that the President be immediately notified of the Senate’s action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

OFFICE OF PERSONNEL MANAGEMENT

Kay Coles James, of Virginia, to be Director of the Office of Personnel Management.

FEDERAL LABOR RELATIONS AUTHORITY

Othoniel Armendariz, of Texas, to be a Member of the Federal Labor Relations Authority for a term of five years expiring July 1, 2005.

EXECUTIVE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Nos. 182 through 196 and all nominations on the Secretary’s desk; that the nominations be confirmed, en bloc; that any statements therein be printed at the appropriate place in the RECORD; the motions to reconsider be laid upon the table; the President be immediately notified of the Senate’s action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

DEPARTMENT OF STATE

Pierre-Richard Prosper, of California, to be Ambassador at Large for War Crimes Issues.
Charles J. Swindells, of Oregon, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to New Zealand, and to serve concurrently without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Samoa.
Margaret DeHardeleben Purtwiler, of Alabama, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Morocco.
Wendy Jean Chamberlin, of Virginia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Islamic Republic of Pakistan.
William S. Farish, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Kingdom of Great Britain and Northern Ireland.
Francis Xavier Taylor, of Maryland, to be Coordinator for Counterterrorism, with the rank and status of ambassador at large.
Robert D. McCallum, of Kansas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to India.
Anthony Horace Gioia, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta.
Howard H. Lauck, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to France.
William A. Eaton, of Virginia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Assistant Secretary of State (Administration).
Alexander R. Vershbow, of the District of Columbia, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Russian Federation.
Clark T. Randt, Jr., of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People’s Republic of China.
C. David Welch, of Virginia, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Arab Republic of Egypt.
Douglas Alan Hartwick, of Washington, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Lao People’s Democratic Republic.
Daniel C. Kurtzer, of Maryland, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Israel.

NOMINATIONS PLACED ON THE SECRETARY’S DESK

FOREIGN SERVICE

PN508 Foreign Service nominations (110) beginning Stephen K. Morrison, and ending Joseph Laurence Wright, II, which nominations were received by the Senate and appeared in the Congressional Record of June 12, 2001.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now return to legislative session.

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE CALENDAR NO. 104

Mr. REID. Mr. President, I ask unanimous consent that the majority leader, after consultation with the Republican leader, may turn to the consideration of Executive Calendar No. 104, the nomination of John Graham to be the Administrator of the Office of Regulatory Affairs at OMB and that it be considered under the following time limitation:

One hour under the control of Senator Lieberman, 3 hours under the control of Senator Thompson, 2 hours under the control of Senator Durbin, 2 hours under the control of Senator Wellstone, 15 minutes under the control of Senator Kerry; that upon the use or yielding back of the time, the Senate vote at a time to be determined by the two leaders on the nomination; that upon the disposition of the nomination, the President be immediately notified of the Senate’s action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY, JULY 12, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9 o’clock a.m., on Thursday, July 12. I further ask consent that on Thursday immediately following the prayer and the pledge, the Journal of the proceedings be approved to date, the morning hour be deemed to have expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the motion to proceed to H.R. 333, the House Bankruptcy Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, on Thursday, the Senate will convene at 9 a.m. and resume consideration of the motion to proceed to the House Bankruptcy Reform Act, with 3 hours for debate prior to a cloture vote on the motion to proceed.

Following consideration of the bankruptcy act on Thursday, the Senate will resume consideration of the Interior and Related Appropriations bill with the vote in relation to Nelson of Florida amendment No. 893.

At 11:30 a.m., the Senate will swear in the new Secretary of the Senate, Jeri Thomson.

ORDER FOR ADJOURNMENT

Mr. REID. Mr. President, I ask unanimous consent that following the remarks of Senator Murray and Senator...
CANTWELL, who will be recognized to speak on matters of importance to them and their States and the country, the Senate stand in adjournment under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, the majority leader has indicated that the two managers of the bill have stated they believe they can complete the bill tomorrow. If not, we will have to complete it on Friday. We are quite certain that will not happen, but the leader wanted us to notify people in case we were unable to finish tomorrow.

The PRESIDING OFFICER. Under the previous order, the Senator from Washington is recognized.

LOSS OF FOUR WASHINGTON FIREFIGHTERS

Mrs. MURRAY. Mr. President, I come to the Senate Chamber this evening to join my colleague, Senator MARIA CANTWELL, in acknowledging four young Americans who lost their lives in service to our country last evening.

Like many Americans, this morning I awoke to the very tragic news that four firefighters had died while battling a wildfire near Winthrop, WA.

Today I want my colleagues and the American people to know the names of those four brave firefighters: Tom Craven, 30 years old, of Ellensburg, WA; Karen Fitzpatrick, 18 years old of Yakima, WA; Devin Weaver, 21, of Yakima; and Jessica Johnson, 19, also from Yakima.

These were young people.

These were people who put themselves in harms way to keep the rest of us safe.

Today, my thoughts and prayers are with the families of those four courageous firefighters.

It’s hard to imagine the dangers that firefighters face every day. But they choose to fight fires to help protect the rest of us—our families and our communities.

When something like this happens, it makes all of us stop and think about what they’ve sacrificed for our safety.

My brother is a firefighter. For years, he fought fires. My family and I understand the risks.

I know how those families feel every day when they send their loved ones off to work.

They are proud of them.

They know they are doing something important for their neighbors and their community.

And they are always hoping they will get back home safely at the end of the day.

This tragedy reminds us all of the dangers that firefighters face every day.

To the families of those four brave young people, please know that we are a grateful nation, and you are all in our thoughts and prayers.

I also want to wish a speedy recovery for the other firefighters who were injured while battling the fire.

I want to thank the firefighters in Washington State—and across the country—for the work they do to protect us.

We own them a debt of gratitude.

Today, we owe four families our condolences and our thanks for their sacrifice. I yield to Senator CANTWELL from Washington State.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Ms. CANTWELL. Mr. President, it is with a heavy heart that I come to the floor today after learning of the tragic deaths of four firefighters in the Wenatchee National Forest in Washington state. These courageous firefighters died yesterday battling a wildfire in Okanogan County. A tragedy of this magnitude is felt throughout Washington state, but should also be recognized and mourned by a grateful nation.

This is the nation’s deadliest wildfire since 1994. On behalf of the citizens of Washington State, I extend my deepest sympathies to the families of the four brave men and women who gave their lives to protect their neighbors. Squad Leader Tom Craven of Ellensburg, Devin Weaver of Yakima, Jessica Johnson of Yakima, and Karen Fitzpatrick of Yakima gave their lives to keep us safe. This tragedy is compounded because these firefighters were so young—the youngest being just 18 years old.

We join their families and friends in mourning their loss.

As Senator MURRAY pointed out, this tragedy reminds us that we often take for granted the men and women who routinely put their lives on the line to protect us. Every state in the nation has experienced the loss of people involved in fighting wildfires.

I hope the families and friends of these brave firefighters know that the courage and sacrifice of their loved ones will not be forgotten and that our sympathies reach out to their families.

I also want to recognize the hard work of those firefighters who are still fighting; to those who are injured, I wish them a speedy recovery. The firefighters of the U.S. Forest Service come from all over the country. They have been battling fires for years. This year alone, 300 firefighting personnel are available on the Okanogan and Wenatchee National Forests. These firefighters work year after year in service to their country with little recognition.

On behalf of the residents of Washington State and the Nation, I thank them for their hard work and their dedication under very trying circumstances. We all remember the sacrifice that each and every one of you have made.

Mrs. MURRAY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MILLED). The clerk will call the roll.

The Assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent for the quorum call to be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I ask unanimous consent to speak in morning business for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

FBI OVERSIGHT

Mr. GRASSLEY. Mr. President, I want to discuss with my colleagues the issue of the Federal Bureau of Investigation oversight, and how we can help the Bureau regain the trust and confidence of the American people.

First, I find it very pleasant today to commend Attorney General Ashcroft for something he did. He announced today action to enlarge the jurisdiction of the Office of Inspector General of the Justice Department so that that Office of Inspector General would be able to work with the FBI and the DEA on its own initiative, without jumping through a lot of hoops which were some hoops that were put in place in the previous administration, which, in a sense, put the FBI and the DEA out of bounds from things that you would expect an inspector general of a department to be looking into.

So, effective immediately, then, the inspector general will have primary jurisdiction over allegations of misconduct against employees of the Federal Bureau of Investigation and the Drug Enforcement Agency. This is an important and encouraging step towards overall FBI reform, one which I hope will help to solve problems that the FBI has with its management culture.

Previous to this, the inspector general could not initiate an investigation within the FBI, or the Drug Enforcement Agency, without the express permission from the Deputy Attorney General. Contrariwise, in most other Departments, the inspector general can do any investigation they want to, unimpeded in any way. It is very important for the inspector general to have that freedom to function. They are not only an agent for the Cabinet Department head, but they are also an agent of the Congress because they can report directly to the Congress. It is essential to have that type of oversight, that type of policing to ferret out wrongdoing.

I have been saying for many years that the FBI should not be allowed to police itself, and I am encouraged by this step taken today towards the establishment of a free and independent oversight entity which now, truly, the Department of Justice inspector general will be.
I am also pleased to see as part of this order that the Attorney General has enhanced whistleblower protection for FBI employees who come forward with protected disclosures. As an author of legislation that is on the books now for whistleblower protection, the last time we enhanced the protection for whistleblowers there was just enough sympathy—and unjustified sympathy—within this body for the FBI that somehow the FBI could have a separate set of regulations just for whistleblowers within the FBI. As a result, whistleblowers within the FBI have not had the same amount of protection that whistleblowers in any other agency of the Federal Government might have. So this will also help in that direction. I thank the Attorney General for that.

Today, then, following up on this action of the Attorney General, I have forwarded a letter to Attorney General Ashcroft, commending him on these steps, and also request that his office provide me with additional details regarding how these various investigative and audit entities within the Department of Justice, the FBI, and the DEA are to be administered and organized.

Earlier this week, I had the opportunity to meet with FBI Director nominee Robert Mueller. I discussed with Robert Mueller several concerns that I have with how the Bureau has been managed over the past several years. I also discussed with Mr. Mueller my views on the type of leadership that I think the FBI needs.

We have a once-every-10-year opportunity to find someone who can fix the problems inherent in the management culture at the Bureau because that appointment comes up for a 10-year length of time. I want to make sure, during this 10-year opportunity, Mr. Mueller understands my concerns.

Part of our discussion concerned the need for strengthening FBI oversight, both on the part of the executive branch, along the lines of what I have been saying about the inspector general, but also from the Congress—constitutional oversight of the executive branch agencies.

Without asking Mr. Mueller to comment on pending legislation, I mentioned to Mr. Mueller I am working on a bill to permanently extend by statute the jurisdiction that was given today by the Attorney General to the Department of Justice inspector general, so that some future Attorney General cannot put impediments in the way of the inspector general investigating things within the FBI. I encourage Mr. Mueller, should he be confirmed, to make it a priority to ensure that he and the FBI will cooperate fully with whatever oversight entity is in place.

I also discussed with Mr. Mueller the need for increased whistleblower protection for FBI employees. Over the years the FBI has been notorious for retaliating against those who would expose the types of waste, fraud, and abuse in cases that have now become synonymous with a culture of arrogance within the FBI. These are cases such as Ruby Ridge, Waco, the TWA 800 investigation, the FBI crime lab investigation, Wen Ho Lee, Robert Hansen, and most recently the Oklahoma bombing investigation in the McVeigh case.

I will be introducing legislation that will provide statutory protection for FBI whistleblowers to overcome the shortcomings of the legislation that was signed by President Bush in 1989. Those exemptions that were made from the FBI need to be taken out so the whistleblowers in the FBI have the same protections as whistleblowers in any other agency of Government. I hope the new Director will not only support this important reform but will work to ensure these important reforms are communicated clearly through the Bureau.

I believe that in order to regain the trust and confidence of the American people, the FBI must be open and fully responsive to differing points of view within its own ranks. More importantly, employees must be able to present these opinions in an atmosphere that is free of retaliation that happens so often against people whom we call whistleblowers.

Basically, within any organization there is a great deal of peer pressure to go along to get along. But that peer pressure also has the capability of covering up wrongdoing and bad administration. That is why the process of people telling the truth and coming out in the open is so important.

Without this freedom, the FBI will only continue to suppress and marginalize those who speak out, and things will go on as they have for so long. That is not good. That is what has brought about a culture of arrogance—of believing within the FBI that the FBI can do no wrong.

Perhaps the greatest example of this type of retaliation against a whistleblower occurred in an investigation I am making involving a whistleblower by the name of Dr. Fred Whitehurst. You may remember that when Dr. Whitehurst came forward with proof of abusive practices at the FBI crime lab, he was shamelessly discredited by senior FBI officials. An inspector general investigation—after going through all of those hoops I talked about—later supported the assertions made by Dr. Whitehurst and got back his good name. Dr. Whitehurst won a settlement that ended up costing the American taxpayers $1 million.

There is something wrong when a whistleblower comes forward and he is not listened to, and he has to sue, and it costs the taxpayers $1 million to settle. He should have been listened to in the first instance.

We want to encourage an environment within all government agencies, for the simple reason that FBI, bad wrongdoing is not covered up; that people who whistleblow aren’t treated like a skunk at a picnic on a Sunday afternoon, that they are held up as somebody who ought to be honored rather than somebody who ought to be suppressed.

I want to make sure to mention that the comments I make about the FBI today, though, should in no way minimize the great sacrifices made every day by hard-working FBI agents and support personnel. These men and women serve their nation proudly. They deserve an organization that has integrity and credibility.

The FBI management system is broken. This does a real disservice to the hard-working agents on the street. When the FBI does what they are set up to do—to seek the truth and let the truth convict—they do their job right. But when there is an effort to cover up wrongdoing, then the agents and people are more concerned about the headlines and the public relations of the organization as opposed to the fundamentals of law enforcement—that is, those cases and a lot of others I have already listed—that is when their agency gets in trouble and loses credit.

In regard to these agents who do their work and do it right and because of this management culture that must be changed by the new Director, I have asked the Attorney General to provide me with information regarding the extent to which the new FBI Director will be able to institute the departmentwide reforms and to make staffing changes, including changes at the senior staff and management level.

I believe that a new FBI Director will only have a certain period of time—maybe a couple of months—in which he can make real change. In order for the new Director to take advantage of that time, he must be afforded maximum flexibility for staffing and policy setting.

I also agree that we have not done enough in Congress. I am not putting the blame just on the Department of Justice and the FBI. We have a constitutional responsibility of oversight. We spend all of our time legislating, giving speeches, passing laws, voting, and offering amendments. That is what most people think being a Congressman is all about. But also, once laws are passed, the checks and balances of our Constitution require that we do our constitutional job of oversight; that is, to make sure that the laws that have been enacted are executed and that money spent appropriated by Congress is spent within the intent of Congress and that the law is enforced within the intent of Congress. Congress does not do a good enough job. For too long we have seen mishap after mishap occur, with the end result being more money and more jurisdiction for the FBI. The Director of the
FBI comes up to Capitol Hill, everybody sees the Director of FBI, and they just melt. The Director of the FBI says a couple of mea culpas and walks out of here with a nice pat on the back, and probably a bigger appropriation.

That is not oversight. That is just business as usual. One way this can be improved is through the creation of a subcommittee within the Committee on the Judiciary that would be directly responsible for FBI oversight.

We need to help the FBI change the kind of culture that places image and publicity before basics and fundamentals. We need to help the FBI change the kind of culture that holds press conferences in high-profile cases before the investigation is complete and all the facts are in, and when all the facts are in, then the FBI has egg on its face.

Yes, the American people deserve the kind of agency that won’t make the kind of mistakes the FBI has made in the Wen Ho Lee and the Atlantic Olympic bombing case, and the Waco case and the Ruby Ridge case. But, more importantly, the American people deserve an agency that is honest and forthright about their errors; in other words, very transparent.

As one of our Supreme Court Justices said 80 or 100 years ago, the best disinfectant is sunshine. Let the Sun shine in and there won’t be mold. That is transparency. That is the way the American Government ought to operate.

I look forward to getting down to the business of helping the FBI and its next Director regain the trust and confidence of the American people.

I yield the floor. I thank the Presiding Officer for waiting for me to speak tonight.
The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. COOKSEY).

DESIGNATION OF THE SPEAKER PRO TEMPORE
The SPEAKER pro tempore laid before the House the following communication from the Speaker:

I hereby appoint the Honorable John Cooksey to act as Speaker pro tempore on this day.

J. DENNIS HASTERT.
Speaker of the House of Representatives.

PRAYER
The Reverend Tommy Nelson, Pastor, Denton Bible Church, Denton, Texas, offered the following prayer:

Our Father, You have made us as You have made all things. You have established the nations and their boundaries. You have ordained their leaders, their authority and the absolutes by which they rule. To You, who are the foundation of justice, of love and equality, we ask Your sovereign mercy.

Grant these men and women, whom You have vested, the wisdom to perceive Your pleasure, the skill to implement it, the courage to stand by the right, and the consistency and the integrity of life to merit the trust of this Nation, who has looked unto them. Encourage them and surround their families and marriages with Your blessing and help and truth. Have mercy on this Nation through them, to walk in Thy way and know Thy peace.

In Thy Holy and Merciful Name we pray. Amen.

THE JOURNAL
The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. McNULTY. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER pro tempore. The question is on the Speaker's approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. McNULTY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8, rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

PLEDGE OF ALLEGIANCE
The SPEAKER pro tempore. Will the gentleman from Oregon (Mr. Wu) come forward and lead the House in the Pledge of Allegiance.

Mr. Wu led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE
A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 1. An act to close the achievement gap with accountability, flexibility, and choice, so that no child is left behind.

H.R. 2216. An act making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 1) "An Act to close the achievement gap with accountability, flexibility, and choice, so that no child is left behind", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. Kennedy, Mr. Dodd, Mr. Harkin, Ms. Mikulski, Mr. Finken, Mr. Bingaman, Mr. Wellstone, Mrs. Murray, Mr. Reed, Mr. Edwards, Mrs. Clinton, Mr. Lieberman, Mr. Bayh, Mr. Gregg, Mr. Frust, Mr. Enzi, Mr. Hatchenson, Mr. Warner, Mr. Bond, Mr. Roberts, Ms. Collins, Mr. Sessions, Mr. DeWine, Mr. Allard, and Mr. Ensign, to be the conferes on the part of the Senate.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 2216) "An Act making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. Byrd, Mr. Inouye, Mr. Hollings, Mr. Stevens, and Mr. Cochran, to be the conferes on the part of the Senate.

WELCOMING THE REVENERD TOMMY NELSON, PASTOR, DENTON BIBLE CHURCH, DENTON, TEXAS

Mr. THORNBERRY. Mr. Speaker, on behalf of the gentleman from Texas (Mr. ARMey), the majority leader, and my colleague the gentleman from Texas (Mr. HALL), it is my privilege to welcome as our guest chaplain today Tom Nelson, the Senior Pastor of Denton Bible Church in Denton, Texas. Tom was born and raised in Waco and grew up in a family of four boys. He attended what is now the University of North Texas in Denton, where he played quarterback for the football team and earned his degree in 1973. From there, he attended Dallas Seminary.

Tom has been pastoring at Denton Bible Church for 23 years. With over 4,000 members, Denton Bible Church is the largest church in Denton. Beside the four services he leads each Sunday, Tom discipiles over 30 young men and teaches two men's bible studies.

In addition, Tom has served as a national speaker for the Fellowship of Christian Athletes, Campus Crusade for Christ, and Navigators. He is the author of two books and three video series. His taped messages have been heard throughout the world. Tom and his wife Teresa have two sons, Benjamin and John Clark.

Once again, Mr. Speaker, it is my privilege to welcome Tom Nelson to the Congress of the United States. I would like to thank him for his leadership in the community of Denton and express my appreciation for his leading the House today in prayer.

SUPPORT FLETCHER-PETERSON BALANCED PATIENTS' BILL OF RIGHTS

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, today I rise to express my strong support for a meaningful and responsible Patients' Bill of Rights recently introduced by my colleagues and friends, the gentleman from Kentucky (Mr. FLETCHER),
and the gentleman from Minnesota (Mr. Peterson).

We have been debating this issue for years, and it is time to give Americans what they need and what they deserve. This bill ensures that Americans will have access to medical care, including pediatric services, OB-GYN, specialists and emergency care. It further provides accountability by assuring those who make medical decisions which result in an injury are held responsible for their actions.

And this bill assures Americans can count on affordable health care. After all, what good is a Patients’ Bill of Rights if millions of more Americans are unable to afford health care?

I call upon everyone in this Chamber to support the Fletcher-Peterson bill. It is a balanced Patients’ Bill of Rights, which ensures that medical decisions are made by doctors and patients, and not by HMO gatekeepers or lawyers.

APPROVE FEDERAL FUNDING OF STEM CELL RESEARCH

(Ms. ESHOO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ESHOO. Mr. Speaker, I was recently visited in my office here in Washington by two of my young constituents, Mary Lucas, 9 years old, and Kelsey Kagle, 15. They both have juvenile diabetes.

Mary Lucas, the 9-year-old, said something to me that has remained with me and I think always will. She told me that if we found a vaccine or a cure for diabetes, and if there was enough for everyone, she would give up her share to someone who needed it more than her. Her unselfish words, I think, are instructive to us.

How will we cure juvenile diabetes? One promising method is by investing in stem cell research, which has the potential to cure diseases that afflict tens of millions of Americans today, diseases like cancer, Alzheimer’s and Parkinson’s.

According to a recent article in the New York Times, a study by the NIH sites the dazzling array of treatments that may result from research on both embryonic and adult stem cells. The report makes clear that embryonic stem cells are clearly superior to adult stem cells for stem cell research.

Most Americans understand that stem cell research is not about destroying lives, but prolonging and bringing quality to and curing American lives today. So let us get this out of political science and keep it in the hands of the real scientists that understand this, and let us take a giant step, Mr. President, and allow Federal funding for stem cell research.

WALK FAR FOR NATIONAL ALLIANCE FOR AUTISM RESEARCH

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, these posters portray two beautiful, happy children, Bonnie and Willis Flick. When these pictures do not portray is that Bonnie and Willis cannot effectively communicate with their parents or their playmates because they live with autism.

In recent years autism has risen dramatically across our Nation, and although it typically affects 1 in every 500 children, in my hometown of Miami-Dade County, the rate of autism in young children has jumped to about 1 in every 250.

On Saturday, November 3, I will participate in Walk Far for NAAR, the National Alliance for Autism Research. This will raise funds for research projects and fellowships to fight this devastating disorder.

I ask my colleagues to join me in congratulating the chair of this year’s walkathon, Patricia Cambo, and the co-chairs, Rene Vega and Dr. Michael Alessandri, as well as last year’s co-chairs, Michelle Cruz and Marie Irene Whitehurst.

Due to the success of Walk Far, the National Alliance for Autism Research more than doubled its level of funding for this year, and we hold promise that a cure for autism is just around the bend for Bonnie and Willis Flick and many other children with autism.

SUPPORT USE OF FEDERAL FUNDS FOR STEM CELL RESEARCH

(Ms. DeGETTE asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DeGETTE. Mr. Speaker, why should we use Federal money for embryonic stem cell research? While it is a difficult medical-ethical decision to make sure we put controls in place, embryonic stem cell research promises new breakthroughs in science that will help literally tens of millions of Americans.

There are three reasons why we need to make sure this research is federally funded and federally supervised.

First, medical breakthroughs of underestimated value are available through funding of this research. A large body of successful work with mouse embryonic stem cells shows these cells are superior to adult stem cells in the development of what may be cures for diabetes, Parkinson’s disease, Alzheimer’s and other chronic diseases.

Second, Federal funding provide necessary oversight of stem cell research. This is the new frontier, and we need to make sure we keep control of it.

Finally, America has the greatest health, medical and science community in the world. Federal funding will help U.S. scientists keep pace with international researchers. We need to find the cure for diabetes, we need to find the cure for Parkinson’s, for Alzheimer’s and so many other diseases. Let us keep this research going.

FUND ADULT STEM CELL RESEARCH GENEROUSLY

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, we must have stem cell research. Alzheimer’s, Parkinson’s and diabetes, these are all very serious diseases that have no cures. But our research must be ethical. Adult stem cell research holds the most promise for finding cures.

We should fund adult stem cell research, and fund it generously for non-embryonic stem cell research. Creating human embryos for research, experimentation, harvesting and destruction is not ethical. Killing one human life, even though very tiny, on the chance of maybe one day saving another, is not ethical, moral, and, I should add, even legal to do with taxpayer money.

Since 1996, our laws ban government funding of research that involves killing human embryos. We should keep that law.

Now we have a study that shows that embryonic stem cells may be too unstable to be of much use anyway, unless they are produced in huge numbers. But there is no such evidence that adult stem cells are unstable. Adult stem cell research holds great promise. Adult stem cell research promises to help us find cures to diseases that have plagued mankind for centuries. Let us fund adult stem cell research, and fund it generously.

CHINA DOES NOT DESERVE TO HOST 2008 OLYMPIC GAMES

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, China has executed 1,781 citizens in the last 90 days. That is more executions than the entire world performed over the last 3 years. China is now even executing citizens for pimping and prostitution. It is getting so bad that Chinese citizens, Chinese lovers, in fact, are afraid to even kiss in public. Meanwhile, China says it is necessary to ensure “social stability.”

Now, if that is not enough to power surge your electric chair, China is in line to host the 2008 Olympic games.

Beam me up. The Olympic games are designed to be a celebration of life, not death. China does not deserve to host these games.
I yield back the human rights abuses, the death and dying at the hand of Communist Chinese dictators.

GOVERNMENT SPENDING CAUSES DEFICIT SPENDING
(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, Washington is out of touch with the real world again. Tax relief does not cause deficit spending, as we hear; spending causes deficit spending.

Washington spends every dime we send up here. That is the reason why this Congress stopped deficit spending in America. That is why this Congress stopped 40 years of dipping into the Social Security and Medicare Trust Funds, and that is why this Congress has started to pay down a good amount of the national public debt. Mr. Speaker, make no mistake. The very reason we sent money back home to the people is because we will spend every dime of it.

Look what we spend. Let us talk about the outhouse, the $1 million, two-seater outhouse that our National Parks and Wildlife built a year ago. Let us talk about the salmon. We spend $5 billion a year helping salmon swim upstream to their spawning grounds. We could put each fish in a first-class ticket seat and fly them to the top of the river each year and still save money. We have enough dollars for the priorities of America. What we do not have is enough for the priorities of sleness. Tax relief does not cause deficit spending; spending causes deficit spending.

STEM CELL RESEARCH IS PRO-LIFE
(Ms. HARMAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. HARMAN. Mr. Speaker, I rise today to urge strong support in Congress and the administration for a vital field of medical research. Federal funding for embryonic stem cell research should not be caught up in the abortion debate. As many antichoice proponents have courageously noted, stem cell research is pro-life. It will save lives, not take them.

Let me review what we know about stem cell research.

First, research using embryonic stem cells is helping us understand and treat not just Parkinson’s disease, spinal cord injuries, and Alzheimer’s, but possibly heart disease, arthritis and cancer.

Second, stem cell research is going on today and should be subject to Federal guidelines. Research of the type described in the lead story in today’s Washington Post is not permitted under NIH’s ethical guidelines. Third, adult stem cells are not able to develop into as many kinds of tissue as embryonic cells.

Fourth, the embryos used in stem cell research would otherwise be destroyed by fertility clinics.

Mr. Speaker, if the embryos used in this research are simply discarded, we discard with them the hope of patients across the country and the promise of a new generation of medical cures.

HYDROPOWER FOR CLEAN AND SAFE ENERGY
(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, we in the House will be marking up an energy policy this week, and part of this policy will include hydropower. Hydropower provides a clean and safe source of energy. Hydropower is the fourth largest source of total generation, making it an important part of America’s energy supply mix. In addition to providing sustainable power at a low cost, hydropower production has significant environmental benefits. Hydropower production has no emissions. Every kilowatt of power that is produced from hydropower reduces the need to burn oil and coal to produce the same amount of energy.

I am pleased that the Republican energy package will include elements to assure that we maximize the potential of our existing hydropower facilities. While we work to implement policies and strategies to conserve energy, we must also work to increase energy supply to keep pace with growing demand. Mr. Speaker, I believe that maximizing the benefits of our hydropower resources is an important part of meeting that challenge.

CHOOSING TO BE RELEVANT TO SCIENCE
(Mr. WU asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WU. Mr. Speaker, stem cell research offers the prospect for cures for diseases such as diabetes, Alzheimer’s, and Parkinson’s disease. It is a development of such great historic significance that I want to hear it spoken about in the same breath of hope and potential as we discuss the other era when science was under threat from a theocracy.

About 400 years ago, Galileo Galilei was forced to recant the evidence of his eyes that the moons and the planets revolved around each other rather than all of them revolving around the Earth, as the church then insisted that we all ascribe. But even as the theocracy forced Galileo to recant his views, he was heard to mutter, “But the planets do move.”

Mr. Speaker, just as the planets move, stem cell research will go forward. The only question is whether it goes forward in this country or in foreign countries; with government support or without government support; subject to NIH guidelines or subject to no ethical guidelines whatsoever.

Our choice here is not about stem cell research or not. Just as no theocracy can prevent the planets from moving, no theocracy can prevent stem cell research from going on. The only choice is whether we choose to be relevant to science.

AMERICA IS A NATION OF THE PEOPLE, BY THE PEOPLE, AND FOR THE PEOPLE
(Mr. SAM JOHNSON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSON. Mr. Speaker, do my colleagues know what? Our taxes were lowered on July 1. That means we will take home more of our own money. We can thank President Bush for that.

When I was home in Texas over July 4, I met Kris and Melissa Kelly who are constituents of mine, and I asked them, what are you going to do with that tax refund? They said they are going to put a down payment on a brand-new minivan for their family. Is that not what America is all about? Instead of allowing the Federal Government to keep our hard-earned money, creating new and expensive government programs, we gave the people their own money back so they can buy the things they need.

So I salute President Bush for all he has done for the hard-working people of this great Nation. America really is a Nation of the people, by the people, for the people.

STEM CELL RESEARCH
(Mr. EVANS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS. Mr. Speaker, there should really be no debate about stem cell research, given the immense promise that it holds for a number of diseases. This is an issue that is of paramount importance to millions of Americans who stand to benefit from this groundbreaking research. I know, because I am one of them. I suffer from Parkinson’s disease.

This debate is being mired down in the politics of abortion, but it has nothing to do with abortion. This is an issue of medicine. Stem cells are never derived from an embryo that a woman intends to be implanted into her womb, nor are embryos ever created for their...
use in stem cell research. Researchers only use embryos which were scheduled to be discarded.

Clearly, these embryos can be put to better use. The scientific promise of embryonic stem cells offers hope that simply did not exist a few years ago. We cannot afford to literally throw away such potential. Every day that we continue research brings with it astonishing possibilities for enhanced treatments and cures for now-irreversible diseases and injuries.

Let us come together as a body in support of stem cell research.

**SUPPORT ETHICAL AND RESPONSIBLE STEM CELL RESEARCH**

(Mr. RYUN of Kansas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYUN of Kansas. Mr. Speaker, I rise in support of ethical stem cell research and in opposition to the destruction of human life. I firmly believe that we have a responsibility to respect and protect life at every stage.

The issue we face is not whether we allow this research. Both the ethical adult stem cell research that I support and the controversial embryonic research will continue on.

However, we must now decide if we are going to force taxpayers to fund this controversial embryonic research. Allocating Federal dollars for research that retires destruction of human embryos would require many Americans to fund something that they morally oppose. I urge the President and my colleagues to join me in supporting responsible and ethical stem cell research and standing for what is right and moving ahead with this research.

**JULIAN C. DIXON POST OFFICE**

(Ms. WATSON of California asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WATSON of California. Mr. Speaker, on December 8, 2000, Julian Dixon, a Member of Congress, died of a heart attack at age 66. On that day, Congress lost an experienced leader, and California lost a tireless advocate. But the loss of Julian Dixon was felt the hardest in the 32nd Congressional District of California where Angelenos lost a beloved friend and neighbor.

Yesterday, I introduced a bill to rename a post office in the 32nd district as the “Congressman Julian C. Dixon Post Office.” This one small effort pales in comparison to the years of devoted service Julian provided to his community.

But as a friend and a school chum of Julian Dixon, I know that my neighbors in the 32nd Congressional District would be proud to have Julian remembered in this way. What an appropriate way to honor him, since he was well known for corresponding with his constituents by mail.

Mr. Speaker, I ask the entire California delegation, as well as any other Member, to join me in cosponsoring this piece of legislation.

**FROZEN EMBRYOS ARE BEING ADOPTED**

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, Hannah is a happy 2½-year-old little girl. She is a normal, healthy toddler discovering the joys of life. In a few days I hope to meet Hannah and when I do, I will reassure her that there is no such thing as a “spare” or “leftover” person.

Although she may not yet understand what that means, her parents sure do. They understand perfectly, because little Hannah used to be a frozen embryo in an invitro fertilization clinic. She was one of those who support embryonic stem cell research—research that destroys human embryos. Callously call “spare” and “leftover” embryos.

But Hannah is neither “spare” nor “leftover,” despite the fact that she spent a considerable amount of time in a deep-freeze that served her as a frozen orphanage. The perky toddler could have been fodder for researchers, but instead today is talking a blue streak, and in a few years will go to school.

Mr. Speaker, the story of Hannah and other adopted embryos underscores why we should not spend Federal tax dollars to destroy human embryos to steal their precious stem cells. These stem cells are not ours to take. And given the discoveries from adult stem cell research, which does not rely on destroying human embryos, arguments for federally funding embryonic stem cells is less persuasive than ever.

**PUT POLITICS ASIDE AND SUPPORT STEM CELL RESEARCH**

(Ms. WOOLSEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WOOLSEY. Mr. Speaker, I rise today in support of stem cell research. It is time for people on all points of the political spectrum to come together, support efforts to make stem cell research safe, legal and ethical. Stem cell research has the potential to unlock the door to medical knowledge for a host of diseases. We cannot allow America’s health to be held hostage to politics, while medical research stagnates.

For people suffering from Alzheimer’s or Parkinson’s, or for those who have loved ones with these diseases, including cancer and juvenile diabetes, stem cell research represents hope for a cure. Yet by banning this research, either adult or embryonic research, we foreclose the possibility of improving or saving many, many lives. And who will pay the price? A mother fighting Parkinson’s or a child battling juvenile diabetes. That is why I strongly urge my colleagues to put politics aside, support the promising scientific research of stem cell research.

**RESEARCH MONEY SHOULD GO TOWARD ADULT STEM CELL RESEARCH**

(Mr. WELDON of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WELDON of Florida. Mr. Speaker, prior to coming to the United States Congress, I practiced internal medicine for 15 years, including treating many patients with diabetes, Alzheimer’s disease, and Parkinson’s disease. For that reason, I was very interested in this issue of stem cell research.

I have reviewed the medical literature on this issue. Today, most of the people advocating for the use of embryonic stem cells are bench researchers who like to use them because they tend to proliferate very nicely in the U.S. culture. That very same property makes them very problematic in using them in clinical applications.

There is today the use of adult stem cells in treating diseases. There is no use of embryonic stem cells in treating any diseases. Indeed, there is not even an animal model where we can take a rat with a disease and treat it with an embryonic stem cell.

Using embryonic stem cells in clinical applications is very problematic for the very same reason that the bench researchers like to use it, the cells tend to proliferate and behave like malignancies. It is not only ethical to use adult stem cells, it makes the most sense, and it is where the research money should be going.

**EMBRYONIC STEM CELL RESEARCH IS A MEDICAL ISSUE**

(Ms. SCHAKOWSKY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SCHAKOWSKY. Mr. Speaker, the issue of embryonic stem cell research has been misrepresented as one of abortion. It is not an abortion issue. Stem cell research is a medical issue, one that should transcend political lines and instead focus on human lives.

One such life is that of Carolyn Laughlin, a mother of two diabetic
CONGRESSIONAL RECORD—HOUSE

July 11, 2001

12963

sons in my hometown of Evanston, Illinois, who wrote me this past April to share her family’s struggle and urge my support for federally-funded stem cell research.

She said, “Diabetes haunts my family every waking hour. Insulin, blood testing, calculating food portions are constant companions of my sons. Overnight, I fear insulin reactions that will leave them unconscious. Long-term we face the concerns of kidney failure, blindness, and amputations.”

Most scientists are in agreement that embryonic cell research offers the greatest hope for families like the Laughlins. Federal funding guidelines assure that research will meet ethical standards and allow advancements to be made as quickly as possible in diseases like Parkinson’s and Alzheimer’s, cancer, heart disease, spinal cord injury.

The Laughlins and millions of other families are counting on us.

ETHICAL STEM CELL RESEARCH USES ADULT STEM CELLS

(Mr. LEWIS of Kentucky asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Kentucky. Mr. Speaker, I rise today in strong support of ethical stem cell research that uses adult stem cells instead of embryonic stem cells. Life begins at conception, and the use of embryos for research destroys young life.

I support the use of adult stem cells, not just because no young lives are lost, but also because research using adult stem cells has already produced exciting results. Large Scale Biology Corporation, a biotechnology company in the Second District of Kentucky, has produced a growth factor using tobacco-based plant proteins that causes adult stem cells to behave like embryonic stem cells.

Using their patented method, Large Scale Biology Corporation has successfully produced breast cancer and leukemia vaccines in conjunction with a joint Navy-NIH research team.

We all want to see diseases like cancer and Alzheimer’s cured, so let us support a proven alternative that we can all agree on and is not controversial. I urge my colleagues and President Bush to support funding for adult stem cell research and oppose life-destroying embryonic stem cell research.

WE MUST ALLOW FEDERAL FUNDING FOR LIFE-SAVING EMBRYONIC STEM CELL RESEARCH

(Mr. McDermott asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDermott. Mr. Speaker, throughout time people have resisted scientific advancement. History is replete with the examples of fundamentalist religious leaders issuing scientific decisions based on absolutely no evidence.

It is deja vu all over again today with this current administration as they inject politics into the single most promising medical research of the century. The Bush administration is unfortunately not committed to research that would hasten medical discoveries, but rather, to hold science hostage to the Catholic vote.

Carl Rove, the President’s chief political adviser, is concerned about the views of the Catholic Church because the Catholic voters are seen as a swing vote in the elections. This administration has degraded medical research and the tremendous potential of embryonic stem cell research into an anti-abortion vote.

The White House is currently reviewing the matter. In other words, they are looking at the polls. “A responsible leader,” and this is a quote, “is someone who makes decisions based upon principles, not based upon polls or focus groups.” The New York Times reminds us that President Bush said those words a few days before Election Day. Perhaps he needs to be reminded.

Without a microscope, one cannot even see what this debate is all about. The center of the controversy is a microscopic cluster of cells stored in test tubes like this one. It is smaller than the period at the end of a sentence.

When Orrin Hatch says he can tell the difference between cells in the test tube and those in a woman’s body, then we know that this is a nonsense argument. We should continue this research.

GUTKNECHT AMENDMENT ALLOWS ACCESS TO REASONABLY-PRICED DRUGS FOR SENIORS

(Mr. Gutknecht asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. Gutknecht. Mr. Speaker, later today we are going to have a very heated debate about a simple amendment that I am going to offer to make it clear what the Congress intended last year in terms of prescription drugs and allowing seniors and other Americans access to drugs from other places.

Much of the debate is going to revolve around this chart and the issue of safety. I just want to talk about a couple of these items here. For Glucophage, a commonly-prescribed drug for diabetes, in the United States the average price is $30.12 for a 30-day supply. That same drug made in the same place and packaging costs $4.11.

Mr. Speaker, a lot of people are going to say, what about safety? What about safety? Well, there is not a single piece of evidence, not one piece of evidence, that anyone has been injured by bringing legal drugs back into the United States where they have a prescription. That is a fact.

It is also a fact that 4.4 percent of the fruit and produce that comes into this country every day is tainted with serious pathogens.

Mr. Speaker, we are going to have a chance to vote on this amendment. We are going to have to decide whether we are going to defend and explain this chart, and say that Americans should not have the access to legal drugs from legal countries around the world.

URGING THE PRESIDENT TO ALLOW STEM CELL RESEARCH TO PROCEED

(Mrs. Maloney of New York asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. Maloney of New York. Mr. Speaker, I urge the President to allow stem cell research to proceed.

Along with the gentlewoman from Maryland (Mrs. Morella) and many others in this Congress, we have introduced House Resolution 17 that calls on Federal funding of human pluripotent stem cell research to continue.

As the recent statements by a number of prominent Republicans, such as Andy Card and Tommy Thompson, have said, they have come out in support of stem cell research. They underscore that this should not be a partisan issue. After a lengthy public comment period on August 25, the NIH published guidelines on human pluripotent stem cell research. Additionally, they accepted applications for research projects through March, 2001.

However, President Bush has put a hold on this work, calling for a review of the guidelines. I say to the President that it is estimated that over 100 million Americans are living with diseases like Parkinson’s, Alzheimer’s, diabetes. These people could be helped by stem cell research. We need to support science. We need to support medical knowledge. We need to support stem cell research.

EMBRYONIC STEM CELL RESEARCH DESTROYS LIFE

(Mr. DeLay asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DeLay. Mr. Speaker, I rise in support of a fact about stem cell research, research that is ethical and which has been proven effective. The stem cell research I am referring to is derived from adults, umbilical cord blood, and placental blood, to name just a few sources. I, however, am not talking about stem cell research extracted from human embryos.

We can and are saving lives with stem cells gathered from adults even
We also have to increase supplies of energy and reduce our reliance on foreign oil. We have to improve our energy infrastructure, strengthen it, and give ourselves safe pipelines and modern transmission grids and refineries to get the energy where it needs to be.

We have a wonderful opportunity this summer to craft a policy important to the future of this country and to every citizen who pumps gas into their car or pays the family electric bill. We should seize that opportunity.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. COOKSEY). Although some minutes have passed since the remarks that prompt the Chair to mention it, the Chair must remind all Members that remarks in debate in the House may not include quotations of Senators, except in making legislative history on a pending measure.

FLAG PROTECTION AMENDMENT

Ms. SANCHEZ. Mr. Speaker, I rise today in support of House Joint Resolution No. 36, the flag protection constitutional amendment.

The flag stands for all of us in this wonderful country, and the honor we bestow upon it as our symbol is as great as the contributions each of us should hope to make for our Nation. If the Stars and Stripes could talk, I am sure that they would say, "I am what you make of me. It is up to you to keep me raised high and flying. I am what you make of me. It is up to you to keep me raised high and flying."

THE LAW AND ETHICAL STANDARDS DEMAND DISCONTINUATION OF FEDERAL FUNDING OF DESTRUCTIVE HUMAN EMBRYO RESEARCH

Mr. PENCE. Mr. Speaker, I consistently vote for this amendment because I believe that all Americans should be allowed to vote on whether to protect our flag.

CONGRESSional RECORD—HOUSE

July 11, 2001

COMMITTEE ON ENERGY AND COMMERCE IS CRAFTING BALANCED, LONG-TERM ENERGY POLICY

Mrs. WILSON. Mr. Speaker, the Committee on Energy and Commerce of the House today starts working on a comprehensive energy bill. It is going to be a balanced, long-term approach on energy policy for the Nation.

We have made wonderful strides in the last 20 years in conserving energy in this country. The refrigerator that we can buy today down at our local appliance store is one-third more efficient than it was in 1972.

We have a wonderful opportunity this summer to craft a policy important to the future of this country and to every citizen who pumps gas into their car or pays the family electric bill. We should seize that opportunity.

COMMITTEE ON ENERGY AND COMMERCE IS CRAFTING BALANCED, LONG-TERM ENERGY POLICY

Mrs. WILSON. Mr. Speaker, the Committee on Energy and Commerce of the House today starts working on a comprehensive energy bill. It is going to be a balanced, long-term approach on energy policy for the Nation.

We have made wonderful strides in the last 20 years in conserving energy in this country. The refrigerator that we can buy today down at our local appliance store is one-third more efficient than it was in 1972.
We should use adult stem cell research to cure these diseases. We should protect the most vulnerable. We should support life from conception to natural death.

This has long-term implications.

Mr. SHIMKUS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

Mr. HINCHENY, Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

Mr. HINCHENY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

The SPEAKER pro tempore (Mr. SHIMkus). Pursuant to House Resolution 183 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2330.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2330) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, with Mr. GOODLATTE in the chair.

The Clerk read the title of the bill.

Mr. GILMAN. Mr. Chairman, I appreciate the efforts of the gentleman from Texas (Mr. BONILLA) to provide assistance to our onion growers in Orange County, New York, who have incurred substantial crop losses due to the damaging weather-related conditions in 3 of the last 4 years.

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I would first of all like to say that I hope that the constituents back home of the gentleman from New York (Mr. GILMAN) understand how hard he has been working on this issue.

Mr. BONILLA. This is not something that, as the gentleman is presenting it to us today, we are hearing for the first time. The gentleman has done yeoman's work on bringing this issue to our attention; and we know it is a very serious problem.

It is going to be a difficult issue for us to deal with, but I do commit to the gentleman that we will do what we can and whatever might be possible between now and conference to help the growers back home.

Mr. BONILLA. Mr. Chairman, I thank the gentleman from Texas (Chairman BONILLA) for his encouraging words, and I look forward to working with him.

The CHAIRMAN. The Clerk will read.

The Clerk reads as follows:

In addition, export certification user fees authorized by 21 U.S.C. 381 may be credited to this account, to remain available until expended.

In addition, mammography user fees authorized by 42 U.S.C. 381(b) may be credited to this account, to remain available until expended.
CONGRESSIONAL RECORD—HOUSE

July 11, 2001

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of or used by the Food and Drug Administration, where not otherwise provided, $34,281,000, to remain available until expended (7 U.S.C. 2209b).

INDEPENDENT AGENCIES

Commodity Futures Trading Commission

For necessary expenses to carry out the provisions of the Commodity Exchange Act (7 U.S.C. 1 et seq.), including the purchase and hire of passenger motor vehicles; the rental of space (to include multiple year leases) in the District of Columbia and elsewhere; and not to exceed $25,000 for employment under 5 U.S.C. 3109, $70,700,000, including not to exceed $2,000 for official reception and representation expenses.

FARM CREDIT ADMINISTRATION

LIMITATION OF ADMINISTRATIVE EXPENSES

Not to exceed $36,700,000 (from assessments collected from insured institutions and from the Federal Agricultural Mortgage Corporation) shall be obligated during the current fiscal year for administrative expenses as authorized by law (7 U.S.C. 2294b). That this limitation shall not apply to expenses associated with receiverships.

TITLE VII—GENERAL PROVISIONS

Sec. 701. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for fiscal year 2002 under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed 379 passenger motor vehicles, of which 378 shall be for replacement only, and for the hire of such vehicles.

Sec. 702. Funds in this Act available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901–5902).

Sec. 703. Not less than $1,500,000 of the appropriations made for the Department of Agriculture in this Act for research and service work authorized by sections 1 and 10 of the Act (7 U.S.C. 221 et seq.), commonly known as the Bankhead-Jones Act), subtitle A of title II and section 302 of the Act of August 14, 1946 (7 U.S.C. 1621 et seq.), and all related provisions, shall be available in the manner provided in section 311, United States Code, shall be available for contracting in accordance with such Acts and chapter.

Sec. 704. The Secretary of Agriculture may transfer unobligated balances of funds appropriated by this Act or other available unobligated balances of the Department of Agriculture to the Working Capital Fund for the acquisition of plant and capital equipment necessary for the delivery of financial, administrative, and information technology services of primary benefit to the agencies of the Department of Agriculture (hereinafter referred to as the Board and herein referred to as the Department). Provided, That none of the funds made available by this Act or any other Act shall be transferred to the Working Capital Fund pursuant to this section shall be available to, or obligated by, the Board without the prior approval of the Committees on Appropriations of both Houses of Congress.

Sec. 705. New obligatory authority provided for in this Act shall remain available until expended: Animal and Plant Health Inspection Service, the contingency fund to meet emergency situations, authorized by the National Agricultural Resources Management and Innovative Systems Acquisition program, boil water program, up to 25 percent of the screwworm program, and up to $2,000,000 for grants associated with international cooperation offices; Food Safety and Inspection Service, field automation and information management project; Cooperative State Research, Education, and Extension Service, funds for competitive grants (7 U.S.C. 3405(b)); funds for the Research, Education and Economics Information System (REEIS), and funds for the Native American Institutions Endowment Fund; Farm Service Agency, salaries and expenses funds made available to county committees; Foreign Agricultural Service, the Animal Health Information and Training program and up to $2,000,000 of the Foreign Agricultural Service appropriation solely for the purpose of offsetting fluctuations in international currency exchange rates, subject to documentation by the Foreign Agricultural Service.

Sec. 706. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Sec. 707. Not to exceed $50,000 of the appropriations made for the Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act (7 U.S.C. 5901–5902).

Sec. 708. No funds appropriated by this Act may be used to pay negotiated indirect costs on cooperative agreements or similar arrangements entered into by the United States Department of Agriculture and nonprofit institutions in excess of 10 percent of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate payment of indirect costs on grants and cooperative agreements when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

Sec. 709. None of the funds in this Act shall be available to restrict the authority of the Commodity Credit Corporation to lease space for its own use or to lease space on behalf of the Secretary of Agriculture when such space will be jointly occupied.

Sec. 710. None of the funds in this Act shall be available to be charged against competitive agricultural research, education, or extension grant awards issued by the Cooperative State Research, Education, and Extension Service that exceed 19 percent of total Federal funds provided under each award: Provided, That notwithstanding section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310), funds provided by this Act for grants awarded competitively by the Cooperative State Research, Education, and Extension Service shall be available to pay full allowable indirect costs for each grant awarded under section 9 of the Small Business Act (15 U.S.C. 636). Provided, That notwithstanding any other provision of law, none of the funds appropriated or otherwise made available in this Act may be used to transfer to the Treasury or to the Federal Financing Bank any unobligated balance of the Rural Telephone Bank telephony liquidating account which is in excess of current requirements and such balance shall receive interest as set forth for financial accounts in section 505(c) of the Federal Credit Reform Act of 1990.

Sec. 711. Of the funds made available by this Act, not more than $1,800,000 shall be used to cover necessary expenses of activities related to all advisory committees, panels, commissions, and task forces of the Department of Agriculture, except for panels used to comply with negotiated rule making and panels used to evaluate competitively awarded grants.

Sec. 712. None of the funds appropriated by this Act may be used to carry out section 410 and section 30 of the Poultry Products Inspection Act (21 U.S.C. 471).

Sec. 713. Notwithstanding section 606C of the Agricultural Marketing Service, the Grain Inspection, Packers and Stockyards Administration, the Animal and Plant Health Inspection Service; and the food safety activities of the Food Safety and Inspection Service may use cooperative agreements to reflect a relationship between the Agricultural Marketing Service; the Grain Inspection, Packers and Stockyards Administration; the Animal and Plant Health Inspection Service; or the Food Safety and Inspection Service and a state or cooperators to carry out agricultural marketing programs, to carry out programs to protect the nation's animal and plant resources, or to carry out educational programs or special studies to improve the safety of the nation's food supply.

Sec. 714. Notwithstanding any other provision of law (including provisions of law requiring competition), the Secretary of Agriculture may enter into cooperative agreements (which may provide for the acquisition of goods or services, including personal services) with a State, political subdivision of a State, or agency thereof, private agency, organization, or any other person, if the Secretary determines that the objectives of the agreement will: (1) serve a mutual need of the parties to the agreement in carrying out the programs administered by the Natural Resources Conservation Service; and (2) all parties will contribute resources to the accomplishment of these objectives: Provided, That Commodity Credit Corporation funds obligated for such purposes shall not exceed the level obligated by this Act to the Federal Communications Commission for such purposes in fiscal year 1998.

Sec. 715. None of the funds in this Act may be used to retain more than 5 percent of the Class A stock of the Rural Telephone Bank or to maintain any account or subaccount within the accounting records of the Rural Telephone Bank the creation of which has been authorized by law: Provided, That notwithstanding any other provision of law, none of the funds appropriated or otherwise made available in this Act may be used to transfer to the Treasury or to the Federal Financing Bank any unobligated balance of the Rural Telephone Bank telephony liquidating account which is in excess of current requirements and such balance shall receive interest as set forth for financial accounts in section 505(c) of the Federal Credit Reform Act of 1990.

Sec. 716. Of the funds made available by this Act, not more than $180,000 shall be used to cover necessary expenses of activities related to all advisory committees, panels, commissions, and task forces of the Department of Agriculture, except for panels used to comply with negotiated rule making and panels used to evaluate competitively awarded grants.
July 11, 2001

CONGRESSIONAL RECORD—HOUSE

SEC. 719. None of the funds appropriated or otherwise made available by this Act to the Department of Agriculture shall be used to transmit or otherwise make available to any non-Department of Agriculture employee questions or responses to questions that are a result of information collected for the appropriations hearing process.

SEC. 720. None of the funds made available to the Department of Agriculture by this Act may be used to acquire new information technology systems or significant upgrades, as determined by the Office of the Chief Information Officer, without the prior approval of the Chief Information Officer and the concurrence of the Executive Information Technology Investment Review Board: Provided, That notwithstanding any other provision of law, none of the funds appropriated or otherwise made available by this Act may be transferred to the Office of the Chief Information Officer without the prior approval of the Committees on Appropriations of both Houses of Congress.

SEC. 721. (a) None of the funds provided by this Act or any previous Appropriations Acts to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2002, or provided from any account in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for programs or projects or any activities of funds which: (1) creates new programs; (2) eliminates a program, project, or activity; (3) increases fees or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates an office or employees; (5) reorganizes offices, programs, or activities; or (6) contracts out or privatises any functions or activities presently performed by Federal employees; unless the Committees on Appropriations of both Houses of Congress are notified 15 days in advance of such reprogramming of funds.

(b) None of the funds provided by this Act, or provided by previous Appropriations Acts to the agencies funded by this Act that remain available for obligation or expenditure in fiscal year 2002, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for programs or projects or any activities of funds which: (1) creates new programs; (2) eliminates a program, project, or activity; (3) increases fees or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates an office or employees; (5) reorganizes offices, programs, or activities; or (6) contracts out or privatises any functions or activities presently performed by Federal employees; unless the Committees on Appropriations of both Houses of Congress are notified 15 days in advance of such reprogramming of funds.

(c) The Secretary of Agriculture shall not approve or otherwise make available by this Act any other Act shall be used to pay the salaries and expenses of personnel who prepare or submit appropriations language as part of the President’s Budget submissions for programs under the jurisdiction of the Appropriations Subcommittees on Agriculture, Rural Development, Food and Drug Administration, and the Department of Agriculture that assumes revenues or reflects a reduction from the previous year due to user fees proposals that have not been enacted into law prior to the submission of the Budget unless such Budget submission identifies which additional spending reductions should occur in the event the user fees proposals are not enacted into law prior to the date of the meeting of a committee of conference for the fiscal year 2003 appropriations Act.

SEC. 722. None of the funds made available by this Act or any other Act may be used to pay the salaries and expenses of personnel to carry out section 793 of Public Law 104–167, the “Domestic Student Loan Program Act of 2000”.$230,000,000.

SEC. 723. With the exception of funds needed to administer and conduct oversight of grants awarded and obligations incurred prior to enactment of this Act, none of the funds made available by this Act or any other Act may be used to pay the salaries and expenses of personnel to carry out section 793 of Public Law 104–167, the “Domestic Student Loan Program Act of 2000”.$230,000,000.

SEC. 724. None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel to carry out the provisions of section 401 of Public Law 105–185, the Initiative for Future Agriculture and Food Systems (7 U.S.C. 7621).

SEC. 725. None of the funds appropriated by this Act or any other Act shall be used to pay the salaries and expenses of personnel to carry out the provisions of section 1204M of the Food Security Act of 1985 (16 U.S.C. 3839bb).

SEC. 726. None of the funds appropriated by this Act or any other Act shall be used to pay the salaries and expenses of personnel who prepare or submit appropriations language as part of the President’s Budget submissions for programs under the jurisdiction of the Committees on Appropriations of both Houses of Congress.

SEC. 727. None of the funds made available by this Act or any other Act may be used to pay the salaries and expenses of personnel to carry out the provisions of section 375(e)(6)(B) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2204f).

SEC. 728. None of the funds made available by this Act or any other Act shall be used to pay the salaries and expenses of personnel to carry out section 412 of Public Law 105–185, the “Initiative for Future Agriculture and Food Systems”.$4,000,000.

SEC. 729. None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel to carry out the provisions of section 520 of the Housing Act of 1949 (42 U.S.C. 1461).

SEC. 730. Notwithstanding any other provision of law, the City of Cabot, Arkansas, and the City of Waterford, Michigan, shall be eligible for loans and grants provided through the Rural Community Advancement Program.

SEC. 731. Notwithstanding any other provision of law, the Secretary shall consider the City of Casa Grande, Arizona, as meeting the requirements of a rural area in section 520 of the Housing Act of 1949 (42 U.S.C. 1461).

SEC. 732. Notwithstanding any other provision of law, the Secretary shall consider the City of Saint Joseph, Missouri, as meeting the requirements of a rural area in section 520 of the Housing Act of 1949 (42 U.S.C. 1461).

SEC. 733. Notwithstanding any other provision of law, the Secretary shall consider the City of Hollister, California, as meeting the requirements of a rural area for the purposes of housing programs in the rural development mission areas of the Department of Agriculture.

SEC. 734. Notwithstanding any other provision of law, none of the funds made available by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a possible reorganization to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 735. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a possible reorganization to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 736. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a possible reorganization to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 737. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a possible reorganization to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 738. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a possible reorganization to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 739. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a possible reorganization to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 740. (a) Assistance Available.—The Secretary of Agriculture may use up to $150,000,000 of funds of the Commodity Credit Corporation to make payments as soon as possible after the date of the enactment of this Act to apple producers to provide relief for the loss of markets for their 2000 crop.

(b) Payment Basis.—The amount of the payment to a producer under subsection (a) shall be based on a per ton basis to each qualifying producer’s 2000 production of apples, except that the Secretary shall not
make payments for that amount of a particular farm's apple production that is in excess of 20,000,000 pounds.

(c) DUPLICATIVE PAYMENTS.—A producer shall be ineligible for payments under this section with respect to a market loss for apples to the extent of that amount that the producer received as compensation or assistance for the same loss under any other Federal program other than under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.).

(d) OTHER TERMS AND CONDITIONS.—The Secretary shall not establish any terms or conditions for producer eligibility, such as limits based upon gross income, other than those specified in this section.

(e) APPLICABILITY.—This section applies only with respect to the 2006 crop of apples and producers of that crop.

Mr. BONILLA (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill through page 74 line 21 be considered as read, printed in the Record, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT NO. 12 OFFERED BY MS. KAPTUR

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 12 offered by Ms. KAPTUR:
Add before the short title at the end of the following new section:

Sec. 700c-11. (a) Of the amount provided in title I under the heading “extensive activities,” $500,000 shall be available to support the National 4–H Program Centennial Initiative, as authorized by the Act entitled “An Act to authorize funding for the National 4–H Program Centennial Initiative”.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from Ohio (Ms. KAPTUR) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I intend to withdraw the amendment after a brief discussion due to an understanding with the gentleman from Texas (Mr. BONILLA) to look for funds for the celebration of the centennial anniversary of National 4-H as we move toward conference.

Also, I do this out of respect for the National 4-H leadership that has committed not to have those funds come at the expense of existing extension programs which are already stretched.

Our amendment would provide funding pursuant to an authorization that was approved by the House 2 weeks ago when we voted for S. 657, the National 4-H Program Centennial Initiative. The centennial will occur next year, but planning obviously needs to begin immediately. In fact, the President signed the relevant legislation yesterday.

That measure was a companion bill to H.R. 1388, introduced by the gentleman from Iowa (Mr. GANSKE). That measure provided $25,000,000 for the National 4-H Council, with the expectation that those funds would be matched by private contributions, and it also assumed the Secretary could use the Fund for Rural America to finance some of the operations of the 4-H Program. Otherwise, there is money for neither of these options in the bill.

Now, I think every American has been touched in some way by 4-H. It operates in over 3,000 counties in each of our States and provides truly constructive opportunities to young men and women in both rural and urban areas. Just the fact that this magnificent organization has existed for a century is something all Americans can truly celebrate.

But should this appropriation bill move forward without at least beginning to address the funding issue, there is the risk that the support for the centennial initiative would come too late. The amount today that is in my amendment, $500,000, is only one-tenth of the amount that is necessary, but it would get the activity going and demonstrates we are serious about full support.

Over the coming months, between now and the final conference on the bill, proponents will be in a position to work to identify the right amount of resources needed for the program and to secure additional funds for this bill. While today’s amendment suggests that $500,000 out of existing extension funds could be used, the long-term intention is to obtain an increase for extension to finance the activity.

So, Mr. Chairman, in withdrawing this amendment, let me just say that this Member, and I think the entire membership of the Body in voting for this centennial celebration, would want to assure the success of all activities related to it. The planning that must begin this year and all the celebrations in the year 2002, will touch thousands and thousands of lives of young people in our communities and all the good works that they do. The 4-H deserve the full support of this Congress, and we look forward to working with the chairman as we move toward conference.

The CHAIRMAN. Without objection, the amendment of the gentlewoman from Ohio (Ms. KAPTUR) is withdrawn. There was no objection.

Mr. BONILLA. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 5 minutes.

Mr. BONILLA. Mr. Chairman, just briefly, I would like to acknowledge the gentlewoman’s hard work on this issue and commit to working with her as we move to conference to addressing the needs of our good 4-H people around the country.

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Chairman, I thank the chairman very much for his openness and willingness to work with us as we move toward conference.

AMENDMENT OFFERED BY MS. PELOSI

Ms. PELOSI. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. PELOSI:
At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 700c-11a. (1) agricultural commodities to—
(A) individuals with Human Immunodeficiency Virus and Acquired Immune Deficiency Syndrome in the communities,
(B) households in the communities, particularly individuals caring for orphaned children;
(2) agricultural commodities monetized to provide other assistance (including assistance under microcredit and microenterprise programs) to create or restore sustainable livelihoods among individuals in the communities, particularly individuals caring for orphaned children.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from California (Ms. PELOSI) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from California (Ms. PELOSI).

Ms. PELOSI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as a member of the Committee on Appropriations, I am pleased to rise and join the gentlewoman from North Carolina (Mrs. CLAYTON), a member of the authorizing committee, the Committee on Agriculture, in offering this amendment to ensure continued funding to reduce the burden of hunger for HIV/AIDS patients and children orphaned by AIDS in developing world.

I commend the gentlewoman from North Carolina (Mrs. CLAYTON) for her leadership on this issue. She worked with us on this issue in the Committee on Agriculture as well as a member of the Congressional HIV Task Force. She developed this proposal, and her leadership has been very important, because this amendment affects so many millions of families worldwide.
I would like to thank the gentleman from Texas (Chairman Bonilla) and the ranking member, the gentlewoman from Ohio (Ms. Kaptur), for their leadership on the subcommittee and their support for this amendment.

Mr. Chairman, I will submit my statement for the record, but I just want to make two quick points. Poor nutrition accelerates the progression of HIV to AIDS, and an adequate food supply is critical to any prevention and care strategy. When a family member becomes infected with HIV, household food production is undermined, limited financial resources are used for medical costs rather than crop production, and family members are forced to care for the sick, rather than work in the fields.

Starting last year, $25 million was provided through the Food for Peace program to reduce the burden of hunger for families impacted by AIDS through agricultural improvement, maternal and child health programs and direct distribution of food commodities. Today's amendment will continue this vital funding. I wish that we could have the number be higher in the future, but the $25 million called for here is a very, very important addition. I thank my colleagues for their support of this important amendment.

Mr. Chairman, I am pleased to yield 1 minute to the gentlewoman from Ohio (Ms. Kaptur), the very distinguished ranking member of the subcommittee.

Ms. Kaptur. Mr. Chairman, I want to thank the gentlewoman from North Carolina (Mrs. Clayton), the real author of this amendment, and commend her for her tremendous leadership.

Mrs. Clayton. Mr. Chairman, I want to thank the gentlewoman from California for her leadership on this and also her continuous and long-standing leadership in fighting AIDS.

This is a unique opportunity to do good while doing well. The Food for Peace program allows us to make contributions all across the world where there is suffering. What better effort than to direct $25 million of the Food for Peace program to interventions and make the quality of life of families who are suffering from AIDS, of children who are orphaned from AIDS, to make this as an opportunity.

As the gentlewoman from California (Ms. Pelosi) said already, this program is available to be a prevention intervention program. We are increasingly aware that the medication alone does not improve health by itself. Not only that, but because of the health condition of the individual, their productivity and ability to afford food has been decreased drastically.

I am very happy that the Republicans as well as the Democrats, all support this, and I want to commend the chairman for his support of this amendment.

Mr. Bonilla. Mr. Chairman, I ask unanimous consent to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. Bonilla) is recognized for 5 minutes.

Mr. Bonilla. Mr. Chairman, I rise to simply state that I am not opposed to the gentlewoman's amendment. A similar provision was included in the conference agreement last year as section 743 of our bill, without any objection of which I am aware. I would hope that we can quickly move to a vote on this issue, and commend the gentlewoman's work on this very important issue.

Ms. Pelosi. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the distinguished chairman of the committee for his words of cooperation.

Mr. Chairman, I am pleased to yield 1 minute to the gentlewoman from California (Ms. Kaptur), the very distinguished ranking member of the subcommittee.

Ms. Kaptur. Mr. Chairman, I want to compliment the wonderful, wonderful gentlewoman from California (Ms. Pelosi) and the gentlewoman from North Carolina (Mrs. Clayton). Would I not know that the two of them would do something this significant? What they are proposing is only to continue what the House had agreed to do in conference last year, and that is to use the food power of this country to help alleviate suffering around the world, and certainly the plague of HIV/AIDS.

Their effort uses the power of food in the most creative way possible. Yet the sponsors of the amendment and all who support it should keep in mind that the President's budget proposes a review of the 416 programs with an eye toward reducing their availability. So, those of us who understand these programs need to be prepared to speak out before these programs are eliminated or reduced.

I want to thank the gentlewomen for bringing this up before the full House to make sure that we effectively use the dollars that are there, and not permit the food surplus of this country to be subscribed in a way that would not be made available to those who truly need it globally. I support them in their efforts.

Ms. Pelosi. Mr. Chairman, I rise to join Representative Clayton in offering this amendment to ensure continued funding to reduce the burden of hunger for HIV/AIDS patients and children orphaned by AIDS in the developing world. I commend Representative Clayton for her leadership on this issue, which affects so many millions of families worldwide. I would also like to thank Ranking Member Kaptur and Chairman Bonilla for their leadership on the Subcommittee and their support for this amendment.

I want to thank the gentlewomen for their tremendous leadership on the subcommittee and their support for this amendment.

We have all heard the staggering statistics—36 million people infected with HIV, 22 million deaths from AIDS, and nearly 14 million children orphaned. Archbishop Desmond Tutu has said, "AIDS in Africa is a plague of biblical proportions. It is a holy war that we must win." It is indeed, and the battles in this war occur on many fronts.

The impact of HIV/AIDS on poor families goes beyond the pain that accompanies the loss of a loved one. AIDS strikes people during their most productive years, and family income is cut by more than half when a parent is sick.

Household food production is undermined as limited financial resources are used for medical costs rather than crop production, and family members are forced to care for the sick rather than work in the fields. Many families must mortgage their land and sell productive assets, including livestock, to pay for food and medicine.

The U.S. has sought to reduce the burden of hunger that results from families' diminished ability to produce food. Starting last year, $25 million was provided through the Food for Peace program to improve food security through agricultural improvement, maternal and child health programs, and direct distribution of food commodities.

Today's amendment continues this vital funding. I thank my colleagues for their support of this important amendment.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from California (Ms. Pelosi).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HINCHHEY

Mr. HINCHHEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. Hinchey: Insert before the short title the following section:

Sect. __. None of the funds appropriated or otherwise made available by this Act shall be used to eliminate the two river navigator positions, including the contract position, for the Hudson River and Upper Susquehanna/Lackawanna Rivers or to alter the tasks assigned to the persons filling such positions.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from New York (Mr. Hinchey) and a Member opposed each will control 15 minutes.

The Chair recognizes the gentleman from New York (Mr. Hinchey).

Mr. HINCHHEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is an amendment that ensures that two Federal positions designated as river navigator positions, including the contract position for the Hudson River and the Susquehanna River, will continue to function, and that they will be funded in this appropriations bill.

I want to express my appreciation to the chairman of the subcommittee, the
gentleman from Texas (Mr. BONILLA), for working with us on this very important subject. I also want to express my appreciation to the gentleman from Pennsylvania (Mr. KANJORSKI), who has also been very deeply concerned about the continuation of these positions, particularly in his case the position of river navigator for the Susquehanna River, a river that flows through Pennsylvania as well as New York.

I believe that the language that we have arrived at here is language which is acceptable to the chairman of the subcommittee, and that the amendment will be accepted by him.

Before I ask him that, I just want to make the point that these two positions are very, very important. What they do is they coordinate all Federal programs to buy these two rivers. These two rivers are two very important rivers, the Susquehanna, of course, feeding into the Chesapeake Bay, and there are a great many Federal programs, including programs consistent with the Federal Clean Water Act and others, that are very important to these rivers and the people who live along them. Therefore, Federal coordination of all programs associated with these rivers is very important.

I thank the chairman of our subcommittee, the gentleman from Texas, for recognizing that importance, and I want to express to the gentleman my appreciation for the ability to work with him and express my pleasure in having had the opportunity to work with him on this important issue.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent to strike the last word.

The CHAIRMAN. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. BONILLA. Mr. Chairman, I want to acknowledge the good amendment that the gentleman from New York is offering, and tell him that we are delighted to accept the amendment.

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Chairman, I just want to thank the chairman for his support of our very able colleague from New York who has such a persevering record on attempting to get the American Heritage Rivers Initiative fully operational for the city of New York and for rivers immediately adjacent to and in his district, so that these local river conservation plans become more than plans, but, in fact, help us to preserve the precious freshwater resource that is ours alone in this quadrant of the United States.

I would have to just say as the ranking member on the subcommittee, no Member has fought harder for this program than the gentleman from New York (Mr. HINCHHEY), and the people of New York have sent the right man here to represent the people of New York.

Mr. HINCHHEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to thank the gentlewoman from Ohio (Ms. KAPTUR), the ranking member on our Subcommittee on Agriculture of the Committee on Appropriations, for those very kind words, and for her diligent and very effective work on the committee. Once again, I want to extend my appreciation to the chairman of our subcommittee and also to the staff that works under his direction for their assistance in putting this amendment together and for its successful acceptance.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HINCHHEY).

The amendment was agreed to.

Mr. SANDERS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 20 offered by Mr. SANDERS:

At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 7. None of the amounts made available in this Act for the Food and Drug Administration may be used for enforcing section 801(dd)(1) of the Federal Food, Drug, and Cosmetic Act.

Mr. SANDERS. Mr. Chairman, this tripartisan amendment is offered by the gentleman from Vermont (Mr. SANDERS) and a Member opposed each will control 20 minutes.

The CHAIRMAN. The chairman recognizes the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this tripartisan amendment is offered by the gentleman from New York (Mr. CROWLEY), the gentlewoman from Connecticut (Ms. DELAUNO), the gentleman from California (Mr. ROHRABACHER), and the gentlewoman from Texas (Mr. PAUL).

It is about lowering the cost of prescription drugs so that the American people do not have to pay far the highest prices in the world for prescription drugs. It is about ending the national disgrace of tens of thousands of American citizens in New England, the Midwest, the Northeast, from having to go across the Canadian border in order to purchase the same exact prescription drugs that they buy at home for 50 percent of the cost or 60 percent of the cost or 20 percent of the cost.

It is about ending the absurdity of American citizens in California, Texas, Arizona, and the southern parts of our country of having to go to Mexico for the same exact reason.

It is about allowing women in the United States who are fighting for their lives against breast cancer so they do not have to pay 10 times more than the women in Canada for Tamoxifen, a widely prescribed breast cancer drug.

It is about telling the drug companies that they cannot continue to charge the American people $1 for drugs when those same exact products are sold in Germany for 60 cents, France for 51 cents, and Italy for 49 cents, the same exact products made by the same exact companies.

Mr. Chairman, for decades now, good people, Democrats, Republicans, in the House and in the Senate, have attempted to do something about lowering the cost of prescription drugs in this country so that the American people do not have to pay outrageously high prices for their medicine, so that doctors do not have to write out prescriptions knowing that their patients cannot afford to fill them. But year after year, with lies, with scare tactics, with well-paid lobbyists and massive amounts of campaign contributions the pharmaceutical industry always wins. They never lose.

In the last three years alone the drug companies have spent $200 million in campaign contributions, lobbying and political advertising. In the last election cycle they doubled the amount of campaign contributions from 9 million to $18 million, and I have no doubt that they are prepared to double it again.

The issue today is not only the high cost of prescription drugs. The issue today is whether the Congress has the guts to stand up for its constituents, people who are being ripped off, people who are dying and suffering because they cannot afford sky-high prescription drug prices; or do we cave in again to the pharmaceutical industry that is spending so much money trying to buy our votes.

The pharmaceutical industry has endless amounts of money. Year after year the industry sits at the top of the charts in profits. The top 10 companies last year made $27 billion in profits. They have a lot of money to spend on Congress. Their top executives, well, they have a lot of money to spend too.

A report came out yesterday from Families U.S.A., which talked about the compensation of executives in the pharmaceutical industry.

At a time when Americans die and suffer because they cannot afford prescription drugs, you might be interested to know that the CEO of Bristol-Myers Squibb has unexercised stock options of over $227 million. Elderly people cannot afford prescription drugs, and this CEO has unexercised stock options of over $227 million. Pfizer has $130 million in unexercised stock options. Merck has $10 million, and on and on it goes.

Mr. Chairman, today in a tripartisan amendment, the gentlewoman from
Congressional Record—House

July 11, 2001

Connecticut (Ms. DeLAURO), the gentleman from New York (Mr. CROWLEY), the gentleman from California (Mr. Romano), the gentleman from Texas (Mr. PAUL), and I are offering an amendment that is exactly the same as the Crowley amendment that won overwhelmingly in the House last year by a vote of 363 to 12.

As was the case last year, this amendment will serve as a place-holder that will allow the Senate and conference committees to address the pricing loopholes contained in last year's bill.

Mr. Chairman, a lot of people here talk about free trade. In a globalized economy where we import millions of tons of beef, pork, vegetables, and all kinds of food products from virtually every country on earth, it is high time that we take notice of the potentially dangerous drug company practices of reimportation of prescription drugs in this country.

Prescription drug distributors and pharmacists should be able to purchase and sell FDA safety-approved medicines at the same prices as they are bought and sold in Canada, England, and every other major country. The passage of reimportation could lower the cost of medicine in this country by 30 to 50 percent and enable Americans to purchase at a discounted rate, the cost of medicine in this country.

The FDA, and the administration strongly oppose this language and any effort to purchase at a discounted rate, the cost of medicine in this country.

Mr. Chairman, I reserve the balance of my time.

The gentleman seeks to solve one problem by creating another, and I am going to cite some very, very serious testimony here from the Food and Drug Administration that was presented in front of the gentleman from Pennsylvania (Mr. GREENWOOD) and his Subcommittee on Oversight and Investigations last month.

At the hearing, the FDA stated, and I quote: "From a public health standpoint, importing prescription drugs for personal use is a potentially dangerous problem by creating another, and I am in opposition to the amendment, and I utterly believe that we need to control the cost of prescription drugs for seniors; it is an issue that we could rally around. But no, once again, we are being fought by the pharmaceutical industry. They oppose reimportation. That poses the question: What exactly are they for? They are against the Medicare prescription drug benefit for all seniors. They are opposed to the Allen bill that would allow for pharmacists to be able to purchase at a discounted rate, the pharmaceuticals that Germany, France, Britain, and others can purchase. They are against across-the-board price reductions. They never tell us what they are for."

In fact, the only thing they seem to be for is extending their patents and seeing their profits increase. Last year, the top five pharmaceutical companies earned $26 billion in profits. They oppose this amendment because the bill might cut into its considerable profit margin.

Mr. Chairman, there are opponents of this amendment who raise the safety issue. The fact is that reimportation is something that has worked for years in Europe. Twenty-five percent of drugs consumed in European countries are reimported.

Mr. Chairman, I reserve the balance of my time.

The gentleman from Louisiana (Mr. TAUZIN), the former FDA Commissioner under President Bush and Clinton, stated that U.S.-licensed pharmacists and wholesalers would be able to safely import quality prescription drugs. He believes the importation of prescription drugs can be done without causing a greater health risk to American consumers.

Let me just say that GlaxoWellcome is a British company. They send drugs to the United States, and they are perfectly well approved.

Mr. BONILLA. Mr. Chairman, I yield 2½ minutes to the distinguished gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, I absolutely believe that we need to control the cost of prescription drugs for seniors; but this is an allided way to do it. I understand that the people who speak for this amendment are well motivated, but the fact is that they run the risk because they are tackling this issue indirectly rather than directly. They run the risk of allowing large numbers of adulterated drugs into this country.

One would think that this is a goal that we could rally around. But no, once again, we are being fought by the pharmaceutical industry. They oppose reimportation. That poses the question: What exactly are they for?

They are against the Medicare prescription drug benefit for all seniors. They are opposed to the Allen bill that would allow for pharmacists to be able to purchase at a discounted rate, the pharmaceuticals that Germany,
the chairman of the Committee on Energy and Commerce, and the gentleman from Michigan (Mr. Dingell), one rank and various other members of the committee, which says the following: "Despite anybody's best intention, if the Sanders amendment becomes law, our citizens will have no idea whether the source of their pills is an FDA-approved facility or an unregulated warehouse rented for the weekend by big business counterfeiters and larcenists seeking to penetrate the U.S. market. Drug counterfeiters present a severe and growing threat to the health and safety of the United States consumers."

If we want to deal with this problem, in my view, the correct way is to support the Allen legislation, because that attacks this issue directly. It directly lowers the prices, so it is charged to seniors; it does not force seniors to have to rely on questionable products introduced into this country by larcenists and winds up threatening the health of senior citizens.

Mr. Chairman, I urge a "no" vote on this amendment.

Mr. SANDERS, Mr. Chairman, just as a point of fact, Donna Shalala did not implement last year because of safety. It had nothing to do with safety; it had to do with pricing loopholes.

Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. GUTKNECHT), who has done an excellent job on this issue.

□ 1215

Mr. GUTKNECHT. Mr. Chairman, I thank the gentleman from Vermont for yielding time to me. I want to show a couple of charts, because we are going to have several debates. This amendment is somewhat broader than the one that I have drafted, but it really revolves around a couple of important points.

One is the issue of price. I do not think anybody here today is going to dispute this chart. I did not make this chart. This was done by the Life Extension Foundation. The information is about 2 weeks old.

If we compare what Americans pay to what Europeans pay, and we are talking about Europe here, not Mexico, not Third World countries, but we are talking about Switzerland and Germany, where they do not have price controls, at some point we are going to have to explain to our constituents why we stand illy by and allow this chart to exist.

The issue they are going to raise, and it is going to be a red herring, is safety. Safety. Understand this, Mr. Chairman, every day millions of pounds of raw meat and vegetables come into this country, and we have checked with the FDA, it is the Food and Drug Administration, their own study in 1999 said that 4.4 percent of the produce coming into the United States has dangerous pathogens, including 3.3 percent have salmonella.

Do Members know what can happen if we get salmonella? We can get real sick. In fact, we can die. That is every day that is coming into the United States. Yet, there is no known scientific study where consumers in the United States have been injured importing legal drugs from G-8 countries, not one. As a matter of fact, if we had heard that, it would be all over. I suspect the pharmaceutical industry would have that over every newspaper and on television.

The truth of the matter is that there is almost no risk to consumers to bringing legal drugs back into the United States.

They are going to talk about illegal drugs. Nothing in the Sanders amendment, about legal drugs, anything that is going to be discussed today is about legalizing illegal drugs. We are not talking about the Medellín drug cartel, which incidentally does ship billions of dollars worth of illegal drugs into the United States, because the FDA is unable to do almost anything about it. What we are talking about today is law-abiding citizens that have legal prescriptions that are buying FDA-approved drugs from other countries.

If Members cannot explain that earlier chart, they should vote for this amendment and they should vote for my amendment.

Mr. BONILLA, Mr. Chairman, I yield 1 minute to the distinguished gentleman from Pennsylvania (Mr. GREENWOOD), who is the chairman of the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce.

Mr. GREENWOOD. Mr. Chairman, I thank the gentleman for yielding time to me. I applaud the motives of the makers of the amendment. I voted for the measure of the gentleman from Minnesota (Mr. GUTKNECHT) last year. I have looked into the issue a lot further since then and now oppose it.

The previous speaker talked about the ability to assure that these drugs are safe. Our seniors need safe and cost-effective drugs, affordable drugs.

Here is what we found out. Institutions like this, counterfeiters, are able to produce drugs in vermin-filled, filthy, and unhygienic conditions. This is what they produce. They produce drugs, counterfeit drugs, that look exactly like the real thing. There is another example of that that we will put up of a drug that looks exactly like ours.

The point of the matter is, if we want seniors to have affordable drugs and safe drugs, help is on the way. This morning's Washington Post says, "Bush Has Pharmacy Discount Card Plan." We are on the verge of providing senior citizens affordable drugs. We can assure that they are safe, and they are not dangerous drugs that are imported from rat-infested, filthy laboratories like this one.

Mr. SANDERS. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. ROHRABACHER), our cosponsor.

Mr. ROHRABACHER. Mr. Chairman, I rise in strong support of the Sanders amendment. We have to take a look at the substance here, instead of trying to be diverted away from the central point of what is going on by scare tactics.

I do not know if any Members have had calls come to their office last night, but I had calls. My office was flooded with calls from people who had been told that the Sanders amendment meant that marijuana and heroin and all sorts of drugs would be permitted to flow across the border. That type of across-the-board bordering that is so important to the health of the American people as the issue that we are discussing today.

It appears that the people on the other side of this issue are so afraid of the actual facts that they have succumbed to this type of scare tactic and dishonesty. That should play no part of this debate.

Let me note that we are being told that there will be a few Americans who will be hurt if we pass the Sanders amendment because some people will get hold of counterfeit drugs, some people will get hold of drugs that are not exactly regulated correctly and produced correctly.

Yes, a few Americans might be hurt, and let us admit that. But what we are talking about is the vast number of Americans who will be hurt if they cannot afford to buy drugs. Certainly the number of people who will be hurt is far less than what they would have to pay in the United States.

This bill permits people, American citizens, and especially those who live near the borders of another country, to go across those borders and buy drugs that are being sold at a cheaper rate. Sometimes we have seen it to be half as much, a third as much, sometimes one-quarter or 20 percent the price across-the-board. If there is a danger less than what they would have to pay in the United States.

It makes no sense for us to talk about globalizing the economy and globalizing the world economy without letting our people benefit from the competitive advantages, the consumers' competitive advantages in dealing on an international market.

We believe, okay, in free trade. We believe in a competitive market and a global market. Let us let the American consumer benefit from that. What will happen if we pass this amendment is that there will be pressures, competitive and market pressures, on our own
drug producers here in the United States to lower the price of their product in the United States as well. By defeating the Sanders amendment, we are not protecting anybody. What we are doing is keeping the prices high and protecting the pharmaceutical companies from competition.

I like the pharmaceutical companies, and I appreciate the good job that they have done for the American people and for the people of the world in developing new drugs. But that does not mean that they should be free of competition. That does not mean that they should be able to have differential pricing in one country versus another.

Let us stand up for the American people and also stand up for competition at the same time.

Mr. BONILLA. Mr. Chairman, I yield myself some time to the gentleman from Minnesota (Mr. GUTKNECHT) a moment ago that in this letter that comes from the gentleman from Louisiana (Chairman TAUZIN), the gentleman from Michigan (Mr. DINGELL), and other subcommittee chairs, the gentleman from Pennsylvania (Mr. GREENWOOD) and the gentleman from Florida (Mr. DEUTSCH), it points out clearly, the ALS Association, the National Prostate Cancer Coalition, the Cystic Fibrosis Foundation, the Pancreatic Cancer Action Network, the National Kidney Cancer Association, the National AIDS Treatment Advocacy Project, all of these groups are adamantly opposed to the Sanders amendment.

Mr. Chairman, I yield 2 minutes to the distinguished gentleman from North Carolina (Mr. BURR).

Mr. BURR of North Carolina. Mr. Chairman, I think the gentleman for yielding time to me.

Mr. Chairman, this is not about bringing illegal drugs in. This is about whether we are going to withstand the gold standard of the Food and Drug Administration in the United States of America.

In 1997, this House in a bipartisan way, and as a matter of fact, under suspended rules in an unanimous vote, voted to modernize the Food and Drug Administration. The one vigilant thing that every Member said was that we are going to defund any, any and all reviews at our borders of reimportation. The gentleman from Pennsylvania (Mr. GREENWOOD) just showed the awful conditions where drugs are manufactured, where they look identical, where they are packaged identically. Today the DEA, the FDA, the Customs Department, they are all against this amendment. They are all against reducing the gold standard that we currently find at the FDA.

As a matter of fact, the executive director of the trade program at U.S. Customs had this quote: “Counterfeit pharmaceuticals enter in both wholesale and retail quantities. Additional problems include expired material, products that have not been approved by the FDA, products made in facilities under no proper regulation, and products not having the proper instructions for consumers to use.”

Mr. Chairman, we should not do this to the American people. We should maintain the gold standard.

Mr. SANDERS. Mr. Chairman, I yield 2½ minutes to the gentleman from New York (Mr. CROWLEY), a cosponsor of this amendment.

Mr. CROWLEY. Mr. Chairman, I rise in strong support of the Sanders-Crowley-DeLauro-Paul-Rohrabacher amendment. This language offered today is the same language I offered last year in the agriculture appropriations bill. We again offer this amendment as a first step to provoke a discussion and get real reimportation language enacted into law.

This is the only way Democrats and Independents can get heard on this issue. The GOP-controlled House is not doing anything to solve this problem. The problem of counterfeit drugs is not just a phenomenon of the developing world. Our lucrative market and ineffective import controls are increasingly making the United States an attractive target for drug counterfeiters and diverters.

“Last month three counterfeit prescription drugs were found in the shelves of pharmacies of several States. It is not known whether these fake drugs were made in the United States or overseas, but such a cluster of counterfeiters has not been seen for years in this country.”

The hearing proved that the FDA is unable to assure the U.S. public that it can prevent unsafe imports from entering this country at this point in time. The gentleman from Vermont is making their way onto the shores and onto the shelves of pharmacies around this country. The legislation that was enacted to stop it, the Prescription Drug Marketing Act enacted in 1987, which included Section 801(d)(1) that we are striking funding for today, has not been successful in protecting consumers. It has been tremendously successful in protecting, though, the interest of the drug companies.

We as Democrats have been trying to pass legislation to find a remedy, a legislative remedy to address the spiraling cost of medications. Each time the leaders of the Congress have rebuffed us.

The GOP passed a fake prescription drug bill last year so weak that 178 of their Members later backed my amendment to the agriculture appropriations bill last year to make reimportation a better alternative to lowering the price of prescription drugs than their party’s plan.

This year, Congress expressed a collective round of laughter at the drug proposal advanced by the White House, representing one of the greatest feats of bipartisanship in recent memory.

Mr. SANDERS. Mr. Chairman, we have so many speakers who feel strongly about it that I ask unanimous consent that each side have an additional 7½ minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

Mr. BONILLA. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard. Mr. SANDERS. Does the gentleman have people who want to debate the issue?

Mr. BONILLA. I object.

The CHAIRMAN. Objection is heard. Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. DEUTSCH).

Mr. DEUTSCH. Mr. Chairman, I would yield to no Member of this House in terms of my efforts to lower prescription drug costs for seniors in America. I support the efforts of the gentleman from Vermont (Mr. SANDERS) to allow importation of drugs from outside the United States.

However, this amendment is not the way to do it. If we look specifically at what this amendment does, it stops all funding for FDA in terms of importation. That is what the amendment actually does. That is a scary thing if we start to think about it.

As a matter of fact, when my good friend, the gentleman from California, talked about global trade, one of our objectives with global trade was to harmonize the standards of approval so that we could reach the efficiencies of a global sourcing base. We have yet today to reach harmonization standards with the EU because we cannot accept the Italian standard for drug approval.

But what this amendment does, it says we are going to defund any any and all reviews at our borders of reimportation. The gentleman from Pennsylvania (Mr. GREENWOOD) just showed the awful conditions where drugs are manufactured, where they look identical, where they are packaged identically. Today the DEA, the FDA, the Customs Department, they are all against this amendment. They are all against reducing the gold standard that we currently find at the FDA.
drug, it is paint that is coming in. This amendment cuts out all FDA funding in terms of literally looking at the substance of the drug that come into the United States of America, and zip, nothing. We could not review that if this amendment actually became law.

Mr. SANDERS. Mr. Chairman, will the gentleman yield?

Mr. DEUTSCH. I yield to the gentleman from Vermont.

Mr. SANDERS. Mr. Chairman, the gentleman knows this is not what we are doing. This is a place holder for the Senate and the conference committee to do what we did last year in developing a comprehensive bill and doing away with the pricing loopholes.

Mr. DEUTSCH. I support the gentleman’s efforts, but again, as a place holder, we do not do place holders, we do real amendments. We do real law.

Mr. SANDERS. Mr. Chairman, the gentleman knows this is not what we are doing. This is a place holder for the FDA to regulate drugs that come into the United States of America. This amendment would allow the gentleman to ask a question about the American patients.

Mr. SANDERS. Mr. Chairman, the gentleman knows this is not what we are doing. This is a place holder for the FDA from doing anything about it. If we could not even get a few more minutes on each side. We have more speakers than we had anticipated, and it is an important issue and lives actually hang in the balance on it. I wondered if we might take a few additional minutes on each side.

The CHAIRMAN. Is the gentleman making a unanimous consent request?

Ms. KAPPTUR. Mr. Chairman, I was just rising to either ask unanimous consent to strike the last word to get some of my own time on this or to plead with the chairman to see if we could not even get a few more minutes on each side. We have more speakers than we had anticipated, and it is an important issue and lives actually hang in the balance on it. I wondered if we might take a few additional minutes on each side.

The CHAIRMAN. Is the gentleman making a unanimous consent request?

Ms. KAPPTUR. Mr. Chairman, I am.

The CHAIRMAN. What is that request?

Ms. KAPPTUR. My request is to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. BUYER. I object.

Mr. SANDERS. Mr. Chairman, can I have a point of personal something or other?

On this issue of enormous consequence, our friends do not want to add a few more minutes to debate? I think that is really unfortunate.

I want to ask the gentleman again, the gentleman from Texas (Mr. BONILLA), who I know is a decent man and I respect his opinion, but we have many people here, so what is wrong with 5 more minutes on either side?

The CHAIRMAN. Is the gentleman making a unanimous consent request?

Mr. SANDERS. I am.

The CHAIRMAN. What is that request?

Mr. SANDERS. That the chairman grant us 5 minutes more so people on both sides can have the opportunity to debate this issue. Five minutes on both sides.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

Mr. BUYER. I object.

The CHAIRMAN. Objection is heard.

Mr. SANDERS. Mr. Chairman, may I know what the time frame is?

The CHAIRMAN. The gentleman from Texas (Mr. SANDERS) has 4½ minutes remaining and the gentleman from Texas (Mr. BONILLA) has 8 minutes remaining.

Mr. SANDERS. I would urge the other side to go ahead.

Mr. STUPAK. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. STUPAK).

Mr. STUPAK. Mr. Chairman, why do we want to open it up so we are not able to have that gold standard that a former colleague talked about? When people see an FDA-approved drug, they know about the efficacy and safety of that particular drug.

The Food and Drug Administration and the Customs Service have testified as recently as June 7th that “Drugs being imported from outside the United States pose considerable risk to consumers because they may be counterfeit, expired, superpotent, subpotent, simply tainted, or mislabeled.”

American consumers should not have to worry that the drugs they take may be adulterated, just as the gentleman from Michigan (Mr. STUPAK) said, with yellow highway paint, which the FDA has found with imported drugs. Defeat the Sanders amendment.

Mr. SANDERS. Mr. Chairman, I yield 45 seconds to the gentlewoman from Florida (Mrs. THURMAN).

Mrs. THURMAN. Mr. Chairman, I was going to ask a lot of other questions we have been working on this project: reimportation. When it leaves this country and comes back into this country, we do not know what it is.

This is one post office, where 721 parcels came back in. We cannot tell what that capsule is. We had a capsule labeled what it is, what it even is made of. This is the yellow powder we speak of. This is boric acid and yellow highway paint. They do it to put on these pills which they put in this blister pack for Poncelet. Nothing we can use medically in this country.

This is about drug safety. It is not priced for senior citizens. All of us Democrats, most of us Republicans, would like to see lower drug prices. This is drug safety. Four years we have been working on this issue. Do not limit the FDA’s ability to do enforcement when these drugs like this highway paint are coming in and being put on pills and we are supposed to take it as a safe drug.

Reject this amendment. If you want to pass meaningful legislation, pass the Allen bill.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Chairman, I do agree on one thing with the gentleman from Vermont (Mr. SANDERS). This amendment is important. It is important because if it passes, people will die, and that is no exaggeration.

Why would we ever want to permit a system that is one of the best in the world, like the FDA, which ensures that we have drug safety in our Nation, why do we want to open it up so we are not able to have that gold standard that a former colleague talked about? When people see an FDA-approved drug, they know about the efficacy and safety of that particular drug.

The Food and Drug Administration and the Customs Service have testified as recently as June 7th that “Drugs being imported from outside the United States pose considerable risk to consumers because they may be counterfeit, expired, superpotent, subpotent, simply tainted, or mislabeled.”
amendment, but could the gentleman give me an indication of who is for this? And also, for the record, this was 363 to 12 the last time we took a vote on this.

Mr. SANDERS. Mr. Chairman, will the gentlewoman yield?

Mrs. THURMAN. I yield to the gentleman from Vermont.

Mr. SANDERS. Mr. Chairman, that is absolutely correct. Some groups supporting it are Public Citizens Network, the National Catholic Social Justice Lobby, the National Education Association, Communication Workers of America, the Children's Foundation, the Alliance for Retired Americans, the Gray Panthers, and a number of other organizations. And I thank the gentlewoman for asking that question.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Colorado (Ms. DeGETTE).

Mrs. DeGETTE. Mr. Chairman, all of us, all of us want to see lower drug prices, and all of us are frustrated by the high price of drugs. It does no good, though, to import these drugs if we cannot be guaranteed of their efficacy. In my hand I have three packages of Viagra, all of them imported. Two of these packages are counterfeit. All the packages look the same. The holograms on the back are the same and the blister packs holding the pills are exactly the same in all three boxes. I am sure that two of these boxes are cheaper than the third, but I would ask my gentlewomen colleagues if they would rather have lower prices, or which two of these boxes would they take?

Mr. SANDERS. Mr. Chairman, I yield 1 minute to the gentlewoman from Maine (Ms. ALLEN).

Mr. ALLEN. Mr. Chairman, I thank the gentleman for yielding me this time, and I rise in support of the Sanders amendment, not because it is the perfect amendment but because I believe it is a step in the right direction. I believe it is a step that will allow us to ask that of those who produce these drugs, they make profits, and they do just fine. Only in America, only in America do we basically allow them to charge the highest prices in the world to seniors, who can least afford it.

That is why this is a step in the right direction. I do believe we need a prescription drug cap here in the United States so that our seniors are not discriminated against and our seniors no longer pay the highest prices in the world.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey (Mr. HOLT).

Mr. HOLT. Mr. Chairman, I thank the gentleman for yielding me this time. Congress does have an obligation to help our seniors get the prescription drugs that they need, and seniors deserve a voluntary universal prescription drug benefit under Medicare. We can all agree on that. But making it easier to bring counterfeit medicines into the United States is not the way to help seniors get these medications, not the way to help families.

The Sanders amendment is a step backward. The FDA and the Customs Service have a huge challenge keeping counterfeit drugs out of this country. Consumers in New Jersey and California and Kansas can take prescription medicines today with the certain knowledge that they are putting safe, tested, clean medicines into their bodies.

It is not just agencies like the Customs Service that oppose this, it is also patients' groups, like the National Prostate Cancer Coalition, the Cystic Fibrosis Foundation, and the ALS Foundation. They all strongly oppose it. It is simply not the way to provide seniors with affordable prescription drugs. It would undermine confidence that doctors and patients have in their ability to make informed decisions about patient care.

PARLIAMENTARY INQUIRY

Mr. ROHRABACHER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his inquiry.

Mr. ROHRABACHER. During this debate we have had this photo displayed of what has been called a foreign drug lab. Several Members here believe that is a picture of a laboratory in the United States. How would I inquire as to the validity of that evidence that has been presented?

The CHAIRMAN. The gentleman could ask the Members in control of the debate time to yield to him to give such an explanation.

Mr. ROHRABACHER. So who would I be able to ask that of?

The CHAIRMAN. A Member in control of time for this debate.

Mr. ROHRABACHER. Thank you very much.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the distinguished gentleman from New Jersey (Mr. FRELINGHUYSEN), a member of the Committee on Appropriations.

Mr. FRELINGHUYSEN. Mr. Chairman, I thank the gentleman for yielding me this time, and I rise in opposition to the Sanders amendment, which will literally endanger the safety of our constituents.

First, there is no doubt that we must and we need to help seniors with the high cost of prescription medicines, but this amendment is not the answer. Secondly, we debated this same issue a year ago. The only thing that has changed is that we now have confirmation from both the former Secretary of Health and Human Services, Donna Shalala, and her successor that this amendment could endanger our constituents.

Anyone who thinks the threat is not real, I would refer them to the recent testimony of the U.S. Customs Service and the recent news that counterfeit drugs are already coming into this country that pose a serious health threat to our citizens. This amendment would essentially make that practice legal and allow unscrupulous marketers to invade our markets and endanger our constituents.

Our Nation, with the FDA, has the world's gold standard for ensuring the quality and safety of medicines used by consumers here in the United States and around the globe. Let us not undermine these high standards for consumer safety.

Mr. SANDERS. Mr. Chairman, I would once again ask unanimous consent to ask the chairman now just for 3 minutes on each side of additional time, because we have many speakers who feel strongly about this; and I am sure the gentleman does as well.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

Mr. LUCAS of Oklahoma. Objection, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Ms. KAPTUR. Mr. Chairman, I would inquire of the Chair, I stood up before to ask for additional time as the ranking member of the subcommittee and could not get additional time. I wish to personally speak in favor of the Sanders amendment. Do I understand the procedures here to disallow me, as ranking member, the highest member of my party on this committee, from bringing forward this amendment? Is there no procedure available to me to use today because of this unrealistic time limitation?

The CHAIRMAN. The gentlewoman can seek unanimous consent. The time is controlled by prior agreement.

Ms. KAPTUR. So could I ask unanimous consent, could I plead with the chairman of our subcommittee, to give us 2 additional minutes on each side to fully debate, not even fully debate, to partially debate an amendment of this consequence that would allow the ranking member to at least offer an opinion in favor of this amendment?

The CHAIRMAN. The vote last year was 363 to 12 in favor of the Crowley-Sanders amendment.

Mr. BONILLA. Mr. Chairman, would the Chair repeat the unanimous consent request?

The CHAIRMAN. The unanimous consent request is that each side would have 2 additional minutes for speakers controlled by the gentleman from
Mr. SANDERS. Mr. Chairman, I yield 1 minute to the gentleman from Vermont (Mr. SANDERS). I reserve the balance of my time.

Mr. SANDERS. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. DeFazio).

Mr. DeFazio. Mr. Chairman, we have heard a lot from the other side of the aisle about the FDA is the gold standard. It is fool’s gold. Guess what? U.S. drugs are manufactured mostly in Puerto Rico with major components imported from China and India with no mandatory testing. None. This bill proposes mandatory testing, a whole new regime. The EU has been doing this for 25 years. What is the result? Counterfeit drugs and people dying? No. The result is drugs are much cheaper in the European Union; and in Britain they are on average 36 percent cheaper, and there has not been a single incidence of all of these chimaeras that are raised.

What really happened was the pharmaceutical industry was caught napping last year. The seniors that I have seen divide their pills in half, against doctor’s orders, and I have seen spouses that have to choose, one gets drugs and the other does not. We are doing nothing about that. We are supporting the profits of this industry. If the other side reverses their vote from last year, they will be held accountable by the tens of millions of Americans who cannot afford their pharmaceutical drugs. This is not about safety, it is about affordability, and it is about lives.

Mr. BONILLA. Mr. Chairman, we only have one remaining speaker, and we reserve the right to close.

Mr. Chairman, I reserve the balance of my time.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The jurisdiction of the Committee of the Whole to enlarge the time prescribed by the Order of the House depends on congruent division of the time. The gentleman from Texas (Mr. BONILLA), therefore, has 2 additional minutes as a consequence of the 2 additional minutes granted to the gentlewoman from Ohio (Ms. KAPTUR).

Mr. SANDERS. Mr. Chairman, I do not object; but my understanding of the unanimous consent that the gentleman from Vermont (Mr. BONILLA) gave was to give Ms. KAPTUR 2 minutes. Mr. Chairman, I ask unanimous consent for 2 additional minutes for both sides.

Mr. LUCAS of Oklahoma. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SANDERS. Mr. Chairman, I yield 45 seconds to the gentleman from Maine (Mr. BALDACCI).

Mr. BALDACCI. Mr. Chairman, this is really an unfortunate circumstance that we are being forced as citizens of our country to have to reimport drugs that are manufactured in our country under our country’s supervision in FDA-approved laboratories, but in order to be able to get affordable prescription medicines to our citizens.

Our citizens are paying 33 to 50 percent higher for the same drugs. This is no different from some of our agriculture farmers who recognize the importation of products that are manufactured here but sold overseas cheaper. It is cheapening and the gravy is to pay for it at the same level in our own country, and we are being put through this process.

Mr. Chairman, this amendment will allow us to get those safe, FDA-approved, reviewed and supervised prescription drugs to our seniors that need them. Our State needs this relief now.

Mr. SANDERS. Mr. Chairman, I yield 45 seconds to the gentleman from New York (Mr. HINCHEY).

Mr. HINCHEY. Mr. Chairman, it seems to me that the honest opponents of this bill are focusing on the trees and, therefore, cannot see the forest. The forest is that Americans pay exorbitantly high prices for pharmaceuticals everywhere else in the world.

If we were running this place properly, we would have an honest debate on a pharmaceutical drug program under Medicare. We are not going to have that. We would have an honest debate about health insurance for all Americans. We are not going to have that.

Mr. Chairman, this is the only vehicle that we are permitted. If Members want to move us closer to honest prices for pharmaceuticals for senior citizens and everyone else in America, vote for this amendment.

The CHAIRMAN. The gentleman from Vermont (Mr. SANDERS) has 30 seconds remaining, and the gentleman from Texas (Mr. BONILLA) has 5 minutes remaining.

Mr. SANDERS. Mr. Chairman, is the procedure that the gentleman from Texas has the right to close?

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA), as the chairman of the subcommittee, has the right to close.

Mr. SANDERS. Mr. Chairman, I yield 30 seconds to the gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Chairman, it is a shame we have not had more time for this debate because our constituents do not have time to survive when they...
Mr. BONILLA. Mr. Chairman, I yield all remaining time to the gentleman from Louisiana (Mr. TAUZIN), the chairman of the Committee on Energy and Commerce.

Mr. TAUZIN. Mr. Chairman, one of the former speakers complained about the scare tactics that have been used in discussions and debates on this bill. Let me tell you, they need to be afraid of this amendment.

My mother, my 82-year-old mother, is a three-time cancer survivor and needs to be afraid of this amendment. This amendment effectively repeals an important consumer protection law designed to protect my mother and other consumers from bad drugs.

Mr. Chairman, the FDA was created not to protect pharmaceutical companies, whether they are here in the United States or foreign countries. The FDA was created to protect consumers like myself, my mother and everybody's mother from bad, illegal, counterfeit, dangerous drugs.

If Members do not believe there are people running these kitchens, let them send them to Members' mothers today, be afraid.

Let me read from testimony before the Committee on Energy and Commerce, Subcommittee on Oversight and Investigations hearing. This is about a U.S. Customs effort in Thailand called Operation Checkpoint. What they discovered in this kitchen cooking up drugs for America was 18.5 kilograms of powder steroids and Viagra. The processing took place on the counter of a filthy, vermin-infested kitchen and on the floor of a spare bedroom of the house. The tools and scales were never cleaned, and used for both steroids and Viagra. The British national who was running this operation had just been released from the hospital for hepatitis treatment, was still under medication, was processing and packaging these drugs with the assistance of a Thai female prostitute.

Mr. Chairman, the picture complained about is from Colombia. This is one of the kitchens in Colombia that is cooking up drugs for Members' mothers and mine, and importing them into the United States.

Mr. Chairman, the FDA was created and this important consumer protection law was created to protect our seniors and loved ones from this stuff. This amendment removes that protection.

I want to ask Members, in the interest of cheaper tires, are Members willing to repeal NHTSA, our Highway Safety Administration? Are Members willing to take away the consumer protections we have built around the law that says people cannot sell us tires that will blow up and flip our trucks over? In the interest of cheaper energy, are Members ready to repeal the EPA so anybody can do anything they want in this country to the environment?

Mr. Chairman, in the interest of cheaper toys and sleepwear, are Members ready to repeal the Consumer Products Safety Commission so our kids can have cheaper toys and sleepwear, but they might burn to death at night because sleepwear is flammable and nobody is looking after them?

Mr. Chairman, the FDA was created to protect us, not the companies; to protect my mom and other moms. When we passed this ban on reimportation, we did something very important. We said to our Secretary, unless we can satisfy that the drugs coming into this country are going to be safe, they are not going to kill my mother, they are not coming from these drug kitchens in Colombia and Thailand, unless the Secretary can satisfy us, keep the ban.

Do Members know what the Secretary said in the last administration? "I cannot tell you that we can satisfy that without FDA approval these drugs are safe."

Yes, we all want cheaper drugs for our mothers and fathers; and yes, we're working on bills that do that. The administration was working on a project to provide discount cards to all seniors. Yes, we ought to be concerned about the high cost of those drugs, but are we going to trade drug safety for drug prices? Are we going to put everybody at risk for the sake of a cheaper drug?

I suggest to Members this is the wrong remedy for the problem. We can all agree that is a problem. We can all agree that there is something wrong about the way that drugs are priced in America, and we are working on something in the Subcommittee on Oversight and Investigations. We can all agree that the Medicare system ought to make drugs more affordable; and the copayment is too high when seniors need treatment for cancer therapy.

Mr. Chairman, the Sanders Amendment clearly contradicts the reasoning behind these efforts and would instead allow unrestricted reimportation of prescription drugs.

Moreover, the Sanders Amendment would delete the provision which Congress passed last year directing the Secretary of Health and Human Services to demonstrate that any cost-savings derived from reimported drugs be passed to the American consumer.

Last December, then-HHS Secretary Donna Shalala found she could not demonstrate that the reimportation law would not jeopardize patient safety, nor could she demonstrate that savings would be passed on to consumers.

Moreover, Mr. SANDERS' amendment would likely lead to an increase in the flow of counterfeit drugs into the U.S., which is already a growing problem the Government cannot control.

At a June 7, 2001 hearing, Ms. Elizabeth Durant, Executive Director of Trade Programs at the U.S. Customs Service, testified that "perhaps as much as 90 percent of the pharmaceuticals that enter the U.S. via the mail do so in a manner that violates FDA and/or DEA requirements. To offer an example, one seizure included a 3,000-tab shipment of a counterfeit drug with an expiration date of 1980. We have counterfeit drugs. We have gray-market drugs. We have prohibited drugs and we have unapproved drugs. The whole gamut of illegal substances pass through our mail facility at Dulles. And this is a situation that is pretty much replicated around the country."

While I am concerned about the rising cost of pharmaceuticals in the U.S., I am more concerned that Mr. SANDERS' amendment would compromise the health and safety of millions of Americans who count on the quality and purity of pharmaceuticals approved by the FDA to treat their illnesses. What we cannot afford to do is knowingly expose American consumers to drugs and pharmaceuticals that
may jeopardize their health, and yet that is precisely what the Sanders amendment would do. Again, I urge my colleagues to put the welfare of Americans first and vote against the Sanders amendment.

Ms. LEE of California. Mr. Chairman, I rise in strong support of the Sanders/Crowley/DeLauro prescription drug reimportation amendment to the Agriculture Appropriations bill. This amendment will lay the groundwork for lowering the cost of prescription drugs in the U.S. by 30 to 50 percent.

This amendment will allow prescription drug distributors and pharmacists to purchase FDA-approved prescription drugs from anywhere in the world at competitive and reasonable prices.

It is a shame that millions of Americans are not able to afford the outrageously high cost of prescription drugs in this country. Their quality of life continues to deteriorate while we continue to limit their access to basic health necessities.

Citizens of the United States pay the highest prices in the world for prescription drugs. Many of our constituents will travel to Mexico or Canada to buy the same drugs for a lesser value. In my district in California, the average prices that senior citizens must pay are 97% higher than the prices that Canadian consumers pay and 96 percent higher than the prices that Mexican consumers pay.

For every $1 spent in the United States for prescription drugs, those same drugs are purchased in Switzerland for .65, the United Kingdom for .64, France for .51, and Italy for .49.

Why should patients have to continually compromise their health while being forced to decide which prescription drugs to buy and which drugs not to take because they cannot afford to pay for all of them. These patients cannot afford to pay such burdensome costs.

These patients are forced to gamble with their health when they cannot afford to pay for the drugs needed to treat their conditions. Every day, these patients have to live with the fear of having to encounter major medical problems because they were denied access to prescription drugs they could not afford to pay out of their pocket. Often times, these individuals must choose between buying food or medicine. With outrageously high energy costs in California right now, some seniors and other Californians have to choose between paying their electric bill or their drug bills. This is wrong.

All Americans should be entitled to medical treatment at affordable prices. The Sanders/Crowley/DeLauro amendment will allow these patients to buy the prescription drugs needed to lead a healthy and productive life.

This amendment will break the monopoly the pharmaceutical industry now has over re-importation.

Let’s stop gambling with the lives of our patients and support this reimportation amendment in order to cut these outrageous prescription drug prices. Americans deserve the right to lead healthy lives by purchasing prescription drugs at reasonable and competitive prices.

Mr. PAUL. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Vermont. As I am sure I need not remind my colleagues, many Americans are concerned about the high prices of prescription drugs.

The high prices of prescription drugs particularly affect lower-income citizens since many seniors have a greater-than-average need for prescription drugs. One of the reasons prescription drug prices are high is because of government policies which give a few powerful companies a monopoly position in the prescription drug market. One of the most egregious of those policies are those restricting the importation of quality pharmaceuticals.

If members of Congress are serious about lowering prescription drug prices they should support this amendment.

As a representative of an area near the Texas-Mexican border I often hear from constituents angry that they cannot purchase inexpensive quality pharmaceuticals in their local drug store. Many of these constituents regularly travel to Mexico on their own in order to purchase prescriptions. Mr. Chairman, where does the federal government get the Constitutional or moral right to tell my constituents they cannot have access to the pharmaceuticals of their choice?

Opponents of this amendment have been waging a hysterical campaign to convince members that this amendment will result in consumers purchasing unsafe products. I dispute this claim for several reasons. Unlike the opponents of this amendment I do not believe that consumers will purchase an inferior pharmaceutical simply to save money. Instead, consumers will carefully shop to make sure they are receiving the highest possible quality at the lowest possible price. In fact, the experience of my constituents who are currently traveling to Mexico to purchase prescription drugs shows that consumers are quite capable of ensuring they only purchase safe products without interference from Big Brother.

Furthermore, if the supporters of the status quo were truly concerned about promoting health, instead of protecting the special privileges of powerful companies, they would consider how our policies endanger safety by artificially raising the cost of prescription drugs. Oftentimes lower income Americans will take less than the proper amount of a prescription medicine in order to save money or forgo other necessities, including food, in order to afford their medications.

Mr. Chairman, I urge my colleagues to show they are serious about lowering the prices of prescription drugs and that they trust the people to know what is in their best interest by voting for the Sanders amendment to the Agriculture Appropriations bill.

Mr. CROWLEY. Mr. Chairman, I move to strike the last word.

I rise in strong support of the Sanders/Crowley/DeLauro/Paul/Rohrabacher amendment.

This language offered today is the same as language I offered last year.

We again offer this amendment as a first start to provoke a discussion and get real re-importation legislation enacted into law.

This is the only way Democrats and Independents can get heard on this issue—the GOP majority authorizing committees are not doing their jobs.

All we have seen to date was a Commerce Committee hearing held earlier this month on the horrors of reimportation—and the arguments from that hearing have hardened my resolve in supporting reimportation.

Why?

In part because of the comments from that hearing, such as Chairman Tauzin’s opening statement where he remarked on June 7, 2001:

The problem of counterfeit drugs is not just a phenomenon of the developing world. Our lucrative market and ineffective import controls are increasingly making the United States an attractive target for drug counterfeiters and diverters. Last month, three counterfeit prescription drugs were found in the shelves of pharmacies of several states. It is not known whether these fake drugs were made in the United States or overseas. But such a cluster of counterfeits has not been seen for years in this country.

Yes, in fact, counterfeit drugs are making it onto our shores and the legislation that was enacted to stop it—the Prescription Drug Marketing Act (PDMA) enacted in 1987, which includes section 801(d)(1) that we are striking funding for today, has not been successful in protecting consumers.

It has been tremendously successful in protecting drug company profits though.

We, as Democrats, have been trying legislative remedy after legislative remedy to address the spiraling costs of medications—and each time the leaders of this Congress have rebuffed us.

The GOP passed a fake prescription drug benefit last Congress—so weak that 178 of their members later backed my amendment to Agricultural Appropriations last year making reimportation a better alternative to lowering drug prices then their Party Plan. This year, Congress expressed a collective round of laughter at the Drug proposal advanced by this White House—representing one of the greatest feats of bi-partisanship in recent memory.

I recognize the safety concerns advanced by Commerce Chairman Tauzin and Ranking Member Dingell are legitimate and I greatly respect their diligence on this issue and their hard working in protecting American consumers—their motives cannot be questioned here.

But the current laws are not working, as we all readily admit.

Something new must be done.

We cannot protect people from medications by not allowing them to have any access to affordable drugs at all—and unfortunately that is more and more the case throughout the U.S.A.

I remember the thoughts of a local pharmacist who told me that American seniors pay the highest drug prices on Earth.

Some Members will oppose this amendment on fair grounds and for valid reasons—but we offer it as a starting point for discussion to get Congress to act and act this year to lower drug prices for Americans—especially our seniors.

Let me put this in perspective, I have a constituent in Long Island City, NY who must purchase 100 capsules of Prilosec every three months for his wife. He pays almost $400 for these drugs.

I have this letter from a gentleman who writes “Isn’t that an outrageous price for a medication my wife will have to take on a regular basis”.
Yes it is, sir.

Especially, in light of the fact that this same drug that costs $409 in Queens New York, would have cost him $107 in Mexico and $184 in Canada.

Price gouging is wrong and needs to be stopped.

Price gouging medications is illegal in Canada and Mexico, and surprise—their drug prices are half the cost of what they are in the U.S.—even for the same drugs, with the same FDA-approved label.

This amendment this year will allow for re-importation of FDA-approved drugs and will serve as an important place marker for more comprehensive reimportation language to be included by the Democratically-controlled Senate.

Americans are turning more and more to giant super stores for their consumer needs—because they can get great bargains at places like Wal-mart and they have to such large wholesaler to purchase their medications.

Something that is not a luxury but a necessity.

What upsets me most is that the drug companies get away with it—they give super discounts to the oil rich nations in every other country in the world, because they know those governments would never allow for price gouging of their elderly.

But knowing full well they can commit gouging in the U.S.—they mark up their products well beyond what any reasonable senior can afford.

This price gouging must stop.

We can no longer, in good conscience, as a nation allow our seniors to ration their medications, or have to choose between paying their rent and purchasing their drugs.

Representative SANDERS and I are offering this reimportation amendment as the first of a three pronged approach to helping America's seniors afford their medications.

Besides reimportation, we argue for the passage of the Prescription Drug Fairness for Seniors Act, by Congressman TOM ALLEN of Maine.

And I hope that all of the sponsors of this amendment will join me in this fight—the goals are the same here—lowering drug prices and protecting American seniors.

This legislation would automatically lower the drug prices paid by American seniors by an average of 40 percent overnight at negligible cost to the Government by mandating that the drug manufacturers sell drugs to seniors at the same price they sell them for in the other industrialized nations.

These two approaches lead us to our final and long term goal—that of a prescription drug benefit under Medicare.

We cannot have millions of Americans go without their medications.

We need to pass real reimportation language this year—and begin to lower the skyrocketing costs of drugs for Americans.

Mr. DINGELL. Mr. Chairman, once again I find it necessary to oppose amendments to the Agriculture Appropriations bill designed to gut the protection the Prescription Drug Marketing Act (PDMA) affords all Americans.

Once again we find ourselves debating ill-conceived efforts to convince our people, particularly the elderly, that a panacea for high drug prices can be found in re-imports of American manufactured prescription drugs.

Make no mistake—despite the good intentions of the proponents, nothing in these amendments will lower drug prices one dime for consumers. Nothing in these amendments will benefit any consumer, directly or indirectly. Instead, consumers will be put at risk, because drug re-importation would be a welcome mat for crooks and frauds.

Foreign wholesalers were cut out of the drug distribution system in 1987 because of the flood of contaminated, counterfeit, and mislabeled products. These shady characters have taken advantage of the appropriate public outrage over drug prices to encourage America to once again open its borders to these dangerous drugs.

Proponents of the amendments argue that if the drugs are made in America they must be safe. They are wrong. Our Committee's investigation of the mid-1980's showed that American packaging and labeling was duplicated perfectly by counterfeiters entering their product as re-imports. Unfortunately, they had not duplicated the FDA vigilance that American consumers believe is attached to such packaging.

Counterfeit products were imported into the U.S. as "American Goods Returned"—before the PDMA put an end to it. Ask the women who took the two million counterfeit birth control pills—in packaging that duplicated Searle's—just how good the coxols are at graphic design. The cycles, the boxes they came in, and the instructions that came with the pills were knocked off perfectly in Spain and in Guatemala. The Spanish product had so much excess hormone that it caused excessive bleeding. The Guatemalan product contained no active ingredient so it went undetected, except, of course, for the unwanted pregnancies that resulted.

I could go on with many more examples such as the perfectly packaged Naprosyn from Mexico that contained aspirin as the only active ingredient. That must have come as a shock (or worse) to those hypersensitive to aspirin. Even the non-counterfeit products were often so poorly stored that safety was frequently compromised.

Did these counterfeiters and diverters produce any savings to the American consumer? We looked in depth at this $500 million a year market and found no evidence that consumers saved so much as a penny. No compensation was provided to unsuspecting consumers for all the risks they unknowingly assumed.

We should be able to find a way to address effectively the problem of high priced drugs and to protect consumers from risky products. The amendments offered today do neither, and should be rejected.

Mrs. MALONEY of New York. Mr. Chairman, I come to the floor today in support of the Sanders/Crowley/DeLauro amendment.

Prescription drug costs are a life and death issue for thousands of Americans. Making these life saving and health sustaining drugs affordable for our citizens, and especially our seniors, is simply the right thing to do.

Just look at the cost of prescription drugs in my district. Last year, I conducted three different studies in New York City that showed rampant price discrimination against uninsured seniors by pharmaceutical companies. Beyond a shadow of a doubt, New Yorkers are being side stepped by inflated prices.

For instance, Tamoxifen—which is sold under the brand name Nolvadex—is the most frequently prescribed breast cancer drug in this nation. It is used by thousands of women across this state and across the country to treat early and advanced breast cancer. In fact, in 1998, total sales of Tamoxifen were over $520 million.

Women in my district who need Tamoxifen must pay ten times what seniors in other countries pay. According to the study I conducted, a one month supply of Tamoxifen costs only nine dollars in Canada—yet it costs over one-hundred dollars in my district. That means that, over the course of a year, a woman in my district will pay roughly twelve-hundred dollars more than women in Canada.

That's a price differential of over one-thousand percent. This is a life-saving drug that thousands of women need to survive. Many women in New York are forced to dilute prescriptions they need to fight breast cancer—forcing them to cut their pills in half or in thirds—in order to get by financially. No doctor recommends this. No person deserves this.

All eight of the drugs I studied cost at least forty percent more in my district than they do abroad. The average price differential with Canada was 112 percent, and with Mexico it was 108 percent.

Prolisec, an ulcer medication and the U.S.'s top prescription drug in dollar sales in 1998, cost $49.80 for a one month supply in Canada, but cost $121.83 for a one month supply in my Congressional District, that's a 145 percent price differential.

Prescription drugs costs are too high for America's families and are now the largest out-of-pocket health care expense for America's seniors.

Congress recognized this crisis last year when both the House and Senate passed a drug reimportation bill by wide margins.

Once passed, however, significant flaws were detected in the details of the bill that jeopardized our ability to ensure lower prices and safe products for U.S. consumers through the new policy.

The bill before us today tries to get us back on track by more explicitly preserving the Food and Drug Administration's authority to ensure the safety and efficacy of a system to reimport prescription drugs.

I urge passage of this reimportation amendment which would allow U.S. pharmacists and prescription drug distributors to purchase and sell locally FDA-approved medications—purchased from abroad. This measure should lower the price of prescription drugs, perhaps as much as 50 percent.

I strongly support adoption of the Sanders/ Crowley/DeLauro amendment.

Mr. SLUMENAUER. Mr. Chairman, today the House of Representatives is faced with an amendment, offered by Representative SANDERS of Vermont, which attempts to address the problem of high drug prices in the United States. Seniors in the United States pay the highest prices in the industrialized world for prescription medicines and are often the victims of discriminatory pricing. This amendment, however, seriously undermines the current system that protects U.S. consumers from
reimporting potentially tainted drugs from abroad and this is why I play to vote against this measure. I believe that the additional amendments to the Agriculture Appropriations bill today that attempt to accomplish similar goals, but unless they address the need for strong consumer protections, I also plan to vote against these amendments.

Prescription drugs are an increasingly vital part of health care and are the fastest growing component of health care expenditures. Spending on prescription drugs is expected to continue to rise. Seniors, who comprise only 13% of the total population, account for more than a third of the annual expenditure on prescription drugs. The average senior uses 18 prescriptions a year and these vital prescriptions are absolutely essential to their quality of life. The rising costs of pharmaceuticals, combined with the increasing reliance on drugs for medical treatments, have created a serious threat to the financial security of a particularly vulnerable population, seniors who are on fixed incomes.

We must provide relief to seniors in the United States. My concern though is that this amendment would reduce our ability to ensure the integrity of drug products and could put American consumers, especially our seniors, in serious jeopardy. Counterfeit medicines have already infiltrated the U.S. market and we must make sure that any reimportation proposal addresses consumer safety and the need for thorough drug inspections. It does seniors no good to allow the importation of less costly prescription drugs if we cannot also ensure their safety and efficacy.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont (Mr. SANDERS).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. BONILLA. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Vermont (Mr. SANDERS) will be postponed.

AMENDMENT NO. 18 OFFERED BY MR. LUCAS OF OKLAHOMA

Mr. LUCAS of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 18 offered by Mr. Lucas of Oklahoma.

Insert before the short title the following new section:

SEC. ___. The amounts otherwise provided by this Act are revised by increasing the total amount provided in title II under the heading “WATERSHED AND FLOOD PREVENTION OPERATIONS” (to be used to carry out section 14 of the Water Pollution Control and Flood Prevention Act (16 U.S.C. 1012), as added by section 313 of Public Law 106-472 (114 Stat. 2677)), and none of the funds made available in this Act shall be used to pay the salaries of personnel of the Department of Agriculture who carry out the programs authorized by section 528(a) of the Federal Crop Insurance Act (7 U.S.C. 1521) in excess of a total of $3,600,000 for all such programs for fiscal year 2002, by $5,400,000.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Oklahoma (Mr. LUCAS) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Oklahoma (Mr. LUCAS).

Mr. LUCAS of Oklahoma. Mr. Chairman, I yield myself such time as I may consume.

The amendment that I am offering today will provide $3 million to be used for the rehabilitation of aging watershed dams. Public Law 106-472 authorizes USDA to assist local communities with rehabilitation of their aging flood-control dams constructed with USDA assistance. The authorizing legislation, which I authored, received widespread bipartisan support in both the Committee on Agriculture and on the House floor.

Since the authorizing legislation was signed into law, NRCS has been flooded with requests from communities for assistance on rehabilitation for their aging dams. As of March of this year, 434 communities have requested rehabilitation assistance on more than 1,400 dams in 35 States. The cost to rehabilitate these dams is estimated to be in excess of $500 million.

In fact, nearly 10,500 small watershed dams have been built in the United States since 1944. Many of these dams, which were built and designed with a 50-year life span, will reach their life expectancy over the next few years. These watershed projects are extremely important to our communities. They provide flood control, municipal water supply, recreation, soil erosion control, water quality improvement, wetland development, and wildlife habitat enhancement on more than 130 million acres in this Nation. These dams benefit millions of people’s lives every day.

In fact, the small watershed program has proven to be one of our Nation’s most successful public-private partnerships. The program represents an $0.5 billion Federal investment and an estimated $6 billion local investment in the infrastructure of this Nation. These completed small watershed projects have provided $2.20 in benefits for every $1 of cost. Very few Government projects can make that claim.

We must continue to build on this program that our predecessors started 50 years ago. I hope that my colleagues will support this very important amendment to begin the process of rehabilitating these dams before we have a tragic dam failure.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent to claim the time in opposition to this amendment.

The CHAIRMAN. Without objection, the gentleman from Texas (Mr. BONILLA) is recognized for 5 minutes.

There was no objection.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of the amendment offered by my friend the gentleman from Oklahoma. I want to commend him for the work that he and his staff have put into this amendment. This amendment makes additional funds available to the Watershed and Flood Prevention Operations account specifically for the small watershed rehabilitation program that passed this House last year. This is a good amendment, and I urge all Members to support the amendment.

In fact, I think the amendment is so good that I have not heard one word of opposition from anyone on this amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. LUCAS of Oklahoma. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma (Mr. LUCAS).

The amendment was agreed to.

AMENDMENTS NO. 17 AND 18 OFFERED BY MRS. MINK OF HAWAII

MRS. MINK OF HAWAII. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. The amendment offered by my friend the gentleman from Oklahoma. I want to commend him for the work that he and his staff have put into this amendment.

The amendment was agreed to.

The text of the amendment is as follows:

Amendment No. 17 offered by Mrs. Mink of Hawaii.

Insert before the short title at the end the following new section:

SEC. ___. Of the amount for the Department of Agriculture provided under the heading “AGRICULTURAL RESEARCH SERVICE”—“SALARIES AND EXPENSES” in title I, the Secretary of Agriculture shall provide $500,000, the same amount as was provided for fiscal year 2001, for the Hawaii Agriculture Research Center to maintain competitiveness and support the expansion of new crops and products.

Amendment No. 18 offered by Mrs. Mink of Hawaii.

Insert before the short title at the end the following new section:

SEC. ___. Of the amount for the Department of Agriculture provided under the heading “AGRICULTURAL RESEARCH SERVICE”—“SALARIES AND EXPENSES” in title I, the Secretary of Agriculture shall provide $1,603,000, the same amount as was provided for fiscal year 2001, for tropical aquaculture research for the Oceanic Institute of Hawaii for continuation of the comprehensive research program focused on feeds, nutrition, and global competitiveness of the United States aquaculture industry.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Hawaii...
(Mrs. MINK) and a Member opposed each will control 5 minutes.

Mr. BONILLA. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Texas reserves a point of order.

The Chair recognizes the gentleman from Hawaii (Mrs. MINK).

Mrs. MINK of Hawaii. Mr. Chairman, I yield myself such time as I may consume.

Both of these amendments go to the Agricultural Research Service. One has to do with the earmarking of $550,000 for the Hawaii Agricultural Research Center. The other is an earmark of $1,603,000 for the Oceanic Institute. Both of these programs are long existing and have been funded at this level in the past fiscal year. Both of these programs, the Oceanic Institute and the Hawaii Agricultural Research Center, are included in the President's budget.

I think that the importance of these two amendments is to recognize and to herald the tremendous contributions that those two research centers have made, not only to Hawaii as a single State but to the entire United States and perhaps even globally with reference to the Oceanic Institute research.

The Hawaii Agricultural Research Center provides vital services to Hawaii's farmers, and particularly now with the loss of our sugar industry with only two plantations remaining, the existence of this center and its support is even more vital as the State struggles to find additional crops to grow on the vast acreages that are being farmed as a result of the closure of the agricultural industry. We do have tremendous potential in coffee, tropical fruits, vegetables, macadamia nuts and many other industries.

In respect to the Oceanic Institute, this program assists the expansion of aquaculture and feed manufacturing sectors and to develop new products, processes and markets for U.S. grains. The Oceanic Institute in Hawaii manages the program and is a world leader in feeds and nutrition technology with extensive experience in a variety of marine finfish.

Some of the program's research highlights in the past year have included the development of new feed formulations that enabled the production of market-size shrimp in only 8 weeks. The program has recently assumed a new role in the development of new feed formulations with the overall Agricultural Research Service.

The CHAIRMAN. Does the gentleman from Texas insist on his point of order?

Mr. BONILLA. Mr. Chairman, it is my understanding that the gentlewoman is going to withdraw her amendments, but we are willing to work with the gentlewoman as we move toward conference on this issue. I know it is a very important issue to her.

Mrs. MINK of Hawaii. I thank the gentleman from Texas. It is very important that report language include these two projects. I am heartened to hear that the gentleman will work toward the conference when the matter goes to conference.

With that assurance, Mr. Chairman, I withdraw both my amendments.

The CHAIRMAN. Without objection, the two amendments are withdrawn.

There was no objection.

AMENDMENT OFFERED BY MR. GUTKNECHT

Mr. GUTKNECHT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. GUTKNECHT:

At the end of title VII, insert after the last section (preceding any short title) the following section:

SEC. 7. None of the amounts made available in this Act for the Food and Drug Administration under section 801 of the Federal Food, Drug, and Cosmetic Act to prevent an individual who is not in the business of importing prescription drugs within the meaning of section 801(g) of such Act from importing a prescription drug that (1) appears to be FDA-approved; (2) does not appear to be a narcotic drug; and (3) appears to be manufactured, prepared, propagated, compounded, or processed in an establishment registered pursuant to section 510 of such Act.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Minnesota (Mr. GUTKNECHT) and the gentleman from Texas (Mr. BONILLA) each will control 15 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. GUTKNECHT).

Mr. GUTKNECHT. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, this debate is going to be very similar to the debate we had just a few minutes ago concerning the pricing of prescription drugs. I supported the Sanders amendment even though it was a bit broader than the amendment that I offer. I hope Members will take a few minutes to at least read the amendment that I am offering. Essentially what I am saying is, let us not stop law-abiding citizens from importing drugs from G-8 countries for personal use. The issue again is price. If Americans, it is a fact, it is a dirty little secret in three different ways, we are paying all the research cost for all the other countries in the world, and we are paying it in three ways: first of all in the prices that we pay for prescription drugs, as Members can see, anywhere from 30 to 70 to 80 percent more than other countries in Europe; secondly, we are paying for the research in the money that we put into the NIH and some of the other science programs here in the United States. It amounts to almost $14 billion a year that the taxpayers are subsidizing research; and, finally, we subsidize the research through the Tax Code. When by and large the pharmaceutical industry says, well, we are spending billions of dollars on research, that is true. The last year that we have numbers for, they spent about $12 billion on research. But do understand they pay hefty taxes, and as a result they can write off all of that research and in some cases they even qualify for research and development tax credits. So the real net cost to the pharmaceutical industry is far lower than most people say.

What we are saying in this amendment is the game has to stop. We have been subsidizing Europe for a long time. It is time for us to stop subsidizing the starving Swiss.

My amendment is very simple. It simply says that an individual who is not in the business of reimporting drugs shall have the right to bring those drugs in either on their person or by mail from any country they desire. This does not even include Mexico.

We heard this big safety issue. We are going to talk a little bit about that. The truth of the matter is most of the safety issues that were talked about in the previous amendment exist today. We are not changing anything. We are not going to legalizing. We are not going to tell people that they can bring in adulterated drugs. We are talking about law-abiding citizens that have a legal prescription that are bringing in FDA-approved drugs made in FDA-approved facilities.

We have a problem right now, as I mentioned earlier, in terms of contamination on all of the food and produce we bring in. Yet we do not hear this ballyhoo because there is not a company out there, there is not an industry out there like the pharmaceutical industry that stands to make billions of dollars.

Make no mistake, at the end of this debate, this is about money. I believe my simple little amendment that simply opens the door for personal importation could at the end of the day save American consumers upward of $20 billion. Now, if Members wonder why individuals and groups have been spending millions of dollars over the last couple of weeks, it is about money.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.
Mr. Chairman, once again we have an effort here to solve one problem by creating another; and in fact it could create a series of additional problems. Let me just mention once again a few of the facts that have been stated clearly by the Food and Drug Administration. This presents a clear danger, a potential danger, a serious threat to consumers who could use drugs that are dangerous, that have not been stored under proper conditions, have not been manufactured properly, do not conform to the standards of drug manufacturing in our country. This is simply something that, as we have just heard in the debate in the last half-hour or so, would not be in the best interest of consumers.

We are all in agreement here on both sides of the political aisle that we want to do something about the higher cost of drugs in this country, but we want to do it the right way and not add language on an appropriations bill that is not supported by anyone who has been working on this issue in a very serious and sincere way on the authorizing committees for many months now. I rise in strong opposition to this amendment and would urge its defeat.

Mr. Chairman, I reserve the balance of my time.

☐ 1315

Mr. GUTKNECHT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would just bring to the attention of the body that last year amuch broader amendment than the one that I am offering, that would have had blanket reimportation, passed this House by a vote of 363-to-12. So we are talking about a very targeted amendment and would urge its defeat.

Mr. Chairman, I yield 1 minute to the gentleman from Tennessee (Mr. BRYANT).

Mr. BRYANT. Mr. Chairman, it is with great respect that I rise in opposition to the amendment of my good friend, the gentleman from Minnesota (Mr. GUTKNECHT). I did support this last year. But since that time, as a Member of the Committee on Commerce, we have held numerous hearings on the safety of drugs and the possibility of reimporting these drugs, and I have seen very direct evidence that has caused my concern to change enough to oppose that amendment this year.

We have seen films of laboratories overseas that produce counterfeit drugs. We know that drugs are tampered with, prescriptions are forged, persons who have participated in such activities are out there. The seniors in my district worked hard their entire life and do not expect a free lunch from government. However, what I do hear from my seniors is the frustration about the disparity of prices here in the United States and overseas. I have heard from former state of Florida (Mr. MILLER).

Mr. MILLER of Florida. Mr. Chairman, I thank the gentleman from Minnesota (Mr. GUTKNECHT) for once again bringing up a good, commonsense amendment to help seniors throughout this country, seniors in my district. My district in Florida, the median age is 47. My district has more Medicare recipients than any other district in the Nation, save one—hardworking and informed seniors who recognize that their heart medicine is 60 percent cheaper in Canada than in Florida. They do not know, and I cannot explain, why United States seniors, in the age of free trade and NAFTA, cannot take advantage of lower prices for products across our border.

Mr. Chairman, I am a free trader. I believe bringing the elements of free trade will solve many issues in America, whether it is the outrageous costs to consumers of the anti-free trade movement or whether it is a difference for seniors in drug prices across our border. Americans are free to buy pork chops, fruit, and other food from across the border. Why can we not do the same with FDA-approved drugs?

The amendment of the gentleman from Minnesota (Mr. GUTKNECHT) is carefully drafted to concentrate on personal use of FDA-approved products made in FDA-approved facilities. It allows Americans to have greater access to cheaper drugs. It is a commonsense measure that deserves everyone's support.

I fully recognize that this amendment alone will not solve the problem of high drug prices, and I oppose price controls on prescription medicines. I have no interest in bashing the pharmaceutical industry because I recognize how important they are, especially for the future production of new drugs. However, I believe that this bill will introduce an additional source of needed supply to help lower prices. It is something that should be a starting point to allow the free market to work to the benefit of all seniors, and I urge a yes vote.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. CROWLEY) which was identical to the amendment of the gentleman from Vermont (Mr. SANDERS), and every person who was in favor of it is opposed at this time and that is interesting, because I understand PHRMA, the trade association for the pharmaceutical companies, has spent millions of dollars this week advertising against this.

Needless to say, this is a very critical issue. I have constituents who have to go to Canada to get drugs for their children, one of whom has a very severe form of epilepsy. This woman is a single mom and not able to afford to buy this drug in the United States because in Canada, of course, it is only a third of what it costs here in the United States.

The Gutknecht amendment simply allows the reimportation of American-manufactured drugs, in approved, safe FDA facilities, to be brought back here without punishment. I think that it is very important in a nonelection year to be in favor of lower prescription drug costs.

I might also add that safety really is not an issue with regard to the Gutknecht amendment. It reserves all of the FDA's legal duty to approve all imports. And under the current law, FDA's mandate is to stop drugs that appear to be unapproved; and nothing in the Gutknecht amendment changes that. So I would certainly urge all of those people who supported this and other bills last year to vote for it again this year.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from California (Mr. WAXMAN), the author of the Hatch-Waxman Act.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to the Gutknecht amendment. I am opposed to it because the
amendment is so vaguely drafted it can be interpreted as either ineffective or dangerous, but under no reading is it worth the writing. It appears to be a counterfeit.

The Gutknecht amendment says this "all appears." I do not think we want "to appear" with the health and safety of our people. Where is the safety net for our honored citizens under this Gutknecht amendment? We cannot allow re-importation if it "appears" okay.

The FDA, the Customs do not have the resources to open up every one of these and make sure it is the real thing. We have an example given here under the Sanders amendment and now the Gutknecht amendment. Do not allow this amendment to go through because it appears that the senior citizen is going to be helped out, or the single mother, or whoever it may be. They cannot be distinguished.

To run the tests are $6,000 to $8,000 per test to determine if it is the genuine thing. The offices of my colleagues from the U.S. Department of Justice. There are letters in the offices of my colleagues from the FDA asking us not to approve the Gutknecht amendment, not to approve the Sanders amendment, and I would submit both of these letters for the RECORD as they are both the FDA and the Department of Justice Drug Enforcement Administration opposition to these amendments.

Hon. W. J. TAUSZEN, Chairman,
Hon. JOHN D. DINGELL, Ranking Member,
Committee on Energy and Commerce, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN AND RANKING MEMBER DINGELL:

I am writing in response to your request for the Drug Enforcement Administration (DEA) to comment on two certain proposed amendments to H.R. 2390. In furtherance of the efforts of the Energy and Commerce Committee, the DEA is pleased to address the importation of drugs in the United States and submit the following comments on the proposed amendments. These comments would prohibit the Food and Drug Administration (FDA) from using any of its funds received under the Agriculture Appropriations Act to enforce certain provisions of the Federal Food, Drug, and Cosmetic Act (FDCA) that pertain to the importation of prescription drugs. We oppose both of these proposed amendments because they would hinder the ability of federal law enforcement officials to ensure that drugs are imported into the United States in compliance with longstanding federal laws designed to protect the public health and safety.

One of the proposed amendments would prohibit the FDA from using any of its appropriation to prohibit the importation of "prescription drugs," including controlled substances, into the United States. This proposal would be in conflict with the Controlled Substances Act (CSA), which is DEA’s governing statute. The basic foundation of the CSA is the control of the distribution of controlled substances, under which all persons in the legitimate distribution chain (manufacturers, wholesalers, and retailers) must be registered with DEA and maintain strict accounting for all transactions. This regulatory scheme, administered by DEA, is designed to prevent diversion of controlled substances into illicit channels. However, DEA can maintain no control over the distribution chain and prevent diversion where American consumers purchase their drugs abroad. Somewhat similarly, the law that the FDA administers (the FDCA), cannot be effectuated where American consumers purchase drugs abroad. Among the ways that the FDCA protects the American public is by requiring good manufacturing practices, proper labeling, and safe handling to prevent adulteration. There is no way to ensure such protections to American consumers if they are allowed to purchase drugs from foreign sellers without FDA oversight.

We recognize that the proposed amendment states that it does not apply to controlled substances. However, the wording of the proposed amendment would provide a potential loophole that could be exploited by traffickers in controlled substances. Every day, agents of law enforcement, including controlled substances, are illegally shipped into the United States by mail or private carrier. Those who ship controlled substances in this fashion mark their packages as containing controlled substances. Under the proposed amendment, drug traffickers could send shipments of controlled substances into the United States marked “FDA-approved noncontrolled substance” and the FDA would be powerless to take any investigative steps or to assist the United States Customs Service (USCS) or DEA in intercepting these illegal shipments. An additional concern with the proposal is the use of the phrase “not in the business of importing prescription drugs.” This terminology is vague, impractical, and inconsistent with that use historically in American drug laws. The FDCA and the CSA have always used the concept of “registration.” Under the FDCA, only those manufacturers registered with the FDA may import prescription drugs. Under the CSA, persons must be registered with DEA to import controlled substances. Moreover, it would be an undue burden on law enforcement (and a benefit to traffickers) to require the government to prove that someone is “in the business of importing prescription drugs” before even considering investiga
tion. Many unscrupulous persons would simply claim they are "not in the business of importing prescription drugs" in order to stifle investigation of potential criminal activity.1

1 The CSA makes an allowance for individuals to import small amounts of controlled substances for personal medical use or for family members traveling to and from the United States—only for the legitimate personal medical use of the traveler and in small quantities in accordance with state laws. See 21 USC §963(a); 21 CFR §130.22. As with the proposed amendment described above, another proposal would likely be exploited by drug traffickers. This proposal would prevent the FDA from enforcing section 801(d)(1) of the FDCA (21 USC §381(d)(1)), which prohibits the importation of "any drug that is not in the business of importing prescription drugs" from importing from certain specified countries FDA-approved prescription drugs that contain substances. This proposal would be in conflict with the Controlled Substances Act (CSA), which is DEA’s governing statute. The basic foundation of the CSA is the control of the distribution of controlled substances, under which all persons in the legitimate distribution
DEA, FDA, and the USCS are currently facing extensive demands on many fronts with respect to prescription drug importation and smuggling. Information obtained from the USCS indicates that there is an increased volume of prescription drugs being imported through the mail as a result of the Internet. Although the CSA clearly prohibits importation of controlled substances in this manner, the FDA and USCS must inspect each package to ascertain the contents. Identifying a drug by its appearance and labeling is not an easy task. From a practical standpoint, inspectors cannot examine drug products and accurately determine the identity of such drugs or the degree of risk they pose to the individual who will use them. This is particularly true since these drugs are often intentionally mislabeled. Shipment from countries identified in the section 804(f) of the FDCA have been the source of a large amount of controlled substances that have been illegally imported. Additionally, the USCS inspectors on the southern and northern borders must determine whether each package going through the United States with a drug is complying with the FDCA and the CSA. By preventing the FDA from enforcing certain provisions of the FDCA regarding the importation of drugs, these amendments could be a windfall for criminals, giving them a new way to hide their activities behind a new restriction on law enforcement.

For these reasons, we respectfully oppose the foregoing amendments to H.R. 2390. Thank you for your attention to this matter. If we may provide additional assistance, we trust that you will not hesitate to call upon us.

The Office of Management and Budget has advised us that there is no objection from the standpoint of the Administration’s program to the presentation of this report.

Sincerely,

WILLIAM B. SIMPKINS,
Acting Administrator.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Hon. W. J., “BILLY” F. QUINN,
Chairman, Committee on Energy and Commerce,
House of Representatives, Washington, DC.

Hon. JOHN DINGELL,
Ranking Minority Member, House of Representa-
tives, Washington, DC.

DEAR MR. CHAIRMAN AND MR. DINGELL:

Thank you for your continued interest in the safety of medicines available in the United States. This is in response to your letter of July 5, 2001, regarding Representative Gil Gutknecht’s proposed amendment to the FY 2002 Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriation bill. 

As you know, the amendment offered by Mr. Gutknecht would prohibit the Food and Drug Administration (FDA or the Agency) from using appropriated funds to enforce section 801 of the Federal Food, Drug, and Cosmetic (FD&C) Act to prevent an individual from importing personal use a non-controlled substance, prescription drug that is approved by FDA from a country referred to in section 804(f) of the FD&C Act.

Your questions are restated, followed by the Agency’s response.

1. Section 801 of the FD&CA requires the FDA to take certain actions when the drug presented for import “appears from the evidence to be manufactured in insanitary conditions or adulterated or misbranded, among other things. The Gutknecht Amendment, however, requires the FDA to determine whether "a prescription drug [has been] approved by such Administration" when presented for import. Isn’t it true under present law FDA can only determine whether the drug is approved prior to import, and that the Gutknecht Amendment imposes a higher standard on the Agency? If so, what mechanism must the FDA use to determine whether a drug is FDA-approved when presented for importation?

2. The Gutknecht Amendment would create new substantial duties for the Agency: 

1. It requires FDA to first determine whether or not an imported drug is approved before the Agency can take action against the drug; and,

2. It dramatically increases the burden of proof the Agency must meet in deciding whether to refuse the importation for personal use.

Prescription drugs imported for personal use are regulated by data from the manufacturer that is sufficient to establish—with certainty—whether the drug was in fact produced at a facility holding a valid FDA permit and that the drug meets labeling requirements specified in that approval. An Agency official may be able to visually identify the drug and determine whether the drug is approved under current law. However, meeting the standard of certainty required by the amendment—that is, determining whether the drug is, or is not, FDA-approved—would require the Agency to compile evidence and make judgments and determinations far beyond that required under current law.

To compile such evidence, FDA could perform laboratory analyses on random samples from each shipment, a process that is time-consuming, resource-intensive, and expensive. Depending on the nature of the drug and the dosage form, we estimate a single test can cost between $6,000 and $15,000. This would, at best, serve to determine whether the drug is approved in the labeling and is composed of the FDA-approved formulation. However, first, FDA would have to develop such testing methodologies, and subsequently, it would have to develop the necessary capability to handle the anticipated influx of products needing to be validated. FDA would also have to determine if that drug is made in a facility registered with FDA.

Another potential method to determine identity is to try to trace the product back to the manufacturer. However, FDA lacks oversight of foreign wholesalers and pharmacists. A trace back may be feasible if the imported product is labeled with a lot number, which can be traced back to the manufacturer, although, without laboratory testing, it is possible that the drug and its labeling are counterfeit. However, small shipments of medications for personal use usually do not provide the lot number and may be composed of medications from multiple lots. If enacted, the Gutknecht amendment would, in many instances, make it virtually impossible for FDA to stop the personal importation of adulterated or misbranded drugs from identified countries that pose public health risks because of the insurmountable burden on the Agency to first demonstrate that these drugs are not approved products.

2. The Gutknecht Amendment would also require the FDA to determine from what country a prescription drug is being imported and has been manufactured, whether the FDA can take action against it.

No, currently FDA does not have the responsibility to determine the country from which the drug is imported. This would be a new duty for FDA. In addition, the amendment could be construed to allow the importation of approved drugs stored or handled in countries not listed in section 804(f) of the FD&C Act as long as the final country from which the drugs are shipped is listed in 804(f). For example, the U.S. Customs Service conducted a pilot study earlier this year at the Carson international mail facility in California. FDA identified a large volume of imported drugs originating in Vanuatu, a country not listed in 804(f), but transshipped through New Zealand, a country that is listed in 804(f). Many shipments, even some of those listed in 804(f), lack adequate controls on transshipment. This amendment would seriously impair FDA’s ability to ensure that approved drugs are not subpotent, counterfeit, contaminated, or otherwise a threat to public health and safety.

As you know, under current law, FDA can send warning letters to individuals not in the business of importing prescription drugs to import prescription drugs that are FDA approved. The Gutknecht provision were to pass, the FDA’s inquiry would be whether the drug is approved, not whether it is adulterated or misbranded. The FDA does not mail warning letters to individuals not in the business of importing prescription drugs if the prescription drugs appeared to be adulterated and/or misbranded.

If the drug is FDA-approved and imported from a country referred to in section 804(f) of the FD&C Act, under the Food, Drug and Cosmetic Act, FDA could not issue such a notice as the first step in preventing the importation even if the drug is adulterated or misbranded. Only if FDA determines that the drug is not approved or is approved but not imported from a country referred to in section 804(f) and, is adulterated or misbranded, may FDA send such a notice to an individual or to a manufacturer or distributor. The amendment does the same thing and not a counterfeit. Reject this amendment.

Mr. GUTKNECHT. Mr. Chairman, I yield myself such time as I may consume.
Mr. Chairman, in terms of those pictures, I just want to point out that those happened years ago and are not happened. Most importantly, I believe I am correct, those drugs were actually purchased on shelves in the United States. These are not drugs being brought in by Americans going to other places.

Mr. Chairman, I yield 1 minute to the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Chairman, I thank the gentleman from Minnesota (Mr. GUTKNECHT) for yielding me the time.

Mr. Chairman, whether the idea comes from a Republican or an Independent or a Democrat, who is trying to lower the outrageously high cost of prescription drugs in this country, there is no question that the amendment I am about to introduce, which has spent $200 million in the last 3 years to make sure that women in this country who have breast cancer have to pay ten times more for Tamoxifen than they do in Canada. The gentlewoman from Minnesota (Mr. GUTKNECHT) has a good idea. It will save substantial sums of money for millions of Americans.

I should point out, by the way, that the concept of reimportation that we are talking about today has been in existence for 25 years in Europe; and I do not know of one problem that has existed there. Let us stand up today to the pharmaceutical industry. Let us support this amendment. Let us support my amendment. Let us represent the people back home rather than the big money interests who would defeat both of these amendments.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentlewoman from Colorado (Ms. DEGETTE).

Ms. DEGETTE. Mr. Chairman, let me just say that the women of this country who have breast cancer desperately want Tamoxifen but they do not want counterfeit Tamoxifen, and that is the problem with some of these amendments. There are a number of problems with this amendment, and that is why I rise in opposition to it.

First of all, the terms of this amendment are vague; and it is not even clear how it is intended to function. For example, the amendment only applies to drugs that are sold in the United States who cannot afford their prescription drugs, and, for many of them, going to Canada or doing a mail order arrangement is a very nice solution to the cost problems.

To say that this is so dangerous, to me, I think, is a little bit of a red herring. In terms of the appearance language, as I understand it, that is the standard in the law as it currently exists. The gentleman from Minnesota (Mr. GUTKNECHT) was just following the current standard.

This amendment will help a lot of people. The majority of seniors have a prescription plan that is paid for by their previous employer, so this is not
going to affect them. But, for those in need, and I used to take care of those people, this can be very, very helpful.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. NORWOOD).

Mr. NORWOOD. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, we all want to do whatever we can do to lower the prescription drug costs for patients, and the sponsors of this amendment obviously intend to do just that. My friend the gentleman from Minnesota (Mr. GUTKNECHT), that is what he is after. But there is more to this than just lowering the cost. The corresponding cost to public safety under this amendment is simply unacceptable.

Under this amendment, overseas scam artists can counterfeit a label, claiming their product is a brand name, and we ban the FDA from even investigating? Would you vote to ban the FDA from investigating medications prescribed in this country? Even when they suspect exactly what is happening, the FDA is banned from investigating.

Mr. Chairman, I, too, wrote a lot of prescriptions as a practicing dentist for 25 years before I came here. I can tell you, America’s health providers must know beyond any doubt that the medicines that they give their patients are what they say on the label.

I know that some medications can come in, and it does save some people some money. But I do not want it imported through the port of Savannah to be spread out through my State, not knowing what is in that medicine.

Mr. GUTKNECHT. Mr. Chairman, I yield 1 minute to the gentleman from Maine (Mr. BALDACCI).

Mr. BALDACCI. Mr. Chairman, I would like to thank the gentleman for introducing this amendment today, which is similar to his amendment which was passed with broad support last year during the consideration of the agriculture appropriations bill.

Living in a border State, many of my constituents are burdened with large prescription bills and travel to Canada to purchase their medication. This is a hard trip for these people who are driving to such a high cost because of the high cost of prescription drugs in this country.

Most of my constituents who board buses to Canada are elderly and in need of medication to manage chronic conditions. They rely on these medications to keep them out of costly and unnecessary hospital care. This amendment enables Americans to obtain their medications from Canada through personal reimportation.

We must ensure that all of our constituents have access to these more affordable prescription drugs. Certainly reimportation is not a panacea, it is not the answer to this problem in itself, but it is a step, and it is a step, an important step, in the right direction, and important to the constituents that we represent.

Mr. Chairman, I urge my colleagues to support the Gutknecht amendment.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Chairman, there are some concerns that have been raised here by the DEA. They sent a letter to the gentleman from Louisiana (Chairman TAUZIN) and the ranking member, the gentleman from Michigan (Mr. DINGELL), dated July 11, 2001, which I will refer to and have placed in the record.

When you look at the actual language, two of the concerns that they raise in the debate here today is this issue of appearance.

Under the present law, the FDA can stop drugs at the border if they appear not to be approved. That is sensible and workable. But the new Gutknecht amendment shifts the burden. The Gutknecht amendment says the FDA cannot stop a drug if it appears to be in compliance. If it appears to be in compliance.

Then it goes even one step further. It says you cannot prevent an individual who is not in the business of importing a prescription drug. This is going to be a safe haven for defense lawyers. They are going to love this. They are going to attack a lot of cases.

Let me refer here to the DEA. DEA says, you know, this will create an undue burden on law enforcement to require the government to prove that someone is in the business of importing prescription drugs before even commencing an investigation. Many unscrupulous persons will simply claim that they are “not in the business of importing prescription drugs” in order to stifle investigations of potential criminal activity.

Mr. Chairman, we try to create laws with the best of intentions, and we create loopholes in the process, because sometimes there are things that get beamed. I lose last week, we want to do is send a signal to the international drug cartels, stop hiding your cocaine and your heroin. I tell you what, just put it in the form of an aspirin, label it, and it will come into the country. That is the wrong thing that we do not want to do.

I think this is a well-intentioned amendment, but completely misguided. Please vote against the Gutknecht amendment.

Mr. Chairman, I include for the RECORD the letter from the Drug Enforcement Administration to the chairman and ranking member of the Committee on Energy and Commerce.
An additional concern with the proposal is the use of an individual drug which is not in the business of importing prescription drugs." This terminology is vague, impractical, and inconsistent with that used historically in drug laws. The FDCA and the CSA have always used the concept of registration." Under the FDCA, only those manufacturers registered with the FDA may import prescription drugs. Under the CSA, persons must be registered with DEA to import controlled substances. Moreover, it would be an undue burden on law enforcement agents (i.e., traffickers) to require the government to prove that someone is "in the business of importing prescription drugs" before even commencing an investigation. "Valume of prescription drugs simply claim they are "in the business of importing prescription drugs" in order to stifle investigation of potential criminal activity each.

As with the proposed amendment described above, another proposal would likely be exploited by drug traffickers. Under the FDCA, we would prevent the FDA from enforcing section 801(d)(1) of the FDCA (21 USC 381(d)(1)), which prohibits the reimportation into the United States of prescription drugs except by the manufacturer of the drug. Under this proposal, a drug trafficker could stymie legitimate efforts by the FDA to assure consumer protection by requiring that any activity of "registration." Under the FDCA, only those manufacturers registered with the FDA may import prescription drugs. Under the CSA, persons must be registered with DEA to import controlled substances. Moreover, it would be an undue burden on law enforcement agents (i.e., traffickers) to require the government to prove that someone is "in the business of importing prescription drugs" before even commencing an investigation. "Valume of prescription drugs simply claim they are "in the business of importing prescription drugs" in order to stifle investigation of potential criminal activity each.

As with the proposed amendment described above, another proposal would likely be exploited by drug traffickers. Under the FDCA, we would prevent the FDA from enforcing section 801(d)(1) of the FDCA (21 USC 381(d)(1)), which prohibits the reimportation into the United States of prescription drugs except by the manufacturer of the drug. Under this proposal, a drug trafficker could stymie legitimate efforts by the FDA to assure consumer protection by requiring that any activity of "registration." Under the FDCA, only those manufacturers registered with the FDA may import prescription drugs. Under the CSA, persons must be registered with DEA to import controlled substances. with labeling that does not identify the manufacturer, packer or distributor; labeling that does not include the name and quantity of active ingredients; labeling that does not require adequate warning. And, most important, this would defund any effort by our enforcement mechanism to stop drugs that do not comply with child-resit- sistant packaging requirements under the Poison Packaging Act.

Mr. Chairman, it could not have been said better than by the gentleman from Michigan (Mr. DINGELL), the ranking member of the Committee on Energy and Commerce: “I wrote this provision because we had counterfeiting years ago. If we change this provision, we will have counterfeiting in the future.”

Defeat this amendment. Stand up for the safety of our pharmaceuticals in this country.

Mr. FRELINGHUYSEN. Mr. Chairman, I rise in opposition to the Gutknecht amendment.

Like the Sanders amendment, this amendment would expose our constituents to potentially unsafe and harmful drugs. We all want to do more to help our seniors with access to affordable medicines but exposing them to potentially unsafe medicines as a way to do so is unacceptable.

As Members of the authorizing committee will rightfully argue, any proposed changes to the consumer safety standards in our country—a country that now ensures our medicines are the safest in the world—should only be done after thorough investigation and consideration.

To date, that investigation has shown that the Customs Service and the FDA are already overwhelmed at the border and at international mail facilities with drugs being shipped in for personal use and only a small portion of those shipments are currently investigated for their safety. In fact, our health and safety experts are recommending that we strengthen protections against these imported mail order drugs, not weaken them.

And if you won’t heed the warnings of the experts, listen to the people who rely on us to keep their medicines safe. The ALS, Lou Gehrig’s Association wrote with their concern.

This amendment would deprive the FDA, pharmacies and thus, our patients and families of the confidence we now have that our medicines are safe, have been properly stored, and are not counterfeit.

The Gutknecht amendment would only compound the safety risk to our constituents of counterfeit and unsafe medicines. I urge my colleagues to do the same.

Mr. FRELINGHUYSEN. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Pursuant to the order of the House, the gentleman from Ohio (Mr. KUCINICH) will be recognized.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume.

I offer this amendment today to ensure the livelihood of commercial fishermen and protect our oceans, lakes and streams. This amendment is a reasonable and moderate safeguard. It will delay FDA approval of genetically engineered fish for 1 year.

This amendment is necessary because commercial fishermen and environmentalists have raised concerns that GE fish may pose ecological risks that have not been carefully considered by Federal marine agencies. This amendment corrects this situation by providing a 1-year moratorium, giving Congress the opportunity to investigate and authorize an agency with environmental expertise clear authority to regulate the environmental impacts of genetically engineered fish.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I rise in opposition to the amendment, and I yield myself such time as I may consume.

Mr. Chairman, I recognize that there are legitimate concerns for the safety of genetically engineered animals, including fish. I am not concerned that the proposed amendment would actually delay advancement in the state of scientific knowledge. It would prevent FDA from reviewing any applications related to transgenic fish. The process of consulting with sponsors and reviewing applications that advances scientific understanding in both the public and private sectors, I do not wish to halt this learning process.

Further, in reviewing these applications, FDA addresses the safety of the animal, the environment, and the consumer. In addition, the sponsor must assure that the transgenic fish are contained and not introduced into the environment or the food chain until safety is assured. This is a reasonable and prudent scientific integrity and discipline of the drug-approval process makes it a reliable, effective, and safe venue for advancing scientific knowledge and getting needed products to the marketplace.

As a result, I oppose this amendment, and I urge my colleagues to do the same.

Mr. Chairman, I reserve the balance of my time.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume.

I would just like to say in response that what we are proposing here is not to block research, but to block FDA final approval. Our approach would mean that the FDA would have to actually do more research. Scientists licensed into the wild, they become much more attractive for mating; but they are not as fit to survive. Their offspring are not as fit to survive, and eventually we end up with an extinct species.

As a result of genetically engineered fish producing unfit offspring that are more successful in mating, the Purdue scientists predict that if 60, 60 genetically engineered fish were introduced into the population of a fish, the species would become extinct within only 40 fish generations. They refer to these disturbing results as the trojan gene effect.

Here we can see why a genetically engineered fish would be represented as a genetically engineered fish and is, in fact, what we are speaking about, as opposed to two conventionally developed fish, and we see the difference in size. What happens is, if they are released into the wild, they become much more attractive for mating; but they are not as fit. Their offspring are not as fit to survive, and eventually we end up with an extinct species.

Mr. Chairman, I reserve the balance of my time.

Mr. BONIOR. Mr. Chairman, I yield 2 minutes to the gentleman from Mississippi (Mr. PICKERING).

Mr. PICKERING. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Ohio (Mr. KUCINICH), denying the Food and Drug Administration’s scientific experts the funding necessary to review the application of transgenic fish.
I oppose this amendment because it does not give the FDA, the experts in this field, the power to make informed decisions on the safety of transgenic fish. Congress does not possess the depth of scientific knowledge needed to determine the safety of transgenic fish. We should go forward with the review. There is also already a comprehensive regulatory process at FDA’s Center for Veterinary Medicine to evaluate any risk associated with transgenic species.

Now, the fundamental flaw also in the Kucinich amendment is that it is not restricted just to transgenic salmon, but applies more broadly to transgenic fish. For example, the amendment would severely hamper ongoing research efforts, including catfish research. Catfish is the nation’s largest agricultural sector spending over $500 million in revenue to farms covering over 190,000 acres in 13 States and is extremely important to my home State of Mississippi. Also, research on transgenic catfish is targeted to the development of disease-resistant stocks and novel veterinary medicine.

This research is vital because catfish farmers can identify disease and, once identified, can remove the single greatest barrier to improved farm production and human health.

Mr. Chairman, U.S. agriculture producers and consumers have benefited greatly from advances in transgenic technology and in plant sciences. These new tools allow farmers to produce better products, while reducing chemical use, which provides a tremendous benefit to our environment. In addition, biotechnology holds the keys to eliminating world hunger and wiping out global poverty. While this technology has not been used widely in animal production, for results similar to those that we have seen within the realm of plant science is evident.

Let me just close real quickly by saying, oppose the Kucinich amendment. Stand for sound science. Do not stick our heads in the mud. This is a great technology that will make species stronger, healthier and better.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume. For the record, this amendment does not restrict any research funding. Now, in case my colleagues did not hear that, this amendment does not restrict any research funding. It only restricts FDA funding related to their approval of the fish, but they do not do research. Any research funding comes from other USDA research accounts, and that is not impacted by this amendment.

Mr. D’EFAZIO. Mr. Chairman, I yield 4 minutes to the gentleman from Oregon (Mr. DeFazio), whose work on this amendment I appreciate.

Mr. D’EFAZIO. Mr. Chairman, let us just get this straight one more time: no impact on research. Companies that are investing in research are free to continue to research. They are free to continue to research without any restrictions.

But what we want is a full scientific analysis of the potential impact of the release of these transgenic fish into the environment. That is what we are talking about. The FDA has no qualifications in the area of environmental science. They admit it. They have deemed, under their authority, that transgenic fish are new drugs. Therefore, they have the authority to pass on the viability of a new drug and the safety of a new drug; but the drug that they are approving is a living fish, a fish that will grow at many times the rate of its natural cousins; and it will outcompete them for food, outcompete them for mating activity, and ultimately make our native stocks and species, rivers, or even our ponds, because sometimes they get out of there, too, we want to know what the potential impact is on other species of fish.

That is all we are asking for here. It is a simple request—firing an agency that knows something about fish, not the people at the FDA. Find one person at the FDA who has a degree in marine biology and I will buy dinner. There are not any over there. They do not know a darned thing about this issue or the potential impacts on the environment and other species of fish.

So this is a very, very prudent and conservative amendment. I urge Members to adopt it.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky (Mr. Whitfield).

Mr. WHITFIELD. Mr. Chairman, I thank the gentleman for yielding time to me.

I oppose reluctantly to oppose this amendment today, because of my respect for the gentleman from Ohio (Mr. Kucinich), a good friend of mine. But I think his amendment that would cut off funding for the FDA to go through the approval process or issue the final approval is bad policy.

I do not believe the anti-biotech position is supported by the facts. Even the Washington Post in this Monday’s editorial entitled “Food Fight” called efforts to ban biotech murderous nonsensical. Let me read our title article.

“Is this technology safe? No test has suggested that genetically-engineered crops harm human health. On the other hand, a lack of plentiful, cheap food harms human health enormously. Half the children in South Asia and one-third in sub-Saharan Africa are malnourished today. Among other consequences, these children suffer iodine deficiency disorder, which causes mental retardation, and vitamin A deficiency, which causes blindness.

“Some anti-genetic activists say the poor will not be able to afford or benefit from these new genetic products.” They say also that the so-called “green
revolution'', which was supposed to conquer hunger and in their view did not, Received by George. Congress, which mimicked the same idea, as well as the American Farm Bureau Federation, the American Soybean Association, the Grocery Manufacturers of America, the National Corn Growers Association, the National Cotton Council, the National Fruit Processors Association, and many, many more. Mr. Chairman, let me tell you why my colleagues reject this step back into the dark ages.

Mr. KUCINICH. Mr. Chairman, I yield 24 minutes to the distinguished gentleman from Ohio (Ms. KAPTUR), the ranking member of the subcommittee.

Ms. KAPTUR. Mr. Chairman, I thank the gentleman for yielding time to me, and I want to compliment my colleagues, the gentleman from Ohio (Mr. KUCINICH) and the gentleman from Oregon (Mr. DeFazio), for bringing this extremely important issue before the full House as we debate this 2002 agriculture appropriations bill.

Let me say to the gentleman that I think what is so important about what he has done is that has drawn a line in the sand. He is saying to us that before we cross the line between the green revolution and the genetic revolution, somebody here in Congress had better pay attention that our government is not properly structured to deal with this significant scientific leap.

We are not talking about the marriage of genes between necessarily like species that have mated in nature, or pollinated in nature. But rather, we are addressing the injection of growth hormones into fish that have never mated, producing species that we have never seen the likes of, and nature has never seen the likes of since the dawn of time.

From an administrative standpoint, we could ask ourselves, who is in charge of fish, anyway? We cannot even get the government of the United States to inspect fish that is coming over our borders and causing people to get sick.

So who is in charge of fish? We have the Commerce Department, with NOAA, the National Oceanic and Atmospheric Administration. We have the Interior Department with the Fish and Wildlife Service. We have the USDA, with the Food Safety Inspection Service. We have the EPA, which issues these advisories such as “Do not eat fish from Lake Erie but one per week because of mercury levels being too high.”

I can tell the Members this, that we know today that we have half as many fish in our oceans as we did 25 years ago. This diminishment of the natural system of oceanic fish production is a serious international problem. If we think about the dawn of genetic engineering, this is but another transgenic product that we should be concerned about when it is released from containment into the natural environment. We do not know its consequences on the ecosystem, we do not know the consequences of transgenically-altered plants in the natural environment. We are ill-equipped as a country to deal with these issues in any intelligent way, so we sort of get into using current unprepared bureaucracies, like FDA, which this amendment stops research. But what it does is it says let us take a pause for thought here with the FDA. Let us take a look as a Congress to investigate and authorize the appropriate agency with environmental expertise and clear authority to regulate the impacts of these genetically-engineered fish, wherever that might be.

I fully support the amendment and urge adoption of this amendment.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Texas (Mr. Brady).

Mr. BRADY of Texas. Mr. Chairman, there is a reason America has the highest standards and the safest foods in the world, safer than Europe, more nutrition than Asia, using less pesticides and preserving more of the environment than any other Nation in the world. The reason is that time and time again America has refused to inject politics into our food safety process.

However, that is what this amendment does. It contaminates our scientifically sound food safety process with politics. There is no scientific reason for the moratorium. The FDA already requires all food applicants, whether they are scientifically improved or not, to meet their highest safety standards, not just for human food consumption but for animal welfare and environmental safety.

This amendment not only does not contribute to food safety, it actually harms it, because it says no matter how beneficial, no matter how strong the benefits of this research, foods can not even consider it. This does discourage research into aquaculture breakthroughs which help us develop fish stocks that are healthier, more abundant, and more immune to disease.

That is important not just to farm catfish, not because we have decimated the world’s fishing, but it helps to save the 30 percent of fish killed needlessly each year because of illness. If fish are healthy, the food is going to be healthy.

Finally, this amendment feeds the European hysteria, and feeds upon normal people who have not thought about the progress and benefits of biotechnology, too. The fact of the matter is that we produce more food on less land, more environmentally safe food with less pesticides in America and around the world because of biotechnology.

At Texas A&M, which I represent, we work with the Medical Center in Houston to develop plants and vegetables that have cancer-fighting oxidants. As we said here today, scientists have rice that will address the vitamin A deficiency which could help prevent 500,000

Mr. Chairman, nothing in the gentleman’s amendment stops research. But what it does is it says let us take a pause for thought here with the FDA. Let us take a look as a Congress to investigate and authorize the appropriate agency with environmental expertise and clear authority to regulate the impacts of these genetically-engineered fish, wherever that might be.

I fully support the amendment and urge adoption of this amendment.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Texas (Mr. Brady).

Mr. BRADY of Texas. Mr. Chairman, there is a reason America has the highest standards and the safest foods in the world, safer than Europe, more nutrition than Asia, using less pesticides and preserving more of the environment than any other Nation in the world. The reason is that time and time again America has refused to inject politics into our food safety process.

However, that is what this amendment does. It contaminates our scientifically sound food safety process with politics. There is no scientific reason for the moratorium. The FDA already requires all food applicants, whether they are scientifically improved or not, to meet their highest safety standards, not just for human food consumption but for animal welfare and environmental safety.

This amendment not only does not contribute to food safety, it actually harms it, because it says no matter how beneficial, no matter how strong the benefits of this research, foods can not even consider it. This does discourage research into aquaculture breakthroughs which help us develop fish stocks that are healthier, more abundant, and more immune to disease.

That is important not just to farm catfish, not because we have decimated the world’s fishing, but it helps to save the 30 percent of fish killed needlessly each year because of illness. If fish are healthy, the food is going to be healthy.

Finally, this amendment feeds the European hysteria, and feeds upon normal people who have not thought about the progress and benefits of biotechnology, too. The fact of the matter is that we produce more food on less land, more environmentally safe food with less pesticides in America and around the world because of biotechnology.

At Texas A&M, which I represent, we work with the Medical Center in Houston to develop plants and vegetables that have cancer-fighting oxidants. As we said here today, scientists have rice that will address the vitamin A deficiency which could help prevent 500,000
Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Missouri (Ms. MCCARTHY).

Ms. MCCARTHY of Missouri. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. DEFAZIO).

Mr. DEFAZIO. Mr. Chairman, the gentleman who preceded me in the well said there would be virtually no risk because they will be sterilized. But the companies who manufacture these fish admit they cannot sterilize them all. Come on, they are not perfect. So some of them will get into net pans that will not be sterile, and we know some of the fish in net pans will get out. But if we are lucky, it will not be the ones who are not sterile; and if we are really lucky, if they are the ones who are not sterile, they will get caught before they breed. But if they breed, they could create an environmental disaster.

That is why a huge number of organizations, of fishermen across the United States, bicoastal, and on the Gulf oppose the release of these fish. All of them know their potential impact on the environment. We have a world to feed, Mr. Chairman, and I urge my colleagues to oppose the amendment.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. BONILLA).

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. DEFAZIO).

Mr. DEFAZIO. Mr. Chairman, the gentleman who preceded me in the well quoted from The Washington Post on an editorial about plants. Let us read the editorial The Washington Post wrote about fish. "The ecosystem may or may not be ready for the first genetically engineered salmon, but the regulatory system emphatically is not. Environmental issues will be covered, the FDA promises, but the environmental and marine specialists who could best address them are housed at other agencies. The area requires the routine involvement in decisions about the handling of genetically modified organisms that might get released into the environment."

The gentlewoman who preceded me in the well said there would be virtually no risk because they will be sterilized. But the companies who manufacture these fish admit they cannot sterilize them all. Come on, they are not perfect. So some of them will get into net pans that will not be sterile, and we know some of the fish in net pans will get out. But if we are lucky, it will not be the ones who are not sterile; and if we are really lucky, if they are the ones who are not sterile, they will get caught before they breed. But if they breed, they could create an environmental disaster.

That is why a huge number of organizations of fishermen across the United States, bicoastal, and on the Gulf oppose the release of these fish before we know their potential impact on the environment. Mr. Chairman, may I inquire how much time remains? The CHAIRMAN. The gentleman from Oregon (Mr. DEFAZIO) has 2 minutes remaining and the gentleman from Texas (Mr. BONILLA) has 5 minutes remaining.

Mr. BONILLA. Mr. Chairman, I yield the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Missouri (Ms. MCCARTHY).

Ms. MCCARTHY. Mr. Chairman, I yield myself such time as I may consume.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Missouri (Ms. MCCARTHY).

Ms. MCCARTHY. Mr. Chairman, I yield myself such time as I may consume.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Missouri (Ms. MCCARTHY).

Ms. MCCARTHY. Mr. Chairman, I yield myself such time as I may consume.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Missouri (Ms. MCCARTHY).

Ms. MCCARTHY. Mr. Chairman, I yield myself such time as I may consume.
My concern with the amendment that we are considering today is, one, that we will circumvent our science-based regulatory process and concern that it will set the process back, that it will ensure that we can have politics that can intercede all too often that will preclude our ability to ensure that we can see progress in the development of these new technologies.

One of my colleagues earlier today in this debate mentioned we have half as many fish in the ocean today as we did some few decades ago. A lot of this is due to overfishing and fishing that was occurring because of the demand to provide an adequate food source for a lot of people today. When we are looking at the potential for this technology, the technology that can be advanced through transgenic fish, this is something that in many ways could address some of the pressure on our natural fisheries by ensuring that we can continue to see progress in the commercial production of food and fish products.

So I think this is another argument for us to ensure that we are again continuing this science-based process. Some of the concerns that my colleagues raise I think are adequate. We ought to ensure we are using the most appropriate science. But FDA today is required, when they are considering the approval of these new transgenic products, to have a dialogue, to be consulting with EPA, with U.S. Fish and Wildlife, and the National Marine Fisheries Service and NOAA, as well as USDA.

Furthermore, it is this amendment that would preclude that continued research and investigation through those bodies that have the scientific expertise. In fact, this amendment would set back our ability to fully understand the science and the threat that transgenic fish might pose for human consumption as well as the threat it might potentially pose to the environment.

Once FDA is confident that, through their investigation and the scientific process, that there is not a significant or marginal threat to both consumers as well as the environment, before anyone can even get a permit to produce transgenic transgenic fish, they are going to have to go through a permitting process at both the Federal and the State level, that they will have to be dealing once again with EPA and other agencies, the National Marine Fisheries Service and U.S. Fish and Wildlife and EPA, which will be mandatory. So we have another safeguard there to ensure we will have adequate protections to the environment to ensure that we will not see any negative impacts.

In closing, I just ask my colleagues to respect the process. One of my colleagues earlier said that this is an amendment to protect the ability to use hormones in fish. Nothing could be further from the truth. Opposing this amendment is to protect a science-based process, to protect a process that we will ensure that it will set the process back, that it will ensure that we will have adequate protections and that we can see the increase in food production, in this case, in the production of fish, that can meet the protein and nutritional needs of hundreds of thousands if not billions of people that are going to be populating this Earth.

I ask my colleagues to vote "no" on this amendment.

Mr. KIND. Mr. Chairman, I want to thank you for the opportunity to speak on behalf of this amendment and urge my colleagues to support an amendment which would preserve funding for the American Heritage Rivers Initiative. I also want to extend my gratitude to my colleagues for introducing this important amendment.

The American Heritage Rivers Initiative is entirely voluntary and locally driven. This program is composed of local river pilots who work for a federal agency. These pilots help communities locate the resources they need to improve water quality, reduce flood losses, and promote environmental and riverfront development along some of the nation's significant waterways, including the Upper Mississippi River.

This program has been extremely successful in the designated areas along the Upper Mississippi River that include 58 communities in Illinois, Iowa, Minnesota and Missouri. Along the Upper Mississippi River, the American Heritage Rivers Initiative has been instrumental in bringing communities together to link existing trails and greenways, establish and promote interpretive centers, restore habitat and promote riverfront revitalization. I fully support the effort to preserve funding for the proposed designations of Alma and Prairie du Chien, Wisconsin.

Thank you again for the opportunity to speak in support of this amendment and the American Heritage Rivers Initiative.

Mr. SMITH of Michigan. Mr. Chairman, I rise in opposition to the amendment from the gentleman from Ohio. This proposal is a thinly disguised attack on biotechnology. It would preclude the Food and Drug Administration from using finding to review and approve applications for salmon and fish improved from biotechnology. This amendment not only wastes money that already has been spent assessing the health and environmental safety of these biotech fish, it also would prevent FDA from proceeding to review new foods under the Federal Food, Drug and Cosmetic Act.

This amendment not only wastes money that already has been spent assessing the health and environmental safety of these biotech fish, it also would prevent FDA from proceeding to review new foods under the Federal Food, Drug and Cosmetic Act.

Current law and regulations require applicants who wish to bring a new fish on the market to undergo a "new animal drug" review process by the Center for Veterinary Medicine. In meeting these requirements, an applicant must meet rigorous safety standards, which include strict requirements on animal welfare, the environment, and human health. This pre-market review process ensures that the products of biotechnology are safe to grow and eat.

It is interesting to note that while research to develop commercially-viable biotech fish is well underway, none has completed the FDA review process. This amendment would effectively end current research projects and would put future private and public research efforts to improve productivity and lower cost at risk.

Today, for example, disease is the biggest impediment to improved production of farm-reared catfish. This amendment would seriously undermine research that could improve these yields and reduce losses from disease. Quick-growing biotech salmon could reduce the pressure on wild fish stocks that are used for feed. Salmon farmers also use only sterile, all-female stock to prevent cross-breeding with wild populations. The gentleman's amendment would throw out all of the research and capital that were used to develop these new varieties and is that is needed to move toward more sustainable fish production and harvesting.

FDA's policy on biotechnology has been in place for nearly ten years and has allowed the safe introduction of wholesome and safe food. Incidentally, FDA's policy applies to all foods, not just those produced using biotechnology. The gentleman's amendment implies that biotech foods are inherently different and more risky than foods produced using traditional techniques such as cross breeding. There is no scientific evidence to justify this assertion. Rather than incite unfounded, ideologically-driven fears of this technology, we should recognize the incredible potential of biotechnology. Biotechnology will help alleviate hunger in the developing world, promote more environmentally-friendly and sustainable farming practices, reduce pressures on arable land, and create new markets for farmers.

Mr. Chairman, make no mistake: this is a measure aimed at stopping aquacultural biotechnology. FDA's current regulatory process should not be short-circuited. I urge my colleagues to oppose this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. KUCINICH).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. KUCINICH. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Ohio (Mr. KUCINICH) will be postponed.

AMENDMENT NO. 5 OFFERED BY MRS. CLAYTON

MRS. CLAYTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 5 offered by Mrs. Clayton:

At the end of the bill (before the short title), insert the following new section:

SEC. 738. The amounts otherwise provided by this Act are reduced by the amount made available for "AGRICULTURAL PROGRAMS—AGRICULTURE BUILDINGS AND FACILITIES AND RENTAL PAYMENTS".
CONGRESSIONAL RECORD—HOUSE

July 11, 2001

by reducing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for competitive research grants (7 U.S.C. 321–326 and 328), including Tuskegee University), by increasing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for a program of capacity building grants (7 U.S.C. 3152(b)(4)) to colleges eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321–326 and 328), including Tuskegee University), by increasing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for payment to eligible land-grant colleges (including Tuskegee University (7 U.S.C. 3222)), and by increasing the amount made available for “AGRICULTURAL PROGRAMS—OUTREACH FOR SPECIFICALLY DISADVANTAGED FARMERS” (7 U.S.C. 3152, $5,021,000, $10,000,000, and $7,007,000, respectively).

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from North Carolina (Mrs. CLAYTON) and a Member opposite, each of whom will control 10 minutes.

Mrs. CLAYTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I have agreed to present my amendment with the understanding that the chairman is going to work with us during conference, and then I will withdraw it. But he has graciously allowed us to get the argument into the RECORD.

This amendment is an en bloc amendment and has three phases to it. The first part is to indeed allow for justification for the outreach to small and disadvantaged farmers. The reason why we need these extra resources for small and disadvantaged farmers is because small farmers, all farmers are having difficulty, but small farmers and disadvantaged farmers and minority farmers are especially having difficulty. We are all aware of the issue around farmers not being able to get credit, farmers not being able to get the technical assistance, farmers not being able to keep up with the new technology. Well, providing monies to what we call the minority research builds the capacity and the research that we are providing new people about the understanding of our food and our fiber.

So I would ask my colleagues as we move forward to support this.

Mr. Chairman, I yield 2 minutes to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Chairman, I thank the gentlewoman from North Carolina for allowing me the opportunity to work with her. I also thank the author of this en bloc amendment of this committee and the ranking member for their leadership and their concern.

This is not a new attempt. This is an initiative that we worked on with the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies and the authorization committee last year dealing with the 1890 land grant colleges. I am on the Committee on Science, and I know the value of R&D. I also know the value of the history of farmers as well as those farmers in the African community.

But generally speaking, the history of the land grant colleges were around the rural communities in particular: They came out of the soil, if you will. In fact, many of the colleges still have very large agricultural programs now and teach agricultural science, such as Prairie View A & M.

It is interesting we are not in this amendment asking, if you will, to take over the percentages and the dollars given to other colleges in particular the 1862 land grant. But what we are here today saying that the research dollars to the 1890 land grant is less than 1 percent. It is .5. So the opportunity for innovative research that can help in nutrition, that can help in agricultural science as it relates to the research done with farm animals, if you will, if an urbanite can suggest that particular type of research, soil research, environmental research, coming from these kinds of campuses, dealing with small farmers is an enormous asset to what is a very important part of our economy, and that is farming and food and agriculture.

So I would simply ask and join the gentlewoman from North Carolina in asking for our amendment to be supported in Ohio (Ms. KAPTUR) for lines of research in enhancing the opportunity for these colleges. In my State it is Prairie View A & M, but there are many, many colleges that can benefit by this research. It is, again, not to take away, it is to enhance.

I would hope that we would want to enhance the opportunities for research among these particular colleges. I ask for support of this amendment.

Mr. BONILLA. Mr. Chairman, I rise in opposition to the amendment.

Ms. KAPTUR. Mr. Chairman, I thank the gentleman from Texas (Mr. BONILLA) is recognized for 10 minutes.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I understand clearly that we are to work on this in the weeks ahead and the months ahead to try to address the concerns of the gentlewoman from North Carolina and would like to inquire if the gentlewoman from North Carolina is still interested to withdraw, if the gentleman will allow me to do that.

Ms. CLAYTON. Mr. Chairman, I yield the gentleman?

Mr. BONILLA. Mr. Chairman, I yield the gentlewoman from North Carolina.

Ms. CLAYTON. Mr. Chairman, I do, but I do have another speaker, if the gentleman will allow me to do that.

Ms. KAPTUR. Mr. Chairman, I thank the gentlewoman from North Carolina (Mrs. CLAYTON) for yielding time to me.

Mr. Chairman, I wanted to publicly acknowledge the incredible work that the gentlewoman from North Carolina (Mrs. CLAYTON) has done in proposing this amendment along with the gentlewoman from Texas (Ms. JACKSON-LEE). Were it not for their vision and leadership last year, we would not have had any increase to these accounts.
Without question these colleges and institutes have such an enormous impact in our country, but also can be pivotal institutions for advancement in other countries. I envision the day when these additional dollars will be able to link these institutions to even some of the most underdeveloped areas of Africa. There, I think, cooperative research efforts could benefit both nations, the farmers of both nations, the people of both nations.

I also want to thank both the gentlewomen from North Carolina (Ms. CLAYTON) and the gentlewoman from Texas (Ms. JACKSON-LEE) for taking a hard look at the full potential of these historically black colleges and universities and the Tuskegee Institute and the needs of our smaller African American farmers.

In supporting this amendment, I am reminded of my travels to one State where there were significant civil rights suits against the U.S. Department of Agriculture. It was unbelievable to me that loans were not being made to very worthy endeavors by minority farmers for food processing. We run into this age-old problem of discrimination even by some of the local loan committees that still exist across this country.

I think that these universities and the Tuskegee Institute and these colleges can help lead America forward in a very important way. They can be of special assistance because of the trust with which they and their researchers are held by the very communities that we want to assist.

Mr. Chairman, I would have to say to these two gentlewomen—who really cannot be viewed as only gentle for some of what they have to address in serving at the national level and dealing with the issues that we contend with—that they are leading America forward in this new millennium in a way that is so vitally necessary. They certainly have my support in their intentions to increase funding in these categories.

Mr. Chairman, I know the gentlewoman wishes to withdraw the amendment at some point, but hopefully we will move to the Senate, we will be able to take my colleague’s excellent recommendations and enact them into law through conference.

Mrs. CLAYTON. Mr. Chairman, I yield 30 seconds to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Chairman, let me thank the ranking member for the sensitivity and enormity of her leadership in feeding the world.

I wanted to restate something that is crucial: The kind of partnerships that can be built the best between the historically black colleges and developing nations in terms of nutrition and agriculture science and opportunities to enhance their ability to provide food for themselves, which is a great problem in developing nations.

I thank the gentlewoman from Ohio (Ms. KAPUR) for her leadership. I thank the gentlewoman from North Carolina (Mrs. CLAYTON).

Ms. KAPUR. Mr. Chairman, will the gentlewoman yield?

Ms. JACKSON-LEE of Texas. I yield to the gentlewoman from Ohio.

Ms. KAPUR. Mr. Chairman, certainly we know in most of those places it is women who are raising most of the food and feeding their villages. We know that the historically black colleges and Tuskegee Institute will be especially sensitive to that. Without a doubt their reach can be worldwide.

Mrs. CLAYTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to thank all of those who are sensitive to this issue; but I want to raise the issue of the contribution that small family farmers and minority farmers are making to the vitality of the agricultural community. And to the extent we help them, and 2501 is that outreach program, it is administered by nonprofit groups and 1890 colleges, and that is why it is essential to get sufficient funds for it.

The research that the gentlewoman from Texas (Ms. JACKSON-LEE) emphasized so strongly, already there is a connection between the developing countries. Tuskegee is doing biotechnology in Nigeria. There is a program, Farmers to Africa, Farmers to Caribbean. 1890 is taking sustainable agricultural know-how to these small, struggling countries to transfer the knowledge we have. So Americans are doing good and well at the same time.

Finally, the capacity-building of the 1890 colleges is sustained to add to the credibility and strength of our higher education system. Research is an important part of agriculture, and to that extent we want to strengthen all of the land grant colleges, and this allows us to strengthen the 1890 land grant colleges.

Mr. Chairman, I thank the chairman for his willingness to work with us as we go forward in the conference committee.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentlewoman from North Carolina?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

AMENDMENT OFFERED BY MR. BACA

Mr. BACA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 74, after line 21, insert the following new section:

SEC. 71. The amount otherwise provided by this Act in title I under the heading "AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES" for an education grants program for Hispanic-serving Institutions (7 U.S.C. 4231) is hereby increased by $16,508,000.

Mr. BONILLA. Mr. Chairman, I reserve a point of order on this amendment.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from California (Mr. BACA) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from California (Ms. BACA).

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of my amendment to increase funding for USDA grants for Hispanic-serving institutions for agricultural research. Hispanic-serving institutions, or HSIs, are the backbone of Hispanic college education. These schools have great research capabilities and have much to offer, but because they do not have a land grant or are not necessarily historical, they sometimes do not receive all of the resources they deserve.

I salute the efforts of the chairman, the gentleman from Texas (Mr. BONILLA), on behalf of the Hispanic-serving institutions on his work toward allowing HSIs to gain a foothold in agricultural research grants. Yet I am certain that the gentleman from Texas (Mr. BONILLA) would agree with me that these schools merit more funding, especially to increase the growth and development of Hispanics in our institutions.

Mr. Chairman, 41 percent of all USDA research project proposals for HSIs are funded. Forty-one percent is a remarkable success rate for proposal acceptance. We obviously have a great reason to believe that we are not using nearly enough, and we need to tap into that.

In addition, I would like to ask Secretary Veneman and the administration to understand that these institutions are important to the Congressional Hispanic Caucus, and we will work and fight for more resources.

FY 2000 HIGHER EDUCATION AND HISPANIC-SERVING INSTITUTIONS EDUCATION GRANTS PROGRAM TOTAL FUNDS AWARDED TO STATES AND LEAD INSTITUTIONS—Continued

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. BACA. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I want to commend the work of the gentleman from California (Mr. BACA) on this very important issue on Hispanic-serving institutions, and I want to also express my gratitude for his acknowledging what this subcommittee has done; and also what has been done historically on the Subcommittee on Health and Human Services and Education over the last few years in a bipartisan way to take care of many of the problems that exist at many institutions in terms of funding.

Mr. Chairman, as I discussed with the gentleman before, we are willing to work to see if there is a possibility at all to try to increase this number down the road. We do not know if that is going to be possible, but we certainly will make every effort. We have given increases in this bill over the last 2 years as well, and we are doing all we can; and we certainly will continue to do that.

Mr. BACA. Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I thank the gentleman from California (Mr. BACA) for his leadership in bringing this issue to the attention of our subcommittee. The gentleman from California is particularly well suited to sensitizing the Congress for the extra attention that needs to be put to identifying those institutions serving higher numbers of Hispanic populations, and to help to place those in a more competitive position with larger and more established institutions that tend to have first call at the U.S. Department of Agriculture, even in their research protocols.

Mr. Chairman, I assure the gentleman that I will have my full support in identifying ways to move funding to those institutions to reach a broader array of the American public, and, as with some of the other institutions we were talking about a little bit earlier, particularly those serving African American populations, to look also toward a global role for those institutions because of their inherent bilingual capabilities and the historic ties that exist, certainly with Latin America and other places.

So we do not have a narrow view of only one State or even our own country, but we have this tremendous resource in our own country if we but see it and enhance it.

Mr. Chairman, I thank the gentleman for coming to us and for being the leader in this Congress and for bringing this issue to our attention. California could not have sent a more capable representative here, and the gentleman certainly has my pledge to work with him as we move toward conference to see if we cannot do it better in this new millennium than perhaps some of those who served here in the past.

Mr. BACA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the gentlewoman for her comments. We all realize that it is important to support institutions such as the HSIs, and I appreciate the lead that the gentleman from Texas (Mr. BONILLA) has taken in the past years ensuring funding, and I look forward to working with him in the future in conference committee to increase funding for this wonderful grant program.

Mr. Chairman, I understand that my amendment is subject to a point of order. I concede to that point of order, and I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

AMENDMENT NO. 20 OFFERED BY MR. SANDERS

Mr. Chairman, the pending business is the demand for a recorded vote on amendment No. 20 offered by the gentleman from Vermont (Mr. SANDERS); amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT); amendment No. 13 offered by the gentleman from Ohio (Mr. KAPTUR).

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

AMENDMENT NO. 20 OFFERED BY MR. SANDERS

Mr. Chairman, the pending business is the demand for a recorded vote on amendment No. 20 offered by the gentleman from Vermont (Mr. SANDERS) on which further proceedings were postponed in the following order: Amendment No. 20 offered by the gentleman from Vermont (Mr. SANDERS); amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT); amendment No. 13 offered by the gentleman from Ohio (Mr. KAPTUR).

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

RECORDED VOTE

The CHAIRMAN. A recorded vote has prevailed by voice vote.

The vote was taken by electronic device, and there were—ayes 145, noes 279, not voting 9, as follows:

(Roll No. 218)

AYES—145

Mr. LEWIS of California. Mr. Chairman, on order of the House of Thursday, June 28, 2001, the gentleman from Oregon (Mr. BLUMENAUER). The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I offer an amendment.

The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I yield myself such time as I may consume.

I rise to offer an amendment that would direct the Department of Agriculture to submit a report to Congress that details the full amount of Federal funds being used to provide price support for agricultural commodities. The amendment also describes the full effects of import quotas and tariffs imposed by the United States to protect such commodities.

Mr. Chairman, we have a strange patchwork of policies that date back two-thirds of a century to the Depression Era, back to a time when there were six million family farmers, when 25 percent of our population lived on the farms. Today, we have a crazy patchwork of programs that have serious environmental impacts, which is why this amendment has been endorsed by Friends of the Earth and the Environmental Working Group, but it also has distortive impacts as far as the economy is concerned. It is estimated that worldwide, there are over $150 billion in extra costs that are added; and for the United States consumer, it is the equivalent of a 3 percent food sales tax, and the most regressive because of the impacts this has on the poor who spend more, $18 billion a year.

We deserve, Mr. Chairman, the opportunity to see the big picture before we move forward with other elements that deal with agriculture, that deal with international trade.

The result of the vote was announced as above recorded.

The amendment offered by Mr. BLUMENAUER: Insert before the short title at the end the following new section:

Sec. 3. Effective three months after the date of the enactment of this Act, none of the funds appropriated or otherwise made available in this Act may be used to pay the salaries or expenses of personnel of the Department of Agriculture to make price support available (in the form of loans, direct payments to producers, or other subsidies) without respect to an annual report to the Committee on Agriculture of the House of Representatives and the Senate Committee on Agriculture, Nutrition, and Forestry of the total amount of Federal funds being used to provide price support for agricultural commodities. The amendment also describes the full effects of import quotas and tariffs imposed by the United States to protect such commodities.

Mr. BONILLA, Mr. Chairman, I reserve the point of order.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Oregon (Mr. BLUMENAUER) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I yield myself such time as I may consume.

I rise to offer an amendment that would direct the Department of Agriculture to submit a report to Congress that details the full amount of Federal funds being used to provide price support for agricultural commodities. The amendment also describes the full effects of import quotas and tariffs imposed by our Government protecting commodities.

Mr. Chairman, we have a strange patchwork of policies that date back two-thirds of a century to the Depression Era, back to a time when there were six million family farmers, when 25 percent of our population lived on the farms. Today, we have a crazy patchwork of programs that have serious environmental impacts, which is why this amendment has been endorsed by Friends of the Earth and the Environmental Working Group, but it also has distortive impacts as far as the economy is concerned. It is estimated that worldwide, there are over $150 billion in extra costs that are added; and for the United States consumer, it is the equivalent of a 3 percent food sales tax, and the most regressive because of the impacts this has on the poor who spend more, $18 billion a year.

We deserve, Mr. Chairman, the opportunity to see the big picture before we move forward with other elements that deal with agriculture, that deal with international trade.
Mr. Chairman, I yield 1 1/2 minutes to the gentleman from Florida (Mr. MILLER) to speak to a specific example of the impacts that we are concerned about.

Mr. MILLER of Florida. Mr. Chairman, I rise in support of this amendment, and I thank the gentleman for introducing it.

All we are asking for is transparency, and let me use the illustration of the sugar program that was passed in 1996, when we were told, no cost to the American taxpayer. Well, let us look at the facts. Let us look at the facts.

First of all, GAO says it cost $1.9 billion for the American consumer. The American consumer is the American taxpayer, so it cost $1.9 billion. Last year, the Federal Government had to buy $430 million worth of sugar, and it does not have any use for it. It is having to store it. We are spending $20 million a year to store all of this sugar that we have no use for, and yet we were told that it had no cost. The price of sugar in the United States is more than double what it is elsewhere around the world, as if the Federal Government were a major purchaser of sugar, whether it is in VA hospitals or schools and such.

In addition, under the environmental issue, sugar is a major contributor to the pollution of the Everglades. We are going to spend $8 billion to clean up the Everglades, and we are going to pay a lot of that cost because the sugar program is causing the problem.

So these agriculture programs that say, oh, it does not cost the Government anything, we do not know what it costs us. It has direct costs and it has indirect costs, and all this amendment says is let us have transparency, and let us figure out what it really costs.

Mr. SCARBOROUGH. Mr. Chairman, I appreciate the gentleman from Oregon bringing this important amendment to the floor.

It is also important to remember that in 1996, this Congress brought the Freedom to Farm Act to this floor. The professed plan was to phase out farm subsidies in 7 years by spending $36 billion on subsidies. Well, 7 years later we have spent over $80 billion instead of $44 billion, and that has not even been enough for subsidy supporters. In emergency funding for agriculture alone, Congress has spent an additional $28 billion. That means we either made a very bad guess back in 1996, or we are dealing with very bad public policy.

Today we find that the Freedom to Farm Act that was supposed to free American taxpayers from price supports, has actually backfired; and now, Congress once again is paying two, three, even four times the amount of subsidies that we pledged to the American people in 1996.

Congress passed welfare reforms for struggling single parents; and now Congress needs to pass similar reforms for the American farmer. Americans should not continue paying people for not planting their crops.

The Freedom to Farm Act failed because Congressional courage failed all American taxpayers. We need to look at these misguided policies again, and stop subsidy payments that continue to cost American taxpayers billions of dollars.

Mr. BLUMENAUER. Mr. Chairman, I yield myself such time as I may consume.

I would hope that we on this floor of both parties, people of disparate philosophical orientations, could agree on one thing: the American public deserves to know the big picture, how much it costs, who is paying, and the impacts of these programs so that we can make the appropriate decisions for agriculture, for the environment, and sound economic policy.

I understand there may be some question as to the acceptability of this amendment, that it may be subject to a point of order and I respect that, and I will be willing to withdraw my amendment. But I hope that we can work with the members of this subcommittee to be able to work to make sure that we have the information available to protect the environment, to provide sound agricultural policy, and be able to deal with our trade responsibilities in the international arena.

Mr. Chairman, I yield back the balance of my time.

PARLIAMENTARY INQUIRY

Mr. BONILLA. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BONILLA. Is the gentleman going to withdraw his amendment?

Mr. BLUMENAUER. Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

AMENDMENT NO. 1 OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 1 offered by Mr. TRAFICANT:

SEC. 516. No funds appropriated or otherwise made available under this Act shall be made available to any person or entity that has been convicted of violating the Act of March 3, 1933 (41 U.S.C. 10a-10c; popularly known as the “Buy American Act”).

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Ohio (Mr. TRAFICANT) and a Member opposed each with control 5 minutes.

The Chair recognizes the gentleman from Ohio (Mr. TRAFICANT).

Mr. TRAFICANT. Mr. Chairman, I yield myself such time as I may consume.

I would like the appropriators, if they would, to listen to my brief remarks, and the other Members. We just celebrated a great holiday, the independence of the United States of America, and right down here on the Mall when the national symphony was performing in celebration of our great democracy and republic, vendors were handing out souvenier small plastic American flags that were made in China. The national symphony is performing, people are in Washington to celebrate this great holiday, and the vendors are distributing small flags that I will send over; I do not have them with me. This is ridiculous.

Mr. Chairman, this is a very simple amendment. It gets right to the point. Anybody that has violated our Buy American laws will not be eligible to get money under the bill.

I would ask that it be approved, as it has been to other bills.

Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. BONILLA), the distinguished chairman in his first term, and I commend him for his work.

Mr. BONILLA. Mr. Chairman, I thank the gentleman for yielding me this time. I want to commend the gentleman for offering this amendment. We support the amendment and would hope that we could move to a vote quickly on this amendment.

Mr. TRAFICANT. Mr. Chairman, I yield such time as he may consume to the gentleman from Oregon (Mr. SCARBOROUGH), my distinguished colleague.

Mr. SCARBOROUGH. Mr. Chairman, I thank the gentleman for proposing this Buy American amendment. As well as many other bills that he has been successful in achieving this added language, I would not only like to support the gentleman on this effort, but to work with him to assure that both the letter and spirit of the law, as the gentleman has been able to pass here regarding Buy American, are working in every program of our government, let me point out, for example, the Department of Defense's purchase of food commodities, should be oriented toward U.S. farmers, U.S. produced commodities, not food brokers that might acquire their product from foreign sources.

Mr. Chairman, I just want to commend the gentleman and say I support the Buy American Act, and congratulations to the gentleman for bringing this Buy American amendment to America's attention.
Mr. SMITH of Michigan. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 21 offered by Mr. SMITH of Michigan:

Add before the short title at the end the following new section:

Mr. BONILLA. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Michigan (Mr. SMITH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Michigan (Mr. SMITH).

Mr. SMITH of Michigan. Mr. Chairman, I yield myself such time as I may consume.

I presume that nobody is going to oppose this amendment, except maybe on a point of order. It is language that now exists over this past year for American farmers, and I simply want to bring to the body’s attention that this amendment concerns a matter of fairness and equity to American farmers.

Very simply, my amendment would maintain the number of farmers eligible for the price support program that we have in the Federal Government.

We have a price support program that provides that if market prices fall below a certain level for these programs’ crops, someone is eligible for an LDP, a loan deficiency payment, or a commodity nonrecourse loan.

Under the provisions of the law, though, technically, only those individuals that were enrolled in farm programs and designated their program crops acreage back in the late 1980s are eligible for this kind of support.

So what we did last year is allow every American farmer, those cattle and livestock farmers, those dairy farmers that did not have program crops and repeat them back in the 1980s, to be eligible for that same kind of federal price support as those individual crop farmers that had program crops.

We are basing our farm programs on antiquated crop history that was established from 1986 to 1991. This amendment corrects that those other farmers that today are growing that corn, that rice, that cotton, the soybeans, that corn, will still be eligible for the Federal Government price support program.

It is a matter of fairness, and I say to the gentleman from Iowa (Mr. LATHAM), the deputy chairman, that the Senate has indicated they are interested in putting this in the Senate version of their agricultural appropriation bill. It is important that we, as quickly as possible, tell the American farmers, that otherwise might not be eligible for this kind of support help, that we intend to pass this amendment.

We had it in the chairman’s mark of the appropriation bill supplemental. That bill was changed with the Stenholm substitute. This amendment needs to be accomplished. I would ask the leadership in their efforts, when we go to conference, if this is in the Senate bill, can we move ahead on this amendment?

Mr. LATHAM. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Michigan. I yield to the gentleman from Iowa.

Mr. LATHAM. Mr. Chairman, I appreciate very much the gentleman from Michigan’s interest in this matter.

I understand there is strong bipartisan support to remedy this inequity in our farm program laws. I support the gentleman’s efforts to accomplish this.

I am sorry that, because of the legislative nature of this amendment, the bill before us today is not the appropriate vehicle for this provision. However, I look forward to working with the gentleman in the future on this problem, and if the provision is in the Senate bill, we will consider this correction in our conference committee. I thank the gentleman for his efforts.

Mr. SMITH of Michigan. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I rise to bring to the body’s attention an amendment I have prepared that concerns a matter of fairness and equity to American farm policy. Very simply, my amendment would maintain the number of farmers eligible for Loan Deficiency Payments (LDPs) under language included in last year’s Agricultural Risk Protection Act (Crop Insurance Reforms).

The explanation for this need is as follows: for farmers to be eligible for LDP payments under the current farm bill, they must have had their land enrolled in farm program acreage back in 1986–91 crop years. This means that farmers that have decided to go into farming in the 1990s, for example, have not been eligible to receive loans or LDPs unless they have purchased farmland that was enrolled in the 1986–91 acreage. This would also include those farmers that did have acreage enrolled at the inception of the base acreage allotments, but later shifted acreage from another use into program crop production. For instance, if a corn/soybean farmer that also grazes some land enrolled in program acreage decides to shift that grazed acreage into corn/soybean production, his new cropping acreage would not be eligible for the Loan Deficiency Payment.

This problem was recognized last year and LDP eligibility was expanded to include farmers not enrolled in program acreage—language included in Crop Insurance legislation. However, this provision was only for crop year 2000, and another legislative remedy is needed for crop year 2001.

My amendment, which I have also introduced as a stand-alone bill, H.R. 2089, would do just that. The idea of LDP eligibility equity has garnered strong bipartisan support within the Ag Committee, and was included in Chairman COMBEST’s original mark for the 2001 Crop Year Economic Assistance Act that was voted on earlier this week (H.R. 2213), but was narrowly eliminated along with all other fiscal year 2002 spending that was included in the mark-up.

The Congressional Budget Office estimates that approximately 98.6 percent of program crop production is eligible for LDP payments. While that number is significantly high and captures most commodity producers, it is still unfair for the other 1.4 percent to be ineligible simply because those farmers are not enrolled in farm program base acreage. It is important that we enact this provision and eliminate this loophole that places some farmers at a competitive disadvantage. I urge members to vote for passage of this amendment so that we may correct this problem.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. The amendment of the gentleman from Michigan (Mr. SMITH) is withdrawn.

Amendment No. 30 offered by Mr. SMITH of Michigan:

Mr. SMITH of Michigan. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 30 offered by Mr. SMITH of Michigan:

Add before the short title at the end the following new section:

July 11, 2001

CONGRESSIONAL RECORD—HOUSE

NATIONAL MARKET TRANSITION ACT (7 U.S.C. 7256(a)(2)) TO BE EXCEEDED IN ANY MANNER FOR FARMERS IN PROGRAM ACREAGE FOR THE 1986-91 CROP YEARS.
marketing loans at a lower rate, the issuance of certificates redeemable for commodities, or forfeiture of a loan commodity when the payment limitation level is reached), except, in the case of a husband and wife, the total amount of the payments specified in section 1910(d) of that Act that they may receive during the 2001 crop year may not exceed $150,000.

Mr. LATHAM. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. A point of order is reserved.

Pursuant to the order of the House of Thursday, July 28, 2001, the gentleman from Michigan (Mr. SMITH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Michigan (Mr. SMITH).

Mr. SMITH of Michigan. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am disappointed in this amendment because earlier I had an indication from the Parliamentarian that this would be in order. We added some language that apparently is now going over the line in terms of legislating in an appropriation bill.

But let me just emphasize the importance of policy as we consider this amendment. The question before this body is should the huge, large agricultural farm corporations get the most benefit from Federal agricultural programs? This amendment reinstates the $75,000 limit for payments.

Our agriculture programs, ever since we started these programs in the 1930s, have tended to benefit the large, and very large farmers, so in part the large farmers have bought out the small farmers because they have had the advantage in farm program payments.

My amendment, reinstates the $75,000 payment limitation on loan deficiency payments and it makes it a real $75,000 limitation on these producers. At the same time, and I would call this to the attention of the ranking member and chairman, at the same time, this amendment allows spouses of these farmers to be considered an equal partner in the farm operation, in other words, be eligible for the $75,000 payment limitation.

What we do now is make those spouses jump through, if you will, bureaucratic hoops to become qualified. We require such action as requiring the spouse to borrow money in their own name, put it into the farm operation, and then they can be eligible as a separate partner.

This amendment says that married couples would have the $150,000 payment limitation.

Let me go a little further on what this amendment really does. Historically, net losses from loan deficiency payments have been capped at $75,000 per producer, but this limit was doubled in the bill that went through on special orders a couple of weeks ago.

The increased payments to producers over the current $75,000 limit are estimated to be over $350 million. The huge giant farmers are taking $350 million over and above the $75,000 limitation. This benefits only the very largest farmers.

The average farm size in the U.S. is about 920 acres, but one would have to raise 4,000 acres of corn at current prices to exceed or to go over the $75,000 limitation. There are many large farm operations that exceed 20,000 acres, so they are taking all of this extra money in and, in effect, taking it away from the family farmer.

Amazingly, this flawed system has allowed payments over $1 million to go to some of these farms. Farmers that receive these large subsidies, and the grain traders that profit from expanded production, oppose this amendment. I think it is so important that we consider this kind of policy in terms of focusing the benefits on the small- and moderate-sized family farm operations. This amendment accomplishes several things. It gives the spouse of a farmer the same kind of considerations as a partner. It provides that we hold to the $75,000 payment limitation, at a time when we are considering being frugal in our spending so that we do not start reaching into the Medicare and Social Security trust fund. It says, let us save that $350 million that is spent on those huge farmers by locking in the limit that would also apply to the nonrecourse loan and the forfeiture provisions or the commodity certificates that are offered to that farmer if they exceed the limitation.

Mr. Chairman, I would urge this body to consider our program of agricultural farm policy that we want for the future of American agriculture.

Mr. Chairman, I have an amendment concerning payment limitations for marketing loan gains for farm operators, in addition to loan deficiency payments (LDPs) to farmers, as well as limits on benefits received through the USDA commodity certificate program and nonrecourse loan forfeitures. This amendment would cap payments to individual farmers from these programs at $75,000.

Mr. Chairman, few people are aware that many of our farm commodity programs, for all of their good intentions, are set up to disburse payments with little regard to farm size. Often in our rush to provide support for struggling farmers we overlook just where that support is going.

The limit on price support payments to farmers was increased when we passed H.R. 2213, the 2001 Crop Year Economic Assistance Act on June 28th. Historically, net benefits from loan deficiency payments and marketing loan gains have been capped at $75,000 per farmer. However, H.R. 2213, which passed under the suspension calendar and was not subject to amendment, doubled the benefit cap to $150,000. Even this limitation is exceeded when USDA authorizes a commodity certificate program to pay farmers that reach the payment limit.

The increased costs to government by doubling the benefit cap from the current $75,000 limit is estimated at over $50 million. Furthermore, additional payments to large producers received through the commodity certificate program cost over $320 million in crop year 2000 alone.

A Congressional Research Service report on commodity certificates stated that, “while purported to discourage commodity forfeitures, certificates effectively serve to circumvent the payment limitation.” Amazingly, this flawed system allowed a single farmer to receive $1,201,677 in commodity support payments in 1999.

My amendment would simply restore a $75,000 limit on price support payments to individual farmers—including benefits via commodity certificates and loan forfeitures, but increase the limit to $150,000 for husband and wife farming operations. Currently spouses have to jump through several bureaucratic hoops to qualify.

With increased spending a concern, along with the fact that the additional benefits from the “certificate” program go to huge farm operations, I urge your consideration of my amendment. Boosting farm program payment limitations disproportionately skews federal agricultural support to the largest of producers, while doing nothing to alleviate the difficulties faced by small and medium-sized farmers. Let’s do more to focus benefits on small and moderate size family farm operations.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Does the gentleman from Iowa (Mr. LATHAM) insist on his point of order?

Mr. LATHAM. Mr. Chairman, I continue to reserve my point of order. If there are no other speakers, I would make a point of order.

The CHAIRMAN. Is the gentleman withdrawing the amendment?

Mr. SMITH of Michigan. I am not withdrawing the amendment. I question the point of order. It does not legislate, if I may speak.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa (Mr. LATHAM).

POI NT OF ORDER

Mr. LATHAM. Mr. Chairman, I make a point of order against the amendment because it proposes to change existing law and constitutes legislation in an appropriations bill, and therefore violates clause 2 of rule XXI.

The rule states, in pertinent part, “An amendment to a general appropriation bill shall not be in order if changing existing law.” The amendment imposes additional duties, and I ask for a ruling from the Chair.

Mr. SMITH of Michigan. Mr. Chairman, I would like to speak on the point of order.

The CHAIRMAN. The gentleman from Michigan (Mr. SMITH) is recognized.
Mr. SMITH of Michigan. Mr. Chairman, hoping the Chair is open to discussion and debate on this issue, I would call it to the Chairman’s attention to the fact that we simply say in this amendment, “None of the funds appropriated or otherwise made available in this Act may be used to pay the salaries of personnel of the Department of Agriculture” to accomplish these certain purposes.

This type of amendment has been put in former appropriation bills, so I would like a more detailed explanation from the Chair if he rules this amendment out of order.

The CHAIRMAN. The Chair is prepared to rule. The Chair finds that this amendment in the last phrase includes language imposing a new duty. The amendment therefore constitutes legislation in violation of clause 2 of rule XXI.

The point of order is sustained and the amendment is not in order.

Amendment offered by Mr. STUPAK

Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. STUPAK:

At the end of the bill, insert after the last section (preceding the short title) the following section:

Sec. ____ For an additional amount for the Secretary of Agriculture to carry out section 311 of the Older Americans Act of 1965, and the amount otherwise provided by this Act for “Agriculture Buildings and Facilities and Rental Payments” is hereby reduced by, $10,000,000.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Michigan (Mr. STUPAK) and a Member opposed each will control 10 minutes.

The Chair recognizes the gentleman from Michigan (Mr. STUPAK). Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased for the second year in a row to offer this important bipartisan amendment with the gentleman from New York (Mr. BOEHLERT). Unfortunately, the gentleman from New York cannot be here as he is on his way down to the White House, but we have his full support for this amendment.

Our amendment adds $10 million to USDA’s nutrition program for elderly meal programs, known as senior citizen meals and Meals on Wheels. This amendment offsets this additional spending by $10 million from the agriculture building and facilities and rental payments.

Our amendment has the support of the Meals on Wheels Association of Michigan, the National Association of Nutrition and Aging Services Program, the TREA Senior Citizens League, the National Council on the Aging, and the National Association of Area Agencies on Aging.

I am sure all of us have met and spoken with seniors in our districts. I am sure they have told us how much they need assistance in these times of high gas prices, high cost of meals, and the increase in demand for the meals they receive, be it Meals on Wheels or meals at their senior centers.

Senior meal providers receive funding for the meals they distribute to seniors under the Older Americans Act through several avenues: first, through private donations; second, through the Department of Health and Human Services; and third, through the U.S. Department of Agriculture meal reimbursements.

Let me explain why a funding increase for USDA’s nutrition program for the elderly program is so important. Unlike funding from the U.S. Department of Health and Human Services, HHS, which is distributed to the States based on population, the USDA reimbursement to States is according to the amount of meals served at each senior center. The money they receive is actually based on meals served at the senior center.

Our amendment is the best way to ensure that proper distribution of these funds are going to the centers where they prepare the meals.

Why do we need more money? Why are we back for a second year in a row? Why does this amendment go above the President’s request? As our chart indicates here, if we take a look at this chart, according to the Administration on Aging, 233 million meals were served in 2000, but the agency admits that this year the estimates will be 291 million. That is a 15 percent increase over last year.

Even though we increased the funding last year for the meals, it is not going to keep up with the dramatic rise in demand we see for senior meals. So the President’s budget request, and the good work by the committee, it was good work, would be short of what we need just to cover our basic costs.

What our amendment does, the Stupak-Boehlert amendment will allow this important funding to reflect the inflation and the increase in demand for these meals. We can help senior meal providers that so desperately need assistance in these times of high gas prices, high cost of meals, and the increasing number of seniors who have come to depend on these meals, even in these good economic times.

I offer this amendment because of conversations I had last year with one such meal provider and about the plight of his agency. Bill Dubord and Sally Kidd of the Community Action Agency in Escanaba, Michigan, in my northern Michigan District, told me that their agency every year is having to put their head above water to provide senior meals.

I am sure all of us have heard similar stories as we travel about senior centers. According to a recent study, there are now an average of 85 people on waiting lists for home-delivered meal services, and on the waiting list for an average of 2.6 months.

The bottom line is, our senior meal providers need more money to provide the meals. Increased funding will give them more money to provide more meals and are on the waiting list for an average of 2.6 months.

When my colleagues are casting their votes, I hope they will think of the seniors they have met back home and the good work by the committee. I am sure they have spoken with. Cast a vote for them and support this Stupak-Boehlert amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. LATHAM. Mr. Chairman, I just congratulate the gentleman on the amendment. I rise to simply state that I am not opposed to his amendment.

The CHAIRMAN. Does the gentleman seek unanimous consent to seek the time in opposition even though the gentleman is not in opposition?

Mr. LATHAM. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized for 10 minutes.

Mr. LATHAM. Mr. Chairman, I yield myself such time as I may consume to simply once again state I am not opposed to the gentleman’s amendment, in fact support it, and I would hope we could quickly move to a vote on the issue.

Mr. Chairman, I reserve the balance of my time.

Mr. STUPAK. Mr. Chairman, I yield the balance of my time to the gentlewoman from Ohio (Ms. KAPTUR).

The CHAIRMAN. The gentlewoman from Ohio (Ms. KAPTUR) is recognized for 6 minutes.

Ms. KAPTUR. Mr. Chairman, I thank the gentleman for yielding me this time on this important amendment to increase funding for the elderly food program and to take funds that may be available from rental payments that USDA does not have to make because it no longer is occupying certain facilities.

Without question, across our country the costs of even paying utility bills are rising significantly for seniors. Electric bills, gas bills in the Midwest, for example, have just risen at astronomical rates. And any way we can find to help seniors make it through this year and next I think are worthy of consideration. This is certainly one
of those at the very basic level of decent nutrition.

We know that in many of our senior feeding programs, in fact, the programs are oversubscribed. I have been surprised in my own district on related programs, such as the Seniors Farmers’ Market Nutrition Program, where seniors are allowed to use food coupons to purchase fruits, vegetables, herbs and so forth, the enrollment in the program is just growing exponentially because people are pinching every penny because of other expenditures that they have had.

So I think we really have to look carefully at any ways we can move food to the seniors’ tables, and these particular meals programs operated through our area offices on aging are eminently successful across the country. I know that’s the case in my own district and I have watched seniors being asked to contribute money in little envelopes to help pay for these meals at these senior centers to offset rising costs when they have very little to give anyway.

So I would say to the gentleman that I think he has a very worthy amendment this year. He was successful in leading our country last year with a similar amendment to increase funding for the program, and the number of meals, according to the charts that he has provided, have gone up. So it has been successful.

Certainly no person in America, no senior in this country should go without decent nutrition. We know that the poorest people in our country are women over the age of 85, and many of them are too weak sometimes to even get to the senior centers, so we have home-delivered meals being taken across our country in various neighborhoods. It is the only way that that senior has are with the person who delivers the noon meal.

So I want to thank the gentleman from Michigan (Mr. STUPAK), whose district actually spans the northern region of Michigan, who understands the problems of rural isolation of people in poverty and thank him for leading us all. And I am sure that the USDA, within its various accounts, can find the funds to cover the USDA, within its various accounts, can find the funds to cover the

Mr. BOEHLERT. Mr. Chairman, I rise in strong support for the Stupak-Boehlert amendment to increase funding for the USDA’s Nutrition Program for the Elderly by $10 million. This vital program helps provide over 3 million senior citizens with nutritionally sound meals in their homes through the meal-on-wheels programs, or in senior centers, churches, and in my district a few fire halls through the congregate meal centers.

I would venture a guess that almost every single Member of this House has visited a congregate meal site or volunteered to ride along with a meal-on-wheels program. I want to remind everyone that these programs are important to communities and that the need is quite real. Participants in this program are disproportionately poor. 33% of congregate meal participants and 50% of home delivered meal participants have incomes below the poverty level. A majority of meal-on-wheels participants live alone and have many physical impairments as well as the average elderly person. The Nutrition Program not only feeds seniors in need but also allows those seniors to remain connected to their communities. Congregate meal sites give participating seniors the opportunity to socialize with members of the community. And Meals-on-Wheels volunteers deliver meals to frail, sick, home bound seniors most whom do not leave their homes even once a week.

Let me take just a moment to share with you the comments of some of the congregate meal site participants from the town of New Harford Senior Center located in my home town.

Juanita, age 76, says: ‘‘Meals are important. I come every day.’’

Margaret, age 78, says: ‘‘The meals are very nutritious and I like food! It helps me feel good and want to be active.’’

Helen, age 91, says: ‘‘I enjoy coming here for the meals and the company. There is always something new that I hear and learn. The food, I enjoy immensely.’’

Carlton, age 88, says: ‘‘It is a chance to get out and enjoy the company of seniors that makes my day!’’

In order to fund this needed increase for senior meals, the Stupak-Boehlert amendment offsets $10 million for the Agriculture Building and Facilities account. I do not doubt the need for these funds. But the number of seniors needing nutrition services continues to grow and we must make a larger commitment to ensure that Nutrition Program for the Elderly is properly funded.

The Stupak-Boehlert amendment is endorsed by the Meals on Wheels Association of America, the National Association of Nutrition and Aging Services Programs, the TREAS Seniors Citizen League, the National Council on the Aging, and the National Association of Area Agencies on Aging. This amendment represents a small investment in a program that helps to fight the malnutrition and isolation far too many needy senior citizens face.

I urge my colleagues to vote for the Stupak-Boehlert amendment. Vote to support our nation’s seniors.

Mr. STUPAK. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. STUPAK).

The amendment was agreed to.

AMENDMENT NO. 25 OFFERED BY MR. WEINER

Mr. WEINER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 25 offered by Mr. WEINER: Insert before the short title the following new section:

SNC. . . None of the funds appropriated or otherwise made available by this Act shall be used to pay the salaries of personnel of the Department of Agriculture to make any payment to producers of wool or producers of mohair for the 2000 or 2001 marketing years under section 814 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (as enacted by Public Law 106-387; 114 Stat. 1549A-55).

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from New York (Mr. WEINER) and a Member opposed each will control 20 minutes.

The Chair recognizes the gentleman from New York (Mr. WEINER).

Mr. WEINER. Mr. Chairman, I yield myself such time as I may consume.

First, let me begin, Mr. Chairman, by offering my sincere thanks to the chairman of the subcommittee, the gentleman from Texas (Mr. BONILLA), and his staff for all the assistance they provided, as well as the gentlewoman from Ohio (Ms. KAPTUR) and her staff. I would also like to thank the gentleman from California (Mr. ROYCE) and the gentleman from Wisconsin (Mr. RYAN), who are also joining me in offering this amendment.

I stand as an urban member, someone who represents Brooklyn and Queens, the garden spot of the five boroughs perhaps, but not exactly a bastion of agriculture. But I am someone who strongly supports farm bills when they are offered. I have never voted against one and plan to vote for this one with enthusiasm. But just as during the 1980s and a period thereafter, as we have sought to make government programs more efficient and many social and urban programs were made more efficient by the actions of this body, we have an opportunity today to end what is quite literally a fleecing of America.

The wool and mohair program, which will cost in the area of some $20 million to the United States taxpayer next year, is a program that has been
by this body and now revived by the President with the assistance of this bill. My amendment seeks to eliminate the subsidy.

First of all, let me explain that this is a program that has, I guess, the agricultural version of mission creep. It was started out in the 1930s and 1940s as an effort to protect the strategically needed resource, that is wool; to make sure that wool was available to be used in our military uniforms. Well, those of my colleagues who serve on the Committee on Armed Services recognize that since the 1950s or so it has been removed as a strategically necessary resource because we do not make uniforms out of wool any more. In fact, I have a uniform here that is made out of 100 percent cotton. And all of the uniforms are made out of either cotton or nylon.

So once that rationale was removed, then it became an emergency subsidy intended to get the industry over a hump that it faced in the early 1990s. When it was clear that the program was not as effective and perhaps a little more wasteful than some would want, this body ended the program in 1993. Now there is an effort to revive it again under the rubric that we need to be able to deal with foreign competition and the only way to do it is with this subsidy.

The second thing about this subsidy is that it is not cheap. We have throughout the 1990s provided more than a billion dollars to this industry. Just last year it was in the neighborhood of $10 million. It is not really clear where next year’s number will end up, but it is somewhere in the range of $10 million, $15 million, or $20 million.

It is also very clear from our history with this program that it is not helping the family farmer. According to a study done in 1993, the average payment is some $4, though there are many who get much more than that. The top 1 percent who benefit from this program, including Mr. Sam Donaldson, gets in the neighborhood of $100,000 or more. So the idea this is something that is helping to augment the family farm is simply not borne out by the facts.

Fourth, as a matter of pure economics, this program is a failure. Wool has seen a price drop since the reinstitution of this programming from some 63 percent. Why are we seeing that? It is because most likely, in combining with the subsidy, we are doing nothing to control supply. So we are continuing to shear more and more animals, more and more stockpiles are building up, the supply keeps on growing and growing and growing, and the price remains depressed. There is nothing in this program that does anything to change that behavior.

But perhaps the most damning economic line in this whole issue is that the price of mohair, which is about 20 percent of this program, has increased about 80 percent since 1985. If there was anything to this subsidization, it is not an impact on the price and, therefore, the success of the farmers; it is that fact; that wool and mohair are bunched together in this program. And one is seeing this drop in price and one is seeing a dramatic increase in price. The program simply does not make sense from that perspective. If anything, if we are trying to drive up the price on some level, then at least mohair should be dropped from the program. The final irony is that there is a greater subsidy for mohair in this bill than there is for wool.

I would make one final point. There was a period of time between the time this program died and then like Frankenstein that it resurrected itself, and that was the year 1997 and 1998. And if we look at the statistics as to how the industry did in the last year we had the subsidy and then when it returned, the industry got worse, not better. There was a reduction in wool, in wool production, of about 11 percent. There was an 11 percent reduction in the profits to wool farmers in 1996. And why? The subsidy ended; they actually had smaller losses of only about 3 percent. The same is true in the mohair industry. Mohair prices and mohair jobs actually reduced when we had the subsidy and then came back slightly when we got rid of the subsidy.

I would ask my colleagues to consider very frankly why it is that we have these programs in general. All of us want to be able to support farm programs. I believe the farm bill, as I said from the outset, is a worthy document we should support. Very often I am calling upon my colleagues to support purely urban things. But if someone comes to me and says, you know, this program that deals with the urban centers, like many of the housing programs of the 1980s, it simply is not working, I believe it is incumbent on Members that have those interests at heart to try to weed out the waste. This is, the wool and mohair subsidy program, is simply a waste of taxpayer money.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume, and I would first like to ask my colleague from New York if he would answer a question.

Has the gentleman ever visited a wool house or visited any of the areas where the sheep and goat raisers exist?

Mr. WEINER. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. I yield to the gentleman from New York.

Mr. WEINER. I would have to answer no, but that is true of most of the food products I eat every day. I have not visited where they were farmed either.

Mr. BONILLA. Reclaiming my time for another question, does the gentleman also oppose the apple program to deal with the hardships that apple producers are currently facing in the State of New York? Does the gentleman also oppose that?

Mr. WEINER. Mr. Chairman, if the gentleman will continue to yield, I would be happy to answer that question.

When we offer in this body emergency programs to deal with exigent circumstances, we expect that that is not going to be in perpetuity. That is why if I were in this body I would not have opposed the first time this emerged as an emergency subsidy.

So I would say I support the judgment of the chairman. If there is an emergency situation existing in the apple industry, I would clearly support it. If the gentleman came to me for 10 years in a row and said it is an emergency because now we are getting competition from applesauce manufacturers, that is why we need to keep it going. I would probably have reservations regardless of the State.

Mr. BONILLA. So the short answer would be no, the gentleman does not oppose the apple money in the bill, and it is not a designation of an emergency line item.

Mr. WEINER. If the gentleman will continue to yield, if the apple program is, in the judgment of the chairman, a worthy program to help, I would imagine it is a program that is designed, and as one that is nearly as expert on as the gentleman is, but I imagine it is designed to deal with this temporary circumstance and not to exist into perpetuity; is that correct?

Mr. BONILLA. Well, the program was proposed by one of the gentleman’s colleagues from New York, and that is why I am asking a question. It is a hardship that exists on apple growers in New York and in other parts of the country that is in this bill. It is not an emergency line item either.

I am just trying to draw the comparison that hardships exist in different parts of the country and it is interesting that the gentleman does not oppose the $150 million apple line item in here, and there was money for apple producers last year as well. So there are continuing programs on occasion that do help producers that are doing all they can to pay their bills back home that are not part of permanent law.

The Wool Act, as the gentleman knows, was eliminated several years ago. I believe it was 6 years ago, and is not in permanent law. The program that the gentleman is trying to remove
from the bill today is one that is not permanent law either. We are just trying to assist producers out there now that have gone through very some difficult times.

Mr. WEINER. If the gentleman will continue to yield, I guess the concern that some of us have that are concerned about this program, and to use the apple example, if we were to stand here in 1950 or 1945 and say, you know what, we need to defend the apple producers because the apple seeds are a vital resource, and then it turned out apple seeds were not that important; and then we come back and said it is the apple core that is very important; and then a few years later we killed the program because it is no longer worthy, I think the point I am trying to make is this is a program that has been tried; it has been offered several different justifications, it has failed by most economic sources I can look to, it has not been successful, and Congress did the right thing in pulling the plug on it.

I guess I would agree with the gentleman that the same standard should be used for the apple program or any other program, sir.

Mr. BONILLA. Well, let me again summarize it, and I do not want to put words in the gentleman’s mouth, but clearly the gentleman does not oppose a program for example in his State that is a big line item in this bill, but is yet trying to remove this program from this bill.

Let me point out some statistics, and perhaps the gentleman can identify with some hardships that exist currently for wool and mohair producers. Since 1993, 16,000 family farms and ranches have left the sheep industry. The U.S. breeding herd has dropped by 20 percent. Lamb imports have increased by 50 percent, and it is currently 20 percent of the domestic market. U.S. wool production has dropped to record lows, and imports have increased by 11 percent.

The Nation’s largest wool textile company filed for bankruptcy. Wool prices in 2000 were the lowest in 30 years.

We in Congress do the best we possibly can for whatever part of the agriculture industry that exists around the country that is suffering hardship. There is nothing more American and traditional in this country than to try to preserve family farms and ranches; and there are many, many programs in this bill that do just that, including the one I pointed out that was in the gentleman’s home State as well, which he supports.

All I am saying is whether we are talking about apples, corn, cotton, tobacco, wheat, soybeans or whatever, all of these are part of the American fabric. Wool and mohair producers are part of the American fabric that we do not want to see become extinct. So for that reason I stand in strong opposition to the amendment today.

As a nation, we can no longer afford to arbitrarily attack agriculture because it has the fewest voices representing it. Less than 2% of the American population is involved with agriculture, yet we feed and clothe all of America and most of the world.

What I find even more strange is that the amendment singles out a total of less than $400 million in much needed assistance to wool and mohair producers. Yet the sponsors have no problem with the rest of the $5.5 billion dollars that Congress just approved for corn, cotton, tobacco, wheat and soybean producers. If they did, I assume they would try to kill that relief as well.

Yet, those commodities have a much larger voice and support base in Congress so I guess we can overlook the little guys. And they are small producers.

Twenty-one percent of the 12,825 payments went to sheep ranchers in the Navajo Nation. I’m sure that the gentleman would not even begin to insinuate that the Navajo people are wealthy and not in need of this program.

This amendment would hit them harder than any other group of individuals.

Mr. Chairman . . . , many of the statistics the gentleman is using do not even relate to the emergency payments they are trying to stop. They refer to the old wool program which ended in 1995.

Mr. Chairman . . . , I urge all of my colleagues to oppose this amendment, it’s the wrong amendment, the wrong time and the wrong place. Oppose this amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. WEINER. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. ROYCE).

Mr. ROYCE. Mr. Chairman, I think the Congress has been a little sheepish when it comes to reducing wasteful programs, especially during times when we have had a Federal surplus.

I would just make the point that Congress did end the wool and mohair subsidy. It was phased out in 1994. I think that was a good thing. Subsequent to that taxpayers did save about $200 million a year. That was good.

However, like a wolf in sheep’s clothing, this subsidy came back in the fiscal 1995 omnibus appropriations bill and again in the fiscal 2000 agriculture appropriations bill. Now wool and mohair producers have become eligible to receive these payments again.

I do oppose the subsidy for apple producers. I think that is another rotten apple in this agriculture measure that is before us. But let me make the observation that while in the old program farmers were paid a subsidy for the wool and mohair they sold, in this new program, if I understand it right, the way it works now is the farmers do not need to attempt to sell their goods necessarily. The Agricultural Department will pay farmers by the pound just to produce mohair. Under the new program not only can farmers make money without selling their crop, they can lose money without trying to market it, if I read it correctly.

In 1999, taxpayers provided wool and mohair farmers, I believe, 10.3 million in subsidy. As explained, the original concept of this had to do with our national security. It had to do with the fact that military uniforms were wool. But the reality is that in 1959 they changed to synthetic fabrics and cotton. That is the situation today.

I just think it is time to end this waste of taxpayers’ dollars. I think it is time to shear the wool and mohair subsidy and stop the fleecing of tax dollars.

Mr. WEINER. Mr. Chairman, I reserve the balance of my time.

Mr. Chairman, I rise in opposition to this amendment.

The prior speaker said we are a little sheepish. I do not want to pull the wool over the eyes of the American public in this Congress. You have to be in the business to receive the help in opposition to what he stated in his testimony.

The farmers and ranchers of the United States that produce wool and mohair are suffering the same crisis in agriculture as producers of other crops. Sheep producers pay the same increased cost of fuel as the grain farmer and are suffering undue hardships because of the value of foreign currency to the U.S. dollar in unfair trade practices. Loopholes remain open that allow foreign products access to U.S. markets through Mexico and Canada.

Producers in the United States continue to produce some of the world’s finest wool and mohair, and yet for many producers wool prices do not even cover the cost of shearing the sheep. As a result, short-term financial relief through a market loss assistance program is vital to U.S. producers. Market loss assistance has had a positive impact for producers in all 50 States.

I am in the cashmere goat production business, which is not under this particular amendment. I do not get any financial assistance. But I can state that we are trying to help people within agriculture to diversify the income on their farms or ranches so they do not have to be dependent upon Federal handouts.

This amendment goes against every principle of trying to help people in agriculture help themselves. We do not want to be dependent on the Federal Government; but until this government gets a handle on energy costs, import problems, and understands that, unless this government steps forward and solves many of the problems that are creating the crisis in the Federal...
July 11, 2001

CONGRESSIONAL RECORD—HOUSE

13007

farm communities of this Nation, we will continue to have to come in and look to the Federal Government for relief.

We cannot let the people that want to destroy agriculture get our goat. I urge the Members to vote no on this amendment.

Mr. WEINER. Mr. Chairman, I yield myself such time as I may consume.

First of all, let me address some of the points that have come up by the very distinguished chairman about the inconsistency in his mind of my supporting a program that is in New York. Well, I also support programs that are in Mississippi, Montana and North Carolina and all across this country because I support the bill. I think it is a good bill.

Mr. Chairman, I would ask both the chairman and members of the committee and all of my colleagues, if we had a program that was in place under various guises since 1938, and still we were seeing that the marketplace was not responding to the subsidy, that we were still hemorrhaging market share, and still losing the jobs and had fewer and fewer heads of sheep that were being lost, why would you deem it to be a successful program?

Can anyone argue by any measure that it is a successful program? Is it successful for the average farmer that will get $44? The gentleman from Montana said we need to keep it in place because of the strength of the dollar or because of trade disputes. We will add those to the list of justifications and reasons that have been growing since 1938.

Let me reiterate the statistics of this. 1993 we had a subsidy. There was a 5.2 percent reduction in wool production. 1994 we had a subsidy, 11 percent loss. 1995 we had a subsidy, 8 percent loss. 1996 we had a subsidy, 11 percent loss. If we did not have a subsidy, we only had a 3 percent loss.

Perhaps there was something about the marketplace in 1997, perhaps it was the Democratic Presidency, but the fact of the matter is there seems to be no correlation between the subsidy and the success of the program.

Mr. Chairman, I think it is reasonable for Members of Congress who support ag programs to say this one is a bust. It is not working. I think we have to make those determinations both in agriculture programs, and I would say this to my most fervent colleague in the urban areas, we have to make those determinations with urban areas as well. If a colleague from an urban area said he needed to continue the subsidy for mass transit for all of those coal-powered subways, I would say there are no coal-powered subways.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, what is the time remaining?

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) has 13 minutes remaining. The gentleman from New York (Mr. WEINER) has 9 minutes remaining, and the gentleman from Texas as the chairman of the subcommittee has the right to close.

Mr. BONILLA. Mr. Chairman, we only have one additional speaker, so I reserve the balance of my time.

Mr. WEINER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I do not have a great deal to add on the importance of preserving what I believe will turn out to be on the final vote on this bill a continuation of the very strong urban-rural coalition that exists in this House. I and many of my colleagues are going to be supporting the agriculture bill with enthusiasm. We recognize the matrix that exists between farm programs that are miles away from our communities and the importance that they play to our economies and our communities.

All of that being said, it should never be a substitute for us making wise decisions about what programs work and what programs do not work. In 1993, this body took several steps to reduce the size of government to make thing more efficient.

In 1993, after years of being hampered on television shows which were frequently unfair about a fleecing of America, we finally decided to see what we could do about ending this program. The program ended; and, unfortunately, there continued to be a decline in the production of wool and mohair in this country. That decline slowed, and since then we have had an increase in mohair prices.

There has been an 88 percent increase since 1995, yet we continue the subsidy. The subsidy for mohair is 40 cents, as opposed to a 20-cent subsidy for wool. Despite the fact that we say we are trying to help the family farmer. Many more people are producing wool. They are in a much more dire situation, yet they get half the subsidy of those who produce mohair.

We still have the terrible imbalance that exists in this program between the average farmer who gets $44 and the top 1 percent that get over $100,000 each.

Mr. Chairman, I stand shoulder to shoulder with the chairman, who has done a terrific job on this bill, in saying that there are many areas that we have to step in and provide assistance to. But if we are standing here in 38 years, God willing, or 50 years, God willing, and we are debating the apple program, the tobacco program or the corn program, or any of the programs that may or may not be in this bill, and if we are still having the same problems as we had from 50 years ago, I believe we should first say we should eliminate that program.

Mr. Chairman, I urge Members to eliminate the wool and mohair subsidy, save our constituents 10 to 15 to $20 million; and even more important, end a program that has long since proven itself to be ineffective. More importantly than that, show that we understand and have the ability to separate a program that truly does work from those that do not.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Idaho (Mr. SIMPSON).

Mr. SIMPSON. Mr. Chairman, we work on a funny program. It helps if one knows the facts; it really helps if one understands the facts. But if one neither knows nor understands the facts, it causes a great deal of confusion.

Mr. Chairman, let me talk about the ‘‘Dear Colleague’’ letter that went out. It says this subsidy began during World War II and the Korean War, and obviously it is no longer necessary because the military does not need this wool anymore. This is not the original program for the military in World War II. This is an economic disaster, market loss assistance program, which was put into place.

Our agricultural producers that raise sheep and mohair are suffering the same economic consequences as everybody else is in the agricultural industry; and to pick them out and say we are not going to help them, we are not going to have an assistance program for them and we are going to for everybody else is wrong. This is not the old program put into place during the war.

Mr. Chairman, the other part of the ‘‘Dear Colleague’’ says, ‘‘The average farmer received $44 for this subsidy. The largest factory farms, representing 1 percent of all growers, received 25 percent of the subsidy.’’ That is blatantly not true. There are no facts which support that. To support this, the largest producer would have to raise 62,000 sheep. There are no producers that large.

Mr. WEINER. Mr. Chairman, I yield myself the balance of my time.

If I can just address the remarks of the previous speaker who was not here earlier, that is exactly my point, that the program that we had since 1938 has evolved so many times; yet we continue to find another justification for it. We say, well, it was because we needed the uniforms; well, now we need an emergency in the 1990s; well, now it is to make up for the loss in the strength of the dollar.

The fact remains that that is the definition of a program that ain’t working. If you have a program since 1938, if you keep changing the name and changing the justification and still the facts remain the same, that the decline in the industry domestically has been unfortified by these programs. In fact, I earlier read a statistic that I will repeat for the gentleman, that the year
that the program went out of effect for 2 years, the industry did better. It did better. The losses were smaller in 1997 than they were in 1996 in both wool and mohair.

If you want to find a program that works, you say, here is what the subsidy did. I defy anyone in this Chamber to point me a success story from this program. Tell me one year that this program has been in effect that there is a single farmer that got $44 on the average, a single farmer that said, oh, I got my 44 bucks.

Mr. SIMPSON. Mr. Chairman, will the gentleman yield?

Mr. WEINER. I yield to the gentleman from Idaho.

Mr. SIMPSON. Mr. Chairman, I would like to know where he got the average of $44 per farmer, because we cannot find anywhere where that information comes from. In fact, it comes to about $800 per farmer from our information. And the information that he suggests that 1 percent of those sheep producers got 25 percent of the payments is just blatantly false.

Mr. WEINER. I will be glad, reclaiming my time, to give the gentleman the source for that. That was the 1993 National Performance Review performed by the office of Vice President Gore, which was the rationale for a bill that came to this floor providing for greater efficiency in government that ended this program.

Mr. SIMPSON. So these are decades-old figures that he is quoting to us, 8 years, from 1993?

Mr. WEINER. I have been quoting numbers out the yingyang today, but which one is the gentleman referring to?

Mr. SIMPSON. Any ones that he understands.

Mr. WEINER. That should narrow it down.

No, anything after 1993 obviously did not come from that study. Anything after 1993 came from the Agricultural Statistical Service, sir.

Mr. SIMPSON. That is interesting because they did not have any information for us.

Mr. WEINER. I will be glad to provide it for the gentleman. But one thing, and I would yield to anyone, since I have a couple of moments left, anyone that can point to a year the subsidy was in place that it did anything to reverse the trend. The trend has been consistent right along. The only time there has been a blip in the trend was 1997 and 1998 when the program was phased out momentarily. Then reduced. They did not gain, but the losses were reduced.

So the argument for a program is not simply that I came up with a new rationale for it. I could do that for any program. The argument has to be, here is how and we have not seen any demonstration that it has worked.

Mr. Chairman, I yield back the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield the balance of my time to the gentleman from Texas (Mr. STENHOLM), the ranking member on the Committee on Agriculture, a hero to agriculture, and someone who is going to tie all this up in a little package for us at the conclusion of this debate.

The CHAIRMAN. The gentleman from Texas is recognized for 12 minutes.

Mr. STENHOLM. Mr. Chairman, I thank the gentleman for yielding me this time.

In light of the last exchange, I am often reminded but never more so than this afternoon on this amendment of the late Will Rogers’ quote when he said, “It ain’t people’s ignorance that bothers me so much, it’s them knowing so much that ain’t so is the problem.”

That is the problem with this amendment. The gentleman from New York and the gentleman from California are still attacking a program that was eliminated in 1994. They keep referring and all of these letters that we get sent to us about the wool and the mohair program like it is still here. It was eliminated in 1994.

Even the money the gentleman is talking about for striking is not even in the bill we are discussing today. It is in the emergency bill that passed the House Committee on Agriculture and this body to provide assistance to wool and mohair producers.

Now, this gentleman stood on this floor in 1994 and opposed the elimination of the wool and mohair program because we believed it would do damage to an industry that we did not believe was ready to be eliminated because of unfair foreign competition. We lost, I lost. The gentleman from New York did not lose, he won that amendment. We predicted the demise of the wool and mohair industry. And, guess what? Here in 2001, we have 25,000 less wool producers in the United States. They are gone. The gentleman from New York said there is no supply reduction. I would guarantee you there has been a supply reduction. Production has gone down in the United States; 25,000 producers are gone. We have eliminated 70 percent of the mohair producers. They are gone, thanks to the philosophy of the gentleman from New York.

Now, we might say, well, that is the way it should be. Well, in April of 1999, the United States International Trade Commission determined that the domestic lamb industry suffered from extremely low prices and a flood of imports which constitutes a substantial cause of threat of serious injury to the domestic lamb industry.

In July of 1999 because of the commission’s findings, President Clinton issued Presidential Proclamation 7208 establishing a tariff rate quota on lamb meat for a 3-year adjustment period. The 3-year adjustment period was established so the domestic sheep industry could recover from unfair trade.

Unfair trade.

Now, we accomplished what this body wanted to accomplish with the elimination of the wool and mohair program. It is gone. Now what some of us are interested in doing is trying to assist those wool and mohair producers that believe that they can compete in the international marketplace if their government would stand shoulder to shoulder with them as just this year the European Union will spend $2 billion, that is with a B, subsidizing their wool industry.

Now, I would ask anyone in this body that represents any interest, whether it be agricultural, airplanes, anything that you are manufacturing in this country. If your competitor is spending $2 billion a year, why is that excessive? What is it that we are doing that has brought this amendment to the floor today to suggest that by trying to stand with an industry that is trying to survive in the marketplace now, we are doing something that is not with subsidies. The old program cost $200 million a year. We are providing $16.9 million, exactly like we are doing for apples, for cotton, for wheat. That is all that is being done. Not in this bill, but in some other bill. Since 1999, depressed wool prices. In 1995 wool was selling for $1 a pound. Today it is 33 cents a pound. That is in constant dollars. Real dollars. Yet you stand on the floor today and say there has been no market reaction, that somehow we are doing something that is unfairly subsidizing the wool producers? Come on.

We have a letter from the American Textile Manufacturers Institute saying, “Please do not get into thinking that the money for wool and mohair producers is actually a continuation or revival of funding provided by the Wool Act which Congress eliminated in the 1990s.”

That is the truth. The gentleman from New York and the gentleman from California have taken some other individuals who have no knowledge whatsoever of the industry and have suggested that somehow we are putting the wool and mohair back into place. All we are doing is spending $16.9 million. And at another time, in another place, is saying to those wool and mohair producers who have survived the elimination of the Wool and Mohair Act that we want to stand shoulder to shoulder with you and we want to give you a little assistance, and it is a very little assistance, and we are struggling now in the Committee on Agriculture to come up with a program that will hopefully give them the opportunity to compete in the marketplace. The gentleman from New York’s rhetoric has suggested; but his facts are so far off base that I know the gentleman did not mean to misstate to this House
what he has stated over and over again today. But I believe he has been misled. Perhaps I state the Weiner-Royce amendment is misguided, inconsistent with the commission’s findings, the commission’s findings, not the House Committee on Agriculture. The International Trade Commission in looking at the results of the elimination of the wool and mohair program suggested that we ought to do something to stand with our producers, and we have been doing that and the Committee on Agriculture and others who have little knowledge about the industry, and I say this respectfully because I know the gentleman did not mean to misstate.

Mr. WEINER. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from New York.

Mr. WEINER. Mr. Chairman, I appreciate the gentleman yielding. I have questions for the gentleman because he is much more expert at this than I am. But the statistics on the production of wool bear out certain trends; and one is that during the years that the previous, using his words, the previous wool and mohair subsidy, although was identical but for all intents and purposes we are paying farmers based on how much wool and mohair they shear, a certain amount, go warehouse it or sell it, is there anything in the trend to show that the years that the subsidy was in place were good for farmers or better than anything in the period that it was out of place?

Mr. STENHOLM. I take my time back. There he goes again. He keeps referring to the old program. It is gone. I am not standing here today defending the wool and mohair program of 1994. I fought for that then. I believed it was in the best interest. We lost. We lost. It is gone. He keeps talking about what used to be. I am talking about what is. And what is today is a $16.9 million program that is designed to help those who have survived. Twenty-five thousand wool producers are gone, out of business, eliminated. Seventy percent of our mohair producers are gone, eliminated, financially.

Mr. WEINER. If the gentleman would indulge me then in his experience with the last program. We had a subsidy that he supported. He said earlier in his statement that as a result of the victory in eliminating the program, there has been a dramatic decline. Is that borne out anywhere in the statistics?

Mr. STENHOLM. Sure it is. Absolutely. I reclaim my time. Twenty-five thousand less wool producers. The gentleman is not listening. In 1995, we had 5,000 mohair producers. In the year 2001, we had 1,400. That is a 70 percent reduction. They are gone.

Mr. WEINER. Unfortunately, the problem with that reasoning is that they hemorrhaged worse during the last wool and mohair subsidy program.

Mr. STENHOLM. Wrong.

Mr. WEINER. I can provide the gentleman with the number of sheep and goats being farmed in this country. 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999 we lost during every one of those years. But we lost less during the years there was no subsidy, irrespective of the elimination of wool and mohair 1, 2, 3 or 5.

Mr. STENHOLM. Again I reclaim my time because the gentleman is stating something that is completely erroneous.

I conclude my remarks to my colleagues today by saying, please oppose this amendment. It should not even be on this bill. The money he is talking about is in the other bill. That is where we ought to be discussing this. But when you start looking at what we are trying to do, and we will have plenty to say about that when the farm bill comes up, what we are trying to do with the money he is trying to eliminate is to help hand to the remaining wool and mohair producers, trying to come up with some new ideas in the marketplace in which we can survive.

The gentleman from New York would just say, Adios. We don’t give a rip about that. We just think you ought to compete in the international marketplace. I ask you again: How could any wool producer in the United States with $16.9 million total support that the Congress is giving them compete with the European Union that is putting in $2 billion?

Let us talk about Australia. He pooh-poohed a minute ago the idea that the value of dollar and currency values had anything to do with this. The Australians have an advantage in cotton and in wool of 50 percent because the value of the Australian dollar is 50 percent of the United States dollar. I ask you about this: if you are selling wool, and we are selling it for 33 cents today, way below what it costs to produce. The Australians are getting twice that much, 66 cents, just the value of their currency. That is a justification for the expenditure of $16.9 million of our taxpayer money attempting to help our wool producers, exactly like we are doing it for apples and exactly like we are doing it for wheat and corn and soybeans and rice and all of the other commodities.

That is why I ask and I commend the chairman of the committee and others who have participated today, I believe that this is clearly an amendment that needs to be soundly defeated and let us not only defeat this bill but let us not do anything to the passing of this bill that the committee has worked so diligently on.

The CHAIRMAN pro tempore (Mr. CHABOT). The question is on the amendment offered by the gentleman from New York (Mr. WEINER).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

Mr. WEINER. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN pro tempore. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York (Mr. WEINER) will be postponed.

AMENDMENT NO. 19 OFFERED BY MR. ROYCE

Mr. ROYCE. Mr. Chairman, I offer an amendment.

The CHAIRMAN pro tempore. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 19 offered by Mr. ROYCE: Insert before the short title the following new section:

Sic. . . . None of the funds appropriated or otherwise made available by this Act may be used to award any new allocations under the market access program or to pay the salaries of personnel to award such allocations.

The CHAIRMAN pro tempore. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from California (Mr. ROYCE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from California (Mr. ROYCE).

Mr. ROYCE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in a true market economy, advertising is a function of the private sector. It should not be in the public sphere. The public in my view should not be forced to subsidize corporations.

This is a philosophical point but it goes to the question of this Market Access Program. Let me make the point that the Market Access Program is a leftover product of two previously failed USDA programs. One was the market promotion program and the targeted export assistance program, both of which we debated on this floor, both of which we tried to reform.

Basically, the Market Access Program funnels tax dollars to corporate trade associations and to cooperatives to advertise private products overseas.

While proponents of the program claim that the Market Access Program boosts its exports and creates jobs, there is no evidence to support that. As a matter of fact, the General Accounting Office studies indicate that this program has no discernible effect on U.S. agricultural exports.

I believe the private sector knows how to advertise. It does not need government interference. I think that taxpayer dollars merely replace money that would be spent by private companies on their own advertising, and provisions in the 1996 farm bill have attempted to reform MAP but thus far have failed. Although the percentage of large companies that get this MAP money has decreased, a number of large corporations still receive millions indirectly through trade associations.
In the last 10 years, America’s taxpayers basically paid out $1.5 billion for this particular subsidy. I think the American people would agree that their money would be better spent if this was relegated back to the private sector.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN pro tempore (Mr. SIMPSON). Does the gentleman from Texas (Mr. BONILLA) claim the time in opposition?

Mr. BONILLA. Mr. Chairman, yes.

The CHAIRMAN pro tempore. The gentleman from Texas (Mr. BONILLA) is recognized for 5 minutes.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I thank the gentleman from Texas (Mr. BONILLA) for yielding me this time.

Mr. Chairman, I rise in opposition to the Royce amendment. I think that the proof is in the pudding, and the pudding is in the trade accounts of the United States, which show that in spite of an unbelievably large trade deficit in almost every other sector, in the agricultural area we have been able to keep our nose above water barely, because we have exported more than we have imported. With dropping prices for product and so forth, we have managed to double some exports. In specialty areas, whether we are talking about fish or packaged juices, we have been able to keep moving product outside this country. That takes effort.

The Market Access Program helps.

With changes made in prior farm bills, we have limited those who can apply for assistance in order to move product into the international market; but as would not want to stand on this floor and oppose a program that has helped America maintain positive trade accounts in agriculture internationally when every other single account in petroleum and imported oil products, in manufactured goods, in electrical equipment, no matter where one goes in the trade accounts, the United States has historic trade deficits but for agriculture.

Though the going is getting rougher in international waters in terms of trade, my goodness, this would be the last program one would want to eliminate in terms of helping both farmers in this country move product and in maintaining and turning around that yawning trade deficit which is a very serious underbelly inside this economy. So I rise in opposition to the Royce amendment.

Mr. ROYCE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. CHABOT).

Mr. CHABOT. Mr. Chairman, I thank the gentleman from California (Mr. ROYCE) for yielding me this time.

Mr. Chairman, I rise in strong support of the Royce amendment, and I commend the gentleman from California (Mr. ROYCE) for his hard work on this issue.

Mr. Chairman, this is one of the most egregious examples of taxpayer subsidized corporate welfare, the MAP program. Hardworking taxpayers should not have to subsidize the advertising costs of America’s private corporations. Yet that is exactly what the MAP program does.

Since 1986, the Federal Government has extracted nearly $2 billion from the pockets of American taxpayers and handed it over to multimillion dollar corporations and cooperatives to subsidize their marketing programs in foreign countries.

When Congress, back in 1996, in the farm bill required MAP funds to be limited to farmer cooperatives and trade associations, proponents argued that the funds could only be used to help small businesses and farmers. In fact, much of the funding went to large associations made up of some of the largest and most profitable corporations.

Mr. Chairman, Congress should end the practice of wasting tax dollars on special-interest spending programs and unfairly take money from hard working families to help profitable private companies pad their bottom line. MAP is a massive corporate welfare program that we should eliminate today.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. FARR).

Mr. FARR of California. Mr. Chairman, I would say to my colleagues, wake up, wake up and smell the coffee. How do we know the coffee is brewing? How do we know that there are French and Italian wines at the market? The answer is because these countries that answer is because these countries that grow these products also advertise these products.

They want us to buy agriculture in other countries. That is why we see oranges from South America being advertised in the United States, coffee from Colombia, wine from France and Italy and so on; and yet when it comes to our own agriculture, the most abundant agriculture in the world, where we grow more than we can consume and where we actually grow products for other countries, we should not be allowed to be on a competitive field where everybody has a fair chance by small matching money that the private sector has to put up and match by the Federal Government?

The Federal Government spends $3.187 billion on advertising and recruiting for the military. Our States advertise for tourism. Let us also advertise for agriculture.

Mr. ROYCE. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. WEINER).

Mr. WEINER. Mr. Chairman, I appreciate the opportunity to speak once again on the MAP program. One of the arguments that was made by my colleague from California is that, well, other countries are in a position that they can do this advertising and it has led the United States to be less competitive to them. The fact of the matter is that our consumer marketplace encourages that type of advertisement to go on of our products that are here made domestically in the United States, irrespective of what is being done in Chile or what is going on in France. I do not believe that the United States taxpayer should be subsidizing these advertising programs because, in fact, what winds up happening is that much of this advertising, I would argue all of it that is subsidized by the MAP program, would go on anyway because of the decisions made by the industry; that it is in their interest to encourage this type of development.

If the MAP program is another example of a program where I do not see it is very easy for us to point to demonstrate areas where the advertising has led to any more farmers, any more ranchers, any more production or sales. I am firmly of the belief, and perhaps I am wrong on an economic level, that if the U.S. Government leaves this field it would quickly be occupied.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Iowa (Mr. LATHAM).

Mr. LATHAM. Mr. Chairman, I thank the gentleman from Texas (Mr. BONILLA) for yielding me this time.

Mr. Chairman, I rise in strong opposition to this amendment. I would just like to make a couple of points. Number one, these funds are not available to large international corporations. These funds are matched by people like the corn growers, the beef producers, the pork producers, people who care about their product and want to promote their product so that we can expand our exports for the American farmers.

There is a prohibition from these corporations who are making corporate welfare out of this. These programs are absolutely essential for the future of agriculture so that we can add value to American agriculture, so that we can go out into the world marketplace and talk about the quality and the supply of good American food products.

If anything, Mr. Chairman, we should be increasing these funds. We should be proud of what we stand for in agriculture. We should stand up and say to our American farmers that they do have the best products in the world and we want to go tell the world about it. That is what we need to do is to protect this program. It is not large enough as it is.

Mr. ROYCE. Mr. Chairman, I yield myself the remainder of my time.
Mr. Chairman, agricultural exports are expected to increase by another $2 billion, this year, or $53 billion. More than 1 million Americans now have jobs that depend on U.S. agricultural exports. This program goes a long way toward making sure that we have these export markets. I strongly oppose this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROYCE).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. ROYCE. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from California (Mr. ROYCE) will be postponed.

AMENDMENT NO. 11 OFFERED BY MS. KAPTUR

Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows: Amendment offered by Ms. KAPTUR: Add before the short title at the end the following new section:

Sec. 1700. Provided further: That the entire amount is designated to our country.

We declare an emergency, we set aside $500 million, and we say that biofuels are as important as natural gas, they are as important as petroleum, we are as important as any other fuel, whether it is windmills or turbines or whatever, in order to put America on a sound energy footing. We want to make sure that our message is heard loudly and clearly.

Mr. Chairman, I yield ½ minutes to the gentleman from Maryland (Mr. HOYER), who has experience in this area, and again I express gratitude for his coming to the floor.

Mr. HOYER. Mr. Chairman, I thank the gentlewoman for her amendment, and I thank her for her comments and her hard work on this committee and on so many other areas. She has touched on a critically important issue to our country.

Mr. Chairman, I rise in support of the gentlewoman’s amendment to provide half a billion dollars in emergency spending on biodiesel, ethanol and biomass research and development.

Mr. Chairman, since 1999, the Beltsville Agricultural Research Center, which is located in my district, has been conducting a pilot project using biodiesel at BARC they use 80 percent diesel and 20 percent soybean oil mix. Their test results found that using biodiesel reduces carbon dioxide emissions 16 percent; particulate matter, which is a major component of smog, 22 percent; and sulfur emissions, 20 percent. Equally important to the environmental benefits of these fuels is the fact that their use, as has been so well articulated by the gentlewoman from...
Ohio, lessens our dependence on foreign oil and opens up new markets for our farmers. So, from every perspective, this is a very important direction for the country to move, and I thank the gentlewoman for her leadership.

Ms. KAPTUR. Mr. Chairman, I yield 1 1/4 minutes to the gentleman from Illinois (Mr. DAVIS), who has waited all afternoon in order to make these comments. I thank the gentleman sincerely.

Mr. DAVIS of Illinois. Mr. Chairman, I rise in strong support of the Kaptur amendment.

To say that we have an energy crisis is an understatement, but the State of Illinois stands ready to help find a solution. The State of Illinois is a major producer of corn, which, when used in the development of ethanol, makes good sense. This amendment makes good economic sense, environmental sense and common sense.

Ethanol is an additive which, when used in gasoline, produces cleaner and more efficient energy. To help this country to become more energy-efficient, we can and should employ greater use of ethanol. Ethanol makes us more energy-efficient, more self-reliant and environmentally protected. It is a good amendment, Mr. Chairman, and I urge its adoption.

Mr. Chairman, I thank the gentlewoman from Ohio for introducing this amendment.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in closing this afternoon, let me say that oil ministers of the Middle East should not be put in charge of setting energy prices in the United States of America. We should have that control inside of our border. This amendment would merely reallocate one hundredth of the nearly $70 billion that we send to the Middle East oil ministers every year for petroleum imported here, and replace it with investments we make in ourselves for the future. It gives the Secretary of Agriculture very flexible authority in order to spend these dollars in order to make agriculture an equal pillar along with other old fossil fuels.

The CHAIRMAN. Does the gentleman from Texas (Mr. BONILLA) insist on his point of order?

Mr. BONILLA. I continue to reserve the point of order.

Mr. Chairman, I would like to inquire if the gentlewoman is going to withdraw her amendment before going to the Agriculture subcommittee.

Ms. KAPTUR. Mr. Chairman, if the gentleman will yield, I would say to the chairman of our subcommittee, very reluctantly, very, very, very reluctantly, very, very, very reluctantly, I am going to be forced, because of the rules, to withdraw my amendment to put America on a more renewable energy future. But I would hope that our words today have been heard at the U.S. Department of Agriculture.

I appreciate the chairman for his indulgence, and I would hope that wisdom will prevail in the days and months ahead.

The CHAIRMAN. Without objection, the amendment is withdrawn.

There was no objection.

AMENDMENT OFFERED BY MS. KAPTUR

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. KAPTUR: At the end of title VII, insert after the last section (preceding any short title) the following section:

SEC. 7. Of the amounts appropriated in this Act in the item relating to “DEPARTMENT OF HEALTH AND HUMAN SERVICES—FOOD AND DRUG ADMINISTRATION—SALARIES AND EXPENSES” the amount appropriated in the second undesignated paragraph of such item (relating to section 804 of the Federal, Food, and Cosmetic Act) is transferred and made available as an additional appropriation under the first undesignated paragraph of such item.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from Ohio (Ms. KAPTUR) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR).

Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we have witnessed a great debate today about the importation and reimportation of prescription drugs. Yesterday Secretary Thompson finally rendered his decision regarding the fate of the reimportation provision attached to the fiscal year 2001 agriculture appropriation bill. My amendment takes the $2.95 billion designated in this bill for costs associated with the reimportation provision and would transfer these funds back to the Food and Drug Administration general account.

Clearly, in the wake of the Secretary’s decision, the Agency no longer needs the funds for the purposes of reimportation, and my amendment would simply keep those funds within the Agency so they are not penalized to be used for program priorities at the Agency’s discretion within such accounts as the prevention of BSE, TSE, mad cow disease and hoof and mouth disease, many of the challenges that are facing our country today.

Given its tremendous responsibilities and challenges, FDA needs every resource available to keep our food and drug supply safe. I encourage the membership to vote yes to keep these funds within the Agency.

Mr. BONILLA. Mr. Chairman, I rise in strong support of this amendment, and ask unanimous consent to control the time in opposition.

The CHAIRMAN. Without objection, the gentleman will be recognized for 5 minutes.

There was no objection.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the chairman very much. It has been a pleasure to work with the gentleman on this bill. We are proceeding expeditiously, in view of the large number of amendments. I am deeply grateful for the gentleman’s support.

Mr. Chairman, I yield back the balance of my time.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the chairman sincerely.

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Ohio (Ms. KAPTUR).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. Brown of Ohio: At the end of title VII, insert after the last section (preceding any short title) the following section:

SEC. 7. Of the amounts appropriated in this Act for carrying out the responsibilities of the Food and Drug Administration with respect to abbreviated applications for the approval of new drugs under section 505(j) of the Federal, Food, and Cosmetic Act, $1,000,000 is available for the purpose of carrying out section 314.53(b) of title 21, Code of Federal Regulations, in addition to any other allocation for carrying out such section 314.53(b) made from amounts appropriated in this Act for the Food and Drug Administration.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Ohio (Mr. BROWN) and a Member opposed each will control 10 minutes.

The Chair recognizes the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to start with what the Brown-Emerson amendment does not do: It does not legislate on an appropriations bill; it does not spend extra dollars; it does not reduce legitimate patent protection for brand-name drugs; and, most importantly, it does not permit FDA to continue to squander billions in consumer savings, making excuses instead of making the brand-name drug industry abide by Federal law.

Under FDA laws and regulations, a generic must certify it is not infringing
on patents that are directly related to a brand-name drug as approved by the FDA. The drug company wins. Is it fair? Is it approved by FDA? It is important.

If a generic drug company is sued for potentially infringing on these type of patents, FDA automatically suspends approval of the generic for 30 months. Because the drug industry knows that FDA does not actually enforce its regulations, I repeat, because the drug industry knows that FDA does not actually enforce these regulations and weed out patents that under no circumstances should trigger that 30-month delay, drug companies therefore are conjuring up patents that by no stretch of the imagination fit any FDA criteria, just to trigger the 30-month delay, just to enjoy 30 months more of profits, patents on unapproved formulations of the drug or even unapproved uses of the drugs, patents on the shape of the pills, patents on the grooves in the pills, patents even on the bottle holding the pills. Each of these patents, when challenged, triggers the 30-month delay.

These totally unnecessary delays cost consumers billions of dollars in lost savings, while the brand-name companies reap those same billions in additional profits.

Seven years ago CBO estimated that generics save consumers $8 billion to $10 billion per year. Utilization and prices have both increased dramatically since 1994. So have the potential savings associated with generic drugs.

Take Prilosec, for example. Prilosec generates $283 million per month in sales. Astra Zeneca has filed several unapproved use patents on Prilosec, each of which could trigger a 30-month delay in generic competition, even though under FDA regulations only patents on unapproved uses of the brand name should trigger the 30-month delay.

Remember, generics save consumers, save employer-sponsored plans, save all levels of government 40 to 60 percent over the brand-name price. After a few years, the price differential sometimes grows to 90 percent. Over the next 10 years, brand-name drugs with sales topping $40 billion annually will reach the end of their patent life. If we do not do something to prevent drug companies from gaming the system to extend the lock on the market to make their patents grow, if you will, we are perpetuating needlessly inflated drug prices. I do not want to do that to the consumers in my district.

Our amendment empowers FDA to enforce its regulations and at least prevent the most blatant abuses of its 30-month delay provision and stop the gaming of the patent system by the name-brand drug manufacturers.

It permits the Agency to use up to $1 million to get its act together to enforce its laws, to stop brand-name drug companies from walking all over the Agency, and, more importantly, walk all over the public.

We have an opportunity today to help our constituents without changing a word of the existing FDA statute. I urge my colleagues to take advantage of that opportunity and vote for the Brown-Emerson amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I claim the time in opposition to the amendment.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 10 minutes.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in lukewarm opposition to this amendment. This concept sounds like a good one, and possibly, FDA, to prevent patent listing abuses, this amendment does not seem to defeat the purpose. Why would the sponsor seek to increase drug review times?

Again, I must oppose the amendment, reluctantly so, and ask my colleagues to do the same.

Mr. Chairman, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Chairman, I want to reiterate that these are FDA regulations that FDA claims it cannot enforce. It is not doing its job. This $1 million will help it do its job.

Mr. Chairman, I yield 1 minute to the gentleman from Maine (Mr. ALLEN).

Mr. ALLEN. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, I rise in support of this amendment because it would equip the FDA to prevent blatant patent abuses. This amendment does not open up Hatch-Waxman, cut into patent protection, legislate on an appropriations bill or spend new money. What this amendment does is to enable the FDA to exercise the existing authority to prevent blatant patent abuses under the Hatch-Waxman Act.

Today, some drug companies attach unrelated patents to approved drugs and then sue companies that want to produce a generic equivalent for patent infringement. As the gentleman from Ohio (Mr. BROWN) indicated, this can produce a 30-month delay in generic drug approvals and result in substantial delays in consumer access to generic drugs.

Mr. Chairman, let me point out, the FDA has the authority to prevent these blatant abuses right now. What they need is $1 million through the Office of Generic Drugs in order to enforce this agreement and ensure that patents are not inappropriately listed.

Mr. BONILLA. Mr. Chairman, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Chairman, I yield 3 minutes to the gentlewoman from Missouri (Mrs. EMERSON), who has been a real leader in the fight to keep prescription drug prices down.

Mrs. EMERSON. Mr. Chairman, I rise in strong support of the Brown-Emerson amendment, which will help FDA exercise its existing authority to prevent patent listing abuses under the Hatch-Waxman Act.

As many people may know, since the passage of Hatch-Waxman, brand-name pharmaceutical companies have really become quite proficient in manipulating the law to keep generic alternatives from reaching the market. I do not think that the authors of this law would want that to be happening today.

Just, for example, one of the brand industry’s favorite and most frequently used methods to delay generic competition is to make insignificant changes to their products and secure new patents just as the patent on the original product is set to expire. Under current law, once such new patents are granted by the Patent Office, no matter how frivolous or invalid they may be, the generic drug is prohibited from reaching the market for 30 months.

In one instance a brand-name company triggered the 30-month prohibition on delayed generic competition by claiming the generic version infringed on the brand patent because, like the brand, the generic pill had two grooves in it.

These types of delay tactics cost our constituents billions of dollars every year. For example, Bristol-Myers Squibb listed a frivolous patent with the FDA on the eve of its patent expiration for the drug BuSpar. After months of delay, a Federal court ruled that the patent was improperly listed and ordered Bristol to delist its patent with the FDA. So the cost to consumers for this 5-month delay was $57 million.

The situation is getting so out of hand that on May 16 of this year, the U.S. Trade Representative Trade to send a citizens’ petition to the FDA questioning the possible improper or untimely listing of patents by brand-name drug companies.
Mr. Chairman, our amendment is very simple. It would reallocate already-appropriated funds. This amendment does not add any additional money, no additional money. All it does is reallocate already-appropriated money.

Let us all make sure that the FDA devotes the resources necessary to prevent the exploitation of patent listings by drug companies who want to extend the patent laws of their blockbuster drugs. This amendment does not add any additional money, no additional money. All it does is reallocate already-appropriated money.

Mr. BROWN of Ohio. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey (Mr. PALLONE).

Mr. PALLONE. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Ohio (Mr. BROWN).

Mr. Chairman, the problem right now is that brand-name drug companies have been attaching unrelated patents on to existing drug patents. They are required to list patents of drugs that directly relate to existing patents. However, one of the brand-name industry's tactics for extending patents is to stack a list of patents that simply relate to and do not directly affect existing patents.

As the brand-name industry engages in this so-called "patent stacking," unfortunately generic drug approvals are automatically basically tagged with a 30-month delay, and this delays the process from making prescription drugs more affordable.

The FDA currently has the authority to ensure that only patents in compliance stay on the books, and this amendment helps the FDA Office of Generic Drugs use its $1 million in increased funding to exercise this authority and remove barriers to generic competition.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

Mr. BONILLA. Mr. Chairman, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. WAXMAN), the author of the Waxman-Hatch bill.

Mr. WAXMAN. Mr. Chairman, I thank the gentleman for yielding time to me.

Looking when we adopted the law, we wanted to balance generic drugs, brand-name drugs; and if a generic went in to FDA, FDA is supposed to evaluate whether they are violating a patent. But some of these patents are frivolous patents, and all the Brown amendment seeks to do is give FDA more resources so that they can figure out how to find out whether a patent is frivolous or real. Why should consumers have to pay higher prices for drugs and not allow competition with a generic availability because of a frivolous patent?

So I strongly support this amendment, and I urge all Members to support this very well-thought-out, clear, and helpful, constructive amendment.

Mr. BROWN of Ohio. Mr. Chairman, I yield back the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield the remaining time to the gentleman from Florida (Mr. BILIRAKIS).

Mr. BILIRAKIS. Mr. Chairman, I would like to support this amendment because of the intent behind the amendment. The gentleman from California (Mr. WAXMAN) and others, including the gentlewoman from Missouri (Ms. KANETE), correctly noted that FDA currently does not have the authority to review and prevent the abuse of patent listings by drug companies who want to extend the exploitation of patent listings, even if those listings are not appropriate under the law.

The Brown amendment does not add any additional money, no additional money. All it does is reallocate already-appropriated money. This amendment does not add any additional money, no additional money. All it does is reallocate already-appropriated money.

As the brand-name industry engages in this so-called "patent stacking," fortunately generic drug approvals are automatically basically tagged with a 30-month delay, and this delays the process from making prescription drugs more affordable.

The FDA currently has the authority to ensure that only patents listed on to existing drug patents. They are required to list patents of drugs that directly relate to existing patents. However, one of the brand-name industry's tactics for extending patents is to stack a list of patents that simply relate to and do not directly affect existing patents.

As the brand-name industry engages in this so-called "patent stacking," unfortunately generic drug approvals are automatically basically tagged with a 30-month delay, and this delays the process from making prescription drugs more affordable.

The FDA currently has the authority to ensure that only patents in compliance stay on the books, and this amendment helps the FDA Office of Generic Drugs use its $1 million in increased funding to exercise this authority and remove barriers to generic competition.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

The FDA has absolutely no authority under present law to judge the validity of patents. I say again, it has no authority to judge the validity of patents. Their function is purely ministerial. It gets the patent; it lists the patent. If it does not list the patent when they get the patent, by gosh, there is something wrong with that and it has to be taken care of. But they have no authority. They do not review patents. They are forbidden by the law from reviewing patents. I will not say that they are necessarily forbidden, but there is no language in the law that basically gives them that authority.

The Patent and the Trademark Office, as has been said by others, and the courts that judge patent validity say the FDA does not have the experts to do so and, basically, they do not have the authority to do so.

When Dr. Janet Woodcock, director for FDA's Center for Drug Evaluation was asked by, I believe, one of our colleagues who has already made a statement here, at the Committee on Energy and Commerce, whether the FDA had authority to review patents, she said no. She went on to say, when asked whether FDA should have the authority to do so, she said, and I quote her, "If we were asked to do such a thing, I would have to say that it would significantly divert resources from the scientific review of generic drugs that we are currently undertaking."

So if FDA were to get into the job of judging patent validity, they tell us, the people that do this job, that the agency would be subject to countless lawsuits. The $1 million provided for in the Brown amendment would be spent very, very quickly.

I understand that, and I have already admitted, that there are legitimate questions associated with additional patents being listed very late in a patent term. The gentleman from Ohio knows how I feel about generics. I bring them up all the time, and I am concerned about the fact that they are possibly not being approved on a more timely fashion.

This concerns us so much that just last month in the Committee on Energy and Commerce we held a hearing on this matter that I have already referred to. At this hearing we learned many things, including the fact that the FDA cannot, under the law, judge the validity of patents. The Brown amendment does not do what the author says. I would hope that it would do, maybe if it passes, what the author says; but I do not feel that it does. It would not allow FDA to review patents; it merely would reallocate $1 million and say, hey, we trust you to use that the better way. That's far as analyzing and listing patents. The FDA cannot do so under the law and they should not be able to do so, and for those reasons, unfortunately, I
would ask my colleagues to vote “no” on the Brown amendment.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. Brown).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ALLEN

Mr. ALLEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 4 offered by Mr. ALLEN: At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 7. None of the amounts made available in this Act for the Food and Drug Administration may be expended to approve any application for a new drug submitted by an entity that does not, before completion of the approval process, provide to the Secretary of Health and Human Services a written statement specifying the total cost of research and development of such drug, by stage of drug development, including a separate statement specifying the portion paid with Federal funds and the portion paid with State funds.

Mr. BONILLA. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. A point of order is reserved.

Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Maine (Mr. ALLEN) and a Member opposed each will control 5 minutes.

The CHAIRMAN. The Chair recognizes the gentleman from Maine (Mr. ALLEN) for 5 minutes.

Mr. ALLEN. Mr. Chairman, I yield myself such time as I may consume.

I rise to offer an amendment with the gentleman from Ohio (Mr. BROWN) to provide American taxpayers with information about our collective investment in the research and development of new drugs. The Food and Drug Administration should not approve, in our opinion, a new drug application unless the total cost of the research and development of that drug is available to the public. We are particularly interested in knowing how much money the taxpayers have contributed.

The pharmaceutical industry claims that efforts to make drugs affordable for seniors would reduce the industry’s ability to conduct research and to develop new drugs. I disagree. This industry is the most profitable in the country. Their profits last year were more than $27 billion. The manufacturers will always be able to attract capital in order to do R&D.

The industry asserts that they have a right to charge high prices to those least able to afford it because of the $500 million, more or less, that they claim it takes to launch a new drug.

What the industry consistently fails to disclose is that new drugs are usually the result of a partnership with the public. A good portion of our Nation’s pharmaceutical research is conducted by publicly-funded entities. We deserve to know how much.

The pharmaceutical industry says we do not deserve to know. They say this amendment is unjustified. I say there is no justification for the way America’s seniors are currently treated. Seniors pay taxes which are used to fund research, but the product of that research, which saves lives, is too expensive for many of them to afford.

The drug manufacturers say no other industry has to disclose R&D figures. But no other industry gouges the needy as they do, or operates in such a shroud of secrecy.

We are not asking that the FDA make an approval decision based on the R&D data. We are simply asking the FDA to inquire about the data on the cost of R&D and to make it available.

The industry has attacked this amendment. They say only assume they know their arguments about their R&D expenses will be undermined if the public is told how much of the cost of the development of new drugs is actually paid by the public.

We know that the taxpayer contribution to the development of innovative medicines is significant. NIH estimates that taxpayer-funded research, combined with private foundation-funded research, accounts for about 50 percent of all medical research in this country. Now we need to know the details, just how much public and private funding is involved in the development of new drugs.

We do not want to slow the approval of or access to new drugs, but there are too many patients who cannot afford the drugs, even if they are approved by the FDA. Proving a drug safe and effective can take years. Providing the cost of development should be easy. A memo to the FDA would do the job. I assure the Members that the pharmaceutical industry is capable of tracking expenditures in their development of new drugs. We know that the taxpayer contribution to the development of new drugs. I am confident that this Congress and this administration can find a way to implement this amendment.

Because the cost of R&D is one of the most important components of our debate over prescription drug costs for the elderly and disabled, it is hard to believe that anyone could object to making basic information on those costs available to the public.

Millions of our seniors have paid taxes for decades and contributed to the development of new drugs. Now, in their retirement, they pay the highest prices in the world for those drugs. The pharmaceutical industry spends millions of dollars on TV ads about their miracle drugs, but does not want the public to know how much the public has contributed to those miracles. The public deserves to know. I urge passage of this amendment.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does the gentleman from Texas (Mr. BONILLA) insist on his point of order?

Mr. BONILLA. I would inquire, Mr. Chairman, if the gentleman is going to withdraw his amendment.

Mr. ALLEN. Mr. Chairman, I have one more speaker. I am not willing to withdraw the amendment.

Mr. BONILLA. Mr. Chairman, I continue to reserve my point of order.

The CHAIRMAN. The Chair recognizes the gentleman from Maine (Mr. ALLEN) for 30 seconds, the balance of his time.

Mr. ALLEN. Mr. Chairman, I yield the balance of our time to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I thank the gentleman for yielding time to me.

Prescription drug companies consistently depend on one argument and one argument only, to defend charging U.S. consumers two and three and four times higher prices in the U.S. than they do in other developed countries.

The one argument they use to justify grossly inflated drug prices is that those prices are necessary to sustain R&D. Yet, we know that American taxpayers pay almost half of all the R&D that is done in the drug industry development in this country.

It is an insult for the industry to ask American taxpayers to willingly pay the highest price in the world when they will not tell us what they spend when they are the most profitable industry in America, when they spend more money lobbying this institution than anybody else. They pay back American taxpayers by charging us more than anybody in the world.

I ask support for the Allen amendment.

The CHAIRMAN. Does the gentleman from Texas (Mr. BONILLA) insist upon his point of order?

Mr. BONILLA. Mr. Chairman, I make a point of order against the amendment. It proposes to change existing law and constitutes legislation in an appropriations bill, and therefore violates rule XII of the House.

The rule states, in pertinent part, “An amendment to a general appropriations bill shall not be in order if changing existing law.” The amendment imposes additional duties. I ask for a ruling from the Chair.

The CHAIRMAN. Does the gentleman from Maine (Mr. ALLEN) wish to speak on the point of order?

Mr. ALLEN. I simply await the ruling of the Chair.

The CHAIRMAN. The Chair is prepared to rule.

The Chair finds this amendment imposes additional duties not required by
existing law. Therefore, the amendment constitutes legislation in violation of clause 2 of rule XXI.

The point of order is sustained and the amendment is not in order.

AMENDMENT OFFERED BY MR. OLIVER

Mr. OLIVER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. OLIVER: Strike section 726 of the bill.

Mr. OLIVER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, for the most part, this bill is an excellent bill.

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. OLIVER. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, just to inform the gentleman, we are just delighted to accept this amendment. If the gentleman would like to offer any more debate time, that is fine, but in the good spirit of trying to work in agreement here, I just want to let the gentleman know that we are prepared to accept the amendment and move it forward.

Mr. OLIVER. Mr. Chairman, I thank the gentleman for his acceptance of the amendment. We do have several speakers who wish to speak on it.

Mr. Chairman, this is an excellent bill. I greatly respect the outstanding amendment. The outstanding amendment would strike has been used to badger agencies and demand repeated explanations of environmental activities. The Inspector General was recently forced to investigate alleged violations by the EPA, the Department of Energy, and the State Department, and found no instances of violations. It is the President of the United States who will not implement Kyoto, who runs the executive departments.

This rider jeopardizes the executive agencies' work on every issue related to climate change, which the U.S. is obligated to address as part of the United Nations Framework Convention on Climate Change. Remember, the U.N. Framework Convention on Climate Change was ratified by then President George Herbert Walker Bush in September of 1992, was ratified by the Senate in October of 1992, and took force in 1994.

It states that, and I quote, "The parties to the convention are to implement policies with the aim of returning to their 1990 levels of anthropogenic emissions of carbon dioxide and other greenhouse gases."

Mr. Chairman, the consequences of global warming will not be mild. If we do not begin to act soon, it may be too late to preserve our coastlines and our agriculture. The American public wants this Congress and this administration to find a way to address global warming. How we do that is not the subject of today's debate. This vote has nothing to do with implementing or even liking the Kyoto Protocol. But a yes vote to remove this ill-conceived and unneeded rider allows our agencies to search for ways and measures authorized by the already-ratified U.N. framework to begin addressing greenhouse gases.

I urge a yes vote on the Gilchrest-Olver amendment.

Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. BOEHLERT), the distinguished chairman of the subcommittee, the gentleman from Texas (Mr. BONILLA), and the ranking member, the gentlewoman from Ohio (Ms. KAPTUR), but I rise to strike section 726, an anti-environmental rider which is meant to prevent any and all action to address the climate change caused by global warming.

Mr. Chairman, section 726 is equivalent to burying our heads in the sand, and hot sand, at that. Regardless of the fate of the Kyoto Protocol, there is an overwhelming, peer-reviewed sound scientific evidence for global warming. The National Academy of Sciences has very recently reaffirmed that fact.

Placing a gag order on Federal agencies can only stifle our ability to address what will be the most critical environmental issue of the 21st century at a time when carefully considered but comprehensive action is needed.

This oil rider dates back to the Clinton administration. I am disappointed that President Clinton would have acted to implement Kyoto. But President Bush has made it clear that he has no intention of implementing the Kyoto Protocol. He has declared the Kyoto Protocol dead, dead. So, at the very least, the rider would strike and reinitiate the negotiations. If it has been used in attempts to thwart voluntary agreements, voluntary agreements, with industries that offered to cut their greenhouse gas emissions.

Yet, both President Bushes, 41 and 43, acknowledged that climate change is a serious problem. In fact, President George Herbert Walker Bush even signed an international agreement to reduce U.S. emissions of greenhouse gases, and that treaty was ratified by the U.S. Senate.

Despite its misgivings about the Kyoto Protocol, this administration too has acknowledged the seriousness of climate change. As many know, after receiving last month the report from the National Academy of Sciences, a report that underscored yet again the scientific consensus that exists on climate change, President Bush pledged that the U.S. will take a leadership role to address it.

I, for one, want to help him do that. I want the U.S. to take the lead on dealing with climate change responsibility, and the obstructionist language in this bill does not help do that.

So I want to commend the gentleman from Massachusetts (Mr. OLVER) and I want to commend the gentleman from Maryland (Mr. GILCHREST) for their steadfast support of reasonableness as we shape public policy, and I want to extend to the subcommittee chairman, the gentlewoman from Texas (Mr. BONILLA), my appreciation for his cooperation.

Mr. Chairman, I rise today, in support of the Olver-Gilchrest amendment, but frankly, I'm disappointed that we have to have this debate at all. I am disappointed that the language that we are attempting to strike has been included in the Agriculture Appropriations Bill in the first place, because today the scientific consensus on global climate change is stronger than ever.

Mr. Chairman, the opponents of this amendment will tell you that the language included in this bill—the language the amendment would strike—simply prevents the Administration from implementing the international agreement, known as the Kyoto Protocol, to reduce greenhouse gases and curb global climate change.

The opponents say that the Administration should not implement the Kyoto Protocol because it is fatally flawed and unrealistic.

They say the Administration shouldn't implement the Protocol because it would exempt developing countries from requirements to reduce their greenhouse gas emissions.

They say the Administration shouldn't implement the Kyoto Protocol. Period.

Well guess who agrees with them entirely? The Administration.

So if this Administration isn't even remotely thinking about implementing the Kyoto Protocol, what is the language this amendment would strike really about?
It is not about the Kyoto Protocol. It is not about fears the Administration will sneakily conduct “back-door” implementation. It is really about preventing any serious progress at all on the serious environmental problem of global climate change. The truth is that this amendment is really about who is for dealing with climate change responsibly, and who is not.

For years now, the language this amendment would strike has been used to hound federal agencies that tried to address climate change. It was used to harass agencies who sent government officials to international climate change meetings. And it has been used in attempts to thwart voluntary agreements—voluntary agreements—with industries that offered to cut their greenhouse gas emissions.

Yet, both Presidents Bush have acknowledged that climate change is a serious problem. In fact, George H.W. Bush even signed an international treaty when he was President. The U.S. emissions of greenhouse gases—and that treaty was ratified by the U.S. Senate. Despite its misgivings about the Kyoto Protocol, this Administration, too, has acknowledged the seriousness of climate change. As many of you know, after receiving last month the report he requested from the National Academy of Sciences—a report thatunderscored yet again the scientific consensus that exists on climate change—President Bush pledged that the U.S. will take a leadership role to address it.

I, for one, want to help him do that. I want the U.S. to take the lead on dealing with climate change responsibly. And the obstructionist language in this bill does not help do that.

It is time this House took the issue of climate change seriously, as our President has said he does. I urge my colleagues to support the Olver-Gilchrest amendment. Let’s strike this troublesome language from the bill, and put the tired old bogeyman of Kyoto behind us.

Mr. OLVER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Chairman, I thank my friends across the aisle, the gentleman from New York (Mr. BOEHLERT) and the gentleman from Maryland (Mr. GILCHREST), for cosponsoring this effort to strike an anti-environmental rider.

I just want to share an experience I had last week when I was up on the Arctic plain on the shores of the Arctic Ocean talking to biologists and geophysicists about what is going on in the Arctic.

What I learned was that, in a relatively stunning development, fully 50 percent of the depth of the pack ice above the North Pole, the Arctic oceans, have dissipated in the last several decades. Half of the depth has gone away, and 10 percent of the extent of the ice is gone because of global warming that has occurred.

I talked to rangers at Denali National Park who have worked there about 15 years and have seen the treeline move north just during their experience. The fact is, this is happening. It is happening four or five times more rapidly in the Arctic than it is in temperate areas, but it is a harbinger of things to come.

I am hopeful that the House will not move backwards with this, but in fact will strike this language so we can make a positive statement and move forward. The United States should be a leader. We have been a leader in freedom. It is time for us to become a leader in global climate change, and realize the development for our economy at the same time.

Mr. OLVER. Mr. Chairman, I yield 3 minutes to the gentleman from Maryland (Mr. GILCHREST), and want to recognize in general the leadership the co-author on this amendment has provided on climate change.

Mr. GILCHREST. Mr. Chairman, I thank the gentleman for yielding time to me, and for the part the gentleman from Massachusetts (Mr. OLVER) has played in the process, and thank all the other Members for their work.

I also want to thank, with a great deal of gratitude, Mr. Chairman, of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies of the Committee on Appropriations, the gentleman from Texas (Mr. BONILLA), for accepting our amendment.

Number two, it gives us, as Members of the House, a sense of responsibility for protecting the planet, so we will not pass that burden and that responsibility off to the next generation, which will have a much more difficult time.

Number three, very quickly, everybody talks about the weather, but not a lot of people, including us, know a lot about the weather or where does the air that we breathe come from, how does it sustain us, how is the air sustained, and over what period of time did it create what we now see.

Well, there is a word that I think is interesting called coevolution, and that means the biological diversity of the web of life, on land and in the oceans, over eons of time, has produced and sustained the atmosphere that surrounds this planet, unique in the known universe, in which life through nature’s bounty thrives as we know it today.

And the last comment I want to make is can man, through polluting, degrading, and fragmenting the environment, have the capacity to change the atmosphere and actually change the climate? That is the question. Is it reasonable that the Bush administration had a number of scientists from the National Academy of Science review and come back and tell the Bush administration the answers to those two questions. Does man have the capacity to change the atmosphere, thus changing the climate?

To read just a couple of sentences from this report commissioned by the Bush administration from the National Academy of Sciences, “Greenhouse gases are accumulating in Earth’s atmosphere as a result of human activities, causing surface air temperatures and subsurface ocean temperatures to rise. Temperatures are, in fact, rising. Human-induced warming and associated sea level rises are expected to continue through the next century.” That is throughout the 21st century.

Can we change the atmosphere? If we look at this chart produced by the National Oceanic and Atmospheric Administration, we can see from 1860 to the year 2000 the acceleration of the accumulation of carbon dioxide in the atmosphere. This is from our Federal Government, commissioned by the Bush administration. We can change the atmosphere by increasing the greenhouse gas of carbon dioxide, thereby increasing warming.

This chart, produced by NASA, shows since 1860 the level of increase in warming which affects the climate, and it is dramatic during the industrial age.

So the questions are: Can we affect our atmosphere? Can we change climate? The answer to those two questions is yes, and now it is time for us to do something about it.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent that the time be in opposition, though I am not opposed to the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 3 minutes.

Mr. BONILLA. Mr. Chairman, I yield back the balance of my time.

Mr. OLVER. Mr. Chairman, I yield myself such time as I may consume to thank the gentleman for his acceptance, and I thank him for yielding back his time. I do have two people who wish to make very short statements.

Mr. Chairman, I yield 1 minute to the gentlewoman from California (Ms. LEE).

Ms. LEE. Mr. Chairman, I thank the gentleman from Massachusetts for yielding me this time and for his leadership on this issue. I stand in strong support of this amendment, which will ensure that we move forward to combat global warming.

Global climate change is underway. Denying the existence of global warming will not make it go away nor can
the United States afford to deny its role. Just last week I had the opportunity to talk to European leaders about climate change and I believe they have grave concerns about our re-trenchment. Our country must bear its share of this burden.

Now, President Bush recently asked the National Academy of Sciences to revisit the issue. They concluded greenhouse gases are accumulating in the Earth’s atmosphere as a result of human activities. Temperatures are in fact rising. Their report goes on to say the national policy decisions made now and in the long-term future will influence the extent of any damage suffered by vulnerable human populations and ecosystems later in this century.

Voluntary reductions, which the President advocates, are not sufficient. I urge adoption of this amendment. We need to send a clear message that this Congress is committed to protecting our environment, protecting the public health and ensuring our future.

Mr. OLVER. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Missouri (Ms. McCARTHY).

Ms. McCARTHY of Missouri. Mr. Chairman, I rise in support of the Olver-Gilchrest amendment to strike the Kyoto rider language.

The President has already indicated that he has no intention of implementing the Kyoto Protocol. The reason, he said, to stay engaged at the table to encourage progress on this critical issue. However, it makes this rider unnecessary.

Science has confirmed the existence of global climate change is real. The effects of this have significant implications for agriculture in our nation and around the world. The mix of crop and livestock production is influenced by climatic conditions and water availability. Increases in climate variability already make adaptation by farmers more difficult. In my state of Missouri, agriculture is a $4 billion annual industry, one-half of which comes from livestock, especially cattle. The major crops in my state are corn, soybeans, and hay. Corn and soybean yields could fall by as much as 22% or rise by as much as 6%, depending on the climate variability resulting from global climate change.

As a result of global warming, we expect to see more frequent anomalies in our weather, with more frequent severe storms, floods, and droughts. Clearly these volatile weather patterns can have a highly negative impact on our ability to farm and protect and secure families and property.

We might also expect to see more pests in our plants and food stream. We may see more insects—this is expected greenhouse gases are expected to become more prevalent. There may be many pests that are new to our area, and we might expect to see greater numbers of insects, some of which carry diseases like malaria. The insects could travel further north—into MO—a result of global warming. Again, this could have a potentially significant adverse effect on plants and crops by destroying our nation’s precious resources and jeopardizing human health.

This morning, Deborah Clark from the University of Missouri-St. Louis, at a National Academy of Sciences forum, spoke about the ability of plants to photosynthesize, thus reducing their ability to capture carbon.

Our Nation’s strategy to address climate change can produce a reliable supply of diverse fuels that minimize greenhouse gases and secure our leadership in energy technology to benefit our consumers and to export around the world.

We must make the necessary investments in emerging technologies which will allow the United States to gain the edge in developing and marketing new products and lead to job creation. If we fail to act, we will lose the edge to other nations like Japan and Germany who are committed to this course of action.

A decade of progress has occurred since former President Bush signed the original climate treaty in Rio in 1992. This rider makes it difficult for federal agencies to work on any issues related to climate change, which the U.S. is obligated to address as part of the Rio agreement.

I urge others to join with me in voting in favor of this amendment, because whether or not the Kyoto protocol moves forward, we must have an obligation to maintain our global leadership role in developing new technologies that will enable us to reduce emissions of greenhouse gases and promote the agricultural economy.

The rider is unnecessary and I urge my colleagues to support the Olver/Gilchrest amendment.

Mr. OLVER. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I appreciate the gentleman’s courtesy in allowing a brief comment. This commonsense resolution set the absolute minimum criteria for Senate ratification of any climate treaty. The Clinton Administration never ratified the Kyoto Protocol to the Senate for ratification because it knew that it would be dead on arrival.

In a breath of fresh air, President Bush said succinctly, “I will not accept a plan that will harm our economy and hurt American workers.” In stating the obvious and pulling the plug on this flawed treaty, the President has spared us from a U.N. boondoggle that would harm American workers, consumers, and businesses.

The proponents of this amendment argue that, because the Administration does not support the Kyoto Protocol, the language in the bill is superfluous. Further, they argue that striking the language will send a positive message to the international community that the U.S. is willing to play a leadership role in climate change.

We are a leader in the world on reducing and sequestering harmful emissions. Annually we spend nearly $2 billion on climate change research, more than the rest of the world combined. There are many things about the climate system we still do not understand. That is why we need to continue this research and increase our knowledge of climate variability and the potential human impact of greenhouse gas emissions.

Current computer models predicting warming over the next century may prove to be no more reliable than the five-day weather forecast. But even assuming that these models are right, achieving the emission goals in the treaty would reduce projected warming by less than one-tenth of a degree by 2050. So we still have time to do the necessary research to fill in the gaps and get it right instead of lurching ahead with a treaty that would cost too much and do nothing to solve the problem it is intended to solve.

The Administration also has said that it will be working to develop new technologies, market-based incentives, and other approaches to increase energy efficiency and reduce greenhouse emissions. I fully support these approaches, which make much more sense than the command-and-control dictates that would flow from the Kyoto process.
Mr. OLVER. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. OLVER).

The amendment was agreed to.

SEQUENTIAL VOTES POSTPONED IN COMMITTEE OF THE WOOL

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed in the following order: the amendment offered by the gentleman from New York (Mr. WEINER); the amendment offered by the gentleman from California (Mr. ROYCE); the amendment offered by the gentleman from Ohio (Mr. BROWN).

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

PARLIAMENTARY INQUIRY

Ms. KAPTUR. Parliamentary inquiry, Mr. Chairman. We were just presented a list of potential amendments for consideration by the full membership, and I wonder if the Chair would again repeat which amendments the Members will be asked to vote on and the order that they will be presented.

The CHAIRMAN. The amendments on which further proceedings were postponed will be voted on in the following order: the amendment offered by the gentleman from New York (Mr. WEINER); the amendment offered by the gentleman from California (Mr. ROYCE); and the amendment offered by the gentleman from Ohio (Mr. BROWN).

Ms. KAPTUR. Mr. Chairman, we believe that third amendment was accepted; voice vote.

The CHAIRMAN. The gentleman is correct, the amendment was approved by voice vote and no recorded vote was requested.

Ms. KAPTUR. Mr. Chairman, for all the Members who are watching from their offices, then, in terms of the order of the votes, it would then be?

The CHAIRMAN. The amendment offered by the gentleman from New York (Mr. WEINER) will be first, followed by the amendment offered by the gentleman from California (Mr. ROYCE) and the amendment offered by the gentleman from Ohio (Mr. BROWN).

Ms. KAPTUR. Then we will move to final passage?

The CHAIRMAN. That is correct.

Ms. KAPTUR. I thank the Chair very much.

AMENDMENT NO. 25 OFFERED BY MR. WEINER

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from New York (Mr. WEINER) on which further proceedings were postponed and on which the no prevailing by voice vote.

The Clerk will redesignate the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—aye 155, noes 272, not voting 6, as follows:

Mr. Hayes, Mr. McCrery, Mr. McGovern, Mr. Mclntire, Mr. Berman, Mr. McDermott, Mr. Johnson, Mr. Balderston, Mr. Latta, Mr. Baldacci, Mr. Aderholt, Mr. Brasfield, Mr. Brad Sherman, Mr. Berman, and Mr. Berman changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device will be taken on the additional amendment.

MESSRS. GONZALES, WYNN, DAVIS OF ILLINOIS, NEAL OF MASSACHUSETTS, MS. PELOSI, MR. HAYDE, and MR. WATT OF NORTH CAROLINA changed their vote from "aye" to "no."

So the amendment was rejected.
The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from California (Mr. ROYCE) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The CHAIRMAN. The Clerk will redesignate the amendment. The Clerk redesignated the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIRMAN. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—aye 85, noes 341, not voting 7, as follows:

AYES—85

Boswell
Bonior
Bishop
Bilirakis
Biggert
Berry
Bereuter
Barton
Barcia
Baldwin
Ackerman
Adkorth
Aderholt
"aye" to "no."

The result of the vote was announced as above recorded.

Stated against:
Mr. LEWIS of California. Mr. Chairman, on rollcall No. 220, I was unavoidably detained. Had I been present I would have voted "no."

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

This Act may be cited as the "Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2002."

The CHAIRMAN. If there are no further amendments, under the rule the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. SIMPSON) having assumed the chair, Mr. GOODLATTE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2330) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2002, and for other purposes, pursuant to House Resolution 183, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them on gross.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to engross and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Under clause 10 of rule XX, the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 414, nays 16, not voting 3, as follows:

[Roll No. 221]
The Clerk read as follows:

H. RES. 187

Resolved, That the following Member be and is hereby elected to the following standing committee of the House of Representatives:

Standards of Official Conduct: Mr. Hulshof.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO CONGRESSIONAL-EXECUTIVE COMMISSION ON PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Without objection, and pursuant to section 303(a) of Public Law 106–286, the Chair announces the Speaker’s appointment of the following Members of the House to the Congressional-Executive Commission on the People’s Republic of China:

Mr. LEVIN of Michigan
Ms. KAPTUR of Ohio
Ms. PELOSI of California
Mr. DAVIS of Florida.

There was no objection.

COMMUNICATION FROM THE HONORABLE STEPHEN E. BUYER, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Stephen E. Buyer, Member of Congress:

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES

Hon. J. Dennis Hastert,
Speaker, House of Representatives, Washington, D.C.

Dear Mr. Speaker: I am writing to submit the following request for the issuance of a subpoena that I have no documents that are hereby elected to the following standing committee of the House of Representatives:

Standards of Official Conduct: Mr. Hulshof.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO CONGRESSIONAL-EXECUTIVE COMMISSION ON PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Without objection, and pursuant to section 303(a) of Public Law 106–286, the Chair announces the Speaker’s appointment of the following Members of the House to the Congressional-Executive Commission on the People’s Republic of China:

Mr. LEVIN of Michigan
Ms. KAPTUR of Ohio
Ms. PELOSI of California
Mr. DAVIS of Florida.

There was no objection.

COMMUNICATION FROM THE HONORABLE STEPHEN E. BUYER, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Stephen E. Buyer, Member of Congress:

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES

Hon. J. Dennis Hastert,
Speaker, House of Representatives, Washington, D.C.

Dear Mr. Speaker: I am writing to submit the following request for the issuance of a subpoena that I have no documents that are hereby elected to the following standing committee of the House of Representatives:

Standards of Official Conduct: Mr. Hulshof.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO CONGRESSIONAL-EXECUTIVE COMMISSION ON PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Without objection, and pursuant to section 303(a) of Public Law 106–286, the Chair announces the Speaker’s appointment of the following Members of the House to the Congressional-Executive Commission on the People’s Republic of China:

Mr. LEVIN of Michigan
Ms. KAPTUR of Ohio
Ms. PELOSI of California
Mr. DAVIS of Florida.

There was no objection.

COMMUNICATION FROM THE HONORABLE STEPHEN E. BUYER, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Stephen E. Buyer, Member of Congress:

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES

Hon. J. Dennis Hastert,
Speaker, House of Representatives, Washington, D.C.

Dear Mr. Speaker: I am writing to submit the following request for the issuance of a subpoena that I have no documents that are hereby elected to the following standing committee of the House of Representatives:

Standards of Official Conduct: Mr. Hulshof.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO CONGRESSIONAL-EXECUTIVE COMMISSION ON PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Without objection, and pursuant to section 303(a) of Public Law 106–286, the Chair announces the Speaker’s appointment of the following Members of the House to the Congressional-Executive Commission on the People’s Republic of China:

Mr. LEVIN of Michigan
Ms. KAPTUR of Ohio
Ms. PELOSI of California
Mr. DAVIS of Florida.

There was no objection.

COMMUNICATION FROM THE HONORABLE STEPHEN E. BUYER, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Stephen E. Buyer, Member of Congress:

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES

Hon. J. Dennis Hastert,
Speaker, House of Representatives, Washington, D.C.

Dear Mr. Speaker: I am writing to submit the following request for the issuance of a subpoena that I have no documents that are hereby elected to the following standing committee of the House of Representatives:

Standards of Official Conduct: Mr. Hulshof.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO CONGRESSIONAL-EXECUTIVE COMMISSION ON PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Without objection, and pursuant to section 303(a) of Public Law 106–286, the Chair announces the Speaker’s appointment of the following Members of the House to the Congressional-Executive Commission on the People’s Republic of China:

Mr. LEVIN of Michigan
Ms. KAPTUR of Ohio
Ms. PELOSI of California
Mr. DAVIS of Florida.

There was no objection.

COMMUNICATION FROM THE HONORABLE STEPHEN E. BUYER, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Stephen E. Buyer, Member of Congress:

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES

Hon. J. Dennis Hastert,

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT OF MEMBERS TO CONGRESSIONAL-EXECUTIVE COMMISSION ON PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Without objection, and pursuant to section 303(a) of Public Law 106–286, the Chair announces the Speaker’s appointment of the following Members of the House to the Congressional-Executive Commission on the People’s Republic of China:

Mr. LEVIN of Michigan
Ms. KAPTUR of Ohio
Ms. PELOSI of California
Mr. DAVIS of Florida.

There was no objection.
He was remembered at his funeral service for what speaker after speaker called his “legacy of justice.” Stanley Mosk was the only Democrat on the State High Court and a very progressive member. He died in San Francisco.

He was my neighbor and he was my friend. Our colleague, the gentleman from California (Mr. Schiff), will be speaking more specifically about Stanley Mosk’s contribution to the law in California and our country. I want to speak briefly about him personally.

Stanley Mosk was a genius. He was a great tennis player. He took great pride in that. He might have wanted that to be first. He was a great family person. Of course, that did come first. He was a person of such great intellect that his decisions when he wrote them were the subject of great admiration and study by law students and admired by those who followed the law. He will be greatly missed in San Francisco, where the supreme court resides in California.

He was the first person elected statewide in California, when he ran for office many years ago, the first person of the Jewish religion ever elected. Once and for all, he settled that issue. Because of Stanley Mosk, Jewish candidates know that their religion is not a factor in elections in this great State. Indeed, if they were a factor at all, it is a plus.

With that, Mr. Speaker, I want to mention further that it is said of him that many people learned much about pain and much about joy from him.

Stanley Mosk did not want to retire. He went home, he was with his family, but he planned to retire in the fall. So, if I am hesitant about this, it is with great sorrow that I tell our colleagues that Stanley was vigorous to the end, of course, with his great and powerful intellect, benefiting all of us to the end.

His plan was to retire in the fall. That was not in the cards for him. God took him sooner. But I want his family to know that many of us in the Congress mourn his passing, and I hope it is a comfort to them that so many people share their grief, but also their great pride in California Justice Stanley Mosk.

PLEIT OF PUBLIC HOSPITAL SYSTEMS IN NATION

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, this evening I would like to talk about the plight of the public hospital systems in this Nation, and use as an example my own public hospital system, the Harris County Hospital District.

First of all, let me applaud the district for being such a vital part of our community, both in times of need and in times of tragedy. In particular over the last couple of weeks, it is the Harris County Hospital District that has stood up under the burden of Tropical Storm Allison. When any number of our private hospitals were closed, the Harris County Hospital District had its doors open. The trauma center, the Trauma and Emergency Center, was available for those who were in need. Now this hospital district is in need, and we need to rally around it to support it.

First of all, there is an enormous nursing shortage, as we well know, throughout this Nation. We must find ways to enhance and grow nurses, as well as provide opportunities for existing nurses who are immigrants to come in and provide assistance.

Furthermore, we must address the funding issue that plagues the Harris County Hospital District as it relates to the formula utilized for Medicaid dollars in this Congress. I hope that my colleagues and I can work together in a way to address. I will be approaching, along with Members of the United States Senate, can help us assist in obtaining additional funding, at least providing some minimal relief to the Harris County Hospital District, but addressing the need across the Nation for our public hospital systems. I applaud them and thank them for their service to the health needs of America.

TRIBUTE TO THE LATE JUSTICE STANLEY MOSK

(Mr. FARR of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FARR of California. Mr. Speaker, I rise tonight to speak on the memorial of Justice Stanley Mosk. Many of you know that the California, born in San Francisco, where Stanley Mosk died, that he was a giant among supreme court Justices in the United States. He left a legacy of justice in California, having served on the supreme court in that State for 37 years.

I knew him as a lawyer. My father was in the State legislature and was very close to the Mosk family and to the Pat Brown family. Governor Pat Brown appointed him to the bench.

The tragedy of his loss is that one of the greatest legal minds of this century served in all of that time when California was emerging as a State, growing to be the incredible nation-state that it is, and the California Supreme Court rose to, I think, in respect probably the highest among all State supreme courts in the United States. Stanley Mosk led that drive. It is a great tragedy that we lost him before we could totally record all of his memories, but his legacy will live on in the history of California. He was one of the men that matched our mountains.
The Speaker pro tempore (Mr. WELCH). Mr. WALDEN of Oregon. Mr. Speaker, I rise tonight to again talk about the tragedy that is occurring at ground zero of the Endangered Species Act debate.

Today, in the Washington Post, Michael Kelly, a columnist, writes, "The Endangered Species Act has worked as intended, but it has been exploited by environmental groups whose agenda is to force humans out of lands they wish to see returned to a prehuman state. Never has this been made more nakedly, brutally clear than in the battle for the Klamath Falls.

Mr. Speaker, I want to read today from a couple of letters I have received from constituents. These folks, Bill and Ethel Rust wrote, "We have not written sooner as shock and disbelief have kept us almost immobilized and so sick at heart. My husband is 76 years old and a Navy veteran of World War II, having kept us almost immobilized and so sick at heart. Their livelihoods are at stake.

We need also to work with USDA to get feed and water for livestock. Literally, a crisis is at the doorstep. We are in shock that our own government has taken this away from us. We recently retired to a small 75-acre alfalfa ranch that was just perfect for us to handle at our age, and you have just destroyed it. Without water, our alfalfa is dying. What are we to do to replace this income? Is the suckerfish more important to you than we are? Having raised nine children to be hard workers and contributors to our society, are we now to apply for welfare or live off our children?

We have sold our cattle. We are in the process of selling our horses. After a lifetime of getting up in the morning to care for our livestock and ranch chores, what would you suggest we do with our mornings? What reason do you give us to get out of bed? "We need the help of our government. Will we get that?"

Mr. Speaker, this is typical of hundreds, if not thousands of letters I have received from the people of Klamath Falls.

We, as the Sacramento Bee columnist Peter Schrag has eloquently noted, as the gentlewoman from California (Ms. PELOSI) indicated, all of our sincere pride in the work of that great man. As the Sacramento Bee editorialized so appropriately, Justice Mosk was "California's brightest beacon of liberty." While his life has ended, his legacy shines brightly for all Californians and for our great Nation.

CRISIS IN KLAMATH RIVER BASIN

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Oregon (Mr. WALDEN) is recognized for 5 minutes.

Mr. WALDEN of Oregon. Mr. Speaker, I rise tonight to again talk about the saga of the Klamath Basin and the farmers who have lived there and tilled the ground and fed the Nation.

As my colleagues know, Mr. Speaker, on April 6, they cut off the water. They said, no water for the farmers this year; the suckerfish would prevail. Mr. Speaker, word is finally getting out about this crisis. There have been stories in The New York Times, and today in the Washington Post there is a story. It has been on Fox News and other networks, CNN and others, who are beginning to cover this story and the tragic story that is occurring at ground zero of the Endangered Species Act debate.

Today, in the Washington Post, Michael Kelly, a columnist, writes, "The Endangered Species Act has worked as intended, but it has been exploited by environmental groups whose agenda is to force humans out of lands they wish to see returned to a prehuman state. Never has this been made more nakedly, brutally clear than in the battle for the Klamath Falls.

Mr. Speaker, I want to read today from a couple of letters I have received from constituents. These folks, Bill and Ethel Rust wrote, "We have not written sooner as shock and disbelief have kept us almost immobilized and so sick at heart. My husband is 76 years old and a Navy veteran of World War II, having lost a brother in this war. We have been ranchers our entire life and depend on this for our livelihood. We are still in shock that our own government has taken this away from us. We recently retired to a small 75-acre alfalfa ranch that was just perfect for us to handle at our age, and you have just destroyed it. Without water, our alfalfa is dying. What are we to do to replace this income? Is the suckerfish more important to you than we are? Having raised nine children to be hard workers and contributors to our society, are we now to apply for welfare or live off our children?

We have sold our cattle. We are in the process of selling our horses. After a lifetime of getting up in the morning to care for our livestock and ranch chores, what would you suggest we do with our mornings? What reason do you give us to get out of bed? "We need the help of our government. Will we get that?"

Mr. Speaker, this is typical of hundreds, if not thousands of letters I have received from the people of Klamath Falls.

We, as the Sacramento Bee columnist Peter Schrag has eloquently noted, as the gentlewoman from California (Ms. PELOSI) indicated, all of our sincere pride in the work of that great man. As the Sacramento Bee editorialized so appropriately, Justice Mosk was "California's brightest beacon of liberty." While his life has ended, his legacy shines brightly for all Californians and for our great Nation.
not better, as people's frustration levels rise, not fall. They need our help, Mr. Speaker. They need help in us changing the Endangered Species Act. They need help financially; but most of all, they need the water they were promised so that next year they can plant the crops like they have for the past 85 years.

Mr. Speaker, I want to thank my colleagues in the Oregon congressional delegation, members of both parties, for working with me on this issue, for helping secure the $20 million. It is a start, but it is not the end. It must be distributed rapidly and not parcelled out over the months. We need to act.

It took an overnight to cut off the water; it cannot take months to get relief to these same people.

Mr. Speaker, these people who settled in this country and are invited there by this Federal Government with the promise of land and water if they would simply homestead the land and produce food for the country. People who were invited to this area were the very people who fought for our freedom in a far-off land. Veterans of America's Armed Forces were given priority. It is our turn now, Mr. Speaker, to step up and take care of those people.

PROBLEMS IN AMERICAN AGRICULTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. SMITH) is recognized for 5 minutes.

Mr. SMITH of Michigan. Mr. Speaker, today we passed an appropriations bill for agriculture. Let me first spend a second giving my impressions of the predicament that American agriculture is now facing.

On a level playing field, American agriculture could compete favorably with most any other country in the world on most any of the commodities that we produce. Part of the challenge in our Federal agricultural policy is the fact that other countries subsidize their farmers much more than we subsidize our farmers in this country. So, for example, Europe subsidizes five times as much as we do, and the consequences are that the additional production from those farmers and in those countries that are heavily subsidized often take what would otherwise be our markets to sell our particular agricultural products. Farmers today face some of the lowest commodity prices they have seen in the last 15, 20, 25 years, depending on the particular commodity.

So as we try to develop agricultural policy in the next several weeks for what is going to partially determine the economy and, in many cases, the survival or bankruptcy or going out of business of many farmers in the United States, we need to look at how we spend Federal taxpayer dollars to most effectively, number one, assure that the agricultural industry that we want to keep in America stays here and is able to survive; number two, that still be the marketplace and those individual farmers that are efficient and productive tend to have the kind of incomes that are going to allow them and their families to stay on that family farm operation.

One of the amendments I had today on the agricultural appropriations bill was an amendment that would put a payment limitation on farmers. We are now seeing a situation where our farm programs, our Federal farm policy, since we started it in 1934, has tended to favor the large farmers. The result is that those large farmers, with the additional advantage of Government payments, ended up trying to buy out the smaller farms and became even larger. If there is some merit in having a Federal agricultural policy that helps the traditional family farm survive without giving, then it is going to be a situation that gives an additional advantage to the huge, large farmer.

Some farmers in the loan program, the price support program for commodities that we have as part of our Federal farm policy, still continue to favor that large farmer. The average farm size in the United States is about 420 acres. To exceed the current limits in law of not more than $75,000 per farmer in this loan, minimum price protection policy that we have, we see a lot of farmers now that have gone way over the average of 420 acres. We have 20, 30, 40, 50, 60, 70, 80,000 acre farms.

Because we have no limit on the price support of those farmers, then some of these farms are taking in $1 million, or some of these farmers are taking in $1 million plus in farm payments.

As we face the predicament of trying to be as frugal and as well-managed as we can on the available resources in this country, we need to look at the kind of policy that does not continue to favor those large farmers, and putting a real limit on how much taxpayers should be paying to any farmer should be part of that consideration.

I am disappointed that my amendment today was ruled out of order, but it is an issue as we start developing new farm legislation that we have to deal with in terms of assuring not only that we have the kind of agricultural production in this country that is not going to put us in a security disadvantage, and I use the comparison of oil.

In concluding, Mr. Speaker, we are now dependent almost 40 percent on imported energy from petroleum products. We have seen the power of OPEC in raising their prices and making us pay the higher price.

That same thing could happen to agriculture, so the decisions we make in agricultural policy are extremely important. Favoring the traditional family farm and not favoring the huge farm corporations must be part of our agricultural agenda.

SMALL BUSINESS REFINERS' COMPLIANCE WITH THE HIGHWAY DIESEL FUEL SULFUR CONTROL REQUIREMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. HORN) is recognized for 5 minutes.

Mr. HORN. Mr. Speaker, at the beginning of this year, on January 18, 2001, the Environmental Protection Agency, EPA, implemented heavy-duty engine and vehicle standards and highway diesel fuel sulfur control requirements.

I strongly supported the final rule by the EPA as a necessary tool to reduce pollution. Under this new regulation, oil refiners must meet rigorous new standards to reduce the sulfur content of the highway diesel fuel from its current level of 500 parts per million to 15 parts per million by June, 2006. The diesel rule goes a long way in reducing the amount of pollution in our air.

Small business refiners produce a full slate of petroleum products, including everything from gasoline to diesel to jet fuel to asphalt, lube oil, and specialty petroleum products.

Today, among the 124 refineries operating in the United States, approximately 25 percent are small independent refineries. These small business refineries contribute to the Nation's energy supply by manufacturing specific products such as grade 80 aviation fuel, JP4 jet fuel, and off-road diesel fuel.

In order for oil refineries to comply with the new rule, the Environmental Protection Agency estimated capital costs at an average of $14 million per refinery. This is a relatively small cost for major multinational oil companies, but for smaller refineries this is a very high capital cost that is virtually impossible to undertake without substantial assistance.

Small business refineries presented information in support of this position to EPA during the rule-making process. In fact, EPA said that small business refiners would likely experience a significant and disproportionate financial hardship in reaching the objectives of the diesel fuel sulfur rule.

There is currently no provision that helps small business refiners meet the objectives of the rule. That is why I am introducing a tax incentive proposal that would provide the specific targeted assistance that small refiners need to achieve better air quality and provide complete compliance with EPA's rule.

A qualified small business refiner, defined as refiners with fewer than 1,500
employees and less than a total capacity of 155,000 barrels a day, will be eligible to receive Federal assistance of up to 35 percent of the costs necessary, through tax credits, to comply with the highway diesel fuel sulfur control requirements of the EPA.

Without such a provision, many small refiners will be unable to comply with the EPA rule and could be forced out of the market. Individually, each small refiner represents a small share of the national petroleum marketplace. Cumulatively, however, the impact is substantial. Small business refiners produce about 4 percent of the Nation's diesel fuel, and in some regions, provide over half.

Small business refiners also fill a critical national security function. For example, in 1998 and in 1999, small business refiners provided almost 20 percent of the jet fuel used by the U.S. military bases. Small business refiners' pricing competition pressures the larger integrated companies to lower prices for their products to the public. Without that competitive pressure, consumers will certainly pay higher prices for the same products.

Over the past decade, approximately 25 United States refiners have shut down. Without assistance in complying with the EPA rule, we may lose another 25 percent of U.S. refiners.

This legislation is critical, not because small business refiners do not want to comply with the EPA rule due to differences in environmental policy, but because it will help keep small business refiners as an integral part of the industry and on the way to cleaner production and full compliance with all environmental regulations.

SENATE MANAGED CARE LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GREEN) is recognized for 5 minutes.

Mr. GREEN of Texas. Mr. Speaker, I rise tonight to encourage our House leadership to bring the Patients' Bill of Rights to the floor as soon as possible, hopefully next week.

The Senate took historic steps before the July 4 recess to pass a bipartisan, meaningful Patients' Bill of Rights. The Dingell-Ganske compromise legislation includes strong patient protections that will ensure high quality health care for millions of Americans with private health insurance coverage.

These protections include:

- Access. Patients will be able to go directly to specialists. Women have the right to go to their OB-GYNs, and children directly to their pediatricians.
- Communication. The Senate bill eliminates gag clauses which prohibit doctors from discussing all the treatment options, even those not covered by the plan, with their patients.
- Emergency room care for patients who reasonably believe that they are suffering from an emergency medical condition and do not have to drive by an emergency hospital to go to the one that is on their list.
- Internal-external appeals, which ensures that patients have access to timely and appropriate health care.

And probably the most important is accountability if an HMO's denial or delay of treatment causes a person's injury or death.

Many critics of this legislation say it would result in an onslaught of frivolous and expensive litigation, but this compromise bill also included many provisions to prevent such lawsuits from taking place.

For example, the legislation requires patients to exhaust all their appeal procedures before they appeal their health plan. By requiring that patients utilize an independent review panel, the bill makes sure that medical decisions are made in the best interests of medical practice in a timely manner.

In my home state of Texas, we have been using independent review organizations, or IROs, as we call them, to resolve HMO's and patient coverage disputes since 1997. 4 years. These IROs are made up of experienced physicians who have the capability and the authority to resolve disputes for cases involving medical judgment.

These provisions have been successful not only because they protect patients, but also because they protect the insurers. Plans that comply with the independent review organization's decision cannot be held liable for punitive damages if they do go to court.

This plan has worked well. Since 1997, more than 1,000 patients and physicians have gone to IRO's decision. I would hope that our medical decisions have a better percentage than to flip a coin, so in 55 percent of the cases in Texas, either partially or totally the HMO was reversed by the independent review organization.

The Senate legislation protects employ-ers from unnecessary litigation.

Let me go back to the independent review organizations. Fifty-five percent of the time, these IROs found that there was something wrong with the HMO's decision. I would hope that our medical decisions have a better percentage than to flip a coin, so in 55 percent of the cases in Texas, either partially or totally the HMO was reversed by the independent review organization.

The bill goes so far because it protects employers against any liability unless they are directly participating in the decision on a claim for benefits which result in personal injury or death.

The bill specifically lists a number of areas that are not considered direct participation. In other words, as an employer, one could select the health plan, choose benefits to be covered under the plan, buy a Cadillac plan or a Chevrolet plan, and the employer would not be sued for that, or for advocating with the health plan on behalf of the beneficiary for coverage.

I know in my own experience as a small business, oftentimes my biggest problem was advocating for our employees with our health insurance plan to say it should be covered.

The only case where an employer would be liable would be if they choose to make medical decisions which harm or kill a patient. If the employer acts like a doctor, then the McCain-Kennedy bill hold them responsible like a doctor.

Mr. Speaker, I mentioned earlier, we have had many of these same provisions in Texas law now for 4 years. Yet, we have not seen a barrage of frivolous lawsuits, nor have insurance premiums risen at a faster rate than anywhere else in the Nation.

Mr. Speaker, the Dingell-Ganske bill brought to the House is very similar to the McCain-Kennedy bill, which is very similar to a law that we have had on the books in Texas for 4 years. It contains many of the same compromise provisions, which at the same time ensure that these protections can be enforced.

It is time that the House followed suit and passed a real, meaningful, strong, bipartisan Patients' Bill of Rights. I urge the leadership not to delay in bringing the Dingell-Ganske bill to the floor for a vote.

Ms. WATSON of California. Mr. Speaker, I ask unanimous consent that the钉ell-Ganske bill be considered by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

THE LEGACY OF CALIFORNIA STATE SUPREME COURT JUSTICE STANLEY MOSK

Ms. WATSON of California. Mr. Speaker, today I stand before this august body to pay tribute to a superb colleague, friend, and fighter for justice, the late Honorable California State Supreme Court Justice Stanley Mosk.

As a State Supreme Court Justice, Stanley Mosk fought repeatedly for civil rights and individual liberties. He constantly strove for fairness for all Californians. Judge Mosk did not view his judicial task as a job, but as a mission for humanity. Judge Mosk understood the pain of racism.
It was during his election to statewide office that his faith was made an issue. Judge Mosk, as a Los Angeles Superior Court judge, threw out a racially restrictive covenant that prevented a black family from moving into a white neighborhood. A year later, the U.S. Supreme Court voided such covenants.

It was Judge Mosk’s ability to relate to the pain caused by racism that allowed him to approach legal decisions with a touch of humanity and fairness.

Even before his career as a judge, Mosk had the ability to tell the difference between right and wrong. As a State Attorney General in the late 1950s and early 1960s, he established the office’s civil rights division, and helped to persuade the Professional Golfer’s Association to drop its whites-only clause.

Judge Mosk, a longtime Democrat and self-described liberal, was appointed to the State’s highest court in 1964 and served until his death, a 37-year tenure that made him the State’s longest-serving Justice. During that time, he wrote 1,500 opinions.

Judge Mosk often produced opinions separate from the court majority. He opposed the death penalty, but also showed flexibility and a knack for anticipating political currents. His decisions continued to reflect his quest for fairness and the desire to correct existing wrongs.

In 1972, Judge Mosk’s ruling extended to private developers a law requiring a study of each major project’s likely environmental impact and ways to avoid the harm.

In 1978, Judge Mosk ruled to ban racial discrimination in jury selections. He rendered this decision 8 years before the U.S. Supreme Court made the same decision. In light of his judicial decisions and opinions, Judge Stanley Mosk remained a champion for fairness and humanitarian values.

Today, I am honored as a Californian and as a former State Senator to pay homage to the career and the legacy of this great man.

Ms. WATERS. Mr. Speaker, I speak today to honor Justice Stanley Mosk, who died last month after serving 37 years on the California Supreme Court. He was California’s longest serving Justice, a highly respected, even revered judge who delivered almost 1,700 opinions in his remarkable career. He was repeatedly honored for his contributions to the caliber of our judiciary and the quality of justice meted out by our courts in California. He was a distinguished lawyer, a renowned author and an outstanding jurist.

I have had the honor of knowing Justice Mosk and his family for many years and he was a model of the kind of person who has had a profound influence on my political life. He was a tremendously impressive individual who embodied a unique combination of political savvy and legal scholarship with an abiding commitment to justice.

From 1931 to 1942 he served as executive secretary and legal adviser to the Governor of California, and for the 16 years from 1943 to 1959 he was a judge of the Superior Court in Los Angeles. After serving in the Coast Guard Temporary Reserve during the early days of World War II, Judge Mosk left the Superior Court bench and enlisted in the army as a private. He served until the end of the war and then returned to the court.

In 1958, Mosk was elected Attorney General of California with more than a million votes, the largest majority of any contest in America that year. He was overwhelmingly re-elected in 1962.

He was the first person of the Jewish faith to be elected to a statewide office after a campaign in which his religion was made an issue, but he never let religious prejudice dampen his desire to help the poor and those who have been disenfranchised. Mosk believed passionately that the courtroom should be a source of justice for all, not just for the wealthy and powerful.

In 1978, Justice Mosk again led the U.S. Supreme Court in ground-breaking decisions. In that year, he ruled in favor of a racial discrimination claim. The U.S. Supreme Court waited eight years before making the same ruling.

Justice Mosk promoted civil rights from an early stage in his career. While serving as the California State Attorney General in the late 1950s and early 1960s, Justice Mosk established the office’s civil rights division. He also successfully fought against the Professional Golf Association’s bylaws that denied access to minority golfers. Justice Mosk went further than that—actually contacting each state’s attorney general on this matter, to ensure that no state would provide the PGA with a place to hide.

Charlie Sifford, the African-American golfer whose cause Justice Mosk took up, sent a note to the Mosk family after hearing of Justice Mosk’s death. He wrote, “Justice Mosk worked to improve voting rights long before the disasters that occurred in last year’s election. He fought successfully for Latino voting rights in the 1960 election in Imperial Valley. He did what we should do in our present day elections—he sent agents down to the town to be sure that the voters weren’t being intimidated.

Justice Mosk was also an extremely productive judge, producing nearly 1700 rulings during his tenure on the California State Supreme Court.

The State of California has lost not only a great justice and strong advocate, but a true legacy. His presence will be missed by those who worked with him, and his absence will be felt by those on whose behalf he worked.

Ms. MILLENDER-MCDONALD. Mr. Speaker, I wish to pay tribute to a renowned man who has had a tremendous impact on our country. “Libertas per Justitiam”—Liberty through Justice, was a phrase that Justice Mosk had sewn into the collar of his judicial robes. It is a fitting inscription for a man who embodied the phrase. He came to the bench, one of the few special people who had a profound influence on my political life. He was a tremendously impressive individual who embodied a unique combination of political savvy and legal scholarship with an abiding commitment to justice.

From 1931 to 1942 he served as executive secretary and legal adviser to the Governor of California, and for the 16 years from 1943 to 1959 he was a judge of the Superior Court in Los Angeles. After serving in the Coast Guard Temporary Reserve during the early days of World War II, Judge Mosk left the Superior Court bench and enlisted in the army as a private. He served until the end of the war and then returned to the court.

In 1958, Mosk was elected Attorney General of California with more than a million votes, the largest majority of any contest in America that year. He was overwhelmingly re-elected in 1962.

He was the first person of the Jewish faith to be elected to a statewide office after a campaign in which his religion was made an issue, but he never let religious prejudice dampen his desire to help the poor and those who have been disenfranchised. Mosk believed passionately that the courtroom should be a source of justice for all, not just for the wealthy and powerful.
COUNTRY-OF-ORIGIN LABELING FOR FARM-RAISED FISH

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Arkansas (Mr. ROSS) is recognized for 5 minutes.

Mr. ROSS. Mr. Speaker, the farmed catfish industry is an important part of the economy in my congressional district that covers the southern third of Arkansas. In fact, Arkansas is third in catfish sales in the Nation, behind only Mississippi and Alabama, with nearly $66 million, or 13 percent, of the total U.S. sales.

I recently met with catfish farmers in southeast Arkansas, and I can tell my colleagues that catfish producers in my district are upset that so-called catfish are being dumped into our markets from Vietnam and sold as farm-raised catfish. The truth is that it is not farm raised, and I am not even sure it is catfish. Last year, imports of Vietnamese catfish totaled 7 million pounds, more than triple the 2 million pounds imported in 1999 and more than 12 times the 575,000 pounds imported in 1998.

In Vietnam, these so-called catfish, also known as basa, can be produced at a much lower cost, due to cheap labor and less stringent environmental regulations. In fact, many of these fish are grown in floating cages in the Mekong River, exposing the fish to pollutants and other conditions. They are then dumped into American markets and often marketed as farm-raised catfish. Many catfish producers believe that these imports have taken away as much as 10 percent of our markets here at home.

It is really quite simple. Farmers do not mind competition, but they do mind when the competition is unfair and untruthful. This is why today my colleagues, including the gentleman from Arkansas (Mr. BERRY), the gentleman from Mississippi (Mr. SHOWS), and the gentleman from Mississippi (Mr. PICKERING) introduced, along with me, a bipartisan bill, H.R. 2439, the Ross-Berry-Pickering bill, that would amend the Agricultural Marketing Act of 1946 to require retailers to inform consumers of the country of origin of the fish that they sell.

Under the bill, all fish would be covered. Each retailer would be required to notify the consumer at the final point of sale of the country of origin of the fish. The fish could only be designated as being from the United States if it is from a farm-raised fish that is exclusively born, raised, and processed in the United States.

When our consumers go into the store to buy their fish, they deserve to know what they are getting is actually farm raised and catfish. By letting consumers know where the product is coming from, this bill will encourage the people in Arkansas and all across America to buy catfish grown by our farm families, not fish grown in a polluted river in another country.

I urge my colleagues to join me in protecting consumers and to support a level playing field for America’s farm-raised fish producers by supporting this measure.

TRIBUTE TO THE LATE JUDGE STANLEY MOSK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. WAXMAN) is recognized for 5 minutes.

Mr. WAXMAN. Mr. Speaker, I am pleased to join my California congressional colleagues in honoring the memory of Justice Stanley Mosk and the great legacy he left the people of California and our Nation.

Justice Mosk was in public service for sixty years. He was a trial judge on the Superior Court of Los Angeles. He served as the Attorney General for the State of California. He was the longest serving member in California State’s Supreme Court 151-year history. He served on the court for 37 years under five chief justices until his death on June 19, 2001 at the age of 88.

My colleagues who have preceded me have spoken very eloquently about Judge Mosk’s contributions to our Nation. I want to take a moment to speak of Justice Mosk’s personal influence on me as a Jewish American. Today, we take for granted that individuals of different racial and ethnic ancestry serve in public office. Last year, when Senator Joe Lieberman ran on the national ticket for vice president, he was the first Jewish American to do so, but his religious and ethnic background did not cause a strong reaction in most Americans. He was judged as an individual on his abilities, his political beliefs, and his record.

In the late 1970’s, Stanley Mosk was the first Jewish American to run for statewide office in California, and his candidacy caused some concern and trepidation in the Jewish community. American Jews were very active in politics, and they made great public service contributions, but there was enormous hesitancy in running for public office and assuming such a visible a position. Today, those of us who are Jewish and from California feel an enormous amount of pride in Justice Mosk because he was one of the premier constitutional lawyers in our Nation and he met the highest standards for public officials.

As a trailblazer in the Jewish community, Stanley Mosk never forgot that he helped pave the way for Jews and other minority Americans who faced professional and social hurdles. He was an unflagging champion of civil rights and individual liberties. He was also a shining inspiration to all of us who followed. When I ran for a seat in the House of Representatives more than twenty-five years ago, I was the first Jewish American from Southern California to be elected to Congress, and the first in the State in forty years. It is a tribute to our Nation that Jewish Americans today represent not only districts with large Jewish populations, but those with small Jewish constituencies as well.

Stanley Mosk was mentor to a whole generation of Jewish activists. He will be affectionately remembered and sorely missed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would remind Members not to refer to individual Senators.

AMERICA’S ENERGY POLICY

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, the gentleman from Oregon (Mr. DeFAZIO) is recognized for 60 minutes as the designee of the minority leader.

Mr. DeFAZIO. Mr. Speaker, this evening I rise, hopefully to be joined by others, to discuss the energy situation in the United States of America. It was James Watt, when President Bush unveiled the national energy policy, so eloquently in this blue book, who said, “Well, they just took out my work of 20 years ago.” This is James Watt, mind you, not exactly an enlightened individual when it comes to present-
day energy policy. He said, "They just dusted off my work of 20 years ago. It is really good in search of a 20-year-old energy policy for the 21st century?"

Well, after I read through it, upon hearing Mr. Watt's comments, I would observe it a little differently. I would say this is not James Watt's energy policy of 1980, this is actually our father's energy policy. It is much more 1960s energy policy. It is Dick Cheney's energy policy, and it reflects a bygone era of limitless frontiers, dig, drill, and burn. It is not and does not offer America a new sustainable and more affordable energy path to the next century.

So we will be talking about that a bit tonight, about electricity, electric deregulation, and other subjects. But before I go there, I would like to recognize the gentleman from Oregon (Mr. DeFazio) mentioned, just that. In fact, as the gentleman on the energy committee in the Department of the Interior and Environmental Conservation in search of a sensible energy policy to craft a more responsible policy. By leveling the playing field for renewables and efficiency measures, we can and must ensure that our national security becomes more safe and secure through diverse energy sources.

Mr. DeFAZIO. Mr. Speaker, I thank the gentlewoman from California for including me in this special order tonight from Oregon (Mr. DeFazio) mentioned, just that. In fact, as the gentleman committee on Energy of the Department of the Interior and Environmental Conservation in search of a sensible energy policy to craft a more responsible policy. By leveling the playing field for renewables and efficiency measures, we can and must ensure that our national security becomes more safe and secure through diverse energy sources.

Mr. Speaker, it is important that we look toward the future and not toward the past for the energy supply for the United States of America. We can both have energy sources that are more gentle on the environment and deal with the problem of global warming, and are more stable and more affordable for the people of our Nation so we will no longer be held hostage to OPEC and other cartels around the world who basically blackmail us from time to time in jacking up the price of oil and exporting from American consumers.

I think her legislation is a very, very important addition to getting something that looks forward instead of back, and I thank the gentlewoman for her contribution.

Mr. Speaker, today we had Secretary Norton come before the Committee on Resources to update us on where they are on the President's national energy policy. In reading her testimony, I was interested to see that she said despite the statements of Vice President Cheney of about 6 weeks ago where he said conservation and renewables, that might be a personal virtue, but it is nothing for a national energy policy to be based upon.

Despite the fact that over the last 20 years this Nation has gained 4 times as much energy from efforts in conservation and renewables than from new energy development based on fossil fuels, nuclear and other traditional sources, 4 times as much, the Vice President says that might be a personal virtue, but we cannot base policy on it.

Mr. Speaker, there seems to have been a backlash, and the administration seems to be very quickly backpedalling on the very, the very, the very early statements of Vice President Cheney. In fact, today Secretary Norton said, remember, the President's energy policy, this blue book written by Vice President Cheney, 50 percent of that is based on conservation renewables and other sustainable energy sources. I said, Madam Secretary, that is an extraordinary statement. I said, tell me, 50 percent of what in this book, 50 percent of the projected new energy supply? When I look in the back, I see that they are projecting 28 percent of our energy over the next 50 years might come from sustainable renewable sources and conservation, so it was not 50 percent of the new energy. They are projecting 93.2 percent will come from conventional fossil fuels and nuclear power. I said, I am a bit puzzled. Is it 50 percent of the investment? I said, I remember the President's budget dramatically slashed investment in conservation renewables and sustainable energy sources, things that could make the United States of America energy-independent.

She said it is 50 percent of the words in this proposal were on conservation, technologies, like fossil fuels, coal, and nuclear. Increasing our reliance on 20th century technology is not in the best interest of the 21st century, and it is certainly not an answer to our energy future. Instead, with the energy challenges we are experiencing across the country, it is more important than ever that we take this opportunity to craft a more responsible policy. By leveling the playing field for renewables and efficiency measures, we can and must ensure that our national security becomes more safe and secure through diverse energy sources.

Mr. Speaker, I thank the gentlewoman from Oregon for including me in this special order.

[45x207]CONGRESSIONAL RECORD—HOUSE July 11, 2001
Mr. Speaker, there are so many subjects to be covered in this area, this is just sort of a beginning. I see the gentleman from Oregon (Mr. BLUMENAUER) has joined me, and I wonder if he might like to address some of these subjects.

Mr. BLUMENAUER. Mr. Speaker, I thank the gentleman for yielding.

I do appreciate our taking the time to address with the professional detail the other side of some of these questions because it is indeed complex. It is indeed important.

As the gentleman pointed out, there are a wide range of interests that are coalitional in nature. We have a lot. Conservatives, liberals, people from the East and the West, even some of our friends from California step back, and they are looking at what has been advanced by the administration with skepticism and in some cases wonder.

I personally just returned from the Arctic Wildlife Refuge. It is an area that I have not visited before and I have heard people on the floor make some assertions. I wanted to take the time to see for myself, to put in context the reports that we are given, the information that comes forward. I must say that I do not pretend to be an expert based on this trip, the hiking, the camping, exploring the wilderness, flying over some of the vast stretches, talking to Alaskans of a variety of different perspectives, including spending time in the Prudhoe Bay area with representatives of the petroleum industry.

Mr. Speaker, I must say having visited some of the BP operations, having Fourth of July in the snow, roasting hot dogs as part of their Fourth of July celebration on a man-made island on the Arctic Ocean, I came away impressed with the professionalism, dedication of the men and women working in the industry. But I also came away struck with the rather wide range of the area that is already available for oil exploration, the billions of cubic feet of natural gas that are being pumped down back into the ground that are available for energy purposes, and, if the circumstances and costs are right, that would be available to us.

I was struck by the magnitude of the Alaska pipeline, which is now 25 years old. I have a certain personal relationship to this. My father worked on the pipeline until the day he died. I had some input from him about the challenges based on his experiences there. But it is aging.

Just yesterday we saw in the Wall Street Journal a front-page article that the State of Alaska, covering the inspections of people in this for this vast infrastructure which pumps more oil in 3 days than is pumped from the entire State of Indiana in a year, and it has approximately one-half the inspectors, only five people inspecting this vast infrastructure which is aging and subjected, despite the professionalism and dedication of the employees and, I think, the good intentions of the industry, I take it at face value, but there is not much that inspires my confidence when I think of the volume of it. Then when I consider what was there in the Arctic Wildlife Refuge, this amazing vista, the tussock grass, the 10,20,30 years old, that are only inches high and thinking about what would happen if there were problems there. I came away with a profound sense that the American public is right. The Arctic Wildlife Refuge is absolutely the last place we should be exploring for oil, not the first.

CONGRESSIONAL RECORD—HOUSE 13029

The gentleman referenced the much-debated comment from our Vice President dismissing the notion that conservation may be a virtue, but it should not be the basis for a rational national energy policy. I think the American public, and I certainly agree, conclude that he has it 180 percent wrong. You cannot have a rational national energy policy without beginning with the notion of conservation and wiser use of our energy resources. And it does not have to drive the American public back to the Stone Age. Our friends in Japan have been able to manufacture a hybrid vehicle that will get 60, 70 miles per gallon. There is a 6-month waiting list for American consumers. Yet the American Government in the 5 years I have been in Congress, we have been prohibited from even studying extending the vehicle miles for the CAFE standards and having more efficient automobiles.

It has been represented to me that there is approximately one-1/2 the abysmal mileage that they get now and the potential for bringing it up to the overall fleet average would be the difference for the typical SUV, the gap
here is the equivalent of leaving your refrigerator running with the door open for 6 years. This is not technology that is beyond us.

We hear people making rash claims that we have to have the administration’s proposal of building a power plant a week and the attendant economic cost, and they will throw out arguments like, Well, we haven’t had a nuclear plant licensed in this country in 20 years. Well, they are right, we have not had a nuclear plant licensed in this country in 20 years, but what they do not tell you is that we have not had an application for licensing in more than 20 years. Industry has recognized that it is not a good investment. And for the administration to put forward half-representations, arguing for the proposal, I think is going to mean a plant a week and ignore simple, commonsense steps to improve energy conservation, I think completely misses the target.

Again, the last things and I will turn this back to the gentleman. I know that there are others that wish to join the gentleman from Oregon (Mr. DeFazio), and the last thing I want to do is disrupt his train of thought too much. As dean of the Oregon delegation, I have too much respect for his rhetorical and intellectual capacity to do that, but if he will permit me to make two other observations.

Number one, it seems to me that we can take steps, and we may hear from some of our friends in California who have had some energy difficulties which they are working their way through, we may be hearing about that this evening, but the simple, expedient step of having roof colors, and you do not have to put money in the way to have a green roof, but just having a reflective color, can cut the energy requirements for air conditioning one-third. Having concrete instead of asphalt can lower the temperatures of our cities 2 degrees, the heat island effect that we are seeing in major metropolitan areas.

I appreciate the opportunity to join the gentleman this evening. I appreciate his leadership and look forward to further discussion.

Mr. DeFazio. Just taking up what the gentleman was talking about, tax credits for Americans, for consumers, to help them meet their needs at home or at work or purchase more energy-efficient transportation, to create a market for that and help our people, that unfortunately did not make the cut in the blue book here. But what did make the cut, for instance, is royalty relief. For those poor suffering oil companies, we have got to have some royalty relief. I am certain that they too will pass those lowered costs on to the consumers. The estimate is that the Bush energy plan would lower royalties by $7.4 billion over 2 years. That is money that should flow to the Federal Treasury and go back to the American citizens of the United States of America because of the extraction in our coastal areas and inland areas of oil and gas, would be reduced by $7.4 billion under the proposal of the Bush administration.

Now, of course, these are the same companies that just last year entered into a plea bargain in a criminal case for defrauding the taxpayers of royalty revenues and entering into an unprecedented $443 million civil settlement with the Justice Department. But, of course, that was the Clinton Justice Department, and I do not think the Bush Justice Department is going to be pursuing too many defrauded American taxpayers’ royalty claims. In fact, no, they are going about it: Hey, let’s just forgive the royalties altogether. This is the basis for an energy policy.

Certainly we do not need to forgive the royalties to get these people to explore or pump oil. Let us look at the profits. Last year, ExxonMobil profits, $15.9 billion, a 1-year, 102 percent increase. Chevron, $5.1 billion, a 150 percent, 1-year increase. Texaco, $2.5 billion, 116 percent, 1 year. Conoco, $1.9 billion, 155 percent. Phillips Petroleum even being on the down list. These people need relief? They need encouragement from the taxpayers? They need subsidies from the taxpayers to explore for oil and gas? I do not think so. In fact they should be giving money back to the taxpayers because they are fleecing the taxpayers to show those sorts of profit increases in one year.

So the gentleman is exactly right with his orientation of where we should be investing or forgiving revenue for the Federal Government, should be oriented toward small businesses and consumers and others who want to invest in energy-efficient measures, not those who want to go out and extract yet more oil and gas from sensitive areas in our coastal plain, our national monuments and elsewhere.

From there, I believe we would be well served to get into the area of electricity. Most recently in the western U.S., the most extraordinary manifestation of an energy crisis that we have seen has been the rolling blackouts and brownouts in California, the fact that the total electricity energy bill in California went from $7 billion 2 years ago to $27 billion last year and is projected to go to over $50 billion this year. The fact that we have found out that even in the Pacific Northwest, we are paying higher average wholesale prices but thankfully thus far have been buffered by our Bonneville Power Administration and our own energy insular with our blackouts.

Now, the question would be, Is this a justified increase? Is this such a short-term and such a precious commodity that you can justify increases of up to, well, if you went from $30 an hour average megawatt 2 years ago to the high price that has been charged up over $3,000 a megawatt, a 1,000 percent increase in 1 year in the price, there is a real question. There is no one who is more expert on that than the gentleman from San Diego, who comes from ground zero in terms of the electricity energy crisis, market manipulation and price gouging in the western United States. I yield to the gentleman to educate us a bit on what has been going on down in his district.

Mr. Filner. I thank the gentleman from Oregon for yielding, and I thank him for his leadership. I recall over the last few years the gentleman from Oregon talking about the problems with deregulation. Very few of our colleagues listened. But now we are witnessing them, and he was right. And California has been the greatest example of that. He mentioned rolling blackouts. He mentioned manipulated markets.

Let me tell you what happened one day in January of this year. We suffered several hours of rolling blackouts in San Diego. That had, just a few hours, a tremendous impact. Companies in production lost millions of dollars worth of production. People who could not deal with the traffic lights off, we had near fatal accidents. People stuck in elevators. The largest company sending people home and not getting a paycheck. At that time, at a time of the rolling blackout, with all these disruptions, the biggest generator in San Diego County was not in operation. It was shut down, not due to any maintenance; it was just taken out of service.

Now, we have examples of that all through the last year where production...
was down, not for maintenance, not for any environmental reason but to bolster the price, because in a controlled marketplace, you can withhold supplies or can increase the price. What occurred in San Diego at what we call the South Bay Power Plant in my district operated by the Duke Energy Corporation, they took generators out of service, not only during the blackout but many times during the year.

We just recently had five former employees of that plant who worked there for a total of 100 years. These are not newcomers. They know what is going on in that plant. They testified under oath to a State Senate committee that not only were these generators down not because there was any real lack of need for them, we were in a rolling blackout, but purely related to the price. DEFAZIO: be gotten or withheld because of an attempt to raise the price. They testified that the generator floor was in constant contact with the marketing floor of the corporation. And they ramped up and down their production according to the price, not according to the need. They testified that they were asked to throw away spare parts, so it would take longer in any maintenance situation.

That leads me to believe that this is not primarily a supply and demand problem, although we have tight supplies and the Governor of California is doing everything he can to increase those supplies; but this was a crisis of a manipulated market brought on by deregulation which the gentleman from Oregon foreseen.

Mr. DEFAZIO. I think the key point and one of my principal objections to deregulation was that it severed the relationship between a utility and the consumer. Historically in this country, whether we have tight supply recently with deregulation, utilities had a duty to serve. Their highest duty was to keep the lights on. They maintained a buffer over and above their demand or their anticipated demand. They were required to do that. They were required except in times of catastrophe, provide as nearly as possible 100 percent reliability.

Mr. FILNER. And they made a healthy profit doing that.

Mr. DEFAZIO. That is correct. They certainly did. They always were favored by investors. They had no problem raising money. It was an industry that was known as a good place to put your money for a reliable and very healthy rate of return.

Now, what happened as the gentleman just pointed out with Duke and with all the others, they are an exception, is that they no longer had under deregulation a duty to serve their customers. Their only duty is to serve their stockholders and the people on Wall Street. If they can make more money by blacking you out, shutting you down, closing other businesses for lack of power, it is their duty, their fiduciary responsibility as their board of directors sees it to do that. That is why they tied their floor traders to the plant operators, [2015]

It is absolutely outrageous to think that that is what the system has come to.

Mr. FILNER. They made almost a billion dollars doing that in the course of the year. By the way, just to emphasize the gentleman’s point of the cut in relationship to the community, the five employees I mentioned lived in our area, were community members, paid taxes, had their kids go to school. They were let go. Apparently, Duke did not want people tied to the community working in their own plant.

There is insult to injury. I would say to the gentleman from Oregon (Mr. DEFAZIO) that in this case I just told him about, the plant was being ramped up and down for profit, which stole a billion dollars out of our economy, is a public plant. Under the law, the San Diego Unified Port District bought that plant and leased it to Duke and leased it for very, very, let us say, favorable terms. The terms under which they leased the plant they thought they would recoup their investment in 5, 7 years. They got it back in 3 months. That shows what the prices were that they charged.

They leased this plant from the public so they are stealing from the people who own this plant. They have violated the lease terms that they were under. They were supposed to operate that plant in a prudent manner. It is a prima facie case that they had not and these employees testified that they had not.

I think the Port District, a public agency in San Diego, ought to break the lease, take back the plant, operate it in the public interest. They produce power there for three or four cents a kilowatt. As the gentleman pointed out earlier, a thousand percent increase in the price they were charging us up to $10.00 a kilowatt. So here we have the most obscene price gouging.

Duke, by the way, was the one that thought they would recoup their investment in 5, 7 years. They got it back in 3 months. That shows what the prices were that they charged.

Duke, by the way, was the one that charged that $1,000 a megawatt, or $4.00 a kilowatt, hour and they did it out of a public plant. I think San Diegans understand that they have been gouged and they are ready, in fact, to embark with a municipal utility district, to take over plant such as the one I mentioned, the South Bay Power Plant, and begin to get out of the control of this energy cartel.

Let me just conclude this part by saying, the gentleman made the point earlier about how we need renewables.

He made the point earlier about how we need conservation. Everybody in California, as I am sure in Oregon, is tried of this thing. They want something that works. Only the Federal Government can deal with the wholesale prices. Only the Federal Government can regulate that. Our President has chosen not to be involved. Our vice president has refused to listen. The Federal Energy Regulatory Commission has taken some baby steps in this direction, but the Congress should impose what is called cost-based rates on wholesale electricity prices and refund all the criminal overcharges since last summer. When this started. Then we can begin to talk about a national energy policy, and as the gentleman pointed out, the President’s plans say nothing about this area.

Mr. DEFAZIO. Unfortunately, the President’s plans do say something about this, but it says what we should do is spread retail deregulation nationwide. We are going to take the model of California and we are going to impose that on the rest of the States of the United States of America.

Now, if there was some place we could turn to and say, well, look, look how great deregulation has worked, well, first off the model was Great Britain. They are still trying to fix the problems they created with deregulation. Their prices are 70 percent higher than the average in the United States. They suffer a much higher percentage of blackouts, brownouts. They have extraordinary complaints about service. That is the model on which the 1992 deregulation was written.

Maybe we have done better in the States. Let us turn to some of the pioneers in the United States. Montana in my region, they have an industry, which was deregulated, as were the rates in Montana, go up by 1,000 percent because Pennsylvania Power and Light bought all of the generation in Montana, which is a State that can produce 150 percent of its needs and they can make more money by exporting that power, some of it to the gentleman, and charging extraordinary prices for it. So that has not worked out real well in Montana.

Rhode Island, another pioneer, prices are up 60 percent. The list goes on and on and on. Everywhere that we have seen energy deregulation, with the promise of competition, lower prices, better service, we have seen higher prices, worse service and now rolling blackouts and brownouts.

What is the answer? I have never had an Oregonian come up to me and say, Congressman, I am tired of this utility that provides me electricity day in and day out at a reasonable price; I want a chance to choose my energy provider. Not those phone calls at 5:00 at night from AT&T and MCI and all the others, offering me stuff that I cannot quite fathom and does not ever really seem to work out
quite the way they promised it but every once in awhile they send me a $15 check. If I change from one to the other, now, he has come to me and said I want to impose that system on my electricity. I want to guess whether my electricity, my lights, are going to be on or off, what my bill is going to be. No, they do not want that. Americans want reliable, affordable electricity and they are not getting it under this system.

Now some people are doing very well. We have mentioned a few. The gentleman mentioned Duke Energy. Their profits were $1.8 billion last year. That is a 100 percent 1-year increase. That was before they got into this really overt manipulation described by the employees to drive the prices even higher. So we can expect that they will do even more of that next year.

El Paso Natural Gas, of course, is now under investigation for having withheld gas from the pipeline. Somehow gas provided in Texas shipped to California, which is a little cheaper to New York City, was sold at four times the price in California than it was sold in New York City and somehow they did not use a very significant portion of the pipeline capacity, which contributed to the run-up in the price. They had a $2.2 billion profit, a 361 percent 1-year increase. Not bad, and of course, they share the wealth. Now do they share it with the consumers? Well, no, not exactly. But they do share the wealth.

A number of these companies have very generously shared the wealth with their CEOs. For instance, with Enron, who I mentioned earlier, who had a $979 million, nearly a billion in profits last year, the CEO netted $123 million all by himself. Some of that money was from the company created, both hurting other stockholders and obviously money extracted from a whole lot of consumers and obviously which the company created, both hurt consumers. He only got $40 million in 1999 and ten times what he got in 1998.

Mr. FILNER. It works.

Mr. DeFAZIO. Deregulation is working for a few individuals.

Mr. FILNER. When I hear those figures, I wonder how these people sleep at night. I can again look at my own district where we have been experiencing these prices for a few years now. We have scores of small businesses just had to close up. I mean, we have had people in my office in tears that their family businesses that have been in their family for 40, 50, 60 years, they could not sustain electricity cost increases of first 100 and then 200 percent. There was no way. In fact, 65 percent of small businesses in San Diego County, by a recent Chamber of Commerce report, face bankruptcy this year with these prices continue, 65 percent of small businesses.

Now, if this were an earthquake or a hurricane or a tornado, the Feds would be in there instantly and offering loans and helpful economic incentives. This is worse than 10 or 20 earthquakes and the Federal Government has not been able to do much about it. Either it was the Clinton administration or the Bush administration, the Federal Government chose not to help out. These are incredible human problems. It is not just statistics. When the person on a fixed income whether they be older or younger, who is faced with a doubling or tripling of his or her utility bills and they have to chose now not between just food and medicine but between food, medicine and a comfortable sleep with air conditioning, this is ridiculous. This is tragic. This is criminal, in my opinion. We have not acted. We have not even had a debate on the House floor about any of the legislation that we have proposed to try to deal with this. The leadership of this House has chosen not even to bring up anything.

We have what is called a discharge petition. That is a mechanism that if a majority of the Members of this body want to discuss a bill, whether the leadership does or not, we can have to go to those lengths to try to get a discussion of a situation which can still destroy the economy of the western States. I do not understand it. I have been struggling to have my constituents' voices heard in Washington, but there seems to be a deaf ear to our complaints.

When I listen to the recital of the kind of income that the CEOs have made, I just get madder and madder. Those people ought to be in jail, not receiving these kinds of checks. Mr. DeFAZIO. If the gentleman would yield back, we have not had yet the extraordinary impact that the gentleman has felt in San Diego but it is coming. We are facing a 47 percent rate increase this winter with the Bonnevile Power Administration because we are having a drought. That normally would not be a big problem because we normally would turn to our neighbors in California and say, look, wintertime, you have a lot of excess capacity, we would like to buy some electricity from you for the winter. We have traditionally done that. In the summertime, during the gentleman's high demand season, we have sold to him. We cannot sell to him this year because of the drought, but we would buy from the gentleman next winter and hopefully it will snow and rain next winter and we will be back into that normal equilibrium.

Confronted with these kinds of markets, our Bonnevile Power Administration has to go to extraordinary lengths to shed load for the coming winter, closing down the aluminum industry, getting all the other utilities to get their business to reduce their consumption by a minimum of 10 percent, and still we are going to see this 47 percent increased increase because they are going to have to buy some power in this outrageously priced wholesale market. In anticipation of that, some of our utilities have already raised rates in little tiny municipal utility in Drain, Oregon, raised rates this winter. When I had a town meeting there back in April I had a kid come in from the school and say, do you know that last year we asked if we could bring blankets to school to wrap ourselves during class because it was so cold in the schools? She says it was so cold in the school, they could not afford the heat, she says that the pipes burst during a cold spell and we are sitting there wrapped in blankets. Yet, Ken Lay at Enron gave himself $123 million bonus. Some of that money came from the kids' parents in Drain, Oregon. A lot of that money came from the small businesses in San Diego, California.

Now this same gentleman is one of the principal authors of the national energy policy. When Vice President Cheney was asked to name who he met, had I met with Vice President Cheney when I developed this document, lots of people, they said, well, name some. He said, well, they said, Ken Lay of Enron? And they said, was that the only person? He said, no, I met with lots of people, but he will not tell us who the other lotuses are.

He did admit that he met with Ken Lay of Enron, the same Ken Lay of Enron who called the chair of the Federal Energy Regulatory Commission, who is no friend of consumers, Mr. Hebert of Louisiana, who has refused to act to rein in prices, but he even called him to say that what he was doing was not enough for his company as chair of the Federal Energy Regulatory Commission and if he would do what Mr. Lay wanted, well, then they might be able to assure him that he could continue to be chairman.

Mr. Hebert, again no friend of consumers, was outraged. He went to the press about this and said I cannot believe that this gentleman called me.

Well, this is who is writing the energy policy of this country.

Mr. FILNER. Some of our colleagues do watch us as we make these statements and talk about the situation in the West, and they say stop your whining. It is your own damn fault. If you did not have these environmental whackos in California and Oregon who stopped the building of power plants, you would not be in this situation.

Now I would like to hear what the gentleman says to them, but I say that is the ridiculous argument. Number one, I felt, not because of what was the growth in the West that chose not to build power plants because they already had calculated that they had a surplus. They miscalculated that, but that was a decision made in their economic interest, they thought, not because of any environmental regulations.

I am going to soon announce in San Diego the building of a new power
July 11, 2001

CONGRESSIONAL RECORD—HOUSE

13033

Mr. DEFAZIO. Mr. Filner. I think this administration has a faith-based energy policy. They not only pray for us to do something, they pray to the market where there is no market.

Mr. DEFAZIO. Well, that is exactly what we are doing. We are trying to get a national system to protect the environment, to make us a sustainable and responsible nation, to ensure our future and to ensure the future of the energy industry, which not only has fixed the prices, but has foreclosed on the ability to fix the prices, to allow the incredible surplus of energy coming from the sun, that could replace the fossil fuels from the OPEC cartel.

The Reagan Administration said that research and development should be done in the private sector and that the government should not be involved. Mr. DeFazio, if the gentleman will remember back 20 years, back in 1980 the United States of America through our labs, Federal labs in Golden, Colorado, was the world leader in photovoltaics, an endless source of energy coming from the sun, that could replace the fossil fuels. The Reagan Administration refused to allow that to occur.

So this Congress ought to be looking at the future of the energy industry, which not only has fixed the prices, but has foreclosed or attempted to foreclose on the ability to do research and development and have refused to allow that to occur.

This Congress ought to be looking not only at, as the President, new production and et cetera of the fossil fuels, but the structure, the economic structure of the energy industry, which not only has fixed the prices, but has foreclosed or attempted to foreclose part of our future by not allowing the research and development that we so desperately need in these other areas.

Mr. DeFazio. If the gentleman will remember back 20 years, back in 1980 the United States of America through our labs, Federal labs in Golden, Colorado, was the world leader in photovoltaics, an endless source of energy coming from the sun, that could replace the fossil fuels. The Reagan Administration refused to allow that to occur.
wind energy and tidal sources of energy being used in Europe. All these extraordinary, absolutely benign renewable resources are being ignored with one focus, and that focus is on fossil fuels and the profits of that industry and perpetuating that industry.

I had a constituent testify at a hearing, and said Congressman, the stone age did not end because they ran out of rocks. He said they developed new technology. But this administration is attempting to stonewall that new technology. In fact, they want to turn back to the technology of the fifties. They want to go back to nuclear energy, let alone the fact we have not figured out what to do with the waste we have now and it is disbursed all around the country.

Mr. FILNER. What they have done with their tax plan is, of course, give several trillion dollars to the wealthiest of our Nation, where if you put tax incentives into the photovoltaic technology you mentioned, put tax incentives into some of these renewables, we could bring down the price and make it affordable.

We in San Diego boast of our 330 days or so of sunny weather. That sustains solar panels, that sustains photovoltaic cells. If we could bring down that price and put that technology into work in our homes and businesses, we would be free of this energy cartel that we have been talking about tonight that has so disrupted our lives and future.

So, in every way where you look, tax policy, FERC, the way the President’s energy policy is, we see a dedicated effort to deny American citizens a future of low-cost, reliable sustainable energy. I think that is a criminal offense, in my opinion, and this Congress should take greater heed of what is occurring.

I thank the gentleman for educating us tonight.

Mr. DEFAZIO. Our time is about expired. I do not think really I can end on a much more eloquent note than the gentleman just made, which is that there is sort of two paths that can be chosen for the American people at this point in time. One is a sustainable, reliable inexpensive energy for the future, and the other is more of what is going on today, crisis after crisis, higher prices, price gouging, manipulation, and being held hostage by the OPEC cartel and the other traditional proponents of the energy industry.

I would like to choose a new path for the 21st century. So far the administration is choosing the 1950 path.

Mr. FILNER. Amen.

THE PRESIDENT’S PLAN FOR ENERGY

The SPEAKER pro tempore (Mr. OSBORNE). Under the Speaker’s announced policy of January 3, 2001, the gentleman from California (Mr. RADANOVICH) is recognized for 60 minutes as the designee of the majority leader.

Mr. RADANOVICH. Mr. Speaker, I appreciate the privilege to come on this floor and talk about the President’s plan for energy and for the future of the United States of America.

I wanted to make a couple of points in response to one statement of the previous hour regarding the situation in California. I am from California. I represent Fresno, California, and the central part of the state, where we too are at ground zero of the California energy crisis.

There were a couple of statements made earlier which spoke ill of deregulation and used California as an example of that, and I would like to clarify that in California there was never really a deregulation plan. It was half a deregulation plan.

In California’s deregulation plan, the rates and the charges that the utilities were able to charge consumers were frozen. They were frozen rates and were not allowed to be increased, whereas the wholesale rates, or those rates that utilities had to go out and purchase energy for, were unlimited and put on the spot market, so that they would change minute by minute, hour by hour, every 24 hours, which made them very susceptible to high price spikes and such.

That was the problem in California, the problem that the price increases could not be passed on as signals to the consumer to start conserving was what created the energy crisis in California.

It was half of a deregulation plan, and under such a situation, it could have been easily corrected, up to a year ago. In May of the year 2000, when evidence started showing in San Diego that prices were going through the roof, the Governor of California, who I believe was more concerned about providing leadership in a crisis than, frankly, his own reelection prospects and obtaining the presidency, had he acted earlier and imposed or allowed the PUC, the State PUC, to impose a 20 to 25 percent rate increase, not like the 48 percent rate increase that was passed because he waited so long, I think, people would have been able to start conserving and he would have prevented this entire thing. It was half of a deregulation plan, half of a plan that would have been easily corrected, up to a year ago.

Now, granted, those prices are starting to come down, because a rate increase of 48 percent was imposed by the governor a year after he could have done it and averted this whole problem, has come into effect, and people are starting to conserve, and the future prices of energy are beginning to come down. This is what should have happened a year ago and did not happen until now. My own utility bill that I just got from my residence in California right now is about 4 times more than average of it.

I think people in general are experiencing a doubling to tripling of their retail rates because of this. A 20 to 25 percent rate increase early on, with decisive leadership from the governor, would have prevented this entire thing and, instead, in waiting so long and in purchasing energy at such convoluted rates that he has led California into this crisis and we are still in the middle of it.

Mr. Speaker, in addition to that, the governor has entered into long-term contracts that do not start for about another year, but the average of those long-term contract prices range from about, again, 3 to 7 times more than what the utilities are able to charge for. I had a company in my office the other day that talked about the inability of the governor to sit down with all those that are involved in the energy crisis in California; that would be the utilities, that would be the marketers, the generators, the the powerless everybody that cares about California and who has a business stake in California, not only in the short term, but in the long term, and to sit down and work through this process, really resulted in nothing. In fact, dollar for dollar up at least 8 months after the crisis began. Had the governor gotten people into his room, he would have been able to negotiate things.

That is an upside down equation that leads to billions and billions of dollars worth of debt that the utilities, after $9 billion in debt, could not manage. So the State has started incurring those losses, and still do. Today, California’s Department of Water Resources, under the eye of the governor, is purchasing power right now 3 to 7 times more than what utilities are able to get from it now. Granted, those prices are starting to come down, because a rate increase of 48 percent was imposed by the governor a year after he could have done it and averted this whole problem, has come into effect, and people are starting to conserve, and the future prices of energy are beginning to come down. This is what should have happened a year ago and did not happen until now. My own utility bill that I just got from my residence in California right now is about 4 times more than average of it.

I think people in general are experiencing a doubling to tripling of their retail rates because of this. A 20 to 25 percent rate increase early on, with decisive leadership from the governor, would have prevented this entire thing and, instead, in waiting so long and in purchasing energy at such convoluted rates, he has led California into this crisis and we are still in the middle of it.

Mr. Speaker, in addition to that, the governor has entered into long-term contracts that do not start for about another year, but the average of those long-term contract prices range from about, again, 3 to 7 times more than what the utilities are able to charge for. I had a company in my office the other day that talked about the inability of the governor to sit down with all those that are involved in the energy crisis in California; that would be the utilities, that would be the marketers, the the powerless everybody that cares about California and who has a business stake in California, not only in the short term, but in the long term, and to sit down and work through this process, really resulted in nothing. In fact, dollar for dollar up at least 8 months after the crisis began. Had the governor gotten people into his room, he would have been able to negotiate things.
July 11, 2001

As an example, one company that has a geothermal plant in southern California, closed to the gentleman from California who just spoke, in northern California, went to the governor and was willing to sell energy at 7 cents per kilowatt hour and was frustrated so much by the governor and was rebuffed, clear up until the governor finally got 7 cents per kilowatt hour on a long-term contract when they had been offering 7. It is this kind of, I do not even want to say the word "leadership," in California that has caused our problems. It has not involved the environmentalists to a degree that has caused the shortage in California, it has really been a short-sightedness I think on the part of Californians to think that we can bury our heads in the sand and pretend that our rapid increases in population are somehow going to provide the energy from some source unknown or unnamed, so let us not take care of our own energy needs.

Mr. Speaker, my own congressional district in California grew by 20 percent over the last 10 years. We are one of the faster growing parts of the State, but it is very obvious in all of California that our population was growing, our energy demands were increasing, and nobody was making the effort not only to increase the capacity of the natural gas lines that come into the State of California from other areas, but also to license and permit other plants and facilities in the State in order to make up for it.

It is much the same I think with Americans. We like to have the lights come on when we flip the switch; we love to have water come out of the faucet when we turn it on, but very few of us want one of those own facilities in our communities or want to provide that for us. As individuals in our local communities, we are like that, but we are also that way nationally, when it comes to the national energy policy that we have.

The United States consumes over 25 percent of the energy produced in the world today, and yet we utilize and use about 2 percent of our natural resources to get it. It is this kind of nimby attitude I think on a local level that has caused problems in California and, kind of on a national level, in our participation in the world’s energy resources that we think that we can have our cake and eat it too.

Mr. Speaker, I am grateful that the President has taken the initiative on this energy policy to change that, because not only is it hypocritical, it is not serving in our best interests, it is a threat to our national security, and I think it is morally wrong to demand a lifestyle and yet not pay for it to develop the resources to provide it. I commend the President for coming up with the energy policy that he has so that we can not only provide increased energy from alternate sources like wind and solar, but also realizing that they are never going to be able to take the place of the natural fuels, oils; they are not going to be a significant part of the energy mix in the United States, ever. I think that we can work to increase that, but the percentage increases that we get are not going to be that great.

So it is wise for us to begin to look at developing our own resources so that we can make up the energy difference that is caused by the increased population in the United States, but also to begin to think about our national security. That is why I commend the President of the United States for doing what he is doing, providing the leadership. It may not be popular to some people; it may not be a thrill to talk about putting down the plans for developing coal reserves, but I have to tell my colleagues, what is more important I think is keeping the lights on and keeping the water running and keeping our national boundaries secure.

So that is why I want to thank the President.

I have to tell my colleagues, today we took 2 very important steps forward on the development of our national energy policy. One was in the Committee on Resources where we began hearings on the Energy Security Act with the gentleman from Utah (Mr. HANSEN), the chairman of the committee. This bill focuses on increased production of diverse fields beneath Federal lands and the outer continental shelf. It instructs the Secretary of the Interior to establish an environmentally sound program for exploration, development and production of oil and natural gas in ANWR, the Arctic National Wildlife Refuge. Again, the exploration in this whole area amounts for about one-fifth of Dulles International Airport. For those of us in America that have not flown into Dulles International Airport, it is about one-fifth the size of your own airport if you are in an urban setting. It is a very, very small piece of this vast, vast wilderness, about half a percent of the total landmass in general.

It also adds 5 areas for increased production: hydropower, gas, geothermal, solar, and wind energy. As my colleagues know, part of the problem in California was our overreliance on one single source of energy, and that was natural gas. Even in that situation, with the transmission lines in California, there was no increased technology to increase the capacity of the flow of natural gas within the State of California, which caused the high prices for those that were bringing natural gas into the line. It is California’s fault, and it is time to stop blaming the bogeyman or the evil-doers for victimizing poor California. It was bad leadership that caused the energy crisis in California, and I am very thankful that we had the President come to that plate with this energy plan.

Also, in the Committee on Energy and Commerce we took up the Energy Advancement and Conservation Act of 2001. It does the following: it leads with conservation, which is one of the most important aspects of the President's plan. It mandates that the Federal Government take the leadership role, leading by example and making conservation happen. It establishes a Federal energy bank to fund energy conservation projects. It expands LIHEAP and weatherization assistance.

Now, LIHEAP is typically a program, a Federal program that makes up for the high cost of heating oil in the northeast. Typically, that is the history of the program, but it is being expanded so that it can work for those that cannot afford the increased costs because we have to run our air conditioners a little bit more because it got up to even last week 108 in some parts of the central valley, these LIHEAP funds are being extended to help those rising costs because our air conditioners are running so high. That program is being expanded in California. It provides assistance to schools and hospitals for energy conservation, and for consumers it provides new appliance standards and expands the energy star program to provide better consumer education.

This is just a piece of what is beginning to happen in Washington today because of the initiative of the President of the United States, President Bush, who has seen that we have been shortsighted over the last 8 to 10 years and not developed a policy that leaves us vulnerable to foreign countries all across the world.

I would like to invite the gentleman from Utah (Mr. HANSEN), the chairman of the Committee on Resources, to begin perhaps a little dialogue on the bill that was begun in his committee today, and that is the Energy Security Act.

Mr. Speaker, I welcome the gentleman.

Mr. HANSEN. Mr. Speaker, I appreciate the gentleman from California for inviting me to be a part of this Special Committee. I would like to explain, with the gentleman’s permission, some of the things about the plan that we introduced today.

Mr. RADANOVICH. Please do.

Mr. HANSEN. Mr. Speaker, let me point out that for 8 years we have just kind of been Moses in the desert wandering, trying to find out where we are going on this thing. I think Mr. Richard-
fact, if we did anything, we ruined a lot of areas because of monuments that were not thought out and things along that which we did not want.

Vice President Cheney was given the assignment to work on the energy program and did a very commendable job. I read it very carefully and, in my opinion, if there is one word that would explain what the present administration has come up with, it is the word “realistic.” They came up with a realistic program on how to face some of these things.

Now, I enjoy hearing my colleagues talk about all of these wonderful things that are going to happen and how it is going to come together, but when we get right down to it, in all honesty, what is “going to happen” is not there. We cannot drive into a gas station, walk to the pump, and get gas. We cannot do this at all. There is nothing there. We cannot get there. We cannot get gasoline. This is the view that the gentleman was talking about. This is the view that the gentleman from California, strikes me as unrealistic. He said, I do not know, but I think it will be. I think he is not right. I think we are not going to be able to do this.

I would like to use the illustration of a gentleman that came into my office about 5 or 6 years ago and he started telling me about all of the interesting things that have occurred in transportation. He said, years ago, we used to use horses and then we went to cars and most people went on buses or trains, and it was really a big deal when the trains came together in Promontory, Utah, in my district, incidentally, and every May we celebrate the idea of driving the golden spike. Gosh, we could get on a train and instead of doing 4 miles an hour on a horse, we could breeze across the country. That was a wonderful thing. People really thought it was a Utopian idea. Then came along airplanes and, of course, now we do not see too many people travel on trains, most of us go by air.

Well, he made an interesting statement. He said, I am working on a program, and, he said, I think it will be there, where you walk into a thing like a phone booth and you punch in San Francisco and zap, you end up in San Francisco. He went on and I got just a tad nervous talking to this gentleman. I said, when is it going to be working? He said, I do not know, but I know it is going to work. I did not ask how you change the molecules around and all that because he loved the idea, but that, in a way, I say to the gentleman from California, strikes me with a lot of these things we are hearing about alternative sources: 2 percent, tripled to 6 percent. When are we going to get to that area?

In the interim period, when someone comes up with this wonderful invention that moves us within seconds from one place to another, we still have to take that airplane, we still have to drive our cars, we still have to heat our homes, we still have to light our homes. So while we are talking, let us go back to what the Vice President was talking about. We are talking about a realistic program to get us out of this energy problem that we are in.

That is why this bill was introduced today in the Committee on Energy and Commerce today, so we could take care of these things.

I was interested, in listening to the former speakers. When I was listening to them, I thought back to that gentleman who came in and talked to me about this wonderful idea.

Gosh, I know there is a lot of energy from the sun. I agree with the gentleman from Oregon. It is too bad we cannot capture it and make it all work right now. If someone would step up to the plate and say, here is the technology, we have, and doggone it, we are going to do it, I commend them. I still hope they come up with something good.

But right now, the plan that we have introduced in both of these committees is around this word “realistic,” and realistically, where are we getting our energy? Our energy is basically coming from fossil fuels. Also, it is coming from other areas. We do get some out of water. We do get some out of various sources of energy. But right now, the one that they have come up with takes care of that.

I notice the one gentleman from California talked about the idea that it was not California’s problem, it was the problem of these big energy guys who would not build these things. Well, no disrespect to our good friend from California, and especially my friend, the gentleman from California (Mr. RADANOVICH), but let us look at what California has put in the way of restrictions compared to other areas.

California has made it so difficult to build a nuclear plant, a coal-fired plant, especially a coal-fired plant, a gas-fired plant, that it makes it totally impossible to do it.

A lot of these people come and say there are too many regulations, too many hoops to get through, and therefore, we do not want to do it.

Mr. RADANOVICH. If I may weigh in a little, too, California used to have three nuclear facilities. We only have one, now. A few years ago, the Rancho Seco Nuclear Power Plant, which was in the Sacramento area, the voters in the area voted to shut the thing down, so they not only discouraged new ones, they actually went after existing power-generating facilities.

So it is not, unfortunately, the view that we could have increased population and not increase energy capacity. That is not realistic, but, I think that is the view that the gentleman so well expounded. That alternative energy is great, I think it needs to be expanded, but it is not realistic to think that it is ever going to meet a significant portion of our energy needs. It is just another way of saying that we do not want to develop our own energy resources.

Mr. HANSEN. That is sad, in a way. Because if America is willing to say, all right, we do not want to drive our cars, heat our homes, we do not want power or air conditioning, we will just go back to the Stone Age, so to speak, then let us all stand around and say, gee, is wonderful. Look at this beautiful environment.

But America is not going to do that. America is a forward, progressive country, always looking for that edge of the envelope where we can get ahead. Gosh, will that not be nice when we do develop these things. I hope it is in our lifetime where we can see these things come about, and we will not have the energy pollution and that type of thing.

But I hasten to say that a lot of these things are much better. We just talked about nuclear. They are very, very safe. It is kind of sad, but a lot of politicians like to get up and talk about how terrible it is, we are all going to die because we have that. A lot of people do not realize that we have not built these new nuclear plants, but we have gone from 12 percent of nuclear dependency up to 20 percent just through efficiency.

I think really, I would say to my friend, the gentleman from California, that the thing we have to realize is that we are now 57 percent dependent on foreign sources, 57 percent, according to testimony today in the committee from the Department of the Interior.

It was not too long ago, in fact I think it was right at the start of President Clinton’s administration, where we were about in the thirties. So we have really gone in a hurry to get ourselves up to this amount.

What does America want to do? Where are we getting that 57 percent? Some of it is from our friends from Venezuela, some of those areas. But let us just have the American public look at this. That is, do we want to depend on those we can least depend upon? Do we want to depend upon Iraq, with a man like Saddam Hussein having his hand on the spigot of the oil we get? Do we want to depend on Iran? Do we want to depend on Libya? Do we want to depend on countries that we can hardly depend on who are not friendly to us, who many of them practice terrorism on us? Do we want to depend on those people?

People say, OPEC surely does not have the range of this thing. Who are we kidding? They can make this go up and down in the matter of a blink of an eye, and have shown that they can do that.
What was so bad about the idea of looking at other sources? Now, a real great actor who considers himself a great environmentalist, who has probably done more to foul it up than anybody I know, wrote a letter to the administration criticizing them for going to ANWR, and made the statement in his letter, well, we are only getting 6 months' worth out of that.

Come on, let us think about that a while. Where do we get this? Does it all come out of one big spigot? Of course not. We get some from Texas, some from Indiana, some from Utah, some from Venezuela, some from California, some from Saudi Arabia, some out of Alaska, we get some offshore, so it is an aggregate.

If we just took one of those, we could say that about any source there is, that and that only in, they can go look at this thing at ANWR up on the North Slope of Alaska. What do we have up there? It is east of Prudhoe Bay. The last time I was there and heard these people talk about it, they used these figures. One that jumps out at me was 1 million barrels a day for 100 years. That would be about 11 percent of what we are getting.

Then I debated one of our Senators. He said, there is no infrastructure. Where has he been? It is only 74 miles over to the Alyeska pipeline. That is a lot better than we have in the West in a lot of different instances where they could pipe it to the Alyeska pipeline, down to Valdez, and we could use that source.

Today in testimony it went on ad nauseum, and Secretary Norton did a very fine job in explaining the position of the administration about fouling up ANWR. The gentleman from Alaska (Mr. YOUNG) was there, and very admirably talked about what ANWR is. Frankly, as we look at it, that is 19,600,000 acres. That is the size of South Carolina. If we look at that, we will say, how much are we going to use? The figure now is about 2,000 acres, but it could even be 10,000, but they said 2,000 today. Figure the percentages in that. That is an infinitesimal drop in the bucket.

Also, they talked about the technology, where they can use that small area, and tentacles go in, they can go to the oil areas, and we would never even know it was there.

The gentleman from Massachusetts said, yes, that is all right, who would be against that? But how do we get it out of there? Do we fly it out, balloon it out? He made light of the idea. He said no, what we do is put in oil lines.

So we go to dig a trench, every time we fix a road we make a little mess, but Mother Nature can reclaim it, and will do so. So to give up on ANWR does not make a lick of sense to me when I think of the mix we are looking at. We have a mix of fossil fuels, of natural gas, of other areas, of nuclear, of water that we have to use.

Out in Salt Lake last Monday, I chaired a meeting with the seven States that use the Colorado River. The issue came up on hydropower. Hydropower is the cleanest and probably the best source we have, because once we put those turbines in, we do not see anything come out. It is a clean power. It amazes me that some people will stand on this floor and other areas and criticize the use of hydropower. What is better than that?

I was talking to a gentleman. He said, let us all go to wind. Maybe that is good, I do not know, but I have gone through some of those areas with wind. Maybe they are doing it. But here are these beautiful green acres, and they are all filled up with propellers spinning around. I do not know if that is better. It bothers me maybe as much as an oil rig would. The Audubon Society points out they do not like all the birds going through and getting creamed by those things.

Let us go back to what my friend, the gentleman from California, that the bill we have introduced today is a good mix, a good step forward. Four committees of Congress are going to have to be involved, the Committee on Energy and Commerce, the Committee on Resources, the Committee on Ways and Means, and the Committee on Science, to determine if we can come up with a package.

I would just ask the people in America, let us get off this political nonsense. Let us not try to make political hay on this. Let us say we have a President, and we do not care if he is a Democrat or Republican, but this Republican President has decided he wants to cure a problem before it gets disastrous. Let us get behind him and get this done.

The cheap political points some people make on this do not make much sense to me. It makes more sense to say, all right, everyone is going to have to bend a little bit. In my 42 years as an elected official, the thing that bothers me the most is the person who sees a beautiful piece of legislation, but boy, he cannot go along with it because it has two sentences in it that bother him. If he cannot get them changed, put it on a scale of one to ten, and if it is a five or nine, why does he not go with it?

Years ago, I took my young family down to the Grand Canyon. We were standing on one of those beautiful points on the North Rim and looking one of those seven wonders of the world. It boggles your mind. It is awesome.

My one little son, about 6, he says, "Hey, Dad, what about that ugly worm down there?" I said, "Paul, what is the matter with you? Here is the beautiful canyon, and this is the thing that you are worried about?" He said, "Dad, look at the worm." I looked at the worm. I could not get Paul off the idea of that little worm.

I will not let somebody say this is a great bill, but it only goes 90 percent. I cannot go for it, for heaven's sakes, if it is a 90 percent, go for it. Give it some thought.

Maybe this bill will have something in it that will have something that the gentleman does not like or I do not like, but right now it is the Grand Canyon. Let us not look at the worm.

Mr. RADANOVICH. Mr. Speaker, I thank the gentleman from Utah for that, and for all his work on the Committee on Resources regarding the national energy policy.

Mr. Speaker, there are a couple of things that the previous speakers were speaking about that stick in my craw. I just have to address them.

One was regarding the issue of price-gouging. There was a lot of talk about price spikes and all these out-of-State generators that were making incredibly large fortunes.

FERC did a study. They came back, or at least the judge that is trying to resolve the dispute between all those involved in the California energy crisis, he came back with the numbers. The out-of-State generators, out-of-State of California, made up or earned about 10 percent of those monies that are alleged to be overcharged during these last 6 months. The other 90 percent went to in-State-qualified facilities and also public utilities, like SMUD, the Sacramento Metropolitan Utility District, and in L.A., the similar utility district in California.

Ninety percent of that number is alleged to be price-gouged went to utilities within the State of California. So we had just better get our numbers right, and better yet, they had better stop doing the blame game and get to solving the problem in California.

There is another thing that was talked about. That is the price caps. The issue of price caps in California, keeping the price down. The FERC did react by providing what they call a 7-24 monitoring system, where 7 days a week, 24 hours a day, they will monitor prices, rather than just doing it during
I am going to talk about it from the standpoint of basic science and what we can learn from that and what we can and cannot do and how that impacts us in the future. I am also going to take a rather long-term view on some of these issues because we have to think long term on this.

I do have to say that dealing with energy and public policy has been very frustrating to me because when I was first elected to the Michigan legislature and worked in both the House and the Senate, I tried to work on developing a solid energy policy for the State of Michigan. I could not get anyone interested in the public or the legislature because we did not have a crisis at that point. Eventually I decided I could better spend my time doing a fair amount of research on energy and public policy has been very interesting again. But regardless of what the public may lose interest in going down, the public may lose interest again. But regardless of what they say or do, we must have a good energy policy, and I hope that will emerge from my comments.

In the study of energy, one of the first things we encounter is the three laws of thermodynamics. Now, thermodynamics, that very word, means heat going into motion. And that was extremely important about 150 years ago when the laws of thermodynamics were developed because that helped us build steam engines, and not only just build steam engines but helped to build efficient steam engines that led to the industrial revolution in terms of steam engines to do work in the factories and also steam engines to move trains across continents.

The laws of thermodynamics, and I do not want to get into a lot of detail, the first one we can ignore, it is very elementary, just dealing with temperature, and the second one is the conservation of energy, which simply says that in a closed system, energy can be neither created nor destroyed but can change form, from one form to another.

Well, what are the forms of energy? There are many, but I will just mention a few. First of all, let me explain that energy always has something to do with work. And so when we apply a force through a distance, we do work. I happen to have here a rather giant rubber band, and when I pull on it, I have to exert a force. I exert a force through a distance, I am doing work on it. I am imparting energy to this. It is stored as potential energy in this rubber band; or at the molecular level it is stored in the molecular stretching of the bonds within the molecules and between the molecules.

When I stop exerting the force, it pulls my hands back in. That energy was stored there and it was used to pull my hands back together. But we lost some in the process.

As I said, in a closed system we do not lose energy, but we have lost some to heat, that is because there is not a perfect closed system, and that helps to warm the room. In fact, we could easily make a heat machine out of this if we wanted to use it for a heating system. Very inefficient, but we could have one that would just simply stretch rubber bands and the heat generated could heat a building by being able to heat a substantial space.

The third law of thermodynamics is even more important than the second, even though the second is extremely important. The third one is the statement that entropy and any reaction, any transfer of energy, always increases. Now, I am not going to get into entropy here. It is a very complex concept. But it basically means every time we transfer from one form of energy to another, the quality of the energy degrades. That means it is less useful. It cannot do as much work.

Remember, energy represents the ability to do work, and that is why it is so important to us. We went, as human beings, from the nomadic existence to an agricultural existence, or that agricultural existence, that we first learned how to tame nonhuman energy to do work. In other words, animal energy. Before that, humans had to do everything. They tried agriculture and it just did not work that well. There were various agricultural communities, but they all had trouble and many of them failed. Once we had animal energy to use, they learned how to harness domestic animals to do the work, the plowing, et cetera, and agriculture flourished and continued to grow and increase for years.

The next big change was when we learned how to use nonanimal energy, that is the industrial age, where we built steam engines and other machines that allowed us to do more work. And the better the quality of the energy, the more work we can do with it. But as I said, the third law of thermodynamics says every time we use energy, it degrades to a lower level. It is not able to do as much work.
In a modern power plant, we burn natural gas or burn coal, and that produces heat, which we either use to generate steam or to operate a turbine. Out of that we get waste heat. We use cooling towers to get rid of it, but we could heat a lot of homes or greenhouses with that if we chose to. But we cannot get much more work out of it. Eventually, where we have done radiates out into space.

Now, those are very important concepts because what we have to remember about energy is it is our most basic natural resource simply because we cannot use any of our other natural resources without using energy. If we decide we want to dig a mine in Utah, for example, and extract some materials, and there is a huge copper mine in Utah, as I recall, that takes a lot of energy and the extra energy to get it to the mill where it is extracted and smelted, rolled, then transferred to a fabric factory, fabricated, and finally transferred to the consumer. Every single step of the way takes energy, and that is why energy is our most basic natural resource. But it is also our only nonrecyclable resource. The copper that is pulled out of that mine, we can use it, and when we are finished with it in a product, we can recycle it and put it in a different product. But energy cannot be recycled. Once we use it, it is gone.

Now, all of these principles make it very important for us to develop an energy policy that recognizes this, and I believe that the energy policy that Mr. Bush has presented recognizes these issues and begins us on the road for a very long-term plan. There are many different ways of obtaining energy. We have talked tonight about retrieving energy from fossil fuels, primarily oil and natural gas. Another fossil fuel is coal, and that is very useful to us. These involve burning these fossil fuels, because they are combustible, and extracting the heat energy from them and converting that into electrical energy or into energy of motion or things of that sort.

We also know of other ways of using energy. We have Einstein’s famous equation, E equals MC squared, which means that mass can be converted into energy and vice versa. But if we can learn how to convert mass into energy, we get huge amounts of energy out of small amounts of mass. And that is what we have with nuclear power and nuclear weapons. It is just amazing when we consider that the bomb that exploded in Hiroshima had just basically a handful of enriched uranium, of which only a part was converted into energy but was sufficient to destroy a major city; or that a nuclear reactor, rather than fission, can generate huge amounts of power for a long time out of small amounts of fuel.

We also have another means of nuclear energy, and that is fusion, where we combine hydrogen nuclei or Lithium nuclei and extract energy that way, because we lose some mass in the process. And hope someday, it will be a very good source of energy, but it is a number of years away. But, again, we have to do the planning, because we cannot recycle energy, and someday we will all see simply going to run out of the traditional sources.

Now, there are other things we can do. People talk about conserving energy. I do not really like to use that term, even though I support it. But I think it is much better to talk about efficiency of use of energy. Because conservation, I find, gives the image of people freezing in the dark. If we are heating our homes and we want to conserve, we turn the thermostat down, turn the lights out, and freeze in the dark.

In fact, I remember once I was at an event during the first energy crisis we know about, in 1973, and one of the speakers got up and he was very proud because they turned the heat down to 55 degrees. This is in Michigan, where I live. And they turned most of the lights out, and he told his teenaged daughters that they were not allowed to use hair dryers. They just had to let their hair dry naturally, and so forth.

And he went on and on about conservation.

I asked him afterwards what kind of house he lived in. He said, well, we have a cement block house. I said do you realize that for a small amount of money you could insulate that concrete block house and still live comfortably with the same fuel bills? He did not realize that. He did not realize, for example, that concrete is not a good insulator. In fact, one-inch of Styrofoam has the same insulating power as four feet of concrete. In other words, by putting just one-inch of Styrofoam around his house, he would have saved as much as having a four foot concrete wall. And if they added a little more insulation, they would have been very comfortable.

That is what I mean about using energy efficiently. It is not a matter of using less, it is a matter of using it efficiently. And everyone, I believe, supports efficient use of resources. That is how businesses make more money, by being more efficient in their use of their material resources, human resources and machinery. So I think it is very important that we try to be as efficient as possible in our use of energy.

We also have to look at alternative ways of using energy. As an example, hydrogen. I think one of the better developments in automobiles that is coming along the path is the use of fuel cells. We will, when we will be able to use hydrogen, combine it with the oxygen in the atmosphere, and with almost no pollution produce electricity to drive an electric motor. Now, this is not easy technology, but we know it works because we used it on space vehicles, we have used it on the shuttle and other energy purposes, and we have used it in experimental automobiles which use fuel cells. Right now they are still expensive because they are experimental. But someday, when we get the design down and manufacture them in bulk, I am hoping that it will be able to sell as a good source of energy. We can either use gasoline in them or some other fossil fuel and preform it, as they say, so that we extract the hydrogen from it and run the hydrogen through the fuel cell and get our power that way.

Even better would be if we developed a hydrogen economy, where we develop hydrogen out of our fossil fuel resources, or by electrolyzing water, H2O, remember, and separating it into hydrogen and oxygen, and that way we could, using electrical energy from nuclear plants or other plants, generate hydrogen and pipe it around, sell it at hydrogen stations instead of gasoline stations, and power our automobiles that way.

The Hybrid, incidentally, is an interesting way of improving mileage, and again using the energy more efficiently. A couple of manufacturers are doing that now. I expect a few more will be developed. But I regard that as an interim. It is slightly more efficient but not as good as the fuel cell is going to be.

We have to look at other possibilities for alternative sources of energy. Solar energy is tremendously promising in terms of its potential. We get as much energy on this earth from the sun per day as we expend from all our other energy sources for quite a number of years. Huge amounts of energy from the sun hitting the earth. The problem has been that it is very diffuse and, therefore, very low quality, very hard to use. But we are making progress in photovoltaic cells, and I expect in not too many years we will find new homes built with solar shingles on the roof, shingles that will generate electricity and help heat the hot water in the House, help heat and cool the house, provide electricity for cooking, for the clothes dryer, and things of this sort, and with some electronics can actually provide high enough quality electricity to run TVs, VCRs, and a number of things.

So that is I think a promising alternative that is coming down the pike. I would estimate probably 10 years from now that will be economical. It is not going to be economically feasible to take our existing shingles off and put these others on. That would be costly. But as part of a new building or as part of a required replacement of shingles, it will become economically feasible.

2130

We have others. Wind as power, of course, has potential. It is not a stable source of energy. We need an energy
storage device or supplementary energy. The same of course is true for solar, but it again depends where one lives and what sort of promise, particularly for less developed countries. That, incidentally, is one of reasons and the main reason I was opposed to the Kyoto protocol. I think President Bush was exactly right in saying that it is dead because it only put restrictions on the developed nations, not to developing nations. If we do not have some restrictions on them or at least tell them at a certain date they have to meet these requirements just as we do, we will soon find all of them putting in highly polluting coal burning plants that produce a lot of CO₂ greenhouse gases, a lot of pollutants. Then when we say, there is too much production. There needs to be a cutback. They will say, look, we have all these investments now and all of these marvelous plants. We cannot cut back now.

I think if we have an international agreement, if we ever reach one that places restrictions on us, it also has to place restrictions on less developed countries because then they will make investments in alternative sources of energy such as solar, which is certainly the best answer in many places such as Africa and parts of Asia, rather than building these power plants which will create more problems.

So I have talked about a whole range of different issues tonight, and I did not get into the specifics of some of our current problems. But I am simply saying that the plan that the Republicans are developing is a good launching pad for the things that I have been talking about that we have to move towards in the future. It contains the seeds of a long term national energy policy and certainly the good short term energy policy that we need right now to address the problems of prices at the gas pump and the crisis in California.

One last thought on that. We have to not only consider energy issues as we have talked about now, but we also have to consider the international relations or foreign policy aspects of it. We are 70 percent dependent right now on oil from other countries. As I said earlier, energy is our most basic natural resource. We are at the mercy of other countries because if they cut off our supply for whatever reason, political or war or whatever, we are at their mercy because our industry cannot operate without energy and we cannot produce enough internally instantaneously. That is why it is very important, as the energy plan of President Bush points out, that we must establish our independent fuel sources in our own countries. We have to develop our own sources. We have to develop alternative sources so we can truly be energy independent and not depend on the good will of individuals who may not feel very kindly toward us at various times.

Mr. RADANOVIĆ, Mr. Speaker, in closing, let us consider the lessons that are being learned in California do not have to be learned in the United States to get a decent energy policy. Even though California is second only to Rhode Island in energy conservation, we have had 63 stage one power emergencies, 63 stage two power emergencies and 38 stage three power emergencies.

The way it happens is when electricity begins to run out, that is a stage one alert. When it gets worse, that is a stage three alert and from there we enter into rolling blackouts.

We are having to suffer through that because I think we have not been keen on making sure that California has had adequate energy supply and we will create that. We will become a great State or continue to be the great State that we are. But I do not want the country to go through the same problems that California is because of an unrealistic expectation out of energy and where the supply needs to go.

California is getting real fast. I think the rest of country needs to learn to get real about where our energy supplies need to come from. That is why I applaud the leadership in the House and also the President of the United States for putting this energy plan together, a realistic one that also includes alternative fuels, energies and conservation and puts them in their proper perspective.

ROLE OF THE FEDERAL GOVERNMENT IN AGRICULTURE AND EDUCATION

The SPEAKER pro tempore (Mr. KEIRNS). Under the Speaker’s announced policy of January 3, 2001, the gentleman from New York (Mr. OWENS) is recognized for 60 minutes.

Mr. OWENS. Mr. Speaker, today we concluded the appropriations debate and passed an agricultural appropriations bill for $74.6 billion. I think that it passed with a minimum amount of discussion and controversy.

I think we had an overwhelming vote from all the members. I voted for it myself, even though in the past I have been wary of agricultural bills that have large amounts of subsidies for farmers for crops that no longer need subsidies. But that is not a point that I want to expand on. I want to say that we have passed a bill for $74.6 billion, the Federal Government’s involvement in agriculture, and the farmers of the United States are less than 2 percent of the population.

We take good care of our farmers and they give us good return. We are the best fed Nation in the world, but we certainly take very good care of them. Any people among those farmers and that particular group that continues to talk about government or complaining about big government, telling government to get off their back, et cetera, it is hypocritical because the government is very much involved in producing the best agricultural system in the world. It is a monument to the achievement of government and education. The Morrell Act which created the land grant colleges in all of the States set off a process which created agricultural engineering and science, an approach to implementing new theories rapidly, the county agents, and a number of different innovations that still survive to this day. There are still committees in every county that relate to the Department of Agriculture.

The system has been very productive. The system is, however, a system that we oversee as the Federal Government, and it is fed and kept alive by the Federal Government. Most people do not know it, but the Department of Government in Washington which has the second largest number of employees, second only to the Pentagon, is the Department of Agriculture, although we now have less than 2 percent of the population which are actually farmers, bodies who can be called farmers.

Mr. Speaker, we take good care of agriculture and as a result, we get good return. There are 53 million children in the public schools of the Nation. That is far more than 2 percent of the population. If we want to put the same kind of investment into education, we would reap greater and greater returns, I assure my colleagues, on education. As I said before, the productivity of our agriculture system is directly related to the fact that we understand the role of science, an approach to implementing new theories rapidly, the county agents, and a number of different innovations that still survive to this day. There are still committees in every county that relate to the Department of Agriculture.

The system is, however, a system that we oversee as the Federal Government, and it is fed and kept alive by the Federal Government. Most people do not know it, but the Department of Government in Washington which has the second largest number of employees, second only to the Pentagon, is the Department of Agriculture, although we now have less than 2 percent of the population which are actually farmers, bodies who can be called farmers.

The Morrell Act, of course, was inspired by Thomas Jefferson’s genius when he created the University of Virginia, a State-based university. He took the first step and Morrell followed through, and every single State benefitted from the same vision, an extension of the vision of Thomas Jefferson.

We need the same kind of vision as we look at the 53 million children that
are in our public schools. We need to understand that a large part of what we have been able to accomplish as a Nation is based on the fact that we have subscribed from the early days to the philosophy of universal education.

The Federal Government has not played the first role, but the Federal Government certainly has never interfered with the States, and every State accepted the responsibility. It is the ethic of the American people which lead to the creation in the constitution of every State the responsibility for education.

The Federal Government discovered in World War I and World War II that it had to go beyond that in terms of the development of its youth population, its scientists and technicians, and so it began to play a greater role in higher education. We can tie it to the genius of Lyndon Johnson and the great society era where he established the first Federal support for elementary and secondary education, the Federal government has been a partner. We are engaged in emergences. We do not have a major role in terms of funding. We actually only fund about 7 percent of the total education budget for the Nation. It is the State and local governments that fund the rest of the education budget, but we are involved.

We recognize the necessity for that involvement and I think every State education official and local education official, and certainly teachers and principals throughout the Nation, will indicate that since the Federal Government got involved to the present there have been improvements.

The Federal Government’s role in education has been a very positive role, a role that we can be proud of. I am here to remind us today that the Federal Government should not allow this lull in the attention being offered by the Federal Government, by the people here in the Congress and the White House to education, do not let this lull allow us to take for granted what is going to happen next in the area of education in terms of this year’s legislative agenda.

We have passed a bill here in the House of Representatives, Leave No Child Behind, the President’s bill, and the bill has passed in the other body. It is now up for conference. I read in the paper that the other body has appointed its conferees, the people who will sit on the conference committee. We have not done that in the House, but I assume that we will do that fairly soon. It is likely this process will go beyond the August recess, and that the climax will take place in September when we return from the August recess.

In the meantime, I want Members to stay aware of the fact that the last word has not been stated, it is not over yet by a long shot. We have a major dilemma. We have to confront a major dilemma with respect to the bills that have passed in the House of Representatives and the other body. The dilemma is this. We have authorized in the House not to implement the Leave No Child Behind education program, amounts of money that are far greater than the amounts of money that have been reserved in the budget, the budget which has been passed in this House and in the other body, does not allow for the implementation of the most important provisions of the Leave No Child behind legislation.

For example, one very important piece, Title I, Title I has been the major instrument for granting and providing public assistance, Federal assistance to education agencies across the country. It is about $8 billion. Title I in the Leave No Child Behind legislation was left in the House for the next 5 years beginning with increments which will go into effect this year. So in this year’s budget, there has to be the first increment for the movement of Title I forward. And in a 5-year period, it will reach $17.2 billion, according to the authorization bill. It is logical to have all of the powers that be, the White House, both parties agreed on this, and then to have the authorization sitting there without an appropriation to back it up. There is no room in the budget at this point.

So it is going to have to be negotiated through some extraordinary effort. We are going to have to break the budget or greatly shift some items around in order to accommodate the authorized amount. We certainly want to make certain that the priorities are such that this authorized amount will be honored. We have to have some items that may be honored. In order to do this, we cannot leave it to the processes here in Washington. The same processes that have generated this movement forward, however small it may be, and I am not pleased with the fact that Leave No Child Behind is inadequate in so many ways. It is inadequate because it has no money, not a single penny, for school construction. The Leave No Child Behind legislation that passed the House of Representatives did not allow a single penny for school construction. There is some hope because the other body did place $175 million in the budget for charter school construction. So there is some hope there that in the conferencing process we can move in the direction of the amounts of money that have been established by the other body and be able to deal with some of the inadequacies that are left. I think the important thing is the public must realize that education is on the agenda at all, the fact that it was one of the first items the new administration placed before the Congress is due to the commonsense pressure that is being applied from the bottom. It is the public opinion that keeps consistently stating to the elected officials that education has to be one of our priority items. It seems that we are always running away from it. Elected officials have not really engaged the education agenda the way they should. Considering the fact that for the last 5 years, it has been among the top items and for the last 2 years it has been number one on the agenda of the public opinion polls, we should have done more. We should have done more. But our engagement has been of a shadow boxing approach where we engage in it with rhetoric, there is a lot of talk about education, there is a lot of discussion, and then when the authorizing and the appropriation process takes place, there is minimum effort. In the Leave No Child Behind legislation, we do not have maximum effort, we have minimum effort. It is important for the public to
remember that. Whatever we are going to conclude with this year is still far short of where we should be in terms of the Federal involvement in education. People say, ‘Well, it’s really a local and a State matter.’ Yes, it should primarily remain a local and State matter. In terms of support for education, financing for education should remain primarily a State and local matter. But that does not mean that the Federal Government cannot be more involved than 7 percent. Seven percent leaves us a lot of room. Why do we not shoot for 25 percent? There are people who fear that greater Federal involvement will mean a loss of local control, a loss of State control of the schools. With 7 percent involvement, and the local government and State government have 93 percent of the funding, then one can control anything. If you have 93 percent, if the other party has 93 percent, you cannot control it with 7 percent. Let us not kid ourselves. If we increase it, the Federal share, from 7 percent, we still are not in a position to control, and that is a boogeyman that should be shot down and forgotten. We should be moving toward more Federal funding in terms of a greater percentage of the bill for education should be paid by the Federal Government.

All taxes, all revenue comes from the local area, anyhow. All politics is local, all revenue is local. The money we print in Washington is symbolic, it is symbolic of the taxes that are flowed in here from the States and the localities. So give it back to them in ways which promote the item that the American public has indicated is the number one item. They would like to see more involvement, Federal involvement. Let us keep the debate going, let us continue to talk in terms of what is needed, instead of merely settling for the parameters that have been established by the Leave No Child Behind legislation.

I want to take the opportunity today to talk about two groups, two statements of vision that have come to my office very recently. One is a book that is written by Dwight Allen who is an education professor at Old Dominion University and with whom I worked, Bill Cosby. Most people do not know that Bill Cosby has a Ph.D. in education and that he has always been interested in schools and in children. Cosby wrote several books on children and families that were best sellers some years ago. This book is a combination with an education professor friend of his. The title of the book is ‘American Schools, the $100 Billion Challenge.’ The $100 billion does not refer to $100 billion over the next 10 years. Mr. Cosby; it refers to $100 billion per year that ought to be added to the Federal effort in education. It is interesting that they would think in those terms, when a second presentation by the Children’s Defense Fund, the Act to Leave No Child Behind as a bill that was introduced in the Senate, S. 940, and in the House as H.R. 90. Senator Christopher Dodd of Connecticut is the sponsor in the Senate and the gentleman from California (Mr. George Miller) is the sponsor in the House. The American Schools, the $100 Billion Challenge, is the title of the book is ‘American Schools, the $100 Billion Challenge.’ The $100 billion does not refer to $100 billion over the next 10 years. Mr. Cosby; it refers to $100 billion per year that ought to be added to the Federal effort in education. It is interesting that they would think in those terms, when a
teaching and nursing. All those barri-
ners have fallen now and we have a
tremendous shortage of teachers right
now. At the moment and the short-
age is increasing geometrically. It
is increasing right now greatly.

New York City had 4,000 teachers who
resigned or retired over a 2-year period
2 years ago. In this last year, they had
4,000 teachers in one year. They expect
to have 6,000 retire next year. We are
into a situation where they can see the
number of people qualified in terms of
years spent in the system and the other
pressures will lead to a tremen-
dous drain on the number of teachers.

There is a great shortage of teachers
in New York City right now. We are
not able to get trained, certified teach-
ers to fill all of our classrooms, and
many other big cities have the same
problem.

The other pressure, other than just
not having the bodies that come out of
the process of education, is that the
surrounding suburbs, which usually are
more wealthy sometimes in other
States, in New Jersey or Pennsylvania,
New York is surrounded by suburbs
that can pay much higher salaries for
teachers. So they have shortages in
those areas and it speeds up, it esca-
lates, the drain of teachers in New
York City.

I am told that one of the big
problems we have with school construc-
tion is that school construction has now
hit a problem because the construction in-
dustry certainly in the New York area
has sort of over booked. They have
more than they can handle because the
construction industry has a great
shortage of skilled personnel, car-
penters, sheet metal workers. The peo-
ple who make construction go are in
short supply. So we have a skills prob-
lem in the area of construction.

We have a problem recruiting police-
men. There is a difficulty. There is a
difficult. They have lowered the
standard for policemen. Whenever you
move in search of some skills that go
beyond just a high school education,
there are shortages developing in big
metropolitan areas. I am certain that
the experience in Los Angeles and Chi-
cago and Detroit and some other areas
is not going to be so different. There is
unemployment at the lower levels
where you have no skills and no edu-
cation, but in the areas where the peo-
ple are semi-professional or profes-
sional, the shortages have already
shown up. So just to fill the shortages,
just to fill nurses, nurses is another area
which we are hearing more and
more about every day. I have heard
some 1-minute speeches on the floor of
the Congress. I have seen items in the
newspapers about the problem of
not having enough nurses and other
medical personnel. So that is another
area of skilled and professional people
where you have a shortage.

Just to fill those traditional posi-
tions, just to take care of the careers
that we are all familiar with, you need
more people who are educated. But
when I talk about a great geometrical
increase in the benefits that you get
from having an educated population, I
mean more than just replacement of
the people who put a supply of those
people, and asking about professions that we have not
even conceived yet that are just shap-
ing up. The people in the area of genet-
ics, a large numbers of people in the
field of genetics, who were not there 10
years ago, it is an exploding field. Peo-
ple in biotechnology, on and on it goes
in terms of the kinds of research that
if you have the personnel, if you have
the people who have the scientific
know-how, then you can move much more rapidly to un-
earth new discoveries in science.

Whether you are talking about discov-
ery in biotechnology and microbi-
ology, in physics, all kinds of discov-
eries, scientists can take place in direct proportion to the
number of people who are educated. All of
the forward motion in terms of tech-
ology and science can also move for-
ward without the costs being so great.
This greater the supply of professionals
and technicians, the less the costs. We
have some high cost scientists and some high cost scientific projects be-
cause there are too few scientists avail-
able.

In the area of computer technology, it
is kind of a recession, a correction, they say, in the dot com industry.
Computer specialists were in high de-
mand. Information technology per-
sonnel, is in high demand and I am told
this is only a blip on the screen, that
pretty soon the demand for informa-
tion technology personnel will be as
great as it was before. So an invest-
ment in education pays off geome-
trically. If we do an extra dollar more
per year on education, for the next 10
years, it will give this society benefits
which are worth far more than we in-
vest. If you have to state everything in
terms of dollar value, trillions and tril-
ions of dollars would be realized be-
cause we would develop, we know that
there are secrets out there waiting to
be unlocked in biotechnology alone,
that if you put more people to work
there is a correlation between the ratio
of people put to work and the benefits
that you would achieve. The same
thing is true in certain areas of digi-
talization, computerization and those
areas. They reap benefits, what they
call in economic terms productivity.
Automation productivity has been
increased, and one of the downsides
of the great increase in productivity is
that it puts out of work a lot of people
who did mundane tasks but at the
same time it creates a need for a dif-
ferent kind of personnel with much more know-how.

We want to have the personnel with
the know-how available to take the
jobs. So our investment in education
has a dual effect of moving us forward
to an era where more will be unlocked
in biotechnology, new medical benef-
ts, new ways to decrease the energy employed to
produce items and all other so-called
seemingly unsolvable problems, prob-
lems that cannot be solved now, seem
t hey cannot be solved. You can	
come to grips with them if you get more personnel, if you get more trained people.
The training process, the education process
from the first grade to graduate school
and beyond graduate school, is such
that you are only going to produce a
certain number of geniuses, but you

If you give them the opportunity, they will develop to their fullest capac-
ity, which means that everybody will
be improved and everybody will be able
to make a contribution that they could
not make if they did not have the edu-
cation.

We should not hold back and hesitate
as most of our political leaders are.
The governors and the mayors and the
people who are in charge continually
become an obstacle in the forward
movement of the appropriation of the
adequate sums of money for education.
They are the ones who prefer to talk
about education without really improv-
ing education.

We have a problem in New York City
with the receipt of State aid over the
years has been clearly unfair. They have
not given the city pupils the same
kind of support from the State that the
other pupils have gotten outside of
New York City. A court suit was
mounted and a judge came to the con-
clusion that, yes, it is true. The State
has not been appropriately financing
the schools in the city and the State
should take corrective action. The gov-
ernor of the State has appealed that
decision, and one of the things he said
in his appeal is quite frightening. The
firm that was hired by the State of
New York, which is the firm that has
been used in a lot of school segregation
cases in the south, that firm has based
its defense, its appeal on the following
theory: That city students failed in
school because of their poverty. No
amount of money, whether to raise
teachers’ salaries to build new tech-
schools or to install science labs, would
make a difference. That is what the
States attorneys are saying, that pov-
erty is the cause of the failure of the
before the public outcry for improvements by dealing with basics. Basically, you need to provide basic instructional assistance by having trained teachers, teachers who are certified and know what they are doing. You need to have decent equipment, decent supplies, decent sized laboratories. You need a library at every school. The basics are not there.

Before we move to more theoretical kinds of considerations of account-ability and testing and blaming the teachers, let us put the basics in place. The basics are not there. However, these people who talk about $100 billion per year are on track because in stead of proposing utopian ideas, Dwight Allen and Bill Cosby are proposing ideas that make a lot of sense. Senator Christopher Dodd and the gentleman from California (Mr. George Miller) in the Act to Leave No Child Behind, S. 940, H.R. 1990, are making some sound proposals. I must point out that the Act to Leave No Child Behind is not just an education bill. This is about children. It goes be- yond education, to health, environment, nutrition, housing. This is about a program for children. In terms of the dollar figures, they come out at the same point, but the proposed approach is different. Nothing proposed here is out- landish, outrageous, utopian. It is all very sound and very on target.

But we have lost sight of that. In the deliberation of the education bill, I of- fered a motion to instruct which was related to construction. Now, because of the atmosphere that exists in this body, I am tempted to try to win votes by watering down the original amendment that I had made. We came all the way down from an amendment that I made which would have appropriated $10 billion a year over a 10 year period for school construction, to $1.2 billion, the amount equal to the amount appro- priated by the outgoing Clinton Admin- istration for school repairs, mostly emergency repairs.

So even though the need is clearly up at the present time, to at least $10 billion a year just for school constructi on, and that is based on several stud- ies that have been conducted by the General Accounting Office and con- ducted by the National Education As- sociation showing that you needed about $320 billion. The National Edu- cation Association study, if you com- bined school construction and repair with new technology, you need $320 bil- lion. New York State had the highest need of about $44 billion in order to bring the schools up to par to a level where they could serve the present popu- lation appropriately.

So my estimates and my figures on school construction were not pulled out of the air. They were already a compromise. But on the floor here I of- fered a motion to instruct which was watered down to $1.2 billion per year. Of course, that failed. It got a party line vote, and we failed to pass it. But it was a far cry from the need.

We have to do that. As people who are trying to compromise and get something done, we have to sacrifice our vision of what the need is. But I do not want the people out there who have had the common sense all these years to keep the pressure on elected offi- cials. Here is one proposal. We do not need $1.2 billion for school constructi on, we need $10 billion a year for school construction. We need the kind of figures that are stated in this book. American Schools, the $100 Billion Challenge.

I am going to read a few examples from this $100 billion challenge which Bill Cosby and Professor Dwight Allen put forth. I am going to read these, as I said before, not as a politician, an elected official offering these as sug- gestions that I intend to put in legisla- tion tomorrow, but as mind-stretching exercises.

Let us stretch our minds and try to look at education from the point of view of these experts. They are both Ph.D.s in education, they are both very concerned about it, but they are outside looking into the governmental process, and some of the conclusions that they come to are very instruc- tive. We did not hear from these people in hearings before we passed the Leave No Child Behind legislation. Nobody was interested in hearing these kinds of statements.

But there is a vision that is worth consideration by all that really care about education. In the section $100 bil- lion for teachers, a summary of the listing, they start out with $6 billion regular in-service training on the Internet for all teachers.

Now, we have pages and pages of dis- cussion of teacher training and teacher improvement, but I do not think any one of our legislative proposals dealt with anything of this nature, certainly not with that kind of figure. I think our total amount for training of teach- ers is something close to $4 billion for all training, and in-service training and upkeep for teachers.

Let me just read a few examples, $6 billion for regular in- service training on the Internet for all teachers. Compensate every teacher in America $2,000 per year extra to spend 2 hours a week on the Internet upgrad- ing their knowledge of his or her sub- jects, their teaching methods and of the newest research. We all agree that lots of teachers are out-of-date in their knowledge of both content and method of teaching. Current methods are hit and miss and often not valued by teachers who receive such training. The Internet offers a dramatic new po- tential. Developing and presenting new content and methods in a systematic way for all teachers can now be routine and effective. They estimate if at all possible—$6 billion they propose to spend on regular in-service training on the Internet for all teachers in the Cosby-Allen proposals.

Another area that they propose ex- penditures which I found to be inter- esting was the expenditure of $2 billion to train a corps of master teacher men- tors. Provide a trained corps of clinical
master teacher mentors for each teacher in training and for beginning teachers. There would be the concomitant benefits of paying teachers $2,000 to $5,000 stipends each year. This is above their salary. First of all, well-trained mentors would provide better supervision and guidance for new teachers, and if the mentors are well paid, they will be encouraged to provide more and more and better assistance and they will stay in the school system, instead of moving on to higher paying jobs elsewhere.

Another item, $5 billion, $5 billion, this is one I have never seen before, for a corps of $100,000 classroom teachers. Listen closely, $5 billion for a core of $100,000 classroom teachers. Pay 5 percent of all teachers, pay 5 percent of all teachers, an added $50,000 per year to attract who must be one of the brightest college and university graduates as master teachers.

In other words, you get master teachers who would be making up to $100,000 a year. Pay 5 percent of all teachers $100,000 a year. We need to break the mold of a single salary schedule for all teachers. Just as the dream of a NBA million dollar contract does energize sandlot and school basketball all over the Nation, realistic aspiration of $100,000 stipends per year for even a small percentage of teachers would energize applicants at all levels and increase the recruitment pool. We are a Nation that responds to financial incentives.

Another item, $10 billion, $10 billion, for teaching assistance and other support staff for teachers. Now, I would wholeheartedly endorse this one as being practical, being necessary, and we ought to write it into our legislation right away. Teaching assistance and other support staff for all teachers.

Build the concept of a teacher and his or her staff with clerical and technical support in the classroom, including teaching assistants and interns. Teachers are now required to do it all. Teachers are self-contained in their classrooms. Sporadically they may have teaching assistants or some volunteer support. If we are to make the most efficient use of our most valuable resource in education, well-trained teachers, we must begin to give them the support that is routine for all other professionals.

I think we ought to stress that. Real professionals, every other professional, whether you are talking about lawyers or doctors or engineers, they have staff; they have staff assistants, they have people at various levels of support. Teachers deserve the same kind of support, and you would actually have a more efficient and more effective classroom, a more effective use of your highest price personnel. If you were to have each teacher being seen as part of a unit, where they are the head of the unit, directing the unit, but they are not weighted down with a lot of tasks that are not professional, not productive and do not involve learning. So I wholeheartedly endorse that proposal as being a very practical one and one we should have moved on long ago.

We talk a lot of technology in the classroom and about the use of technology in the classroom, computers in the classroom. I do not think teachers should have to learn how to make computers do new things in terms of their curriculum and opening the eyes of youngsters with more creative approaches to teaching. They should not have to do all that and also learn how to fix the machine when it breaks.

When computers are on the blink, they should not have to be the ones to fix them, the servicing of the computers and the use of the equipment. There is a whole array of things that teachers should not have to do, and if you had that built in a system, that taken care of by a unit, you would have more people staying in teaching instead of resigning and retiring as quickly as they can.

Another item they have here in the Cosby-Allen proposals is a $1 billion item, challenge grants for teacher initiatives for educational reform. Teachers should be encouraged to examine their own practices and to try new initiatives. A series of challenge grants should be established, with teachers from other states making a judgment about the priorities of which initiatives to fund.

The whole debate on education and the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers. We talk a lot about what teachers should do, we have not talked about how we are going to train teachers, we even talk about teacher preparation institutions, penalizing them if they do not graduate teachers who can pass the certification tests. We are deep into the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers. We talk a lot about what teachers should do, we have not talked about how we are going to train teachers, we even talk about teacher preparation institutions, penalizing them if they do not graduate teachers who can pass the certification tests. We are deeply into the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers. We talk a lot about what teachers should do, we have not talked about how we are going to train teachers, we even talk about teacher preparation institutions, penalizing them if they do not graduate teachers who can pass the certification tests. We are deeply into the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers.

The debate over education and the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers. We talk a lot about what teachers should do, we have not talked about how we are going to train teachers, we even talk about teacher preparation institutions, penalizing them if they do not graduate teachers who can pass the certification tests. We are deeply into the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers. We talk a lot about what teachers should do, we have not talked about how we are going to train teachers, we even talk about teacher preparation institutions, penalizing them if they do not graduate teachers who can pass the certification tests. We are deeply into the production of the Leave No Child Behind Act in both Houses of the Congress, the people who were consulted least were the teachers.

There are all sorts of variations possible. For example, funding can be in the form of loans that include year of funding forgiven for every year as a teacher. We have had those proposals offered in terms of forgiving loans, but we have not had any proposals that talked about $10,000 per year in order to draw students to get a 6 year education.

Another item, $3 billion, one-year internship for teachers after professional training. These are items which coincide with some practical proposals that have been made in legislation already. $1 billion for higher salaries for more teacher educators. Increasing salaries of $10,000 teacher educators by $25,000 to $75,000 per year. Again, the same principle, to attract the brightest graduates into teacher education and to raise the standards of the teaching profession.

Another $1 billion is proposed for the development of teacher training materials. Then technology, $15 billion proposed for technology for all schools, the purchase of microcomputers and replacement. And on and on it goes, into a budget which concludes with $100 billion per year for education, American schools.

Again, I have been talking about a vision offered by Bill Cosby and Dwight Allen. Dwight Allen is a noted Professor of Education Reform at Old Dominion University, and Bill Cosby has a Ph.D. in education and has been interested in education for a number of years and has written several books on children and families.

In conclusion, I have offered these two visions which are outside the usual discussion that takes place here on the Hill. I just so happen they come at a time when there is a great need to keep the dialogue going.

We cannot sit still and wait until the conference committee acts. We should not sit still and wait until the final negotiation takes place, probably at the end of September. We need to keep the pressure on. The public needs to remind each one of us in the Congress that they have made education a priority, and making education a priority, there is a need to have resources behind the rhetoric.

The dilemma we face is that we have two bills that have passed, one in the other body and one here in the Congress, and both have authorization figures much higher than any provisions that have been made in the budget. We need to solve that dilemma in a positive way. We need to have the pressure applied from those who care about education to make the appropriations figures rise to the authorization figures as a one first positive step. At least the Leave No Child Behind legislation should not be hypocritical.
We are going to hear more about this as we go toward September. The important thing is that we should understand that the door is not closed, and the final decision has not been made. There is room for an appropriation which measures up to the authorization and all of us should dedicate ourselves to the proposition that we will fight to have the appropriation measure up to the authorization for education.

Mr. M CINNIS. Mr. Speaker, I would like to take a few moments of my Special Order to address a very sad situation that occurred yesterday in Winthrop, Washington State. As my colleagues know, this time of year is the time of year in our Nation across the Nation that we face horrible forest fires. Most of the time, we are able to conquer those fires through the able leadership of the Forest Service, the BLM, our professional fire departments, our volunteer fire departments and volunteers across the country. But every once in a while the fire gets the best of us, as it did in Storm King Mountain in Glenwood Springs, Colorado, the town that I was born and raised in.

I was in Storm King at the time of the incident and I remember the situation very well. I remember the horrible tragedies and the tears of the young children and the widows and the mothers and the fathers and all the families and the friends and the shock of that community. We had hoped that Storm King Mountain in Glenwood Springs, that the incident would never repeat itself, but we knew at some point in time that it would, because it is almost like part of a fate of fighting fires. Over a period of time, we are going to have casualties. It is a war of its own, really. We think about it, thinking about a fire that is unpredictable, in some cases; some cases it is predictable, an enemy that has no discrimination as far as who it picks to destroy. We see it destroy animals, we see it destroy mountains.

I know that basically, it is a force that can erupt, just like the force erupted yesterday. Yesterday we had a fire of about 5 acres and we had what we call the blowup. The thing that scares anybody dealing with fires, the worst condition that we can have are the conditions that accumulate in the incident called fire blowup. That means we have low humidity, we have very dry timber, and we have a wind that is unexpected that comes in. This fire which burns 5 acres over some period of time exploded from 5 acres to 2,005 acres in a matter of moments. These firefighters that lost their lives yesterday, 4 of them, had no chance. By the way, I understand we lost an 18-year-old firefighter, a 21-year-old firefighter, a slurry bomber at another fire; not this fire, but at another fire somewhere in the northwest as well.

So my words of honor this evening are for all 5 of those firefighters. But I am only recognizing the incident and the loss of the 4 firefighters who lost their lives yesterday. I would like to mention their names. Tom Craven, Tom was 30 years old. He was from Ellensburg, Washington. Karen L. Fitzpatrick. Karen was 18 years old, of Yakima. Devon A Weaver. Devon was 21 years old of Yakima. Jessica L. Johnson. Jessica was 19, of Yakima.

Tom, Karen, Jessica and Devon 2 days ago were alive. Two days ago, when our country called upon them to respond to a fire, they did so without hesitation. Now, despite the young age and, in fact, this was one of the first fires, or not the first fire for one of those individuals, despite the age, they received training. And at some point, one has to respond to their first fire. At some point, one has to pick up actual field experience.

Almost every firefighter we have had in the history of this country gets through those first few fires. In fact, almost all of our firefighters are able to retire, or at least leave it without a fatality. But that was not meant to be the case for these 4 young people. We lost a lot of spirit. We lost a lot of youth. Two days ago, we did not have families in mourning who had families who were excited that their children, in most cases, and I am sure in this case, were doing what they dreamed of doing for a long time, and that is going out and taking on fire, and going out and helping our country in a time of need. Going out and literally saving communities, saving animals, saving vegetation, saving our mountains. We have seen it. We have seen it throughout our country, what these people do.

I saw it in Storm King Mountain in Glenwood Springs, Colorado, about 7 years ago.

So my comments tonight are intended to be in honor of these 4 firefighters. In fact, I expand that beyond those 4 firefighters to the fifth firefighter who I understand lost their life in August, to all firefighters across the Nation. To those firefighters who today cannot of course hear these words because they are camped out on the side of a mountain fighting a fire somewhere in Colorado, fighting a fire in Oregon or Washington, or out there in California. These are gutsy people, and they carry out a mission that takes a lot of risk. They know the risk. They go into it with full knowledge. But I guess if one is a young spirit, one always goes into it thinking, I can overcome. I can get by it, but they did not get by it, and we should recognize them for the hero status that is properly bestowed upon them.

I can say to the families of these 4 deceased, our Nation, the United States of America, owes your family a great deal of gratitude, that we consider these lost firefighters heroes, the way the word “hero” should be used, not some celebrity figure, but for a figure to me that is much more of a hero than any movie star or sports figure could ever be, and that is these 4 young people who gave their lives yesterday for the United States of America.

ENERGY CRISIS IN CALIFORNIA

Mr. Speaker, I would like to move on to my topic of discussion. As usual, as my colleagues know, we have had preceding speakers here on the floor, and it was interesting when I listened to my good friend, the respected gentleman from California (Mr. FILNER) and the respected gentleman from California (Mr. DEFAZIO). Both, most of the time, seem to be fairly knowledgeable on the subjects that they address, but I have disagreements with the state representatives that they made this evening. I was surprised that the gentlemen from California, when they talked about the energy shortage that they have had in California, that has become typical with some of the people out of California, blame everybody else; blame everybody else.

If we listen to the gentlemen from California this evening, or if we listen to the gentleman from the northwest, one would think that everybody in this Nation is to blame for the shortage, the energy crisis that they have experienced in California, the blackouts in California have nothing to do with the political leadership of the State of California. That the energy blackouts in the State of California have nothing to do with the fact that they have not been able to build a power generation plant in California for years and years and years. The fact that they have an energy crisis in California has nothing to do with the fact that some people out there in that State that say, do not build in my State, do not build in my backyard. We do not need electrical generation plants. We do not need gas
 transmission lines in our State. Let the other States generate it and we will let them.

It was interesting to hear that the gentleman in the northwest is blaming what he calls the greedy companies. Well, I have seen plenty of greed in my life, and perhaps that is one of the contributing factors, but do not continue to run away from the fact that it was poor policy in California. I say California versus the northwest, because in the northwest it was not necessarily poor policy. In the northwest, they have a minor problem. The Columbia River is going dry. They have had a drought. They did not get the rain or the moisture that they expected, so they were not able to generate the hydro power which, by the way, is very clean power, a very clean way to generate energy. So the northwest is a little unique.

But let me focus in on California. They did not have a river go dry on them. What happened out there is that they refused to accept the responsibility, especially the political leaders in California, to look to the future, to have a vision for the future, to know that they have to provide energy for their constituents.

Now, I also heard the gentleman say, whacko environmentalists, that those who have criticized the State of California say it is because of whacko environmentalists. Well, there are some whacko environmentalists, there are some whacko developers. But putting that aside, the fact is that California has got a lot of balanced, reasonable environmentalists who understand the fact that they need clean generation of power. But the leadership in California, whether it is at the local level or the State level or the governor's level, have let it occur. They kind of brought it upon themselves.

Mr. Speaker, I know that the gentleman from California says he was tired of hearing people say, California brought it upon themselves. Well, let me say how interesting it is that out of 50 States, California stands alone. Do they in California not think that the political leaders in California had a little something to do with the problems that they are facing out there? No, my colleague mentioned, well, several of his colleagues have said, the heck with California, that is their problem, let them suffer. That is not the attitude of this Congressman. I think California is a very important State in our Nation. I do not think we can just walk away from California. But it is awful frustrating for those of us who want to help the State of California to see that there are those in California who are too stubborn or too lazy to have an ideological point of view that they will not even pull themselves up by their own bootstraps, that some in California will not provide self-help. That is what the problem is. We cannot walk away from California. This is a nation. This is a nation of 50 States. We are like brothers and sisters. We are tied together. It is a good union of being tied together.

But the fact is, when somebody is not pulling their load, we have to be frank about it and say, you are not pulling your load. It is like pulling a wagon up a hill. If we have somebody that is supposed to be pulling and they continually jump in the back and ride the wagon and you say to them, hey, Johnny, you got to get out of the wagon, you got to help pull it. Johnny gets out and says well, the whole reason I have to get out of this wagon is because the rest of you are not pulling hard enough. That is exactly what California is saying and that is exactly what some of my colleagues from California, especially the gentleman who spoke earlier, and that is a good analogy. We have said to the gentleman from California, look, we are not going to let the wagon go, we still have to get this wagon, on top of the hill. But you have to get out of the wagon and help pull the wagon up the hill. Do not just sit there and complain about how abused you are because the rest of us asked you to get out of the wagon to help us pull the wagon up the hill. Get out of the wagon, get off your duff and help the rest of us.

Mr. Speaker, ever since I was young my folks took us camping. My district is the Rocky Mountains of Colorado, born and raised, multi-generations in Colorado. My folks had a little rule. That is, if you went camping with them and you wanted to enjoy the campfire in the early mornings when it was quite chilly, as we know it gets, my district is the highest in the Nation, so it gets cool there in the mornings, or cold. So if you want to enjoy the campfire, guess what you got to do? You got to help gather the firewood.

In California, it is the same thing. If you want to have enough energy, not just for this generation, but for future generations, you got to help gather the firewood. You got to help build electric generation facilities. You have to plan natural gas transmission lines in your State. You have to be serious about conservation. To California’s credit, let me say that this energy problem that we have, conservation can make a big dent in it, and California does deserve credit. In the last couple of months, the citizens of California have been responsive to conservation issues, although I am concerned that as this energy problem begins to resolve itself, people will put conservation along the side. I think in this Nation, all of us, every American, needs to adopt conservation on a permanent adoption basis.

Conservation is important. But California, do not expect the rest of us not to be frustrated if they are not going to help themselves get out of this mess. Do not continue to blame the President out there, the Governor out there, did for some period of time. When he found out that was not working, he blamed the greedy companies down in California. Then he threatened to seize the companies, like it was some type of socialistic government that we operate in this country. Everything except themselves they have blamed for this crisis.

I am saying to the leaders and I am saying to the Governor of the State of California and I am saying to my good colleagues here on the floor from California who are taking these issues up about how badly treated California is, we want to help, but they have to help, too. Simply going up and saying, ‘‘In 2 weeks we want to help us’’ or ‘‘we want to help, but you have to help themselves.’’ How do they help themselves? The entire Nation can help itself with conservation and alternative fuels, those things. But alternative fuels really are something of the future. Today if we took all of the alternative energy in this world, all of the alternative energy in the world, and we put it all into the United States of America, we are talking about 3 percent of our power needs, 3 percent of our energy needs.

So clearly, alternative energy is going to be what the generation behind myself, my children’s generation, my three kids and their generation, they are going to be primarily dependent on that like we are dependent on fossil fuels for our generation, and the two generations preceding us were dependent upon it.

That is going to be important. But in the meantime, what do we do for the current generation? We have to do a couple of things. California has to allow generation facilities to be built on a reasonable basis.

The gentleman from California, as supported by the gentleman from Oregon, seemed to suggest that we set aside, or people on both sides of the aisle say that, ‘‘In 2 weeks we want to help us’’ to sit there and do nothing. That is what Gray Davis, the Governor out there, did for some period of time. When he found out that was not working, he blamed the greedy companies down in California. Then he threatened to seize the companies, like it was some type of socialistic government that we operate in this country. Everything except themselves they have blamed for this crisis.

That is absurd on its face. We can build generation facilities that are balanced. We can build Grayson facilities that have an acceptable impact on the environment. I am not asking, and I do not think many of my colleagues, are asking for the State of California
to drop all of their environmental laws. I do not know anybody in here who really is calling the mainstream environmental community in California wackos. I do not think they are wackos at all, and that is a direct quote from the gentleman from California who had spoken previously, about an hour ago.

What I am saying to California is, hey, there is a balance with the environmental regulation. There is a balance with the zoning. They are going to have to have a power line in somebody’s backyard in order for everybody backyad to enjoy power. They have to be reasonable.

It is unreasonable for California to be the only State in the last 10, 15, 20 years that has not allowed an electrical generation power facility to be built in their State. California, it is not a little odd that they are one out of 50? Is it not a little odd that they are now the one out of 50 that is suffering the crisis out there?

The rest of the country is not in an energy crisis. Now, we have gotten a very clear warning, no doubt about it, but we are not in an energy crisis. Why? Because the other States have taken a more reasonable approach than has the Southern California leadership of the State of California.

I am telling the Members, in my opinion, the Governor of California has taken absolutely the wrong direction on how to solve the problem. First of all, about 2 or 3 or 4 weeks ago, maybe 5 weeks ago, at the height of the market, the Governor finally decides he is going to sign long-term contracts, so he has bound the people of California into long-term contracts at the highest possible price. Nobody, we have seen in any number of years for electrical power. So if they think they are going to get rate relief in California, citizens of California, through my colleagues here, they are mistaken.

The second thing is, the Governor of California has tried to say to the people, let us put on price caps. In other words, they say, let us artificially lower the price of the power. Let us not have them pay what the power actually costs to produce, the price that allows for some margin for reinvestment for the next generation, but let us subsidize the power price by either selling bonds, which is what the Governor of California has done, he has invested in billions, by billions of dollars future generations to pay for this generation’s power.

If I was talking to the Governor, I would say that that is the wrong approach. First of all, this generation ought to pay for this generation’s power. Furthermore, this generation has an obligation to exercise some type of leadership, some type of responsibility, some type of vision for the next generation. We need to start planning for their energy needs.

California can join in and do it with us. Let me reiterate, I do not think California should be left alone. California, if it were a country of its own, would be the sixth most powerful country in the world. California has a lot of American citizens. It is a big part of our Union. It would be a deep, deep mistake for anybody on this House floor to turn their back and walk away from California.

But it is a mistake for anybody on this floor to look to our colleagues from the State of California and say, quit blaming everybody else, Governor. Quit blaming everybody else, newspaper editorials out there. Accept some of the blame. Consider and accept the fact that they have to help themselves, and let us move forward as a team.

That is my message to California: We want to help them pull up the hill, but they need to help us pull up the wagon. If they have been or if 15 years they have gotten a free ride by riding in the back of the wagon. Now all of a sudden it is time for them to come up and help the rest of us. When they do, they are going to find out, just like I found out, when I was a kid, the firewood at the campsite we get to sit by the campfire. But if they are not going to help gather firewood when they have the capability to gather firewood, then they should not sit by the campfire and enjoy the benefits of that fire.

Let me talk just for a moment about conservation, because while we are on energy, I think it is important that we discuss conservation.

I had a fascinating thing happen to me not long ago. I was talking to a young person. I would guess the person was 23, 24 years old, and seemed to me to be very, very bright, very capable, I got to talking, as I often do with that generation, and saying, what are you going to do? What is your career orientation?

This particular individual said to me, well, my orientation, my career, is how do we get energy out of the ocean. How do we get energy out of the ocean? At one point I had him in my office and I said, go home the next day and try to make a solution to a problem of how we get energy out of the ocean, and I will tell you whether you are going to make a solution or not. He took that challenge.

By the way, I have a fascinating thing happen to me about this. I had a young person that I ran into a general store in New York, and I said to him, you know, every time there is movement, to those who have studied physics and so on know, every time there is movement, we could generate electricity. I think it is important that we discuss conservation.

I had a fascinating thing happen to me not long ago. I was talking to a young person. I would guess the person was 23, 24 years old, and seemed to me to be very, very bright, very capable.

This little thing right there could capture energy from the ocean, how do we get energy out of the ocean? How do we get energy out of the ocean? I thought that little thing right there was fascinating. I think that is what is the ticket for the future. That is what our generation has an obligation to try and help the future generation, encourage that generation, and then the generations that are not yet born to become dependent upon, to be more creative than using fossil fuels.

But at the same time, we as a generation have an obligation to accept the responsibility that fossil fuels are what we primarily depend upon right now.

I heard my colleagues earlier critiquing the Bush administration about the energy policy. Ironically, I would mention that the Clinton administration and Clinton and Gore had no energy policy for 8 years, had no vision into the future about what to do in regard to energy. The only one who has come up recently, stepping forward, stepping out of the line to take a leadership role, has been President Bush.

I notice that they criticize right off the bat the fact that, in his budget, has cut some funds for some research. Let me tell the Members, this is an old-time Washington, D.C. trick. Every program in the Federal budget has a life. It is either for the children or it is for the future or it is alternative energy.

Why does every program have a good name to it? Because it is hard to cut it. It is hard to take money out of it. Once we create a program back in Washington, D.C., we can pretty well be assured that program has a life, a long life of being able to use taxpayer dollars.

The first thing that happens back here with the special interests, and special interests that go the entire band of interests, these special interest groups, the first thing they do when they get a program, and this includes the Federal agencies, the first thing they do when they get a program put into place is to put a protective shield around it, in case somebody ever comes and says, look, what is the bottom line? Tell me, what are we doing for accountability? Tell me what the results are. Oh, we would like to do an audit to see if you are doing what you said you are going to do. What kind of results have you given us for this money?
Then they can immediately deploy their weapons, the weapons of special interest. That is to say, how dare you ask a question about whether the money for example, money is being spent efficiently on the school lunch program? You must want children to starve. It is the same kind of thing we are seeing here. We have research programs that we have funded for years, year after year after year on energy, and the bottom line is the results are not there. They are not there.

The minute we go up to them, as the President has done, and said, look, we are going to have to take the money away and use it for some other purposes, use it for highways or something, we are going to put this money and put it into research we think is going to make a difference, the first thing they do is run to the local political media and say, my gosh, the President is proposing that we cut research. How terrible, in an energy crisis. This is a President who only wants oil drilling. He wants to cut our research, the President is proposing that we cut research. How terrible, in an energy crisis. This is a President who only wants oil drilling. He wants to cut our research, the President is proposing that we cut research. How terrible, in an energy crisis.

At best, at best that is a misleading statement. That is giving them the benefit, here. In fact, most of these programs, when we go after accountability, they are well-designed to do whatever is necessary to protect that program and keep that program alive. Let me talk for a moment about the energy policy of this country. I mentioned earlier that President Clinton, the former President and the Vice President, they had no energy policy. We need an energy policy. What happened in California, what happened up in the Northwest, now, the Northwest was primarily because of the Columbia River, but what happened in the Northwest was a warning shot to all 50 States. It was a warning shot saying to us, hey, one of these days we are going to face a real energy crisis. One of these days, we had better be prepared for it, because we are not going to get a second chance. We have to be prepared with energy alternatives.

What do we need to do that? We need to have some kind of energy policy. That is exactly what the President has done. Now, Members may not agree with the policy. Members may not agree with the policy, but they do not have an energy policy. What happened in California, what happened up in the Northwest, now, the Northwest was a warning shot to all 50 States. It was a warning shot saying to us, hey, one of these days we are going to face a real energy crisis. One of these days, we had better be prepared for it, because we are not going to get a second chance. We have to be prepared with energy alternatives.

And by saying we ought to put conservation on the table, and we ought to put alternative energy on the table, we have to talk about supply. We have to talk about exploration. Put it on the table. We have to talk about what areas of the country should or should not be explored for other types of energy recovery. At least the discussion has begun.

Now, that does not mean that we have to adopt everything they have put on the table. That is not what it means. But it means that we have an opportunity now to start to put this policy together. So discussion is an important benefit of what the President’s energy policy has put forward.

Now, let us talk about some of the other elements that are obviously very important for any energy policy. First of all, we have to ask what is it that every American could do? What could every American out there do to help our Nation on an energy policy, to help our Nation through these energy problems, to help our Nation assure future generations that an energy crisis is not going to be something they have to worry about?

The first thing every American can do, every American that is capable of moving and thinking, is conservation. Even simple conservation. Now, there is a lot of conservation that can take place in our Nation without an inconvenience to our lifestyles. Let me give a couple of examples. Turn off the lights when we leave the room. Now, that sounds kind of simplistic. Sounds like, gosh, that is so basic, of course we turn off the lights. But what difference does it make if I walk out of the room over here and I have the lights off for 3 minutes? Am I going to be back there in 2 minutes anyway. Imagine the difference if every American that is using lights right now as I speak shut off their lights for 2 minutes. How much energy would we save? How much conservation is that? It is significant. And let us put that together with a little less idling of our cars; maybe turning our air conditioning a little higher, at 70 degrees instead of having it set at 68 degrees; maybe in the winter having the heat set at 68 degrees instead of 75 degrees; maybe just simply checking our ceiling fans to make sure they are turning in a clockwise direction or motion so that they draw the cool air up and help cool our homes.

So we need to have a policy that as we put this energy policy on the table and we are crafting what a future energy policy should look like, we need to face the fact that we are going to have to talk about exploration. But that is only a part of the energy package that we need for this country. What other element should be in that energy package? Well, of course, alternative energy.

As I mentioned, I was fascinated by this little device, this device that I saw, whether it is wind power, whether it seizes energy from motion. That simple motion turns this little light on. That motion, through the physics and all the other engineering, we need to have that. We need to have research. But when we put research for alternative energy, we need to be able to have accountability from the people that we give this money to. We need to know that our research is at least moving us in the right direction. We need to know that the people doing this research have oversight. Because we do have an obligation not just to throw money at anybody that says I have an idea for future alternative energy, so give me money, Federal taxpayers.

There are a lot of scams that take place out there, and most of the people getting scammed in this country are taxpayers. And most of the scamming is done by special interest groups who know how to give a program a great name and then take gobs and gobs of money away and use it for something else. I say research is very important, it has to be research that means something. It has to be research that is going to come up with a result or at least move us towards the path of a result.

So we need to have accountability for alternative fuels. We also need to face the fact, as I said earlier in my comments, that if we took all of the alternative energy in the world, all of those different technologies, whether it is solar power, whether it is some other type of generational electrical power, even like this little device, if we took all of it around the world and directed all of it to the United States of America, it would only supply 3 percent of our needs.

So we need to have research for alternative fuels. We also need to face the fact that as we put this energy policy on the table and we are crafting what a future energy policy should look like, we need to face the fact that we are going to have to talk about exploration. But that is only a part of the energy package that we need for this country. What other element should be in that energy package? Well, of course, alternative energy.
can lessen our dependence on fossil fuels. If we do not do that, the demand for fossil fuels increases.

So how do we fill that gap? I will show my colleagues. On this chart right here, this is oil field production. This is the oil that we are now bringing out at the 1990–2000 growth rates. It is flat. It is actually not flat, as we can see from the angle of my pointer. It actually is declining. Our oil production is declining. Yet if we look at the red line to my left, we will see a line that is labeled oil consumption, and we see that that is going at an angle up and the oil production, field production, is at an angle going down. That means we have a projected shortfall. That is the blue.

How do we make up the difference? How can we possibly have oil consumption, here when we have energy production down here? Does not make sense, does it? Well, it does. Because what fills that blue spot on this chart, what goes in there and fills that big hole is foreign oil. Foreign oil. Our dependency on foreign oil.

Remember the other energy crisis? Many are too young to remember, but the energy crisis in the early 1970s is when we were 40 or 30 percent dependent on foreign oil. Today we are over 50 percent dependent on foreign oil. This gap right here is becoming larger and larger and larger. We need to begin to close oil consumption through conservation, and we need to bring up our energy resources through not just alternative energy but also through our own resources so that we become less dependent on countries like Iraq and so on.

So in my opinion an energy policy needs to be put together by this Congress. And we should continue for our President. We do not have to agree with all the elements of an energy policy, but certainly everybody in these chambers should commend the President for at least stepping forward and saying, number one, we need an energy policy, which is a dramatic change from what we have had over the last 8 years under the previous administration; and, number two, we need to put an energy policy together that makes sense on a number of different fronts: Conservation, alternative fuels, research, and further exploration of fossil fuels.

Now, there are some other areas that an energy policy brings up debate on this floor: Nuclear. Nuclear energy. Now, probably some of the most socialist-liberal groups in the world are the Europeans. Guess what, they have a 70 or 80 percent dependency on nuclear plants. The problem with nuclear, of course, is disposal. It burns cleanly, but we have disposal issues. Maybe we ought to put more of our research money into disposal.

Then there is hydropower. That is the energy of movement from water as it drops from a high point to a low point, and we grab that energy as it comes down to spin a turbine to create electricity. The cleanest energy that we have out there, and it uses a renewable resource. The energy that we use to run our cars, called gasoline, is not renewable. It has become more efficient, and frankly it has to become more efficient than it is today, but it is not renewable. Hydropower provides us with a renewable resource.

So my concluding remarks regarding energy this evening, before I move on to my other subject, are this: Number one, I am going to make some comments from my colleagues from California and the State of Oregon.

My message to the State of California is we are not turning our backs on California. We cannot. You are like a brother or a sister. We have 50 states. We all stick together. But the fact is, California, we cannot afford to have you riding in the back of the wagon anymore. We cannot continue to provide your energy, or if we do, you will have to pay the price that we need to get to provide it for you. You need to get out of the wagon and help yourself. California, you have to help other states that are not in the same predicament you are in for good solid reasons. You have got to help them pull the wagon. You cannot continue, California, to sit in the back of the wagon and point at everybody else and blame them for not being going to have to get out of the wagon and help pull too.

California, the frustration that some of us have on this House floor is the frustration that you do not want to seem to use self-help. In the last 15 or 20 years you have not wanted any self-help. You have refused to allow generation facilities in your State. You have not allowed gas transmission lines in your State for probably 8 or 10 years. You need some self-help.

California is too important to walk away from, even if they were not the economic power base that they are in this country. Even if it was the smallest State of the union like the State of Wyoming for population, we could not afford to walk away from California because we have an inherent obligation to the citizens of America to help our fellow States. But we also have the right within the realm of fairness to say, hey, if you are going to sit by the camp fire, you help collect the fire wood.

Now, from these chambers we should be open to some type of energy policy. The President has got to start it. He has put some ideas on the table. He does not live or die by those ideas, but he has exercised vision for this country and at least begin the debate. Congress. Let us put an energy policy together, Congress. We cannot afford, as we have done for the last 8 or 9 years, not to have an energy policy. So at least give credit to this President for stepping forward and putting an energy policy on the table.

Now, it is up to us to add or delete. In the elements of that, number one, look at conservation. Number two, look at exploration of questions and other ways it can be picked up. Number three, ask the legitimate question: How dependent should we be on foreign oil? Is over 50 percent a safe number? Should we continue to buy in that quantity or should we begin to accept a little of that obligation or a little of that reservoir ourselves to go into our own resources? Those are all questions that I hope we have good healthy debate on.

I know next week in several of the committees, including the Ways and Means Committee on which I sit, we are going to have that kind of debate. So energy is an important thing in this country.

Let me conclude my energy remarks with one final caution. We have seen in the last three or four weeks, although it may not be seen at the local pump, it should be seen at the local pump. If not, there should be some kind of question asked. But the price of gasoline in this country has dropped dramatically in the last 3 to 4 weeks. We now have a position where demand has dropped in part to conservation and supply has increased, so price has dropped.

I am a little concerned that as prices finally begin to drop at the pumps out there as they should, as heating and air conditioning bills begin to drop as they should, as our electrical generation facilities around this Nation become on line, and by the way, if every generation plant currently on the drawing board today is constructed we will have a new one line every day 5 days a week for the next 5 years so we will have adequate electricity, we are going to be put back into that comfort zone. We will not only not be facing an energy crisis, we will have energy comfort.

As we go into that it would be a very serious mistake, probably for our generation, certainly for the next generation, to believe that, one, we do not need to conserve; that, two, we do not need to look at alternative energy for the future; and that, three, we do not have some kind of obligation to continue to meet this generation’s needs by looking at our resources located within the boundaries of this country.

Let me move on from that.

Mr. Speaker, I had a discussion last night about public lands in the West, and I had some questions come up today which I thought would be worthy of clarification.
As many of my colleagues know, this is one of my favorite charts. Why? Take a look at this. This chart shows the water storage facilities in the United States. There are differences between the eastern United States and the western United States. I will just point out a couple of them.

First of all, water. The State of Colorado, and my district is this color, the poster here to the left. My district is about 64,000 square miles. My district is larger than the entire State of Florida. This is the highest point in the United States right here. As a result, we have water and lots of snow. Our State provides water, just the Colorado River, which goes like this, that river alone provides drinking water for 25 million people. But that water comes from snow melt. Colorado, this State in the center of the United States, has no water. It is the only State in the lower 48, Colorado, that has no free flowing water that comes into its State for its use. The only State out of the lower 48.

When one takes a look at water in the West, you have the western United States, a chunk about like this, that is over half of the United States, yet that area that I have just pointed out that I have the pointer on, while it consists of over half the land of the United States, it only has 14 percent of the water in the United States. We do not have much rainfall in the West. In the East, people sue each other to shove water, make sure that water is diverted over to their neighbor's property.

In the West, out in the West, life is written in water. Water is like blood in the West. We are an arid region. I had not seen a heavy rain until I came East. Our rain in Colorado is cold and does not last a long time. Once in awhile we get some heavy storms, but generally we do not get much rain. We depend very heavily in the West on water storage because for about 6 to 8 weeks, we get all of the water we could possibly ask for generally, and that is in the spring runoff as the high snows begin to melt and come down. But the rest of the year we do not have that kind of water. Even that 6 weeks, it is not on a consistent basis. Some years we have more snow, and some years we have less snow.

So in the West, we are dependent on water storage. In the West we have Hoover Dam with Lake Mead and we have the Glen Canyon Dam with Lake Powell that provides 80 percent of our water storage. Our water storage is necessary to get us from year to year. It is not nearly as critical in the East as it is in the West. In fact, primarily a lot of your water storage facilities in the East are flood control. You have got to much water.

Our water storage facilities in the West are also flood control, but primarily utilized to store these waters. That is the difference between the East and the West. Let me tell you another difference between the East and the West, and that is public lands. Follow my pointer over here to the left. In the early days of our country, our population really was on the East Coast like this up in this area. And our Nation began to acquire through the Louisiana Purchase and the Missouri buys and things like that large chunks of land out here. In the East our political leaders decided as we grow this great Nation of ours, we have to figure out how to get hold of this land and put people out on this land. You see back then, simply having a title, having a piece of paper that said you owned the land, it did not mean a hoot.

What you needed to do if you wanted to own the land is you needed to possess it probably with a six shooter on your side. That is where the old saying came from, "Possession is nine-tenths of the law."

So they came up with a problem, how do we influence people to move to the West? West being just Kentucky, out here in the Virginias. How do we get them to move west? Somebody came up with the idea, "Let's do what we did in 1776." What did they do in 1776? We all remember that date. What did they do in 1776? Believe it or not, the government decided beyond the deserters, or people who will defect, soldiers who will defect from the British army. As a reward we'll give them land if they will be defectors. So let's deploy the same type of strategy, not for defectors but since land seemed to work pretty well then, let's give away land. Let's tell people that if they move to the West, we will give them 160 acres. We'll call it the Homestead Act. Here is kind of a demonstration of it.

What has happened is of late, we have somebody said, we can't do that anymore. Somebody else said, we can't do that anymore. Some people say, I'll do it. In 1862, this is later on, because for a while, we could not get the Homestead Act because the North and the South while we could not get the Homestead Act there, so we have to influence people to move to the West. We'll call it the Homestead Act.

Here is kind of a demonstration of it. In 1862, this is later on, because for a while, we could not get the Homestead Act because the North and the South were constantly fighting because they did not want too much of a population in one area that might go slavery or might be opposed to slavery. But in 1862 the U.S. Congress passed the first of many homestead laws that opened settlement of the West. The law provided that anyone was entitled, either the head of a family, 21 years old or a veteran of 14 days of active service in the U.S. Armed Forces, and who was a citizen or had filed a declaration in the U.S. Armed Forces, and who was a citizen or had filed a declaration intending to become a citizen could acquire a tract of land in public domain not exceeding 160 acres. We have got to allow the people to use the land. That is where the concept of public lands came from, and that is where the concept of multiple use came from and that is where the sign that I grew up with, when I would go into the forest or Federal lands and, by the way, in my district almost every community in my district is completely surrounded by public lands, when we went on those public lands, there was a large sign there, "You are now entering the Roosevelt National Forest, a land of many uses." A land of many uses. That is just what I have here to the left of my chart.

What has happened is of late, we have organizations like the National Sierra Club who would like to take down the water storage project at Lake Powell which consists of about 40 percent of our water storage in the West. We have groups like Earth First that are coming out and trying to educate people out here in the East that in the West all this land, the reason it was never put into private ownership was so that...
it could be conserved for all future generations and not to be used by the people in the West and really we ought to get rid of the concept of multiple use.

What they do not tell you is there were some lands, like right up there, the great Yellowstone National Park, Teton National Park, fabulous areas. Everybody should go see those areas. Those were set aside specifically as national parks and so on. But this land out here was never intended to be a land with a no trespassing sign on it. It was thought to be a land that could support life, a land of which the people could have multiple uses, whether it was recreation, whether as we know today protection of the environment, whether it was farming or skiing or having a highway or having a power line or having your home or being able to go out and watch the wildlife.

And my purpose here tonight, after my discussion last night, was not an attack on the East obviously, but to help my dear colleagues from the East, so that you can talk to your constituents and say, you know, life in the West really is different. I mean, they are America one country, but we need to take into consideration public lands and private lands. We need to take into consideration the different water issues of the West, compared with the water issues of the East. We need to take into consideration the fact that in the West, they deal with much different geographic differences, or elevations even, than we do in the East. And as you begin to look at those things, as you begin to hear our side of the story, a just a hint, you begin to say, wow, I did not realize that. I did not know that. Gosh, that map that you showed us this evening really does show something that we ought to think about, something we ought to consider when we make legislation off this fine floor of the House of Representatives.

So my purpose again to reiterate tonight is simply to demonstrate that there are differences that we must consider as we have legislation dealing with everything from water to public lands.

Mr. Speaker, let me very quickly end my remarks as I started my remarks, and that is, I wish to honor this evening four firefighters who lost their lives yesterday in service to their country. These firefighters were Tom L. Craven, 30 years old, of Ellensburg; Karen L. Fitzpatrick, 18 years old, of Yakima; Devin A. Weaver, Devin was 21 years old, of Yakima; and Jessica L. Johnson, who was 19 years old, of Yakima.

If some of you colleagues have just come in towards the end of my remarks, let me tell you that 2 days ago, these four young people were called to service to fight a fire, a fire that started at five acres and within minutes moved to 2,500 acres. From five to 2,500. These firefighters and some of the others that managed to survive on that fire experienced the horror every firefighter has, the bad dream that every firefighter has, and that is called a blowout. These four people fit the classification of the definition of the word hero as we see it in our dictionary, as we feel it in our mind, as we think about it in our emotions.

In my concluding remarks tonight, I would ask that this body and every citizen in America, all your constituents, extend their sympathies and their prayers to the families of these firefighters who lost their young loved ones, and also, it also gives us a little time for consideration. The next time you see a firefighter, whether it is a volunteer, fireman, professional fireman, a police officer, an EMT or just the local volunteer from the community that helps us take on the battle of fires which we face every summer, pat them on the back, tell them thanks, tell them we care about them.

But tonight, colleagues, before you go to sleep, if you say prayers, and I do, if you say prayers, say just a little prayer for those firefighters who gave their lives in the last 24 hours as the duty of their Nation called.

They answered that call. They fulfilled their duty and they are now part of history. I ask for your consideration and your prayers.

The SPEAKER pro tempore (Mr. KEEN). Pursuant to clause 12 of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly at 11 o’clock and 31 minutes p.m., the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. DEERE) at 1 o’clock and 23 minutes a.m.
EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications not included in the Speaker's table and referred as follows:

2825. A letter from the Head, Regulations and Legislation Branch, Administrative Law Division, Department of the Navy, transmitting the Department's final rule—Disposition of Property (RIN: 0703–AA60) received July 2, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

2826. A letter from the Head, Regulations and Legislation Branch, Administrative Law Division, Department of the Navy, transmitting the Department's final rule—Rules Limiting Public Access to Particular Installations (RIN: 0703–AA63) received July 2, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

2827. A letter from the Head, Regulations and Legislation Branch, Administrative Law Division, Department of the Navy, transmitting the Department's final rule—Rules Applicable to the Public (RIN: 0703–AA64) received July 2, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

2828. A letter from the Secretary, Department of Defense, transmitting a report on the approval of the Secretary of the Navy, General David S. Weisman, United States Army, and his advancement to the grade of lieutenant general on the retired list; to the Committee on Armed Services.

2829. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the AGENCY's final rule—Aminoethoxyvinylglycine; Temporary Tolerance [OPP–301144; FRL–6788–7] (RIN: 2070–AB78) received July 6, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

2830. A letter from the Acting Secretary & COO, NMS, Office of the President, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2831. A letter from the Acting Assistant Secretary for Budget and Administration, Executive Office of the President, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2832. A letter from the Acting Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule—Atlantic Highly Migratory Species; Rejection of a petition (Docket No. 051701G) received July 9, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

2833. A letter from the Acting Assistant Secretary for Budget and Administration, Executive Office of the President, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2834. A letter from the Acting Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule—Finding of Affirmative Action for the Exclusive Economic Zone Off Alaska; Correction to the Emergent Interim Rule; Closure (Docket No, CONGRESSIONAL RECORD—HOUSE

July 11, 2001

Mr. HORN, for 5 minutes, today.

Mr. WELDON of Florida, for 5 minutes, today. (The following Member (at his own request and by special privilege) made the remarks and includes extraneous material.1)

Mr. WAXMAN, for 5 minutes, today.
to Government information and services, and for other purposes: to the Committee on Government Reform.

By Mr. KUCINICH (for himself, Mr. CONyers, Mr. LEWIS of Georgia, Mr. HINCHIrt, Mr. HARAll, Ms. LER, Mr. McCAIN, Mr. SNEIDER, Mrs. MALoney of New York, Mr. UDAIl of Colorado, Mr. BROWN of Ohio, Ms. SOLIS, Mr. PARK of California, Mrs. JONES of Ohio, Mr. STARK, Ms. McKINNEY, Mr. JACKson of Illinois, Mr. PAYNE, Mr. SANDERS, Ms. JACKson-Lee of Texas, Mr. FILNER, Mr. DAVis of Illinois, Ms. VELAZQUEZ, Mr. DeFAZIO, Mr. GUTierrez, Mr. HONDA, Mr. OWENS, Mr. EVANS, Ms. SCHRADER, Mr. TOWNs, Ms. CASRON of Indiana, Mr. SERRANO, Mr. BAIrD, Mr. HOLT, Mr. McGOWEn, Ms. WAItERS, and Mr. SCOTT):

H.R. 2459. A bill to establish a Department of Peace; to the Committee on Government Reform, and in addition to the Committees on International Relations, the Judiciary, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BOEHLERT:

H.R. 2460. A bill to authorize appropriations for environmental research and development, identification of energy alternatives, demonstration, and commercial application of energy technology programs, projects, and activities of the Department of Energy; to the Committee on the Environment and Radiactive Waste; and for other purposes; to the Committee on Science.

H.R. 2461. A bill to amend the Federal Election Campaign Act of 1971 to provide for public funding for House of Representatives elections, and for other purposes; to the Committee on House Administration.

By Mr. BRADY of Pennsylvania:

H.R. 2462. A bill to amend the Internal Revenue Code of 1986 to provide an exclusion from gross income for that portion of a government pension received by an individual which does not exceed the maximum benefits payable under the Social Security Act which could have been excluded from income for the taxable year; to the Committee on Ways and Means.

By Mr. BRADY of Texas:

H.R. 2463. A bill to provide limits on contingency fees in health care liability actions; to the Committee on the Judiciary.

By Mr. BRADY of Texas:

H.R. 2464. A bill to amend the Internal Revenue Code of 1986 to allow a deduction from taxable income; to the Committee on Ways and Means.

By Mr. BYRANT (for himself and Mr. HILLIARY):

H.R. 2465. A bill to amend the Appalachian Regional Development Act of 1965 to add Hickman, Lawrence, Lewis, Perry, and Wayne Counties, Tennessee, to the Appalachian Regional Commission on Transportation and Infrastructure.

By Mr. COBLE (for himself, Mr. EHRLICb, Mr. GOSs, Mr. BAIR of Georgia, Mr. HICKs, Mr. HEPLEy, Mrs. CURb, Mr. CULBerson, Mr. OTTER, Mr. TIBREI, Mrs. BIGGERET, Mr. HILLIARD, and Mr. RACHU):

H.R. 2466. A bill to amend the diamond title 49, United States Code, to permit an individual to operate a commercial motor vehicle solely with

in the borders of a State if the individual meets certain standards prescribed by the State, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. COBLE:

H.R. 2467. A bill to suspend temporarily the duty on [3,3′-Bianthra[1,2-c;8]anthraquin]-6,6′(1H,1′H)-dione; to the Committee on Ways and Means.

By Mr. COBLE:

H.R. 2468. A bill to extend the suspension of duty on 3-amino-2-(sulfato-ethyl sulfonyl) benzidine; to the Committee on Ways and Means.

By Mr. COBLE:

H.R. 2469. A bill to extend the suspension of duty on MUB 738 INT; to the Committee on Ways and Means.

By Mr. COBLE:

H.R. 2470. A bill to extend the suspension of duty on 5-amino-N-(2-hydroxyethyl)-2,3-dioxolene-1,1-diol; to the Committee on Ways and Means.

By Mr. COBLE:

H.R. 2471. A bill to extend the suspension of duty on 2-amino-5-nitrothiazole; to the Committee on Ways and Means.

By Ms. JACKSON-LEE of Texas:

H.R. 2472. A bill to protect children from unsolicited e-mail smut containing sexually oriented advertisements offensive to minors; to the Committee on the Judiciary, and in addition to the Committees on Science, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BOEHNER of Michigan:

H.R. 2473. A bill to amend the Federal Election Campaign Act of 1971 to reform the financing of campaigns for election for Federal office, and for other purposes; to the Committee on House Administration, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ROHRABACHER:

H.R. 2474. A bill to amend the Immigration and Nationality Act to specify that improper reentering the United States after removal subsequent to a conviction for a felony shall be under circumstances that stress strenuous work and sparse living conditions, if the alien is convicted of another felony after the reentry; to the Committee on the Judiciary.

By Mr. ROHRABACHER:

H.R. 2475. A bill to provide for the distribution to coastal States and counties of revenues collected under the Outer Continental Shelf Lands Act; to the Committee on Resources.

By Mr. SANDERS (for himself, Mr. McGOWEn, Mr. ALLEN, Mr. BALDacci, Mr. BISHOP, Mr. BLAGOEVICH, Mr. BOUCHER, Mr. CONyers, Mr. CROWLEY, Mr. DeFAZIO, Mr. DELAHUNT, Mr. EVANS, Mr. FILNER, Mr. FORD, Mr. FRANK, Mr. HINCHY, Mr. LANTOS, Ms. LEE, Ms. MCCARTHY of Missouri, Ms. MCCLINTOCK, Mr. MEEKs of New York, Mrs. MINK of Hawaii, Mrs. NAPOLIANTO, Mr. OLVER, Mr. OWENS, Mr. PASCRELL, Mr. PAYNE, Mr. SCHAKOWSKY, Mr. SLAUGHTER, Mr. WAXMAN, and Mr. WERNER):

H.R. 2476. A bill to amend the Higher Education Act of 1965 to increase the funds available for the provision of student financial assistance, and for other purposes; to the Committee on Education and the Workforce.

By Ms. WATERS:

H.R. 2477. A bill to extend title 49, United States Code, to prohibit the expansion of the passenger or cargo capacity of any airport that is located in a county with a population of more than 400,000 and that has the capacity to serve 80,000,000 or more air passengers annually; to the Committee on Transportation and Infrastructure.

By Ms. WOOLSEY (for herself, Mr. FILNER, Mr. SANDERS, Ms. McKINNEY, Mr. HOF, Mr. THOMPSON of Mississippi, Mr. PAYNE, Mr. BAIrD, Mr. BABAC, Mr. BALDacci, Ms. RIVERS, Mr. BLUMENAUER, Mr. LANTOS, Mrs. MINK of Hawaii, Mr. WU, Mr. HONDA, and Mr. UDAIl of Colorado):

H.R. 2478. A bill to establish a balanced energy program for the United States that unlocks the potential of renewable energy and energy efficiency, and for other purposes; to the Committee on Ways and Means, and in addition to the Committees on Science, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. YOUNG of Alaska:

H.R. 2479. A bill to ratify an agreement between The Aleut Corporation and the United States of America to exchange land rights received under the Alaska Native Claims Settlement Act for certain land interests on Adak Island, and for other purposes; to the Committee on Resources, and in addition to the Committee on Armed Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. WALDEN of Oregon:

H. Res. 187. A resolution designating majority membership on certain standing committees of the House; considered and agreed to.
CONGRESSIONAL RECORD—HOUSE
July 11, 2001

H.R. 1171: Mr. KENNEDY of Minnesota.
H.R. 1073: Mr. TIBERI, Mr. CUMMINGS, Mr. LA Tourette, Mr. Levin, Mr. CAPUANO, Ms. Woolsey, Ms. Napolitano, Mr. Neal of Massachusetts, Mr. Green of Wisconsin, Mr. Gutierrez, Ms. Eshoo, and Ms. Waters. 
H. Con. Res. 116: Mr. HOLLON, Mr. GUTIERREZ, and Mr. TERRY.

AMENDMENTS
Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H. Res. 230
Offered By: Mr. Baca
Amendment No. 31: Page 74, after line 21, insert the following new section:
SEC. 741. The amount otherwise provided for in the Agricultural Research, Education, and Extension Programs—Cooperative State Research, Education, and Extension Service—Research and Education Activities for an education grants program for Hispanic-serving Institutions (7 U.S.C. 4231) is hereby increased by $16,508,000.
CONGRESSIONAL RECORD—HOUSE

H.R. 2356

OFFERED BY: Mr. Bentsen

AMENDMENT No. 1: Amend section 308(a)(1) to read as follows:

(1) in subparagraph (A), by striking "$1,000" and inserting "$2,000"; and

H.R. 2356

OFFERED BY: Mr. Bentsen

AMENDMENT No. 2: Strike subsections (a) and (b) of section 308 and insert the following:

(a) INCREASE IN LIMITS ON INDIVIDUAL CONTRIBUTIONS TO NATIONAL PARTIES.—Section 315(a)(1)(B) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)(1)(B)) is amended by striking "$20,000" and inserting "$25,000".

(b) AGGREGATE INDIVIDUAL LIMIT.—Section 315(a)(3) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)(3)), as amended by section 102(b), is amended by striking "$30,000" and inserting "$25,000".

H.R. 2356

OFFERED BY: Mr. Terry

AMENDMENT No. 3: Amend section 308 to read as follows:

SEC. 308. INCREASE IN CONTRIBUTION LIMITS.

(a) INCREASE IN INDIVIDUAL AND POLITICAL COMMITTEE CONTRIBUTION LIMITS.—Section 315(a) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)) is amended—

(1) in paragraph (1)—

(A) in subparagraph (A), by striking "$1,000" and inserting "$3,000";

(B) in subparagraph (B), by striking "$20,000" and inserting "$60,000";

(C) in subparagraph (C), by striking "$5,000" and inserting "$15,000"; and

(2) in paragraph (3) (as amended by section 102(b))—

(A) by striking "$30,000" and inserting "$75,000"; and

(B) by striking the second sentence.

(b) INCREASE IN MULTICANDIDATE LIMITS.—Section 315(a)(2) of such Act (2 U.S.C. 441a(a)(2)) is amended—

(1) in subparagraph (A)—

(A) by striking "$5,000" and inserting "$7,500"; and

(B) by inserting "except as provided in subparagraph (D)," before "to any candidate";

(2) in subparagraph (B)—

(A) by striking "$15,000" and inserting "$30,000"; and

(B) by striking "or" at the end;

(3) in subparagraph (C), by striking "$5,000" and inserting "$7,500"; and

(4) by adding at the end the following:

"(D) in the case of a national committee of a political party, to any candidate and his authorized political committees with respect to any election for Federal office which, in the aggregate, exceed $15,000.".

(c) INDEXING.—Section 315(c) of such Act (2 U.S.C. 441a(c)) is amended—

(1) in paragraph (1)—

(A) by striking the second and third sentences;

(B) by inserting "(A)" before "At the beginning"; and

(C) by adding at the end the following:

"(B) Except as provided in subparagraph (C), in any calendar year after 2002—

"(i) a limitation established by subsection (a), (b), (d), or (h) shall be increased by the percent difference determined under subparagraph (A); and

"(ii) each amount so increased shall remain in effect for the calendar year.

"(C) In the case of limitations under subsection (a), each amount increased under subparagraph (B) shall remain in effect for the 2-year period beginning on the first day following the date of the last general election in the year preceding the year in which the amount is increased and ending on the date of the next general election."; and

(2) in paragraph (2)(B), by striking "means the calendar year 1974" and inserting "means—

"(i) for purposes of subsections (b) and (d), calendar year 1974; and

"(ii) for purposes of subsections (a) and (h), calendar year 2001.";

(d) INCREASE IN SENATE CANDIDATE CONTRIBUTION LIMITS FOR NATIONAL PARTY COMMITTEES AND SENATORIAL CAMPAIGN COMMITTEES.—Section 315(h) of such Act (2 U.S.C. 441a(h)) is amended by striking "$17,500" and inserting "$90,000".

(e) EFFECTIVE DATES.—

(1) Except as provided in paragraph (2), the amendments made by this section shall apply to calendar years beginning after December 31, 2001.

(2) the amendments made by subsection (c) shall apply to calendar years after December 31, 2002.
INDIA, RUSSIA AGREE ON $10 BILLION IN DEFENSE CONTRACTS

HON. DAN BURTON
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. BURTON of Indiana. Mr. Speaker, on June 4, the Information Times reported that India and Russia have signed $10 billion worth of defense contracts. This is not good for American interests in the world or for the cause of freedom.

Much has been written lately about the Indian Government's desire to improve its relations with the United States. However, we must not forget that India just recently voted to oust the United States from the UN Human Rights Commission. It supported a Chinese bid to table our resolution condemning Chinese human-rights violations. In May 1999, according to the Indian Express, Defense Minister George Fernandes convened a meeting with the ambassadors to India from Cuba, Communist China, Libya, Yugoslavia, and Russia to construct a security alliance "to stop the U.S." India was an ally of the former Soviet Union and publicly supported its invasion of Afghanistan.

Mr. Speaker, America's national interests are best served by seeking new allies in south Asia. The best way to achieve that is to support the legitimate aspirations for freedom of the occupied and oppressed nations of South Asia such as Kashmir, Nagalim, and several others by means of a free and fair plebiscite under international supervision on the question of independence. Until India allows that democratic vote and permits all the minorities and every citizen to exercise their rights freely, we should cut off all aid to India. That should focus their attention on practicing democratic principles, not on grabbing every available military technology in pursuit of hegemony in South Asia. These are the best measures we can take to support the cause of freedom in the Indian subcontinent.

Mr. Speaker, I would like to place the Information Times article of June 4 into the RECORD.

INDIA, RUSSIA SIGN ABOUT 10 BILLION DOLLARS DEFENSE CONTRACTS

Russia, 4 June 2001 (VOA): India and Russia have signed defense contracts worth some $10 billion as the two countries seek to increase their military cooperation.

The signing came during a visit to Russia by Indian Foreign Minister Jaswant Singh. Singh arrived in Moscow late Sunday for a series of meetings with Russian officials that will also focus on the "United States' proposal for a national missile defense system."

Russia opposed the plan, while India has indicated it is open to the idea.

Among the agreements already concluded are major Indian purchases of Russian Su-30MKI fighter jets and T-90 tanks.

Russian Deputy Prime Minister Ilya Klebanov says the two countries will sign an agreement later this year to jointly develop a military transport aircraft and a next-generation fighter plane.

Klebanov says contracts for the sale of a Soviet-era aircraft carrier to India will be signed later this year. India has traditionally been one of the largest customers for Russian weapons.

RECOGNITION OF THE VETERANS OF WORLD WAR II

HON. MICHAEL FERGUSON
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. FERGUSON. Mr. Speaker, in recent years there has been an increased movement to recognize veterans of World War II. Despite improved awareness, there are many veterans whose heroic efforts to preserve this great country are still overlooked. Accordingly, we must continue to take greater strides to demonstrate the appreciation and gratitude these loyal Americans deserve for the sacrifices they made.

During World War II, tens of thousands of U.S. POWs were captured and either killed under unspeakable conditions or forced into slave labor for Japanese companies. After the United States surrendered its forces on the Bataan Peninsula, Philippines in early 1942, the infamous 60-mile Bataan Death March claimed the lives of hundreds of Americans. In fact, more than 14,000 American POWs perished from disease, starvation, injury, brutality or execution at an appalling 40 percent death rate that proved it was more deadly to be a prisoner of the Japanese than to fight in battle. The prisoners who survived the Bataan Death March were joined by other American prisoners who were taken at Corregidor and throughout the Pacific—Guam, Wake Island, and survivors of the sinking of the U.S.S. Houston.

Any words used to describe the conditions these American prisoners faced cannot do justice to the pain and suffering that they experienced. Upon arrival in Japan and Japanese-occupied territories such as Manchuria, they were sent to work as slaves for some of Japan’s richest companies, like Mitsubishi and Nippon Steel—companies that remain wealthy and powerful today.

The U.S. played an instrumental role in the discussions between German companies and their victims during the Holocaust litigation, and it is now time that our government extend the same gesture of gratitude and support for the POW veterans of World War II. As such, I am proud to voice my strong support for H.R. 1198, the "Justice for United States Prisoners of War Act of 2001," introduced by Representatives DANA ROHRABACHER (R-CA) and MICHAEL HONDA (D-CA).

I applaud Representatives ROHRABACHER and HONDA for their leadership in bringing these Japanese companies to justice on behalf of the well-deserving veterans who suffered and lost their lives. The bipartisan legislation will rightfully allow American POWs to sue Japanese companies in U.S. state or federal court for losses and injuries sustained during the time they were imprisoned and forced into slave labor. Moreover, the bill also provides that if Japan enters into peace settlement terms with another country more beneficial to that country than to the United States, those additional benefits will also be extended to the United States.

I believe our POWs, who have given years of their lives to serve the cruel interests of our wartime enemies should at least be allowed the opportunity to have their grievances redressed in an international court of law. As a nation, which has thrived because of the sacrifices of these brave men, we must do everything in our power to recognize and repay their courageous efforts.

We owe it to these POWs—both the survivors and those killed in action—who made immeasurable sacrifices for the brighter future of this great nation. We owe it to their families, who also made sacrifices by losing precious days, weeks and months with loved ones who were off serving, preserving the peace and freedom we have in this country today.

CONSECRATION OF FATHER JACOB ANGADIATH

HON. J. DENNIS HASTERT
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. HASTERT. Mr. Speaker, today, I would like to congratulate Father Jacob Angadiath, who will head up the newly created diocese in Chicago to serve Syro-Malabar Catholics in the United States and Canada. The consecration of Father Angadiath as bishop of the diocese will take place on July 1st.

Earlier this year, Pope John Paul II created the new diocese to serve the Syro-Malabarians of North America. The Syro-Malabar Archepiscopal Church is an Eastern Catholic Church with more than 3 million faithful, and they trace their roots to St. Thomas the apostle, who brought the Gospel to South ern India. Though the vast majority of Syro-Malabarians live in India, about 75,000 live in North America, including about 7,000 in Chicago.

The creation of the new St. Thomas Syro-Malabar Catholic diocese of Chicago is truly a recognition by Pope John Paul II of this faithful community, which refers to itself as "oriental in worship, Indian in culture and Christian in religion." It is the first Syro-Malabar diocese outside of India.

● This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.
I want to again congratulate Father Angadiath, and wish him the best of luck as he takes on his new responsibilities as bishop. The St. Thomas Syro-Malabar Catholic diocese will provide a spiritual home for the Syro-Malabar Catholics outside of India, and it will be a wonderful addition to Chicago's many other religious communities.

CONGRATULATING STEVE SAMUELIAN

HON. GEORGE RADANOVICH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to congratulate Steve Samuelian for being presented with the Chair's Award from the United Way of Fresno County (UWFC). The Chair's Award is selected by the Chair of the Board of Directors of the UWFC, and is awarded to the board member who has demonstrated outstanding service to community improvement.

The main goal of the United Way is to maximize financial resources in order to build a healthier community while improving the quality of life. Steve's exemplary service to the UWFC has helped advance the mission, values, and goals of the United Way. In addition to his work on the Board of Directors, Steve recruited and chaired the Leadership Giving Committee of the United Way of Fresno County. The Leadership Giving Committee is the group that recruits and handles major donors to the United Way of Fresno County. The amount of contributions to this committee has doubled under Steve's guidance.

Steve serves on the Board of Directors of the Clovis District Chamber of Commerce and participates in the National Education Association's Read Across America Program. He is also a member of the Resource Development Committee for the Fresno Leadership Foundation. In addition, Steve is actively involved in the Armenian-American community, and serves on the Board of Advisors for the Armenian Studies Program at California State University, Fresno.

Mr. Speaker, I want to congratulate Steve Samuelian for earning the United Way of Fresno County Chair's Award. I urge my colleagues to join me in recognizing Steve Samuelian's contributions and dedication to the community.

TRIBUTE TO COLONEL TIMOTHY M. DANIEL

HON. IVE SKELTON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. SKELTON. Mr. Speaker, let me take this means to congratulate and pay tribute to Colonel Timothy M. Daniel, who recently retired from the United States Army Corps of Engineers where he served as Chief, Commander's Planning Group. He has distinguished himself, the Army, and our nation with dedicated service.

EXTENSIONS OF REMARKS

Colonel Daniel, originally from Wyoming, enlisted as a soldier in 1970. Following his tour of duty as a construction surveyor and instructor, he returned to the University of Wyoming where he graduated in 1975. He accepted a ROTC commission and reentered active duty in July 1975.

Colonel Daniel is a graduate of the engineer officer basic and advanced courses, Command and General Staff College. He holds a bachelor's degree in International Relations. A master's degree in Public Administration and attended Harvard University's John F. Kennedy School of Government as a fellow in their national security program.

Prior to his assignment as Chief, Commander's Planning Group, United States Army Corps of Engineers, he served as the Garrison Commander of the United States Army Garrison, Fort Leonard Wood, Missouri. His other commands include the 35th Engineer Battalion and company command at the United States Army Engineer Center, serving again at Fort Leonard Wood, Missouri.

Other assignments of Colonel Daniel include Long Range Planner, Strategic Plans and Policy Division, Office of the Chief of Staff for Operations and Plans at Headquarters, Department of the Army; Area Engineer for Israel; executive officer, 14th Combat Engineer Battalion, TRADOC Liaison Officer to the French Corps of Engineers, Angers, France; and Group Engineer, United States Army Artillery Group, Cakmak, Turkey.

Mr. Speaker, Colonel Daniel has dutifully served our nation. As he prepares to spend more time with his wife Carol and his children, Thomas and Kelly, I know the members of the House will join me in expressing appreciation for his years of service.

IN HONOR OF ARTHUR MAYER, JR. WHO HAS BEEN ELECTED NATIONAL PRESIDENT OF THE BENEFICENT AND PROTECTIVE ORDER OF ELKS

HON. ROBERT MENENDEZ
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to recognize Arthur Mayer, Jr., who formally became President of the Benevolent and Protective Orders of Elks on Saturday, July 7, 2001. Mr. Mayer assumed his presidency at the 133rd Elks National Convention in Philadelphia, Pennsylvania.

Arthur Mayer, Jr. is a native of Bergenfield, New Jersey and has been an active member of the Bergenfield Elks Lodge #1477 for the past 35 years. In 1978, he was appointed District Deputy Grand Exalted Ruler for the Northeast District of New Jersey. He also served as President of the New Jersey Elks Association from 1985 to 1986. As President of the New Jersey Elks Association, he managed and supervised over 120 lodges throughout New Jersey.

The Benevolent and Protective Order of Elks of the United States of America is one of the largest fraternal organizations in the country. Currently, over 1.2 million men and women serve as members of this prestigious association. In the organization's 132-year history, it has disbursed over $2 billion in goods and services for programs and civil programs that assist armed service veterans and students in over 2,000 communities nationwide.

As a result of his hard work and diligent efforts, Arthur Mayer, Jr. has helped improve the lives of thousands of families across the country.

Today, I ask my colleagues to join me in honoring Arthur Mayer, Jr. for his commitment to helping others and for his years of distinguished service at the Benevolent and Protective Order of Elks of the United States of America.

INTRODUCTION OF THE "QUINEBAUG AND SHETUCKET RIVERS VALLEY NATIONAL HERITAGE CORRIDOR PROTECTION ACT OF 2001"

HON. ROB SIMMONS
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. SIMMONS. Mr. Speaker, I rise today with my colleague from Massachusetts, Richard Neal, to introduce the "Quinebaug and Shetucket Rivers Valley National Heritage Corridor Protection Act of 2001."

The bill would provide for the implementation of a management plan for the Corridor to protect resources critical to maintaining and interpreting the distinctive character of the Quinebaug and Shetucket Rivers Valley National Heritage Corridor.

Created by Congress in 1999, the Quinebaug-Shetucket Rivers Valley National Heritage Corridor (QSHC) encompasses about 695,000 acres in northeastern Connecticut and south-central Massachusetts.

Called "the Last Green Valley" in the sprawling metropolitan Boston-to-Washington, D.C. corridor, the QSHC has successfully assisted in the development and implementation of integrated cultural, historical, and recreational land resource management programs that has and will continue to retain, enhance, and interpret these significant features. But much more needs to be done, which is why Mr. Neal and I introduced this legislation.

The QSHC will embark on two very significant projects. The Green Valley Institute is an expansion of the successful natural resource education program that will serve as a key educational tool for the scores of volunteers who work on the municipal boards, committees and commissions making those important decisions regarding land use and natural resource conservation. The program will also provide much-needed information in estate planning, forestland management, and technical assistance in GIS training and other important technology. The Green Valley Institute may be the single most important program that the QSHC can provide its 35 towns.

The other significant project is the planning and consideration of the Gateway Center proposed for I–395 in Thompson, Connecticut. Many entities in northeast Connecticut and south-central Massachusetts are looking to the...
QSHC as the unifying element to carry the project forward. The Gateway Center will fill a significant need for the communities, businesses, attractions and recreational facilities in the region. It's imperative that the Quinebaug-Shetucket Rivers Valley National Heritage Corridor be given the resources to continue to conserve, celebrate and enhance the significant historical, cultural, natural and scenic resources in the region while at the same time promoting a quality of life based on a strong, healthy economy compatible with the region's character.

It's my hope that the Gateway Center will be a significant step forward in attaining the important goals. I hope my colleagues will join me in supporting this worthy initiative.

RECOGNIZING MISS ARKANSAS 2001 JESSIE WARD

HON. MIKE ROSS
OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. ROSS. Mr. Speaker, it is with honor and great pride that I wish to recognize and congratulate the new Miss Arkansas 2001 Jessie Ward, who was crowned Saturday, June 16th, in Hot Springs, Arkansas. Jessie is a native of my hometown of Prescott, and I have watched her grow up since she was a little girl. Jessie has always been a caring, talented, and hard-working young lady.

At her first press conference following her crowning as the new Miss Arkansas, Jessie said that during the competition she wanted to be different—to stand out, if you will—while remaining true to herself. I think it's safe to say that she succeeded. In the talent competition, she performed an energetic tap-dance routine to “The King of Pop,” a medley of hits by the world famous pop singer, Michael Jackson. Her performance earned her preliminary talent winner honors as well as the coveted $1,000 Coleman Dairy Talent Scholarship.

During her on-stage interview, Jessie explained to the crowd that she enjoys not only bass fishing with her father, but also a rather unique hobby, taxidermy. In her words, she said, “to me, taxidermy is an art form, and everyone needs a little art in their life.”

In addition to her hobby, Jessie is also co-authoring a book with her mother, Karen Ward, on perseverance, which is something I think we could all use a lesson on from time to time.

Jessie's platform as a contestant, and now as Miss Arkansas, is School Violence Prevention Awareness, and she has spent the past three years traveling through Arkansas and Texas to promote this message. In her program, she stresses the importance of recognizing warning signs and being aware of safe reactions to potentially violent situations. Just recently, she has developed a scholarship program to reward a graduating senior each year who exhibits dedication to his or her school and community.

Jessie is affiliated with the National Center for the Prevention of School Violence, and her goal, she says, is to rally the state and national governments for funding of preventative programs and to reach at least two schools in every school district in Arkansas with her school violence prevention message.

I know this is an issue that she cares very deeply about, and I want to applaud her for her interest and leadership in helping to make our schools and communities safer.

Jessie is currently completing undergraduate degrees in biology and radio, television, and film at the University of Arkansas at Little Rock. She plans to attend medical school and begin working in rural medicine—something that is very important to south Arkansas. She eventually hopes to establish herself as a medical correspondent in the national broadcast arena.

Again, I say to Jessie, “Congratulations. We're proud of you, and we wish you all the best.”

HONORING WAIN JOHNSON

HON. GEORGE RADANOVICH
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to honor the retirement of Wain Johnson after his twenty years faithful dedication to Mariposa County. Mr. Johnson's agricultural vision revised and shaped Mariposa County's grape growing industry.

In March of 1981, Wain began working as the University of California Farm Advisor for Mariposa County. Wain is a past President of the Mariposa Wine Grape Growers Association. His impact on the grape growing industry, in Mariposa County has been great. Wain's dream was for the county to become a premier grape growing and winemaking region. He helped Mariposa County realize this dream by educating the County's grape growers, providing classes and seminars in viticulture to local farmers.

Mr. Speaker, I am pleased to pay tribute to Wain Johnson for his service to the people of Mariposa County. I urge my colleagues to join me in wishing him a long and happy retirement.

PERSONAL EXPLANATION

HON. DENNIS MOORE
OF KANSAS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. MOORE. Mr. Speaker, on June 25, 2001, I inadvertently failed to record my vote on vote No. 4187, H. Res. 99. This motion to suspend the rules adopted a resolution that would urge President Clinton to allow Hezbollah to allow Red Cross staff to visit four countries in Lebanon last year. I strongly support this resolution and intended to vote “aye.”

RECOGNITION OF FORT CHADBOURNE, COKE COUNTY, TEXAS

HON. CHARLES W. STENHOLM
OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. STENHOLM. Mr. Speaker, I rise today to recognize Fort Chadbourne, which is located in Coke County, Texas. I commend local citizens, including Garland and Lana Richards, along with many others who have worked to preserve this important part of Texas history.

A part of the Texas Fort Trails, Fort Chadbourne was established in 1852 as one of eight frontier posts set up to provide settlers protection while venturing into the Indian Territory. It also provided a stage stop for the Butterfield Overland Mail Route. The Fort, which is listed in the National Registry of Historic Places, is open to the public for the first time in 120 years.

The Fort Chadbourne Foundation, established in 1999 to preserve and protect the Fort, is currently in the process of stabilizing the Fort ruins and also plans to restore our buildings. In addition, the Foundation has raised more than $1,000,000 and is pursuing funding through the Statewide Transportation Enhancement Program in order to establish a visitors center and museum. The center will enable visitors to learn the history of the Fort and the area.

I wish to include in the RECORD an excellent article by Preston Lewis, a free-lance writer based in San Angelo, that appeared in Sunday's edition of The Dallas Morning News. I know that many of my colleagues join me in recognizing the important historic preservation work at Fort Chadbourne.

[From The Dallas Morning News, July 8, 2001]
addition to those and the various other men and women who had helped in the past. Several of the former officers were happy to see the project moving forward. But, there were also some who were concerned about the lack of support from the government.

The project is being funded by a combination of grants and private donations. The organizers hope to complete the work by the end of the year. In the meantime, the fort is being used as a historical site and as a place for community events.

One of the organizers, Mr. Richards, has been a driving force behind the project. He said, "I've been working on this project for a long time, and I'm excited to see it come to fruition."

The fort is located in the middle of a small town, and it has become a focal point for the community. The organizers are hoping to attract more visitors and to bring attention to the history of the area.

---

**HONORING LARRY HOLMAN ON HIS RETIREMENT**

**HON. TOM UDALL**

**OF NEW MEXICO**

IN THE HOUSE OF REPRESENTATIVES

**Tuesday, July 10, 2001**

Mr. UDALL of New Mexico. Mr. Speaker, I rise today to honor Larry Holman on the occasion of his retirement later this summer. Mr. Holman has served 30 years as the Bureau of Indian Affairs’ Superintendent for Education of the Eastern Navajo Agency. Since beginning his BIA career in 1966 as a Wingate Elementary school teacher, he has dedicated his life to bringing equal opportunity education to the Navajo youth of New Mexico.

Mr. Holman has seen many changes during his term. In the late sixties, families would bring their children to school in horse-drawn wagons. In the seventies, there was a lot of pressure to only offer English instruction. One of his many distinguished accomplishments was instituting a new Bureau of Indian Affairs personnel system. Through his efforts, BIA teachers’ salaries were raised to equal the Department of Defense teacher’s rate. This led to a superior teaching staff, and it has increased the quality of education for students.

Such dedication to our teachers and our students, the future of our world, is one of the greatest gifts that a person can give. Mr. Holman has touched many lives and affected a strong beginning for a successful education for many New Mexicans.

Today we recognize Larry Holman’s distinguished career and his remarkable service to the youth of the Navajo nation. Mr. Speaker, I believe that I speak for every citizen in the State of New Mexico when I extend our congratulations and best wishes for a retirement filled with happiness.

---

**TRIBUTE TO THE LATE POLICE OFFICER LOIS MARRERO**

**HON. JIM DAVIS**

**OF FLORIDA**

IN THE HOUSE OF REPRESENTATIVES

**Tuesday, July 10, 2001**

Mr. DAVIS of Florida. Mr. Speaker, today I joined thousands of Floridians in saying goodbye to one of Tampa’s finest, Police Officer Lois Marrero, who was struck down when a bank robber opened fire on four pursuing officers. Marrero was Tampa’s first female police officer killed in the line of duty, but she will be remembered in Florida for so much more. A devoted officer, Marrero never let her diminutive stature slow her down. Today, her friends and colleagues recalled her feisty spirit, her dedication to the job and as one officer described it, her “heart that was twice as big as her physical size.”

Marrero, who was just 15 months shy of retirement, impressed her superiors throughout her career for her energy and professionalism. She was praised for her crime fighting efforts in Ybor City’s neighborhoods, and as head of the Tampa Police Department’s community affairs bureau and gang suppression units,
EXTENSIONS OF REMARKS

HON. JOE KNOLENBERG
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. KNOLENBERG. Mr. Speaker, today I pay tribute to Dr. Richard W. McDowell, the longest-serving President in Schoolcraft College's history. He will be retiring on June 30, 2001. Dr. McDowell has been a great asset to his students, and served the Michigan educational community with diligence and excellence. In addition to his tenure as president, he has served on numerous educational and commerce boards, including the Livonia Chamber of Commerce, American Association of Community Colleges, and Council of North Central Two-year Colleges.

After completing his tenure as vice-president and acting-president at two community colleges in Pittsburgh and Florida respectively, Richard McDowell joined Schoolcraft College in 1981, and helped guide the college through a 20-year period of academic growth and brilliance. On this end, he achieved high standards in increasing staff development, employee recognition, and provided the necessary direction to establishing the Business Development Center that has generated a billion dollars in grants to various local companies.

The increased funds have enabled Schoolcraft College to be expanded considerably, which has made for a livelier and richer educational environment for students. On May 16th, 2001 the college broke ground on a $27 million facility that will house a state-of-the-art information technology center, and it's culinary arts department, which is recognized nationally.

Through his dedication and hard work to Schoolcraft College and the Michigan educational community, Dr. McDowell is a prime example of the kind of people that we need running the affairs of colleges and universities dedicated to providing the best environment and education possible to our students. I congratulate Richard on his fine achievements and wish nothing but the best in his future endeavors.

A TRIBUTE TO DR. RICHARD W. MCDOWELL

HON. JOE KNOLENBERG
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. RODRIGUEZ. Mr. Speaker, on Friday, July 13, 2001, after 85 years the flag will be brought down for the final time at Kelly Air Force Base in San Antonio, Texas. In recognition of this momentous occasion, I offer the following tribute of Kelly AFB and its lasting legacy to the United States Air Force, the nation, and the San Antonio community.

Seventy-four years ago, Travis Crockett and Bowie manned the battlefields at the Alamo, a different kind of warrior made his appearance over the South Texas City of San Antonio. He rode on wings of wood and fabric. In January 1910, on orders from Major General James Allen, Chief of the Army Signal Corps, Lieutenant Benjamin Foulois established a flying field at Fort Sam Houston, Texas. Foulois arrived at the Fort with a Wright flyer, the only airplane in the air service. In April 1911, three young Army officers joined Foulois fresh from Glenn Curtiss' Flying School at San Diego. Among them was a thirty-year-old lieutenant from London, England, George Edward Maurice Kelly. Kelly immigrated to America, enlisted in the United States Army and eventually received his citizenship and gained a commission. Volunteering for duty in the Air Service, he trained briefly with Curtis and then joined Foulois at San Antonio. Lieutenant Kelly's aviation career would be short lived. On May 10, 1911, he crashed his Curtis Type-4 Pusher into the brush near Fort Sam Houston's Drill Field. Lieutenant Kelly became the first American military aviator to die in the crash of a military aircraft. Six years later, one of the nation's premier flying fields would bear the name of this brave young aviator.

Lieutenant Kelly's death caused the Commander at Fort Sam Houston to call a halt to flying at the Post. Aviation didn't return to the Fort until November 1915, when the First Aero Squadron arrived from Fort Sill, Oklahoma. It did not stay long. In March 1916, the Mexican Revolutionary leader, Pancho Villa, attacked Columbus, New Mexico, and the First Aero Squadron, commanded by Foulois, joined a punitive expedition commanded by General John J. Pershing. Within months all its few aircraft were grounded. With World War I raging in Europe, it was clear that American military aviation needed to expand. Foulois, now a major, was called upon to form new squadrons and find a training site. In November 1916, he returned to San Antonio. Lacking space to expand at Fort Sam Houston, Foulois looked for another site for an aviation camp, choosing a 700-acre track of land southwest of San Antonio. The land was leased in January 1917. What was once cotton, cabbage, mesquite and cactus, was overrun by men and machines on the way for a landing field. On April 5th 1917, the first four planes slid out of the sky to land at the new field. The United States entered World War I the next day. Named Kelly Field in July, the new field was seen training aviators, mechanics, and support personnel for duty in France. Within 18 months, Kelly was the largest aviation training, classification and reception center in the United States. With the end of the war to end all wars, Kelly Field was consumed by the lethargy that follows most armed conflicts. The United States adopted an isolationist attitude and military aviation lapsed into a period of near hibernation. Aircraft that has been built for war were now turned to barnstorming and amusement. Throughout the nation aviation camps and depots were closing, but at Kelly Field the wheels had only slowly stopped. For a time, all the active flying groups were stationed at Kelly. Then in 1922, the Air Service restructured its training program, making Kelly home to the Air Service Advanced Flying School. For the next two decades, Kelly would become famous as the alma mater of the Air Corps. In these years, some of aviation's greatest names pressed the rudder pedals of Kelly trainers. Early graduates of the Advanced Flying School include "long eagle" Charles Lindbergh; General Curtis LeMay, cigar chomping advocate of strategic air power; and future Air Force Chiefs of Staff Hoyt S. Vandenburg, Thomas D. White, John McConnell and George S. Brown.

With the acquisition of more land west of Frio City Road in 1917, Kelly Field was divided into two areas, Kelly Number 1 and Kelly Number 2. While Kelly Number 2 was busy turning out dashes aviators, Kelly Number 1, renamed Duncan Field in 1925, was engaged in a less glamorous task of aviation supply and maintenance. This humble stepchild swarmed out of necessity would eventually thrive and go on to become an Air Force logistical giant. By 1935, most world powers were struggling to free themselves from the grip of worldwide depression. In Germany, Adolf Hitler had seized the reigns of power. On the other side of the globe, Japan was running rampant through Manchuria. The clouds of depression were clearing, but clouds of war were rapidly taking their place. Aircrrew training at Kelly was stepped up; courses were conducted in nearly every form of military aviation including attack, pursuit, observation and bombardment. Paved runways and permanent facilities sprouted throughout the installation. When Japanese bombs rained on Pearl Harbor on December 7th, 1941, Kelly Field was ready to take its place as a major cog in America's war machine. Midway through World War II, Kelly's logistical role came to the forefront. Pilot training moved to Randolph and other new airfields while an organization known as the San Antonio Air Service Command sought to repair and supply the nation's aerial fighting force. In two short years, the workforce expanded from 1,000 to over 20,000. Many were women, Kelly Katies, the Kelly equivalent of Rosie the Riveter. Peace came in August 1945. Kelly Katies went home. The base paused, caught its breath, and then
July 11, 2001

EXTENSIONS OF REMARKS

put itself to the task of supporting the most powerful Air Force in the world. One September 18, 1947, President Harry S. Truman signed the national security Act. Among the articles contained in this legislation was one establishing the Air Force as an independent military service. Duncan Field and Camp Normandy had been absorbed during World War II, and in January 1948, the field became Kelly Air Force Base. Within a year, the base would once more respond to an international challenge. The Russian bear was putting paw prints all over Eastern Europe. When the Soviets attempted to slam the door on West Berlin, allied air power came to its rescue. Kelly engine maintenance shops operated night and day. Pratt and Whitney R2000 engines rolled off the production lines destined for installation on C-54 aircraft flying the Berlin Airlift. The Russian bear hug on Berlin was broken after 11-months of Herculean effort by crews, aircraft and dedicated support by San Antonio Air Materiel Area workers. Less than a year later, the outbreak of the Korean War dropped the temperature of Cold War even further. Kelly personnel labored around the clock to prepare B-9 bombers and Mustang fighters for service in the outback. The sky at night and famous as San Antonio’s “Great White Way”. Nuclear deterrent was the “watch word” and Kelly’s people worked in support of the intercontinental B-36 bomber, the first capable of flying anywhere in the world, dropping its nuclear payload and returning home. Its Pratt and Whitney R4360 engines monopolized Kelly’s overhaul facilities for over a decade. A proud yet poignant story revolves around the cargo version of the B-36. The XC-99 transport was the largest cargo aircraft ever built until the advent of the massive C-5A. The huge bird nestled at Kelly and from this base of operations set numerous cargo hauling records, nesting at Kelly and from this base of operations the first 3Cs loaded 5 million pounds of munitions to the theatre of operations along with 7,400 tons of other supplies and 4,700 passengers. In April 1999, Kelly employees again called upon to perform their logistical magic.” Engines were surged to support NATO’s efforts to end brutal ethnic cleansing in Kosovo.

Even before the end of the Cold War, America’s military services saw their budgets grow smaller, and by the early 1990s, people expected to see a “peace dividend” to help reduce the budget deficit and pay for soaring costs of social services. Continuing efforts to cut defense spending by relocating some missions and burdening a C-5F at DESERT SHIELD/DESERT STORM. By March 1991, Kelly had sent nine million pounds of munitions to the theatre of operations along with 7,400 tons of other supplies and 4,700 passengers. In April 1999, Kelly employees again called upon to perform their logistical magic.” Engines were surged to support NATO’s efforts to end brutal ethnic cleansing in Kosovo.

Although the flag came down on the San Antonio Air Logistics Center on July 13, 2001, it was not the end of prosperity’s story. Kelly’s legacy will live on. For generations, Kelly was a place where people from all backgrounds came together to roll up their sleeves and work for a united cause—our country’s freedom. For 85 years Kelly AFB made major contributions to the military strength of the United States and the prosperity of San Antonio. Kelly was the largest single employer in San Antonio and South Texas for over 50 years, and year-after-year Kelly was the largest contributor to the Combined Federal Campaign within the city. Kelly was a place where the workers prospered, purchased better homes, and provided family members the resources to pursue more education and more opportunities. Kelly Field provided tens of thousands of civil service jobs, and was the birth and backbone of the Hispanic middle class in the Alamo City. Generations of Hispanic families were employed at Kelly throughout its history, and today many of the city business leaders and even congressional members have their roots as Kelly families.

For decades the men and women of Kelly AFB dedicated their hearts and lives to the service of their country. From its beginnings as a farmer’s cotton field in 1916, Kelly became the largest recruit and aviation training camp in the United States during World War I. In the interwar years, Kelly served as the Alma Mata of the Air Corps while its neighbor Duncan Field provided repair and supply support for America’s small air arm.

Following World War I, Kelly became one of the country’s largest logistical supermarkets, supporting the Air Force around the globe. During the most recent conflicts of JUST CAUSE, DESERT SHIELD/DESERT STORM, and Kosovo, the Kelly employees had the greatest logistical support of all the ALCS, shipping more components, more engines, and more munitions. From the beginning of Kelly Field to the end of the San Antonio Air Logistics Center, the logistical impact and support of Kelly and its employees were vital for the United States to be successful in completing the mission. Today, Kelly transitions and, today many of the city business leaders and even congressional members have their roots as Kelly families.

Today, Kelly transitions and, becoming KellyUSA, an industrial, commercial park for the 21st century. But, throughout this tradition of service remains and will continue to be—Kelly Forever!

HONORING EDWARD PAELTZ
HON. JOHN SHIMKUS
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. SHIMKUS. Mr. Speaker, I rise today to honor Mr. Edward Paeltz of Godfrey, Illinois. Mr. Paeltz is a veteran of World War II and was recently awarded the “General William C. Westmoreland Award” from the National Society of the Sons of the American Revolution for his distinguished service to veterans. Since he was discharged from the Army 55 years ago, Edward Paeltz has spent countless hours helping veterans in need of care. With the help of his wife, Nancy, he frequently visits veterans in hospitals, nursing homes, and veterans homes throughout Illinois. During the Christmas season, he brings them cookies and other gifts to bring a smile to their faces.

In addition, Mr. Paeltz helps transport veterans from the Veterans Hospital in Marion, Illinois, to a lodge and retreat center in Carbondale so they can participate in recreational activities. Edward Paeltz is a former commander of Alton American Legion Post 126. He recently fulfilled his dream of designing and organizing the construction of a Veterans’ Memorial in Alton, Illinois, to honor the veterans of all branches of the armed forces. Mr. Paeltz is an inspiration to us all.

Tribute to Herb Oberman
HON. HILDA L. SOLIS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Ms. SOLIS. Mr. Speaker, I rise today to recognize the retirement of Mr. Herb Oberman, who will step down from his job as a Los Angeles County social worker on July 12, 2001. A dedicated public servant, Herb has served the people of Los Angeles County for the past 35 years.

Herb has proven that he truly cares about protecting children’s rights. He received his Master’s Degree of Social Work from the University of California Los Angeles in 1966 and spent seven years dedicating himself as a Children’s Service Worker in the Foster Care Program. In 1973, he participated in the formation of Community Service Centers.

Herb has served on the board of directors of several social service organizations. He is the past president of the Santa Clarita Valley Girls and Boys Club and served on the board of directors of the Los Angeles Regional Foodbank between 1973–1993.

Herb Oberman’s contributions have received recognition for his programs, which include the Los Angeles Efficiency and Productivity Program administration of the Los Angeles Citizenship Assistance Campaign; the Ford Foundation’s “Innovations in State and Local Government” award in 1986 for his administration of the county’s Federal Food Commodities Distribution Program; and the Parents Fair Share Project, a national demonstration project which helps noncustodial parents find employment and pay.

As Herb moves on to new pursuits, I would like to thank him for his remarkable work. I ask my colleagues to join me in honoring his hard work and extraordinary contributions and wish him luck on his retirement.

Honor Tom Udall
HON. TOM UDALL
OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, June 27, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes:

Mr. UDALL of New Mexico. Mr. Chairman, I would like to explain my position on the Kucinich amendment that would reduce funding for the National Ignition Facility at Lawrence Livermore National Laboratory and move some of the NIF money into the non-proliferation programs of the national Nuclear Security Administration. There is clearly a need to avoid the damage that would occur to our nonproliferation programs if funding is not increased. The President made a mistake in his budget when he made deep cuts in the non-proliferation programs. The cuts make little sense in a world where many nations have the capability and desire to develop weapons of mass destruction including nuclear, chemical, and biological weapons. We must therefore increase our capability to monitor developments around the globe in this area.

The President’s budget already cuts the NIF programs. I support that cut given the troubling history of this program. I am very concerned about the recent findings, which concluded that not only will NIF cost at least $1 billion more than planned and take six years longer than expected to begin operations, but also that the program poses a serious number of unresolved technical problems. Moreover, because of the critical nature of the GAO findings, the agency reportedly is doing a follow-up report, which it intends to submit to Congress.

Mr. Speaker, furthermore, in an article in the Albuquerque Tribune, the Director of Sandia National Laboratory, Mr. Paul Robinson, criticized NIF suggesting there be a reduction in its design and cost to protect other nuclear weapons program components. Moreover, a report by Dr. Robert Civiak, a physicist and former OMB Program Examiner for the Department of Energy, spells out the need to cancel NIF before any further spending occurs.

For these reasons and others, Congress needs to closely examine the NIF program and determine whether it warrants future funding. That is why I am voting NO on the Kucinich amendment.

PROJECT VOTE SMART
HON. HENRY J. HYDE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. HYDE. Mr. Speaker, I was recently informed of the efforts of an organization called Project Vote Smart—a group of dedicated individuals who work tirelessly in a non-partisan fashion to develop dependable facts about various national and state issues affecting all Americans while encouraging eligible citizens to vote. I am pleased for his programs to cancel NIF before any further spending occurs.

A few years ago a handful of people, a mixture of young energetic students and retired
leaders from fields in politics, academia and various fields, held a meeting about the increasing use of media and technology by campaigns to manipulate information, and the citizen’s diminishing access to dependable, abundant information on issues and political candidates.

That meeting gave birth to Project Vote Smart (PVS), a small 501(c)(3) now engulfed in its own success. In the beginning the idea seemed simple: use young people from throughout the country to collect millions of documented facts about issues, candidates and other information about politics; index the information and then categorize it so that citizens could easily access the information through local libraries, toll-free hot lines, the internet and published reports.

Specifically, the Project is in a national library of factual information on over 40,000 candidates and incumbents in public office, all presidential, congressional, gubernatorial, state legislative seats, county, and local candidates and incumbents. They are researching all major backgrounds, backgrounds, voting records, campaign finances, performance evaluations by over 100 conservative to liberal special interests, and campaign issue positions on the issues they will likely have to deal with if elected.

Project Vote Smart does not lobby, support or oppose any candidate or cause, and does not accept financial support from any organization that does—it is supported entirely by philanthropic foundations and the organization that does—it is supported entirely by philanthropic foundations and the disciplined manner in which they meet challenges. While they have already accomplished a great deal, these young people possess unlimited potential, for they have learned the keys to success in any endeavor. I am proud to join with their many admirers in extending our highest praise and congratulations to the finalists of the 2001 LeGrand Smith Congressional Scholarship Program.

TRIBUTE TO 2001 LeGRAND SMITH SCHOLARSHIP FINALISTS

HON. NICK SMITH
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. SMITH of Michigan. Mr. Speaker, it is a sincere pleasure to recognize the finalists of the 2001 LeGrand Smith Scholarship Program. This special honor is an appropriate tribute to the academic accomplishment, demonstration of leadership and responsibility, and commitment to social involvement displayed by these remarkable young adults. We all have reasons to be proud of their success, for it is in their promising and capable hands that our future rests:

- Brian Anderson of Lansing, Michigan; Nicole Bell of Tecumseh, Michigan; Leah Brady, of Battle Creek, Michigan; Jeremy Connin of Jackson, Michigan; Lindsay Elliott of Pittsford, Michigan; Calby Garrison, of Onsted, Michigan; Aaron Heinen of Battle Creek, Michigan; Sarah Holliday of Hillsdale, Michigan; Stephanie Lallemend of Battle Creek, Michigan; Tabbetha McLaren of Quincy, Michigan; Molly Miller of Marshall, Michigan; Jessica Muterspaugh of Spring Arbor, Michigan; Teresa Rodgers of Detroit, Michigan; Adam Shieler of Jackson, Michigan; Anna Vanderstelt of Charlotte, Michigan; and Randi Wigent of Reading, Michigan.

The finalists of the LeGrand Smith Congressional Scholarship Program are being honored for showing that same generosity of spirit, depth of intelligence, and capacity for human service that distinguished the late LeGrand Smith of Somerset, Michigan. They are young men and women of character, ambition, and initiative, who have already learned well the value of hard work, discipline, and commitment.

These exceptional students have consistently displayed their dedication, intelligence, and concern throughout their high school experience. They are people who stand out among their peers by achieving academic milestones and the disciplined manner in which they meet challenges. While they have already accomplished a great deal, these young people possess unlimited potential, for they have learned the keys to success in any endeavor.

I am proud to join with their many admirers in extending our highest praise and congratulations to the finalists of the 2001 LeGrand Smith Congressional Scholarship Program.

HON. FORTNEY PETE STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. STARK. Mr. Speaker, on July 14, 2001, the Union City Police Department celebrated the retirement of three of its finest officers, Sergeant Ron Packard, Officer Joe Reis and Officer John Nyikes.

Sergeant Ron Packard began his law enforcement career with the Union City Police Department on November 1, 1968. His first assignment was undercover at a local high school, posing as a student. During the week, he attended classes with the intention of identifying sales and distribution of illegal drugs on campus. In the evenings, he completed class homework assignments and police reports.

Sergeant Packard continued in his career, and was promoted from Officer to Sergeant on January 16, 1974. He has served as a Firearm instructor and Range Master, SWAT member, and has supervised a number of divisions, including Traffic Investigations and Patrol. Sergeant Packard was instrumental in developing the Union City Police Department’s current Canine Program and is currently the Canine Program Manager. During his off-duty hours, Sergeant Packard enjoys participating in local and international Police and Fire Olympics, and is the recipient of numerous silver and gold medals in archery.

Officer Joe Reis, President of the Union City Police Officers Association, began his career in law enforcement on December 16, 1974.
more than 300,000 new jobs, more than New York, Los Angeles, or San Diego. I urge my colleagues in the U.S. House of Representatives to join me in congratulating and expressing pride in the city of Lansing, Michigan, and the community businesses that work for job growth and development of the city’s entrepreneurial landscape.

PERSONAL EXPLANATION

HON. J.C. WATTS, JR.
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. WATTS of Oklahoma, Mr. Speaker, I was unavoidably detained due to a delayed flight arriving into the Ronald Reagan National Airport on July 10, 2001, and unfortunately missed the following recorded votes: No. 211 on H. Con. Res. 170; No. 212 on H. Con. Res. 168; and No. 213 on H. Con. Res. 174. I ask that the RECORD reflect that, had I not been delayed, I would have voted “yea” on all of the above bills.

PAYING TRIBUTE TO THE LANSING BOARD OF WATER & LIGHT

HON. MIKE ROGERS
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. ROGERS of Michigan, Mr. Speaker, I rise to honor the proactive efforts of the Lansing Board of Water and Light in Lansing, Michigan, to develop a program aimed at using environmentally friendly energy to generate the electricity it provides in the Lansing metropolitan area.

The Board of Water and Light has launched a Green Wise Electric Power program that encourages customers to voluntarily pay an additional minimal fee to cover the added cost of purchasing electricity from “clean” sources. The program allows the municipal utility to buy some or all of its electricity from clean, renewable sources such as wind, water and biomass generation. While the cost of cleaner electricity may be higher than that provided through conventional sources such as coal or natural gas, the environmental advantages make this a highly worthy program.

As America struggles to meet its environmental challenges, the Lansing Board of Water and Light has shown extraordinary vision and commitment to protecting our precious resources while continuing to meet the electric power needs of its customers. They are working hard to achieve that balance between environment and economy which is essential for the future of every community across the nation. I urge my colleagues in the U.S. House of Representatives to join me in congratulating the Lansing Board of Water and Light and to extend to its board of directors and staff our admiration for their service in the interest of the nation, the State of Michigan, and their own community. We wish them well in their future endeavors.

PERSONAL EXPLANATION

HON. JULIA CARSON
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Ms. CARSON of Indiana, Mr. Speaker, on Tuesday, July 10, I was in my district attending to official business and as a result missed rollcall votes 211, 212 and 213. Had I been present, I would have voted “yea” on all three votes.

PAYING TRIBUTE TO ELLEN V. FUTTER, NASA PUBLIC SERVICE MEDAL RECIPIENT

HON. JERROLD NADLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. NADLER, Mr. Speaker, I rise to express my pride, and that of New York, that on June 21, 2001, Ellen V. Futter, President of the world-renowned American Museum of Natural History, was awarded NASA's prestigious Public Service Medal by NASA Administrator Daniel S. Goldin. She was presented this medal in recognition of her leadership in advancing the highest quality science education. Through Ms. Futter’s leadership, the American Museum of Natural History is bringing NASA’s cutting-edge science to children and families of New York, the nation, and the world through the Rose Center for Earth and Space and the NASA-sponsored National Center for Science Literacy and Education Technology. Her achievements rest on a keen appreciation of the importance of scientific literacy in the 21st century and a unique vision for bridging the gap between science and the public.

With the leadership of Congress, the American Museum of Natural History and NASA have forged a productive scientific and educational partnership that advances their shared goals of advancing science and scientific literacy nationwide. The National Center for Science Literacy, Education, and Technology was conceived by the Museum; approved, advanced, and funded by Congress; and sponsored by NASA. It is a model partnership of which we can all be proud.

Founded in 1869, the American Museum of Natural History is one of the nation’s preeminent science and education institutions. Throughout its history, its efforts have been directed to its twin missions: to examine critical scientific issues and increase public knowledge about them. Its rich scientific legacy includes an irreplaceable record of life on Earth
in collections of some 32 million natural specimens and cultural artifacts. The Museum's power to interpret wide-ranging scientific discoveries and connect them imaginatively has inspired generations of visitors and educated millions about the marvels of the natural world and the vitality of human cultures.

I congratulate Ellen Futter, the American Museum of Natural History, Daniel Goldin and NASA on their remarkable accomplishments.

TRIBUTE TO KRISTIN ANDERSON OF BROOKLYN, MICHIGAN
LEGRAND SMITH SCHOLARSHIP WINNER

HON. NICK SMITH
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. SMITH of Michigan. Mr. Speaker, it is with great respect for the outstanding record of excellence she has compiled in academics, leadership and community service, that I am proud to salute Kristin Anderson, winner of the 2001 LeGrand Smith Congressional Scholarship. This award is made to young adults who have demonstrated that they are truly committed to playing important roles in our Nation's future.

As a winner of the LeGrand Smith Congressional Scholarship, Kristin is being honored for demonstrating that same generosity of spirit, intelligence, responsible citizenship, and capacity for human service that distinguished the late LeGrand Smith of Somerset, Michigan.

Kristin is an exceptional student at Columbia Central High School and possesses an impressive high school record. Kristin has received numerous awards for her excellence in academics, as well as her involvement in soccer and volleyball. She is active in student government, serving as President of the National Honor Society and Secretary of the student body. Kristin's volunteer efforts include helping to organize a local coat drive and working with the Toys for Tots Program.

There is no way to join with her many admirers in extending my highest praise and congratulations to Kristin Anderson for her selection as a winner of a LeGrand Smith Congressional Scholarship. This honor is also a testament to the parents, teachers, and others whose personal interest, strong support and active participation contributed to her success.

To this remarkable young woman, I extend my most heartfelt good wishes for all her future endeavors.

IN HONOR OF THE LATE JUSTICE STANLEY MOSK

HON. NANCY PELOSI
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Ms. PELOSI. Mr. Speaker, I rise to pay my final respects to the former California Supreme Court Justice Stanley Mosk. It is with great sadness and deep respect that I share with my colleagues the following words on the life of Justice Stanley Mosk.

Justice Mosk was born in San Antonio, Texas, graduated from the University of Chicago Law School, and in 1933 he moved to California. Justice Mosk served for his country in WWII before returning to his family and career as a judge of the Superior Court in Los Angeles. Justice Mosk was elected Attorney General in 1958 with an overwhelming million vote majority—the largest of any election that year. During his six years as the Chief Law Officer of the State of California he argued before the United States Supreme Court in the Arizona v. California water case and other landmark cases before the California Supreme Court. In 1961 Justice Mosk was credited with persuading the Professional Golf Association to admit African American golfers. In 1964 Justice Mosk was appointed to the California Supreme Court by Governor Pat Brown.

Justice Mosk was an astute, independent thinker whose tenure as a California Supreme Court Justice was both brilliant and controversial. As Mosk's former colleague California Chief Justice Ronald George stated correctly, "Stanley Mosk was giant in the law." He revealed that status by writing nearly 1,500 opinions while serving for 37 years, the longest tenure of any California Supreme Court Justice. Stanley Mosk continued his tireless efforts until his last day. Each year in the last decade, Justice Mosk authored more opinions than any other Supreme Court Justice. Although widely considered a liberal, he chose not to abide by any limitations on his opinions. On several occasions, Justice Mosk's decisions stunned the legal and political community.

As Justice Mosk traveled extensively, he observed the South-West Africa case at the World Court, on behalf of the State Department. He lectured throughout Africa thereafter. Justice Mosk traveled to the Netherlands in 1970 to participate in summer sessions of The Hague Academy of International Law at the Peace Palace. Justice Mosk lectured at Universities throughout the United States as well.

Justice Mosk was valued and respected by his colleagues. He will be remembered as a passionate proponent of the will of the law. Justice Mosk was one of the most influential and passionate proponents of the will of the law of any other Supreme Court Justice. Although he downplayed its effect on his life, before going into the hospital, he worked every day and insisted to many people that if the doctors hadn't told him that he was sick, he would not have gone. Dick was a reporter for The Chattanooga Times and it's reporter, the Republican Party and this great nation. He read, he wrote and he ran (3 miles or so) virtually every day. He also loved to tell stories, do impersonations and he especially loved to talk politics.

Dick's extensive political knowledge was also useful in the successful 1994 campaign of Senator Fred Thompson—where he served as the Tennessee Press Secretary. Even at the end, Dick was courageous and selfless. He knew that his illness was serious but he downplayed its effect on his life. Dr. Height, chair and president emerita of the National Council of Negro Women (NCNW) in Washington, D.C., is a legendary figure in the civil rights movement. In 1989, President Reagan acknowledged her achievements by presenting her with the Citizens Medal Award. In 1993, the NAACP awarded her its prestigious Spingarn Medal. That was followed by the Presidential Medal of Freedom Award, bestowed by President Clinton in 1994. Last August, a feature story on Dr. Height in the Cincinnati Enquirer declared that every president since Eisenhower has called on her for advice. In their book, The African American Century, Comel West and Henry Louis Gates, Jr., cited her as one of the 100 most influential African-Americans of the 20th century.

Dr. Height was born in Richmond, Virginia, in 1912, but grew up near Pittsburgh in a household where volunteerism prevailed. In those days, blacks from the southern states were migrating north to jobs in the steel mills. Height's mother and father, a nurse and building contractor respectively, helped these families settle in, thus instilling in her a sense of responsibility and integrity. Dr. Height earned both bachelor's and master's degrees in educational psychology from New York University in four years and graduated in 1933—the height of the Depression. She then turned her attention to social work in New York City, later working for the Young Women's Christian Association (YWCA). During those years, she also was active in community service and religion, and eventually became one of the first leaders of the United Christian Youth Movement.

From her position in the church and at the YWCA in Harlem, she spanned caps between the city's impoverished ethnic groups and the government, spotlighting the plight of unemployed domestic workers for national figures such as Eleanor Roosevelt and Langston Hughes. Dr. Height's successes did not escape notice by the leadership of the NCNW. In 1937, she was approached to conduct committee work for the organization, an affiliation of civic, educational, labor, community, church, and professional institutions headquartered in Washington. By 1957, she was its president. Under the guidance of educator and NCNW founder Mary McLeod Bethune, she organized voter registration drives in the South, testified repeatedly before Congress on social issues, and worked tirelessly on the more mundane tasks of the civil rights movement, such as jobs programs. She turned it into one of the most influential national leaders in the burgeoning field of humanitarianism, working closely with Martin Luther King, Jr., Roy Wilkins, and a host of other legendary leaders.

Dr. Height, who has been called the “grande dame” of the civil rights movement, has served in the leadership of dozens of organizations devoted to social change, most notably as president of Delta Sigma Theta sorority from 1947 to 1956. In 1986, she founded and organized the Black Family Reunion Celebration, a national coming together of African-American families dedicated to promote historic strengths and traditional values. The Frederick Douglass Award will be presented to Dr. Height at Westminster Hall, in Baltimore, adjacent to the University of Maryland School of Law. Those in attendance will include Maryland Governor Parris N. Glendenning, USM Board of Regents Chairman Nathan A. Chapman, Leronia A. Josey, member of the USM Board of Regents, Thelma T. Daley, past national president of Delta Sigma Theta sorority, and USM Chancellor Donald N. Langenberg. Frederick Douglass IV, professor at Howard University and a direct descendant of Douglass, will provide a dramatic reading from the latter's work. David J. Ramsay, president of the University of Maryland, Baltimore, will welcome the audience.

The Frederick Douglass Award was established in 1995 by the USM Board of Regents to honor individuals “who have displayed an extraordinary and active commitment to the ideals of freedom, equality, justice, and opportunity exemplified in the life of Frederick Douglass.” Previous recipients include the Honorable Peter J. Mitchell, a member of Congress for the 7th District of Maryland (1996); Benjamin Quarles, scholar at Morgan State University (1997, posthumously); Samuel Lacy, Jr., sports writer for the Baltimore Afro-American (1998); the Hon. Kweisi Mfume, president of the National Association for the Advancement of Colored People (1999); and Beatrice “Bea” Gaddy, advocate for the poor and homeless and a member of the Baltimore City Council (2000).

Statesman, publisher and abolitionist Frederick Douglass was the leading spokesman of American blacks in the 1800s. Born a slave in 1817 in Tuckahoe, MD, he devoted his life to the abolition of slavery and the fight for black rights. Douglass's name at birth was Frederick Augustus Washington Bailey, but he changed it when he fled from his master in Baltimore in 1838. He ended up in New Bedford, Mass., where he attempted to ply his trade as a ship caulker, but settled for collecting garbage and digging cellars. In 1841, at a meeting of the Massachusetts AntiSlavery Society, Douglass delivered a lecture on freedom that so impressed the president that he was allowed to talk publicly about his experiences as a slave. He then began a series of protests against segregation, and published his autobiography, Narrative of the Life of Frederick Douglass, in 1845.

Mr. Speaker, I know the Members of the House take great pride in joining me in congratulating Dr. Dorothy Irene Height on this very special day for her lifelong work. She is truly deserving of the Frederick Douglass Award and I rise to congratulate her on this esteemed award.

The celebration, “Marshall Field’s Weekend of Wonder at The New Detroit Science Center—32 Hours of Exploration,” will kick off at 10 AM on July 28 and continue around the clock until 6 PM on July 29. The Detroit Science Center was founded by Detroit businessman and philanthropist Dexter Ferry nearly 30 years ago. In 1998, plans were made to transform the Detroit Science Center into a leading center for science education. The Center broke ground on its expansion and renovation in 1999. The New Detroit Science Center will serve as a vehicle to educate our children and their families in the areas of science and technology. Detroit is known as a technological hub, and this new Center will involve our children and expose them to the resources that are available to them.

This Center will serve as a tremendous resource for teachers, children, and families across the State of Michigan. Its exciting programs, which include an IMAX theater, five hands-on laboratories, the DaimlerChrysler Science Stage and Spakes Theater, the Ford Learning Center, and the Digital Dome Planetarium, will create an interest in science, engineering, and technology. The New Detroit
bring their families to visit Detroit's newest Science Center. This commitment to our children by the community members and businesses have proved to be immeasurable.

Mr. PUTNAM. Mr. Speaker, I was absent the week of June 25, 2001, attending to my wife Melissa during the birth of our first child, Abigail Anna Putnam. Had I been present this is how I would have voted on the following roll call votes.

June 25, 2001:
On Roll Call 186—I would have voted Yea in support of H. Res. 160 calling on the Government of the People's Republic of China to immediately and unconditionally release Li Shaomin and all other American scholars of Chinese ancestry being held in detention, and calling on the President of the United States to continue working on behalf of Li Shaomin and the other detained scholars for their release.
On Roll Call 187—I would have voted Yea in support of H. Res. 99 expressing the sense of the House of Representatives that Lebanon, Syria, and Iran should call upon Hezbollah to allow representatives of the International Committee of the Red Cross to visit four abducted Israelis, Adi Avitan, Binyamin Avraham, Omar Souad, and Ichanan Tannenbaum, presently held by Hezbollah forces in Lebanon.
On Roll Call 188—I would have voted Yea in support of H. Con. Res. 161 honoring the 19 United States servicemen who died in the terrorist bombing of the Khobar Towers in Saudi Arabia on June 25, 1996.

June 26, 2001:
On Roll Call 189—I would have voted Yea on Approving the Journal.
On Roll Call 190—I would have voted Yea on the motion to consider H. Res. 178.
On Roll Call 191—I would have voted Yea on agreeing to the Res. 179 for the consideration of H.R. 2299, Transportation and Related Agencies Appropriations Act for FY 2002.
On Roll Call 192—I would have voted Yea on agreeing to H. Res. 166 recognizing disaster relief assistance provided to Houston, TX, after Tropical Storm Allison.
On Roll Call 193—I would have voted Yea on the Sabo amendment to H.R. 2299.
On Roll Call 194—I would have voted Yea in support of H.R. 2299, the Transportation and Related Agencies Appropriations Act for FY 2002.
On Roll Call 195—I would have voted Yea on agreeing to the approval of the Journal.
On Roll Call 196—I would have voted Yea on agreeing to H. Res. 180, providing for consideration of H.R. 2311; Energy and Water Development Appropriations Act for FY 2002.

Wednesday, July 11, 2001
On Roll Call 201—I would have voted Nay on the Tancredo amendment to H.R. 2311.
On Roll Call 204—I would have voted Yea on the Berkley amendment to H.R. 2311.
On Roll Call 205—I would have voted Yea on the Davis amendment to H.R. 2311.
On Roll Call 206—I would have voted Yea on final passage of H.R. 2311, the Energy and Water Development Appropriations Act for FY 2002.
On Roll Call 207—I would have voted Yea on H. Res. 183, providing for consideration of H.R. 2330; Agriculture Appropriations Act for F.Y. 2002.
On Roll Call 208—I would have voted Yea on the Brown of Ohio amendment to H.R. 2330.
On Roll Call 209—I would have voted Yea on the Brown of Ohio amendment to H.R. 2330.
On Roll Call 210—I would have voted Yea on the Engel amendment to H.R. 2330.

Mr. TURNER. Mr. Speaker, I rise to pay tribute and to express the thanks of Texans to our friend Wayne Scott on the occasion of his retirement as Executive Director of the Texas Department of Criminal Justice. His leadership of the fastest growing agency in the State of Texas during years of difficult transitions have earned him the respect and admiration of all Texans.

Wayne began his professional journey in 1972 as a correctional officer at the Huntsville unit of the Texas Department of Corrections. While working there, Wayne Scott received his Bachelor of Business Administration from Sam Houston State University in 1973. Making his way into the system, he became warden of the facility in 1984. In the following years, Wayne served as regional director, deputy director for operations, and institutional division director. In 1996, Wayne Scott was promoted to Executive Director of the Texas Department of Criminal Justice, the largest agency in the state of Texas. It can be said that Wayne began at the bottom of the ladder and climbed to the top through a firm commitment to hard work, a willingness to make the tough decisions, and a constant pursuit of the highest ethical standards for both himself and the department.

With the responsibility of more than 40,000 employees and more than 150,000 felony offenders, Wayne Scott has been recognized by his fellow criminal justice professionals in the American Correctional Association, the Southern States Correctional Association, and the...
EXTENSIONS OF REMARKS

Therefore, I am proud to join with my many admirers in extending my highest praise and congratulations to Emily Stack, for her selection as a winner of a LeGrand Smith Congressional Scholarship. This honor is also a testament to the parents, teachers, and others whose personal interest, strong support and active participation contributed to her success. To this remarkable young woman, I extend my most heartfelt good wishes for all her future endeavors.

HON. EDOLPHUS TOWNS
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of Caroline R. Jones for her tremendous contributions during her shortened life. Born and raised in Benton Harbor, Michigan, as Caroline Richardson, the eldest daughter in a family of ten children, she graduated from the University of Michigan with a degree in English and science.

Caroline traveled to New York City in 1963 to look for teaching positions. She ended up taking a job as a secretary at J. Walter Thompson, at the time the world’s largest advertising firm. She soon started career paths after she was moved to the creative department. It was there that she was selected for a junior copywriter program. With this selection, Caroline became the first African American trained as a copywriter in the firm’s 140 years history.

Caroline’s success did not end at J. Walter Thompson. She worked at a number of leading general market and black-owned agencies as both a copywriter and as a creative director. Caroline later became the first black woman elected vice president of a major advertising firm. Caroline also helped to found the Black Creative Group as well as Mingo-Jones Advertising, where she served as executive vice president as well as creative director. During her time at Mingo-Jones, Jones created the “We Do Chicken Right” campaign for Kentucky Fried Chicken.

Jones started her own firm in the 1980s, Creative Resources Management, as well as many shops under her name. She was also the successful television and radio host of two programs, “In the Black: Keys to Success” and “Focus on the Black Woman.”

Mr. Speaker, Caroline Richardson Jones devoted her life to eliminating the barriers of sex and racial discrimination in the advertising arena. Only 59 at her death on June 28 from cancer, she will always be remembered for her tireless efforts in promoting the agenda of Annual Legislative Weekend sponsored by the Congressional Black Caucus. As such, she and her family are more than worthy of receiving our recognition today. I hope that all of my colleagues will join me in remembering and honoring the life of this remarkable woman.

HON. JOSE´ E. SERRANO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. SERRANO. Mr. Speaker, once again it is an honor for me to recognize the Great Dominican Parade and Festival of the Bronx on its twelfth year of celebrating Dominican culture in my South Bronx Congressional District.
This year’s festivities will take place on July 15, 2001. Under its Founder and President, Felipe Febles the parade has grown in size and splendor. It now brings together an increasing number of participants from all five New York City boroughs and beyond. I also would like to recognize all the people who, under the leadership of Director Rosa Ayala, are making sure that this year’s events will be successful as in the past.

On Sunday, July 15, thousands of members and friends of the Dominican community will march from Mt. Eden and 172nd Street to East 161st Street and the Grand Concourse in celebration of their Dominican heritage and their achievements in this nation. Among other accomplishments, Dominicans have been instrumental in transforming New York City into a great bilingual city. Moreover, the parade has served as a national landmark in which people from all ethnic groups unite to commemorate our Nation’s glorious immigrant history.

Mr. Speaker, the Board of Directors of the Dominican Parade of the Bronx has chosen me to be their “International Godfather” and I have gladly and humbly accepted that honor. As one who has participated in the parade in the past, I can attest that the excitement it generates brings the entire City together. It is a celebration and an affirmation of life. It feels wonderful to enable so many people to have this experience—one that will change the lives of many of them.

The event will feature a wide variety of entertainment for all age groups. This year’s festival includes the performance of Merengue bands, crafts exhibitions, and food typical of the Dominican Republic.

Mr. Speaker, it is with enthusiasm that I ask my colleagues to join me in paying tribute to this wonderful celebration of Dominican culture, which has brought much pride to the Bronx community.

IN RECOGNITION OF MT. ROSE CHURCH OF GOD IN CHRIST

HON. KEN BENTSEN
OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. BENTSEN. Mr. Speaker, I rise today to recognize the 11th Annual Founder’s Day celebration of the Mt. Rose Church of God In Christ and the ground breaking ceremony of their new facility.

The Mt. Rose Church of God was founded in 1944 and is located in Barrett Station, Texas. Though located in Barrett Station, the ministry performed at Mt. Rose Church of God In Christ is felt throughout the greater Houston area. The goal of Mt. Rose Church of God In Christ is to create “The City of Refuge.” A place where the vision of salvation, deliverance, Christian maturity, and support are shared; a place where the doors are always open to hardship.

The prayerful and Spirit-filled members of Mt. Rose Church of God In Christ have come to the aid of the community in need time and time again. Through their compassionate offerings, these leaders have enhanced the lives of the entire community. Their actions provide a flicker of hope to individuals who were otherwise in despair.

Mr. Speaker, I commend the members of Mt. Rose Church of God In Christ and in particular Pastor Elder Ron Eagleton, whose passionate and dedicated leadership has borne the commitment to service that is so much a part of this congregation.

The 11th Annual Founder’s Day Celebration on Sunday, July 15, 2001, is especially significant because it also marks the ground breaking of the new 43,000 square foot facility to be completed next year. The new sanctuary will seat 1,100 people and the facility will house the more than 20 ministries of Mt. Rose Church of God In Christ. In addition, it will also include a gymnasium for recreational activities.

Mr. Speaker, as Mt. Rose Church of God In Christ continues to grow in size and members, they are embracing the community of Harris County. Their work sets an example for the entire community to follow.

MEDICARE EDUCATION AND REGULATORY FAIRNESS ACT OF 2001

HON. DANNY K. DAVIS
OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. DAVIS of Illinois. Mr. Speaker, I’d like to preface my comments by saying that Medicare is a wonderful program. Since the enactment of Medicare in 1965, seniors and disabled individuals have had better access to physicians and more access to life-saving treatments. And in comparison to managed care, Medicare is also extremely cost-effective. It’s an under-appreciated fact that Medicare is administered for just two cents on the dollar, while managed care is typically administered at a rate twelve times greater.

Still, it’s absolutely amazing how much bureaucratic red tape you can generate for two cents on the dollar. This is 500 sheets of paper. If you write double-sided, it’s 1000 pages. Now, if you imagine 110 of these stacks piled on top of each other, you begin to have an idea of how complicated Medicare is. 110,000 pages of regulations—that’s over three times the length of the U.S. tax code.

Every month, physicians receive pages upon pages from their Medicare carriers describing ever-changing policies and regulations. Keeping track of everything is frankly impossible. Yet, if a physician doesn’t follow one of the rules, no matter how unintentionally, he or she can be subjected to the draconian process of a Medicare audit. Currently, when carriers identify an alleged physician billing error, they can “extrapolate” the single identified error to the physician’s other claims. This would be like the IRS identifying an error on your most recent tax return and then assuming that you made that error on every tax return you ever filed.

The “Medicare Education and Regulatory Fairness Act of 2001” is a common-sense piece of legislation that addresses this injustice, as well as many others. This act will guarantee that physicians receive the same due process that we guarantee all our citizens. If this alone were the only virtue of this bill, it would still be worth passing. But there is a larger significance here that extends beyond physicians, and it can be summarized with a simple equation: Less time spent on paperwork means more time spent on patient care. Therefore, as much as physicians will benefit from this legislation, let us always keep in mind that the true beneficiaries are the patients.

INTRODUCTION OF LEGISLATION TO ALLOW FEDERAL CIVILIAN EMPLOYEES TO RETAIN FREQUENT FLYER MILES THEY RECEIVE WHILE TRAVELING ON OFFICIAL GOVERNMENT BUSINESS

HON. DAN BURTON
OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. BURTON. Mr. Speaker, today I am introducing a bill that would assist federal departments and agencies in their efforts to recruit and retain employees. This bill would allow federal civilian employees to keep frequent flyer miles and other promotional benefits they receive while traveling on official government business. Unlike private-sector employees, federal workers are currently prohibited by law from keeping these benefits for personal use.

The existing law, enacted in 1994, intended to save the government money. However, the law has been difficult to implement because the airlines regard frequent flyer miles as belonging to the individual traveler and are generally unwilling to create separate official and personal frequent flyer accounts for the same individual. Overall, the burdens and costs of administering this program have limited its benefits to the government.

The private sector commonly allows its employees to keep the frequent flyer miles they receive while on business travel, giving private companies, including government contractors, a competitive edge over federal agencies in attracting and retaining skilled employees. Changing this policy would help level the playing field.

However, in order for federal employees to keep these benefits, the bill would require that they be obtained under the same terms as provided to the general public and must be at no additional cost to the government. Frequent flyer miles that are accrued during employees’ official travel will also help compensate employees for the sacrifices and frustrations often associated with air travel. Similar to private-sector employees, federal employees must often travel on their personal time to meet work schedules.

This is just one small step to help counteract the effects of the expected retirements in the federal workforce in the coming years, and it would help the government compete for top-quality employees.

I urge my colleagues to cosponsor this legislation.
Mr. McINNIS. Mr. Speaker. It gives me great pleasure to recognize the city of Trinidad, Colorado as the city celebrates its 125th anniversary.

Throughout Trinidad’s town history, the city has been a melting pot for various cultures. In its defining years, Trinidad was a bustling city founded on coal mining and cattle ranching. Trinidad was also a stopping point for the railroad as it progressed westward. Today, it is a city of rich historical significance and livability located on the western slope of Colorado.

The 125th anniversary of Trinidad presents a wonderful opportunity for many residents to recall the theories that have shaped this dynamic community. For others, it highlights historical notes that illuminate an era when Bat Masterson was the town marshal in the 1880’s and when Trinidad was frequented by such famous western legends as Kit Carson, Wyatt Earp, Doc Holliday and Billy the Kid.

Mr. Speaker, I would especially like to commend the men and women who have impacted the city of Trinidad and made it the delightful place it is today. For example, Felipe Baca was an early businessman who built and resided in the notorious Baca Mansion. Sister Blidinda was a pioneer for the Catholic Church, erected in 1886. These are just a few of the many personalities that have molded not only the city of Trinidad, but also the western territory in general.

Mr. Speaker, as the members of this historic community reminisce of days gone by and anticipate those yet to come, I am proud to honor and congratulate the residents of Trinidad on their anniversary. It is truly a remarkable accomplishment to celebrate 125 years of prosperity and good fortune.

HON. MELISSA A. HART
OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Ms. HART. Mr. Speaker, I submit the following Wall Street Journal article printed on Friday, July 6th. The story discusses the implementing Wall Street Journal article printed on Friday, July 6th. The story discusses the following Wall Street Journal article printed on Friday, July 6th.

EXTRUDE HONE CORPORATION

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

[From the Wall Street Journal, July 6, 2001]

IRWIN, PA.—Extrude Hone Corp. is one of the reasons that the bottom hasn’t fallen out of the U.S. economy.

Quietly, but profitably, the company is going about its business: making machines that use a special abrasive putty to smooth out rough edges on aircraft engines, fuel-injection jets, and heart valves. By itself, Extrude Hone, which has a work force of less than 200 locally and 400 world-wide, hardly registers beyond its rural hometown near Pittsburgh and the large community of its customers. But its broader significance lies in the fact that it’s far from alone.

Extrude Hone is just one of about 4,000 manufacturers in this southwest corner of Pennsylvania, nearly all with fewer than 500 workers. As a group, they employ about 170,000 people, and their payrolls total $7.1 billion annually. Most are too small to show up on Wall Street’s radar screen. But these stealth manufacturers, principally durable-goods makers, have an outsized impact on the nation’s economy, and many of them are showing surprising strength.

LAYOUTS VS. HIRING

Though there have been some recent signs of a pickup, the durable-goods sector, which produces big-ticket items designed for repeated use, has borne the brunt of the manufacturing slump that began in the second half of 2000. Many of the sector’s publicly traded giants, such as General Electric Co., Eaton Corp. and International Paper Co., have reported earnings announcements or layoffs. But despite all that, about 80% of south-western Pennsylvania’s durable-goods manufacturers plan to add workers this quarter, according to a recent survey by staffing agency Manpower Inc.

Why? Larry Rhoades, Extrude Hone’s chief executive, can cite several reasons. So can Kurt Leisher III, whose family-owned company makes vacuum systems, or Robert Moscardini of U.S. Tool & Die Inc., who has nearly tripled his work force to 110 people since 1994 and whose board wants him to increase it to as many as 500.

All three businesses have been understaffed in recent years and have had to invest heavily in recruiting and training. Mr. Leisher figures U.S. Tool & Die spent 3,000 hours training workers last year, even paying an outside welding company to help it in the effort. “You figure every hour is worth $60 to $100,” he says, “That’s a big investment. You don’t just let those people go.”

EIGHT GREAT YEARS

Nor are many small to midsize manufacturers everywhere in the nation rushing to cut back. Though some have had no choice but to lay off employees, even many of those businesses have strengthened their resolve to hang on to their workers, both out of loyalty to their communities and employees and out of fear that they will be left without much-needed talent when the times improve. And, unlike public shareholders breathing down their necks demanding that they maximize returns, they have the flexibility to eschew layoffs in favor of longer-range business goals.

“They’re not crying the blues because they had eight great years,” says Dean Garrison of the new Pennsylvania Manufacturers Association. “They’re just not putting in the effort.” Says Jerry Letendre, owner of Diamond Casting Corp. in Hollis, N.H., where he and his 50 employees pour molten aluminum into shapes for high-tech pumps. Last year, his profits dropped 50% and sales fell 30%. But rather than make big layoffs, he decided to hold off buying a new computerized milling machine and dig deeper into his own pockets to re-build inventory and introduce new products.

Twenty-five percent of its products were introduced in the past 10 months, keeping it a step up. “During good times you conduct yourself so you can comfortably sustain not-so-good times like now,” Mr. Letendre says. And, he adds, “I don’t have Wall Street thinking, ‘What have you done for me this week?’”

Here in southwest Pennsylvania, industrial stalwarts such as U.S. Steel Corp., Alcoa Inc. and Westinghouse Electric Corp. drove the economy, spawning thousands of smaller operations that were formed solely to supply and serve them. Many of those operations dried up over the decades as Westinghouse left town and steel’s presence here shrank. The small manufacturers that have survived the shakeout have done so by keeping in step with their large community of its customers. But its owners can still afford to put “dollars into the company,” he says. “They’re less apt to let people go, and that creates a stabilizing force.”

In a slow-down

And a significant one. Those largely anonymous businesses account for about 9.8 million more than half of all manufacturing jobs. And their seeming resistance to layoffs helps explain why consumers, who are also employees, have remained relatively upbeat, despite the current slowdown.

Jerry Letendre owns Diamond Casting Corp. in Hollis, N.H., where he and his 50 employees pour molten aluminum into shapes for high-tech pumps. Last year, his profits dropped 50% and sales fell 30%. But rather than make big layoffs, he decided to hold off buying a new computerized milling machine and dig deeper into his own pockets to re-build inventory and introduce new products.

Twenty-five percent of its products were introduced in the past 10 months, keeping it a step up. “During good times you conduct yourself so you can comfortably sustain not-so-good times like now,” Mr. Letendre says. And, he adds, “I don’t have Wall Street thinking, ‘What have you done for me this week?’”

Here in southwest Pennsylvania, industrial stalwarts such as U.S. Steel Corp., Alcoa Inc. and Westinghouse Electric Corp. drove the economy, spawning thousands of smaller operations that were formed solely to supply and serve them. Many of those operations dried up over the decades as Westinghouse left town and steel’s presence here shrank. The small manufacturers that have survived the shakeout have done so by keeping in step with their large community of its customers. But its owners can still afford to put “dollars into the company,” he says. “They’re less apt to let people go, and that creates a stabilizing force.”

In a slow-down

And a significant one. Those largely anonymous businesses account for about 9.8 million more than half of all manufacturing jobs. And their seeming resistance to layoffs helps explain why consumers, who are also employees, have remained relatively upbeat, despite the current slowdown.

Jerry Letendre owns Diamond Casting Corp. in Hollis, N.H., where he and his 50 employees pour molten aluminum into shapes for high-tech pumps. Last year, his profits dropped 50% and sales fell 30%. But rather than make big layoffs, he decided to hold off buying a new computerized milling machine and dig deeper into his own pockets to re-build inventory and introduce new products.

Twenty-five percent of its products were introduced in the past 10 months, keeping it a step up. “During good times you conduct yourself so you can comfortably sustain not-so-good times like now,” Mr. Letendre says. And, he adds, “I don’t have Wall Street thinking, ‘What have you done for me this week?’”

Here in southwest Pennsylvania, industrial stalwarts such as U.S. Steel Corp., Alcoa Inc. and Westinghouse Electric Corp. drove the economy, spawning thousands of smaller operations that were formed solely to supply and serve them. Many of those operations dried up over the decades as Westinghouse left town and steel’s presence here shrank. The small manufacturers that have survived the shakeout have done so by keeping in step with their large community of its customers. But its owners can still afford to put “dollars into the company,” he says. “They’re less apt to let people go, and that creates a stabilizing force.”

In a slow-down

And a significant one. Those largely anonymous businesses account for about 9.8 million more than half of all manufacturing jobs. And their seeming resistance to layoffs helps explain why consumers, who are also employees, have remained relatively upbeat, despite the current slowdown.
A few years ago, Mr. Ross got together with some other area manufacturers to discuss the problem. With the help of Duquesne University in Pittsburgh and a local foundation, they developed a training program aimed at people who had planned to go to college and indicated an interest in a career but had ended up in dead-end jobs. So far, Lesker has hired about 15 graduates of the program, which is called Manufacturing 2000, including Dan McKenzie.

More EarnIng Power

Mr. McKenzie, 27, had just finished a stint with the Marine Corps and was working in a pizza shop. He saw the program’s ad for free training and jumped on it. Now, he works for Lesker as a machinist and has taken some college courses toward an industrial-engineering degree. As a result, Mr. McKenzie, who made $8.50 an hour delivering pizza, has seen his earning power increase substantially. The average annual wage in the manufacturing sector here is $42,000. The sector, which employs about 15% of the region’s workers, accounts for 20% of the region’s wages, according to Barry Macial, of Duquesne’s Institute for Economic Transformation.

Local companies paid $1,250 for each Manufacturing 2000 graduate and considered it a bargain, “We don’t have the resources to train and recruit that larger companies have,” says Lesker’s Mr. Ross. Once it gets people, the company is loath to lose them.

Moreover, the average age of machinists, welders and tool grinders is 43, and welders rarely wait until they are 65 to retire because their work is so physically demanding. So, the company has to think about the future.

But Lesker also feels a loyalty to its work force, a luxury many public companies can’t afford. Kurt Lesker III, Lesker’s president, remembers sales plummeting after the fall of the Berlin Wall dried up the company’s defense-related business. “We went through several years of break even. We could have easily allowed the company to wither away because it had to get better,” he says. “If it was a public company, I would have been fired.”

PERSONAL EXPLANATION

HON. BOB RILEY
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. RILEY. Mr. Speaker, I was unavoidably detained for rollcall No. 211, Encouraging Corporations to Contribute to Faith-Based Organizations. Had I been present I would have voted “yea.” I was also unavoidably detained for rollcall No. 212, Expressing the Sense of Congress in support of Victims of Torture. Had I been present I would have voted “yea.” I was also unavoidably detained for rollcall No. 213, Authorization of the Use of the Rotunda for Presenting Congressional Gold Medals to the Navajo Code Talkers. Had I been present I would have voted “yea.”
his selfless service to America and to his 50 combat flights. These are distinctions one earns for going above and beyond the call of duty.

I am proud to honor Fritz with this Congressional Tribute as he is truly an American hero who exemplifies the spirit of patriotism. He is one individual who added to the collective effort to perpetuate peace and reconciliation following World War II. I commend his notable service and his efforts on the behalf of this country and wish him all of the best in the years to come.

EUROPEAN UNION OPPOSES BEIJING’S OLYMPIC BID—CONGRESS REMAINS SILENT

HON. TOM LANTOS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. LANTOS. Mr. Speaker, on July 5th the 626-member European Parliament meeting in Strasbourg, France, adopted a resolution opposing China’s bid to host the 2008 Summer Olympics. In finding that China “clearly fails to uphold universal human, civil and political rights, including freedom of religion,” the European Parliament urges that the International Olympic Committee (IOC) “reconsider Beijing’s candidacy,” only when China has made “fundamental change in their policy on human rights, and the promotion of democracy and the rule of law.”

Last March, with an overwhelming bipartisan vote, the House Committee on International Relations expressed itself against China holding the Olympics by approving H. Con. Res. 73. Now the 626 Members of the European Parliament have voted and approved a similar resolution, yet we in the U.S. House of Representatives have not been given the opportunity to speak as a whole on this critical moral issue. I implore the Speaker and the Majority Leader—stop bottling up this legislation.

Mr. Speaker, I ask that the entire text of the resolution concerning Beijing’s application to host the 2008 Olympic Games, as adopted by the European Parliament on July 5th, be placed in the CONGRESSIONAL RECORD. I urge my colleagues in speaking out against China’s Olympic bid in the few hours that remain before the IOC vote on Friday in Moscow. Religion is persecuted, political freedom does not exist, media freedom does not exist, our airplane is forced down, our servicemen and women are held in captivity for 11 days; yet this body is not allowed to vote on whether the Olympics should be held in Beijing.

EUROPEAN PARLIAMENT RESOLUTION ON BEIJING’S BID TO HOST THE 2008 OLYMPIC GAMES

The European Parliament resolution on Beijing’s bid to host the 2008 Olympic Games The European Parliament, having regard to its previous resolutions on the situation in the People’s Republic of China (PRC), having regard to the conclusions of the General Affairs Council of 19 March 2001, in which the Council expressed its concern at the serious human rights violations in the PRC, recalling the city of Beijing held the 2001 Olympic Games, recalling that the Charter of the Olympic Games states that Olympicism has as a goal “to place sport at the service of the harmonious development of humankind, with the object of creating a peaceful society with the preservation of human dignity”, A. Whereas the repression of freedom of opinion and freedom to hold demonstrations in favour of democracy that has been practised for decades, is continuing in the PRC, despite international protests. B. Having regard to the repression of religious, ethnic and other minorities, in particular Tibetans, Uighurs and Mongolians and the Falun Gong movement. C. Having regard to the frequent imposition of capital punishment, leading to over a thousand reported executions in China every year, as well as the widespread use of torture on the part of the Chinese police and military forces. D. Recalling that the PRC has still not ratified the International Covenant on Civil and Political Rights. E. Whereas the Chinese authorities have taken no significant initiatives on respect for human rights, despite the ongoing political dialogue between the EU and the PRC. F. Concerned with regard to environmental and animal welfare issues in the PRC. G. Stressing that the plans relating to Beijing’s bid to host the 2008 Olympic Games would involve the destruction of a large part of the old city and the obligatory transfer of the inhabitants to the surrounding areas. H. Recalling that the International Olympic Committee is due to designate, on 13 July 2001 in Moscow, the city that will host the 2008 Olympic Games.

1. Invites the International Olympic Committee to establish guidelines to include respect for human rights and democratic principles to be applied as a general rule to host countries of Olympic Games.

2. Regrets that the PRC clearly fails to uphold universal human, civil and political rights, including freedom of religion and therefore believes that this negative record and the repression in Tibet as well as in Ouguristan and in South Mongolia, make it inappropriate to award the 2008 Olympic Games to Beijing.

3. Urges the International Olympic Committee in any case to make a thorough environmental impact assessment with regard in particular to the recurrent water shortages, the impact of mass tourism and the social repercussions in the region surrounding Beijing.

4. Invites the International Olympic Committee to reconsider Beijing’s candidacy when the authorities of the PRC have made a fundamental change in their policy on human rights, and the promotion of democracy and the rule of law.

5. Instructs its President to forward this resolution to the Council, the Commission, the Presidents of the parlament of the Member States, and to the International Olympic Committee.

CAMPAIGN FINANCE REFORM

HON. JERRY MORAN
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. MORAN of Kansas. Mr. Speaker, the House this week begins debate on campaign finance reform. This debate is important for a number of reasons. We need to end the practice of unlimited soft money contributions from corporations and labor unions, improve disclosure requirements so that ordinary citizens know who is paying for campaigns. Most importantly, we need to restore people’s confidence that their elected officials are looking out for their interests.

IN PREVIOUS DEBATES ON CAMPAIGN FINANCE REFORM, I HAVE SUPPORTED A BAN OF SOFT MONEY. THESE UNREGULATED, UNLIMITED CONTRIBUTIONS HAVE CAST A SHADOW OF IMPROPRIETY OVER ELECTIONEERING EFFORTS BY BOTH POLITICAL PARTIES. SOFT MONEY CIRCUMVENTS CURRENT CAMPAIGN FINANCE LAWS WHICH PROHIBIT CORPORATE CONTRIBUTIONS TO FEDERAL CAMPAIGNS AND LIMIT HOW MUCH AN INDIVIDUAL CAN CONTRIBUTE. BANNING SOFT MONEY WOULD ELIMINATE THE LARGEST SOURCE OF QUESTIONABLE CAMPAIGN MONEY IN ELECTIONS AND WOULD HELP REPAIR CONGRESS’S TAMASHIRED PUBLIC IMAGE.

ANOTHER KEY PRINCIPLE OF CAMPAIGN FINANCE REFORM IS IMPROVED DISCLOSURE. VOTERS HAVE A RIGHT TO KNOW WHO IS CONTRIBUTING TO CAMPAIGNS, HOW MUCH AND WHEN. THEY ALSO HAVE A RIGHT TO KNOW WHO IS PAYING FOR ADVERTISING AND OTHER POLITICAL ACTIVITIES ON BEHALF OF OR IN OPPOSITION TO CANDIDATES. ARMED WITH THIS INFORMATION, VOTERS ARE MORE THAN CAPABLE OF JUDGING WHO IS REPRESENTING THEM AND WHO IS REPRESENTING SPECIAL INTEREST CONTRIBUTORS.

REFORM LEGISLATION SHOULD STRENGTHEN DISCLOSURE REQUIREMENTS AND IMPROVE ELECTRONIC ACCESS TO CAMPAIGN FINANCE INFORMATION.

I STRONGLY SUPPORT REFORMING OUR CAMPAIGN FINANCE LAWS. I DO NOT SUPPORT TAXPAYER FINANCING OF FEDERAL ELECTIONS. NOR DO I SUPPORT PROPOSALS THAT INFRINGE ON THE FREE SPEECH RIGHTS OF INDIVIDUALS OR GROUPS. THE FREEDOM TO SUPPORT OR OPPOSE CANDIDATES IS FUNDAMENTAL TO THE AMERICAN SYSTEM OF GOVERNMENT. PUBLIC FINANCING FORCES CITIZENS TO SUPPORT WITH THEIR TAX DOLLARS CANDIDATES THEY OPPOSE AT THE BALLOT BOX. SIMILARLY, IT IS WRONG TO PROHIBIT CITIZENS FROM USING THEIR OWN RESOURCES TO ADVOCATE THE ELECTION OR DEFEAT OF A CANDIDATE. WE NEED TO ENSURE THAT WE DO NOT USE THE BANNER OF REFORM TO SILENCE THE VOICES OF THOSE WHO OPPOSE US.

I WILL WORK TO PASS AND SEND TO PRESIDENT BUSH A CAMPAIGN FINANCE REFORM BILL THAT ACCOMPLISHES TRUE REFORM WHILE PROTECTING THE RIGHTS OF ALL CITIZENS TO PARTICIPATE IN OUR DEMOCRACY.
EXTENSIONS OF REMARKS

on all the people of south Asia. We can do this by maintaining the existing sanctions against India, by stopping our aid to India until it stops dehumanizing and brutalizing the peoples of South Asia, and by committing our resources to provide the people of South Asia with the tools that are the cornerstone of real democracies, and by supporting self-determination for the peoples of South Asia in the form of a free and fair plebiscite on their political status. By these measures, we can help bring freedom, security, stability, and prosperity to the subcontinent and bring America new allies and new influence in this dangerous region.

HONORING NANCY MACCONELL

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to honor a great wife, mother, sister, aunt, grandmother, great grandmother and friend. Eighty years ago this Saturday, July 14th, Nancy Leigh MacConell, was born in Globe, Arizona, eldest daughter of Elijah and Alta Phillips.

Nancy is also a treasure to one and all. She has brought great joy to all her family including her beloved sisters Joan and Sidney and her late husband Michele MacConell, Jr.

Nancy is the mother of three; Suzanne Du Pree, Michele King and Michael, the grandmothers of ten and the great grandmother of thirteen. And all firmly believe she has the patience of Job and is the greatest mom there ever was.

I rise today to celebrate and honor Nancy MacConnell's 80th birthday and wish her as much and love and joy in the next 30.

SUPPORTING A COMMEMORATIVE STAMP FOR THE HONORABLE ADAM CLAYTON POWELL, JR.

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. RANGEL. Mr. Speaker, I rise to urge my colleagues to support House Concurrent Resolution 182, which recommends a long overdue commemorative stamp for a lawmaker, civil rights advocate and American statesman whose achievements continue to resonate. Congressman Adam Clayton Powell, Jr. remains one of the greatest and most effective legislators in the history of the U.S. Congress. When he was first elected to Congress in 1945, he was one of only two African-American members, and became the first of his race to chair the powerful Committee on Education and Labor from 1961 to 1967.

As Chairman, he spearheaded the legislation that authorized the Medicare, Medicaid, Head Start and school lunch programs, increased the minimum wage and established student loan programs. Congressman Powell also pushed through the landmark Civil Rights Act of 1964, finally codifying his famous "Powell Amendment": a rider that would deny federal dollars to institutions which practice racial discrimination, which he had introduced repeatedly for years.

Congressman Powell was a pioneer among lawmakers and accomplished what leaders among the greatest examples of perseverance and triumph in our democratic system.

I respectfully urge my colleagues to join me and cosponsor H. Con. Res. 182 to celebrate a lawmaker whose legacy and accomplishments are among the greatest examples of perseverance and triumph in our democratic system.

IN RECOGNITION OF EDUCATOR LARRY RATTO

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. STARK. Mr. Speaker, I would like to pay tribute to a legendary educator in my congressional district who retired on June 30, 2001 after an illustrious thirty-six year career filled with memorable contributions to the Hayward, California school district.

A native of Alameda, California, Larry began his career in 1965, when he worked as a history/government teacher and counselor at Mt. Eden High School. Four years later, he became an administrator at Tennyson High School where he took the reins and lead with vigor and creativity.

He stood on hot coals more than once for a good five to ten minutes during pep talks to student leaders at their annual weekend retreat.

Many recall the time in 1970 when Larry rode a galloping horse between the Tennyson High School buildings to chase down a truant student—a legendary story that people still talk about three decades later.

In 1971, Larry became vice principal at Hayward High School and five years later, Larry became principal/co- principal of Sunset High School until it closed in 1990. He returned to the 1,900-student Hayward High School as principal, the last position he held before his retirement.

"You got to have some pizzazz," Larry said, while wrapping up his final days as a public school administrator. "You are competing with the MTV culture." Larry describes his career as "fun." He said, "There were days when it was not fun and hours that I thought, "Why am I doing this?"

Having once considered being a lawyer, Larry enjoyed the excitement of a high school principal's life, that every day was different. He is proud of Hayward High School and its wide class offerings and plethora of extracurricular student activities.

Parents, teachers, students, and community leaders express great admiration for Larry Ratto's three decades of outstanding leadership in education as well as his exemplary involvement in community activities.

I ask my colleagues to join me in paying tribute to this colorful, legendary educator, and community leader.
IN HONOR OF THE REOPENING OF THE LESBIAN, GAY, BISEXUAL & TRANSGENDER COMMUNITY CENTER

HON. JERROLD NADLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. NADLER. Mr. Speaker, I rise today to recognize the reopening of the newly renovated and recently renamed Lesbian, Gay, Bisexual & Transgender Community Center located in New York City. The stated mission of the Center is to provide a home for the birth, nurture and celebration of lesbian, gay, bisexual, and transgender organizations, institutions and culture. For nearly two decades the Center has successfully fulfilled that mission by providing groups and individuals a safe space in which to achieve their fullest potential. The newly renovated space at 208 West 13th Street in Manhattan, will be a permanent home for the local LGBT community, fostering creativity, compassion, and activism.

The Lesbian, Gay, Bisexual & Transgender Community Center has long been a beacon of hope for many in the community, serving thousands upon thousands of residents from all walks of life and from every corner of the world. The Center is not only a host to a wide variety of civic, athletic, health, and cultural groups, but it also provides an array of its own programming. Programs such as Project Connect, CenterBridge, Center Kids, the Pat Parker/Vito Russo Center Library, and the National Museum and Archive of Lesbian and Gay History add to the expansive fabric that binds New York’s LGBT Community.

Mr. Speaker, I salute The Lesbian, Gay, Bisexual & Transgender Community Center in its ongoing effort to better enrich the LGBT Community and society as a whole. I am eminently proud to represent such a living landmark. I urge my colleagues to join me in wishing them well and all the hope for the future in their new spectacular facility.

EXTENSIONS OF REMARKS

HON. DON YOUNG
OF ALASKA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Mr. YOUNG of Alaska. Mr. Speaker, I rise today to introduce legislation which will facilitate and promote the successful commercial reuse of the former Naval Air Facility on Adak Island, Alaska. At the same time, this legislation will allow the Aleut people of Alaska to reclaim the island and to make use of its modern developments and important location.

The legislation I introduce today ratifies an agreement between The Aleut Corporation, an Alaska Native Regional Corporation, the Department of the Interior, and the Department of the Navy. “The Agreement Concerning the Conveyance of Property at the Adak Naval Complex, Adak,” Alaska was signed last September and is the result of more than four years of discussions and negotiations among the three parties.

The bill and the Agreement also further the conservation of important wildlife habitat. A portion of Adak is within the Aleutian Islands subunit of the Alaska Maritime National Wildlife Refuge. The Agreement facilitates the Department of the Interior’s continued management and protection of the Refuge lands on Adak and even adds some of the Navy lands to the Refuge. Moreover, in exchange for the developed Navy lands, which are not suitable for the Refuge, but are commercially useful, the Aleut Corporation will convey environmentally sensitive lands it holds elsewhere in the Refuge to the Department of the Interior.

For many years the Navy was an important constituent in Alaska’s Aleutian Chain. Its presence was first established during World War II with the selection and development of the island because of its combination of ability to support a major airfield and its natural and protected deep water port. The Navy’s presence there contributed greatly to the defense of our Pacific coast during World War II and throughout the Cold War. Through the Navy’s presence, Adak became the largest development in the Aleutians as well as Alaska’s sixth largest community. With the end of The Cold War our defense needs changed, however, and Adak was selected for closure during the last base closure round.

Those very same features that made Adak strategically important for defense purposes also make it important for commercial purposes. Adak is a natural stepping stone to Asia and is at the crossroads of air and sea trade between North America, Europe, and Asia. With the ability to use Adak commercially, the Aleut people, through The Aleut Corporation can establish it as an important intercontinental location with enterprise enough to provide year round jobs for the Aleut people. These goals are consistent with the promises and the Alaska Native Claims Settlement Act, the legislation that created the corporation.

This rebirth of Adak is already well under way. The Aleut people assumed responsibility for the operation of the Island from the Navy last October and there are a number of new commercial enterprises and endeavors. At the same time a new community has begun to take shape. Just last month the new City of Adak was established as a result of a public referendum and is in the process of taking over responsibility for the many public facilities.

The Agreement resolves a number of important issues related to the transfer of this former military base and the establishment of the new community on Adak, including responsibility for environmental remediation, institutional controls, indemnification, required public access, and reservation of lands for government use.

This legislation furthers this country’s objectives of conversion of closed defense facilities into successful commercial reuse, it benefits the Aleut people and restores them to their ancestral lands and it benefits the National Wildlife Refuge System. I believe everyone will agree that such legislation is important and worthy of our support.

PRESCRIPTION DRUG BENEFIT

HON. BETTY MCCOLLUM
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 11, 2001

Ms. MCCOLLUM. Mr. Speaker, it is far past the time for us to address the intolerable discrimination in drug pricing and provide a comprehensive prescription drug benefit now. These drug re-importation amendments fail to address the real issue of the lack of affordable prescription drugs and in turn provide no real relief.

Seniors should be able to buy American prescription drugs for the same price in Rochester as you can in Rio, in Mankato as you...
HONORING THE 125TH ANNIVERSARY OF THE VILLAGE OF BALDWIN, ILLINOIS

HON. JERRY F. COSTELLO
OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. COSTELLO. Mr. Speaker, I rise today to ask my colleagues to join me in recognizing the 125th anniversary of the Village of Baldwin, Illinois.

The Village of Baldwin originally was settled about one mile north of it's present location. The early settlers were the Henderson, Allen and Preston families. In 1874, the Mobile and Ohio Railroad built a railroad line at it's present location. Later, a grain elevator was built along the railroad and the village started to develop. In 1876, villagers circulated a petition requesting the official incorporation of the Village of Baldwin. On July 12, 1876, at a special term of the County Court, this petition was presented to Presiding Judge John H. Lindsey and County Clerk Moses McBratney. The petition, signed by fifty legal voters, requested that the organization of the Village of Baldwin be recognized as the county in the County of Randolph be approved. County Judge Lindsey approved the petition and ordered an election to be held on Tuesday July 11, 1876 at the office of RH Preston Esq, for the purpose of voting for or against the organization of the Village under the general laws of the State of Illinois. William L. Wilson and James C. Howbrook, Justices of the Peace of Randolph County, canvassed the election returns, finding that all votes cast were unani-mously for the organization of the Village. Judge Lindsey ordered that on August 8, 1876, at the office of RH Preston Esq., an election be held for six Village trustees and one Village Clerk. The first Village Board that was elected then was S.H. Johnson, J.E. Davis, W.T. Thompson, James R. Holden, W.M. Wilson and S.B. Adams. The elected Village Clerk was S.D. Lindsey. On August 11, 1876, the Board of Trustees held it's first meeting. S.B. Adams was chosen as the President of the Board and W.S. Johnson was appointed Village Constable and S.D. Lindsey was appointed Village Treasurer.

The Village of Baldwin prospered as a small trading Village throughout the years. The main business being a grain elevator, of which there has been one in Baldwin since it's incorporation. At present, the elevator is owned and operated by Gateway PS. In 1932, Highway 154 was built through Baldwin to provide all-weather transportation to neighboring towns and communities. In September of 1940, the Mobile and Ohio Railroad was purchased by the Gulf, Mobile and Northern Railroad and re-named to The Gulf, Mobile and Ohio. Later it merged with the Illinois Central Railroad and today it is part of the Canadian National System. Passenger and freight service was provided on the railroad until October 1958, when passenger service was discontinued in the 1980's. The present rail system supplies services to the Baldwin Power plant, Fairmont Minerals, the Kaskaskia Regional Port District and Gateway FS.

In the Village of Baldwin the educational system consisted of a three-year high school, a public grade school and a Lutheran grade school. The high school was discontinued in the mid 1940's and the school district became part of the Red Bud School District. In 1959, the public grade school and children were sent to Red Bud schools. The Lutheran school was built in the mid 1970's and children attend either Prairie or Red Bud. Baldwin is also the home to many churches. Both the St. John's Lutheran Church and the Baldwin Community Presbyterian Church have organizations to promote the welfare of their members. The Village also has many civic organizations which include the American Legion Nicholas Laufu Post 619, the Baldwin Athletic Club, the Baldwin Community Center, when completed, will be used for all community functions and also serve as a meeting room for the Village Board. Offices for the Village President and Village Clerk will also be included in this facility. Today, the Village of Baldwin is presided over by Jeffrey S. Rowold, Village President, Wesley G. Stellhorn-Village Clerk, Eileen Mehring-Village Treasurer, Craig Hartman, James Mueller, Darrell Mueh, Gary Schoenbeck and Cheryl Sellers all Village Trustees.

Mr. Speaker, I ask my colleagues to join me in honoring the 125th Anniversary of the Village of Baldwin and to salute it's past, present and future residents.
operation of trucks may be a small but necessary part of an individual’s job. We imposed our will on thousands of small businesses not involved in long-haul trucking and somehow expected them to adjust to any circumstance that might arise. Under these conditions, I believe it should be within a state’s discretion to determine what kind of commercial vehicle licensure and testing is required for commerce solely within its borders.

I again want to emphasize that it would be entirely up to each state whether it chooses to reassert authority over licensing and testing of intrastate drivers. A state that chooses to exercise this option would in no way diminish the role of the CDL in the long-haul trucking industry. Additionally, this legislation effectively precludes two or more states from using this option as the basis for an interstate compact. I am confident that those states taking advantage of this option will develop testing standards that maintain the safety level of the federal program. After all, the primary mission of all state DOTs is to ensure the safety of those travelling on their roads.

This legislation is extremely important to our nation’s small businesses, and I urge the House to adopt this measure.

RECOGNIZING THE CONTRIBUTIONS OF FUJIFILM TO THE SMITHSONIAN INSTITUTION

HON. LINDSEY O. GRAHAM
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. GRAHAM. Mr. Speaker, I rise today to congratulate Fujifilm for recently receiving the Smithsonian Institution’s 2001 Corporate Leadership Award for its role as lead sponsor of Mei Xiang and Tian Tian, the new giant panda pair at the Smithsonian’s National Zoo. The award recognizes the gift made on behalf of Fujifilm’s 8,000 U.S. associates at 47 separate facilities.

Additionally, I would like to commend Fujifilm for the significant contribution that organization has made to the Smithsonian’s National Zoo in donating $7.8 million, the largest donation in the Zoo’s distinguished history. Fujifilm’s generous gift and lead sponsorship of the project to bring a new giant panda pair to the Zoo and to construct the Fujifilm Giant Panda Conservation Habitat which will serve as the new, permanent home for the pandas. Mei Xiang and Tian Tian have quickly become national treasures. Their arrival at the Zoo, as well as the extensive giant panda education and research activities, initiated through their sponsorship, have been beneficial to the visiting public. Fujifilm hopes that its involvement will create a gateway that will help people better understand the broader issues of species conservation worldwide. Additionally, many items from Fujifilm’s wide range of state-of-the-art imaging, data storage and information products will be used by Zoo researchers as they conduct their projects in the study of the giant pandas.

Mr. Speaker, I urge my colleagues to join me in lauding the outstanding corporate citizenship of Fujifilm and its leadership in conserving efforts. Additionally, I would hope that the members of this body will join me in thanking Fujifilm’s 8,000 U.S. associates for their valuable gift to the National Zoo, its visitors, and its researchers.

PERSONAL EXPLANATION

HON. MARK R. KENNEDY
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 11, 2001

Mr. KENNEDY of Minnesota. Mr. Speaker, on rollover Nos. 211, 212 and 213 I was unavoidably detained by airline delays.

Had I been present, I would have voted “yea” on each rollover.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in any meetings as they occur.

As an additional procedural step along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, July 12, 2001 may be found in the Daily Digest of today’s RECORD.

MEETINGS SCHEDULED

JULY 13
9:30 a.m.
Energy and Natural Resources
To hold hearings on proposals related to energy efficiency, including S.352, the Energy Emergency Response Act of 2001; Title XIII of S. 597, the Comprehensive and Balanced Energy Policy Act of 2001; Sections 602-606 of S. 388, the National Energy Security Act of 2001; S. 95, the Federal Energy Bank Act; and S.J. Res. 15, providing for congressional disapproval of the rule submitted by the Department of Energy relating to the postponement of the effective date of energy conservation standards for central air conditioners.

SD-366

Emitted Services
Readiness and Management Support Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 2002 for the Department of Defense and the Future Years Defense Program, focusing on installation programs, military construction programs, and family housing programs.

SR-232A

JULY 16
1 p.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings to examine security risks for the E-consumer.

SR-253

JULY 17
9:30 a.m.
Energy and Natural Resources

SD-366

Commerce, Science, and Transportation
To hold hearings to examine media concentration.

SR-253

10 a.m.
Judiciary
To hold hearings on executive branch nominations.

SD-226

2:30 p.m.
Judiciary
Immigration Subcommittee
To hold hearings on S. 121, to establish an Office of Children’s Services within the Department of Justice to coordinate and implement Government actions involving unaccompanied alien children.

SD-226

JULY 18
9:30 a.m.
Governmental Affairs
To hold hearings on S. 1008, to amend the Energy Policy Act of 1992 to develop the United States’ Climate Change Response Strategy with the goal of stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system, while minimizing adverse short-term and long-term economic and social impacts, aligning the Strategy with United States energy policy, and promoting a sound national environmental policy, to establish a research and development program that focuses on bold technological breakthroughs that make significant progress toward the goal of stabilization of greenhouse gas concentrations, and to establish the National Office of Climate Change Response within the Executive Office of the President.

SD-342

Commerce, Science, and Transportation
Surface Transportation and Merchant Marine Subcommittee
