The Senate met at 9:30 a.m. and was called to order by the Honorable Evan Bayh, a Senator from the State of Indiana.

The PRESIDING OFFICER. Today's prayer will be offered by guest Chaplain, Canon Pastor Lawson Anderson, of Trinity Cathedral in our Little Rock, AR. It is my privilege to notify all those present that Reverend Anderson is the uncle of our colleague, Senator Blanche Lincoln of Arkansas.

PRAYER
The guest Chaplain offered the following prayer:
Gracious God, as we prepare in the week ahead to celebrate the anniversary of the founding of this Republic, we commend this Nation to Your merciful care, and we pray that being guided by Your providence, we may live securely in Your peace.
Grant to the President of the United States, to the Members of this Congress, and to all in authority wisdom and strength to know and to do Your will. Fill them with the love of truth and righteousness and make them ever mindful of their calling to serve this country in Your fear. Guide them as they shape the laws for maintaining a just and effective plan for our Government.
Give to all of us open minds and caring hearts and a firm commitment to the principles of freedom and tolerance established by our Nation's founders and defended by countless patriots throughout our history.
Help us to stamp out hatred and bigotry and to embrace the love and concern for others that You have clearly shown to be Your will for all mankind.
Bring peace in our time, O Lord, and give us the courage to help You do it.
We ask this in Your holy name. Amen.

PLEDGE OF ALLEGIANCE
The Honorable Evan Bayh led the Pledge of Allegiance, as follows:
I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE
The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. Byrd).
The legislative clerk read the following letter:

To the Senate:
Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable Evan Bayh, a Senator from the State of Indiana, to perform the duties of the Chair.

Robert C. Byrd
President pro tempore

Mr. BAYH thereupon assumed the chair as Acting President pro tempore.
The ACTING PRESIDENT pro tempore, The Senator from Arkansas, I shall take the privilege of the Chair and say that was an especially moving invocation this morning.

Mrs. Lincoln. I thank the Chair.
I thank the Senator from Nevada and all of my colleagues for the opportunity to share with you all this morning a very special individual in my life. I have been very blessed to grow up in a very close-knit family of supportive and encouraging people. My uncle, the Reverend Lawson Anderson, is just one of those wonderful people. I grew up within walking distance of both sets of my grandparents, and on hot summer days I would walk over to his mother's home and in the cool of his house play the organ that she practiced as she was the organist for our church.

One of the most wonderful stories and I think lessons I have learned from my Uncle Lawson I would like to share with my colleagues. He did not get started in ministry. His degree is in forestry. He began as a forester. He then went into banking and figured out, in order to really make it through life, he needed the wisdom and the courage that came from the ministry, which he joined later in life. He did say, however, that one of the best lessons he learned was not necessarily from the ministry but from his time in the forest industry.

He talked about dealing with problems in life, and he said one of the best lessons he learned as a forester was when he was very young and was presented with a forest fire, a difficult problem. He was beating at that fire with a shovel, and one of the older members of the forestry team came up to him and said: What are you doing? He said: I am putting this fire out; I'm putting it out. And the wise forester, who was beyond I guess his years in wisdom, looked at Uncle Lawson and said: That is not how you conquer a problem. The way you conquer a problem and, more importantly, a forest fire is you walk around it; you approach it from the front; you evaluate the circumstances: Which way is the wind blowing? What kind of moisture is there in the area? And then you dig a hole all the way around so that you encircle your problem and you actually take care of the whole thing. You do not just beat at it, but you make sure you get in front of your problems, you assess the situation, and you face them head on.

I am honored and privileged to serve the people of our great State of Arkansas. It has been something that has certainly been incredible in my life. But when I am able to bring to the Senate and share with these individuals, these incredible individuals with whom I serve in this great body, someone who has been a major part of shaping my life and molding me into the person that I am, it is, indeed, my honor and privilege to do that and to have him with us today.
I thank the Chair.

RESERVATION OF LEADER TIME
The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

BIPARTISAN PATIENTS PROTECTION ACT
The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1052 which the clerk will report.
CONGRESSIONAL RECORD—SENATE  

June 26, 2001  

The senior assistant bill clerk read as follows:

A bill (S. 1052) to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.

PENDING:

Frist (for Grassley) motion to commit to the Committee on Finance and the Committee on Health, Education, Labor, and Pensions with instructions to report back not later than that date that is 14 days after the date on which this motion is adopted.

Gramm amendment No. 810, to exempt employers from certain causes of action.

Edwards (for McCain-Edwards) amendment No. 812, to express the sense of the Senate with regard to the selection of independent review organizations.

The ACTING PRESIDENT pro tempore. Under the previous order, there will be 2 hours of debate in relation to the Grassley motion to commit and the Gramm amendment No. 810, the time to be equally divided in the usual form.

The ACTING PRESIDENT pro tempore, The Senator from Nevada is recognized.

SCHEDULE

Mr. REID. Mr. President, I just want to make a brief statement on behalf of Majority Leader DASCHLE. As has been indicated, the resumption of the Patients’ Bill of Rights will be the order at hand today. As has been announced, there will be approximately 2 hours of closing debate in relation to the Grassley motion to commit—and I understand he wants to modify his motion.

I ask Senator GRASSLEY, it is my understanding the Senator wants to modify his motion to commit; is that right?

Mr. GRASSLEY. Yes, Mr. President, I would not object—and with respect to the Gramm amendment regarding employers. That debate will be ended shortly. There will be two rollcall votes at 11:30 a.m.

I met with Senator DASCHLE early this morning, and he has indicated that without any question we are going to finish the Patients’ Bill of Rights before the Fourth of July break.

Now, I would say to everyone within the sound of my voice, I believe we have been on this bill a week. I think we have fairly well defined what the issues are, and I think it would be in everyone’s best interests if today we would decide what those issues are and have amendments offered. If people want time agreements, fine. If they do not, debate them, complete what they want to say, and move on. Everyone has many things to do during the Fourth of July break. But this is important. This bill has been around for 5 years, and we are going to complete it.

There is also a need to complete the supplemental appropriations bill. As I have indicated before, I think Senator BYRD and Senator STEVENS have done an excellent job in moving that bill along and I think we can do that very quickly. But there are going to be late nights tonight and Thursday. We are going to do our best to make sure everyone is heard, but also in consideration of other people’s schedules, we will do our best to complete action on this legislation as quickly as possible.

I see Senator REGG, the ranking manager of the bill, is here. I did not see him earlier.

Mr. REGG. Mr. President, I would like to ask unanimous consent that Senator ENZI be added as a cosponsor of the Gramm amendment which is pending.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REGG. I thank the Senator.

The ACTING PRESIDENT pro tempore. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I hope you will call on the Senator from Texas.

The ACTING PRESIDENT pro tempore. The Senator from Texas.

Mr. GRAMM. Mr. President, I ask unanimous consent that following the vote on the Grassley amendment, each side have a total of 3 minutes to summarize the arguments on the amendment excluding employers from liability.

Mr. REID. No objection.

The ACTING PRESIDENT pro tempore. Is there objection?

The Chair hears none, and it is so ordered.

The Senator from Iowa.

MOTION TO COMMIT, AS MODIFIED

Mr. GRASSLEY. Mr. President, before I speak on my motion, I ask unanimous consent that the pending motion to commit be modified to reflect the reference of the bill jointly to the Judiciary and the same 14-day timeframe that affects the Finance Committee and the HELP Committee also apply to the Judiciary Committee.

The ACTING PRESIDENT pro tempore. Is there objection?

The Chair hears none, and it is so ordered.

The motion to commit, as modified, is as follows:

MOTION TO COMMIT

Mr. Grassley moves to commit the bill S. 1052, as amended, to the Committee on Finance, the Committee on Health, Education, Labor, and Pensions, and the Committee on the Judiciary with instructions to report the same back to the Senate not later than that date that is 14 (fourteen) days after the date on which this motion is adopted.

Mr. GRASSLEY. Mr. President, I thank the majority for permission to modify my motion.

Mr. President, I rise to speak in favor of my motion to commit the Kennedy-McCain bill to the Health, Education, Labor, and Pensions, Judiciary, and Finance Committees with instructions that these committees report the bill out in 14 days.

As a preliminary note, I thank the good counsel of Senators THOMPSON and HATCH. Yesterday, they reminded me that the Kennedy-McCain bill also includes a series of provisions on liability that fall under Judiciary’s jurisdiction and have never been reviewed by that committee either. Thus, I have modified my motion to include the Judiciary Committee along with the HELP and Finance Committees.

I am deeply troubled that the Kennedy-McCain bill has bypassed the relevant committees and has been brought directly to the floor—without one hearing, without one markup, and without public input into this particular bill.

As I have very clear on the floor yesterday, I strongly believe that patient protections are critical to every hard-working American who relies on the managed care system. We need a strong and reliable patients’ rights bill and I am supportive of this effort. 100 percent. What we do not need is a bill, like Kennedy-McCain, that exposes employers to unlimited liability, drives up the cost of health insurance, and ultimately increases the number of Americans without health coverage.

Instead, I believe we should protect patients by ensuring access to needed treatments and specialists, by making sure each patient gets a review of any claim that may be denied, and above all by ensuring that Americans’ who rely on their employers for health care can still get this coverage. I’m confident these goals can be reached.

However, the very fact that our new leadership brought the Kennedy-McCain legislation directly to the floor with improper committee action, violates the core of the Senate process.

I know my colleagues on the other side will waste no time accusing me of delaying this bill, but the truth is, had the relevant committees been given the opportunity to consider the Kennedy-McCain legislation in the first place, I would not be raising these objections.

By bringing this bill directly to the floor, the message seems to me to be loud and clear: that the new chairman under the new Democratic leadership are merely speedbumps on the road to the floor.

I guess, as a former chairman who hopes to be chairman again in the near future, I do not particularly enjoy being a speedbump. But there’s something much more important at stake—process. A flawed process, more often than not, will lead to a flawed legislative product. We are seeing that point illustrated on this legislation.

Does anyone really think that if we had followed regular order and gone through the committee process that the bill before us would be in worse
June 26, 2001

CONGRESSIONAL RECORD—SENATE

11819

shape? Would we still be sitting around wondering where this bill is going? Or would it be up to me to define the employer liability exception with Senator Gramm’s amendment?

I guess I have more confidence in the committees of jurisdiction than the new leadership and sponsors of this bill do. The HELP, Judiciary, and Finance Committees have the experience and expertise to deal with the important issues this bill presents. My motion simply provides these fine committees with an opportunity to do their jobs.

Now let me turn for a moment to my committee, the Finance Committee. The Kennedy-McCain legislation treads on the Finance Committee’s jurisdiction in three ways that are by no means trivial—on trade, Medicare, and tax issues.

In fact, approximately one-third of the nearly $23 billion in revenue loss caused by this bill, is offset by changes in programs within the jurisdiction of the Finance Committee.

First, section 502 extends customs user fees generating $7 billion in revenue over eight years. These fees were authorized by Congress to help finance the costs of Customs commercial operations.

Most of my colleagues know first hand the financial pressures put on the Customs Service. From Montana, to Delaware, Massachusetts, Texas, and California, there is a dire need for funds to modernize the Customs service. Yet, the Kennedy-McCain legislation diverts money intended for Customs and uses it to pay for this bill. This is not what Congress intended. If these fees are to be extended—and I emphasize “if”—they should be done so in the context of a Customs reauthorization bill in the Finance Committee. This gives the Finance Committee the opportunity to carefully review, analyze and debate the implications of any Customs changes on the future of the Customs service and Customs modernization.

Second, section 503 of the Kennedy-McCain bill delays payments to Medicare providers, which generates $235 million to help offset the losses in the bill.

It is ironic that while many of us are spending significant amounts of our time working to improve Medicare’s effectiveness and efficiency—this bill actually takes steps to exacerbate the frustrations so many providers already experience today with delayed payments in Medicare.

Any changes to Medicare need thorough evaluation and consideration in the Finance Committee—where the expertise exists to determine the implications of any changes to the program. For those of us who think we can just tinker with this program, they’re wrong. It is much too important to our Nation’s 40 million seniors and disabled that rely on it. Any change, large or small, can have a sweeping impact on seniors, providers, and taxpayers.

Finally, let me turn to the third Finance Committee policy area implicated in this legislation. I’m talking about health care-related tax incentives.

Now I know there are no tax code changes in this particular bill. However, in years past, tax incentives have been an important part of this legislation. There’s good reason for this. As Senator McCain recognized, tax incentives provide balance to patients’ rights legislation by making health care more affordable and therefore more accessible.

I am a strong believer in health tax policy and have proposed a number of changes along with a number of other health care—including ways to reduce long-term care insurance and expenses, promote better use of medical savings accounts, and improve the affordability of health insurance through refundable tax credits.

But while I might agree with these policies on a substantive level, I will continue to oppose health tax amendments to the Kennedy-McCain legislation simply because the Finance Committee has never been given the opportunity to analyze, review, or discuss the implications of these provisions on the internal revenue code—a code that is the responsibility of the Finance Committee.

My motion provides the Finance Committee with its rightful opportunity to add health tax cut provisions to this legislation. There is no doubt that the Hutchinson-Bond amendment, that the Hutchinson-Bond amendment, has already agreed to consider the opportunity to analyze, review, or discuss the implications of these provisions on the internal revenue code—a code that is the responsibility of the Finance Committee.

On that point, I want to make clear that at my urging, Chairman Baucus has already agreed to consider a package of health care-related tax cuts, would be included in a package before the Finance Committee.

So let us hear no more discussion on this point. There is no justification for bypassing the committee.

What our new leadership has done is violate the rights of the members of three important Senate committees from utilizing their expertise and experience to fully evaluate the Kennedy-McCain legislation—a job these committees were designed to do.

Any member of the Finance Committees that support this process should beware. Supporting this process means that they support disenfranchising their own rights as committee members.

I believe we are at a critical juncture in history. Through a very close election, the American people have instructed those of us who represent them in this town of Washington, DC, to get serious about legislative business.

I believe the Iowans have told me, and what the Iowans have told me, is to get serious about legislative business.

What the Iowans have told me, and what the Iowans have told me, is to get serious about legislative business.

Thank you.
partisan politics and to be serious legislators.

We have a responsibility to our constituents who have given us the opportunity to represent them. That responsibility is to legislate in a thorough, fair, and constructive fashion. That is not the way the Kennedy-McCain bill has been handled thus far.

If we are to carry out the people’s business in the manner the Senate set forth—through the committee process—then we must utilize this process to produce legislation that will help improve the lives of every American.

After all, is that not what the people really want? A good law that is produced in the proper way.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Massachusetts.

MR. KENNEDY. Mr. President, I have been going through the text of this legislation, and I wish to focus on the provisions that would make employers immune from liability when they are responsible for making medical decisions that result in injury or death. If ever there was a duty that employers had to the people they employ, it’s the duty of employers to take care of their employees. Employers are complicit when they do not face serious financial consequences for their misconduct no matter how egregious.

The PRESIDING OFFICER. The Senator from Massachusetts controls 51 minutes on the motion and the amendment.

MR. KENNEDY. Mr. President, I yield myself 15 minutes.

Mr. President, the Senate recently completed major education reform after six weeks of debate focused on accountability. We agreed that in order to persuade schools to live up to high standards, serious consequences were needed for schools that failed to improve. Republicans in particular emphasized the need for tough financial sanctions.

The risk of losing funds, they argued, is an appropriate and necessary incentive to achieve high performance.

This emphasis on accountability is not new. It was also the hallmark of our efforts in America’s Job Center and the family leave program. It is an incentive for employers who retain responsibility for providing medical care.

The consequences can be extremely serious when an HMO or an insurer denies access to killer drugs or indefinitely delays access to essential medical treatment. It can literally be a matter of life and death.

Yet there is overwhelming evidence that access to care is being denied in many cases for financial, not medical, reasons.

And after five years of debating this issue, we’ve finally reached the point where very few Senators will come to the floor and openly claim that HMOs and health insurers should not be held accountable in court when they hurt people. These corporations desperately want to keep the immunity that they currently have, immunity that no other businesses enjoy.

We are working together on a bipartisan compromise that will shield employers from liability when they are not involved in making decisions about medical care. It is a bipartisan compromise that will also protect patients. I believe there is a middle ground. I will be working with my colleagues to find it.

I yield the floor.

The PRESIDING OFFICER (Mr. Cleland). The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts controls 51 minutes on the motion and the amendment.

MR. KENNEDY. Mr. President, I yield myself 15 minutes.

Mr. President, the Senate recently completed major education reform after six weeks of debate focused on accountability. We agreed that in order to persuade schools to live up to high standards, serious consequences were needed for schools that failed to improve. Republicans in particular emphasized the need for tough financial sanctions.

The risk of losing funds, they argued, is an appropriate and necessary incentive to achieve high performance.

This emphasis on accountability is not new. It was also the hallmark of our efforts in America’s Job Center and the family leave program. It is an incentive for employers who retain responsibility for providing medical care.

I yield the floor.
take advantage of Senator Gramm’s absolute immunity. Other employers would turn to self insurance as an obvious way to avoid accountability for the actions of their health plans.

Health insurance companies would rework their contracts to give employers the final say on benefit determinations in order to take advantage of this shield from accountability.

Today fewer than 5 percent of employers assume direct responsibility for medical decisions on behalf of their employees. But if the Gramm amendment became law, the share of employers taking on these decisions would grow enormously. By providing absolute immunity from accountability, the Gramm amendment creates a strong incentive for employers to intervene in medical decisions, despite the fact that employers are not qualified to do so.

Employers and HMOs are free to negotiate any relationship they want, and that relationship can be detailed in writing, or it can be detailed in informal “understandings” that workers never get to see. What the Gramm amendment does is leave families completely vulnerable to the most unscrupulous HMOs and employers.

For example, an employer could demand that an HMO call it for approval before allowing any treatment that would cost over a certain amount, compromising the patient’s privacy and enabling the employer to make medical decisions based on cost alone. The Gramm amendment would completely shield an employer who causes grave injury or death in this way, and the HMO might also escape liability because it could show that the employer alone made the final decision. Under the language, employers have no liability as long as they do not make decisions about whether a specific beneficiary receives necessary medical care. The only employers who can be brought into court are the very few who step into the shoes of the doctor or the health care provider and make final medical decisions.

Our bill does not authorize suit against an HMO or another plan sponsor unless “there was direct participation by the employer or other plan sponsor.” “Direct participation” is defined as the “actual making of such decision or the actual exercise of control” over the individual patient’s claim for necessary medical treatment. Our bill directly protects employers from liability by stating: “Participation . . . in the selection of the group health plan or health insurance coverage involved or the third party administration will not rise to liability; “Engagement . . . in any cost-benefit analyses undertaken in connection with the selection of, or continued maintenance of, the plan or coverage” will not give rise to liability.

Employers are very well protected by our legislation as it is written. We are pleased to consider other strategies for accomplishing President Bush’s principle on this issue, but the loophole that the Texas Senators propose fundamentally contradicts the President’s principle and ours.

Senator Snowe and others are working on language to codify that principle, and I am looking forward to seeing their ideas.

The Gramm amendment is exactly the wrong medicine for America. It deserves to be soundly defeated for the sake of a level playing field for all employers, and for the good health of employees and their families.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. Bunning. Mr. President, I will take the time Senator Gramm has and yield myself as much time as I may consume.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Bunning. Mr. President, I rise in strong support of the Gramm amendment and ask unanimous consent to be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Bunning. Today in the United States we do not mandate that any employer or business provide health insurance. We do not force them to buy it for themselves or their employees. We let the employer make this decision. And employers all across the United States do provide health care insurance that covers over 160 million people. These employers do not have to provide that health care. They do this voluntarily for a number of reasons. Some actually do it because they care about their employees, but most do it because it is good business—it helps attract employees to come to work for them. But regardless of why these employers offer health benefits, the important factor is that they do this voluntarily.

There is no employer mandate in America. We had that debate in 1994 during the argument about the Clinton health bill, and it was clear that everyone—the American people and American business—wanted to keep our voluntary system. But if the bill before us today becomes law, that could all change.

In spite of what the Senator from Massachusetts said, businesses—big and small—all over America would stop offering health insurance benefits to their employees. And the reason they would stop can be summed up in one word—lawsuits.

The simple fact is that the Kennedy-McCain bill would expose employers who provide health care insurance coverage to their employees to lawsuits. I have heard some supporters of the bill claim that employers are protected from lawsuits in this bill. We just heard the good Senator from Massachusetts say that. They say that this
bill protects our current system. They point out that on page 144 of the Kennedy-McCain bill that there is a provision in bold lettering that reads: “Exclusion of Employers and Other Plan Sponsors.” But what they don’t tell you is that on the very next page the bill reads, as clear as day: “A Cause of Action May Rise Against an Employer . . . .” After that there are four pages explaining when an employer can be sued.

That means that while this bill does exclude suits against doctors and hospitals and other providers, it does not exempt suits against employers who purchase health insurance. In fact, the bill exposes employers who provide health care insurance to both State and Federal lawsuits. It exposes them to unlimited economic damages, unlimited punitive damages in State court, and $5 million in damages in Federal court.

Ladies and gentlemen, that is an awful lot of lawsuits.

I believe that this exposure to liability in the Kennedy-McCain bill will scare employers away from providing health insurance. Instead of providing coverage, one of two things is going to happen if this bill becomes law. Employers are either going to drop their coverage altogether or they will give their employees cash or some sort of voucher and wish them well in searching for the best deal for themselves and their families they can find in health care. This would turn our entire health care system on its head and would lead to serious problems.

I don’t believe anybody in this Chamber really wants that. Instead, I urge support for the Gramm amendment. This amendment would apply language from the current Texas State law to specifically protect employers that provide health care insurance to employees from facing lawsuits for doing so. It is a clear solution, but it is very clear in its intent.

For years some of my colleagues have been eager to point out that Texas has a Patients’ Bill of Rights, and some of them even talk about this as a model for the Federal legislation. Now we have the opportunity to do just this and to be one of the very tough sticking points. Now we have a chance to fix it, to improve the bill, and to make it signable.

I want to vote for a Patients’ Bill of Rights, a bill of rights that is going to become law—but not today. Today the Gramm amendment is a critical step in that direction. A vote against the amendment means that we will probably just talk about these problems without doing anything to change them. I urge my colleagues to vote to protect employers and employees alike and to think that this is the reason they are opposing it; that it prevents liability, the basic fact is that they may want no health care benefit at all and then force the United States to have a single-payer plan at the end. We will do anything in our power to defeat that.

I urge a vote on the Gramm amendment and yield back my time.

The PRESIDING OFFICER. Who yields time?

Mr. THOMPSON. Mr. President, I would like to speak on the Gramm amendment. I see that neither Senators GRASSLEY nor GRASSLEY are present. I understand there is time remaining for Senators GRASSLEY and GRASSLEY to propose the appropriate thing to do would be to ask for 10 minutes of the time on the Gramm amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THOMPSON. Mr. President, we are proceeding to clear the air on this issue, and that is important. It is a very important issue. One of the things Senator GRASSLEY pointed out was that this did not go through the regular committee process. It is a very complicated bill, and we are just now seeing the complications of it; one of those being the extent to which employers are liable, employers can be sued.

Unfortunately, we didn’t have a chance to work all that out in committee. So now we are here in this Chamber arguing about the exposure of employers.

We are making progress because, when we first started this debate, the supporters of the McCain-Kennedy-Edward bill basically said: We were not attempting to go after employers. That is not what this is about. Then in the fine print, yes, well, under certain limited circumstances.

I think we know now that there is, indeed, extreme exposure as far as employers are concerned and that it constitutes a significant part of the effect of this bill. We are making progress.

Now we can talk about the extent to which employers should or should not have exposure and liability.

We have heard statements today that there are a lot of employers out there that will do the wrong thing; that even though they are not required to have health insurance for their employees, apparently there are employers out there that will set up health care plans and then do everything they can to disadvantage their own employees, and that that consideration is driving this provision of the bill. So we are, indeed, refining the issue; the lines are being drawn.

The response to the issue of suing employers has always been: Don’t worry about that. The main thing is we are going after the big bad HMOs. You don’t have to worry about anything else. When times get really tough, we bring out another picture of some poor individual who is used to demonstrate the evilness of managed care.

Our hearts go out to these people. These are people in need. But the average observer in America must be watching this and asking themselves: Why doesn’t the Government just require these people to be covered for anything the time in unlimited amounts? Why doesn’t the Federal Government just take care of the problem? Why are we going after the big bad HMOs if the Government doesn’t want to do it? Why don’t we make some insurance company pay somebody for any claim they make, if it is a real need, at any time for any amount? In fact, why didn’t we pass the Clinton health bill a few years ago? The average person must be asking: If that is the only issue, taking care of sick folks, then why don’t we nationalize this health care system of ours? That is the logical conclusion of all that we have been hearing.

The answer, of course, is that in public policy matters, there are tradeoffs to be considered. There is never just one side of the coin.

We know, for example, that we set up managed care in this country because health care prices were rising up to the point of almost 20 percent a year. We knew that couldn’t be sustained so we put in a managed care system. Some HMOs abused that and did some bad things. Thirty or forty some States passed laws addressing some of these problems. The State of Tennessee has broader coverage than the bill we are considering today. It is not as though the States have been standing still. They are covered. Health care costs are going back up.

So here we come and we are going to lay on another plan that, if passed in the current form, without question, will drive up health care costs again.

My heart goes out to these poor people who are being used in this debate to demonstrate the necessity for the passage of this legislation. But I want to refer to a group of individuals myself. In fact, I want to refer to 1.2 million individuals. I don’t have the space or the time or the resources to bring in pictures of the 1.2 million people who, the most conservative estimates say, will be thrown off of insurance altogether if this bill passes.

The Congressional Budget Office says that at a minimum—and there are other estimates, but that is the lowest one I have seen—1.2 million people will lose insurance altogether. Who is going
to bring their pictures in here to dem-
strate to the American people that they
and the disadvantaged by the bill we
might pass. The question is whether health care
costs up so great that these small em-
ployers that some would like to demon-
ize or large ones, for that matter, that
some would like to demonize don’t have
to provide health care at all?

What is going to keep them from just
saying, as has been pointed out this
morning, that the costs are too great,
the liability is too great? We want to
do the best we can. We are not perfect.
We might make mistakes. But instead of
setting up a system to rectify those
mistakes, we will be opened up to un-
limited lawsuits at any time, anywhere
in the country, in any amount. Why
should we have that aggravation? Why
not just give the employees X number of
dollars a month, and let them take it—
—and they may or may not take care of
it with that money—or if you are a
small employer, to drop insurance cov-
erage altogether. Who is going to speak
for that 1.2 million people who they say
will wind up without any insurance at
all?

There won’t be any arguments with
any HMOs because there won’t be any
insurance at all.

So the lines have been drawn in this
debate. We have people over here need-
ning help, needing assistance. We have
set up a review process to get inde-
pendent people to look to determine
whether or not these employers are
taking advantage of people. So far so
good.

Then the proponents of this bill want
to lay in a system of lawsuits on top of
that. We draw the line in there and say
that, yes, let’s have an administrative
process to see whether or not employ-
ers are taking advantage of folks. Let’s
have an independent doctor look at it.
After that, let’s not lay on unlimited
lawsuits against employers who do not
provide the health care and expose them
to liability, when we say that what we are going after is the big bad
HMOs. Why expose these people who
are providing health insurance? They
are not providing health care, so why
expose them to liability?

The question remains, Do we want to
see employers? Do we want to have the
right to sue employers or not? The pro-
ponents of this bill say yes, but only
with regard to when they directly par-
ticipate in decisionmaking. This gets
a little technical, but it is very impor-
tant. There is a certain resonance of
the proposition that if somebody does
something wrong, they ought to be
held accountable. I have tried a few
cases myself, and I believe in that prin-
ciple. I think that is right. But the
problem in the context of this health care
debate, which we nationalize to a
certain extent with ERISA for a por-
tion of the population, and now we are
going to nationalize the rest of it with
this bill, the problem is we are setting
it up so that, by definition, a large
group of employers are going to be con-
sidered to be directly participating be-
due to the fact that they have employees who are on the front
eend of these claims processes. They tell
me that these self-insured plans are some of the best plans that we have.
They don’t go out and hire an HMO.
They try to do it themselves, in-house,
with their own people, looking out for
their own employees, who they don’t
have to insure if they don’t want to,
but they do. I am told that they pro-
vide more benefits than the other plans. They are some of our better
plans. But by cutting out the middle-
man, so to speak, and doing it them-
selves, they are going to be subject to
liability under this bill.

The second point of exposure has to
do with many of the for-profits, who
have settlement value. What lawyer
worth his salt, if he is going to sue
anybody along the line here in this
process, would not include an employer
as a part of this lawsuit? An employer
has a chance of settling or not to
go to court and stand on principle
because he is not liable and spend sev-
eral thousand dollars defending himself
or settle up front and pay the other
side in order to get out of the lawsuit.
The other side says they don’t want
to sue employers unless they have con-
tr
d. I mentioned direct participation.
The other key words are “or control”—
to exercise control of the health care
plan. The only problem with that is
under ERISA law, by definition, em-
ployers are supposed to have control
over these plans. So if you just look at
the definitional sections of the applica-
able law, on day 1 you have a large num-er of employers that are subject to
this lawsuit. So let’s not kid ourselves
about that.

The first part of this debate was that
most employers are not covered. Most
employers are not covered. Now, we
know that is not true. The issue now is
whether or not they should be. You
say, well, why if they do something
wrong? That is a good point. Why
should they be any different? Why
should they have immunity? We could
ask the same thing about treating doc-
 tors and about treating hospitals and
about all sorts of other things in this
country, in America, including U.S. Senators. Why
do we have protection for anything we
say in this Chamber under the speech
and debate clause? Is it because we are
better than anybody else or because we
don’t ever go over the line and do
something wrong or maybe even out-
rageous? No. It is because of the trade-
offs of public policy because there are
other considerations, just as there are
other considerations when we wash out
and use our own instinctive urge to sue
an employer.

You are going to drive costs up; you
are going to drive people out of the sys-
tem; and you are going to cause more
uninsured. Besides, there is account-
ability. There is a sense of the Senate
pending today that talks about the im-
morality of the bill. We are going to see
that this bill creates. The employer
doesn’t get to make a decision to cut
somebody off under this bill, and that
is the end of it. It goes through an
independent evaluation process. It goes
through an independent evaluation process. Then, if it is a medical decision, it goes
to an independent medical reviewer.

This bill spends pages on pages in
setting up these individual entities,
protecting them, qualifying them, hav-
ing the Federal Government look over
their shoulders. They are the final
word. If the employer is wrong, they
are the final word, and they don’t have
anything to do with the employer.

There might be some hypothetical
where some employer might sneak through the cracks somewhere. All I am saying is it is our obligation
to consider both sides of this coin. If in
trying to do that, if in trying to reach
that hypothetical extreme case we
drive up health care costs and we drive
small employers out of the health care
business and we do wind up with over
a million more people uninsured, we are
making a bad bargain.

I yield the floor.

The PRESIDING OFFICER. The Sen-
ator controls 37½ minutes.

Mr. KENNEDY. I will yield myself 2
minutes. I want to remind my good
friend from Tennessee when he talks
about the issues of cost, that we have
heard this issue raised before by the
Chamber of Commerce regarding fam-
ily leave. They estimated that its cost
would be $27 billion a year. It has been a fraction of that. I
don’t hear Members wanting to repeal
it. We heard about the issue of cost
when we passed Kassebaum-Kennedy,
which permits insurance portability,
and is used particularly by the dis-
abled. We heard that Kassebaum-Ken-
ney was estimated to cost tens of bil-
lions of dollars. That cost has not de-
veloped. Nobody is trying to repeal it.

We heard about costs when we passed
an increase in the minimum wage. We
heard that it would lead to inflation
and lost wages. We have responded to
that. The cost issue has always been
brought up.

I will remind the Senator that we
have put in the RECORD the pay for Wil-
liam McGuire and United Health
Group, the largest HMO in the coun-
try. The total compensation is $54
million and $357 million in stock options for a
total compensation of $411 million per
year. That is $4.25 per premium holder.
The best estimate of ours is $1.19, and
you get the protections. We can go
down the list of the top HMOs they are
making well over $10 million a year

June 26, 2001

CONGRESSIONAL RECORD—SENATE

11823
and are averaging $64 million in stock options. We could encourage some of those who want to do something in terms of the cost to work on this issue, Mr. President.

In the 1970s, we welcomed, as the principal author of the HMO legislation, the opportunity to try to change the financial incentives for decapitation, to keep people healthy. There would be greater profits for HMOs. It is a good concept. To treat people and families holistically is a valid concept and works in the best HMOs.

What happened is that HMOs, and in many instances, employers, started to make decisions that failed to live up to the commitment they made to the patient when the patient signed on and started paying the premiums. That is what this is about. The patient signs on and has a hard time to have coverage if I am in a serious accident. Then we have the illustration of the person who broke their leg and the employer said: Absolutely not. We are cutting off all assistance. That person was left out in the cold. There is no reason to do that. The only people who have to fear these provisions are those employers that make adverse decisions with regard to an employee's health. It seems to me they should not be held free from accountability any more than anyone else should be.

How much time remains? I yield 12 minutes to the Senator from North Carolina and that will leave me how much?

The PRESIDING OFFICER. Twenty-two minutes.

Mr. KENNEDY. I yield the Senator from North Carolina 15 minutes.

The PRESIDING OFFICER. The Senator from North Carolina is recognized. Mr. President, I ask unanimous consent to speak after the Senator from North Carolina.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EDWARDS. Mr. President, I want to speak to some of the concerns and comments that have been made by my friend and colleague from Tennessee with whom I have been working over the course of the last few days on this issue. There are a couple of issues he raised that deserve a response.

First is the general notion that an appeals process, before going to court, is adequate in and of itself. There are two fundamental problems with that logic. Remember, the way the system works under both pieces of legislation is if an HMO denies care to a patient, they can go through an internal appeal. If that is unsuccessful, they can go to an external appeal. If that does not resolve the issue and they are hurt, they can then go to court.

There are two reasons the appeal by itself does not resolve the issue. An HMO says to a family: We are not going to allow your child to have this treatment. The child then suffers an injury as a result, and a week later, or however long it takes to complete the appeals process, the child, the decision is reversed by an appeals board.

An independent review board says: Wait a minute, HMO, you were wrong to start with. Unfortunately, the only thing that independent review board can do is give that child the test they should have had to start with, but the child has already suffered a serious permanent injury as a result. The treatment no longer helps.

The problem is if the HMO decides on the front end they are not going to pay for some care that should be paid for, and the child is hurt as a result, and then 1 week or 2 weeks later the appeals board reverses that decision and says, yes, they are going to order the treatment, and the child has nowhere to go and their family has nowhere to go.

That is the point at which—and I think the Senator and I may agree on this—we believe the HMO should be held accountable. The independent review board cannot fix the problem where the child has been injured for life. The HMO that made the decision, just as every entity in this country, should be held responsible and accountable for what they did. That is what we believe. We believe in personal responsibility.

The second reason the appeals process by itself does not solve the problem: If there is nothing beyond the appeal, it creates an incentive for the HMO, which is what I am talking about, to have a policy of when in doubt, deny the claim because the worst that is ever going to happen is they are going to finish this appeals process and some appeals board is going to order them to pay what they should have paid. If they take 1,000 patients for a particular kind of treatment and deny care to those 1,000 patients, the majority of them are never going to go through an appeal, so they save money. Then they go through the appeal and the worst that can ever happen to them is with 30 or 40 of them, an appeals board orders them to go back and pay what they should have paid.

The problem is fundamental. The appeal process alone does not create an incentive for the HMO to do the right thing.

On the other hand, if the HMO knows if they make an arbitrary wrongful decision and somebody is hurt as a result, injured as a result—if that child suffers a permanent injury as a result—they can be held responsible for that as everybody else who is held responsible, then it creates an enormous incentive for the HMO to do the right thing.

That is what this legislation is about. Senator MCCAIN, Senator KENNEDY, and I structured this legislation to avoid cases having to go to court, to create incentives for the HMO to do the right thing, something they are not doing in many cases around the country now. This problem is, without both the appeals and the possibility of being held responsible down the road, we do not create the incentive for the HMO to do the right thing. We know that today around the country many families are being denied care they ought to be provided by an HMO.

There are fundamental reasons the system is set up the way it is. It is all designed not to get people to court and not even to get people into an appeals process but to get the patient the correct care, to get them the care for which they have been paying premiums.

Mr. THOMPSON. Will the Senator yield for a question?

Mr. THOMPSON. I thank the Senator for addressing the issues I raised, and I ask this as a legitimate point of inquiry and not just a debating point.

Mr. President, it occurs to me with regard to the Senator's first point and that is coverage might be denied initially but later overruled, and in the interim—I think he used the example of a small child again—a child might be suffering damage, does not ERISA currently provide injunctive relief? It allows a person under those circumstances to go into Federal court for mandatory injunctive relief, and would that not address the concern the Senator has?

Mr. EDWARDS. I thank the Senator for his question. It is a perfectly fair question. The problem, of course, is that many times it could be a situation where it would take entirely too long to go to court and get injunctive relief. When there is a situation where they are suffering damage, does not ERISA currently provide injunctive relief? It allows a person under those circumstances to go into Federal court for mandatory injunctive relief, and would that not address the concern the Senator has?

Mr. THOMPSON. Excuse me. It is impossible during that period of time to get injunctive relief against an HMO, and I might add, the last thing in the world a family is thinking about when they have a member of their family who is in trouble and needs health care is going to court to get an injunction.

Now I yield.

Mr. THOMPSON. I thank the Senator. I could not agree more with that.
last point. However, my experience has been that injunctive relief is designed by nature for very rapid consideration. You could do that in every case, but you do have to go to court to get it.

My question is, If we are not going to avail ourselves or require claimants to avail themselves of the processes if they believe they have been wronged, does that not necessarily lead to the conclusion that we must grant all claims?

How does a person considering a claim know which one—let’s assume they are dealing in good faith. In every case where there is an injury or potential injury going to occur, is the logical conclusion that we should see to it that all claims are granted regardless of whether or not the person considering the claim is conscious, if we say we do not have time for that, then doesn’t that mean we have to grant all of them?

Mr. EDWARDS. Reclaiming my time, my response to the Senator’s question is simple and common sense. For a family in a bad situation needing medical care immediately, the last thing in the world they are thinking of is hiring a lawyer, going to court and trying to get an injunction. The Senator well knows that process by itself can take enough time for something serious to happen in the interim.

As to the second issue the Senator raises, all we are saying in our legislation, in the structure of our system—internal appeals—are obviously not covered under the agreement?

If we do not go through the processes that are in law for people to avail themselves and to show to an independent arbiter or judge that their claim has merit, if we say we do not have time for that, then doesn’t that mean we have to grant all of them?

Mr. KENNEDY. At the present time, a small number of employers are interfering with medical decisions. If the President’s amendment is enacted, this will put the good employers at a serious disadvantage in competition with others, does he not agree? Would not the others be able to formulate a structure so they could effectively cut back on excessive costs for the health care system for their employees, while the good ones who are playing by the rules would be put at a rather important competitive disadvantage? Does the Senator not agree that for the employers working within the system and playing by the rules this is an invitation to change their whole structure and to be tempted to shortchange the coverage and protection for their employees?

Mr. EDWARDS. In response to the question, the answer is, of course we believe employers, the vast majority of employers, care about their employees and want to do the right thing. Our legislation is specifically designed to protect those employers, just as the President of the United States has suggested needs to be done.

What we have done in this legislation, what the President has suggested, and in the work that continues as we speak on additional compromise language, all is aimed at the same principle, and that is getting a compromise.

This amendment is outside that mainstream—different from our legislation, different from the principle established by the President of the United States, and different from the compromise that is being worked on at this moment. I remain optimistic we will be able to reach a compromise that provides real and meaningful protection to the employers of this country we want to protect. We have said that review process. We stand by it. We want to protect them.

If I may say a couple of things about the issue of costs which was raised a few moments ago, the CBO has not said anybody will become uninsured as a result of this legislation. What the CBO has said is there will be a 4.2-percent increase in premiums over 5 years because of our legislation and a 2.9-percent decrease if the legislation passes, roughly 4 percent versus roughly 3 percent. The difference between these two pieces of legislation on cost is a very minuscule part related to litigation. I think the difference is less than half of 1 percent related to litigation. Rather, the differences are related to quality of care. If people get better access to clinical trials, better access to specialists, better emergency room care, a more enforceable and meaningful independent process, if those things occur, there is a marginal cost associated with it.

We have real models. We don’t have to guess about what will happen. Those models are Texas, California, and Georgia. In those States, the number of uninsured, while the patient protection laws have been in place, has gone down, not up. We have some real, although short term, empirical evidence about what happens when this patient protection enacted.

We have to be careful. A lot of arguments being made are the same arguments that have been made by HMOs for years to avoid any kind of reform, to avoid any kind of patient protection. We are working in this legislation to give real protection to somewhere between 170 and 180 million Americans who are having problems with their HMO. We want to put the law on the ground for the first time in a bad situation needing medical care immediately, the last thing in the world they are thinking of is hiring a lawyer, going to court and trying to get an injunction. The Senator well knows that process by itself can take enough time for something serious to happen in the interim.

The truth is, the Gramm amendment is way outside the mainstream. All the people on the other side of the road are individuals who are doing a good job and are not interfering with medical decisions. If we do not do through the processes that are in law for people to avail themselves and to show to an independent arbiter or judge that their claim has merit, if we say we do not have time for that, then doesn’t that mean we have to grant all of them?

Mr. EDWARDS. Absolutely.

Mr. KENNEDY. At the present time, a small number of employers are interfering with medical decisions. If the President’s amendment is enacted, this will put the good employers at a serious disadvantage in competition with others, does he not agree? Would not the others be able to formulate a structure so they could effectively cut back on excessive costs for the health care system for their employees, while the good ones who are playing by the rules would be put at a rather important competitive disadvantage? Does the Senator not agree that for the employers working within the system and playing by the rules this is an invitation to change their whole structure and to be tempted to shortchange the coverage and protection for their employees?

Mr. EDWARDS. In response to the question, the answer is, of course we believe employers, the vast majority of employers, care about their employees and want to do the right thing. Our legislation is specifically designed to protect those employers, just as the President of the United States has suggested needs to be done.

What we have done in this legislation, what the President has suggested, and in the work that continues as we speak on additional compromise language, all is aimed at the same principle, and that is getting a compromise.
The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. NICKLES. Madam President, I thank my friend and colleague from Texas, Senator HUTCHISON, for her comments. I also wish to thank the Senator from Texas, Mr. GRAMM, for his leadership on the amendment, as well as Senator THOMPSON.

Mr. NICKLES. Madam President, I thank you. The Breaux-Frist plan would definitely address her concerns because it would give her the care she needs rather than going directly for a lawsuit and possibly delaying the health care she needs—and for other patients.

Madam President, I ask my colleagues to support the Gramm-Hutchison amendment and support the Grassley motion. Let’s get a good bill that will have the effect of increasing coverage in our country and not decreasing it.

Thank you, Madam President. I yield 4 minutes to Senator NICKLES.

The PRESIDING OFFICER (Mrs. CARNAHAN). Under the previous order, the Senator from Texas is recognized.

The Senator from Texas, Senator HUTCHISON, for her comments.

The PRESIDING OFFICER. The Senator from Texas has 9 minutes. Senator GRAMM has 7½.

Mrs. HUTCHISON. Thank you, Madam President.

I ask unanimous consent that I have 6 minutes allocated—4 minutes from Senator GRASSLEY’s time and 2 minutes from Senator GRAMM’s time. It is my intention to yield 4 minutes to Senator NICKLES on behalf of the Grassley motion.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HUTCHISON. Will the Chair notify me at the end of 2 minutes?

Madam President, I want to speak on behalf of the Grassley motion which would send this bill to committee so that it could be marked up and fully debated because while we have had great debate, bypassing the committee process I think has caused us to have to rewrite the bill in this Chamber. I don’t think that is a good way to pass legislation.

I think we all want to have a Patients’ Bill of Rights that is well ventilated and well debated and that we know will have the intended consequences because the last thing we want to do is have unintended consequences when we are talking about the health care of most Americans.

I hope we can commit the bill to bring it back in a better form. Second, I hope people will support the Gramm-Hutchison amendment because this is the Texas law. Senator HARKIN, on a news program this weekend, said: I would love to have just the Texas law for the entire Nation. The Gramm-Hutchison amendment is the Texas law verbatim when it applies to a person’s employer because what we don’t want to do is put the employer in the position of standing for the insurance company. The employer wants to be able to offer insurance coverage to their employees. But if they are going to be liable for a decision made by the insurance company and the doctors, then they are put in a position that is untenable. What we want is health care coverage where the decisions are made by the doctors and the patients.

The Senator from North Carolina had a picture of a lovely young woman. He said: This is what the debate is about. It is what the debate is about.

The Senator from North Carolina had a picture of a lovely young woman. He said: This is what the debate is about. It is what the debate is about.

The Senator from North Carolina had a picture of a lovely young woman. He said: This is what the debate is about. It is what the debate is about.

The Senator from North Carolina had a picture of a lovely young woman. He said: This is what the debate is about. It is what the debate is about.
My colleagues, this is not the way to appropriate committees of jurisdiction. Moreover, the liability provisions have been principally involved in drafting these liability provisions and they have done so with their own interest in mind. And believe me, as a former medical malpractice attorney, I know what their tricks are, and I know what they are trying to do. This provisions are simply not in the best interest of the American people.

Accordingly, I urge my colleagues to support his motion to commit. It is incumbent upon us to do this right and to do this in the best interest of patients, not trial attorneys. I am confident that with a little extra time, we can make these provisions legally sound. We have spent far too many years on this issue not to do it right. We have a real opportunity to pass meaningful patients' rights legislation. Let us not squander this opportunity by acting expeditiously without the benefit of more careful and thoughtful review.

The PRESIDING OFFICER. Who yields time?

The Senator from Texas.

Mr. GRAMM. Madam President, could you tell me how much time the two sides have?

The PRESIDING OFFICER. You have 4 minutes and a half. The Senator from Massachusetts has almost 12 minutes.

Mr. GRAMM. Madam President, I would like my amendment to close out the debate.

Does Senator GRASSLEY have time?

The PRESIDING OFFICER. He has 5 minutes. You have 9 minutes. The Senator from Massachusetts has 12 minutes.

Mr. GRAMM. Let me just allow the majority to go ahead.

Mr. MCCAIN. I say to the Senator from Texas, I think it is perfectly reasonable for you to have the last 5 minutes.

I ask the President of the Senate that one of us be recognized so that the Senator from Texas has the final 5 minutes.

The Senator from Arizona wants—

Mr. GRASSLEY. Two minutes.

I want to emphasize that these are all critical important, legal issues that must be considered carefully. The regular process of the Senate should not be circumvented for the political expediencies of my friends on the other side. Why rush this important bill through the Senate? According to the Congressional Budget Office, this legislation will cause premiums to increase by at least 4.2 percent. As a result, it is estimated that 1.3 million Americans will lose their health insurance because health premiums will become too expensive. Even worse, employers benefit altogether for fear of more expanded liability exposure under so-called bipartisan Democrat proposal.

Shouldn't we hear from experts and other legal scholars in an open forum before passing such a monumental bill that impacts so many Americans? It is very apparent to everyone in this Chamber that the trial lawyers have been primarily involved in drafting these liability provisions and they have done so with their own interest in mind. And believe me, as a former medical malpractice attorney, I know what
fewer questions asked. I think when people see a product from the Senate, they want to make sure that product is done right.

So I offer to my colleagues the motion and hope that they will vote yes on the motion to commit the legislation to the respective committees—Health, Education, Labor; Judiciary; and Finance—for the fair consideration of this legislation and a final, good product that we know serves the best interests of the people, which obviously is to make sure that everybody is protected with a Patients’ Bill of Rights.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

The Senator from Arizona is now recognized.

Mr. MCCAIN. Mr. President, I think it is important, because of the issue of what is happening or not happening in the State of Texas and Texas State law, that I take a few minutes to quote from a letter I just received from the President of the Texas Medical Association who was a key player in the formulation of the language and the legislation that passed the State of Texas in 1997.

I would like to quote from the letter that Mr. Hancher sent me:

I have been watching the debate over the Patients’ Bill of Rights and can understand the confusion over many of the issues. We, in Texas, debated managed care reforms for over two years culminating in the passage of a package of managed care reforms in Texas in 1997. Because Texas’ laws have become the basis for evaluating certain aspects of proposed federal reforms, I hope I can help to clarify some areas for you. As Texas Medical Association worked closely with the sponsors of these reforms, including the managed care accountability bill, I would like to offer our experiences on this issue....

I will focus on the three areas of primary disagreement—employer immunity, medical necessity and administrative procedures. These decisions were long, sometimes contentious, and ultimately successful. With over 1300 independent reviewers, 52% overturned the plans’ decision and only 17 lawsuits—

I want to emphasize: Only 17 lawsuits.

I am proud of how our laws are working for the people of Texas employed in managed care plans. On behalf of my colleagues and our patients, I ask that you not take any action that would undermine what we have done in our state.

It is signed: Tom Hancher, MD, President of the Texas Medical Association.

I urge all of my colleagues to read this letter from Dr. Hancher. I think it lays out the issues surrounding this particular amendment and remaining areas of discussion that I believe are very important. We need to better clarify, give employers a kind of separate section of our law.

The debate in Texas over patient protections was long, sometimes contentious, and ultimately successful. With over 1300 independent reviewers, 52% overturned the plans’ decision and only 17 lawsuits—

But we cannot, in the interest of greater clarity, give employers a kind of plan.

Mr. President, I cannot support the pending amendment because I believe that employers should be held accountable for medical decisions they have made if those decisions resulted in a patient’s injury or death.

I do not believe employers should be held liable for the decisions made by insurers or doctors. Nor do I believe this legislation would subject employees throughout the country to a tidal wave of litigation as our opponents claim.

But if an employer acts like an insurance company and retains direct responsibility for making medical decisions about their employee’s health care then they should be held accountable if their decisions harm or even kill someone.

If an employer is not making medical decisions, and very few employers do, then they will not be held liable under our legislation.

Let me repeat—employers will not be held liable or exposed to lawsuits if they do not retain responsibility for directly participating in medical decisions.

I keep hearing from opponents of our bipartisan bill that our language is vague and would subject employers to frequent litigation in state and Federal court. I don’t believe this is true.

Our legislation specifically states that direct participation is defined as “the actual making of [the] decision or the actual exercise of control in making [the] decision or in the [wrongful] conduct.” This language clearly exempts businesses from liability for every type of action except specific actions that are the direct cause of harm to a patient.

The sponsors of this legislation are willing, however, we indeed we would welcome an amendment that helps further clarify the employer exemptions provided for in the bill. I know that Senators SOWEDE, DEWINE and others are working on such an amendment.

The debate in Texas over patient protections was long, sometimes contentious, and ultimately successful. With over 1300 independent reviewers, 52% overturned the plans’ decision and only 17 lawsuits—

I want to emphasize: Only 17 lawsuits.

I am proud of how our laws are working for the people of Texas employed in managed care plans. On behalf of my colleagues and our patients, I ask that you not take any action that would undermine what we have done in our state.

Best wishes in your deliberations.

It is signed: Tom Hancher, MD, President of the Texas Medical Association.

I urge all of my colleagues to read this letter from Dr. Hancher. I think it lays out the issues surrounding this particular amendment and remaining areas of discussion that I believe are very important. We need to better clarify, give employers a kind of separate section of our law.

The debate in Texas over patient protections was long, sometimes contentious, and ultimately successful. With over 1300 independent reviewers, 52% overturned the plans’ decision and only 17 lawsuits—

But we cannot, in the interest of greater clarity, give employers a kind of plan.
of blanket immunity when they assume the role of insurers and doctors by making life and death decisions for their patients. This is what the pending amendment would do.

Let’s just step back for a moment and reflect on how the employer based health care system is structured and works. An employer contracts with an insurer to provide health care coverage for their employees. The insurer is then responsible for making the medical decisions that go with managing health insurance. That is how the system typically works and how employers want it to work.

Most businesses simply do not make medical decisions. Hank who runs a local plumbing company does not tell the HMO his company has contracted with, “We have clogged drains and need Joe Smith, Josh2 et al. and we can’t afford for him to be laid up waiting for surgery.” And Hank would not be held liable under our bill because he is not practicing medicine—he is repairing plumbing.

Now admit there are a small group, of mostly very large companies that have chosen to provide insurance to their employees themselves. In these small number of cases, employers have made the decision to sell plumbing and act as an insurer that makes medical decisions.

And if the decisions they make harms or kills someone then why should they have a blanket exemption from liability as this pending amendment would provide them, a blanket exemption that we do not provide doctors or nurses or hospitals?

Mr. President, I yield the floor.

The PRESIDING OFFICER. The PRESIDING OFFICER. Senator McCaIN and Senator Kennedy have 3½ minutes.

Mr. KENNEDY. Mr. President, let me yield myself the time. As I understand, the Senator from Texas is going to close.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, this legislation is very simple. The point of the overall Patients’ Bill of Rights is to permit doctors to make the final, ultimate decision on what is in the best interest of the patient. Doctors, nurses, trained health care professionals should be making that judgment. However, we find that the HMOs are overriding them.

Now we have put this into the legislation. If it is demonstrated with internal and external appeals that a HMO has overridden the doctors, they are going to have a responsibility towards the patient. They are going to have to give that person, who might have been irreparably hurt, or the patient’s family. If the doctor has been overridden, there must be an opportunity to have some satisfaction.

What the Gramm amendment says is, if that same judgment is made by the employers, they are somehow going to be free and clear. He can distort, misrepresent and misstate what is in this legislation, but we know what is in the legislation. They hold the employer that is in the place of the HMO accountable. If the employer is making a medical decision that may harm an individual or patient, or may cause that patient’s life or serious illness, they should bear responsibility.

Under the Gramm amendment, they can be free and clear of any kind of responsibility no matter how badly hurt that patient is.

That is absolutely wrong. I can see the case where the HMO is sued. The HMO says: Don’t speak to me; it was the employer that did it. And then the employer says: Look, the Gramm amendment was passed. We are not responsible at all. This amendment is another poison pill. It is a way to basically undermine the whole purpose of the legislation.

Doctors and nurses should be making medical decisions and not the HMO bean counters who are looking out for the profits of the HMO. Employers should not be making these medical decisions either. They may say, every time my employee has some medical procedure that is over $50,000, call me, HMO. I don’t want to pay more than $50,000. Then the HMO calls them up and the employer says, no way, don’t give that kind of medical treatment to my employee. The HMO listens to the employer, the patient does not get that treatment, and dies. Under the Gramm amendment, there will be no accountability.

I hope his amendment is defeated.

The PRESIDING OFFICER. The PRESIDING OFFICER. Senator CARNANAH. Under the previous order, the Senator from Iowa has 2 minutes followed by the Senator from Texas.

Mr. Gramm. Mr. President, from Iowa has spoken. I assume if we add up the time, I have 7 minutes. I would like to take it.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRAMM. Madam President, nothing in this amendment has anything to do with HMOs. Nothing in the amendment that I have offered would in any way exempt any HMO from any liability. Both Senator Kennedy and Senator McCain talked about HMO liability. Senator McCain talked about HMOs standing in the shoes of doctors.

This amendment I have offered is not about HMOs.

Senator Kennedy talks about HMOs escaping liability by blaming it on the employer. Nothing in the amendment I have offered in any way would allow that to happen.

The amendment I have offered has to do with employers. Why is this an issue because, in America, employers are not required to provide health insurance. Employers, large and small, all over America provide health insurance because they care about their employees and because they want to attract and hold good employees. But every employer in America has the right under Federal law to drop their health insurance.

I am concerned, and many are concerned, that employers would be forced to drop their health insurance given the liability provisions in the bill. I have here a number of letters from business organizations endorsing my amendment. I send to the desk and ask unanimous consent that these letters be printed in the RECORD: an NFIB letter designating this a small business vote; a letter from Advancing Business Technology representing the AEA; the National Association of Manufacturers; the National Council of Chain Restaurants; the National Restaurant Association; and the National Association of Wholesalers and Distributors, all letters endorsing the Gramm amendment; and finally, a wonderful letter from the Printing Industry of America talking about the dilemma they would face if this amendment did not pass.

Then, being no objection, the letters were ordered to be printed in the RECORD, as follows:

Hon. Phil Gramm, U.S. Senate, Russell Senate Office Building, Washington, DC.

Dear Senator Gramm: Thank you for offering an amendment to the HMOs Employers should not be making these medical decisions either. They may say, every time my employee has some medical procedure that is over $50,000, call me, HMO. I don’t want to pay more than $50,000. Then the HMO calls them up and the employer says, no way, don’t give that kind of medical treatment to my employee. The HMO listens to the employer, the patient does not get that treatment, and dies. Under the Gramm amendment, there will be no accountability.

I hope his amendment is defeated.

Mr. President, from Iowa has spoken. I assume if we add up the time, I have 7 minutes. I would like to take it.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRAMM. Madam President, nothing in this amendment has anything to do with HMOs. Nothing in the amendment that I have offered would in any way exempt any HMO from any liability. Both Senator Kennedy and Senator McCain talked about HMO liability. Senator McCain talked about HMOs standing in the shoes of doctors.

This amendment I have offered is not about HMOs.

Senator Kennedy talks about HMOs escaping liability by blaming it on the employer. Nothing in the amendment I have offered in any way would allow that to happen.

The amendment I have offered has to do with employers. Why is this an issue because, in America, employers are not required to provide health insurance. Employers, large and small, all over America provide health insurance because they care about their employees and because they want to attract and hold good employees. But every employer in America has the right under Federal law to drop their health insurance.

I am concerned, and many are concerned, that employers would be forced to drop their health insurance given the liability provisions in the bill. Then, being no objection, the letters were ordered to be printed in the RECORD, as follows:

their employees and their employees’ families.

There are other serious weaknesses in the McCain-Kennedy bill with which NAW members are concerned; however, adoption of your amendment will at least mitigate one of the worst excesses in that unnecessary McCain-Kennedy bill. Therefore, NAW is pleased to support your amendment, and we thank you for your leadership.

Sincerely,

DIRK VAN DONGEN
President
JAMES A. ANDERSON, Jr.
Vice President-Government Relations.

NATIONAL RESTAURANT ASSOCIATION.
Hon. PHIL GRAMM,
U.S. Senate, Washington, DC.

DEAR SENATOR GRAMM: As debate continues on S. 1052, the McCain-Kennedy-Edward patients’ rights bill, the National Restaurant Association sincerely appreciates your support of the Senate. The Senate amendment that employers will not be subject to liability for voluntarily providing health benefits to their employees. A vote in support of the Gramm-Hutchison Amendment will be considered a key vote by the National Restaurant Association.

The majority of America’s 844,000 restaurants are small businesses with average unit sales of $580,000. Rather than risk frivolous lawsuits and unlimited damages authorized under S. 1052, many businesses will be forced to stop offering health benefits to their employees. Even without the effect of litigation risk economists predict at least 4–6 million Americans could lose their employer-sponsored health coverage as a result of the increased costs of S. 1052. We urge you to avert this harmful situation.

By taking language from the Texas patients’ rights bill, your amendment will clearly define that employers would not be subject to liability. This amendment is critical given that S. 1052 currently exposes employers and plans to liability for direct and indirect liability costs for adverse benefit determinations. Whether or not employers actively intervene into a given benefit determination, they are charged with responsibility for all aspects of plan administration under ERISA’s fiduciary responsibility standard (including benefit determinations). Thus, an employer can either actively or passively meet the McCain-Kennedy bill’s standard of “direct participation” (the act of denying benefits or the actual exercise of authority over the act).

The Gramm-Hutchison Amendment is the Texas Health Care Liability Act’s unambiguous exemption of employers as adapted to ERISA. We believe the majority of senators will agree on the need to protect employers from health care liability.

The National Association of Manufacturers will continue to oppose the underlying McCain-Kennedy bill as adding too much additional cost to the existing double-digit (33 percent on average) health-care inflation. The rising cost of health-care coverage, together with the high cost of energy, is exerting a significant drag on the economy. The Senate, however, should be heard on the specific question of health-care liability for employers.

Again, we urgently ask your support for the Gramm-Hutchison Amendment (Senate Amendment #100) which will be considered for designation as a key manufacturing vote in the NAM Voting Record for the 107th Congress.

Sincerely,

MICHAEL ELLIAS BAROODY
Executive Vice President.

NATIONAL RETAIL FEDERATION.
To the Members of the U.S. Senate:

Tomorrow morning, you will have the opportunity to vote on a critically important amendment offered by Senator Gramm to the Kennedy-McCain “Patient Protection Act of 2001” that will exempt employers from new lawsuits under the legislation. On behalf of the National Retail Federation (NRF), I strongly urge you to support this amendment. The vote on the Gramm amendment will be a key vote for NRF’s ability to address their disputes through an independent appeals process, allowing broad new causes of action in state and federal court for virtually uncapped damages would have dire consequences on the employer-based health care system. The costs of open-ended liability on health plans will ultimately be borne by employers and employees alike.

As background, the National Retail Federation (NRF) is the world’s largest retail trade association with membership that comprises all retail formats and channels of distribution including department, discount, catalog, Internet and independent stores. NRF members represent an industry that encompasses more than 1.4 million U.S. retail establishments serving less than one in 5 American workers—and registered 2000 sales of $3.1 trillion.

NRF’s international members operate stores in more than 50 nations. In its role as the retail industry’s umbrella group, NRF also represents 34 national and state associations in the U.S. as well as 30 international associations representing retailers and franchisees in more than 100 countries.

Again, we urge you to support the Gramm amendment, and to support future efforts to remedy the onerous liability provisions in S. 1052.

Sincerely,

Michael Elias Baroody
Executive Vice President.

NATIONAL COUNCIL OF CHAIN RESTAURANTS OF THE NATIONAL RETAIL FEDERATION.
Hon. PHIL GRAMM,
U.S. Senate, Russell Senate Office building, Washington, DC.

DEAR SENATOR GRAMM: On behalf of the National Council of Chain Restaurants, I am writing to thank you for introducing your amendment to protect employers from liability lawsuits authorized by the Kennedy-McCain “Patients’ Bill of Rights” currently being debated by the Senate.

The National Council of Chain Restaurants ("NCCR") is a national trade association representing forty of the nation’s largest multi-unit, multi-state chain restaurant companies. These forty companies own and operate in excess of 50,000 restaurant facilities. Additionally, through franchise and licensing agreements, another 70,000 facilities are operated under their trademarks. In the aggregate, NCCR’s member companies and their franchises employ in excess of 2.8 million individuals. Although most of the nation’s chain restaurant companies offer health care benefits to their employees, these employers have become increasingly concerned with the skyrocketing costs of providing such coverage. In fact, many employers are already being forced to reevaluate whether they can continue to afford the proper health care insurance to their employees. The Kennedy-McCain bill’s imposition of liability on
health plans will exacerbate this problem even further by exposing employers to a number of new liability situations. As costs are driven ever upward, many employers will be forced out of the market, pushing even more working families into the ranks of the uninsured.

The Kennedy-McCain bill threatens to undermine the nation’s employer-sponsored health care system and to remove the only vehicle employers have to assure that their employees in the aggregate are not worse off as a result of passage of S. 1052. Your amendment to the Kennedy-McCain bill is the only way to prevent the nation’s employers from being forced to drop health insurance coverage for their employees. In addition to the immediate costs resulting from health plan liability under the Kennedy-McCain bill, many employers will have no choice but to drop such important employee benefits.

The Kennedy-McCain bill threatens to undermine the nation’s employer-sponsored health care system when companies are likely to be concerned that the ability to make decisions is the other side—turning the next employee. In other words, we could be sued for failing to make a decision. Our organization cannot expose the assets of the organization to that liability potential.

Our very small employee contribution. Employees share of the benefits will go up. The $50 per month family coverage will likely be increased to $200 per month. Co-pays and deductibles will also rise. Some coverage may have to be dropped altogether.

We have discussed this issue and other related matters related to this legislation with you. We are not alone in the impact this bill would have on our employees. I am aware that we have many self-insured, jointly trusteed union plans in our industry that have many members are concerned that the liability issues are the other side—turning the next employee. In other words, we could be sued for failing to make a decision. Our organization cannot expose the assets of the organization to that liability potential.

In other words, we could be sued for failing to make a decision. Our organization cannot expose the assets of the organization to that liability potential.

We are the ultimate decision maker in our company and the benefits are a very important part of this bill. We have never made a negative decision. We have made several very positive decisions to help employees in very difficult situations.

That has been pointed to over and over again to say that employers cannot be sued. The problem is that on line 15, the bill goes on and says:

CIRCUMSTANCES IN WHICH AN EMPLOYER WILL NOT BE SUED.

Then the bill goes on for 7 1⁄2 pages of ifs, ands, and buts about when employers can be sued. They can be sued if they have “a connection with;” they can be sued if they “exercise control,” which is very interesting because under ERISA, which is the Federal statute that governs employee benefits provided by the employer, every employer is deemed to exercise control over every employee benefit.

The bottom line is, despite all the arguments to the contrary, in the bill before us, employers can be sued.

The Texas Legislature faced exactly the same dilemma, and they concluded that they wanted an absolute carve-out of employers. Why? Not that they believed employers were perfect; not that they believed every employer was responsible, but because they couldn’t figure out a way to get at potential employer misbehavior without creating massive loopholes which would produce a situation where employers, large and small, could be dragged into a courtroom and sued because they cared enough about their employees to help them buy health insurance.

The Texas Legislature decided you ought not be able to sue an employer.

Senator MCCAIN read a letter from the Texas Medical Association president, but he did not read the one paragraph in the letter that I was going to read. It is a very important paragraph. Let me explain why. Opponents of this amendment say: You ought to be able to sue employers if employers are making medical decisions. The point is, this bill—and the Texas law and every Patients’ Bill of Rights proposal made by Democrats and Republicans—has an external appeal process that a panel of physicians and specialists, totally independent of the health care plan and totally independent of the employer, that will exercise the final decisionmaking authority.

How would an employer call up this professional panel, independent of the health insurance company or the HMO, and in any way intervene? They couldn’t.

The line from the letter from the Texas Medical Association addresses exactly this point. It points out that the State couldn’t reach into ERISA. But another reason that it wasn’t necessary or advisable to try to sue employers was, from the letter:

[Additional information regarding utilization review]

And this is the review process—agents were making the decisions regarding appropriate medical treatment for employees of these self-funded plans. We contended that these state-licensed utilization review agents would be subject to the managed care accountability statute.

Which is the Texas law.

The same would be true under this bill. Under this bill, no employer can make a final decision. The final decision is made by this independent medical review.

So what is this all about? It all boils down to the following facts: If we leave this provision in the bill, which says employers can be sued and has 7 1⁄2 pages of ifs, ands, and buts about suing them, and then interestingly enough says you can’t sue doctors, you can’t sue hospitals, but you can sue employers in its conclusion, then what is going to happen is all over America businesses are going to call in their employees.

The example I used yesterday, and I will close with it today—is I am out of time?

The PRESIDING OFFICER. The Senator’s time has expired.

Mr. GRAMM. Let me wrap up by saying, all over America, small businesses are going to call in their employees and say: I want to provide these benefits, but I cannot put my business at risk, which my father, my mother, my family have invested their hearts and souls in; therefore, I am going to have to cancel your health insurance.

I urge my colleagues to vote for this amendment.

I yield the floor.

Mr. KENNEDY. Madam President, I am prepared to yield back the minute on the Grassley motion. As I understand it, Senator GRASSLEY is going to yield back his time.

I ask for the yeas and nays on both the Grassley motion and the Gramm amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The senior assistant bill clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 39, nays 61, as follows:

[Rollecall Vote No. 196 Leg.]

YEAS—39

NAYS—61

The motion was rejected.

Mr. KENNEDY. I move to reconsider the vote.

Mr. GREGG. I move to lay that motion on the table.

The motion was agreed to.

AMENDMENT NO. 810

The PRESIDING OFFICER. Under the previous order, there will now be 6 minutes for closing debate, divided in the usual form, prior to a vote on or in relation to the Gramm amendment No. 810.

Who yields time?

Mr. KENNEDY. I understand there are 3 minutes to a side.

The PRESIDING OFFICER. The Senator is correct.

Mr. KENNEDY. I yield myself a minute and a half and a minute and a half to the Senator from North Carolina.

Madam President, we have just finished the education legislation. In this legislation, we held students accountable, school districts accountable, teachers accountable, and children accountable. Now we are trying to hold the HMOs accountable if they override doctors, nurses and trained professionals regarding the care for injuries of individuals. That is the objective of this legislation.

However, if employers interfere with medical judgments, they ought to be held accountable as well. The Gramm amendment says: No way; even if an employer makes a judgment and decision that seriously harms or injures the patient, there is no way that employer could be held accountable.

We may not have the language right, but at least we are consistent with what the President of the United States has said. We may have differences with the President of the United States and we do on some provisions. However, the Gramm amendment is an extreme amendment that fails to protect the patients in this country and fails to provide that needed protection.

Mr. GRAMM. Madam President, I make a point of order that the Senate is not in order. Senator EDWARDS deserves to be heard.

The PRESIDING OFFICER. The Senate will be in order.
The Senator from North Carolina is recognized.

Mr. EDWARDS. Madam President, this is an issue on which we have consensus. The President of the United States said, "Only employers who retain responsibility for and make vital medical decisions should be subject to suit."

Our bill provides exactly as the President describes. As Senator KENNEDY has indicated, we have consensus not only with the President of the United States but in this body and in the House of Representatives based on the Norwood-Dingell bill which was voted on before. This is an issue about which there is consensus.

We are continuing to work. Senator SNOWE and others are leading that effort. We are working across party lines to get stronger physicians that are settlement language so that employers know that they are protected without completely leaving out the rights of the patients.

I urge my colleagues to vote against the Gramm amendment, which is outside the mainstream, outside our bill, outside our position, outside Norwood-Dingell, and outside what the President of the United States has said.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Madam President, throughout this debate, those who are in favor of this bill have said our bill is just like the Texas bill. Look at Texas. No employers have been sued, and there have been a minimum number of lawsuits. Yet when you look at this bill, it says employers can't be sued. Then it says they can be sued. And it has 7 1/2 pages of ifs, ands, and buts.

Are employers connected with the decision? Do they exercise control? ERISA says that in any employee benefit the employer is deemed to exercise control, which would mean that every employer in America is covered. The Texas legislature did not assume that every employer was perfect. They were worried about unintended consequences.

They also concluded that no employer can be the final decisionmaker because this bill, as in our bill, has an external review process that is run by independent physicians that are selected independently of the plan. They make the final decision, not an employer.

The Texas legislature decided what we should decide here; that is, if you get into ifs, ands, and buts, what is going to happen all over America is businesses are going to drop their insurance.

If we should pass the bill without this amendment in it, it is easy to envision that we could have a small business where the business owner calls in his employees and says, Look, we worked hard to provide good health benefits, but my father and my mother worked to build their business. I have worked. My wife has worked. We have invested our whole future in this business, and I do not continue to provide benefits when I might be sued.

Think about the unintended consequences. That is what the Texas legislature did. They concluded that employers should not be liable. They cannot make the final decision under this bill. They cannot make the final decision under Texas law because it is made by an external group of physicians. But when you make it possible to sue them, they are going to drop their health insurance, and you are going to have fancy reviews and stiff penalties, but people aren't going to have health insurance.

I urge my colleagues to look at Texas. If you want to take all the claims of the benefits of Texas, do it the way they have been. They created unintended consequences by letting employers be sued. They knew that employers could not make the final decision because they had external review, just as this bill and every other bill has. By doing an employer carve-out, they guaranteed that every small and large business in the State would know they cannot be sued.

The PRESIDING OFFICER (Mr. CORZINE). The question is on agreeing to amendment No. 810. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 43, nays 57, as follows:

[Roll Call Vote No. 197 Leg.]

YEAS—43

NAYs—57

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The quorum call will be rescinded.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, we were in the process of trying to propound a unanimous consent request, but all the parties are not here. We will do that at 2:15.

MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period of 30 minutes for the consideration of a pending matter of business for not to exceed 30 minutes with Senators permitted to speak therein for up to 5 minutes each.

Under the previous order, the Senator from Wisconsin is recognized to speak for up to 15 minutes.

COLORADO REPUBLICAN CASE

Mr. FEINGOLD. Mr. President, on April 2 of this year, the Senate voted overwhelmingly to pass the McCain-Feingold bill and ban soft money. Even before the roll was called on final passage and 59 Senators voted "aye," the Senate's foremost opponent of reform declared that he relished the opportunity to take a constitutional challenge to the bill. "You're looking at the plaintiff," the Senator from Kentucky announced.

Opponents of reform have consistently expressed confidence that the courts will strike down our efforts to clean up the campaign finance system. They regularly opine that the McCain-Feingold bill is unconstitutional, and, despite clear signs to the contrary in the Court's opinion last term in Nixon v. Shrink Missouri Government PAC, express great certainty that the Supreme Court will never allow our bill to take effect.

Well, in its decision yesterday morning in FEC v. Colorado Republican Federal Campaign Committee, the Court again dumped cold water on that certainty. The court held that the coordinated party spending limits now in the law—the so-called "44a(d) limits"—are constitutional. It ruled that the coordinated spending limits are justified as a way to prevent circumvention of the $1,000 per election limits on contributions to candidates that the Court upheld in the landmark Buckley v. Valeo decision in 1976. In my view, the
Congressional Record—Senate
June 26, 2001

decision makes it even more clear that the soft money ban in the McCain-Feingold bill will withstand a constitutional challenge.

The first thing to note about the Court’s ruling is that it reaffirms the distinction the Court has drawn between contributions and expenditures and the greater latitude that the Court has given Congress in the case of restraints on contributions. The Court noted that the law treats expenditures that are coordinated with candidates as contributions, and the Court has upheld contribution limits in previous cases with that understanding. It agreed with the FEC that spending by a party coordinated with a candidate is functionally equivalent to a contribution to the candidate, and that the right to make unlimited coordinated expenditures would open the door for donors to use contributions to the party to avoid the limits that apply to contributions to candidates.

The Court rejected the Colorado Republican Party’s argument that party spending is due special constitutional protection. Instead, the Court found that the parties are in the same position as other political actors who are subject to contribution limits. Those actors cannot coordinate their spending with candidates. The Court noted that under current law and the Court’s previous decision in the first Colorado case, the parties are better off than other political actors in that they can make independent expenditures and also make significant, but limited, coordinated expenditures. The limits on coordinated expenditures have not prevented the parties from organizing to elect candidates generating large sums of money to efficiently get out their message, the Court noted.

After determining that limits on party coordinated spending should be analyzed under the same standard as contributions limits on other political actors, the Court had little trouble in deciding that there was ample justification for those limits based on the need to avoid circumvention of the contribution limits in the federal election laws. It pointed to substantial evidence of circumvention already in the current system, and the near certainty that removing the 441a(d) limits would lead to additional circumvention. The Court held:

[There is good reason to expect that a party’s right of unlimited coordinated spending would attract increased contributions to parties to finance exactly that kind of spending. Coordinated expenditures of money donated to a party are tailor-made to undermine contribution limits. Therefore, the choice here is not, as in Buckley and Colorado I, between a limit on contributions and pure expenditures. The choice is between limiting contributions and limiting expenditures whose special value as expenditures is also the source of corruption. Congress is entitled to its choice.

So, Mr. President, I am pleased that the Court upheld Congress’s right to limit the coordinated spending of the parties. But even more than that, I am pleased that the Court looked at the constitutional issues in the case and the arguments of the parties. The Court’s analysis demonstrates an understanding of the real world of money and politics that gives me great confidence that it will uphold the soft money ban in the McCain-Feingold bill against an inevitable constitutional challenge.

As my partner and colleague, Senator McCain, pointed out to me prior to my taking the floor, of course this decision was about hard money; but if you really read it, it isn’t so much about hard money or soft money, it is just about money and the corrupting influence it has on our political process.

For example, the Court noted that “the money the parties spend comes from contributors with their own interests. And the Court recognized that those contributions are made to parties in an attempt to influence the actions of candidates. The Court said:

Parties are thus necessarily the instruments of some contributors whose object is not to support the party’s message to elect party candidates across the board, but rather to support a specific candidate for the sake of a position on one, narrow issue, or even to support any candidate who will be obliged to the contributors.

This is precisely the point that we who have fought so hard to ban soft money have been making for years. These contributions are designed to influence the federal officeholders who raise them for the parties, and ultimately, to influence legislation or executive policy. The Court shows that it understands this use of contributions to political parties when it states:

Parties thus purchase a function more complex than simply electing candidates; whether they like it or not, they act as agents for spending on behalf of those who seek to produce officeholders.

The Court also recognized that the party fundraising, even of limited hard money, provides opportunities for large donors to get special access to lawmakers. The Court states:

Even under present law substantial donations turn the parties into matchmakers whose special meetings and receptions give the donors the chance to get their points across to the candidates.

In a footnote, the Court notes evidence in the record of the Democratic Senatorial Campaign Committee establishing exclusive clubs for the most generous donors.

These special clubs and receptions are even more prevalent in the world of soft money fundraising. Both parties sell access to their elected officials for high dollar soft money contributions. This week a Republican fundraiser featuring the President and the Vice President is expected to raise over $20 million.

The corrupting influence of soft money, or at least the appearance of corruption created by the extraordinary sums raised by party leaders and federal officeholders and candidates, is an essential element of the constitutionality of a ban on soft money that those who support the McCain-Feingold bill would have made even if the Colorado II case had come out the other way. But the Court’s decision itself is solid support for another independent reason that the soft money ban is constitutional.

Corporations and unions are prohibited from contributing money in connection with federal elections. And individuals are subject to strict limits on their contributions to candidates and parties. The soft money loophole allows those limits to be evaded. This is not just a theoretical possibility, as in the Colorado case. There is a massive amount of soft money going on today, as there has been for over a decade. The evidence of this is overwhelming. Soft money is being raised by candidates for the parties, and it is being spent in a whole variety of ways to influence federal elections. In recent years, the parties have used soft money to run ads that are virtually indistinguishable from campaign ads run by the candidates. That is what is going on in the real world.

A soft money ban will end the circumvention of these crucial limits in the law, limits that date back to 1907 in the case of corporations, 1947 in the case of unions, and 1974 in the case of individuals. The Supreme Court’s decision yesterday tells us that Congress can constitutionally act to end that evasion.

The remaining question, of course, is whether we will do it. Our vote in this body on April 2 was the first step. When the House returns from the July 4th recess, it will take up campaign finance reform, and I am hopeful that it will act decisively to pass a bill that is largely similar to the McCain-Feingold bill. Then it will be up to the Senate to act quickly and send the bill to President Bush for his signature. We are getting close, Mr. President, to finally cleaning up the corrupt soft money decision. The Supreme Court’s decision yesterday, unexpected as it was to many in the Senate and in the legal community, is a major boost for our efforts. The Court has spoken. Now Congress must act.

I yield the remainder of the time under my control to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York.

Mrs. CLINTON. I thank the Chair. Mr. President, I add my thanks and gratitude to my good friend from Wisconsin. He has been a leader on this issue of campaign finance reform for so many years. He started as a young boy, and it has taken most of his life. I think progress is being made from a most unlikely source. I applaud
the continued perseverance and commitment of the Senator.

**HIV/AIDS EPIDEMIC**

Mrs. CLINTON. Mr. President, we are in the midst of this very important debate about a Patients’ Bill of Rights. I am hopeful that before we break for the Fourth of July recess, the doctors, nurses, patients, and families of America will have the relief for which we have all waited for a very long time: making it clear doctors should be making decisions; that nurses, not bookkeepers, should be at our bedside; and that the Patients’ Bill of Rights will be a reality.

I rise today because we have to consider our broad needs for health care not only in our country but around the world. Today we made a few minutes to Patients’ Bill of Rights to make sure that Americans have access to the best health care in the entire world, there are millions of people around the world who do not have that opportunity or that right. As painfully obviously of those who are suffering from HIV/AIDS.

We should be supporting vigorously the United Nations General Assembly on Meeting the Global HIV/AIDS Challenge and urging them to consider creative tools, such as debt relief, in efforts to combat HIV/AIDS.

As the general assembly is meeting in special session in New York to try to come up with a strategic blueprint for fighting HIV/AIDS worldwide, it is imperative that we in America appreciate that this worldwide epidemic has nowhere near crested. Africa is ravaged. It has just begun to affect India, China, and Russia. This is an epidemic of historic proportions, and it needs a response that is only a logically appropriate.

Almost 60 million people worldwide have been affected by HIV/AIDS, and over 20 million men, women, and children have died. If current trends continue, 50 percent or more of all 15-year-olds in certain most severely affected countries will die of AIDS or AIDS-related illnesses.

We are in the middle of summer vacation. We have many families and young people visiting our Capitol. We are always so happy to have them here and for them to take a few minutes to see their Government in action, but it is just chilling to imagine American 15-year-olds facing bleak futures as orphans or victims because they were born to infected mothers.

Every American should be concerned with what is going on beyond our borders. We should also be concerned because when it comes to diseases today, there are no borders. People get on jet planes, people travel all over the world. There is no disease that is confined to any geographic area any longer. We have to recognize that for us to worry about the HIV/AIDS epidemic in Africa and Asia is not only the right thing to do, it is the smart thing to protect our children.

It is also important to recognize that the group of treatments that are keeping people with HIV/AIDS alive today are not available to those who suffer elsewhere. Less than 1 percent of HIV-infected Africans, for example, have access to life-extending antiretroviral medications. The challenges facing us are great, and we should work together to combat this global emergency.

I strongly support the formation of a global fund for infectious diseases such as AIDS, but also including tuberculosis and malaria. We are seeing tuberculosis and malaria in our own country. We are seeing the spread of malaria, which used to be confined to a tropical belt, beginning to move northward. With global warming and desertification, so the mosquitoes can travel further north and find hosts who traditionally have not suffered from malaria.

Tuberculosis is becoming epidemic in many parts of the world. In Russia, drug-resistant tuberculosis is a major killer.

I believe we should have a global fund to combat these infectious diseases, and I am very pleased the United States, private donors, and some other nations have taken steps to address the need for money as articulated by Secretary General Kofi Annan. We need between $7 billion to $10 billion annually. It is my hope that through a public-private partnership we are able to continue to invest in promoting prevention, treatment, and eventually a vaccine to prevent this devastating disease.

I am old enough to remember polio as a scourge in Africa as it is now. I can remember my mother not letting me go swimming in the local swimming pool because of polio. I remember as though it were yesterday when the announcement of a vaccine was made. What a sense of relief that spread through my house and all of our neighbors, and we all lined up to get that shot, we thought would protect us from what had been, up until then, such a serious, overhanging cloud in the lives of young people, as well as older people.

HIV/AIDS exacts a severe economic toll on nations worldwide. The disease spreads so rapidly. No one is immune from it. It has grave consequences for societies, and it threatens the interest of peace and prosperity around the world.

HIV/AIDS alone will reduce the gross domestic product of South Africa by $22 billion, or 17 percent, over the next decade. That is why I believe debt relief must also be part of any conversation about a broader global HIV/AIDS strategy.

While most African countries spend less than $10 per capita on health care, they spend up to five times that amount in debt service to foreign creditors. In fact, the burdens of debt repayment have come into direct conflict with public health efforts in some instances. For example, structural adjustment programs have sometimes required governments to charge user fees for visits to medical clinics, a practice that stands in the way of effective prevention and treatment programs. As discussions of global HIV/AIDS prevention proceeds, consideration should be given to the role of international debt relief in the overall plan to combat HIV/AIDS.

I have written to the U.N. General Assembly President Harri Holkeri to express my support for his efforts and to urge inclusion of debt relief strategies in any effort that comes out of the general assembly.

I also urge our own Government to look more closely at what we can do.

In the last administration, we forgave a lot of our bilateral debt for the poorest of the nations, but we should look at expanding beyond the circle of the poorest to the next poorest of the poor, and we should also look at our bilateral debt.

I am hoping I will find support on both sides of the aisle for a sense-of-the-Senate resolution I will be submitting to express the policy view that debt relief can and should be an important tool.

I have visited African countries. I have visited Asian countries. I have visited HIV/AIDS programs. I have been in places where 12-year-old girls who were sold into prostitution by their families have come home to die in northern Thailand.

I have been in programs in Uganda which have done probably the best job I know of in Africa in trying to spread the message about how to prevent HIV/AIDS. I have listened to the songs that were taken out into villages to tell villagers about this new disease that nobody really knows where it came from or how it arrived, but to warn people about its deadly consequences.

I was fortunate and privileged last year to participate in the United Nations discussion about AIDS, and I sat with AIDS orphans: A young boy from Uganda whose father and then mother died of AIDS, leaving him responsible for his younger brothers and sisters; a young boy from Harlem whose mother died of AIDS; a young boy from Thailand who was also orphaned by this terrible disease.

In some parts of Africa now, one will only find children, and most of them are orphans. The rate of infection ranges from 15 to 35 percent, and I am deeply concerned we are still in some parts of the world in a state of denial about HIV/AIDS.

Certainly, both India and China face tremendous challenges to educate their population about this disease and to avoid practices that might spread it. It
CONGRESSIONAL RECORD—SENATE June 26, 2001

Mr. REID. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I ask unanimous consent that there be 45 minutes for debate with respect to the McCain amendment No. 812, which is pending, with the time equally divided and controlled in the usual form with no second-degree amendments in order thereon; that upon the use or yielding back of time the amendment be temporarily laid aside, and Senator Gregg or his designee be recognized to offer the next amendment as under a previous order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Who yields time?

Mr. REID. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I ask unanimous consent that the time during the quorum call be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I yield myself 7 minutes.

The PRESIDING OFFICER. The Senator is recognized.

Mr. KENNEDY. Madam President, the cornerstone of an effective patient protection program is the right to timely, fair and independent review of disputed medical decisions. This amendment reaffirms a critical element of that right—the right to an independent appeal process that is not stacked against patients by giving the HMO the right to select the judge and jury.

This is a critical difference between our approach to that issue and the approach of the alternative legislation before the Senate. Under their bill, the HMO gets to select the independent appeals organization. Under our bill, neither the HMO nor the patient selects the appeals organization. Instead, it must be selected by a neutral and fair appeals process. This amendment puts the Senate on record as supporting that fair and impartial appeal process.

The approach of allowing one party to a dispute—in this case the HMO—to select the judge and jury is so inherently unfair that it has been rejected out of hand by virtually every expert who has considered the issue. It flies in the face of every principle and precedent founded on fair play.

We don’t allow it in our civil court procedures. We don’t allow it in our criminal procedures. Doesn’t a child with cancer whose HMO has overruled her doctor deserve at least the same basic fairness we provide for rapists and murderers?

The unfair approach of allowing one party to the dispute is not only alien to our court system, it is prohibited under the Federal Arbitration Act. It is unacceptable under the standards of the American Arbitration Association. It is rejected by the standards of the American Bar Association. Of the 39 States that have created independent review organizations, 33 do not allow it; neither should the Senate.

Do we understand, in the 39 States that have created independent review organizations, 33 do not allow the HMO to select and pay the independent reviewer; and neither should the Senate.

Under the fair external review approach we have in Medicare and in most States, the reviewer decides the plan is right about half the time and decides the patient is right about half the time. In the financial services industry, the industry gets to select the reviewer in disputes, and the industry wins 99.6 percent of the time. No wonder HMOs want that system: it makes a mockery of the whole idea of independent review. A vote for this amendment is a vote against making this bill a mockery of everything that a true Patients’ Bill of Rights should stand for.

And how ironic it is that the sponsors of the competing proposal are vociferous supporters of the President’s principle that we should preserve good State laws. But under this amendment, the 39 State external appeals systems currently in place would be wiped out. Do we understand? There is one provision in the two major pieces of legislation before us; that is, the McCain-Edward bill and the Breaux-Frist bill. In the Breaux-Frist bill, their appeals provision effectively preempts all of those 39 States. They have to follow what is in their legislation. As I pointed out, that is the process by which the HMO selects the independent reviewer. They
would be null and void, even where they provide greater consumer protections than the Federal standard. In all of these cases, the underlying proposal of the McCain-Edwards bill.

We have heard a lot of tragic examples of HMO abuse during the course of this debate and through the extensive discussions in the press over the last 5 years. We heard of children denied life-saving cancer treatment by their HMO. It is wrong to let that same HMO choose the judge and jury that could decide whether those children live or die. And our amendment says it is wrong.

We have heard of women with terminal breast and cervical cancer denied the opportunity to participate in clinical trials that could restore normal functioning. It is wrong to give the HMO that made that heartless decision the right to choose the judge and jury that could decide whether that woman has a real chance to live to see her children grow up or is guaranteed to be dead within 3 months.

We have heard of a young man whose HMO decided that it was cost-effective to amputate his injured hand instead of providing the surgery that could restore normal functioning. It is wrong to give the HMO that made that heartless decision the right to choose the judge and jury that could decide whether that young man goes through life with one hand or two.

We have heard of a policeman with a broken hip, whose HMO decided it was better to give him a wheelchair than to pay for the operation that would have restored his normal functioning. It is wrong to give the HMO that made that heartless decision the right to choose the judge and jury that could decide whether that man ever walks again.

Last week, in discussing the issue of access to specialty care, I mentioned what had happened to Carley Christie, a 9-year-old little girl who was diagnosed with Wilms Tumor, a rare and aggressive form of kidney cancer. Her family was frightened when they received the diagnosis, but they were relieved to learn that a facility close to their home in Woodside, CA, was world-renowned for its expertise and success in treating this type of cancer—the Lucille Packard Children’s Hospital at Stanford University.

The Christie family’s relief turned to shock when their HMO told them it would not cover Carley’s treatment by the children’s hospital. Instead, they insisted that the treatment be provided by a doctor in their network—an adult urologist with no experience in treating this rare and dangerous childhood cancer. The Christies managed to scrape together the $50,000 they needed to pay for the operation themselves—and today Carley is a cancer-free, healthy and happy teenager. If the Christies had been less tenacious or had the uninsured with the $50,000, there is a good chance that Carley would be dead today.

Under our opponents’ plan, the HMO that passed a possible death sentence on little Carley Christie would have the right to choose the judge and jury to determine whether that possible death sentence should be upheld. No family should have to go through what the Christie’s did.

The PRESIDING OFFICER. The Senator has used 7 minutes.

Mr. KENNEDY. I yield myself 5 more minutes, Madam President.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. No HMO should be allowed to choose the right to life of a 9-year-old child. And that HMO should certainly not have the right to choose the external review organization to decide whether Carley should get the care she needed.

Another case that I find particularly shocking is that of Melissa Yazman, right here in Washington. In May, 1997, Melissa Yazman was a second year law student at American University, going to school full-time, living in suburban Virginia, working part-time for an attorney in D.C., and taking care of her two kids while her husband traveled with his job.

In the past 4 years, much has changed for Melissa. Her dreams of law school and a career in the working world are gone, and her new career is focused on healing and living every day to enjoy the time she has with her husband and her two sons—Ben who is 11, and Josh who is 8.

In the spring, in 1997, at the age of 36, she was diagnosed with stage IV pancreatic cancer at the age of 36. Pancreatic cancer is a fairly rare cancer, and, for the majority of patients like Melissa, diagnosis is not possible until the cancer is in an advanced stage.

Melissa was told that she had 3 to 6 months to live. There are no curative treatments for pancreatic cancer. For most pancreatic cancer patients clinical trials are their only hope.

Melissa was referred to a clinical trial at Georgetown University. Her insurer refused to cover the treatment. Melissa and her husband were forced to go through lengthy and time consuming negotiations with the insurer—negotiations that took her husband away from their children for 2 to 3 hours a day—negotiations that ultimately ended in failure. She and her husband ended up paying for these costs themselves because they ran out of time waiting for a decision from her insurer.

Because she and her husband had enough money in their savings account, they were able to pay for her routine costs—costs that her insurer should have covered and would cover for a patient not enrolled in a life-saving clinical trial.

Because of the therapy she received in a clinical trial, Melissa has been able to have 4 extra years with her family and with her young boys. Without the clinical trial, she would have had 3–6 months. Every patient with incurable cancer hopes for enrollment in a clinical trial that can save or extend their life. No patient should have their hopes dashed because their insurer simply says no. And no patient like Melissa should have their right to a fair, impartial appeal voided because the HMO that said “no” gets to choose the organization that will decide the case.

For cancer patients, for women, for children—indeed, for every patient whose HMO denies critically needed care—the right to a speedy, fair, impartial appeal should be a fundamental right. This amendment will put the Senate on record as saying that this appeal should truly be fair and impartial, that it will not load the dice and stack the deck against patients. Every Senator knows that this amendment represents simple justice, and I urge every Senator to vote for what they know to be right.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Ms. STABENOW. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded. How much time is on both sides?

The PRESIDING OFFICER. There is no time remaining on the opponents' side, and there are 14 minutes 44 seconds on the opponents' side.

Mr. REID. I see nobody here of the opponents. If they require more time, I will be happy to give them whatever time I may use here. I ask unanimous consent that I be allowed to speak, and if the opponents of this sense-of-the-Senate amendment desire more time, they can have whatever time I use.

Ms. STABENOW. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.
The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. The Senator from New Hampshire heard that request?

Mr. GREGG. No.

Mr. REID. We have no more time left. You have 14 minutes. I said I would like to speak. If you want more time, whatever time I use, you can have that in addition to the 14 minutes.

Mr. GREGG. I am not aware of any speakers. We are waiting for people to return from the White House before we get really started.

Mr. REID. I want to direct a question to the Senator from Massachusetts. I say to my friend from Massachusetts, we heard a lot of talk about how this legislation has an adverse effect upon the business community. Has the Senator or her constituents?

Mr. KENNEDY. Yes, certainly have.

Mr. REID. I received an e-mail from Michael Marcum of Reno, NV. Here is what he said. I would like the Senator to comment on this communication I received from my constituents:

DEAR SENATOR REID, as a small business owner, and as a citizen I urge you to support the pending bill commonly known as the “Patients’ Bill of Rights.” I also would like to state that I support your and Senator McCain’s version of the bill. If the HMO’s can afford to spend millions on lobbyists and advertisements then they can afford to do their job correctly preventing the lawsuits in the first place . . .

I am willing to pay to know that what I am purchasing from my HMO will be delivered, not withheld until someone is dead then approved post mortem (AKA a day late and a dollar short). While a believer in the market and freedom, I feel that we need a better national approach to health care. As the richest nation in the world, as the only real super-power, why do so many Americans get third world levels of health care, even when they have health insurance?

Thank you for your time—Michael Marcum (Reno, NV).

Will the Senator acknowledge that Michael Marcum is one of the hundreds of thousands of small business people who do not have the money to run these fancy ads; that their only way of communicating with you and me is through e-mails and communicating through the standard means, not through these multimillion-dollar advertising campaigns?

Mr. KENNEDY. I thank the Senator for bringing two matters to the attention of the membership. One is the example the Senator referred to, and the other point is the fact we have heard so much during the course of the debate that if these protections are put in place, it is going to mean millions of insured individuals as a result of this legislation will become uninsured.

Yet it is apparent, as the Senator has pointed out, that the HMOs have millions of dollars to spend on these advertisements—millions of dollars that ought to be spent on either lowering premiums or giving patients the protections they need. Evidently, it is an open wallet for the HMOs because they have been on the national airways and have been distorting and misrepresenting the legislation, as the Senator has just pointed out, distorting what its impact would be on average families in this country.

I am wondering if the Senator is familiar with the Texas Medical Association letter we just received. It confirms that the Texas law mirrors the letter and spirit of the McCain-Edward-Kennedy bill. This is from the Texas Medical Association. They point out that the Texas Medical Association and President Bush agree that any entity making health care decisions should be held accountable for those decisions. This is not only the position of the Texas Medical Association but is exactly what President Bush called for in a Patients’ Bill of Rights.

We received a letter earlier today. The Texas Medical Association believes it is consistent with the intent of the Texas law to hold any entity, whether employer or insurer, accountable if they make a medical decision that harms a patient or results in death. We uphold that today.

The Texas law was never designed to exempt from accountability businesses that made harmful medical decisions.

It was suggested earlier the Senator remembers that it would be, rather, a clarification that the liability provisions did not apply to small- and medium-sized businesses that purchased traditional insurance.

That is interesting to hear because we heard a great deal earlier about where the legislation was. This is a clarification.

The Senator is pointing out we spent a good deal of time trying to catch up with the distortions and misrepresentations, but as the Senator from Nevada knows, what this is really about is doctors and nurses making decisions on health care for their patients and not having them overridden by the HMOs or by employers who put themselves in the place of HMOs.

That is what this legislation is about: letting our doctors and nurses practice their best in medicine. We have so many well-trained medical professionals. They are highly motivated, highly committed, and highly dedicated. What is happening in too many places, as the Senator has pointed out in this debate, too many times those medical decisions are being overruled and overturned by the HMOs, and that is plain wrong. That is what this battle is about. I thank the Senator for his comment.

Mr. REID. I say to my friend from Massachusetts, yes, I am familiar with the letter from the President of the Texas State Medical Association. I believe that is his title.

Mr. KENNEDY. That is correct.

Mr. REID. I heard Senator McCaIN read the letter word for word. I was so impressed because what has happened to the past few years is that doctors, who in the past have been totally non-political, have been drawn into the political field because they are losing their practices, they are losing their ability to practice medicine, their ability to take care of patients they were trained to take care of. They have come into the political field and have joined together with the American Medical Association—all the different specialists and subspecialists—they have joined together saying: We as physicians of America need some help.

If you want us to be the people who make a judgment about how you, the sick wife, husband, mother, father, neighbor, then we need to have the ability to treat patients and give them the medicine they need.

The Senator from Massachusetts joined part of this letter. Senator McCaIN read the full text of the letter earlier today. It confirms this legislation is not being driven by a small group of fanatics but, rather, by the entire medical community. When I say “medical community,” it is more than just doctors. It includes nurses. It includes all the people who help render care to patients.

I say to my friend from Massachusetts, I commend him, Senator McCAIN, and Senator Edwards for their diligence in doing something the American people need. We all have had the experience of having sick people in our families and seeing if care can be rendered. We know how important a physician is. When I loved one of mine is sick, I want the doctor to have unfettered discretion to do whatever that doctor, he or she, believes is best for my loved one. That is what this Patients’ Bill of Rights is all about. When a doctor takes care of a patient, let the doctor take care of the patient.

Mr. KENNEDY. I thank the Senator. He has summarized the purpose of this legislation. As the Senator knows now, we are ensuring there will be remedies for those patients if the HMO is going to make a judgment and overturn that medical decision with internal and external appeals.

Now the matter before the Senate is to make sure that appeal is truly independent and not controlled by the HMO, not paid for by the HMO. As I mentioned earlier in my presentation, 33 States at the present time do not permit the HMOs to make the determination and select the independent reviewer. That is our position. That is in the McCain amendment. We do not want to have an appeals provision that is rigged in favor of the HMO that may be making the wrong decision with regard to the patient’s health in the first
place and then be able to select the judge and jury to get it to reaffirm an earlier decision which is clearly not in the interest of both sides equally.

Mr. REID. I say to my friend from Massachusetts, the manager of this bill, before I came to Congress, I was a judge in the Nevada State Athletic Commission for prize fights. As the Senator from Nevada, Nevada is the prize fight capital of the world. One thing they would not let the fighters do is pick the judges. They thought it would be best if some independent body selected the judges to determine who was going to sit in judgment of those two fighters.

It is the same thing we have here. We simply do not want the participants picking who is going to make the decision. That should be made by an unbiased group of people who have nothing to gain or lose by the decision they make.

This is very simple. This sense-of-the Senate resolution says that if there are going to be people making a decision, they should be unbiased. They should be people who have nothing in the outcome of the case. Is that fair?

Mr. KENNEDY. I agree. Senator, as you may know, the language in the alternative legislation not only permits the HMO to select the reviewer and to pay that, but also it preempts all the other States that have set up their own independent review, and 33 of the 39 that have set up their reviews have chosen a different way from this process, a truly independent review. They would effectively be usurped or wiped off the books.

We hear a great deal about State rights and not all wisdom is in Washington. This is a clear preemption of all of the existing State appeal provisions. It is a way that permits the HMO to be the judge and jury. That is why the McCain amendment—which says there will be an independent selection of review, and we will not preempt the States—makes a good deal of sense.

Mr. REID. If I could refer a question to the Senator from New Hampshire, our time under the agreement is just about out. Are you arriving at a point where you might offer the other amendment?

Mr. GREGG. I hoped we would be. Some of the Senators involved in that amendment are at the White House, so we are waiting for them to return. When they return, we will be ready to proceed.

Mr. REID. I have been told they probably won't return until about 3:30.

Mr. GREGG. I suggest we divide the time between now and 3:30 between the two sides equally.

Mr. KENNEDY. I don't know at this time of the other amendments on this side. We are making good progress dealing with this legislation. We are eager to address these other matters. There are continued conversations on some of the issues. We certainly welcome ideas that can protect the patients. Looking at this realistically we now have several Members of the Senate to address the Senate and have spoken to me several times that they would like to make comments about the legislation. We can use the time productively, but we indicate we are ready to deal with the amendments and we look forward to receiving them. We want to continue business.

We thank the Senator from New Hampshire for his cooperation. I will notify my colleagues who might want to speak.

Mr. REID. We have no objection to the request of the Senator from New Hampshire.

Mr. GREGG. I ask that the time between now and 3:30 be equally divided between myself and Senator KENNEDY, and any quorum calls be divided between each side.

The PRESIDING OFFICER (Mr. CARPER). Without objection, it is so ordered.

Mr. REID. Mr. President, I have been reading into the RECORD names of organizations supporting this legislation, hundreds of names. I begin with the D’s:

Daniel, Inc.; Denver Children’s Home; DelPhelchin Children’s Center in TX; Developmental Disabilities; Digestive Disease National Coalition; Dystonia Medical Research Foundation; Easter Seals; Edgar County Foundation; Facing Our Risk of Cancer Empowerment; Families First, Inc.; Families USA; Family and Children’s Center Counsel; Family & Children’s Center in WI; Family & Counseling Service of Allentown, PA; Family Advocacy Services of Baltimore; Family and Child Services of Washington; Family and Children’s Service in VA; Family and Children Services of San Jose; Family and Children’s Services in Tulsa, OK; Family and Children’s Agency Inc.; Family and Children’s Association of Mineola, NY; Family and Children’s Center of Mishawaka; Family and Children’s Counseling of Louisville, KY; Family and Children’s Counseling of Indianapolis; Family and Children’s Service of Minneapolis, MN; Family and Children’s Service in TN; Family and Children’s Service of Harrisburg, PA; Family and Children’s Service of Niagara Falls, NY; Family and Children’s Services in Elizabeth, NJ; Family and Children’s Services of Central, NJ; Family and Children’s Services of Chattanooga, Inc. in TN; Family and Children’s Services of Fort Wayne; Family and Children’s Services of Indiana; Family and Community Service of West Palm Beach; Family and Children’s Services of Hackensack, NJ; Family and Youth Counseling Agency of Lake Charles, LA; Family Centers, Inc.; Family Counseling Services of Cleveland, OH; Family Counseling & Shelter Service in Monroe, MI; Family Counseling Agency; Family Counseling and Children’s and Children’s Services, Family Counseling Center of Central Georgia, Inc.; Family Counseling Center of Sarasota; Family Counseling of Greater New Haven; Family Counseling Service in Texas; Family Counseling Services of Greater Michigan; Family Counseling Service of Lexington; Family Counseling Service of Northern Nevada; Family Counseling Service, Inc.; Family Guidance Center in Hickory, NC; Family Guidance Center of Alabama; Family Resources, Inc.; Family Service Agency of Arizona; Family Service Agency of Arkansas; Family Service Agency of Clark and Campbell counties in OH; Family Service Agency of Davie in CA; Family Service Agency of Genesse, MI; Family Service Agency of Monterey in CA; Family Service Agency of San Bernardino in CA; Family Service Agency of San Mateo in CA; Family Service Agency of Santa Barbara in CA; Family Service Agency of Santa Cruz in CA; Family Service Agency of Youngstown, OH; Family Service and Children’s Alliance of Jackson, MI; Family Service Association Greater Boston; Family Service Association in Egg Harbor, NJ; Family Service Association of Beloit, WI; Family Service Association of Bucks County in PA; Family Service Association of Central Indiana; Family Service Association of Dayton, OH; Family Service Association of Greater Tampa; Family Service Association of Roanoke County, Inc. Family Service Association of New Jersey; Family Service Association of San Antonio, TX; Family Service Association of Wake County in NC; Family Service Association of Wabash Valley, IN; Family Service Association of Waukesha County in WI; Family Service Council of California; Family Service Council of Ohio; Family Service in Lancaster, PA; Family Service in Lincoln, NE; Family Service in Omaha, NE; Family Service in WI; Family Service Inc. in St. Paul, MN; Family Service of Burlington County in Mount Holly, NJ; Family Service of Caterina Private Bill, Inc.; Family Service of Chester County in PA; Family Service of El Paso, TX; Family Service of Gaston County in Gastonia, NC; Family Service of Greater Bakersfield in CA; Family Service of Greater Boston; Family Service of Greater New Orleans; Family Service of Lackawanna County, in PA; Family Service of Morris County in Morristown, NJ; Family Service of Norfolk County; Family Service of Northwest, OH; Family Service of Racine, WI; Family Service of Roanoke Valley in VA; Family Service of the Cincinnati; OH; Family Service of Piedmont in High Point, NC; Family Service of Waukesha County, WI; Family Service of Westchester, NY; Family Service of York in PA; Family Service of Spokane in WA; Family Service, Inc. in SD; Family Service, Inc. in TX; Family Service, Inc. of Detroit, MI; Family Service, Inc. of Lawrence, MA; Family Service Association, Inc. in Elkhart, MD; Family Service Centers; Family Service in Canton, OH; Family Service of Cedar Rapids; Family Service of Central Massachusetts; Family Service of Charlotte, NC; Family Service of Lexington, NC; Family Service of Delaware Councils; Family Service of Elkhart County; Family Service of King County in WA; Family Service Association, Inc. in Elkhart, MD; Family Service of Muncie, IN; Family Service of Northeast Wisconsin; Family Service of Northwestern in Erie, PA; Family Service of Southeast Texas; Family Service of Summit County; Family Service of the Lower Cape Fear in NC; Family Service of the Mid-South in TN.
Family Service of Tidewater, Inc. in VA; Family Service of PA; Family Serv- ices Woodfield; Family Services, Inc. in SC; Family Services, Inc. of Lafayette; Family Services, Inc. of Winston-Salem, NC; Family Solution, Inc. of Cary; Family Services of Ft. Worth; Family Support Services of Texas; Family Tree Information, Education & Counseling in LA; Family Violence Prevention Fund; Family Means in Stillwater, Minnesota; Psychological & Cognitive Sciences; Federation of Families for Children's Mental Health; FEI Behavioral Health in WI; Florida Families; Friends Committee on National Legislation.

Mr. President, this is a partial list of the hundreds of names of organizations that support this legislation. This is the fourth day that I have read into the RECORd names of hundreds of organizations supporting this legislation. This list was prepared for me more than a week ago. It has grown since.

When I finish this list, I hope we will have completed this legislation. But if we haven’t, I will come back and read the new names.

This is legislation that is supported by virtually every organization in America. It is opposed by one umbrella group—the HMOs. They are the ones paying for these ads. They are the ones that are running the advertisements in newspapers and television and now even radio ads. The reason being that they do not want their members, their clients, and their patients to be able to stop. When I have my income tax done, every year I have an accountant do that. When myself or a member of my family needs to be taken care of, I don’t want an accountant doing that. I want a doctor to do that.

That is what this legislation is all about. I am so happy that we have a bipartisan group that the HMOs are not going to be able to stop.

We are going to pass this legislation, send it over to the House, the conference committee will meet, and we will send a bill to the President that he will sign.

I suggest the absence of a quorum. The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DAYTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Minnesota is recognized.

Mr. DAYTON. Thank you, Mr. President.

Mr. President, I rise today in support of S. 1052, the McCain-Kennedy-Edwards Patients’ Bill of Rights legisla- tion. Minnesota, my home State, has one of the largest concentrations of HMO providers in the country. In fact, 90 percent of Minnesotans who are cov- ered by their employers also receive their health care services through HMOs. Also, historically, the HMO concept originated in Minnesota by a Min- nesota physician who has now re- nounced what HMOs have become.

Originally, HMOs were going to herald in a new age of health care, with greater emphasis on prevention, on pri- mary care, more efficient referrals, co-ordinated and integrated medical care, all leading to a better quality of medical services for patients at lower over- all costs to our health care system.

Integral also to their arguments was their conceit that the private sector ai- costs it better than the public sec- tor, that the large public health sys- tems of Medicare and Medicaid, and other public reimbursement programs, were largely the ones to blame for these skyrocketing health costs, and that private-sector and insur- ance companies could manage health care dollars so much better than Gov- ernment and provide better quality for less quantity of dollars.

However, once they got into the pro- fession, they found that it was not quite that easy, that quality care costs money. There is always some con artist in this country who claims we can have something for nothing, or at least for less. But the reality is, quality health care costs money. Well-quali- fied, highly trained, life-saving doc- tors, nurses, and attendants deserve to be well paid; and that costs money. Ad- vanced lifesaving diagnostic equipment costs money. State-of-the-art, well- staffed hospitals and clinics cost money. And providing enough of all of the above, to take care of all the pa- tients across this Nation, costs money, more money than most of these health care delivery or insurance systems wanted to spend.

So HMOs became what I call them “HNOs”: The way to save money be- came to say no; deny care; deny treat- ments; deny claims. Health care pro- viders became health care deniers. As these HMOs became larger and larger, business operations—whether for-profit or nonprofit—their “no” bureaucracies became bigger and more important. Stalemate in negotiations, retained earnings all became dependent on their ability to grow and to say no, deny patient care to produce profits at cost savings, to grow to produce even more profits.

The PRESIDING OFFICER. The time of the majority has expired.

Under a previous agreement, the time until 3:30 was to be equally di- vided between the majority and minor- ity. The time of the minority has ex- pired.

Mr. GREGG. Mr. President, how much time does the Senator think he needs to make his statement?

Mr. DAYTON. I say to the Senator from New Hampshire, another 10 min- utes. But I will return to speak another time.

Mr. GREGG. No. We have no speakers at this time. I am happy to yield 10 minutes to the Senator from Min- nesota. And I ask unanimous consent for five minutes to be added to our time.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Reserving the right to ob- ject.

The PRESIDING OFFICER. The Sen- ator from West Virginia.

Mr. BYRD. I wonder if I might be able to have the floor to speak.

Mr. GREGG. What amount of time does the Senator from West Virginia need?

Mr. BYRD. Thirty minutes.

Mr. GREGG. I have no problem with that on my side, as long as our side will receive an equal amount.

So that would be 40 minutes; 10 min- utes to Senator from Minnesota, 30 minutes to the Senator from West Vir- ginia; and then 40 additional minutes to be added to our side’s time. And the Senator from West Virginia be recog- nized after the Senator from Min- nesota.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Senator from Minnesota.

Mr. DAYTON. I would be happy to yield the floor to the Senator from West Virginia.

The PRESIDING OFFICER. Does the Senator from Minnesota wish to con- clude his remarks?

Mr. DAYTON. I yield to the Senator from West Virginia.

The PRESIDING OFFICER. The Sen- ator from West Virginia is recognized for up to 30 minutes.

Mr. BYRD. Mr. President, I thank both Senators.

(The remarks of Mr. BYRD are located in today’s RECORD under “Morning Business.”)

Mr. DAYTON. Mr. President, I thank the great Senator from West Virginia for his erudite discourse on the trade agreement which gives me remarks as I shall present them to my constituents in Minnesota. I thank the distin- guished Senator.

Mr. BYRD. Mr. President, I thank my colleague. I thank him very much.

Mr. DAYTON. Mr. President, to con- tinue where I left off, a great American once said that a house divided against itself cannot stand. Our Nation’s health care providers unfortunately are fundamentally divided against them- selves. Their avowed purposes are to provide health care to their members, their clients, and their patients. Yet their financial success depends increas- ingly on not providing health care to their members, their clients, and their patients, and their members, clients, and patients are increasingly the vic- tims of their own health care pro- viders.
Why do we even need a Patients’ Bill of Rights to protect us from our own health care providers? The fact we even need this legislation, the fact we are debating it in the Senate today, says how badly our Nation’s health care system has deteriorated. A Patients’ Bill of Rights, even if necessary, should consist of two words: Doctors decide. Doctors decide what diagnostic procedures, what treatments, what surgeries, hospitalizations, and rehabilitation therapies are needed. The health care providers provide them, and the insurer pays for them. It is that simple. It is that sensible. It is that lawsuit-free.

Our distance from it today is a measure of our social insanity. It is the measure of our health care idiocy. But that is where we are today.

There is a story that reports stories these days, trash talking. There is a lot of trash being talked about this legislation: It will explode the costs of health care; it is going to cost employees their health care coverage; it will drive businesses out of bankruptcy. Those are the same smears and scare tactics that were used against Social Security, against Medicare, against workers’ compensation, against unemployment compensation, and against family leave. Is there anything that is good for the American people that is not bad for American business?

I don’t entirely blame them, because those business men and women have been talked trash to, as well, by their partners in these health care enterprises. Many businesses across this country are bedeviled by increasing costs of their health care. They want to do the right thing for their employees, but they are not in the business of administering health care plans. I am sympathetic to this. But I say to those big leaders, if you want to get out of the business of providing health care coverage for your employees, then you need to actively support a better alternative, a separate system of true national health care which is devoted to providing care, not to avoiding costs.

Last Saturday in Minnesota, along with my distinguished colleague from Minnesota, Senator WELSTON, and our majority leader, Senator DASCHELLE, we heard from several families who expressed their support for their legislation and the critical need for it from their life experiences. There was a father who spoke eloquently and powerfully about his 4-year-old daughter named Hope. Hope was born with spina bifida. As part of her treatment, six doctors—six physicians—including one at the Mayo Clinic, prescribed certain physical therapy treatments for her. Yet her HMO was unwilling to provide or pay for those prescribed treatments. It took 8 months of banging their heads against this bureaucratic wall, paying for the treatments that they could afford out of their own pockets, forgoing other treatments that they knew were in the best interests of her young life, until they finally were able to break through the red tape and get needed

A mother spoke of her 21-year-old daughter who died of an eating disorder. As she so powerfully stated last Saturday in St. Paul, MN, young people aren’t supposed to die of eating disorders. But her insurance company refused to pay for the necessary evaluation of her daughter’s illness, it refused to refer her to a specialist who might have made the correct diagnosis, and that young woman is dead today. Her life has been snuffed out, taken away from her family. Her mother set up a foundation just for this purpose, to advocate for the care that should be provided for anyone else in that situation. What a horrible way for a parent to be pulled into their own daughter unnecessarily to a disease, an illness that should not have been fatal except for the lack of proper medical care, medical care that was available in our country and was not made available to her by her insurer.

Finally, we heard from the wife of a husband and father of five children, a healthy, active, middle-aged man who suddenly, over the course of just a few months, was caught with some debilitating disease and confined to a wheelchair. For 8 months she and her husband tried to get their primary physician at an HMO to make a diagnosis that could lead to successful treatment. For 8 months this primary physician at the HMO was unable to make the diagnosis and refused to refer this man to a specialist elsewhere for that evaluation. He finally said to this patient, father of five, devoted husband: “Maybe there is something you need to confess.” Can you believe the absurdity of that? “Maybe there is something you need to confess”—as though there were some religious curse. This was a primary physician at an HMO. They could not escape the vice, the trap of that bureaucracy.

Finally, on their own initiative, the wife was so desperate, they decided to risk their entire life savings and drove to the Mayo Clinic in Rochester, world renowned clinic, and signed papers saying they would pay personally for the costs of whatever treatments were necessary. The physician there made a diagnosis of a viral disease, an invasive disease, prescribed the necessary treatments, medications, and this man is now at least partially recovered. He tires easily and cannot stand for extended periods of time but is out of a wheelchair and hopefully back to a full recovery. It cost this family $25,000.00 out of their own pocket to get the medical care that the HMO refused to provide. The care they finally agreed to pay 80 percent of that cost.

This legislation is about lawsuits, it is about lives. It is not about trial lawyers but people, patients, mothers, fathers, children. I am not interested in lawsuits. I hope there is never a lawsuit as a result of this legislation because that would mean there would never be the need for them. It would mean all Americans were receiving the health care they need, the health care they deserve, the health care for which they paid.

I strongly urge this legislation, and I strongly urge my colleagues to support this as well.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. JOHNSON). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection?

Mr. KENNEDY. Mr. President, we encourage and invite colleagues who have amendments to come to the floor. Having talked with Senator GREEGG and others, I anticipate we will have an active debate on the issue of medical necessity. That is an issue which is of very considerable importance in the legislation. It was the subject of a good deal of debate the last time we debated this legislation. It was the subject of a good deal of debate when we were in the conference. It was actually one of the few issues that were resolved in the conference.

At this time, we have language in the McCain-Edwards legislation, of which I am a cosponsor, as well as in the Breaux-Frist measure, which is virtually identical. There are some small differences in there, but they are effectively very much the same. There will be an amendment to alter and change that. I will take a few moments now to speak about the importance of what we have done with the underlying legislation, and hopefully the importance of the Senate supporting the construct we have achieved.

It is my anticipation that the amendment will probably be offered at about 5 o’clock this evening. We will have debate through the evening on that measure. Hopefully, we will have a chance to address it. There are several other amendments dealing with the issue of the scope of the legislation, as well as on liability. I understand we may very well have the first amendments on liability a little later this evening as well.

This issue on medical necessity is of very considerable importance. I want to outline where we are and the reasons for it for just a few minutes.

The legislation before the Senate closes the door against one of the most serious abuses of the HMOs and other insurance plans, and the ability of a patient to use an unfair, arbitrary, and biased definition of medical necessity to deny patients the care their doctor recommends.

June 26, 2001

CONGRESSIONAL RECORD—SENATE

11841
My concern is that the amendment we are going to see before the Senate is going to take a different approach. We closed it with McCaин-Edward and also with the Breaux-Frist measure. The issue before us is as clear as it was when we started the debate 5 years ago; that is, who is going to make the critical medical decisions—the doctors, the patients, or HMOs? The Senate voted for that approach. I still think it is the right approach. But we heard complaint after complaint from the other side that putting a definition into law would be a straightjacket for health plans, it would prevent them from keeping pace with medical progress, and so on.

So Congressmen John Dingell and Charlie Norwood changed that provision. They removed the definition of medical necessity from the law. Instead, they said, let the plans choose the definition that works best for them. But if a dispute went to an independent medical review, the reviewers would need to consider that definition. But they would not be bound by it in cases involving medical necessity; that is, they would be able to use in the review their own judgment in terms of the medical necessity. They would make the decision based on the kind of factors all of us would want for ourselves and our families—the medical condition of the patient, and the valid, relevant, and competent evidence, including peer-reviewed medical literature, or findings, including expert opinion.

Mr. GREGG. Mr. President, will the Senate yield for a question? Mr. KENNEDY. Yes.

Mr. GREGG. I understand the Senator's time has expired. I ask unanimous consent that whatever time the Senator consumes, an equal amount of time be added to our time.

The PRESIDENT. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, at the time of these appeals, they would make the decision based on the kinds of factors all of us would want for ourselves and our families—the medical condition of the patient, and the valid, relevant, and competent evidence, including peer-reviewed medical literature, or findings, including expert opinion.

Those factors essentially say that the independent medical reviewer should strive to make the same recommendation that the best doctor in the country for that particular condition should make. It is a fair standard. It is a standard all of us hope our health plans do their job well. The Senate should understand that this was not only a bipartisan compromise between Congressmen John Dingell and Charlie Norwood, it was a compromise on which every member of our conference signed off in the last Congress, from Don Nickles and Phil Gramm to John Dingell and myself. In fact, this concept of letting the external reviewer consider but not be bound by the HMO's definition of medical necessity is also included in the Frist-Breaux bill endorsed by the President. On this issue, the legislation before the Senate is clearly the middle ground. It is the fair compromise. But my concern is that the amendment we will face will tilt us away from that compromise, away from the HMO's...

Now the authors of this amendment claim that they have just provided a safe harbor for HMOs that want to be able to maintain a fair definition of medical necessity throughout the entire process. But our list of the factors that must guide the external reviewers' decision is already consistent with every fair definition of medical necessity. The fact is that this amendment may create a safe harbor for HMOs, but it tosses patients over the side into the storm-tossed seas. It would allow HMOs to adopt some of the most abusive definitions ever conceived. It ties the hands of the independent medical reviewers. It puts HMO bureaucrats in the driver's seat—and kicks patients and doctors all the way out of the automobile and is not in the interest of the patient.

Our concern is that the amendment we anticipate will be offered will say that HMOs can define medical necessity as they please, and that the patients are out of luck. There is nothing to appeal, because the plan's definition of "medical necessity" controls what the external reviewers can decide.

Another plan uses different words to reach the same result. It says, medical necessity is "Any service or supply for the prevention, diagnosis or treatment that is (1) consistent with illness, injury or condition of the member; (2) in accordance with the approved and generally accepted medical or surgical practice prevailing in the locality where, and at the time when, the service or supply is ordered." Doesn't sound so bad so far, but here is the kicker. "Determination of 'generally accepted practice' is at the discretion of the Medical Director or the Medical Director's designee." In other words, what is medically necessary is what the HMO says is medically necessary.

Among those who have been most victimized by unfair definitions of medical necessity are the disabled. Definitions that are particularly harmful to them are those that allow treatment only to restore normal functioning or improve functioning, not
June 26, 2001

CONGRESSIONAL RECORD—SENATE

Mr. KERRY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THOMAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THOMAS. Mr. President, we have some time to speak on the bill on this side; is that correct?

The PRESIDING OFFICER. The minority controls the next 41 1/2 minutes.

Mr. THOMAS. I thank the Chair.

Mr. President, we have been on this bill now, it seems, for a very long time. It is very important, and indeed we should be on it. On the other hand, we also ought to be making some progress. It appears we are not. We hear all this talk about how we can get together, let’s put it together, and we can agree. But I see nothing of that nature happening. It seems to me we continue to hear the same old things going on. I hear a recitation of a great many people who are opposed to the bill listed off name by name. I suppose we can do that for the rest of the day.

Here is a list of people opposed to the Kennedy bill. There are over 100 names of businesses and organizations. I could do that, but I don’t know that there is great merit in doing that. We have talked about what we are for, and I think, indeed, we Republicans have certain principles, and we have talked about that: Medical decisions should be made by doctors; patients’ rights legislation should make coverage more accessible, not less; coverage disputes should be settled quickly, without resort to excessive and protracted litigation. That is where we have been and what we think, indeed, we Republicans have certain merit in doing that. We have talked about how we can get together, let’s put it together, and we can agree. But I don’t see any evidence of that.

It seems to me if we are going to do that, we ought to do it. Instead, it seems we are in this kind of bait and switch sort of thing that we hear. I think the McCain-Edwards-Kennedy bill, as described by the sponsors, is a far cry from what is written. How many times have we been through that? The sponsors promise it would shield employers from lawsuits, that it would uphold the sanctity of employer health care contracts, and require going through appeals before going to

Mr. KERRY. Mr. President, I ask unanimous consent I be permitted to speak in morning business on the time of the Republicans.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERRY. Let me begin by thanking my colleague, the senior Senator from Massachusetts, for his extraordinary leadership on this critical issue for our country with respect to the Patients’ Bill of Rights. That is without any question the most important business before the country and the most important business before the Senate. I will return to the floor of the Senate either later today or tomorrow to share some thoughts with respect to that.

(The remarks of Mr. KERRY are located in today’s RECORD under “Morning Business.”)
One of the sponsors says: We actually specifically protect employers; employers cannot be sued under the bill. Yet you find in the bill itself exclusions of employers and other plan sponsors, and it again goes into causes of action. And then, unfortunately, the next provision says certain causes of action are permitted and then it goes forward with how in fact they can be sued. They say, first of all, we specifically protect employers from lawsuits. Then it says in the bill that certain causes of action are permitted to sue them.

So we don’t seem to be making progress and meeting the kinds of agreements we have talked about. What we simply do is continue to get this back and forth on the one hand, which is endless, and it isn’t the same as what is in the bill. I don’t know how long we can continue to do that.

I am hopeful we can come to some agreement. I think people would like to have a Patients’ Bill of Rights that ensures that what is in the contract is provided for the patient. I think we can indeed do some of those things. However, I have to say it seems to me if we intend to do it, we need to get a little more dedicated to the proposition of saying, all right, here is where we need to be on liability and let’s see if we can work out the language to do that. We have been talking about it now for a week and a half. It is not there. All right. We are talking about the opportunity for holding to the contract, not going outside the contract. We need to have that language.

So I think most of us are in favor of getting something done here, but we are getting a little impatient at the idea of coordinating the same things over and over again when in fact the bill does not say that. We ought to be making some propositions to be able to make the changes that indeed need to be made if that is our goal.

Frankly, Mr. President, I hope that it is.

I see other Members in the Chamber. I will be happy to yield the floor.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill clerk will call the roll.

Mr. GREGG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GREGG. Mr. President, I yield back such time as I might have at this point.

The PRESIDING OFFICER. The Senator’s time is yielded back.

Mr. REID. If the Senator will yield for a brief statement, there are efforts being made now to work out what some deem to be better language on the McCain amendment. If that is not possible, the Senator from New Hampshire and I have said we might be able to voice vote that anyway. I personally do not expect a recorded vote on that, but time will only tell.

I ask unanimous consent that the McCain amendment, be set aside and the Senator from Missouri be recognized to offer his amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

Mr. BOND. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: to limit the application of the liability provisions of the Act if the General Accounting Office finds that the application of such provisions has increased the number of uninsured individuals)

On page 179, after line 14, add the following:

SEC. 9. ANNUAL REVIEW.
(a) IN GENERAL.—Not later than 24 months after the general effective date referred to in section 401(a)(1), and annually thereafter for each of the succeeding 4 calendar years (or until a repeal is effective under subsection (b)), the Secretary of Health and Human Services shall request that the Institute of Medicine of the National Academy of Sciences prepare and the appropriate committees of Congress a report concerning the impact of this Act, and the amendments made by this Act, on the number of individuals in the United States with health insurance coverage.

(b) LIMITATION WITH RESPECT TO CERTAIN PLANS.—If the Secretary, in any report submitted under subsection (a), determines that more than 1,000,000 individuals in the United States have lost their health insurance coverage as a result of the enactment of this Act, as compared to the number of individuals with health insurance coverage in the 12-month period preceding the date of enactment of this Act, section 302 of this Act shall be repealed effective on the date that is 12 months after the date on which the report is submitted, and the submission of any further reports under subsection (a) shall not be required.

(c) FUNDING.—From funds appropriated to the Department of Health and Human Services for fiscal years 2002 and 2004, the Secretary of Health and Human Services shall provide for such funding as the Secretary determines necessary for the conduct of the study of the National Academy of Sciences under this section.

Mr. BOND. Mr. President, it is clear that all of us agree that protection for patients of health care delivery systems is very important. Patients need to get quick, independent second opinions when their insurance company or HMO denies them. Women need unbiased access to obstetricians or gynecologists. Children need pediatric experts making decisions about their care and providing them care. Patients need to go to the closest emergency room and be confident that their insurance company or HMO will pay for the care.

Those things ought to be understood as the basis on which we all agree. To say, as some have, that those of us on this side of the aisle are not concerned about patients is just flat wrong.

I have spoken in the past about patients who are employees of small businesses, who are the families of small business owners. They do not get patient protection because they cannot afford insurance. They cannot even be patients because they do not have the care.

We need to figure out how we can assure patient protections, get more people covered by health care insurance, health care plans, HMOs, and give them the protections they need within those plans.

This bill is about balance. As we provide patient protections, we need to be concerned about how much we increase the cost of care because at some point these costs will start to bite. At some point, employers, particularly small business employers, will not be able to offer coverage to anyone so their employees cannot be patients. In addition, as prices go up, the employees or patients may not be able to afford their share of the insurance costs. The result: Fewer people with care.

It is generally understood that for every percent increase in the cost of health care, we lose about 300,000 people from health care coverage. It is a fact of life. No matter how we try to insulate, no matter how much we expend and gesticulate and obfuscate, we cannot repeal the laws of economics. When something gets more expensive, you are going to get less of it. The question is, How far do you go? How much is too much?

The folks on my side of the aisle have said we need to give patients basic, commonsense protections, such as the ones I mentioned in the beginning: independent second opinions; access to emergency care, access to OB/GYN care, access to pediatric care, and many more. But that is not enough. Some of our friends on the other side have insisted on going forward. In addition to the common provisions, they want to add an expensive new right to sue that poses a huge threat to runaway health care costs.

There are some people who are very interested in the right to sue. Those people are called trial lawyers, and they do really well at bringing lawsuits. They get a lot of fees from winning those lawsuits, particularly if the
June 26, 2001

CONGRESSIONAL RECORD—SENATE 11845

judgment is high and they have a good contingency fee contract. At the same time, these costs ultimately can deny people health care coverage because to pay these judgments, the companies involved have to raise costs.

As we have debated this legislation, I have tried to focus on what patient protections are needed and, on the other crucial questions: What will this bill do to employers’ ability to offer health care insurance to their employees? How many health care patients might lose their coverage? I know that one of this version of the bill do not want to talk about the people across America, the patients, who will lose their health insurance because this bill as a whole, including the new lawsuits, may cost more than a million people their health care coverage. We need to talk about it. We need to focus on it because over 1 million people who have health insurance today—men and women who are getting their annual screenings, mothers-to-be who are receiving prenatal care, and parents whose children are getting well-baby care—will be losing care because of this bill, and how many of them can we afford to lose?

We will be losing health care coverage for seniors who are taking arthritis medicines, men and women who are being treated with chemotherapy or kidney dialysis, families waiting for a loved one to have heart bypass surgery. These are the lives that will be disrupted, even devastated, as a direct result of this bill. Whom will they have a chance to sue then? What good is the right to sue a health plan if I have lost my health plan in the first place? It does not do me much good.

I have said in the past we know there are going to be people who lose their insurance coverage as a result of this bill. In the past several days, I have brought to the Chamber a contract that keeps a running total of the number of patients who will lose their health care coverage because their employers have told us that if the provisions of the current McCain-Kennedy bill with the right to sue employers are enacted into law, they will have no choice but to drop health care. They want to provide health benefits to their employees. They are important benefits, they are attractive benefits and ensure the employees get good work from employees, and they take care of the patients who are the employees and the families of the employees.

These small businesses have told me if they are faced with lawsuits from one or two employees or dependents who do not get the right kind of health care, they cannot afford to take that risk. Health care costs are too much already. Health care costs are going up. They are seeing more and more of the costs burdening their ability to provide health care.

In the past, I have read from letters from small businesses in Missouri that are fearful of losing health care coverage for their employees and their employees’ dependents. These are real life examples of people who have written in, saying they are very worried about the provisions of the McCain-Kennedy bill.

I read yesterday a letter from a fabricator company. Today I have a letter from an accounting group. They are a small business, currently insuring four employees at a cost of $1,935 a month; they pay 100 percent of the premiums. Last year, their health care coverage costs went up 21 percent. They note there has been a steady increase over the past few years. They have had to pass these costs on to clients to cover the charges for their employees. At this rate, providing health insurance to employees in the future may take away one of their employees’ Bill of Rights proposed by Senator KENNEDY expands liability and results in employers being held responsible for medical court cases, they will certainly be forced to cancel this employee benefit.

They go on to say:

I do small business accounting every day. These are small mom-and-pop businesses that cannot exist if they are treated in the same way as large businesses with regard to employee benefits. Sometimes Congress forgets that mom-and-pop businesses of America are employers, not just names in an address book we write to every day, in and out, just to maintain a moderate lifestyle. While they are not poor, they are not employers in the same sense as major corporations.

Please help us keep our businesses and try to provide for our employees.

That is one thing we need to remember. As we look at things on a grand scale and look at large employers, we cannot forget the mom-and-pop businesses providing a living for mom and pop, their families, their employees, and their employees’ families. We want all of them to be able to get good health care coverage. We want them to have rights that they can exercise if the HMO or the insurance company denies them coverage. But we certainly don’t want to throw them out of health care coverage.

Here is another company in Missouri.

They write:

I have been doing business in Missouri for over 15 years and have been providing health insurance to my employees since November of 1993. At that time, counting myself, I insured four employees at an average cost of $73.30 a month. I now insure five at a monthly cost of $390.60, with the same high deductible coverage. My cost has increased over 250 percent, way beyond the rate of inflation and way beyond the growth of my business. I have had to absorb this increased cost in the bottom line. This bill Senator KENNEDY has now in committee looks like a disaster ready to happen. I am not alone as a small business owner wondering if I might be able to continue to offer this benefit to my employees in view of the rising costs of the policies. If I were legally responsible for medical court cases, I just toss in the towel and close my business.

Those are the mom-and-pop operations, the small businesses, the life-blood of our economy, the dynamic, growing engine of our economy that provides the jobs and the well-being and goods that everybody wants to talk about and everybody loves as the small businesses. But we need to be sure we are not pricing them out of business or even costing them the ability to cover their employees’ health care costs.

Right now, our toll is 1,895 Missourians losing their health care coverage from what their employers have told us about the burdens they expect from the McCain-Kennedy bill. One can argue they may be wrong. I can make an argument based on reading the pages I have read before of exceptions under which an employer can be sued. But they would be well advised if they cannot stand the costs of a lawsuit, to give up their health insurance. You can argue about it one way or the other, but 1,895—almost 1,900—employees will be thrown out of work, according to their employers who have communicated directly to us, if this measure is unamended and goes to the floor.

What are we going to do about it? I hope we can work on the liability sections. I have heard people want to compromise. I haven’t seen that compromise yet. So I will offer a very simple proposal. My amendment says one simple thing: At a certain point, enough is enough. If more than one million Americans lose health care coverage because of this bill, the most expensive part of this bill, the right to sue, should be reevaluated.

The beautiful thing about this amendment is, all of the disagreements that exist about how much the McCain-Kennedy bill will increase costs and how many people may lose coverage won’t matter. We will never get an agreement on this floor. We will argue about it one way or the other, but 1,895 employees in a small business may as well just toss in the towel and close their business.

Health economists assure this analysis can be done, they say, over a 2-year period, and we will look at employment patterns, inflation, health regulations, or policy measures other than patient protections and other factors that affect employers and employees’ health care coverage. Economists can estimate how many people lose coverage due to a major piece of health legislation. The Institute of Medicine has more than enough expertise and brain power at its disposal to do this.

The amendment I have proposed says not later than 24 months after the effective date, and thereafter for each of the 4 succeeding years, the Secretary of Health and Human Services shall ask the Institute of Medicine of the National Academy of Sciences to prepare and submit to the appropriate committees of Congress a report concerning the impact of the act on the number of
individuals in the United States with health care insurance.

Then, if the Secretary, in any report submitted, determines more than one million individuals in the United States have lost their health insurance coverage as a result of the enactment of this act as compared to the number of individuals with health insurance coverage in the 12-month period preceding the act, then the liability section shall be repealed, effective on the date 12 months after the date on which the report is submitted. The Department of Health and Human Services is authorized to get funding for the conduct of the study, the National Academy of Sciences.

It is very simple. If it throws more than a million people out of health care coverage, then we repeal the liability section. Then Congress comes back and looks at it and says: Can we do a better job? We don't have to rely on any estimates or predictions. We can find out how many people have lost their coverage. I think a million people is a lot. But if anything we do is going to have a cost. What constitutes too much? I propose that at a starting point we say that 1 million people losing coverage is too much.

The two key issues in this debate are: First, access to care; second, access to coverage.

Patients need access to care without undue managed care interference. Thus, we need a patient protection bill. That is the external appeal. That is the right to see certain specialists, and the very important provisions we have in it. But the patients also need access to coverage. Are we going to get more people covered? Are we going to knock more people out of coverage?

The ability to sue HMOs sounds nice. But at what price? If the ability to sue HMOs and the ability to sue employers is too high, and if the price is 1 million Americans who lose coverage, then that price is too high.

I urge my colleagues to accept this amendment. I believe it is one way to make sure that we have a fail-safe mechanism to make sure that we observe that basic principle of medicine: first do no harm. I think a million individuals losing health care coverage is harm. That is why I suggest that we should agree to the amendment.

Mr. President, I yield the floor. I suggest the quorum. The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GREGG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GREGG. Mr. President, I rise in support of the excellent idea of the Senator from Missouri.

One of the big concerns that has been heard expressed throughout this entire debate has been the effect especially of the plethora of lawsuits which would be created under the present bill as it is structured on employers, especially small employers, and their willingness to continue to offer health insurance to their employees.

The real issue for most people is, first, do they have health insurance. When someone goes to find a job, one of the key conditions that most people look at is if that job has a decent health insurance package that is coupled with it. This is an extraordinarily big problem for not only people working at high-level jobs but especially people who work at entry-level jobs and in between.

You can take large employers in the retail industry or large employers in the manufacturing industry. In all of these areas, employees see as one of their primary benefits the pay they receive, obviously, but additionally the fact that they have good health insurance from their employers.

Then with the smaller employers, people who run small restaurants or small gas stations, or small mom-and-pop manufacturing businesses, the people who work for those folks also appreciate that fact that they might have a health insurance package that is coupled with their employment. This is especially true for families. I don't think there is anything a family fears more than having a child get sick and not having adequate coverage, and not being able to get that child into a situation where they can be taken care of, or alternatively having their savings wiped out by the need to do something to take care of that child who has been sick, or a member of the family.

Quality insurance is absolutely critical. We should not do anything that undermines the manufactur- ers, of employers, of small businesspeople, of mom and pop operators to offer insurance to their employees. It should almost be a black letter approach. Instead of saying we are going to function in a vacuum in this Chamber, where essentially we throw out ideas that we think are good but don't know what is going to happen, this is essentially saying, all right, if we think we have ideas that are good, we are going to hold those ideas to accountability.

We heard the Senator from Massachusetts talking about accountability in another section of this bill. He brought up the education bill, which we talked about for the last 7 weeks before we got to this bill. And the issue was accountability. Does it work? The education bill we passed has language in it that essentially took a look at what had happened in order to determine what would occur in the future. What Senator Bono has suggested is that we do that under this bill. It is a very practical suggestion. He is saying if a million people lose their insurance, then we will put the liability language in the bill on hold until we can straighten it out. Actually, it would be reversed.

The practical effect of that is, I presume, Congress would come back and say, listen, we didn't intend to have a million people lose their insurance. Our purpose in this bill was to give people more rights, not to give them less rights. You give people less rights if they lose their ability to have insurance.
CONGRESSIONAL RECORD—SENATE

June 26, 2001

So by taking this language we will be in a position of being sure that what we are doing in this Chamber, and what we are doing in the isolation of the legislatie process—although we get input, we never really see the actual events—will have a positive impact. We will know that if it isn’t having a positive impact, there will be a consequence. The consequence is that part of the bill, which has created the negative impact—throwing people out of their insurance—will be held up or stopped or sunsetted until we can correct it.

So the Senator’s concept in this amendment makes a huge amount of common sense. It is truly a commonsense idea. I guess it comes from the “show me” State. Nobody has used that term today on this amendment. I do not think they have it. I think it is right that way. This is a classic “show me” amendment. This says: Show me how the bill works. If the bill does not work, OK, we are going to change it to the idea of having this trigger, which establishes whether or not the bill is positive or whether the bill is negative. If the bill is negative—“negative” meaning over a million people losing their insurance as a result of the effects of this bill—then we sunset the liability language.

I do think it is important to stress that this amendment does not sunset the whole bill. It just focuses on the liability provisions within the bill, which sections I have severe reservations about and have referred to extensively in this Chamber, which I think are going to have unintended consequences which will be extraordinarily negative on employees in this country where a lot of people are going to lose their insurance.

This amendment just goes to that section of the bill. It doesn’t go to the positive sections of the bill that there is general agreement on. It does not even go to those sections of the bill where there isn’t general agreement on, such as the scope issues of States’ rights or the contract sanctity issue, for that matter.

But it does go to this question of, if you have people losing their insurance because their employers are forced to drop their insurance because it has become so expensive as a result of the liability provisions of this bill, then, in that case, where that happens to a million people—a million people, by the way, is essentially the population of the State of New Hampshire. It is not the population of Missouri, but essentially we have 1,250,000 people in New Hampshire, so we are talking about not an inconsequential number of people; it is pretty much the whole State of New Hampshire. So it is a reasonable threshold.

If a million people lose their insurance because employers cannot afford it, because the liability costs have driven them out of the ability to ensure their employees, then we should stop that; we should end that liability language and look at it as a Congress and correct it.

So I congratulate the Senator from Missouri for offering this classic “show me” amendment. It is very appropriate that it has been offered by the Senator from Missouri, from the “show me” State. It makes incredible common sense. I also would say it is a “Yankee commonsense” amendment. So we shall claim it for New England also, I join enthusiastically in supporting this amendment.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DAVENPORT). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SANTORUM. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. SANTORUM. Mr. President, I rise in support of the Bond amendment. I commend the Senator for standing up and trying to mold patient protection legislation to comply with a fundamental principle that he has repeated many times today: The first order of business in medicine is to do no harm. And building on this principle, as I continue to iterate so many times when I come to this Chamber to speak, we cannot afford to ignore what I believe to be the No. 1 problem in health care today: the fact that we have anywhere between 42 and 44 million people who do not have health insurance.

I will state again for the record—and I am happy for anyone to come forward and tell me different if there is not one thing in this bill that increases the number of uninsured people in America, not one thing. This is a pretty good-sized bill. It has 179 pages to it. Not one page, not one paragraph, not one sentence, not one word will cover one additional person in America.

For many of the people who are the greatest critics of the health care delivery system in this country, the paramount feature of which they are most critical is the number of uninsured in our society, which is increased by people around the world against America’s health care system; it does not have to do with quality of care. I think everyone will agree that America pretty much sets the gold standard in terms of the quality of care delivered to patients. I think most people say, yes, the best health care in the world is available here in the United States. But the critics around the world will say, it may be the best system but you have 42 to 44 million people in this country who are not insured.

Do you think the first health care bill we are considering here in the Senate should consider what most people see as the greatest problem with America’s health care system? Most people in this country who wonder why there is concern are considering. But this bill doesn’t do that. Interestingly enough, what does this bill do? It provides patient protection. That is great. I am for that. There are a group of people in this country who worry that their health insurance plans that are regulated solely by the Federal Government, who have very few patient protections afforded to them because they are not covered under State patient protection laws. So we should pass a Federal Patients’ Bill of Rights to cover those people. I am all for that, and we should have adequate protection.

What does this bill do, what the Senator from Missouri is trying to really focus on, is it does a whole lot of other things that will cause at least one million more Americans to become uninsured. Now, I am pleased that the President of the United States has vowed to veto this legislation should it come to his desk in its present form for signature. But if for some reason it is enacted into law, maybe over the President’s objections, this will result in millions more being uninsured.

You can put all the benefits aside. Let’s assume this is the greatest patient protection bill in the history of the world, that as a result of this bill, patients will be supremely protected, a notion, of course, with which I take issue. I don’t believe that will occur. But let’s assume it does. The result of this bill will be millions more uninsured. In particular, if the liability provisions of this bill are enacted, which allow employers to be sued—and that is really the issue that is at heart of the Bond amendment, if it allows employers to be sued, to practically an unlimited extent—you won’t have a million or 2 million people lose insurance as a result of this bill. You will have tens of millions of people who will lose their insurance. Why? Do I say I am against employer liability because I love employers? No. Employers are nice people. Employees are nice people. They are all nice people. The question is, What is the effect of holding employers liable? The effect of holding employers liable is employers who voluntarily provide health insurance as a benefit, will stop providing that benefit because it will jeopardize their entire business. If they can be sued for a decision that is made with respect to a benefit they voluntarily provide one of their employees, the provision of which they did not set in their business, they are simply going to stop providing that benefit.

That is what the Senator from Missouri is trying to get at. If we cause, as a result of the employer liability provisions, and some of the general liability provisions, and some of the contract provisions, which basically allow outside entities to rewrite contracts in
litigation and in appeals, if we open up this Pandora’s box of problems for employers to continue to provide insurance to their employees, employers will do what employers must do: first, protect the survival of their business. And this will be a direct threat to the survival of their business.

What is now a pleasant benefit that you can provide to your employees and something that you can help to attract employees with by providing good health care insurance will become a serious liability risk that a business simply cannot afford to take.

The Senator from Missouri is saying, very simply: We have a great patient protection bill here, but we have the very real potential of having a tremendous downside, in really hurting people. I am very sympathetic about all the cases being brought forward, about the need for patient protection. I think you will find fairly universal agreement on this side that we want to provide those protections. But the first protection should be the possession of insurance in the first place. If we deny them that protection, all these other protections don’t matter, really, if they lose their insurance. This could be a great bill, but if you don’t have insurance, then this bill doesn’t help you. In fact, it can hurt you because it can cause the loss of your insurance.

What the Senator from Missouri is saying is: Let’s go through, and we will work on some more amendments. We will try to get this thing honed down until we have a good patient protection bill. If we can’t fix the liability provisions, which I don’t know whether we will be able to or not, at least let’s say that if the liability provisions are what we believe they are, in other words, problem is two-fold: first the potential of devastation to millions or at least a million people in losing their insurance, then we should have a trigger.

You are seeing all of these kinds of comments by folks who are supportive of this bill and supportive of the liability provisions in the bill saying: Hey, this isn’t going to hurt anybody. We are not going to cause any problems with this. No, no, no, employers aren’t going to drop their coverage. Health care costs are not going to go up. Millions more won’t be uninsured.

They will make that statement and have made that statement over and over again. Pine. They may be right.

What happens if they are wrong? What happens? What happens if past experience is any guide, if we are right and millions do become uninsured? Should we have to wait for an act of Congress for this body generally to re-allocate that we made a mistake and have to come back and go through this whole legislative process to repeal the problem here? Should we have to wait for that? Or should we just simply have a trigger that says, if we made a mistake, if we made a mistake, then we are going to immediately cancel that portion of the bill that deals with recognition that we have a problem of a million uninsured.

As the Senator from New Hampshire said, a million people is a lot of folks, a lot of children, a lot of families. It is a lot of people who are going to go without health care. If what we really care about is providing good, quality health care, the first thing we should care about is to get them an insurance policy in the first place.

One of the things that strikes me most about this bill is that references as to how we are going to go out and get the HMOs. These HMOs are a bunch of bean counters who don’t care about people. There is all these horrible cases about HMOs.

My understanding is that the liability provision that allows you to sue your employer, that allows you to sue your insurance company, does not just apply to HMOs. It applies to PPOs. It applies to insurance contracts. Obviously, if it is a fee-for-service contract and there is no limitation on what provider you want to go to, that is one thing. But in most insurance plans today that are not HMOs, there is some limitation of some sort, certainly some limitation on procedures that are covered. But that is not what is talked about here, folks. What we talk about, when they talk about this liability provision, they are talking about these nasty HMOs.

What they don’t tell you is that it ain’t just the nasty HMOs that can be sued under this bill, it is any insurance company who provides any insurance product and any employer that provides any insurance product.

Oh, that is a different story, isn’t it? You don’t hear them up there railing against those nasty fee-for-service plans or those nasty PPO plans because they don’t poll as well as going after those nasty HMOs. But this isn’t just about nasty HMOs, this is about all insurance products. There is no way out of this liability provision unless, of course, you just want to say to your employees: We will cover everything. Doesn’t matter what you want, where you want to go, we will just pay for everything you want. Of course, we all know what an exorbitant cost of that would entail, and so this is neither practical or realistic.

The point is, this bill has serious consequences for millions of people who are on the edge, whose employers are sitting there right now saying: Well, I have a 13 to 20 percent increase in my premiums this year. The economy is flattening out a little bit. I am looking forward to it. I will tighten my belt a little bit more, and we will continue to provide health insurance to our employees. Then this bill comes along, which will increase costs more and poten-
Mr. GREGG. If the Senator will yield, I advise Members that it is very possible we will have a vote around 6 o'clock. So Senators should be aware of that.

Mr. SANTORUM. As I was saying, I know there are many people in this Chamber who believe a single-payer health care system is the best way, the most efficient way, the most compassionate way—to use these wonderful, glorious terms—to provide health insurance in this country. Obviously, I disagree, but it is a legitimate point of view. I think we should have that debate.

We had that debate in 1994 with the Clinton health care proposal, and we had a good debate on the floor of the Senate about the kind of health care delivery system we should have. But it was a deliberate debate about how we can change the health care system by a direct act of the Congress. The problem with this legislation is that we are going to severely undermine one health care system, which is a health care system that is principally funded through employees, contributions, and we are not going to replace it with anything.

You see, as many of my colleagues well know, if employers stop providing health insurance, then people are going to have to pay with their aftertax dollars and buy health care, and the costs will be prohibitive. If you don’t believe me, I would ask any of my colleagues to drop their federal health insurance plan today, and to endeavor to purchase health insurance with aftertax dollars. It is very difficult.

One of the things I hope to accomplish—and maybe we can work on this in this bill—is to create refundable tax credits for those who do not have access to employer-provided health insurance by a direct act of the Congress. The government offers for employer-provided health insurance. We give a deduction for the business. In other words, if I am an employer and I provide health insurance to my employees, I get to deduct the cost of that off of my earnings, my income. We also subsidize it on the other end. If you are an employee and you have employer-provided health insurance, you don’t have to pay taxes on the money that your employer uses to purchase that insurance. In other words, let’s say it is a $5,000 family policy. That is a benefit to you. That is compensation to you. It is $5,000 of insurance costs that your employer pays for you, but you don’t have to pay taxes on it. It is tax-free compensation to you. So, in that sense, we subsidize you by not taxing you on that benefit. So the employer gets subsidized, and the employee gets subsidized.

But if you are an individual who does not have access to employer-provided health insurance, you have to take the money that is left after you pay all your taxes—after you pay Social Security taxes, after you pay income taxes, after you pay local taxes, and Medicare taxes—and then you can take your money and try to buy health insurance.

That is a pretty rotten system. If we are going to do anything about the problem with the millions of uninsured in this country, we are going to have to start treating people who don’t have access to employer-provided insurance the at least as well as we do with those who do have it. None of that is in this bill, there is no tax equity.

I will say it again. There isn’t one paragraph in this bill that will increase the number of insured in this country. There are, unfortunately, pages and pages and pages and pages in this bill that will make it more and more and more people losing their insurance. But we can mitigate that—or at least a big part of it—if we adopt the Bond amendment.

The Bond amendment says if we have a problem, let’s not wait for an act of Congress to admit our mistake. I know those who are listening might find this hard to believe, but sometimes Congress is a little slow in admitting we made a mistake. Sometimes we don’t own up to the fact that it was our fault. I know some within the sound of my voice will find that to be almost an incredible proposition on my part—that somehow Congress doesn’t immediately come in and say, yes, we understand we made a mistake; we are sorry America, we blew it. Everything I said the year or two before about how this wasn’t going to cause a problem, you are right; it did. My mistake; we are going to repeal this.

I just ask my colleagues, when was the last time that happened? I know some in this room will remember the last time it happened. My recollection is that it happened back in 1988, when it came to Medicare catastrophic coverage. Congress tried to pass catastrophic prescription drug coverage for seniors, and quickly found out that seniors really didn’t like what Congress did. Seniors rose up and screamed and hollered, and within a year or so—I wasn’t there at the time, but I recall Congress reversed it. That was about 12 years ago. I can’t think of any instance since and, frankly, I can’t think of anything before that.

So let’s just assume—I think it is a pretty safe assumption—that the people who are saying that this liability provision will not cause a problem are wrong. They will be in very good company if they go on to insist that they aren’t wrong in the future—that even though we may have evidence of millions of people saying this liability provision, somehow or another they will avoid blame and will point to something else that caused this problem, not the liability provisions. So it will be some sort of contest here as to whether we even take up this issue again.

The Bond amendment avoids all that. It says, look, if the GAO says this provision, the liability provision, has caused a problem of causing more than million additional uninsured, then that part of the bill sunsets, the rest of the bill stays in place. Patient protections stay in place.

Patient protections stay in place. It affects just the liability provisions. The internal-external reviews stay in place so there is patient protection. What does not stay in place are the provisions that are causing massive damage to millions of American families.

I am hopeful, No. 1, we can fix these liability provisions because we should not pass a bill that is going to cause this kind of severe dislocation, this kind of trouble for millions of American families. We should not consciously do harm to people, particularly when we understand it is the No. 1 problem facing our health care system today, which is the lack of insurance for 42 to 44 million people.

We should not do this. We should not pass flawed liability provisions. I know the Senator from New Hampshire and Senatorators on both sides of the aisle are trying to see if we can get a good provision. But should we not get a good liability provision, the Bond amendment is a very prudent stopgap measure so as to ensure that we do not go down the road of making what is the worst problem facing health care today even worse.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. BOND. Mr. President, I thank my friend from Pennsylvania for making a very compelling argument. I very much appreciate his support because we are talking about something that should be of concern to every American who wants to be sure that they and their families are covered by health insurance. If you price it out of range and lose your health care, it does not matter how many independent reviews might be provided in the law. If you do not have a plan, they do not do you any good.

The basis for our trigger, our safety valve, is, let’s just see if this bill has a cost. We say that the Institute of Medicine within the National Academy of Sciences can figure it out. It has been indicated they can rely on work that has already been done by the General Accounting Office, CBO, and other congressional bodies. But for constitutional purposes, the ultimate responsibility of this study has to be in the executive branch, and that is why it is in the Institute of Medicine. We know from our work with the GAO and CBO the kind of format, the kind of approach that can be taken. We move
that function into an executive branch area. We say if this bill throws more than 1 million people out of their workplace health care coverage or their own health care coverage, then we sunset the most expensive part, the liability part.

I said earlier that the general rule of thumb is that 300,000 people will lose their health care coverage if health care costs go up 1 percent. I ought to be a little more specific and explain something. As I understand it, when the costs of this bill are calculated, it is impossible to determine how many dollars will be added to the health care costs from the liability provisions themselves. Basically, the additional responsibilities that go into the bill—setting aside the liability questions—the Congressional Budget Office estimated a previous and substantially equivalent form of this bill would raise private health insurance premiums an average of 4.2 percent. That comes from the mandates in coverage, external review, and all those other things. This 4.2 percent would mean that over 1 million people will be thrown out of work. But that does not deal with the number of people who would lose their health care coverage because of the exposure to liability or because of the costs of liability judgments.

We probably will not have liability judgments in the first couple of years. It will take some time for cases to work their way through the court system. But you can bet if a couple of juries come in with the billion-dollar judgments that some juries are coming in with now, those costs are going to have to be factored into the health care premiums for everybody, whether it is an employer, whether it is the employee—paid or unpaid—and there are going to be a lot of people who are not going to be patients because they are going to lose their health care coverage.

Then there are those, such as the small businesses I have referenced from Missouri, who say: I cannot take the chance; I cannot put my business at risk of one of these multimillion-dollar judgments, a tort action or contract action—tort action most likely—brought against me as an employer because I provide health care insurance or health care coverage or a health care plan; I am going to drop the plan. It will take some time for cases to work their way through internal review, and all those other things.

We probably will not have liability judgments in the first couple of years. It will take some time for cases to work their way through the court system. But you can bet if a couple of juries come in with the billion-dollar judgments that some juries are coming in with now, those costs are going to have to be factored into the health care premiums for everybody, whether it is an employer, whether it is the employee—paid or unpaid—and there are going to be a lot of people who are not going to be patients because they are going to lose their health care coverage.

CONGRESSIONAL RECORD—SENATE

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To clarify that independent medical reviewers may not require coverage for excluded benefits and to clarify provisions relating to the independent determinations of the reviewers. Beginning on page 36, strike line 20 and all that follows through line 8 on page 36, and insert the following: (C) No Coverage for Excluded Benefits. Nothing in this paragraph shall be construed to require an independent medical reviewer to require that a group health plan, or health insurance issuer offering health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage and that are disclosed under subparagraphs (C) and (D) of section 121(b)(1) and that are not covered regardless of any determination relating to medical necessity and appropriate adjudication of the nature of the treatment, or an evaluation of the medical facts in the case involved."

On page 37, line 16, strike "and".

On page 37, line 25, strike the period and insert "and".

On page 37, after line 25, add the following: 

"(i) the definitions used by the plan or issuer of medically necessary and appropriate, or ‘experimental or investigational’ if such definition is the same as either—

(a) 'medically necessary and appropriate' or 'experimental or investigational' if such definition is the same as either—

(A) ESTABLISHMENT OF NEGOTIATED RULEMAKING COMMITTEE AND FACILITATOR. The amendment is as follows:

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 818

Mr. KYL. Madam President, I ask unanimous consent the order for the quorum be rescinded.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KYL. Madam President, I ask unanimous consent the order for the quorum be rescinded.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. KYL), for himself, Mr. NELSON of Nebraska, and Mr. NICKLES, proposes an amendment numbered 818.

Mr. KYL. Madam President, I ask unanimous consent reading of the amendment be dispensed with.
Mr. KYL. Madam President, this amendment is offered on behalf of myself and Senator NELSON. It is an amendment that deals with the definition of "medical necessity" under the bill and is intended to provide a safe harbor definition consistent with the plan requirements. I should also say this amendment is also offered on behalf of Senator NICKLES. I apologize to my colleague from Oklahoma.

First, let me offer some general views on S. 1052, the Kennedy-McCain Patient Protection Act, and then I will discuss this amendment.

As you know, President Bush has reiterated his intention to veto this legislation because, in his view, it "would encourage costly and unnecessary litigation that would seriously jeopardize the ability of many Americans to afford health care coverage." None of us wants that result. As a result, we are trying to do our best to work with the sponsors of the bill to make some changes that would make it palatable to both the President and to most of us in this Chamber.

My concerns include the fact that it will undoubtedly raise premium costs due to new lawsuits and increased regulation, that it will undermine the States' traditional role of regulating the health insurance industry, and make employers who voluntarily provide health care coverage to their employees vulnerable to frivolous lawsuits, and that it will violate the terms of the contract between the employer and the health plan. This latter issue is one the Nelson-Kyl-Nickles amendment is intended to address.

Under S. 1052, the external reviewer is "not bound by" the "medical necessity" defined in their plan document. And there is no substitute definition provided, so there is really no standard for review.

Let me put in context what this means. What we have provided for here is a method by which people will actually get the care they believe they have contracted for and deserve. The object is not to create a lawsuit to try to pay the money after the fact for some injury they suffered but, rather, to get the care in advance. That is what this should all be about.

So we have a review process by which first somebody within the company, and then an external reviewer, takes a look at the case and says: All right, this is what the contract means. This is what medical necessity means under this circumstance as called for under the contract, and therefore the patient is entitled, or is not entitled, to this particular procedure.

This review process is supposed to occur quickly so that the patient receives the care he or she has contracted for and deserves under the circumstances.

And for an external reviewer to know whether or not a particular procedure or treatment is called for, there has to be some standard by which to judge that. The Presiding Officer and the other lawyers in this body will know that anytime you ask some reviewer to determine whether or not something has to be provided some standard upon which that reviewer can base a decision.

The bill right now contains no standard, and it needs such a standard. Our amendment supplies that standard. We believe it supplies a very fair and reasonable standard. The language in S. 1052 gives the external reviewer a free hand to disregard the definition of "medical necessity" contained in the contract, and, as I say, supplies no substitute definition.

As in all of the bills, this external review requirement is the last process prior to going to court. But, as I said, the external reviewer is "not bound by" the contract's key definition of "medical necessity" or "experimental and investigational." As a result, the external reviewers can simply make up their own definition of "medical necessity."

Private contracts negotiated between the parties—employers, insurers or, or insurers and individuals—would become virtually meaningless in this circumstance, and the financial obligations of the health plan could become totally unpredictable.

The plan or insurer could become obligated to pay for items or services based on definitions outside the contract, even potentially including contractually excluded items that were deemed to be medically necessary by the reviewer. The "not bound by" provision, therefore, would have the effect of eliminating the ability of the parties to negotiate the key terms and conditions of health insurance contracts.

Madam President, in addition to vitiating legal contracts, the "not bound by" language would have the following negative effects.

First, inconsistent standards: The standards used by reviewers would vary with each review panel and with each case. In most cases, the plans are trying to create some degree of uniformity with this legislation, but under the bill you could have the potential for a wide variety of arbitrary decisions because of the lack of a standard.

Second, quality of care: The mere threat of contract nullification could prompt some plans to pay for all claims regardless of the cost and the impact on the quality of patient care.

Solvency and stability: The use of unpredictable outside definitions of medical necessity will impose costs for unanticipated treatments not reflected in actuarial data used to determine the amount of the health care premium.

And finally, cost increases: Solvency concerns would result in increased cost for employers and increased premiums for employees.

The net result of that, of course, will be to remove more people from the rolls of the insured.

Under S. 1052 as written, these contracts for care between the parties and often approved by State insurance regulators, will be, voidable, not by a judge or a court of law but by an unrelated nonjudicial third-party reviewer.

This will undermine the principles of the contract as well as due process.

So, as I said, to address this problem, we have sponsored an amendment that would allow the plan to adopt a widely accepted safe harbor definition of medical necessity as its contract definition. If a plan utilized this safe harbor definition, then the external reviewer would be bound by it when hearing a patient's appeal of denial of coverage.

Safe harbor definitions contained in legislation are basically at three different levels. First, we take the definition from the Federal Employee Health Benefits Plan that currently covers about 73 percent, as best we can calculate it, of the employees under the Federal Employee Health Benefits Plan. That's 6 million Federal employees and Members of Congress are covered by this definition.

It is important to recognize—I think some of our friends on the other side misunderstood and thought we were offering an amendment that had been offered a couple years ago. I want to make it very clear—this definition is not the FEHBP or Office of Personnel Management definition for managed care plans, or HMO plans.

This definition is the definition for the fee-for-served plans. As a result, it is a more strict definition. The insurance companies are going to have to provide a higher quality of care under this definition than they would under the HMOs that provide some coverage to roughly one-fourth of the people served under the FEHBP program.

So, first of all, we have this definition. I will actually read it in just a moment.

Secondly, there are going to be some States that already have a binding State statutory definition. There are 13 of them. Of course, a legally binding State definition of medical necessity would apply to claims filed in those
June 26, 2001

CONGRESSIONAL RECORD—SENATE

We think it represents a reasonable compromise on the one hand between requiring an external reviewer to be bound by a too narrow definition in a "rogue" plan contract and, on the other hand, affording a majority of the plans that operate in good faith the opportunity to adopt a widely accepted safe harbor definition of medical necessity to which the external reviewer would be bound.

Madam President, we think this is a good compromise. It is clearly important for us to include some kind of definition in the legislation. We had hoped that the sponsors of the legislation would be willing to work with us to include this definition. So far they have declined to do so. But I am hopeful that we can continue to talk with them, and perhaps we can reach some understanding in the bill to substitute this definition for the lack of a definition in the legislation right now.

At this point, I yield time to the co-sponsor of the amendment, Ben Nelson, the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. NELSON of Nebraska. Madam President, I rise today to offer, along with my colleague and friend from Arizona, Senator Jon Kyl, an amendment to protect the sanctity of health insurance contracts, to provide certainty and clarity so that both the issuer and the insured can know what coverage they have.

This amendment will preserve a patient's right to receive the health benefits that they paid for while keeping insurance premiums affordable. In more colloquial terms, this amendment is what is needed to see that the people who work for the Federal employees. It is obviously a good standard to use.

There are three other aspects of it. I will read each of the three. They deal with very specific situations. Not primarily for the personal comfort or convenience of the patient, the family, or the provider; No. 4, not part of or associated with scholastic education or vocational training of the patient; and No. 5, in the case of inpatient care, cannot be provided safely on an outpatient basis. That would enable the treatment to be provided on an outpatient basis if it could be done.

It is a very straightforward definition. It is one that has been used literally hundreds of times. It covers a significant portion of the 6 million people covered, and we think it is a good definition to be included in this legislation.

But before my support for a Patients' Bill of Rights is misconstrued as an "anything goes" approval, I want to be clear that the Senate should approve a Patients' Bill of Rights, I think that some improvements are justifiable. And right now, we have the opportunity to make those much-needed improvements which will ultimately increase the effectiveness of the Patients' Bill of Rights.

I believe the bill needs to carefully consider matters such as the issue addressed by this amendment pertaining to the sanctity of health insurance contracts. And I hope that the sponsors of the legislation will look very favorably on this matter and that we will be able to work out an arrangement or agreement to get it included as part of the bill.

Currently this amendment would ensure that patients receive the care that they are entitled to under the plans to which they subscribe. External reviewers would be required to assess treatment options based on the contract that exists between the patient and the plan.

Patients would be entitled to the care outlined as a provided benefit within the contract that exists. External reviews would not be able to circumvent the contract to force employers to expand coverage for any particular patient unless the patient was entitled to the care as specified by the care contract.

This will help keep down the high cost of health care and, at the same time, will enable employers to continue to provide their employees with the best care possible.

More importantly, this amendment will provide three safe harbors for employers with respect to protecting them against unnecessary litigation over treatment. While patients will have the right to sue under this bill, this amendment will more clearly define the parameters by which treatments can be determined as "medically necessary" and thus will provide a safeguard of medically necessary standards for employers that administer their own health plans.

The McCain-Edwards-Kennedy bill contains something that I think would currently require external reviewers to abide by the standard for the determination of medical necessity included in the bill, but it doesn't bind the reviewers by the insurers' definitions for medical necessity. This is problematic as it relates to the existing contract between patient and provider and provides a great deal of unclarity and uncertainty.

So to remedy this situation, this amendment proposes to identify three separate and distinct sources of definitions that employers could choose to use in the contract by which reviewers will be bound. The three options that we create for the plans are:
One, a definition that plans are required to use by State law. This would provide the previously existing and any newly revised plans to use a definition put forward by the State.

Second, any definition used by a plan which is codified by the language in the fee-for-service agreement that is currently covering maybe 50 to 75 percent of the Federal employees under the FEHBP, or the Federal Employees Health Benefits Program, would be used by the plans covering those who would be covered under these ERISA plans. What that means is, if it was good enough for Members of Congress and Federal employees, this certainly ought to be good enough for everyone else.

Three, a definition that is to be developed through negotiated rulemaking. This option requires the Secretary of Labor to develop a rulemaking committee that will seek public comment to develop a definition of “medical necessity.” In other words, State laws will be recognized and respected. Secondly, there will be a definition that is now included as a fee-for-service definition in the current Federal Employees Health Benefit Program. And in the event that a rulemaking process is negotiated through the Department of Labor, the rulemaking committee will seek public comment to develop a definition of what is “medical necessity.”

The negotiated rulemaking committee, the third item of this three-pronged approach, will consist of at least one individual representing each of the following groups: Health care consumers, small employers, large employers, physicians, hospitals, other health care providers, health insurance issuers, State insurance regulators, health maintenance organizations, third party administrators, the Medicare Program, the Medicaid Program, the Federal Employees Health Benefits Program, the Department of Defense, the Department of Veterans Affairs, and the Agency For Health Care Research and Quality. That is quite a list of individuals for public comment and public input.

This committee would have until 1 year after the general effective date of the bill’s implementation to propose a rule to the Secretary. The Secretary, then, would be required to publish the rule within 30 days of the receipt.

Madam President, our goal is to ensure that all patients have access to all treatment options available under their plans. We need to provide this access without undermining the integrity of the contract between the patient and the provider. Without some standard for “immediate medical necessity,” these objectives would be impossible to obtain. Both parties are entitled to certainty and predictability. This will provide it. Without passage of this amendment, there will be both uncertainty and a lack of predictability and neither party will be benefited.

I ask my friends and colleagues to consider this amendment as one that will improve the McCain-Edwards-Kennedy HMO reform bill. I ask for their support.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Madam President, I reluctantly have to rise in order to oppose the amendments of my good friends on the issue of medical necessity. I outlined earlier in the day the basic judgment and basic history of how we reached the language that we have included in our bill.

First, let us look at what will be the standard that is in both the McCain-Edwards bill, as well as in the Frist-Breaux bill. Effectively, both treat this particular issue of medical necessity the same. This is a result of the fact that this issue had been debated 21/2 years ago when we considered the Patients’ Bill of Rights here and in the House. The question is: Did we did to define the test on medical necessity during that period of time. What we resolved is to permit, at the time of the external review, the kind of test that we have included in our language here and in the Frist-Breaux language. This was actually the language which was agreed to in the conference last year, a conference that never resulted in an overall outcome of the legislation. Nonetheless, we had agreed on a handful of different areas of dispute. That was agreed to by my colleagues, Phil Gramm, Don Nickles, myself, and others, after a good deal of negotiation.

It seems wise to continue that particular proposal because basically this is what we are doing. At the time of the appeal of any of these medical necessity issues, we are permitting for the standard of determination in our bill, on page 35: “The condition shall be based on the medical condition of the participant. That is obvious. No. 1, what is wrong with the patient? And then it talks about “valid, relevant, scientific evidence and clinical evidence, including peer-reviewed medical literature and findings, including expert opinion.”

Basically, the reason for that is to allow for the possibility that we find out there are new kinds of discoveries, new kinds of techniques, new kinds of treatments for various health conditions. In order to not use a stagnant kind of proposal, we included that language. This language which was agreed to is supported by the American Medical Association and other medical groups.

So in the legislation that we have here in the McCain-Edwards proposal, which I support, and the Frist-Breaux proposal, which others including the President of the United States support, and in the agreement that was made by Republicans and Democrats alike, we agreed effectively to this language. This agreement occurred after considering the different kinds of proposals. It raises questions of why we are today attempting to alter that particular proposal.

The argument is, first of all, that we can offer three different options. One would be that the administration can propose an administrative commission that can make some recommendations about what that standard would be.

That may work out, but it may not work out very well if we have an administration that is not as sympathetic to the protection of patients’ and consumers’ rights that we are. It is an agreement that we have included in our language here and that was agreed to in the conference last year, a conference that never resulted in an overall outcome of the legislation.

The argument is, first of all, that we can offer three different options. One would be that the administration can propose an administrative commission that can make some recommendations about what that standard would be.

That may work out, but it may not work out very well if we have an administration that is not as sympathetic to the protection of patients’ and consumers’ rights that we are. It is an agreement that we have included in our language here and that was agreed to in the conference last year, a conference that never resulted in an overall outcome of the legislation.

I understand the basic thrust of this legislation is to establish minimum standards. If States want to have higher protections for consumers, they are welcome to do it. What we are trying to do is ensure that all Americans, all American families are protected.

In the area of scope, all Americans being protected—actually, every Republican proposal that was considered in the House of Representatives included all Americans—we were attempting to ensure that there was going to be a minimum standard. However, we can use another standard, such as the good Federal employee standard to which the Senator just referred.

It is interesting, though, that the Office of Personnel Management does not use the Federal employee standard on their reviews. What we do is something very similar to what we have done. They permit the doctor to make the ultimate decision and not be bound by some definition. The reason for this is because they do not believe that that should be the restrictive definition for all appeals. As the Senator stated, we have all been pressed with the different proposals. I have had a chance to talk to my friend and colleague, Senator NELSON, on a number of different provisions. From personal experience, I can tell that this is a Senator who has spent a good deal of time on this legislation and has been willing to spend a great deal of time visiting.
Mr. EDWARDS. Mr. President, I start by thanking my two colleagues, the Senator from North Carolina, Mr. EDWARDS, Mr. President, I start by thanking my two colleagues, the Senator from Arizona, my good, dear friend from Arizona, for his work on this issue, and now my friend from Nebraska, with whom I have had occasion on this specific bill to work many days and many hours. As the Senator from Massachusetts has suggested, he has great expertise in this area, both in his time as insurance commissioner and his time as Governor. He and I have worked together on a number of issues, such as employer liability which we will be offering an amendment on hopefully tomorrow. We have talked about a number of other issues, such as the scope of the legislation, and medical necessity is another issue in which the Senator has been actively involved.

I specifically thank him for his work on this issue on behalf of the people of Nebraska whom he represents. He has been extremely diligent and involved in this very important issue of the Patients’ Bill of Rights and patient protections. I thank him very much for all of his work and I will continue to work with him. He has had terrific ideas all the way through the discussion.

As to this specific amendment, I announce to my colleagues that we have negotiated during the course of the day with other Senators besides the sponsors of this amendment and have reached an agreement on a compromise that we believe accurately and adequately reflects a balance between recognizing the sanctity of the contract language while at the same time giving medical reviewers the flexibility they need to order care in those cases where the care needs to be ordered.

Tomorrow we anticipate an amendment being offered by Senators BAYH, CARPER, and perhaps others, that will reflect the results of those negotiations. We feel very pleased we were able to reach that issue with some of our colleagues.

For that reason, we will not be able to support this particular amendment, but I believe our amendment goes a long way toward addressing the same issues while trying to address with this amendment. Their work is helpful and productive, and we appreciate it very much.

Tomorrow morning we will be offering the results of the work we have done with Senators BAYH, CARPER, and others which, as I indicated, properly reflects the balance between the importance of the language of the contract and showing deference to that language while at the same time recognizing that in some cases the medical reviewers will need some more flexibility to do what is necessary for a particular family or for a particular patient.

Mr. KENNEDY. Will the Senator yield?

Mr. EDWARDS. Yes.

Mr. KENNEDY. Will the Presiding Officer let us know when we have 5 minutes remaining?

The PRESIDING OFFICER. The Chair will do so.

Mr. KENNEDY. As I understand it, and I can be corrected, under one of the provisions, HHS establishes a board. At some time the board tries to work out the definition, but we do not know how that will work out, what the framework will be, or how many patients, consumers, and HMO personnel will be on the board. That board will have a meeting, and they will work out some definition of “medical necessity” which creates a degree of uncertainty.

Second, we have questions about the States, some of which have adopted various criteria about what is medical necessity.

Third, we have the Federal employees health program, which, as I mentioned, is not the standard which is used in the Office of Personnel Management. They don’t use that. They use a standard much closer to what we have. Even on that standard, many cancer groups are very concerned about possible restrictions on palliative care, care which is enormously important to cancer patients. We have heard from a number of cancer organizations about their serious concern regarding this particular point.

On the other hand, they are in support of the language we have included in the Edwards bill.

First, we know we have something that the American Medical Association, the medical professionals, patients, the doctors, and the health care delivery system have said is a good standard. Our opponents offer a standard that may turn out to be fine in the future but we don’t know. And secondly, as another standard which has serious problems with the cancer community because it raises questions, doesn’t the Senator agree with us, and we ought to use what is now agreed to by Republicans, by Democrats? Most importantly, ought we not use the standard endorsed by those within the medical profession? If this standard does not work, we will have the opportunity to take a look down the road in terms of altering and changing. Is that a preferable way to proceed?

Mr. EDWARDS. I agree with the Senator.

As the Senator knows, the legislation offered by the Senator, myself, and Senator MCCAIN, this specific language is supported by the medical groups from around the country involved with this issue on a daily basis that have a first-hand understanding of what works and what doesn’t work. We have been working with those groups to fashion this language. That is the reason that language exists. We know from the American Medical Association and all the health care groups around the country that they support the language we have in the bill.

That having been said, I say to the Senator in order to try to address some of the concerns raised, my colleagues who are the sponsors of this amendment have been working with a group of Senators today to fashion an alteration to this language that makes it clearer that the contract language will be respected but balances that against the need for flexibility with the review panel. I believe we will have an amendment tomorrow to offer on that subject.

I end by thanking my colleagues from Arizona and Nebraska. While I will not be able to support their amendment, we understand the issue. We believe our bill is adequate on this issue, but we will have an alternative to propose tomorrow. Ultimately the point of this, of course, is to protect patients, make sure patients get the care they need. I think the language in our bill plus the language in the amendment will accomplish that purpose.

I yield the floor.

Mr. NICKLES. Mr. President, I rise in support of the amendment and I...
urge my colleagues to support it. I will make a couple of comments about some of the statements that were made.

I appreciate Senator Edwards' comments saying we are willing to have an amendment tomorrow to try to fix part of the problem. We heard that earlier today when we had an amendment to exempt employers.

There were statements made by many proponents of the language, employers can't be sued under this bill. That is a direct quote. So earlier today we tried to make sure employers couldn't be sued, and people voted against the amendment. But we heard: Well, there is an amendment coming that will protect employers.

We understand this bill language, and there is a section that deals with employers that white-collar workers shall be excluded from liability, and then there is an exception. As a matter of fact, on page 144, causes of action against employers and plan sponsors are precluded, paragraph (A).

Paragraph (B) says:

CERTAIN CAUSES OF ACTION PERMITTED.—
Notwithstanding subparagraph (A), a cause of action may arise against an employer or other plan sponsor.

We tried to make sure employers would be exempted, and unfortunately that amendment didn't pass. But we did hear assurances from some of the sponsors, we have an amendment and we will protect employers. But, yes, employers can be sued because obviously the Gramm amendment didn't pass. So I just mention that.

We raised the point, and it was raised well by Senator Kyl from Arizona and Senator Nelson of Nebraska, that said we are not bound by contracts, and there is all kinds of language here dealing with contracts. You don't have to have coverage for excluded benefits. That sounds very good, but there is language "except for," language that says you have to cover benefits that are excluded or expressly limited under the plan contract. Then I heard my colleague from North Carolina say we will have an amendment tomorrow to take care of that.

There are several major provisions with this bill that are wrong, one of which is the liability is far too generous and what the contracts don't mean anything. So we are wrestling with the liability.

We tried to exempt employers today and were not successful. Now we are working on contract sanctity. I hope all Democrats and Republicans will look at the language that is in the bill and realize how far it goes and think about what is getting ready to happen. I use for an example President Clinton's appointment of a bipartisan commission to make recommendations on this issue. This is the report:

The right to external appeals does not apply to denials, reductions, or terminations of coverage or denials of payment for services that are specifically excluded from the consumer's coverage as established by contract.

In other words, the report to the President by the Advisory Commission on Consumer Protection and Equality in Health Care says if it is excluded in the contract, you don't have the right to even have an appeal. That is not appealable. In other words, if the contract says don't cover it, it shouldn't be covered.

Yet in the language in the bill, did we adhere to the President's commission? No. If you look at the language on page 35 of the bill:

NO COVERAGE FOR EXCLUDED BENEFITS.—
Nothing in this subsection shall be construed to permit an independent medical reviewer to require that a group health plan, or health insurance issuer offering health insurance coverage, provide coverage for items or services for which benefits are specifically excluded or expressly limited under the plan or coverage in the plain language of the plan document.

If it stopped there, it would be great, but it doesn't stop there, if you read the additional language:

and which are disclosed under section 121(b)(1)(C) except to the extent that the application or interpretation of the exclusion or limitation involves a determination described in paragraph (2).

In other words, you don't have to pay for an excluded benefit "except for:"

1. Wait a minute, you have a contract, and a medical provider says, I will provide this list of contracts and I will charge so much per month to provide these contracts, and this bill says we are not going to overturn that exclusion. That is what the first part of the paragraph says. And the second part of the paragraph says "except for:" and you have to ask, well, what do you mean "except for:"? Start reading; except for medically reviewable decisions, and it turns out anything is a medically reviewable decision.

So anyone can say it is medically reviewable if the denial is based on medical necessity and, appropriately, denial based on experimental or otherwise based on evaluation of medical facts. The net result is, bingo, anything is covered. You have a lottery.

I heard my colleague from Massachusetts—and I have great respect for him—say we had an agreement last year and basically Senator Nicklaus from the conference committee agreed to this language.

We did not. I will make a few comments to get specific on the language. We came close in a lot of areas. But I will tell you colleagues, on things we did agree to that do not appear in the bill today.

I have a document, agreed-to elements of the external appeals section, dated April 13, 2000, 6 o'clock. We made an agreement were not in the underlying bill. I don't think you can say we agreed to one provision—whops, we forget to say we agreed on a lot of other things.

We agreed that a patient should have access to independent reviews for any denial of a claim of benefits, No. 1, if the foundation of such item exceeds a significant financial threshold or, No. 2, if there is a significant risk of placing the life, health, or development of the patient in jeopardy.

I see in the bill we have before us that there is no such thing as a financial threshold. This clearly violates the so-called agreement that was entered into last year.

Further, the language regarding the "denial creates a significant risk of placing the life health or development of the patient in jeopardy" is not in the bill before us. It is not in the McCain-Kennedy-Edwards bill.

It is interesting; that language was in the original Senate bill, S. 6. It was also in the President's report on quality. But it is not in the bill that we have before us. It is not in the McCain-Kennedy-Edwards bill. My point is, before we had included some language to try to make sure we would have some protections and that was disregarded.

In addition, last year we agreed to a $50 filing fee to discourage frivolous filings. I see this particular agreement was also absent from today's version. The bill before us has a $25 filing fee. One of the reasons why we had a $50 filing fee was because we did not want frivolous filings. We didn't want people to say:

I will appeal. Maybe I will get lucky; maybe I will have extra benefits, more coverage; maybe I can lay a predicate for lawsuits in the future. What do I have to lose? If you had a little more of a threshold, it may discourage frivolous suits.

We also agreed at one time to consider expert opinion if it was by independent, valid, and reliable scientific and clinical evidence. The language we have before us on page 35 talks about the standard for determination. It says we are going to review:

... valid relevant scientific evidence and clinical evidence, including peer-reviewed medical literature and findings including expert opinion.

But it did not include everything we had agreed to in the past.

What I do recall is last year we did agree that before Clinton maintained there was a goal to maintain the sanctity of the contract and not establish appeals which allowed for the coverage of any excluded benefit. In fact, the very basis for today's debate is ensuring that patients are not denied promised benefits. It is not a debate to create a process to resolve and order unpromised benefits.

I think the language we have before us in the McCain-Kennedy-Edwards bill does just that. It is the legislative process to make sure people could get unpromised benefits, to get items that in some cases are contractually prohibited to be covered benefits.
That is a stretch. Federal employees do not have that; Medicare does not have that. And I don’t have it. There is a list of covered benefits, there is also a list of excluded benefits. I will give an example and I will put this in the RECORD. This is from CHAMPAVA. It has a list of about 25 items that are excluded, specifically, from VA coverage. I will mention a couple of them: acupuncture, air conditioners, humidifiers, exercise equipment, eyeglasses, and contact lenses.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. NICKLES. I ask unanimous consent to proceed for another 6 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The Senator may proceed.

Mr. NICKLES. The health club memberships, hearings aids or hearing aid exams, homemaker services, hypnosis, massage therapy, physical therapy consisting of general exercise programs, plastic and other surgical procedures primarily for cosmetic purposes, smocking cessation programs, and several others.

My point is, here is a Government plan for veterans that has specifically excluded items that should not be covered. I will venture to say every private health care plan has excluded items as well. Under the bill we have before us, it says you don’t have to cover excluded items except for—and then it opens the door. That, to me, says do not pay any attention to the contracts. Contracts do not mean anything.

What is the net result of that? If people who have contracts are not bound by the contracts, then the cost of providing health care is going to go way up. There is no legal definitive way of knowing how much the coverage is going to cost because it is not defined coverage. There is nothing you can bank on.

I compliment my friends and colleagues from Arizona and Nebraska for their leadership in putting this amendment together. This amendment is equally as important—maybe not quite as easy to understand but very much as important—for containing the cost of health care as anything we have considered so far. Are we going to allow people to have contracts? Are we going to live by those contracts? Or are we going to take the language in this bill and say: Contracts? We don’t care. Are we going to violate what the President’s Commission on Health Care said? They said you should not cover items that are excluded from contracts. We are just going to ignore it as does the underlying McCain-Kennedy-Edwards bill? Are we going to have a medical necessity definition that is the same thing Federal employees have on their fee-for-service plans, which is a quality plan which most all of us are in and most all of us are happy with? Isn’t that good enough? Can’t we give some assurances that those are things that people can rely on?

Mr. NICKLES. I compliment my colleague from Nebraska, Senator NELSON, for his expertise. He brought this to my attention when I was discussing this legislation. He was exactly right. He said this has to be fixed. We are working to fix it. We can’t just say do not pay any attention to the contracts, ignores contracts, no telling how much it can cost and also, incidentally, have liability?

You could have, under the McCain-Kennedy bill, a situation where somebody doesn’t provide a service that is contractually promised and they can be sued because some expert might determine it is medically necessary. This expert might be a acupuncturist specialist and they might determine that what you need to solve your back problem is acupuncture and you have your contract, as VA’s, says you do not have to cover it, you have to cover it because that is a solution and under the bill it says expert opinion. So maybe it should be covered.

If you think that’s a stretch, it is not a stretch. You can find experts to say almost anything in the medical field and sometimes in the legal field.

My point is this bill undermines contracts in a way in which I think we should be very, very wary. We should not do this. My colleagues from Nebraska and Arizona have come up with a good fix, a good solution. I appreciate that the Senator from North Carolina said he is amenable to fixing this problem. The way to fix it is to pass the Mr. NELSON amendment. I urge my colleagues to vote for this amendment tomorrow morning.

I thank the indulgence of my colleagues I yield the floor, and ask unanimous consent the CHAMPAVA list be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OTHER MEDICAL SERVICES . . . WHAT IS NOT COVERED

(Not a.Inclusive—see Specific Exclusions)

Acupuncture.

Air conditioners, humidifiers, dehumidifiers, and purifiers.

Autopsy.

Aversion therapy.

Biolfedback equipment.

Biofeedback treatment of ordinary muscle tension or psychological conditions.

Chiropractic service.

Exercise equipment.

Eyeglasses, contact lenses, and eye refraction exams—except under very limited circumstances, such as corneal lens removal.

Foot care services of a routine nature, such as removal of corns, calusses, trimming of toenails, unless the patient is diagnosed with a systemic medical disease.

Health club memberships.

Hearing aids or hearing aid exams.

Homemaker services.

Hypnosis.

Items that do not require a prescription (except for insulin and other diabetic supplies which are covered).

Massage therapy.

Naturapathic services.

Orthotic shoe devices, such as heel lifts, arch supports, shoe inserts, etc., unless associated with diabetes.

Physical therapy consisting of general exercise programs or gait analysis.

Plastic and other surgical procedures primarily for cosmetic purposes.

Radial Keratotomy.

Sexual dysfunction/inadequacy treatment related to a non-organic cause.

Smoking cessation programs.

Transportation services other than what is described for ambulance service under What Is Covered in this section.

Weight control or weight reduction programs, except for certain surgical procedures (contact HAC).

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 12 1/2 minutes remaining.

Mr. KENNEDY. I yield myself 4 minutes.

Mr. President, we have had a good discussion coming back, once again, to what I think is one of the fundamental aspects of this bill. We have gone through this. I have taken the time to go through this evening what the criteria were going to be for the medical officer at the time of the external appeal. Those criteria have been supported today by the overwhelming majority of the medical profession because they understand that, with those criteria, we are going to get a medical decision that will be in the best interests of the patient. That is really not changed.

What is being suggested are three different options that might be used. The one we offer has the support of the medical community. It has the overwhelming support of the medical community. That is the first point.

With all respect to my friend and colleague from Oklahoma, regarding the provisions, when it comes down to what is and is not going to be permitted, clearly if there is an exclusion in the contract there will not be the right of the medical officer to alter and change that. Let me give an example on the issue of medical necessity under the criteria that we have, where it might very well be interpreted by a medical officer that a particular HMO excluded cosmetic surgery.

The question came down to a child that had a cleft palate, and the medical officer said: Well, they are excluding cosmetic surgery, but a cleft palate for a child is a medical necessity. That medical officer, I believe, ought to be able to make that judgment. Under the language that we have, that medical officer would be able to do it.
If, on the other hand, the HMO had put in the contract that they will not permit a medical procedure for a cleft palate, then clearly that would be outside of the medical judgment, and outside of medical necessity.

That is the example that is really reflected in the language which we have included. But the fact is those are exceptional cases. They are not unimportant. But the most important aspect of the case is that the judgment that is going to be made by the medical officer is going to be based on the medical needs of the particular patient and the best medical information that is available.

That is what has had the broad support. There may very well be a new commission established under HHS made up of a number of different stakeholders which may come up with some recommendation that may be a better one. That might be so. If that is the case down the road, maybe we can have the opportunity to consider it and bring some change to it. But as we have heard earlier, and as we have seen, the Federal employees standard that is used is not permitted to be used in terms of appeals procedure. The reason, evidently, is because they believe the medical officer ought to be able to use the criteria which brings into play the latest information and the latest scientific information that is available, and the best information that would be helpful to that medical profession.

Finally, there is the question. What are we going to do? Are we really going to ultimately let their judgment and decision be made by the medical professional with enough flexibility so that they can bring to bear medical judgments on this, and also consider the best information that is available to them, and only that best medical information available to benefit the patient?

I think we have a good process and a good way of proceeding. That is why I believe that we ought to stay the course with what is included in the legislation and resist the amendment.

Mr. President, I know we have another amendment that we are going to debate this evening. If there are others who want to speak on this, we welcome them.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, if this side has run out of time, I ask unanimous consent to speak for what time I might consume. But I don’t expect it will be over 10 or 12 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. I don’t intend to object. Is this in favor of the amendment?

Mr. GRASSLEY. Yes. I am sorry I didn’t say that. I am in favor of the amendment.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, I want to address what I believe is a very fundamental, fatal flaw in the legislation as written to how the bill treats health plan contracts, and the precedents that this treatment sets for all contracts, not just those between health plans and employers.

As currently drafted, the bill states that specific definitions and terms in health plan contracts can be entirely thrown out in favor of another definition made up by a third party charged with reviewing a plan’s decision to deny care.

This basically invalidates all contracts between health plans and employers and makes them non-binding.

Putting the terms of health plan contracts on the chopping block undercuts the very purpose of the health plan contract.

If these contracts are not binding, the health plan will have no way of knowing what standard it should follow in making coverage decisions, the employer will have no way of knowing what costs will be, and the patient will have no way of knowing what kinds of items and services are covered.

In short, the contract won’t be worth the paper its printed on.

How do you do business without a contract? Quite frankly it’s almost impossible to imagine doing business at all without a binding agreement.

The Kennedy-McCain bill forces managed care plans to do business in a way that no other industry is forced to do—by that I mean without a binding and valid contract.

Now, let me stop here for a minute and talk about these health plan contracts.

First, contracts between health plans and employers are actually negotiated with all parties involved.

Employers, usually with the help of unions and other worker representatives, bargain for specified coverage in order to meet the unique needs of different employees. Every contract is different.

What’s more, these contracts are typically reviewed and approved by state insurance regulators before they become effective. The whole process is deliberative, time consuming and, all told, is truly a “meeting of the minds.”

The Kennedy-McCain bill says, in effect, to heck with that meeting of the minds. The bill gives unrelated third parties reviewing patient complaints unprecedented authority to take out contract terms that were bargained for in good faith and literally throw them in the trash.

This authority to override contracts at any time and for any reason goes far beyond the authority given even to judges, and the most important instances are obliged to apply the terms of a contract.

And where judges must explain their rationale in opinions and are generally accountable as public officials, these third party reviewers as outlined in the Kennedy-McCain legislation are private citizens and are not accountable to anyone at all.

I do believe that every patient should have a right to an independent, external review of a health plan’s decision to deny care. But that right cannot be without some rationality and accountability.

Third parties charged with reviewing patient complaints should have broad discretion to thoroughly assess, and even overturn, a plan’s decision so long as that authority is exercised within the four corners of the contract.

Kennedy-McCain authorizes third parties to veer far, far away from those four corners, and to tear up the contract altogether.

I encourage my colleagues to think about what it would be like if the contracts that they live by everyday contracts for life insurance, home mortgages, even car leases could be torn up and rewritten by an unaccountable third party at any time.

Moreover, I encourage my colleagues who know small business owners or who were themselves small business owners, to think about doing business without the security of a binding contract.

I believe that those of my colleagues who do think about this will come to understand that the consequences of allowing contract terms to be thrown out could be disastrous, and that all contracts, whether involving a health plan or not, deserve the deference that our laws traditionally give them.

I urge my colleagues to reject the Kennedy-McCain approach to health plan contracts and to support the Kyl-Nelson amendment—which is an approach that honors both the integrity of the contract itself, as well as the intent of the parties to it. In the end, it is the patient who wins under this amendment.

Thank you.

The PRESIDING OFFICER. Under the previous order, the Senator from Colorado is to be recognized to offer an amendment.

AMENDMENT NO. 817

Mr. ALLARD. Mr. President, I call up amendment No. 817.

The PRESIDING OFFICER. The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Colorado [Mr. ALLARD], for himself, Mr. BOND, Mr. SANTORUM, and Mr. NICKLES, proposes an amendment numbered 817.

Mr. ALLARD. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To exempt small employers from causes of action under the Act)

On page 148, between lines 23 and 24, insert the following:
June 26, 2001

CONGRESSIONAL RECORD—SENATE

11859

Mr. ALLARD. Mr. President, I am of-

ferring an amendment to S. 1052 that would prevent frivolous, unnecessary,

and unwarranted lawsuits against small employers. That is what my

amendment is all about. It exempts small employers that have 50 or fewer

employees in their firm. I think this is an important provision. I plan on

sharing with my colleagues in the Senate Chamber some of my experiences as

a small businessman.

I have had the experience of having to start my business from scratch. I

worked with fewer than 50 employees. Believe me, from personal experience, I

know what happens when you are a small employer and you have too many

mandates on your business and you do not have all the staff and accountants

and lawyers in your firm to help you along, and you have to hire an attorney

or accountant outside your business. I know the impact it can have as far

as cost is concerned.

Believe you me, I know what it feels like to have taxes increased on you as

a small businessman because you are in the dollar game; every dollar makes a

difference on what your bottom line is going to be.

Contrary to what many Members of the Senate believe, under S. 1052, does not

exempt small employers from lawsuits. Under S. 1052, employees could sue their employers when an

employer—and I quote—"fails to exercise ordinary care in making a decision." That is from page 140 of the

bill. Mr. President, 72 percent of small employers in the United States provide

health care that Americans need. They do not have to provide that coverage,

but they choose to on their own. The Senate should honor that. The Senate

should respect that. S. 1052, however, undermines that.

Allowing small employers to be liable for health care decisions would un-
duly burden a small employer. It would force the small employer to spend

costs, as I mentioned earlier, by more than 4 percent. This is above and be-

yond the additional 13-percent increase in health care costs that employers expe-

rienced last year. Now, as we move forward into another year, they are look-

ing at somewhere around a 13-percent increase.

I have a recent survey that was jointly put together with the consulting

firm Deloitte & Touche and the industry of business and health that reveals that

health premiums increased more than 12 percent last year and are expected to increase 13 percent in both

2001 and 2002. So this is a burden with which small employers are faced.

With the passage of this bill, the Congressional Budget Office has estimated it would increase premiums another 4

percent. That would have a very adverse impact on small employers. We have heard it is likely we will have an additional 1 million uninsured with the passage of this Patients’ Bill of Rights. I suggest to the Members of the

Senate, a large part of that million is going to come from the very small employers, those with 50 employees or fewer.

S. 1052, as it is currently written, would cause further increases in health

care costs for American families, workers, and businesses across the board. The Congressional Budget Office has estimated that the previous version of S. 1052, which is substantially identical to the current bill under consideration, would increase the Nation’s health care costs, as I mentioned earlier, by more than 4 percent. This is above and be-

yond the additional 13-percent increase in health care costs that employers expe-

rienced this year. Moreover, this year’s increase would be the seventh annual in-

crease in a row.

If S. 1052 passes, many small employers will stop providing health care for

their employees and the number of uninsured Americans will increase. The

country cannot afford this. The small businesses of America cannot afford this. The country cannot afford S. 1052 in its current form.

We should know the costs of providing health care to employees. As I

mentioned earlier, for 20 years I practiced veterinary medicine and provided health care insurance to my em-

ployees. I can speak from personal experience: Providing health care was costly. If I were still practicing veteri-

nary medicine as a private employer, I could not begin to imagine the burden S. 1052 would place on me, my employ-

ees, and everybody’s families involved in my business.

I believe we should pass a Patients’ Bill of Rights, not a lawyers’ right to

sue. Our bill should focus on expanding access to affordable health care for the
I don’t want to see us lose that by moving constantly towards larger businesses and a corporate-type of society. The backbone of small business is important to this country. I hope Members of the Senate will join me in making sure the small employer, those with 50 employees or less, is exempted from the liability provisions in S. 1052. I seek for their support of this amendment.

The PRESIDING OFFICER. Who yields time? The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I thank the good Senator for his amendment and his thoughtful explanation of it. I will oppose the amendment. I will state briefly why this evening.

Basically, we have a number of definitions of small business. We are talking about a definition of 50 employees or less. That is about 40 percent of the workforce. It might be as high as 43 percent. So with this amendment, effectively we are undoing 40 to 43 percent coverage for all those employees and employers. If we believe in the protections of this legislation, that is a major exclusion.

What are those protections? Those protections are very simple. They are very basic and fundamental. For example, doctors ought to be making the decisions on medical care and not the HMOs. The employees who work in these businesses and where the HMOs are selling these policies are being hurt just as those who are above the 50. Excluding them from these kinds of protections is unacceptable.

Their children are going to be hurt. Their children should be able to get the kind of specialty care that others can. The wives of those who work in those places and factories ought to be able to get into clinical trials if they have breast cancer. They ought to be able to get the prescription drugs they need. If a drug is not on the formulary, they ought to be able to get the continuity of care they need. This care protects expectant mothers from losing a doctor during the time of their pregnancy, if the employer drops the coverage with an HMO. These are very important kinds of protections we are discussing.

If we accept the Senator’s amendment, we are effectively excluding 40 percent of the population.

The Senator makes a very good point about cost, particularly for small business. I am always amazed in my State of Massachusetts. You go down to 15, 20 employees and still the small businesses are providing health care coverage. What is happening, they are paying an additional 40 percent or more in premiums every single year. This occurs because they are not able to get together with other kinds of groups and get the reductions that come from the ability to contract with large numbers of employers. They are getting shortchanged under circumstances. Many of the firms they work with are in the business one year and out of the business a second year.

The point the Senator makes about the particular challenge for small employers to offset health coverage for their employees is very real. We ought to help them. There have been a number of different proposals which I have supported and others have supported in terms of deductibility and helping those companies. That is an important way of trying to get about it. But the suggestion that is underlying the Senator’s presentation is that the cost of this particular proposal is what is really going to be the straw that breaks the camel’s back.

He talks about a 4-percent increase in premiums. That is a percent a year, as we have learned. The alternative percent is around 3 percent. It is 5 percent over the period of years. The CBO points out that the cost of the various appeals provisions and the liability provisions are eight-tenths of 1 percent over the 5 years. And in the alternative bill, it is four-tenths of 1 percent.

I mentioned earlier in the day that the largest CEO salary of an HMO was $54 million a year, and $350 million in stock options. This constitutes a benefit package of $490 million. This adds $1.25 to every premium holder, small business premium holder, $4.25 a month. Our proposal adds $1.19 a month. That is just one individual. I am sure, in this case, he does a magnificent job. But when you are talking about the cost of this, we have also brought in the fact that the average income for the 10 highest salaried HMO CEOs is $10 million a year. Their stock options are in the tens of millions of dollars a year. The profits are 1 percent. They profit $3.5 billion a year in profits. And still they ratcheted up their premiums 12 percent to maintain their profit margin. They made $3.5 billion.

Yet they cannot make sure that we are going to be able to provide protections for their employees. They cannot make sure that they are not going to overrule doctors in local hospitals and community hospitals, in the urban hospitals and in rural hospitals trying to give the best medical attention to the children and the women and their workers? We can’t say that we want to provide that degree of protection for them?

I just can’t accept that. I would welcome the opportunity to work with the Senator in the area of small business. But that isn’t what we are about this evening. The Senator’s amendment, as I said, would effectively exclude 40 percent, 43 percent of all the employees. It makes the tacit assertion—more than tacit, explicit assertion—that the increased premiums that are going to be
I think that those 40 percent of American workers are entitled to coverage and protection.

(Mr. CORZINE assumed the Chair.)

Mr. DURBIN. Will the Senator yield for a question?

Mr. KENNEDY. Yes.

Mr. DURBIN. I listened to the Senator from Colorado present his amendment on behalf of small businesses and employers. I recall, before my election to Congress, running a law office and buying health insurance for myself and my employees. I recall the experience when I went to one of the larger health insurance companies to cover my employees. So the belief that small businesses only do business with small insurance companies I am not sure is an accurate description. I think that small businesses often do business with larger insurance companies to cover their employees. So the people who are losing are not the small business owners but the small business employees who don’t get the benefit of the same protections that we are trying to guarantee to all Americans. Is that the Senator from Massachusetts sees it?

Mr. KENNEDY. The Senator is quite correct on this. That, of course, raises competitive situations. You are going to have competition on the dumbing down of protections for employees, rather than establishing a standard in competition in terms of the quality of the product. It is a race to the bottom, so to speak.

Mr. DURBIN. So this will, in fact, limit the protections for employees of small businesses across America so that if you go to work for a small business, you just won’t have the right to specialty care, to the drugs your doctor thinks are necessary to cure your disease, the right to a specialist in a critical circumstance, access to emergency rooms—all the things we are trying to guarantee in this bill. What the Senator from Colorado does is say we are not going to provide those protections if you are one of the 40 percent who works for a small business in America. Is that what the Senator understands?

Mr. DURBIN. The Senator is correct. I will make the case tomorrow, but it is my judgment that you will find that there are greater abuses in the areas of these smaller companies, smaller HMOs, appealing to smaller companies, rather than some of the larger HMOs which are tried and tested and have the reputation within a community to try and defend. We have had many that do a credible job, but you are going to find, I believe—and I will get to this more tomorrow morning—that the workers who are the most vulnerable are going to be workers in these plants.

Mr. DURBIN. May I ask another question of the Senator from Massachusetts?

Mr. KENNEDY. Yes.

Mr. DURBIN. While I listened to the Senator from Colorado explain the increase in premiums, he suggested premiums had gone up 12 percent last year, and they anticipated they would come up 13 percent nationwide this year and the following year, which suggested that in a 3-year period of time, the Senator from Colorado tells us, we are going to see a 38-percent increase in health insurance premiums.

Going back to a point earlier, how much would the Kennedy-Edwards-Mc Cain bill increase premiums each year over the next 5 years if we are going to have 38 percent in 3 years, just the natural increase in health insurance, how much will this legislation we are debating add to that bill?

Mr. KENNEDY. Well, according to the Congressional Budget Office and OMB it will be less than 1 percent a year over the next 5 years—much less, closer to 4 percent. So, effectively, it is 4 percent.

As we pointed out earlier in the debate, under the alternative proposal that the President supports, it is effectively 3 percent over 5 years. As the Senator is pointing out, it is somewhat less than 1 percent a year against what we are debating add to this bill.

Mr. DURBIN. I think that really addresses the issues raised by the Senator from Colorado. First, we are saying to employees of small businesses that you are not going to receive the protection of others with health insurance. Secondly, even though the cost is less than 1 percent a year against what the President supports, it is 4 percent.

I thank the Senator from Massachusetts.

Mr. KENNEDY. I thank the Senator for his helpful comments.

Mr. REID. Will the Senator yield?

Mr. KENNEDY. Yes.

Mr. REID. I know the Senator is in a rush. I just want to make two brief comments. First of all, to make it plain English so somebody from Searchlight, NV, where I was born, understands it, the Congressional Budget Office says S. 1052 would result in a premium increase of only 4.2 percent over 5 years. The cost of the average employee would be $1.19 per month.
This would be 37 cents per month more than the legislation that really gives no coverage at all on the other side. And as one last thing to my friend. We were here on the floor earlier today. We know one of the things that is trying to be injected into this is that this is a terrible thing for small business. I read to the Senator earlier today—and I am going to take 1 minute to read a communication I got from a small businessman in Nevada today:

As a small business owner—Less than 50 employees—and as a citizen, I urge you to support the upcoming bill commonly known as the “Patient’s Bill of Rights.” I also would like to state that your amended version of the McCain’s version of the bill. If the HMOs can afford to spend millions on lobbyists and advertisements, then they can afford to do their job to prevent the lawsuits in the first place . . . . I am willing to pay to know that what I am purchasing from my HMO will be delivered, not withheld until someone is dead, then approved postmortem.

As a believer in the market and freedom, I feel that we need a better national approach to health care. As the richest nation in the world, as the only real superpower, why do so many Americans get Third World levels of health care, even when they have insurance? Thank you for your time. Michael Marcum, Reno, NV.

This is a small businessperson. He doesn’t have millions of dollars to run TV ads, radio ads, and newspaper ads, but he has the ability to contact me, as hundreds of thousands of other small businesspeople can do. This legislation that you are supporting is good for small business, and this is only one of the other ploys to try to distract from the true legislation.

Mr. KENNEDY. I thank the Senator because in his statement he has really summarized the importance of resisting this amendment. Those 40 percent of workers deserve these kinds of protections. They are not very unique or special kinds of protections.

They are the commonsense protections we have illustrated during the course of this debate—access to emergency room care based upon a prudent layperson standard, protections of specialty care, clinical trials, OB/GYN, continuity of care and point of service. So patients are able to get the best in specialty care and formulary, the new medicines, and making sure their doctors, American doctors, are the best trained in the world. These doctors have committed their lives to benefit patients, and they are trained to do so trained to make the medical judgments.

That is what American families believe they are paying for when they pay the premiums, but we have a group of HMOs that feel they can put the financial bottom line ahead of patient interests and shortchange millions of Americans. We should not let the 40 percent that will be affected by this amendment be shortchanged.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ALLARD. Mr. President, I want to respond to some of the comments that were just made. The fact remains, if you survey employers, half say they will drop employee coverage if exposed to lawsuits. I can understand that having been a small businessman, and I understand how one tries to deal with the bottom line of that business, usually a very marginal business.

Again, I agree with the Senator from Massachusetts when he says we are talking about 40 to 45 percent of the workforce in this country. It points out how important the small business sector is. Those were 50 employees or less. They are a vital part of our economy. We want to make sure they have an ability to attract employees into their business. We want to make sure they can meet the demands they want to make sure they stay in business.

I want to share a quote with the Members of the Senate made by William Spencer, who is with the Associated Builders and Contractors, Inc. We all know many times builders and contractors are small businesspeople, sometimes, at least in my State, frequently 4 and 5-man operations, rarely over 10, particularly in the subcontracting area.

Many of the ABC’s member companies are small businesses, and thus the prospect of facing a $5 million liability cap on civil assessments is daunting. Financial reality is that if faced with such a large claim, many of our members could be forced to drop employee health insurance coverage rather than face the potential liability or possibly even shut their business down.

I think he is right on, and I agree with him. The question is, how do you respond as a small employer when you are faced with an untenable exposure from a lawsuit or costs or regulatory burden? You try to figure out a way you can move out of that liability you are facing. What I did, and I think many small employers will do, is go back to their employees and say: Look, there is no way we can cover your medical insurance. There is no way we can work with a program, whether it is an HMO or whatever, to provide you with medical insurance.

If you are a small employer such as I was—I had part-time employees working for me. Many who came to work for me were part-time employees that it was just a part of their job. They were just out of high school, in many instances, and going to college. I was going to give them their first experience in the workplace.

I had to make a decision as to what we were going to do. In a case where I had increasing costs in my small business. Many of them were as a result of insurance premiums. I decided that I was going to approach my employees and say: I would much rather pay you extra to work in my business and leave it up to you to line up your own health care coverage.

Again, they were part-time employees who we expected, in many cases, to work for us for 3 months, sometimes 2, 3 years, and then they would be moving on.

By taking this approach, I also gave them portability. In other words, when they left my business, they were not faced with the issue of what is going to happen with my insurance when I get to a new employer; what is going to happen, from the employee’s perspective; what am I going to do when I am no longer working for my current employer as far as health coverage is concerned.

That is how I decided to handle it. I think most small employers will view it the same way I did. When they see that untenable exposure, they are going to decide not to have coverage for employees. In order to stay competitive, they might decide to pay them more or some other way to compensate them for that loss in health care coverage.

The fact remains, from my own personal experience, it is not hard for me to believe that many small employers, as many as half, will elect not to provide health care coverage for their employees.

We need to do everything we can to encourage the small business sector to survive. This is not the only place where we draw a bright line, where we recognize how important the small business sector is to us. In other places in the law, we have tried to define what a small business is. In some cases, we drew it at 150 employees or less; in some cases, 100 employees or less; or maybe, in some cases, 50 employees or less. In fact, in some cases, they even tried to define the very small employer of 15 employees or less.

It is not an unusual policy for the Senate in legislation to draw a bright line to define what a small employer would be. In this particular instance, it is entirely appropriate to make that at 50 employees or less, and if you have 50 employees or less, you would be exempted from the provisions of the Senate bill that is before us.

Small businesses are important for the economic growth of this country. Small businesses are important to generate new ideas. When an American has a great idea, many times they go into business for themselves, and they try to develop the very small employer that eventually grow into a large business. If it does not work, they may eventually end up having to work for another employer. But many times they are contributors to their communities. They are contributors to the employee’s leadership within that community and help make that community a better place in which to live.
I believe we need to be sensitive to what small employers can contribute to our economy and the vital role they play. I believe this mandate, this bill will make it much more difficult to stay in business, and consequently we will begin to lose that pool of talent that is so vital to the health of this country.

Presiding Officer. Who yields time?

Mr. Reid. Mr. President, under the order that is now before the Senate, if the Senator from Colorado yields back his time, we will do so and finish this debate in the morning under the time that is scheduled.

Mr. Allard. Is the Senator from Nevada yielding back his time?

Mr. Reid. Yes.

Mr. Allard. I will yield back the remainder of my time.

Mr. Reid. We will complete the debate in the morning. The Senator from Colorado will have an hour in the morning.

Mr. Allard. That is my understanding, there will be an hour.

Mr. Reid. Evenly divided.

I yield back our time and the minority has yielded back their time.

I suggest the absence of a quorum.

Presiding Officer. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. Reid. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Presiding Officer. Without objection, it is so ordered.

Morning Business

Mr. Reid. Mr. President, I ask unanimous consent there be an hour in the morning.

The assistant legislative clerk proceeded to call the roll.

Mr. Reid. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Presiding Officer. Without objection, it is so ordered.

Presidential Trade Negotiating Authority

Mr. Byrd. Mr. President, I am very much concerned about our loss of direction with regard to Presidential trade negotiating authority. Many Members of the House, and some of my colleagues here in the Senate, advocate a wholesale surrender—a wholesale surrender—of Congress' constitutional authority over foreign commerce, as well as the evisceration of the normal rules of procedure for the consideration of Presidential trade agreements.

I am talking about what is commonly known as “fast-track.” “Fast-track,” though the administration has chosen the less informative moniker—the highfalutin, high sounding “trade promotion authority.” “Trade promotion authority” sounds good, doesn’t it? “Trade promotion authority,” that is the euphemistic title, I would say—“trade promotion authority.” “The real title is “fast-track.”

What is this fast-track? It means that Congress agrees to consider legislation to implement nontariff trade agreements under a procedure with mandatory deadlines, no amendments, and limited debate. No amendments. Get that. The President claims to need this deviation from the traditional prerogatives of Congress so that other countries will come to the table for future trade negotiations.

Before I discuss this very questionable justification—which ignores almost the entire history of U.S. trade negotiating authority—I think we ought to pause and consider—what?—the Constitution of the United States. And hold it in my hand. And hold it in my hand. That is my Constitution of the United States. That is my contract with America, the Constitution of the United States.

Each of us swears allegiance; we put our hand on that Bible up there. I did, and swore to defend the Constitution of the United States against all enemies, foreign and domestic.

Each of us swears allegiance to this magnificent document. As Justice Davis stated in 1866:

The Constitution of the United States is a law for rulers and people, equally in war and in peace, and covers with the shield of its protection all classes of men, at all times, and under all circumstances. No doctrine, involving more pernicious consequences, was ever invented by the wit of man than that any of its provisions can be suspended during any of the great exigencies of government.

Ex Parte Milligan, 71 U.S. 2 (1866). This was the case that refused to uphold the wide-ranging use of martial law during the Civil War.

Thus, Mr. President, let us review that power Congress is given with respect to commerce with foreign nations. Article 1, section 8, says that “The Congress shall have power to . . . regulate commerce with foreign nations, and among the several states, and with the Indian tribes . . . .”

This Constitution also gives Congress the power “to lay and collect . . . Duties, Imposts, and Excises.” The President claims he has these powers. Congress is given these powers. There it is. Read it. The President is not given these powers. These powers have been given to Congress on an exclusive basis.

Is this the extent of Congress’ involvement in matters of foreign trade? It scarcely needs to be pointed out that Congress’ central function, as laid out in the first sentence of the first article of the Constitution, is to make the laws of the land. When it is not for that first sentence in this Constitution, I would not be here; the President would not be here; the Senator from the State of Minnesota, Ohio, Florida, the great States, Alabama, we would not be here. Congress makes the laws of the land. Some people in this town need to be reminded of that.

For example, Congress decides whether a particular trade practice in the U.S. market is unfair. Congress decide whether foreign steel companies can use the U.S. market as a dumping ground, which they have been doing, for their subsidized overcapacity. Are we to give this authority to the President and make Congress nothing more than a rubber stamp in the process of formulating important U.S. laws? As the great Chief Justice of the United States John Marshall might have asked: Are we “mere surplusage”? Is the Senate mere surplusage?

The Founding Fathers’ memories were not short. Those memories were not occluded by real-time television news nor were they occluded by the proliferation of “info-tainment.” The Founding Fathers had a vast reservoir of learning, particularly classical learning, to draw upon and a treasure trove of political experience.

Our Founding Fathers were not enamored with the idea of a President of the United States who would gather authority unto himself, as had been experienced with King George III of England. Most of the administrations that have occurred—there have been at least 10 different Presidents with which I have served; I have never served under any President, nor would any of those framers of the Constitution think well of me if I thought I served under any President. The framers didn’t think too much of handing out executive power.

So this exclusive power to regulate foreign commerce was not centered upon the legislative branch by whim or fancy. There were weighty considerations of a system founded on carefully balanced powers.

The U.S. Congress tried to give away some of its constitutional authority by granting the President line-item veto power a few years back. Fie on a weak-minded Congress that would do that, a Congress that didn’t know enough and didn’t think enough of its constitutional prerogatives and powers and duties to withhold that power over the purse which it did give the President of the United States. Mr. Clinton wanted that power. Most Presidents want that power. Congress was silly enough to give the President of the United States that power. It was giving away constitutional power that had been vested in this body of Government, in the legislative branch.

Thank God, in that instance at least, for the Supreme Court of the United States. It said Congress can’t do that. Congress can’t give away that power that is vested in it, and it alone, by the Constitution of the United States.
lawmaking, would Congress decide that we can do without such fundamentally important procedures when it comes to trade agreements?

The U.S. Senate is the foremost upper house in the world today. Why? There are many reasons. But two of the main reasons are these. The U.S. Senate has the power to amend, and the U.S. Senate is a forum in which men and women are able to debate in an unlimited way—they can limit themselves; otherwise, in this forum, I can stand on my feet as long as my feet will hold me and debate. And nobody—not the President of the United States, not the Chair—can take me off my feet, not in this body. Nobody. And I am not answerable to anybody for what I say here. Our British forebears took care of that when they provided in 1689 that there would be freedom of speech in the House of Commons.

Well, we are doing it to ourselves when we pass fast track. We are saying: No amendments. You just either stamp up or down what the President sends up here.

Again, why, in light of the fact that extensive debate and freedom to offer amendments are essential to effective lawmaking, would Congress decide that we can do without such fundamentally important procedures when it comes to trade agreements?

I submit that, in 1974, we had no idea of what kind of Pandora’s box we were opening. At that time, international agreements tended to be narrowly limited. Consider, for example, the U.S.-Israel Free Trade Agreement of 1985.

The implementing language of that agreement was all of four pages, and it dealt only with tariffs and rules on Government Procurement.

Fast track began to show its true colors with the 1988 U.S.-Canada Free Trade Agreement which, despite its title, extended well beyond traditional trade issues to address farming, banking, food inspection, and other domestic matters.

The U.S.-Canada agreement required substantial changes to U.S. law, addressing everything from local banking rules to telecommunications law, to regulations regarding the weight and the length of American trucks. These changes were bundled aboard a hefty bill and propelled down the fast track before many Members of Congress knew what had hit them.

Most ominously, the U.S.-Canada agreement established the Chapter 19 dispute resolution procedure. This insidious mechanism, which was only supposed to be a stopgap until the U.S. and Canada harmonized their trade laws, gives the so-called trade “experts” from the two countries the authority to interpret the laws of the United States. We are not talking about judges now. We are not talking about persons trained in the laws of the United States. We are talking about trade “experts,” frequently hired hands for the industries whose disputes are under consideration.

Moreover, in our domestic courts, there is no mechanism by which American companies that are adversely affected by Chapter 19 panel decisions might obtain appellate review. The system simply does not work. It goes against fundamental American principles of fairness and due process.

In short, the U.S.-Canada agreement was nothing less than a dagger pointed at the heart of American sovereignty. That agreement—and the process by which it was concluded—undermined both the legislative and judicial authority of the United States.

So where are we now? Today, American trade negotiators are faced with a completely different reality from what it was in 1974. Our trading partners know the game—shut out the people and appeal to the elite conceptions of a smoothly functioning global economy. In 1974, Lane Kirkland, then-president of the AFL-CIO, made an observation about NAFTA that is just as pertinent today as it was then, when I voted against it. Here is what he said:

Make no mistake, NAFTA is an agreement conceived and drafted by and for privileged elites, with little genuine regard for how it will affect ordinary citizens on either side of the Mexican border . . . The agreement’s 2,000 pages are loaded with trade-enforced protections for property, patents, and profits of multinational corporations, but there are no such protections for workers.

In the new world of international trade negotiations, our trading partners, frequently assisted by their American trade lawyers, place on the table their ideas for elaborate changes to U.S. law. For example, our free trade area of the American trading partners propose dozens of pages of changes to our trade laws, modifications that are intended to eviscerate those laws.

The American workers who would be displaced if those modifications were implemented are given no role in this process. None. We, their representa- tives, are given a minimal role, a little teeny-weeny portion. But we are not yet voiceless, not yet drowned out by the elite consensus on the virtues of free trade.

Well, I am for free trade—2000—who would not be—as long as it is fair, fair trade. But that is quite another matter.

Let the free traders come to West Virginia. Come on down, Mr. President, and talk to the steelworkers who are being laid off in Weirton, WV. Don’t go over to Weirton and burn the flag. Those are patriotic citizens over there. But they are losing their jobs. Let the free traders come to West Virginia and talk to the steelworkers, talk to their families, talk to their neighbors. Let them talk to labor leaders from North America and Latin

CONGRESSIONAL RECORD—SENATE

11865

America. Let them try to explain why the disintegration of ways of life that give both opportunity and security is good in the long run.

As John Maynard Keynes once wrote, “Long run is a misleading guide to current affairs. In the long run we are all dead.” I will add: dead, dead, dead.

I am getting sick and tired of these administrations, Democratic and Republican, who run to West Virginia and want the votes there and turn around and fail to take a stand for American goods, American industries, and American men and women workers.

John Maynard Keynes also wrote, “Practical men, who believe themselves to be quite exempt from any intellectual influences, are usually the slaves of some defunct economist.”

How many Washington Post editorialists would lose their jobs if our trade laws are eviscerated? How many libertarian think tanks will be shut down when the free trade dystopia is established? Shall we take their views—the views of some defunct economist—as gospel, or shall we listen to those who earn their living by the sweat of their brow?

When God evicted Adam and Eve from the Garden of Eden, they were told to earn their bread from the sweat of their brow, and that is why we are still doing it. I say listen to those who earn their living by the sweat of their brow. Go to Weirton to the steel town; go to Wheeling to that steel town, at Wheeling-Pitt with over 4,000 workers. I believe that is right. Go over there. Say to them: Boys, get in touch with your Senator and get in touch with your House Members and tell them to vote for—they do not call it fast track. Tell your Senator to vote for—that I didn’t say that I said it.

I am for expanding international trade. Who wouldn’t be. But let the trade be fair. Let us have a level playing field, and let us not neglect our responsibilities in this Senate to participate meaningfully in the formulation and implementation of U.S. trade policy.

I am not saying the Senate ought to vote on every duty and every tariff on every little toothbrush and every little violin string that is sent into this country. I am saying there are some big questions this Senate ought to be able to speak to and to vote on. At least on 2, 3, 4, 5, or 6, let’s have a vote by this Senate.

One way we can reassert our constitutional role with respect to foreign trade is to create a Congressional Trade Office modeled after the Constitution with respect to foreign trade

My colleagues might recall this was one of the many ideas discussed in the report of the U.S. Trade Deficit Review Commission. Senator Baucus and I are working on legislation that would give us a trade office with the information resources and expertise necessary to permit us to discharge our oversight responsibilities.

That is what we need. We need to exercise our oversight responsibility. We cannot do it if we gag ourselves, if we cannot speak, if we cannot amend. We cannot fulfill our responsibilities under the Constitution. We cannot fulfill our responsibilities to the people who sent us here.

Can anyone guess how many trade agreements have been negotiated without fast track? The President is running around saying: Oh, I have to have this; I have to have this in order to enter into these trade agreements. Can anyone guess how many trade agreements have been negotiated without fast track? Let me be clear: The authority was first granted to the President in 1974? The answer is in the hundreds. We have had fast track on this Senate floor 5 times in the last 27 years, but in the meantime, hundreds of trade agreements have been negotiated, the most recent examples being the U.S.-Jordan agreement and the U.S.-Vietnam agreement.

I think we need an analysis of all the trade agreements concluded over the past 27 years. Let us try to determine if the Founding Fathers were completely off the mark when they gave Congress authority over foreign commerce.

I believe that any impartial study of this history will demonstrate that we can have trade agreements without surrendering our constitutional authority over foreign commerce. If negotiation of trade agreements is in the interests of other nations, they will be at the table. They will be at the table, in my judgment, Congress or no Congress. Is there any serious argument to the contrary?

Let me be clear. I am thinking of a Presidential nominee some years ago who said this. For the moment I have forgotten his name. He said this: I didn’t say that I didn’t say it; I said that I didn’t say that I said it.

And then he said: Let me be clear. I didn’t say that I didn’t say it: I said that I didn’t say that I said it.

He said then: Let me be clear—after the audience had laughed.

Let me be clear. I am not suggesting that we noodle away at a Presidential trade agreement by considering myriad small amendments. No, Congress should not focus on the minutiae. There may, however, be a small number of big issues in such an agreement that go to the root of our constituents’ interests. We must have the authority to subject those issues to full debate and, if necessary, amend.

In closing, I reiterate that we should put our trust in this document which I hold in my hand, the Constitution of the United States—not in fast track but in the Constitution of the United States and in the people for whom it is drafted and ratified: the people of America.

Let us not give away even one piece of our national birthright, the Constitution, without at least demanding and proof of that its tried and true principles must be modified.

Let us preserve our authority as Members of Congress to participate fully in the process of concluding international trade agreements. Let us not permit the globalization bandwagon to roll over us, to weaken our voices, to sap the vigor of our democratic institutions, and to blind us to our national interests and the needs of our communities.

If we cannot uphold this banner—the Constitution of the United States which I hold in my hand—if we cannot uphold this banner, the banner of our more than 200-year-old constitutional Republic, if we cannot play a constructive role in taming the free-trade leviathan, then we are unworthy of our esteemed title.

Mr. President, I yield the floor.

IN RECOGNITION OF RAYMOND BOURQUE

Mr. KERRY. Mr. President, I would like to take a moment that I know my colleague from Massachusetts agrees with me to pay special recognition and tribute, celebrating the career of one of New England’s most beloved sports figures, Raymond Bourque, who announced his retirement today.

Over the course of a 22-year career in the National Hockey League, this future-certain Hall-of-Famer set a standard for all athletes—playing with a special kind of determination and grit and, above all, class that has been recognized by his fellow players and by sports fans all over this country and indeed the world.

He came to us in Boston from Canada as a teenager to play for our beloved Boston Bruins, earning Rookie of the Year honors for that first year in 1979 to 1980.

Many make a large splash with a lot of headlines in the first year, but Ray proved, even as he won Rookie of the Year, to be more marathon than sprint. Through perseverance and a deep dedication to his craft, he played his way into the hearts of sports fans across the region and throughout the league.

For over 20 years, touching literally hundreds of lives throughout those 20 years, he was the foundation on which the Boston Bruins built their teams and chased the dream of bringing the Stanley Cup back to Boston. Alas, that was not to happen.

The statistics, however, of his chase speak for themselves: The highest scoring defenseman in league history; a 19-time All-Star; a five-time Norris Trophy winner as the league’s best
defenseman. But in many ways it was more than goals and assists and legendary defense that won him the tremendous adoration of Boston fans. It was his performance beyond the game itself.

December 3, 1987, is a day that remains indelibly imprinted in the hearts and minds of Boston sports folklore. It is next to Fisk’s homer, Havlicek’s steal, and Orr’s flying goal. That day Bruin Hall-of-Famer Phil Esposito’s No. 7 was retired and raised to the rafters of the old Boston Garden. Ray Bourque also wore No. 7 and most believed he was going to continue to wear his number for the remainder of his career.

That night, Ray touched generations of fans and nonfans by skating over to Esposito, removing his No. 7 jersey to reveal a No. 7 worn by a player that would be his for the rest of his illustrious career. He handed the No. 7 jersey to a stunned and emotional Esposito and said, “This is yours, big fella. It never should have been mine.”

The Stanley Cup was the one thing that was missing during his years in Boston that continued to elude him and his teammates. In fact, Ray had the most games played without winning a Stanley cup—1,625. However, that distinction did not diminish him in the eyes of his fans or his teammates, the teammates who were proud to call him captain. It only made them all want to give him one last opportunity to prevail. With that in mind, Boston gave Ray his leave and he set his sights on that final goal—to win a Stanley Cup—only this time he set out to do it with the Colorado Avalanche.

Even after Ray left the Bruins in the midst of the 2000 season in search of that goal, Boston fans never left him. His new Colorado team immediately recognized his value as a leader and they awarded him the moniker of Hall-of-Famer. But when you take the full measure of the man, he has shown to be one of those few athletes who transcend sports. He could have played a couple of years more. He could have made millions of more dollars. But he chose to go out on top and to return to his family. He felt his family had made enough sacrifices for him, and it was time for him to be there for them.

In Massachusetts, and fans everywhere, I think there is a special sense of gratitude for his success, for his happiness, and we are appreciative of all of his years with the Bruins and proud to have him back home in Massachusetts. We wish him and his family well.

Mr. DASCHLE. Mr. President, I am honored today to present to my colleagues in the Senate an essay by Austin Lammers of Hermosa, SD. Austin is a student at St. Thomas More High School and he is the National Peace Essay Contest winner for South Dakota.

I ask unanimous consent that the essay be printed in the RECORD.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

FAILURE IN AFRICA

Imagine how horrible living in a third world country could be in a civil war.

The latest civil war in Rwanda started on April 6, 1994, when the plane carrying Rwandan President Habyarimana and the President of Burundi was shot down near Kigali (Freeman 22). That same day the genocide began, first killing the Prime Minister and the Hutus, then the Tutsis (Potter 17). Also bad weather, pests, and the UN ban on the export of livestock to the U.S. and Saudi Arabia have worsened the economic situation in Somalia (Johnston 60). The drop in economy in Somalia has caused lowered employment and increased starvation (Johnston 60).

The UN should not have intervened in Somalia but rather let Somalia deal with their own internal problems. While the UN was in Somalia, they made the war bigger and thus causing more starvation. After the UN was removed, the police force abused citizens, and their economy was crashing further down (Potter 30).

The United Nations should have learned from their mistakes in Somalia and ignored what had happened and tried to help the civil war in Rwanda during 1994. Rwanda’s population is approximately 86% Hutu and 11% Tutsi. The two groups have had bad relations since that 15th century when the Hutus were forced to serve the Tutsi lords in return for Tutsi cattle (Brown 50). Since the 15th century, a number of civil disputes have begun between the Hutus and the Tutsis (Brown 51). The latest civil war has resulted in mass genocide (Prunier 38).

The United Nations began to evacuate when on April 6, 1994, when the plane carrying Rwandan President Habyarimana and the President of Burundi was shot down near Kigali (Freeman 22). That same day the genocide began, first killing the Prime Minister and her ten bodyguards, then all ‘Tutsi’ and political moderates (Freeman 27). This genocide, which has been compared to the Holocaust, lasted from April 6 until the beginning of July (Prunier 57). The Interahamwe militia consisting of radical Hutus, started the genocide killing up to one million Tutsis and political moderates, bragging that in twenty minutes they could kill 1,000 Tutsis (Bronwyn 4). However, milita was not the only faction to lead the genocide. A local Rwandan radio broadcast told ordinary citizens to “Take your spear, guns, clubs, swords, stones, everything—hack them, those enemies, those cowards, those enemies of democracy” (Browyn 13).

The United Nations was in Rwanda before and during the mass genocide, but did not do anything to stop the killings or even to stop the fighting (Benton 67). In 1993, the United Nations Assistance Mission to Rwanda, UNAMIR, oversaw the transition from an overrun government to a multiparty system (Benton 74). As the genocide broke out in 1994, the UN began to panic; and on April 21, just days following Resolution 794 the UN began the United Nations Operation in Somalia (UNOSOM) which monitored the new ceasefire between the rebels and the government forces while delivering humanitarian aid (Johnston 29). The ceasefire did not last long, and soon the fighting began, but this time with UN peacekeepers caught in the middle (Benton 129). As the fighting grew worse the UN soon abandoned UNOSOM (Johnston 29). A U.S. led force; the Unified Task Force (UNITAF) to make a safe environment for delivery of humanitarian aid replaced UNOSOM (Benton 130). In May 1995, UNOSOM II replaced UNITAF; but only starvation was relieved, there was still governmental unrest (Benton 136).

The U.S. decided to leave Somalia on October 3, 1993, a Somalia rebel group shot down a U.S. helicopter, killing eighteen American soldiers (Fox 19). The U.S. was evacuated by 1994, and by 1995 all UN forces had left (Fox 22).

Following Resolution 794 the UN began the United Nations Operation in Somalia (UNOSOM) which monitored the new ceasefire between the rebels and the government forces while delivering humanitarian aid (Johnston 29). The ceasefire did not last long, and soon the fighting began, but this time with UN peacekeepers caught in the middle (Benton 129). As the fighting grew worse the UN soon abandoned UNOSOM (Johnston 29). A U.S. led force, the Unified Task Force (UNITAF) to make a safe environment for delivery of humanitarian aid replaced UNOSOM (Benton 130). In May 1993, UNOSOM II replaced UNITAF; but only starvation was relieved, there was still governmental unrest (Benton 136).

The U.S. decided to leave Somalia when on October 3, 1993, a Somalia rebel group shot down a U.S. helicopter, killing eighteen American soldiers (Fox 19). The U.S. was evacuated by 1994, and by 1995 all UN forces had left (Fox 22).

After the abandonment by UN in 1995, the new police force created by the UN community for the internal war—made up of thousands of mercenaries (Brown 17). Also bad weather, pests, and the UN ban on the export of livestock to the U.S. and Saudi Arabia have worsened the economic situation in Somalia (Johnston 60). The drop in economy in Somalia has caused lowered employment and increased starvation (Johnston 60).

The next civil war erupted between rebel and governmental forces in 1991 (Fox 90). The most recent civil war erupted between rebel and governmental forces in 1991 (Fox 90). The United Nations should have learned from their mistakes in Somalia and ignored what had happened and tried to help the civil war in Rwanda during 1994. Rwanda’s population is approximately 86% Hutu and 11% Tutsi. The two groups have had bad relations since that 15th century when the Hutus were forced to serve the Tutsi lords in return for Tutsi cattle (Brown 50). Since the 15th century, a number of civil disputes have begun between the Hutus and the Tutsis (Brown 51). The latest civil war has resulted in mass genocide (Prunier 38).

The United Nations began to evacuate when on April 6, 1994, when the plane carrying Rwandan President Habyarimana and the President of Burundi was shot down near Kigali (Freeman 22). That same day the genocide began, first killing the Prime Minister and her ten bodyguards, then all ‘Tutsi’ and political moderates (Freeman 27). This genocide, which has been compared to the Holocaust, lasted from April 6 until the beginning of July (Prunier 57). The Interahamwe militia consisting of radical Hutus, started the genocide killing up to one million Tutsis and political moderates, bragging that in twenty minutes they could kill 1,000 Tutsis (Bronwyn 4). However, milita was not the only faction to lead the genocide. A local Rwandan radio broadcast told ordinary citizens to “Take your spear, guns, clubs, swords, stones, everything—hack them, those enemies, those cowards, those enemies of democracy” (Browyn 13).

The United Nations was in Rwanda before and during the mass genocide, but did not do anything to stop the killings or even to stop the fighting (Benton 67). In 1993, the United Nations Assistance Mission to Rwanda, UNAMIR, oversaw the transition from an overrun government to a multiparty system (Benton 74). As the genocide broke out in 1994, the UN began to panic; and on April 21, just days
after the genocide started, the UN withdrew all but a handful of UNAMIR soldiers. When the UN saw the gradual increase of the genocide they agreed to send 5,000 troops, but those troops were never deployed due to UN disagreements (Freeman 45). UNAMIR finally withdrew in 1996, having accomplished almost nothing (Prunier 145). Jean Paul Biramvu, a survivor of the massacre, commented on the UN help saying, "We wonder what UNAMIR was doing in Rwanda. They could not even lift a finger to intervene and prevent the deaths of tens of thousands of people who were murdered and raped right under their very noses...the UN protects no one" (Freeman 46).

Again, just as in Somalia, the United Nations failed to bring peace in a civil war. Not only did the UN do almost nothing to stop the genocide, they also knew that there was a plan to start the genocide before it even happened (Brownyk 12). On December 16, 1999, a press conference about the genocide brought to light new information that the United Nations had accurate knowledge of a plan to commit genocide as early as three months before the killings occurred (Brownyk 13). The UN had ample time to stop a large-scale slaughter of almost a million innocent people, and did not even send troops that saved those that have prevented the deaths of thousands of Tutsis (Brownyk 13). Two reasons for the reluctance to do anything in Rwanda was that Rwanda was not of national interest to any major powers, and since the problems in Somalia, the UN did not want to risk being hurt again (Brownyk 18). The United Nations work in Rwanda was another pathetic example of how peace missions should work.

The United Nations and other international communities can intervene and help prevent violent civil conflicts in many ways. The first way to improve intervention is that the International Community needs to keep a consistent stand on how to protect victims in civil disputes. The most important step to take when war is apparent is to protect people's lives. Second, the International Community should enforce laws that form theories of any early signs of war using human right monitors to decide if conditions might worsen. The genocide in Rwanda would have been prevented if the UN had taken notice of the early signs of war, and listened to reports of a genocide. Third, better make the criminal court for genocide, war crimes, and other human rights violations so the criminals are punished right away with a sentence that fits the crime. Many times people who commit war crimes are not punished, or do not get a harsh enough sentence.

Fourth, violent methods by the International community may only be used after non-violent methods have failed, and the government is unwilling to help. The UN in Somalia tried to use military force immediately instead of trying to use non-military force when war broke out and they were in the middle (Benton 107).

Fifth, International Communities need to have immediate troops ready when a war is apparent, and impress on the warring country that if it resists, more troops will be sent in to stop the war. The UN did have troops ready in case of war, but when the war did break out in Somalia, they did not send more troops to secure the situation (Fox 23).

Sixth, every country, no matter how much power or relevance in the world, needs to be interested in helping others. The United Nations during the Rwandan genocide did not worry about helping the victims because Rwanda did not have much international power in the world such as valuable exports or strong economies. The UN cannot be worried how they will benefit but rather how the country warfare will benefit (Brownyk 18).

Third parties such as the United Nations are often not concerned if they try to keep peace in civil conflicts, especially conflicts that have been going on for hundreds of years. In some instance, such as Somalia and Rwanda, the UN hurt the people more than they helped by causing death and famine. The International community needs to come together and create new policies that help the countries that they are trying to keep peace instead of hurting them and sending them deeper into war.

THE REGIONAL IMPORTANCE OF ECUADOR AND PERU

Mr. GRASSLEY. Mr. President, I rise today to highlight the countries of Ecuador and Peru within the context of the Andean Region. The Andean Regional Initiative, ARI, the FY-2002 follow-on strategy to Plan Colombia. Although the ARI encompasses 7 South American counties, I want to focus today on these two important United States allies. Our hemispheric counterdrug efforts must be viewed within a regional context, or else any successes will be short-term and localized, and may produce offsetting or even worse conditions than before we started. Narcotics producers and smugglers have always been dynamic, mobile, innovative, exploitative, and willing to move to areas of less resistance. I am concerned that spillover, displacement, or narcotrafficker shifts, from any successful operations within Colombia, has the real potential to negatively affect Peru and Ecuador. I want the United States actions to help—and not hurt—our allies and this important region of our own hemisphere.

The State Department’s June 2001 country program fact sheet reports that “Ecuador has become a major staging and transshipment area for drugs and precursor chemicals due to its geographical location between two major cocaine source countries, Colombia and Peru. In recent months, the security situation along Ecuador’s northern border—particularly in the Sucumbios province, where most of Ecuador’s oil wealth is located—has deterred sharply due to increased Colombian guerrilla, paramilitary, and criminal violence. The insecurity on Ecuador’s northern border, if not adequately addressed, could have an impact on the country’s political and economic climate. Sucumbios has long served as a resupply and rest/recreation site for Colombian insurgents; and arms and munitions trafficking from Ecuador fuel Colombian violence.”

The Ecuador fact sheet continues “[n]arcotraffickers exploit Ecuador’s porous borders, transporting cocaine and heroin through Ecuador primarily overland by truck on the Pan-American Highway and consolidating the smuggled drugs into larger loads at poorly controlled seaports for bulk shipment to the United States and Europe hidden in containers of legitimate cargo. Precursor chemicals imported by ship into Ecuador are diverted to cocaine-processing laboratories in Colombia. In addition, the Ecuadorian police and army have discovered and destroyed cocaine-refining laboratories on the northern border with Colombia. Although large-scale coca cultivation has not yet spilled over to the border, there are scattered coca-converted plantations of coca in northern Ecuador. As a result, Ecuador could become a drug producer, in addition to its current role as a major drug transit country, unless law enforcement programs are strengthened.” Finally, the State Department concludes that “Ecuador faces an increasing threat to its internal stability due to spillover effects from Colombia at the same time that deteriorating economic conditions have reduced the Ecuadorian government’s ability to combat narcotics. Because the Ecuadorian government is unable to control or reduce illicit drug production, the United States is seeking to consolidate existing aid programs in Ecuador using the Andean Country Program (ACP) to enhance the capacity of Ecuador’s national police and drug enforcement agency to combat drug-related crime and to develop and enforce the rule of law. To further combat narcotics, the United States is working with Ecuador to upgrade the capability of the Ecuadorian military to interdict drug shipments.”

The State Department’s March 2001 country program fact sheet reports that “Peru is now the second largest producer of coca leaf and cocaine base. Peruvian traffickers transport the cocaine base to Colombia and Bolivia where it is converted to cocaine. There is increasing evidence of opium poppy cultivation being established under the direction of Colombian traffickers.”

The fact sheet continues “[f]or the fifth year in a row, Peruvian coca cultivation declined from an estimated 115,300 hectares in 1995 to fewer than an estimated 47,900 hectares in 1999, a decline of 60 percent. The continuing [now-suspended] U.S.-Peruvian interdiction program and manual coca eradication were major factors in reducing coca leaf and base production.”

In addition, “[t]he U.S. Government supported law enforcement efforts are complemented by an aggressive U.S.-funded effort to establish an alternative development program for coca

A TRIBUTE TO GOLD STAR
MOTHERS
Mr. CAMPBELL. Mr. President, today
I take this opportunity to call to
the attention of our colleagues the na-
tional convention of the American
Gold Star Mothers which began on
Sunday, July 1st, and continues to
row, June 27, 2001, in Knoxville, TN.
The Gold Star Mothers is an organi-
ization made up of American mothers
who lost a son or daughter while in
military service to our country in one
of the wars. The group was founded
shortly after the First World War for
those special mothers to comfort one
another and to help care for hospital-
ized veterans confined in government
hospitals far from home. It was named
after the Gold Star that families hung
in their windows in honor of a deceased
veteran. Gold Star Mothers now has 200
chapters throughout the United States,
and its members continue to perpet-
uate the ideals for which so many of
our sons and daughters died.
Over this past Memorial Day week-
end, I participated in the Rolling Thun-
der rally on the National Mall to honor
our Nation's veterans and remember
those missing in action. During that
time, I personally met some of the
Gold Star mothers and was moved by
their compassion, their commitment
and the sacrifices they and their fami-
lies have made for our country.
I ask my colleagues to join me in rec-
ognizing the Gold Star Mothers for
their many years of dedicated service
and congratulating them on the occa-
sion of their national convention.
OUTSTANDING SCHOOLS HONORED
FOR SERVICE LEARNING
Mr. KENNEDY. Mr. President, I wel-
come this opportunity to recognize a
number of schools that are doing an ex-
cellent job of encouraging community
service by their students. The Nation
has Bray,men and women who look to
their involvement of its citizens to help
meet the challenges we face. Today,
the Corporation for National Service
works with state commissions, non-
profits, schools, and other civic organi-
zations to provide opportunities for
Americans of all ages to serve their
communities.
Learn and Serve America, a program
sponsored by the Corporation for Na-
tional Service, supports service-learn-
ing programs in schools and commu-
nity organizations that help nearly a
million students from kindergarten
through college meet community
needs, while improving their academic
skills and learning the habits of good
citizenship. Learn and Serve grants are
used to create new programs, replicate
existing programs, and provide train-
ing and development for staff, faculty,
and volunteers.
This year the Corporation for Na-
tional Service has recognized a number
of outstanding schools across the coun-
try as National Service-Learning Lead-
er Schools for 2001. The program is an
initiative under Learn and Serve Amer-
ica that recognizes schools for their ex-
cellence in service-learning. These mid-
dle schools and high schools have
created programs that engage students
in actively working to improve their
schools. They serve as models of excel-
ence for their exemplary integration of
service-learning into the curriculum
and the life of the school. I am hopeful
that the well-deserved recognition they
are receiving will encourage and in-
crease service-learning opportunities
for students in many other schools
across the country.

Hugh Grundy for his many years of service to the United States. On June 30, 2001, Hugh will be honored by the City of Vashon, WA. The message also announced that the House has passed the following bill, H.R. 658. An act to reauthorize the Rhinoceros and Tiger Conservation Act of 1994.

H. Con. Res. 161. Concurrent resolution honoring the 19 United States servicemen who died in the terrorist bombing of the Khobar Towers military housing compound in Dhahran, Saudi Arabia, on June 25, 1996. The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

S. 657. An act to authorize funding for the American Battlefield Protection Program. Enrolled bill signed.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

The message further announced that the House has passed the following bill, without amendment:

S. 657. An act to authorize funding for the National Endowment for the Arts and Humanities, Individual Artist and Artistic Communities Initiative. Enrolled bill signed.

The message also announced that the Speaker has signed the following enrolled bill:
At 2:22 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2213. An act to respond to the continuing economic crisis adversely affecting American agricultural producers.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2213. An act to respond to the continuing economic crisis adversely affecting American agricultural producers; to the Committee on Agriculture, Nutrition, and Forestry.

The following concurrent resolutions were read, and referred as indicated:

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, June 26, 2001, he had presented to the President of the United States the following enrolled bill:

S. 1029. An act to clarify the authority of the Department of Housing and Urban Development with respect to the use of fees during fiscal year 2001 for the manufactured housing program.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. SMITH of Oregon (for himself and Mr. BINGAMAN):

S. 1068. A bill to amend the Food Stamp Act of 1977 to improve food stamp informational activities in those States with the greatest rate of hunger; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SMITH of Oregon (for himself and Mr. LEAHY):

S. 1099. A bill to increase the criminal penalties for assaulting or threatening Federal judges, their family members, and other public servants, and for other purposes; to the Committee on the Judiciary.

By Mr. CONRAD (for himself, Mr. CASSIDY, Mr. RUCFTS, Mr. DASCHLE, Mr. MURKOWSKI, Mrs. LINCOLN, and Mr. KERRY):

S. 1100. A bill to amend the Trade Act of 1974 to provide trade adjustment assistance to farmers; to the Committee on Finance.

By Mr. WARNER (for himself and Mr. ALLEN):

S. 1101. A bill to name the engineering and management building at Norfolk Naval Shipyard, Portsmouth, Virginia, after Norman Sisisky; to the Committee on Armed Services.

By Mr. WELLSTONE:

S. 1102. A bill to strengthen the rights of workers to associate, organize, and strike, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. ROCKEFELLER (for himself, Mr. DORGAN, and Mr. BURNS):

S. 1103. A bill to amend title 49, United States Code, to enhance competition among and between rail carriers in order to ensure efficient rail service and reasonable rail rates in any case in which there is an absence of effective competition, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. GRAHAM (for himself, Mr. MURKOWSKI, Mr. GRAMM, Mr. NICKLES, Mr. THOMPSON, Mr. KYL, Mr. HAGEL, Mr. ROBERTS, and Mr. CHAFEE):

S. 1104. A bill to establish objectives for negotiating and procedures for implementing certain trade agreements; to the Committee on Finance.

By Mr. THOMAS (for himself and Mr. ENZI):

S. 1105. A bill to provide for the expedient completion of the acquisition of State of Wyoming lands within the boundaries of Grand Teton National Park; and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DOMENICI:

S. 1106. A bill to provide a tax credit for the production of oil or gas from deposits held in trust for, or held with restrictions against alienation by, Indian tribes and Indian individuals; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. CLINTON (for herself and Mr. SCHUMER):

S. Res. 117. A resolution honoring John J. Downing, Brian Fahey, and Harry Ford, who lost their lives in the course of duty as firefighters; to the Committee on the Judiciary.

By Mr. BOND (for himself, Mrs. HUTCHISON, Mr. DEWINE, and Mr. LIEBERMAN):

S. Con. Res. 55. A concurrent resolution honoring the 19 United States servicemen who died in the terrorist bombing of the Khobar Towers in Saudi Arabia on June 25, 1996; to the Committee on Armed Services.

By Ms. SNOWE:

S. Con. Res. 56. A concurrent resolution expressing the sense of Congress that a commemorative postage stamp should be issued by the United States Postal Service honoring the members of the Armed Forces who have been awarded the Purple Heart; to the Committee on Governmental Affairs.

ADDITIONAL COSPONSORS

S. 21

At the request of Mr. DASCHLE, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 21, a bill to establish an off-budget lockbox to strengthen Social Security and Medicare.

At the request of Mr. THURMOND, the name of the Senator from Nevada (Mr. ENSIGN) was added as a cosponsor of S. 145, a bill to amend title 10, United States Code, to increase to parity with other surviving spouses the basic annuity that is provided under the uniformed services Survivor Benefit Plan for surviving spouses who are at least 62 years of age, and for other purposes.

At the request of Mr. FRIST, the names of the Senator from Iowa (Mr. HARKIN) and the Senator from Nebraska (Mr. NELSON) were added as co-sponsors of S. 180, a bill to facilitate famine relief efforts and a comprehensive solution to the war in Sudan.

At the request of Mr. REID, the name of the Senator from Hawaii (Mr. AKAKA) was added as a cosponsor of S. 49, a bill to amend the Internal Revenue Code of 1986 to expand the credit for electricity produced from certain renewable resources.

At the request of Mr. MCCAIN, the name of the Senator from New Jersey (Mr. CORZINE) was added as a cosponsor of S. 319, a bill to amend title 49, United States Code, to ensure that air carriers meet their obligations under the Airline Customer Service Agreement, and provide improved passenger service in order to meet public convenience and necessity.

At the request of Mr. LEAHY, his name was added as a cosponsor of S. 43, a bill to provide for equal coverage of mental health benefits with respect to health insurance coverage unless comparable limitations are imposed on medical and surgical benefits.

At the request of Mr. DASCHLE, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of S. 550, a bill to amend part E of title IV of the Social Security Act to provide equitable access for foster care and adoption services for Indian children in tribal areas.

At the request of Mrs. LINCOLN, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 686, a bill to amend the Internal Revenue Code of 1986 to provide a credit against tax for energy efficient appliances.

At the request of Mr. KERRY, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a co-sponsor of S. 706, a bill to amend the Social Security Act to establish programs to alleviate the nursing profession shortage, and for other purposes.
CONGRESSIONAL RECORD—SENATE

June 26, 2001

S. 721

At the request of Mr. Hutchison, the name of the Senator from Pennsylvania (Mr. Specter) was added as a cosponsor of S. 721, a bill to amend the Public Health Service Act to establish a Nurse Corps and recruitment and retention strategies to address the nursing shortage, and for other purposes.

S. 778

At the request of Mr. Hagel, the names of the Senator from Louisiana (Ms. Landrieu) and the Senator from Connecticut (Mr. Lieberman) were added as cosponsors of S. 778, a bill to expand the class of beneficiaries who may apply for adjustment of status under section 245(i) of the Immigration and Nationality Act by extending the deadline for classification petition and labor certification filings.

S. 804

At the request of Mrs. Feinstein, the name of the Senator from Washington (Mrs. Murray) was added as a cosponsor of S. 804, a bill to amend title 49, United States Code, to require phased increases in the fuel efficiency standards applicable to light trucks; to require fuel economy standards for automobiles up to 10,000 pounds gross vehicle weight; to raise the fuel economy of the Federal fleet of vehicles, and for other purposes.

S. 827

At the request of Mr. Rockefeller, the name of the Senator from Michigan (Mr. Levin) was added as a cosponsor of S. 827, a bill to amend the Social Security Act to guarantee comprehensive health care coverage for all children born after 2001.

S. 836

At the request of Mr. Craig, the names of the Senator from Indiana (Mr. Bayh) and the Senator from Utah (Mr. Bennett) were added as cosponsors of S. 836, a bill to amend part C of title XI of the Social Security Act to provide for coordination of implementation of administrative simplification standards for health care information.

S. 847

At the request of Mr. Dayton, the names of the Senator from South Dakota (Mr. Johnson), the Senator from North Carolina (Mr. Edwards), and the Senator from Alabama (Mr. Shelby) were added as cosponsors of S. 847, a bill to impose tariff-rate quotas on certain casein and milk protein concentrates.

S. 859

At the request of Mr. Thomas, the name of the Senator from Arkansas (Mrs. Lincoln) was added as a cosponsor of S. 859, a bill to amend the Public Health Service Act to establish a mental health community education program, and for other purposes.

S. 871

At the request of Mr. Cleland, the name of the Senator from South Dakota (Mr. Johnson) was added as a cosponsor of S. 871, a bill to amend chapter 83 of title 5, United States Code, to provide for the computation of annuities for air traffic controllers in a similar manner as the computation of annuities for law enforcement officers and firefighters.

S. 913

At the request of Ms. Snowe, the names of the Senator from South Dakota (Mr. Daschle) and the Senator from Connecticut (Mr. Dodd) were added as cosponsors of S. 913, a bill to amend title XVIII of the Social Security Act to provide for coverage under the medicare program of all oral anticancer drugs.

S. 969

At the request of Mr. Dodd, the name of the Senator from Connecticut (Mr. Lieberman) was added as a cosponsor of S. 969, a bill to establish a Tick-Borne Disorders Advisory Committee, and for other purposes.

S. 992

At the request of Mr. Conrad, the name of the Senator from Connecticut (Mr. Lieberman) was added as a cosponsor of S. 992, a bill to impose a deduction for TRICARE supplemental premiums.

S. 1067

At the request of Mr. Grassley, the name of the Senator from Tennessee (Mr. Frist) was added as a cosponsor of S. 1067, a bill to amend the Internal Revenue Code of 1986 to expand the availability of Archer medical savings accounts.

S. RES. 71

At the request of Mr. Harkin, the names of the Senator from Delaware (Mr. Biden) and the Senator from Washington (Mrs. Murray) were added as cosponsors of S. Res. 71, a resolution expressing the sense of the Senate regarding the need to preserve six day mail delivery.

S. CON. RES. 24

At the request of Mr. Lieberman, the name of the Senator from Utah (Mr. Hatch) was added as a cosponsor of S. Con. Res. 24, a concurrent resolution expressing support for a National Reflex Sympathetic Dystrophy (RSD) Awareness Month.

AMENDMENT NO. 808

At the request of Mr. Enzi, his name was added as a cosponsor of amendment No. 810 proposed to S. 1052, a bill to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. Smith of Oregon (for himself and Mr. Bingaman): S. 1098. A bill to amend the Food Stamp Act of 1977 to improve food stamp informational activities in those States with the greatest rate of hunger; to the Committee on Agriculture, Nutrition, and Forestry.

Mr. Smith of Oregon. Mr. President, I rise today to introduce the State Hunger Assistance in Response to Emergency or SHARE Act of 2001. I introduce this bill because it is a tragedy, that in this land of plenty, people across America go to bed hungry. It is high time that Congress do something to combat this tragedy.

Over the past few years, my home State of Oregon has seen an unprecedented economic boom—as has much of the country. Our silicon forest has grown by leaps and bounds; unemployment has dropped, and our welfare rolls have been reduced by half. But this prosperity has not reached all Oregonians. Oregon has the appalling distinction of having the highest rate of hunger in the nation, according to the USDA. That means that per capita, more people in Oregon go without meals than in any other State. I think that it may surprise some of my colleagues to learn that many of their home States suffer from severe hunger problems as well.

Perhaps the most tragic aspect of America’s hunger problem is that it
can be prevented. Federal programs, like Food Stamps and WIC, can help families fill the gap between the size of their food budget and the size of their check, but too many people don’t know that they qualify for the help available to them through these programs. This is especially true in the rural areas of Oregon, which is also home to most of my State’s hungry citizens. Help exists for hungry people, and I want to make sure every American knows about the resources the Federal Government has already made available to them.

The Food Stamp Act of 1977 authorized the Secretary of Agriculture to provide states with up to 50 percent of the costs of informational activities related to program outreach; however, because the remaining 50 percent of the funds for these limited outreach activities makes it difficult for states, as named by the USDA, to help those in need learn about and sign up for federal food assistance programs. The SHARE bill authorizes the Secretary of Agriculture to make grants available to States with particularly innovative outreach demonstration projects, so that we can find the best ways to combat hunger.

In a society as abundant as ours, no family should go hungry simply because they lack the information they need to get help. When passed, the SHARE Act will allow the Secretary of Agriculture to make grants available to States with particularly innovative outreach demonstration projects, so that we can find the best ways to combat hunger.

In a society as abundant as ours, no family should go hungry simply because they lack the information they need to get help. When passed, the SHARE Act will allow the Secretary of Agriculture to make grants available to States with particularly innovative outreach demonstration projects, so that we can find the best ways to combat hunger.

Food stamp recipients spend their benefits, in the form of paper coupons or electronic benefits on debit cards, to buy food at authorized retail food stores. Food stamp recipients, or those eligible for food stamps, cross the life cycle. They include individuals of all ages, races and ethnicity in both urban and rural settings.

As a result of the National Nutrition Monitoring and Related Research Act of 1990, the nutritional state of the American people has been closely monitored at State and local levels. We know that food insecurity is a complex, multidimensional phenomenon which varies through a continuum of successive stages as the condition becomes more severe. As the stage of food insecurity and hunger progresses, the number of affected individuals decreases. It is important to identify the stages of food insecurity and hunger as early as possible and, thus, continue to avoid the more severe stages of hunger. This means that we will need to focus on a much larger population base with a less severe condition which may be more difficult to identify. Fortunately, current tools to document the extent of poor nutrition and hunger caused by income limitations are sensitive and reliable.

We must continue developing tools to document the extent of poor nutrition attributable to factors other than income limitations, like inadequate consumption of fruits and vegetables and overconsumption of sugar, fat, and empty calories. In the meantime, The State Hunger Assistance in Response to Emergency Act of 2001 (SHARE) would take information which is already being collected by the Department of Agriculture and allow the 10 States with the greatest rate of hunger to accommodate a fund for enhanced outreach activities for the food stamp program.

The goal of the food stamp nutrition education program is to provide educational programs that increase the likelihood of all food stamp recipients making healthy food choices consistent with the most recent dietary advice. States are encouraged to provide nutrition education messages that focus on strengthening and reinforcing the link between food security and a healthy diet. Currently USDA matches the dollars a State is able to spend on its Food Stamp nutrition education program. This nutrition education plan is optional but participation has increased from five State plans in 1992 to 48 State plans in FY 2000.

This bill expands the allowable outreach activities for the States with the worst statistics and would allow up to $1 million per State with 10 percent of the State's food stamp purchases. In exchange for this unmatched money, the State must submit a report that measures the outcomes of food stamp informational activities carried out by the State over the 3 years of the grant. In addition, up to five States with innovative proposals for food stamp outreach could be selected by the Secretary of Agriculture for a demonstration project to receive the same amount of money over 3 years.

I have always been proud to represent my home State of New Mexico in the United States Senate. Unfortunately New Mexico has one of the worst hunger statistics in the nation. I think it is my duty to advocate for the New Mexicans that I represent as well as all Americans who are at risk for experiencing hunger, including those from Oregon, Texas, Arkansas and Washington who share similar statistics.

By Mr. SMITH of Oregon (for himself and Mr. LEAHY): S. 1099. A bill to increase the criminal penalties for assaulting or threatening Federal judges, their family members, and other public servants, and for other purposes; to the Committee on the Judiciary.

Mr. SMITH of Oregon. Mr. President, one of the important tasks we have in Congress is to ensure that our laws effectively deter violence and provide protection to those whose careers are dedicated to protecting our families and also our communities.

With this in mind, today I rise to reintroduce the Federal Judiciary Protection Act with my esteemed colleague, Senator LEAHY. This bill will provide greater protection to Federal law enforcement officials and their families. Under current law, a person who assaults, attempts to assault, or who threatens to kidnap or murder a member of the immediate family of a Federal law enforcement official, is subject to a punishment of a fine or imprisonment of up to 5 years, or both. This legislation seeks to expand these penalties in instances of assault with a weapon and a prior criminal history. In such cases, an individual could face up to 20 years in prison.

This legislation would also strengthen the penalties for individuals who communicate threats through the mail. Currently, individuals who knowingly use the U.S. Postal Service to deliver any communication containing any threat are subject to a fine of up to $1,000 or imprisonment of up to 5 years. Under this legislation, anyone who communicates a threat could face imprisonment of up to 10 years.

Briefly, I would like to share several examples illustrating the need for this legislation. In my State of Oregon, Chief Judge Michael Hogan and his family were subjected to frightening, threatening phone calls, letters, and messages from an individual who had been convicted of previous crimes in Judge Hogan’s courtroom. For months, he and his family lived with the fear
that these threats to the lives of his wife and children could become reality, and, equally disturbing, that the individual may strike again in a matter of a few months, or a few years.

Judge Hogan and his family are not alone. In 1995, Mr. Melvin Lee Davis threatened two judges in Oregon, one judge in Nevada, and the Clerk of the Court in Oregon. The threat was carried out to the point that the front door of the residence of a Mr. John Cooney was shot up in a drive-by shooting. Unfortunately for Mr. Cooney, he had the same name as one of the Oregon judges who was threatened.

In September 1996, Lawrence County Judge Dominick Motto was stalked, harassed, and subjected to terrorist threats. In 2002, C. Reiguer, who was upset by a verdict in a case that Judge Motto had heard in his courtroom. After hearing the verdict, Reiguer stated his intention to “point a rifle at his head and get what he wanted.”

These are just several examples of vicious acts focused at our Federal law enforcement officials. As a member of the legislative branch, I believe it is our responsibility to provide adequate protection to all Americans who serve to protect the life and liberty of every citizen in this Nation. I encourage my colleagues to join us in sponsoring this important legislation.

Mr. LEAHY. Mr. President, I am pleased to join my friend from Oregon to introduce the Federal Judiciary Protection Act. In the last two Congresses, I was pleased to cosponsor nearly identical legislation introduced by Senator GORDON SMITH, which unanimously passed the Senate Judiciary Committee and the Full Senate, but was acted upon by the House of Representatives. I commend the Senator from Oregon for his continued leadership in protecting public servants in our Federal Government.

Our bipartisan legislation would provide greater protection to Federal judges, law enforcement officers, and United States officials and their families. United States officials, under our bill, include the President, Vice President, Cabinet Secretaries, and Members of Congress.

Specifically, our legislation would: increase the maximum prison term for forcible assaults, resistance, opposition, intimidation or interference with a Federal judge, law enforcement officer or United States official from 3 years imprisonment to 8 years; increase the maximum prison term for use of a deadly weapon or infliction of bodily injury against a Federal judge, law enforcement officer or United States official from 10 years imprisonment to 20 years; and increase the maximum prison term for threatening murder or kidnaping of a member of the immediate family of a Federal judge or law enforcement officer from 5 years imprisonment to 10 years. It has the support of the Department of Justice, the United States Judicial Conference, the United States Sentencing Commission, and the United States Marshal Service.

It is most troubling that the greatest democracy in the world needs this legislation to protect the hard working men and women who serve in our Federal Government. Just last week, I was saddened to read about death threats against my colleague from Vermont after his act of conscience in declaring himself an Independent. Senator JEFFORDS received multiple threats against his life, which forced around-the-clock police protection. These unfortunate threats made a difficult time even more difficult for Senator JEFFORDS and his family.

We are seeing more violence and threats of violence against officials of our Federal Government. For example, a courtroom in Urbana, Illinois was bombarded recently, apparently by a disgruntled litigant. This follows the horrible tragedy of the bombing of the federal office building in Oklahoma City in 1995. In my home state during the summer of 1997, a Vermont border patrol officer, John Pfeiffer, was seriously wounded by Carl Drega, during a shootout with Vermont and New Hampshire law enforcement officers in which Drega lost his life. Earlier that day, Drega shot and killed two state troopers and a local judge in New Hampshire. Apparently, Drega was bent on settling a grudge against the judge who had ruled against him in a land dispute.

I had a chance to visit John Pfeiffer in the hospital and met his wife and young daughter. Thankfully, Agent Pfeiffer has returned to work along the Vermont border. As a Federal law enforcement officer, Agent Pfeiffer and his family will receive greater protection under our bill.

There is, of course, no excuse or justification for someone taking the law into their own hands and attacking or threatening a judge, law enforcement officer or U.S. official. Still, the U.S. Marshal Service is concerned with more and more threats of harm to our judges, law enforcement officers and Federal officials.

The extreme rhetoric that some have used in the past to attack the judiciary only feeds into this hysteria. For example, one of the Republican leaders in the House of Representatives was quoted as saying: “The judges need to be intimidated.” If they do not behave, “we’re going to go after them in a big way.” I know that this official did not intend to encourage violence against any Federal official, but this extreme rhetoric only serves to degrade Federal judges in the eyes of the public.

Let none of us in the Congress contribute to the atmosphere of hate and violence. Let us treat the judicial branch and those who serve within it with the respect that is essential to preserving our liberty. We have the greatest judicial system in the world, the envy of people around the globe who are struggling for freedom. It is the independence of our third, co-equal branch of government that gives it the ability to act fairly and impartially. It is our judiciary that has for so long protected our fundamental rights and freedoms and served as a necessary check on over-reaching by the other two branches, those more susceptible to the gusts of the political winds of the moment.

We are fortunate to have dedicated women and men throughout the Federal Judiciary and Federal Government in this country who do a tremendous job under difficult circumstances. They are examples of the hard-working public servants that make up the Federal Government, who are too often maligned and unfairly disparaged. It is unfortunate that it takes acts or threats of violence to put a human face on the Federal Judiciary, law enforcement officers or U.S. officials, to remind everyone that these are people with children and parents and cousins and friends. They deserve our respect and our protection.

I thank Senator SMITH for his leadership on protecting our Federal judiciary and other public servants in our Federal Government. I urge my colleagues to support the Federal Judiciary Protection Act.

By Mr. WARNER (for himself and Mr. ALLEN):

S. 1101. A bill to name the engineering and management building at the Virginia and Fletcher Sisisky Naval Shipyard, Portsmouth, Virginia, after Norman Sisisky; to the Norfolk Naval Shipyard, Portsmouth, Virginia, after Norman Sisisky; to the Norfolk Naval Shipyard, Portsmouth, Virginia, after Norman Sisisky; to the Committee on Armed Services.

Mr. WARNER. Mr. President, I rise today to introduce a bill that will redesignate Building 1500 at the Norfolk Naval Shipyard, Portsmouth, Virginia, as the Norman Sisisky Engineering and Management Building. I am joined by my Virginia Senate colleague, GEORGE ALLEN.

As a Navy veteran of World War II, Congressman Sisisky was proud to be a part of the greatest generation. The most extraneous chapters in American history, when America was totally united at home in support of our 16 million men and women in uniform on battlefields in Europe and on the high seas in the Pacific, all at home and abroad, fighting to preserve freedom.

During our 18 years serving together, Congressman Sisisky’s goal, our goal, was to provide for the men and women in uniform and their families.

The last 50 years have proven time and again that one of America’s greatest investments was the G.I. Bill of Rights, originated during World War II, which enabled service men and women
tions to farmers; to the Committee has been a true champion of this effort and for and made a reality for today’s soldiers, sailors, airmen, and Marines. His strength in public life was supported by his wonderful family; his lovely wife Rhoda and four accomplished children. They were always by his side offering their love, support, and counsel.

He worked tirelessly throughout Virginia’s 4th District, however, there was always a special bond to the military installations under his charge. As a former sailor, the Norfolk Naval Shipyard was high among his priorities. He knew the workers by name and the monthly workload in the yard. In consultation with his family and delegation members, he chose this building at the shipyard as a most appropriate memorial to our friend and colleague. I waited until the special election was contested, as the entire Virginia delegation could join together on this legislation.

Norman Sisisky was always a leader for the delegation on matters of national security. We are honored to join in this bi-partisan effort to remember Congressman Norman Sisisky and his life’s work; ensuring the nation’s security and the welfare of the men and women in uniform and their families.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1101

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF ENGINEERING AND MANAGEMENT BUILDING AT NORFOLK NAVAL SHIPYARD, VIRGINIA, AFTER NORMAN SISISKY.

The engineering and management building (also known as Building 1500) at Norfolk Naval Shipyard, Portsmouth, Virginia, shall be known as the Norman Sisisky Engineering and Management Building. Any reference to that building in any law, regulation, map, document, record, or other paper of the United States shall be considered to be a reference to the Norman Sisisky Engineering and Management Building.

By Mr. CONRAD (for himself, Mr. GRASSLEY, Mr. BAUCUS, Mr. DASCHLE, Mr. MURkowski, Mrs. LINCOLN, and Mr. KERRY):

S. 1100. A bill to amend the Trade Act of 1974 to make farmers eligible for Trade Adjustment Assistance, TAA, so that they can get assistance similar to that provided to workers in other industries who suffer economic injury as a result of increased imports.

When imports cause layoffs in manufacturing industries, workers become eligible for TAA. Under TAA, a portion of the income these workers lose is restored to them in the form of extended unemployment insurance benefits while they adjust to import competition and seek other employment. When imports of agricultural commodities increase, though, farmers do not lose their jobs. Instead, the increased imports drive down the prices farmers receive for the crops they have grown. This drives in price changes that have an impact that is every bit as devastating to the income of a family farmer as a layoff is to a manufacturing worker. In fact, it can be even more devastating. In many cases, the check that farmers get for all the hard work of growing crops or livestock for the year may not only leave the farmer with no net income, it may not even cover all the input costs associated with producing the commodity, leaving the farmer with thousands of dollars in losses. But, because job loss is a requirement for getting cash assistance under TAA, farmers generally don’t get benefits from TAA when imports cause their income to plummet.

Trade is very important to our overall economy, and trade is especially important to our agricultural economy. For example, we export over half the wheat grown in the United States. That is why, historically, agriculture has been among the leading supporters of trade liberalization. If we today send a strong signal to farmers that they will not be left behind in our trade policy, that agriculture must be a priority.

We need to be sure that we don’t leave American farmers behind. I hope my colleagues will join me in supporting American family farmers as they compete in the global market place.

By Mr. WELLSTONE:

S. 1102. A bill to strengthen the rights of workers to associate, organize and strike, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. WELLSTONE. Mr. President, I rise today to introduce legislation to strengthen the basic rights of workers to organize and to join a union. This legislation, the “Right-to-Organize Act of 2001,” addresses shortcomings in the National Labor Relations Act, NLRA, that, over the years, have eroded the framework of worker empowerment the NLRA was designed to ensure. The NLRA, also known as the Wagner Act, was enacted to “protect the exercise by workers of full freedom of association, self-organization and designation of representatives of their
own choosing for purpose of negotiating the terms and conditions of their employment or other mutual aid or protection for themselves and their families, that the commerce of the Nation would be aided by workplaces that respected and empowered workers’ voices about the terms and conditions of their own employment. Its proponents envisioned that supporting workers’ right to organize would help lay the basic platform for healthy economies, healthy communities, and healthy families.

Grounded in lofty notions of “full freedom of association” and “actual liberty of contract,” the promise of the NLRA was a fundamentally democratic one: participatory processes as a way to guarantee basic protections and to give those affected a role in decision-making about issues of paramount concern to them.

That was the promise of the NLRA. Unfortunately, today that promise is far from being realized. Indeed, today the democratic foundation we have attempted to erect for our workplaces is crumbling all too quickly.

Today, instead of celebrating the participatory voice of workers, we are faced with the stark reality that in too many cases, workers who do participate, workers who choose to organize, workers who choose to voice their concerns about the terms and conditions of their workplace live in fear. They live in fear of being harassed, of losing wages and benefits, of being put on leave without pay, and ultimately fear of losing their jobs. In a country that celebrates democracy and freedom, the land of the free, it is unconscionable that hard working men and women can be placed in fear of losing their livelihood because they choose to exercise their legal rights to associate for the bargaining collectively and participating in decision-making about their workplaces.

Today, as one organizer told me, all too many times you have to be a hero when you try to organize your own workplace. That’s true. The men and women who do this—who step up to take some ownership for what’s going on in their own workplaces—are doing heroic work. But that shouldn’t have to be the case. That wasn’t the promise of democracy and participation—of the associational and liberty of contract values this Nation endorsed in the National Labor Relations Act.

It’s urgent that we take action here. Estimates are that 10,000 working Americans lose their jobs illegally every year just for supporting union organizing campaigns. The 1994 Dunlop Commission found that one in four em-

ployees is fired.

This is unacceptable. This is truly one of the most urgent civil rights and human rights issues of the new millen-

nium. Working Americans are harassed, threatened and fired simply for seeking to have a voice and be represented. According to the Dunlop Commission, the United States is the only major democratic country in which the choice of whether workers are to be represented by a union is subject to such confrontational processes.

As Chair of the Employment, Safety, and Training Subcommittee with jurisdiction over the National Labor Relations Act, NLRA, I am introducing the “Right-to-Organize Act of 2001” to shore up the crumbling foundation of democracy in the workplace that the NLRA was intended to promote. The Act will target some of the most serious abuses of labor law that unfortunately have become all too common in recent years.

First, employers routinely monopolize the debates leading up to certification elections. They distribute written materials in opposition to collective bargaining. They require workers to attend meetings where they present their anti-union views. They talk to employees one-on-one about the dire consequences of unionization, such as the possibility that the individual employee or all employees could lose their jobs. All too often, at the same time that this flagrant coercion, intimidation, and interference is taking place often on a daily basis—union organizers are barred from work sites and even public areas.

Second, as noted above, employers too frequently are firing employees and engaging in other unfair labor prac-

tices to discourage union organizing and union representation. They are doing this sometimes with near impunity because they simply are not strong enough to discourage them from doing so. As the report, Unfair Advantage noted just last year, employers intent on frustrating workers’ efforts to organize can, and do, drag out legal proceedings for years, at the end of which they receive a slap on the wrist in the form of back pay to the worker illegally fired and a requirement that they post a written notice promising not to repeat their illegal behavior. Many employers, according to this report, have gone to court to appeal remedies, like back pay for workers fired because of union activity as a routine cost of doing business, well worth it to get rid of organizing leaders and derail workers’ organizing efforts.

We need to put teeth into our ability to enforce the legal rights that are already on the books.

Third, as part of efforts to discourage organizing, employers are able today to drag out election campaigns, giving themselves more time in some cases to harass workers through methods such as those I have described. Their hope may be that the climate of fear and intimidation will encourage workers to vote against the union seeking certification. While just across our border in Canada, elections take place on average within a week of the filing of a petition, here in the United States, it takes on average 80 days between petition and certification. That is an enormous amount of time for workers to live in fear of casting a vote to empower their voice in the workplace.

Finally, there is a growing problem of employers refusing to bargain with their employees even after a union has been duly certified. Achieving so-called “first contracts” can often be as harrowing as the organizing effort itself.

I want to be clear. Most employers do not take advantage of their workers in this way. Indeed, in tens of thousands of workplaces across the country, employers are working together with employees and their unions, to create safe, healthy, productive, and rewarding work environments. I applaud the efforts these employers and workers are making.

Unfortunately, however, this is not universally the case. All too frequently employers are disempowering workers and undermining their rights to organize, join, and belong to a union. That is why, that I say this is one of the most urgent civil and human rights issues of the new millennium. Civil rights and human rights is fundamentally about protecting the dignity and well-being of the less powerful against excesses of the more powerful.

Nothing could be more important to protecting workers’ rights to advocate for themselves and their families than securing a meaningful right to organize.

The Right-to-Organize Act of 2001 is a first step in tackling some of the most serious barriers to workers’ ability to unionize. In particular, the Act would do the following:

First, it would amend the National Labor Relations Act to provide equal time to labor organizations to provide information about union representation. Under this proposal the employer would trigger the equal time provision by expressing opinions on union representation during work hours or at the work site. Once the triggering actions occur, then the union would be entitled to equal time to use the same media used by the employer to distribute information and be allowed access to the work site to communicate with employees.

Second, it would toughen penalties for wrongful discharge violations. In particular, it would require the National Labor Relations Board to award back pay equal to 3 times the employee’s wages when the Board finds that an employee is discharged as a result of an unfair labor practice. It also would allow employees to file civil actions to recover punitive damages when they have been discharged as a result of an unfair labor practice.
Third, it would require expedited elections in cases where a super majority of workers have signed union recognition cards designating a union as the employee’s labor organizations. In particular, it would require elections within 14 days after receipt of signed union recognition cards from 60 percent of the employees.

Forth, this legislation would put in place mediation and arbitration procedures to help employers and employees reach mutually agreeable first-contract collective bargaining agreements. It would require mediation if the parties cannot reach agreement on their own after 60 days. Should the parties not reach agreement 30 days after a mediator is selected, then either party could call in the Federal Mediation and Conciliation Service for binding arbitration. In this way both parties would have incentives to reach genuine agreement without allowing either side to hold the other hostage indefinitely to unrealistic proposals.

The need for these reforms is urgent, not only for workers who seek to join together and bargain collectively, but for all Americans. Indeed, one of the most important things we can do to raise the standard of living and quality of life for working Americans, raise wages and benefits, improve health and safety in the workplace, and give average Americans more control over their lives is to enforce their right to organize, join, and belong to a union.

When workers join together to fight for job security, for dignity, for economic justice and for a fair share of America’s prosperity, it is not a struggle merely for their own benefit. The gains of unionized workers on basic bread-and-butter issues are key to the economic security of all working families. Ulptra-marketization is a way to advance important social objectives, higher wages, better benefits, more pension coverage, more worker training, more health coverage, and safer work places, for all Americans without drawing on any additional government resources.

The right to organize is one of the most important civil and human rights causes of the new millennium. I urge my colleagues to join me in helping to restore that right to its proper place.

By Mr. ROCKEFELLER (for himself, Mr. DORGAN, and Mr. BURNS).—S. 1103, a bill to amend title 49, United States Code, to enhance competition among and between rail carriers in order to ensure efficient rail service and reasonable rail rates in any case in which there is an absence of effective competition, and for other purposes; to add a new section to Commerce, Science, and Transportation.

Mr. ROCKEFELLER. Mr. President, I am happy today to join with my colleagues Senator DORGAN and Senator BURNS, in introducing the Rail Competition Act of 2001. Very simply, the purpose of this legislation is to encourage a healthy competitive environment among participants in the freight rail industry, which has undergone unprecedented concentration in recent years, to the detriment of virtually all rail customers.

This legislation is a renewed effort on the part of my colleagues and me to address an issue that has amazed and shocked us for years. The monopoly power of the railroads places pervasive burdens on so many industries important to our states and to the national economy. No other industry in this country wields as much power over its customers as the railroad industry, and no other industry has as close an ally in the agency charged with its oversight as the railroads do in the Surface Transportation Board, known by the abbreviation STB. In fact, no other formerly regulated industry in this country continues to maintain this level of market dominance over its customers and essential infrastructure.

Shippers of bulk commodities, like coal from mines in West Virginia and grain from the Plains states, must routinely deal with shipments that move more slowly, and at rates much higher than would normally be charged in a truly competitive market. Every company that ships its product by rail has a trove of horror stories regarding how high prices and poor service attributable to the lack of meaningful competition in the freight rail industry has affected their ability to compete in their own industries. I know this because these companies have been telling me the same types of stories since I came to Congress.

I know that other members of Congress have heard the stories, too. As many of my colleagues will remember, the point was driven home last year when more than 280 CEOs from companies covering the broadest possible spectrum of the American economy wrote to Senators MCCAIN and HOLINGS asking them to do something to insert real competition in the freight rail industry. For the record, the STB has also heard the complaints. However, the Board’s focus has been on the railroads’ still-weak financial health, rather than the continued service problems that are its root cause.

I want to give my colleagues an example from an industry that is very important to my State and the rest of the Nation, the chemical industry. Throughout the country, approximately 80 percent of individual chemical operations are “captive” to one railroad, meaning they are served by only one railroad. By whatever pricing scheme the railroad chooses to use. In my home State of West Virginia, where the chemical industry is one of the pillars of the State’s economy, 100 percent of chemical plants are captive. Some might be reluctant to just write this off as the cost of doing business, but let me impart another view: These plants produce bulk chemicals that other companies buy and turn into countless products in use in every home and business in America.

Make no mistake, while the immediate beneficiary of this legislation will be the Rail Shipper who will have the opportunity to operate with the confidence that they are getting a fair deal the true beneficiary of this legislation is the retail shopper. Every purchase of every product that began its life in a chemical plant will be cheaper when that chemical plant receives competitive rail service because of this bill. Every ingredient in your families’ dinners will go down in price when the shippers of agricultural commodities see their costs go down because this bill has produced efficiencies that benefit both shipper and customer. Every time you flip the switch, and the lights turn on at a lower kilowatt-per-hour rate, it will happen because utilities throughout the nation have a more reliable and inexpensive supply of coal because of the Railroad Competition Act of 2001.

Congress deregulated the railroad industry with the passage of the Staggers Rail Act in 1980. Many of the predicted results of deregulation have come to pass in relatively short order. The major freight railroads, which were in pretty bad financial shape at the end of the 1970’s, put their fiscal houses in order. In the course of these improvements, some weaker railroads were swallowed up by stronger corporations. Our Nation’s rail network, which was extensive but inefficient in some respects, became more streamlined. Unfortunately, some of the benefits of competition that Congress was led to expect most notably improved service at lower cost have simply not materialized for many shippers in several parts of the country.

Indeed, rather than improving over time, the situation has grown steadily worse. The second half of the 1990’s saw an unprecedented spate of railroad mergers, to the point now that the more than 50 Class I railroads in existence when I entered the United States Senate has dwindled to only six with four railroads carrying a staggeringly high percentage of the freight.

STB has considered these mergers to be “in the public interest,” and I will not pretend that the outcome of them may have been. I tend to believe that the notion that fueled many of the mergers was that somehow financially weak corporations with poor track records of service could be transformed overnight into efficient, railroad-like railroads providing good service at lower costs. Meanwhile, rail shippers had to contend with newly merged railroads with monopoly power that did...
not seem to care any more about cus-
tomer service than the separate compan-
ies that succeeded them.

Before I complete my remarks, I want to address what I predict will be some of the rhetoric bandied about by the railroad industry. This bill is not an attempt to re-regulate the industry. When Congress passed the Staggers Rail Act in 1980, it did not do so with only the financial health of the rail-
rails in mind. The Interstate Com-
merce Commission, and its successor 
agency, the STB, were supposed to 
 maintain competition in the rail indus-
try. Both agencies have failed miser-
ably to contain the anti-competitive 
behavior of the railroads. My cospon-
sors and I only seek to require rail-
routes to quote a price for a portion of a route on which they carry a com-
pany’s goods. This bill does not seek 
to give the STB more regulatory au-
tority over the railroads, it only 
serves to remind the Board of the pro-
competitive responsibilities authorized 
by Congress in the Staggers Act.

Likewise, we do not offer this bill to 
hasten the demise of the industry. The 
companies that have come to use time 
and again for help in getting competi-
tive rail service absolutely need a 
strong railroad industry. Their prod-
ucts, for the most part, cannot be 
 moved efficiently via trucks or barges. 
The competition that will be fostered 
 by this legislation is intended to help 
the railroads as much as it is intended 
to help shippers. Some may dispute the 
fundamental economic logic of this, 
to which I respond: Giving the railroads 
relatively unfettered regional mono-
 polies with the right to engage in anti-
competitive behavior has not produced 
the strong railroad industry the Stag-
gers Act sought to produce. At the very 
least, it has failed to give com-
petition a chance to succeed.

Mr. DORGAN. Mr. President, I rise 
today to speak about a bill, the Rail-
road Competition Act of 2001, which, 
along with Senator BURNS and Senator 
ROCKEFELLER, I hope will introduce a 
bit of competition and better service in 
our railroad industry. The truth is that 
our rail system is completely broken.

Since the supposed deregulation of the rail industry in 1980, the number of major Class I railroads has been al-
 lowed to decline from approximately 42 to only four major U.S. railroads 
today. Four mega-railroads over-
whelmingly dominate railroad traffic, generating 95 percent of the gross ton-
 miles and 94 percent of the revenues, 
controlling 90 percent of all U.S. coal 
 movement, 99 percent of all grain 
 movement, and 88 percent of all origi-
nated chemical movement. This drastic 
level of consolidation has left rail cus-
tomers with only two major carriers 
operating in the East and two in the 
West, and has far exceeded the indus-
ty’s need to minimize unit operating 
costs.

But consolidation has not happened 
in a vacuum. Over the years, regulators 
have systematically adopted polices 
that so narrowly interpret the pro-
competitive provisions of the 1980 sta-
tute that railroads are essentially pro-
tected from ever having to compete 
with each other. As a consequence rail 
users have no power to choose among 
carriers either in terminal areas where 
switching infrastructure makes such 
choices feasible, nor can rail users even 
 get a rate quoted to them over a “bot-
tleneck” segment of the monopoly 
system.

The negative results of this approach 
have been astonishing. In North Da-
 kota the price to ship a rail car 
of wheat to Minneapolis (appro. 400 
 miles). Yet for a similar 400 mile move 
 between Minneapolis and Chicago, it 
costs only $310 to deliver that car. 
And move that same car another 600 miles 
to St. Louis, and it costs only 
 $610 per car. Looking at it another 
way—An elevator in Minot, North Da-
 kota pays $2.99 to the farmer for a 
bushel of wheat. The cost to ship that 
wheat to the West coast on the BNSF 
is $1.30 per bushel. At that rate, rail 
transportation consumes 43 percent of 
the value of that wheat. Not only is 
that totally unfair to the captive farm-
er, but in the long run it is 
unsustainable.

How has this happened? Since the de-
 regulation of the railroad industry, it 
has been the responsibility of the 
 Interstate Commerce Commission, 
later renamed, the Surface Transpor-
tation Board, to make sure that the 
STB has to be a more aggres-
sive defender of competition and rea-
sonable rates.

By Mr. GRAHAM (for himself, 
Mr. MUKOWSKI, Mr. GRAMM, 
Mr. NICKLES, Mr. THOMPSON, 
Mr. KYL, Mr. HAGEL, Mr. ROB-
ERTS, and Mr. CHAFEE):

S. 1104. A bill to establish objectives for 
negotiating, and procedures for, im-
plementing certain trade agreements; to 
the Committee on Finance.

Mr. MUKOWSKI. Mr. President, I rise 
today with Senator MURKOWSKI and our 
cosponsors to introduce the Trade Pro-
motion Authority Act of 2001. We have 
stepped forward because we believe 
that international trade is essential 
to increase opportunities for U.S. pro-
ducers, to support U.S. jobs, and to pro-
 vide economic opportunities for trad-
ing partners who need development.

Last month the Administration re-
 leased its 2001 International Trade 
Agenda, which outlined the President’s 
principles for renewed trade promotion 
authority, TPA. At the same time, I 
was working with a group of pro-trade 
Democrats to identify the princi-
 ples. What we discovered is that our 
two sets of principles had much in com-
mon.

Over the last few weeks, Senator 
MURKOWSKI and I have worked together 
to translate those two sets of prin-
ciples into legislative language.

The trade debate has been virtually 
deadlocked for years, with voices from 
the “end zones” taking center-stage. In 
our view, this bill represents the basic 
architecture of a bipartisan bill on 
what we believe is the “90 yard line.” 
We also look forward to the contribu-
tion that others will make before this 
 bill is signed into law.

The fact that we introduced this bill 
with bipartisan support is particularly 
significant because this is not just a 
set of ideas that happened to be pop-
ular with both Democrats and Repub-
licans. This bill took real compromise 
on both sides.

For my part, my contributions to 
this bill were based on the trade prin-
ciples developed by New Democrats led 
by CAL DOOLEY in the House and sev-
 eral of my colleagues in the Senate. 
The New Democrat trade principles we
released in May are fully incorporated into this bill.

What I introduce today is not a trade agreement. Trade promotion authority is an authorization to the President to begin negotiations. Details of a trade bill will be developed through the process established by the grant of TPA. At the end of that process, Congress will review the result of those negotiations and grant approval or disapproval to the result.

Trade promotion authority puts the will of Congress behind our trade negotiator, but it cannot and should not mandate a specific result from negotiations. We must leave it to our negotiators to reach the most favorable agreement they can.

A trade promotion authority bill is a way for Congress to communicate its priorities and its commitment to the priorities we put forward in this bill include: negotiating objectives on labor and environment that receive the same priority as commercial negotiating objectives; a new negotiating objective on information technologies to reduce trade barriers on high technology products, enhance and facilitate barrier-free e-commerce, and provide the same rights and protections for the electronic delivery of products as are offered to products delivered physically; adoption of measures in trade agreements to ensure proper implementation, full compliance and appropriate enforcement mechanisms that are timely and transparent; and a stronger process for continuous Congressional involvement in the process before, during, and at the close of negotiations so that the will of Congress is fully expressed in the final agreement.

I have been concerned by the views expressed by some Members that it may be considered a "major league" mistake to TPA until next year. This would be a "major league" mistake. There is a real price to be paid for delay.

One hundred years ago the U.S. took an isolationist position with respect to our economic relations with Latin America. The result of this was that the Nations of Latin America adopted European technical standards. This has been a handicap to the U.S. economic position in Latin America ever since.

We must learn from this mistake. The best way to avoid doing so is to negotiate and enter trade agreement with nations so that American standards become the norm and American businesses and workers can benefit.

Nothing is likely to occur in the next 12 to 24 months that will make reaching a consensus on trade promotion authority more likely. In fact just the opposite is true.

The best way to move forward is to put TPA in perspective. It seems the debate on this issue moves quickly to being a referendum on whether trade and globalization are good or bad.

That, frankly, is not the question. We can’t walk away from globalization and we can’t shut the door to international commercial opportunities. Without trade, this Nation would simply not be the greatest on earth.

Yet no matter how many times we have learned this lesson, we forget it just as many times. Here we are in 2001, facing the same challenge on trade we have faced on countless occasions in the past. The champions of protectionism have become more sophisticated over the years. Still: their arguments are the same old fear-mongering and disinformation they have been peddling for 200 years.

Does trade lead to winners and losers? Yes, that’s called competition, the bedrock of our society.

Does economic growth put pressures on underdeveloped societies in labor and environmental areas? Yes, it can. It did in this country too.

But do the short-term pains of competition and other pressures on society outweigh the benefits of trade? No, not ever.

The United States can be leaders on trade or we can be followers. We can either shape the global economy or be shaped by it.

There are 134 free trade agreements in the world today. The United States is party to only 2 of those. To my mind, that is a shameful record. We have done a disservice to our farmers, fishermen, businessmen and the working men and women of this country.

I recognize there are those who are concerned about the broader impacts of globalization. To them I say: you can’t influence the outcome unless you are in the game.

Does government have a role in easing the plight of firms and individuals negatively affected by trade? Absolutely. Sound economic policy should ease the transition of individuals and their companies to more competitive areas.

Can the United States help other countries overcome short-term labor and environmental problems resulting from rapid growth? No question at all. Through technology and other means we have many tools to help the developing world.

But the only way to address these problems is for the United States to exercise leadership on trade. Without Trade Promotion Authority, such leadership will be impossible.

Senator GRAHAM and I and our colleagues believe the Graham-Murkowski Trade Promotion Act of 2001 is the right vehicle to provide those leadership tools.

By Mr. THOMAS (for himself and Mr. ENZI):
Park, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. THOMAS. Mr. President, I am pleased to introduce a bill today to authorize the exchange of State lands inside Grand Teton National Park.

Grand Teton National Park was established by Congress on February 29, 1929, to protect the natural resources of the Teton range and recognize the Jackson area’s unique beauty. On March 15, 1943, President Franklin Delano Roosevelt established the Jackson Hole National Monument adjacent to the park. Congress expanded the Park on September 14, 1950, by including a portion of the lands from the Jackson Hole National Monument. The park currently encompasses approximately 310,000 acres of wilderness and has some of the most amazing mountain scenery anywhere in our country. This park has become an extremely important element of the National Park system, attracting almost 2.7 million visitors in 1999.

When Wyoming became a State in 1890, sections of land were set aside for school revenue purposes. All income from these lands—rents, grazing fees, sales of other resources—is placed in a special trust fund for the benefit of students in the State. The establishment of these sections predates the creation of most national parks or monuments within our State boundaries, creating several State inholdings on federal land. The legislation I am introducing today would allow the Federal Government to remove the state school trust lands from Grand Teton National Park and allow the State to capture fair value for this property to benefit Wyoming school children.

This bill, entitled the “Grand Teton National Park Land Exchange Act,” identifies approximately 1,400 acres of State lands and mineral interests within the boundaries of Grand Teton National Park for exchange for Federal assets. These Federal assets could include mineral royalties, appropriated dollars, federal lands or combination of any of these elements.

The bill also identifies an appraisal process for the state and federal government to determine a fair value of the state property located within the park boundaries. Ninety days after the bill is signed into law, the land would be valued by one of the following methods: (1) The Interior Secretary and Governor would mutually agree on a qualified appraiser to conduct the appraisal of the State lands in the park; (2) If there is no agreement, the Interior Secretary and Governor would each designate a qualified appraiser. The two designated appraisers would select a third appraiser to perform the appraisal with the advice and assistance of the designated appraisers.

If the Interior Secretary and Governor cannot agree on the evaluations of the State lands 180 days after the date of enactment, the Governor may petition the U.S. Court of Federal Claims to determine the final value. One-hundred-eighty days after the State land value is determined, the Interior Secretary, in consultation with the Governor, shall exchange Federal assets of equal value for the State lands.

The management of our public lands and natural resources is often complicated and requires the coordination of many individuals to accomplish desired objectives. When western folks discuss Federal land issues, we do not often have an opportunity to identify proposals that capture this type of consensus and enjoy the support from a wide array of interests; however, this land exchange offers just such a unique prospect.

This legislation is needed to improve the management of Grand Teton National Park, by protecting the unique nature of these lands against development pressures and allow the State of Wyoming to access their assets to address public school funding needs. This bill enjoys the support of many different groups including the National Park Service, the Wyoming Governor, State officials, as well as folks from the local community. It is my hope that the Senate will seize this opportunity to improve upon efforts to provide services to the American public.

By Mr. DOMENICI:

S. 1106. A bill to provide a tax credit for the production of oil or gas from deposits held in trust for, or held with restrictions against alienation by, Indian tribes and Indian individuals; to the Committee on Finance.

Mr. DOMENICI. Mr. President, today I am proud to introduce legislation that would provide a Federal tax credit for oil and natural gas produced from Indian lands. This legislation will serve two important purposes. It will provide an immediate boost to tribal economies, and it will provide additional domestic sources of energy to ease our growing energy crisis.

Even though Indian lands offer a fertile source of oil and natural gas, many disincentives to exploration and production exist. For example, the Supreme Court permits the double taxation of oil and natural gas produced from tribal lands, which unfairly subjects producers to both State and tribal taxation. Furthermore, tribal economies are not sufficiently diversified to allow for tribal tax incentives for oil and natural gas production.

Finally, Congress has enacted innumerable incentives for energy development on Federal lands, which have made production from this land far more profitable. As a result, Indian lands are too often overlooked as a source of domestic energy.

This legislation would remedy these disadvantages by providing Federal tax credits for oil and natural gas production on tribal lands. These tax credits would be available to both the tribe as royalty owner and the producer. Tribes would benefit in two ways: they could broaden their tax base from substantially increased oil and gas production; and they could market their share of the tax credit to generate additional revenue. These additional revenues would allow tribes to strengthen their infrastructure and improve the vital services that they provide to their citizens.

Unfortunately, the recent economic prosperity has not been extended to many Indian tribes. This is the reason why these tax incentives are so crucial. They will provide a much-needed shot in the arm to tribal economic development and will compensate for the discriminatory double taxation that hinders energy production. In recent years, many people have criticized the growth of the gaming industry on reservations. However, these critics have failed to suggest viable alternatives for tribal economic development. This legislation would supply strong opportunity for entrepreneurship in a vital national industry and would bring many more tribes into the economic mainstream.

Finally, this legislation would have the added benefit of creating an additional source of domestic energy. In our efforts to craft a comprehensive energy policy for the United States, we have been searching for additional sources of domestic energy. In this search, we must not overlook tribal oil and gas production. America’s energy supply is a patchwork of various domestic and international sources, and the addition of tribal lands will only strengthen the seams of this patchwork and decrease our risky reliance on foreign sources.

Therefore, I am proud today to introduce this legislation to boost the production of oil and natural gas on Indian lands and to strengthen our domestic energy supply.

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 117—HONORING JOHN J. DOWNING, BRIAN FAHEY, AND HARRY FORD, WHO LOST THEIR LIVES IN THE COURSE OF DUTY AS FIREFIGHTERS

Mrs. CLINTON (for herself, and Mr. SCHUMER) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. Res. 117

Whereas on June 17, 2001, 350 firefighters and numerous police officers responded to a 911 call that sent them to Long Island General Supply Company in Queens, New York; Whereas a fire and an explosion in a 2-story building had turned the 128-year-old...
family-owned store into a heap of broken bricks, twisting and bending glass.
Whereas all those who responded to the scene served without reservation and with their personal safety on the line;
Whereas the valiant efforts of these firefighters were injured by the blaze, including firefighters Joseph Vosilla and Brendan Manning who were severely injured;
Whereas John J. Downing of Ladder Company 168, an 11-year veteran of the department and resident of Port Jefferson Station, and a husband and father of 2, lost his life in the fire;
Whereas Brian Fahey of Rescue Company 4, a 14-year veteran of the department and resident of East Rockaway, and a husband and father of 3, lost his life in the fire; and
Whereas Harry Ford of Rescue Company 4, a 27-year veteran of the department from Long Beach, and a husband and father of 3, lost his life in the fire; therefore, be it
Resolved, That the Senate—
(1) honors John J. Downing, Brian Fahey, and Harry Ford, who lost their lives in the course of duty as firefighters, and recognizes them for their bravery and sacrifice;
(2) extends its deepest sympathies to the families of these 3 brave heroes; and
(3) pledges its support and to continue to work on behalf of all of the Nation’s firefighters who risk their lives every day to ensure the safety of all Americans.

SENATE CONCURRENT RESOLUTION 55—HONORING THE 19 UNITED STATES SERVICEMEN WHO DIED IN THE TERRORIST BOMBING OF THE KHOBAR TOWERS IN SAUDI ARABIA ON JUNE 25, 1996

Mr. BOND (for himself, Mrs. HUTCHISON, Mr. DEWINE, and Mr. LIEBERMAN) submitted the following concurrent resolution, which was referred to the Committee on Armed Services: S. CON. RES. 55

Whereas June 25, 2001, marks the fifth anniversary of the tragic terrorist bombing of the Khobar Towers in Saudi Arabia;
Whereas this act of senseless violence took the lives of 19 brave United States servicemen, and wounded 50 others;
Whereas these nineteen men killed while serving their country were Captain Christopher Adams, Sergeant Daniel Cafaurek, Sergeant Millard Campbell, Sergeant Earl Carttire, Jr., Sergeant Patrick Fennig, Captain Leland Haun, Sergeant Michael Heiser, Sergeant Kevin Johnson, Sergeant Ronald King, Sergeant Kendall Kitson, Jr., Airman First Class Christopher Lester, Airman First Class Brent Matthew, Airman First Class Brian McVeigh, Airman First Class Peter Morgera, Sergeant Thanh Nguyen, Airman First Class Joseph Rimkus, Senior Airman Jeremy Taylor, Airman First Class Justin Wood, and Airman First Class Joshua Woody;
Whereas those guilty of this attack have yet to be brought to justice;
Whereas the families of these brave servicemen still mourn their loss and await the day when those guilty of this act are brought to justice; and
Whereas terrorism remains a constant and ever-present threat around the world: Now, therefore, be it
Resolved by the Senate (the House of Representatives concurring), That the Congress, on the occasion of the fifth anniversary of the terrorist bombing of the Khobar Towers in Saudi Arabia, recognizes the sacrifice of the 19 servicemen who died in that attack, and calls upon every American to pause and pay tribute to these brave soldiers and to remember ever vigilant the signs which may warn of a terrorist attack.

SENATE CONCURRENT RESOLUTION 56—EXPRESSING THE SENSE OF CONGRESS THAT A COMMEMORATIVE POSTAGE STAMP SHOULD BE ISSUED BY THE UNITED STATES POSTAL SERVICE HONORING THE MEMBERS OF THE ARMED FORCES WHO HAVE BEEN AWARDED THE PURPLE HEART

Ms. SNOWE submitted the following concurrent resolution; which was referred to the Committee on Governmental Affairs: S. CON. RES. 56

Whereas the Order of the Purple Heart for Military Merit, commonly known as the Purple Heart, is the oldest military decoration in the world in present use;
Whereas the Purple Heart is awarded in the name of the President of the United States to members of the Armed Forces who are wounded in conflict with an enemy force or while held by an enemy force as a prisoner of war, and posthumously to the next of kin of members of the Armed Forces who are killed in conflict with an enemy force or who die of a wound received in conflict with an enemy force;
Whereas the Purple Heart was established on August 7, 1782, during the Revolutionary War, when General George Washington issued an order establishing the Honorary Badge of Distinction, otherwise known as the Badge of Military Merit or the Decoration of the Purple Heart;
Whereas the award of the Purple Heart ceased with the end of the Revolutionary War, but was reactivated out of respect for the memory and military achievements of George Washington in 1932, the year marking the 200th anniversary of his birth; and
Whereas the issuance of a postage stamp commemorating the members of the Armed Forces who have been awarded the Purple Heart is a fitting tribute both to those members and to the memory of General George Washington: Now, therefore, be it
Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—
(1) the United States Postal Service should issue a postage stamp commemorating the members of the Armed Forces who have been awarded the Purple Heart;
(2) the Citizens’ Stamp Advisory Committee should recommend to the Postmaster General that such a stamp be issued not later than 1 year after the adoption of this resolution.
Ms. SNOWE. Mr. President. I rise today to submit a concurrent resolution to express the sense of Congress that a commemorative postage stamp should be issued by the United States Postal Service honoring the members of the Armed Forces that have been awarded the Purple Heart.
The Purple Heart, our nation’s oldest military decoration, was originated by General George Washington in 1782 to recognize “instances of unusual gallantry.” Reflected in the Badge of Military Merit, the decoration was awarded only three times during the Revolutionary War.
Following the war, the general order authorizing the “Badge” was misfiled for over 150 years until the War Department reactivated the decoration in 1932. The Army’s then Adjutant General, Douglas MacArthur, succeeded in having the medal re-instituted in its modern form—to recognize the sacrifice our service members make when they go into harm’s way.
Both literally and figuratively, the Purple Heart is the world’s most costly decoration. However, the 19 separate steps necessary to make the medal pale in comparison to the actions and heroics that so often lead to its award. The Department of Defense does not track the number of Purple Hearts awarded, but we do know that just over 500,000 of the veterans and military personnel that have received the medal are still living. And we have also know that every single recipient served this country in one form or another; a good number of the awardees even made the ultimate sacrifice—giving their lives for the liberty and freedoms that we all enjoy and often take for granted.
I am sure you will agree that these sacrifices deserve our respect and remembrance. This resolution, to express the sense of the Congress that a postage stamp honoring Purple Heart recipients should be issued by the U.S. Postal Service, is a fitting place to start. I urge my colleagues to support this effort to recognize those brave service members.

AMENDMENTS SUBMITTED AND PROPOSED

SA 813. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill S. 1062, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table.
SA 814. Mr. SANTORUM submitted an amendment intended to be proposed by him to the bill S. 1062, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table.
SA 815. Mr. SANTORUM submitted an amendment intended to be proposed by him to the bill S. 1062, supra; which was ordered to lie on the table.
SA 816. Mr. BOND proposed an amendment to the bill S. 1062, supra.
SA 817. Mr. ALLARD (for himself, Mr. BOND, Mr. SANTORUM, and Mr. NICKLES) proposed an amendment to the bill S. 1062, supra.
SA 818. Mr. KYL (for himself, Mr. NELSON of Nebraska, and Mr. NICKLES) proposed an amendment to the bill S. 1062, supra.
by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

At the end of the bill, add the following:

**TITLE — HUMAN GERMLINE GENE MODIFICATION**

SEC. 01. SHORT TITLE.

This title may be cited as the “Human Germline Gene Modification Protection Act of 2001”.

SEC. 02. FINDINGS.

Congress makes the following findings:

(1) Human Germline gene modification is not needed to save lives, or alleviate suffering, of existing people. Its target population is “prospective people” who have not been conceived.

(2) The cultural impact of treating humans as biologically perfectable is ambiguous and often fatal as the result of only a few people will have been exposed to harm prospectively.

(3) Human germline modifications of themselves those in future generations who are harmed ready exist.

(4) The negative effects of human germline modification are irreversible.

(5) All people have the right to have been conceived and be held as ‘normal’.

SEC. 03. PROHIBITION ON HUMAN GERMLINE GENE MODIFICATION.

(a) IN GENERAL.—Title 18, United States Code, is amended by adding at the end of chapter 15 the following:

"CHAPTER 16—GERMLINE GENE MODIFICATION"

"§ 301. Definitions.

"In this chapter:

(1) HUMAN GERMLINE GENE MODIFICATION.—The term ‘human germline gene modification’ means the introduction of DNA into any human cell (including human eggs, sperm, fetal tissue, (i.e. embryos, or early cells that will differentiate into gametes or can be manipulated to do so) that can result in a change which can be passed on to future individuals, including DNA from any source, and in any form, such as nuclei, chromosomes, nuclear, mitochondrial, and synthetic DNA. The term does not include any modification of cells that are not a part of or are not used to construct human embryos.

(2) HUMAN HAPLOID CELL.—The term ‘haploid cell’ that contains only a single copy of each of the human chromosomes, such as eggs, sperm, and their precursors; the haploid number in a human cell is 23.

(3) SOMATIC CELL.—The term ‘somatic cell’ means a diploid cell (having two sets of the chromosomes of almost all body cells) obtained from a human body at any stage of development; its diploid number is 46. Somatic cells are diploid cells that are not precursors of either eggs or sperm. A genetic modification of somatic cells is therefore not germline genetic modification.

"§ 302. Prohibition on germline gene modification.

("(a) IN GENERAL.—It shall be unlawful for any person or entity, public or private, to import the product of human germline gene modification for any purpose.

("(b) IMPORTATION.—It shall be unlawful for any person or entity, public or private, to import the product of human germline gene modification for any purpose.

("(c) PENALTIES—

(1) IN GENERAL.—Any person or entity that is convicted of violating any provision of this section shall be fined under this section or imprisoned not more than 10 years, or both.

(2) CIVIL PENALTY.—Any person or entity that is convicted of violating any provision of this section shall be subject to, in the case of a violation that involves the derivation of a pecuniary gain, a civil penalty of not less than $1,000,000 and not more than an amount equal to the amount of the gross gain multiplied by 2, if that amount is greater than $1,000,000.

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 1 of title 1, United States Code, is amended by adding at the end the following:

'8. ‘Person’, ‘human being’, ‘child’, and ‘individual’ as including born-alive infant.'."
(iii) who does not live apart from such individual's spouse at all times during the taxable year;

the limitation imposed by subparagraph (B) shall be applicable separately between the individual and the individual's spouse unless they agree on a different division.

(3) COVERAGE MONTH.—For purposes of this subsection—

(A) IN GENERAL.—The term 'coverage month' means, with respect to an individual, any month during which the individual is covered by qualified health insurance, and

(ii) the premium for coverage under such insurance for such month is paid by the taxpayer.

(B) EMPLOYER-SUBSIDIZED COVERAGE.—

(i) in general.—Such term shall not include any month for which such individual is eligible to participate in any subsidized health plan (within the meaning of section 162(h)(2)(D)) maintained by any employer of the taxpayer or of the spouse of the taxpayer.

(ii) PREMIUMS TO NONSUBSIDIZED PLANS.—If an employer of the taxpayer or the spouse of the taxpayer maintains a health plan which is not a subsidized health plan (as so defined) and which constitutes qualified health insurance, employee contributions to the plan shall be treated as amounts paid for qualified health insurance.

(C) CAFETERIA PLAN AND FLEXIBLE SPENDING ACCOUNT BENEFICIARIES.—Such term shall not include any month during a taxable year if any amount is not includible in the gross income of the taxpayer for such year under section 106 with respect to—

(i) a benefit chosen under a cafeteria plan (as defined in section 125(d)), or

(ii) a benefit provided under a flexible spending or similar arrangement.

(D) MEDICARE AND MEDICAID.—Such term shall not include any month with respect to an individual if, as of the first day of such month, such individual—

(i) is entitled to any benefits under title XVIII of the Social Security Act, or

(ii) is a participant in the program under title XIX or XXI of such Act.

(E) COVERAGE BY CONTRACT.—Such term shall not include any month during a taxable year with respect to an individual if, at any time during such year, any benefit is provided to such individual under—

(i) chapter 89 of title 5, United States Code,

(ii) chapter 55 of title 18, United States Code,

(iii) chapter 17 of title 38, United States Code, or

(iv) any medical care program under the Indian Health Care Improvement Act.

(F) PRISONERS.—Such term shall not include any month with respect to an individual if, as of the first day of such month, such individual is imprisoned under Federal, State, or local authority.

(G) INSUFFICIENT PRESENCE IN UNITED STATES.—Such term shall not include any month during a taxable year with respect to an individual if such individual is present in the United States on fewer than 183 days during such year (determined in accordance with section 7701(h)).

(4) COORDINATION WITH DEDUCTION FOR HEALTH INSURANCE COSTS OF SELF-EMPLOYED INDIVIDUALS.—In the case of a taxpayer who is eligible for an amount under section 162(l)(2) for the taxable year, this section shall apply only if the taxpayer elects not to claim any amount as a deduction under such section for purposes of this section—

(C) QUALIFIED HEALTH INSURANCE.—For purposes of this section—

(I) IN GENERAL.—The term 'qualified health insurance' means insurance which constitutes medical care as defined in section 220(b)(1)(B) without regard to—

(A) paragraph (1)(C) thereof, and

(B) so much of paragraph (1)(D) thereof as relates to qualified long-term care insurance contracts.

(II) EXCLUSION OF CERTAIN OTHER CONTRACTS.—Such term shall not include insurance if a substantial portion of its benefits are excepted benefits (as defined in section 9822(c)).

(III) ARCHER MSA CONTRIBUTIONS.—

(I) IN GENERAL.—If a deduction would (but for paragraph (2)) be allowed under section 220 to the taxpayer for a payment for the taxable year to the Archer MSA of an individual, subsection (a) shall be applied by treating such payment as a payment for qualified health insurance for such individual.

(II) DENIAL OF DOUBLE BENEFIT.—No deduction shall be allowed under section 220 for that portion of the Archer MSA payments otherwise allowable as a deduction under section 220 for the taxable year which is equal to the amount of credit allowed for such taxable year by reason of this subsection.

(III) SPECIAL RULES.—

(1) COORDINATION WITH MEDICAL EXPENSE DEDUCTION.—The amount which would (but for this paragraph) be taken into account by the taxpayer under section 213 for the taxable year shall be reduce by the credit (if any) allowed by this section to the taxpayer for such year.

(2) DENIAL OF CREDIT TO DEPENDENTS.—No credit shall be allowed under this section to any individual with respect to whom a deduction under section 220 for the taxable year was allowed under section 220 for the缴款年 for the taxable year to the Archer MSA of an individual.

(4) COORDINATION WITH DEDUCTION FOR QUALIFIED HEALTH INSURANCE.—For purposes of this section, the term 'qualified health insurance' means insurance defined (as so defined) and which constitutes qualified health insurance, employee contributions to which plan shall be treated as amounts paid for qualified health insurance.

(A) I N GENERAL.—The term 'coverage month' means, with respect to an individual if, as of the first day of such month, such individual is covered by qualified health insurance, employee contributions to the plan shall be treated as amounts paid for qualified health insurance.

(B) EMPLOYER-SUBSIDIZED COVERAGE.—

(i) in general.—Such term shall not include any month for which such individual is eligible to participate in any subsidized health plan (within the meaning of section 162(h)(2)(D)) maintained by any employer of the taxpayer or of the spouse of the taxpayer.

(ii) PREMIUMS TO NONSUBSIDIZED PLANS.—If an employer of the taxpayer or the spouse of the taxpayer maintains a health plan which is not a subsidized health plan (as so defined) and which constitutes qualified health insurance, employee contributions to the plan shall be treated as amounts paid for qualified health insurance.

(C) CAFETERIA PLAN AND FLEXIBLE SPENDING ACCOUNT BENEFICIARIES.—Such term shall not include any month during a taxable year if any amount is not includible in the gross income of the taxpayer for such year under section 106 with respect to—

(i) a benefit chosen under a cafeteria plan (as defined in section 125(d)), or

(ii) a benefit provided under a flexible spending or similar arrangement.

(D) MEDICARE AND MEDICAID.—Such term shall not include any month with respect to an individual if, as of the first day of such month, such individual—

(i) is entitled to any benefits under title XVIII of the Social Security Act, or

(ii) is a participant in the program under title XIX or XXI of such Act.

(E) COVERAGE BY CONTRACT.—Such term shall not include any month during a taxable year with respect to an individual if, at any time during such year, any benefit is provided to such individual under—

(i) chapter 89 of title 5, United States Code,

(ii) chapter 55 of title 18, United States Code,

(iii) chapter 17 of title 38, United States Code, or

(iv) any medical care program under the Indian Health Care Improvement Act.

(F) PRISONERS.—Such term shall not include any month with respect to an individual if, as of the first day of such month, such individual is imprisoned under Federal, State, or local authority.

(G) INSUFFICIENT PRESENCE IN UNITED STATES.—Such term shall not include any month during a taxable year with respect to an individual if such individual is present in the United States on fewer than 183 days during such year (determined in accordance with section 7701(h)).

(H) COORDINATION WITH DEDUCTION FOR HEALTH INSURANCE COSTS OF SELF-EMPLOYED INDIVIDUALS.—In the case of a taxpayer who is eligible for an amount under section 162(l)(2) for the taxable year, this section shall apply only if the taxpayer elects not to
CONGRESSIONAL RECORD—SENATE

SEC. 6050T. Returns relating to payments for qualified health insurance.

(c) CONFORMING AMENDMENTS.—(1) Paragraph (2) of section 1324(b) of title 31, United States Code, is amended by inserting before the period "., or section 35 of such Code".

(2) The table of sections for subpart C of part IV of subchapter A of chapter 1 of such Code is amended by striking the last item and inserting the following new item:

"Sec. 35. Health insurance costs."

(3) Section 36. Overpayments of taxes.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

SEC. 62. ADVANCE PAYMENT OF CREDIT FOR PURCHASERS OF QUALIFIED HEALTH INSURANCE.

(a) IN GENERAL.—Chapter 77 of the Internal Revenue Code of 1986 (relating to miscellaneous provisions) is amended by adding at the end the following new section:

"SEC. 7527. ADVANCE PAYMENT OF HEALTH INSURANCE CREDIT FOR PURCHASERS OF QUALIFIED HEALTH INSURANCE.

"(a) GENERAL RULE.—In the case of an eligible individual, the Secretary shall make payments to the provider of such individual's qualified health insurance credit advance to an eligible individual.

(b) ELIGIBLE INDIVIDUAL.—For purposes of this section, 'eligible individual' means any individual—

(1) who has qualified health insurance (as defined in section 35(c)), and

(2) who is covered by or eligible for the credit provided by such Code.

(c) QUALIFIED HEALTH INSURANCE CREDIT ELIGIBILITY CERTIFICATE.—For purposes of this section, a qualified health insurance credit eligibility certificate is a statement furnished by an individual to the Secretary which—

(1) certifies that the individual will be eligible to receive the credit provided by section 35, and

(2) estimates the amount of such credit for the taxable year, and

(3) provides such other information as the Secretary may require for purposes of this section.

(d) QUALIFIED HEALTH INSURANCE CREDIT ADVANCE PAYMENT.—For purposes of this section, the term 'qualified health insurance credit advance amount' means, with respect to any provider of qualified health insurance, the Secretary's estimate of the amount of credit allowable under section 35 to the individual for the taxable year which is attributable to the insurance provided to the individual by such provider.

(e) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section.

(b) CLERICAL AMENDMENT.—The table of sections for chapter 77 of such Code is amended by adding at the end the following new item:

"Sec. 7527. Advance payment of health insurance credit for purchasers of qualified health insurance."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 2002.

Subtitle B—Assuring Health Insurance Coverage for Uninsurable Individuals

SEC. 11. QUALIFIED HEALTH INSURANCE COVERAGES FOR ELIGIBLE INDIVIDUALS

(a) IN GENERAL.—

(1) REQUIREMENT.—For years beginning with 2002, each qualified health maintenance organization and health service organization shall be a participant in a health insurance safety net in this subtitle referred to as a 'safety net' established by the State in which it operates.

(2) FUNCTIONS.—Any safety net shall assure, in accordance with this subtitle, the availability of qualified health insurance coverage to uninsured individuals.

(3) FUNDING.—Any safety net shall be funded by an assessment against health insurers, health service organizations, and health maintenance organizations on a pro rata basis of premiums collected in the State in which the safety net operates. The costs of the assessment may be added by a health insurer, health service organization, or health maintenance organization to the costs of its health insurance or health coverage provided in the State.

(4) GUARANTEED RENEWABLE.—Coverage under a safety net shall be guaranteed renewable. The nonpayment of premiums, material misrepresentation, fraud, or abandonment of eligibility under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.), loss of dependents, or noneligibility for other health insurance coverage.

(5) COMPLIANCE WITH NAIC MODEL ACT.—In the case of a State that has not established, or submit a similar comprehensive health insurance program that assures the availability of qualified health insurance coverage to all eligible individuals residing in the State, a safety net shall be established in accordance with the requirements of the 'Model Health Plan For Uninsurable Individuals Act' (or the successor model Act), as adopted by the National Association of Insurance Commissioners and as in effect in the date of the safety net's establishment.

(b) DEADLINE.—Safety nets required under subsection (a) shall be established not later than January 1, 2002.

(c) WAIVER.—This subtitle shall not apply in the case of insurers and organizations operating in a State if the State has established a similar comprehensive health insurance program that assures the availability of qualified health insurance coverage to all eligible individuals residing in the State.

(d) RECOMMENDATION FOR COMPLIANCE REQUIREMENT.—Not later than January 1, 2003, the Secretary of Health and Human Services shall submit to the Congress a recommendation on appropriate sanctions for States that fail to meet the requirement of subsection (a).

SEC. 12. UNINSURABLE INDIVIDUALS ELIGIBLE FOR COVERAGE.

(a) UNINSURABLE AND ELIGIBLE INDIVIDUAL DEFINED.—In this subtitle:

(1) UNINSURABLE INDIVIDUAL.—The term 'uninsurable individual' means, with respect to a State, an individual who has been refused or denied coverage because of his or her uninsurability for reasons by one insurer; or

(2) E XCEPTION FOR INDIVIDUALS WITH UNINSURABLE CONDITIONS.—The State shall make available benefits to an individual who is not under a safety net plan coverage without applying for health insurance or establishing proof of uninsurability under paragraph (1). An individual who can demonstrate the existence of medical or health conditions on such list shall not be required to provide the proof described in paragraph (1). The list shall be effective on the first day of the operation of the safety net plan and may be amended from time to time as may be appropriate.

(b) ADDITIONAL FUNDING.—A safety net shall provide for additional funding through an assessment on all health insurers, health service organizations, and health maintenance organizations in the State through a nonprofit association consisting of all such insurers and organizations doing business in the State on an equitable basis or pro rata basis consistent with section 11.

SEC. 13. QUALIFIED HEALTH INSURANCE COVERAGE UNDER SAFETY NET.

In this subtitle, the term 'qualified health insurance coverage' means, with respect to a State, health insurance coverage that provides benefits typical of major medical insurance individual health insurance market in such State.

SEC. 14. FUNDING OF SAFETY NET.

(a) LIMITATIONS ON PREMIUMS.—

(1) IN GENERAL.—The premium established under a safety net may not exceed 125 percent of the applicable standard risk rate, except as provided in paragraph (2).

(2) SUBCHARGE FOR AVOIDABLE HEALTH RISKS.—A safety net may impose a surcharge on premiums for individuals with avoidable high risks, such as smoking.

(b) ADDITIONAL FUNDING.—A safety net shall provide for additional funding through an assessment on all health insurers, health service organizations, and health maintenance organizations in the State through a nonprofit association consisting of all such insurers and organizations doing business in the State on an equitable basis or pro rata basis consistent with section 11.

SEC. 15. ADMINISTRATION.

A safety net in a State shall be administered through a contract with 1 or more insurers or third party administrators operating in the State.

SEC. 16. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to reimburse States for their costs in administering this subtitle.

SA 816. Mr. BOND proposed an amendment to the bill S. 1052, to
amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 179, after line 14, add the following:

SEC. 6. ANNUAL REVIEW.
(a) In General.—Not later than 24 months after the general effective date referred to in section 401(a)(1), and annually thereafter for each of the succeeding 4 calendar years (or until a single employer is effective under subsection (b)), the Secretary of Health and Human Services shall request that the Institute of Medicine, the National Academy of Sciences prepare and submit to the appropriate committees of Congress a report concerning the impact of this Act, and the amendments made by this Act, on the number of individuals in the United States with health insurance coverage.
(b) Limitation With Respect to Certain Plans.—If the Secretary, in any report submitted under subsection (a), determines that more than 1,000,000 individuals in the United States have health insurance coverage as a result of the enactment of this Act, as compared to the number of individuals with health insurance coverage in the 12-month period preceding the date of enactment of this Act, section 302 of this Act shall be repealed effective on the date that is 12 months after the date on which the report is submitted, and the submission of any further reports under subsection (a) shall not be required.
(c) Funding.—From funds appropriated to the Department of Health and Human Services for fiscal years 2003 and 2004, the Secretary of Health and Human Services shall provide for funding as the Secretary determines necessary for the conduct of the study of the National Academy of Sciences under this section.

SA 817. Mr. ALLARD (for himself, Mr. BOND, Mr. SANTORUM, and Mr. NICKLES) proposed an amendment to the bill S. 1652, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 148, between lines 23 and 24, insert the following:

(D) EXCLUSION OF SMALL EMPLOYERS.—

(i) In General.—Notwithstanding any other provision of this paragraph, in addition to excluding certain physicians, other health care professionals, and certain hospitals from liability under paragraph (1), paragraph (1)(A) does not create any liability on the part of a small employer (or on the part of an employee of such an employer acting within the scope of employment).

(ii) Definition.—In clause (i), the term ‘small employer’ means an employer—

(I) that, during the calendar year preceding the calendar year for which a determination under this subparagraph is being made, employed an average of at least 2 but not more than 50 employees on business days; and

(II) maintaining the plan involved that is acting, acting, serving, or functioning as a fiduciary, trustee, or plan administrator, including—

(aa) a small employer described in section 3(16)(B)(i) with respect to a plan maintained by a single employer; and

(bb) one or more small employers described in section 3(16)(B)(iii) in the case of a multi-employer plan.

(B) Application of Certain Rules in Determination of Employer Size.—For purposes of this subparagraph:

(I) Application of Aggregation Rule for Employers.—All persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1986 shall be treated as a single employer.

(II) Exclusion of Small Employer.—In the case of an employer which was not in existence throughout the preceding calendar year, the determination of whether such employer is a small employer shall be based on the average number of employees that it is reasonably expected such employer will employ on business days in the current calendar year.

(III) Predecessors.—Any reference in this paragraph to an employer shall include a reference to any predecessor of such employer.

On page 165, between lines 14 and 15, insert the following:

(D) Exclusion of Small Employers.—

(i) In General.—Notwithstanding any other provision of this paragraph, in addition to excluding certain physicians, other health care professionals, and certain hospitals from liability under paragraph (1), paragraph (1)(A) does not create any liability on the part of a small employer (or on the part of an employee of such an employer acting within the scope of employment).

(ii) Definition.—In clause (i), the term ‘small employer’ means an employer—

(I) that, during the calendar year preceding the calendar year for which a determination under this subparagraph is being made, employed an average of at least 2 but not more than 50 employees on business days; and

(II) maintaining the plan involved that is acting, acting, serving, or functioning as a fiduciary, trustee, or plan administrator, including—

(aa) a small employer described in section 3(16)(B)(i) with respect to a plan maintained by a single employer; and

(bb) one or more small employers described in section 3(16)(B)(iii) in the case of a multi-employer plan.

(iii) Application of Certain Rules in Determination of Employer Size.—For purposes of this subparagraph:

(I) Application of Aggregation Rule for Employers.—All persons treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1986 shall be treated as a single employer.

(II) Exclusion of Small Employer.—In the case of an employer which was not in existence throughout the preceding calendar year, the determination of whether such employer is a small employer shall be based on the average number of employees that it is reasonably expected such employer will employ on business days in the current calendar year.

(III) Predecessors.—Any reference in this paragraph to an employer shall include a reference to any predecessor of such employer.

SA 818. Mr. KYL (for himself, Mr. NELSON of Nebraska, and Mr. NICKLES) proposed an amendment to the bill S. 1652, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 37, line 25, strike the period and insert the following:

(B) No Coverage for Excluded Benefits.—Nothing in this subsection shall be construed to permit an independent medical reviewer to require that a group health plan, or health insurance issuer offering health insurance coverage in connection with a group health plan, provide coverage for items or services that are specifically excluded or expressly limited under the plan or coverage and that are disclosed under subparagraphs (C) or (D) of section 121(b)(1) and that are not covered regardless of any determination relating to medical necessity and appropriateness, experimental or investigational nature of the treatment, or an evaluation of the medical facts in the case involved.

On page 37, line 16, strike ‘and’.

On page 37, line 25, strike the period and insert ‘;’.

On page 37, after line 25, add the following:

(III) the definition of such term that is developed through a negotiated rulemaking process pursuant to subsection (i); and

On page 66, between lines 10 and 11, insert the following:

(1) Establishment of Negotiated Rulemaking Safe Harbor.—

(I) In General.—The Secretary shall establish, on an expedited basis and using a negotiated rulemaking process under subchapter III of chapter 5 of title 5, United States Code, standards described in subsection (d)(3)(E)(iii)(IV) (relating to the definition of ‘medically necessary and appropriate’ or ‘experimental or investigational’) that group health plans and health insurance issuers offering health insurance coverage in connection with group health plans may use when making a determination with respect to a claim for benefits.

(II) Publication of Notice.—In carrying out the rulemaking process under paragraph (1), the Secretary shall, not later than November 30, 2002, publish a notice of the establishment of a negotiated rulemaking committee, as provided for under section 564(a) of the United States Code, to develop the standards described in paragraph (1). Such notice shall include a solicitation for public
comment on the committee and description of—

(a) the scope of the committee;

(b) the interests that may be impacted by the standards;

(c) the proposed membership of the committee;

(d) the proposed meeting schedule of the committee; and

(e) the procedure under which an individual may apply for membership on the committee.

(3) TARGET DATE FOR PUBLICATION OF RULE.—After the general effective date referred to in section 566(a)(5) of title 5, United States Code, means May 15, 2003.

(4) ABBREVIATED PERIOD FOR SUBMISSION OF COMMENTS.—Notwithstanding section 566(c) of title 5, United States Code, the Secretary shall provide for a period, beginning on the date on which the notice is published under paragraph (2) and ending on December 14, 2002, for the submission of public comments on the committee under this subsection.

(5) APPOINTMENT OF NEGOTIATED RULE-MAKING COMMITTEE AND FACILITATOR.—The Secretary shall carry out the following:

(A) APPOINTMENT OF COMMITTEE.—Not later than January 10, 2003, appoint the members of the negotiated rulemaking committee under this subsection.

(B) FACILITATOR.—Not later than January 21, 2002, provide for the nomination of a facilitator under section 566(c) of title 5, United States Code, to carry out the activities described in subsection (d) of this section.

(C) MEMBERSHIP.—Ensure that the membership of the negotiated rulemaking committee includes at least one individual representing—

(1) health care consumers;

(ii) small employers;

(iii) large employers;

(iv) physicians;

(v) hospitals;

(vi) other health care providers;

(vii) health insurance issuers;

(viii) State insurance regulators;

(ix) health plans;

(x) third-party administrators;

(xi) the Medicare program under title XVIII of the Social Security Act;

(xii) the Medicaid program under title XIX of the Social Security Act;

(xiii) the Federal Employee Health Benefits Program under chapter 89 of title 5, United States Code;

(xiv) the Department of Defense;

(xv) the Department of Veterans’ Affairs; and

(xvi) the Agency for Healthcare Research and Quality.

(6) FINAL COMMITTEE REPORT.—

(A) IN GENERAL.—Not later than 1 year after the general effective date referred to in section 401, the committee shall submit to the Secretary a report containing a proposed rule.

(B) PUBLICATION OF RULE.—If the Secretary receives a report under subparagraph (A), the Secretary shall provide for the publication in the Federal Register, by not later than the date that is 30 days after the date on which such report is received, of the proposed rule.

(C) DURATION OF REPORT.—If the committee fails to submit a report as provided for in paragraph (6)(A), the Secretary may promulgate a rule to establish the standards described in subsection (d)(3)(E)(iii)(IV) (relating to the definition of medically necessary and appropriate or ‘‘experimental or investigational’’) that group health plans and health insurance issuers offering health insurance coverage in connection with group health plans may use when making a determination with respect to a claim for benefits.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on June 26, 2001, to conduct a hearing on the nomination of Donald E. Powell, of Texas, to be Chairman of the Board of Directors of the Federal Deposit Insurance Corporation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet on Tuesday, June 26, 2001, at 9:30 a.m. on the nominations of Sam Bodman (DOC), Allan Rutter (FRA), Kirk Van Tine (DOT), and Ellen Engleman (DOT).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on June 26, 2001, at 10:30 a.m. in room 483 Russell Senate Building to conduct a Hearing to receive testimony on the goals and priorities of the Great Plains Tribes for the 107th session of the Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE ADMINISTRATIVE OVERSIGHT AND THE COURTS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on the Judiciary Subcommittee on the Constitution be authorized to meet to conduct a hearing on “Should Ideology Matter? Judicial Nominations 2001” on Tuesday, June 26, 2001 at 10:00 a.m. in SD226. No witness list is available yet.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet on Tuesday, June 26, 2001, at 10:00 a.m. for a hearing entitled “Diabetes: Is Sufficient Funding Being Allocated To Fight This Disease?”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Tuesday, June 26 at 9:30 a.m. to conduct a hearing. The committee will receive testimony on proposed amendments to the Price-Anderson Act (Subtitle A of Title IV of S. 472; Title IX of S. 597) and nuclear energy production and efficiency incentives (Subtitle C of Title IV of S. 388; and Section 124 of S. 472).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, June 26, 2001 at 2:30 p.m. to hold a nomination hearing as follows:

Panel 1: The Honorable Margaret Deبارdleben Tutwiler, of Alabama, to be Ambassador to the Kingdom of Morocco.

The Honorable C. David Welch, of Virginia, to be Ambassador to the Arab Republic of Egypt.

The Honorable Daniel C. Kurtzer, of Maryland, to be Ambassador to Israel.

Panel 2: The Honorable Robert D. Blackwell, of Kansas, to be Ambassador to India.

The Honorable Wendy Jean Chamberlin, of Virginia, to be Ambassador to the Islamic Republic of Pakistan.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on June 26, 2001, at 10:30 a.m. in room 483 Russell Senate Building to conduct a Hearing to receive testimony on the goals and priorities of the Great Plains Tribes for the 107th session of the Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE ADMINISTRATIVE OVERSIGHT AND THE COURTS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution be authorized to meet to conduct a hearing on “Should Ideology Matter? Judicial Nominations 2001” on Tuesday, June 26, 2001 at 10:00 a.m. in SD226. No witness list is available yet.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet on Tuesday, June 26, 2001, at 10:00 a.m. for a hearing entitled “Diabetes: Is Sufficient Funding Being Allocated To Fight This Disease?”

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON STRATEGIC

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Subcommittee on Strategic of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, June 26, 2001, at 10:00 a.m., in open session to receive testimony on the Department of Energy’s fiscal year 2002 budget request for the Office of Environmental Management, in review of the Defense Authorization request for fiscal year 2002 and the future years defense program.

The PRESIDING OFFICER. Without objection, it is so ordered.
PRIVILEGE OF THE FLOOR

Mrs. CLINTON. Mr. President, I ask unanimous consent that Dr. Mary Catherine Beach, a legislative fellow in my office, be granted the privilege of the floor for the duration of the debate on S. 1052, the McCain-Edwards-Kennedy Patients’ Bill of Rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY, JUNE 27, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:30 a.m. on Wednesday, June 27. Further, I ask consent that on Wednesday, immediately following the prayer and the pledge, the Journal of Proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the Patients’ Bill of Rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, the Senate will convene at 9:30 a.m. and resume consideration of the Patients’ Bill of Rights. There is 1 hour of debate on the Allard amendment regarding small employers, followed by a vote in relation to the amendment at approximately 10:30 a.m.

Following the Allard vote, there will be 1 hour of debate on the Nelson-Kyl amendment regarding contracts, followed by a vote in relation to the amendment. Following disposition of the Nelson-Kyl amendment, we expect Senator Edwards or his designee to be recognized to offer an amendment regarding medical necessity.

We are going to conclude consideration of Patients’ Bill of Rights, I have been told on more than one occasion today by the majority leader, this week. We will also complete the supplemental appropriations bill and the good work that has been done preliminarily by Senators Byrd and Stevens. This is something we will be able to do without requiring a lot of time. Then we wish to complete the organizational resolution that has been pending for several weeks.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. REID. If there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate at 8:22 p.m., adjourned until Wednesday, June 27, 2001, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate June 26, 2001:

DEPARTMENT OF TRANSPORTATION

JEFFREY WILLIAM RUNGE, OF NORTH CAROLINA, TO BE ADMINISTRATOR OF THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, VICE SUSAN BAILEY.

DEPARTMENT OF COMMERCE

NANCY VICTORY, OF VIRGINIA, TO BE ASSISTANT SECRETARY OF COMMERCE FOR COMMUNICATIONS AND INFORMATION, VICE GREGORY BORDE, RESIGNED.

DEPARTMENT OF THE TREASURY

ROBERT C. BONNER, OF CALIFORNIA, TO BE COMMISSIONER OF CUSTOMS, VICE RAYMOND W. KELLY, RESIGNED.

Rosario Marin, of California, to be Treasurer of the United States, Vice Mary Ellen Withrow, Resigned.

DEPARTMENT OF STATE

ROGER FRANCISCO NORIEGA, OF KANSAS, TO BE PERMANENT REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE ORGANIZATION OF AMERICAN STATES, WITH THE RANK OF AMBASSADOR, VICE LUIS J. LAURERGO.

JEANNE L. PHILLIPS, OF TEXAS, TO BE REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT, WITH THE RANK OF AMBASSADOR, VICE AMY L. BONDBURANT.

IN THE MARINE CORPS

The following named officer for reappointment in the United States Marine Corps to the grade indicated while assigned to a position of importance and responsibility under Title 10, U.S.C., Section 601:

To be lieutenant general

LT. GEN. EARL B. HAILSTON, 0000
The House met at 9 a.m. and was called to order by the Speaker pro tempore (Mr. CULBERSON).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

I hereby appoint the Honorable JOHN ARNEY CULBERSON to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

MORNING HOUR DEBATES

The SPEAKER pro tempore, Pursuant to the order of the House of January 3, 2001, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to not to exceed 25 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to not to exceed 5 minutes, but in no event shall debate extend beyond 9:50 a.m.

The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

PROJECT IMPACT

Mr. BLUMENAUER. Mr. Speaker, numerous natural events of the past few months, including the earthquake in the State of Washington and Tropical Storm Allison of just recent days in Texas and Louisiana, have underscored our need for disaster preparedness.

What we have learned from these events is that we can in fact save lives and money by making investments up front to protect our communities. What we have learned is that what we do in the beginning by hardening the sites, preparing people’s responses, moving out of harm’s way, has an overwhelming payback, a payback not just in money but in lives saved and injury and human misery avoided.

As was pointed out in yesterday’s Washington Post, spending money in disaster mitigation pays off. It has often been cited that in the great flood of 1993, Charles County, Missouri, suffered $26 million in damages. However, the same area, after a significant buyout and a similar flood 2 years later, experienced only $2,000 in damage. Our friends at the Federal Emergency Management Agency believe that in the past 8 years the buyout programs of the Federal government have received a 200 percent rate of return in investment in disaster mitigation.

It is frustrating that, in the wake of these tragedies, the Bush administration and its Office of Management and Budget have proposed cutting funds for several of these Federal mitigation programs, including FEMA’s Project Impact.

Mr. Speaker, I have had significant opportunity to interact with the men and women working with Project Impact. This was one of the creations of former Director James Lee Witt that has in fact earned him international recognition.

I have seen that, contrary to the administration’s assertion that Project Impact has not proven effective, I have seen Project Impact leverage even a modest Federal investment in my own community to be a lynchpin for additional commercial investments, as well as careful planning and consideration by local government.

I had an opportunity last fall to address the Conference of Project Impact Volunteers. One of the most important aspects of this program is the development of the human infrastructure to aid in disaster mitigation. It is hard to imagine a Federal investment doing more than to produce these dedicated volunteers making the difference in making these programs work.

Project Impact is not a grant program. It provides seed money to build disaster-resistant communities. It is a commonsense approach to help communities protect themselves. It offers more than technical assistance. It puts the latest technology and mitigation practices into the hands of local communities, and most important, it brings people together to understand how they can solve their own problems.

Started just 5 years ago with seven pilot projects across the country, there are now 2,500 Project Impact business partners, including Federal agencies like NASA, that are working in 250 Project Impact communities.

Mr. Speaker, Joe Allbaugh, a long-time friend and Bush appointee, the new Director of FEMA, has pointed out that he is deeply impressed by the “swift and tangible results,” his words, of buy-out programs and other efforts to mitigate the cost of disasters before they strike. I know from the news accounts that he has taken his budget concerns to the OMB who need to understand the potential benefits of continuing this program.

I must commend the Bush administration for understanding the potential of using reform in other contexts. I appreciate and applaud their putting money in the budget that signifies reform of the National Flood Insurance Program.

The gentleman from Nebraska (Mr. BERREUTER) and I for the last 2 years have been working to reform the flood insurance program so it is no longer subsidizing people to live in areas where it is repeatedly shown that it is dangerous and inappropriate.

I hope the administration will build on this notion of reform that they are proposing in flood insurance and carry it over in Project Impact. We cannot afford to lose it.

RECESS

The SPEAKER pro tempore, There being no further requests for morning hour debates, pursuant to clause 12, rule I, the House will stand in recess until 10 a.m.

Accordingly (at 9 o’clock and 8 minutes a.m.) the House stood in recess until 10 a.m.

AFTER RECESS

The recess having expired, the House was called to order at 10 a.m.

PRAYER

The Reverend Lawson Anderson, Canon Pastor, Episcopal Diocese of Arkansas, Little Rock, Arkansas, offered the following prayer:

Let us pray. Gracious God, as we prepare in the week ahead to celebrate the anniversary of the founding of this Republic, we commend this Nation to Your merciful care. We pray that being guided by Your providence we may live securely in Your peace.

Grant to the President of the United States, to the Members of this Congress, and to all in authority wisdom and strength to know and to do Your will. Fill them with the love of truth and righteousness and make them ever mindful of their calling to serve this country in Your fear. Guide them as they shape the laws for maintaining a just and effective plan for our government.

☐ This symbol represents the time of day during the House proceedings, e.g., ☐ 1407 is 2:07 p.m.

 Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.
Give to all of us open minds and caring hearts and a firm commitment to the principles of freedom and tolerance established by our Nation’s founders and defended by countless patriots throughout our history.

Help us to stamp out hatred and bigotry, to embrace the love and concern for others that You have clearly shown to be Your will for all mankind. Bring peace in our time, O Lord, and give us the courage to help You do it.

For we ask this in Your name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day’s proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. ISAаксON. Mr. Speaker, pursuant to clause 1, I demand a vote on agreeing to the Speaker’s approval of the Journal.

The SPEAKER. The question is on the Speaker’s approval of the Journal.

The question was taken; and the Speaker announced that the ayes had it.

Mr. ISAаксON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Pursuant to clause 8, rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from New York (Mr. McNULTY) come forward and lead the House in the Pledge of Allegiance?

Mr. McNULTY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WELCOME TO REVEREND LAWSON ANDERSON, GUEST CHAPLAIN

(Mr. HUTCHINSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUTCHINSON. Mr. Speaker, it is with great pleasure that I welcome Reverend Lawson Anderson to the floor and thank him for such an encouraging opening prayer.

Reverend Anderson is a lifelong resident of Arkansas and thousands have been blessed with his compassion and support in times of crisis. He is well-known for his wisdom, his wonderful wit, and his easy manner in any situation. After successful careers in forestry and banking, Lawson was called to the ministry and has served Episcopalian congregations in Sprinoble, Newport, and North Little Rock.

In his life, Lawson reflects a true commitment to helping and encouraging others; from prison ministries to respite care for the elderly; from youth services to mental health; from crisis to crime prevention.

After 25 years of ministry, he continues his work. He has provided support and counseling to law enforcement officials, educators, and health professionals following the tragic school shootings in Jonesboro and the tornadoes in Central Arkansas.

He has served his community, his State, and his Nation with honor and compassion. While he reminds me that he is here today not to be praised but to pray, I am honored to have him pray with us today and to recognize the work he has done for the people of Arkansas and thousands have been blessed with his compassion and wonderful heart.

Mr. Speaker, it is with great pleasure that I welcome Reverend Lawson Anderson to the House.

He has served his community, his State, and his Nation with honor and compassion. Mr. FORBES appeared at the bar of the House and took the oath of office, as follows:

Do you solemnly swear that you will support and defend the Constitution of the United States against all enemies, foreign and domestic; that you will bear true faith and allegiance to the same; that you take this obligation freely, without any mental reservation or purpose of evasion, and that you will well and faithfully discharge the duties of the office on which you are about to enter. So help you God.

The SPEAKER. Congratulations, you are now a Member of the 107th Congress.

WELCOMING THE HONORABLE J. RANDY FORBES TO THE HOUSE OF REPRESENTATIVES

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, it is my pleasure to welcome the newest Member of the House, RANDY FORBES, of Chesapeake, Virginia.

RANDY won a hard-fought battle to represent the Fourth District of Virginia, which was represented by our colleague and very, very good friend, Norman Sisisky, for the last 18 years.

RANDY comes to Congress with a strong legislative background. He has served in the Virginia General Assembly since 1990, first as a member of the House of Delegates, then as a State senator since 1997. He held leadership positions in both bodies.

RANDY also has served as the chairman of the Republican Party of Virginia. He had tremendous success recruiting candidates and is credited with helping Republicans take control of the Virginia House of Delegates for the first time in modern history.

While in the General Assembly, RANDY was a leader in the Commonwealth’s drive to abolish parole and enact truth-in-sentencing laws. He was the chief patron of a bill that allows teachers to enforce discipline in their classrooms without fear of being sued. And he led the effort to create a school construction grants program to assist localities with the skyrocketing costs of building new schools to help reduce classroom overcrowding.

I have known RANDY for a long time. He is good, he is honest, he is ethical, he is decent, he is very, very capable legislator. I know he will be an outstanding addition to the United States Congress. He has a longstanding relationship with a number of other Members, particularly with those of us from the Virginia delegation and we will have no trouble at all adapting to how things are done here in Congress.

RANDY earned his law degree from the University of Virginia and was the valedictorian of his 1974 graduating class at Randolph-Macon College. He and his wife of 22 years, Shirley, live in Chesapeake, Virginia. They have four children.

Mr. Speaker, it is my pleasure to welcome RANDY to the United States Congress. Joining us today are Senator JOHN W. WARNER and Senator GEORGE ALLEN. I, along with my other colleagues from Virginia and across the country, look forward to working with you.

EXPRESSING GRATITUDE ON ELECTION TO CONGRESS

(Mr. FORBES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORBES. Mr. Speaker, I can think of no honor greater than the privilege of joining the men and women of this body for whom I have such great respect. I want to personally thank you, the congressional leadership, and those men and women on both sides of the aisle who have been so gracious in assisting us in our quick transition to this new office.

Mr. Speaker, I am also aware that I will benefit greatly by standing on the shoulders of a great legislator, Norman Sisisky, who worked tirelessly for his constituents for over 18 years. Since he is no longer with us, and I cannot thank him personally, I would like to thank his family and his staff for the service his office has provided over the years.

Mr. Speaker, I also want to thank all the people of the Fourth Congressional District for giving me their trust and confidence. I particularly want to thank my wife, Shirley, my children, family, friends and all the people for all their help. I promise to each of you that I will give all my energy, all my ability, and all my passion to representing the ideals of this Congress and of fulfilling the hopes, dreams and needs of the people of the Fourth Congressional District of Virginia.

Mr. Speaker, last but certainly not least, I am grateful to the Lord for giving me the wonderful gift of living in the greatest Nation on the face of the earth. I will continue to pray that God will give me the wisdom and strength to serve the men and women of the fourth district and that He will continue to bless this great Nation.

REPUBLICANS TRIUMPH IN ANNUAL CONGRESSIONAL BASEBALL GAME

(Mr. OXLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OXLEY. Mr. Speaker, today is the day of bragging rights for the congressional baseball game. I am proud to
There has been no contact with her since she was arrested over 4 months ago. All attempts to locate Gao Zhan have failed. The United States ambassador in China and other United States officials as well as attorneys from both the United States and China have tried to locate the whereabouts of Gao Zhan. The Chinese government has refused to share any information.

I have introduced H.R. 1385, which grants Gao Zhan citizenship in the United States without her being administered the oath of renunciation and allegiance. This bill is critical since Gao Zhan is being held against her will in China and the law provides different treatment to United States citizens than it does to United States lawful permanent residents. Congress needs to confer this citizenship on Gao Zhan. She is one who needs to be reunited with her family.

TIME TO STOP POINTING FINGERS

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, in the past few weeks Governor Gray Davis has turned up the rhetorical heat while Californians have turned out their lights because of rolling blackouts expected to plague the State all summer long.

The Governor has left no stone unturned in his campaign to point fingers in any direction. He has blamed the Federal Government. He has blamed electric utilities. He has blamed energy companies. He has even blamed President Bush. My God. He is the Energizer bunny of bankrupt ideas.

President Bush recognizes that America faces serious energy shortages, so his administration is putting forward a comprehensive plan to protect consumers from fluctuating fuel costs using 21st-century technology to diversify our clean and affordable energy sources.

But what does Gray Davis do? He hires spin doctors at $30,000 a month paid for by the taxpayers to explain why his State is suffering. I am sure Governor Davis realizes this is an inappropriate use of tax dollars, considering he is sitting on $26 million in campaign cash.

This reminds me of another disaster, Mr. Governor, the Exxon Valdez. That is your administration.

MONUMENT NEEDED FOR SOME OF THE BRAVEST AMERICANS

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, today is the 125th anniversary of Custer's last stand, a sad chapter in American history. To make it even worse, there is only one monument at Little Bighorn, to—General Custer!

Unbelievable. As the story goes, Uncle Sam took the whole Indian Nation and put them on a reservation. He took away their native tongue, taught English to their young, took away their way of life, killed their children and their wife. And even the beads they made by hand were then imported from Japan.

Beam me up. Is it any wonder that these brave warriors joined together massively for one last victory to be remembered throughout all of American history?

Now, Mr. Speaker, their descendants fight along with our soldiers to keep America free.

I yield back the need to build a lasting monument in tribute to some of the bravest Americans who ever lived right here in Washington, D.C.

PRICE CONTROLS MAY BE NICE POLITICS BUT THEY ARE LOUSY POLICY

(Mrs. BIGGERT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BIGGERT. Mr. Speaker, day in and day out I hear calls for price controls on electricity, and I wonder were the 1970s that long ago, or are we just suffering from convenient amnesia? Am I the only one who remembers the gas price controls imposed by President Richard Nixon in an effort to ensure an adequate supply of gasoline at reasonable rates? Am I the only one who remembers that the resulting artificial low prices did not lower consumption, but did lower supply? I guess I am the only one who does not look fondly back on the days of long lines at the local service station and gas rationing. Price controls may be nice politics, but they are lousy policy. The bottom line is that we are trying to meet today's energy needs with yesterday's energy infrastructure, and it is not working.

Our energy demand has increased 47 percent over the last 30 years, and yet we have half as many oil refineries, static pipeline capacity, and 20 times as many mandated gasoline blends. Low energy prices through the 1980s and 1990s have lulled American consumers and producers into believing that low prices will always be there, but now we know that is not true.

Perhaps Ali’s greatest testament was the only fight in which he declined to participate. With the war in Vietnam dragging on, the draft call was expanded, and the heavyweight champion of the world was reclassified as 1A, eligible for military service.

Ali was told the news at a training camp in Miami, and, badgered all day by the press, he came out with the now famous line, “I ain’t got no quarrel with them Viet Cong.”

It may have been a spontaneous remark, but he stuck by his word with courage, conviction and stood out against the conflict in Vietnam. His courage to stand by his belief in the years when the war was still favored by the majority of Americans will stand as a testament to those who protested.

I would encourage, Mr. Speaker, my colleagues in joining, along with the other 40 cosponsors, in awarding Muhammad Ali a Congressional Gold Medal. Please sign up.

CONGRATULATIONS TO CHARLTON “CHEWY” JIMMERSON, THIS YEAR’S OUTSTANDING PLAYER AT UNIVERSITY OF MIAMI

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, I congratulate the University of Miami baseball team for its exceptional coach Jim Morris for the flawless performance that enabled them to win the College World Series. The Hurricanes celebrated their 12-to-1 win over Stanford, and this victory marks their second annual title in 3 years.

Professional teams have drafted 11 talented Hurricanes, but it is Charlton Jimerson who won this year’s Outstanding Player Award.

Chewy, as he is called by his teammates, survived an unstable childhood. He was raised by his sister Lanette, who inspired confidence so that he would achieve and succeed. By writing a letter, Chewy invited himself to play at the University of Miami, and today this fifth-round draft choice of the Houston Astros is described as the emotional fuse for a dynamite team.

I ask my congressional colleagues to join me in congratulating outstanding player Charles Jimerson, his talented coach Jim Morris, and the amazing University of Miami baseball team for an outstanding victory once again.

PRICE CONTROLS, THE EVIDENCE IS THEY DO NOT WORK

(Mr. PETERSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETERSON of Pennsylvania. Mr. Speaker, wholesale electric price controls do not work. What better example of this than California? Leading energy experts have been saying for months that one major reason California is in its current energy mess is because of price controls. Now we have further evidence that the price controls are not the answer.

Last week the Department of Energy released a report indicating that if Governor Davis gets his way and a cost-plus-$25 price cap is implemented, Californians will be literally in the dark.

The Department of Energy report concludes that Governor Davis’ price caps would result in the delay or abandonment of about 1,300 megawatts of capacity scheduled to be constructed in the State. What does this mean to Californians? It means that 90,000 additional households could be affected.

As Pennsylvania learned, deregulation can be implemented with success, but price caps and unnecessary government regulations result in shortages and higher prices. We in Pennsylvania know that the Department of Energy concurs.

HARD-WORKING AMERICANS DESERVE ANSWERS AND THEY DEMAND A SOUND ENERGY POLICY

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, our economy over the last year has showed signs of slowing. Energy prices are already too high, and they are going higher. Much of our country faces either energy shortages, blackouts or both. Major energy shortages are expected throughout the summer for most of the West. Gas prices there top $2.25 a gallon at the pump. Hard-working Americans deserve answers, and they demand a sound energy policy.

Mr. Speaker, our Nation’s energy problems demand multifaceted solutions, including increased supplies of traditional fossil fuels and alternative sources of energy as well as improving energy conservation and efficiency. It will not be easy, and it will not be quick, but we have the technology and the resources to meet our energy needs for decades, even centuries, to come, while ensuring a clean environment as a legacy for our children as well.

We need to work with President Bush to create a balanced, comprehensive national energy policy that meets our energy challenges today and provides for our needs well into the future.
ARTISTIC HOMES. A WAY TO CONSERVE OUR ENERGY RESOURCES

(Mrs. WILSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. WILSON. Mr. Speaker, on Saturday afternoon I was on the west side of Albuquerque at Artistic Homes. Artistic managers explained the way they build homes in order to reduce utility bills.

I met a first-time buyer family that is going to buy one of those homes. They were signing the papers that day. They currently pay $160 a month for their electric and gas bill, and they expect that bill will be $20 a month when they move into this new home.

That experience reinforces why conservation must be a part of our energy agenda. We have an energy problem in this country. It is toughest in the West, but it affects us all. There are not going to be any quick fixes. We need a balanced, long-term approach to give us the security and the energy that we need. This is too important to do anything but the right thing.

We need to start with conservation. We have made tremendous progress in this country over the last 20 years. We are not going back, and nobody wants to. We need a balanced mix of new supplies of energy, and we have to bring on the next generation of new supplies of energy. It is time to pull together and lead, to give us real answers for our energy problems.

THE TIME HAS COME TO CHANGE THE OUTDATED DAVIS-BACON ACT

(Mr. BALLenger asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLenger. Mr. Speaker, I would like to speak to one of many problems on the outdated Davis-Bacon Act of 1931. As my colleagues know, this law requires the labor that is paid on local construction projects receiving over $2,000 in Federal aid must adhere to the Federal prevailing wage, which on average is 17 to 22 percent higher than the State level. Because of these higher wages, State and local construction projects can cost up to 38 percent more than they would have without the act.

This enormous waste of taxpayers dollars is proof that the Davis-Bacon Act should be modernized. In the 70 years since its introduction, the act has never been adjusted for inflation and has not been amended according to current construction standards. Meanwhile, inflated Davis-Bacon costs continually hinder emergency relief efforts and federally-assisted construction projects because of the additional costs that localities must pay if they receive a mere $2,000 in Federal aid.

Because this $2,000 minimum was set in 1931 and has never been adjusted, the gentleman from North Carolina (Mr. COBLE) and I have introduced H.R. 2094, the Davis-Bacon Modernization Act, which would increase the threshold from $2,000 to $100,000. While many of my colleagues believe this number is not high enough, I believe it is a good start. Let us make this law more reasonable and, above all, helpful. I urge my colleagues to help communities across the country to get more bang for their buck. Cosponsor and support the Davis-Bacon Modernization Act.

THE AGRICULTURAL SUPPLEMENTAL RELIEF ACT

(Mr. POMEROY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. POMEROY. Mr. Speaker, it is another tough year for the farmers of this country. Commodity prices once again are below the cost of producing the crop. Imagine the frustration of investing one's heart and soul and extending virtually everything they own to grow a crop that when it is harvested and it is taken to the elevator, the money that is received does not even cover the costs they had of growing it. That is, of course, if the production season is a good one and a crop is actually gotten. Yesterday I was in fields in North Dakota that have been totally devastation by hail. There will be no crop for these farmers. There will be no income of any kind at the elevator. I raise this to everyone's attention because in a few minutes we are about to consider the Agricultural Supplemental Relief Act. Unfortunately, the Committee on Agriculture brings forward a proposal that reduces by about 15 percent the amount of relief and support we gave to farmers last year.

Now farmers stand again. Now farmers have once again taken to the streets, costing more to grow the crop. The prices are still lowly. It is no time to cut relief for our farmers. Reject this and increase assistance.

NORTH KOREA

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, I recently met with a German doctor, Dr. Norbert Vollertson, and talked to him about his experiences during his 18 months living in North Korea.

The stories of suffering and the photos of starving children and adults were deeply moving. Dr. Vollertson made a strong statement that should spur the international community to action.

When comparing the North Korean prison camps to Nazi concentration camps, Dr. Vollertson said, "No journalist, nobody wanted to believe that Hitler is so cruel, that the German government is so cruel. I think it is my duty as a German to learn from history, to not make the same mistake twice."

He said what is happening in North Korea in the concentration camps, in his opinion, is as bad as what happened during the Second World War. It is the duty of the international community not to make the same mistake again, to ignore the plight of thousands of people in North Korea who are starving and in terrible prison situations where they are beaten and tortured and executed in horrific ways.

Mr. Speaker, I call on this body and the administration to act on behalf of the people of North Korea, to act to ensure that the regime in North Korea is no longer allowed to continue destroying its people.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SHIMKUS). Pursuant to clause 8 of rule XX, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered or on which the vote is objected to under clause 6 of rule XX.

Any record votes on postponed questions will be taken later today.

RECOGNIZING OUTSTANDING AND INVALUABLE DISASTER RELIEF ASSISTANCE PROVIDED DURING TROPICAL STORM ALLISON

Mr. COOKSEY. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 166) recognizing the outstanding and invaluable disaster relief assistance provided by individuals, organizations, businesses, and other entities to the people of Houston, Texas, and surrounding areas during the devastating flooding caused by tropical storm Allison.

The Clerk read as follows:

WHEREAS numerous individuals and entities have selflessly and heroically given of themselves and their resources to aid in the disaster relief efforts; and

WHEREAS this disaster tragically and suddenly took the lives of 21 people; and

WHEREAS this disaster injured countless other people, uprooted families, and devastated businesses and institutions; and

WHEREAS the State of Texas has been declared a Federal disaster area, and individuals and families in 28 Texas counties are eligible for Federal assistance; and

WHEREAS numerous individuals and entities have selflessly and heroically given of themselves and their resources to aid in the disaster relief efforts; and

WHEREAS the catastrophic injury, death, and damage in Houston, Texas, and surrounding areas caused by tropical storm Allison would have been even worse in the absence of local relief efforts: Now, therefore, be it

CONGRESSIONAL RECORD—HOUSE June 26, 2001
Resolved. That the House of Representa-
tives, recognizing the outstanding and inva-
surable service during the devastating flooding
crushed by tropical storm Allison in Houston,
Texas, and surrounding areas, the following:
(1) The American Red Cross, located at the
Sunset Multi-Service Center, Friendswood
Activity Center, Lake Forest Church, and Berean
Seventh Church, the American Red Cross lo-
cated at Salvation Army Community Center,
Arbor Lights Men’s Shelter, the B.L.O.C.K.,
Oak Village Middle School, Kirby Middle
School, and the many other voluntary relief
sites and shelters who rendered outstanding and
invaluable assistance to the victims of the disaster;
(2) the Houston Police Department, the
Houston Fire Department, and the Sheriff’s
Department of Harris County, Texas, who
disbursed with bravery and dedication in
rendering assistance to the people of
Houston, Texas during the disaster;
(3) Houston Mayor Lee Brown, particularly
for his efforts in establishing the Adopt-a-
Family program and for his collaboration in
the disaster relief efforts with Robert
Echols;
(4) Texas Governor Rick Perry and all
other State and local officials, who provided
invaluable support and assistance;
(5) the Federal Emergency Management
Agency, who quickly deployed and responded
to the disaster;
(6) the United States Coast Guard;
(7) the Texas Army National Guard, who
quickly deployed and responded to the dis-
aster;
(8) the employees of Texas Medical Center,
Memorial Hermann Hospital, and Houston
Veteran’s Hospital, who struggled heroically
to perform their jobs amid chaos;
(9) all the volunteers, who are too numer-
ous to name, but who made heroic efforts
and special sacrifices and played a crucial role in the
disaster relief efforts;
(10) the private sector, including major
Corporations, other businesses of all sizes,
and their employees, who rapidly and volun-
tarily donated money and other resources to the
disaster relief efforts;
(11) the many media organizations who
aided the relief effort by keeping the commu-
nity closely and extensively informed, re-
quested information, and providing informa-
tion regarding dangerous roads; and
(12) all the individuals and organizations
who immediately and unselfishly helped the
people of Houston, Texas, and surrounding
areas in their time of need, took quick and
decisive action for the public good, and
demonstrated an ability to work together for a
brighter future.

The SPEAKER pro tempore. Pursu-
ant to the rule, the gentleman from
Louisiana (Mr. COOKSEY) and the gentle-
man from Texas (Mr. LAMPSON) each will
control 20 minutes.

The Chair recognizes the gentleman
from Louisiana (Mr. COOKSEY).
Mr. COOKSEY. Mr. Speaker, I yield
myself 4 minutes.
Mr. Speaker, I rise today in strong
support of this resolution, and I join
the gentleman from Texas (Ms. JACKSON-LEE),
who authored the bill. And while I
could list too many colleagues in
extending my sincere thanks and appreciation to all of
the personnel throughout the two states who
have devoted their lives to disaster relief efforts.

Having walked the streets of Houston,
Texas, and saw the heartache and loss, both fiscal and
emotional, and got a chance to see a lot of
that devastation. The people of Friendswood are a strong and resilient
people, but without the heroics of
dedicated individuals in their
lives to disaster recovery, the casual-
ties and destruction could have been much worse.

This resolution recognizes the in-
valuable disaster relief of various agencies,
organizations, businesses, and indi-
aviduals who assisted the people of
Houston and the surrounding areas
during the devastating floods of
Tropical Storm Allison. The resolution
states that although 21 people died, the
casualties and destruction would have
been even worse, if not for the disaster relief
given by American Red Cross
centers, the voluntary donation of
money and resources from individuals
and private businesses of Texas, the
heroes of the United States Coast
Guard, the Houston police and fire
departments, and the valiant efforts of
many other hospitals and shelters. The
bill also lauds the recovery actions of
Houston Mayor Lee Brown and Texas
Governor Rick Perry.

Looking back to Monday, June 4,
when the reconnaissance aircraft first
reported the development of Allison, I
realized that the main impact of this
storm would not be the wind, but would
be the rain. Rain totals throughout
Harris County in and other portions of the
district exceeded 30 inches during the
period when the remains of Allison brought
relentless flooding to the upper Texas
Gulf Coast.

Of course, no words can adequately
describe the devastation that the
Greater Houston area felt in the wake of the storm. The Texas coast certainly
had not seen flooding of this magnitude
in decades. Clearly, this event was
more than a wake-up call; it was a
starkest reminder of the impressive forces
that still govern the Earth.

In the midst of the disaster and peri-
ods of chaos, there were countless indi-
viduals and organizations who
donated nearly $500 million,
most instantaneously to help the vic-
tims caught by the flood waters. The
plight of one became the concern of
many, and people displayed an enor-
mous humanitarian spirit that tran-
scended all barriers.

The American Red Cross placed its
disaster relief plans into action and
opened numerous service centers
throughout Harris County and the
Ninth Congressional District of Texas.
The police, fire, sheriff, and emergency
response teams worked quickly and
without reservation to minimize inju-
riness and render invaluable assistance.

The disaster tragically claimed the
lives of now 23 individuals from prac-
tically every walk of life and every
part of the city. Deaths would have
been in the hundreds, were it not for
the selflessness, professionalism, and dedi-
cation of all those who responded.
The media broadcast around the clock to keep the public constantly informed of the dangerous situation by disseminating critical information. Volunteers, many of whom were also suffering, responded to the calls for help from the various agencies, who were critical to the response efforts.

Our friends at FEMA also did a phenomenal job in a task that was as sobering as it was frustrating. Thousands of people were affected and the recovery and damage assessments still continue.

I toured the devastation firsthand by helicopter and on the ground. The scenes were tragic: lost homes, lost businesses, lost medical research, and lost lives. Yet the human spirit continues throughout Texas, Louisiana, and across the Gulf Coast States and up the Eastern Seaboard, where Allison ravaged property and tore apart lives. So as I stand here today reflecting on the tragedy, I am forever grateful to all who assisted; and my prayers continue for the suffering and the afflicted. The strength that all have displayed is worthy of our recognition.

Mr. Speaker, I reserve the balance of my time.

Mr. COOKSEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. DELAY).

Mr. DELAY. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, we have seen time and time again that the best qualities within the people that we know often emerge when the weight of a tragic event presses down upon us. In Houston, we have learned this lesson all over again. The unending rains from the Tropical Storm Allison overwhelmed our bayous, overflowed our streams, and flooded our streets and buildings and homes; but they did not dampen our Houston spirit.

We Texans pride ourselves on maintaining the spirit of the West. It has passed down from the early generations, who fought the elements, to build a new life in Texas. They were tested, and those that stayed shared a very common quality. They had the resilience and resourcefulness to outlast Mother Nature and overcome the obstacles that she places in our path.

Part of that creed is the understanding that when nature strikes, you pitch in to help your friends and neighbors. We understand that. We understand that when we rally together, no adversity, can keep us down for very long. Houstonians demonstrated that they were up to the task of running their responsibility to aid each other during Allison.

We feel deeply for all our neighbors who lost a loved one or a friend. This tragedy claimed far too many lives. Many others lost belongings and had their homes destroyed by the unrelenting fury of Allison. But we can be certain that far more people would have died if Houstonians had not responded as quickly and as vigorously as they did.

Many, many people deserve to be thanked for their efforts. We are grateful to the Coast Guard and Red Cross, to the National Guard troops, and our local police officers and fire fighters. We say thank you. For every individual citizen who lifted a hand and waded out into the flood waters to bring comfort and assistance, we say thank you so very much. Your efforts make us a great community and a great place to raise a family.

All Houstonians also appreciate the swift response from the Federal Emergency Management Agency and the Bush administration. By reacting quickly, they are helping us get back on our feet.

When I stopped by the Red Cross shelter in Pearland, I saw the best and most incredible of the men and women who pitched in in responding to Allison. Hanging inside the shelter was a little small sign that was written in crayon by a child, and it simply said "God bless you for helping us." When the floodgates opened on Houston, we were ready to respond with charity, sacrifice, hard work and compassion. I hope we always stand ready to react with the same qualities.

Mr. LAMPS, Mr. Speaker, I yield 4½ minutes to the gentleman from Houston, Texas (Ms. JACKSON-LEE), the author of the bill.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentleman for managing the bill, and I thank him for his support. I thank all of my colleagues for supporting H. Res. 166, and I rise to support the resolution that I introduced on June 14 to recognize the outstanding and invaluable disaster relief assistance that individuals and organizations and businesses and other entities provided to the people of Houston, Texas, and surrounding areas during the devastating flood that was caused by Tropical Storm Allison, one of the worst disasters that Houston has known.

Some people would ask, what is going on in Houston, Texas? I would simply say, the greatest amount of charitable spirit, heroic efforts, friendship, love, and the ability of a community to stand up together and say yes we can. But for the heroic efforts of those invaluable volunteers, the catastrophic death, injury and damage would have been far worse.

I commend my fellow colleagues in the House of Representatives, especially my fellow Members of the Texas delegation, for joining us in encouraging the heroic acts of selflessness and heroism.

I remember within the 24-hour time frame of being out walking in neighborhoods, flying overhead, looking at homes filled to capacity up to the roof with water, and hearing the tragedies of those who may have been stuck overnight, there were the encouraging words that people were saying, yes we can.

While words cannot even begin to describe adequately the destruction that Houston and surrounding areas knew, I hope to paint for you a visual picture.

More than three feet of rain that fell on the Houston area began June 6 and caused approximately 23 deaths. Over 20,000 people have been left at least temporarily homeless during the flooding, many with no immediate hope of returning to their homes. More than 56,000 residents in 30 counties have registered for Federal disaster aid. Over 3,000 homes have been destroyed, over 43,000 damaged. The damage estimates in Harris County, Texas, alone are about $4.8 billion.

Some of the areas that have been hit, universities in my congressional district, like the University of Houston, Texas Southern University, and a little neighborhood known as Kashmere Gardens. You would think a place filled with flowers. It is an enclave that has a high number of senior citizens, many of whom I visited in the last weekend, some still left in their homes, stranded, possessing few resources, yet with a strong spirit.

Other areas such as Sunnyside in southeast Houston, northwest Houston and around Scarborough High School. Additionally, of course, we all know a very important aspect of our community, the Texas Medical Center, has faced a very uphill battle. But I am very pleased that they are going to have the kind of support where all of the delegation members of this particular delegation will be supporting them and helping them with the millions and millions of dollars of damages, maybe in the billions of dollars of damage, to come back and be able to serve not only Texas, but to serve the Nation. Ten million gallons of water have inundated the medical center complex, and we are working to make sure that they get back on their feet.

But let me share the many personal stories, the help that the Red Cross has given, the 46 disaster centers, the Houston Fire Department, the sheriff’s department displayed great bravery and dedication in rendering assistance. Mayor Lee Brown and the Adopt-a-Family program, Judge Robert Eckles, the Texas Governor Rick Perry, all of us gathered together, huddled around the Houston TransCar Center, a center that was supposed to deal with traffic; but we determined that it could be an
June 26, 2001

CONGRESSIONAL RECORD—HOUSE

Mr. Speaker, I rise today to support H. Res. 166, a resolution I introduced on June 14 to recognize the outstanding and invaluable disaster relief assistance that individuals, organizations, businesses, and other entities provided to the people of Houston, Texas and surrounding areas during the devastating flooding caused by Tropical Storm Allison, one of the worst disasters Houston has known. But for the heroic efforts of those invaluable volunteers, the catastrophic death, injury and damage would have been far worse. I commend my fellow colleagues in the House of Representatives, and especially my fellow members of the Texas delegation, for joining me in encouraging these altruistic acts of selflessness and heroism.

Although words cannot even begin to describe adequately the destruction that Houston and its surrounding areas know, I will attempt to paint for you some of the havoc that the storm has wreaked. The more than three feet of rain that fell on the Houston area beginning June 6 has caused at least 23 deaths in the Houston area and as many as fifty deaths in six states. Over 20,000 people have been left at least temporarily homeless during the flooding, many with no immediate hope of returning to their homes. More than 56,000 residents in thirty counties have registered for federal disaster assistance. Over 3000 homes have been destroyed, over 43,000 damaged. The damage estimates in Harris County, Texas alone are $4.88 billion and may yet increase.

Mr. Speaker, I believe that this is an important resolution to be able to acknowledge, as the Houston Chronicle said, most of the countless acts of kindness and compassion, of heroism and self-sacrifice, that will go unseen and the heroes that will remain anonymous, even to those they helped.

I believe it is important to mention some of those personal stories. Time will not allow me to talk about Cora Clay, a sandwich shop employee who fed an entire shelter from funds from her own pocket, or Kathleen Ross who donated two of her rental properties, or the heroic police officers who could not swim, but yet jumped in. C.R. Bean and Mike Lumpkin and Matt May who jumped in to save those who were in their car, floating. The Texas Children's Hospital, the Coast Guard and Texas National Guard. Let me just simply conclude by saying, it gives me a special privilege to be able to thank all of those people who gave of their time, who gave of their heart. We have spirit in Houston and the surrounding areas. We have spirit in Texas, and we will overcome. Mr. Speaker, I rise today to support H. Res. 166, a resolution I introduced on June 14 to recognize the outstanding and invaluable disaster relief assistance that individuals, organizations, businesses, and other entities provided to the people of Houston, Texas and surrounding areas during the devastating flooding caused by Tropical Storm Allison, one of the worst disasters Houston has known. But for the heroic efforts of those invaluable volunteers, the catastrophic death, injury and damage would have been far worse. I commend my fellow colleagues in the House of Representatives, and especially my fellow members of the Texas delegation, for joining me in encouraging these altruistic acts of selflessness and heroism.

Additionally I note the damage which occurred at Texas Medical Center, because what has occurred affects us not just locally, or even in Texas, but nationally. The Texas Medical Center, home to some forty medical institutions, is the largest medical center in the world. Globally, reknown medical care and research takes place here. The flood has decimated these preeminent health institutions. The cost to restore the Center is about $2.04 billion, which is nearly all of the total $2.04 billion in damage at Harris County's public facilities. It serves 4.8 million patients yearly with a local economic impact of $10 billion. More than 52,000 people work within its facilities, which encompass 21 million square feet. The damage includes $300 million to Texas Methodist Hospital and $433 million to Veteran's Hospital.

The impact on the University of Texas Health Science Center at the Texas Medical Center is extensive, impacting medical education, research and the physical structures at this medical community have been affected.

Ten million gallons of water have inundated the medical school complex, and the earliest estimates suggest it will be more than three months before it is possible to restart classes. They run mid-July, including operation of one of the two Level One trauma centers in Houston. The ability of the center to serve the Houston community will be severely compromised for at least two months. In the entire Houston area, a total of 3,000 beds are out of service.

The UT Health Science Center has incurred $52 million in physical damage to the facility and $53 million to the equipment. A total of 400 emergency personnel have been required to assist in the clean up thus far. Moreover, preparation must still also be made for 825 medical students arriving in August, and the floor used for student service functions is estimated to be nine months away from re-opening. Until that point, teaching facilities and services must be dispersed across the city.

Research has been affected, destroying all animal based research due the death of all 4,000 animals. Some of these losses could take as long as three to four years to recoup, and some of the more senior graduate students may have lost their dissertation research, setting back their careers indefinitely. $105 million in sponsored research has been affected.

Yet the storm has not defeated our spirit. The citizens of Houston are facing the tragedy with the spirit of love and have displayed the true meaning of the biblical phrase the "peace of the midst of the storm." Unfolded numbers of individuals and organizations have risen to meet the overwhelming challenges that the storm has presented. Among those who have risen to this challenge is the American Red Cross, which at one time was running 48 disaster relief centers around the city to serve those in need, and who, along with the Salvation Army is serving thousands of meals per day.

The Houston Police Department, the Houston Fire Department, and the Sheriff's Department of Harris County, Texas have displayed great bravery and dedication in rendering assistance to the people of Houston, Texas during the disaster. Houston Mayor Lee Brown, Judge Robert Eckles, Texas Governor Rick Perry and all other State and local officials have provided invaluable support and assistance.

The Federal Emergency Management Agency is once again successfully fulfilling its mission, having quickly deployed and responded to the disaster, and the Small Business Administration has also been on the ground providing much needed disaster assistance to families and small businesses. The United States Coast Guard and the Texas Army National Guard have bravely and rapidly served through this disaster. Houston TransCar Center was an outstanding Storm emergency center where strategy to help the victims was designed.

Many major corporations, other businesses of all sizes, and their employees have who rapidly and voluntarily donated money and other resources to the disaster relief efforts. Many media organizations have aided the relief effort by keeping the community closely informed of the disaster and self-sacrifice, will go unsung and the heroes will remain anonymous, even to those they helped. Those who are known insist there was nothing exceptional about their actions, that they happened to be in the right place at the right time to help someone in need.

Sgt. C.R. Bean is a Houston Police officer who could not swim. Yet the acts of heroism by Mike Lumpkin and Matt May plunged into cold, rapidly rising water to attempt to save the lives of three young men whose vehicle had been swept off the road by the torrential waters. They spent at least an hour and a half and were able to save two. They were unable to save Chad Garren, but without the exceptional bravery of the officers, all three would have been lost. Shelters like Oak Village Elementary School and Kirby Middle School were invaluable in helping the displaced.

There have also been the ultimate sacrifices of people like Sharon Mateja of Warsaw, Missouri. Sharon was a Red Cross volunteer and member of the Board of Directors who was crushed by a van while helping another volunteer move bags of ice to a Red Cross van.

This flood has pushed ordinary people to do extraordinary things. As reported in the Houston Chronicle, "most of the countless acts of kindness and compassion, of heroism and self-sacrifice, will go unsung and the heroes will remain anonymous, even to those they helped. Those who are known insist there was nothing exceptional about their actions, that they happened to be in the right place at the right time to help someone in need."

Mr. Speaker, let me just simply conclude by saying, it gives me a special privilege to be able to thank all of those people who gave of their time, who gave of their heart. We have spirit in Houston and the surrounding areas. We have spirit in Texas, and we will overcome. Mr. Speaker, I rise today to support H. Res. 166, a resolution I introduced on June 14 to recognize the outstanding and invaluable disaster relief assistance that individuals, organizations, businesses, and other entities provided to the people of Houston, Texas and surrounding areas during the devastating flooding caused by Tropical Storm Allison, one of the worst disasters Houston has known. But for the heroic efforts of those invaluable volunteers, the catastrophic death, injury and damage would have been far worse. I commend my fellow colleagues in the House of Representatives, and especially my fellow members of the Texas delegation, for joining me in encouraging these altruistic acts of selflessness and heroism.

Although words cannot even begin to describe adequately the destruction that Houston and its surrounding areas know, I will attempt to paint for you some of the havoc that the storm has wreaked. The more than three feet of rain that fell on the Houston area beginning June 6 has caused at least 23 deaths in the Houston area and as many as fifty deaths in six states. Over 20,000 people have been left at least temporarily homeless during the flooding, many with no immediate hope of returning to their homes. More than 56,000 residents in thirty counties have registered for federal disaster assistance. Over 3000 homes have been destroyed, over 43,000 damaged. The damage estimates in Harris County, Texas alone are $4.88 billion and may yet increase. Some of the most hard hit areas include the University of Houston, Texas Southern University, and the Kashmere Gardens neighborhood, a Houston enclave that has a high number of elderly citizens and possesses the fewest resources needed to bounce back from this once in a lifetime event. Other areas such as Sunnyside and South East Houston—northwest Houston around the Scarborough High School area were also hard hit.

Mr. Speaker, let me just simply conclude by saying, it gives me a special privilege to be able to thank all of those people who gave of their time, who gave of their heart. We have spirit in Houston and the surrounding areas. We have spirit in Texas, and we will overcome.
and without condition to our community in need.

At two hospitals in the Texas Medical Center, the Memorial Hermann Hospital and Memorial Hermann Children’s Hospital, located in the Texas Medical Center, the flooding caused the loss of all utilities. The hard working employees of the hospitals along with Life Flight, the Coast Guard and the Texas National Guard struggled heroically amid chaos to evacuate successfully and safety 540 patients to other hospitals via helicopters and ambulances, some to hospitals as far away as San Antonio and Austin.

Several houses of worship have opened their doors and hearts to the community to give disaster relief assistance, including use of their buildings for FEMA disaster centers and Red Cross Service Centers. Father Enette of St. Peter Claver Church opened his doors, in the midst of his recovery from a stroke. Father Enette told the congregation that the church would incur the substantial increased use of electricity and water as a result of opening its doors. Paster Lewis opened the doors of the BLOCk Church for use as a full time FEMA center to provide relief for those located in the Sunnyside South Post Oak area. There is the kindness of Paster Kirby Caldwell from Windsor Village Church, who made a delivery of clothing and food to one of the shelters within our district. And there is the group known as the Baptist men, who have prepared more than 62,000 meals. Minister Robert Muhammad and Makeba Muhammad from Mosque #45 in Houston, fed over 3,000 families. Lakewood Church opened its doors to over 2,000 people during the early morning hours after the flood.

Each and every effort made to help the flood victims has been done not so for recognition and public glory, but because it is the right thing to do.

Mr. Speaker, this resolution attempts to recognize all the individuals and organizations who immediately and unselphishly helped the people of Houston, Texas, and surrounding areas in their time of need, took quick and decisive action for the public good, and demonstrated an ability to work together for a brighter future.

As much as this disaster has torn apart our city and its surrounding areas, it has also bound us together, neighbors, friends and strangers alike. While we cannot personally thank everyone, may all of you know that your courage, hard work, sacrifice and kindness are recognized. And as we recover from this disaster, let us not forget to help those whose needs are heard, their patients gratefully acknowledged and hopefully prayers answered.

Mr. COOKSEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Houston, Texas (Mr. BRADY).

Mr. BRADY of Texas. Mr. Speaker, I want to thank the gentleman from Louisiana (Mr. COOKSEY), who has been such a good friend to Texas in all issues, including his help and response to Tropical Storm Allison. I also want to commend my Democratic colleagues, the gentlewoman from Texas (Ms. JACKSON-LEE), the gentleman from Texas (Mr. BENTSEN), the gentleman from Texas (Mr. GREEN), and the gentleman from Texas (Mr. LAMPSON), for their leadership in this effort as we jointly work together, and to the gentleman from Texas (Mr. DELAY) and the gentleman from Texas (Mr. CULBERSON), who together as a delegation have been working to try to recover and restore some sense of getting back on our feet in our region.

This storm was more than just numbers. For many of us who have lived in the area a long time, we have seen a lot of natural disasters in our part of Texas, but Tropical Storm Allison was stunning. While it caught us a bit, it did not look like it was a tough, difficult storm to start with; but the damage was remarkable. It is more than numbers.

When I look at the reports each day on the number of homes in my area, as I continue to ask for requests, and the numbers continue to go up and up. In 26 of my communities in North Harris County, in Montgomery County, in Waller and Washington County, we see now over 3,000 homes that have been flooded and need help. That is not including all of the businesses, small businesses, all the road and infrastructure damage. I look at all of the help that has been given by FEMA, the Disaster Assistance Center at Greens Point and all around our region, those people are working tirelessly. All of the volunteers, the firefighters, the police, the United Way agencies. We have wonderful emergency assistance directors in our counties that have I think been awake since the storm hit us.

For the families that are hurt so bad, this is so important because being flooded out is a miserable experience. It is so disheartening and disruptive. And the only thing that keeps us going is the prospect of those who are stepping forward to help us through this time of our friends, the community, even FEMA workers who I saw in the centers who had been flooded out themselves in other States, who felt the calling to help in the Houston region. It is because of all of those people that we are recovering today.

Mr. Speaker, our region is very strong. We have strong individuals and strong communities; but the assistance that has been provided, both within and without, is irreplaceable. So to all of the volunteers, to all that are helping and continue to help, I wanted to add my “thank you” and sincere appreciation for all that you do and continue to do. We cannot do enough.

Mr. LAMPSON. Mr. Speaker, I yield 2 minutes to the gentleman from Houston, Texas (Mr. BENTSEN), who suffered probably the largest amount of damage there.

Mr. BENTSEN. Mr. Speaker, I rise in strong support of this resolution, and I commend the gentlewoman from Houston, Texas, for offering it.

The flood waters from Tropical Storm Allison may have receded, but the damage remains. As I tour the damage in my part of Harris County, Texas, I am confronted with the many stories of tragedy and loss; but what shines through is the spirit of the people of Harris County, the sense of community that has neighbors reaching out to one another, unselfishly最好的 the ordinary blessings of compassion to less fortunate friends and neighbors. A citizenry summoned to the call of charity.

As torrential rains fell on Harris County, power outages at the Texas Medical Center meant patients had to be evacuated. Nurses, technicians, doctors, and orderlies came to the rescue and physically carried more than 540 patients down dark, wet stairways to safety. Volunteer organizations guided the volunteers down corridors to awaiting helicopters. Police and firefighters worked double and triple shifts to ensure public safety, even going days without sleep. These men and women who, without concern for their own flooding homes, but the interest of others ahead of their own and are those whom we recognize today.

In the trying times that have followed Allison, the true colors of the ordinary citizens and community leaders have shined. Banks and thrifts have generously offered to waive check-cashing fees and phone companies have donated cellular phones to disaster-relief shelters. More than 600 officials from the Federal Emergency Management Agency have assisted nearly 60,000 victims and the Red Cross has aided thousands more. I applaud the businesses and residents and volunteers for their efforts and commitment to transforming our city into a community.
June 26, 2001

CONGRESSIONAL RECORD—HOUSE 11897

Mr. CULBERSON. Mr. Speaker, the physical boundaries of the district I represent in west Houston, district seven, we were very, very blessed and fortunate to have escaped the flooding, in large part. We had a few very small isolated pockets of flooding, but the businesses of many of the people I represent were affected; and the entire city, of course, suffered a devastating blow as a result of the flood.

I was extraordinarily impressed to have seen firsthand the work of the emergency rescue personnel who were staging their operation out of my district in west Houston, out of Tully. The weekend the flooding began, I spent time there at the headquarters where the search and rescue teams were coordinated, by FEMA, bringing in resources from all over the State of Texas. The Colorado River Authority contributed personnel and equipment; the San Antonio Fire Department contributed personnel and equipment. There were resources from every corner of the State there to help the people of Houston; and it was an extraordinarily impressive operation, to see the ability of these rescue personnel to come in right away, right after the flood, to rescue people from their homes to save them from life-threatening situations. It was also instructive for me to see as a new Member of Congress that there was, immediately after that initial period of rescuing people, a gap in services where the City of Houston, the county was unable in many cases to actually get in to some of these neighborhoods that were so devastated to help people clean up their property, take care of the day-to-day essentials of living, which had all been brought to a screeching halt.

What particularly impressed me is that in that gap, between the time the rescue services came in to pluck people off their roofs and get them to hospitals and the time when the city and the county were able to really come into those neighborhoods and help, that gap, which was largely unfilled by local government, was filled spontaneously and almost immediately by the churches of Houston, by the civic associations, by individuals, by people stepping forward to help their own neighbors and family members.

Therefore, I ask all of my volunteers, all of the people that were gracious enough to help me throughout the last year’s election campaign and the people I know throughout west Houston, to contribute their volunteer time, their money and their efforts through their local churches and civic associations, but in particular through their churches, to help relieve the heroism of the recall the Second Baptist, First Indian Memorial drive of the United Methodist Church, which is stepping forward with volunteers and assistance, to help people tear out carpet, to get their homes restructured, rebuilt, their lives restructured where they do not have insurance.

That final phase of the recovery that is going on now, which will go on for months to come, is where the Federal Government can really step forward to help. That is why I am proud to be a co-sponsor of this resolution. It is a very, very good example of the unity that is so necessary among the members of the Texas delegation, the Houston congressional delegation, and working together, not only through this resolution to say “thank you” to all of the rescue personnel, but, more importantly, for us all to work together to find ways to ensure that the people who have lost their homes to fill the gap between what private insurance covers and what is not covered; that the Federal Government is there to help pay for the reconstruction, the relocation of families, and to do whatever is necessary to provide every available Federal dollar to repair the damage done to homes, to the Texas Medical Center, to all that irreparable research that was damaged as a result of the flood. The Houston area congressional delegation, the congressional delegation from Texas is unified and focused in doing everything that we can to ensure that the damage is repaired as fast as humbly possible.

Mr. Speaker, I want to reassure the people of Houston, the people of Texas that the money will be there to rebuild, to repair, and to, for the long term, plan for and prevent future floods of this type because of the unified and focused approach of the Houston and Texas congressional delegations.

Mr. LAMPSON. Mr. Speaker, I yield 2 minutes to the gentleman from Houston, Texas (Mr. GREEN), who toured the devastation with us.

Mr. GREEN of Texas. Mr. Speaker, like my colleagues, I represent an area that tragically succumbed to Tropical Storm Allison in northeast Harris County. I want to thank my Texas colleagues for putting this resolution together, but mainly to the hundreds and even thousands of volunteers and workers who donated their time to help Houston residents clean up.

At the top of the list would be the men and women of FEMA who literally were on the ground before the waters receded, assessing the damage and getting a head start on setting up the disaster recovery centers, three in our congressional district in the Jacinto City Community Building, Sheldon Intermediate School, and also in the Aldine School District School, the M.O. Campbell Center.

To date, FEMA has received 62,000 applications for assistance, and also their recovery centers have played a role in providing people a deal of comfort visiting the Red Cross Centers in our district, the FEMA neighborhood centers, and walking the streets in north and east Harris County showed the huge loss, but also the response from seeing literally people helping each other, communities pitching in and banding together, seeing people in Jacinto City and Galina Park in Aldine and northeast Houston, working together to help overcome this loss, seeing the loss at North Forest Independent School District, Sheldon ISD and also Houston Independent School District.

To date, we know that FEMA and the Small Business Administration made available millions of dollars through loans and grants to assist Houstonians in replacing their belongings and temporary housing. I urge FEMA to keep these disaster centers open as long as necessary so that individuals can continue to have access to vital services on a personal basis.

I would also like to thank the Coast Guard and our National Guard for their effort and the many employees of the City of Houston and Harris County for their efforts to rescue people and as they go through the cleanup effort now. Mr. Speaker. As Houston and southeast Texas and other areas affected continue the long process of rebuilding, I want to express my thanks to everyone and will continue to work to make sure that the Federal funds are there to help people in disasters.

Mr. LAMPSON. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Speaker, I appreciate people coming together to focus on the heroic efforts that have taken place in Houston in the aftermath of this terrible storm, but I hope we also focus on what we can do to prevent it in the future.

We should as a Congress invest in Project Impact which helps prepare communities before disaster occurs, rather than to cut it, as has been suggested by the administration. We also need to reform the flood insurance program so it no longer subsidizes people to live in places where God repeatedly shows that He does not want them.

It is important that we not ignore global climate change, because the scientist tell us if we are not careful, global climate change is going to make these horrible events that occurred in Houston far more frequent and far worse.

Mr. Speaker, this is an opportunity for us in Congress not only to reflect on the heroism that took place and to mourn the loss, but for us to step forward to take our responsibility to
make sure that we are doing everything possible so that it does not occur in the future.

Mr. LAMPSON. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. Mr. Speaker, I commend the gentlewoman from Texas (Ms. JACKSON-LEE), my colleague, and the other Members of the Texas delegation for introducing the resolution to recognize those who have helped the people of Texas during the recent flooding.

It is so important to take time to express gratitude to those who have brought relief to the people of Houston during the flooding and its aftermath. I know that Missourians who have experienced flooding, particularly the devastating floods of 1993 and 1995, understand what it takes to recover from such a disaster.

Mr. Speaker, we must not take the contributions of volunteers for granted, for their selfless efforts often come at a great price. If I can bring to this body's attention the time particular Red Cross volunteer who answered the call to help the victims of Tropical Storm Allison, Mrs. Sherry Mateja of Warsaw, Missouri, who was killed in a tragic accident last week while helping another volunteer move bags of ice from a tractor-trailer to a Red Cross van at a church in Humble, Texas.

A Red Cross volunteer since 1999, Mateja was an active volunteer with the Pettis County Chapter of the American Red Cross in Sedalia, serving in a leadership role on the chapter's board of directors. She was instrumental in providing Red Cross services in her local community, including the chapter's disaster relief and learning to swim programs.

It is essential to help relief efforts for Tropical Storm Allison in Texas was her first national disaster assignment. Mrs. Mateja is survived by her husband, John Mateja; three sons, Marc, Nick, and Eric; two grandchildren; her brother, Charles Maggard; and her mother, Margaret Maggard.

While recognizing the work of all the volunteers helping the Houston community, I ask my colleagues to join me today in paying special tribute to Sharon Mateja, for her contributions to her community and for her selfless efforts to help the people of Texas. I send my sincere condolences to her family and to her friends.

Mr. LAMPSON. Mr. Speaker, I yield 1 minute to the gentleman from East Texas (Mr. TURNER).

Mr. TURNER. Mr. Speaker, I represent 19 counties in the Second Congressional District in Southeast Texas, all of which were declared a disaster area during the recent tragedy of the Tropical Storm Allison.

I think we all come to the floor today with a deep sense of gratitude for the many who worked so tirelessly to help in that disaster.

Sure I want to mention three organizations that I know were among the private sector organizations that helped the victims of Tropical Storm Allison, that is the Salvation Army, the American Red Cross, and Texas Baptist Men.

Those three private organizations, in addition to literally scores of others, helped so rapidly and so efficiently along with our many State and Federal agencies during that time of crisis.

While the greatest damage was in Harris County, there was significant damage in all of the 19 counties that I represent. There has been over 63,000 contacts made to FEMA just in the last few weeks, so we all express our gratitude at this moment to the many who helped during time of crisis.

Mr. LAMPSON. Mr. Speaker, I yield the balance of my time to the gentlewoman from Houston, Texas (Ms. JACKSON-LEE), the author of the bill.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I yield to the gentleman from Texas (Mr. LAMPSON) for yielding the time to me and for managing the bill.

Mr. Speaker, I also thank the Committee on Transportation and Infrastructure, for their accomodation in moving this legislation to the floor of the House so quickly.

Let me also thank the House leadership and say, Mr. Speaker, that many times in giving comfort in a religious setting, we will say, this, too, will pass.

I am very grateful to have authored this legislation to not pass over those who have family members, were lost, or to pass over those who sacrificed in helping others.

Mr. Speaker, I again want to mention Sergeant C.R. Bean, a Houston police officer, who, as I indicated earlier, could not swim, and along with officers Mike Lumpkin and Matt May, plunged into cold rapidly rising water to attempt to save three lives. The likes of those individuals who came forward are an expression of the kind of spirit we have in Houston, Texas.

As indicated, many of us were out within 24 hours of the flood, joining the Coast Guard and joining FEMA Director Joe Allbaugh, in surveying the area. I want to you to know that the religious community stood tall.

It is very important to note the Sunnyside Multi-Service Center, the Friendswood Activity Center, Lakeewood Church, the Berean Seventh Day Adventist Church, the American Red Cross Centers, the Salvation Army, the Men's Shelter, the B.L.O.C.K., the Oak Vista Middle School, Super Home Missionary Baptist Church and Lakewood Church that opens it doors to 2,000 people right after the flood.

This was the kind of sacrifice, Mr. Speaker, that was made, Robert Muhammad and Makeba Muhammad from Mosque 45 in Houston who fed over 3,000 families.

Mr. Speaker, I would like to acknowledge the fact that we lost even a Red Cross worker and the name is Sharon Mateja of Warsaw, Missouri. Sharon was a Red Cross volunteer and a member of the board of directors who was crushed by a van when helping another volunteer move bags of ice to a Red Cross van.

Mr. Speaker, we would like to say that this will not happen again, but we are working diligently with the FEMA resources in restoring them back into the budget and being assured, as I was on the floor of the House, as the gentleman from Florida (Mr. YOUNG), Chairman of the Committee on Appropriations, that we would not let Houston and the surrounding areas not have the dollars it needs to be restored.

We will be fighting for those dollars; and to those who are seeking to be rebuilt and to be recovered, we will continue to work with you.

We will also work prospectively to ensure that we put in place the kind of structures that help us not have such incidents occur or prevent such incidents from occurring again.

Today, what we are doing, Mr. Speaker, is simply thanking all of those who are still standing and rising to the occasion. We are thanking the volunteers, the churches, the local officials, because the day still continues where they are recovering and seeking to recover.

It will be a long journey, but when someone asks what is going on in Houston, Texas, and the surrounding areas, I am saying great activities are going on, great people are working with others and we are doing the job to get the job done.

Mr. OBERSTAR. Mr. Speaker, I rise in strong support of H. Res. 166, recognizing the outstanding and invaluable disaster relief assistance provided by individuals, organizations, and businesses, to the people of Houston, Texas, and surrounding areas during the flooding caused by Tropical Storm Allison.

During the month of June Tropical Storm Allison brought devastating floods and damage from debris to Texas, Louisiana, Florida, and many other states. After the President declared the storm that hit Texas a major disaster, 28 counties became eligible for disaster assistance. Tropical Storm Allison is responsible for 21 deaths, countless injuries, and major damage to homes and businesses. Yet, through it all, many individuals and groups selflessly gave of themselves and
their resources to help in the disaster efforts. From the Red Cross and Salvation Army, to local law enforcement like Harris County Police and Fire Department, to the Texas Medical Center, to the United States Coast Guard, to the dedicated elected officials, to name just a few; they all made special efforts and sacrifices and today, we honor them for their service and dedication to their fellow citizens. The pending resolution calls our attention to our recent failure to ensure that we will be able to aid victims of Allison and future disasters. Just last week, while the Federal Emergency Management Agency (FEMA) was working diligently to help the victims of Tropical Storm Allison, the House passed H.R. 2216, the FY2001 Supplemental Appropriations Act, containing a provision, which many of us strongly opposed, to rescind $389 million in disaster relief funds from FEMA.

Current FEMA data are projecting the impact of Tropical Storm Allison on Texas, Louisiana, and Florida, and it expects to request additional funds to address these pressing needs. More than 25,000 flood insurance claims are expected from that region of the country, and FEMA is projecting the flood insurance claims for Tropical Storm Allison in Texas and Louisiana alone will exceed $350 million.

The proposed rescission could preclude FEMA’s ability to pay these claims and it might limit assistance to future victims of disasters and necessitate another supplemental spending bill. The rescission eliminates much of the funding needed by the agency to provide quick and effective assistance to disaster-stricken communities and victims. The most recent disaster data highlight the fact that these funds could be needed by FEMA to pay for natural disasters occurring in FY2002. They should not be rescinded.

Moreover, with the increases in climate change brought on by global warming, we should be prepared for more natural disasters. According to recent data, in 1999, the United States experienced the warmest January-March period since we began keeping these records 106 years ago. Climate change and these temperature patterns are likely to have a significant impact on major weather events, including droughts, floods, and hurricanes. Over the past decade we have seen a marked increase in natural disasters and this trend is expected to continue. FEMA data show that more frequent and severe weather calamities and other natural phenomena during the past decade required 460 major disaster declarations, nearly double the 237 declarations from the previous ten-year period, and more than any other decade on record. The increased number and severity of natural disasters has huge economic impacts on the United States. Comparing the three-year periods of 1989 through 1991, and 1997 through 1999, the federal cost of severe weather disasters increased 337 percent in less than ten years. Of the $35 billion that FEMA has spent in the last 20 years for disaster relief, $28 billion, or 80 percent, has occurred in the last seven years alone (1993–2000). In addition, the insurance industry has paid more than $7 billion in insured losses in these seven years.

Fortunately, the Senate Appropriations Committee has reported its Supplemental Appropriations bill and it does not contain the $389 million rescission from FEMA’s contingency fund. I am hopeful that the conference report on this bill will not accept the House provision on FEMA’s rescission. We are all aware of the critical and fundamental support that FEMA provides for the victims of natural disasters. It is essential that we do not hinder FEMA’s mission by allowing the unwarranted rescissions or cuts to FEMA’s budget.

Again, I commend the numerous individuals, government agencies, and groups of people in Texas who heroically gave of themselves and assisted their fellow citizens through a major storm. They serve as an inspiration to us all and I pledge to work together with FEMA and other agencies on behalf of these victims to help them rebuild their lives and renew their spirits.

I urge all Members to support H. Res. 166. Mr. CRENSHAW. Mr. Speaker, I rise in support of H. Res. 166, which honors the men and women, community organizations and businesses, and the government entities that provided relief and assistance to the people of Texas in the wake of Tropical Storm Allison. It is truly times like these, when Mother Nature strikes suddenly and strongly, that communities must come together to help people whose homes and businesses are damaged or destroyed and who might have suffered loss of life within their families. It is a true testament to the spirit of community to see neighbors selflessly helping neighbor in these circumstances, and I commend the men and women who lent of their time, energy, money, resources, and friendship to make the flooding in Houston and its suburbs less painful for their neighbors.

While the damage was not nearly so severe, I would be remiss if I did not mention the community spirit of Floridians who helped to reduce the pain and suffering that tropical storm Allison brought to the people of Florida. For instance, local fire and rescue workers attempted to save swimmers who regrettably drowned off of Florida Panhandle beaches in the storm-tossed waters of the Gulf. They also bravely worked to keep people off of the coastal ocean to guard against the flooding in Tallahassee and elsewhere in North Florida. Also, electric company and utility employees worked to keep power, water, and information flowing into people’s homes and businesses as North Florida was pelted with heavy rain, 40–55 mile-per-hour winds, and 15-foot waves.

It is in their honor, as well, that I ask my colleagues to support this resolution.

Ms. PELOSI. Mr. Speaker, I rise to speak in support of H. Res. 166 and applaud Ms. JACKSON-LEE for introducing this resolution. H. Res. 166 commends the many volunteers, public safety officials, agencies, and businesses that rose to the challenge of tropical storm Allison. The storm took 22 lives and caused at least $4.8 billion in property damage.

Living in San Francisco, in an area that is prone to natural disasters, I appreciate the commitment and heroism shown by so many people in the wake of a major natural disaster. Thanks to many brave and generous individuals, Houston and the communities around it pulled through the storm and are on the road to recovery.

I came back this morning from Houston, where I had the great pleasure of meeting my 6th grandchild, who was born on Sunday. While the damage in the area is clearly visible, so are the signs of healing. For my own family and all the people who call Houston home, I was pleased to see the recovery already underway. I urge my colleagues to support this resolution.

Mr. COOKSEY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SHIMKUS). The question is on the motion offered by the gentleman from Louisiana (Mr. COOKSEY) that the House suspend the rules and agree to the resolution, H. Res. 166.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LAMPSON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair’s prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. COOKSEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include therein extraneous material on H. Res. 166.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR ON H.R. 2149

Mr. COMBEST. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 2149.

The SPEAKER pro tempore. The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

2001 CROP YEAR ECONOMIC ASSISTANCE ACT

Mr. COMBEST. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2213) to respond to the continuing economic crisis adversely affecting American agricultural producers, as amended.

The Clerk read as follows:

H.R. 2213

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MARKET LOSS ASSISTANCE.

(a) ASSISTANCE AUTHORIZED.—The Secretary of Agriculture (hereafter in this Act referred to as the “Secretary”) shall, to the maximum extent practicable, use $1,622,240,000 of funds of the Commodity Credit Corporation to make a market loss assistance payment to owners and producers on a farm that are eligible for a final payment for fiscal year 2001.
under a production flexibility contract for the 1995 crop year under section 204(e) of the Agricultural Market Transition Act (7 U.S.C. 7201 et seq.).

(b) Amount.—The amount of assistance made available to owners and producers on a farm is the amount claimed by the owner or producer for the 1995 crop year under section 204(e) of the Agricultural Market Transition Act.

SEC. 2. SUPPLEMENTAL OILSEEDS PAYMENT.

The Secretary shall use $423,510,000 of funds of the Commodity Credit Corporation to provide a supplemental payment under section 204(b)(6) of the Agricultural Risk Protection Act of 2000 (Public Law 106–224; 7 U.S.C. 1421 note) to producers of the 2000 crop of oilseeds that previously received a payment under such section.

SEC. 3. SUPPLEMENTAL PEANUT PAYMENT.

The Secretary shall use $54,210,000 of funds of the Commodity Credit Corporation to provide a supplemental payment under section 204(b) of the Agricultural Risk Protection Act of 2000 (Public Law 106–224; 7 U.S.C. 1421 note) to producers of quota peanuts and additional peanuts for the 2000 crop year that previously received a payment under such section. The Secretary shall adjust the payment rate specified in such section to reflect the amount made available for payments under this section.

SEC. 4. SUPPLEMENTAL TOBACCO PAYMENT.

(a) Supplemental Payment.—The Secretary shall use $129,000,000 of funds of the Commodity Credit Corporation to provide a supplemental payment under section 204(a) of the Agricultural Risk Protection Act of 2000 (Public Law 106–224; 7 U.S.C. 1421 note) to producers of quota peanuts and additional peanuts for the 2000 crop year that previously received a payment under such section.

(b) Special Rule for Georgia.—The Secretary may make payments under this section to eligible persons in Georgia only if the State of Georgia agrees to use the sum of $13,000,000 to make payments at the same rate and the same time as required by section 204(b) of the Agricultural Risk Protection Act of 2000.

SEC. 5. SUPPLEMENTAL WOOL AND MOHAIR PAYMENT.

The Secretary shall use $15,940,000 of funds of the Commodity Credit Corporation to provide a supplemental payment under section 814 of the Agricultural, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (as enacted by Public Law 106–387) to producers of wool and mohair for the 2000 marketing year that previously received a payment under such section. The Secretary shall adjust the payment rate specified in such section to reflect the amount made available for payments under this section.

SEC. 6. SUPPLEMENTAL COTTONSEED ASSISTANCE.

The Secretary shall use $84,700,000 of funds of the Commodity Credit Corporation to provide supplemental assistance under section 204(e) of the Agricultural Risk Protection Act of 2000 (Public Law 106–224; 7 U.S.C. 1421 note) to producers of the 2000 crop of cottonseed that previously received assistance under such section.

SEC. 7. SPECIALTY CROPS.

(a) Base State Grants.—The Secretary shall use $12,000,000 of funds of the Commodity Credit Corporation to make grants to the several States and the Commonwealth of Puerto Rico to be used to support activities that promote agriculture. The amount of the grant shall be:

1. $500,000 to each of the several States;

2. $1,000,000 to the Commonwealth of Puerto Rico.

(b) Grants for Value of Production.—The Secretary shall use $153,400,000 of funds of the Commodity Credit Corporation to make a grant to each of the several States in an amount that represents the proportion of the value of specialty crop production to the total value of specialty crop production in the State in relation to the national value of specialty crop production, as follows:

(1) California, $63,320,000.

(2) Florida, $16,860,000.

(3) Michigan, $3,250,000.

(4) Oregon, $3,220,000.

(5) Arizona, $3,430,000.

(6) Washington, $9,610,000.

(7) Idaho, $3,670,000.

(8) Georgia, $2,730,000.

(9) Texas, $2,660,000.

(10) Wisconsin, $1,540,000.

(11) North Carolina, $1,540,000.

(12) Colorado, $1,510,000.

(13) North Dakota, $1,380,000.

(14) Minnesota, $1,250,000.

(15) Hawaii, $1,150,000.

(16) New Jersey, $1,150,000.

(17) Pennsylvania, $980,000.

(18) New Mexico, $900,000.

(19) Maine, $880,000.

(20) Ohio, $800,000.

(21) Indiana, $660,000.

(22) Nebraska, $540,000.

(23) Massachusetts, $610,000.

(24) Virginia, $620,000.

(25) Maryland, $590,000.

(26) Louisiana, $500,000.

(27) South Carolina, $440,000.

(28) Tennessee, $400,000.

(29) Illinois, $400,000.

(30) Alabama, $300,000.

(31) Delaware, $290,000.

(32) Mississippi, $250,000.

(33) Kansas, $210,000.

(34) Arkansas, $210,000.

(35) Missouri, $210,000.

(36) Connecticut, $180,000.

(37) Utah, $130,000.

(38) Montana, $140,000.

(39) New Hampshire, $120,000.

(40) Nevada, $120,000.

(41) Vermont, $120,000.

(42) Kansas, $120,000.

(43) New Hampshire, $120,000.

(44) Iowa, $100,000.

(45) Oklahoma, $80,000.

(46) Kentucky, $60,000.

(47) Rhode Island, $40,000.

(48) Alabama, $40,000.

SEC. 8. COMMODITY ASSISTANCE PROGRAM.

The Secretary shall use $10,000,000 of funds of the Commodity Credit Corporation to make a grant to each of the several States in an amount that represents the proportion of the value of agricultural commodities that are used by the States to cover direct and indirect costs related to the processing, transportation, and distribution of commodities to eligible agencies. The grants shall be allocated to States in the manner provided under section 204(a) of the Emergency Food Assistance Act of 1983 (7 U.S.C. 1735 note).
June 26, 2001

shall be entitled to receive for one or more contracts and ollseeds under the Agricultural Market Transition Act (7 U.S.C. 7201 et seq.) during the 2001 crop year may not exceed $150,000.

SEC. 11. TIMING, AND LIMITATION ON, EXPENDITURES.

(a) DEADLINE FOR EXPENDITURES.—All expenditures required by this Act shall be made not later than September 30, 2001. Any funds made available by this Act and remaining unexpended by October 1, 2001, shall be deemed to be unexpended, and the authorizing Act to expend such funds is rescinded effective on that date.

(b) TOTAL AMOUNT OF EXPENDITURES.—The total amount expended under this Act may not exceed $5,500,000,000. If the payments required by this Act would result in expenditures in excess of such amount, the Secretary shall reduce such payments on a pro rata basis as necessary to ensure that such expenditures do not exceed such amount.

SEC. 12. REGULATIONS.

(a) PROMULGATION.—As soon as practicable after the date of the enactment of this Act, the Secretary and the Commodity Credit Corporation, as appropriate, shall promulgate such regulations as are necessary to implement this Act and the amendments made by this Act. The promulgation of the regulations and administration of this Act shall be made without regard to—

(1) provisions of section 553 of title 5, United States Code;

(2) the statement of the Secretary of Agriculture effective July 24, 1971 (36 Fed. Reg. 13894), relating to notices of proposed rulemaking and public participation in rulemaking; and

(3) chapter 35 of title 44, United States Code (commonly known as the "Paperwork Reduction Act").

(b) CONGRESSIONAL REVIEW OF AGENCY RULEMAKING.—In carrying out this section, the Secretary shall use the authority provided under section 808 of title 5, United States Code.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. COMBEST) and the gentleman from Texas (Mr. STENHOLM) each will control 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. COMBEST).

Mr. Speaker, I rise today to advocate passage of H.R. 2213, a bill to provide economic assistance to farm producers for the 2001 crop year. The current farm recession, in its 4th year, ranks among the deepest in our Nation’s history, along with the Great Depression, the post-World War I and II recessions and the financial ruin of the 1980s.

There are many factors that contribute to this dismal situation. First, energy prices have skyrocketed, pushing up fuel and fertilizer to more than twice last year’s prices. Second, overseas markets continue the slump that started with the Asian financial crisis, and that has been compounded by the steadily increasing strength of the dollar is up to 25 percent relative to our competitors’ currencies, making our farm commodities significantly less marketable in overseas markets. Finally, tariff charges on our agricultural exports remain high, averaging 5 times those levied by the U.S.

Clearly, additional assistance for our farmers is needed. H.R. 2213 makes a good start in providing such assistance. With the help of the Committee on the Budget, the gentleman from Iowa (Chairman NUSSLE), in this year’s budget, Congress made available funding for fiscal year 2001 and fiscal year 2002 specifically to address the need for the assistance in the 2001 crop year.

The legislation before us today makes $5.5 billion available for that purpose. In my opinion, this amount is not sufficient to meet the needs of our producers, and I intend to work further as this bill moves forward through the legislative process to improve that message. But today the important point is to move the process along, because the fiscal year 2001 funds will expire unless congress passes new legislation. Therefore, it is imperative that a bill be sent to the President for signature before the August recess.

To ensure that outcome, the House must move the legislation this week. Despite its current imperfections, farmers need House passage of H.R. 2213 today.

The Committee on Agriculture is now in the process of writing a new multiyear farm bill that will end the need for these annual emergency packages. We expect to bring that bill to the floor before the end of the year and hope to have it in place for next year’s crop. But today we are dealing with the immediate crisis that is in this year’s crop, and that is why I am asking my colleagues to support passage of H.R. 2213.

[1145]

Additionally, Mr. Speaker, it has come to my attention that there are some misconceptions currently being spread about the bill, including one suggesting that H.R. 2213 will extend the Northeast Dairy Compact. This is simply not the case.

First of all, dairy compacts are not within the jurisdiction of the Committee on Agriculture and, therefore, are not authorized under this legislation that our committee would report. Second, there are simply no dairy provisions of any kind in H.R. 2213, as amended.

When I introduced the bill originally, it did include a simple extension of the dairy price support program to expire at the end of this year, but even that provision has been removed from the amended version.

Mr. Speaker, I reserve the balance of my time.

Mr. STENHOLM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this bill even though I, too, wished we could do more.

At the outset, let me recognize the work of the gentleman from Texas (Chairman COMBEST) and stand for the record that American agriculture is in need of immediate assistance, and that producers of our food and fiber are at risk.

Last year crop prices were at a 27-year low for soybeans, a 25-year low for cotton, a 14-year low for wheat, and an 8-year low for rice. Very little recovery has occurred since that time. The need for the $5.5 billion in assistance provided by this bill is so great that a doubling of this amount could easily be utilized.

Because this is the fourth year in a row that we have provided ad hoc assistance to compensate for low commodity prices, however, I consider it crucial that we provide aid with a view toward the long term.

While the budget should provide us the authority to improve our commodity programs, there are a couple of reasons why the amount made available in the budget will soon appear insufficient. First, as the amounts in the bill before us, the budget provides $73.4 billion to add to our baseline over 10 years. During the course of the Committee on Agriculture’s hearings, however, representatives of agriculture have responsibly argued for several times that amount.

Second, the budget is not ironclad. The Committee on Agriculture has a budget allocation for fiscal year 2002, but not for the succeeding fiscal years. The remaining $66 billion is only available to the extent that the on-budget surplus is greater than the Medicare surplus. Our ability to address agriculture’s long-term need is now very sensitive to any deterioration in the overall budget surplus.

In the reality of the tight budget situation we faced was recently made abundantly clear by a letter from the administration. Prior to the markup of this economic assistance, theOMB Director advised that, if the committee enters into conference with the Senate, he would require the President not sign the bill.

A bare majority of my colleagues on the Committee on Agriculture agreed with the gentleman from Ohio (Mr. Boehner) and me that we needed to save every penny we could to draft a responsible long-term farm bill.

I am proud to say that, by adopting our amendment, the Committee on Agriculture has faced its responsibility to prioritize agriculture’s needs within the budget. Our chairman presided over a full debate with the utmost fairness. For those of us who were strong advocates for agriculture, we arrived at a difficult decision.

The bill before the House today provides a reasonable response to our producers who are suffering from the continued slump in the farm economy. Assistance is provided in a very clear
way. Take the aid provided for the most recent crop and prorate the payments to equal $5.5 billion. I repeat, assistance is provided in a very clear way. Take the aid provided in the most recent crop and prorate the payments to equal $5.5 billion. Funds will be disbursed to producers quickly and simply.

While I would have preferred alternative ways to deliver this assistance, we are constrained in this manner because the assistance must be provided by September 30.

We also need to analyze all fiscal year 2002 options at the same time in order to provide the right long- and short-term policy mix. Many specialty crops that desire additional assistance over that provided in the bill can only be accommodated in fiscal year 2002 money. We can provide such assistance, but it must be provided fairly and consistently in keeping with our long-term strategy.

Mr. Speaker, I cannot disagree with those who say that the $5.5 billion is inadequate; however, this is all we can afford at the moment. As we pass this bill, it is crucial that we immediately move toward an improved and reliable long-term policy that benefits farmers and taxpayers alike. I urge the passage of the bill.

Mr. Speaker, I support this bill even though we wish we could do more.

At the outset, let me recognize the work of Chairman COMBEST and state for the record that I agree with him that American agriculture is in need of immediate assistance and that the producers of our food and fiber are at risk. Last year, crop prices were at a 27-year low for soybeans, a 25-year low for cotton, a 14-year low for wheat and corn and an 8-year low for rice. Very little recovery has occurred since that time. The need for the $5.5 billion in assistance provided by this bill is so great that a doubling of this amount could easily be utilized.

Because this is the fourth year in a row that we have provided ad hoc assistance to compensate for low commodity prices, however, I consider it crucial that we provide aid with a view toward the long term. While the Budget should provide us the authority to improve our commodity programs, there are a couple of reasons why the amount made available will soon appear insufficient:

First, aside from amounts in the bill before us, the Budget provides $73.4 billion to add to our baseline over ten years. During the course of the Agriculture Committee’s hearings, however, representatives of agriculture have responsibly argued for several times that the President not sign the bill. A bare majority of my colleagues on the Agriculture Committee agreed with Mr. Boehner and me that we needed to save every penny we could draft a responsible long-term farm bill. I am proud to say that by adopting our amendment, the Agriculture Committee has faced its responsibility to prioritize agriculture’s needs within the budget. Our Chairman presided over a full debate with the utmost fairness and, for those of us who are strong advocates for agriculture we arrived at a difficult result.

The bill before the House today provides a reasonable response to our producers who are suffering from the continued slump in the farm economy. Assistance is provided in a very clear way. Take the aid provided for the most recent crop and prorate the payments to equal $5.5 billion. Funds will be disbursed to producers quickly and simply. While I would have preferred alternative ways to deliver this assistance, we are constrained to this manner because the assistance must be provided by September 30.

We also need to analyze all FY 2002 options at the same time in order to provide the right long- and short-term policy mix. Many specialty crops that desire additional assistance over that provided in the bill can only be assisted with FY 2002 money. We can provide such assistance, but it must be provided fairly and consistently in keeping with our long-term strategy.

Mr. Speaker, I cannot disagree with those who say that the $5.5 billion is inadequate; however, this is all we can afford at the moment. As we pass this bill, it is crucial that we immediately move toward an improved and reliable long-term policy that benefits farmers and taxpayers alike. I urge the passage of the bill.

Mr. Speaker, I reserve the balance of my time.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Iowa (Mr. Nussle), the chairman of the Committee on the Budget.

Mr. NUSSEL. Mr. Speaker, I rise in strong support of H.R. 2213, the Fiscal Year 2001 Economic Assistance Act. It provides $5.5 billion in markets loss payments and other agriculture assistance.

I am pleased that the Committee on the Budget was able to work hand in hand with the Committee on Agriculture to make this bill possible. Recognizing the needs of farmers, the Committee on Budget reported and the House passed a budget resolution that revised the allocations and budgetary totals for the current fiscal year to accommodate $5.5 billion in additional emergency agricultural assistance for the crop year of 2001. We budgeted for this emergency assistance within the budget. It is responsible.

All the Committee on the Budget asked was that the Committee on Agriculture produce a straightforward bill that avoided accounting gimmicks and reserved sufficient funds to meet future crop year needs and permanently revised the agricultural assistance programs so we can move away from this Band-Aid approach of the past 3 years. H.R. 2213 more than up holds the Committee on Agriculture’s part of this bargain.

As the chairman of the Committee on the Budget, I have the privilege of reporting to my colleagues that this bill is within the budget. I commend the gentleman from Texas (Chairman Combest), the gentleman from Georgia (Chairman Chambliss), the gentleman from Texas (Mr. Stenholm), ranking member, for their hard work on this and all the members of the Committee on Agriculture.

Mr. STENHOLM. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. Blumena).

Mr. BLUMENAUER. Mr. Speaker, I appreciate the gentleman’s courtesy in allowing me to speak on this bill.

I know it has been hard for the members of the Committee on Agriculture, but I am personally disappointed that there appears to be no funding for the conservation programs in the agricultural supplemental. This is especially troubling in light of the fact that it appears that the Committee on Appropriations plans to sharply reduce funding for our major conservation programs in the next fiscal year, including the Wetlands Reserve Program, the Wildlife Habitat Incentives Program and Farmland Protection Program.

Only 5 percent of the USDA funding rewards voluntary efforts for protecting our drinking water supplies, to provide habitat for wildlife, protect open spaces.

There are many programs where farmers voluntarily want to come forward, but as a result of declining funding levels for conservation programs, three out of four farmers, ranchers and foresters are rejected when they offer to sell development rights to help combat sprawl and protect farmland; half of our farmers and ranchers and foresters are rejected when they seek basic technical assistance. Sadly, we are not stepping forward to help the incredibly productive farmland that surrounds our metropolitan area, the urban-influenced farmland.

Mr. Speaker, as we struggle with declining amounts of money because of some decisions that we have made, that, frankly, I think some of us are hoping that people recognize were inappropriate, we need to make sure that we are dealing with efforts to equip and ensure that we maintain the agricultural base.

This is an opportunity for a win-win to protect the environment, to enhance the vast majority of small farmers that are at risk, and to make sure that we
Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. CHAMBLISS).

Mr. CHAMBLISS. Mr. Speaker, I thank the chairman for the opportunity to speak today, and I thank him for his leadership on this and other matters relative to the agriculture community in our country.

I rise in strong support of this bill. I would say to the gentleman from Oregon (Mr. BLUMENAUER) I share the same concerns that he does about conservation, and I hope we can address that to a greater extent in the farm bill.

But what we are doing today is coming forward with a market assistance package, and I emphasize that because it is not a disaster bill. A market assistance package is necessary for our farmers because, for the fourth year in a row, we are facing low commodity prices all across the spectrum.

This is possible. It addresses the needs of producers. It puts an amount of money in the pocket of producers as quickly as we can do it. Our folks need that relief now. At the same time, if the American people are going to be assured that they are going to continue to have quality food products at low-commodity prices, we need to pass this bill today.

Mr. STENHOLM. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. KIND).

Mr. KIND. Mr. Speaker, I thank the gentleman from Texas for yielding me this time.

Mr. Speaker, I rise in support of this measure, but I also want to express some concern about the fact that any type of funding for conservation programs within this farm supplemental bill for 2001.

While there is no doubt that our Nation’s farmers, ranchers and foresters are struggling financially, this measure merely continues the failed economic policies of the current farm bill, directs cash transfers that many of us believe distort the marketplace and drives commodity prices even further down.

The next farm bill, which the House is currently considering, must be more inclusive and provide creative new revenue streams to assist our Nation’s family farmers. It is my hope that voluntary incentive-based conservation programs which provide landowners with much-needed revenue while also assisting them in meeting soil, air and water environmental compliance is a part of the new farm bill.

For instance, programs such as Wetlands Reserve, Wildlife Habitat Incentive Programs and the Farmland Protection Program not only help our farmers to promote preservation of open space, habitat for wildlife and improve water quality, but they also increase farm profitability.

Two-thirds of America’s farmers do not benefit from any traditional income support programs under the current farm bill. Furthermore, more than 90 percent of USDA payments go to only one-third of America’s farmers who produce commodity crops. For example, States such as California and Florida receive less than 3 cents from USDA for every dollar they earn. Conservation payments provide an important source of funding that allows farmers throughout all regions of the country to retain their land while providing benefits to society, including cleaner drinking water and improved recreational opportunities.

Currently, funding levels are insufficient to meet the demands of conservation programs. Three out of every four landowners are turned away when they seek to participate and help protect habitat and improve the quality of drinking water through these land conservation programs.

Mr. Speaker, I hope the conservation funding aspect becomes a major feature of the next farm bill, I look forward to working with the leadership on that.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Montana (Mr. REHBERG).

Mr. REHBERG. Mr. Speaker, agriculture is Montana’s number one industry, but with the cost of farm production at an all-time high and farm incomes sagging, I am deeply concerned about agriculture’s future in our State.

H.R. 2213 will provide much-needed help to Montana producers, but the bill fails in many ways. The assistance level provided for in this legislation is not sufficient to address needs of many families this year.

H.R. 2213 fails to address the needs of dairy farmers, sugarcane growers, those who graze their wheat, barley, and oats, as well as producers who are denied marketing loan assistance because they do not have an AMTA contract.

Members who supported the $5.5 billion in assistance at the committee level argued that a cut in funds to producers this year was necessary to save funds for the new farm bill, but I fear that many producers in my State will now have to face the reality that they may not make it for the next farm bill.

While this bill is far from perfect, it is a first step in keeping Congress’ commitment to stand by America’s farmers and ranchers until a permanent safety net is in place.

I want to thank the gentleman from Texas (Chairman COMBEST) and the staff for all their hard work on behalf of America’s farmers.

Mr. STENHOLM. Mr. Speaker, I yield 2 minutes to the gentleman from Mississippi (Mr. SHOWS).

Mr. SHOWS. Mr. Speaker, dramatic increases in energy costs have hurt everybody, especially in the agriculture industry. Today, right now, farmers in my district, a lot of them, are going bankrupt, clearly not able to keep up with their energy bills.

We need to encourage more domestic production of oil and gas, but that is for the future. We will not solve the crisis of today.

I am not really not here to point fingers, assign blame for skyrocketing energy prices, but I am here on behalf of family farmers who do seek solutions. They need our help now.

Despite repeated appeals from my colleagues and myself, this Congress, this leadership has ignored the plight of ordinary citizens who are suffering this energy crisis. Let us face the fact that many farmers and ranchers have seen their gas bills double and triple over the last year, and this is through no fault of their own.

Our economy depends on agriculture, and especially Mississippi, because we are still a rural economy.

This may not be a natural disaster like a tornado or flood, but it is a disaster just the same. It is an economic disaster that threatens the very existence of our farms.

If we cannot see fit to address these needs through supplemental funding, I challenge the Congress to take up the issue separately.

I have introduced H.R. 478, the Family Farmers’ Emergency Energy Assistance Act, which will provide immediate and long-term emergency assistance to our farmers and ranchers, including crop and greenhouse growers and dairies and livestock producers.

H.R. 478 will authorize the Secretary of Agriculture to provide grants to help farmers and ranchers to deal immediately with financial pressures caused by this crisis. This bill would also make low-interest loans available to help deal with the energy crisis for the months ahead.

H.R. 478 defines what constitutes an ‘energy emergency’ and lays out a formula that will work. H.R. 478 is a farm energy crisis bill that will ensure that agriculture producers suffering a energy crisis will get assistance.

I am calling upon our leaders in Congress to move this emergency assistance bill quickly to passage. In a world where reliable energy costs are tanta-mount to success or failure, we should remember the pain rural America is enduring while we stand here and debate.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Mississippi (Mr. PICKERING).

Mr. PICKERING. Mr. Speaker, I rise today to voice my support for the farmers of my home State of Mississippi and for this legislation.
Could we do more? Yes. Should we do more? I hope by the end of the day, by the time the Senate takes this up and it goes to the President, that there will be more. In terms of real dollars, Mississippi farmers are facing their 4th year of prices that have not been this low since the Great Depression.

I look forward to working with the committee and the chairman to look at ways in the farm bill that we can have long-term solutions to crises that come up, not only in our commodities and crops, but for farmers who are in other areas, such as poultry. We need to find ways so that if we do have an energy crisis or spike that we can meet those needs, whether through grants or loans, so that they too can manage their farm income in a way that is predictable and gives them certainty. We need our crop farmers avoid the bankruptcies that we are seeing today in places across my district and in the Southeast.

As we continue to get the emergency assistance and the long-term care, I look forward to working, as chairman of the Congressional Sportmen’s Caucus Waterfowl Task Force, in getting the conservation titles of the farm bill in order for the good it does both for our environment and for our farmers.

Mr. STENHOLM. Mr. Speaker, I yield 1 minute to the gentleman from Maryland (Mr. GILCHREST).

Mr. GILCHREST. Mr. Chairman, I thank the gentleman from Texas (Mr. STENHOLM) for yielding me this time, and I want to compliment the chairman of the committee for this supplemental, which goes a long way to preserving the rural legacy of this United States, understanding the fact that every year we lose hundreds of farms all across the Nation. This injection of dollars will go a long way into helping make our farms sustainable and, to a large extent, if we work the right way, making those farms profitable.

I would also ask the Chairman, as we move through the rest of this session, to understand that not only do the crisis or spike that we can meet those needs, whether through grants or loans, so that they too can manage their farm income in a way that is predictable and gives them certainty. We need our crop farmers avoid the bankruptcies that we are seeing today in places across my district and in the Southeast.

Mr. STENHOLM. Mr. Speaker, I have no further speakers at this time, and I reserve the balance of my time.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. KENNEDY).

Mr. KENNEDY of Minnesota. Mr. Speaker, I thank the gentleman for yielding me this time, and I rise today for eighth discharge and diligence in bringing assistance to our Nation’s farmers who are in need.

I am supportive of this bill, though I support the $6.5 even more; and I hope it will bring some relief to our farmers plagued by low commodity prices, rising energy costs, drought, and a slow world economy. USDA estimates that the economic productivity of farm producers income could drop to historical lows, so it is imperative we act now.

H.R. 2213 does not provide the same level of assistance as previous years but I urge my colleagues’ support and it is my sincere hope that we can provide more adequate assistance as we move through the legislative process.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. PENCE).

Mr. PENCE. Mr. Speaker, I thank the gentleman for yielding me this time, and I want to thank him for his hard work and leadership in speeding this crop assistance package to the floor today. Family farmers across Indiana appreciate the gentleman’s aggressiveness.

Mr. Speaker, by providing $5.5 billion in economic assistance, this farm bill represents a much-needed first step in keeping Congress’ promise to America’s farmers and ranchers, but it is our first step.

It is said that the sower sows in expectation, and this farm bill fails to meet the expectation of American farmers in at least two respects. First, the assistance level it provides is not sufficient to address the total needs of farmers and ranchers; and, second, the bill’s scope is too narrow, leaving many needs completely unaddressed.

At a time when real net cash income on the farm is at its lowest level since the Great Depression, it is not the time to cut supplemental aid to farmers. Although I urge my colleagues to support this bill as a first step toward helping our Nation’s farmers, I am deeply disappointed this bill leaves out $1 billion in farm aid for only a few short-term benefits.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. BOEHNER).

Mr. BOEHNER. Mr. Speaker, let me congratulate the chairman, the gentleman from Texas (Mr. STENHOLM), and the gentleman from Texas (Mr. STENHOLM) for continuing to move this process along.
We all know that we have great difficulty in ag country. We have low commodity prices, we have higher fuel costs, and the pressure is on farmers across the country and has been. Until we open more markets for our farmers, this pressure will continue to be there because our farmers continue to outproduce their competitors around the world.

There has been a lot said here about the size of this package. As the author of the amendment, along with my good friend, the gentleman from Texas (Mr. STENHOLM), I believe that the $5.5 billion, as allocated by the budget, is a sufficient amount of money for aid now. Would I like to do more? Of course, I would like to do more. But the fact is we just went through a budget process and allocated $5.5 billion for this year’s emergency assistance to farmers. To go back on that now opens the door to the other body to raise the number even higher. I think what we have done here is the fiscal thing to do.

Secondly, we are about to go through the new farm bill. We are going to have a major debate about how to reallocate those resources dedicated in the budget to the new farm bill. Let us not stick our fingers into the pie and take some of next year’s money for this year’s problems.

Mr. COMBEST. Mr. Speaker, how much time is remaining?

The Speaker pro tempore (Mr. SIMPSON). The gentleman from Texas (Mr. COMBEST) has 7½ minutes remaining; the gentleman from Texas (Mr. STENHOLM) has 8½ minutes remaining.

Mr. COMBEST. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. SMITH).

Mr. SMITH of Michigan. Mr. Speaker, American agriculture is in a predicament. Should we go to the free market and accept the survival of the fittest in an international market and price for food and fiber?

It is complicated by a couple of situations. One is the fact that other countries, such as Europe, subsidize their farmers up to five times as much as we subsidize our farmers.

How interested are we in maintaining a vital agricultural economy in the United States? I would suggest to my colleagues that that ability to produce food is even more important than the production of energy for our national security. With our dependency on imported energy, we have seen what can happen when OPEC decides to hold back. Think what might happen with food.

Right now, farmers are faced with low commodity prices. A 27-year low for soybeans, 25-year low for cotton, a 14-year low for wheat and corn, an 8-year low for rice. Over the past 3 years, net cash income fell in real dollars to its lowest point since the depression.

Now is the time that we have to make the decision of standing up for the survival of American agriculture. I would just suggest that farmers need help to survive. In addition to low commodity prices we have seen increased fuel costs of $2.4 billion over the last year because of higher energy prices.

Mr. COMBEST. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. MORAN). Mr. MORAN of Kansas. Mr. Speaker, I thank the chairman for yielding me this time. It is with concern today that I rise on the House floor. This is an important piece of legislation. We have worked hard at making certain that the farmers of Kansas and across the country have access to additional resources this year to tide them over; and yet the actions of our House Committee on Agriculture last week, I think, are inadequate in reaching that goal.

I voted against the passage of this bill from the committee, and yet I know it is important for the process to continue. We have hope that additional dollars will be placed in this legislation before this bill returns from the Senate.

Two weeks ago I spoke on the House floor about the difficulties facing farmers in my State. I talked about corn prices at $1.89 and gasoline at $1.93. That does not work. Combines and custom cutters are working their way across Kansas now. Wheat prices dropped 25 cents last month; and when I looked at the board this morning, in Dodge City wheat was $2.71, down another 4 cents.

Assistance today is important. Many of my farmers will not be able to wait around and see what happens with the farm bill and the improvements that we hope to make in agricultural policy in this Congress unless they have some dollars placed there now. The crisis is real, and the consequences of our failure to act are significant.

I joined the chairman in supporting an increase for assistance for farmers. Our position failed by one vote, 24 to 23. So even within the House Committee on Agriculture, there is disagreement in the best way to help producers. However, I think now is not the time to hold up this bill over our previous disagreements. It is time for those of us concerned about agriculture and rural America to come together and to work on behalf of our Nation’s farmers and ranchers.

I look forward to that process continuing, and I look forward to working with my chairman and the ranking member to see that good things happen in Kansas and American agriculture.

Mr. COMBEST. Mr. Speaker, I yield 1½ minutes to the gentleman from Minnesota (Mr. GUTKNECHT).

Mr. GUTKNECHT of Minnesota. Mr. Speaker, I thank the chairman for yielding me this time; and really for the benefit of some of my colleagues who are not from farm country, I thought I would like to take a minute today to talk about what is happening to agriculture here in the United States and around the world. Because it is easy for some people to say the problem is the farm bill, the problem is freedom to farm.

It may well be true that some of the problems we face in agriculture today were exacerbated by the farm bill. But the truth of the matter is what we are into now is the 4th consecutive year of worldwide record production. 1215

Mr. Speaker, I think against that backdrop with any farm policy in the United States, our farmers would be facing a tough year as it relates to our commodities.

The second thing we have to appreciate, in Europe we see huge subsidies for agriculture. Beyond that, we have permitted, we have allowed our trading competitors to subsidize their exports to the tune of $8 billion while we limit ourselves to $200 million. We have put ourselves and our farmers behind the eight ball relative to our trade policy and relative to our agriculture policy. Ultimately that is all coming together.

There is a desperate need in agriculture today for some kind of help. We are here today, and the Committee on the Budget has responded appropriately. The bill in front of us today is the right answer. Ultimately there will be negotiations between the House and Senate and the White House, and hopefully this can be plussed up. There are serious problems in agriculture, most of which are not controllable by our farmers.

Mr. Speaker, I think this is a good bill, and I hope all of my colleagues on both sides of the aisle will join us in supporting this legislation today.

Mr. COMBEST. Mr. Speaker, I reserve the balance of my time.

Mr. STENHOLM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge my colleagues to support this bill. I associate myself with all of the remarks saying we should do more; but I would also point out that this amount of money today is within the budget that was passed that we have agreed to live under this year. I think that is a significant point. And also, as the chairman pointed out in his opening remarks, time is of the essence.

Mr. Speaker, we must have this bill to the President for his signature by August 1 if we are to have any hope of dealing with the multitude of problems that this bill is designed to help.

Mr. Speaker, I encourage my colleagues to pass this bill today and move the process forward, and encourage the other body to do the same.

Mr. Speaker, I yield back the balance of my time.

Mr. COMBEST. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I appreciate the comments of the gentleman from Texas.
Mr. STENHOLM and appreciate the good working relationship that we have. Our committee works on behalf of American agriculture, I think, on a bipartisan basis as well as any committee in the Congress.

It is vitally important, and I strongly urge my colleagues who have any reservation about the level of this funding to move forward with this suspension to allow the House to have completed its action so that we make for certain that the $5.5 billion which was established in the budget resolution is in fact eligible to be paid to farmers by the end of the fiscal year of September 30. I think it also sends a message to farmers that in fact there is some assistance on the way at a very critically needed time.

Mr. Speaker, to the Members who spoke of the committee's action in the next few weeks in reporting a farm bill, I will say that we have heard them and all others. This will be a comprehensive farm bill. It will have a strong conservation title, as some have indicated is needed. It is an area that we are looking at very carefully. It is something that we will be trying to craft to deal with all aspects of American agriculture, and we will be spending a great deal of time on it. It is the intent of our committee to report a bill by the beginning of the August recess so that consideration for a full farm bill in a much-needed sector of the American economy that is suffering tremendously can be moved forward; and that we will be able to send a message to American agriculture that there is help on the way.

Mr. Speaker, I appreciate the interest, the intensity, and passion of all of my colleagues on the committee.

Mr. BISHOP. Mr. Speaker, H.R. 2213 will provide the much-needed help that many farmers in the Second Congressional District need today. The $5.5 billion is not sufficient to address all the farming needs, but it goes a long way in helping our family farmers. Input costs have skyrocketed for every one including our farming community. I hope this supplemental bill moves quickly to help alleviate some of these costs.

I am happy with the way our peanut farmers concerns have been addressed in this bill, $25.83 a ton for quota peanuts and $13.55 for additional peanuts will help ease the burden that our peanut farmers face today.

I am glad that we continue as we should stand by our American farmers. This will provide immediate relief while our Committee continues to work hard on drafting the new Farm bill.

I urge my colleagues to support H.R. 2213 and speedily get these funds to our farmers.

Mr. COMBEST. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The gentleman from Texas (Mr. COMBEST) that the House suspend the rules and pass the bill, H.R. 2213, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed. A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. COMBEST. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 2213, the bill just passed. The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 2299, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

Mr. REYNOLDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 178, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 178

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of H.R. 2299, making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. After general debate the bill shall be considered as amended, for the purpose of the five-minute rule. Points of order against provis-ions in the bill for failure to comply with clause 2 of rule XXI are waived except as follows: on page 13, line 24, through “section 40117;” on line 25; beginning with “Provided” on page 14, line 12, through line 20; beginning with “Provided—” on page 15, line 9, through line 14; beginning with “Provided” on page 23, line 20, through page 24, line 2; “notwith-standing any other provision of law” on page 26, line 15, beginning with “together with”; on page 26, line 15, through the closing quotation mark on line 16; page 31, line 9 through “as amended,” on page 10; page 38, line 23, through page 45, line 2; page 50, line 22, through page 51, line 15; page 55, line 6, through line 13; page 56, line 16, through page 57, line 2. Where points of order are waived against part of a paragraph, points of order against a provision in another part of such paragraph may be made only against such provision and not against the entire paragraph. In consideration of the bill for amendment, the Chairman of the Committee of the Whole may accord priority in recognition on the basis of whether the Member offering an amendment has caused it to be printed in the portion of the Congressional Record designated for that purpose in clause 8 of rule XVIII. Amendments so printed shall be considered as read at the request of the chair, and consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without out intervening motion except one motion to reconsider with or without instructions.

Mr. COMBEST. Mr. Speaker, pursuant to section 426 of the Congressional Budget and Impoundment Control Act of 1974, I make a point of order against consideration of the rule (H. Res. 178) because it contains an unfunded Federal mandate.

Section 426 of the Budget Act specifically states that the Rules Committee may not waive this point of order.

In the rule of H. Res. 178, and I quote: “The Rules Committee may not waive this point of order.” Therefore, I make a point of order that this bill may not be considered pursuant to section 426.

The SPEAKER pro tempore. The gentleman from Virginia makes a point of order that the resolution violates sections 426(a) of the Congressional Budget Act of 1974. According to section 426(b)(2) of the act, the gentleman must specify language in the resolution that has that effect. Having met this threshold burden to identify the specific language of the resolution under section 426(b)(2), the gentleman from Virginia (Mr. MORAN) and a Member opposed will each control 10 minutes of debate on the question of consideration under section 426(b)(4).

Following the debate, the Chair will put the question of consideration, to wit: Will the House now consider the resolution?

The gentleman from Virginia (Mr. MORAN) is recognized for 10 minutes.

Mr. MORAN of Virginia. Mr. Speaker, I raise a point of order because section 313 of this appropriations act directs the local transit authority to change the name of its transit station at Ronald Reagan Washington National Airport with local funds. The cost to comply with this provision is estimated to be $405,476; but the principle being violated is far more costly.

Mr. Speaker, earlier this year the local jurisdiction which controlled the transit board elected not to change the name of the Metro station at the airport.

The board determined that the estimated cost of these changes would be better spent on other priorities.

In addition to the rule that requires the request to come from the local jurisdiction in which the station is located, the regional transit board has a long-standing policy of not naming their transit stations after people, preference being given to names they are named after the location that they are serving.

At one time many Democrats wanted the RFK Stadium stop to be named
after Robert Kennedy, but that suggestion was rejected because Stadium-Army is more descriptive, and named after a place rather than a person.

In my view, that was a correct use of local taxpayer resources. I have to think that if President Reagan were not tragically suffering from Alzheimer’s disease, he would join the board and the local governments in resisting these heavy-handed tactics of the Federal Government in forcing the local government to act contrary to its best judgment.

In 1964 following the tragic death of President Kennedy, an overzealous Johnson administration by executive fiat renamed Cape Canaveral Cape Kennedy without consulting the local jurisdictions. Had the Johnson administration consulted the local jurisdictions, they would have learned the importance of the name Canaveral dating back to the time of the Spanish explorers and a part of the cape’s identity, culture and heritage for the succeeding 400 years. For the next 10 years, the local communities resisted the Federal action, preferring instead to use the term Canaveral. In the early 1970s, the Florida State legislature showed its defiance by enacting legislation to rename the cape Cape Canaveral. By default and Federal inaction, that name still stands.

In the instance of the airport, the localities were never consulted on the 1998 act to rename the airport. Had Congress conducted hearings and allowed local elected officials to testify, it would have learned that Washington National Airport already had a name in honor of our first President, George Washington, one of our founding fathers, commander in chief of the Continental Army during the War of Independence, a President, a resident of northern Virginia, living just down the very road that runs by the airport. The airport was literally built on land owned by George Washington’s family.

Recognizing the direct relationship and strong historical roots of the property, President Roosevelt asked that the airport’s main terminal, completed in 1946, be designed to resemble Mount Vernon. That resemblance is now a historic landmark.

Like the renaming of Cape Canaveral, resentment of the name change is on the minds of northern Virginia’s local residents. We had a compromise proposal that would have updated the name, not renamed it, except for the name of the airport. President Reagan’s legacy will be defined by what he did as President, not by what we do for him. I am sure he would join me in opposing this provision that mandates the local transit authority rename the transit station.

In referencing the controversy of the Metro station issue in his weekly column, George Will said:

"How many ways are there to show misunderstanding of Reagan’s spirit? Let us count the zealous ways. Political freedom implies freedom from political propaganda—from being incessantly bombarded by faceless symbols and messages intended to shape public consciousness in conformity with a contemporary agenda. Such bombarding is unquestionably the aim of some Reaganites. Monument mongers. They have the mentality that led to the lunatic multiplication of Lenin portraits, busts and statues throughout the Evil Empire."

Let us resist the urge to establish Ronald Reagan’s legacy by renaming everything after the former President, thereby trivializing the principles that he stood for.

I urge that we oppose this unfunded federal mandate.

Mr. Speaker, I reserve the balance of my time.

Mr. REYNOLDS. Mr. Speaker, I rise in opposition to the point of order.

The SPEAKER pro tempore (Mr. SIMPSON). The gentleman from New York is recognized for 10 minutes.

Mr. REYNOLDS. Mr. Speaker, I yield myself such time as I may consume.

I would like to take this opportunity to put on the record this provision would violate the Unfunded Mandates Reform Act. While a review by the Congressional Budget Office determined the requirement to rename the station to be an intergovernmental mandate under the Unfunded Mandates Reform Act, renaming the station falls well below the 2001 threshold of $56 million. In fact, this project is estimated to cost approximately $500,000. I submit CBO’s findings for the RECORD.

Mr. Speaker, the gentleman from Virginia helped craft the Unfunded Mandates Reform Act, and in playing such a key role in that creation, he should know that these thresholds were instilled to prevent time-consuming and unwarranted attacks on House legislation. While I appreciate my colleague’s efforts to uphold the integrity of the Unfunded Mandates Reform Act, this is clearly a dilatory tactic to rewrite the terms of the underlying legislation.

Mr. Speaker, I reserve the balance of my time.
Mr. MORAN of Virginia. Mr. Speaker, I yield myself 15 seconds to share with the gentleman the fact that OSHA is exempt from the unfunded mandates law because it is a civil rights provision, and the Federal Government only considers OSHA an unfunded mandate. And the gentleman from New York (Mr. REYNOLDS) points out.

I request that the Chair rule against this.

Mr. REYNOLDS. Mr. Speaker, I yield 4 minutes to the gentleman from Georgia (Mr. BARR), the original sponsor of this legislation.

Mr. BARR of Georgia. Mr. Speaker, I thank the distinguished gentleman from New York (Mr. REYNOLDS) for yielding me this time.

I request that the Chair rule against this.
of National Airport, over which this Congress has jurisdiction, was changed by majority vote of the people of the United States, as represented by their representatives, was changed to reflect Ronald Reagan’s name. They lost that vote. Get over it, guys. You lost it.

Not satisfied with that, not satisfied with simply playing by the rules and recognizing that the name change went through the Congress, was signed by none other than President Bill Clinton, what they are doing now is they keep trying to come in the back door. They go to their friends on the Metro board, which has never before had a problem with any name change. They have operated like any other metropolitan transit board. When there is an official name change by law, the signage and the literature is changed to reflect that official name. When there is a name change by law, the signage and the literature is changed to reflect that official name change, and every other transit board in the country has always done, whether it is reflecting the name of John F. Kennedy or former President Eisenhower or anybody else, and simply make the changes and let us move on.

Would the gentleman agree that that makes sense, let us just move on?

Mr. MORAN of Virginia. Mr. Speaker, will the gentleman yield?

Mr. BARR of Georgia. I yield to the gentleman from Virginia.

Mr. MORAN of Virginia. No, I do not agree. The gentleman’s recollection of the facts is not accurate.

Mr. BARR of Georgia. Mr. Speaker, I take back my time. That is what I suspected, and I wanted to give the gentleman the benefit of the doubt and get him on record.

The other side is not interested in just moving on. We are, Mr. Speaker. We are not asking for anything out of the ordinary, out of standard operating procedure, but to simply say the name of National Airport has been lawfully changed. It was signed by a Democrat President into law over 3 years ago. It is high time that the Metro board did what they have done in every other situation. Change the name. Let us move on with this rule and move on with the adoption of the appropriations bill for the American people.

Mr. MORAN of Virginia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is certainly not in order to force name changes upon local governments when they are opposed to it.

Mr. Speaker, I yield 30 seconds to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, just to correct the record, there have been eight proposals, as I cited in my opening remarks, in which WMATA rejected renaming proposals, some of them equally as strong as this one.

Secondly, the naming of National Airport was flawed in its inception. Some years ago when Senator Dole proposed changing the name of Dulles Airport, his legislation left it up to the airport authority to make the decision; did not shove it down their throats.

As for the gentleman’s comment about get over it, we are not the ones proposing name changes. It is the other side. I say to the gentleman, get over it. Stop acting like a playground bully trying to shove Reagan’s name down the throats of every place in this country.

Mr. MORAN of Virginia. Mr. Speaker, I yield myself the remainder of my time.

Mr. Speaker, I would urge this body not to force Washington’s local governments to pay $400,000 with local funds to make a name change to a transit station. It does not fit in length. It does not fit with the policy of naming stations after places rather than people. In any event, it goes to the point that we are contradicting everything he stood for. I have several quotes that I ought not to have to share with the body where President Reagan urged us to respect local government. This is not respecting local government. What is being said is, we stand by Reagan’s principles as long as it suits our politics. That is not right. The principle of deference to local government is correct, and in this case it is being violated not only with the naming of the airport, but certainly with the naming of the transit station.

I would urge my colleagues to read George Will. I would urge them to read President Reagan’s statements, and I would encourage my colleagues the gentleman from Georgia (Mr. BARR) and the gentleman from Kansas (Mr. TAHERT), have pointed out in their opposition to this point of order.

Most important, I have also cited in my opening that on page 111 of the report, which we are going to consider as the rule is hopefully passed and the legislation is before the House, where $30 million under section 9 in the formula for funding will go to the District of Columbia’s Metro system. That money is eligible for signs and other important aspects of how this legislation has been created within the appropriations bill.

The gentleman from Virginia (Mr. MORAN) has raised the possibility that H.R. 2299 may contain an unfunded mandate. I urge that we proceed forward so that we may continue consideration of this important legislation.

Mr. Speaker, an aye vote is a vote for the continuation of the consideration of the resolution. I urge an aye vote as we move forward from the point of order on the rule and then to the legislation.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SIMPSON). All time for debate has expired. The question is, Will the House now consider the resolution?

The question was taken; and the ayes appeared to have it.
202, not voting 12, as follows:

YEAS—219

Messrs. BERRY, STARK, TAYLOR of Mississippi and Ms. KILPATRICK changed their vote from "yea" to "nay."

Mr. LINDER changed his vote from "nay" to "yea." So the question of consideration was decided in the affirmative.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

So the motion to reconsider was laid on the table.

States:

Ms. WATSON of California, Mr. Speaker, on rollcall No. 190, I was delayed because of constituents in my office, hence I would have voted "no" on the question of consideration.

The SPEAKER pro tempore (Mrs. WILSON). The gentleman from New York (Mr. REYNOLDS) is recognized for 1 hour.

The rule provides that the bill shall be considered for amendment by paragraph.

In addition, the rule waives clauses 2 of rule XXI (prohibiting unauthorized or legislative provisions in an appropriations bill) against provisions in the bill, except as otherwise specified in the rule.

Further, the rule authorizes the Chair to accord priority in recognition to Members who have preprinted their amendments in the Congressional Record.

Finally, the rule provides one motion to recommit, with or without instructions.

Madam Speaker, the Committee on Appropriations has worked diligently to produce legislation that meets the Nation’s transportation priorities. As more and more Americans hit the airways in the high season this year, Congress can take pride in the fact that the underlying legislation represents an increase in safety measures and resources in every area of our transportation system.

With all of the travel we do back and forth to our home districts, I am sure my colleagues can relate to the frustration of airline delays. That frustration is tenfold for countless Americans who rely on air travel for work and for pleasure each and every day.

This bill includes several provisions to address the problem of airline delays such as fully funding the “Free Flight” program and raising funding for the “Safe Flight 21” programs. These programs develop technologies to aid in the improvement of airway capacity both responsibly and prudently.

Moreover, the bill meets the funding obligation limitation in the transportation legislation known as TEA 21, the Transportation Equity Act for the 21st Century, by providing $31.7 billion in highway program obligation limitations, a 4 percent increase over the current fiscal year’s level. Continuing our commitment toward investments in
June 26, 2001

CONGRESSIONAL RECORD—HOUSE

11911

the Nation’s infrastructure, this bill provides nearly $59.1 billion in total budgetary resources, a responsible 2 percent increase over the current fiscal year.

This bill, much like last year’s, continues to improve and enhance motor carrier safety by providing $206 million for motor carrier safety grants, an increase of $30 million that is consistent with truck safety reforms enacted as part of the Motor Carrier Safety Improvement Act of 1999.

This body recently passed the Coast Guard authorization for fiscal year 2002. The Coast Guard’s duties include promoting the safety of life and property at sea, enforcing all applicable Federal laws on the high seas, maintaining navigation aids, protecting the marine environment, and securing the safety and security of vessels, ports, and waterways.

The legislation before us today appropriates in the amount of $5 billion, including $300 million available to initiate the “Deepwater” program, which will fight the scourge of illicit drugs, provide support for offshore search and rescue, and work to protect Americans and American shores.

In addition, the bill provides $521 million for Amtrak’s capital needs. This funding will cover capital expenses and preventive maintenance. This bill sustains the Federal commitment to continue in partnership with Amtrak and to help it reach its goal of self-sufficiency.

These, along with other modest increases within the bill, will allow the Department of Transportation to have greater flexibility and oversight control for both large and small projects alike. Ensuring proper funding levels ensures the ability of the Department of Transportation to do its job, making travel safer and easier for us all.

Safety should remain the Federal Government’s highest responsibility in the transportation area. Clearly, whether by land, by sea, or by air, this bill addresses those needs and concerns, while maintaining the fiscal discipline that has been the hallmark of this Congress.

Madam Speaker, I would like to commend the gentleman from Florida (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) for all of their hard work in bringing this bill to the floor. The ranking member of the Committee on Appropriations Sub-committee on Transportation have brought us a good bill that funds a number of vital transportation projects, including one important to my congressional district in the Dallas-Fort Worth area.

I am pleased that the bill will provide $70 million to the North Central Light Rail Transit Extension. A bipartisan group of North Texas members worked very hard to get this funding that will more than double DART’s light rail coverage and help stimulate development in the Dallas-Fort Worth metroplex.

However, Madam Speaker, while this is a good bill overall, I cannot support the rule supported by the Republican majority because they have denied a request made by the Democratic ranking member of the Subcommittee on Transportation, who sought to offer an important amendment relating to the safety issues raised by allowing Mexican trucks to enter the United States.

I must also oppose this rule because of the issue of the Washington Metropolitan Transit Authority and the renaming of the National Airport Metro stop. Time and again over the last 6 years, the Republican majority has selectively ignored their own mantra of local control when it suits an ideological purpose. The renaming of this Metro stop ignores the wishes of the local authorities, as well as the Member representing this area. And for that reason, as well as the fact that the Sabo amendment was shut out by the Committee on Rules, I oppose the rule.

One of the greatest defects of this rule is the Republican leadership, working in concert with the President, has prevented the House from addressing a serious highway safety issue: the safety standards of Mexican trucks entering this country under NAFTA.

The Bush administration has lifted all restrictions on the movement of Mexican trucks on our highways effective January 1, 2002. Next year, Mexican trucks will be free to drive across the country, despite clear evidence that many are unsafe for our highways.

In May, the Department of Transportation’s Inspector General found that the Federal Government needs to add dozens of additional border inspectors before lifting restrictions on Mexican trucks. The few inspectors now policing the borders found that 40 percent of Mexican trucks that are currently allowed into the U.S. were pulled out of service for significant violations of our safety standards, which is higher than the percentage of violations among U.S. trucks.

So many of these trucks are deemed unsafe for our roads because they are allowed to operate in Mexico with virtually no oversight. The Committee on Transportation and Infrastructure Democrats who address these issues on a routine basis, also expressed their deep concerns to the Committee on Rules about these trucks coming into the United States; yet their concerns were also ignored by the Republican leadership.

For example, Mexican trucks are 10 years older than U.S. trucks, on average, and do not comply with weight standards. Mexico has no hours-of-service regulations, while U.S. drivers can only drive 10 hours per shift. The gentleman from Minnesota (Mr. SABO) offered a sensible amendment that would require the Federal Motor Carrier Safety Administration to conduct a safety compliance review of each Mexican truck entering the United States and to require that they be found to be satisfactory under the same standards applicable to U.S. carriers before being granted conditional or permanent operating authority.

However, the Republican leadership has refused to allow the House to vote on the Sabo amendment. I simply cannot understand why the administration and the House leadership oppose what the gentleman has proposed. The Republican leadership’s refusal to recognize safety concerns related to the use of these trucks throughout the United States is nothing short of negligent, Madam Speaker.

This highway safety issue is particularly critical in Texas, as well as in my own congressional district where I-35 runs through the middle of the district, since two-thirds of Mexican trucks enter the U.S. through Texas; and many of those trucks will travel on I-35 to their interior destinations. But make no mistake: this is a serious safety issue coming to highways all across America, now that the President has lifted any and all restrictions on Mexican trucks operating on American roads and highways.

This rule also prevents discussion of how to pay for relabeling Metro signs for National Airport. In 1998, over strong local opposition, the Republican leadership decided to rename Washington’s National Airport in honor of President Ronald Reagan. Now, in this bill, they are requiring the already strapped Washington Metro Authority to change all of their station signs, maps, directories, and documents to reflect the new name, but Republican leaders are not providing one single penny of the $400,000 it will cost to do this.

Madam Speaker, I served in the Congress when Ronald Reagan was President and understand that many Republicans and Democrats want to honor him. Indeed, this Congress and this Nation have already done much to ensure President Reagan’s accomplishments...
get the respect they deserve. But a $400,000 unfunded mandate hardly seems like a fitting tribute to President Reagan. After all, he made a career of campaigning on behalf of local control.

In my own district, we would not take kindly to the Federal Government forcing us to spend $400,000 in local funds that might otherwise have been already budgeted for health care or schools or other local priorities. I understand why this local community would resist spending $400,000 on a symbolic name change while far too many children in the District of Columbia go without food at the end of the month.

Madam Speaker, if the Republican leadership and Grover Norquist believe new Metro signs and maps are such an important priority, then they should provide the funds to pay for them. It is just plain wrong to force local governments to spend this money on maps for tourists instead of meals for children. Mr. Norquist and other Republican leaders do President Reagan no favor by imposing this unfunded mandate on his name.

Madam Speaker, I believe the House should be allowed to consider and vote on the issue of the safety of our Nation’s highways. These are the same roads school buses travel and people use to get to and from work.

Their safety should be paramount.

Madam Speaker, I urge my colleagues to reject this rule so we may go back to the Committee on Rules and find a better way to address this important issue.

Madam Speaker, I reserve the balance of my time.

Mr. REYNOLDS. Madam Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. ROGERS), the Chair of the Subcommittee on Transportation.

Mr. ROGERS of Kentucky. Madam Speaker, I thank the gentleman from New York (Mr. REYNOLDS) for yielding me the time.

Madam Speaker, I rise in support of this rule. It is a good rule, it is a fair rule, and it needs to be adopted. At the outset, I want to advise the Members that we have worked closely and cooperatively with the Committee on Transportation and Infrastructure to resolve areas of disagreement on the bill.

The gentleman from Alaska (Mr. YOUNG) and this gentleman have been able to work out almost everything to our mutual satisfaction. We do not agree with their position on every matter, but we do not begrudge their right to assert their concerns and jurisdiction.

Under this rule, the authorizing committee will in a number of instances exercise its prerogatives under the rules of the House to remove provisions that our committee believes are important and necessary, but which fall within their jurisdiction. The rule preserves their right to do that. In a number of other cases, the authorizing committee has agreed not to object to provisions included by our committee, which, again, we believe are necessary to carry out the programs in the bill.

It is vitally important, Madam Speaker, that we adopt the rule and proceed to consider the Transportation appropriations bill. The bill contains $59 billion for highways, airport grants and other aviation programs, highway safety activities, pipeline safety programs, many other items that are critical to every State and to individual Members of the House and, of course, our people.

We are within our funding allocation and the budget resolution. The bill is balanced. It is bipartisan and deserves the support of every Member of this body.

Let me briefly discuss the issue of Mexican trucks and NAFTA. As my colleagues know, the President says that we will be opening our border pursuant to NAFTA in January of next year.

This administration has a plan to ensure the safety of Mexican carriers that transport goods beyond the commercial zones and into the interior of the United States. The administration has put money behind that plan in its budget request. We fund that plan to the penny and then some. In fact, we provide increases above the President's request for the inspection of Mexican carriers at the border. The administration requested $88.2 million above current-year spending. We include $100.2 above the current year, an 80 percent increase.

This money will pay for border inspection facilities and more inspectors. It pays for a common-sense plan that the House needs to support. In addition, our committee has included language in the committee report directing the Department of Transportation to implement a strong safety oversight program that ensures the operational safety of Mexican motor carriers who seek permission to operate in the U.S. Madam Speaker, together these provisions ensure compliance with U.S. safety laws and regulations, while it allows free trade to go forward. It is the responsible approach, and it complies with NAFTA.

Madam Speaker, I have some serious reservations that the proposal from the other side would, in fact, violate NAFTA, subjecting the United States to severe fines.

Madam Speaker, this is a good rule. It is a good bill, and I would hope that Members would support both today.

Mr. PELOSI. Madam Speaker, I yield 4 minutes to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Madam Speaker, I simply want to rise to express my opposition to this rule because of its failure to include the right of the gentleman from Minnesota (Mr. SABO) to offer his amendment on truck safety.

Very simply, what his amendment seeks to do is to require the establishment of procedures to guarantee that Mexican trucks will be safe before they are allowed to travel all over the United States. It just seems to me that we ought to understand that right now Mexican motor carriers operate with virtually no safety oversight to date.

There are no motor carrier hours of service regulations in Mexico. There is no way at this point to check the driving records, the driving history of Mexican motor carrier drivers. The out-of-service record for those trucks in the areas where they have been checked near the border is astronomically low. Therefore, we cannot turn the road without severe safety precautions.

It is asserted that somehow the Sabo amendment would be a violation of NAFTA. That is nonsense. NAFTA is a trade pact. It is not a suicide pact. We are not required to protect the safety of our motorists at risk in order to satisfy some international bureaucracy. We have already had a ruling that makes quite clear that the United States has the authority, whatever authority we need to exercise, in order to protect the safety of American travelers.

I find it ironic that this House will spend a lot of time on this Mickey Mouse amendment to require the renaming of a train station in the District of Columbia area and yet will not take the time to fully the debate the issue raised by the gentleman from Minnesota. I think that represents a warped set of priorities.

Yet I also find it ironic that the Republican majority has said through legislation that when the question of worker safety is at stake, as was the case with the ergonomics regulations that the Labor Department wanted to put into effect some time ago, I find it ironic that at this point the Republican majority of this House said, “Oh, no, the regulations must wait. We are not going to worry about safety.”

Yet at this point, when we are asking them again to take into account the safety considerations in truck safety, in Mexican trucks crossing our American road, they are saying, “Damn the truck safety consequences, full speed ahead!” If I can plagiarize from Admiral Farragut.

It just seems to me that this House ought to come back to a rule of common sense. Just because the committee did not adopt the amendment in full committee is no reason this House should not have the opportunity to take whatever action is within our reach to ensure the safety of American drivers on our highways.

Madam Speaker, I think the bill itself is basically a good bill, and I intend to support it, but I think it is
June 26, 2001

CONGRESSIONAL RECORD—HOUSE 11913

egregiously erroneous for the House not to allow a debate on the Sabo amendment, and that is why I would vote against the rule and urge that other Members do likewise.

Mr. REYNOLDS. Madam Speaker, I yield 3 minutes to the gentleman from Iowa (Mr. Nussle), the Chairman of the House Budget Committee.

Mr. NUSSEL. Madam Speaker, first, I rise in support of the rule. I share the concern that the gentleman from Wisconsin (Mr. Obey) is raising about Mexican trucks. This is the wrong place and the wrong way to address it, in an appropriations bill. I think there is a lot of concern over the Mexican truck issue, and we need to find a way to resolve that. This is not the place.

I rise in support of the underlying bill, H.R. 2299, making transportation appropriations for fiscal year 2002. As the chairman of the Committee on the Budget, I want to report to my colleagues that this bill is consistent with the budget, and it complies with the applicable sections under the Congressional Budget Act.

H.R. 2299 provides $14.9 billion for the Department of Transportation and several transportation-related agencies. The bill includes $907 billion in rescissions of previously enacted budget authority.

The bill is within the 302(a) allocations of the Committee on Appropriations. On 'Transportation and, therefore, complies with section 302(f) of the Budget Act, which prohibits the consideration of appropriation measures that exceed the appropriate subcommittee's 302(b) allocations.

Madam Speaker, I would observe that, based on the congressional scoring that we have before us, the bill would exceed the statutory caps on highways and mass transit. Under the Budget Act, any bill that breaches its caps triggers an across-the-board sequester in programs under that cap, but I further understand that the Committee on Appropriations believes and will work to ensure that this bill will come in under the caps when it is scored by OMB. It is OMB scoring that is used to enforce the caps and trigger any sequester.

Madam Speaker, I urge that the conference committee and the chairman consider this concern and ensure that the final bill is consistent with both the budget resolution and the highway and mass transit caps.

Madam Speaker, I commend the gentleman from Kentucky (Mr. Rogers) and support the rule, but the underlying bill of H.R. 2299.

Mr. FROST. Madam Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. Sabo).

Mr. SABO. Madam Speaker, I thank the gentleman from Texas (Mr. Frost) for yielding me the time.

Madam Speaker, first, let me say that this is a good bill, and I will have more to say about that later. I commend the gentleman from Kentucky (Mr. Rogers) for producing a good bill. At the very least, a bill that deserves broad bipartisan support and should be passed by an overwhelming margin.

Madam Speaker, however, I cannot support this rule. The reason is that we have a problem, a serious problem, with the advent of Mexican trucks having access to the United States outside of the 20-mile commercial zone starting January 1.

This bill did not create the problem, it has been created for us, and if there is one place we can begin to deal with the remedy, that place is in this bill.

The amendment that I had offered, which would require inspection of carrier applicants in Mexico before they receive conditional certification, so that, for example, would add to the safety potential that we have in this country, to go along with the additional inspectors. None of us can guarantee perfect safety, but those working together would give us some greater hope that we will have safe trucks operating in this country.

Madam Speaker, no one disputes the fact that Mexico-domiciled motor carriers operate with virtually no safety oversight today. There are no motor carrier hours of service regulations in Mexico. Even though the Mexican Government is now implementing a driver record database, there is currently no way to check the driving history of Mexican motor carrier drivers. In addition, Mexico will not finalize its roadside inspection program until October 2001.

Let me add that while we are focusing on inspection and out-of-service rates for trucks, equipment is important, but the driving capability of the driver is the most important. A greater proportion of the Mexican-domiciled trucks are out-of-service, a 50 percent higher out-of-service rate than what we have in the United States. Obvious reason, there are no permanent truck inspection facilities at 25 of 27 southern border crossings that account for 3½ million northbound trucks every year.

There is no systematic method in place to verify registration on Mexican-domiciled trucks. The inspector general of our DOT found 254 Mexican trucks operating illegally beyond the commercial zones in 24 States. Those trucks are in a position to kill our constituents. Five thousand people a year die in truck-car accidents. There are going to be half as many more deaths if we allow these Mexican trucks to come unsafely into the United States.

They have a woefully inadequate safety regime in Mexico, no systematic safety rating processes, no truck weight enforcement process, no roadside domestic inspection program, no hours of service regulations in Mexico, no credible enforcement of drug and alcohol testing. We ought to defeat the rule, allow the Sabo amendment to be offered.

Mr. REYNOLDS. Madam Speaker, I reserve the balance of my time.

Mr. FROST. Madam Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. Borski).

Mr. BORSKI. Madam Speaker, I rise in opposition to the rule. I believe it is very, very important for this House to be able to vote on the Sabo amendment.

Madam Speaker, just last month, along with the gentleman from Wisconsin (Chairman Petri) and the gentleman from California (Mr. Filner) and the gentleman from Pennsylvania (Mr. Holden), we paid a visit to some of the inspection facilities along the Mexican border.

At Otay Mesa in California, we saw an inspection system that works and works pretty well and hopefully could
serve as a model for the rest of our country.

In California, they perform a comprehensive level one inspection on all trucks crossing the border at least once every 90 days and issue a certificate. If a truck does not have a certificate, it is pulled over and inspected.

The out-of-service rate in California is very similar to our experience in the rest of the United States. Around 24 percent of trucks are taken out of service, way too high in the United States, but something we can continue to work on.

The situation in Texas was an absolute nightmare. There is no inspection in Texas. At Laredo, we visited it on a Sunday, a slow day. Major Clanton of the Texas Rangers or Texas Department of Public Service told us a truck that is absolutely no discussion. On that day Major Clanton told us he pulled five or seven or eight trucks over to inspect, and five of them were taken out of service. We asked if there were serious concerns. The answer was, yes, extremely serious. Things like brakes that are not working.

Madam Speaker, the situation in Texas is very serious. We should not allow trucks to come into the United States unless they are safe, unless they are inspected.

We asked the people in Texas how soon they could put inspection stations up at the border. They told us it would take at least 18 months.

So I would strongly urge that we defeat this rule, we allow the Sabo amendment to be in order so that we can protect the safety of the traveling public in the United States. Whether one is for NAFTA or against NAFTA, we can all be for public safety on the highways.

Mr. REYNOLDS. Madam Speaker, I yield 5 minutes to the gentleman from Texas (Mr. BONILLA), a member of the Committee on Appropriations.

Mr. BONILLA. Madam Speaker, I rise today to ask my colleagues to stop attacking Mexico. I cannot quite understand what the motivation is. If we look at the issue, we are talking about trucks coming into our Nation that would be held at the same standards that American trucks would be held by. That is something we are here about trying to put the same restrictions on Canadian trucks, for example. This simply seems to be an effort to try to discriminate and target Mexican trucks.

Again, let me emphasize that, in the State of Texas, like in my area that I represent spans 800 miles of the Texas-Mexico border. We want the trucks. We are prepared to have them come in and bring their cargo through in a safe manner, complying with American law.

Let me also tell my colleagues what free trade has meant to some of these border communities that used to have unemployment rates at 40 to 45 percent. Free trade has dropped the unemployment in border communities drastically. In some areas, like in Laredo, Texas, it has now caused it to be the second fastest growing community in America. It is a boom area, and we enjoy the fruits of free trade.

Allowing these trucks to come in would help those folks as well. So to try to talk about offering an amendment to stop these trucks from coming in not only discriminates against Mexico, but it discriminates against a lot of minority communities along the border that want these trucks to come through because it has improved the quality of life. Trade has improved the quality of life. This is part of free trade that would improve it even more.

So leave us alone. Let the border communities, the high Hispanic population communities in Texas, benefit from free trade. Stop discriminating against us and stop discriminating against Mexico.

Mr. ROGERS. Madam Speaker, will the gentleman yield?

Mr. BONILLA. I am happy to yield to the gentleman from Kentucky.

Mr. ROGERS. Madam Speaker, the gentleman represents an area of Texas I think is the largest border area of any Member of Congress.

Mr. BONILLA. The gentleman is correct. Madam Speaker.

Mr. ROGERS. So all of the gentleman's constituents live on the border; is that correct, Madam Speaker?

Mr. BONILLA. Madam Speaker, the vast majority of my constituents, although I have areas that are also several hundred miles from the border.

Mr. ROGERS. Madam Speaker, if the gentleman will continue to yield, knowing what the administration, the Department of Transportation is doing even as we speak. That is, DOT is designing a plan for the safety of the trucks coming up from Mexico, and knowing generally what the plan is, does the gentleman from Texas (Mr. BONILLA) have concerns for the safety of his constituents through which these trucks would pass to the rest of the U.S.?

Mr. BONILLA. Madam Speaker, reclaiming my time, not any more than I would have a concern about an American truck coming through the Mexico border.

Let me also just add, if I could, to the gentleman from Kentucky, I would challenge any Member here who continues to pursue this action against Mexico, next time they speak about this issue, and the television camera is on them, I challenge them to look at that camera in the eye and tell us that they are not discriminating against Mexico and border area residents.

Mr. ROGERS. Madam Speaker, will the gentleman yield?

Mr. BONILLA. I am happy to yield to the gentleman from Kentucky.

Mr. ROGERS. Madam Speaker, is the gentleman aware of the rulemaking?

Mr. BONILLA. Madam Speaker, re-emphasizing my time, I am aware of that. I am aware of what the gentleman has said, but I am aware of what I know all of us are concerned about having the highest standards complied with by anyone who drives trucks in our country.

Mr. ROGERS. Madam Speaker, if the gentleman will yield, is the gentleman aware of any Members who have spoken here today that have registered a complaint with the Motor Carrier Safety Administration?

Mr. BONILLA. Madam Speaker, I am not aware of any such problems that have existed, not to create a premise on which to file any complaints. These are simply scare tactics and, as I have pointed out, targeted just against Mexico, nothing mentioned about Canada.

Mr. ROGERS. Madam Speaker, will the gentleman further yield?

Mr. BONILLA. Yes, I yield to the gentleman from Kentucky.

Mr. ROGERS. Madam Speaker, does the gentleman also realize that, if the rulemaking that will be adopted some time this early fall is not severe enough to ensure the safety of American citizens from Mexican trucks, that Congress can always address the question at that time?

Mr. BONILLA. Madam Speaker, I am aware of that, and I am sure that that is something we would want to do in a bipartisan way.

Mr. FROST. Madam Speaker, I yield 2 minutes to the gentleman from California (Mr. FULNER).

Mr. BONILLA. Madam Speaker, I rise in opposition to the rule and because of its refusal to allow the common-sense Sabo amendment on truck safety.

This gentleman represents a border community. This gentleman represents an area where 30 percent of the trucks cross the border.

The gentleman from Kentucky (Mr. ROGERS) has filed a complaint on the rulemaking. I will tell my colleagues that I know of the dangers of the trucks to our citizens and to our driving public. I know what happens when uninsured drivers have accidents. I know what happens when trucks do not have brakes. I know what happens
when tired drivers are on the roads in San Diego and the rest of this Nation. I will tell the gentleman from Texas (Mr. Bonilla), who just spoke, and the gentleman from Kentucky (Mr. Rogers) who talks about an administration plan, I live on the border. There is no evidence of such a plan. There is no national standard. I have traveled to Texas, I have looked at our border inspections in California. This is not discrimination against Mexico, Madam Speaker. This is a plea on behalf of the state of Texas.

Mr. REYNOLDS. Madam Speaker, I reserve the balance of my time.

Mr. FROST. Madam Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. Brown).

Mr. BROWN of Ohio. Madam Speaker, I thank the gentleman from Texas for yielding me this time.

President Bush's decision to open the border to Mexican trucks is wrong. A report released on May 8th from the Department of Transportation's inspector general showed the U.S. Border Patrol can only inspect 1 percent, 46,000 of the 4.5 million trucks that were crossing the border.

Three years ago, at my expense, I went to Laredo, Nuevo Laredo. I went to the border, I watched the trucks inspections. One person was inspecting trucks that day. Two thousand five hundred trucks were going through the border at Laredo; one inspector was 

for Governor George W. Bush and the Department of Public Safety in Texas. I asked him how many trucks he inspected a day. He said 10 to 12. I asked, how many trucks do you take out of service each day? He said, somewhere between 9 to 11.

He had told us, it had come to the State of Texas had not fixed the scales which had been broken for 3 months, that the State of Texas and the Government of the United States simply were not very interested in truck safety.

Whether these trucks, these 2,500 a day that were going from Nuevo Laredo to Laredo, Texas, the 4.5 million trucks a year, whether they have faulty brakes or tire failures or loads that exceed weight limits, Mexican trucks fail to meet American standards.

Mexican trucks on average are 10 years older than U.S. trucks. A truck driver in the United States cannot get a license until they are 21. In Mexico, the age is 18. Mexico does not have a national commercial truck driver's license information system to detect driving violations. U.S. drivers can drive only 10 hours per shift, must keep a log of their hours worked, must pass a knowledge and skills test, and must have regular medical examinations.

In Mexico there are none of those requirements. Madam Speaker, President Bush is wrong on truck safety. He is wrong to open the border to unsafe trucks. The Republican leadership is wrong on this issue. Vote 'no' on the rule.

Mr. REYNOLDS. Madam Speaker, I reserve the balance of my time.

Mr. FROST. Madam Speaker, I reserve the balance of my time.

Mr. REYNOLDS. Madam Speaker, if the gentleman wishes to yield back, we will close this and move to the vote.

Mr. FROST. Madam Speaker, we had several other requests for time. The Members are not present on the floor. I would ask the gentleman whether he has any additional speakers.

Mr. REYNOLDS. No, I do not. It is obvious I have been reserving the balance of my time to close the debate on our side when the gentleman is ready.

Mr. FROST. Madam Speaker, I yield myself such time as I may consume to urge that the rule be defeated. The rule does not make in order the very important amendment offered by the gentleman from Minnesota (Mr. Sabo), and the rule also did not take into consideration the objections raised by the gentleman from Virginia (Mr. Moran).

Madam Speaker, I yield back the balance of my time.

Mr. REYNOLDS. Madam Speaker, I yield myself such time as I may consume to close.

Madam Speaker, this is an open rule. It is a fair rule. It is a rule that allows the transportation legislation of the Committee on Appropriations to come before the House. There has been considerable discussion, with the will of the Committee on Appropriations passing a second degree amendment to the Sabo amendment offered by the gentleman from Kentucky (Mr. Rogers). That amendment passed 37 to 27, reflecting the will of the Committee on Appropriations in the amendment.

Madam Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered. The SPEAKER pro tempore (Mrs. Wilson). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FROST. Madam Speaker, I object to the vote on the ground that a quorum is not present and I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The SPEAKER pro tempore. Pursuant to clause 8(c) of rule XX, this 15-minute vote on the adoption of House Resolution 178 will be followed by a 5-minute vote on the motion to suspend the rules posted earlier today.

The vote was taken by electronic device, and there were—yeas 219, nays 205, not voting 9, as follows:

(Roll No. 191)

YEA—219

Mr. Chairman, I am very pleased to present to the House the Department of Transportation and related agencies appropriations bill for fiscal year 2002. This is an excellent bill that reflects not only the priorities of the budget submitted by the President earlier this year but also the important contributions of all the Members of our subcommittee and full committee and we hope now the full House.

I want to especially thank the gentleman from Minnesota (Mr. OBEY), the ranking member of the full committee, for their support of this subcommittee and the programs we oversee. I am also thankful to all the members of our subcommittee who had a part in the drafting of this bill and the full committee on Appropriations, each of which had the chance to amend and correct as we went through that process. And, of course, we would not be here without our wonderful staff, both on the majority and the minority side upon whom we all so much depend.

Mr. Chairman, the bill I present today provides an increase of 6 percent in the programs and activities of the Department of Transportation. At first blush, this appears to be a healthy increase over current levels, but in fact it is barely enough to cover the 4.6 percent pay raise that will go to all Federal employees next year as well as the general cost of inflation for programs in our jurisdiction. So this is a lean bill, especially when compared with the explosive growth and needs caused by highway and air travel in this country. We are doing a lot in this bill to respond to that demand but not nearly as much as we would like. The Department of Transportation will have to economize, it will have to be more efficient, and it will have to live within the constraints of the spending limits set by the budget just like every other agency.

The bill is within our 302(b) allocation, in both budget authority and outlays. It fully funds the highway and aviation spending increases established by TEA-21 and AIR-21, and it will help relieve the congestion that is frustrating citizens on our interstates, in the skies, and in our bus and train terminals.

Our bill fully funds the Coast Guard’s operating budget and provides $600 million, which is a huge increase, in their capital account. Within the capital appropriation for $4 billion to kick off the Deepwater program, which will provide a vitally needed upgrade and replacement of the Coast Guard’s ships and aircraft. Members should know that this is the largest acquisition program, that is the Deepwater program, in the Coast Guard’s history.

The bill also includes, Mr. Chairman, funds to address serious staffing, training, and equipment problems at our small-boat stations of the Coast Guard which were highlighted in our hearings with the Inspector General and the Coast Guard this year. I am proud that we could find a small amount of money to raise the staffing levels and the training at these stations which provide the backbone of our Nation’s search and rescue capability. With an average workweek, Mr. Chairman, of 80 hours-plus, Coast Guardsmen at these stations are in desperate need of some help. We provide it in this bill.

The bill also includes, Mr. Chairman, funds to address serious staffing, training, and equipment problems at our small-boat stations of the Coast Guard which were highlighted in our hearings with the Inspector General and the Coast Guard this year. I am proud that we could find a small amount of money to raise the staffing levels and the training at these stations which provide the backbone of our Nation’s search and rescue capability. With an average workweek, Mr. Chairman, of 80 hours-plus, Coast Guardsmen at these stations are in desperate need of some help. We provide it in this bill.

Consistent with the provisions of AIR-21, this bill fully funds the airport grants program at $3.3 billion and fully funds FAA’s capital appropriation at $2.9 billion. It also provides nearly 100 percent of the FAA’s operating budget. In addition, this bill includes several initiatives that will hopefully lead to reductions in the number and severity of airline delays. Our gridlocked aviation system has been a major focus of this subcommittee, and it will continue to receive the scrutiny of our panel until we untangle it for the good of the traveling public and the industry.

In this bill we are doing everything possible to make sure the money is there for work and technologies that address the problem.

If we find programs and initiatives that work, we will fund them. If we find programs that fail, we will cut them off. It is that simple. We are determined to make improvements. Things will change. This bill is a start. But we will keep pressing for real action and real results in an area critical to all of us.

The bill restores proposed cuts to the essential air service program. Under the administration’s proposal, 18 cities would have lost their air service next year. This bill maintains the eligibility of each of these cities in the program and provides the additional $13 million needed to maintain current service levels. That will be good news to 18 cities across the country where EAS provides a necessary service. In addition, the bill provides $10
million to kick off the new small community air service development pilot program authorized last year in AIR-21. This program will enable small and rural communities around the country to foster air service where it does not exist and foster competition in those communities where there is monoply service. I can personally attest to the decline in air service in many smaller cities around the country. It is a tremendously needed program, and I am pleased the bill provides initial funding for it.

The bill includes $32.6 billion for our Nation's highways, an increase of $1.2 billion, 4 percent, consistent with the authorizations in TEA-21. This will provide for high-priority construction needs in every State of the Nation.

The bill provides $298 million for the Motor Carrier Safety Administration, an increase of 11 percent over the current year. Included in the bill is the addition of $112 million requested by the President to maintain a high level of trucking safety on the border with Mexico as we fully open up the border next year pursuant to NAFTA. This is a very important initiative to ensure the safety of all Americans as Mexican trucks begin to drive beyond commercial zones near the border into the interior of the U.S. I believe this funding, combined with the administration's regulatory and program activities, will ensure that we receive the benefits of greater trade with Mexico while at the same time protecting our people as we learn to share the road with our neighbors to the south.

The bill includes $419 million for the National Highway Traffic Safety Administration, a 4 percent increase above current year, essentially the same as the administration requested, and it provides the level of funding called for in TEA-21.

Amtrak, we are recommending the requested level of $521 million for Amtrak's capital needs, and we waive a limitation on funding carried for several years so that Amtrak can access those funds on the first day of the fiscal year. We have all read about and studied Amtrak's difficult cash situation. This bill will help them as much as we can next year. Ultimately, though, Congress will have to decide what to do next year if Amtrak does not meet its 5-year glide path to operational self-sufficiency mandated by Congress, soon to be 5 years ago. This bill for now meets the Federal commitment to help get Amtrak to that point. Now the debate will begin about whether or not Amtrak deserves the subsidies that will be required to keep it operating.

In transit, the bill provides $6.7 billion for transit programs, an increase of almost $500 million over the current year. For the New Starts program, where funding is very tight, the committee chose to provide a higher share of the requested amount to those transit projects which show a more solid financial commitment by the local and State governments and where the Federal share is limited to 60 percent or less. This will allow the Congress to stretch the very limited amount of Federal money so a much greater number of worthy projects as possible can be conducted. I hope all Members will appreciate that the explosive demand for transit services is far greater than we can possibly fund. By rewarding those projects with a higher local commitment, we are being good stewards of the taxpayers' money.

Mr. Chairman, I reserve the balance of my time.

Mr. SABO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the fiscal year 2002 appropriation bill. This bill is one that historically has been developed in a bipartisan manner, and I am happy to say that this year is no different.

This is the first year that the gentleman from Kentucky (Mr. ROGERS) has chaired the subcommittee, and I congratulate him on a job well done. He has been thorough, he has been fair, and we have a bill before us that deserves the support of all Members of this House.

I would also like to thank our staff, Bev Phyto and Marjorie Duske from my staff, and the subcommittee staff of Rich Efford, Stephanie Gupta, Cheryle Tucker, Linda Muir and Theresa Kohler. They all have worked exceptionally well together and have produced an outstanding product. So this is a good bill that deserves passage by a substantial margin, and I would hope unanimous support.

The subcommittee held a number of hearings this year on aviation delays. The gentleman from Kentucky (Mr. ROGERS) should be commended for bringing the FAA, airports, airlines and other stakeholders together for frank discussions on the problems facing aviation customers. Solutions are not easy to come by, but we need a balanced approach to increase aviation system capacity with updated air traffic control technology, new runways and responsible flight scheduling.

One important factor that must not be overlooked is the fact that many communities have a legitimate concern about airport noise that results in delays or even prevent airport expansion. In order to save billions of dollars every year to mitigate noise impacts by insulating or relocating homes. To help alleviate the noise problem at its source, the bill provides an additional $20 million to increment aircraft engine noise research so that quieter airplanes can be developed sooner.

Overall, this is a great bill. We should pass it.

Let me also, however, note some concerns of our colleagues that the committee did not extend several transit, bus and New Start earmarks and would allow them to be reprogrammed in 2002. I am sure that we can work out these issues as we move forward in the appropriations process.

In closing, I believe that the merits of this bill outweigh any problems that must be addressed, and I urge support of the bill.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, to finish my opening statement, this bill is fair, it is balanced, it is bipartisan. It satisfies our national transportation needs to the best of our ability. It emphasizes strong program oversight and financial accountability, and it represents the hard work of every Member of this subcommittee.

I want to thank all of our Members for their suggestions, their hard work, and, again, special thanks to the ranking member, the gentleman from Minnesota (Mr. SABO), for his assistance throughout the process. I urge approval of the bill.

Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. YOUNG), the very able chair of the full committee who has been so helpful to us in the production of this bill and all of the others.

Mr. YOUNG of Florida. Mr. Chairman, I rise in enthusiastic support of this bill, and I want to compliment the gentleman from Kentucky (Mr. ROGERS) for having done an outstanding job in working with the gentleman from Minnesota (Mr. SABO), the ranking member, and the staff of the subcommittee, because they have taken a bill that has the potential for real controversy and made it a very good bipartisan bill.

That is not to say that there are not some differences, because there are some differences. That is always the case when we bring a bill to the floor. But these men have done a really good job.

I also want to compliment the gentleman from Kentucky (Mr. ROGERS), the chair of the Subcommittee, for the tremendous relationship that he has established with the authorizing committee, the Committee on Transportation and Infrastructure, chaired by our friend and colleague, the gentleman from Alaska (Mr. YOUNG). They had some problems that had to be worked out, and they were able to do that, mostly to the satisfaction of both of them. I believe this is a good example of how legislation can be drafted to get to a good bill that can be accepted by most everybody in this Chamber.
Mr. ROGERS of Kentucky. Mr. Chairman, I wish to engage in a colloquy with our distinguished chairman, the gentleman from Kentucky (Mr. ROGERS) and the staff of the Subcommittee on Transportation and Infrastructure, the authorizing committee, with whom I have a very close working relationship, and I appreciate his leadership and hard work, and I want to congratulate him for the outstanding job he has done as chairman of the subcommittee.

At the beginning of this Congress, the gentleman from Kentucky (Mr. ROGERS) and I began a process of improving communications between our two committees, and I am hopeful that we can continue to work together to improve our communications and cooperation.

I also would like to thank the gentleman from Florida (Mr. YOUNG) and the gentleman from Kentucky (Mr. ROGERS) for reporting a bill that generally honors the funding guarantees contained in both the Transportation Equity Act for the 21st Century, TEA–21, and the Aviation Investment and Reform Act of the 21st Century, AIR–21.

However, I still have several concerns about the legislation. First, I have made it clear from the beginning of my term as chairman of Committee on Transportation and Infrastructure that I am going to ensure that the guarantees provided in TEA–21 and AIR–21 are respected. These funds are essential to maintaining and improving our ground and aviation transportation systems.

As the gentleman from Minnesota (Mr. SABO) mentioned earlier, with NAFTA many trucks now will be coming into America further than the 30 miles, coming across into our country, and sometimes they may not meet the requirements that our country has set for our own trucks. I hope we will revisit the SABO amendment and that we make those trucks coming in from Mexico meet the very same standards that our trucks have. Mexican trucks coming from Mexico do not have regular hours of service. Sometimes their inspection records are not up-to-date like ours must be. I hope we take the time in this bill to revisit that issue, to make sure that all American citizens are secure and safe as trucks move around our country.

I would also like to thank the gentleman from Alaska (Mr. SABO) and the staff of the Subcommittee on Appropriations for their cooperation. I want to again to congratulate the gentleman from Alaska (Mr. SABO), the new and very able and strong chairman of the Committee on Transportation and Infrastructure, the authorizing committee, with whom I have a very close working relationship, and I appreciate his hard work and his cooperation.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. KILPATRICK), a distinguished member of our subcommittee.

Mr. KILPATRICK. Mr. Chairman, I thank the ranking member, the gentleman from Minnesota (Mr. SABO) for his outstanding leadership as we brought a perfect bill to this floor.

Mr. Chairman, it has been a pleasure to work with the gentleman from Kentucky (Mr. ROGERS) on this first time on appropriations and in the subcommittee. This is a good bill. I strongly urge its adoption and that we move forward in the process.

The gentleman from Alaska (Mr. SABO) and the gentleman from Minnesota (Mr. YOUNG) for the good work he has done in helping us to resolve some of these differences.

It is a good bill. Let us vote for it.

Mr. SABO. Mr. Chairman, I yield 3 minutes to the gentlewoman from Michigan (Ms. KILPATRICK), a distinguished member of our subcommittee.

Ms. KILPATRICK. Mr. Chairman, I thank the ranking member, the gentleman from Minnesota (Mr. SABO) for his hard work and willingness to work with the gentleman through this appropriation process to produce the best transportation appropriation bill possible.

Mr. Chairman, I wish to thank the gentleman for yielding me 3 minutes to the gentleman from New Jersey (Mr. LOBIONDO). His amendment is needed to address the significant shortfall in the appropriation to the Coast Guard. It was my understanding that the Committee on the Budget had provided a sufficient Function 400 to cover all the needs of the Coast Guard. Unfortunately, that allocation was not passed in the appropriation bill. Therefore, the subcommittee on the Appropriations Committee on Transportation Appropriations for its consideration and cooperation. I want to commend the excellent staff of the gentleman from Kentucky (Chairman ROGERS) and the staff of the Subcommittee on Transportation for their hard work and willingness to work with my staff.

I look forward to continuing to work with the gentleman through this appropriation process to produce the best transportation appropriation bill possible.

Mr. SABO. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey (Mr. ROTHMAN), a member of the full committee.

Mr. ROTHMAN. Mr. Chairman, I thank the gentleman for yielding me 3 minutes.

Mr. Chairman, I wish to engage in a colloquy with our distinguished chairman, the gentleman from Kentucky (Mr. ROGERS) and the staff of the Subcommittee on Appropriations for its consideration and cooperation. I want to commend the excellent staff of the gentleman from Kentucky (Chairman ROGERS) and the staff of the Subcommittee on Transportation for their hard work and willingness to work with my staff.

I look forward to continuing to work with the gentleman through this appropriation process to produce the best transportation appropriation bill possible.

Mr. SABO. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey (Mr. ROTHMAN), a member of the full committee.

Mr. ROTHMAN. Mr. Chairman, I thank the gentleman for yielding me 3 minutes.

Mr. Chairman, I wish to engage in a colloquy with our distinguished chairman, the gentleman from Kentucky (Mr. ROGERS) and the staff of the Subcommittee on Appropriations for its consideration and cooperation. I want to commend the excellent staff of the gentleman from Kentucky (Chairman ROGERS) and the staff of the Subcommittee on Transportation for their hard work and willingness to work with my staff.

I look forward to continuing to work with the gentleman through this appropriation process to produce the best transportation appropriation bill possible.

Mr. SABO. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey (Mr. ROTHMAN), a member of the full committee.

Mr. ROTHMAN. Mr. Chairman, I thank the gentleman for yielding me 3 minutes.

Mr. Chairman, I wish to engage in a colloquy with our distinguished chairman, the gentleman from Kentucky (Mr. ROGERS) and the staff of the Subcommittee on Appropriations for its consideration and cooperation. I want to commend the excellent staff of the gentleman from Kentucky (Chairman ROGERS) and the staff of the Subcommittee on Transportation for their hard work and willingness to work with my staff.

I look forward to continuing to work with the gentleman through this appropriation process to produce the best transportation appropriation bill possible.

Mr. SABO. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey (Mr. ROTHMAN), a member of the full committee.

Mr. ROTHMAN. Mr. Chairman, I thank the gentleman for yielding me 3 minutes.

Mr. Chairman, I wish to engage in a colloquy with our distinguished chairman, the gentleman from Kentucky (Mr. ROGERS) and the staff of the Subcommittee on Appropriations for its consideration and cooperation. I want to commend the excellent staff of the gentleman from Kentucky (Chairman ROGERS) and the staff of the Subcommittee on Transportation for their hard work and willingness to work with my staff.

I look forward to continuing to work with the gentleman through this appropriation process to produce the best transportation appropriation bill possible.
(Mr. ROGERS), on the subject of Stewart Airport.

Mr. Chairman, I thank you for joining in a colloquy with me and the distinguished ranking member, the gentleman from Minnesota (Mr. SABO), to discuss an important issue regarding air traffic in the New York-New Jersey metropolitan region.

Mr. Chairman, I am grateful for your efforts and those of our distinguished ranking member and for the work of the committee to research how to reduce the terrible problem of aircraft noise, which affects tens of thousands of my constituents in northern New Jersey.

I also want to thank the chairman and ranking member for addressing the critical problem of airline delays and for their work on the redesign of the New Jersey-New York metropolitan area's regional air space.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. ROTHMAN. I yield to the gentleman from Kentucky.

Mr. ROGERS of Kentucky. I want to thank the gentleman from New Jersey for requesting this colloquy. I am proud to inform him of the work the committee has done in our oversight hearings and in this bill to address the serious issue of airline delays. I am also pleased to report that the bill includes $8.5 million, which the Federal Aviation Administration is to use only for the redesign of the New Jersey-New York metropolitan region's air space.

Mr. SABO. Mr. Chairman, will the gentleman yield?

Mr. ROTHMAN. I yield to the gentleman from Minnesota.

Mr. SABO. Mr. Chairman, the committee has also increased funding for the Federal Aviation Administration's environment and energy budget to research aircraft noise mitigation to $27.6 million, an increase of $24.1 million over fiscal year 2001, in order to speed the introduction of lower-noise aircraft technologies.

Mr. ROTHMAN. Mr. Chairman, re-claiming my time, I thank the gentle-

men.

As the Federal Aviation Administration looks at ways of reducing the stress on our overburdened regional air space, particularly the air space over northern New Jersey, I would also ask the committee to work with the FAA on examining the important role that Stewart International Airport could play in accommodating general aviation aircraft that now use Teterboro Airport, located in my district in New Jersey. Such a shift from Teterboro to Stewart would reduce the aircraft noise and air traffic that affects hundreds of thousands of my constituents every day.

Mr. ROGERS of Kentucky. If the gentle-

man will continue to yield, I want to thank the gentleman from New Jersey (Mr. ROTHMAN) and the others for high-lighting these additional ways that the FAA can reduce aircraft noise and ease air traffic congestion in the region. We will work with them on these important issues as the committee moves forward.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. ROTHMAN. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I represent the area around the Stewart Airport, and I want the gentleman to know just today we have been meeting with the FAA to emphasize the need for using regional airports, such as Stewart, to alleviate the congestion of LaGuardia Airport. I want to commend the gentleman for focusing attention on this important issue.

Mr. ROTHMAN. Mr. Chairman, re-claiming my time, I thank my distin-

guished colleague.

Mr. SABO. Mr. Chairman, I yield 1 minute to the gentleman from Wis-

consin (Mr. OBEY), the distinguished ranking member of the full Committee on Appropriations.

Mr. OBEY. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, I simply want to say while we will certainly be debating a number of issues about which there is some disagreement today, including the Sabo amendment, overall, this is a very reasonable bill and it deserves to be supported. I expect to support it, and I expect a large number of Members will do the same.

I congratulate the gentleman from Kentucky and the gentleman from Minnesota for the job they have done. I appreciate their good work, as I know the House does, and we look forward to disposing of this bill in fairly short order.

Mr. ROGERS of Kentucky. Mr. Chair-

man, I yield 2 minutes to the gentle-

woman from Missouri (Mrs. EMERSON), one of the hardest working members of our subcommittee.

Mrs. EMERSON. Mr. Chairman, I rise today in support of H.R. 2299, and want to thank the gentleman from Kentucky (Chairman ROGERS) and the gentleman from Minnesota (Mr. SABO), the ranking member, for the fabulous job they have done in putting this bill together, as well as the staffs, who have worked tremendously.

I believe very strongly this bill goes a long way towards meeting our Na-
tion's transportation priorities. I come from a rural district; and, as cochair of the Rural Caucus, there is probably nothing more critical to helping rural America than improving our infra-
structure. It is probably the most im-
portant thing that we needed to ad-
dress in this issue, from my perspec-
tive, and, for the first time, our legisla-
tion does fund the Small Community Air Service Development Pilot Pro-
gram, which will stimulate new and ex-
panded air service at under-utilized airports in small and rural commu-
nities.

The legislation also includes import-
ant language which strongly urges the Department of Transportation to issue rural consultation provisions which were included back when we did TEA-
21 3 years ago. These important rules will ensure that our rural elected officials have a seat at the table when our State departments of transpor-
tation are making Statewide transpor-
tation planning decisions.

So, again, I would like to thank the chairman for his tremendous hard work; and I look forward to working with him and the ranking member as we continue on with the process.

Mr. SABO. Mr. Chairman, I yield 1 minute to a distinguished member of our subcommittee, the gentleman from Arizona (Mr. PASTOR).

Mr. PASTOR. Mr. Chairman, first of all I would like to congratulate our chairman, the gentleman from Ken-
tucky (Mr. ROGERS), and, ranking mem-
ber, the gentleman from Minnesota (Mr. SABO), for the fine work they have done in bringing this bill before us. It is a reasonable bill, it is a fair bill, and I congratulate them and also thank them.

I would like to thank the sub-committee for the work that they did on the issue of the borders in this bill. We have monies dedicated to building facilities that will inspect the trucks, as we have the international flow of trucks, and also we have additional personnel on the borders. This bill con-
tains additional money for personnel on the borders that will inspect the trucks.

I would also like to congratulate the subcommittee for the work they have done in dealing with airport congesc-
tion. As the gentleman from New Jer-
sey (Mr. ROTHMAN) talked about hubs, this subcommittee has taken on the re-
sponsibility of dealing with conges-
tion that we have, and I look forward to working with them to resolve that.

I would like to thank the staff for the fine work they have done. This is a good bill, and we support it.

Mr. ROGERS of Kentucky. Mr. Chair-

man, I yield 2 minutes to the gentle-

man from New York (Mr. SWEENEY), another one of the very hardworking members of our subcommittee.

Mr. SWEENEY. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, I basically wanted to stand and commend and congratulate our chairman of the subcommittee, who faced a number of challenges, as well as the ranking member, the gentle-

man from Minnesota (Mr. SABO).

This is a comprehensive bill that moves forward the transportation needs of this Nation in a very positive way, connecting our people with the air. They faced a great many challenges.

I come from a State that has huge transportation infrastructure needs.
For example, in the New Start program, they faced the challenge that the Federal Transit Administration account has done dangerously low levels in the New Start program, and there are a number of programs that need funding.

We were able to secure some funding for the New York City area, which has huge and substantial needs. In addition to that, as my colleague, the gentleman from New Jersey (Mr. ROMAN), pointed out, this bill moves forward in a very positive way. I think it is the first tangible way that any level of government began to look at the use of Stewart Airport as one of the four major airports in the New York metropolitan area. And this is not a North-east regional issue or problem, it is a national problem, because 30 percent of all domestic travel is constant out of this region. If we are able, through the commission of a study in this bill, to find a way to ease that problem, it will have an effect nationally.

There are a number of other provisions that work to serve the Northeast and my constituents, an I-87 corridor study and many other efforts in the high speed rail area, to connect our region.

But I want to especially commend the chairman, the gentleman from Kentucky (Mr. ROGERS), and his staff for their paying attention to these problems, for taking the issues that are at hand here today and working hard with them.

In addition, I understand we are going to add some new money into the FAA’s General Counsel’s office to handle airport-airline complaints. All of those efforts are consumer friendly and are important to moving the agenda forward, and I want to commend the chairman for his efforts.

Mr. PASTOR. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from New York (Mr. SERRANO), a member of the subcommittee.

Mr. SERRANO. Mr. Chairman, I rise to engage my chairman, the gentleman from Kentucky (Mr. ROGERS), in a colloquy.

Mr. Chairman, as you know, New York City is the nation’s biggest user of mass transportation. The city’s transportation needs, the constant growth and transit improvements and expansion are of critical importance to the city’s mobility and general well-being.

One project that is vital to the transit network of the future is the Second Avenue Subway. I requested funding for this project, as did other members of the New York delegation. However, as a member of the subcommittee, I am keenly aware of the funding limits that the gentleman from Kentucky (Chair- man Rogers) and the ranking member, the gentleman from Minnesota (Mr. SABO), faced in putting their bill together and of the tough decisions that they were forced to make.

One of these decisions was to limit New Starts funding to projects already in preliminary engineering. This made funding decisions that are still in the alternatives analysis stage of the planning process impossible.

I would ask the gentleman from Kentucky (Chairman ROGERS) if there were any exceptions to this policy and if the gentleman from New York has been very, very persuasive with us.

Mr. SERRANO. Mr. Chairman, reclaiming my time, I thank the chairman for those comments. I would like to close by saying this continues to be a major issue and to certainly the surrounding area, the people who come in to visit. I would hope that in the near future we could move to find a way to fund this project.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, I am pleased to rise in strong support of this measure, the Fiscal Year 2002 Transportation Appropriations Act. I commend the gentleman from Kentucky (Mr. ROGERS), the subcommittee’s distinguished chairman, for his diligence and hard work in crafting this legislation, which appropriates over $50 billion in budgetary resources to meet our Nation’s transportation needs, including almost $20 million for New York State and my Congressional district.

I am gratified to note that over $6 million has been earmarked for improving Stewart International Airport, which we have been discussing, providing funding for the construction of a new, long-needed air traffic control tower.

In addition, funds are going to be allocated to the Stewart Airport Connector Study, which will improve surface access to the airport. Moreover, I welcome Chairman ROGERS’ support for Stewart by his recognition of its potential as a priority alternative regional airport for the New York metropolitan region.

Earlier today, I was pleased to host a meeting with Chuck Seliga, Managing Director of Stewart International, and with officials from the Federal Aviation Administration to review the future of Stewart Airport and how our efforts to alleviate congestion at LaGuardia should include Stewart Airport.

Stewart International has the infrastructure location and capability to be a viable alternative for the New York metropolitan region, and I fully support efforts to promote this underutilized airport. I commend the gentleman from Kentucky (Mr. ROGERS), the chairman of the subcommittee, for his efforts in crafting this vital legislation.

Accordingly, I urge my colleagues to fully support this important appropriations bill.

Mr. FASTOR. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from New Jersey (Mr. ANDREWS).

Mr. ANDREWS. Mr. Chairman, I would like to engage the gentleman from Kentucky (Mr. ROGERS), the subcommittee chairman, in a colloquy.

Mr. Chairman, I would like to request that a study be conducted on pier safety in navigable waters.

Currently, no Federal regulations exist requiring safety standards for piers. This deeply concerns me because there have been a great number of fatal pier accidents that could have been prevented if Federal safety standards were in place.

One such fatal accident took place on May 18, 2000, when a 140-foot portion of Pier 34 on the Delaware River in Philadelphia collapsed, killing three constituents of mine. This accident could have been avoided if Federal pier safety standards had existed.

I believe that Congress can take an active role in preventing these tragic accidents from occurring by creating safety standards for piers in navigable waters. Therefore, I respectfully ask for the chairman to support my efforts by urging the conferees to include language in the final transportation appropriations bill that calls for a study to be conducted on pier safety.

Mr. Chairman, I thank the gentleman for yielding.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. Mr. Chairman, I yield to the gentleman from Kentucky.

Mr. ROGERS of Kentucky. Mr. Chairman, while I have not examined this particular issue in detail, I can assure the gentleman that we will seriously consider his request.

Mr. ANDREWS. Mr. Chairman, I thank the subcommittee chairman and the staff.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. WOLF), the very able immediate past chairman of this subcommittee and now the chairman of the Subcommittee on Commerce, Justice and State and Judiciary.

Mr. WOLF. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. WOLF. Mr. Chairman, I rise in strong support of the bill.
I do want to just say, though, for the membership of the body and for the administration, the gentleman from Minnesota (Mr. Sabo) is right. We have to be careful on this truck issue. Five thousand people a year die in the United States from trucks. If you go out on a truck inspection of American trucks, you will be fearful when you go out on the road sometimes.

Mexico has no hours of service. None. Mexico has no drug testing. None. Mexico has no truck inspection. None. Mexico uses leaded gasoline and not unleaded gasoline.

Frankly, the administration has not thought this thing through, and we do not even have an Office of Motor Carrier Administration yet on the job.

Now, I know the gentleman from Kentucky (Mr. Rogers) said we will watch this carefully and I appreciate that. But this is an important issue. I tell you this, Mr. Sabo, you have to be careful and you better handle this right, because if this is not handled right, people will die. So this is an important issue, and I appreciate the chairman’s commitment to making sure that those regulations are good. I think the Congress ought to be very careful and the administration especially so, to listen to what the gentleman from Minnesota (Mr. Sabo) was trying to say.

The truck safety issue is one that I advocated as the chairman of the House transportation appropriations subcommittee over the past six years. I sat in hearings and heard testimony on this. If you can make a comprehensive safety program involving trucks from Mexico, including testing from the inspector general at the Department of Transportation, that office issued a December 1998 audit report which “concluded that neither the Office of Motor Carriers nor the border states, with the exception of California, are taking sufficient action to ensure that trucks entering the United States from Mexico meet U.S. safety standards.” A copy of the report is enclosed.

I understand the requirements under NAFTA permitting cross-border trucking services. Nevertheless, the U.S. needs to ensure that trucks from Mexico, including testing from the inspector general at the Department of Transportation must establish a comprehensive enforcement program that provides reasonable assurance of the safety of trucks from Mexico. The Department of Transportation must establish a comprehensive enforcement program that provides reasonable assurance of the safety of trucks from Mexico.

The United States and Mexico must establish, test and implement a comprehensive truck safety program at our borders. This is unacceptable to have unsafe trucks from anywhere on our highways. These trucks could be traveling on I-81 through the Shenandoah Valley in the heart of my congressional district, or on I-5 in California, or on the streets of the nation’s capital. We have an obligation to protect our families, our friends and our neighbors who use the nation’s highway system every hour of every day.

I urge the Bush Administration to take every precaution necessary to ensure that no lives are lost because of unsafe trucks on our highways. I have spent considerable time on this issue over the past six years and believe it deserves your close attention.

Mr. HINCHEY. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from New York (Mr. Hinchey).

Mr. HINCHEY. Mr. Chairman, I want to express my appreciation to the gentleman from Kentucky (Mr. Rogers), the chairman of the subcommittee, for putting together a very excellent bill to help us deal with the transportation needs of our country over the course of the upcoming fiscal year.

In particular, I want to thank him for his attention to our air traffic needs and particularly to the subject of air traffic safety and the need to relieve air traffic congestion in many places around the country.

The airport at the LaGuardia field in New York City is principal among them. The chairman has recognized that it is possible to relieve air traffic congestion at LaGuardia and other metropolitan airports by providing an alternative venue at Stewart International Airport, which is located just 60 miles north of Manhattan.

The chairman has expressed that by working with us to obtain an appropriation of $5.7 million for a new air traffic control tower and air traffic control system at Stewart, we are going to be successful in attracting new carriers into Stewart, new commercial carriers, this air traffic control system, which is funded in this appropriation bill, will be absolutely essential. I thank the chairman for that.

I also want to express my appreciation to the chairman for his recognition and allowing of report language in the bill which instructs the Federal Aviation Administration to pay attention to Stewart Airport as it addresses the need to relieve congestion at LaGuardia and other airports in the metropolitan region. We have placed language, report language, in the bill which stipulates that this should occur and that the FAA and the Federal Department of Transportation in addressing these needs also pay attention to the need to provide surface transportation between Newburgh where Stewart Airport is located and the metropolitan area of New York City.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. Gekas) for the purpose of a colloquy.

Mr. GEKAS. Mr. Chairman, I thank the gentleman for yielding me this time.

The current bill contains a provision in which the result is a reallocation of certain funds that were appropriated for what is called Corridor One in central Pennsylvania, a very vital item in...
the revitalization of mass transit transportation and economic development. We want to recommit this reallocation and allow the stimulus of funding to continue, and we would urge the chairman, and I will yield to him for a colloquy on this. I would ask him to work with us, staff-to-staff and Member to Member, so that we can try to refashion the appropriation and re-store what has been reallocated.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from Kentucky.

Mr. ROGERS of Kentucky. Mr. Chairman, I appreciate the concerns of the gentleman. We would be pleased to work with him as the transportation bill moves along this year, and I assure the gentleman of that.

Mr. MENENDEZ. Mr. Chairman, I thank the gentleman.

Mr. PASTOR. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New Jersey (Mr. MENENDEZ).

Mr. MENENDEZ. Mr. Chairman, I thank the gentleman for yielding me this time.

I would ask if he, on behalf of the gentleman from Minnesota (Mr. SABO) and the distinguished chairman, as well as the gentleman from New Jersey (Mr. ROTHMAN), would join in a colloquy.

Mr. Chairman, I would like to thank the gentleman from Kentucky (Mr. ROGERS), the chairman of the sub-committee, and the gentleman from New Jersey (Mr. ROTHMAN), I yield to the gentleman from New Jersey (Mr. ROTHMAN), for the cooperation.

Mr. ROTHMAN. Mr. Chairman, will the gentleman yield?

Mr. MENENDEZ. Mr. Chairman, I yield to the gentleman from Kentucky.

Mr. ROTHMAN. Mr. Chairman, I too wish to express my gratitude to the gentleman from Kentucky (Mr. ROGERS), the chairman of the sub-committee, and to the gentleman from Arizona (Mr. Pastor) on behalf of the ranking member, the gentleman from Minnesota (Mr. SABO), for the cooperation and generosity of the committee for its help on a wide range of transportation priorities in New Jersey that are included in this bill.

I understand the funding constraints under which the committee is working. I would also, however, like to point out that this new ferry hub project would provide an important transportation solution for the area, New York, New Jersey and Connecticut, as well as in particular for Jersey City. It would connect the New York and New Jersey financial districts with a 5-minute ferry ride, transport up to 30,000 passengers daily, and provide relief to the congested PATH and Holland Tunnel interstate traffic.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. MENENDEZ. I yield to the gentleman from Kentucky.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield all of my colleagues for bringing the Jersey City project to our attention. I will be glad to work with my colleagues and other project sponsors as we move the transportation bill through the process this year.

Mr. MENENDEZ. Mr. Chairman, I thank the chairman for his consideration.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Illinois (Mr. KIRK).

Mr. KIRK. Mr. Chairman, I applaud the gentleman from Kentucky (Mr. ROGERS) and the committee for taking action to fight the growing gridlock that plagues northern Illinois.

For the first time in 70 years, our country is building a new commuter rail line, Metra’s North Central line; and once complete, this line will pull thousands of cars off of our crowded highways and help us meet our obligations under the Clean Air Act.

The bill also contains funding for a traffic control center in Libertyville, Illinois, the Pace Suburban Bus System that relieves the pressure for the reverse commuters and for roadway construction at Palwaukee Airport that will rebuild a crumbling runway that is crucial to relieving congestion at nearby O’Hare.

I want to thank the gentleman from Minnesota (Mr. SABO) and the gentleman from Kentucky (Mr. ROGERS) for their commitment to the quality of life and environment of northern Illinois.

Mr. Chair, I urge strong support for this bill.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 2 minutes to the gentleman from Maryland (Mr. HOYER), one of our colleagues on the Committee on Appropriations and an old friend.

Mr. HOYER. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I applaud the efforts of the chairman and the ranking member on this bill.

I rise to speak on behalf of a provision which will help the Anacostia waterfront become a vibrant community of residents and commerce, a project that will make Poplar Point a recreation destination, and to make South Capitol Street the center of a vital community and an appropriate gateway entrance into this capital city.

Last year, the gentlewoman from the District of Columbia (Ms. NORTON) shepherded through the Congress a bill to allow private development of the Southeast Federal Center. Her bill was key in bringing commercial and residential growth into this community. Over the past several months, I have been working with the gentlewoman from the District of Columbia (Ms. NORTON), Mayor Williams, and a host of Federal and local agencies and all of my colleagues from the Washington metropolitan area to identify what the Federal Government’s next step can be. The next step must be addressing the terrible state of the South Capitol Street entrance to the Nation’s capitol.

I therefore rise in strong support of the initiative in this bill for the Transportation Department to examine how to rework South Capitol Street. The transportation study will examine ways to create better infrastructure that links the waterfront community to the existing Capitol Hill community.

Once completed, this study is certain, certain to help community residents, Federal officials, and entrepreneurs to combine their skills and energy to realize the Anacostia’s full potential.

We in Congress, Mr. Chairman, have a duty, a duty to this great city. By supporting the South Capitol Street traffic pattern study, we will be giving our Nation’s capital a critical planning tool to make a smart, balanced development decision in the next few years. We will also be sending a powerful signal to District residents and entrepreneurs that we care about Washington, D.C.’s future.

I am very pleased to support this bill and the initiative. I think it is an initiative that all of us will look back on a decade, 2 decades from now and say, this was a substantial step, not just for the capital city, but for America as well.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. FOSSELLA) for the purposes of a colloquy.

Mr. ROGERS of Kentucky (Mr. ROGERS). Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. MENENDEZ) for addressing the needs of the Jersey City project.

Mr. MENENDEZ. Mr. Chairman, I yield to the distinguished gentleman from Illinois (Mr. KIRK).

Mr. Chairman, I urge strong support for this bill.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 2 minutes to the gentleman from Maryland (Mr. HOYER), one of our colleagues on the Committee on Appropriations and an old friend.

Mr. HOYER. Mr. Chairman, I urge strong support for this bill.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. ROTHMAN) for the purposes of a colloquy.
Mr. FOSSELLA. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I would like to thank the gentleman from Kentucky (Mr. ROGERS) for giving me the opportunity to discuss an issue that is vital not just to New York, but indeed the entire country.

As the gentleman knows, the dynamics of the Regional Airspace Redesign recently brought this issue to our attention. The FAA is currently undertaking the New York-New Jersey-Philadelphia Airspace Redesign project, which is expected to take 5 years to complete.

According to the FAA, the purpose of the New York-New Jersey Airspace Redesign project is to “increase the efficiency of air traffic flows into and out of the metropolitan area, including Philadelphia, while maintaining or improving the level of safety and air traffic services that are currently in place.”

In accordance with the Federal law, the FAA must conduct an environmental review before implementing any new flight plans. A concern that I have is the environmental impacts of departure delays. Anybody on the runway of any of the major airports knows what I mean, particularly, for example, in Newark airport, where it is not uncommon to sit on the runway for 45 minutes or hour, an hour, 15 minutes in the morning.

It is something that I feel deserves more consideration while conducting the redesign. By increasing efficiency, not only will delays be reduced, but the environments of surrounding communities will see a significant reduction in air pollution. Airports are significant sources of ground-level volatile organic compounds and nitrogen oxides. In our Nation’s largest and busiest airports, these idling planes can create as much, if not more, ground-level pollution than many of their large industrial neighbors.

According to a July 2000 report by Department of Transportation Office of Inspector General, at the 28 largest U.S. airports, the number of flights with taxi-out times of 1 hour or more increased 130 percent over the past 5 years, with nearly 85 percent of all delay times occurring on the ground. In addition, it was reported that the departure delays were significantly underreported, so the full environmental effects of idling planes is not known.

The area included in the redesign contains four of the Nation’s 10 most delayed airports. By encouraging the FAA to take the environmental impacts of departure delays into consideration while evaluating new departure paths, this could lead to not only more efficient airports with less delays and happier consumers, but also a cleaner environment; therefore, I respectfully ask that the gentleman include language in the committee report directing the FAA to consider these impacts while conducting its environmental review.

Mr. SABO. Mr. Chairman, I yield 2 minutes to the gentlewoman from California (Mrs. DAVIS).

Mrs. DAVIS of California. Mr. Chairman, I want to thank the gentleman from Florida (Mr. YOUNG), the gentleman from Wisconsin (Mr. OBEY), the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) for their great work on this bill.

Mr. Chairman, $65 million for the Mission Valley East Light Rail Extension is included in this bill, and that is part of the San Diego Trolley, an area that we have been trying to improve for a number of years. Also it includes $2 million for phase 1 of the Mid Coast Corridor Extension.

Mr. Chairman, I want to thank the gentleman from Alaska (Mr. YOUNG) and the gentleman from Minnesota (Mr. OBERSTAR) for their long-standing commitment to mass transit.

I also want to recognize and thank my colleagues in the San Diego congressional delegation, the gentleman from California (Mr. HUNTER), the gentleman from California (Mr. FILNER) and the gentleman from California (Mr. ISSA). We have worked together on this Mission Valley East Extension, and this bipartisan cooperation will make a big difference for all of our constituents in San Diego.

What does that mean? It means that we are going to be increasing the trolley ridership by 2.5 million new annual transit riders. It means that students at San Diego State University will now be connected to our light rail system. It means that patients at Alvarado Medical Center will be connected to the light rail system. It also means that we are going to close the gap between our blue and our orange lines, and we will take a first step towards linking the University of California at San Diego to our light rail system.

Mr. Chairman, I thank the gentleman from Kentucky (Mr. ROGERS) for the opportunity to acknowledge these needed transit improvements that will be coming to the San Diego region and the big difference it will be making for all of us.

Mr. SABO. Mr. Chairman, I yield back the balance of my time.

Mr. ROGERS of Kentucky.

Mr. Chairman, I submit the following for the RECORD.
## TRANSPORTATION APPROPRIATIONS BILL, 2002 (H.R. 2299)

CONGRESSIONAL RECORD—HOUSE
11931

Ms. PELOSI. Mr. Chairman, I support the Sabo amendment, which would ensure that Mexican trucking companies undergo safety reviews before their trucks gain access to American highways.

Trucks are a major factor in highway fatalities. Even with safety regulations in place in the U.S., crashes involving large trucks killed 5,282 people in 1999. Of these fatalities, 363 occurred in my home state of California. Mexico’s regulations are much weaker than ours. Drivers do not log their hours on the road, restrictions on hours behind the wheel are not enforced, drivers can be under 21, trucks that violate safety standards are not taken off the road, and trucks can weigh significantly more than in the U.S.

Of the nearly 4 million trucks that enter the U.S. commercial zones from Mexico annually, the U.S. inspects only 1%. Of that 1%, more than a third are removed from service because of deficiencies. This is a dismal record. We must ensure that trucks from Mexico are safe before they are allowed on any highway in the United States. I urge my colleagues to vote for the Sabo amendment.

Mr. BEREUER. Mr. Chairman, this Member rises in support of H.R. 2299, the Transportation Appropriations Subcommittee bill for fiscal year 2002.

This Member would like to commend the distinguished gentleman from Kentucky (Mr. ROGERS), the Chairman of the Transportation Appropriations Subcommittee, and the distinguished gentleman from Nebraska (Mr. SABO), the ranking member of the Subcommittee for their hard work in bringing this bill to the Floor.

Mr. Chairman, this Member certainly recognizes the severe budget constraints under which the full Appropriations Committee and the Transportation Appropriations Subcommittee operate. In light of these constraints, this Member is grateful and pleased that this legislation includes funding for several important projects of interest to the State of Nebraska.

This Member is particularly pleased that this appropriations bill includes $1,517,000 for pre- liminary work leading to the construction of bridges in Plattsmouth and Sarpy County to replace two obsolete and deteriorating bridges. The request for these funds was made by this Member as well as the distinguished gentleman from Nebraska (Mr. TERRY) and the distinguished gentleman from Iowa (Mr. GANISKE and Mr. BOSWELL).

The agreement leading to the funding was the result of intensive discussions and represents the consensus of city, county and state officials as well as the affected Members of Congress. The construction of these replacement bridges (a Plattsmouth U.S. 34 bridge and State Highway 370 bridge in Bellevue) will result in increased safety and improved economic development in the area. Clearly, the bridge projects would benefit both counties and the surrounding region.

This Member is also pleased that the bill includes $325,000 requested by this Member for the construction of a 1.7-mile bicycle and pedestrian trail on State Spur 26E right-of-way, which connects Ponca State Park and the Missouri National Recreational River Corridor to the City of Ponca. This trail will play an im-

portant role as the area prepares for the bicentennial of the Lewis and Clark Corps of Discovery expedition and the significant impact it will help generate.

The approaching bicentennial represents a significant national opportunity and it is crucial that communities such as Ponca have the resources necessary to prepare for this significant commemoration.

The trail will provide the infrastructure necessary to improve the quality of life by providing pedestrian and bicycle access between Ponca and the Ponca State Park and increases the potential for economic benefits in the surrounding region. The trail addresses serious safety issues by providing a separate off-road facility for bicyclists and pedestrians.

This Member would also like to mention that this bill provides more than $2.6 million in Section 5307 urban area formula funding for mass transit in Lincoln, Nebraska. This represents an increase of $230,753 over the FY2001 level.

Finally, this bill includes $1,976,000 for Nebraska’s Intelligent Transportation System (ITS). This funding, which was requested by this Member and the distinguished gentleman from Nebraska (Mr. Osborne), is to be used to facilitate travel efficiency and increased safety within the state.

The Nebraska Department of Roads has identified numerous opportunities where ITS could be used to assist urban and rural transportation. For instance, the proposed State- wide Joint Operations Center would provide a unified element allowing ITS components to share information and function as an inter- modal transportation system. Among its many functions, the Joint Operations Center will facilitate rural and statewide maintenance vehicle fleet management, roadway management and roadway maintenance conditions. Overall, the practical effect will be to save lives, time and money.

Mr. Chairman, in conclusion, this Member supports H.R. 2299 and urges his colleagues to approve it.

Mr. NADLER. Mr. Chairman, today I rise in support of this bill to provide appropriations for the Department of Transportation for Fiscal Year 2002.

First, I would like to thank Chairman YOUNG, Ranking Member OBIEY, Subcommittee Chairman ROGERS, and Ranking Member SABO, for including funds for the Cross Harbor Rail Freight Tunnel Environmental Impact Study in this bill. This project was first authorized in TEA-21, and received funds for a Major Investment Study, which was just completed last year. After examining numerous alternatives, the MIS recommended construction of a rail tunnel under New York Harbor to facilitate cross-harbor freight movement. The MIS confirmed that a tunnel would be beneficial in several respects. The economic return to the region would be about $420 million a year. The benefit to cost ratio is 2.3 to 1. The environmental impact would be profoundly felt, as the tunnel would remove one million trucks from our roads per year.

Furthermore, this project will improve the overall social and economic conditions in Queens County.

I would also like to thank the Committee for the inclusion of $10 million for the East Side Access Project.

The East Side Access connection will lead to a comprehensive network of pedestrian, bicycle and transit connections between Long Island City residential and business areas and new parks, retail stores, and cultural institutions.

These innovative improvements will help reduce automobile traffic and improve our neighborhood air quality.

I would like to thank the Committee leadership for understanding the importance of this project, and including funds for the EIS phase so that we can continue the progress of the last few years and correct the freight infrastructure imbalance that exists in the region between the Hudson of New York and Connecticut.

I do have a few concerns, however, regarding transit funding. As many of you know, New York relies heavily on public transportation, and as such, we have a number of projects which are essential to the economic stability, as well as to the environmental quality, of the city. I would like to thank the Committee for including funds for one of these projects, The East Side Access Project, to connect the Long Island Railroad to Grand Central Station in Manhattan. Unfortunately, no funds were included for the Second Avenue Subway. Both of these projects are important, and will require a greater federal investment if they are to be completed in the sufficient time frame. That being said, I hope this problem can be resolved, and I urge the Appropriations Committee to include funding for the Second Avenue Subway when this bill goes to Conference with the Senate.

I have a number of other concerns with this bill. For instance, funds should be included for the inspection of Mexican trucks operating in the United States. We must not sacrifice safety in an attempt to comply with NAFTA. Overall, however, this is a good bill, which fully funds the highway and aviation trust funds. I would like to commend Chairman ROGERS and Ranking Member SABO for their hard work in drafting this important legislation, and I want to thank all my colleagues for their support.

Mr. CROWLEY. Mr. Chairman, I rise today in firm support of the transportation appropriations bill for fiscal year 2002.

I would like to commend Chairman ROGERS and Mr. SABO for crafting a bill that addresses the unique transportation needs in this country.

Though this bill takes into account the demands and constraints of the current transportation network throughout the country, I would like to make special mention of certain aspects of this bill that have a tremendous impact on my constituents in the 7th Congressional district of New York.

I want to thank Mrs. LOWEY, Mr. SERRANO, Mr. HINCHEY, and Mr. SWEENEY for their assistance in securing the inclusion of $250,000 for the Long Island City Links Project.

The LIC Links research funded in this bill will lead to a comprehensive network of pedestrian, bicycle and transit connections between Long Island City residential and business areas and new parks, retail stores, and cultural institutions.

These innovative improvements will help reduce automobile traffic and improve our neighborhood air quality.

Furthermore, this project will improve the overall social and economic conditions in Queens County.

I would also like to thank the Committee for the inclusion of $10 million for the East Side Access Project.

The East Side Access connection will involve constructing a 5,500-foot tunnel from the LIRR Main Line in Sunnyside, Queens, to the existing tunnel under the East River at 63rd Street.
A new Passenger Station in Sunnyside Yard, Queens will also be constructed to provide access to the growing Long Island Business District.

The elements of this bill beneficial to my constituency is not limited to ground transportation.

As representative of LaGuardia Airport in Congress, the issue of congestion in the air and on the ground is a problem that plagues residents in and around the airport on a daily basis.

I am pleased that this bill has included two million dollars for the procurement of air traffic control equipment at LaGuardia Airport. It is my hope that these funds will help alleviate the traffic problems that plague one of the most congested airports in the country.

In that same vein, I would like to commend my colleagues in the New York and New Jersey delegation for their work with regard to air space redesign and the diversion of traffic to Stewart Airport.

The idea of burden sharing of airports in the tri-state is essential to the future of LaGuardia Airport.

Given that LaGuardia is completely saturated, the report initiated by Mr. Hinchey to increase service at Stewart Airport will be a welcome relief for travelers and residents of Queens alike.

This is a reasonable and comprehensive bill that truly addresses the needs of Americans in the 21st century.

Therefore, I strongly urge my colleagues to vote in favor of this bill.

Mr. QUEEN OF TEXAS, Mr. Chairman, I rise today in support of this bill. While there are areas that I hope we can improve via amendments that will be offered, it is a good bill that will continue meeting the transportation needs of our constituents.

I would particularly like to praise the Committee for including funding for the Greater Harris County 9-1-1 Emergency Network from the Department of Transportation’s Intelligent Transportation Systems (ITS) program. Harris County, which includes Houston, Texas, is pioneering the practical application of critical data provided by Automatic Collision Notification boxes that are beginning to be installed on late-model automobiles.

By deploying these boxes to 9-1-1 centers and trauma hospitals in Harris and Fort Bend Counties, these locations will be able to receive up-to-date information on automobile accident victims.

This information will enable 9-1-1 operators to direct appropriate levels of resources to accident locations, and will also allow doctors and nurses at hospitals the time and information that they need to prepare for incoming accident victims.

The goal of this technology is saving lives, through better distribution of emergency response personnel and a higher level of preparedness for incoming patients by emergency room personnel.

The transmitted data will include the speed of the vehicle at impact; number of times that vehicle may have rolled; the number of occupants in the vehicle; heat generation, which may indicate whether or not the vehicle is on fire; and other valuable information.

The lessons we learn in the implementation and testing of this system will serve as a model for other jurisdictions across the United States as they develop and deploy their own lifesaving networks.

Again, I support this bill, and I support the funding for this innovative program that will save lives.

Mr. FRELINGHUYSEN. Mr. Chairman, today I rise in support of H.R. 2299, the fiscal year 2002 Transportation Appropriations bill and urge my colleagues to do the same.

First, I want to thank Chairman ROGERS and Ranking Member SADO for all their hard work in crafting this bill, and for their assistance in addressing New Jersey’s transportation priorities.

A special thanks to Rich Erford and the Transportation Subcommittee staff for their help.

Mr. Chairman, as we debate this important bill, thousands of my constituents back in New Jersey are struggling right now to battle traffic delays on Interstate 80, in Denver, and in the heart of my County. The west bound lanes were closed last week after a fiery tractor trailer collision last week damaged the roadway beyond immediate repair.

This is a major commuter route and out of New York City, and commuters snarled in rush hour traffic this morning learned that extensive repairs to the highway may not be completed until this October. My constituents—these commuters stuck in traffic—know only too well that New Jersey’s mass transportation projects deserve our full commitment.

Because New Jersey is the most densely populated state in the nation, innovative commuter light rail projects such as the Hudson-Bergen Light Rail and Newark-Elizabeth Rail Link are vital to relieving traffic congestion in some of the most densely populated areas of our state.

I am pleased to report that these two commuter rail projects, New Jersey’s top transportation priorities, have received major support and funding, within the confines of the overall budget allocation, which keeps our commitment to the Balanced Budget Agreement of 1997.

Mr. Chairman, as we debate this important bill, thousands of my constituents back in New Jersey are struggling right now to battle traffic delays on Interstate 80, in Denver, and in the heart of my County. The west bound lanes were closed last week after a fiery tractor trailer collision last week damaged the roadway beyond immediate repair.

This is a major commuter route and out of New York City, and commuters snarled in rush hour traffic this morning learned that extensive repairs to the highway may not be completed until this October. My constituents—these commuters stuck in traffic—know only too well that New Jersey’s mass transportation projects deserve our full commitment.

Because New Jersey is the most densely populated state in the nation, innovative commuter light rail projects such as the Hudson-Bergen Light Rail and Newark-Elizabeth Rail Link are vital to relieving traffic congestion in some of the most densely populated areas of our state.

I am pleased to report that these two commuter rail projects, New Jersey’s top transportation priorities, have received major support and funding, within the confines of the overall budget allocation, which keeps our commitment to the Balanced Budget Agreement of 1997.

I am also pleased that this bill will provide a minimum of $8.5 million specifically for the ongoing Federal Aviation Administration’s New Jersey/New York Metropolitan Airport Redevelopment project. For too long, constituents in my district have been suffering from the daily burden of aircraft noise. We have been repeatedly told by the FAA that the only way to alleviate aircraft noise in New Jersey will be through the comprehensive redesign of our airspace. That is why continued, dedicated funding for this redesign effort is vitally important, and I thank the subcommittee for its continued commitment to this vital effort.

Again, I want to thank Chairman ROGERS and Ranking Member SADO for all their hard work, and urge my colleagues to support this legislation.

Mr. WELLER. Mr. Chairman, I rise today in strong support of H.R. 2299, Making Appropriations for the Department of Transportation for Fiscal Year 2002. H.R. 2299 is an important bill for Illinois, providing much needed funding for Metra Commuter Rail Service New Start Projects and the Elgin, Joliet and Eastem Railroad Bridge Reconstruction. The legislation also directs the Federal Aviation Administration to make a priority of processing the Environmental Impact Statement for the proposed South Suburban Chicago Third Airport and to help Lewis University Airport with much needed expansion.

I would like to focus on the unique needs of Lewis University Airport today. Lewis University Airport is the busiest “single-runway” airport in Illinois with 104,000 annual aircraft landings and takeoffs. Located in Will County, Illinois, it serves as the only corporate airport in Illinois’ fastest growing county. The airport is home to 295 based aircraft and over 35 regular visiting customers. Jet fuel sales—an indicator of corporate aircraft use—have increased from 1.468 gallons sold in 1991 to 273,652 gallons sold in 2000. In less than a decade, jet sales have increased to 136 times the first year’s sales.

The existing 12,000 square yard apron has space for only 10 aircraft. The small size of the apron limits its use by aircraft arriving at the Airport’s new terminal building. The apron is regularly over-filled with visiting corporate jets. There are no spaces available for based aircraft.

To meet federal airport safety and design standards, the Airport must soon relocate 150 aircraft storage positions that are too close to the runway. The proposed terminal apron expansion will provide space for the relocation of these Airport residents.

The proposed apron is part of a multi-phased development program of the Airport. The Runway 1–19 construction program is using innovative construction and land use techniques to save over $9.600,000 in federal airport development dollars. The project received recognition by the FAA with the award of the first projects funded under the FAA’s Innovative Development Funding Program.

In addition, Lewis University Airport is by far the closest and most convenient airport to the new ChicagoLand Motor Speedway, opening July 2001. This NASCAR Winston Cup race is expected to bring 200 to 300 aircraft to the Joliet/Will County area, providing a serious need to increase the apron capacity of the airport.
CONGRESSIONAL RECORD—HOUSE

June 26, 2001

Mr. Chairman, the House Transportation Appropriations Bill recognizes the importance of law enforcement and border security. The Federal Aviation Administration to make it a priority. This is good legislation for Illinois and the Nation's transportation infrastructure. I encourage all of my colleagues to support this bill and vote yes on the rule and final passage.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the bill shall be considered for amendment under the 5-minute rule.

During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered read.

The Clerk will read. The Clerk read as follows:

H.R. 2299

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes, namely:

TITLE I

DEPARTMENT OF TRANSPORTATION

OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

For necessary expenses of the Office of the Secretary, $67,726,000: Provided, That notwithstanding any other provision of law, there may be credited to this appropriation up to $2,500,000 in funds received in user fees: Provided further, That not to exceed $50,000 shall be for allocation within the Department for official reception and representation expenses as the Secretary may determine.

OFFICE OF CIVIL RIGHTS

For necessary expenses of the Office of Civil Rights, $8,500,000.

TRANSPORTATION PLANNING, RESEARCH, AND DEVELOPMENT

For necessary expenses for conducting transportation planning, research, systems development, development activities, and making grants, to remain available until expended, $5,193,000.

TRANSPORTATION ADMINISTRATIVE SERVICE CENTER

Necessary expenses for operating costs and capital outlays of the Transportation Administrative Service Center, not to exceed $125,323,000, shall be paid from appropriations made available to the Department of Transportation: Provided further, That such services shall be provided on a competitive basis to entities within the Department of Transportation: Provided further, That the above limitation on expenses shall not apply to non-DOT entities: Provided further, That no funds appropriated in this Act to an agency of the Department shall be transferred to the Transportation Administrative Service Center without the approval of the agency modal administrator: Provided further, That no assessments may be levied against any program, bureau, activity, subactivity, or project funded by this Act unless notice of such assessments and the basis therefor are presented to the House and Senate Committees on Appropriations and are approved by such Committees.

MINORITY BUSINESS RESOURCE CENTER PROGRAM

For the cost of guaranteed loans, $300,000, as authorized by 49 U.S.C. 332: Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974: Provided further, That such funds are available to subsidize total loan principal, any part of which is to be guaranteed, not to exceed $18,367,000: Provided further, that in administrative expenses.
that is up to 30 percent, due to insuffi-
cient funds. Without additional oper-
ation funding for the fiscal year 2002, the
Coast Guard will be forced to cut
drug interdiction by 20 percent, includ-
ing eliminating 5 cutters, 19 aircraft and
520 positions.
Mr. Chairman, without the funding in-
crease provided in my amendment, the
Coast Guard’s operating budget during the
next fiscal year will again be inadequate to respond to critical
missions. The law enforcement emer-
gency concerning migrant interdiction or a surge in drug smuggling would se-
verely degrade other Coast Guard law
enforcement activities. None of us want drug smugglers to be given open access to the United States, but that is
exactly what could happen if we are not careful with these funding levels.
Sho Coalt Getmendment will be accept-
ent today. I would urge the House and the Senate conferes on H.R. 2299 to
fund the Coast Guard at a level con-
sistent with the budget resolution and the Coast Guard Authorization Act of 2001. I respectfully request that the
gentleman from Kentucky (Mr. ROGERS), the gentleman from Florida (Mr. YOUNG) and the gentleman from Alaka (Mr. YOUNG) work toward that end.
I understand the Senate Appropriation Committee’s Transportation 302(b) allocation is about $690 million above the House allocation. I strongly believe that the U.S. Coast Guard is the best place to allocate a portion of this fund-
ing.
Mr. Chairman, I urge the House to support my amendment and allow the
Coast Guard to be funded at the levels necessary to respond to the operational emergencies.

POINT OF ORDER
The CHAIRMAN. Does the gentleman from Kentucky wish to be heard on his point of order?
Mr. ROGERS of Kentucky. I do, Mr. Chairman.
Mr. ROGERS. Of Kentucky, I do, Mr. Chairman.
Mr. Chairman, I have great respect for the gentleman from Kentucky (Mr. ROGERS), the gentleman from Florida (Mr. YOUNG) and the gentleman from Alaka (Mr. YOUNG) work toward that end.
I understand the Senate Appropriation Committee’s Transportation 302(b) allocation is about $690 million above the House allocation. I strongly believe that the U.S. Coast Guard is the best place to allocate a portion of this fund-
ing.
Mr. Chairman, I urge the House to support my amendment and allow the
Coast Guard to be funded at the levels necessary to respond to the operational emergencies.

The CHAIRMAN. Does the gentleman from Kentucky wish to be heard on his point of order?
Mr. ROGERS of Kentucky. I do, Mr. Chairman.
Mr. ROGERS. Of Kentucky, I do, Mr. Chairman.
Mr. Chairman, I have great respect for the gentleman from Kentucky (Mr. ROGERS), but the reality is, that is what we all claim we want the Coast Guard to stop the flow of illegal drugs into this country, and to save our depleted fish-
ery, and to maintain aids to navigation for commercial and recre-
tional boaters, and, of course, to save lives.
If we want those things, we have to ante up. I understand the difficulties as articulated by the gentleman from Kentucky (Mr. ROGERS), but we have to find a way.
The facts are with inexcusably inad-
quate resources, the Coast Guard does a heroic job of balancing their multiple responsibilites with heroic profes-
sionism. At the same time budget constraint have been so severe and so chronic that the Coast Guard can barely keep its fleet in the water and its airplanes in the air.
The authorization bill recently passed and championed by the gen-
tleman from New Jersey (Mr. LoBIONDO) responded to those chal-
enges by boosting the Coast Guard’s operating budget for the next year by
250 million, and thus far in the appro-
priations process, that promise stands unfulfilled.
We have to do better. We have to find a way, otherwise we face the predict-
able consequences of a crippled Coast
Guard, lost property, lost commerce and, of course, lost lives, both the lives of the men and women in the Coast
Guard who serve us every day, as well as those who use the seas either for en-
joyment or to secure a livelihood.

□ 1545
Let me just finally remind my col-
leagues that just recently came reports that the Coast Guard recalled port se-
curity forces that were sent overseas to protect U.S. naval units after the de-
stroyer Cole was attacked by a truck. Be-
cause it can no longer foot the bill. That, Mr. Chairman, is simply dis-
graceful, and it is unacceptable.
The CHAIRMAN. Is there anyone else who wishes to be heard on the point of order?
The Chair is prepared to rule on the
point of order.
The Chair is authoritatively guided under section 312 of the Budget Act by an estimate of the Committee on the
Budget that an amendment providing any net increase in new discretionary budget authority would cause a breach of the pertinent allocation of such
authority.
The amendment offered by the gen-
tleman from New Jersey would in-
crease the level on, to expend total budget authority in the bill. As such, the
amendment violates section 302(f) of the Budget Act.
The point of order is sustained. The
amendment is not in order.
The Clerk will read as follows:

ACQUISITION, CONSTRUCTION, AND
IMPROVEMENTS
For necessary expenses of acquisition, con-
struction, renovation, and improvement of
aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $800,000,000, of which $19,896,000 shall be derived from the Oil Spill Liability Trust Fund of which $90,000,000 shall be available to acquire, repair, renovate or improve ves-
sels, small boats and related equipment, to remain available until September 30, 2006; $26,000,000 shall be available to acquire new aircraft and increase aviation capability, to remain available until September 30, 2004; $74,173,000 shall be available for other equip-
ment to remain available until September 30, 2004; $44,206,000 shall be available for
shore facilities and aids to navigation facili-
ties, to remain available until September 30, 2004; and $4,631,000 shall be available for per-
sonnel compensation and benefits and related

costs, to remain available until Sep-
ember 30, 2003; and $300,000,000 for the inte-
grated deepwater systems program, to re-

main available until September 30, 2004: Pro-
vided, That the Commandant of the Coast

Guard is authorized to dispose of surplus real property, by sale or lease, and the proceeds shall be credited to this appropriation as offset-
ning collections and made available only for the national distress and response system to remain available until September 30, 2004; provided further, That upon initial submission to the Congress of the fiscal year 2003 Presi-
dent’s budget, the Secretary of Transpor-
tation shall transmit to the Congress a com-
prehensive capital investment plan for the
United States Coast Guard which includes funding for each budget line item for fiscal

years 2003 through 2007, with total funding for each year of the plan constrained to the
funding targets for those years as estimated and approved by the Office of Management and Budget: Provided further, That none of the funds provided under this heading may be obligated or expended for the Integrated Deepwater Systems (IDS) acquisition
contract until the Secretary of Transpor-
tation, or his designee within the Office of

11934
CONGRESSIONAL RECORD—HOUSE

June 26, 2001

CONGRESSIONAL RECORD—HOUSE

11935

the Secretary, and the Director, Office of Management and Budget, jointly certify to the House and Senate Committees on Appropriations that IDS program funding for fiscal years 2003 through 2007 is fully funded in the Coast Guard Capital Investment Plan and within the Commerce, Justice, State, Judiciary, and Related Agencies Appropriations, and Budgets' budgetary projections for the Coast Guard for those years.

ENVIRONMENTAL COMPLIANCE AND RESTORATION

For necessary expenses to carry out the Coast Guard's environmental compliance and restoration functions under chapter 19 of title 14, United States Code, $16,927,000, to remain available until expended.

Ms. BROWN of Florida. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to support the amendment offered by the gentleman from New Jersey (Mr. LoBIONDO), chairman of the Subcommittee on Coast Guard and Maritime Transportation.

Our U.S. Coast Guard performs to the same high standards and faces many of the same dangers as our Armed Forces, but does not get funded in the larger Department of Defense budget. Each year they compete for funding with major agencies in the transportation budget, and for the last several years has been forced to either decrease operations or transfer money from maintenance to operations.

Just 2 weeks ago we passed a Coast Guard authorization by 411 to 3 that added $300 million more than this bill provides. Without this additional funding, the Coast Guard will be forced to reduce operations by 20 percent including deactivating two medium cutters, two TAGOS ships, and 13 Falcon jets.

This is not how we should be treating the men and women who risk their lives stopping drug smugglers and illegal immigrants, protecting our ports, and preventing search-and-rescue missions.

I urge our colleagues to vote yes on this amendment and support a budget for the United States Coast Guard that meets our Nation's priorities.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, $15,466,000, to remain available until expended.

RETIRED PAY

For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and for payments for medical care of retired personnel and their dependents under the Dependent Medical Care Act (10 U.S.C. ch. 55), $876,346,000. Provided, That none of the funds in this Act for financial support of the Coast Guard Reserve: Provided further, That none of the funds in this Act may be used by the Coast Guard to assess direct, indirect, or allocable costs or fees for research and development, testing, and evaluation.

Ms. BROWN of Florida. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to support the amendment offered by the gentleman from New Jersey (Mr. LoBIONDO), chairman of the Subcommittee on Coast Guard and Maritime Transportation.

Our U.S. Coast Guard performs to the same high standards and faces many of the same dangers as our Armed Forces, but does not get funded in the larger Department of Defense budget. Each year they compete for funding with major agencies in the transportation budget, and for the last several years has been forced to either decrease operations or transfer money from maintenance to operations.

Just 2 weeks ago we passed a Coast Guard authorization by 411 to 3 that added $300 million more than this bill provides. Without this additional funding, the Coast Guard will be forced to reduce operations by 20 percent including deactivating two medium cutters, two TAGOS ships, and 13 Falcon jets.

This is not how we should be treating the men and women who risk their lives stopping drug smugglers and illegal immigrants, protecting our ports, and preventing search-and-rescue missions.

I urge our colleagues to vote yes on this amendment and support a budget for the United States Coast Guard that meets our Nation's priorities.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, $15,466,000, to remain available until expended.

RETIRED PAY

For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and for payments for medical care of retired personnel and their dependents under the Dependent Medical Care Act (10 U.S.C. ch. 55), $876,346,000. Provided, That none of the funds in this Act for financial support of the Coast Guard Reserve: Provided further, That none of the funds in this Act may be used by the Coast Guard to assess direct, indirect, or allocable costs or fees for research and development, testing, and evaluation.

Ms. BROWN of Florida. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to support the amendment offered by the gentleman from New Jersey (Mr. LoBIONDO), chairman of the Subcommittee on Coast Guard and Maritime Transportation.

Our U.S. Coast Guard performs to the same high standards and faces many of the same dangers as our Armed Forces, but does not get funded in the larger Department of Defense budget. Each year they compete for funding with major agencies in the transportation budget, and for the last several years has been forced to either decrease operations or transfer money from maintenance to operations.

Just 2 weeks ago we passed a Coast Guard authorization by 411 to 3 that added $300 million more than this bill provides. I urge our colleagues to vote yes on this amendment and support a budget for the United States Coast Guard that meets our Nation's priorities.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, $15,466,000, to remain available until expended.

RETIRED PAY

For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and for payments for medical care of retired personnel and their dependents under the Dependent Medical Care Act (10 U.S.C. ch. 55), $876,346,000. Provided, That none of the funds in this Act for financial support of the Coast Guard Reserve: Provided further, That none of the funds in this Act may be used by the Coast Guard to assess direct, indirect, or allocable costs or fees for research and development, testing, and evaluation.
For the implementation of obligations incurred for grants-in-aid for airport planning and development, and noise compatibility planning and programs as authorized under chapter 471 of Title 49, United States Code, and under other law authorizing such obligations; for administration of such programs and other programs and sections 4017, for procurement, installation, and commissioning of runway incursion prevention devices and systems at airports of such title; for implementation of section 203 of Public Law 106-181; and for inspection activities and administration of airport safety programs, including those related to airport operating certificates under section 44706 of title 49, United States Code, $1,800,000,000, to be derived from the Airport and Airway Trust Fund and to remain available until expended: Provided, That under this heading shall be available for the planning or execution of programs the obligations for which are in excess of $3,300,000,000 in fiscal year 2002, notwithstanding section 4017 of Title 49, United States Code: Provided further, That of the funds limited under this heading for small airports due to returned entitlements, $10,000,000 shall be utilized only for the small community air service development pilot program authorized in section 203 of Public Law 106-181: Provided further, That notwithstanding any other provision of law, not more than $56,300,000 of funds limited under this heading shall be obligated for administration.

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against the language found at page 13, beginning on line 24 which begins “for administration of such programs” and continuing to line 25 and ending with the words “section 4017.” That would fund the cost of administering the Airport Improvement Program from contract authority that, under chapter 471 and section 48103 of Title 49 U.S.C., is authorized only for grants, not administrative expenses. This language clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

The CHAIRMAN. Does the gentleman from Kentucky (Mr. ROGERS) wish to be heard on the point of order?

Mr. ROGERS of Kentucky. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman from Kentucky (Mr. ROGERS) is recognized.

Mr. ROGERS of Kentucky. Mr. Chairman, I will concede the point of order in just a minute, but it is unfortunate that the point of order is made. I would defer the beginning of an important and authorized program. These funds would help promote development of smaller airports and promote competition where there is none.

The CHAIRMAN. The gentleman is authorized, just not from this particular funding source. But we believe it is appropriate to use funds otherwise available to small airports for this new program, which only benefits small airports.

Mr. Chairman, I make a point of order against the language found on page 14, beginning on line 12 with the word “Provided” and continuing to end the line.

The language on lines 12 through 17 before the words “Provided further” would fund the cost of the Small Community Air Service Development Pilot Program from contract authority that is authorized only for AIP grants under chapter 471 and section 48103 of Title 49 U.S.C. Although I support this program, as found in section 4017, and would also provide for some administrative expenses, this is an unauthorized earmark of funds.

This language clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

Mr. Chairman, the language found at page 15, line 17 with the words “That notwithstanding” and continuing through the end of line 20 would fund the cost of administering the Airport Improvement Program from contract authority under chapter 471 and section 48103 of Title 49 U.S.C., that is authorized only for grants, not administrative expenses. This supercedes existing law and clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

The CHAIRMAN. Does the gentleman from Kentucky (Mr. ROGERS) wish to be heard on the point of order?

Mr. ROGERS of Kentucky. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman from Kentucky (Mr. ROGERS) is recognized.

Mr. ROGERS of Kentucky. Mr. Chairman, I will concede the point of order in just a minute, but it is unfortunate that the point of order is made. I would defer the beginning of an important and authorized program. These funds would help promote development of smaller airports and promote competition where there is none.

As I indicated, the program is authorized, just not from this particular funding source. But we believe it is appropriate to use funds otherwise available to small airports for this new program, which only benefits small airports.

Mr. Chairman, I make a point of order against the language found on page 14, beginning on line 24 which begins “for administration of such programs” and continuing to line 25 and ending with the words “section 4017.” That would fund the cost of administering the Airport Improvement Program from contract authority that, under chapter 471 and section 48103 of Title 49 U.S.C., is authorized only for grants, not administrative expenses. This language clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

Mr. Chairman, the language found at page 15, line 17 with the words “That notwithstanding” and continuing through the end of line 20 would fund the cost of administering the Airport Improvement Program from contract authority under chapter 471 and section 48103 of Title 49 U.S.C., that is authorized only for grants, not administrative expenses. This supercedes existing law and clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

The CHAIRMAN. Does the gentleman from Kentucky (Mr. ROGERS) wish to be heard on the point of order?

Mr. ROGERS of Kentucky. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman from Kentucky (Mr. ROGERS) is recognized.

Mr. ROGERS of Kentucky. Mr. Chairman, I will concede the point of order in just a minute, but it is unfortunate that the point of order is made. I would defer the beginning of an important and authorized program. These funds would help promote development of smaller airports and promote competition where there is none.

As I indicated, the program is authorized, just not from this particular funding source. But we believe it is appropriate to use funds otherwise available to small airports for this new program, which only benefits small airports.

Mr. Chairman, I make a point of order against the language found on page 14, beginning on line 24 which begins “for administration of such programs” and continuing to line 25 and ending with the words “section 4017.” That would fund the cost of administering the Airport Improvement Program from contract authority that, under chapter 471 and section 48103 of Title 49 U.S.C., is authorized only for grants, not administrative expenses. This language clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

Mr. Chairman, the language found at page 15, line 17 with the words “That notwithstanding” and continuing through the end of line 20 would fund the cost of administering the Airport Improvement Program from contract authority under chapter 471 and section 48103 of Title 49 U.S.C., that is authorized only for grants, not administrative expenses. This supercedes existing law and clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

An office already exists, but in lengthy hearings last year over the delays at the Detroit airport involving Northwest Airlines, one aggrieved consumer stood up and said, you know, I spent over $100 on toll bills before I found out there was anybody at the Department of Transportation in a subcategory of the General Counsel’s Office who would listen to my complaint.

This office generally has labored in obscurity merely to compile statistics with a phone recording, people leave their complaints, and sometimes to advocate on the behalf of those with disabilities.

This amendment would increase the rescission of funds on line 25 by $720,000, and it would allocate those funds in the Secretary’s office to the Office of General Counsel, to the people who handle it in the Aviation Consumer Protection Division. It would be funds that could establish a 1-800 number and would also provide for some funding for staff for that number.

I have consulted with the former general counsel a number of times over this over the years and have contacted the Department. They feel that, although this is a relatively modest amount of money, that given the existing number of complaints and the complaints they feel would warrant further action by the Department of Transportation and by that office, they believe it would be adequate funds to begin to better serve aviation consumers.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. DEFAZIO. Yes, Mr. Chairman, the gentleman from Kentucky, the able chairman, is absolutely correct.

Mr. ROGERS of Kentucky. Mr. Chairman, do I understand the gentleman’s amendment is intended to provide funds which the Secretary of the Department of Transportation would be able to use to establish a hotline for consumers to complain of airline delays, cancellations, problems and so forth associated with air travel?

Mr. DEFAZIO. Yes, Mr. Chairman, the able chairman from Kentucky, the gentleman is correct.

Mr. DEFAZIO. Yes, Mr. Chairman, the gentleman from Kentucky, the able chairman, is absolutely correct.

Mr. ROGERS of Kentucky. Mr. Chairman, in that instance, I have no objection to the amendment.

Mr. DEFAZIO. I thank the gentleman.

Mr. SABO. Mr. Chairman, will the gentleman yield?

Mr. DEFAZIO. I am happy to yield to the gentleman from Minnesota (Mr. SABO).

Mr. SABO. Mr. Chairman, do I understand also that the gentleman from Oregon has offset the cost of his amendment with a rescission that equals the cost of his amendment?

Mr. DEFAZIO. Yes, Mr. Chairman, the amendment is.

Mr. SABO. Mr. Chairman, I think the gentleman has a good amendment.

Mr. DEFAZIO. Mr. Chairman, I thank the gentleman.
Mr. Chairman, I just want to clarify. I am sorry, I had a different number on mine. I want to make sure we all agreed on the same amendment. With that, I thank the chairman, and I thank the ranking member.

The CHAIRMAN. The CHAIRMAN. The CHAIRMAN.

The CHAIRMAN. The amendment was designated.

The Clerk will report the correct amendment.

The Clerk reads as follows:

Amendment offered by Mr. DeFazio:

Page 14, strike lines 24 and 25 and insert the following:

Of the unobligated balances authorized under 49 U.S.C. 48103, as amended, $301,720,000 are rescinded.

The amount otherwise provided in this Act for “OFFICE OF THE SECRETARY—Salaries and Expenses” is hereby increased by $720,000.

Mr. DeFazio (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The CHAIRMAN. The CHAIRMAN. The CHAIRMAN.

The amendment was agreed to.

Amendment offered by Mr. Young of Alaska

Mr. Young of Alaska. Mr. Chairman, I offer an amendment.

The Clerk reads as follows:

Amendment offered by Mr. Young of Alaska

Page 14, after line 25, insert the following:

SMALL COMMUNITY AIR SERVICE DEVELOPMENT PILOT PROGRAM

For necessary expenses to carry out section 41743 of title 49, United States Code, $10,000,000, to remain available until expended.

Mr. Young of Alaska (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alaska?

There was no objection.

Mr. Rogers of Kentucky. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The point of order is reserved.

Mr. Young of Alaska. Mr. Chairman, my amendment restores funding for the Small Community Air Service Development Pilot Program that was stricken by my point of order.

This program will help small communities that do not have adequate, affordable commercial air service attract new service. Without reliable air service, small communities cannot sustain their economic growth.

The Small Community Air Service Development Pilot program authorized by section 203 of the Aviation Investment Reform Act for the 21st Century, AIR-21, will assist underserved airports obtain jet service. It will also allow small communities to work with that service to increase passenger service.

The money provided by this program could also assist a small or midsized community by making money available to subsidize air carriers’ operations. If the Secretary of Transportation determines that the community is not receiving sufficient air carrier service.

Mr. Chairman, this program is important to many small communities throughout our Nation, and I urge the adoption of the amendment.

Mr. Chairman, I also suggest, although I struck the money, I do support the program. This is an attempt to put the money back in without having tapped the sources that it originated.

Mr. Oberstar. Mr. Chairman, will the gentleman yield?

Mr. Young of Alaska. Yes. I yield to the gentleman from Minnesota.

Mr. allocation of $301,720,000. Mr. Chairman, I supported this program as a pilot program in AIR-21 last year. In fact, Chairman Shuster and I worked together to fashion the language. I have long supported service to small communities and to initiatives of this kind.

We all know that deregulation has saved billions of dollars for air travelers, but we also know that, in the process, deregulation has cost communities air service.

What we have now is a phenomenon of the community in my district and elsewhere around the country where people are traveling by car as much as 100 miles to get adequate air service.

With the kind of initiative that we anticipated in this provision, this pilot program, we can both prevent communities from becoming essentially air service towns, where the Federal Government is coming in to support air service with direct dollar payments, and help them to advertise, undertake initiatives locally to encourage air travel from lesser-served communities and boost their air service. Such initiatives have worked in communities in my district to more than double air travel in those towns, saving their air service.

I think that this pilot program in the manner in which the chairman has proposed to fund it ought to be approved and will help increase demand in such markets to create adequate service without direct Federal assistance.

Mr. Young of Alaska. Mr. Chairman, I thank the gentleman from Minnesota for his comments. I hope to work with the ranking member and of course the gentleman from Kentucky (Mr. Rogers), the chairman of the subcommittee, to see if we cannot get these monies somehow into this program. It is a good program.

Again, though, I think it should be coming from the general fund and not necessarily from the funds that were set aside for the improvements of these airports.

Mr. Green of Texas. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will not take all of the 5 minutes, but I wanted to bring a point of concern to the attention of my colleagues now that we have both the Chair of our appropriations subcommittee and the Chair of our subcommittee.
Every day, in some of the busiest airports in America, hundreds of aircraft, charter planes, private jets, commercial flights, and even helicopters ferrying oil platform workers, disappear from the radar screens of our air traffic controllers. These flights are not victims of any air disaster, but rather the fact that, for a wide area of airspace in the Gulf of Mexico, we have no effective radar coverage.

In this area, the air traffic controllers at Houston; Miami; and at Merida, Mexico; who share responsibilities for coverage in the Gulf, can neither see these flights nor communicate directly with the pilots who are flying them. For 3 years, the Federal Aviation Administration, the FAA, has worked with airline representatives, pilots, controllers, and other Federal entities, like the Department of Defense, to complete a Gulf of Mexico strategic plan. This plan sets out a detailed recommendation on how to resolve the Gulf of Mexico airspace issues.

I urge the FAA Administrator Jane Garvey to act quickly and approve the solutions laid out by this working group. These solutions are inexpensive and easy to implement and would have a very real impact on the traffic jam in our skies in the Gulf of Mexico.

It will increase safety in our skies and reduce congestion at Houston’s Bush Intercontinental Airport, an important travel hub, especially for the growing markets in Central and South America.

Where previously controllers have had to employ oceanic nonradar separation standards, this enhanced coverage will allow better utilization of empty airspace and more effective management of air traffic. This would reduce delays and save airlines and passengers time and money. I would hope that the FAA could move forward with this much-needed project.

The CHAIRMAN. The Clerk will read.

LIMITATION ON TRANSPORTATION RESEARCH

The Chair recognizes the gentleman from Texas (Ms. Jackson-Lee) for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I offer an amendment.

Mr. ROGERS. Mr. Chairman, on this amendment I reserve a point of order.

The CHAIRMAN. The Chair will recognize the gentleman from Texas (Ms. Jackson-Lee) for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I hope that my colleagues will see the necessity and importance of waiving the point of order.

This amendment in particular deals with current events that are happening in Houston, Texas. It is an amendment to earmark $5 million in FHA/FAA transportation research funding for the operation of Houston TranStar, a high-tech center that deals with transportation in the context of a tropical storm or a disaster. The impact of not funding the expansion of the transportation emergency center, also known as Houston TranStar, would be undermining Houston’s transportation system. Mr. Chairman, we cannot afford to eliminate additional multimodal transportation management functions requested by the residents of Houston and to limit the transportation emergency management functions to those now existing at the center in inadequate space.

This is not an old unit, the Houston TranStar center, but it has proven itself to be old in wisdom and usefulness. It was very effective in moderating the congestion in Houston, all over the community, but more importantly, in these last couple of weeks, Houston TranStar, that center, became the anchor, the heart of the strategy to help us recover from Tropical Storm Allison. The governor met there, the FEMA director met there, the mayor met there, the judge of Harris County met there, Members of Congress, all support staff, fire department, police department, the health department, all of those individuals were able to gather and design a strategy to help us begin to pull ourselves up.

The establishment and implementation of a temporary command post was a real element of TranStar’s viability. It directed people where not to go because of the flooding in different highways and freeways. The initial action to get pumping gear at the Texas Medical Center, Southwestern Bell’s main switching station, and the Civic Center garage all were part of Houston TranStar.

The coordination of shelter identification, operation of the Salvation Army and the American Red Cross occurred there. The coordination of rescue efforts in unincorporated portions of Harris County, with the Harris County Sheriff’s liaison and the Harris County Fire Marshall’s liaison. The re-location operation of the 911 system in unincorporated portions of Harris County, and the direction, operation and control functions of the Harris County government were pretty much housed at Houston TranStar. The transfer and operation of the Harris County Sheriff’s department and the coordination of the Harris County air search and recovery unit.

Two times I lifted off in a helicopter, one a Black Hawk, to be able to survey the area, and it was from Houston TranStar. Houston TranStar represents a major element of transportation in Houston and the surrounding areas. This is a request for $5 million for a
June 26, 2001

CONGRESSIONAL RECORD—HOUSE 11939

center that has proven not only to assist Houston but also the major surrounding areas as well.

These monies come from the pool of monies that are available for this particular usage, and I would ask that my colleagues consider waiving the point of order for this funding source that is basically very necessary to continue the work that we are already doing in expanding and expediting the recovery that is going on now in Houston, Texas.

Mr. Chairman, I rise to offer an amendment that would provide $5 million in funding for the Houston TranStar program, which has been so instrumental in the response to Tropical Storm Allison.

The impact of not funding the expansion of the transportation and emergency center—also known as Houston TranStar—would be destructive to Houston's transportation system. Mr. Chairman, we are now facing additional multi-modal transportation management functions requested by the residents of Houston and to limit the transportation and emergency management functions to those now existing at the center in inadequate space.

As we all know, Tropical Storm Allison has already been dropped an unprecedented record amount of rainfall in Houston causing homes and businesses near bayous, freeways and even the world renowned Texas Medical Center to flood. Citizens from all walks of life—rich, poor, African-American, White, Hispanic, Asian, Baptist, Catholic, Muslim, and especially the vulnerable were all impacted by the Tropical Storm Allison.

Houston TranStar was one of success stories in helping the relief effort to recover from Tropical Storm Allison. Houston TranStar began operating in 1996 as the only such center of its kind in the nation. It has functioned quietly in the background for many years providing safe and efficient transportation management services at a moment's clock in the Houston community. However, during the recent tragedy inflicted by the recent flood, Houston TranStar, the Transportation and Emergency Management center for the greater Houston region, played a major role in identifying heavy flooded areas, marshaling resources, communicating with the citizens and assisting other local, state and national agencies addressing the devastation that was Tropical Storm Allison.

Much of the success Houston TranStar has and is enjoying can be attributed to in large part to its unique partnership comprised of the City of Houston, Harris County, the State of Texas and METRO. Together, these agencies have combined their agencies and expertise to provide a greater level of immediate services to the residents in entire Houston area.

The fact that Houston TranStar is a valuable resource has never been more evident to me than in the past few weeks. To see this unique center in action is truly a pleasure. It makes you feel positive that people can and are trying to make a difference in people's lives in a tangible way. For instance, during Tropical Storm Allison and all other weather-related events, Houston TranStar serves as a one-stop shop for all agencies charged with addressing the demands of the region while ensuring a minimal loss of life and or harm to property.

Some of the recent efforts to aid and assist Houston have included the establishment and implementation of temporary command posts by the Houston Fire Department to direct rescue efforts and dispatch evacuation and rescue boats that moved more than 10,000 people, the initiation action to get pumping gear to the Texas Medical, Southwestern's Main Switching Station and the Civic Center Garage, and the coordination of shelter identification and operations with Salvation Army and the American Red Cross.

In addition, Houston TranStar assisted with the coordination of rescue efforts in unincorporated portions of Harris County with the Harris County Sheriff's Liaison and the Harris County Fire Marshal's Liaison, the direction and control functions of Harris County Government and the coordination of rescue efforts at Houston TranStar, the logistical support of representatives from FEMA, the Army Corp of Engineers and all agency partner personnel working extended hours, among other valued efforts.

Despite the valiant efforts by TranStar, Tropical Storm Allison has caused $23 billion and the Houston community $4.8 billion. The mere fact that Houston TranStar was able to communicate with its citizens, marshal local, state, and national resources and minimize the impact on the region, is a true testament to how effective this unique partnership is for the greater Houston region.

Let us find a way to include the $5 million funding allocation in the bill to maintain these essential funds for the entire Houston. Mr. Chairman, we cannot squander this opportunity to preserve the TranStar program. I urge my colleagues to support the Jackson Lee amendment.

POINT OF ORDER

Mr. ROGERS. Mr. Chairman, I make a point of order against the amendment because it provides an appropriation for an unauthorized program, therefore, violates clause 2 of rule XXI, which states in pertinent part, "An appropriation may not be in order as an amendment for an expenditure not previously authorized by law."

Mr. Chairman, the authorization for this program has not been signed into law. The amendment, therefore, violates clause 2 of rule XXI. I ask for a ruling of the Chair.

Mr. Chairman, does the gentlewoman wish to be heard on the point of order?

Ms. JACKSON-LEE of Texas. I certainly would.

Mr. Chairman, I thank the chairman very much and the ranking member. As I noted, this comes from a large pool of funding of the Federal Highway Administration, some $475 million. My point is that because of the emergency nature of this request, I am asking that the point of order be waived so that this particular unit can carry forth its emergency efforts in helping Houston recover and remain as an emergency center coordinating all forms of government effectively and helping to coordinate the recovery process and finding resources dealing with heavy equipment, in hosting the Coast Guard and the Army Corps of Engineers.

Mr. Chairman, we researched the question to determine authorization. It is unclear whether such has been authorized. But in any event, I would ask the chair of the subcommittee to consider the fact of the ongoing work of Houston TranStar, its importance and vitality in bringing the city back to its feet, and its involvement to the transportation modules in our community and coordinating transportation in a large metropolitan area.

Mr. Chairman, we cannot afford to eliminate certain funds in the bill. Under clause 2(a) of rule XXI, such an earmarking must be specifically authorized by law. The burden of establishing authorization in law rests with the proponent of the amendment.

Finding that this burden has not been carried, the point of order is sustained. The amendment is not in order.

The Clerk will read.

The Clerk read as follows:

FEDERAL-AID HIGHWAYS
(LIMITATION ON OBLIGATIONS)
(HIGHWAY TRUST FUND)

None of the funds in this Act shall be available for the implementation or execution of programs, the obligations for which are in excess of $31,716,797,000 for Federal-aid highways and highway safety construction programs for fiscal year 2002.

FEDERAL-AID HIGHWAYS
(LIQUIDATION OF CONTRACT AUTHORIZATION)
(HIGHWAY TRUST FUND)

Notwithstanding any other provision of law, for carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 139, notwithstanding any other provision of law, for carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 139, notwithstanding any other provision of law, for carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 139, notwithstanding any other provision of law, for carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 139.

AMENDMENTS OFFERED BY MR. ROGERS OF KENTUCKY

Mr. ROGERS of Kentucky. Mr. Chairman, I offer several amendments, and I ask unanimous consent that they be considered en bloc.

The Clerk read as follows:

Amendments offered by Mr. Rogers:

On page 25, line 4 of the bill, strike "Notwithstanding any other provision of law, for carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 139, notwithstanding any other provision of law, for carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 139."
The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. Without objection, the amendments will be considered en bloc.

There was no objection.

Mr. ROGERS of Kentucky. Mr. Chairman, I shall not take the full 5 minutes time.

This is a manager’s amendment and accommodates the concerns expressed by the Committee on Transportation and Infrastructure by removing in five cases authorizing language. It has been cleared with the minority as well as the authorizing committee. I believe it is noncontroversial, and I would ask for its adoption.

Mr. SABO. Mr. Chairman, I support the amendment.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Kentucky.

The amendments were agreed to.

The CHAIRMAN. The Chair will read.

The Clerk read as follows:

STATE INFRASTRUCTURE BANKS (RECSSION)

Of the funds made available for State Infrastructure Banks in Public Law 104-205, $6,000,000 are rescinded.

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

Motor Carrier Safety

LIMITATION ON ADMINISTRATIVE EXPENSES

For necessary expenses for administration of motor carrier safety programs and motor carrier safety research, pursuant to section 109(a)(1)(B) of title 23, United States Code, not to exceed $52,397,000 shall be paid in accordance with law from appropriations made available by this Act and from any available take-down balances to the Federal Motor Carrier Safety Administration, together with advances and reimbursements received by the Federal Motor Carrier Safety Administrator provided that such amounts shall be available to carry out the functions and operations of the Federal Motor Carrier Safety Administration.

NATIONAL MOTOR CARRIER SAFETY PROGRAM (LIQUIDATION OF CONTRACT AUTHORIZATION) (LIMITATION ON OBLIGATIONS) (HIGHWAY TRUST FUND)

For payment of obligations incurred in carrying out the provisions of 23 U.S.C. 402, 405, 410, and 411, to remain available until expended.

NATIONAL DRIVER REGISTER (HIGHWAY TRUST FUND)

For expenses necessary to discharge the functions of the Secretary with respect to the National Driver Register under chapter 303 of title 49, United States Code, $2,000,000, to be derived from the Highway Trust Fund.

HIGHWAY TRAFFIC SAFETY GRANTS (LIQUIDATION OF CONTRACT AUTHORIZATION) (LIMITATION ON OBLIGATIONS) (HIGHWAY TRUST FUND)

Notwithstanding any other provision of law, for payment of obligations incurred in carrying out the provisions of 23 U.S.C. 402, 405, 410, and 411, to remain available until expended.

NATIONAL DRIVER REGISTRATION (HIGHWAY TRUST FUND)

For expenses necessary to discharge the functions of the Secretary with respect to the National Driver Register under chapter 303 of title 49, United States Code, $2,000,000, to be derived from the Highway Trust Fund.

The amendments were agreed to.

Mr. ROGERS of Kentucky. Mr. Chairman, I rise to support the amendment that has been offered by the gentleman from Kentucky.

This is a manager’s amendment and accommodates the concerns expressed by the Committee on Transportation and Infrastructure by removing in five cases authorizing language. It has been cleared with the minority as well as the authorizing committee. I believe it is noncontroversial, and I would ask for its adoption.

Mr. SABO. Mr. Chairman, I support the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?
construction of bus-related facilities under "Federal Transit Administration, Capital investment grants".

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against the language found at page 23, beginning on line 20 and continuing to page 24, line 2, which begins "Provided further, that notwithstanding section 3008 of Public Law 105–78" and ending on page 24, line 52, with "capital investment grants."

This language violates the guarantees of TEA–21 to provide funds for the Clean Fuels Bus formula grant program to the other discretionary grant programs. This language supersedes existing law and clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXII of the rules of the House of Representatives.

Mr. ROGERS of Kentucky. Mr. Chairman, the point of order is conceded.

Mr. YOUNG of Alaska. Mr. Chair

The Clerk will read.

The Clerk reads as follows:

UNIVERSITY TRANSPORTATION RESEARCH

For necessary expenses to carry out 49 U.S.C. 5303, 5304, 5305, 5311(b)(2), 5312, 5313(a), 5314, 5315, and $522, $323,000,000, to remain available until expended: Provided, That none of the money provided for in this paragraph shall be available for any highway construction or other purpose.

TRUST FUND SHARE OF EXPENSES (LIQUIDATION OF CONTRACT AUTHORIZATION) (HIGHWAY TRUST FUND)

Notwithstanding any other provision of law, for payment of obligations incurred in carry out transit planning and research account: Provided, That $53,600,000 shall be paid to the Federal Transit Administration's administrative expenses account: Provided further, That $4,800,000 shall be paid to the Federal Transit Administration's university transportation research account: Provided further, That $215,000,000 shall be paid to the Federal Transit Administration's capital investment grants account.

CAPITAL INVESTMENT GRANTS (INCLUDING TRANSFER OF FUNDS)

For necessary expenses to carry out 49 U.S.C. 5308, 5309, 5318, and 5327, $658,000,000, to remain available until expended: Provided, That no more than $2,841,000,000 of budget authority shall be available for these purposes: Provided further, That none of the funds provided for in this subsection shall be available to carry out programs under the National Transit Institute (49 U.S.C. 5311(b)(2)); $4,000,000 is available to carry out the programs under the Federal Transit Administration, Formula grants.; and there shall be available for new fixed guideway systems $13,640,000,000, together with $8,128,338 of the funds made available under "Federal Transit Administration, Discretionary grants" in Public law 105–66, and $23,023,901 of the funds made available under "Federal Transit Administration, Capital investment grants" in Public Law 105–277; to be available as follows:

- $10,296,000 for the Alaska or Hawaii ferry projects;
- $25,000,000 for the Atlanta, Georgia, North line extension project;
- $10,867,000 for the Baltimore, Maryland, central light rail transit double track project;
- $1,136,400,000, together with $8,128,338 of the funds made available under "Federal Transit Administration, Discretionary grants" in Public law 105–66, and $23,023,901 of the funds made available under "Federal Transit Administration, Capital investment grants" in Public Law 105–277; to be available as follows:

- $19,118,735 for the Chicago, Illinois, Metra North central corridor commuter rail project;
- $16,000,000 for the Chicago, Illinois, Metra South West commuter rail extension project;
- $20,000,000 for the Chicago, Illinois, Metra Union Pacific West line extension project;
- $2,000,000 for the Chicago, Illinois, Ravenswood reconstruction project;
- $5,000,000 for the Cleveland, Ohio, Euclid corridor transportation project;
- $70,000,000 for the Dallas, Texas, North central light rail transit extension project;
- $60,000,000 for the Denver, Colorado, Southeast corridor light rail transit project;
- $192,492 for the Colorado, Southwestern light rail transit project;
- $25,000,000 for the Dulles corridor, Virginia, bus rapid transit project;
- $10,000,000 for the Floresta station, Los Angeles, Tri-Rail commuter rail upgrades project;
- $3,000,000 for the Johnson County, Kansas–Kansas City, Missouri, I–35 commuter rail project;
- $60,000,000 for the Largo, Maryland, metrorail extension project;
- $1,800,000 for the Little Rock, Arkansas, river valley metrorail project;
- $10,000,000 for the Long Island Railroad, New York, East Side access project;
- $49,686,469 for the Los Angeles North Hollywood extension project;
- $5,500,000 for the Los Angeles, California, East side corridor light rail transit project;
- $3,000,000 for the Lowell, Massachusetts–New Hampshire commuter rail extension project;
- $12,000,000 for the Maryland (MARC) commuter rail improvements project;
- $15,000,000 for the Memphis, Tennessee, Medical center rail extension project;
- $5,000,000 for the Miami, Florida, South Miami-Dade busway extension project;
- $5,000,000 for the Minneapolis–St. Paul, Minnesota, Northstar commuter rail project;
- $50,000,000 for the Minneapolis–St. Paul, Minnesota, Hiawatha corridor project;
- $4,000,000 for the Nashville, Tennessee, East corridor commuter rail project;
- $20,000,000 for the Newark–Elizabeth, New Jersey, rail link project;
- $4,000,000 for the New Britain–Hartford, Connecticut, busway project;
- $14,000,000 for the New Jersey Hudson Bergen light rail transit project;
- $13,800,000 for the New Orleans, Louisiana, Canal Street car line project;
- $3,100,000 for the New Orleans, Louisiana, Desire corridor streetcar project;
- $13,000,000 for the Oceanside–Escondido, California, light rail extension project;
- $16,000,000 for the Phoenix, Arizona, Central Phoenix East Valley corridor project;
- $6,000,000 for the Pittsburgh, Pennsylvania, North Shore connector light rail transit project;
- $20,000,000 for the Pittsburgh, Pennsylvania, stage II light rail, transit reconstruction project;
- $70,000,000 for the Portland, Oregon, Interstate MAX light rail transit extension project;
- $5,600,000 for the Puget Sound, Washington, Sounder commuter rail project;
- $14,000,000 for the Raleigh, North Carolina, Triangle transit project;
- $328,810 for the Sacramento, California, light rail transit extension project;
- $15,000,000 for the Salt Lake City, Utah, CHD to University light rail transit project;
- $718,006 for the Salt Lake City, Utah, South light rail transit project;
- $65,000,000 for the San Diego Mission Valley East, California, light rail transit extension project;
- $2,000,000 for the San Diego, California, Mid Coast corridor project;
- $80,665,331 for the San Francisco, California, BART extension to the airport project;
- $113,336 for the San Jose Tasman West, California, transit light rail project;
- $40,000,000 for the San Juan, Puerto Rico, Tren Urbano project;
- $31,088,422 for the St. Louis, Missouri, MetroLink St. Clair extension project;
- $5,000,000 for the Stamford, Connecticut, urban transitway project;
- $1,000,000 for the Washington County, Oregon, Wilsonville to Beaverton commuter rail project.

POINT OF ORDER

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against the language found on page 26, beginning on line 9 and continuing to line 10 which states "That notwithstanding any other provision of law" and also against the language found on page 26, beginning on line 15 and continuing to line 16 which states "(together with $50 million transferred from "Federal
CONGRESSIONAL RECORD—HOUSE

June 26, 2001

11942

Transit Administration, Formula grants; this clause “notwithstanding any other provision of law” explicitly supercedes existing law and clearly constitutes legislation on appropriations bill in violation of clause 2 of rule XXI of the rules of the House of Representatives.

This language clearly constitutes legislation on an appropriations bill in violation of rule XXI of the rules of the House of Representatives.

The CHAIRMAN. The gentleman from Kentucky wish to be heard on the point of order?

Mr. ROGERS of Kentucky. Mr. Chairman, we concede the point of order.

The Clerk read as follows:

Job Access and Reverse Commute Grants

Notwithstanding section 3037(1)(3) of Public Law 105–178, as amended, for necessary expenses to carry out section 3037 of the Federal Transit Act of 1998, $25,000,000, to remain available until expended: Provided, That no more than $125,000,000 of budget authority shall be available for these purposes:

Provided further, That up to $250,000 of the funds provided under this heading may be used by the Federal Transit Administration for technical assistance and support and performance reviews of the job access and reverse commute grants program.

Point of Order

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against the language found on page 31, beginning on line 9 and continuing to line 10 which begins “Notwithstanding section 3037(1)(3) of Public Law 105–178, as amended.”

This language waives the statutory distribution of funds specified in TEA–21 for the Job Access and Reverse Commute Grants program and explicitly supercedes existing law. This language clearly constitutes legislation on an appropriations bill in violation of clause 2 of rule XXI of the rules of the House of Representatives.

The CHAIRMAN. The gentleman from Kentucky wish to be heard on the point of order?

Mr. ROGERS of Kentucky. Mr. Chairman, we concede the point of order.

The CHAIRMAN. The gentleman from Kentucky concedes the point of order. The point of order is conceded and sustained. The provision is stricken from the bill.

The Clerk will read.

The Clerk read as follows:

SALARIES AND EXPENSES

PIPELINE SAFETY

PIPELINE SAFETY FUND

(PipeLine SpILL Liability TRUST Fund)

For necessary expenses to conduct the functions of the pipeline safety program, for establishment of the pipeline safety program, as authorized by 49 U.S.C. 60107, and to discharge the pipeline program responsibilities of the Oil Pollution Act of 1990, $69,475,000, of which $7,472,000 shall be derived from the Oil Spill Liability Trust Fund and shall remain available until September 30, 2004; and of which $41,003,000 shall be derived from the Oil Spill Liability Trust Fund and shall remain available until September 30, 2004, to result in a final appropriation as offsetting collections and used for necessary and authorized expenses under this heading: Provided further, That the sum made available under this heading shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year 2002, to result in a final appropriation from the general fund estimated at no more than $17,615,000.

TITLE II

RELATED AGENCIES

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

SALARIES AND EXPENSES

For necessary expenses for the Architectural and Transportation Barriers Compliance Board, as authorized by section 502 of the Rehabilitation Act of 1973, as amended, $5,046,000: Provided. That notwithstanding any other provision of law, there may be credited to this appropriation funds received for publications and training expenses.

NATIONAL TRANSPORTATION SAFETY BOARD

SALARIES AND EXPENSES

For necessary expenses for the National Transportation Safety Board, including hire of passenger motor vehicles and aircraft; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS–15, uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901–5902) $66,400,000, of which not to exceed $2,000 may be used for official reception and representation expenses.

TITLE III

GENERAL PROVISIONS

INCLUDING TRANSFERS OF FUNDS

SBC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and purchase of liability insurance for motor vehicles operating in foreign countries on official department business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901–5902).

SBC. 302. Such sums as may be necessary for fiscal year 2002 pay raises for programs funded in this Act shall be absorbed within the levels appropriated in this Act or previous appropriations Acts.
CONGRESSIONAL RECORD—HOUSE

June 26, 2001

11943

SEC. 303. Appropriations contained in this Act notwithstanding, the Federal-Aid Highways Trust Fund (other than the Mass Transit Account) for Federal-aid highways and highway safety programs for the previous fiscal year the funds for which are allocated by the Secretary.

(3) determine the ratio that—
(A) the obligation limitation for Federal-Aid Highways less the aggregate amounts not distributed under paragraphs (1) and (2), bears to
(B) the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction programs (other than sums authorized to be appropriated for sections set forth in paragraphs (1) through (7) of subsection (b) and sums authorized to be appropriated for section 105 of title 23, United States Code, equal to the amount referred to in subsection (b)(4) for such fiscal year less the aggregate of the amounts not distributed under paragraph (1) of this subsection;

(4) distribute the obligation limitation for Federal-Aid Highways less the aggregate amounts not distributed under paragraphs (1) and (2) of section 117 of title 23, United States Code (relating to high priority projects), section 9 of the Appalachian Regional Development Act of 1965, the Woodrow Wilson Memorial Bridge Authority Act of 1995, and $2,000,000,000 for such fiscal year under section 105 of title 23, United States Code (relating to minimum guarantee) so that the amount of obligation authority available for each of such sections is equal to the amount determined by multiplying the ratio determined under paragraph (3) by the sums authorized to be appropriated for such section (except in the case of section 115 of the Appalachian Regional Development Act of 1965, the Woodrow Wilson Memorial Bridge Authority Act of 1995, and $2,000,000,000 for such fiscal year under section 105 of title 23, United States Code) by multiplying the ratio determined under paragraph (3) by the sums authorized to be appropriated for such program for such fiscal year; and

(5) distribute the obligation limitation provided for Federal-aid Highways less the aggregate amounts not distributed under paragraphs (1) and (2) and amounts distributed under paragraph (4) for each of the programs that are allocated by the Secretary under title 23, United States Code (other than activities which are covered by obligations to those previously distributed during that fiscal year), such distribution to the States shall be in the same ratio as the distribution of obligation limitation made available for Federal-aid highways and highway safety construction programs for future fiscal years.

(6) distribute the obligation limitation provided for Federal-aid Highways less the aggregate amounts not distributed under paragraphs (1) and (2) and amounts distributed under paragraphs (4) and (5) for Federal-aid highways and highway safety construction programs (other than the minimum guarantee program, but only to the extent that amounts apportioned for the minimum guarantee program for such fiscal year exceed $2,000,000,000, and the Appalachian development highway system program) that are apportioned by the Secretary under title 23, United States Code, in the ratio that—

(A) sums authorized to be appropriated for such programs that are apportioned to each State for such fiscal year, bear to

(B) the total of the sums authorized to be appropriated for such programs that are apportioned to all States for such fiscal year.

(b) EXCEPTIONS FROM OBLIGATION LIMITATION.—The obligation limitation for Federal-Aid Highways shall not be applied to obligations:

(1) under section 125 of title 23, United States Code; (2) under section 147 of the Surface Transportation Assistance Act of 1973; (3) under section 9 of the Federal Aid Highways Act of 1961; (4) under sections 131(b) and 131(j) of the Surface Transportation Assistance Act of 1982; (5) under sections 139(b) and 139(c) of the Federal Aid Highways Act of 1968; (6) under sections 1103 through 1106 of the Interstate modal Surface Transportation Efficiency Act of 2001; (7) under section 127 of title 23, United States Code, as in effect on the day before the date of the enactment of the Transportation Equity Act for the 21st Century; (8) under title 23, United States Code (but only in an amount equal to $339,000,000 for such fiscal year).

(c) REDISTRIBUTION OF UNUSED OBLIGATION AUTHORITY.—Notwithstanding subsection (a), the Secretary shall, by the date the Congress reconvenes after the Congress reconvenes after the date of the enactment of the Transportation Equity Act for the 21st Century, redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under sections 104 and 144 of title 23, United States Code, section 119 (as amended, of the fiscal year at the end of the fiscal year and in effect on the day before the enactment of the Transportation Equity Act for the 21st Century) of title 23, United States Code, and under section 1015 of the Interstate modal Surface Transportation Efficiency Act of 1991 (105 Stat. 1943–1945).

(d) APPLICABILITY OF OBLIGATION LIMITATION TO TRANSPORTATION RESEARCH PROGRAMS.—The obligation limitation shall apply to transportation research programs carried out under chapter 7 of title 23, United States Code, except that obligation authority made available for such programs under such limitation shall remain available for a period of 3 fiscal years.

(e) REDISTRIBUTION OF CERTAIN AUTHORIZED FUNDS.—Not later than 30 days after the date of the distribution of obligation limitation made available under subsection (a), the Secretary shall distribute to the States any funds: (1) that are authorized to be appropriated for such fiscal year for Federal-aid highways programs (other than the programs under section 1104 of title 23, United States Code) and for carrying out subchapter I of chapter 311 of title 49, United States Code, and highway-related programs under chapter 1015 of title 53, United States Code; and (2) that the Secretary determines will not be allocated to the States, and will not be available for obligation, in any fiscal year due to any obligation limitation for such fiscal year. Such distribution to the States shall be made in the same ratio as the distribution of obligation authority under subsection (a)(6).

The funds so distributed shall be available for any purposes described in section 133(b) of title 23, United States Code.

(f) SPECIAL RULE.—Obligation limitation distributed for a fiscal year under subsection (a)(4) of this section for a section set forth in subsection (a)(4) shall remain available until used, and shall be in addition to the amount of any limitation imposed on obligations for Federal-aid highways and highway safety construction programs for future fiscal years.

(g) Notwithstanding Public Law 105–178, as amended, of the funds authorized under section 104 of title 23, United States Code (other than the funds authorized for the motor carrier safety grant program) for fiscal year 2002, $56,300,000 shall be to carry out a program for state and Federal border infrastructure construction.

POINT OF ORDER

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against

SEC. 305. None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 306. None of the funds appropriated in this Act shall remain available for obligation beyond the current fiscal year, nor may any be transferred to other appropriations, unless expressly so provided herein.

SEC. 307. The Secretary of Transportation is hereby authorized to make such expenditures and investments, within the limits of funds available pursuant to title 49, United States Code, and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 9104), as may be necessary in carrying out the program for aviation insurance activities under chapter 443 of title 49, United States Code.

SEC. 308. The expenditure of any appropriation or the use of any consulting service through procurement contract pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 309. None of the funds in this Act shall be used to implement section 401 of title 23, United States Code.

Mr. ROGERS of Kentucky (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill through page 38, line 22, be considered as read, printed in the Record and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. Are there amendments to the point of the bill?

Mr. YOUNG of Alaska. Mr. Chairman, I have a point of order on page 38, line 23.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows: SEC. 310. (a) For fiscal year 2002, the Secretary of Transportation shall—

(1) not distribute from the obligation limitation for Federal-Aid Highways less the aggregate amounts authorized for administrative expenses and programs funded from the administrative take-down authorized by section 104(a)(1)(A) of title 23, United States Code, for the highway use tax evasion program for amounts provided under section 110 of title 23, United States Code, and for the Bureau of Transportation Statistics;

(2) not distribute an amount from the obligation limitation for Federal-Aid Highways that is equal to the unobligated balance of Federal-Aid Highways less the aggregate amounts not distributed under paragraphs (1) and (2), to

(a) the obligation limitation for Federal-Aid Highways less the aggregate amounts not distributed under paragraphs 1 and 2 of section 117 of title 23, United States Code, equal to the amount referred to in subsection (b)(4) for such fiscal year less the aggregate of the amounts not distributed under paragraph (1) of this subsection;

(b) distribute the obligation limitation for Federal-Aid Highways less the aggregate amounts not distributed under paragraphs (1) and (2) and amounts distributed under paragraph (4) for each of the programs that are allocated by the Secretary under title 23, United States Code (other than activities which are covered by obligations to those previously distributed during that fiscal year), such distribution to the States shall be in the same ratio as the distribution of obligation limitation made available for Federal-aid highways and highway safety construction programs for future fiscal years.

The funds so distributed shall be available for any purposes described in section 133(b) of title 23, United States Code.

(f) SPECIAL RULE.—Obligation limitation distributed for a fiscal year under subsection (a)(4) of this section for a section set forth in subsection (a)(4) shall remain available until used, and shall be in addition to the amount of any limitation imposed on obligations for Federal-aid highways and highway safety construction programs for future fiscal years.

(g) Notwithstanding Public Law 105–178, as amended, of the funds authorized under section 104 of title 23, United States Code (other than the funds authorized for the motor carrier safety grant program) for fiscal year 2002, $56,300,000 shall be to carry out a program for state and Federal border infrastructure construction.

POINT OF ORDER

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against
all of section 310 beginning on page 38, line 23, and ending on page 44, line 2.

The CHAIRMAN. The gentleman from Kentucky concurs the point of order. The point of order is concurred and sustained. The provision is stricken from the bill.

The Clerk will read.

The Clerk read as follows:

SEC. 315. Notwithstanding any other provision of law, airports may transfer, without consideration, to the Federal Aviation Administration (FAA) instrument landing systems (along with associated approach lighting equipment and runway visual range equipment) which conform to FAA design and performance specifications, the purchase of which was assisted by a Federal airport-aid program or project development aid program or airport improvement program grant: Provided, That, the Federal Aviation Administration shall accept such equipment, which shall be available for use in the training, or to members of the National Guard and the Reserve component of the National Guard only, if such equipment is used for FAA purposes.

The Clerk will read the section as follows:

SEC. 323. Notwithstanding any other provision of law, of the $23,896,000 provided under title II of the Civil Aeronautics Act of 1940, none of the funds in this Act may be expended by an entity unless the entity agrees that in expending the funds the entity will comply with the Buy American Act (41 U.S.C. 8001–8002).

(b) Sense of the Congress; Requirement Regarding Notice.--(1) Purchase of American-Made Equipment and Products.—In the case of any equipment or product that may be authorized to be purchased with financial assistance provided using funds made available in this Act, it is the sense of the Congress receiving the assistance should, in expending the assistance, purchase only American-made equipment and products to the greatest extent practicable.

(2) Notice to Recipients of Assistance.—In providing financial assistance using funds made available in this Act, the head of each Federal agency shall provide to each recipient of the assistance a notice describing the statement made in paragraph (1) by the Congress.

(C) Prohibition of Contracts With Persons Falsey Labeling Products as Made in America.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a "Made in America" inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the determination, suspension, and debarment procedures described in sections 9.404 through 9.409 of title 48, Code of Federal Regulations.

Mr. ROGERS of Kentucky (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill through page 50, line 21, be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

Mr. ANDREWS. Mr. Chairman, reserving the right to object, I have an amendment that comes in at page 52 and I wonder what effect that will have on the gentleman's request. I do not intend to object other than to preserve the right to offer my amendment.

The CHAIRMAN. The Chair understands the request is to advance the reading to page 50 line 21.

Mr. ANDREWS. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. YOUNG of Alaska. Mr. Chairman, I have a point of order beginning on line 22.

The CHAIRMAN. Before the Clerk reads into that section, are there any amendments to the portion of the bill now open?

The Clerk will read.

The Clerk read as follows:

SEC. 323. Notwithstanding any other provision of law, of the $23,896,000 provided under title II of the Civil Aeronautics Act of 1940, none of the funds in this Act may be expended by an entity unless the entity agrees that in expending the funds the entity will comply with the Buy American Act (41 U.S.C. 8001–8002).

(b) Sense of the Congress; Requirement Regarding Notice.--(1) Purchase of American-Made Equipment and Products.—In the case of any equipment or product that may be authorized to be purchased with financial assistance provided using funds made available in this Act, it is the sense of the Congress receiving the assistance should, in expending the assistance, purchase only American-made equipment and products to the greatest extent practicable.

(2) Notice to Recipients of Assistance.—In providing financial assistance using funds made available in this Act, the head of each Federal agency shall provide to each recipient of the assistance a notice describing the statement made in paragraph (1) by the Congress.

(C) Prohibition of Contracts With Persons Falsey Labeling Products as Made in America.—If it has been finally determined by a court or Federal agency that any person intentionally affixed a label bearing a "Made in America" inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States, the person shall be ineligible to receive any contract or subcontract made with funds made available in this Act, pursuant to the determination, suspension, and debarment procedures described in sections 9.404 through 9.409 of title 48, Code of Federal Regulations.

Mr. ROGERS of Kentucky (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill through page 50, line 21, be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

Mr. ANDREWS. Mr. Chairman, reserving the right to object, I have an amendment that comes in at page 52 and I wonder what effect that will have on the gentleman's request. I do not intend to object other than to preserve the right to offer my amendment.

The CHAIRMAN. The Chair understands the request is to advance the reading to page 50 line 21.

Mr. ANDREWS. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.
grants to the States of Arizona, California, New Mexico, to hire State motor carrier safety inspectors at the United States/Mexico border: Provided, That such funding is only available to the extent the States submit requests for such funding to the Secretary, and the Secretary evaluates such requests based on established criteria: Provided further, That, on March 31, 2002, the Secretary shall distribute to the States any undistributed amounts in excess of 1/2 of the amount originally reserved, consistent with section 110 of title 23, U.S.C., for the motor carrier safety grants program: Provided further, That on July 1, 2002, the Secretary shall distribute to the States any remaining undistributed amounts consistent with section 110 of title 23, U.S.C., for the motor carrier safety grants program.

POINT OF ORDER

Mr. YOUNG of Alaska. Mr. Chairman, I make a point of order against all of section 323 beginning on page 50, line 20 down to page 51, line 15. This language authorizes the Secretary of Transportation to reserve up to $18 million of Federal Motor Carrier Safety Administration, RABA, for four States, Arizona, California, New Mexico, and purposes of hiring State motor carrier safety inspectors at the U.S.-Mexican border. This explicitly waives existing law in violation of clause 2 of rule XXI of the Rules of the House of Representatives.

The CHAIRMAN. The gentleman from Kentucky wishes to be heard on the point of order?

Mr. ROGERS of Kentucky. Mr. Chairman, the point is conceded.

The CHAIRMAN. The gentleman from Kentucky concedes the point of order. The point of order is conceded and sustained. The provision is stricken from the bill. Section 323 is stricken from the bill.

The Clerk will read.

The Clerk reads as follows:

SEC. 324. Rebates, refunds, incentive payments, minor fees and other funds received by the Department from travel management centers, reimbursement programs, the subleasing of building space, and miscellaneous sources are to be credited to appropriations of the Department and allocated to elements of the Department using fair and equitable criteria and such funds shall be available until December 31, 2002.

SEC. 325. Notwithstanding any other provision of law, rule or regulation, the Secretary of Transportation is authorized to allow the issuer of any preferred stock heretofore sold until December 31, 2002.

Mr. Chairman, in each of the last two Congresses, the House has approved a similar amendment, by a roll call vote in 1999 and by voice in the year 2000. I believe this is a reasonable balance. It permits the work of the Amtrak Reform Council to go on, despite the fact that many of us disagree with that work, while at the same time requiring the council to rely on the good offices of the Department or its modal administrations: (1) any discretionary grant program of the Federal Highway Administration other than the emergency relief program; (2) the airport improvement program of the Federal Aviation Administration; or (3) any program of the Federal Transit Administration other than the formula grants and fixed guideway modernization programs: Provided, That no notification shall involve funds that are not available for obligation.

SEC. 328. Section 232 of H.R. 3425 of the 106th Congress, as enacted by section 1000(a)(5) of the Consolidated Appropriations Act, 2000 is repealed.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I offer an amendment. The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 3 offered by Ms. Jackson-Lee of Texas

Ms. JACKSON-LEE of Texas. Mr. Chairman, I offer an amendment. The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 3 offered by Ms. Jackson-Lee of Texas

Page 53, lines 15 through 17, strike section 329.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I am an eternal optimist. I believe that transportation is such a vital part of the quality of life of Americans and Houstonians and Texans, that I offer this amendment and hope my colleagues can work collaboratively with me to ultimately strike the line that removes the opportunity for planning, design, or construction of a light rail system in Houston, Texas.

I say that because I was on the floor just previously talking about Houston TranStar which is a collaboration between city and local officials helping us move and moderate our traffic. Every major city, Houston now being known as the third largest city in the Nation has traffic congestion. Polling in Houston suggests that not only the city of Houston, but small cities surrounding Houston are favorable toward this whole idea of light rail.
Mr. Chairman, I am hopeful that I will be able to work with my colleagues, including the gentleman from Texas (Mr. Delay), in his interest in the city of Houston. I hope we will be able to work together on securing that authorization and funding for TranStar.

At the same time, I am hoping that we can strike this language or work collaboratively so that the City of Houston can fulfill the commitment it has made to its citizens and the citizens can have the commitment made to them by the City of Houston and the county judge and the metropolitan transit authority to have light rail in our community.

Conventional wisdom also suggests that the light rail project would be immensely useful to complement the Main Street connectivity which continues to enrich the lives of countless Houstonians. Another traffic center is the Texas Medical Center, one of the largest employers in our region. We have also heard of the devastation facing the Texas Medical Center. One of the contributing factors is the ability to move those medical professionals, nurses, technicians, and doctors into one of the most important medical centers in our country. They need light rail.

I believe that we can do this together. Working with the administration of President George Bush; working with both Houses, the Senate and the House; working with our appropriations committee; and authorization committee. Never have we seen in the history of Houston the convergence of so many supporters, business community, local and regional communities, local cities that surround Houston, Houston and Harris County, all the local officials in large part. I cannot imagine why light rail is not in the destinies of Houston, Texas. Our sister city has it. What we are asking for is as we go and do focus groups is the ability and faster modes of transportation will inevitably lead to an improved environment and the critical light rail project that is so important to Houston.

Like all Houstonians, I believe that nothing is more important than mobility for the region's future. For these reasons, I am part of our federal team dedicated to increasing funding for our infrastructure needs in the Houston area. Mr. Chairman, we all have the common goal of making transportation more easily accessible in the Houston area. The goal of accessibility and faster modes of transportation will inevitably lead to an improved environment and a better quality of life for all Houstonians. We can do so much together when we make a commitment to work together.

Lastly, let me say that I recognize that I will continue to work with the Administration and Congress to bring Federal assistance to the light rail project in Houston. I look forward to working with METRO and City officials to match ingenuity being shown by other transportation mechanisms utilized by other major metropolitan cities. With a continued collective effort from local, regional, and Federal resources, I believe the light rail system will help transform Houston's transportation system into one of the premier systems in America.

I know that Congress needs to move forward on this bill, and we cannot debate local issues. But I hope the Congress realizes that this is not a local issue. This is a question of equality and parity when all of the other areas of the nation are able to get dollars for light rail. I think the light rail project meets the requirement, and this Congress should give it consideration. The 18th Congressional District of Texas deserves fair treatment regarding these matters.

I urge my colleagues to support my amendment to strike the language prohibiting funding for the light rail program in Houston.

Mr. Bentsen. Mr. Chairman, I rise in support of the gentleman's amendment. This prohibition affects a rail project in the city of Houston, a large portion of which is in the gentleman's district and the other portion which runs into my district. It is one of the main traffic arteries in the city of Houston. The gentleman mentioned the Texas Medical Center, which is the largest medical center in the world, which is located in my district, which has approximately 60 to 70 thousand people moving in and out of a very concentrated area every day of the week.

The gentleman also mentioned that this project enjoys the support of the locally elected political establishment of Houston and Harris County. The Houston Metro board is a metropolitan organization made up of appointees by the elected leadership. So it does have an indirect connection to the voters in that the directly elected officials appoint the members of this board and those members are approved by the elected members of the county commissioners court and the elected members of the Houston city council.

Finally, I would say there are some who have said that this should not go forward because there has been no direct election by the people. The county attorney of Harris County and the attorney general of the State of Texas have ruled that there is no statute in Texas law that would grant the right for such an election. So that is sort of the basis of this. And where we stand now is because of this specific prohibition affecting the City of Houston, the City of Houston is the only metropolitan area, the only municipal area in the United States of which I am aware where the United States Congress has banned the use of Federal funds for rail.

It comes down not to a question of whether you support rail or not, it comes down to a question of equity and whether or not we are going to allow locally elected officials to make the decisions or whether we are going to allow Washington to make the decisions. Unfortunately this provision in the bill has Washington telling the locally elected officials, both Republicans and Democrats and independents and nonpartisan candidates, that they cannot make the decision.

I hope that the House will adopt the gentleman's amendment and allow...
Mr. DELAY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise today in opposition to the amendment. As a representative from the city of Houston and as a former member of the Texas House of Representatives, I can say that Texas law already provides for a mechanism for the voters to have their voice heard. If the metropolitan transit authority in Houston chooses to issue debt, City Council is given an opportunity to have an election. Having just gone through a very extensive election campaign in Houston, I can tell Members firsthand the voters of Houston want an opportunity to speak on this issue; and if they would all welcome a chance to debate it in the public arena in Houston.

The voters of Houston have the right to have their voices heard particularly because of the extraordinary cost of any rail proposal. The numbers that we have seen indicate that it could cost up to $300 million plus to build a rail system in Houston. I can tell Members that the highest transportation priority in Harris County in the opinion of the entire legislative delegation to Austin, I know with the support of many of my colleagues here, is the expansion of the Katy Freeway. The Katy Freeway still needs another $500 million to complete its expansion. That $300 million minimum that is proposed to finance the cost to build a rail system in Houston would virtually finish the Katy Freeway project. $300 million would build 50 miles of freeway.

We in the city of Houston have a very different type of geography. The way the city has grown is different from other cities. Our city was laid out on a salt grass prairie and those wide open spaces have enabled us to grow very rapidly in many directions. Seventy-six percent of the jobs in our city are outside Loop 610, and the city of Houston is just simply not well situated for a rail plan.

All of these factors together, the fact that the rail plan would absorb so many transportation dollars, move so few riders, have to be subsidized so heavily, and the fact that State law already provides a mechanism for a vote lead me to the conclusion that it is entirely proper, in fact essential, that there be a vote in Houston before money is spent on rail.

Ms. JACKSON-LEE of Texas. Mr. Chairman, thank the gentleman for yielding. I appreciate his recounting of the questions that he has put currently surrounding areas. I support the gentleman in helping to improve the Katy Freeway, I-10 West, which goes through a number of our districts, including mine. I think it is important; and in Dallas, there is momentum in the city of Dallas to put forward very rapidly to build this rail plan from downtown Houston out to the Astrodome without asking for voter approval. They could have asked for voter approval, a simple referendum had they chosen to but did not. There are also other mechanisms to allow for a vote and they chose not to do so.

The cost of the rail plan coupled with the immense amount of subsidy that is going to be required, when you compare the cost of rail systems in other cities, the cost per rider to taxpayers is about $3,000 a year, the subsidized cost per taxpayer in Los Angeles for each rider is about 9,000 dollars a year and in Dallas, there is no cost to the community of the work patterns, the growth patterns, the city of Houston are such that I am not sure that we could support it. In fact every town hall meeting I have held and where I have asked questions on this issue to my constituents, the overwhelming response of my constituents is that almost all of them need their cars in order to get to work.

Because of the unique nature of our city, because of where the job centers, the economic centers of Houston are spread out across the metropolitan area, the bottom line is there must be an election and I strongly support the gentleman from Texas (Mr. Delay) in his call for an election before any transportation dollars are spent on the construction of a rail system in Houston. I urge Members to vote against the amendment so that there can be a vote in the city of Houston.

Mr. DELAY. Mr. Chairman, I move to strike the remaining words.

Mr. Chairman, I oppose this amendment because the Houston Metro bureaucracy still has not resolved a major shortcoming. They have not assembled the facts and they have not placed those facts before our community. Without the facts, how can Houstonians make an informed decision about light rail? The answer is they cannot, and I am not going to tolerate an end run around accountability. Without a referendum on rail, Houstonians would be blindly committing billions of dollars to a vast project with an unknown price tag, unknown performance, and an undetermined impact on our most pressing problem in the Houston-Dalkeston area, and that is mobility. The decision to make a multi-billion-dollar transportation commitment cannot be made without the consent of the whole community. That is why I took action last year to have the Houston Metrorail suspended from being used to fund light rail. And it is why I am asking my colleagues to continue supporting this restriction.

My constituents expect me to safeguard their tax dollars, not flit them away on an unproven concept. A light rail system is far from the most effective way for Houston to reduce congestion. In fact, Houston Metro has even admitted that the Main Street line does nothing to reduce congestion and is not even a transportation project. They themselves call it an economic development project.

The decision to build a light rail system would affect everyone in Houston. Supporters must document the ability of a rail system to reduce congestion and increase mobility. And they must take that case to the citizens of Houston to earn their support for a citywide light rail system. The people of Houston would demand that they be given the information that they need to make an informed choice without all the facts and Houston Metro is not giving them the information that they need.

The method used to build the Main Street line gives every appearance of an attempt to evade accountability. Metro is moving forward with a piecemeal construction plan much like they did in Dallas, Texas, and they are moving piecemeal construction plan without explaining light rail's broader mobility impact on the region.

I trust the people of Houston. They can make the right choice if they have all the facts. Metro needs to prepare a comprehensive mobility plan that takes all of our needs into account. It should document all the challenges that contribute to congestion in the Houston region. It should describe all the transportation options. It should also describe and evaluate the effectiveness of those options. Only then will people be able to make an informed decision about light rail.
An additional problem with the Main Street line is that it simply is not a mobility project. The Main Street line is an economic development project. We have a mobility crisis in Houston. We must spend the available transportation dollars on measures that actually target and reduce congestion.

Mr. ROGERS of Kentucky. Mr. Chairman, I move to strike the requisite number of words.

Mr. MICA. Mr. Chairman, I move to strike the last word.

Mr. CHAIRMAN. The question is on the amendment offered by the gentlewoman from Texas (Ms. JACKSON-LEE).

The amendment was rejected.

Mr. MICA. Mr. Chairman, I move to strike the last word.

The amendment was rejected.
Our Florida Governor signed this measure into law just a few weeks ago, on June 1.

The State of Florida has now taken action to authorize and commit $4.5 million in State funds for high speed rail, and we respectfully ask the subcommittee’s support and assistance and consideration in the future.

Mr. Chairman, I hope that the gentleman from Kentucky (Mr. ROGERS) will be able to work with my colleagues in the Florida delegation and help us identify and secure funding for this project, which also has been authorized under one of the high speed rail corridors.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. MICA. I yield to the gentleman from Kentucky.

Mr. ROGERS of Kentucky. Mr. Chairman, let me thank the gentleman from Florida (Mr. MICA) for offering his comment. We would be pleased to work with the gentleman as this transportation bill moves through the appropriations process, especially as the gentleman is the chairman of a very important subcommittee over there on the Committee on Transportation and Infrastructure.

Mr. MICA. Mr. Chairman, I prepared an amendment to earmark funds for fiscal year 2002 funds for the Florida project, but I will not offer that amendment today. I want to thank the chairman for his intention to work with us on this project. It is most important to the people of Florida.

Mr. ROGERS of Kentucky. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mrs. EMERSON) having assumed the chair, the Speaker pro tempore (Mrs. EMERSON) declared the House in the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2299) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes, had come to no resolution thereon.

LEGISLATIVE PROGRAM

(Mr. YOUNG of Florida asked and was given permission to address the House for 1 minute.)

Mr. YOUNG of Florida. Madam Speaker, I wanted to announce to the membership that it is my intention to file the fiscal year 2002 energy and water development appropriations bill sometime midday tomorrow; and I say midday because in the morning two subcommittees of the Committee on Appropriations will mark up their bills. It will be midday before we could get to the energy and water bill.

With respect to the agriculture bill, it is my intention not to file the fiscal year 2002 agriculture, rural development, Food and Drug Administration and related agencies appropriation bill until the apples issue is resolved. If an agreement can be reached on apples, I would expect to file the agriculture appropriations bill tomorrow.

The Committee on Rules would then meet tomorrow evening to report the rule, and the House could work into the evening on Thursday night, hoping to complete that bill before adjourning for the July 4 recess.

I share theoniums' desire to finish the agriculture bill by midnight Thursday or earlier if possible. In order for us to meet this ambitious schedule, it will require the cooperation of all of our colleagues in the House, and, of course, the cooperation of the Committee on Rules, which is always cooperative.

In order for the House to complete action on the agriculture bill, I would expect that the gentleman from Wisconsin and his leadership would be prepared to enter into time agreements, as we have on previous appropriations bills, and limitations on amendments to be offered on the agriculture appropriations bill. Since we all would like to get home to our districts for the 4th of July holiday, we desire not to have a hard drive into the wee hours of the morning Friday to finish the work. Rather, if necessary, we could complete the work on the agriculture bill when we return in July.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Wisconsin.

Mr. OBEY. Madam Speaker, I thank the gentleman from Florida (Mr. YOUNG) for his statement.

Madam Speaker, essentially for the benefit of the Members, what that means is that we would expect tomorrow after the committee is finished with its work in committee to finish action on the energy and water bill, which is being filed right now, and which will be in the Committee on Rules very shortly. On Thursday, if the agriculture bill is brought to the floor, we will work out time agreements and try to get as much done as possible to hope to finish. If we do not, it can be finished whenever the leadership decides it ought to be dealt with, and that would mean that Members would have notice that we would not be in session on Friday. That is really a concern.

Mr. YOUNG of Florida. The gentleman is correct. It is our intention if, in fact, we are able to take up the agriculture appropriations bill that we will do the best we can to complete it Thursday night; but we will not go into, as has been referred to so many times, the dark of night to try to finish it. We would try to finish it at an early time. We will not go into 2:00 or 3:00 or 4:00 in the morning.

The gentleman is correct, the majority leader has agreed that there would be no session on Friday; that we could complete the agriculture bill, if necessary, when we return.

Mr. OBEY. If the gentleman will yield further, it is also my understanding, frankly, that there will be not all that extended a discussion tomorrow on the energy and water bill. I think it is relatively uncontroversial. So I understand the majority party has an event tomorrow evening, and it would certainly be our understanding we would be finished well in time for that to occur.

Mr. YOUNG of Florida. Madam Speaker, reclaiming my time, the gentleman is correct. We do not anticipate a lengthy debate on the energy and water bill, which the gentleman from Alabama (Mr. CALLAHAN) will file here very shortly. In the full committee it was handled expeditiously, and I believe the same thing would happen on the floor tomorrow. But, understand, the Committee on Appropriations has two markups in the morning, so we cannot get to that bill on the floor until those two markups are completed.

Mr. OBEY. Madam Speaker, if the gentleman will yield further, I thank the gentleman. I think that the Members will appreciate the information.

REPORT ON H.R. 2311, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

Mr. CALLAHAN, from the Committee on Appropriations, submitted a privileged report (Rept. No. 107–112) on the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

The SPEAKER pro tempore (Mrs. EMERSON). Pursuant to clause 1 of rule XXI, all points of order are reserved on the bill.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

The SPEAKER pro tempore (Mrs. EMERSON). Pursuant to House Resolution 78 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2299.
Mr. ROGERS. Mr. Chairman, I move to strike the last word to engage the chairman of the Committee on Appropriations Subcommittee on Transportation in a colloquy.

Mr. Chairman, I note that the subcommittee's recommendation for the New Starts program does not include any funding for the Second Avenue Subway in New York City. This is an important transportation investment planned in the metropolitan area, and it is vitally necessary to ensure fluid transit in an already over-congested metropolitan area. The project received $3 million for continued analysis and design in fiscal year 2001.

I understand that the subcommittee's recommendation provides funding for only those projects that have full funding grant agreements in place, are likely to have full funding grant agreements in place in the very near future, or are in final design. While the Second Avenue Subway does not meet this criteria, it is important that the analysis and design continue on this important project. The MTA assures me that the project will be in preliminary design by the end of fiscal year 2001.

The State and the MTA have made a major commitment for the project and have included $1.05 billion in the MTA's capital budget. I ask the chairman that if the Senate were to include an appropriation for the Second Avenue Subway in its fiscal year 2002 Department of Transportation and Related Agencies Appropriations bill, that the subcommittee accommodate to the greatest extent possible to ensure that Federal funding for this project is continued in fiscal year 2002.

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentlewoman yield?

Mrs. MALONEY of New York. I yield to the gentleman from Kentucky. Mr. ROGERS of Kentucky. Mr. Chairman, I appreciate the gentlewoman's commitment to this project, and her observations about the criteria the subcommittee used in developing its recommendations. The subcommittee had an enormous number of requests for new light rail transit systems that we simply could not accommodate. We did not have the money. Unfortunately, we had to say "sorry" quite a bit this year.

I can assure the gentleman that should the Senate include funding for the subway in its version of the bill, that we will give it every consideration.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 330. None of the funds made available in this Act may be used for engineering work related to an additional runway at New Orleans International Airport.

SEC. 331. None of the funds appropriated by this Act shall be used to propose or issue rules, regulations, decrees, or orders for the purpose of implementation, or in preparation for implementation, of the Kyoto Protocol which was adopted on December 11, 1997, in Kyoto, Japan at the Third Conference of the Parties to the United Nations Framework Convention on Climate Change, which has not been submitted to the Senate for advice and consent to ratification pursuant to article II, section 2, clause 2, of the United States Constitution, and which has not entered into force pursuant to article 25 of the Protocol.

Amendment offered by Mr. OLVER.

Mr. OLVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OLVER:

Page 54, line 7, insert before the period at the end the following: "...except that this limitation does not apply to activities related to the Kyoto Protocol that are otherwise authorized by law (including those activities authorized by the United Nations Framework Convention on Climate Change with respect to which the Senate gave its advice and consent to ratification in October 1992)."

Mr. OLVER. Mr. Chairman, I rise reluctantly, because this bill is an excellent bill, and I respect very much the work of the chairman of the subcommittee, the gentleman from Kentucky (Mr. ROGERS), as well as my ranking member on the subcommittee, the gentleman from Minnesota (Mr. SABO), but I do take exception to the language of section 331.

The language in section 331 is language which has been included several times over the last few years, at a time when it was legitimately believed by the majority that the President in charge of the executive departments would have conducted the very actions which are prescribed by section 331 in the preamble legislation.

On the other hand, President Bush has made it clear that he has no intention of implementing the Kyoto Protocol as it has been worked out, and has even used much stronger language, that the Kyoto protocol is "dead." So, at the very least, the language is unnecessary and shows perhaps a disbelieve in the President's intentions and the President's word, which I am sure the majority does not mean to show.

I would like to point out that just slightly more than 1 month ago, that this House adopted in the Foreign Relations Authorization Act, which was passed on May 16, a sense of the Congress section relating to global warming, and that sense of Congress pointed out that global climate change poses a significant threat to security; that most of the observed warming over the last 50 years is attributable to human activities; that global average surface temperatures have risen since 1961; that in the last 40 years the global average sea level has risen, ocean heat content increased, and snow cover and ice extent have decreased, which threatens to inundate low-lying Pacific Island nations and coastal regions throughout the world; and pointed out at that time that the United States has ratified the United Nations framework on climate change, which framework, ratified in 1992 by the Senate, was proposed for ratification by then President George Herbert Walker Bush to be ratified and was ratified by the Senate and took effect in April of 1994, that quoting from that, "the parties to the convention are to implement policies with the aim of returning to their 1990 levels of anthropogenic emissions of carbon dioxide and other greenhouse gases;" and, to continue, "that developed country parties should take the lead in combating climate change and the adverse effects thereof."

So, in that sense, we already have adopted by this Congress the language that I have offered in the amendment, which is a clarifying amendment, the amendment merely saying that the limiting language should not relate, should not apply, to activities that are otherwise authorized by law, nor to those activities that are authorized by the United Nations Framework Convention on Climate Change with respect to which the Senate gave its advice and consent; and we have a full ratification of that treaty, the United Nations Framework Convention on Climate Change.

So my amendment suggests that the activities that are related to that framework convention as ratified in 1992 are in no way proscribed by the language of section 331. So it is additional language to limit the States' jurisdiction or to explain that limitation.

By the way, Mr. Chairman, it is my intent at the appropriate time to withdraw this amendment. I just wanted to bring it to the attention of the House, that we have a series of activities that we should not be proscribing, that those which are previously authorized by law and those that are part of the already ratified treaty of the United Nations Framework Convention on Climate Change should not be proscribed. So I intend to withdraw the amendment at the appropriate time.

Mr. GILCHREST. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I would hope that with the committee's recommendations process, that those of us who have a different opinion about climate change, for whatever reason, and continue to put language in the appropriations
Mr. Chairman, this country has not prospered for over 200 years because of gagged restraint on the part of its citizens and its agencies; this country has prospered because of the accumulation of knowledge and wisdom and information and initiative.

What I would like to do for the members present is to just discuss some of the undisputed facts about climate change. One is scientifically sound. Over the last 10,000 years, the planet has warmed 1 degree centigrade every 1,000 years, except in the last 100 years, especially the last 50 years, this country has warmed 1 degree Fahrenheit in less than 100 years. So there is a dramatic shift in the warming that corresponds to the amount of CO$_2$ and other greenhouse gasses as a result of human activity.

The polar ice caps, in about 50 years, if the present trend continues, will be gone. The North Pole, the polar ice caps, glaciers are receding around the globe. We are releasing into the atmosphere CO$_2$ in decades that took nature millions of years to lock up.

Mr. Alden, CO$_2$ is a natural greenhouse gas that deals with the heat balance of the planet, and it took millions of years to lock up all of this CO$_2$ as a result of dying vegetation and so on and so forth. Now, we have been releasing that same amount of CO$_2$ in decades, so it has some impact. There is more CO$_2$ in the atmosphere now than there has been in the last 400,000 years.

Now, just one last fact. Mr. Chairman, CO$_2$ makes up about .035 percent of the atmosphere. That is a tiny fraction of our whole atmosphere. Yet that tiny amount has an extraordinary effect on the heat balance of the planet. We are warm in a tiny, thin sheen of atmosphere that covers the earth.

Now, any change in that, which is fairly dramatic that we are seeing, will have an effect on the climate. So basically, human activity, because of what we are doing, is having an effect on the climate and 95 percent of the international scientists and 16 scientists from the U.S. just took up overview of this situation with an international panel on climate change, and 15 out of the 16 said there is no mistake that human activity is having an effect on the climate.

Mr. Young of Alaska. Mr. Chairman, will the gentleman yield?

Mr. Gilchrest. I yield to the gentleman from Maryland (Mr. Gilchrest).

Mr. Young of Alaska. Mr. Chairman, I love his theory, but one thing I would ask the gentleman. Two years ago I was in New Mexico standing and overlooking a huge ice action and the gentleman with me said, you know, think about it, Congressman, 12 million years ago there was 284 feet of ice where you are standing. I never will ask how the ice got there, but it was there, and that has scientifically been proven.

But I will ask the gentleman from Maryland, what melted that ice all the way back to the North Pole when our activity is less than 4,000 years? So I want to ask the gentleman, what melted it at that time there? It always intrigues me about the idea of how arrogant we are thinking we are the real problem for all of the problems that occur on this earth.

The Chairman. The time of the gentleman from Maryland (Mr. Gilchrest) has expired.

(On request of the gentleman from Maryland, and by unanimous consent, Mr. Gilchrest was allowed to proceed for 1 additional minute.)

Mr. Gilchrest. Mr. Chairman, I yield to the gentleman from Alaska (Mr. Young).

Mr. Young of Alaska. Mr. Chairman, the oil that we are going to drill and the gentleman from Maryland is going to help me drill in Alaska if he has any wisdom at all; in fact, when we drill, we do not drill through rock up there, we drill through ferns, tree trunks, elephants, all the way down to the bottom to get to the oil.

Now, if we are to accept the gentleman's theory and there is not going to be any change and we are the fault of all of it, then why did this always occur in the past? We take a great deal upon ourselves saying it is our fault because of this global warming when, in reality, if we look at the past history of this earth, it was warm at one time, it was very, very cold at one time; and that was before mankind had anything to do with it.

So before we jump off the cliff, let us understand one thing, we may not be as important as the gentleman thinks we are.

Mr. Gilchrest. Mr. Chairman, reclaiming my time, if I could just respond to the chairman, I am going to go off that cliff in a very gentle way. I am not leaping off that cliff; I am looking to see what is at the bottom.

The Chairman. The time of the gentleman from Maryland (Mr. Gilchrest) has again expired.

(On request of unanimous consent, Mr. Gilchrest was allowed to proceed for 1 additional minute.)

Mr. Gilchrest. Mr. Chairman, there has been change in the climate ever since we have been a planet and the cycle has run over many millions of years and a quick cycle would be 10,000 years. Human beings have a right to live on the planet and to improve the standard of living as best we can, but we also have a responsibility to understand the nature of our impact on the natural processes so that future generations, which will be our grandchildren, and great grandchildren, will not deal with a situation that is more difficult than what we have.

In the last 10,000 years, as a natural consequence of nature, we have warmed about 1 degree centigrade every 1,000 years. But in correspondence to the internal combustion and burning fossil fuels, we have warmed almost that amount in 100 years. So in a simple observation to me, we ought to take a look at that acceleration of that warming rate.

Mr. Oberstar. Mr. Chairman, I move to strike the last word.

Mr. Gilchrest. I yield to the gentleman from Alaska.

Mr. Young. The Department of Energy has shrunk by 40 percent, releasing enormous amounts of colder water into the great ocean circulating current, the great hyaline circulating current that starts in the Arctic with a volume equal to the discharge of all of the rivers of the world in a second. Mr. Chairman, 2 million cubic meters per second, moving cold water of the ocean from the Arctic all the way down the Atlantic coast of the United States, the south Atlantic, into the Pacific and then circulating back up to the Arctic. That great ocean current from time to time disappears. The world enters an ice age, and it occurs on regular currents of about 100,000 years.

It also occurs with a tilt of the earth's axis a half a degree away further from the sun than it does now. That last occurrence made of the disappearance of the circulating current was followed by a warming period that ended with the great Ice Age, which itself ended over 10,000 years ago and was followed by the lesser Ice Age, the period of roughly 1,300 to 1,400 in the modern era. And then about 750 years ago we experienced another lesser ice age, known as the Younger Dryas.

We are now in a period of extended warming. We are beyond those ice age periods and into a new cycle of climate. As the atmosphere has warmed and as the surface of the waters of the Pacific Ocean have warmed more than a centigrade degree since the beginning of this century, the ocean waters are expanding. As they warm, they expand, and so...
is it happening with the Atlantic waters. And as those waters expand and as the atmosphere is warmer, it holds for every degree of temperature 6 percent more moisture. And with more moisture in the atmosphere, more of a collision of warm and cold forces, we are seeing these violent storms. Fifteen years ago, the did not pay more than $1 billion a year in disaster assistance programs. Within the last 5 years, we have expended over $5 billion a year, and last year with the private insurance and the public funds, expended over $100 billion in response to natural disasters. It is incontrovertible that serious things are happening in our climate. And what has changed is not the forces of nature, but man’s application to them.

The gentleman from Maryland said we have contributed the carbon into the atmosphere. There is more carbon in the atmosphere today than at any time in the last 20,000 years. That carbon causes heating. That is the conclusion of 500-plus scientists gathered in the U.N. in the year of the environment in a multi-volume report that was submitted.

Mr. Chairman, we cannot stick our heads in the sand and ignore these facts. We cannot ignore the relentless movement of forces in nature, the melting polar ice pack in the Arctic and the ice pack of Antarctica that are increasing the volume of the oceans by warming of the surface temperature of the Atlantic and the Pacific Oceans. They are causing warming in the atmosphere and more moisture in the atmosphere, more carbon in the atmosphere; and only we can change it, by slowing down the destruction of the tropical forests, increasing sustainable yield forestry in the United States, and reducing our use of carbon. We ought to have that study, and we ought to have this debate. Five minutes is no serious time in which to do it.

Mr. SMITH of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to share with my colleagues a few facts about climate change that have not gotten much press. The main point is uncertainty. There is still a great deal that we do not know or do not well understand about our global climate. For every study that seems to tell us something, there is another that confounds the previous conclusions. Uncertainty is a normal and maybe important part of the scientific process, but it is a part that is often not considered and so rarely reported on. To its credit, The New York Times ran a piece last week entitled, “Both Sides Now: New Way That Clouds May Cool,” which noted that science is uncertain and that uncertainty can dramatically change climate models.

Clouds have long been a source of uncertainty in climate studies. Certain gases generated by the burning of fossil fuels, such as carbon dioxide, are widely held to play a role in warming the planet by enhancing heat trapping. However, aerosols, also produced from fossil fuels, have been found to contribute to the cooling of the planet by affecting the development of clouds that reflect sunlight, and thus it reflects heat away from the planet.

Now, before we pass legislation meant to curb global warming, we need to understand better which human activities affect those and other processes. It seems, and I would suggest, the most important point to take from the recent round of reports is that our climate is a very complex system that is not well understood. As chairman of our Subcommittee on Research of the Committee on Science, we have held several hearings on this subject, and it is almost universally agreed by those testifying before our committee that scientific evidence and knowledge is lacking.

Our best intentions can very easily produce the wrong outcome. Fredrick Seitz, former president of the National Academy of Sciences, did a piece for the Washington Times last week on this very point. Let me quote from that article entitled “Beyond the Clouds of Fright.” Quote: “The science of climate change today does not call for rash action that could wreak havoc with economies worldwide and even cause worse damage to the environment over time.” He also cautioned that “researchers shouldn’t be pressured by politics or encouraged by publicity to find a particular answer. They should be given the space, the time, the funding and the support to seek and find the truth.”

So in conclusion, I would like to urge my colleagues to resist the temptation to jump on the bandwagon of climate change before we better understand the science and better know the consequences of our actions. I understand the ranking member has a perfecting amendment that might help us, help guide us.

Mr. INSLEE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, modest uncertainty is not an excuse for major inaction. When the captain of the Titanic steamed out of the harbor, he was uncertain if there was an iceberg there, because he was uncertain if there was an iceberg there, that was a mistake. And this body, with the language in this bill, which now continues to ignore this problem of global climate change, is a major mistake.

I am just going to ask my friends across the aisle to look at two things that happened today within a quarter mile of this building. Number one, The Washington Post, headline this morning: “Penguins In Major Decline. Fifty percent of these stocks are disappearing in the Antarctic.”

Why? Because they have had a reduction of ice in the Antarctic, a death of the crill population that penguins rely on and a potential huge collapse in a couple of their populations.

It happened today. I am just going to ask people across the aisle to not adopt the attitude of the ostrich and ignore these facts.

Number two, right now, 200 yards from now, are two fuel-cell-driven cars, one manufactured by the Ford Company, that run on fuel cells and emit water instead of carbon dioxide in their emissions.

We are, I mean we, have the potential if we get together to emphasize research in these new technologies, we are going to lead the world, instead of the laughingstock of the world, of the country that refuses to be anything but an ostrich on this issue.

Mr. Chairman, I am going to ask at some point that we work together to lead the world. We did not have to wait for the rest of the world to do a clean air bill. We did not have to wait for the rest of the world to do a clean water bill. We ought to lead the world on global climate change. That is the right approach.

Mr. Chairman, I look forward to the time we can do that on a bipartisan basis.

Mr. OLVER. Mr. Chairman, I ask unanimous consent to strike the requisite number of words.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. OLVER. Mr. Chairman, I will be very brief this time. In section 331, it refers to a limitation in the use of funds in this legislation to implement in a broad way, in any kind of way, the Kyoto Protocol, which has never been ratified by the Senate of this Nation, nor by any of the other major signatories to the original Protocol for that matter.

My amendment merely says that the limitation which would remain does not include activities related to the protocol which are otherwise authorized by law, nor activities that are authorized by the United Nations Framework Convention on Climate Change, which is the treaty that was negotiated back in 1991 and 1992, and sent to the Senate for ratification by former President George Herbert Walker Bush, and was ratified by the Senate and has the full force of law.

Mr. Chairman, it merely removes the limitation from otherwise-authorized-by-law activities in this area. It is my intent to withdraw the amendment.

Before I do withdraw my amendment, I know that we could probably generate a long discussion here, which
none of us really want, but I would ask the gentleman from Kentucky (Chairman Rogers) if the gentleman would be willing to get together with the groups that are obviously showing their interest in this and come up with something that might address these concerns in the conference that will come forward.

Mr. ROGERS of Kentucky. Mr. Chairman, I will be happy to consider it as time passes, but I was sort of hoping, can we have some more discussion of this?

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Without objection, the amendment is withdrawn.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Sec. 332. None of the funds in this Act shall be used to pursue or adopt guidelines or regulations requiring airport sponsors to provide to the Federal Aviation Administration without cost building construction, maintenance, utilities and expenses, or space in airport sponsor-owned buildings for services related to air traffic control, air navigation or weather reporting; Provided, That the prohibition in this section does not apply to negotiation between the agency and airport sponsors to achieve agreement on "below-market" rates for these items or to grant, loan or otherwise make money available to airport sponsors to provide land without cost to the FAA for air traffic control facilities.

Sec. 333. Notwithstanding any other provision of law, States may use funds provided in this Act under section 402 of title 23, United States Code, to produce and place highway safety public service messages in television, radio, cinema, and print media, and on the Internet in accordance with guidance issued by the Secretary of Transportation: Provided, That any State that uses funds for such public service shall submit to the Secretary a report describing and assessing the effectiveness of the messages.

Sec. 334. Notwithstanding section 402 of the Department of Transportation and Related Agencies Appropriations Act, 1982 (49 U.S.C. 10903 nt), Mohall Railroad, Inc. may abandon track from milepost 5.25 near Granville, North Dakota, to milepost 35.0 at Lansford, North Dakota, and the track so abandoned shall not be counted against the 350-mile limitation contained in that section.

The point of order

Mr. OTTER. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. Does the gentleman from Kentucky (Chairman Rogers) wish to be heard on the point of order?

Mr. ROGERS. Mr. Chairman, we concur the point of order.

The CHAIRMAN. The gentleman from Kentucky concedes the point of order.

The point of order is conceded and sustained under clause 2, rule XXI. The provision is stricken from the bill.

The Clerk will read.

The Clerk read as follows:

Sec. 345. Beginning in fiscal year 2002 and thereafter, the Secretary of Transportation may use up to 1 percent of the amounts made available to carry out 49 U.S.C. §5309 for oversight activities under §5337.

Sec. 338. Amtrak is authorized to obtain services from the Administrator of General Services, and the Administrator is authorized to award to Amtrak, under sections 201(b) and 211(b) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 481(b) and 491(b)) for fiscal year 2002 and each fiscal year thereafter until the fiscal year that Amtrak operates without Federal operating grant funds appropriated for its benefit, as required by sections 2410(d) and 2410(a) of title 49, United States Code.

Sec. 337. Item number 1348 in the table contained in section 1602 of the Transportation Equity Act for the 21st Century (112 Stat. 269) is amended by striking "Extend West Douglas Road" and inserting "Construct Gastineau Channel Second Crossing to Douglas Island".

Sec. 338. None of the funds in this Act may be obligated for the Office of the Secretary of Transportation or for the Aeronautics and Space Administration to approve assessments or reimbursable agreements pertaining to funds appropriated to the modal administrations in this Act, except for activities underway on the date of enactment of this Act, unless such assessments or agreements have completed the normal reprogramming process for Congressional notification.

Sec. 339. For an airport project that the Administrator of the Federal Aviation Administration (FAA) determines will add critical airport capacity to the national air transportation system, the Administrator is authorized to accept funds from an airport sponsor, including entitlement funds provided under the "Grants-in-Aid for Airports" program, for the FAA to hire additional staff or obtain the services of consultants: Provided, That the Administrator is authorized to accept and utilize such funds only for the purpose of facilitating the timely processing, review, and completion of environmental activities associated with such project.

The Text of the amendment is as follows:

Amendment no. 5 offered by Mr. TRAFICANT.

Mr. TRAFICANT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will describe the amendment.

The text of the amendment is as follows:

Amendment no. 5 offered by Mr. TRAFICANT.

At the end of the bill, insert after the last section (preceding the short title) the following new section:

Sec. __. None of the funds appropriated or otherwise made available in this Act may be made available to any person or entity convicted of violating the Buy American Act (41 U.S.C. 80a-10c).

Mr. TRAFICANT. Mr. Chairman, I would just like to say the worst thing about global warming would be a German transit system in the City of New York that focuses on the violations that occur in the Buy American Act. The language is straightforward.

Mr. Chairman, I yield to the distinguished gentleman from Kentucky (Chairman Rogers), who has produced a fine work product.

Mr. ROGERS of Kentucky. Mr. Chairman, the Traficant amendment is a good one. We accept it.

Mr. TRAFICANT. Mr. Chairman, I yield to the distinguished gentleman from Minnesota (Mr. SABO), the ranking member.

Mr. SABO. Mr. Chairman, we accept the amendment.

Mr. TRAFICANT. Mr. Chairman, I ask for a vote in the affirmative.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. TRAFICANT).

The amendment was agreed to.

Mrs. MALONEY of New York. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to thank the Committee on Transportation and Infrastructure for the Long Island City Links project and acknowledge the importance of this project and also to express my appreciation.

Mr. Chairman, I include the following line for the IPCC on developments in this growing economy:

I am tremendously pleased that the House Transportation Appropriations bill includes $250 thousand dollars for the Long Island City

CONGRESSIONAL RECORD—HOUSE 11953
Links project, to improve transit connections and pedestrian paths in an area of New York City that is experiencing tremendous economic growth. These improvements are a vital part of our efforts to make Long Island City not only one of the best places to work in the region, but also a beautiful and livable residential neighborhood. Long Island City Links will immeasurably improve the quality of life for residents in the area by reducing traffic and increasing air quality and providing public parks and walkways.

Long Island City, Mr. Chairman, is one of the fastest growing regions in New York City. Here are just a few of the recent developments in this growing economy:

**BUSINESS MOVES TO LIC**

MetLife brings almost 1,000 jobs to northwestern Queens—MetLife recently decided to relocate almost 1,000 employees in about six months to the renovated, six-story Bridge Plaza North. This move is expected to attract more businesses to this area by drawing attention to the convenient 15-minute commute to midtown Manhattan. MetLife plans to add another building in the city during the 20-year term of its lease.

The FAA has plans to develop a new Regional Headquarters in the area. Construction is already underway for a new FDA laboratory.

Established Companies in the area, such as Eagle Electric, Continental Bakeries, and Schick Technologies, are continually growing and expanding.

Recently welcomed retail chains include Home Depot, Tops Appliance City, Costco, Caldor, Kmart, Sears, the Disney Store, Barnes & Noble, Marshall’s, Gateway, Ethan Allen, Staples, Circuit City, and Bed, Bath & Beyond with a CompUSA already being planned for the near future.

With this growth in business and the economy in Long Island City it is absolutely vital that we move forward with community enhancements like public parks, transportation enhancements, and quality of life improvements for all residents in the neighborhood.

**AMENDMENT OFFERED BY MR. SCHIFF**

Mr. SCHIFF. Mr. Chairman, I offer an amendment.

The Clerk reads as follows:

Amendment offered by Mr. SCHIFF:

The Clerk reads at the end of the bill, insert after the last section (preceding the short title) the following new section:

**SEC. None of the funds in this Act may**

1. Use a very simple amendment. I wish it could be more complicated, but because of the action of the Committee on Rules and the action in the House, I cannot offer a more complicated amendment.

This one simply prohibits funding to process the applications of Mexico-domiciled motor carriers for either conditional or permanent authority to operate throughout the United States beyond the current 20-mile commercial zone.

Let me say that I thought the amendment that we had earlier clearly was NAFTA-compliant. This probably is not, because it is a total prohibition, but I know of no other way for us to do this with this issue on the floor. I think we should deal with it.

Let me review where we are at this point. The Committee on Rules did not make our amendment in order. We heard a great deal about the money that was going to make those funds available for facilities and inspectors in this bill. A significant part of that money has been struck. Today I think close to $90 million for inspectors and facilities have been struck by points of order.

Mr. Chairman, I was an original supporter of the action of our Chair in putting that money in the bill. I thought it was the appropriate thing to do. I thought that was a significant step forward, but not far enough. I thought the best solution to a very troubling situation was both to do preinspection of the carriers, plus add to our capacity to inspect individual trucks.

The reality is at this point in the bill, most of that money has disappeared, and I will now offer an amendment that calls for preinspection. I think the only way we can address this issue in the House, keep it alive for conference, indicate to the administration and to the Senate that we want to make sure that we do the utmost to protect safety, is to adopt this limitation which is strong and outright. It gives us the action from a point of strength of dealing with the issue of truck safety for all the trucks that are going to be coming here from Mexico as we move on in this process.

Let me say as it relates to some of the money that was struck, the administration plans to do 18 months review. Let me simply suggest that even if that money had stayed in the bill, particularly the money for building new facilities, probably very little of that would have been spent within the next 18 months, because it will take a significant period of time to build facilities. Clearly, money would not have been spent by January 1 of this year.

Mr. Chairman, I ask for support of this amendment. It is clear. It is
Mr. Chairman, I fully understand that as this moves through the process, this will need to be revised, but it is the only option we have to deal with this important safety question for the American people.

Mr. ROGERS of Kentucky. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, let us understand where we are here. I did not vote for NAFTA. I opposed NAFTA, but it passed. It is now the law of the land. It is the treaty between our neighbors and us. This provision is in direct violation of a United States treaty with our neighbors.

I am referring to a letter of June 12 from the Secretary of Transportation, who in essence says that this is a clear violation of Mexico’s rights under NAFTA; that it would subject the United States to possible trade sanctions estimated to be valued at over $1 billion annually that this would expose us to.

The majority of my colleagues in this body voted for NAFTA. It passed. NAFTA says we are going to open the borders up to Mexico and to Canada.

This President says January of next year is when we do it. This amendment would prohibit motor carriers from Mexico to enter the United States. Period. You cannot do that. You are in violation of a treaty; in violation of the law; in violation of the majority that passed the treaty through this body.

Now, is it worthwhile to do this type of thing? Look, the Motor Carrier Safety Administration, even as we speak, is taking public comments from anybody who wants to comment, including Members of Congress, about what kind of a procedure we should have to check Mexican trucks for safety as they come into the country. The experts are working on the rule even as we speak. Should we not let them finish their work before we, who are not experts on trucking or safety, tell the experts what they should or should not do?

Give them a chance. If we do not like what they have come up with this fall, we can change the rule and make it effective. But for goodness sakes, give the experts the chance to do their work. They are making the rule right now. Make comments to the rule-making body, not to the Congress. We can deal with this at a later time.

The administration has a plan. The DOT will be going to Mexico. For those carriers in Mexico who want to run trucks into this country, those carriers will be audited for safety, for their record, for training, for all the things that go into whether or not a safe operation of the truck could be made in the United States by that Mexican carrier.

If they pass that audit, they would be given a temporary permit to drive. In the meantime, we will be inspecting the dickens out of the trucks crossing the border.

If at the end of 18 months that carrier has no record problems, all has gone smoothly, then and only then would they be given, not a conditional permit, but a permanent permit. I think it is a responsible approach. There is money in the bill for that approach.

The administration is proceeding. The rulemaking is taking place. Let us not interrupt what they are doing. But please do not vote in this Congress an amendment on to this bill that would be a direct violation of a treaty of the United States of America. Please reject this amendment.

Mr. OBEY. Mr. Chairman, I move to strike the last word. Mr. Chairman, we are being told that this amendment violates NAFTA. That is like the old song that we hear so many times about the person killing both of his parents and then throwing himself on the mercy of the court because he is an orphan.

What the gentleman from Minnesota (Mr. SABO) tried to do is to bring to this House an amendment that will prevent Americans from dying by seeing to it that we have an inspection process and a review process before, not after, dangerous trucks hit the highway.

I want to remind my colleagues NAFTA is a trade agreement. It is not a suicide pact. Let me repeat that: NAFTA is a trade agreement; it is not a suicide pact. We are not required to allow unsafe trucks on American highways in order to satisfy some pencil-heads in Canada, or in Mexico or in NAFTA.

This amendment has no choice but to, for the moment, cut off all Mexican trucks on American highways in order to satisfy some pencil-heads in Canada, or in Mexico or in NAFTA. This amendment has no choice but to, for the moment, cut off all Mexican trucks on American highways because the majority party insisted that was the only option that could be put before this body. So they blocked the effort that the gentleman from Minnesota (Mr. SABO) tried to bring to this House, and which would have been fully consistent with NAFTA. That effort would have said you cannot have those trucks running over American highways until we have the proper review process in place to make certain ahead of time that safety standards are being met.

If this amendment technically would become violation of NAFTA, it is because the majority has forced the House into a position where it can consider no amendment except that kind of an amendment.

Everybody on this floor knows, if you want to pug it out, the bull gravy at the end of the day, this amendment can be fully tweaked in conference so that it is fully consistent with NAFTA and protects the American trucker.

The rationale against this amendment keeps changing. We were told earlier in the day, oh, you have to block the Sabo amendment under House rules because the Sabo amendment was not passed by the full Committee on Appropriations. Many a time, many a time the Committee on Appropriations has chosen not to follow that logic.

We are also told, oh, we do not have to do this. We do not have to protect American motorists this way because we have got all this money in the bill for these new inspectors.

Well, let me remind my colleagues that money is now gone. It was knocked out on a point of order. So the $56 million for infrastructure improvements at the border, the $14 million for added inspections at the border, the $18 million for the supplements for States around the border, all that money is gone.

So your excuse is gone. You have no added protection for American drivers at this point. You know what the problems are. There is no effective oversight. There is no effective oversight on Mexican motor carriers today. There are no motor carrier hours-of-service regulations in effect. Mexico. There is no way to check the driving history of Mexican motor carrier drivers.

In testimony last year, the Department of Transportation Inspector General said this: "I do not think there is any reasonable person who can say that the border is safe when you have an out-of-service rate for safety reasons in the neighborhood of 40 to 50 percent."

Now, the majority blocked the Sabo amendment that would have allowed us to deal with this issue the way it needed to be dealt with. Now because they blocked us from offering the right amendment, they are blaming us because the language of this amendment is not pluperfect.

Well, the gentleman from Kentucky (Mr. ROGERS) is a very smart man. He can easily fix it in conference. We have heard this excuse time and time again. Can fix it in conference. Can fix it in conference. Well, this is one time we are going to say that. We have full confidence in the ability of the gentleman from Kentucky to fix this in conference.

But today, we have only one option if we want to protect American motorists.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. ROGERS) has expired.

(By unanimous consent, Mr. OBEY was allowed to proceed for 2 additional minutes.)

Mr. OBEY. Mr. Chairman, the only option we have is to adopt this amendment, because this is the only procedural alternative left to us by a rule that prevented us from offering the
amendment that should have been offered on this subject. So do not blame us for the shortcomings which the majority has caused.

I would simply make one other point. We have a choice. We can either insist on having an inspection regimen and a review regimen in place before these trucks are put on the highways, or we can do what the gentleman from Kentucky (Mr. ROGERS) says and wait until they are on the highways and then see what happens.

Only one difference between the approaches. There are people who will die under the second approach who will not die under the first. It is just that simple.

So you have got a very clear choice. If you want to do anything at all to protect the safety of American motorists on the highways on this issue, you will have the opportunity to do that, or you will give the committee the opportunity to do what it has done thousands of times before, which is to tweak the language in conference so that it can satisfy the procedural niceties of this House who eight times out of ten run a railroad truck over legitimate procedure.

You hide behind procedure when it suits your purpose, and you trample fair procedure the rest of the time. We are not fooled by that. American drivers are not going to be fooled by that. The only people you might be fooling are yourselves.

Mr. KOLBE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I have listened with interest to this debate. I do rise in strong opposition to this amendment.

I think that sometimes the rules of the House work to help to show the real issue. What is at stake here is what is involved here. I have said all along in the debate in committee and before this, in the years that it has been before, that this is really an issue about trying to block Mexican trucks from the United States highways, that there are interest groups here in the United States that want to compete there.

We want to make sure these Mexican trucks are safe. We do not want under any circumstances to have Mexican trucks driving on our highways.

Well, today we see that with this amendment. Granted, as the gentleman from Wisconsin (Mr. OBEY) said, it is the only amendment that can be offered or something like this amendment can be offered under the rules.

With this amendment, it is very clear. Block all trucks coming into the United States. The heck with anything else. Block all trucks.

I might add, somehow within the 20 miles in my State is okay under this amendment, but in other areas, it is not okay. So somehow it is okay for us not to have safe trucks since he is worried about safe trucks.

So I think it is very clear what we are talking about here. We are talking about blocking trucks from coming to the United States. Let us face it, there are interest groups in the United States that do not want those trucks here. They are joined by interest groups in Mexico. The Mexican Trucking Association does not want American trucks coming down into Mexico. So they join you in this. They want to be sure there are not trucks in the United States to have an opportunity to compete there.

If we get this, we get reciprocity; and we have an opportunity to have Mexican trucks to go down there. There are Mexican truck associations that do not want us. So there are joint interest groups on both sides that do not want this.

But let us review the facts here. We adopted NAFTA. It was adopted in this chamber, and it is implemented by the executive branch. It is in the law of the land that took effect on January 1, 1994. It stipulated that, by January 1, 2000, that is 18 months ago, we would allow trucks to cross at all points of the border into the United States. Here we are at June 25, and it still has not occurred.

Mexico filed a complaint against us under the terms of NAFTA for not meeting the deadline; and in February of this year, the panel concluded that the U.S. was indeed in breach of its NAFTA obligations.

The sanctions that are being talked about could be as much as $1 billion a year. That is $1 billion on American industry. That is $1 billion for American consumers that they are going to pay more.

I say let us stop treating our Mexican neighbors as though they are some kind of people that we should not want to do business with.

This amendment has nothing to do, by the way, with trucks coming from Canada, our other NAFTA partner. Oh no, just the trucks from Mexico somehow are suspect. So I think we should be building bridges, not barriers to our neighbors from the south.

Let us be clear about this. This issue is not about the safety of the truck, it is about paperwork. The issue as was presented today, by the gentleman from Minnesota was about paperwork.

Of course we want to be sure that all trucks traveling on our highways are safe, but the States along the border, for several years now, have said they are prepared to do that. How come the States that have the responsibility for enforcing this, along with the Department of Transportation, are prepared to do this? We have the regimen in place to check the paperwork as they cross the border, to look at the logs, to look at all these things, to make sure the bonds are there, the licenses are there, the insurance is there, and to do the actual physical inspection of the truck. Because that is after all what we are about, is it not? Why not to make sure these trucks are actually safe. So the most important aspect of truck safety is the observation of the driver and the actual inspection of the truck at the border and along the highway.

The gentleman from Wisconsin said people will die. Yes, people have died in my district. Not very long ago there was a truck driver who was using amphetamines, had not slept for 18 hours, crashed into a car parked along the side of the road and destroyed all the occupants of an entire family because he was violating rules and the law in the United States. We need to inspect for that. We need to have adequate inspection to make sure it is safe in this country.

The trucks coming across the border are all going to be subject to inspection, and the percentage of them that are actually going to be physically inspected is going to be much much higher. Currently are inspecting trucks on our highways. American trucks traveling on our highways. So the paperwork is not the issue. If all my colleague wants to do is check the paperwork, the paperwork can be checked when the truck is down in Guadalajara, but that does not tell us whether the truck is safe.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. KOLBE) has expired.

On request of Mr. OBEY, and by unanimous consent, Mr. KOLBE was allowed to proceed for 5 additional minutes.

Mr. KOLBE. Mr. Chairman, let me just say this, and then I really will yield to the gentleman. This really is not about paperwork, in my opinion. It is really about whether or not trucks are going to be allowed to travel on our highways from Mexico.

I say we should treat people equally. In a study, by the way, in California, of trucks coming across the border into that border zone, shows they meet the standards on an equal basis with U.S. trucks. So there is no real difference that is there. So I say we need to treat our neighbors to the south as partners.

Those of us who live along the border understand what this partnership is all about and how important it is economically and politically to the United States, and I believe that we can make this work. It is clear the Department of Transportation is prepared to do it, the States are prepared to do it, and I would urge that we defeat this amendment.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I thank the gentleman for yielding, and let me say he is my good friend, but I would like to read something to him and then ask him a question.
The gentleman indicated that he thought that in this case the rules had been used to bring out the true intent of the amendment before this body, implying that the true intent was to have a flat shutoff of Mexican trucks. I flatly dispute that, and I want to read something then ask the gentleman a question.

This is the text of the original Sabo amendment which the majority blocked from consideration in the House today. It reads as follows: “No funding limited in this Act for the review or processing of applications by Mexican motor carriers for conditional authority to operate beyond U.S. municipalities and commercial zones on the U.S.-Mexico border may be obligated unless the Federal Motor Carrier Safety Administration has adopted and implemented as part of its review procedures under 49 U.S.C. 13902 a requirement that each Mexican motor carrier seeking authority to operate beyond U.S. municipalities and commercial zones on the U.S.-Mexico border shall undergo a new entrant safety compliance review consistent with the safety fitness evaluation procedures set forth in 49 CFR Part 385 and receive a minimum rating of satisfactory thereunder before being granted such conditional operating authority.”

Now, that language is pretty clear. It does not try to shut off Mexican trucks. It says they cannot operate here until they have met these standards. Does not the language of the original amendment in fact indicate what the intention of the original amendment was?

Mr. KOLBE. Mr. Chairman, reclaiming my time, I appreciate the gentleman asking the question, and I understand what the amendment did do and that this amendment now, as it is offered, is somewhat different. But I believe that the amendment that was crafted as offered has the effect of actually stopping any trucks from coming into the United States. That is the intent of it. I believe, to make sure they do not get into the United States.

So now that amendment not having been made in order under the rules, I would say to my good friend from Wisconsin, I think we are seeing the true intent here. It is interest groups. Look at those that are supporting this amendment. Look at the people asking for this. It is groups that do not want trucks coming into the United States.

Mr. OBEY. Mr. Chairman, if the gentleman will again yield. Let me simply say that the gentleman is forgetting one thing. What the Sabo amendment attempted to do is to say that there would be no Mexican trucks on these roads until the safety requirements were met as outlined in the amendment.

I think it is blatantly ridiculous for anyone to assert that the intention of a proposal is something other than that which is quite clearly stated in the proposal. It was the majority that blocked us from being able to vote on this proposal.

Mr. KOLBE. Again reclaiming my time, Mr. Chairman, more than 2 years ago, down at the border, I went over the whole procedures with the Arizona Department of Transportation and the U.S. Department of Transportation. Everybody was prepared at that time to begin implementing this. So there is no question. We are prepared to inspect. We are prepared to look at these trucks. We are prepared to make sure they are safe. We are prepared to make sure they have their license, their insurance, the bonding that is required, and to do the physical inspection of the truck.

As I pointed out, a far greater percentage of them will be inspected than any of the trucks traveling on our highways. The gentleman must acknowledge that there are accidents occurring on our highways because of trucks not properly inspected or, more likely, because the drivers are not following the rules. In fact, there is a very interesting study I just saw the other day that states that 73 percent, I believe was the figure, of all accidents in trucks occur when there is a passenger in the vehicle as opposed to about 23 percent when there is not a passenger. So passengers’ distractions have more to do with it apparently than anything else.

Mr. SABO. Mr. Chairman, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from Minnesota.

Mr. SABO. Mr. Chairman, the gentleman talks about who supports this amendment, or my earlier amendment. The time of the gentleman from Arizona (Mr. KOLBE) has expired.

(On request of Mr. SABO, and by unanimous consent, Mr. KOLBE was allowed to proceed for 1 additional minute.)

Mr. KOLBE. Mr. Chairman, I yield to the gentleman from Minnesota.

Mr. SABO. As I was saying, I have here a letter from the Commercial Vehicle Safety Alliance, which is an association of State, provincial, and Federal officials responsible for the administration and enforcement of motor carrier safety laws. They were writing to me to express their strong support for the amendment that I had before the Committee on Rules. They are hardly a self-interest group. Their interest is in enforcing the laws that we pass.

Mr. KOLBE. Mr. Chairman, I appreciate what the gentleman is saying, but I would say to the gentleman in response that it is very clear to me that we have the ability to do this, we have the wherewithal to do it, we have the desire on the part of both Federal and State authorities to do this checking, and they are capable of doing this.

Why is this amendment not including Canada? Why are we only including Mexico under this? Canada is a NAFTA partner. Why do we discriminate against the one? That is what makes this violative of NAFTA.

Mr. OBEY. Mr. Chairman, will the gentleman yield so we can answer that?

Mr. KOLBE. I yield to the gentleman from Wisconsin if I have time here.

Mr. OBEY. Mr. Chairman, it is very simple.

The CHAIRMAN. The time of the gentleman from Arizona (Mr. KOLBE) has again expired.

(On request of Mr. OBEY, and by unanimous consent, Mr. KOLBE was allowed to proceed for 1 additional minute.)

Mr. KOLBE. I yield to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. The record for Canadian carriers shows that their highway safety record is virtually every bit as good as ours. The record we respect to the Mexican drivers in question demonstrates quite the opposite.

Mr. KOLBE. And I would say to the gentleman that fair is fair. If we are going to treat people fairly, we need to treat both sides in exactly the same way. With the kind of inspection regimen we are talking about installing here, we should have the same kinds of inspections for trucks coming from Mexico as we are talking about trucks that travel from Canada. Fair is fair. Treat all sides fairly here. That is all that I am saying that we should do.

Why are we singling out our neighbors to the south? Why are we singling out Mexico to say we do not trust you, when we do not think your trucks are safe, do we not think you can comply with NAFTA? I think that is wrong and it sends the wrong signal to our partner, the wrong signal to NAFTA and the rest of the world, that we are going to single out this Latin American country, this neighbor to the south of us, to say that we do not believe your trucks can travel here in the United States. I think it is just plain wrong.

Mr. BONILLA. Mr. Chairman, I move to strike the requisite number of words.

Mr. KOLBE. Mr. Chairman, I stand in strong opposition to this amendment.

Here we go again, attacking Mexico, singling out Mexico for some reason that I cannot understand. What a farce, for anyone to argue that these trucks coming in from Mexico would not be forced to comply with the same standards as American trucks on our highways. This is simply a ploy, a naked ploy now, because it is not masked as an earlier amendment was trying to be masked as some kind of effort that is actually behind a safety issue. This is just a clear effort to try to stop these trucks from coming in altogether.
Let me also say to many of my colleagues who are supporting this amendment, this is an attack on many border communities. We have seen an incredible economic boom as a result of free trade over the last 20 years. To support this amendment stops the progress, stops the jobs from being created in many of the communities close to the border. I do represent almost 800 miles of the Texas-Mexico border and have seen incredible opportunities come to these neighborhoods because of free trade. These people want more opportunity that would come with allowing these trucks to drive through these communities. And we know that they would not be held to any less a standard than an American truck driving through the community.

So let us look at this for what it is. It is discriminatory, a truck against Mexico. It has already been pointed out that no one else is being forced to comply with this standard. No one else would fall under this amendment. Our friends from Canada would not fall under this amendment. This is simply another effort to discriminate against our friends in Mexico who have been good trading partners and have helped create thousands of new jobs in this country. I urge defeat of this amendment for those reasons.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBERSTAR) has expired.

Mr. BORSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. CHAIRMAN. The amendment is made in order. I, like my colleagues, regret that the Sabo amendment was not made in order. However, I do not regret being in strong support of this amendment, because I believe it is very important for this House to have a clear vote on this issue.

This issue in my view is not about NAFTA; it is about truck safety and why we can allow the trucks that are entering the United States. Not too long ago, the Subcommittee on Highways and Transit had a site visit to San Diego and Laredo. At San Diego, we found a very good permanent inspection station. That inspection station looks at all of the trucks and issues a permit that is good for 90 days. If any truck tries to enter the United States and does not have that, it is pulled aside and inspected. We have found that their out-of-service rate is similar to the trucks in the whole of the United States of America, about 24 percent. Too high in my view, but similar to the rest of the country.

When we went to Laredo, Texas, we found a system that virtually does not exist. There is no permanent inspection station in Texas. I do not believe there is one outside of California. The results are pretty obvious. The gentleman from the Texas Department of Public Safety, Major Clayton, had suggested to us that a truck that is not inspected will be neglected. We were there on a Sunday, and we asked what the experience was that day. We were informed that they looked at seven or eight trucks, and took five of those trucks out of service.

I asked, What was the problem with those trucks? Were they minor little details like a light that does not work or turn signals or something of that sort?

He said, No, Congressman, these are brakes that are falling, leaking fuel
June 26, 2001

CONGRESSIONAL RECORD—HOUSE

11959

Mr. Chairman, these are the vehicles that are going to be allowed come January 1 to enter the interior of the United States. This is not against NAFTA. If we want to continue allowing trucks to come into the border States, where they are traveling at presumably a very low mile-per-hour rate, if these trucks are allowed into the interior of the United States to travel anywhere in the United States of America with brakes that are failing, leaking fuel lines, cracks in undercarriage, bald tires, there are going to be major accidents in our country.

Mr. Chairman, what happens to NAFTA then? What will be the outcry in our country if a truck that was not inspected and had these kinds of violations caused an accident? I think that will cause a whole lot more harm to NAFTA than our insisting that Mexican trucks be inspected and inspected properly. California has done a pretty good job. They have set a model for us. They have put up the funds and have permanent inspection stations. There are no other permanent inspection stations along the border, and trucks that are unsafe will be entering our country. I strongly support the Sabo amendment.

Mr. Chairman, I move to strike the requisite number of words and see if we might inquire how many people want to speak on both sides.

The CHAIRMAN. Without objection, the gentleman from Minnesota is recognized for 5 minutes.

There was no objection.

Mr. SABO. Mr. Chairman, we have two additional requests for time on our side. And how many on the gentleman’s side?

Mr. ROGERS of Kentucky. Mr. Chairman, will the gentleman yield?

Mr. SABO. I yield to the gentleman from Kentucky.

Mr. ROGERS of Kentucky. Mr. Chairman, we have one additional speaker.

Mr. SABO. Mr. Chairman, I ask unanimous consent that there be 30 minutes of debate, 15 minutes allocated to each side, controlled by the gentleman from Kentucky (Mr. Rogers) and myself.

The CHAIRMAN. On this amendment and all amendments thereto?

Mr. SABO. Mr. Chairman, that is correct.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. SABO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. FILNER).

Mr. FILNER. Mr. Chairman, on behalf of my constituents, I thank the gentleman from Minnesota for his amendment.

Mr. Chairman, I represent the southern half of San Diego, California, a district which borders Mexico and which has all of the border crossings for California, at least the great majority. Thirty-five to 40 percent of all truck traffic into the United States crosses my district, so I believe we have some sort of experience and expertise with regard to this matter.

The distinguished chairman of the subcommittee suggested that we ought to wait for experts to decide this question. Mr. Chairman, my constituents are experts. My constituents will tell the gentleman what it is like to be in an accident with a Mexican truck whose brakes have failed; in an accident where the driver did not have adequate insurance; in an accident where the truck driver was a teenager or who had just driven for 20 hours straight. My constituents are the experts on what happens when we do not have adequate inspection system. The gentleman from Arizona (Mr. KOLONE) talked about all of the States are ready to do this. I do not see any evidence that they are. If they are, why do they not do this? Twelve thousand trucks are crossing every day. We heard from the gentleman from Pennsylvania (Mr. BORSKI) talking about the state-of-the-art facility in San Diego where the California Highway Patrol inspects trucks. They are doing this, by the way, with their own funds, no Federal support. There is no Federal support for State inspections, and all States can do what they want. That does not strike me as a way to assure U.S. citizens of truck safety.

But the California Highway Patrol has taken on that responsibility, has paid for it, and does good inspections on the trucks they inspect. We think they do 10 percent of the trucks that cross the border, and that inspection only deals with the safety of the chassis itself. Very little inspection is done or can be done about insurance. Papers are exchanged, but there is no way to check those papers.

The driver’s license may be asked for and the logs may be asked for, but there is no uniformity of those papers. There is no check or way to check on the accuracy of that data. The truck’s license may or may not be a legitimate driver’s license. Logs are not required to be kept by Mexican drivers, so we do not know how long the driver has driven. We do not know the safety record of that driver. There is no way to hook up the computer systems between our two nations. And even if there was, the Mexican systems do not yet meet the standards that we would expect in a DMV of any State in our union.

So even in California Highway Patrol is state of the art, it is only inspecting a few percent of trucks, and it can only inspect for a few percent of what we would normally require to be inspected. And we are light years ahead of the other States that border Mexico. There is no such permanent facility in Arizona, Texas, or New Mexico, and there are no Federal funds to set up these, and there are no standards by which they ought to operate, and there is no agreement on the kind of inspections that ought to be done in those States.

The gentleman from Pennsylvania (Mr. BORSKI) mentioned that the Subcommittee on Highways and Transit of the Committee on Transportation and the Infrastructure with our chairman was at various border crossings along the southern border. We were in Laredo, Texas, where there, and in the environs, most of the trucks apparently cross the border. They have not decided what kind of inspections ought to take place. They do not have the expertise with regard to this matter.

Not only do they not have the money to do it either way, but it is going to take quite a bit longer before they can do it. So we are years away from having an adequate inspection system. We need the Sabo amendment in order to protect our communities.

Mr. Chairman, I stand behind the Sabo amendment and truck safety. 

Mr. SABO. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. RODRIGUEZ).

Mr. RODRIGUEZ. Mr. Chairman, I rise in support of the amendment offered by my colleagues earlier that we were not allowed to have an opportunity to dialogue on. I represent 13 counties in south Texas, two of which are along the Texas-Mexican border and part of the commercial zone already accessible to Mexican trucks. A number of the other counties contain I-35, a principal trade corridor for truck traffic from Mexico.

I recognize the importance and value of expanding trade with Mexico. We need to build upon the trade relationships with Mexico and Canada. I also recognize that the dramatic growth in truck traffic comes with a price. I know from my constituents that that price is often paid on the ground in those counties as we move forward.

The issue is not whether we should have more trade, rather, the challenge is how to protect the public while increasing trade. One should not be pitied against the other. We should just use our common sense. Road maintenance, border infrastructure improvements and border inspection in general have been the responsibility of the counties along the border, some of which are the poorest counties in the Nation. Increased truck traffic without increased inspections is a recipe for disaster.
They did not. They did not get the re-
171 new commercial vehicle inspectors.

Nearly 70 percent of Mexican truck
freight traffic enters the United States
through Texas, which experienced 2.8
million truck crossings last year. The
volume of truck is expected to increase
by 85 percent. As of now, we do not
have the ability to inspect and regulate
these trucks. A total of 1 percent of the
trucks that are crossing into Texas are
now being inspected. Of those in-
spected, the unmarked trucks are 85
percent, nearly twice the national av-
erage for U.S. trucks. We will make the
problem worse if we do not insist on in-
spections for Mexican trucks.

We must insist that Mexican trucks
and their drivers get the same safety
and inspection requirements as U.S.
trucks. We are not asking for anything
special. We want to make sure that
they also be able to go through the
same guidelines. We are not anti-
competitive, and we are not anti-Mexi-
can. What we want to make sure is
that those trucks get treated in the
same way. They should be inspected in
the same manner.

All we are asking is that Mexican
carriers be subject to on-site inspec-
tions prior to being granted operating
authority and permitted to travel
throughout the United States. Why
should we have to wait 18 months for
that? When it comes to public safety,
should we not be more sure? Mexico,
should we have the ability to inspect and regulate
its trucks, especially its long-haul
vehicle. Mexico does not
have the certification process, that could have
began the reform program of its own.

The result was, and we heard from
the ranking member the statistics
about how many unsafe trucks there
were. I can tell my colleagues that at
that time we found 57 percent of the
trucks that we put through our safety
efforts on our border with Canada, al-
much 57 percent did not meet the stan-
dards in the State of Idaho, and so,
therefore, we could halt them at the
border and reject them because they
did not meet our safety standards.
I suspect, Mr. Chairman, that you can do
just about anything that you want to
with statistics.

But let me just say, this is not un-
usual for the United States to do this.
We have airlines that cross borders. We
have railroads that cross borders. We
have no problem with the safety regu-
lations and the equal treatment of both
sides. The same thing with our water
traffic. And so with all the foreign reg-
istry that we have, whether it is on
airlines or boats or railroads, we still find
that we can have that traffic, and I
think that we could use that example,
the same thing, on our highways.

Mr. Chairman, I think it is time that
we recognize that we need to be good
neighbors; we need to be fair neighbors
and not be picking on those people
who we do not like. And so the states
recognized that we need to be good
neighbors, we need to be fair neighbors,
and we recognize that we need to be good
eighbors. I certainly have sat in
the House and been a member for many
years, and I have seen many of the
sides. The same thing with our water
traffic. And so with all the foreign reg-
istry that we have, whether it is on
airlines or boats or railroads, we still find
that we can have that traffic, and I
think that we could use that example,
the same thing, on our highways.

Mr. Chairman, I think it is time that
we recognize that we need to be good
neighbors, we need to be fair neighbors
and not be picking on those people
who we do not like. And so the states
recognized that we need to be good
neighbors, we need to be fair neighbors,
and we recognize that we need to be good
neighbors. I certainly have sat in
the House and been a member for many
years, and I have seen many of the
sides. The same thing with our water
traffic. And so with all the foreign reg-
istry that we have, whether it is on
airlines or boats or railroads, we still find
that we can have that traffic, and I
think that we could use that example,
the same thing, on our highways.

Mr. Chairman, in 1997, the State of
Idaho petitioned the USTR to stop an
unfair trade practice on our northern
neighbor. I decided perhaps I should come back
and say, I see it, Mr. Chairman, in Idaho we
should be doing business. It is a price
we should not be asked to pay, it is a
risk that we need not take, if we adopt a
sensible inspection policy and then
pay for it. We need to make sure that
those trucks are inspected just like
any other truck.

The CHAIRMAN. The gentleman
for yielding me this
Mr. DEFAZIO. Mr. Chairman, I thank
you for yielding me this
time. The previous speaker in the well
talked about this being a thinly veiled
safety amendment. It is not thinly
veiled. This is all about safety. Plain
and simple that is what we are talking
about, the safety of the driving Amer-
icans, we do not want them exposed
for
with taxpayer dollars, and they can ex-
pect a little bit of protection from their
Federal Government. I think. I
hope.
We do inspect U.S. trucks. We do pull them off the roads when they are unsafe. We do require drug and alcohol testing. I went through that debate here on the floor of the House, and I supported that. We do require log books. We do require restrictions on duty time. And we enforce those laws. For the most part those laws do not exist in Mexico, and where they do exist, they are not enforced.

Now, no one has contested that. They are saying, oh, that we just do not want to be good neighbors. We do not want to be good neighbors, but we do not want to be good neighbors with the people who are endangering the lives of the traveling public.

My district has I-5 running right through the heart of it, and that is where those trucks are going. Now, the gentleman from Minnesota got up and said, ‘My people have done really well. I have such a long border with Mexico, and we have got so many jobs out of this, and you want to hurt that. No, actually he is arguing to hurt them bad. If this amendment does not pass, those trucks are going to steam right through his district. Right now all those trucks have to stop in his district, and they have to reload onto safe American trucks. But when this goes into effect, those trucks are going right through his district and right up into his district, and they have to reload onto safe American trucks. But when this goes into effect, those trucks are going right through his district and right up into his district.

I am a bit perplexed by the arguments on the other side of the aisle. For the most part they have been arguing our side, but in a knee-jerk way at the end they are going to come to a conclusion that we have just got to go ahead, that this is about NAFTA and about free trade.

We have a huge trade with Mexico, a huge and growing trade deficit with Mexico under NAFTA, although they promised us surpluses. That is not to be debated here today. That would not be impeded one bit by this amendment. But what would happen is these trucks that we know are heavier, with drivers who are not meeting U.S. standards for safety, for training, for drug testing, for log books, for records of offenses being kept in a central file, if perhaps for insurance or labeling for hazardous materials, 25 percent of the trucks coming across the border carry hazardous materials; 1 in 4, 7 percent, are labeled. What is going to happen when one of those goes over somewhere on I-5 in California or in a heavily populated part of Oregon or Washington? We will not know what is in it. We will not know how to deal with it. We are going to not only put the traveling public at risk, we are going to put communities at risk. We are going to put the firefighters and the first responders at risk.

No, let us have the Mexicans adopt stringent laws for safety, then enforce those laws, and after they do that, then we will be great neighbors, and we will be happy to welcome their fully inspected, safely driven trucks into the United States of America. But until they meet those standards, no, no, no, no, no.

This will kill Americans. People will die for profit, and that is not right.

Mr. ROGERS of Kentucky. Mr. Chairman, I yield back the balance of my time.

Mr. SABO. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 285, noes 143.

</table>
The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en bloc.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Pursuant to clause 10 of rule XX, the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 426, nays 1, not voting 6, as follows:

[Roll No. 194]

YEAS—426

Mr. WILSON, Mrs. CUBIN, Ms. VELAZQUEZ, Mr. GREENWOOD and Mr. BACHUS changed their vote from "aye" to "no."

Messrs. BAIRD, COMBEST, BUYER, JEFFERSON, FOSSELLA, PICKERING, HYDE, DUNCAN and MICA changed their vote from "no" to "aye."

Mr. HINOJOSA changed his vote from "no." So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. NADLER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would be remiss if I did not rise to thank the chairman of the committee, the gentleman from Florida (Mr. YOUNG); the ranking member, the gentleman from Wisconsin (Mr. OBEY); the subcommittee chairman, the gentleman from Kentucky (Mr. ROGERS); and the ranking member, the gentleman from Minnesota (Mr. SABO); for acceding to the request made by the gentleman from Connecticut (Mr. SHAYS) and myself to include funds in this bill for the environmental impact statement for the New York-New Jersey Cross Harbor Rail Freight Tunnel.

This project was first authorized in TEA–21 and received funds for a Major Investment Study, which was completed last year.

New York City, Long Island, and Westchester and Putnam Counties and the State of Connecticut are virtually cut off from the rest of the country’s rail freight system for lack of any way for rail freight to cross the Hudson River, except at a bridge 140 miles north of New York City.

After examining numerous alternatives, the MFS recommended construction of a rail tunnel under New York Harbor. The benefit to the region will be about $400 million a year and the benefit to cost ratio is 2.3 to 1. The environmental impact will be profound as it would remove 1 million tractor trailers from off the region’s roads a year. So I am gratified this was included in the bill. I am disappointed the Second Avenue Subway was not included in the bill.

The CHAIRMAN. The Clerk will read. The Clerk reads as follows:

This Act may be cited as the "Department of Transportation and Related Agencies Appropriations Act, 2002."

The CHAIRMAN. If there are no further amendments, under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. ISAKSON) having assumed the chair, Mr. CAMP, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2299) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes, pursuant to House Resolution 176, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

So the bill was passed. The result of the vote was announced as above recorded.
June 26, 2001

A motion to reconsider was laid on the table.

CONGRATULATING REPRESENTA-
TIVE PUTNAM AND MELISSA
PUTNAM ON BIRTH OF DAUGH-
TER ABIGAIL ANNA PUTNAM

(Mr. CRENSHAW asked and was
given permission to address the House
for 1 minute.)

Mr. CRENSHAW. Mr. Speaker, I have
some exciting news to share with my
colleagues, and I think in a spirit of bi-
partisanship, we can all agree that this
is, in fact, good news, because today
the youngest Member of the House of
Representatives, the gentleman from
Florida (Mr. PUTNAM) and his wife Me-
lissa became the proud parents of a
baby girl.

Mr. Speaker, today Abigail Anna Putnam was born. She weighed 8 pounds
and 4 ounces. She is 21 1/2 inches
long, and they are still looking for the
first sighting of that fire-engine red
hair that the gentleman carries around
with him here.

Just as a word of history, I want my
colleagues to know, first of all, that
the mother and the daughter are doing
well. The gentleman from Florida is a
little shaky, but I think he is going to
make it.

Abigail is the sixth generation Put-
nam to be born in Polk County, Flor-
da, and her great grandfather, who is
92 years old, is so excited that he said
he is probably more excited about the
gentleman from Florida becoming a fa-
thar than he was when the gentleman
got elected to Congress.

I know that all my colleagues want
to join with me in wishing the gen-
tleman from Florida and his wife Me-
lissa and their new baby Abigail a won-
derful life together.

Mr. PENCE. Mr. Speaker, will the
gentleman yield?

Mr. CRENSHAW. I yield to the gen-
tleman from Indiana.

Mr. CRENSHAW. Mr. Speaker, I thank
the gentleman for yielding to me, and I
want to add my congratulations to the
growing congressional family, to Me-
lissa Putnam for putting up with the
gentleman from Florida (Mr. PUTNAM),
and to the happiness. The knowledge
that children are a reward from the
Lord is something we are pleased to ac-
cept.

Mr. OSBORNE. Mr. Speaker, I ask
unanimous consent that it be in order
at any time on the legislative day of
Wednesday, June 27, 2001, for the
Speaker to entertain motions that the
House suspend the rules relating to the
following measures:

H. Res. 172, H.R. 2133 and H.R. 691.

The SPEAKER pro tempore. Pursu-
ance to clause 8 of rule XX, the Chair
announces that he will postpone fur-
ther proceedings today on the motion
to suspend the rules on which a re-
corded vote or the yeas and nays are
ordered, or on which the vote is ob-
jected to under clause 6 of rule XX.

Any record vote on the postponed
question will be taken tomorrow.

RECOGNIZING AND HONORING
YOUNG MEN'S CHRISTIAN ASSO-
CIATION ON ITS 150TH ANNIVER-
SARY IN THE UNITED STATES

Mr. OSBORNE. Mr. Speaker, I ask
unanimous consent that all Members
may have 5 legislative days within

REPORT ON RESOLUTION PRO-
VIDING FOR CONSIDERATION OF
MOTIONS TO SUSPEND THE RULES

Mr. SESSIONS, from the Committee
on Rules, submitted a privileged report
(Rept. No. 107–113) on the resolution (H.
Res. 179) providing for consideration of
motions to suspend the rules, which
was referred to the House Calendar
and ordered to be printed.

REPORT ON RESOLUTION PRO-
VIDING FOR CONSIDERATION OF
H.R. 2111, ENERGY AND WATER
DEVELOPMENT APPROPRIATIONS
ACT, 2002

Mr. SESSIONS, from the Committee
on Rules, submitted a privileged report
(Rept. No. 107–114) on the resolution (H.
Res. 180) providing for consideration of
the bill (H.R. 2311) making appropri-
tations for energy and water develop-
ment for the fiscal year ending Sep-
tember 30, 2002, and for other purposes,
which was referred to the House Cal-
endar and ordered to be printed.

RECOGNIZING THE YOUNG
MEN'S CHRISTIAN ASSOCIA-
TION (YMCA) ON ITS 150TH
ANNIVERSARY

Whereas 2001 is the 150th anniversary
of the Young Men's Christian Association
commonly referred to as the YMCA in the
United States;

Whereas YMCA programs, including the Boy Scouts of Amer-
ica, the Camp Fire Girls, the Negro National
Baseball League, the Gideons, and the Toast-
masters;

Whereas YMCA programs inspire a spirit of
dedication and challenge to individuals to learn
new skills, try new activities, and explore
other cultures, while being good citizens of
their communities;

Whereas the YMCA was founded in 1844 to
serve soldiers at home and abroad;

Whereas the YMCA has been active in
supporting and leading other non-profit
organizations, particularly in the areas of
health, education, and social services;

Whereas the YMCA is the largest child care
provider in the United States;

Whereas the YMCA is widely recognized
as one of the nation's most respected
organizations;

Whereas the YMCA is a leader in
volunteer-based, volunteer-led activities;

Whereas the YMCA is a leader in
advocacy for justice, peace, and
humanity; and

Whereas the YMCA is a leader in
environmental sustainability;

Now, therefore, be it

Resolved by the House of Representa-
tives of the United States, in
Congress assembled, That the Congress—

(1) honors the Young Men's Christian Asso-
ciation (commonly referred to as the YMCA)
for 150 years of building strong youth, strong
families, and strong communities in the
United States; and

(2) expresses support for the continued
work of the YMCA during the next 150 years.

The SPEAKER pro tempore. Pursu-
ant to the rule, the gentleman from
Nebraska (Mr. OSBORNE) and the gen-
tleman from New Jersey (Mr. PAYNE)
each will control 20 minutes.

The Chair recognizes the gentleman from
Nebraska (Mr. OSBORNE).

Mr. OSBORNE. Mr. Speaker, I ask
unanimous consent that all Members
may have 5 legislative days within

GENERAL LEAVE

Mr. OSBORNE.
which to revise and extend their remarks on H. Con. Res. 172, as amended.

Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring to your attention House Concurrent Resolution 172 to the floor. This concurrent resolution recognizes and honors the Young Men's Christian Association, commonly known as the YMCA, on the 150th anniversary of its founding in the United States.

YMCA's are very much a part of the American landscape and history. The organization began in London, England, in 1844. And in 1851, the first YMCA in America was established in Boston, Massachusetts. The YMCA's presence in America has grown steadily to serve nearly 18 million individuals, including 9 million children annually.

I imagine many of us have participated in or benefited from YMCA's services. Over time, the YMCA has been associated with programs, including youth camping and the creation of after-school sports and activities. Additionally, by the late 1990s, YMCAs were providing daycare for half a million children annually. The YMCA has provided learn-to-swim programs and has been connected to pools and aquatics for many years.

Throughout all of these programs, the YMCA promotes the values of caring, honesty, respect and responsibility. Its commitment to these values can be seen in its history of wartime service dating back to the Civil War, its commitment to the physical and spiritual well-being of the poor and unemployed during the Depression, and its current efforts to teach and reinforce good character in youth through after-school sports and activities.

Mr. Speaker, I am pleased to congratulate the YMCA on the anniversary of their 150 years of existence in America. They have a long history of exemplary service, and I believe we all benefit from the YMCA's existence.

Mr. Speaker, I reserve the balance of my time.

Mr. PAYNE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in celebration also of the 150th anniversary of the YMCA's founding in America. The organization has a special place in my heart, because I had the privilege to serve as the president of the National Council of YMCAs of the USA from 1970 to 1973 and have been involved with the organization most of my adult life, beginning with my teaching career in the late 1950s. Newark's combined YMCA and YWCA is the longest established part of all aspects of our community. In many ways, the history of the local YMCA is a perfect example of the support and stability that Ys around the globe have provided for 150 years to the world.

It seems appropriate tonight to reflect back on many years of successful involvement and rich history this organization has shared with individuals through all parts of the world.

Mr. Speaker, at this point I would like to highlight the route this institution has taken to reach this extraordinary anniversary. The YMCA was founded in London, England, on June 6, 1844, in response to unhealthy social conditions arising in big cities at the end of the Industrial Revolution, roughly 1750 to 1850. The Industrial Revolution took place in Europe.

Growth of the railroads and centralization of commerce and industry brought many rural young men who needed jobs into cities like London. By 1851, an YMCA in Britain was founded with a combined membership of 2,700. That same year, the Y arrived in North America. It was established in Montreal on November 25, and then in Boston on December 29 of that year.

The YMCA expanded throughout the United States. In 1853, the first YMCA for African Americans was founded right here in Washington, D.C., by Anthony Bowen, a freed slave.

The next year, the First International Convention was held in Paris. At that time there were 397 separate YMCAs in 7 Nations with 30,369 members in total.

Then by 1866, the influential New York YMCA adopted a fourfold purpose: the improvement of the spiritual, mental, social and physical conditions of young men.

In those early days, the YMCAs were run almost entirely by volunteers. There were a handful of paid staff members before the Civil War who kept the place clean, ran the libraries and served as correspondent secretaries. But it was not until the 1880s, when the YMCA began putting up buildings in large numbers, that most associations thought they needed to have some full-time employees.

Today's YMCA movement is the largest not-for-profit provider of child care, and it is larger than any for-profit child care at a YMCA each year. In 1996, child care became the movement's second largest source of revenue after membership dues.

Tonight we celebrate the many years of positive change the YMCA has had on our neighborhoods, towns, States and countries. My local YMCA, in Newark, New Jersey, opened its doors in 1881. Since its inception in 1881, the Newark Y has been an integral part of the Newark community.

The programs offered by the YMCA and YMWCA assist Newark residents in their day-to-day lives. For example, the YMWCA has affordable and safe housing options, in addition to state-of-the-art fitness facilities and educational programs.

We must continue our commitment to the YMCA to make it continually strong. As my colleagues know, the triangle of the YMCA, the symbol of the Y stands for the mind, the body and the spirit. We talk about the whole person that must be developed in order for that person to take their rightful place in our society.

And so we would like to acknowledge that the YMCA of the USA in its 150 years of service has been a tremendous asset to this country, as they celebrate this 150-year anniversary this weekend in New Orleans, where people from all over the United States and the world will be celebrating in this great achievement and activities.

We have been fortunate in our own city of Newark today in our city of Newark have come up through the YMCA's programs of youth and government and Model United Nations and trips abroad and work programs, and so it is with that spirit that I stand here proud to commend the YMCA on 150 years.

We wish them continued success in their work.

Mr. Speaker, I reserve the balance of my time.

Mr. Osborne. Mr. Speaker, I yield 5 minutes to the gentlewoman from Maryland (Mrs. Morella).

Mrs. Morella. Mr. Speaker, I thank the gentleman from Nebraska (Mr. Osborne) for yielding the time to me.

Mr. Speaker, I rise in strong support of H.Con.Res. 172, which I introduced with the gentleman from New Jersey (Mr. Payne), my colleague, to honor the YMCA.

150 years, YMCAs have touched the lives of communities across our Nation by pioneering so many activities that we value; camping, public libraries, night schools, swimming lessons, lifesaving courses and teaching English as a second language. Over 2,400 volunteer-based YMCA programs across this Nation dedicate themselves to building strong youth, strong families and strong communities.

In fact, YMCAs partner with local schools, hospitals, police departments, juvenile courts and housing authorities to incorporate the needs of their own communities into the programs that they offer.

In my district, Montgomery County, Maryland, the YMCAs are invaluable to parents through both after-school care and summer camp programs. My constituents can avail themselves of programs at the Bethesda-Chevy Chase YMCA, Silver Spring YMCA, the Upper Montgomery County YMCA, and Campmeta, an exemplary summer camp.

Horizons is a good example offered at the Bethesda-Chevy Chase YMCA of a program that really works. This coed
program assists young people to develop more self-esteem, self-control and improved relationships with people their own age. Youth who take part in Horizons develop self-reliance skills and experience what it means to excel.

Today over a quarter of the Nation’s families are headed by single parents.

\[1945\]

YMCA is often a helping hand, providing athletic activities, substance abuse programs that also deal with prevention and volunteer programs to increase the involvement of youth in community service. As the country’s largest provider of after-school programs, the kids see the YMCA as a safe home away from home.

In addition to providing a supportive and compassionate environment for children and adolescents, the YMCA cultivates innovation and new ideas. Our most recent holiday, Father’s Day, was created by the YMCA. Quite frankly, the Boy Scouts of America, the Campfire Girls, and the Association for the Study of Negro Lives and History, those organizations began at the YMCA. Few organizations boast such creativity and responsiveness to the needs of communities around the Nation.

The YMCA not only charters new programs, but enters into partnerships with other organizations. Schools, hospitals, and housing authorities work closely with YMCA programs to coordinate youth activities, and millions of soldiers at home and abroad have been aided by war relief services. Such innovations and partnerships make the YMCA the largest nonprofit community service network in the United States.

The YMCA currently makes a difference in the lives of all over 17 million people. Our support for the continued good work of the Young Men’s Christian Association is vital as it has provided such a positive impact throughout the last 150 years.

I urge this House to join in honoring the YMCA for its unflagging impressive service to the United States, and I wish the YMCA well in their next 150 years of public service.

Mr. PAYNE. Mr. Speaker, I yield back the balance of my time.

Mr. OSBORNE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. ISAKSON). The question is on the motion offered by the gentleman from Nebraska (Mr. OSBORNE) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 172, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

CONGRESSIONAL RECORD—HOUSE 11965

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

ANNOUNCING THE APPOINTMENT OF MEMBERS OF THE LANDS TITLE REPORT COMMISSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. OXLEY) is recognized for 5 minutes.

Mr. OXLEY. Mr. Speaker, pursuant to authority granted by section 501(b)(1)(c) of Public Law 106–569, I am announcing my appointment of the following four individuals to the Lands Title Report Commission, established by section 501(a) of that Act: Mr. Chester Carl of Window Rock, Arizona; Mr. Louie Sheridan of Lincoln, Nebraska; Mr. Bob Gauthier of Pablo, Montana; and Mr. Francis X. Carroll of Buffalo, New York.

These individuals were chosen for this appointment due to their demonstrated experience in and knowledge of land title matters relating to Indian trust lands. The Commission, and their appointment, will expire 1 year after the Commission’s initial meeting.

The Commission is responsible for analyzing the system of the Bureau of Indian Affairs for maintaining land ownership records and title documents and issuing certified title status reports relating to Indian trust lands and, pursuant to such analysis, determining how best to improve or replace the system. The Commission is then required to report to the Committee on Financial Services of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate on its findings.

The other eight members of the Commissioners are appointed by the Senate and the President.

Mr. Speaker, I want to congratulate these fine individuals on their appointments, and look forward to their report.

ASKING CONGRESS TO HELP STOP JUVENILE DIABETES IN ITS TRACKS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. SANDLIN) is recognized for 5 minutes.

Mr. SANDLIN. Mr. Speaker, I rise today to ask the Congress to help a young friend of mine, Anna Kate Gunn. I am also asking the Congress to help over 1 million other young children in the United States suffer from the disease of juvenile diabetes.

I hold in my hand a book of children of all from over this country, all races, all creeds, all colors, all languages, faces that are looking to us to try to do the right thing, faces of other children with juvenile diabetes. Our country is too strong, it is too great, it is too powerful, and it is too rich not to help our children by stopping juvenile diabetes in its tracks right now.

The Speaker, the Juvenile Diabetes Research Foundation just concluded its 2001 Children’s Congress here in Washington. This year, 200 delegates representing all 50 States gathered to meet with policymakers to ask our support as we make decisions about legislation that will impact funding for diabetes research. Diabetes is a chronic debilitating disease that affects every organ system in the body. Type 1 diabetes or juvenile diabetes lasts a lifetime.

Those who are stricken with this disease must take insulin just to live. However, insulin does not cure diabetes or prevent the possibility of its eventual devastating affects. Those affects include kidney failure, blindness, nerve damage, amputation, heart attack, stroke.

More than 1 million Americans have juvenile diabetes. A new case of juvenile diabetes is diagnosed every single hour in this country. Diabetes shortens the life expectancy of these children by 15 years. It is the single most costly chronic disease. It totals more than $105 billion of annual health care spending in the United States of America.

Anna Kate Gunn, my young friend from Texas, came by the office today with her parents and her grandfather, Gene Stallings, a well-known sports hero, former coach of the Texas Cowboys, of Texas A&M, of Alabama, of St. Louis.

Anna Kate was diagnosed with juvenile diabetes when she was 11 months old. Now, at age 3, she endures three insulin injections a day and 8 to 10 finger pricks a day to check her blood sugar level. Without a cure for juvenile diabetes, Anna Kate will have to live with these injections, with these finger pricks for the rest of her life.

One of the funding decisions we make in Congress will be a part that involves stem cell research, a critical part of research in this area. This breakthrough research holds great promise in the cure and treatment of many diseases afflicting Americans and many disabilities including juvenile diabetes.

There are three sources of stem cells, embryonic, fetal, and adult stem cells. Each of these types of cells is very different from the others and all are needed to advance research.

Specifically, embryonic stem cell research offers hope to the more than 1 million American children like Anna Kate who suffer from juvenile diabetes. These cells have the potential to become insulin producing cells because of their unique potential to differentiate into any human type of cell. It is necessary for researchers to understand how embryonic stem cells work before they can get the full affect of the adult stem cell research.

Federal support for embryonic stem cell research is essential to the work...
that scientists are doing to create therapies for a range of serious and currently intractable diseases. By impeding embryonic stem cell research, we risk unnecessary delay for millions of patients, millions of children across this country who may die or endure needless suffering while the effectiveness of adult stem cells is evaluated.

Certainly, there are legitimate ethical concerns and issues raised by this research. However, it is important to understand that the cells being used in this research were destined to be discarded. The cells used are destined to be discarded. They are destined to be discarded. Under these circumstances, it would be tragic to waste this opportunity to pursue the work that could potentially alleviate human suffering especially in our children.

For the past 35 years, many of the common human virus vaccines have been produced in cells derived from the human fetus to the benefit of tens of millions of Americans. Clearly, there is a precedent for the use of fetal tissue that would otherwise be discarded. This is not a political issue. It is an issue of human responsibility. It is an issue of human decency. It is an issue of doing what is right by our children in this country.

Furthermore, the American public overwhelmingly supports this research. In a poll conducted earlier this year, 65 percent of those surveyed said they support Federal funding stem cell research. It is the right thing to do.

Stem cell research is still in the early stages. In order to receive the full benefits of the research, there must be additional study. Federal funding of this research ensures public oversight and accountability among researchers receiving Federal grants. These researchers will be required to adhere to strict guidelines that do not govern private research. Further, Federal funding will allow many scientists to expand the research in this critical area, thus hastening the discovery of therapies.

Mr. Speaker, we fund many worthwhile projects in the United States Congress. Surely, we can advance funds to save the lives of our children in this country.

Putting an end to public support of this research would have a devastating effect on the future of research in numerous diseases. Congress and the administration should allow this important research to continue, if not for the sake of science, for the sake of Anna Kate and children all across this country that are similarly situated.

Please remember those faces looking at us, faces looking at us in trust and in hope. We cannot let them down. Mr. Speaker, let us do the right thing by America’s children.

REINTRODUCTION OF THE PRIVATE BILL FOR THE RELIEF OF ADELA AND DARRYL BAILOR

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Indiana (Ms. CARSON) is recognized for 5 minutes.

Ms. CARSON of Indiana. Mr. Speaker, on May 8 of this year, I introduced H.R. 1709, legislation that would provide private relief for Adela and Darryl Bailor.

As my colleagues know, Mr. Speaker, private relief is available in only rare instances. I believe that the circumstances surrounding the Bailors’ case qualifies under the rules of private legislation. I believe so firmly in the importance of this case that I have introduced this legislation the 105th, the 106th, and the 107th Congresses.

The facts surrounding this case are clear and undisputed. Adela Bailor, while working for Federal Prison Ministries in Fort Wayne, Indiana, was raped on May 9, 1991 by a Federal prisoner who had escaped from the Salvation Army Freedom Center, a halfway house in Chicago, Illinois.

What makes the Bailor case special is that they were caught in a legal Catch-22. The Bailors filed suit against the Federal Bureau of Prisons and the Salvation Army which ran the halfway house to which Mr. Holly was assigned.

One of the requirements for all inmates at a halfway house is that they remain drugfree and take a periodic drug test. Mr. Holly had a history of violence and drug abuse, including convictions for possession of heroin. On May 6, Mr. Holly was called into the Salvation Army office and was told that his drug test was positive for cocaine use. Salvation Army had the option of informing Mr. Holly of the failed drug test, the U.S. Marshal was present, but chose not to. When advised of his GPO’s PDF drug test failure, Holly simply announced that he was out of here and walked through the unlocked door.

In the lawsuit, the Bailors lost on a legal technicality. The 7th Circuit Court of Appeals recognized this technicality. The technicality was that, under the law, apparently no one had true custody of William Holly. The Federal Bureau of Prisons had legal custody of Holly, but not physical custody. Salvation Army had physical custody of Holly, but not legal custody.

Recognizing that this was legally untenable, the 7th Circuit Court recommended that Ms. Bailor apply to Congress for private relief. I ask my colleagues to join in this effort to eliminate this gross injustice for Ms. Adela Bailor and Darryl Bailor.

If we believe in victims’ rights, then we have a moral obligation to provide relief for the incarceration of violent criminals accountable for such conduct.

Interestingly and profoundly, Adela Bailor is an honorably discharged Marine Corps veteran. At the time of the attack, she was helping to make this country a better place. We cannot and should not turn our back on her because of a legal loophole.

The 7th Circuit has reviewed this case fully and has made the recommendation that they apply to the Congress. Although Congress is not bound by such recommendations, Congress should give a great deference to the legal analysis by the Circuit Court which has determined that Adela Bailor and Darryl Bailor fall into an unusual legal situation.

Mr. Speaker, I urge and encourage my colleagues to sign on to a letter to be sent to the gentleman from Pennsylvania (Mr. GEKAS), chairman of the Subcommittee on Immigration and Claims, urging him to hold a hearing on H.R. 1709. We will be in the process of sending that letter next week, Mr. Speaker.

PRESCRIPTION DRUG PRICES

The SPEAKER pro tempore (Mr. KERNs). Under the Speaker’s announced policy of January 3, 2001, the gentleman from Vermont (Mr. SANDERS) is recognized for 20 minutes as the designee of the minority leader.

Mr. SANDERS. Mr. Speaker, I want to thank the gentleman from New Jersey (Mr. PALLONE) for making some of his time available to me.

Mr. Speaker, I want to tell a story tonight about what happens when an industry with unparalleled greed operates and spends huge sums of money, with the result that they are destroying the health and well-being of millions of Americans. And the industry that I am talking about, sadly enough, is the pharmaceutical industry.

Mr. Speaker, I think, as my colleagues know, millions of Americans today cannot afford the outrageously high cost of prescription drugs in this country. Some of these people will die because they are unable to purchase the prescription drugs that their physicians prescribe to them. Many of them will just continue to suffer, not being able to get the alleviation for their pain because they cannot afford those prescription drugs. Others will buy the prescription drugs by taking money out of their food budget or their heat budget and will do without other basic necessities of life in order to purchase prescription drugs.

Disgracefully, Mr. Speaker, tragically, the American people pay by far the highest prices in the world for prescription drugs. It is not even close. Several years ago, I took a number of Vermonters over the Canadian border into Montreal because they could not afford the very, very high prescription drug prices in our own country. And what we found when we went over the
June 26, 2001

Congressional Record—House

border to Montreal is that the same exact drugs, manufactured and sold in the United States, were purchased in Switzerland for $65 cents, the United Kingdom for 64 cents, France for 51 cents, and Italy for 49 cents. The same exact drugs. Meanwhile, while the pharmaceutical industry rips off the American people, causes death, causes suffering, that same industry year after year is at the top of the charts in terms of profits.

Last year, for example, the top 10 pharmaceutical companies earned $26 billion in profit. Twenty-six billion dollars. Why is it that prescription drug prices are higher in the United States than in any other industrialized country? Well, the answer is pretty obvious. The pharmaceutical industry is perhaps the most powerful political force in Washington and has spent over $200 million in the last 3 years on campaign contributions, lobbying, and political advertising. Twenty million dollars in the last 3 years in order to make sure that Congress does not lower the outrageously high cost of prescription drugs and affect their profits. Two hundred million dollars. We see that money spent. We see it in the TV ads in our homes, on our home television stations. We see it in the full page ads in the Washington papers and in papers all over this country. Amazingly, not only are they spending money on advertising, not only do they spend money on campaign contributions, but the vast majority of Members of Congress receive money from the pharmaceutical industry. The political parties receive money from the pharmaceutical industry in soft money. But even more amazing, the pharmaceutical industry has on their payroll almost 300 paid lobbyists right here on Capitol Hill. Imagine that. There are 535 Members of Congress, 100 in the Senate, 435 in the House, and they have 300 paid lobbyists, including former Senators, former Members of the House, knocking on our doors every day, saying, hey, do not do anything to lower the cost of prescription drugs. Keep our profits high, and we will make sure you get your campaign contributions.

This is an absolute disgrace to democracy and it is an outrage being perpetrated against millions of Americans who want nothing more than to be able to purchase highly priced prescription drugs. Mr. Speaker, year after year senior citizens throughout this country and those with chronic illnesses cry out for prescription drug reform and lower prices, but their cries are ignored. The pharmaceutical industry and their lobbyists defeat all efforts to lower prices. Year after year those poor people come up here, bla, bla, bla, bla, bla, and year after year every effort is defeated because the pharmaceutical industry and their money machine prevents any real reform.

Well, this year it is my hope that it will be different because Congress is going to build on our successes from the last session of Congress. Last year this Congress, in a bipartisan measure, overwhelmingly passed legislation which promised the American people that they would be able to buy prescription drugs at the same low prices as do our neighbors in other countries through a reimportation program. And that means that the United States, in the midst of a global economy, that our prescription drug distributors, our pharmacists, should be able to purchase FDA safety-inspected drugs from any country where they can get a better price. If drugs are sold in Canada for one-tenth the price, pharmacists in the United States should be able to reimport those drugs under strict FDA safety regulations.

In the House in May, the Crowley reimportation amendment, introduced by the gentleman from New York (Mr. CROWLEY), won by a 363 to 12 vote. Unfortunately, at the end of a long legislative process, loopholes were put into the overall bill last year that made it ineffective. While the language remains on the books, it has not been implemented by either the Clinton or the Bush administrations. In an increasingly globalized economy, where we import food and other products from all over the world, it is incomprehensible that pharmacists and prescription drug distributors are unable to import or reimport FDA safety-approved drugs that were manufactured in FDA approved facilities.

The pharmaceutical industry and their supporters in Congress are sending out letters right now saying, oh, this is a dangerous idea, we are going to be poisoning the American people. This is absolute nonsense. Let me briefly read from a letter that was sent to Senator Byron Dorgan on September 13, 2000 last year. And as many people know, Dr. Kessler is the former FDA commissioner, I believe under both former Presidents Bush and Clinton, and this is what he stated in his support of reimportation last year, and I quote. ‘‘I believe U.S. licensed pharmacists and wholesalers, who know how drugs need to be stored and handled, and who would be importing them under the same safeguards, are well positioned to safely import quality products rather than having American consumers do this on their own. Second, if the FDA is given the resources necessary to ensure that imported FDA approved prescription drugs are the authentic product, made in an FDA-approved manufacturing facility, I believe the importation of these products can be done without causing a greater health risk to American consumers than currently exists. Finally, as a Nation, we have the best medical armamentarium in the world. Over the years, FDA and the Congress have worked hard to assure the American public has access to important medicines as soon as possible. But developing lifesaving medications does not do any good unless Americans can afford to buy the drugs their doctors prescribe. The price of prescription drugs poses a major public health challenge. While we should do nothing that compromises the safety and quality of our medicine, it is important to take steps to make prescription drugs more affordable.’’ That is Dr. David Kessler, in a letter to Senator BYRON DORGAN on September 13, 2000.

Mr. Speaker, when the agricultural appropriations bill comes up, perhaps on Thursday, perhaps next week, the gentleman from New York (Mr. CROWLEY), the gentlewoman from Connecticut (Ms. T iliUDBFD) and others and I intend to introduce an amendment, the reimportation amendment, which is the same amendment as the gentleman from New York (Mr. CROWLEY) introduced last year that received, as I mentioned before, 363 votes. We know right now that the pharmaceutical industry’s cash register is clicking overtime. Their lobbyists are all over Washington trying to scare Members of Congress so that they will not pass this legislation. But I believe that when Members of Congress go into their hearts and when they listen to the seniors and the other people back home who are sick and tired of paying...
Mr. Speaker, fortunately, the other body by Senator MCCAIN, Senator KENNEDY, and Senator EDWARDS, and that has been introduced in the House by the gentleman from Iowa (Mr. GANSEK) and the gentleman from Michigan (Mr. DINGELL).

These are bipartisan bills, but I need to point out that the thrust of the bills is from the Democratic side, because though there are some Republicans that are playing a key role on these bills, the Republican leadership has refused to bring them up in either House, or to support the Dingell bill, the real Patients’ Bill of Rights here in the House, or the McCain-Kennedy-Edwards, the real Patients’ Bill of Rights in the other body.

I will not refer to them necessarily as the Democratic bills because we do have some Republican support, but they are Democratic bills in that the Democratic leadership supports them in both Houses and the Republican leadership does not support them in either House.

Why are we talking about the Patients’ Bill of Rights and HMO reform. Two reasons. This comes from my constituents and from Americans from all walks of life. Increasingly, if a person is in a hospital, if you are in an HMO, the decision about what type of care you get, and that means whether you get a particular medical procedure, whether you can go to a particular hospital, whether you can stay in the particular hospital for a particular length of time, these types of decisions about your care unfortunately are made almost exclusively now by insurance companies, by the HMOs.

What the Democrats have been saying and what the real Patients’ Bill of Rights says is that that needs to change. That needs to go back to medical decisions, what is medically necessary for you, and that decision is made by your physician, your health care professional and you as a patient, not by the insurance company. That is the one major change, and the one reason for reform with regard to HMOs that the Patients’ Bill of Rights seeks to accomplish.

The other major issue and the other major change is the fact that today in HMOs, if a decision is made about what type of care you get, and you do not agree with that, in other words you have been denied the care that your doctor and you feel is medically necessary, you do not have any place to go. You can file a grievance with the HMO; and they will review it and say sorry, we made a decision, and we are not going to change it.

What the Democrats would like to see, what the Dingell-Ganske bill would do is that around and say if you want to seek a redress of grievances because you feel you have been improperly denied care, you can go to an external review board, an independent review board outside of the HMO, and they will review that decision by the HMO. They have the power to overrule it if they think that care was improperly denied and you need the care that your physician says is necessary.

Failing that, in certain circumstances you would be able to go to court and bring suit so you could have the decision of the HMO turned around, or you could even be granted damages if you were seriously injured and it was too late to correct your situation; or God forbid, you died, your estate could sue for damages.

Now, those two things, those two basic theories, the decision about what kind of care you get is made by a health care professional, not by the insurance company, and that you have some place to go to right that wrong and to turn that decision around are really at the heart of the Patients’ Bill of Rights.

Mr. Speaker, I want to talk about some of the specific things that the Patients’ Bill of Rights will do which I think are important on a few that apply to patients, and then I want to mention a few that apply to doctors, because I think as you know, the doctors now under HMOs feel that they cannot even practice medicine.

There are a lot of restrictions on what they can do, so the decision is important for the doctors as well as for the patients.

One area is access to emergency room care. The Patients’ Bill of Rights allows patients to go to any emergency room of a medical emergency without having to call a health plan first for permission. Emergency room physicians can stabilize patients and begin to plan for post-stabilization care without fear that health plans will later deny coverage.

This is a big concern that patients have. I get chest pains, I think I am having a heart attack. I cannot go to the hospital that is down the street, I have to go to one 150 miles away. I may have damages because I have to go to an emergency room so far away. That makes no sense. We reverse that and say if you feel, if the average person feels by having severe chest pains they
The Patients' Bill of Rights ensures that patients who suffer from a chronic condition or require care by a specialist will have access to a qualified specialist. If the HMO network does not include specialists qualified to treat a condition, such as a pediatric cardiologist for, for example, to treat a child's heart defect, it would have to allow the patient to see a qualified doctor outside the network at no extra cost. The Patients' Bill of Rights also allows patients with serious ongoing conditions to choose a specialist to coordinate care or to see their doctor without having to ask their HMO for permission before every visit.

The Patients' Bill of Rights also allows direct access to an OB-GYN. It allows the woman to have direct access to OB-GYN care without having to get a referral from her HMO. Women would also have the option to designate their OB-GYN as their primary care physician. This is very important to women.

Finally, and there are so many other patient protections, and I just want to mention a few because I want everyone to understand how important these patient protections are, the Patients' Bill of Rights says that needed prescription drugs would be available to patients. Currently, many HMOs refuse to pay for prescription drugs that are not on their preapproved list. As a result, patients may not get the most effective medication needed to treat their condition.

The Patients' Bill of Rights ensures that patients with drug coverage will be able to obtain needed medications even if they are not on the HMO's approved list. If your plan does not include drugs, we are not saying that you are going to get it. But if your plan includes drugs, they cannot limit you to their preapproved list of medications.

Let me talk about some of the ways in which the Patients' Bill of Rights, the Dingell-Ganske bill and the McCain-Kennedy-Edwards bill, free up doctors to practice medicine, because many times they feel that their hands are tied. My point is what I originally said, is that accountants and insurance company executives and staff should not be making medical decisions. It is the doctor who should be able to make medical decisions.

What the Patients' Bill of Rights says is that it prohibits insurers from gagging doctors. Patients have a right to learn from their doctor all of their treatment options, not just the cheapest. McCain-Kennedy-Edwards bill prevents HMOs from interfering with doctors’ communications with patients. Doctors cannot be penalized for referring patients to specialists or discussing costly medical procedures. People do not understand that a lot of Americans are in HMOs where they say that the doctor cannot talk to you about a preferred method of treatment. If the insurance plan does not cover a particular procedure, then they can tell the doctor that he cannot talk to you about it even if he thinks that you need it. That is the gag rule. We have eliminated it.

The Patients' Bill of Rights allows doctors to make the medical decisions. It says that the insurance company bureaucrats will basically decide what kind of medical care you get. HMOs are prevented from inappropriately interfering with doctors’ judgments and cannot mandate drive-through procedures or set arbitrary limits on hospital lengths of stay.

In addition, doctors and nurses who advocate on behalf of their patients will be protected from retaliation by HMOs. There are many patient protections in the Patients' Bill of Rights. I am not going to go into all of them tonight, Mr. Speaker. Suffice it to say the main thing is the idea that doctors will make decisions, not the insurance company; and there is some way to appeal that decision outside of the HMO.

Mr. Speaker, I wanted to go into some other areas that relate to the Patients’ Bill of Rights because we know that the other body is considering it. They have done so for about 10 days, and we are hoping that it will come to the House of Representatives eventually. Some of the arguments that are being used now against the real Patients' Bill of Rights, the Democratic bill, are that a lot of States have already enacted legislation that would protect patients, and so it is not really necessary for the Federal Government to act. I hear this from time to time.

My State of New Jersey has actually passed a fairly strong patient protection act. Some people say we have it in New Jersey, or maybe we have an option to designate their OB-GYN as their primary care physician. There is an article just a couple of months ago in one of my local papers, the Home News Tribune, an editorial, that advocated for a Federal Patients' Bill of Rights because it said that it is very difficult in New Jersey to sue if you have been denied care.

That is just another example, even in a State as strong as New Jersey, where we need some Federal action.

I wanted to talk about two other things tonight, Mr. Speaker, two other areas related to the Patients’ Bill of Rights, before I yield back the balance of my time.

One is that I know that in the other body, efforts are being made to weaken the Democratic proposal, the McCain-Kennedy-Edwards bill, through amendment. Fortunately, those efforts have failed. We think it is significant, and it shows that even though this is primarily a Democratic bill, that we clearly have enough Republicans now that are coming over with us on these
key amendments that we are forging a bipartisan coalition to support the real Patients' Bill of Rights regardless of the fact that the Republican leadership opposes the bill.

The two amendments that came up within the last week, I think, are significant. One of the amendments which was defeated by a vote of 56 to 48 was opposed to exempt employers from health care lawsuits in every situation. Now, this has been a major point of contention, because some people say, well, the problem with the Patients' Bill of Rights is that employers may be sued. What we have said is there is a very limited situation where employers can be sued and that is only if they have taken direct responsibility and have been directly involved in the decision of what type of care you should get. But the Republicans, in their amendment, just to say that they could not be sued under any circumstances. I think that is wrong. I was glad to see that this amendment was struck down. I think actually that took place today in the other body, the Senate.

The other amendment which I believe was defeated last week related basically to tax breaks. This was a Republican proposal to add a provision speeding up tax breaks to cover costs of health insurance for the self-employed. I mention that, although it may not be as obvious why that is a bad thing, because what we have seen in the past, and this is what happened in the House of Representatives last year when we took up the real Patients' Bill of Rights, is that there was an effort to try to add all kind of things to the bill, what I call poison pills, to load it up with all kinds of unrelated ideas, if you will, or proposals so that it would never pass.

What really happened last year is that the Republican leadership was fairly successful, in that even though we passed a good Patients' Bill of Rights in the House of Representatives, they put in all these poison pills, related to tax breaks, related to malpractice, related to medical savings accounts, and so that when the bill went to conference between the two Houses, it was virtually impossible to get a bill out of conference. But I believe that is only because of all these poison pills, added provisions, loading down the Patients' Bill of Rights so that it could not pass and was not a clean bill. We do not want that to happen again.

I have been very happy with what is happening in the other body because it is clear that we have a majority, albeit a slight one, between most of the Democrats and a few Republicans to try to have a bill that clearly will shift the burden so that decisions are made by doctors and there is a real way of redressing your grievances and, on the other hand, not loading this bill down with all kind of extraneous material so we can never get it out of conference and to the President's desk.

But the event that occurred today that was disturbing, and I think I need to speak out on it because I need to expose again what the Republican leadership this time in the House is trying to do, is that the Republican leadership in the House, which so far has refused to bring up the real Patients' Bill of Rights, will not have it go through committee, will not bring it to the Committee on Rules, will not bring it to the floor, as the Republican leadership has unveiled their own HMO reform bill which, of course, you know, they are going to call the Patients' Bill of Rights, but it is not the real Patients' Bill of Rights. It is not the bill that has already passed the House, that is now being considered in the other body, that is the support of almost every Democrat about a third of the Republicans.

I want to talk a little bit, if I can this evening, Mr. Speaker, about why this latest House Republican leadership proposal cuts off the mustard and is just a subterfuge to try to kill the real Patients' Bill of Rights, because what I think is going to happen is that the Republican leadership when we come back from the July 4th recess is going to try to bring up an alternative version of this bill that basically what they are trying to do is sort of outbest what the other body is doing. They know that the other body is likely to pass a real Patients' Bill of Rights, and they want to bring up a fake one here in the House that the majority of the Democrats, almost all the Democrats and even about a third of the Republicans are opposed to.

We will see what happens, but I think that we need to expose what is happening here and how this latest bill which was much heralded today by the Republican leadership really does not accomplish the major goal of the real Patients' Bill of Rights, which is to switch the decision about what kind of care you get to your doctor and you rather than the insurance company and that allows you to basically appeal a denial of care to an independent body outside of the HMO and ultimately to court if you do not have a fair shake.

Speaker, I just want to say, I know that every night this week the Democrats are using our time during Special Orders to draw attention to the Patients' Bill of Rights and why we need to pass the real bill here in the House and also in the other body. Last night we had Members of the Texas delegation get up, and I thought that was very significant because, as you know, President Bush said during the course of the campaign that he would sign a bill that was like the Texas law. Frankly, they think it is a fake one. By the way, the McCain-Kennedy-Edwards bill, the real Patients' Bill of Rights, is exactly like the Texas law. Yet now President Bush says he will veto that bill and he does not find that bill acceptable and is asking for something else. I think that is not the commitment he made during the campaign. It was not the commitment he made when he was Governor. And it certainly is a commitment that he should keep and hopefully if we send him the real bill, he will sign it even though he is now threatening to veto it.

The second thing I wanted to say is that tomorrow night, the Democrats...
will have some of our Members who are health care professionals, who are nurses and who are other types of health care professionals, taking to the floor.

The reason we are doing that is because I think that oftentimes it is the people that are in the health care profession, the doctors, the nurses, the technicians, these are the people that understand, I think, oftentimes even more than the patients, why it is important to have a real Patients’ Bill of Rights, because they want to take care of their patients. They want to make sure they get the proper care and the care they deserve. They do not want monetary or other considerations, the bottom line, to dictate the quality of care for the average American. We will be here as Democrats every night this week and also return on the July 4th recess to bring up the point that the real Patients’ Bill of Rights must pass. It is the highest priority of the Democrats in both Houses, and we are determined to see it through.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. KENNS). The Chair would remind Members not to characterize Senators or Senate action.

ADDRESSING THE NATION’S ENERGY NEEDS

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, the gentleman from California (Mr. RADANOVICH) is recognized for 60 minutes as the designee of the majority leader.

Mr. RADANOVICH. Mr. Speaker, I would like to take the time that I have that I have been most graciously given to begin to talk about our Nation’s energy needs and the national energy policy that has been put forth by the new administration, by President Bush, and the information contained in the National Energy Policy Development Group’s report on national energy policy.

I want to commend the administration for taking the leadership on what is a real challenging issue, and that is, providing energy for America’s needs. Being from California, they are urgent needs now and also for the energy needs in the Nation for the future. It is a daunting task and one that needs to make up for a lot of lost time because there has not been a lot of focus on our Nation’s energy needs in the last 8 years. So although it may not be popular at times, I want to commend the President for the excellent job that he is doing by tackling such difficult issues.

Why do we need an energy policy? If I may take just a few minutes to outline, it is because America faces its most serious energy shortage since the oil embargoes of the 1970s. Our fundamental imbalance of supply and demand has led to this crisis. Our future energy needs far outstrip present levels of production. Right now, United States energy needs are 56 percent dependent on other countries supplying that need. With that need growing at an ever-increasing rate, we become far more dependent on rogue nations that do not have the best interests of the United States at heart and in many, many ways leave ourselves very vulnerable. I think that it is high time that this policy has been sought after, and I applaud the President for taking steps in this direction.

Last winter, heating bills for many families in the United States tripled. Average natural gas heating costs in the Midwest rose by 73 percent last winter. New Englanders’ heating bills jumped by about 27 percent. Millions of Americans are dealing with rolling blackouts, including myself and brownouts and grayouts and threatening their homes, businesses, families and their own personal safety. Low-income Americans and seniors have been the hardest hit. While energy costs typically represent only about 4 percent of a middle-class household budget, last winter costs for average low-income households were about 14 percent of the household budget.

Drivers across America are paying higher and higher gasoline prices. In 2000, fuel prices on average rose 30 to 40 cents per gallon from a year earlier. This summer in some parts of the Nation, gasoline prices may skyrocket to prices of fertilizer by 90 percent since 1998.

I can read a lot of the talking points on this about a national energy policy, but I think I can speak from the heart being from California and dealing with our energy crisis and the blackouts that we have. Many, many people say that California is an example of how not to deregulate and because of that they face rolling blackouts. Gratefully and thank God there was no direct loss of life attributed to the blackouts that we have had so far, but there is no guarantee that we will not face them in the future because of the dramatic increase in energy needs in California and the lack of California’s ability to meet those needs through increased power generation.

There has not been a new generation plant in California in the last 10 years. So many, many people buried their heads in the sand and this type of increased population was not going to have an effect on the infrastructure of California, when indeed, of course, it did, and it caught up with us in the form of these blackouts.

I do commend the President for his desire to want to piece this thing together and diversify our energy base so that we are not so reliant on natural gas.

I have with me today a dear friend. My mom was born in his district in Arizona. The gentleman from Arizona (Mr. HAYWORTH) is here also to speak on the President’s national energy policy, and I would like to yield him some time.

Mr. HAYWORTH. Mr. Speaker, I thank my colleague, the gentleman from California (Mr. RADANOVICH), for scheduling this hour to discuss the challenges at hand, and whether one resides in Maricopa County, California, Maricopa County, Arizona, or Mecklenburg County, North Carolina, or Mecklenburg County, Virginia, for that matter, from coast to coast and beyond, in our 50 States we are confronting a serious challenge. We need a comprehensive policy, the type drafted by this administration, because we have reached a point where we must realize that this challenge is multi-faceted.

We cannot conserve our way out of it. We cannot drill our way out of it. Instead, we need a calm, confident reassessment of where we are headed.

Mr. Speaker, as I stand here in the well of the United States House of Representatives and I yield just behind me here to this podium, I am acutely aware that 40 years ago Jack Kennedy stood there and challenged this Congress and challenged this Nation to put a man on the moon and bring him safely back to Earth before the decade of the 1960s was completed. We were able to do that; a triumph of technology, yes, but a triumph of will and the human spirit. It will take that kind of commitment. Just as we brought together the best minds and the most innovative companies to put a man on the moon, so, too, we need a national, organized effort, a strategic and financial partnership between business and government to solve the energy problems.

Am I talking about a State plan, excessive regulation program? Of course not. We need to find a reasonable, rational way to put the best minds in this country to work on this program, to take what is valuable from business, to take the strategic planning that should be part and parcel of our constitutional Republic and form a good partnership to solve the energy challenges we face.
Quite simply stated, we need less dependence on foreign oil and more attention to developing our own energy supply here in the United States.

My colleague, the gentleman from California (Mr. RADANOVICH), summed it up. It is worth noting and amplifying. Early in the 1990s, the oil and gas needed by the United States, the majority of that oil and gas was produced within the borders of the United States. Some 60 percent was produced here in this United States. Foreign suppliers accounted for a distinct minority, some 40 percent. Sadly now, at the dawn of a new century, with almost a decade devoid of any energy policy, with almost a decade of the sweet by and by and we will take our risks and we will not worry about this, the situation is completely reversed. We now depend on foreign sources for almost 60 percent of our oil and gas. Simply stated, a reasonable, rational environmentally-sensitive policy of exploring for more American energy is something that forms the foundation of what we need to guarantee an uninterrupted supply of energy when we need it.

It goes beyond that, as important as those products are, because when one thinks of the challenge of energy, when one thinks of what my colleague pointed out, we are talking ultimately not only about the process of exploring and ultimately consuming energy, but there is an impact to the pocketbook. The most immediate effect we think about and associate with across the country is the price at the pump. We need to have a situation where we are no longer dependent on the Organization of Petroleum Exporting Countries, otherwise known as OPEC.

Here is one of the ironies at the outset of this conversation, Saddam Hussein's Iraq, a nation which threatened the stability of its neighbors, attempted to invade and occupy another oil-producing state, Saddam Hussein's Iraq, a country in the early days of this administration where American war planes carried out a raid in part to try and disrupt the fiber optic sophisticated air defense systems now being installed, here is the irony, Mr. Speaker, because of the lack of a cohesive, coherent energy policy, we now import more oil from Iraq than we did prior to the Persian Gulf War.

Mr. RADANOVICH. Mr. Speaker, I want to take the example of the gentleman from Arizona (Mr. HAYWORTH) and put an environmental approach to it, because I am in the Congress continually amazed about the hypocrisy of the extreme environmentalist movement in this Nation. I really believe that the current style of environmentalism in the United States will end when one cannot get water out of a faucet or one cannot get light out of a light switch. People tend in the United States to be very environmental everywhere else but their own backyard, and when emergencies hit like this, there is a change in perception about what we ought to be doing.

Mr. HAYWORTH. Mr. Speaker, I can't think of another approach, I think, that has led to a lot of this Nation's energy crises. It has been at the local levels of government, all across the country, but it has also been fueled a lot by the extreme environmental movement that basically puts the environment over human life, and the priorities thereof.

The reason why I wanted to bring that up, when the gentleman was mentioning this is, does the gentleman think that the environmental policies that regulate oil exploration in Iraq are much more stringent in the United States? I do not think so. Yet the United States uses 25 percent of the world's energy and only has 2 percent of the planet. In 1976, I did this. I do not know what the number is of that 2 percent that is locked up, but I guarantee it is a very, very high percentage.

We are such hypocrites in this country because we demand to use so much energy, and yet we refuse to use our own resources, where if we did that, energy demand would be much more environmentally responsible than in a Third World country.

Mr. KINGSTON. Mr. Speaker, will the gentleman yield?

Mr. RADANOVICH. I yield to the gentleman from Georgia.

Mr. KINGSTON. Mr. Speaker, I wanted to add to that point that in Russia, and I was recently in Russia, their pipelines that transport the oil, they actually use it for oil transportation as much as trucks, but they spill the equivalent of an Exxon Valdez-type spill every week just in transporting their oil.

Here we are, we could help them through aid programs trying to get these pipelines improved, which would help the environment but also our energy supply, and the gentleman said we have the best, the strictest environmental regulations in the country, and yet our environmental policies, our radical environmental policies, want to continuously pick on America.

It is interesting that in 1976, in Louisiana, that is when the last oil refinery was built in the United States of America. The gentleman was cranking up his eight-track player by the time they opened that one up. In fact, the gentleman's eight-track player was probably already getting dated. The gentleman's slide rule was gone, and he was not driving his Ford Maverick anymore. That is how long ago we are talking about.

Now, unfortunately, radical environmental politics, now there are 8,000 environmental groups in the country. They generate something like $3.5 billion a year in terms of checks and revenues to them. The Sierra Club out in the great State of California pays something like $57,000 a month just on rent in San Francisco. That is how big we are talking about. So we approach so many of these things emotionally to the extreme degree that we end up worshiping rather than what are we going to do to have a good, balanced approach.

Our great friend Kelly Ann Fitzpatrick talks about a poll that says if the people in America are polled, 87 percent say they want clean air. Her question is, who in the heck are the other 13 percent? What is going on here?

We want a balance. We want clean air, clean water. We want energy-efficient cars. That is a given. It is extremely important.

At this point America is not ready to throw in the keys to their internal combustion engines and say, okay, we are all going to start riding bicycles. So let us keep the supply up for gasoline.

Mr. HAYWORTH. Mr. Speaker, I cannot help but think of the distinction here. It seems that to the cynic so much of what transpires politically is third-hand. We heard in the preceding hour, and I was especially struck by our colleague, the gentleman from New Jersey (Mr. PALLONE) on another matter, just dealing with misinformation and demonization rather than solutions. It seems to me especially on this topic, which touches every American, perhaps we should pledge ourselves not to an extremist environmentalism, but to an enlightened environmentalism; not to a radical environmentalism, but to the environmentalism of the elite, but to the environmentalism of the enlightened.

Our President has made sense of this because he says, Mr. Speaker, that one has to look at this as an either/or. It is not, we will have a clean environment, or we will burn fossil fuels. It is not, we will have clean air, or we will commit to motor vehicles. Indeed, there is an enlightened approach that uses the latest scientific data for clean-burning energy; for environmentally-sound exploration. Though it may not be commensurate with the theatrical politics of demonization and misinformation that drives some of the eco campaigns my colleagues talks about, it is what we should do because it is the right thing to do, to provide for our economy, but at the same time protect our precious environment.

Mr. RADANOVICH. Mr. Speaker, I would like to applaud the President for just the very reason that the gentleman just mentioned, because he is taking a leadership role on this issue. The polls came out the other day in the front page of the New York Times that he is slipping down now to 53 percent. Whether one agrees with that or not, I can see where a President like this has the leadership and the desire to want to improve America, to upset a few
people and ruffle a few feathers just to make things different for our country and better. I think that is what real leadership is, and that is why I want to applaud the President for doing that.

The person who spoke recently was the gentleman from Georgia (Mr. KINGSTON), a wonderful representative of that State.

We are joined now by the gentlewoman from New Mexico (Mrs. WILSON), and I would yield to her at this point.

Mrs. WILSON. Mr. Speaker, I want to thank my colleague, the gentleman from California (Mr. RADANOVIĆ) for yielding me the time.

Mr. Speaker, I had the privilege of having supper tonight with two friends from Roswell, New Mexico, who are in the oil and gas business. They are second- and third-generation members of their families who are in the oil and gas business. I represent the State of New Mexico, which is one of the country’s providers of oil and gas and uranium and coal. We provide the fuel that lights the lights across this country.

I think all of us understand that we have an energy problem in this country. It is toughest in the West, but it affects us all, whether it is the price of gasoline at the pumps or the rising price of the things that we buy in our stores that take energy to make.

I think there is a growing consensus in this country that we need a plan. We have not had an energy policy in this country for almost 20 years. We are more dependent on foreign oil today than we were at the height of the energy crisis. Fifty-five percent of the oil we consume in this country is imported from abroad, mostly from the Middle East, from OPEC.

The sixth largest source of supply for oil in this country is now Saddam Hussein’s Iraq. Most Americans do not know that, know how dependent we are for our energy security on countries abroad.

California also got itself into a real tough spot over the last decade. Their growing, robust economy required about 10,000 more megawatts of power, but they only built 800 megawatts of supply.

I spent Sunday afternoon in the East Mountains that are right up against the city of Albuquerque. One of the reasons why I love being New Mexicans is we love the great outdoors. We love taking our children there. We love the beauty of the land in New Mexico. I know my colleagues would disagree, but I happen to live in one of the richest energy States in the Nation, but I also live in the most beautiful State in the Nation.

Mr. KINGSTON. If the gentlewoman would yield, you have gone too far now.

Mrs. WILSON. My colleagues, I know my colleagues would disagree, but I think you understand my feeling for the place, and also my knowledge that this is not an either/or question; that if we are smart about it, we can provide the energy that we need to live life the way that we choose to live it, not damming the country that we love. I think that is the kind of policy we want to promote, which means we start with conservation.

One of the things I thought was really interesting about the President’s energy plan was some of the data that was in it. In fact, we do not take credit for how far we have come in the last 20 years in energy efficiency.

This top line in this chart shows energy use at constant energy per dollar of gross domestic product. For how much we are producing in this country.

We have gotten so much more efficient since 1972, which is the baseline year. We are using less energy per dollar of GDP.

Now, part of that is we have a more information-based economy and so forth, but we are much more energy efficient now. A refrigerator, we had to buy one recently, thank goodness my husband was at home to get it, and the refrigerator we bought uses one-third less energy than the one that we bought in 1972 that it replaced.

Our cars are more efficient and hold the promise of being even more efficient with hybrid vehicles, which will not restrict our power and our range of those vehicles. So we do wonderful things. We have made tremendous progress with conservation.

But we cannot conserve our way out of an energy problem, any more than I can feed my family just with the leftovers. You have to have the supply too. So we need to increase and diversify our supply of energy and give a balanced mix of energy.

One of the things I am concerned about is the growing reliance on natural gas. I know that a lot of folks do not know that about half of our power plants in this country actually use coal, and we are making progress on clean coal technologies. But most of the power plants on the horizon are going to use natural gas; and within 20 years, we are going to be so reliant on natural gas that we are going to have to be importing natural gas as well. Yet we only have one port in this country that can take liquefied natural gas, which gets to the third problem we have.

We have to work on conservation, we have to increase and diversify our supply, but we do not have the infrastructure in this country that is reliable and safe and gets things we need in order to have a strong energy policy. We do not have the transmission grids that we need. We do not have the pipelines that are safe enough and plentiful enough.

We have not built a refinery in 20 years in America. Our refineries are working at 97 percent capacity, which means if you have a fire or safety shutdown at a gasoline refinery, you immediately create a shortage of supply. We only have one port that can accept liquefied natural gas.

So we must address conservation; increasing supply, with responsible development of domestic supply; the infrastructure needs of the grid, finally, we have to do some government reform. It should not be possible that the Department of Interior, the Department of Agriculture, the Department of State, can make unilateral decisions that affect our energy security without having to take our energy needs into account, and the way our government is set up today they can do that. That is not right, and we need to change it.

I look forward to working with my colleagues this summer on a comprehensive energy bill that is long-term to address some of these problems.

Mr. KINGSTON. If the gentlewoman would yield, I think that you have really hit a great point. I do not want to say anything bad about the great State of California, where my mother lived and my sister lived and lots of my friends do, but I have to take on a little bit your Governor on politics, because here is a State that has grown economically, done real well, demand for electricity has gone up, and he will not increase the supply; would not permit some of the things that Mrs. Wilson has talked about that increase supply, the infrastructure.

If my hometown, Savannah, Georgia, grew, and it has been growing. As it grows we have added new hospitals; we have added new schools, we have built new roads, we have built new bridges. In fact, the State of Georgia has had about an 18 percent growth. California, I know, has had unprecedented growth. Yet as Governor Davis would do those things, he would not add on any power plants.

Now, I have to ask, common sense would say if you are going to have growth in population, certainly you have to have growth in the supply of energy. For the Governor of California to come East looking for energy, when he needs to be sitting back in Sacramento signing bills and legislation
that streamlines and simplifies regulation, it is ridiculous. He is being negli-
gence.

The Governor, I understand, is going now on David Letterman. Okay, let us be real serious about our energy policy. Going on David Letterman. It is time to put the politics aside and get back to Sacramento and do your legislation. Mr. RADANOVICH. Being the gentle-
man from California, if I may, if the gentleman would yield, I think the gentleman is right on the mark. But there was a separate issue in California that brought, I think, the energy crisis in the United States to the fore.

What the problem was in California was really a crisis in leadership in an improper reaction to a flawed deregulation bill that was passed in 1995. We began to see signs of that with this “dereregulation” of, say, 25 percent, and changes to rates at which utilities could charge consumers but put 100 percent of the energy that they were able to purchase on the spot market, which fluctuated from day to day. That is half a deregulation bill, that is not a full one. If you do not go all the way with deregulation, you do not have deregulation. It caused problems beginning in May of last year.

Mr. KINGSTON. If the gentleman would yield, does Governor Gray Davis of California think he is going to get new energy ideas from David Letterman, or is he just making a chau-
rade out of this?

Mr. RADANOVICH. I will say again that the problem in California was a crisis of leadership, and I think blurred objectives; one being a blurred objective, one objective being staying in office and getting reelected, and the other being providing for the needs of California.

Mr. KINGSTON. Has not Governor Davis received over $1 million from utility companies?

Mr. RADANOVICH. The very ones he vilified, many times they have not been able to speak to him unless it was at his own fund raisers. This is the way the whole thing worked out.

But the problem could have been solved a year ago, and I will make this point: If the Governor would have al-
lowed for a modest retail rate increase by the utilities, that percent, it would have driven down future prices; and he could have encouraged the utilities to get into long-term contracts where the wholesale price was below the retail price. We would never have been in this situation.

It was his delay in imposing a modest increase of 25 percent that, by the time he had to impose it, grew to 48 percent, and on top of that, diverting his ener-
gies to State bio-energy, the transmission lines. I give him credit, he was working for ways to get the utilities creditworthy, but his decision was de-
layed and delayed for political expedi-
cency and the fear of doing something wrong that might hurt politically. That was the crisis in California.

Mr. HAYWORTH. If your friend from California would yield, because this points up the real challenge afoot. If just one-tenth of the energy that is being utilized to engage in name-call-

ing or to go on late night television, and I do not know, do stupid gubern-
natorial tricks or whatever is going to be re-
quired, if that were utilized to help solve the problem, that is the measure of a man or woman in public office. Not posturing and preening for the cameras and issuing attack memos and spin, but working to solve the problem.

Mr. Speaker, I have to ask my col-
league from California, I heard other reports where temporary energy sta-
tions could have been placed into com-
mission on an emergency basis, where some regulations had been streamlined, but what I find amazing is that, appar-
ently, Mr. Speaker, the Governor of California said if the folks employed there do not belong to a union, why, then it was not worth opening the power plant.

Now, Mr. Speaker, whatever your feeling on the right to work or collective bargaining, it seems to me the collec-
tive need for energy outweighs the political chits called in by the union bosses.

Let me address, Mr. Speaker, my col-
league from California. Are those re-
turns true? Did the Governor say he would not allow these temporary plants to come on line, these regul-
ations to be streamlined, unless the folks were union employees at the con-
trols?

Mr. RADANOVICH. I have no doubt that that happened during the time of a year ago. Now, from a year ago to now, I think the reason it has been the hesitancy to provide leadership on the issue. Because of that, it led to a situation that could have cost the State maybe $2 billion to one that has cost the State of California $50 billion and has eaten up about a $12 billion surplus that we had last year. It really was a hesitancy to act, and an al-
legiance to labor and the environment.

Mr. KINGSTON. Let me ask the gen-
tleman, why is it that the Governor of California has enough money to come on major comedian shows like David Letterman and come out in Wash-
ington for Democratic fund raisers and come back East to raise cane about George Bush, but he does not have the time to stay at home and solve the problem? Is the problem not better solved in California, rather than blam-
ing it on George Bush, who just un-
packed his bags when the crisis began?

Mr. RADANOVICH. The solution to California's problem was within the leadership of California, in the State legislature and the Governor's office. It was clear that that is where this prob-
lem was going to be called.

After a series of mistakes, refusing to impose modest rate increases, galli-
vanting off, getting the State involved in buying power, purchasing energy for seven times more than what the utilities were able to receive for that energy, led this thing into such a pre-
cairious position that the Governor could not afford then to solve the cri-
sis. Simply because, did he then, would he be answering questions like what the heck did you do with our $2 billion surplus? So, unfortunately, the politics do not allow for the solution in California. Just know for a fact that there is no solution to this paying four to seven times more for the energy in California than what is being gathered up by the utilities.

The reason that that is happening is because it is not politically expedient to solve the problem in California. There is too much need to vilify the President, there is too much need to vilify Members of Congress, those of us on the Committee on Commerce, be-
cause then the issue becomes why did you wait so long to solve this, when it could have cost far less in money and in damage to the State?

Mrs. WILSON. If the gentleman would yield, I am a New Mexican. I have never met Gray Davis, I would not know him if he walked in the room, but I do know people want us to get down to solutions and stop the blame game and get some things done.

I think that this House over the next 6 weeks has got a strategy for dealing with the energy problem that really stresses four things, and they are the four important things for a long-term balanced approach to America's energy needs. Those include things like con-
servation, increasing supply, fixing our infrastructure and government reform. When we talk about vision, there are so many things that we can do. Sandia National Laboratory is in my district in New Mexico and has done some of the leading-edge research on energy conservation in areas that most folks do not think about.

About 40 percent of the electricity used in America is used to put the lights on. Yet we have made so few in-
novations in lighting in America, to re-
duce the use of energy in lighting. 2115

Super conductivity. That is kind of a long word, but what it really means is that when electricity goes down the wires, whether it is the transmission wires that take electricity from New Mexico to Southern California, or even just the wiring in this building that keeps the lights on, we lose electrons as it is getting to where you want it to do the job.

Mr. HAYWORTH. If some of the executives with a public service company in New Mexico told me that because California is so big and New Mexico is really kind of small in comparison as far as number
of people, we actually lose more electricity. Of the amount that we send to California, we could light up the entire State of Oregon. This is why we put in place CAIIP, for the purpose of loss in transmission. Well, if we could save that energy through superconducting materials, in other words, materials that do not lose those electrons along the way that heat up the wires in our walls or along the transmission grid, we can use that energy to actually do work and not waste it.

Mr. Speaker, we have wonderful plans for next-generation power plants that will conserve electricity and will make power plants much more efficient as they turn the raw materials, whether it is neutrons or nuclear materials or coal or natural gas, and turn that into electricity; and when we make them more efficient, we use less of that natural gas and less of that coal in order to make the electricity to light our homes. But we also have to increase supply.

I want to say something here about nuclear energy. Nuclear energy is one of the safest forms of energy. It has some of the fewest emissions of any kind of energy that we have, and it is time to take nuclear energy out of the “too-hard column” where it has languished for almost 20 years. We are going to have a hydro-licensing bill, and it will come out of the Committee on Commerce, I hope within the next month.

Hydropower is one of the cleanest powers we have, and yet there are dams in this country that have existed for 200 years and they are under State control. What most folks do not know is that as soon as you put a turbine on a dam, it comes under Federal regulators, not State law; and it is a nightmare. It takes almost 100 years to get that turbine licensed to provide power and, in the process, you can be ordered to breach your dam. So why would anyone in their right mind take the risk of putting a turbine on an existing dam that has been there for hundreds of years? And as a result, we have clean, safe energy that is going over spillways and dams in this country because we cannot get our licensing right for hydropower.

The first wonderful things we can do with clean coal technology, with natural gas, where we have natural gas on nonpark public lands that we cannot get access to because the Bureau of Land Management is no longer focused on how we steward our resources, but how to keep people off the land that we enjoy in the West.

So there are things that we will do in this House to lead the way, to stop the blame game, to give ourselves a long-term energy policy, to conserve, to increase supply, to fix our infrastructure, and to reform our government. I am very glad that this House is focusing on those things and not on politics.

Mr. RADANOVICH. Mr. Speaker, I would like to say, continuing to defend California, it was an issue of supply I think that was neutrons or nuclear energy that was not caught up with the vision. Now, we have made changes, to the point where cooling our homes, we have the opportunity to look to the sun, and solar power and solar energy on a residential basis. Just as so many Americans have their own garden in the backyard, we can look to a sound alternative form of energy with technological advancements, and, in the long run, not only save on power bills, but save on taxation too.

Mr. Speaker, we should look to those types of commonsense policies. We should never forget that the term “conservative” and “conservation” share the same root, the same notion, that we preserve in a commonsense fashion and, in so doing, free up other sources for those who need them. That is something we need to remember. Conservation plays a key role; not the only role, but an important part to play, just as we look at tax policy and new exploration and streamlining regulation.

Mr. KINGSTON. Mr. Chairman, if the gentleman will yield, I wanted to touch base with what he is saying in terms of nuclear energy and what the gentlewoman from New Mexico was saying. In France, 76 percent of the homes and buildings are powered by nuclear energy; in Belgium, 56 percent; in America, most people do not know this, it is 20 to 25 percent already, and it is safe. I represent Kings Bay Naval Base and all the subs down there are nuclear submarines; yet ironically, people in that county will say, well, I am against nuclear energy; it might be dangerous. So you have more nuclear power plants in your county than most of the States in the entire country.

Nuclear energy is safe. It is low cost, it has fewer disruptions of power. One out of every five homes in America are powered by a nuclear plant. It is the second single-largest source of energy already, and it provides almost 70 percent of all emission-free energy. This is something that we cannot ignore. There are 103 operational nuclear power plants in America today, and over 3,000 shipments of nuclear fuel that were spent were moved safely in the last 40 years.

So when we talk about nuclear energy, people need to understand that this is not some bold new frontier that we are talking about. I always hear people say, well, what about Three Mile Island? Mr. Speaker, there were no people killed at Three Mile Island. That does happen with other sources of energy, but the thing is, that was over 2 decades ago.

Again, going back to the days of the 80s, not that many years ago, another broadcaster who had gone into public office, the late Jack Williams, Governor of Arizona, at that time there was this promise of nuclear energy, but the technology had not caught up with the vision. Now, we have made changes, to the point where...
could hardly transmit a message past a couple of oak trees. Technology has moved on. Technology has moved on in nuclear power. I think that we are just fooling ourselves by not being a little more bold and aggressive about it. Again, 76 percent of the houses and buildings in France are nuclear powered.

Mrs. WILSON. Mr. Speaker, if the gentleman will yield, it is interesting, on this issue of conservation, on Saturday afternoon I was on the west side of Albuquerque visiting a housing development that is full of first-time homes and the builder, Jerry Wade of Artistic Homes, specializes in energy-efficient houses and they build it into the house. I met a family there who were buying their first home. They were moving from a rental house, and one of the reasons we can actually sell power back to the power company, if we live in a house that is energy efficient, and it was a very nice home, but Jerry Wade guarantees their electric bill will be no more than $20 a month, because they build the energy efficiency in.

One of the things that I hope to do in our conservation bill that we are going to be working on here is to make it possible for those savings to be taken into account when people apply for their mortgages, for their federally supported home mortgage loans, so that we can take into account that the electricity bill is going to be lower. The neat thing about what I saw on Saturday was, we are not talking here about something that costs more, we are talking about something that costs less, and that can be done in homes for first-time buyers, not just people who can put on solar panels on their homes.

Talking about where we are going with solar, it used to be that we thought about solar and, gosh, it takes 10 or 15 years to get back the cost of the solar panels. We are on the verge of innovations and technology that will be just as cheap to put on solar shingles on our houses as it is to put on tar paper shingles on our houses. The difference is we hook it up to the meter, and we can actually sell power back to the power company, if we live in a sunny place like my colleague from Arizona and I are privileged to do. We have solar-powered homes, and it does not power the electricity, but it helps preheat the water, it helps keep our electricity bills lower, it helps keep the gas bill lower by preheating the house and heating a bed of rocks under the House. We can do those kinds of things, and it is going to be in the very near future, we can look forward to doing that as it is to build a home the conventional way, and we should build those incentives in to the conservation bill we hope to pass here in the House.

Mr. HAYWORTH. Mr. Speaker and my colleagues, it has been very interesting to spend this hour, not engaged in disinformation or demonization, but looking for reasonable, rational solutions at the outset.

When the gentleman from California claimed this hour of time, I reminisced about the fact that 4 decades ago, President John F. Kennedy stood at the podium behind us and challenged us to go to the Moon. We harnessed not only a triumph of will and exploration, but a triumph of applying science to a rational vision to deal with that challenge. Certainly this challenge cannot be as formidable. Certainly this Nation, with the best minds at the fore, working together with sound policies that streamline regulation, to make it reasonable that look for environmentally sensitive ways to explore for new energy options, that do the research to bring online the innovative new sources of energy and that realize that our destiny is within our grasp in terms of efficiency. Certainly that can be the watchword, the vision for us. Certainly that is what the administration offers in its energy plan.

The challenge for us, Mr. Speaker, is to abandon the theater of politics where some have been so tempted to engage in name-calling and political posturing, to truly represent the American people to find sound solutions, to reject the extremism of the extremists and embrace the conservation and environmentalism of the enlightened. That is our challenge. I believe we are poised to meet that challenge, just as we put a man on the Moon in the 1960s.

Mr. RADANOVICH. Mr. Speaker, I agree with my friend from Arizona. I want also to state my admiration for this President for taking on this job. I do not envy him. I mean, I was born and raised right next to Yosemite National Park. I am excited about these fuel cells that Honda has on the drawing board right now and I am excited about the hydrogen economy.

Mr. Speaker, I am very excited that Honda has on the drawing board right now a hybrid car that will get 75 miles a gallon. I am excited about these fuel cell cars that are out there that have these perpetual batteries. I believe that our government has a role in funding such research, such general research, and we are going to continue to do that.

Mr. Speaker, I also applaud the gentleman from Arizona (Mr. HAYWORTH) for his comments and the gentleman from New Mexico (Mrs. WILSON) for your boldness in speaking out on nuclear energy, because I think it is something that Americans need to be comfortable with the dialogue.

Finally, I want to say that I think that we should continue to explore alternative uses and evaluate our own domestic resources to see what we can do to become more energy-independent and not risk our national security on the whims of Middle East dictators and kings and despots.

I thank the gentleman from California (Mr. RADANOVICH) for inviting me to be here tonight and look forward
to working with the gentleman and the rest of the Congress on some very positive solutions.

Mr. HAYWORTH. Just one note in closing, Mr. Speaker. Very soon we will move past the rhetoric, and we will have to roll up our sleeves and make it happen. The administration has put out a plan. I cannot help but think about the holiday we are about to celebrate and observe, the independence of this country. A new biography of our second President John Adams has been written. In the final year of his life and the final days, a committee of men from his home State of Massachusetts went to visit the second President, at that time his son was President of the United States, and they asked John Adams, Mr. President, would you like to put your feet to the country and the help to find? And he stood up there, stiff-legged, still the strong voice, and he offered two words: “Independence forever.” They said, Mr. President, do you want to add anything else to that? And he said, no, not a word, that suffices.

Indeed, not only in the tradition of this constitutional Republic, but for the future of a sound energy policy with an enlightened environmentalism, let that again be our cry; Independence forever.

Mr. RADANOVIĆ. Mr. Speaker, I want to thank the gentlewoman from New Mexico and gentleman from Arizona and the gentleman from Georgia for participating in this special order.

OPEC OF MILK

The SPEAKER pro tempore (Mr. SHUSTER). Under the Speaker’s announcement of January 3, 2001, the gentleman from Wisconsin (Mr. GREEN) is recognized for 60 minutes.

Mr. GREEN of Wisconsin. Mr. Speaker, we will not take all that time this evening, but I wanted to talk about a subject that probably many people out there tonight have never heard of yet and I would suggest, adversely affects millions of people.

It is something that was recently described by the Wall Street as the OPEC of Milk. It is a price-fixing cartel for milk that affects families all over the country, especially those who are least able to pay for it.

The history of the OPEC of Milk, the Northeast Dairy Compact, is somewhat interesting. Back in 1996, a small group of New England Members of Congress formed something called the Northeast Dairy Compact. The way it was authorized was not to bring it to the floor of the House or to the floor of the Senate for a vote, but, instead, they were able to sneak it into a conference committee report under an appropriations bill.

Now, their intentions were sound. They believed back in 1996 that this cartel that they created, the Northeast Dairy Compact, would, in their words, help stop the loss of family farms in six New England States by guaranteeing a minimum price for milk. That sounds harmless enough. I was not here at the time, but had I been, those sentiments are certainly ones that we all could have supported.

I would suggest to you, Mr. Speaker, and to those who are listening tonight, that those good intentions went awry a long time ago, and that the OPEC of Milk has done tremendous damage not only to our dairy system and to dairy farmers in New England and all over the country, but also to so many families who are trying to afford the great nutrition that we have in our dairy products.

The reason that this is so timely is that the Northeast Dairy Compact was due to expire in September of this year. This compact clearly could not stand on its own merits, and so we have had some of its strongest supporters, particularly Senator Jeffords over in the Senate, say he understands how unpopular it is. He implicitly understands how bad it is, but he has said that he is bound and determined to get this reauthorized, passed in September no matter what it takes.

In fact, he told the Associated Press not 3 months ago that his goal would be to “sneak it in through the stealth of the night.” And to get it through when people are not looking.”

Mr. Speaker, the Northeast Dairy Compact should die a peaceful death in September. First, it has not met its goal. It has not stopped the loss of family farms, not even in the New England States that are part of this compact. Second, as we will talk about tonight, the Northeast Dairy Compact has raised the price of milk to consumers. It is what so many people have called a milk tax.

Third, the Northeast Dairy Compact has accelerated the loss of dairy farms in other States, States like Minnesota, those whose States together have the largest number of dairy farms in the Nation.

Finally, and perhaps, in my view, most damaging, the Northeast Dairy Compact has prevented us from dealing with our dairy problems on a national basis, and we do have tremendous problems in the dairy sector. We are losing dairy farms each and every day, and we must do something, but as long as we have a policy like the Northeast Dairy Compact, which pits State against State, region against region, farmer against farmer, we will not get that national policy.

Mr. Speaker, I think it is important to understand clearly I have an interest in coming from America’s Dairyland of Wisconsin, but it is not just me, not just those in Minnesota and Wisconsin who believe that the Northeast Dairy Compact is an abomination. It is others, analysts, journalists.

Mr. Speaker, I will read from a few, the Wall Street Journal recently said not 2 weeks ago that compacts are “basically a highly regressive tax on milk drinkers, starting with school-aged children, creating them is a tacit endorsement of the OPEC cartel.”

There is the Consumer Federation of America, hardly a biased group, hardly a Republican group or hardly a Midwestern group, the Consumer Federation of America, which represents over 50 million consumers nationwide said not a month ago that regional dairy compacts give too much money to farmers who do not need the help, too little money to farmers who do need the help, and they asked consumers, especially the low-income consumers, struggling to feed their families and pay the rent to pick up the tab.

There is Americans for Tax Reform, which refers to compacts as dairy cartels.

There is the New Republic Magazine, which said that the Northeast Dairy Compact was “a system that can best be described as socialism.”

There are groups like the Council for Citizens Against Government’s Waste, which says that this is a regressive milk tax on Americans; or the National Taxpayer Union, which said that the Northeast Dairy Compact is “a cartel that no robber baron could admire.”

So it is not just folks from States like mine, Wisconsin. It is consumer groups, journalists, people really across the country, across the spectrum, who realize that the Northeast Dairy Compact was a bad idea. It has not gotten any better, and it should die a peaceful death.

Mr. Speaker, the gentleman from Minnesota (Mr. KENNEDY) for yielding to me and thank the gentleman for his leadership on this very important issue.

People may ask, how did this ever come about? How did we get this dairy some cases to allow States to work together on parklands or transportation systems or waterways; however, there is no precedent for price-fixing compacts evidenced in this situation.
This is the only case where we have allowed a region of the country to set a price-fixing compact against other regions of the country, and how this affects us is if you have excess production of milk that you do not drink with cereal or otherwise, you generally turn that into cheese. So if there is excess production in the Northeast, they convert that into cheese.

For those major milk-producing States that include Minnesota and Wisconsin, but California, Idaho, Arizona, several others, that takes away from our cheese market. In fact, the Northeast Dairy Compact was fined $1.76 million in 1998 for the extra amount of money that the USDA had to consume in buying extra production coming out of the Northeast.

They have since instituted just recently a price-fixing agreement, in the Northeast, but if you think of how un-American this is, let us just say we decided that we do not think that Michigan should be disproportionately producing so many cars, so we are going to have, the rest of the country, let us go into an auto compact where we are going to produce the autos we need outside of Michigan and let Michigan only produce the cars that they can use in Michigan.

Orange juice. What if we decided that we are going to have an orange juice dairy compact where we are going to produce our orange juice and let Florida just produce the amount of orange juice that they can consume in Florida. Or movies in California. Or you can go on and on and on. I mean, this is ridiculous. It is un-American. It undermines where we have been in the past and what has made America strong in the past; that we are one country, that we do not have divisions among States. Our Founding Fathers were very nervous about that happening.

Why we would let this happen and undermine our strong dairy industry in Minnesota, Wisconsin, the upper Midwest and other States around the country is something that is beyond me.

It is something that, if American people understood this issue, they would be against it. If they understood, not just that they were being taken advantage of as consumers, but that one area of the country is going and pitting against another area of the country’s strength, they would be uprising and saying we want to end this. Certainly we do want to end this.

I appreciate the gentleman from Wisconsin (Mr. GREEN) reserving this hour to make sure that we can help educate the American people on this subject.

Mr. GREEN of Wisconsin. Mr. Speaker, I thank the gentleman for his comments. I think that the gentleman has pointed out what may be really the greatest tragedy from the Northeast Dairy Compact. Nobody wants to help dairy farmers more than I or the gentleman from Minnesota (Mr. KENNEDY). I mean, we came from dairy States which had the largest number of dairy farmers.

It is interesting, when we were debating dairy policy last year in this House, farmers from the northeast States got up and talked about how many dairy farms that their home States, their home districts have lost. I remember a good friend of mine from the northeast exclaim that his State had lost some 200 dairy farms last year.

I would like to put things into context for a moment. In my home State of Wisconsin, by this time tomorrow, by a quarter to 10:00 tomorrow night, Wisconsin will have lost four more dairy farms. We are losing four dairy farms each and every day. Over the last 10 years, we have lost 13,000 dairy farms. In fact, as we have a State have lost more dairy farms than any other State. This is why of the gentleman from Minnesota (Mr. KENNEDY).

So no one, no one wants to do more for dairy than those of us who represent States like Minnesota and Wisconsin. But we understand that to fix dairy problems, to meet the challenges, to be successful, to be compassionate, we have to have a national dairy policy, one that works all across America.

The Northeast Dairy Compact rewards some dairy farmers. In fact, it encourages them to overproduce and harms others. It pits farmer against farmer, State against State, region and region. That cannot be good.

As I talked to farmers in my home State and dairy farmers from all across America, they understand that one cannot have a policy that pits farmer against farmer. We cannot meet our challenges if we are divided and fighting amongst ourselves.

The system that the gentleman from Minnesota (Mr. KENNEDY) described is Stalinist. I mean, I think the problem that we have had, so many of us who are so opposed to the Northeast Dairy Compact, is that, when we tell people how bad it is and we describe how it is set up, they do not believe us. They do not believe that, in America today, you could have such an absurd, illogical, irrational system. I am afraid, Mr. Speaker, it is true. Believe it or not, we do have such a system. It makes no sense. It does not work. It is, to put it kindly, a great distraction as we should be taking on so very many important issues.

Mr. Speaker, I yield to the gentleman from Minnesota (Mr. KENNEDY).

Mr. KENNEDY of Minnesota. Mr. Speaker, I would like to say that this dairy compact is kind of like salt in the wound. It is a wound that is already being put in place by an underlying milk marketing system that, again, hurts the natural dairy producing States of this country.

When in the 1930s we implemented milk marketing orders, that was designed to make sure that fresh milk was available all over the country. It may have made sense back then; but right now, it divides milk into four classes, all of which receive a different price.

One class 1 milk which we drink out of our glass gets 33 percent or more higher price than what we make in the cheese. Since we are primarily exporters of dairy, we convert about two-thirds of our production in our region into cheese; and, therefore, our farmers receive more than a third less already, just setting the dairy compact aside, for our milk production than those like the northeast that are producing primarily for fluid, milk.

So we are already being penalized by a system that we have not been able to overcome because of the resistance of people in the northeast. We are already being penalized.

Then when they have one down, the dairy compact is really piling on. It is piling on and saying, okay, you know, you are already only getting 60 percent of what we get, but that is not enough for us. We want more. We want to take more out of your income. We want to take more of your dairy farmers and put them out of business. We want to try to prop up what we have.

It really has not had that beneficial impact. They are still losing family farms in the northeast area. They are still not really having the benefits that they speak of at the same time that they are clearly penalizing us.

As the gentleman mentioned, Minnesota and Wisconsin. Many of the people I know, I live in a rural area of Minnesota called Watertown where there are many dairy farmers that go to church. I come across people who are operators of dairy farmers in the last year that I know that have gone out of business. The milk marketing orders and the Northeast Dairy Compact are to blame for that.

The gentleman’s father, I know, is in the medical profession; and the first rule they learn is to do no harm. It would be good for us as legislators to know, to do no harm.

Well, this is clearly something that harms millions of Americans, favors a very small few, and it is something that we should stand up against. It is something that Americans should stand up against.

Write your Congressman wherever they may be and say this is something I do not believe in. This is something that undermines everything that I believe about America.

I ask my colleagues to oppose the dairy compact because this is just the tip of the iceberg. We need to map here of those areas that want to go into dairy compacts. It includes just about every State in the country that is not a producer of dairy over and above

CONGRESSIONAL RECORD—HOUSE June 26, 2001

11978
June 26, 2001

As I began this evening, I said that, when this system was created, and it was, again, sort of slipped in in the dark of night in a conference committee report, it was done by some Members who really had the best of intentions. They wanted to reverse the decline of dairy farming in New England. But the sad news is it has not worked.

So I would appeal to my friends from the northeast to reexamine their support for the Northeast Dairy Compact, because if they believe that we need to take action to help dairy farmers, this is not it.

The Boston Globe last year did a really interesting study. They studied the States of Massachusetts and Vermont, and they looked at the effect of the Northeast Dairy Compact. Their study showed that, in the 2 years before the Northeast Dairy Compact was concluded, the State of Massachusetts lost 34 dairy farms and the State of Vermont lost 153.

Interestingly, though, in the 2 years after the compact went into effect, the State of Massachusetts lost 44 dairy farms, 10 more, and the State of Vermont lost 153. The compact is not working. In fact, the loss of dairy farms is accelerating.

It is interesting. If one goes beyond those two States to the entire New England region, one will see that 25 more dairy farms went out of business after the compact than in a comparable period before the compact.

What may be most painful of all and really distressing, since the most vulnerable dairy farms in America today are the smallest ones, 50 cows or less, the compact has actually accelerated decline in those farms, the small farms, those that are most vulnerable.

The Consumer Federation of America said recently that, because compacts pay farmers what they can to oppose and certainly we are still benefiting them, but they are not letting us benefit from our natural strengths.

Again, this is something that I implore our colleagues to do everything they can to oppose and certainly we will continue to try to spread the message across the land, that this is something that is un-American and should not be supported.

Mr. GREEN of Wisconsin. The gentleman from Minnesota is right that our two States have football teams that are great rivals. I guess the Northeast Dairy Compact would be like giving the Packers an extra player. Maybe we deserve it, but that is another debate. I think, though, that my good friend and colleague brought up a very important point when he talks about free and fair trade and the great emphasis that we are placing as a Nation and a people on opening up markets and on trying to promote free and fair trade. I think we understand the importance of commerce and growing this economy, what we do best, we all benefit. We all benefit from lower prices of goods. We all benefit from higher employment, higher income levels. The increased prosperity around the world has really sprung from countries opening up their markets and each focusing on what they do best.

If foreign trade is so beneficial to the world, if opening up markets with other countries is so beneficial to us, why should we have open markets with Europe, with Asia, if we cannot even have open markets with Vermont? Again, I have to go back to what you have said. When you tell people about the compact, they cannot believe it. We are used to being pitted against each other when the Packers play the Vikings, and we are used to having our rivalries; but we all come together when it comes to singing that national anthem at the beginning of our games. This does in a nonsportsman-like fashion pit one region of the country against the other in a very unfair way that undermines one region’s strength and subsidizes another region that does not have those natural strengths when in fact they have natural strengths that are still benefiting them, but they are not letting us benefit from our natural strengths.
Mr. KENNEDY of Minnesota. I will just close by saying the gentleman has talked about the broader sense of consumers, how this is hurting consumers. But this is an example, an unprecedented example of the tyranny of a minority by the majority. Those who believe in our government, those who believe in civil liberties should not idly look on as this is taking place. This is a very bad precedent for any number of other things that we are seeing around the country, just because we have fewer congressional votes here in the upper Midwest, can be penalized by another state. How can we as a country, other nations in the West, how can we in all seriousness do it if we come together. I appreciate the gentleman from Minnesota so much for joining me this evening. I offer him the opportunity if he has any final thoughts that he would like to share.

Mr. KENNEDY. Mr. Speaker, thank you for recognizing me again. I am just closing and leaving you with this statement. This is something that the gentleman who is right down the aisle, Mr. ROHRABACHER, and many of our colleagues, the aggrieved States are being overcharged in the Northeast Dairy Compact because it is a very bad precedent for any number of other things that we are seeing around the country. Just because we have fewer congressional votes here in the upper Midwest, we are being penalized by another state. How is that possible? How can we in all seriousness do it if we come together.

I appreciate the gentleman from Minnesota so much for joining me this evening. I offer him the opportunity if he has any final thoughts that he would like to share.
those they wronged. And why should they not stonewall these American heroes? The United States State Department sided with their side against that of Americans who fought and gave their lives and put their lives on the line for the United States of America in the Second World War. The State Department has taken the side of our former enemy, rather than the side of our defenders.

Dr. Lester Tenney, a survivor of the death march in Bataan and of a slave labor camp says, and I quote, "I feel as if I am once again being sacrificed by our government, abandoned not for the war effort as in the past but for the benefit of Japanese big business."

I believe Dr. Tenney has a point that deserves to be heard. In the hours following the attack on Pearl Harbor, the Japanese attacked U.S. installations in the Philippines. The United States forces retreated to the Bataan Peninsula and made their historic stand. Holding off the Japanese for months, they gave America time to regroup and to rally and to come back. Our government had to make the heart-tearing decision to sacrifice the brave heroes of the Philippines because they knew they could not save them without causing the death of many, many, many more Americans in the long run and perhaps a failure of that operation itself. So the decision was made, yes, to abandon those American heroes, tens of thousands of them there in the Philippines. MacArthur was pulled out, he was ordered by the President to pull out, and our troops were left there. They were left there, as the song of the day went, with the battling bastards of Bataan, no mama, no papa, no Uncle Sam.

After the fall of Bataan, American and Filipino troops were forced to walk more than 60 miles in the infamous Bataan Death March. These were men that were weakened already, without food, without water, and they were denied any type of help along the way. Some Filipino people risked their lives; not only risked their lives, but gave their lives in order to throw little bits of water or food to these men as they marched. For those 3 days of the Bataan Death March,

They were beaten, and they were starved as they marched. Those who fell were bayonetted. Some of those who were not walking fast enough were beheaded by Japanese officers who were practicing with their samurai swords from horseback.

The Japanese culture at that time reflected the view that any warrior who surrendered had no honor; thus, was not a fit to be treated like a human being. Thus, they were not committing these crimes against human beings. The Japanese soldiers at that time, as was mandated and dictated by their culture, felt they were dealing with subhumans and animals.

This is the history of the current Japanese generation. The Japanese for the past 50 years have had a strong democracy, at least for these last three or four decades have had a strong democracy, and the Japanese people are America’s best friends. They have a civilized country, and none of them need ever to feel like any of the talk that is going to go on about these men receiving just compensation for what was done to them at Bataan and Corregidor and then later on in the Japanese Islands of Manchuria, the Japanese people themselves are not the target.

We are not trying to make these people feel guilty. This was, after all, the culture of their day, and that culture has changed. Our America had a racist culture for many years. We had slaves in the last century, and the fact is that Americans corrected that. They paid an awful price. In the Civil War, we paid a price of hundreds of thousands, of millions of our own people, in trying to correct this evil in our society.

The Japanese people of today who admit that their country in the past has done wrong need not hang their head in shame, but it will be a shame, and it will be a black spot on the Japanese people if these crimes are covered up and if wrongdoing is not admitted. That is the only accountability the Japanese people of today have.

Those people and those corporations that worked these men as slaves, they have a legal responsibility. It is through these men who were wronged and worked as slaves by these Japanese corporations that still exist, by giving justice to these men we can close this book, and we can bring this chapter to a close. Then they can work and move on. The Japanese people need not feel guilty after that compensation and that apology is made.

In the 3 days of the Death March, 650 to 700 Americans died. They died the worst possible death. Then after enduring this hell, many of the thousands of Americans that had survived that Death March, along with other American prisoners who had been taken prisoner in other areas of the Pacific theater, they were taken, thousands of them, in so-called hell ships to Japan and to Japanese-occupied territories. Packed into cargo holds, these POWs struggled for air, for simple air, in temperatures that reached 125 degrees. It is estimated that over 4,000 American soldiers died aboard these hell ships.

Again, the Japanese treated them like animals because at that time the Japanese were taught if anyone surrenders, they are no better than an animal because they are weak.

Our POWs struggled to survive the harshest conditions imaginable. Toiling beyond human endurance in mines, in factories, in shipyards and steel mills, often under extremely dangerous working conditions, they were worked like animals. Company employees beat and starved these men, and of course, the Japanese work force was all off in the army. They used these slave laborers to make sure Japan could conduct its war effort. In doing so, they treated these men, our men, our heroes, like animals, and they starved these men. They denied them medical care. These brave heroes, Americans, suffered from dysentery, scurvy, malaria, diptheria, pneumonia and many, many other diseases, yet they were not treated, and they were permitted to die. With few rations, and many rations that were simply unfit for human consumption, they worked and they were beaten. POWs were reduced to skin and bones.

Today, many of those who survived the war effort as in the past but for the health problems directly related and tied to that time when they were worked as slave laborers by the Japanese militarists. When one hears the survivors tell their stories, they will never forget how much we owe these heroic individuals.

Frank Bigelow, 78 years old, from Brooksville, Florida, was taken prisoner at Corregidor. Mr. Bigelow was shipped to Japan, where he performed forced labor in a coal mine owned and operated by Mitsui. "We were told to work or die," Mr. Bigelow recalls. Injured in a mining accident, Mr. Bigelow had to have his infected broken leg amputated by a fellow POW. That leg was amputated without anesthetic. At war’s end, though standing 6′4″, Mr. Bigelow weighed 95 pounds.

Lester Tenney, 80 years old, of La Jolla, California, became a prisoner of war with the fall of Bataan on April 9, 1942. He was a prisoner of the Japanese, and once there, he was subjected to the Bataan Death March but was then transported to Japan aboard a hell ship. In Japan, he was sold by the Japanese Government to Mitsui and forced to labor 12 hours a day, 28 days a month, in a Mitsui coal mine. “The reward I received for this hard labor was beatings by the civilian workers at that mine,” he said. They worked him, and they beat him, and they treated him like an animal.

These are just a couple of the stories. The horrors they suffered at the hands of profit-making Japanese corporations can fill the pages of a book and, in fact, have filled the pages of many books.

Their case is clear. The facts cannot be denied. Their claims should not be dismissed or explained away, and their cause should be the cause of all American patriots, and especially should be the cause of the American Government, which they defended with their lives.

And that makes all of this more difficult to understand is why the State Department refuses to assist these heroic veterans. It is hard to fathom why the State Department was willing to help.
facilitate the claims of victims of Nazi Germany but not these victims of militarist Japan.

Certainly the Germans committed atrocities during the war. Nazi Germany was a place of horrors, and the German people have admitted it and tried to make good and tried to bring justice to these claims, and we have backed them up. We have backed them up because it is the right thing to do. We have backed up those people making the claims, and we have encouraged the Germans to move forward in this way.

There is no reason on God's Earth, there is no reason in the cause of patriotism and honor, that our government should not be assisting those Americans that were used as slave laborers by the Japanese corporations. These Americans cannot even make a suit. Bataan Death March, these heroes were worked nearly to death by these Japanese corporations. There is no reason that we should not be with them 100 percent.

Instead, they fight a lonely battle. The lawyers for the State Department are alluding themselves with these war profiteers in Tokyo against the Americans they victimized. The best legalese they can muster is being used to undercut the claims of our American heroes. They are erroneously claiming that the peace treaty with Japan bars these veteran heroes from making these claims against these Japanese corporations that used them as slave labor.

It is wrong, and it is utter nonsense, for a number of reasons. First, as the State Department has elsewhere conceded, the waiver claims of U.S. private citizens against the private companies of another country is not merely unprecedented in the history of the United States, it is not recognized under international law and raises serious constitutional issues under the fifth amendment.

What that means is that it is unprecedented that the United States is claiming that our own citizens cannot sue another company in another country, especially when there are human rights violations involved and international violations of law. This is unprecedented that we are saying that our people are treated in this way, when others who were treated in this way, when American POWs were brought to justice, at the very least justice for our heroes, our World War II heroes right to sue their Japanese tormentors, their Japanese corporate torturers. He provided hope to the survivors that justice will be served.

But I have yet to hear anything else from our Secretary of State. I would hope that Secretary of State Colin Powell, a man of deep feeling, a man of great honor who served our country, but also served his country so well in so many capacities, I hope that the bureaucrats in the State Department do not get to him and have him analyze this situation with a bureaucratic approach that would just put off and put off and put off any type of action until all of these heroes die of old age and are taken by God.

This would be the gravest injustice of all. And those bureaucrats at the State Department, who never want to rock the boat, oh, we cannot rock the boat anywhere in the world. When Americans who have fought for the freedom of the American people were treated in this way, when Americans who are that solid and those people who gave so much for us, when they are being wronged, we can rock the boat anywhere in the world to see that they obtain justice.

I hope that Colin Powell, Secretary of State Powell, sees through this bureaucratic maze that has been constructed and been used to thwart justice for these survivors of the Bataan
June 26, 2001

CONGRESSIONAL RECORD—HOUSE

Death March. I hope he sees through that, and I hope he listens to his heart and his patriotism.

We have another opportunity. I hope Colin Powell acts, but we also have another opportunity. In a few days a new Japanese prime minister will be coming to the United States. Again, let me say that in no way do I hold the Japanese people responsible for what we say tonight. That is not meant in any way to be a slap at the Japanese people.

For the last few decades, by the way, the only Japanese American in this body, I guess maybe there are two Japanese Americans in this body, but one of the two Japanese Americans in this body is the coauthor of this legislation that I have brought forth to try to bring justice to these American POWs. He is not about to insult the Japanese people, just as I mean no insult, and none of us involved in this do.

The Japanese people are good friends of ours. I have many good friends in Japan. I lived in Japan as a young boy. The Japanese people now are an honorable people. Some of them are trying to cover up the mistakes, but the most honorable way to go forward is admit mistakes have been made, bring justice about, make an apology, if necessary, and then just move on. That is the way to handle it.

But, instead, our government has been playing a game, playing a game with these very same Japanese corporations that committed these crimes. When the Japanese prime minister comes this week, many people are hoping that this issue does not come up. The diplomats are hoping that it is not to be an issue addressed at the summit. They believe that this issue should be swept under the rug, and we should just stir the pot and try to keep this situation confused until it goes away. And “goes away,” do you know what “goes away” means? It means those heroic men who gave their lives and sacrificed so much, those heroic men of the Bataan Death March, who served as POWs, our most heroic soldiers of World War II, that they are dead. That is when this “goes away.” That is what our State Department is waiting for.

Well, the rest of us perhaps have a greater and a higher standard than that, and a higher appreciation of what that generation, that World War II generation, did for us, and we are not about to stir the pot. We are working now to have justice for these men, and it should be an issue at the summit with a new Japanese prime minister.

It should be swept away when our heroes from the Bataan Death March and the Japanese slave labor camps and the mines and the Japanese war machines and the corporations that worked our people to death, when they compensate our heroes and apologize, it is over, and it will be done, and the book will be closed. But it will not be until then.

Of the more than 36,000 American soldiers who were captured by the Japanese, only 21,000 made it home. The death rate for American POWs was 30 times greater in Japanese prison camps than in German prison camps. Let me repeat that: The death rates for American POWs were 30 times greater in Japanese prison camps than in German prison camps.

Even though Japanese companies profited from slave labor, these companies have never offered an apology or repayment. Perhaps they were being counseled by our State Department. Maybe they were being counseled by lobbyists in this city. Maybe they were being counseled by people whose advice they sought and paid for.

Just like with some of the things going on with China today, what we have unfortunately seen is that some Americans, many Americans, can be bought off. Can be bought off? Can you imagine this? Can you imagine someone taking a fee from a Japanese corporation and telling them how not to apologize and not to give compensation to a survivor of the Bataan Death March, to the greatest of America’s heroes? Oh, yes, there are people like that in Washington, D.C. Yes, there are.

Today there are fewer than 5,400 surviving former Japanese POWs. These survivors are pushing for justice; not just for themselves, but also for their widows and the families of those POWs who died prematurely due to the horrible conditions that they lived under while they were enslaved by these Japanese corporations.

The POWs finally have a chance, however, to win justice, but they should not and they cannot be abandoned once again by their government. These men were abandoned in 1942 by a decision by our government that our government had to make, and there were many tears, I am sure by those POWs who died and by those command officers who had to make that decision and say that these tens of thousands of Americans will be permitted to be taken, captured by the Japanese, and they were abandoned.

We will not abandon them again. If we do, we promise it will happen, with their shame on us. As I say, the gentleman from California (Mr. HONDA), a Japanese American, I might say that he himself was interned during World War II as a Japanese American, he is co-author of this bill. It is called the Justice for United States POWs Act of 2001. The bill number I will repeat that. The bill is called “The Justice for United States POWs act of 2001,” and the number is H.R. 1198.

My name is DANA ROHRABACHER. I am a Republican from California. I am the author of that bill. The coauthor of that bill is a Democrat from California, the gentleman from California (Mr. HONDA). The gentleman from California (Mr. HONDA) and I have put a great deal of time and effort into this legislation, and I commend my over 100 colleagues who have signed on as cosponsors and supporters of this legislation. I would urge my fellow colleagues to do the same.

Mr. Speaker, I agree with those who say that the United States is a great strategic ally of the United States; but a true friendship requires friends to speak out when there has been an insult or an injustice. And friends must join together to address that injustice. A true friendship can only exist when apologies have been made and wrongs have been righted, when the wrongs have been corrected and recognized.

We are asking the Japanese people to be our friends, and they are our friends. Nothing damages our relationship with Japan more than the cold-hearted and unjustified refusal of these multinational corporations, acting with the support of the Japanese government, to make sure that our American hero veterans do not receive the compensation and the apologies that they deserve.

These POWs have asked for back pay, back pay, for a time when they were toiling to death on Japan’s war machine and the Japanese had no right to do so, and they seek an apology. What American could be opposed to that? I would ask, what Japanese person could oppose that? This would be a sign of good faith, and I would hope that this administration would counsel to the new Japanese Prime Minister. I hope Secretary of State Powell and President Bush counsel the Japanese Prime Minister to take a look at this bill and to reach out to the American people and to close this sad chapter. This issue must be addressed, and our State Department should hang its head in shame if it continues to try to undermine the efforts of these American POWs.

Mr. Speaker, I have been asked often why I am personally involved in this issue? Why I, along with the gentleman from California (Mr. HONDA), worked and wrote the U.S. POW Act of 2001, H.R. 1198, and it really is a very personal issue with me, a very personal issue. Mr. Speaker, 90 years ago this time in my life, I am a very happy person. I am serious about the work I do here, but I am a very, very happy person. Three and a half years ago I was married.
after about 15 years of being a single man, and I found the woman that I love, and it was a wonderful thing. And when we were married 3½ years ago, my wife's father had passed away, he died of cancer about 6 years ago; and of course, someone had to give her away at the wedding, and her own father had died of cancer. Giving her away at the wedding, my wife, Rhonda's, Uncle Lou gave her away. That is the first time I ever had a chance to get to meet Uncle Lou.

Uncle Lou is not this man's real name, but everyone calls him Uncle Lou. His friends call him Lou. Uncle Lou's real name is Arthur Campbell, Army Air Corps, 1941. Uncle Lou was unfortunate enough to have been stationed in the Philippines shortly before the war broke out and was captured by the Japanese and survived the Bataan Death March, the horrific death march. He was then taken on a hell ship to Mukden, which is a prison labor camp in Manchuria. Every day he would see his fellow prisoners murdered, beaten and tortured; scientific experimentation was conducted on these men and other prisoners. This was what Uncle Lou survived.

Uncle Lou was a strapping young man who, by the time he was freed at the end of the war, was under 100 pounds. As I say, we call him Uncle Lou because Uncle Lou was called by his Japanese guards as, this man must be Lucifer, because he is so defiant. He was lucky to have survived at all with a defiant attitude, and all of the rest of the prisoners kept calling him Lou at that point, and he adopted the name. Uncle Lou told me about what happened to him, and he met with some of the fellow prisoners that served with him in the prison camp at Mukden. The stories will just tear your heart out. We cannot permit Uncle Lou and the Uncle Lous of this world to go without justice. Uncle Lou will not live forever. Uncle Lou is in his 80s right now, and he has had a pacemaker put in; and the fact is that when he breathes his last breath and he takes a look around him, I want him to know that his country has done justice by him. I think every American should make that a goal, that the Uncle Lous of this world, that we do right by them, whether they are the survivors of the Bataan Death March or the other people who fought for this country during the Second World War.

As Tom Brokaw says, this truly was the greatest generation; and we insult them, we do them a grave injustice, we trash them by having any government involved with legal wrangling to try to prevent their claims against these Japanese corporations that use them as slave labor. This is sinful. We cannot permit it to go on. We must see that they leave the scene. We must honor them.

My father was also a veteran, a combat veteran of World War II. My father was a Marine pilot. He passed away 3 years ago. I looked into his trunk after he died and out came the Japanese battle flags and the memorabilia from World War II, and it seems that my father too fought in the Philippines. He was one of the pilots, Marine pilots that flew up and down the Philippines during the effort to recapture the Philippines from the Japanese in 1944.

He passed away 3 years ago. I remember him telling me quite often about his experiences, and let me just say I am very proud of my father and I am proud of the things he did. But he harbored no grudges against the Japanese. He fought with the Japanese, he had Japanese battle flags in his trunk; but he had many Japanese friends, and I have many Japanese friends as well. Please, no one should take this as an attack on people. I repeat that again. The Japanese people have tried to leave that part of their culture behind that had them treat men and women as they did. They know that heinous crimes were committed against the Chinese people, and they know that men who gave up and surrendered and were treated like animals, they know that; and they have left that behind.

They are trying to build a civilized society, a society of technology, a society of tolerance in Japan. They are trying to do that. We should help them do that by getting this behind us. We have our own haunts, our own ghosts in our past; and we too have tried to leave them behind us. We too have tried to say that we are going to not treat people in an unjust way, as we have in our society in the past.

So let us not look at this as a condemnation of the Japanese. I am sure the Japanese people, the younger ones in particular, there is no malice in our hearts. We wish nothing but success for the Japanese. Our economies are tied together. America cannot have a strong economy unless the Japanese economy begins to pick up and has a strong economy. We are tied together with the Japanese, and they were our enemies. Perhaps that is one of the greatest aspects of America, is our ability to forgive. But we have got to be asked for forgiveness. The people who have been wronged, the Japanese corporations that did this to our people, have to give some compensation to those men they wronged. This is not an unreasonable request.

Finally, let me say this about the Philippines. The Philippines and the Filipino people are perhaps the best friends of the United States in the Pacific, maybe the best friends of the United States in the whole world. They like us, and we should like them. They are in a bad situation right now too. They are in a very bad situation.

Just as the Japanese militarists sought to dominate Asia and the Pacific during the 1920s and 1930s, there is another power on the march, another militaristic power that threatens the stability of the world and is an enemy. This present government that threatens the Philippines and threatens all democratic countries in that region, are trying to expand into island bases in which they will be used as power bases to assert their authority and power in the areas of the Pacific. We can see that now in the Spratly Islands, and we can see it in the Paracel Islands, we can see it throughout the South China Sea.

This power that seeks to dominate the world, the dominate Asia today is as racist as the Japanese were racist back in the 1920s and 1930s. They felt they were racially superior. The Japanese people do not believe that anymore; they want to be part of the family of nations. And I repeat that again, but they had to lose the war to discard that. We liberated the Japanese people, just like we liberated the Philippines from Japanese militarism. We liberated the Japanese people the same, but today this other militaristic power is on the march. They too are racist, they are expansionary, they are militaristic, and they too understand that only the United States of America stands in their way, and that the Philippines is a friend of the United States of America.

I am talking about, of course, the Communist Chinese. I am talking about the People's Republic of China, which is now engaged today in military naval exercises off the coast of the Philippines. This is an alarming piece of news.

The security of the Pacific was won and the peace of the Pacific was won and the freedom of the Pacific was won by the blood and the sacrifice of American military personnel during the Second World War. People like Lou, my father and Uncle Lou. We cannot permit the Chinese Communists to expand their domain and to take over where the Japanese militarists left off.

During the war, the Japanese sank a U.S. patrol boat, the Panay, U.S.S. Panay, killing several of the people on board. A Chinese jetfighter knocks one of our planes out of the air several months ago while it was on a routine mission in international waters, knocking it out of the air, and they took 24 American military personnel and held them as hostages for 11 days. Things are getting worse with China and in the Pacific. We must do justice to the people who fought in the Pacific by ensuring that the Pacific remains free, remains prosperous and at peace; and today, there are ominous clouds on the horizon. Yet as things get
June 26, 2001

CONGRESSIONAL RECORD—HOUSE

written, as they were getting worse in Japan, corporate America still demands on doing business as usual with the Chinese.

It is very similar, as we have heard so often quoted, where it is deja vu all over again; and I am afraid that this is a very frightening deja vu. The Japanese in the 1930s were insisting that America continue to sell them scrap metal and oil and aerospace, or I should say aeroplane, because there was not any "space" with it in that day, aeronautical technology. Many of the Japanese aircraft that fought against us in World War II actually were designed and were at least partially designed by American manufacturers. The scrap metal and the oil that was used to fuel their war mission can be traced back to the United States. Our company was willing to close its eyes to the threat that faced us in the Pacific back in the 1920s and 1930s, just as corporate America is trying to close our eyes today to the threat of Communist China.

Mr. Speaker, we do not, we do not do justice to those who defended us in the Second World War by going for short-term profit in the mainland of China, letting those big corporations make billions of dollars off their slave labor, while those Chinese Communists are using their profit from their company to build up their military, which some day will perhaps kill Americans. We have already had, we have already had a transfer of rocket technology to the Communist Chinese that makes our country so much more vulnerable to a possible nuclear attack.

It is frightening to think that American corporations, and the Cox Commission outlined how Lorell Corporations was selling technology that improved the accuracy and the capabilities of Chinese rockets.

There are American aerospace firms improving the capabilities and accuracy of Chinese rockets so that they could evaporate tens of millions of Americans if we get into a conflict with them.

I do not want to have any conflict with the Chinese people. I do not want to have any conflict with China at all. War is horrible. I know. My father had told me and Uncle Lou’s tales are very vivid.

These people who we are trying to find justice for tonight, they certainly know how horrible war is. We do not want to have that. But the quickest way to have conflict is to seem to grow before dictators and militarists, and that is what the Japanese knew of the United States before World War II and the Chinese Communists think the same thing of us today.

They think that we have no honor, because our own corporate leaders sell out the national security interests of our country for short-term profit. No wonder they are treating us as a degenerate culture. We must stand firm. We must stand firm for the security of our country, and we must stand firm to keep our country a leader, a leader for world peace, yes, but also a leader for democracy throughout the world.

We must be the friend of the Japanese people, because they want democracy and we liberated them from their militarists, but we also must be the friend of the Chinese people. The Chinese people live in oppression, we must free them from the militarists that oppress them and are threatening the peace of the world.

If we do so, countries like the Philippines who are struggling now, they have no weapons that can deter the Chinese, the Chines grab of the Spratley Islands and the vast mineral resources, under those islands that should belong to the Philipines, the Chinese are permitted to, through aggression and militarism, to steal that from the Philippino person, but they do not have the means to defend themselves.

We should make sure, and I am very proud that I included in the State Department authorization this year a provision that permits us to provide obsolete weapons and the other type of gear that we would be mothballing from the American military that we can provide it to the Philippines, just as if we are providing it to any NATO ally.

So we increased the Philippines to their status in terms of receiving weapons from the United States up to a NATO ally status.

We must be strong and stand with the people who love freedom, whether it be the people of the Philippines or the people of Japan or the people of China against their own oppressors. We must insist on truth. There is an old saying, know the truth and it will make you free. It comes from the good book.

We must insist on the truth. Yes, if we have to make compromises, if we have to go at problems obliquely rather than straight on, that is what it has to be, but it should not be based on the fact that we are lying to ourselves and lying to the American people.

We need a regeneration, a rebirth of courageous leadership in this country of integrity. We had 8 years under the last administration where no one in this world, even our own people, could respect our own leaders. Many of our own leaders were just not respectable. Now we have a chance.

This new administration has a chance. I would ask people to call their congressmen and talk about this piece of legislation, helping the American POWs from World War II.

I would ask them also to contact the White House and see that the White House brings this issue up of American POWs from the Bataan Death March and to try to see what we can do to get President George W. Bush just to mention this to the Japanese prime minister when he arrives here within a few days.

These are the things that we can do and we can do this because by doing so, we honor those 3,000 or 4,000 surviving Death March survivors who are still here waiting for their day, waiting for their day in court and waiting for justice.

Tonight, I would hope all of those who are with these American POWs, I hope that they activate themselves, and I hope that our democratic process is working. I know that we are making them proud. My own father’s watching tonight and all of those who gave their lives in World War II and other all other American wars, they will be proud.

Let us make them proud of us as Americans and by doing so and having the courage to do what is right, especially for the survivors of the Bataan Death March, America’s ultimate hero.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(‘The following Members (at the request of Mr. SANDERS) to revise and extend their remarks and include extraneous material:

Mr. LANGEVIN, for 5 minutes, today.

Mr. DeFAZIO, for 5 minutes, today.

Ms. NORTON, for 5 minutes, today.

Mr. SANDLIN, for 5 minutes, today.

Ms. CARSON of Indiana, for 5 minutes, today.

(‘The following Members (at the request of Mr. OSBORNE) to revise and extend their remarks and include extraneous material:

Mr. OXLEY, for 5 minutes, today.

Mr. GUTKNECHT, for 5 minutes, today.

Mr. HERGER, for 5 minutes, June 28.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 657. An act to authorize funding for the National 4-H Program Centennial Initiative.

ADJOURNMENT

Mr. ROHRABACHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o’clock and 6 minutes p.m.), the House adjourned until Wednesday, June 27, 2001, at 10 a.m.
EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's desk and referred as follows:

2696. A letter from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting the Department's final rule—West Indian Fruit Fly; Removal of Quarantined Area [Docket No. 00–110–3] received June 22, 2001, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Agriculture.

2670. A communication from the President of the United States, transmitting a request to make funds available for the Disaster Relief program of the Federal Emergency Management Agency; (H. Doc. No. 107–90); to the Committee on Appropriations and ordered to be printed.

2674. A letter from the Director, Regulations Policy and Management Staff, Department of Health and Human Services, transmitting the Department's final rule—Requirements for Testing Human Blood Donors for Endemic Disease Due to Communicable Disease Agents [Docket No. 98N–0581] received June 22, 2001, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Energy and Commerce.

2675. A letter from the Director, Regulations Policy and Management Staff, Department of Health and Human Services, transmitting the Department's final rule—General Requirements for Blood, Blood Components, and Blood Derivatives; Donor Notification [Docket No. 98N–0607] received June 22, 2001, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Energy and Commerce.

2676. A letter from the Deputy Director, Defense Security Cooperation Agency, transmitting notification concerning the Depart- ment of the Navy's Proposed Letter(s) of Offer and Acceptance (LOA) to the Republic of Korea for defense articles and services (Transmittal No. 01–17), pursuant to 22 U.S.C. 2776(b); to the Committee on International Relations.

2677. A letter from the Deputy Director, Defense Security Cooperation Agency, transmitting notification concerning the Department of the Army's Proposed Letter(s) of Offer and Acceptance (LOA) to the Republic of Korea for defense articles and services (Transmittal No. 01–16), pursuant to 22 U.S.C. 2776(b); to the Committee on International Relations.

2678. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the sale or transfer of defense articles and services sold commercially under a contract to Taiwan [Transmittal No. DTC 02–01], pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

2679. A letter from the General Legal Advisor for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112(a); to the Committee on International Relations.

2680. A letter from the Director, Office of Personnel Policy, Department of the Interior, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2681. A letter from the Director, Office of Personnel Policy, Department of the Interior, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2682. A letter from the White House Liaison, Department of Education, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2683. A letter from the White House Liaison, Department of Education, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2684. A letter from the Personnel Management Specialist, Department of Labor, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2685. A letter from the Principal Associate Administrator, Environmental Protection Agency, transmitting the Agen- cy's final rule—EPA Mail-Arrival Address; Additional Technical Amendments and Corrections (FRL–6772–2) received June 25, 2001, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Resources.

2686. A letter from the Assistant Attorney General, Department of Justice, transmitting the report on the Administration of the Federal Vacancies Reform Act of 1998; to the Committee on the Judiciary.

2687. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agen- cy's final rule—Oil Pollution Prevention and Response: Non-Transportation-Related Facilities [FRL–7003–1] (RIN: 2050–AES4) received June 25, 2001, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Resources.

2688. A letter from the Chief, Regulations Unit, Internal Revenue Service, transmitting the Service's final rule—Eligibility requirements after denial of the earned income credit [TD 8953] (RIN: 1545–AV61) received June 25, 2001, pursuant to 5 U.S.C. 801(a)(1); to the Committee on Transportation and Infrastructure.

2689. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2690. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2691. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2692. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2693. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2694. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2695. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

2696. A letter from the Assistant Attorney General, Department of Justice, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and referred, as follows:

By Mr. CALVERT (for himself, Mr. LANGEWICZ, Mr. BALDACCI, Mr. ROHRABACHER, and Mrs. BONO): H.R. 2309. A bill to amend the Small Business Act to provide loans to eligible small businesses for energy costs; to the Committee on Small Business.

By Mr. MURTHA: H.R. 2310. A bill to increase the rates of military basic pay for members of the uniformed services by providing a percentage increase of between 7.3 percent and 10.5 percent based on the members' pay grade and years of service; to the Committee on Armed Services.

By Mr. CALLAHAN: H.R. 2311. A bill making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes (Rept. 107–114); referred to the Committee of the Whole House on the State of the Union.

By Ms. GRANGER (for herself and Ms. E. JACOBS, Mr. KOCH, Mr. GAVIN, Mr. COOKSEY, Mr. WELDON of Florida, and Ms. FUGA): H.R. 2312. A bill to prohibit the use of Federal funds for elective abortion; to the Committee on Appropriations.

By Mr. CALLAHAN: H.R. 2313. A bill to amend the Internal Revenue Code of 1986 to repeal the income taxation of corporations, to impose a 10 percent tax on the earned income (and only the earned income) of individuals, to repeal the estate and gift taxes, to provide amnesty for all tax liability for prior taxable years, and for other purposes; to the Committee on Ways and Means.

By Mr. CALDER: H.R. 2314. A bill to amend title I of the Economic Growth Recovery Act of 1986 to provide for the actuarial present value of the Social Security program; to the Committee on Ways and Means.

By Mr. CRANE: H.R. 2315. A bill to amend the Internal Revenue Code of 1986 to repeal the income taxation of corporations, to impose a 10 percent tax on the earned income (and only the earned income) of individuals, to repeal the estate and gift taxes, to provide amnesty for all tax liability for prior taxable years, and for other purposes; to the Committee on Ways and Means.

By Mr. CALVERT: H.R. 2316. A bill to provide for the protection of the flag of the United States; to the Committee of the Whole House on the State of the Union.

By Mr. GILCHREST, Mr. PERRY, Mr. HOLDEN, Mr. PETERS, Mr. WINTER, and Mr. SCHIPP: H.R. 2317. A bill to provide for protection of the flag of the United States; to the Committee of the Whole House on the State of the Union.

By Mr. CALLAHAN: H.R. 2318. A bill to amend title I of the Employee Retirement Income Security Act of 1974 to provide to participants and beneficiaries of group health plans access to obstetric and gynecological care; to the Committee on Education and the Workforce.

By Mr. FLETCHER, Mr. PETTERSON of Minnesota, Mrs. JOHN- son of Connecticut, Mr. BURR of North Carolina, Mr. THOMAS, Mr. TAUZIN, Mr. REILIKARIS, Mr. S. JOHNSON of Texas, Mr. COOKSEY, Mr. WELDON of Florida, Mr. HAYES, Mr. PENCE, Mr. PLATTS, Mr. PETTY of Oregon, Mr. GILCHREST, Mr. GREENWOOD, Mr. PORTMAN, Mr. HOIBON, Mr. HILLIARD, Mr.
sible connections between the recurring incidence of violence, sexual harassment, and workplace-related frustrations experienced by postal workers generally; to the Committee on Government Reform.

By Mr. WATTS of Oklahoma (for himself, Mr. WATTS, and Mr. LUCAS of Oklahoma):

H.R. 2322. A bill to amend the Internal Revenue Code of 1986 to provide credits for individuals and businesses for the installation of certain wind energy property; to the Committee on Ways and Means.

By Mr. WITTFOIT (for himself, Mr. BOUCHER, Mr. SHMKUS, Mr. MOLCHAN, Mrs. CAPITO, Mr. COSTELLO, Mr. Lewis of Kentucky, Mr. PHIELPS, Mr. HART, Mr. STREICLAND, Mr. DOYLE, Mr. TIBERI, and Mr. ROGERS of Kentucky):

H.R. 2323. A bill to authorize Department of Energy programs to develop and implement an accelerated research and development program for advanced clean coal technologies for use in coal-based electricity generating facilities; to the Committee on Science, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. WOOLSEY (for herself, Mr. HALL of Texas, Mr. LAMPSON, Mr. MATHISON, Mr. WU, Mr. BACA, Mr. BAIRD, Mr. BARTY, Mr. BERNAL, Mr. BISHOP, Mr. BOMBERG, Mr. BROWN of Florida, Mr. BROWN of California, Mr. BROWN of Ohio, Mr. BROWN of Pennsylvania, Mr. BROWN of Texas, Mr. BROWN of Virginia, Mr. BROWN of Wisconsin, Mr. BROWN of Iowa, Mr. BROWN of North Carolina, Mr. BROWN of Oklahoma, Mr. BROWN of Oregon, Mr. BROWN of Rhode Island, Mr. BROWN of New York, Mr. BROWN of Utah, Mr. BROWN of Washington, Mr. BROWN of West Virginia, Mr. BROWN of Wisconsin, Mr. BROWN of Wisconsin, Mr. BROWN of Wisconsin, Mr. BROWN of Wisconsin, Mr. BROWN of Wisconsin, Mr. BROWN of Wisconsin):

H.R. 2329. A bill to amend the National Labor Relations Act and the Railway Labor Act to prevent discrimination based on participation in labor disputes; to the Committee on Education and the Workforce.

By Mr. TIERNEY (for himself, Mr. SERRANO, Mr. HINCHey, Mr. FRANK, Mr. MCNULTY, Mr. KILDREW, Mr. HILLARD, Mr. NADLER, Mr. MURTHA, Mr. PALLONE, Ms. BROWN of Florida, Mr. DEFAZIO, Ms. KAPTUR, Mr. BONGUS, Ms. FLISOSI, Ms. NORTON, Mr. ABERCROMBIE, Mr. GEORGE MILLER of California, Mr. SANDERS, Mr. INSELBERG, Ms. HANAYAMA, Mr. WATSON, Mr. EFANG, Mr. EVANS, Mr. RUSH, Mr. MCCOVERY, Mr. STARK, Mr. FILER, and Ms. CARSON of Indiana):

H.R. 2330. A bill to amend the National Labor Relations Act and the Railway Labor Act to prevent discrimination based on participation in labor disputes; to the Committee on Education and the Workforce.

By Mr. TIERNEY (for himself, Mr. SERRANO, Mr. HINCHey, Mr. FRANK, Mr. MCNULTY, Mr. KILDREW, Mr. HILLARD, Mr. NADLER, Mr. MURTHA, Mr. PALLONE, Ms. BROWN of Florida, Mr. DEFAZIO, Ms. KAPTUR, Mr. BONGUS, Ms. FLISOSI, Ms. NORTON, Mr. ABERCROMBIE, Mr. GEORGE MILLER of California, Mr. SANDERS, Mr. INSELBERG, Ms. HANAYAMA, Mr. WATSON, Mr. EFANG, Mr. EVANS, Mr. RUSH, Mr. MCCOVERY, Mr. STARK, Mr. FILER, and Ms. CARSON of Indiana):

H.R. 2331. A bill to amend the National Labor Relations Act and the Railway Labor Act to prevent discrimination based on participation in labor disputes; to the Committee on Education and the Workforce.
H. R. 1711: Mr. Turner, Mr. Easter and Mr. Shadegg.

H. Con. Res. 20: Mr. Hastings of Florida

H. Res. 170: Mr. Emmer.

H. Res. 72: Mr. Green of Texas and Mr. LaHood.

H. Res. 75: Ms. Emerson.

H. Res. 172: Mr. Pastor and Mr. Hastert.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H. R. 2149: Mr. Combest.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H. R. 3311

OFFERED BY: Mr. Cucinich

Amendment No. 1: in title III, in the item relating to “Weapons Activities”, after the aggregate dollar amount, insert the following: “(reduced by $122,500,000)”.

In title III, in the item relating to “D e f e n s e N u c l e a r N o n P ro l i f e r a t i o n”, after the aggregate dollar amount, insert the following: “(increased by $66,000,000)”.

H. R. 3313

OFFERED BY: Mr. Petri

Amendment No. 3: in title I of the bill, strike section 103. Redesignate subsequent sections of title I, accordingly.

H. R. 3311

OFFERED BY: Mr. Tancredo

Amendment No. 4: in title I, strike section 105 (relating to shore protection projects cost sharing).

H. R.

Agriculture Appropriations Bill, 2002

OFFERED BY: Mrs. Clayton of North Carolina

Amendment No. 2: At the end of the bill (before the short title), insert the following new section:

SEC. 738. The amounts otherwise provided by this Act are reduced by the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for competitive research grants (7 U.S.C. 5601(b)), by reducing the amount made available for “AGRICULTURAL PROGRAMS—FARM Service Agency—Salaries and Expenses”, and by increasing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, and EXTENSION SERVICE—RESEARCH and EDUCATION ACTIVITIES” (and the amount specified under such heading for a program of capacity building grants (7 U.S.C. 3152(b)(4)) to colleges eligible to receive funds under the Act of August 30, 1990 (7 U.S.C. 321–326 and 328), including Tuskegee University, by increasing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, and EXTENSION SERVICE—RESEARCH and EDUCATION ACTIVITIES” (and the

H. Con. Res. 30: Mr. Shays.

H. Con. Res. 61: Mr. Starks.

amount specified under such heading for payments to the 1890 land-grant colleges, including Tuskegee University (7 U.S.C. 3222), and by increasing the amount made available for “AGRICULTURAL PROGRAMS—OUTREACH FOR SOCIALLY DISADVANTAGED FARMERS”, by $5,521,000, $10,000,000, and $7,607,000, respectively.

H.R. 11 Agriculture Appropriations Bill, 2002
OFFERED BY: MR. GUTKNECHT
AMENDMENT No. 3: At the end of title VII, insert after the last section (preceding any short title) the following section:

SEC. 710. None of the amounts made available in this Act for the Food and Drug Administration may be used under section 801 of the Federal Foods, Drug, and Cosmetic Act to prevent an individual who is not in the business of importing prescription drugs from importing a prescription drug that is FDA-approved, is not a controlled substance, and is offered for import from a country referred to in section 804(f) of such Act.
HONORING GRANBY MAYOR DICK THOMPSON
HON. SCOTT MCMINNIS
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001
Mr. MCMINNIS. Mr. Speaker, I stand before you today on behalf of Congress to pay tribute to a brave man, and a man who gave of himself to improve the lives of others. Mr. Speaker, the people of Colorado and of our nation lost an amazing man with the passing away of Granby Mayor Dick Thompson, but his heroic efforts will never be lost, because his actions and his character have helped shape his city and country in a positive way that can never be revoked.

In 1949, Dick married his wife Thelma, and eventually became a fantastic father to five children, Larry, Ron, Brenda, Gary, and Linda. A fine businessman, Dick started Thompson Excavating, and later, when his sons decided to join him in his successful business, changed it to Thompson and Sons Excavating.

Dick Thompson believed in self-reliance, freedom, and trust, and he took action to see these values implemented in his community, nation, and family. Dick learned firsthand the meaning of sacrifice at age 18 when he served in the South Pacific during World War II on the U.S.S. Hazard. He never forgot how to serve for the sake of the many, as he gave over 20 years on the town board without a single regret. Eventually, Dick took his political leadership skills to another level when he was elected Mayor in April of 2000. He won the community over with his common sense and his obvious interest for the well being of others. Middle Park Fair and Rodeo, who honored him as Pioneer of the Year, quotes him as saying, “We’ve always had a lot of good people in this country.” "That’s why I like to stay involved. I like the people.”

His positive energy shone through, and helped contribute to his success and to the success of Granby.

It is without a doubt, Mr. Speaker, that Dick Thompson earned our utmost respect and thanks for his exemplary service and honesty. Today, I ask you to join me in honoring one of Colorado’s finest leaders.

In honor of the consecration of the Monastery Marcha Church
HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001
Mr. KUCINICH. Mr. Speaker, I rise today to honor The Consecration of The Monastery Marcha Church for the esteemed dedication by the abbes, Igumanija Ana and two sisters, Sisters Anastasia and Angelina, for their remarkable service to God and the Holy Orthodox Church.

Monastery Marcha in Richfield, Ohio is erected in remembrance of the original Monastery Marcha in Serbia, built in the 17th Century, which was destroyed during the war with Austria-Hungary. Even though it was rebuilt in 1924, it was destroyed once again in 1991. However, due to the devotion of the congregants, the Monastery Marcha in Richfield became what it is today, the first monastery established for the Serbian Orthodox Nuns in the United States.

The Monastery is presently located on a beautiful 82 acre tract of land, which was purchased in 1968 for the sole purpose of building a Diocesan center. The spiritual and uplifting environmental atmosphere invites all those lost souls in need of spiritual enrichment, prayer, service, moral support, and love. The Monastery graciously houses a residence and living accommodations for monastics, a heavenly Chapel, and future plans hope to include a vast area for a cemetery and a residence for senior citizens.

Each week the Holy Services are conducted by an area Orthodox Priest who gratefully volunteered his priestly duties to the Monastery. The Nuns derive income through the generous donations but find that the main source stems from producing vestments, making candles and selling religious articles. The nuns have hospitably provided many spiritual retreats at the Monastery and have become speakers and program presenters throughout Ohio, Pennsylvania, and New York.

The nuns have taken an active part in service to the Monastery and it is well known that the doors of the Monastery are always open for all to enter. My fellow colleagues, please join me in honoring the Monastery Marcha Church for their many contributions to the diocese and wider religious community.

Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP)
HON. SILVESTRE REYES
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001
Mr. REYES. Mr. Speaker, the President’s request for Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) is $277 million for fiscal year 2002. Funding at this level puts the GEAR UP program in my district and many others at serious risk. We should do everything in our power to protect and augment programs like GEAR UP that have proven to be effective.

As you know, GEAR UP is a nationwide program to encourage disadvantaged children to have high expectations, stay in school, study hard and make appropriate decisions that will lead them on the road to a college education. With high school dropout rates so high among Hispanics, programs like GEAR UP are critical. The program directs the Department of Education to offer competitive grants that will build partnerships while creating and expanding alliances between colleges and school districts which have at least 50 percent low-income students.

Since its enactment, GEAR UP has provided a much needed service to nearly 1.2 million children. No other federal program holds more promise for middle school children in low-income schools and does more to institutionalize the necessary reforms that provide early college awareness than GEAR UP. The 73 new partnership grants among 237 new state grants awarded last year brought the two-year total to 237 GEAR UP partnerships and 28 state programs. The second year competition, like that of the first year, was extremely competitive. However, due to funding limitations, only 28 percent of the partnership applications and 33 percent of the state grant applications could be awarded. There is truly a demand for more GEAR UP money.

I believe it is critically important that we remain steadfast in our commitment to GEAR UP, which sends a message to students that a college education is indeed within their reach. I urge my colleagues to support $425 million for GEAR UP in the fiscal year 2002 Labor, HHS and Education Appropriations bill to allow GEAR UP schools to continue to operate their programs.

HONORING TEEN OUTREACH THROUGH TECHNOLOGY (TOTT)
HON. GEORGE RADANOVICH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001
Mr. RADANOVICH. Mr. Speaker, I rise today to honor Teen Outreach Through Technology (TOTT) for their exemplary service to their community. TOTT is a non-profit organization with an emphasis on youth delinquency prevention.

In 1986, Faye Johnson undertook an independent study at Fresno City College to explore the use of telecommunications with at-risk or troubled teens. Her study showed very positive results and shortly thereafter, a formal program was put in operation, volunteers were recruited, and TOTT became a non-profit organization. TOTT’s purpose is to reduce juvenile delinquency by redirecting negative energy into a positive outcome through computer technology. Through the use of a computer network, newsletter and trained volunteer programs, youth are involved in the process of educating the public to their needs, exploring

June 26, 2001

EXTENSIONS OF REMARKS

HON. JAMES E. CLYBURN
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. CLYBURN. Mr. Speaker, I rise today to ask my colleagues to join me in paying tribute to Corporal Kelly Stephen Keith. Kelly Stephen Keith was born in 1978, the son of Donna Harter of Florence and Billy Keith of Cheraw, and stepson of Ronald Harter and Connie Keith. His siblings are Andy and Jay Keith of Cheraw and Dustin Brasington of Florence.

Kelly Keith joined the Marine Corps on December 17, 1996 shortly after graduating from Cheraw High School where he had received the “Spirit of the Brave Award” in his senior year. During his high school years, Kelly played in the marching band, was an avid fisherman and hunter, and enjoyed golf, music, and scuba diving. He was a Boy Scout for ten years, and a member of First Baptist Church of Cheraw.

Over the course of his first three years in the Marines, Keith was promoted four times and received numerous awards for good conduct and advanced to the rank of Corporal. He was assigned to Naval Aircrew Training, and later joined the Osprey Unit team. Before joining the Osprey Unit, Kelly was with the Marine Squadron assigned to transport the U.S. President and his staff.

Corporal Keith distinguished himself as the only Corporal, and the youngest officer, to be named crew chief on the Osprey test team. Keith was killed with eighteen other Marines on April 9, 2000 when their aircraft crashed in Arizona on a training exercise.

The South Carolina General Assembly passed a resolution on March 6, 2001 naming a portion of U.S. Highway 52 in honor of Corporal Keith. Corporal Kelly Stephen Keith was a man of integrity, honor, and respect. The service that he rendered for our nation was inexcusable.

The retirement of Mr. Gallardo signifies the end to a dedicated sixty-four years of service to Major Farms and the entire Soledad community. It is clear that Jesse Gallardo's dedication has made a lasting impact on his community, and I join the city of Soledad in honoring Mr. Gallardo.

Mr. Speaker, I rise before the House of Representatives today to mark the passing of an important American, Robert Moody McKinney, editor and publisher of the Santa Fe New Mexican, the west's oldest newspaper.

Mr. FARR. Mr. Speaker, I rise today to honor Jesse Gallardo as he recently celebrated the end of his tenure at Major Farms Inc. in Soledad, California. Mr. Gallardo retired on March 31, 2001, bringing an end to sixty-four years of service to Major Farms Inc. and the entire Soledad community.

Mr. FARR. Mr. Speaker, I rise today to congratulate Teen Outreach Through Technology for their innovative use of technology to serve young people in the Fresno area. I urge my colleagues to join me in wishing TOTT many more years of continued success.

TRIBUTE TO CORPORAL KELLY STEPHEN KEITH

HON. SAM FARR
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. FARR of California. Mr. Speaker, I rise today to honor Jesse Gallardo as he recently celebrated the end of his tenure at Major Farms Inc. in Soledad, California. Mr. Gallardo
President John F. Kennedy appointed him U.S. ambassador to Switzerland in 1961. Under Presidents Lyndon B. Johnson and Richard M. Nixon, he held appointments in the U.S. Treasury Department. He was awarded the Treasury Department's Distinguished Service Medal. 

Because of Santa Fe's proximity to the National Atomic Weapons Laboratory at Los Alamos, McKinney became interested in peaceful uses of atomic energy, became an authority in that field and published several books on the subject.

McKinney served on the board of directors of several major corporations, including the Rock Island Railroad, International Telephone & Telegraph, Trans World Airlines and Martin Marietta. He was a classical scholar, having mastered Latin at Amarillo High School and Greek at the University of Oklahoma. He was a published poet; his book Hymn to Martin Marietta.

He took a leave of absence from McKinney in 1970 and later married Marielle de Montmollin, who died in 1998. He is survived by his daughter, Robin Martin and her husband, Meade Martin; grandchildren, Laura and Elliott of Nambe; stepson, Laurent de Montmollin of Florida; and stepdaughter, Edmee Firth of New York and her children, Marie Louise Slocum and Olivia Slocum, both of New York, and John Slocum of Newport, R.I.

Funeral services are pending.

HONORING ELMER JOHNSON OF COLORADO LEADERSHIP

HON. SCOTT MCINNIS OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. McINNIS. Mr. Speaker, I stand here today to honor and remember Elmer A. Johnson, who gave of himself throughout his life to serve his country and the citizens of Colorado. Elmer was a patriot, a giving man, and a man blessed with outstanding leadership and business skills.

Elmer, a devoted husband and father, was married to Philomena Mancini for fifty years until her death. He gave his wife, his son, Robert, and his two granddaughters much to be proud of. His patriotism drove him to enlist in the Army Air Forces in 1941, where he eventually served as master sergeant in the China-Burma-India theater during World War II. He then began running his father-in-law's printing business and edited a weekly newspaper.

Then, in 1958, he was elected for the first of three times to the Colorado House. He earned a distinguished reputation with those who knew and worked with him there, including former state Rep. Wayne Knox who the Denver Post quotes as saying, “He was a very well-respected, reasonable, moderate legislator” and “a nice guy, a very good guy.” Elmer had the honor of chairing the Finance Committee and served on the Joint Budget Committee as well as on the Legislative Council.

He was a devoted husband who loved his family and friends and who did not know the word stop. However, in 1963, he began working as a city official as manager of revenue and director of budget and management. He also served on the executive board of the Colorado Municipal League, and became its president in 1970. Incredibly, he also found time to serve on the executive board and as president of the Colorado Municipal League, become a member of the Regional Transportation District, and become a member of the Sons of Norway. In addition, his leadership stretched to serving for a term as the international president of the Municipal Finance Officers of the United States and Canada.

Mr. Speaker, Elmer Johnson was a distinguished veteran, a devoted father and husband, and a selfless leader. Today, I would like pay him tribute on behalf of Congress for his lifelong commitment to the defense of his country and to the people of the United States.

HONORING THE 60TH ANNIVERSARY OF THE UNIVERSITY OF TEXAS M.D. ANDERSON CANCER CENTER

HON. KEN BENTSEN OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. BENTSEN. Mr. Speaker, I rise today to honor the University of Texas M.D. Anderson Cancer Center on its 60th Anniversary on June 30, 2001. Although I will not be present at this Ceremony, I would like to honor this distinguished institution which is one of the world's top tier of institutions devoted to the conquest of cancer.

Throughout its history, M.D. Anderson Cancer Center has set the standard for excellence in cancer patient care, research, education and prevention. Named for its benefactor, Monroe Dunaway Anderson, the hospital was designated one of the first three comprehensive cancer centers in the United States by the National Cancer Act of 1971, and has continued to be the model of other centers seeking such recognition. In 2000, M.D. Anderson was ranked by U.S. News & World Report magazine as the nation's best cancer hospital.

Since the first patient was registered in temporary quarters in 1944, nearly 500,000 people have been admitted. Dr. Clark was succeeded by Dr. LeMaistre, a molecular link between cigarettes and lung cancer from studies showing a carcinogen in tobacco smoke binds to key mutagenic sites in the p53 gene.

Over the years, M.D. Anderson has conducted extensive clinical trials that have led to more effective cancer drugs and biologic compounds, less-invasive surgical procedures and more precise, radiation techniques. Many standard cancer therapies now available around the world were originally evaluated, wholly or in part, through such clinical research studies at M.D. Anderson.

Research discoveries and inventions by M.D. Anderson faculty and staff have been responsible for important technology development partnerships with industry. Fifteen companies have been created as spinoffs from M.D. Anderson research projects.

While research advances at M.D. Anderson over the past 60 years have helped to cure some of the most common forms of cancer, the outlook for better treatments in the future and ultimately, prevent cancer is even more optimistic because of emerging knowledge about the highest number of grants awarded to any institution by the National Cancer Institute and the American Cancer Society.

Translational research that applies new laboratory findings to improve patient treatments as quickly as possible has flourished under the leadership of Dr. John Mendelsohn, a distinguished clinical scientist who became M. D. Anderson's President in 1996. Dr. Mendelsohn has recruited a visionary management team and established bold new priorities for M. D. Anderson in the 21st century.

Dr. John Mendelsohn is the third president of the institution. Dr. R. Lee Clark was named the first full-time director and surgeon-in-chief in 1946, two years after the first patient was admitted. Dr. Clark was succeeded by Dr. Charles A. LeMaistre, who was instrumental in recruiting many leading physicians and surgeons. Dr. Mendelsohn took over in 1996 after Dr. LeMaistre's retirement.

Since celebrating its 50th anniversary a decade ago, the major research accomplishments made by M. D. Anderson scientists and physicians include: The first successful correction of a defective p53 tumor suppressor gene in human lung cancer has led to pioneering gene therapies for lung, head and neck, prostate, bladder and several other forms of cancer; Identification of the defective PTEN gene is providing new ways to target therapy for a usually fatal form of brain cancer and other malignant tumors; Expanded landmark chemoprevention studies showing that drugs can prevent first or second primary cancers in individuals at high risk—and also reverse some pre-malignant lesions; Designed a rapid laboratory method to pinpoint gene abnormalities in chromosomes, thereby improving diagnosis and treatment monitoring of many diseases, including cancer; Developed a gene expression technique to predict which cancers will escape primary sites and spread to other organs of the body; Identified genetic variants of components for a common brain chemical, dopamine, that are associated with nicotine addiction; Reported the appearance of human malignant cells from normal blood cells with a technique that allows studying the intrinsic electrical properties of cells; Documented a molecular link between cigarettes and lung cancer from studies showing a carcinogen in tobacco smoke binds to key mutagenic sites in the p53 gene.

Today, M. D. Anderson's public education and community service initiatives help thousands of people reduce their risk of cancer and learn more about the disease.

The outstanding basic, translational and clinical research conducted at M. D. Anderson, has been supported in recent years with the
June 26, 2001

IN TRIBUTE TO ALFRED RASCON

HON. ELTON GALLEGLY
OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. GALLEGLY. Mr. Speaker, I rise for the second consecutive year to pay tribute to Alfred Rascon, who was recently confirmed as the 10th director of the Selective Service System.

Alfred is a remarkable man. Born in Mexico, he moved to Oxnard, California, in my district, with his family when he was a small child. His family raised him there and instilled in him the values of honor, integrity, a love of his adopt ed land and a reverence for life and his fellow human beings.

At age 17, he left Oxnard and joined the Army. He trained to be a medic and a paratrooper. On March 16, 1966, in the jungles of Vietnam, Alfred was severely and repeatedly wounded as he crawled from comrade to comrade to render aid, to protect his comrades and to retrieve weapons and ammunition needed in the firefight they were in.

By the time Alfred was loaded into a helicopter, he was near death. A chaplain gave him last rites. He survived. Because of his efforts, so did his sergeant and at least one other in his platoon.

But the Medal of Honor Alfred was due was lost in red tape, until two years ago, when the record was corrected.

He returned to civilian life, became a naturalized citizen and rejoined the Army. After another tour of duty in Vietnam and achieving the rank of lieutenant, Alfred again became a civilian. But he continued to serve his country, with posts in the Department of Justice, where he served with the Immigration and Naturalization Service, the Drug Enforcement Administration and INTERPOL. Prior to his appointment as director of the Selective Service System, he served for five years as its Inspector General.

He is married to the former Carol Lee Richard son. They have two children.

Mr. Speaker, Alfred Rascon is a humble man who achieved greatness by quietly and unselfishly doing what he believed was right. He is the right man to head up the Selective Service System. I know my colleagues will join me in congratulating Alfred on his selection and give him our full support in achieving the goals of his new position.

Mr. Speaker, today I recognize with profound gratitude all of the accomplishments made at The University of Texas M.D. Anderson Cancer Center. And, I warmly congratulate the dedicated faculty, staff, volunteers and supporters on the occasion of this remarkable institution’s 60th anniversary.

IN HONOR OF MS. SUSAN CULVER

HON. DENNIS J. KUCINICH
OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. KUCINICH. Mr. Speaker, I rise today to honor and recognize a fine individual and exceptional teacher, Ms. Susan Culver of Olmsted Falls Middle School, for her outstanding dedication to the education of young students.

Ms. Culver has spent the past few months organizing and planning a project for her seventh grade class at Olmsted Falls Middle School. Because of her time and dedication to enriching her students, Ms. Culver has received a grant that will enable her to analyze and research pollution in the Olmsted Falls community. Over the past few years, air and water pollution have become important issues in Olmsted Falls, and Ms. Culver has taken it upon herself to analyze this problem. With the help of 140 seventh-graders, Ms. Culver will test pH levels in local ponds, analyze animal specimens, research the food web, and so much more. This program will give students an opportunity to experience their community in a hands-on environment.

This program materialized only through hours of hard-work, planning and researching. Because of her efforts, Ms. Culver’s program has been chosen to receive a G.I.F.T., Growth Initiatives for Teachers grant. With this grant, Ms. Culver is offering students a wonderful learning experience that will broaden their educational horizons. Ms. Culver is also planning on taking courses at Cleveland State University about computers and will attend numerous conferences of the Environmental Education Council of Ohio.

Ms. Culver holds a bachelor’s degree in middle school math/science and is working toward a masters degree in instructional technology. In 1998, she began her teaching career as a tutor at Olmsted Falls Middle School and joined the full-time faculty in 1999. She teaches science in the classroom, but her influence extends much beyond simple biology and chemistry. Ms. Culver is giving students information that is not only pertinent to where they live, but that will be relevant for their entire lifetime.

Mr. Speaker, please join me in honoring a young teacher that is touching the lives of hundreds of students, Ms. Susan Culver. She has given her time and dedication to Olmsted Falls Middle School, and has earned the respect of students, faculty, and the entire Olmsted Falls community.

READING IS FUNDAMENTAL

HON. SILVESTRE REYES
OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. REYES. Mr. Speaker, as our First Lady Laura Bush said in April of this year “Early reading isn’t just good medicine, it’s an important part of a child’s daily activities. Children benefit greatly from reading activities starting at a very young age.” Mr. Speaker, our First Lady is absolutely right!

Unfortunately, in the 2002 budget, President Bush cut all federal funding for a 35-year-old nationwide reading program. The program which is know as Reading is Fundamental (RIF) is supported through the U.S. Department of Education’s Inexpensive Book Distribution Program (IBDP). RIF provides free, new books and family literacy services to 18,000 school and community sites with the vital help of more than 310,000 local volunteers.

RIF has a proven record and should not be destroyed or altered. For 35 years, it has given free paperback books to poor children in all 50 states, the District of Columbia, and U.S. offshore territories. If the federal government gives states reading grants, as President Bush wants, there is no guarantee that this
kind of program, which is badly needed, will continue.

My district of El Paso, Texas is an impoverished area of our country. Programs like Reading is Fundamental may not make much of a difference in more affluent areas, but they certainly do in El Paso. For some kids, a free book is the only access to reading that they have.

RIF programs operate in schools, libraries, community centers, child-care centers, Head Start and even Start centers, hospitals, migrant worker camps, homeless shelters, and detention centers. Today, thanks to public-private partnerships, RIF is the nation’s largest child and family literacy organization. RIF has placed more than 200 million books in the hands and homes of America’s children.

Now, President Bush has proposed a five-year plan to improve young children’s reading ability by cutting all funding for IBDP and consolidating the funding into state-level reading grants. This is simply not the answer. The answer is RIF.

I respectfully request that the Administration restore the RIF program in the 2002 budget. The RIF program is an example of a program that is working and making a real difference in the lives of countless children across the country. It would be a travesty to destroy it.

HONORING HIS HOLINESS KAREKIN II NERSISSIAN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to honor His Holiness Karekin II Nersissian, the Supreme Patriarch and Catholicos of All Armenians. Karekin II traveled to the United States last month and visited Armenian churches, schools and a retirement home in Fresno, California and surrounding communities.

Karekin II was born in the village of Voskehat, in 1951, in the Etchmiadzin Region of Armenia. He entered the Theological Seminary of the Mother See of Holy Etchmiadzin in 1965 and graduated in 1971. In 1970 he was ordained a Deacon, and in 1972 he was ordained a Celibate Priest. Karekin II then left for Germany to serve as a pastor, while continuing his theological education at the University of Bonn.

In 1979, Karekin II returned to the Mother See of Holy Etchmiadzin, and thereafter, left for Russia to study at the Theological Academy of the Russian Orthodox. In 1980, he was appointed Assistant to the Vicar General of the Araratian Pontifical Diocese. In 1983, he was appointed to Vicar General of the Araratian Pontifical Diocese. Karekin II was ordained a Bishop in October of 1983 and was granted the title Archbishop in November of 1992. In 1998, Karekin II was appointed to the Vicar General of the Catholicos.

On Wednesday, October 27, 1999, Karekin II was elected as the 132nd Supreme Patriarch and Catholicos of All Armenians. Since his ascension to the head of the Armenian Church, Karekin II has actively rejuvenated the theological Seminary. He has been instrumental in the construction of new churches and the building of St. Gregory the Illuminator Mother Cathedral in Yerevan, Armenia. Many new priests have been ordained and assigned to churches in Armenia and Diaspora under the leadership of Catholicos Karekin II.

Mr. Speaker, I urge my colleagues to join me in honoring His Holiness Karekin II Nersissian for his spiritual leadership to all Armenians.

TRIBUTE TO PAUL BEAZLEY

HON. JAMES E. CLYBURN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to a dear friend, a former colleague, and fellow South Carolinian, Paul W. Beazley. On July 16th, Paul will retire from South Carolina State government. It is a retirement well deserved and we will be sorely missed.

Before coming to this august body, I served as Human Affairs Commissioner for the State of South Carolina. I was fortunate to have Paul among my support staff. Paul joined the State Human Affairs Commission in January of 1973. Upon my arrival in October 1974, I named him Director of the Technical Services Division where he served for five years before becoming Deputy Commissioner.

During my nearly 18-year tenure at the Commission, Paul was an invaluable colleague, and became an expert on the issues of equal opportunity and diversity, particularly in the workplace. He supplemented his vast experience in this area with several published works including: Think Affirmative: The Blueprint, which became the leading affirmative action planning manual in the 1970’s and 1980’s. He recently wrote, The South Carolina Human Affairs Commission: A History, 1972-1977; and Who Gives a Hoot at the EEOC?, a public policy case study.

An active member in his community both professionally and personally, Paul currently serves on the Board of Directors of the Midlands Marine Institute, and is president of the Alumni Association of South Carolina State Government’s Executive Institute. Paul is also chairman of the State Appeals Board for the United States Selective Service System.

In addition, Paul is a member of various professional associations, and works as a volunteer for many non-profit organizations. He is also a member of the Eau Claire Rotary Club of Columbia, and has served as President and Secretary of the National Institute for Employment Equity, and as Chairman of the Greater Columbia Community Relations Council. He has also served on the Board of Directors of the Family Services Center of Columbia, the Board of Visitors of Columbia College, the Board of Directors of Leadership South Carolina and numerous task forces at the state and local level.

Prior to joining the Commission in 1973, Paul was a Presbyterian Minister. He served as a pastor, a Conference center Director, and an Educational Consultant. He has also worked as a Consultant for the University of South Carolina General Assistance Center, teaching in the field of test taking and problem-solving. He founded a private school and directed an experimental reading program for the Columbia Urban League.

Paul received his Bachelor of Arts degree from East Tennessee State University, his Master of Divinity from Union Theological Seminary in Virginia, and a Masters of Education from the University of South Carolina, where he also completed Doctoral studies. Paul is also a graduate of the South Carolina Executive Institute (1992), and Leadership South Carolina (1987).

Paul, a longtime resident of my current hometown, Columbia, South Carolina, is married to the former Marcia Rushworth. They have one son, Paul Derrick Beazley, who lives in Charleston. Paul is a competitive tennis player, and we share yet another common interest in pastime, golf.

Mr. Speaker, I ask you to join me in saluting one of our nation’s authorities on diversity, one of my State’s most highly respected professionals, one of my Community’s finest citizens, and one of my good friends, Paul W. Beazley, upon his retirement. Please join me in wishing him good luck and Godspeed.

IN TRIBUTE TO STEPHEN WALPOLE

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. FARR of California. Mr. Speaker, I rise this evening to join with my friend and colleague, Congressman Mike Honda of the 15th District of California, in honoring a dedicated public servant. Stephen Walpole, Chief of Police for the Scotts Valley Police Department, will be retiring on July 6, 2001, bringing an end to 30 years of service to his community.

Chief Walpole is a constituent of Congresswoman Honda, since part of Santa Cruz County is in his congressional district. However, Chief Walpole and I came to know each other well during my years serving in the California Assembly. His work on behalf of the residents of Scotts Valley is an amazing reminder of the importance of public service in our nation. When Chief Walpole’s career began as a reserve officer in 1970 with the Scotts Valley Police Department his potential was quickly recognized. He was promoted to Sergeant in 1974, Lieutenant in 1979, and Chief of Police in 1986. Besides his focus on the community of Scotts Valley, Chief Walpole has also served in several County and State-wide positions, bringing his experience and leadership to others in law enforcement and government.

Chief Walpole has also been the recipient of many awards and recognitions, including the Exchange Club Officer of the Year in 1973 and 1983; the Meritorious Service Award from the Scotts Valley City Council in 1989 for his efforts during the 1989 Loma Prieta earthquake which devastated many parts of Santa Cruz County; and was named as the Scotts Valley Chamber of Commerce Man of the Year in 1989.
Mr. Speaker, when he retires on July 6, 2001, Chief Wapole will be leaving behind a three-decade legacy of excellence and professionalism. It has been a pleasure for myself and Congressman HONDA to work with him and other members of the Scotts Valley community, and it is an honor to be able to pay tribute to him here. We wish him well in his upcoming retirement, but we know that he will always remain an active member of the community.

HONORING JORDAN HENNER
HON. STEVE ISRAEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. ISRAEL. Mr. Speaker, it is with great pride that I rise today to recognize one of New York’s outstanding young students, Jordan Henner. This young man has received the Eagle Scout honor from his peers in recognition of their achievements.

Since the beginning of this century, the Boy Scouts of America have provided thousands of boys and young men each year with the opportunity to make friends, explore new ideas, and develop leadership skills while learning self-reliance and teamwork.

The Eagle Scout award is presented only to those who possess the qualities that make our nation great: commitment to excellence, hard work, and genuine love of community service. Becoming an Eagle Scout is an extraordinary award with which only the finest Boy Scouts are honored. To earn the award—the highest advancement rank in Scouting—a Boy Scout must demonstrate proficiency in the rigorous areas of leadership, service, and outdoor skills; they must earn a minimum of 23 merit badges as well as contribute at least 100 man-hours toward a community oriented service project.

I ask my colleagues to join me in congratulating the recipients of these awards, as their activities are indeed worthy of praise. Their leadership benefits our community and they serve as role models for their peers.

Also, we must not forget the unsung heroes, who continue to devote a large part of their lives to make all this possible. Therefore, I salute the families, scout leaders, and countless others who have given generously of their time and energy in support of scouting.

It is with great pride that I recognize the achievements of Jordan and bring the attention of Congress to this successful young man on his day of recognition. Congratulations to you and your family.

JIM ROPER, INDUCTEE TO THE NEW MEXICO-BROADCASTING ASSOCIATION’S HALL OF FAME

HON. TOM UDALL
OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. UDALL of New Mexico. Mr. Speaker, I rise to honor one of the outstanding citizens of the northeast corner of my home state of New Mexico—Jim Roper, who was recently inducted into the New Mexico Broadcasting Association’s Hall of Fame. As a pioneer with more than 50 years in the industry, he is eminently deserving of this prestigious honor.

Jim Roper is the chief executive officer of Raton Broadcasting and head of KRTN–AM and FM. These stations bring music and important news to the citizens of Colfax, Union, and Harding Counties as well as southeastern Colorado. In northeastern New Mexico, I cannot emphasize how important the medium of radio is as a critical news source. Mr. Roper and his team have served its citizens well.

Jim’s career began in 1948, while still in high school. And it all started because the station’s general manager had laryngitis. Jim and his family lived in the now abandoned town of Brilliant, not far from Raton, where radio was one of the only sources of entertainment. During a high school basketball game, Stan Brown, then the general manager of KRTN, had lost his voice and could not broadcast the game report. Jim said, “I don’t know, but I’ll try.” One thing led to another, and soon he was spinning records at the station. In less than two decades, he was the station’s owner.

Jim has seen vast changes in the radio broadcasting business since he began. Tape recorders replaced wire recorders, compact discs replaced records and satellites replaced disc jockeys. However, at KRTN on-site folks still operate the station, and despite lucrative offers to purchase the small station, Roper has refused to sell.

Jim has always been committed to providing quality service to the listeners of KRTN and capturing the essence of rural New Mexico. His dedication and commitment have made him an important part of the community. Jim has served as the city commissioner, the president of the Raton Chamber of Commerce, as a member of the city parks and recreation board and as the president for the Raton water board.

There have been two constants that have run throughout Jim’s life: the radio station and his loving family. He is a proud husband and father, whose family has kept him focused and grounded.

Mr. Speaker, Jim Roper is a champion of his community and is completely deserving of being named as one of the first inductees into the New Mexico Broadcasting Association’s Hall of Fame. I urge my colleagues to join me in saluting Jim Roper for his vast accomplishments.

HONORING MAYOR JOHNNY ISBELL OF PASADENA, TEXAS

HON. KEN BENTSEN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. BENTSEN. Mr. Speaker, I rise today to honor and recognize a fine individual and exceptional teacher, Ms. Tanya Parisi of Olmsted Falls Middle School, for her outstanding dedication to the education of young students.

Ms. Parisi is one of two teachers that have organized a program that will enrich students and address concerns pertinent to the Olmsted Falls community. Within the past few years, pollution has become a growing concern for the small suburb of Olmsted Falls, and Ms. Parisi has taken it upon herself to analyze this problem. With the help of 140 seventh-graders, Ms. Parisi will be researching water and air pollution, studying water samples, researching the food web, identifying living specimens, and so much more. Throughout this entire project, students will maintain a computer portfolio of their research and publish their results online.

This program materialized only through the tireless efforts of Ms. Parisi. Her love and
determination to enrich the lives of her students has earned her the very prestigious G.I.F.T. Growth Initiative for Teachers grant. Ms. Parisi has also been taking courses in computers and technology at Cleveland State University and attending conferences of the Environmental Education Council of Ohio.

Ms. Parisi holds a bachelor’s degree in education and is now pursuing a dual masters degree in science and technology. She began teaching in 1996 and has been with Olmsted Falls Middle School since 1999. She teaches math in the classroom, but her influence extends much beyond numbers and calculations. Ms. Parisi is giving students information that is not only pertinent to where they live, but that will be relevant for their entire lifetime.

Mr. Speaker, please join me in honoring a young teacher that is touching the lives of hundreds of students. Ms. Tanya Parisi. She has given her time and dedication to Olmsted Falls Middle School, and has earned the respect of students, faculty, and the entire Olmsted Falls community.

ENCOURAGING MEMBERS OF CONGRESS AND THEIR STAFFS TO HAVE SCREENINGS FOR PROSTATE CANCER

HON. SILVESTRE REYES
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. REYES. Mr. Speaker, as we begin to celebrate Men’s Health Week, the week leading up to Father’s Day, I rise today to applaud the efforts of my colleagues to bring attention to many issues surrounding men’s health.

I would like to encourage my colleagues and members of their staffs to have screenings for prostate cancer. Except for lung cancer, prostate cancer is the greatest cause of cancer deaths among American men. At highest risk are African-Americans and those with a family history of prostate cancer. One in five men will develop prostate cancer in his lifetime and the American Cancer Society estimates that over 32,000 men will die from the disease this year, a mortality rate approaching that of breast cancer in women. It is recommended that men at high risk begin annual prostate cancer screenings at age 40, and that all other men begin at age 50.

As one of my former colleagues and good friend, Bill Richardson once said, “Recognizing and preventing men’s health problems is not just a man’s issue. Because of its impact on wives, mothers, daughters and sisters, men’s health is truly a family issue.” We owe it to our families to have our prostate screenings. A tiny bit of discomfort is worth saving your life and sparing your families from the pain of an untimely death.

RECOGNIZING JOHN G. TAYLOR
HON. GEORGE RADANOVICH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to recognize John G. Taylor for being selected as the Person of the Year 2000 for his accomplishments in the area of religious journalism. The Muslim Public Affairs Council-Fresno will present the award to Taylor on Saturday, April 28, 2001 at their annual awards dinner.

John G. Taylor is a first-generation American. He was born in Brooklyn, New York in 1950. He worked as a reporter for a weekly newspaper and as a correspondent for the New York Times while he earned a degree in journalism at New York University. After college, he worked as a desk editor at newspapers in Hartford and New London, Connecticut.

In 1981, John and his family relocated to Fresno, where he began a 20-year career working with the community paper, the Fresno Bee. Most recently, John’s reporting focused on issues of religious significance to the Fresno community, including Pope John Paul II’s World Youth Day Day, the “Stand in the Gap” million-man Christian march in Washington, D.C. He eagerly pur sued stories about people and matters of faith for the Fresno Bee until January of this year. John accepted a position as a senior communications specialist/senior writer with Community Medical Centers. John and his wife Judy have six children and seven grandchildren.

I urge my colleagues to join me in praising Mr. Taylor’s literary contribution to the city of Fresno and in wishing him continued success in the future.

TRIBUTE TO SAMETTA TAYLOR
HON. JAMES E. CLYBURN
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. CLYBURN. Mr. Speaker, I rise today to ask my colleagues to join me in paying tribute to Sametta Alicia Taylor. Ms. Taylor recently qualified as a National Finalist in the 2001 Pre-Teen America Scholarship and Recognition Program to be held on July 3 in Baton Rouge, Louisiana. Sametta is the 12-year-old daughter of Sammie and Michelle B. Taylor of Moncks Comer, South Carolina. She will represent our state in the speech category as South Carolina’s Miss Pre-Teen.

She participated in the South Carolina Pre-Teen Scholarship and Recognition Program held September 2-4, 2000 in Greenville, South Carolina. Young ladies, ages seven to twelve, were invited who have been recognized publicly for their outstanding personal achievements, volunteer services, school involvement, leadership abilities, and creative talents. State finalists were judged on similar categories including communicative ability, general knowledge, onstage expression, and acknowledgment of accomplishments.

Local participants were selected primarily from public announcements of achievements, by teachers, guidance counselors, and recommendations from past participants. Over 120 South Carolinians participated in the event.

Sametta received a $1,000 educational bond, $100 educational bond for winning the speech competition, and 4 trophies for the highest scholastic average of all the participants.

Sametta has a 10-year-old brother, Sammie Taylor, III. She is the granddaughter of Joseph and Emily J. Brown of Moncks Comer, and Sammie Taylor, Sr. and Josephine Sanders of Rembert, South Carolina. Her godparents are Carl and Altissie Weldon of Bowie, Maryland.

Mr. Speaker, please join me and my fellow South Carolinians in honoring Sametta Taylor for her outstanding achievements.

IN HONOR OF JOSEPH J. GARRY, JR.
HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. KUCINICH. Mr. Speaker, I rise today in honor of Joseph J. Garry, Jr. on his remarkable accomplishment of instilling joy and laughter through theater arts in Cleveland for over 34 years.

Joe Garry, who performs side by side with David Frazier, was just honored by the award-winning actress Patricia Neal with the Signstage Theater’s annual Spotlight award, which recognizes individuals for their contributions to the arts and culture in Cleveland.

Gary and Frazier, well-known in the local and national entertainment circles, were instrumental in the success of many long-running productions. They are best known to Cleveland audiences for their landmark musical “Jacques Brel is Alive and Well and Living in Paris” which ran for two and a half years, and by supporting the restoration of the Playhouse State complex in Cleveland.

Garry, director and former professor and head of the Theater Department at Cleveland State University has written, directed, and produced plays, musicals, and operas. Together with his partner, they have actively produced 15 musicals. They have received many prestigious awards, including being inducted into The Cleveland Play House Hall of Fame for their many years as actors in repertory there, and for performing both nationally and internationally.

Recently, they have performed on the Cunard liners, QE2, Caronia and Seabourn Sea. There they sailed the world first class and perform on the bill with many theater legends, while hosting a group of Cleveland friends and including them in the performances.

Joseph Garry has proved to help cultivate not only the Cleveland arts community, but locations throughout the world via his musical theatrical abilities and inspiration. I ask my colleagues to rise in recognizing this great man, Joseph J. Garry, Jr. for his remarkable contributions to the theater arts.
IN HONOR OF THE 226TH BIRTHDAY OF THE UNITED STATES ARMY

HON. SILVESTRE REYES
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. REYES. Mr. Speaker, on Thursday, June 14th, we celebrated the 226th birthday of the United States Army. The Army’s proud tradition, which dates back to 1775, has always stood tall, both in times of peace, and times of conflict which placed American men and women in harm’s way. For more than two centuries, the soldiers of the Army have been poised and ready to answer the call of duty to defend this great nation. The military is a noble profession and those who have served have demonstrated their patriotism and selflessness. The Army has always been relevant and remains relevant today. With the Transformation of the Army to a leaner, lighter, and more lethal force, the Army will continue to be relevant in the future. As we forge into the future, let us reflect on the great legacy the Army has given this nation, through the great men and women who were and are proud to be Americans.

EXTENDING APPRECIATION TO THE MEMBERS OF THE SUBCOMMITTEE ON AGRICULTURE APPROPRIATIONS

HON. GEORGE RADANOVICH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. RADANOVICH. Mr. Speaker, I wish to extend my appreciation to our fine chairman, the ranking member, and all of the members of the Subcommittee on Agriculture, Rural Development, Food and Drug Administration and Related Agencies for their good work on the agriculture spending bill and the accompanying report that passed the full committee on June 13th. In particular, I am thankful that the Subcommittee has recognized the important contributions made by the Valley Children’s Hospital located in California’s Central Valley.

Valley Children’s Hospital (VCH) is the only freestanding children’s hospital in a rural area in the United States. VCH serves the 10-county, 60,000 square mile region between Los Angeles and the San Francisco Bay, and it functions as a “safety-net” health care provider to all children of Central California. The facility provides services regardless of an individual’s race, religion or ability to pay, with over 70 percent of its patients on MediCal.

As you can imagine, VCH faces many challenges to its ability to provide health care. These challenges include inadequate transportation, shortages of health professionals, high poverty and unemployment, and the fact that there are 93 different spoken languages and dialects in the region. Each of the 10 counties that VCH serves is federally designated as medically underserved.

In light of budget realities, we must continue to carefully define our appropriations priorities.

EXTENDING OF REMARKS

I appreciate the Subcommittee’s recognition that Valley Children’s Hospital is a meritorious organization with projects that deserve special consideration.

PERSONAL EXPLANATION

HON. HARRISON FORD, JR.
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. FORD. Mr. Speaker, due to a commitment in my Congressional District, I was absent on Monday, June 25th for three recorded votes. Had I been present, I would have voted “aye” on rollcall votes, No. 186, H.Res 160, No. 187, H. Res. 99, and rollcall vote No. 188, H. Con. Res. 161.

HONORING CHARLOTTE KEYS

HON. RONNIE SHOWS
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. SHOWS. Mr. Speaker, I rise today to congratulate Charlotte Keys, who was recently honored as a 2001 Robert Wood Johnson Community Health Leader. Ms. Keys is one of only 10 individuals from around the country to receive this distinguished award, which includes a $100,000 grant to help further her work.

Ms. Keys is the founder of an organization called Jesus People Against Pollution, located in Columbia, Mississippi, which works to mobilize the community to improve health and environmental justice. Her early efforts focused on those in the community who suffered severe health problems as a result of a major explosion, which dates back to 1775, has always meant contributions made by the Valley Children’s Hospital.

The Army’s proud tradition, which dates back to 1775, has always been relevant and remains relevant today. With the Transformation of the Army to a leaner, lighter, and more lethal force, the Army will continue to be relevant in the future. As we forge into the future, let us reflect on the great legacy the Army has given this nation, through the great men and women who were and are proud to be Americans.

In light of budget realities, we must continue to carefully define our appropriations priorities.

EXTENDING OF REMARKS

I appreciate the Subcommittee’s recognition that Valley Children’s Hospital is a meritorious organization with projects that deserve special consideration.

PERSONAL EXPLANATION

HON. HOWARD COBLE
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. COBLE. Mr. Speaker, I rise today as the U.S. Mint is poised to issue the 14th in a series of State Quarters that started in 1999 and which will continue through at least the year 2008.

On June 4, 2001, I read an interesting article in The Record, the largest newspaper in my Congressional District, about the origins of the state quarter, which came about because of the legislative vision of my colleague from Delaware, Representative Michael Castle and the tenacity of the Mayor of my hometown, the Borough of Fair Lawn, David Ganz.

Mayor Ganz is not a stranger to the congressional legislative process. In 1973, while still a student at Georgetown University here in Washington, he was admitted to the Periodical Press Gallery of the United States Senate as a Special Correspondent for Numismatic News Weekly, a hobby publication based in Wisconsin. He went on to become a member of the Board of Governors of the American Numismatic Association, a Congressionally-chartered organization and referred to as the National Coin Club. In 1993, U.S. Treasury Secretary Lloyd Bentsen, named him among the first six members of the newly-created Citizens Commemorative Coin Advisory Committee.

Both as President of the American Numismatic Association, and as a columnist for various coin collecting hobby publications, David had long advocated for a return to commemorative coinage [for which there had been a hiatus from 1954 until 1981], but also for truly circulating commemoratives. He testified before the House and Senate Banking Committees on numerous occasions in the quarter century following his first appearance in March of 1974.

Mr. Speaker, bureaucracy is often afraid of change for no reason beyond the fact that it is not familiar, not predictable, or not safe. Mayor Ganz had a vision that circulating commemorative coinage would be good for our nation’s coin collectors, good for our nation’s coffers, and ultimately, educational to all Americans.

It is my hope that she continues to run this race for justice. It is clear that she has covered quite a distance, but the road still stretches out ahead.

Mr. Speaker, it is a privilege today to honor Charlotte Keys for this well deserved leadership award. I am confident that it will help to strengthen and sustain her important work.

PERSONAL EXPLANATION

Mr. Speaker, it is a privilege today to honor Charlotte Keys for this well deserved leadership award. I am confident that it will help to strengthen and sustain her important work.
EXTENSIONS OF REMARKS

June 26, 2001

HON. PATRICK J. KENNEDY
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. KENNEDY of Rhode Island. Mr. Speaker, I rise to speak today about a distinguished member of my district who is being honored by an organization which has had an immeasurable impact on America. Jeannine Howard, a retired Bell Atlantic Pioneer from Rumford, Rhode Island, is Junior Achievement’s National Elementary School Classroom Volunteer of the Year. She has volunteered for Junior Achievement for four years and taught 25 classes in that time. Ms. Howard always goes above and beyond her classroom duties, as she works to gradually increase the amount of parents involved in their children’s Junior Achievement efforts in Rhode Island. She even serves as the volunteer for those new programs herself, always with great enthusiasm and energy.

The history of Junior Achievement is a true testament to the indelible human spirit and unparalleled entrepreneurship. Junior Achievement was founded in 1919 by Horace Moses, Theodore Vail, and Senator Murray Crane of Massachusetts, as a collection of small, after-school business clubs for students in Springfield, Massachusetts.

As the rural-to-city exodus of the populace accelerated in the early 1900s, so too did the demand for workforce preparation and entrepreneurship. Junior Achievement students were taught how to think and plan for a business, acquire supplies and talent, build their own products, advertise, and sell. With the financial support of companies and individuals, Junior Achievement recruited numerous sponsoring agencies such as the New England Rotarians, Boy Scouts, Girl Scouts, Boys & Girls Clubs, the YMCA, local churches, playground associations and schools to provide meeting places for its growing ranks of interested students.

In a few short years JA students were competing in regional expositions and trade fairs and rubbing elbows with top business leaders. In 1925, President Calvin Coolidge hosted a reception on the White House lawn to kick off a national fundraising drive for Junior Achievement’s expansion. By the late 1920’s, there were nearly 800 JA Clubs with some 9,000 Achievers in 13 cities in Massachusetts, New York, Rhode Island, and Connecticut.

During World War II, enterprising students in JA business clubs used their ingenuity to find new and different products for the war effort. In Chicago, JA students won a contract to manufacture 10,000 pants hangers for the U.S. Army. In Pittsburgh, JA students developed a specialized lined box to carry off incendiary devices, which was approved by the Civil Defense and sold locally. Elsewhere, JA students made baby incubators and used acetylene torches in abandoned locomotive yards to obtain badly needed scrap iron.

In the 1940’s, leading expositions of the day such as S. Bayard Colgate, James Cash Penney, Joseph Sprang of Gillette and others helped the organization grow rapidly. Stories of Junior Achievement’s accomplishments and of its students soon appeared in national magazines of the day such as TIME, Young America, Colliers, LIFE, the Ladies Home Journal and Liberty.

In the 1950s, Junior Achievement began working more closely with schools and saw its growth increase five-fold. In 1955, President Eisenhower declared the week of January 30 to February 5 as “National Junior Achievement Week.” At this point, Junior Achievement was operating in 139 cities and in most of the 50 states. During its first 45 years of existence, Junior Achievement enjoyed an average annual growth rate of 45 percent.

To further connect students to influential figures in business, economics, and history, Junior Achievement started the Junior Achievement National Business Hall of Fame in 1975 to recognize outstanding leaders. Each year, a number of business leaders are recognized for their contribution to the business industry and for their dedication to the Junior Achievement experience. Today, there are 200 laureates from a variety of businesses and industries that grace the Hall of Fame.

By 1982, Junior Achievement’s formal curriculum offering had expanded to Applied Economics (now called JA Economics), Project Business, and Business Basics. In 1988, more than one million students per year were estimated to take part in Junior Achievement programs. In the early 1990s, a sequential curriculum for grades K–6 was launched, catapulting the organization into the classrooms of another one million elementary school students.

Today, through the efforts of more than 100,000 volunteers in the classrooms of America, Junior Achievement reaches more than four million students in grades K–12 per year. JA International takes the free enterprise message of hope and opportunity even further . . . to more than 1.5 million students in 111 countries. Junior Achievement has been an influential part of many of today’s successful entrepreneurs and business leaders. Junior Achievement is truly the story of America—the fact that one idea can influence and benefit many lives.

Mr. Speaker, I wish to extend my heartfelt congratulations to Jeannine Howard of Rumford for her outstanding service to Junior Achievement and the students of Rhode Island. I am proud to have her as a constituent and congratulate her on her accomplishment.

TRIBUTE TO DOROTHY STEVENS ENOMOTO

HON. ROBERT T. MATSUI
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. MATSUI. Mr. Speaker, I rise in tribute to Dorothy Stevens Enomoto, the first African American woman to manage a California Department of Corrections institution. Mrs. Enomoto, one of Sacramento’s most notable citizens, will receive an honorary Doctor of Humane Letters degree from California State University, Sacramento on May 25th, 2001. As her friends and family gather to celebrate Mrs. Enomoto’s outstanding achievement, I ask all
HONORING JOHN S. KOZA

HON. JAMES A. LEACH
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. LEACH. Mr. Speaker, I rise today to introduce my colleagues to John S. Koza of Iowa City, Iowa. Junior Achievement National Middle School Volunteer of the Year.

Over the past 12 years, John has taught 38 classes in basic business methods as a Junior Achievement instructor. His open, honest and caring teaching style creates a fun, relaxed environment in which students both learn the skills needed to become successful entrepreneurs and are imbued through John’s example with the importance of giving back to your community.

John’s work in the Junior Achievement exemplifies the history of program as a quintessential American success story.

As the exodus from farm to city accelerated in this country at the beginning of the 20th century, so did the need to prepare young people for the demands of a changing workplace. Junior Achievement was founded in Massachusetts in 1919 as a collection of small, after school business clubs to help meet that need, with students learning how to create business plans, to set up appropriate accounting procedures, and to learn basic manufacturing, advertising and marketing techniques.

In 1925, President Calvin Coolidge hosted a White House reception to kickoff a national fundraising drive for Junior Achievement, and by the late 1920’s there were nearly 800 JA Clubs with 8,000 participants in 13 cities throughout New England.

During World War II, enterprising students in JA business clubs applied their ingenuity to aid the war effort. In Chicago, JA students won a contract to manufacture 10,000 pants hangers for the Army; in Pittsburgh, JA students developed a specially lined box to dispose of incendiary devices which was approved by Civil Defense and sold locally; elsewhere, they organized drives to obtain badly needed scrap metal.

The 1950’s saw Junior Achievement increase five-fold, with President Eisenhower declaring the week of January 30 to February 5, 1955, “National Junior Achievement Week.” By then, Junior Achievement was operating in 139 cities in most of the 50 states. By 1982, JA’s formal curricula expanded to Applied Economics, Project Business and Business Basics; by 1988, more than one million students were participating in its programs.

Today, through the efforts of more than 10,000 volunteers like John Koza in the classrooms of America, Junior Achievements reaches over 4 million students in grades K to 12 annually. JA International takes the free enterprise message of hope and opportunity to more than 1.5 million students in 111 countries.

Mr. Speaker, I congratulate John Koza of Iowa City for his outstanding service to Junior Achievement and the young people of Iowa. He is a wonderful example for us all.

TRIBUTE TO LOLA QUENSENBERY

HON. ROBERT E. ANDREWS
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. ANDREWS. Mr. Speaker, I rise today to honor Lola Quensenberry, a woman who has devoted 19 years of service with the USDA Natural Resources Conservation Service (NRCS) through the Earth Team volunteer program. Lola has logged over 18,000 hours of service since she began volunteering in Bythe, California where she worked with the Palo Verde Resource Conservation District.

While in California, Lola assisted with the development of an intensive agricultural irrigation water management program. Her primary role was to operate a Campbell Pacific Nuclear neutron probe, which is an accurate method of monitoring soil moisture, at over 200 sites. Lola also assisted with the evaluation of over 50 irrigation systems, helping the farmers to optimize their water use and thereby conserve our precious water resources.

Lola was also involved with the development of the McCoy Wash PL566 Small Watershed project—a project that is currently under construction.

Upon moving to New Jersey in 1987 to help care for her invalid mother-in-law, Lola continued her Earth Team involvement by volunteering for the South Jersey Resource Conservation and Development Council. Lola’s major responsibility is assisting with the development of the Resource Information Serving Everyone (R.I.S.E.) program. This fully functional program includes operation of eighteen Campbell Scientific weather stations located in seven southern New Jersey counties and four Campbell Scientific water quality stations.

Lola actively participates in numerous watershed projects in New Jersey. She attends meetings and provides a unique perspective to the NRCS-led Millstone watershed project, the proposed Repaucreek watershed project, and the Delaware Valley Regional Planning Commission’s two projects—Crosswicks WMA20 and the Lower Delaware Tributaries WMA 16.

Lola has volunteered time to assist the Bear Creek Conservancy/Stewardship Association with the creation and maintenance of a fresh water marsh for waterfowl habitat. She also volunteers to the South Jersey Chapter of Quail Unlimited to help create upland wildlife habitat.

For over 19 years, Lola Quensenberry’s volunteer spirit, together with the synergy gained from working with other Earth Team members and resource conservation professionals, has helped to conserve resources and improve the environment in California and New Jersey.
IN HONOR OF DAVID O. FRAZIER

HON. DENNIS J. KUCINICH
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. KUCINICH. Mr. Speaker, I rise today in honor of David O. Frazier, on his incredible accomplishments in the arts and contributions to theater in Cleveland.

Frazier began his musical profession the old-fashioned way by performing in a recital for his piano teacher. Little did he know that this was the starting point of an amazing career that would span more than five decades and take him around the world. Fate eventually led him to Cleveland where his professional career took off with his performance at the Cleveland Playhouse, America’s oldest resident professional theater. His dedicated work kept him busy at the Playhouse for 34 years during which he performed in over 150 productions. When Cleveland’s Playhouse Square was threatened with demolition, Frazier took a leave of absence from his career to aid in rescuing it. He appeared in the record breaking production of “Jacques Brel is Alive and Well and Living in Paris”, which became the longest running show. The production saved Playhouse Square. Now 27 years later, Playhouse Square has become the second largest performing arts center in America.

Together with his partner and collaborator Joe Garry, they have accomplished many awhestruck performances. Recently, they have performed on the Cunard liners, QE2, Caronia and Seabound Sea, There they sail the world, and for performing both nationally and internationally.

As if to punctuate this point, the Energy Independence Act of 2001, advanced by the President, with the energy strategy that has been laid out, provides for a 20-year Regional Transportation Plan for San Diego County.

As a member of these organizations and as an individual advocate for the enhancement of the passenger rail service in southern California, Councilman Kellegian has raised millions of dollars for the funding of various rail projects. Recently, Joe and I were successful in obtaining a $1 million appropriation for the Solana Beach Intermodal Transit Station Structure. This money is to be used to initiate a funding package for park expansion and other improvements at the Solana Beach station, in order to help increase the use of the San Diego Coaster.

Since much of southern California and especially San Diego County are such large, sprawling areas, finding efficient public transportation methods proves to be a challenge. Thanks to the efforts of citizens like Councilman Kellegian, above-ground commuter rail service has flourished in recent years, providing, for less congested roads, cleaner air, a healthier environment and an overall better quality of life. I hope that everyone in the city of Solana Beach and the 51st District will join me in congratulating Joe for his achievements in improving rail service in San Diego County.

Mr. CRENSHAW. Mr. Speaker, last week, the House Budget Committee held an informative hearing on the economic and budgetary effects of our nation’s energy policy. Energy has always been a necessary ingredient—either directly or indirectly—to all our goods and services. Particularly as our economy becomes more and more dependent on technology, energy is increasingly the crucial ingredient.

As to punctuate this point, the Energy Information Administration at the Department of Energy has concluded through its research that falling energy prices can enhance economic growth by about 0.7 percent over a 2-year period. Furthermore, stable energy prices that are not fluctuating widely may enhance growth by as much as 0.5 percent-age points over 2 years. Only a few tenths of a percent can make a world of difference, particularly for small businesses, small investors, and working families.

The President began speaking about the need to develop a national energy policy that addresses both long-term and short-term problems and solutions long before the energy crisis in California became apparent. The future of action that he has presented to the nation through his National Energy Policy Development Group is responsible, sound, and comprehensive. It includes suggested solutions to our lack of domestic energy supply and our dependence on foreign sources, as well as recommendations for the development of energy supplies for the 21st Century.

Furthermore, for the most part, the President has made a serious effort to take into account local concerns and interests where they intersect with the nation’s interest in an energy policy that crosses geographic boundaries. I do, however, hope to have the opportunity to work with the President and his administration to find a compromise to the proposals to develop oil and gas exploration in the Eastern Gulf of Mexico that is consistent with the wishes of Floridians. Florida is renowned for its pristine and beautiful beaches and oceans. Our economy depends on that reputation remaining intact and vibrant. In fact, 40 million tourists traveled to Florida in 1999, spending $46 billion in Florida’s hotels, shops, restaurants, and attractions. It is because of our commitment to the environmental and economic health of our state that Floridians have consistently opposed oil and gas development less than 100 miles off the shores of Florida. This is a position that has had the support of Republicans and Democrats alike.

There is currently under consideration within the Administration proposals to explore within this safe harbor that Florida has requested. While I am pleased by the healthy and productive ongoing debate on this matter, I remain opposed to drilling within this safe harbor. I have been encouraged by the seeming willingness of the Bush Administration to work with the State of Florida to seek further moratoriums in the Straits of Florida region by the famous Florida Keys. And, I am very hopeful that the Administration will work with the State to consider restricting lease sales in the Eastern Gulf so that oil and gas exploration can be pursued for the nation while respecting the concerns of Florida.

A TRIBUTE TO JOEL BUCKWALD, NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

HON. JERROLD NADLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. NADLER. Mr. Speaker, I rise today to pay tribute to Joel Buckwald, a Senior Archivist in the New York office of the National Archives and Records Administration whose
service to this country spans the past sixty years. Mr. Buckwald began working for the National Archives on June 3, 1941 after two weeks with the Public Buildings Administration. Hired under the first Archivist of the United States as a Junior Professional Assistant, he quickly rose to the rank of Junior Archivist before enlisting in the Navy at the end of 1942. During World War II, Mr. Buckwald was assigned to the United Nations Central Training Film Committee. Afterwards he studied at the City College of New York and in 1947 returned to the National Archives, where he has worked for the past fifty-four years.

In 1950 Mr. Buckwald moved backed to the New York area to help establish the agency's first regional records center. Thirteen years later he was a consultant to the Organization of American States in archives and records management, spending three months advising the Ministry of Foreign Affairs in Lima, Peru. In 1970 he became the first head of the archives branch for New York, New Jersey, Puerto Rico, and the U.S. Virgin Islands, a post he held for seventeen years before becoming Senior Archivist in what is now the Northeast Region of the National Archives and Records Administration.

Today the National Archives and Records Administration will honor Mr. Buckwald's distinguished career, and tomorrow Mr. Buckwald will celebrate his 84th birthday. For his many years of exceptional leadership and dedication, I congratulate and thank Mr. Buckwald.

**IN RECOGNITION OF STEPHEN K. WOODLAND**

**HON. DAVID D. PHELPS**

**OF ILLINOIS**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, June 26, 2001**

Mr. PHELPS. Mr. Speaker, today I rise to recognize the achievements of Stephen K. Woodland. Mr. Woodland is a 29 year veteran teacher, military retiree, coach, mentor, and friend to hundreds of students who have passed through his regimen of algebra, geometry, and calculus. He drives forward with an energy level undiminished by many years of hard work. For twenty one years, the math teams he has coached and/or helped prepare for state competition have finished first, second, or third. Mr. Woodland maintains the challenge is not the competition. It is the preparation. This is where teaching and learning happen.

Mr. Woodland is the first to tell students that high school math is only the beginning. He encourages students to light their torch of learning in high school and carry it on college. Mr. Woodland refuses the spotlight but his opinion is highly respected, his integrity is beyond reproach, and his influence mighty. When he speaks, students heed his words.

Many teachers will be successful during their careers, but very few will match the level of success and expertise achieved by Mr. Woodland. He is tenacious in his pursuit of excellence. He set his goals and then drives forward. He exhibits the qualities to set himself above the crowd. Clearly, he has distinguished himself in his profession.

**TRIBUTE TO MR. LARRY L. GRIMES**

**HON. MIKE PENCE**

**OF INDIANA**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, June 26, 2001**

Mr. PENCE. Mr. Speaker, I rise today to honor the life of the late Mr. Larry L. Grimes, an outstanding citizen and dedicated community leader in southwest Indiana, but most importantly, a dear friend. I join his lovely wife, Nancy, and daughter, Cassie, in expressing our gratitude for his loyal service to the State of Indiana.

Mr. Speaker, Larry Grimes left this earth in November of 2000, just hours after his overwhelming election to the Warrick Circuit Court in Warrick County, Indiana. His election was a fitting tribute to the Christian character and servant's attitude that animated his life.

Mr. Speaker, I am proud to announce that this past Sunday, June 24, 2001, the town of Newburgh, Indiana held a hose cutting ceremony to dedicate its new fire and EMS station in the name of Former Fire Chief Larry Grimes.

Mr. Speaker, it is written that a good name is more precious than rubies. The good people of Newburgh have put a good name on this new facility.

Mr. Speaker, I respectfully ask my colleagues to join me in paying tribute to this esteemed man and cherished friend who as a family man, an educator, an attorney and a fireman, made southwestern Indiana a better place for his having been there.

**CALLING ON CHINA TO RELEASE LI SHAOMIN AND ALL OTHER AMERICAN SCHOLARS OF CHINESE ANCESTRY BEING HELD IN DETENTION**

**SPEECH OF**

**HON. BILL PASCRELL, JR.**

**OF NEW JERSEY**

**IN THE HOUSE OF REPRESENTATIVES**

**Monday, June 25, 2001**

Mr. PASCRELL. Madam Speaker, I thank my colleague from New Jersey (Mr. SMITH) for his laudable work in the area of human rights and injustice worldwide.

This matter we discuss today hits particularly close to home. Li Shaomin is an American citizen that China is holding hostage.

Sal Cordo, from Bloomfield, was his supervisor when Dr. Li worked for AT&T in New Jersey. Now Sal faces the unimaginable task of leading the charge to get his friend freed from a Chinese prison, where Dr. Li faces trumped up charges.

In a recent article, China's Foreign Minister stated that, “In China, observance of human rights is now in its historically best period.” If China is at its best when it is detaining American citizens without just cause, then “it would be a better world.” Linda, whose actions demonstrate her commitment to such kindness, has improved this world for many.

Linda, who has also worked for Area Agency on Aging, has acted as admissions and marketing director at Columbine Manor for three years. In order to ensure that each resident always has something to look forward to, Linda initiates many projects at the Manor. For instance, she holds a weekly meeting called “Conversations with Linda,” to which she brings a tasty cuisine like corn muffins, pie or crab cakes to spice up the normal meal schedule. The meeting offers more than just a delicious treat, however. Each Tuesday, according to Linda, the residents “share beautiful stories about their past.” In addition, she has involved herself with a committee that plans activities for residents and their families such as Operation Christmas Child, which creates shoeboxes full of gifts for small children. Also, she helps hold a party for every holiday, and a barbecue every month. Linda, always a good listener, makes sure that her events bring what her residents desire. For instance, she says, “Today, we’re helping the residents make potato salad . . . . They wanted homemade potato salad, so we let them do it.”
INTRODUCTION OF HOUSE CONCURRENT RESOLUTION 173—THE INTERNATIONAL HUMAN RIGHTS EQUALITY RESOLUTION

HON. TOM LANTOS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. LANTOS. Mr. Speaker, today with the support of 26 of our colleagues—including both Republicans and Democrats—I introduced House Concurrent Resolution 173, the “International Human Rights Equality Resolution,” a Resolution decrying human rights violations based on real or perceived sexual orientation and gender identity. We introduced this legislation Mr. Speaker, because we believe very strongly that we must send a strong message that gay, lesbian, bisexual and transgendered people must be treated with dignity and respect, not with hatred and violence.

Mr. Speaker, it is appropriate that we have introduced our Resolution today, which is the U.N. International Day in Support of Survivors of Torture. This Resolution, together with Amnesty International’s newly released report, “Breaking the Silence,” highlights the use of torture against people based on sexual orientation and condemns governments who perpetrate these outrageous human rights violations, or fail to do anything to prosecute the perpetrators. All around the world, unacceptable violations of human rights have taken place against individuals solely on the basis of their real or perceived sexual orientation. These ongoing persecutions against gay people include arbitrary arrests, rape, torture, imprisonment, extortion, and even execution.

The scope of these human rights violations is staggering, and for the victims, there are few avenues for relief. Mr. Speaker, some States create an atmosphere of impunity for rapists and murderers of gays and lesbians by failing to prosecute or investigate violence targeted at these individuals because of their sexual orientation. These abuses are not only sanctioned by some States, often, they are perpetrated by agents of the State.

Mr. Speaker, in Afghanistan, men convicted of sodomy by Taliban Shari’a courts are placed next to standing walls by Taliban officials and are subsequently executed as the walls are toppled upon them and they are buried under the rubble. In Guatemala and El Salvador, individuals are either tortured or killed by para-military groups because of their real or perceived sexual identity. In Saudi Arabia, Yemen, Kuwait, Mauritania, and Iran persons accused of committing homosexual acts are convicted of committing homosexual acts. In Pakistan, individuals are flogged for engaging in sexual conduct with same-sex partners, and in Uganda and Singapore individuals engaging in such conduct are sentenced to life in prison. In Brazil, a lesbian couple was tortured and sexually assaulted by civil police. Despite the existence of medical reports and eye-witness testimony, the perpetrators of these heinous crimes are never prosecuted.

Mr. Speaker, around the world, individuals are targeted and their basic human rights are denied because of their sexual orientation. The number and frequency of such grievous crimes against individuals cannot be ignored. Violence against individuals for their sexual orientation violates the most basic human rights.

House Concurrent Resolution 173 puts the United States on record against such horrible human rights violations. As a civilized country, we must speak out against and condemn these crimes. Our Resolution details just a few examples of violence against gays and lesbians in countries as wide ranging as Saudi Arabia, Mexico, China, El Salvador, and other countries. By calling attention to this unprompted and indefensible violence, the International Human Rights Equality Resolution will broaden awareness of human rights violations based on sexual orientation.

House Concurrent Resolution 173 reaffirms that human rights norms defined in international conventions include protection from violence and abuse on the basis of sexual identity, but it does not seek to establish a special category of human rights related to sexual orientation or gender identity. Furthermore, it commends relevant governmental and non-governmental organizations (such as Amnesty International, Human Rights Watch, and the International Gay and Lesbian Human Rights Commission) for documenting the on-going abuse of human rights on the basis of sexual orientation. Our Resolution condemns all human rights violations based on sexual orientation and recognizes that such violations should be equally punished, without discrimination.

I would also like to extend my gratitude to the United States Department of State and the United Nations for documenting the ongoing abuse of human rights on the basis of sexual orientation and gender identity.

Mr. Speaker, the protection of gender identity is not a luxury or privilege, but it should be fully acknowledged in international human rights norms. I ask that my colleagues join me in wholeheartedly embracing and supporting human rights for all people, no matter what their sexual orientation might be. It is the only decent thing to do.

COMMEMORATING THE 50TH ANNIVERSARY OF THE LAURA INGALLS WILDER LIBRARY

HON. JO ANN EMERSON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mrs. EMERSON. Mr. Speaker, it is with great honor and pride that I stand before the House today in observance of the 50th Anniversary of the Laura Ingalls Wilder Library. The Laura Ingalls Wilder Library is located in Mansfield, Missouri, a small town in Missouri’s Eighth Congressional District.

Many will remember with great fondness the Laura Ingalls Wilder books. In fact many of us or our children grew up reading her accounts of life in the great outdoors. She wrote simply and vividly—with such detail that her accounts of pioneer life have become the way that many of us view life on the Midwestern frontier. Through her writing, Laura Ingalls Wilder provided us with a chronology of life during the Pioneer days that has allowed us to preserve a lost era in American history.

But Laura Ingalls Wilder did more than just evoke a love for the rural way of life in her writing. Through her writing, she instilled a love of reading and over time that love of reading was translated into action as she became a tireless advocate for our public libraries.

In rural America, public libraries are not just a luxury or a convenience, they are a way of life. Most small towns don’t have a Barnes and Noble and many folks don’t have access to Amazon.com.

As a result, the tireless endeavors of the Laura Ingalls Wilder’s of today are keeping Ms. Wilder’s efforts alive. In Wright County, the community is working in a cooperative and most inspiring manner to create the Laura Ingalls Wilder Library and Community Center, an expanded library that will provide a technology and community center. The center will give folks the opportunity to embark on a journey of learning and to inspire adults and children with a love for reading.

Mr. Speaker, on this very special occasion, I ask that all of my colleagues join me in recognizing the 50th Anniversary of the Laura Ingalls Wilder Library. May the blessings of the last 50 years serve as a vision for the next 50 years.

IN HONOR OF WILLIAM E. MARTIN, PRESIDENT OF UNITED WAY OF HUDSON COUNTY, UPON HIS RETIREMENT AFTER 45 YEARS OF SERVICE

HON. ROBERT MENENDEZ
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to honor William E. Martin, who will be recognized by the United Way of Hudson County.
New Jersey. On Wednesday, June 27, 2001, the City of Jersey City will honor Mr. Martin during a dedication ceremony to rename Vroom Court the William E. Martin Way. A luncheon in honor of Mr. Martin will follow the ceremony.

William Martin began his distinguished career with the United Way Foundation in 1956, serving as President of the United Way in Hudson County, New Jersey. During his tenure, Mr. Martin was instrumental in establishing over 30 Tri-State United Way agencies. As a result of his hard work and dedication, United Way now provides social services in over 700 communities throughout the Tri-State area, lending assistance to over 8 million people a year.

Beyond his administrative duties, William Martin has also served as an ambassador for the United Way Foundation. In 1988, he was chosen by his peers to set up United Way services in Beijing, China and Hong Kong. In addition, he has assisted in the implementation of United Way services in Vietnam, Pakistan, Egypt, and the Philippines.

Youth outreach and community service initiatives have also been top priorities in William Martin's life. Prior to his tenure with United Way, he was Director of Human Services at Camp Crowder in Missouri and served as Athletic Director at the CYO Center in Jersey City, New Jersey for nine years.

Today, I ask my colleagues to join me in honoring William Martin for his distinguished service on behalf of the United Way Foundation. This group supports needy citizens in Africa and around the world.

I have had the privilege of working with Marvin on other projects, including the Hope Foundation, which he chairs. This group supports needy citizens in Africa and around the world.

For me, Marvin is more than just a partner in public service. I am proud that he is my friend.

Dayton is fortunate that Marvin plans to stay in the area and continue his civic involvement. His creativity, vision, and energy can always be used here.

TRIBUTE TO THE REV. DAVID KALKE

HON. JOE BACA
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. BACA. Mr. Speaker, I rise to salute a constituent of mine, the Reverend David Kalke, recipient of a 2001 Robert Wood Johnson Community Health Leadership Award, for his work in creating a “safe zone” for our youth. The award is the nation’s highest honor for community health leadership and includes a $100,000 program grant.

The Reverend Kalke has done remarkable work with teen health and education programs in an area of San Bernardino, CA, known to have the state’s highest teen pregnancy and STD rates and marked incidents of violence. The original core of 12 teens has since grown to over 100 youths a year.

Because of these efforts, he is one of 10 outstanding individuals selected this year to receive a $100,000 Robert Wood Johnson Community Health Leadership Program award.

You know, Mr. Speaker, it is important that we give the children hope. That we give them a chance. A helping hand up. A chance to have a mentor, to have someone believe in them. Because through that confidence in them comes confidence in themselves. The Reverend Kalke has done that. I think we must all remember the role models in our lives, and remember those who inspired us to see the possibilities. So we can all understand what it is for a child to have the sort of opportunities, the sort of chance that the Reverend Kalke has given them.

The Reverend Kalke has a long history of public service and involvement with serving our youth. His deeply held beliefs that the church should be actively involved in the community began with a mission to Chile during the 1970s. He eventually returned to New York City where he led a Lutheran church congregation and initiated a broad array of community programs in the South Bronx.

In 1996, he was asked by the Lutheran church to revive a struggling church in a poverty-stricken section of San Bernardino, CA, known to have the State’s highest teen pregnancy and sexually transmitted disease rates, as well as one of the highest incidences of gang-related violence.

From the beginning, his vision faced obvious risks. His church, the Central City Lutheran Mission (CCLM), was abandoned with no established community ties and a regular risk of violence from area youth gangs. To gain the neighborhood’s trust, Kalke hired local teens to help clean up the site, offering to pay small salaries while they undertook peer HIV/AIDS health educator training. The original core of 12 teens has since grown to over 100 youths a year, working, learning and volunteering in what has become a gang-free, safe space in the midst of a devastated neighborhood.

Admirers have observed: “Not since Escalante worked his magic in teaching calculi to poor minority kids in East Los Angeles has anyone witnessed the dedication, caring, knowledge and skills of David Kalke in assisting ‘throw away’ kids in a ‘throw away’ neighborhood to learn ways to improve their own and the neighborhood’s existence.”

CCLM’s programs now include: an adolescent health program which employs peer educators to teach HIV, STD and teen pregnancy prevention; an after school program for 50 children between the ages of 5–12 to help with homework and nutrition; and, a teen day-school for suspended, expelled or home-study students. CCLM’s cultural programs include art, writing and photography. Teens publish a newsletter of poems, drawings and photographs on the realities of inner city life.

The Reverend Kalke has also raised federal and city funding to rehabilitate abandoned homes and turn them into transitional housing for homeless HIV+ persons.

In order to create these programs he has effectively pulled together numerous partners including other churches, California State University at San Bernardino (Cal State) and the city council. Cal State’s Social Work, Public Health and Communications Departments regularly send interns and nursing students to conduct 9-month internships at CCLM.

The CCLM programs have transformed hundreds of individual lives, giving food, shelter, education, safety and hope where there was none.

And so we honor the Reverend Kalke, and we salute him, for his achievement and his commitment to our youth.

TRIBUTE TO HUGO NEU

HON. FRANK PALLONE, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. PALLONE. Mr. Speaker, I would like to ask my colleagues to join me in congratulating Hugo Neu Schitzer East, one of the largest scrap metal recyclers in New Jersey, for their proactive efforts to improve industrial recycling.

The Hugo Neu Schitzer East Company has been operating in Port Liberté, New Jersey for the last 40 years. They have invested several million dollars in research and development, attempting to find new and better ways to
mine and recycle waste metal. They have done so with the goal of reducing the amount of scrap metal that needs to be disposed of in landfills. Hugo Neu is working to dispose of these waste materials in a more environmentally conscious manner, as well as find ways to recycle and reuse a larger portion of scrap material.

I ask to submit an article from the Business News New Jersey that better outlines Hugo Neu's efforts on behalf of the environment.

[From the Business News New Jersey, Jersey City, N.J., June 5, 2001]

SCRAPING OLD WAYS AND LOOK FOR NEW ONES
(By Geeta Sundaramoorothy)

John Neu and Robert Kelman like to say jokingly that they are still trying to figure out how to squeeze the last few years of return out of their scrap metal recycling business for 40 years. As part owner and general manager, respectively, of Hugo Neu Schnitzer East, one of the biggest metal recyclers in the region, they may only be half joking.

Jersey City-based Hugo Neu buys scrap metal from auto dealers and construction companies, then shreds, processes and ships it to customers for use as raw material in making steel. With international prices of scrap funding to historic lows and costs increasing, it is imperative that we do not see this important source of funding dwindle. Hugo Neu is spending $20 million to dredge the results of that research in the next two years. "There is only so much we can do to minimize the impact," he says, adding the company has even built a container wall to keep the operations out of the sight of residents. The question is whose impact will be greater for the economy, ours or the residential units, he asks.

Jersey City has, in a way, answered that question by choosing to keep that part of the waterfront reserved for industrial use. Anne Marie Uebbing, director of the city's department of housing, economic development and environment, says Hugo Neu's dredging project, recognizing the importance of Claremont as an international port, especially when Hugo Neu starts bringing in more ships carrying scrap metal cargoes such as rods, rails and containers, is close to emerging out of Chapter 11 bankruptcy, also plans to boost its existing business and handle bulk and break bulk cargo at its Port Newark facility. Last month, the company won a battle against the International Longshoremen's Association to use its own labor for loading and unloading some break bulk cargo.

John Neu's father, Hugo Neu, who is considered a pioneer in the scrap recycling industry, started the family business in the early 1970s. It split in 1994, after Hugo Neu's death, with John Neu getting the scrap metal operations and half the real estate business. John Neu, now CEO of Manhattan-based Hugo Neu Corporation, formed Hugo Neu Schnitzer East in 1998—as a 50% joint venture with the world's largest exporter of processed scrap. The company has annual revenues of about $170 million, 225 employees, and handles 1.3 million tons of scrap annually in the New York metro region. It says it is the region's largest exporter of processed scrap.

According to Kelman, in the last 18 months scrap prices have dropped from about $130 per gross ton to less than $80, a 38% falloff. International demand for scrap has also fallen, and the price for scrap metal has begun to mirror the international trend. As Hugo Neu's share of those declines, the disposal of waste metal causing comparisons which have the support of state, local, business, and environmental leaders would suffer such a serious setback due to faulty information.

Hugo Neu has also invested several million dollars in research and development to find new ways to "mine" the waste metal it produces. About 25% of every automobile that is recycled also contains plastic. Kelman hopes to announce the results of that research in the next few months. In addition, the company is converting waste from the auto shredding process into landfill cover that reduces its tipping fee—money charged by landfill companies for dumping waste. Kelman hopes in the next few years the company will be able to reduce its waste by 50%, with the ultimate goal of producing zero waste.

EXTENSIONS OF REMARKS

June 26, 2001

CORRIDORONE FUNDING

HON. GEORGE W. GEKAS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 26, 2001

Mr. GEKAS. Mr. Speaker, I am joined in my remarks by my fellow colleagues from Pennsylvania, Representative Pitts and Representative Platt. We would like to take this opportunity to note that language was included in the FY '02 Transportation Appropriations bill that reallocated unexpended funds from previous appropriations acts for various projects around the country. Much to our surprise, and disappointment, a project which is critical to the central Pennsylvania region—the CORRIDORone project—was on the list to be rescinded.

The report language from the Committee states "these sums are not needed due to changing local circumstances or are in excess of project needs." Upon further inquiry, I was informed by the Subcommittee that these funds for the CORRIDORone project were being reallocated because it was presumed the funds would not be obligated by the September 30, 2001 deadline. However, this is not the case. Capital Area Transit (CAT), the local agency responsible for the project, is proceeding through the Federal Transit Administration (FTA) approval process and is expected to obligate the funds within a few short weeks, well before the September 30 deadline. I am at a loss as to why it was thought that these funds would not be obligated. How this misinformation came to be I do not know, but it saddens me that such a vital project for the central Pennsylvania region, and one which has the support of state, local, business, and environmental leaders would suffer such a serious setback due to faulty information.

Representatives Gekas, Pitts, and Platt have written to Chairman Rogers requesting that the project be removed from the reallocation list or at the very least be granted an extension of one year in order to utilize funds already appropriated and desperately needed. We have also written to the FTA requesting an explanation of their decision to recommend that CORRIDORone's FY '99 funds be reallocated.

Mr. Speaker, if FY '99 funds were reallocated, CAT would lose half of all federal funds appropriated for CORRIDORone to date. Coupled with the fact that no additional funds were appropriated for the project this year, reallocation of half its federal funds would almost certainly prevent CAT from completing the CORRIDORone project. If central Pennsylvania is to successfully move into the 21st century, such an investment in Pennsylvania's future can not be abandoned at this crucial time.
**June 26, 2001**

**TRIBUTE TO COLONEL JOHN COLEMAN**

**HON. TONY P. HALL**

**OF OHIO**

**IN THE HOUSE OF REPRESENTATIVES**

Tuesday, June 26, 2001

Mr. HALL of Ohio. Mr. Speaker, it is my honor to note the long-term record of selfless service by one of Ohio’s own, and a member of the “greatest generation,” Colonel John Coleman, United States Army, Retired. This year marks the 50th anniversary of Colonel Coleman’s election as National President of the Reserve Officers Association and the 73rd anniversary of his acceptance of the oath of office as a commissioned military officer.

Mr. Speaker, few American’s can claim such a rich legacy of service to country and countrymen. We all know the excellent work that is done every day by the staff of the Reserve Officers Association and their numerous volunteer members. But few of us know the significant achievements of Colonel John Coleman in his role as national president of the Reserve Officers Association.

During 1951, Colonel Coleman worked closely with the Marine Corps Reserve Association to gain passage of the Armed Forces Reserve Act of 1952 which became Public Law 476. That act provided the framework for a fully integrated and fully capable reserve force working as partner with the regulars in meeting the nation’s defense needs. As a result of the legislation passed, the reserve force became a critical resource for all military engagements that followed.

Colonel Coleman’s record of military service began with his commissioning as a second lieutenant of the Field Artillery in 1928. His record is marked by selfless service in numerous staff and command positions including service in combat during World War II. Among his many awards and recognition is his membership in the Honorable Order of Saint Barbara for his contributions to the Army Field Artillery.

Mr. Speaker, Colonel Coleman fully represents the spirit of the Reserve Officers Association and its model, the Minuteman. Just across the street from the East front of the Capitol building stands the Association’s headquarters, the Minuteman Memorial Building: an apt symbol of the Minuteman. A most appropriate location for today’s event.

**EXTENSIONS OF REMARKS**

TO RECOGNIZE THE TEACH OUR CHILDREN FOUNDATION AND THE THIRD ANNUAL BART OATES/RICK CERONE CELEBRITY GOLF OPEN

**HON. ROBERT MENENDEZ**

**OF NEW JERSEY**

**IN THE HOUSE OF REPRESENTATIVES**

Tuesday, June 26, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to honor Bart Oates and Rick Cerone, the cofounders of the Teach Our Children Foundation in Newark, New Jersey. On Monday, June 25, 2001, Mr. Oates and Mr. Cerone hosted their Third Annual Oates/Cerone Celebrity Golf Open at the Mountain Ridge Country Club in West Caldwell, New Jersey. This charity event raised funds for the Teach Our Children Foundation, benefiting underprivileged children living in Newark.

The Teach Our Children Foundation, a nonprofit organization founded by Bart Oates and Rick Cerone, provides educational and developmental opportunities for children living in Newark. The foundation aims to address problems children face in urban America today, including the presence of drugs, the breakdown of the familial structure, and the difficulties urban schools face in handling these and other issues.

Bart Oates and Rick Cerone are very well known throughout New Jersey for their successful careers in professional football and baseball. Bart Oates, who is a former New York Giant, graduated from Seton Hall’s School of Law, and currently is Vice President for Marketing and Client Service at the Gale & Wentworth Real Estate Company. Rick Cerone is a former New York Yankee, an alumnus of Seton Hall University, and founder and president of the Newark Bears Minor League baseball team.

Today, I ask my colleagues to join me in honoring Bart Oates and Rick Cerone, along with the Teach Our Children Foundation of Newark, New Jersey, for providing children with a brighter future and real educational opportunities.

**CALLING ON CHINA TO RELEASE LI SHAOMIN AND ALL OTHER AMERICAN SCHOLARS OF CHINESE ANCESTRY BEING HELD IN DETENTION**

**SPREECH OF**

**HON. JOSEPH CROWLEY**

**OF NEW YORK**

**IN THE HOUSE OF REPRESENTATIVES**

Monday, June 25, 2001

Mr. CROWLEY. Mr. Speaker, I want to thank Mr. Smith of New Jersey for authoring this crucial and timely resolution.

It troubles me to report that one of my constituents is among the many Chinese-Americans being held without cause by the government of the People’s Republic of China.

As an author and scholar, Mr. Wu would often travel to the land of his ancestry for business and research. However, on April 8th, Wu Jiaming (Woo John-Ming) of Elmhurst, New York was detained by security forces while traveling in the People’s Republic of China. He was taken to an isolated house outside the city of Guangzhou for questioning.

Chinese authorities detained Mr. Wu for nearly a week before finally notifying the American consulate of the arrest in violation of standard protocol. Though the Consul General was finally granted access to the physical and emotional well being of Mr. Wu, the circumstances surrounding his captivity are simply unacceptable. He has now been held for nearly three months without being formally charged with any crime.

Chinese diplomats here in Washington argue that Mr. Wu’s case is a matter of national security, and provided no further details. Mr. Wu is a husband, a scholar, and a U.S. citizen. He is not a subversive element.

For the sake of Sino-American relations, it is essential that he be immediately and unconditionally released.

It troubles me to report that Mr. Wu’s story is not an isolated incident. The recent detention of Chinese-American scholars has strained our relationship with Beijing.

As members of the international community and partners of the United States, it is imperative that they be held to the same standards as all other nations.

Therefore, I proudly join Mr. SMITH in supporting the release of these men without further delay, and I urge my colleagues to join us in that endeavor.

**HERSHEY INTERMODAL CENTER FUNDING**

**HON. GEORGE W. GEKAS**

**OF PENNSYLVANIA**

**IN THE HOUSE OF REPRESENTATIVES**

Tuesday, June 26, 2001

Mr. GEKAS. Mr. Speaker, I would like to express my disappointment that funding for the Hershey Intermodal Center was not included in the FY 2002 Transportation Appropriations bill. Hershey, PA, is in need of a modernized, central business district with a vibrant center of activity to meet the transportation and commercial realities of the 21st Century. To address this need, local government officials have been working with private concerns in a public-private partnership to renovate downtown Hershey. At the heart of the downtown improvement plan is the construction of an intermodal transportation center. This facility will provide parking in a central location. It will provide for the overall downtown development and is situated to provide a stop for the commuter rail service that is envisioned in the CORRIDORone long-term plan. I strongly support this regional economic development project and believe that funding for this important project should have been included in the Transportation Appropriations bill.

Although $2.5 million was not added to this year’s House version of the Transportation Appropriations bill, I plan to continue my efforts to seek funds which are seriously needed to revitalize downtown Pennsylvania. I hope the Senate will correct this oversight, and recognize the needs of the hard working people of our commonwealth.
EXTENSIONS OF REMARKS

HON. JAMES E. CLYBURN
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to Paul Beazley, a former colleague, and fellow South Carolinian, Paul W. Beazley. On July 16th, Paul will retire from South Carolina State government. It is a retirement well deserved and he will be sorely missed.

Before coming to this August body, I served as Human Affairs Commissioner for the State of South Carolina. I was fortunate to have Paul among my support staff. Paul joined the State Human Affairs Commission in January of 1973. Upon my arrival in October 1974, I named him Director of the Technical Services Division where he served for five years before being named Deputy Commissioner.

During my nearly 18-year tenure at the Commission, Paul was an invaluable colleague, and became an expert on the issues of equal opportunity and diversity, particularly in the workplace. He accentuated his vast experience in this area with several published works including: Think Affirmative; The Blueprint, which became the leading affirmative action planning manual in the 1970’s and 1980’s. He recently wrote, The South Carolina Human Affairs Commission: A History, 1972–1977; and Who Give a Hoot at the EEOC?, a public policy case study. He played a key role organizing the State’s first Human Affairs Forums, two of which were nationally televised.

An active member in his community both professionally and personally, Paul currently serves on the Board of Directors of the Midlands Marine Institute, and is president of the Alumni Association of South Carolina State Government’s Executive Institute. Paul is also chairman of the State Appeals Board of the United Service Organizations.

In addition, Paul is a member of various professional associations, and works as a volunteer for many non-profit organizations. He is also a member of the Eau Claire Rotary Club of Columbia, and has served as President and Secretary of the National Institute for Employment Equity, and as Chairman of the Greater Columbia Community Relations Council. He has also served on the Board of Directors of the Family Services Center of Columbia, the Board of Visitors of Columbia College, the Board of Directors of Leadership South Carolina, and numerous task forces at the State and local level.

Prior to joining the Commission in 1973, Paul was a Presbyterian Minister. He served as a Pastor, a Conference Center Director, and an Educational Consultant. He has also worked as a Consultant for the University of South Carolina General Assistance Center, teaching in the field of test taking and problem-solving. He designed an experimental reading program for the Columbia Urban League.

Paul received his Bachelor of Arts degree from East Tennessee State University, his Master of Divinity from Union Theological Seminary in Virginia, and a Masters of Education from the University of South Carolina, where he also completed Doctoral studies. Paul is also a graduate of the South Carolina Executive Institute (1992), and Leadership South Carolina (1994).

Paul, a longtime resident of my downtown hometown, Columbia, South Carolina, is married to the former Marcia Rushworth. They have one son, Paul Derrick Beazley, who lives in Charleston. Paul is a competitive tennis player, and we share yet another common interest and pastime, golf.

Mr. Speaker, I ask you to join me in saluting one of our nation’s authorities on diversity, one of my State’s most highly respected professionals, one of my communities finest citizens, and one of my good friends, Paul W. Beazley, upon his retirement from South Carolina State government. Please join me in wishing him good luck and Godspeed.

HON. ANTHONY D. WEINER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Mr. WEINER. Mr. Speaker, I was unavoidably detained in my district on Monday, June 25, 2001 and the morning of Tuesday, June 26, 2001, and I would like the record to indicate how I would have voted had I been present.

For rollcall vote No. 186, the resolution calling on the Government of China to Release Li Shaomin and all other American scholars being held in detention, I would have voted "aye."

For rollcall vote No. 187, the resolution expressing the sense of the House that Lebanon, Syria and Iran should call upon Hezbollah to allow the Red Cross to visit four abducted Israelis held by Hezbollah forces in Israel, I would have voted "aye."

For rollcall vote No. 188, the resolution honoring the 19 U.S. servicemen who died in the terrorist bombing of the Khobar Towers in Saudi Arabia on June 25, 1996, I would have voted "aye."

For rollcall vote No. 189, on approving the Journal, I would have voted "aye."
banding together to stop the government’s sinister plan. The plan to create more bloodshed is backfiring on the Indian government.

Such a plan is a tyrannical, unacceptable abuse of power. As the superpower in the world and the leader of the forces of freedom, we must take a stand against this tyrannical, terrorist activity. First, President Bush should reconsider the idea of lifting the sanctions against India. Those sanctions should remain in place until the Indian government learns to respect basic human rights. Until then, the United States should provide no aid to India. And to ensure the survival and success of freedom in South Asia, we should go on record strongly supporting self-determination for all the peoples and nations of South Asia in the form of a free and fair, internationally-recognized self-governing state. In the nations seeking their freedom. This is the best way to let freedom reign in all of South Asia, we should go on record strongly supporting self-determination for all the peoples and nations of South Asia in the form of a free and fair, internationally-recognized self-governing state.

And to ensure the survival and success of freedom in South Asia, we should go on record strongly supporting self-determination for all the peoples and nations of South Asia in the form of a free and fair, internationally-recognized self-governing state.

Mr. Speaker, I would like to take a moment to recognize a woman that has made numerous contributions to the State of Colorado and the United States. Jane Norton has served the State in various capacities over the years, and is currently being recognized by her alma mater Colorado State University for her varied accomplishments. As her friends, family and classmates gather to honor Jane Norton, I too would like to pay tribute to her. Clearly her hard work is worthy of the pride of Congress.

Jane Norton received her Bachelor of Science in Health Sciences from Colorado State University in 1976. She went on to earn her Masters in Management from Regis University. After graduation Jane held many positions in the government. Most notably Jane was the regional director of the U.S. Department of Health and Human Services, under the administrations of President Ronald Reagan and President George Bush. While serving as the regional director, Jane received the U.S. Public Health Service Assistant Secretary’s Award for Outstanding Accomplishment for increasing immunization rates. This is only one of many awards Jane received during her tenure as the regional director of the U.S. Department of Health and Human Services.

Currently Jane runs a number of broad-based health and environmental protection programs ranging from disease prevention, family and community health services and emergency medical services and prevention. Jane is also Secretary of the State Board of Health, a Commissioned Officer for the Food and Drug Administration, and serves on the Board of Directors for the Regional Air Quality Council and Natural Resource Damages Trustee. Throughout a distinguished career, Jane has been loved and is known to her friends and colleagues as a team player. Jane is not only a bright and intelligent woman, but also a woman with incredible people skills.

As Jane receives distinction among her former classmates, Mr. Speaker, I would like to take this opportunity to thank her for her service to the United States of America. She has worked hard for this country, and her hard work is deserving of the recognition of Congress.

Cesar Chavez Day of Service and Learning, funded through the Governor’s Office on Service and Volunteerism (GO SERV).

Cesar E. Chavez, a civil rights leader and community servant, committed his life to empowering people. He championed the cause of thousands of farm workers in order to improve their lives and communities and to work for social justice. Chavez believed that service to others was a way of life, not merely an occupation of an occasional act of charity. He forged a legacy of service, conviction and principled leadership. Californians celebrate and learn about the life and works of Chavez annually through civic engagement.

On March 30, 2001, the Governor’s Office on Service and Volunteerism commemorated the first annual Cesar Chavez Day of Service and Learning by involving K-12 students in service and teaching children about the life and work of Cesar E. Chavez. Individuals, business and community members, teachers and school children came together to perform meaningful service projects to honor the principles by which Chavez conducted his life. GO SERV awarded grants to 71 projects which performed community activities, such as community garden projects, mural painting, theater/teatro performances, environmental restoration projects, community beautification activities, and agricultural/farmer projects.

As a result of these partnerships, over 300,000 students engaged in service activities to honor Cesar E. Chavez.

One striking example was a program in Orange County. At the Orange County Cesar Chavez Day initiative, over 500 4th grade students participated in cleaning fields and harvesting crops. All of the food gathered was donated to the Second Harvest Food Bank which distributed the food locally. Over 25,000 pounds of cabbage, radishes, carrots, onions, romaine, iceberg and butter lettuce was gathered, and performed community activities, such as community garden projects, mural painting, theater/teatro performances, environmental restoration projects, community beautification activities, and agricultural/farmer projects.

As a result of these partnerships, over 300,000 students engaged in service activities to honor Cesar E. Chavez.

Another program called Barrios Unidos, a nonprofit organization dedicated to violence prevention, developed Cesar Chavez service clubs to commemorate Cesar Chavez Day. Barrios Unidos commemorated the day in seven sites statewide including Santa Cruz, San Mateo, Salinas, Fresno, Santa Monica, Venice, and San Diego. Through these Cesar Chavez clubs, youth participated in community beautification projects while learning about the life and values of Chavez. In Santa Monica for example, people joined to celebrate the day by cleaning up Virginia Avenue Park and painting a 20-foot long mural depicting city life.

GO SERV worked in conjunction with Senator Richard Polanco’s office, the Cesar E. Chavez Foundation, the Chavez family, and the Department of Education to promote the first annual Cesar Chavez Day of Service and Learning. We are proud of the undertakings of the first annual Cesar Chavez Day of Service and Learning and look forward to continuing to see the impact GO SERV will have in our
SPEECH OF
HON. SILVESTRE REYES
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 25, 2001

Mr. REYES. Mr. Speaker, I am here to convey my strong support for the "Healthy Solutions for America's Hardworking Families" package developed to provide critical health, nutrition, and protection benefits to legal permanent resident children and women. This package includes three pieces of legislation that take steps to address some of the most blatant gaps in our nation's effort to help those legally here in our country in times of greatest need.

As Chair of the Congressional Hispanic Caucus and as a Member whose district includes a large Hispanic community, one of my top priorities is to advocate for the fair treatment of hard-working, tax-paying families. The Immigrant Children's Health Protection Improvement Act, H.R. 1143, gives States the option of providing basic health care coverage to legal permanent resident children and pregnant women who arrived in the U.S. after August 22, 1996. As a result of the 1996 reforms, lawfully present children and pregnant women who arrived in the U.S. after 1996 must wait five years before they can apply for basic health care.

Because many of these recent immigrants are concentrated in low-paying, low-benefit jobs, these hard-working, tax-paying families, like so many others in our country, simply cannot afford private health care coverage. Thus, this vulnerable population cannot obtain proper health treatment such as preventative and prenatal care. Many are forced to delay care and rely on emergency room services to receive treatment. I believe this is an unacceptable risk for any American, as well as for current legal immigrants and their future American children.

The Congressional Budget Office estimated last year that this legislation would provide coverage to insure 130,000 children and 50,000 mothers per year who have followed the rules and are in this country legally. In light of the fact that the Hispanic population is the most uninsured in our country, with over 33 percent having no coverage, this legislation is a critical step in meeting this need.

A second component of this package is the Nutrition Assistance for Working Families and Seniors Act, H.R. 2142, which would permit qualified legal immigrants to obtain food stamps regardless of their date of entry. The majority of those impacted would be in low-income families with children and elderly. I have seen first hand, in my district, the detrimental affects of hunger and under-nutrition. Hungry children are more likely to suffer from adverse health effects and studies show that hunger has a negative impact on a child's ability to learn. Furthermore, pregnant women who are undernourished are more likely to have children with low birth weights, likely leading to developmental delays.

This important bipartisan legislation is widely supported and endorsed by many, including the National Conference of State Legislatures, National Association of Counties, U.S. Conference of Mayors, and the National Governor's Association. Restoring this component of our nation's safety net system is not only critical step toward ending hunger in our country, it is just simply the right thing to do.

Finally, the third bill in the Healthy Solutions package is the Immigrant's Safe Harbor Act, H.R. 2258, which would allow legal immigrants who are victims of domestic violence to apply for critically needed safety services. These victims are frequently economically dependent on their abusers and isolated from the support network. Therefore, we must do everything we can to support victims of abuse and get them on a path toward a better life.

Mr. Speaker, restoring Medicaid and SCHIP, nutrition, and protection services to this group is simply good public policy, but more importantly, the provisions in the "Healthy Solutions for America's Hardworking Families" packages can mean the difference between life and death. We cannot let these children and mothers down. I urge my colleagues to support this important package.

SPEECH OF
HON. SOLOMON P. ORTIZ
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, June 25, 2001

Mr. ORTIZ. Mr. Speaker, I commend my colleague from Texas for organizing this Special Order to bring the attention of the House of Representatives to the state of health care—or lack thereof—for our American neighbors along the border.

I represent a South Texas district that abuts the international border with Mexico. This part of the country is unique in so many ways, including the health needs and rampant poverty. Currently, the greatest health need in my district is the need for a comprehensive response to the rampant spread of tuberculosis in South Texas and elsewhere along the Southwest Border.

Just today, the Centers for Disease Control announced that the rate of tuberculosis cases in Brownsville, Texas, is nearly five times the national rate. At least one doctor in the South Texas area has told me that there is a particularly frightening multiple-drug resistant form of tuberculosis that antibiotics just won't kill. I am told that this is spreading fast and is a nightmare for public health officials. It's an enormous problem. Cross-border dwellers, according to the medial community, are not good about following up on medical care and often do not finish drug therapies such as antibiotics. If you only take a little bit of antibiotics, it only takes care of a little bit of the problem and leaves the tuberculosis strong enough to come back another day.

I supported a resolution in the House that recognizes the importance of substantially increasing United States investment in international tuberculosis control in the Fiscal year 2002 foreign aid budget, which is what it will take to deal with the problem. This resolution also recognizes the importance of supporting and expanding domestic efforts to eliminate tuberculosis in the United States and calls on local, national and world leaders, including the President, to commit to putting an end to the worldwide tuberculosis epidemic.

But as we all know, resolutions have no affect of law; they are merely words on paper on which all of us can agree. But the most fundamental job of Congress is to determine spending priorities, and we will not move forward on finding solutions to this problem without the full attention of Congress and other public policymakers.

Our migration patterns, be they associated with economic circumstances, immigration between countries or just travel between countries, have made this challenge more significant. Today it is only tuberculosis, but that may not be the case tomorrow. This portends a real crisis for health care along the border if other simple or chronic diseases become resistant to medicine we have used so far to eradicate them.

Another unique problem for the border and South Texas is the issue of safe water to drink. Often the people who are low-income and who live in the colonias, the unincorporated neighborhoods that have sprung up around municipalities, have no running water to drink. Generally, they will drink unsafe, unhealthy water and they get sick from it. Are the people left with no kind of health insurance and are usually not even aware of programs like Medicaid that provide the most basic help for them.

Mr. Speaker, I would like to pay special tribute to two great women who have gone to great lengths to ensure that the patients who need medications for tuberculosis get them: Dr. Elena Marin of SU Clinica Familiar and Paula Gomez, the Executive Director of the Brownsville Community Health Center. They have been an excellent source of information to me and other Members of Congress who share an interest in matters relating to health care and I am enormously grateful to them for their service to South Texas and the nation.

I join my colleague Ciro Rodriguez in support of the "Healthy Solutions for America's Hardworking Families" agenda. No agenda can fix everything, but it takes steps to address some of the most egregious gaps in our nation's effort to help new immigrants and those who have lived here for a while along the U.S.-Mexico border.

I thank my colleague from Texas, the Chairman of the Congressional Hispanic Caucus Task Force on Health, for his diligence in bringing these matters before the House of Representatives.
June 26, 2001

HONORING THE MEMORY OF MR. KENNETH KRAKAUER

HON. KAREN MCCARTHY OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Tuesday, June 26, 2001

Ms. MCCARTHY of Missouri. Mr. Speaker, I rise today to honor Kenneth Krakauer, whose death on June 16 is an incalculable loss to his loving family, cherished friends, and to our community. Ken touched the lives of many people through his inexhaustible energy and caring that he brought to every aspect of his life. He was a lifelong Kansas City resident and the great grandson of Bernhard Ganz, one of the first Jewish sellers in Kansas City.

Throughout his life, Ken Krakauer remained extremely dedicated to his faith, country, and community. He served in the U.S. Army Air Corps where he flew 27 missions in the European Theatre and was awarded the Air Medal with Five Oak Leaf Clusters for his bravery. He played a significant role in helping to devote many organizations in our community, including: Director of the Menorah Medical Center for 42 years, Secretary of the Kansas City Crime Commission, Chairman and Co-founder of the Kansas City Chapter of the American Jewish Community, Co-chairman of the Kansas City Chapter of the National Conference of Christians and Jews, and a Director of the Barstow School, Visiting Nurses Association, Blue Cross and Blue Shield, UMCK University Associates, Jewish Family Services, and the Jewish Community Relations Bureau to name a few. Ken Krakauer also was an important part of the Kansas City business community. After his Presidency of the Greater Kansas City Chamber of Commerce, The Kansas City Star praised him as “an unqualified success.” His grandfather, Bernhard Adler, founded Adler’s in 1894, and Ken became owner and President in 1956. Adler’s was the place women of all ages shopped to find the latest in fashion. It was always a special occasion for me because of the high standard of service and quality in his stores. His staff reflected his love of helping people find the uniqueness in themselves.

Ken Krakauer was instrumental in the founding of the Committee for County Progress (CCP) with community and civic leaders Bernie Hofman, Jim Nutter, Sr., Charles Curry, Alex Petrovic, Sr., and Frank Sebree. The government reform movement in Jackson County resulted from their efforts. A charter form of government—modern, open and accessible—was created which was responsive to its citizens and inspired future generations of county leaders. I became active in the CCP, volunteering in local elections to keep the reform alive that Ken Krakauer achieved in the mid ’60s as Chairman of the CCP. Through my friendship in high school with his daughter-in-law, Jane Rieger Krakauer, I was able to get to know Ken Krakauer very well and to assist me in sorting through the challenges I faced. Ken Krakauer’s dedication to his community was matched only by his love for golf. He was a talented golfer at the University of Missouri where he was a captain of the golf team before graduating in 1938 from the School of Journalism. His passion for golf remained undiminished throughout his life as he served in leadership capacities in the Kansas City Golf Foundation, the Kansas City Golf Association, the Missouri Golf Association, the Junior Golf Foundation of Greater Kansas City, and the Missouri Seniors Golf Association.

Ken Krakauer also authored numerous golf articles in “Golf Digest” and “Golf Journal,” as well as the book, “When Golf Came to Kansas City,” the 1986 winner of the National Golf Foundation’s Eckhoff Award. He was instrumental in starting the Evans Scholars program, a scholarship program that aids caddies through their participation as a member of the Western Golf Association’s Evans Scholars program.

Mr. Speaker, former U.S. Senator, Thomas F. Eagleton enjoyed Ken’s friendship throughout his outstanding service to the people of Missouri. I wish to share his reflections with my colleagues:

Ken Krakauer was a magnificent, steadfast friend. When I was young and in my first statewide race for Attorney General of Missouri, he supported me for what I had done, but for what I hoped I might do. Later when I was in the United States Senate, he would occasionally drop a note saying he disagreed with a certain vote I had cast. Ken Krakauer believed that an important part of friendship was candor. I have enormous affection for Ken and his wife, Jane, and for Randee and Rex. All of us will dearly miss this wonderful, intelligent man, Ken Krakauer.

Ken Krakauer loved his family and friends with a passion even collateral-sharenishment. Mr. Speaker, please join me in expressing our deepest sympathy to his devoted wife of 55 years, Jane Rieger Krakauer, his daughter and son-in-law, Randee Krakauer Kelley and Michael J. Kelley, and his beloved grandchildren, who deeply miss this wonderful, intelligent man, Ken Krakauer.

Our little girls stopped at their back door for one on one, giving her his full and loving attention, and a great time was had by all. What an anchor in our lives our Uncle Ken was. What an anchor he was. Most days, when Jim was out of town, my daughter and I would knock on the back door asking for cookies and a chat. Uncle Ken would, so sweetly, hand us a wonderful role model for our young boy. A pat on the back, a bear hug, always a “How’s it going Jake?” And then, he would listen. Most days, when Jim was out of town, my newspapers would be at my back door when I came down to the kitchen. How many many mornings did I see the top of his head across the kitchen window and hear the slight thump of Uncle Ken in his bathrobe, delivering the news to the kitchen door? How many many times did I call him when the power went out, the alarms went off, a strange sound was heard? He would show up at my back door to see if we were OK, one time at 1:00 in the morning dressed in his trench coat over his pajamas with a butcher knife in his sleeve, ready to protect the children and me from an intruder.

Two weeks ago, Jim was babysitting our two-year-old granddaughter, Morgan Grace, on a Saturday afternoon. They too, knocked on the Krakauers’ back door. Aunt Jane was not home but Uncle Ken was, and of course through the kitchen table for a big chocolate brownie and milk. Papa Lynch, he brought them to the kitchen table for a big chocolate brownie and milk. Our little girls stopped at their back door to ask for cookies and a chat. Uncle Ken was there for us, taking the place of the family we lacked.

Our little girls stopped at their back door to ask for cookies and a chat. Uncle Ken was there for us, taking the place of the family we lacked.

Our little girls stopped at their back door to ask for cookies and a chat. Uncle Ken was there for us, taking the place of the family we lacked.

love him deeply and completely. He will always be a part of our lives. How we will miss his wave across the driveway. The last thing he ever did when entering his house was always to glance at our kitchen window before the garage door would come down. Always checking on us in his loving way. How I will miss those taillights pulling into the garage, the sound of the car door slamming, and that sweet smile and wave across the drive.
The Senate met at 9:30 a.m. and was called to order by the Honorable HILLARY RODHAM CLINTON, a Senator from the State of New York.

PRAYER
The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Gracious Father, You give us inner eyes to see You and Your truth. Today we celebrate the birthday of Helen Keller, born on this day in 1880. Thank You for her courageous life. With Your help she overcame tremendous obstacles of being born blind and deaf. We are grateful for people like Anne Sullivan who taught her to read braille so that later she could attend Radcliffe College and eventually become a prolific author.

Our spirits are lifted today as we ponder Helen Keller’s words, “I thank God for my handicaps, for, through them, I have found myself, my work, my God.” We intentionally adopt for our lives four things Helen Keller urged us to learn in life: “To think clearly without hurry or confusion; To love everyone sincerely; To act in everything with the highest motives; To trust God unhesitatingly.” And for our work, Keller’s words ring true: “Alone we can do so little; together we can do so much.” Thank You, Father, for the memory of this great woman. Help us today to use all that we have to do as much good as we can in as many circumstances and to as many people as we can. You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE
The Honorable HILLARY RODHAM CLINTON led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE
The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

Mrs. CLINTON thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME
The ACTING PRESIDENT pro tempore. Under the previous order the leadership time is reserved.

RECOGNITION OF THE ACTING MAJORITY LEADER
The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

BIPARTISAN PATIENT PROTECTION ACT
The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1052, which the clerk will report. The legislative clerk read as follows:

A bill (S. 1052) to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage.

Pending:
Kyl amendment No. 818, to clarify that independent medical reviewers may not require coverage for excluded benefits and to clarify provisions relating to the independent determinations of the reviewer.

Allard amendment No. 817, to exempt small employers from certain causes of action.

Mr. REID. On behalf of Senator DASCHLE, the Senate is advised that the Senate will resume consideration of the Patients’ Bill of Rights that has been called by the Chair. There is going to be an hour of debate on the Allard amendment and thereafter on the Kyl amendment. There will be votes on those two matters this morning. Madam President, I have been advised by the managers of this bill that there has been progress made during the night. If things go as expected, we should be able to meet the deadline that has been set by the leadership; that is, we are going to finish this bill by the Fourth of July break and we can also do the supplemental bill and organizing resolution.

Mr. ALLARD. Will the Senator yield?
Mr. REID. I will be happy to yield.

Mr. ALLARD. My understanding is we have an hour for the Allard amendment equally divided between both sides; is that correct?
Mr. REID. That is true.

I would just say, Madam President, the managers of this legislation, the Senator from Arizona, Mr. MCCAIN, and the Senator from North Carolina, Mr. EDWARDS, and the Senator from Massachusetts, Mr. KENNEDY, have done outstanding work. Senator Gregg and the people he has been working with have been very cooperative. I think this is a good sign for this legislation and movement of this legislation generally.

The ACTING PRESIDENT pro tempore. Who yields time?
Mr. ALLARD. Madam President, I would like to yield 2 minutes to the senior Senator from Arizona.

The ACTING PRESIDENT pro tempore. The Senator from Arizona.

Mr. McCAIN. I thank the Senator from Colorado. I will be very brief. I would just like to say to all my colleagues, on this issue I think we have made significant progress. Overnight we have the outlines of an agreement, thanks to Senators SOWEDE DEWINE, NELSON, LINCOLN, and others, on the issue of employer liability. We hope we can get the final details of that ironed out soon. I thank those four Senators and others on this issue.

On the issue of scope, I think we are close to an agreement on that major issue.

I thank all involved, including Senator FRIST and many others, for the serious negotiations that have been ongoing.

We may end up with a couple of issues that simply require votes on the floor to resolve them and the majority of the Senate will prevail. But I am very hopeful, and frankly very pleased at the progress we have made. All parties have been working with each other and working diligently. That is the only way you can resolve an issue that has this much detail and this much complexity associated with it.

Again, I echo the sentiments of the Senate from Nevada. I think we could easily complete this in the next couple of days with the kind of willingness that has been displayed so far.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

Mr. REID. One thing I forgot to mention, Senator KENNEDY and I, late last night, spoke to Senator JUDD GREGG—well, it wasn’t late; it was in the evening. He indicated he would try today to get a list of amendments so we would have a finite list of amendments so we could work through those.
If we can do that, it will be very easy to schedule what we will be doing in the next couple of days. If that doesn’t happen, there is no question which will have to work late tonight and tomorrow night. Everyone should be advised Senator Gregg said he would try to get a finite list of amendments to us this morning.

The ACTING PRESIDENT pro tempore. The Senator from Massachusetts.

Mr. KENNEDY. If I could just proceed for a moment, I just thank all our Members for their cooperation. We have made some progress. There is a lot of work to do on this. We are encouraged by the cooperation of all our Members. But having been around here a long time, we have a lot of work to do. We have to keep at this job. There are very important matters before us.

We ought to just recognize we have a lot of work to do and we will have a chance to see where we are as we take this step by step. We have important debates this morning, and we have some additional issues on employer liability— all of us believing that employers all over this country have to work late tonight and tomorrow night. If that doesn’t happen, there is no question which will have to work late tonight and tomorrow night. Everyone should be advised Senator Gregg said he would try to get a finite list of amendments to us this morning.

The ACTING PRESIDENT pro tempore. The Senator from Arizona.

Mr. EDWARDS. Madam President, I think everybody agrees that if we can resolve the case at that stage and not have to go to litigation, it is better for everybody. So the question is, what is the appropriate medical service, in this case? Here is a very simplistic example. We are not sure exactly what is wrong with the patient. We will take an x-ray to find out. But the doctor and the patient say: Look, we already had an x-ray, and the x-ray was not definitive enough. We think we need a CAT scan or an MRI.

Those are working out; I hope they are being drafted. As we all know, the key is in the details. I don’t want to have any false sense of anticipation. We have still some very important policy issues that have to be resolved. But we are making progress. We are very grateful to all the Members for their help and cooperation, and we look forward to this morning’s debate.

The ACTING PRESIDENT pro tempore. The Senator from Massachusetts.

Mr. EDWARDS. Madam President, I want to echo the words of my colleagues, the Senator from Arizona and the Senator from North Carolina.

There is certainly significant work to be done. Important issues need to be resolved. But we spent a good part of the day yesterday working on the issue of scope, making sure that every American is covered by this bill. I think we have, in fact, made great progress on that issue.

On the issue of medical necessity, which is one of the pending amendments—the Kyl-Nelson amendment—we expect to offer our own compromise amendment on that issue later today, something that was worked out yesterday through the process of discussions. As I think everyone knows, Senators Snowe, DeWine, and Nelson have worked very hard, along with the three of us, to work out an agreement on employer liability— all of us believing that employers all over this country need to be protected. That is not what this legislation is about. It is about giving patients rights and putting health care decisions back in the hands of doctors and patients and not in the hands of big HMOs. All of us are in agreement that in that process it is important to protect employers so they continue to provide coverage for employees all over this country.

So I echo the words of my colleagues. I do think it is true there is work left to be done. We will continue to work diligently with our colleagues. We have had colleagues on both sides of the aisle working on all these issues. We will continue to work on them as we go forward with these votes and this debate. But we are optimistic that we will be able to conclude this bill this week.

I yield the floor.

The ACTING PRESIDENT pro tempore. Who yields time?

The Senator from Colorado.

Mr. ALLARD. Madam President, I do not intend to take the full time right now. There may be others who wish to speak.

Mr. ALLARD has been kind enough to allow those who support the Nelson-Kyl-Nickles amendment to take some of the time right now. I would like to change the subject back to that amendment which we brought before this body last night and debated for about an hour, and then we will also have an opportunity to conclude the debate on it after the vote on the Allard amendment. But now that we have a few moments, I would like to discuss that.

For those who were not in this Chamber last night to hear the debate, let me make it clear that there were two essential problems that we saw that needed resolution. We had worked with Senator KENNEDY, Senator EDWARDS, and others—and Senator NELSON had extensive conversations—about how to resolve these issues. One of the issues has apparently been resolved by agreement, although no amendment has yet been proposed to deal with it; and that all has to do with reviewing a case by the external reviewer. In other words, the insurance company has an internal review of an issue, and then if that isn’t resolved, it goes to an external reviewer.

I think everybody agrees that if we can resolve the case at that stage and not have to go to litigation, it is better for everybody. So the question is, what exactly can be considered by that independent reviewer? The first problem that we saw was that the independent reviewer actually had the authority, under the bill, to order that benefits be provided to a patient that were excluded by the contract—legally excluded. The insured bought a certain set of benefits, and there were certain benefits excluded, but the independent reviewer would theoretically have the right to order excluded benefits to be provided for a patient.

I think everybody realized that was not what was intended, and it is at least the representation of those on the other side—and specifically Senator EDWARDS has made the point—that there is a way to fix that, and a very specific way, which we all understand. If that amendment is offered, then I think it will be a satisfactory conclusion to that particular matter.

The other matter that remains has to do with the other kind of issue that can come up. There is a benefit which is covered but the question is, what exactly is the appropriate medical service in this case? Here is a very simplistic example. We are not sure exactly what is wrong with this person. We will take an x-ray to find out. But the doctor and the patient say: Look, we already had an x-ray, and the x-ray was not definitive enough. We think we need a CAT scan or an MRI.

Those are very important matters before us.

Mr. ALLARD. How much time does the other side—and specifically Senator ALLARD—have, in fact, made great progress on these issues. We will continue to work diligently with our colleagues. We have had colleagues on both sides of the aisle working on all these issues. We will continue to work on them as we go forward with these votes and this debate. But we are optimistic that we will be able to conclude this bill this week.

I yield the floor.

The ACTING PRESIDENT pro tempore. Twenty-eight and a half minutes.

Mr. KENNEDY. If I could just propose an amendment on that issue later today, something that was worked out yesterday through the process of discussions. As I think everyone knows, Senators Snowe, DeWine, and Nelson have worked very hard, along with the three of us, to work out an agreement on employer liability—all of us believing that employers all over this country need to be protected. That is not what this legislation is about. It is about giving patients rights and putting health care decisions back in the hands of doctors and patients and not in the hands of big HMOs. All of us are in agreement that in that process it is important to protect employers so they...
The one that matters the most is the definition of the plan, but the plan has to have a real defined benefit. What would that definition be?

First of all, if a State mandates certain language, then obviously we need to use that language. So for the 13 or so States that actually mandate language, that would have to be applied. But for the rest of the States, there would be a definition, and the definition that we use is the definition that the Federal Employees Health Benefits Plan families approved by the Office of Personnel Management for fee-for-service plans.

So, Madam President, you and I, and the other Members of this body have an opportunity to acquire health insurance through the Federal Employees Health Benefits Plan just as all other Federal employees do. And there are basically two standards that they use for these contracts. One is for managed care. We consider that to be insufficiently protective of the patients. The other is for the fee-for-service. It is a more strict standard. That is the standard we use.

For 49 percent of the people who are covered by a Blue Cross-Blue Shield contract—and the language, we believe, is also used by another 23 percent. So almost three-fourths of the people are covered by very specific language. That is exactly the language we have in these contracts.

There are five specific elements of it. The one that matters the most is the second one, which is: “Consistent with standards of good medical practice in the United States.”

So the reviewer—if you are in a State that does not have a mandatory definition—would then apply this definition. You might say: “Consistent with standards of good medical practice.” That is pretty broad. That could be almost anything. It is not almost anything. What it is good medical practice. And good medical practice can be determined by experts in the field, based upon the standards of the common medical literature should be done in a particular case, and at least affords an opportunity for the independent reviewer to decide whether or not the patient needs the MRI or the CAT scan, in this case, whether good medical practice would ordinarily call for that, or whether, based on the circumstances of this case, it is just not that difficult and an x-ray ought to be good enough.

There are four other elements to it as well, but that is the key one.

There is a third opportunity here. If people do not like that definition, even though it covers three-fourths of us under a Federal plan, then we provide for a negotiated rulemaking procedure whereby all the stakeholders can get together and figure out a definition. I do not know what that would be. If they can all agree on a definition, we provide a mechanism for them to do so.

And if they do, then that supplants this other definition. One year after that is agreed to, then this other definition is gone.

So there is an opportunity to come up with something that all of the parties agree is better if, in fact, they can do that. In the meantime, this is the definition that would apply. We think that is reasonable and think that is an improvement on the legislation. Certainly something has to be done with this particular section.

Senator Kennedy last night talked to both Senator Nelson and me about some possible changes in the language. We are very open to that. I am hoping that in the remaining hour of debate on the Allard amendment—and then we will have the vote on the Allard amendment—and then we have an hour of debate on the Nelson-Kyl amendment—I am hoping in that 120 minutes or so we can come to an agreement as to what exactly this language should be. If we can, we are very willing to change the amendment and adopt whatever we can agree to. Senator Kennedy had one particular idea last night that both Senator Nelson and my staff are exploring right now.

If we can do this, then we will announce it to the body. We will explain what it is, and hopefully we will have an agreement that anyone can support. If not, then obviously we will need to proceed with this language. In any event, we have identified a problem. We have a reasonable solution to the problem. If somebody has a better idea, we are open to consider what that might be.

I urge my colleagues who are interested to come to the floor and speak to it. We not only have a few remaining minutes under Senator Allard’s time, but we have additional time when the amendment is debated after the vote on the Allard amendment.

I reserve the remainder of the time. Again, I invite anyone who is interested in speaking to this matter to come to the Chamber and address it.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. Kennedy. Madam President, how much time do we have on our side?

The ACTING PRESIDENT pro tempore. Twenty-six minutes.

Mr. Kennedy. I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Massachusetts.
Mr. EDWARDS. Madam President, will the Senator yield?
Mr. KENNEDY. I am glad to yield to the Senator from North Carolina.

The ACTING PRESIDENT pro tempore. The Senator from North Carolina.

Mr. EDWARDS. Madam President, as the Senator is aware, we are continuously working very aggressively with Members on both sides of the aisle, led by Senators SNOWE, NELSON, and DEWINE on this issue, specifically to provide protection for employers, including small employers. As somebody who has been involved with this issue for many years, I wonder if the Senator believes we can have a real patient protection act, real Patients’ Bill of Rights, if, in fact, we exempt almost half of the employees in the country from the protection?

Mr. KENNEDY. The Senator is quite right. Of course, we cannot. That is effectively what we are doing to about 43 or 44 percent. In addition, many of those who have looked at the amendment think there will be larger companies who will break down into units of 50 or fewer in order to escape the protections of this legislation. That can go on ad infinitum. We are talking about 40, 45 employees per employer. It may be a lot more.

The problem is this approach is extreme. It is outside anything the American Medical Association, or medical groups across this country would think is a sensible solution to this issue. So I understand the concern. It is a concern we believe we have addressed in our legislation, which is to protect small employers. But we are working to go further with colleagues on both sides of the aisle, Republican and Democrat, to make sure small businesses all over the country are protected. But the solution is not to penalize almost half the families in this country and not provide them with the same rights that all other Americans would have.

I will speak briefly to the Allard amendment. Let me say first to my colleague, the sponsor of the amendment, who is in the Chamber, I have no doubt that his intentions in proposing this amendment are nothing but good and he is trying to accomplish something he believes is important. The problem is this approach is extreme. It is extreme, it is outside the mainstream of all the work, essentially, that has been done on this issue.

The McCain-Edward Kennedy bill deals specifically with protecting small employers. The competing legislation, the Frist-Breaux bill, also deals with that issue, without this kind of extreme carve-out. The Norwood-Dingell bill that passed the House of Representatives by a wide margin did not have this kind of language in it. The American Medical Association, the medical groups from all over the country would not support this kind of carve-out. The more we move towards having a real Patients’ Bill of Rights so all patients and families across this country are protected if in fact you exclude almost half the employees in this country.

The more sensible, mainstream approach, which is the one we are taking in our legislation and as we speak, is to make sure you provide the maximum protection you can, keeping the interests of the patient in mind, for these small employers. That is the reason we are continuing, as we speak, working across party lines, to craft language that we believe is appropriate to the purpose of protecting employers in general and small employers in particular, to provide protections for employers. But to exclude almost half of the employees in this country from this legislation means we have essentially left half the country out of patient protection, which I do not think anyone thinks is a sensible solution to the issue.

I hope this amendment will not be accepted. It is a carve-out. As the Senator from North Carolina has stated, there are members on both sides of the aisle who are working—Senator Snowe and others—to tighten the language included in the basic document. We have talked about and debated the language during this time, in terms of the role of the employer and to ensure that there won’t be unwarranted additional burdens on the employer. That is in the process. That is what we are dealing with as the way to go. We are going to have the opportunity to consider that later in the day.

Now we have an amendment that is going to effectively eliminate responsibility for almost half of the employees in this country. The protection for those employees is not warranted and justified with the legislation. How many employers have remain, Madam President?

The ACTING PRESIDENT pro tempore. Seventeen minutes.

Mr. KENNEDY. I yield to the Senator from North Carolina.

Mr. EDWARDS. Thank you, Madam President.

I would like to speak briefly to the Allard amendment. Let me say first to my colleague, the sponsor of the amendment, who is in the Chamber, I have no doubt that his intentions in proposing this amendment are nothing but good and he is trying to accomplish something he believes is important. The problem is this approach is extreme. It is extreme, it is outside the mainstream of all the work, essentially, that has been done on this issue.

The McCain-Edward Kennedy bill deals specifically with protecting small employers. The competing legislation, the Frist-Breaux bill, also deals with that issue, without this kind of extreme carve-out. The Norwood-Dingell bill that passed the House of Representatives by a wide margin did not have this kind of language in it. The
extreme and it penalizes almost half of the families in this country and leaves them out of patient protection. Those families will still be in the same place they are today, which is HMOs can deny them coverage and they cannot do anything about it; they are simply stuck. Women will not have the right to go to their OB/GYNs; children will not have access to specialists; there will be no emergency room protection if they need to go to the nearest emergency room; and there will be no way to challenge any decision that an HMO has. That 45 percent of American families, almost half of American families, under this amendment would be totally left out. They would continue to be in the place where the HMO held complete control over their health care.

That is where we are trying to do something about. It is not the right thing to do, to exempt almost half of America from this patient protection. Not that the concern is not legitimate, because it is, but this response is extreme. This is outside the mainstream of the work and thinking that has been done by everyone in this area.

The PRESIDING OFFICER (Mr. NELSON of Nebraska). The Senator from Massachusetts.

Mr. EDWARDS. Will the Senator be good enough to yield for a question?

Mr. KENNEDY. Yes.

Mr. EDWARDS. Can the Senator conceive of a situation where the employer got hold of the HMO and said: Look, I have a worker who has been hurt. I know it is going to be a costly process to bring that worker back to good health, and I don’t want you to spend more than $25,000 on this. I want to put a limit on this. We are not going to spend more. I don’t want you to spend more.

The HMO is going to say, if I am going to keep this as a client, I am going to have to charge this client.

Let me ask you this. If the Allard amendment is accepted, and the worker was seriously injured because of the failure to give the kind of medical treatment that the doctors have recommended and suggested, would that patient be able to hold that employer accountable under the Allard amendment?

Mr. EDWARDS. In answer to the Senator’s question, not only under this amendment the employer couldn’t be held accountable, in fact the HMO couldn’t be held accountable because they would both be exempted from the legislation. So the family and the patient would be completely deprived of any help. That was my point earlier in responding to the Senator, in my comment that this is an extreme response. We have a response, both in our legislation and legislation on which the Senator has been very actively involved that provides adequate protection, will make sure small employers are protected, but does not punish almost half the families in the country.

Mr. KENNEDY. If the Senator will yield further, this is almost an invitation, is it not, to employers, such as the mom-and-pop stores that have half a dozen employees, that basically are just paying the premium and are not making the decisions? Someone will say to them: Look, not only do you get quality insurance but you can just tell your HMO not to spend more than $10,000 or $15,000. You can do that and be completely immune and save yourself in terms of the additional premiums, although in that way you put at risk your workers. Could they not do that?

Mr. EDWARDS. Not only that, but I say to the Senator, having worked for and with small businesses for many years, I know they care about their employees. They care deeply about their employees, the vast majority of small businesses around this country. They do not want their employees to be in a position that they have no rights against the HMO.

To continue to streamline the work, and thinking that has been done by everyone in this area.

Mr. ALLARD. If the Senator will yield, I yield myself 30 seconds—under the proposal that we anticipate and support, I will make the assertion that under this critical component of the legislation that the Senator well knows after all his years of work on this issue, is that they have quality health care. The small employers in this country who care about their employees—in my judgment, the vast majority—will want to make sure their employees have the best product they could possibly have. They will want them to have the same protections.

Those small employers will want to be protected from liability. That is a reasonable concern, and that is the concern, as the Senator knows, that we have addressed in our legislation and we are continuing to address with even stronger language with colleagues from across the aisle.

Mr. KENNEDY. Finally, if I may say to the Senator, having worked for and with small businesses for many years, I know they care about their employees. They care deeply about their employees, the vast majority—will want to make sure their employees have the best product they could possibly have. They will want them to have the same protections.

Mr. ALLARD. I think we ought to just take a little time out here and summarize where we are in this debate on whether or not we exempt businesses of 50 employees or fewer. And this is the way I want to lay it out. The Democrats are arguing that 41 percent of small businesses will lack protection from HMOs. That argument is wrong. Forty-one percent of small business employers will be subject to increased health care premiums or even losing their health maintenance insurance altogether. They will not be insured.

So this argument that there is a line being drawn between 48 and 51 employees, the fact is, when you expose small employers and small businesses to increased lawsuits when they take on a program, they are not going to take on the program. So employees will not be insured.

Moreover, an employee does not get protection from HMOs from suing their employer. If they want to sue, they sue their HMO, not the employer, who happens to be, by the way, kind enough to offer the health insurance.

Under S. 1052, employee health costs will increase $1.19 per month. Again, I believe this argument is irrelevant, and because of S. 1052 we will see, in my view, more than 1 million Americans will lose their health insurance. At least the Senate can do something to help out small employers by exempting them from these unnecessary lawsuits. I am talking about businesses with less than 50 employees.

S. 1052 will allow a small business of five employees, for example, to be sued for unlimited economic, unlimited non-economic damages, and up to $5 million in punitive damages. Now, that is not protecting the small businessman. That is not protecting those businesses that have 50 or fewer employees.

According to a survey of 600 national employers, 46 percent of the employers would be likely to drop health insurance coverage for their workers if they are exposed to new health care lawsuits, plain and simple.

I will ask to print in the RECORD a Denver Post editorial from June 21, 2001. I will quote a small section of it. It says:

The competing Democrat bill, in our view, goes too far and includes a provision that will allow employees to sue their employers for denial of a medical request if the employer helped make the decision.

We think this type of language would have the effect of encouraging more lawsuits and driving up costs instead of encouraging quick, early resolution of disputes.

It went on to say:

We also find fault with the provisions that would authorize individual lawsuits to produce punitive damage awards in the multimillion-dollar range. Compensatory damages are one thing; punitive damage awards are quite another.

I ask unanimous consent that this editorial be printed in the RECORD.
CONGRESSIONAL RECORD—SENATE

June 27, 2001

Mr. ALLARD. Mr. President, the employer is not protected. In fact, he is exposed to more lawsuits—multi-million-dollar lawsuits. In order to protect himself, he is not going to provide health insurance. That means the employees will not be covered. The argument was made, why don’t you provide coverage for emergency service? Why don’t they provide coverage for medical needs that occur in families and what not? The employer isn’t going to provide that coverage if he has to face lawsuits. It is optional. He will decide not to offer health insurance.

I was a small businessman and I had to face the challenge of medical costs. We had between 10 and 15 employees. The health care costs were eating us alive. So finally we went to the employees and said what we would like to do is this: We can’t afford this, so we will pay you more in a salary and then, hopefully, that will be enough of an increase that you can buy your own health insurance. We couldn’t afford to do that. That was in times that weren’t as challenging as they are today.

We are seeing horrendous increases in premiums to small business employers. Now we are going to tack on top of that the mandatory and increased costs and the increased threat of a lawsuit. It is not hard for me to believe that we are going to have at least a million more workers out there who are not going to be insured if this bill passes.

Now, it is 41 percent of the workforce that we are talking about with this amendment. But I look at it a different way. I think we are helping assure that they will have health care coverage with this amendment because we are exempting them from the lawsuits.

I think this amendment is a very responsible one. It is needed. If it is not adopted, the small business community of 50 employees or less will suffer.

I yield 5 minutes to the Senator from Missouri.

Mr. BOND. Mr. President, I thank my friend from Colorado and I commend him for this amendment, which I think is very important because it goes to one of the key areas in this Patients’ Bill of Rights.

We want to make sure that people have good health care coverage and that they get what they deserve from their HMO, their insurance company.

That is what this debate is all about. How do we get there? One of the most important parts of that question is how we deal with the small businesses that provide health care coverage now for their employees and who may not in the future.

My colleagues on the other side of the aisle insist that employers will not drop coverage due to the McCain-Kennedy bill. For some employers, that is probably true. Virtually all large companies offer health care, and even if we pass this legislation and dramatically increase costs, they will probably have to do so. They will have to pay more and their employees will have to pay more. But they are likely to have coverage. But from everything I am hearing from the small business community, it is much less likely that small businesses—even those who now provide health care coverage—will be able to do so.

I heard a colleague on the other side of the aisle say that the McCain-Kennedy bill has taken care of small employers. The small employer health care provision. Right. Just like a herbicide takes care of a bed of flowers, it is going to kill small business health care at the roots. I know what “taken care of” means in that context. I have sprayed herbicide; I know what they do to a flower bed or a lawn. That is how McCain-Kennedy takes care of the health care coverage of small business. They drive them out.

Small businesses are the ones that are struggling to survive. Small businesses are the ones that struggle to provide health care. They are at the heart of the problem that the McCain-Kennedy bill totally ignores—the 43 million Americans who have no health insurance. We are going to see 43 million Americans who have no health care insurance, approximately 60 percent are small businesses owners, employees and their dependents, the family members. That is 25.6 million Americans, either small businesses owners, employees, or family members, who are not covered by health insurance. They can’t be a patient under the Patients’ Bill of Rights. In Missouri, we have 570,000 uninsured, and 324,000 are in families headed by a small businessperson, man or woman.

If we drive more of the small businesses out of health care coverage, those numbers are going to go up. That is a disaster. That is the wrong way to go. Many small businesses do not offer coverage. Why is that? Well, there are still many barriers to small businesses providing health care coverage.

First, they have higher premium costs.

Second, they have higher annual premium increases.

Third, there are more difficult administrative hurdles. In mom and pop operations, neither mom nor pop usually has the administrative skills to set up health care and other benefit plans.

Limited deductions for the self-employed, we voted on that last week. Unfortunately, my colleagues chose to turn a blind eye to the needs of the self-employed and their families and said, if you like the status quo, vote for this bill. That is one more mistake in this bill. Here are the problems. Under McCain-Kennedy, there would be a 4.2 percent cost increase—slightly more. That is going to make health care coverage more expensive for the small business and the small business employee. That means fewer patients, because 300,000 lose coverage for every 1 percent increase.

Exposure to liability is the big one. Employers throughout Missouri are writing: we cannot afford the continuing cost increases in health care and we will not tolerate those plus exposure to liability.
June 27, 2001

The PRESIDING OFFICER. The Senator has used 5 minutes.

Mr. ALLARD. I yield the Senator an additional 3 minutes.

Mr. BOND. I ask for 1 minute.

Most small businesses in America are only one lawsuit away from going out of business. This lawsuit, under the provisions of action provided in the McCain-Kennedy bill, could drive any single small business out of business. They are one lawsuit away from going out of business. Small businesses are smart enough to know if they are one lawsuit away from going out of business because they provide health care, they are one McCain-Kennedy bill away from getting out of the health care coverage business.

The 43 million Americans who are now uninsured—watch those numbers increase with the increase in the minimum wage. Very few employees of small businesses would lose health care coverage because their small business employer could not take the risk. That number is going to be higher. It is much higher naturally.

I commend the amendment offered by my colleague from Colorado. I offer this as a suggestion: If Members care about small businesses and the health care coverage they provide their employees, vote for the Allard amendment. This is the only way to save small businesses from a knife in their back, making health care coverage for their employees unaffordable.

Mr. ALLARD. I yield 2 minutes to the Senator from Texas.

Mr. GRAMM. Mr. President, I congratulate Senator Allard. Yesterday we had an amendment on exempting employers from being sued. That amendment was important. This amendment is important, as well.

Our basic point yesterday was, when an employer, because they care about their employees and because they want to attract and hold good employees, put up their own money to help people buy health insurance, we should not reward that voluntary activity by making them liable to being dragged into court and sued.

The bill before the Senate is a classic bait and switch bill, make no doubt. It says you cannot sue employers, and then it says you can sue employers. It has 7½ pages of conditions under which employers can be sued, including conditions where they exercise control, which is a little trick phrase because ERISA, the program that governs employers, guarantees that the employers are always deemed to be in control. So the bill before the Senate is written to guarantee every employer in America can be sued. If anybody doesn't understand that, it is because they don't want to understand it.

This amendment does not fix the problem. This amendment simply makes a plea that if you are going to force companies such as Wal-Mart to cancel their insurance—at least they have smart lawyers and they have lots of money to find a way to get around this provision by changing their plans. Some of them won't. They will cancel their health insurance. And the proponents of this bill will be back a year from now. 2 years from now. And, well, the number of uninsured has gone up and we need to have the Government take over and run the health care system.

This amendment is simply a last gasp effort to introduce some reason into this bill which says while clearly this bill is aimed at allowing employers to be sued, and clearly large employers are going to be hit with this liability and they are going to be forced either to drop their plans or change it, they have some ability to make a change. It is not smart. It is counterproductive. It is hurtful to America. But that is the way it is. That is the majority position.

The point is, this amendment says, if the company has 50 or fewer employees. We are talking about small businesses; we are not talking about companies that can go out and hire a legions of lawyers; we are not talking about companies that have the ability to junk their health care plan and to figure out a clever way to try to get around the devastating provisions in this bill. If you vote against this amendment, you are saying to every small business in America, we don't care if you are sued; we don't care if you provide health insurance.

It is unimaginable we would not adopt this amendment and say that while we want to save the small businesses, we do not want to destroy the ability of small business to provide health insurance, and therefore we are going to adopt this amendment. This does not fix the problem. This is an amendment that should bring out some degree of shame as to what we are willing to do. I urge my colleagues to vote for this amendment.

I yield the floor.

Mr. ALLARD. How much time remains?

The PRESIDING OFFICER. Two minutes, and the other side has 7 minutes 16 seconds.

Mr. KENNEDY. I yield myself 4½ minutes.

Mr. President, the issue is the protection for families in this country. Now this amendment wants to say, we will not go out of business for some, but we will eliminate 45 percent of the protections for families in this country. What possible sense does that make?

There is a representation that somehow employers will be at risk. They will not be at risk unless they are making illegal decisions that will result in harm or injury to the patient. If they are not, they are free, in spite of all the agitation we have heard from those supporting this amendment.

I have been around here long enough to realize that when we take on the special interests—and that is the HMO in this case—we hear dire consequences. When we worked on the Family and Medical Leave we heard the estimates that it would cost American business $25 to $30 billion a year. That was all baloney. We worked on the Kassebaum-Kennedy bill regarding portability of health insurance, particularly for the disabled. They said it would increase the premiums 30 percent. It would be the 4.2 percent over business and the end of the American economy. That was a lot of baloney. We worked on increasing the minimum wage. We heard it would put small business out of business, and that there would be hundreds of thousands out of work all over this country. That was baloney.

The burden we hear that would be put on small business is baloney. They have nothing to fear. They have nothing to fear in this. But the HMOs have something to fear if they are not going to permit doctors and nurses and trained personnel to provide for their patients.

The facts belie these representations that have been made. If you look at the States that have tough HMO legislation, as we have gone through repeatedly, the message should become clear. For instance, in Texas with their tough HMO law, there have been 17 cases in 5 years. California has a tough law that has been in effect now 9 months, and no cases. No cases. Do you hear me? No cases. No small businessmen, nobody with 50 or less, none, no cases on it. And what has happened? The employers are getting the protections they need.

Now we hear, well, what about the premiums? I read into the Record yesterday that the total cost of this amounts to 1 percent a year over the period. It would be the 4.2 percent over 5 years. That amounts to about $1.19 a month. Let me tell every premium payer in this country about what is happening in terms of their premiums, why they are going up.

We have Mr. McGuire, United Health Group, who got $54 million in compensation last year and $357 million in stock options for a total compensation of $411 million. That is $4.25 a month for every premium. We are talking about $1.19 a month.

You want to do something about the increase in terms of your premiums, tell Mr. McGuire he does not need $411 million a year in annual compensation.
Mr. ALLARD. Mr. President, has time expired on the other side? The PRESIDING OFFICER. The majority has 42 seconds. The Senator from Colorado has 1 minute 50 seconds.

Mr. ALLARD. I reserve my time until the majority has used their time on the amendment. The PRESIDING OFFICER. Who yields time?

The Senator from North Carolina.

Mr. EDWARDS. Very quickly, with the remaining 40 seconds that we have, I urge our colleagues to vote against this amendment. We are doing the things necessary to protect small businesspeople all over this country, but that can be done without leaving almost half of the families of America uncovered by the necessary patient protections that are in our legislation. For that reason we urge our colleagues to vote against the Allard amendment. We yield back the remainder of our time.

The PRESIDING OFFICER. The Senator’s time has expired. The Senator from Colorado.

Mr. ALLARD. Mr. President, I yield myself the remainder of the time.

First of all, I would like to thank my colleagues from Texas and from Missouri for their very cogent comments on small business and the adverse impact of this particular bill on small business. My particular amendment exempts businesses of 50 employees or less. This is important because what we do in this bill is we expose businesses to more lawsuits. The consequences are that businesses will not have the ability to get health care coverage. The other side is trying to make the point that somehow or the other this amendment will hurt health care coverage for employees. Just the opposite will happen. If this amendment is not adopted and the bill is passed, small employers all over America will cancel their health care coverage and turn to the employee and ask them to provide for their own health care coverage. That is not more health care coverage; that is less health care coverage.

I am a small businessman. I have had to face those tough decisions, and it is not hard for me to believe that a million employees will lose health care coverage if this particular bill is passed. I am going to ask my colleagues in this Chamber to vote for this Allard amendment because we want to make sure that we have a viable small business community in America. We want to assure that coverage for employees now covered by health plans of their small business employers continues.

If this bill passes, there is a good chance they are going to lose that coverage and that is going to mean less health care coverage for employees, not more.

This is a key amendment. It is a key vote for the small business community.
to discuss with the Senate. I do hope the Senate will come to order.

The PRESIDING OFFICER. The Senate will come to order. Members will take their conversations off the floor.

The Senator from West Virginia.

SUPPLEMENTAL APPROPRIATIONS

Mr. BYRD. Madam President, I have asked for recognition at this time so that I might inquire of the joint leadership as to when we might expect to take up the supplemental appropriations bill. That bill was reported from the Appropriations Committee several days ago. It is on the calendar. We only have a little time left this week.

The administration has asked for this bill. The amount in the bill is within the request of the President of the United States—not one cent, not one thin dime over the President's request.

The bill has had the joint support of the distinguished Senator from Alaska, Mr. STEVENS, and myself, and our respective sides.

I will be able, at a later time, to compliment the members of the committee. Right now I want to inquire. This is a very serious matter. The administration says it wants this bill before we go out because of the need in the military for moneys for services, for training, and so forth. I do not want us to be out through this recess and have this bill hanging out there, and have it there when we get back.

Now we are ready to go. I would suggest we try to get a time agreement that would be amenable to the feelings of the two leaders and our respective sides. I think we can do that. I have every confidence we can do that. I just take the floor now to inquire as to what the chances are for us to move this supplemental appropriations bill before we go home for the Independence Day recess.

Mr. STEVENS. Will the Senator yield for one moment?

Mr. BYRD. I yield.

Mr. STEVENS. Madam President, I just received word from the House of Representatives that they are scheduling two appropriations bills on the floor, and they have bipartisan agreement to finish by Thursday night. That is why this dialog right now is very important. We do have to go to conference with the House before they leave.

I join the Senator in making the inquiry.

Mr. BYRD. Madam President, I thank the distinguished Senator. Mr. DASCHLE addressed the Chair.

Mr. BYRD. Madam President, I yield to the distinguished majority leader.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DASCHLE. Madam President, I thank the distinguished President, I thank the distinguished chairman for yielding.

I reply that it would be my intention to complete the supplemental prior to the time we leave. I do not think we ought to leave Washington prior to the time the supplemental has been satisfactorily completed. I do not think we ought to take vacation until this legislation has been completed.

I have indicated, just now, to Senator LOTT that if we could reach some agreement—a finite list of amendments remaining on this bill, with an understanding of how long these amendments would require for debate—that I may be willing to enter into something I was not prepared to do earlier, which is to move to the supplemental prior to the time we complete our work on the Patients' Bill of Rights. We will complete our work on the Patients' Bill of Rights this week, and we will finish the supplemental this week, and the organizing resolution this week—or before we leave, as it takes.

I hope our House colleagues will choose not to leave town until the conference has been completed and until we have been able to deal with the conference as well. It should not take long in conference, but clearly the work must be done. As I say, if we could reach that agreement with regard to a finite list, I would be prepared then to find a way with which to schedule and then perhaps take up a unanimous consent agreement that would allow us to consider the supplemental over a designated period of time.

Mr. STEVENS. Will the Senator yield?

Mr. BYRD. I yield to the Senator.

Mr. STEVENS. Madam President, the leader is correct about the timing. We should all stay until we finish this matter. But if we don't finish it by Thursday, and the House is already scheduled, I can tell you, you are not going to get that agreement. I know if people believed I was serious about it, but we are serious. We are resolute. That will be the order for whatever length of time it takes to complete our work.

I thank the chairman for yielding.

Mr. STEVENS. Will the Senator yield?

Mr. BYRD. I thank the distinguished majority leader. I yield to my counterpart. Mr. STEVENS. I know the Senator from Oregon wishes to have a conversation. I am prepared—I think the Senator should be prepared—to present to the Senate now our wishes with regard to the agreement.

From my own point of view, we have a very limited managers' amendment which Senator BYRD and I are working on, and I think we disclosed it with regularity and it is in a drought condition. It is certain to be offered. That is an amendment of the Senator from Arizona.

I am prepared to enter into an agreement of no more than an hour on an amendment, and amendments be disclosed here by noon. We will debate them tonight and vote tomorrow.

Mr. BYRD. Madam President, may I first yield to the distinguished Senator from Oregon who has been waiting. Then I want to respond to the distinguished Senator from Alaska.

Mr. SMITH of Oregon. I thank the chairman of the Appropriations Committee. Senator BYRD does not have a bigger fan in this Chamber than I when it comes to the way he defends the people of West Virginia.

I am one of those who would like not to be holding up this bill, but I am looking at a situation in the Klamath Basin of Oregon and California that is in a drought condition. Drought is typical in the western United States. It is regular. You can count on it. Unlike past droughts, the people of Klamath Basin have had the Government magnify their drought by cutting off every
Mr. BYRD. Madam President, I know the Klamath problem. I would be happy to discuss that. I also know that the administration wants this bill. I hope the Senator will not stand in the way of final action on it. There are many things I have wanted over the years, and the Senator has every right to stand on the floor as long as he wants and hold up the bill and speak as long as he wants. I will be here listening when he speaks. I have a sick wife. She has been in the hospital now for 10 days—9 days, but she is on the mend. I will be here as long as the Senator wants to talk. If he wants to stay in the way of the bill, I will be here listening. But we will talk about this.

I am not saying no, but I am saying that when anyone wants to stand in the way, they are going to have the administration to compete with there. The President wants this bill. And my friends in Oregon and I have bust a gut to get this bill to the floor and to keep it within the President’s limits.

If any Senator is contemplating calling up an amendment, if it is a money amendment, that Senator ought to be ready to find an offset in the bill. That Senator ought to be ready to have the administration call that amendment an emergency on this bill. Now, if the administration wants to call it an emergency or if there is an offset, I am sure the Senator probably won’t have a great deal of trouble. But I want to do what the President has asked for in this instance. This money is needed now.

That is a long story, but I say to the distinguished Senator from Oregon that he won’t be by himself if he wants to hold up the bill.

Mr. LOTT. Madam President, will the distinguished Senator from West Virginia yield?

Mr. BYRD. Yes, I will.

Mr. LOTT. I apologize to my colleagues for not being here to hear the discussion earlier. I have been briefed on basically what has been said.

I commend the chairman of the Appropriations Committee and the ranking member for the work they have done on this important defense, and other issues, supplemental appropriations bill. They have worked hard. They did bust a gut to get it out, and they held it within the area of the President’s request. They have done a credible and formidable job.

I would like to get a time agreement, a tight time agreement, and a limit on amendment or amendments, and would, in spite of the fact that there is a very important conflict tonight, be willing to work with the managers of the legislation to see if we could get an agreement to do it tonight so that a conference would be possible with the House and this very important matter could be completed in the conference and the amendments available for the needs of our defense and the health care of our military men and women.

I will be glad to work with the Senator from West Virginia and with his leader, the majority leader, and to work with Senators who have concerns to make sure we address those, that they are heard.

The important thing is that we push to try to get this done. I appreciate that effort. I know the President wants it. I have spoken to him, and Senator Daschle has spoken to him. Clearly, we need to get this business done. I make my commitment to the Senator that I will work with him and others to see if we can’t work out an agreement to handle the bill tonight and then we can do the conference tomorrow. I will be working on that and will confer with Senators as we go forward.

Mr. BYRD. Madam President, I thank the Republican leader. Let me close by urging that our respective staffs of Mr. STEVENS go forward, work out a time agreement, and any Senators who want to offer amendments under the conditions that have been stated here, by which we are bound, let’s have those Senators come forward by noon today and tell us about their amendments so that we can do the conference tomorrow. I will be working on that and will confer with Senators as we go forward.

Mr. BYRD. Madam President, I thank all Senators. Mr. STEVENS. If the Senator will yield for a moment, because of my need for a point of order, I would like to finish the business.

Mr. REID. I say to the two chairmen, I am also a member of that committee, and I would like to finish the whiteness at hand. Senator Daschle has been very clear. He has stated for more than a week now that we must move forward with the Patients’ Bill of Rights. We are doing that. He said this morning and I have been in conference with Senator Kennedy and Senator Edwards. I have spoken to Judd Gregg, manager of the Patients’ Bill of Rights bill. I indicated to him we need a finite list of amendments on the Patients’ Bill of Rights. That seems simple. We are very interested in doing that, and that should be able to be accomplished quickly. Everybody knows the contested issues on this matter. We need a finite list of amendments.

When that Senator Daschle said he would be happy to work with the two Senators and work out something that is fair. We can do that as quickly as possible. I think there could
June 27, 2001

CONGRESSIONAL RECORD—SENATE 12021

be a finite list given to us in the next hour. It should not be very hard to do at all.

Mr. BYRD. Madam President, I want to make sure the distinguished whip understood my request. My request was not that we take up the bill by noon. My request is only that Senators who have amendments make it known by 12 noon, that we close out after they have made it known as to what amendments they want to call up, and that we close out the amendments at that point. The leader would still retain, of course, his right to call up the bill whenever he wishes.

Having said that, might I make the request again?

Mr. REID. Madam President, as the Senator knows, I have come to him on many occasions on various bills saying we may or may not close before noon. Unless we know when the amendments can be filed. We want to do this. I am saying that we will do this as quickly as possible. You need not be on the floor. I will try to get the agreement as soon as possible. We have time limited to the supplemental, but there are certain people I have to check with, and we will do that as quickly as possible.

Mr. BYRD. I yield to the Senator from Alaska.

Mr. STEVENS. My question to the distinguished whip is plain and simple. Is the Senator from Nevada saying that the finite list of amendments to the Patients’ Bill of Rights must be reached before we can get the finite list for the supplemental?

Mr. REID. No. If the Senator allow me to respond.

Mr. BYRD. I yield for that purpose.

Mr. REID. We need a finite list on the Patients’ Bill of Rights so a time can be arranged to do the supplemental.

Mr. STEVENS. Respectfully, that is not how I understood my discussion with the majority leader. We discussed doing this bill tonight. There will be a window. This is the night of the Republican dinner. Some of us have agreed to stay and debate the amendments on the supplemental so that it might be voted on in a very short window tomorrow and get it to the House tomorrow so they can finish it so we can get it back to the floor Thursday as we do that today. I for one am going to give up on the supplemental.

Mr. REID. If the Senator from West Virginia would allow me to answer.

Mr. BYRD. Yes.

Mr. REID. First of all, probably if you are something like me, that would be a good excuse so you would not have to go to the dinner if you had to be here.

Mr. STEVENS. Better not said, but you are correct.

Mr. REID. But there is no reason that we cannot have a finite list of amendments on the Patients’ Bill of Rights within the next hour or so. I am sure Senator DASCHEL would be happy to work with Senator LOTT and arrange a time. Give us a little time on this. I request to my friends again, the question on the list of amendments should be filed and we will work on that very quickly.

Mr. BYRD. Madam President, I hope we have reached an understanding. I have been at this work for many years. I have learned a long time ago that when you are within reach and you have both leaders having expressed their desire for a unanimous consent request, and with the work that the Senator from Alaska and I have already done with respect to arriving at such a request, that other amendments, other Senators, and other requests can come out of the woodwork. I would like to get this nailed down by noon tomorrow because the longer we wait, the more Senators there will be that will say, “This is my chance.” In closing, I hope we can go forward with this request soon. I yield the floor.

AMENDMENT NO. 818

The PRESIDING OFFICER. Under the previous order, there will now be 15 minutes for debate on the Kyl-Nelson amendment No. 818.

The Senator from Arizona is recognized.

Mr. KYL. Madam President, I will speak and then yield time to Senator NELSON of Nebraska, my colleague on this amendment. In discussing this proposed amendment with some of the stakeholders involved, a couple questions have been raised. I want to clarify my intention and turn the time over to Senator NELSON.

One question asked was, With respect to the external review, is this a de novo hearing? That is to say, does the external reviewer begin with whatever record is before it, but can bring in other witnesses, or consider other material or other factors or records in addition to that which may have been considered by the internal reviewer. The answer to that question is yes. I believe that is what the underlying bill provides. Our amendment intends the same. To the extent that would need to be clarified, we are willing to do that.

Secondly, there is concern that with respect to the negotiated rulemaking procedure that is provided for in the amendment, that the composition of the stakeholders be fair.

Obviously, we believe that should be fair. We believe that the providers need to have adequate representation in such rulemaking procedure, that all stakeholders should be represented. I do not know what we can do to make our commitment any more firm, but to the extent anyone has a suggestion about how we ensure that fairness, it would certainly be our intention to do so.

In summary, we have identified a specific problem with the bill, a need to add a standard that is uniform and to ensure that the two extremes do not represent what occurs here. One extreme is that the external reviewer has no guidance and can just ignore the contract. The other extreme is that an HMO can draft a contract that is so strict that the reviewer has no ability to provide medically necessary care for the patient.

We are proposing a standard of care that can be utilized by the external reviewer to ensure that the patient receives the necessary care and that neither ignores the terms of the contract nor is so pinched that it would not be able to provide the care. That is why we have chosen the terms that apply to over 73 percent of Federal employees under the FEHBP that serves all the Members of Congress, our families, as well as other Federal employees. That is the language we have.

I ask my colleague, Senator NELSON, to speak to this. Senator NELSON has probably as much experience as anybody with this body with insurance contracts at the State level from his previous positions in Nebraska, as well as being Governor of the State of Nebraska.

It has been a pleasure for me to work with Senator NELSON who had the idea for this and brought a group together and expressed his idea. It made sense to me at the time. The more I work with him, the more sense it makes to me, and what he is proposing is desirable for us to do.

I urge my colleagues to respect the experience he brings to this issue from his perspective from the State of Nebraska which, I might add, is my State. I am very pleased that I have worked with Senator NELSON on this. Again, I just hope my colleagues respect the experience he brings to this particular issue.

I yield to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. NELSON of Nebraska. Madam President, I appreciate the opportunity to join with my colleague, Senator Kyl, from Arizona, to support and pursue the opportunity for making certain there is a definition and a standard in the Patients’ Bill of Rights legislation that will give certainty and clarity to the standard by which medical claims can be submitted and the providing of medical care can be made.

There is some concern about whether or not the Federal Employees Health Benefits Plan definition of “medical necessity”—which is essentially the definition, the standard, if you will, that is being proposed in our amendment—is something where the Office of Personnel Management would be bound by the plan’s determination.

We have never said that the plan, in this case the medical reviewer, would have to be bound by the plan, but they would have to be bound by the definition. That is what this is about. It is
making certain there is certainty, clarity, and an understanding, a meeting of the minds, about what will be covered and to what extent, always subject to outside standards, outside review.

I support having a Patients’ Bill of Rights that provides the kind of patient protections that are included within this bill. I support the opportunity for a patient to have a review from the internal side and from the external side, and I support the opportunity and the right of the patient to sue the HMO to ensure the medical decisionmaker in conjunction with any questions that are provided for in the level of support that is provided within the current bill.

It is important as the decisions are made about the claims that there is at least certainty and clarity as to a standard. I do not think even the proponents of the legislation would deny it is important to have a standard. As a matter of fact, I understand the history of this bill to some degree, and I know that in the past there was an effort to arrive at a standard. There were two groups with two different pieces of legislation, and they could not quite achieve an understanding as to what the standard should be or the definition. Perhaps out of frustration, and certainly out of not coming together, the decision was made to leave this open.

The problem with leaving it open is there is no basis of a standard; there is no way to know what the definition of “medical necessity” can be. It can be about anything. When you have a contract and when you have two parties to it, an insurer and insured, you need some degree of certainty. That is what we are asking for, so you can know of what medical necessity truly consists.

As I said about whether or not this language, which is taken right out of OPM’s definition that is included in the Federal Employees Health Benefits Plan—as to whether or not that is adequate language, seems to me there should be no question about it. This is to what the Federal employees are subject. You and I, those who are insured, are subject to the language, the standard, and the definition that is included within this amendment.

I find that it would be unusual if somebody objected to this standard, but our plan provides, even if there is a concern about this standard, that under the rulemaking and the negotiations of regulations another standard could be arrived at with the stakeholders to this legislation. The stakeholders, about 19 of them, would all be assembled, and if they did not like this particular standard, then they could achieve upon agreement, another standard.

This is about having a standard, and there seems to be very little concern about whether or not the current standard that is included within this amendment is an adequate standard, certainly from the standpoint of Federal employees. In other words, if it is good enough for me, it ought to be good enough for other people. If it is good enough for the thousands of Federal employees, then it ought to be good enough for the public.

What does it provide? It provides that the determination of services, drugs, supplies, be provided by hospital or other covered provider appropriate to prevent, diagnose, treat, a condition, illness, or injury, and that they must be consistent with standards of good medical practice in the United States. That is a standard we can all live by because we cannot ask for more than having care that is consistent with standards of good medical practice in the United States.

There are some other requirements as well, but they are essentially the same as what I just read. I cannot imagine somebody would want to argue for not having a standard or having a contract that is open-ended and not know that would, in effect, leave uncertainty, a lack of clarity, and an openness that nobody wants to propose or support.

I hope my colleagues will take a look at this as we fight to keep down the high cost of health care, the availability of health care, and that we work toward making this standard the kind of standard that can be included as part of the Patients’ Bill of Rights.

Anything that establishes clarity and certainty is desirable in the context of this legislation, and certainly that is included within this amendment.

There are some who thought the standard might consist of something such as a cost benefit. This does not involve any kind of cost-benefit analysis regarding medical care. There are some who would want to argue for not having a standard or having a contract that is open-ended and not know that would, in effect, leave uncertainty, a lack of clarity, and an openness that nobody wants to propose or support.

I hope my colleagues will take a look at this as we fight to keep down the high cost of health care, the availability of health care, and that we work toward making this standard the kind of standard that can be included as part of the Patients’ Bill of Rights.

Anything that establishes clarity and certainty is desirable in the context of this legislation, and certainly that is included within this amendment.

There are some who thought the standard might consist of something such as a cost benefit. This does not involve any kind of cost-benefit analysis regarding medical care. There are some who would want to argue for not having a standard or having a contract that is open-ended and not know that would, in effect, leave uncertainty, a lack of clarity, and an openness that nobody wants to propose or support.

I realize this is a very complex area that the average person is not going to deal with every day, so I apologize for the complexity, but I do not apologize for having something that will simplify it, that will give us the certainty and the clarity of having a definition and a standard that we can all understand and one with which we can agree and against which good medical care, under good medical practice in the United States, might be measured. That is what we are looking for.

There is a proposal that I understand will be coming forth for consideration this afternoon that will solve part of this problem, but it does not solve the problem of the standard of care and the definition.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON of Nebraska. I yield time to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Madam President, I compliment my friend and colleague from Nebraska, Senator NELSON, for his expertise in this field. He and Senator COLLINS are probably more qualified in this field because they both worked in their respective States in their insurance departments, I think, as commissioners of insurance and they also have expertise in the field from years of experience. When Senator NELSON or Senator COLLINS talk about medical necessity, or being bound or exempt from contracts, they have a certain degree of expertise that the rest of us do not have.

I remember visiting with Senator NELSON and he brought up the medical necessity and the fact this bill before the Senate unfortunately voids contracts. It goes so far as to say you have to cover things that are excluded.

Page 33 of the bill says: No coverage for excluded benefits. That sounds fine. But page 36 says: Except to the extent . . .

In other words, you don’t have to cover items excluded in contracts. Except to the extent somebody considers it medically necessary and so on, even if specifically excluded in contracts. Part of the Nelson-Kyl amendment clears that up.

On contract sanctity, I concur 100 percent. I mentioned a few things excluded under the CHAMPUS program for VA, specifically excluded in contracts under this bill someone might have to pay. They might even be sued if they do not provide a benefit specifically excluded and so on, even if specifically excluded in contracts. Part of the Nelson-Kyl amendment fixes this. Things excluded under CHAMPUS include: Acupuncture, exercise equipment, eye glasses, contact lenses, hearing aids, hypnosis, massage therapy, physical therapy consisting of exercise programs, sexual dysfunction, smoking cessation, weight control or weight reduction programs.

The point is, almost every medical health care plan says we will pay for this list of benefits; we will not pay for these benefits. Those benefits would be excluded in the way they write the bill. That sounds absurd but in reading the language, that could happen. The Nelson-Kyl amendment fixes this. Things excluded under CHAMPUS include: Acupuncture, exercise equipment, eye glasses, contact lenses, hearing aids, hypnosis, massage therapy, physical therapy consisting of exercise programs, sexual dysfunction, smoking cessation, weight control or weight reduction programs.

The point is, almost every medical health care plan says we will pay for this list of benefits; we will not pay for these benefits. Those benefits would be excluded in the way they write the bill. That sounds absurd but in reading the language, that could happen. The Nelson-Kyl amendment fixes this. Things excluded under CHAMPUS include: Acupuncture, exercise equipment, eye glasses, contact lenses, hearing aids, hypnosis, massage therapy, physical therapy consisting of exercise programs, sexual dysfunction, smoking cessation, weight control or weight reduction programs.
Federal employees cannot sue their employer, and Federal employees have to be bound by the contract. If you look at the consumer bill of rights and responsibilities, in OPM’s guidelines dealing with the Federal Employees Health Benefit Program, it says if someone wants to appeal, OPM seeks to determine whether the enrollee or family member is entitled to the services under the terms of the contract. It is bound by the contract.

Blue Cross/Blue Shield, 2001, it says OPM will review your disputed claim requests and use the information it collects from you to decide whether our decision is correct. OPM will determine whether we correctly applied the terms of our contract when we denied your claim or request for service. OPM will send a final decision within 60 days. There are no other administrative appeals.

Interesting to note, the Federal Employees Health Benefits Plan, they appeal to OPM, appeal through their employer. This is not an independent review entity. Again, OPM will make their determination based on the contract.

The Senator from Nebraska and the Senator from Arizona say a contract should be a contract. We should adhere to the contract and have contract sanctity. We should have a definition, some certainty in the definition, and we even use the definition for Federal employees’ fee-for-service plans as one option, as well as the rulemaking process that the Senator from Nebraska spoke about.

I think there are too many people voting “remote control,” thinking, I will vote with Senator KENNEDY or with Senator McCAIN on this issue. I hope they look at this amendment. Should you have contract sanctity? Should you look at the guidelines we use in the Federal Employees Health Benefits Plan to have some contract sanctity? It is obliterated by the underlying bill. I think so.

This is an excellent amendment, an important amendment. If you want a bill that preserves some sanctity of contract, I think it is most important we pass this amendment. I urge my colleagues to vote in favor of the Nelson-Kyl amendment.

Mr. NELSON of Nebraska. I yield.

Mr. ENZI, I thank the Senator from Nebraska for the care and concern that has gone into this amendment. I support it along with him. I know how important it is for businesses to be able to nail down the prices so they can provide this voluntary insurance to people. If they don’t know how much it will cost, if it is going to rise astronomically, I guarantee the small businesses will walk out. That is what the discussion has been about this week and last week—how to continue to have insurance for people.

If I am an accountant, the only accountant in the Senate. I like dealing with numbers. The people who really deal with numbers are the actuaries. They are the ones who have to figure out what the odds are that something is going to happen to people. The smaller the plan, the tougher it is to figure the odds. But those odds have to be calculated in order to figure out the price. If the actuary said figure the whole universe of things that could happen, normally we exclude the ones that are difficult to calculate, but you don’t get to exclude those anymore. You have to figure it as though those could happen to the person, and some reviewer will charge your plan with that. So we cannot tell you what you are going to get in this country, we cannot guarantee it will have to be a higher number because of the uncertainty.

It is extremely important we avoid the Russia syndrome or the China syndrome, where they don’t have contracts worth anything. In this country, we maintain the sanctity of contracts. It is time to do that again. It is time to do that, particularly to protect the people working for small businesses in this country so they will continue to have insurance.

This amendment is particularly important because it does several things. First, it allows both the employer and the employee to be certain about what benefits are covered under the health plan. If they can’t know that, then what’s the point of the contract. Second, the amendment will virtually guarantee that all health plan contracts will now have a great definition of medical necessity, which is the clause in a contract that’s used to make exceptions for medical necessity, the definition of medical necessity. If a health plan or employer chooses not to adopt a strong definition, as defined in this amendment, then they forgo their right to rely on that definition in making decisions on claims for benefits. That’s achieved by allowing the independent reviewer in the external appeals process to ignore that definition if it’s not among those listed in the amendment.

This amendment brings to bear two important concepts that go a long way helping this bill become law. Again, the contract, upon which not just the breadth of benefits is determined, but also the cost of health coverage to both the employer and employee is based, is made whole. And, the quality of health care in this country is set at a standard that will assure patients receive medically necessary care as determined by the standards in the best programs, namely the Federal Office of Personnel Management’s definition for fee-for-service plans.

Mr. President, I again commend my colleagues for their work. Enacting this amendment is as important to preserving the employer sponsored health care system as anything else we may do on this bill. There’s simply no reason Members would vote to undo a health plan contract or against requiring that health plans adopt a strong definition of medical necessity.

Mr. NELSON of Nebraska. We reserve our time.

Mr. KENNEDY. We have 30 minutes? The PRESIDING OFFICER. That is correct.

Mr. KENNEDY. I yield myself 10 minutes.

I agree with our friends and colleagues, the Senator from Oklahoma, about the competency of my good friend, Senator NELSON, as well as the Senator from Wyoming, Senator ENZI. I learned, as I worked with Senator Enzi on a number of different issues, has evolved from—a person has enormous capabilities as an accountant in dealing with numbers. I have also had the good opportunity to work with Senator NELSON on this issue. I think there are few Members of this body outside the Senate or inside the committee that have taken more time than the Senator to understand the details of this legislation. He has a commanding knowledge of this legislation and a very healthy understanding and respect about what is happening in the State and local communities. He has been enormously attentive to detail and concept.

We do not always agree on every provision, but I have certainly developed a deeper understanding of the impact of this legislation from my conversations with him.

Even though we differ on the substance on this particular issue, which I think is an important issue, I have enormous respect for what he has brought to this whole debate on the Patients’ Bill of Rights. I value, very much, his continued involvement in this debate.

I will mention briefly what we have in the legislation and why I believe it is wise to retain the approach we have currently. It has the complete support of the American Medical Association, the cancer organizations—I will refer to those later—and the overwhelming support of the medical community. It has evolved over a period of time. I will reference that in just a moment or two as well.

But it does, I think, meet the standard that has been mentioned here about certainty, clarity, and predictability. That is what the proponents of this amendment have asked for. We have just done that on page 35, in establishing the particular details of our standard. I will give brief reasons that we ought to retain this.

The McCain-Edward-Kennedy bill allows the doctors, not the HMO accountants, to make the important medical decisions and it prohibits the HMOs from using arbitrary definitions

June 27, 2001

CONGRESSIONAL RECORD—SENATE 12023
of medical necessity. Unfortunately, the proposed amendment would undermine this crucial protection and allow plans to use definitions of medical care that may harm the patients.

Our legislation asks every Senator the basic question: Do you support the doctors making the critical medical decisions or do you want the HMOs to continue to deny care based on language that puts dollars before lives?

The independent medical reviewer should consider the definition decided by the health plan. However, we should not bind their hands by arbitrary definitions by an HMO. Senators McCain, Bayh, and Carper will offer an amendment later today that reflects the bipartisan belief that reviewers cannot approve services that are not explicitly covered under any circumstances. If a plan says ‘no cosmetic surgery’ and there is a cleft palate on a child, I could see an independent reviewer saying it is a matter of medical necessity it is imperative that we correct the cleft palate and would be justified in doing so. If, in the plan, it said ‘no cosmetic surgery and no cleft palate,’ the medical reviewer would be prohibited from doing so. So there is that degree of interpretation in terms of medical necessity, that aspect of judgment that we want to give to the doctors in dealing with this issue.

The Kyl amendment, once again, I believe gives the HMOs the opportunity to deny critical care by allowing them to use definitions of medical care that are stacked against the patients. This amendment also prevents independent reviewers from weighing all the relevant factors needed to make a fair decision. In addition, the amendment proposes to institute a complex rule-making process to define medical necessity. However, administrative rule-making is only as fair as the participants. If the participants are hostile to patients’ rights and sympathetic to HMOs, they could undermine care for millions.

As Charlie Norwood said, if reviewers are forced to wait on regulation at the speed HCFA moves, leeches might still be considered medically necessary and appropriate.

Also, under this amendment the plan gets to use any of the many definitions for medical necessity. It can seek out the worst of the worst, but consumers get no comparable rights to demand the best of the best.

All you have to do is look at the range of definitions and it is easy to see why the disability community, the cancer community, the American Medical Association, and other groups are so vehemently opposed to this amendment. It fails to protect the patient and allows the health plans to continue to deny medically necessary care. That is why the overwhelming number of medical groups support our language.

Some of the standards that they could pick from say cost-effectiveness should help determine whether care should be provided. It might be cost-effective, for example, for an HMO to amputate a young man’s injured hand, but what about the cost of having to spend the rest of your life without the full use of limbs? It might be effective for an HMO to pay for older, less effective medication for depression, but what about the cost to a mother trying to raise her family while dealing with the harmful side effects that could have been prevented by newer medication? Why should we subject the American people to them?

I urge my colleagues to reject this amendment. Passing it would reverse the strong bipartisan efforts we have worked out in this legislation.

Let me mention here the letter from the National Breast Cancer Coalition: On behalf of the National Breast Cancer Coalition and the 2.6 million women living with breast cancer, I am writing to urge you publicly to support the McCain-Bayh-Carper amendment on medical necessity. The National Breast Cancer Coalition is a grassroots advocacy organization made up of more than 600 organizations and 10,000 individual members all across the country who are dedicated to the eradication of breast cancer through advocacy and action. With new enactments of a strong, enforceable Patients’ Bill of Rights, the NBCC believes the determination about what is medically necessary must remain with the physicians, not HMOs. The coalition is concerned the Kyl amendment would weaken the provisions in the McCain-Bayh-Kennedy Patients’ Bill of Rights and would allow financial decisions to override the medical judgments on patient care.

Let me just mention some of the definitions which have been used. Here is a definition that is used in terms of medical necessity at that time was this: Medically necessary or appropriate means a service or benefit which is a generally accepted principle of medical practice. That is what virtually every Democrat voted for. That gives the maximum flexibility to the doctor. When we got to the conference and began to work this out, the HMO industries wanted it to be so broad and general, in terms of interpretation, that it could mean anything. Therefore, it would completely override the contract terms of the HMOs.

Then we altered it and said: In the internal review they will use the definitions of the HMO, but in the external review they will use a different definition. That is what is in the legislation. That is basically what is in the Breaux-Frist, as well as in the McCaín-Edwards-Kennedy.

Basically, it says “a condition shall be based on the medical condition of the participant”—therefore you look at the medical condition of the principal—and valid, relevant scientific evidence and clinical evidence including peer review, medical literature or findings, and including expert opinion.”

The PRESIDING OFFICER. The Senator’s time has expired.

Mr. KENNEDY. I yield myself 3 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. The expert opinion is critical. The essential element of the case which I know has been questioned—was talked about and essentially agreed to in the conference last year.

This is the concern we have. Here are some of the definitions which have been used in various HMOs, and even in Federal health insurance. The difference, in Federal health insurance is if there is an appeal of it, they leave it completely open. I asked staff to get the standard that is used. It is completely left to the doctor. That is where we want it, to the greatest extent possible. We have limited it as I have defined it. But these are some of the concerns.

This is in CIGNA, in terms of medically necessary:

...that are determined by our medical director to be no more required than to meet your basic health needs.

So this definition is going to be what this plan’s medical director decides. Clearly, they are going to be biased in the HMO.

This is the Hawaii State plan: Cost effective for the medical condition being treated compared to alternative health intervention, including no intervention.

Cost effectiveness is unacceptable. It is more cost effective for the HMO to put someone in a wheelchair rather than for them to have hip surgery. But it is more effective for the individual to have the hip surgery.

Here is another one:

A treatment that could reasonably be expected to improve the member’s condition or level of functioning.

Even though it is used by the Health Alliance HMO in the Federal health insurance, the problem is that for people with disabilities, the treatment may not be for a condition that can improve—but it certainly may improve the quality of life.

Here are the Pacific Care Health plans furnished in the most economically efficient manner.
“Economically efficient” is a problem.

Again, it is what procedures are the most cost effective.

We have to be very sure about what we are going to have. We have a good definition in this proposal. It is supported by McCain-Edwards and myself and is essentially the provision in Breaux-Frist.

It has the overwhelming support of the American Medical Association, as well as the Cancer Association, and is spelled out in this legislation. So there is certainty.

If there is a change on this, we can come back and revisit it. I give the assurances to my friends that we can. But the idea that we are going to give the authority to a panel that will be set up by the Secretary—the makeup of which we don't know—which can propose something, still indicates that we don't know what is going to come out.

That doesn't seem to me to be the way we ought to go in giving predictability and certainty to patients. If we are interested in that, we ought to get criteria that is sound, responsible, and gives medical professionals the ultimate ability to make judgments to protect the patient. That is what we do in this legislation. That is why I don't believe we should alter or change the proposal.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Madam President, how much time remains on our side?

The PRESIDING OFFICER. Ten minutes.

Mr. KYL. I yield myself 2 minutes.

I am very sorry to have to say this, but the amendment that Senator KENNEDY has just proposed is not our amendment. I want to be very clear about what our amendment does. The amendment that Senator KENNEDY has been talking about was part of last year's bill.

When Senator NELSON came forward this year, he said: Let's try to come up with something new. We did that. So the language we have before us today is not the language to which Senator KENNEDY has been referring.

When he talks about the Signet language and the other plan language, that would absolutely prohibited by what we are talking about here. That was last year. We would absolutely prohibit that. When he talks about the plans choosing from among a range of criteria that is sound, responsible, and gives medical professionals the ultimate ability to make judgments to protect the patient that is what we do in this legislation. That is why I don't believe we should alter or change the proposal.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. KYL. Madam President, how much time remains on our side?

The PRESIDING OFFICER. Ten minutes.

Mr. KYL. I yield myself 2 minutes.

I am very sorry to have to say this, but the amendment that Senator KENNEDY has just proposed is not our amendment. I want to be very clear about what our amendment does. The amendment that Senator KENNEDY has been talking about was part of last year's bill.

When Senator NELSON came forward this year, he said: Let's try to come up with something new. We did that. So the language we have before us today is not the language to which Senator KENNEDY has been referring.

When he talks about the Signet language and the other plan language, that would absolutely prohibited by what we are talking about here. That was last year. We would absolutely prohibit that. When he talks about the plans choosing from among a range of definitions that could include cost effective, that would be absolutely prohibited under our language. That was last year.

Let me again restate what we did this year.

Mr. KENNEDY. Will the Senator yield on my time?

Mr. KYL. Absolutely.

Mr. KENNEDY. What I read here is “what is determined by our medical director to be no more required than to meet your basic needs.” That is in the Federal health insurance program. That would be included. The language I have read is “the treatment that can reasonably be expected to improve the member's condition or level of functioning.” The Federal employees' plans are included.

The last one, “furnish in the most economically efficient manner,” that is Federal employees. That is included. All three are included because the Federal employees' insurance has been included as well.

What is not included is discretion that is given to the medical doctor: The review of that is provided in the Federal employees' plans, and OPM is using it. It is not included in the underlying.

Mr. KYL. If the Senator will allow me to answer, that is a factual matter. I will not argue with his answer. I think I can explain the reason for the confusion. But the answer to the Senator's question is no. What the Senator said is not correct. That was correct a year ago because the language of the amendment was that you took the FEHBP standard. And the Senator would have been correct a year ago because it was both the fee-for-service standard as well as the managed care contract standard.

So the criticism that the Senator levels would have been correct criticism a year ago. And to some extent, I agree with the Senator from Massachusetts about that criticism. We threw that aside. Instead, we asked: What is the contract that governs the fee-for-service FEHBP plans? The contract that governs, we think, 73 percent of the people—in other words, about 6 million people—is the language that they have approved for the Blue Cross/Blue Shield plan contract, as well as some others. We didn't want to allow any discretion whatsoever. So we took the five specific provisions of that contract. Those are embodied in the legislation. There is no discretion.

If you want a safe harbor now under this amendment, you would have to write your contract with those five items, and only those five items. That is what the reviewer then would be able to review.

If I could just continue on with respect to the negotiated rulemaking, it was our idea that if anyone didn't like those five items, and all of the stakeholders would want to get together and negotiate something different, we would be very amenable to that. So we set up this voluntary rulemaking procedure.

If the Senator from Massachusetts and others think there is something wrong with that and they would not want to create the rule, yes, then we are very amenable to dropping that out. We thought we were doing people a favor by putting that option in so that if somebody didn't like these five items, they could engage in this negotiated rulemaking. But anybody in the negotiations could veto it so that it wouldn't go into effect.

But if people somehow fear that, it is not our intention to try to superimpose some nonspecific standard.

If the Senator would like to engage further on that, we can certainly discuss that. I indicated to the Senator last night our willingness to discuss that. I hope I have cleared it up. I understand the reason for the confusion because that was last year's amendment.

Our amendment language was only available a couple of days ago. So it is understandable that one might not have been able to read our amendment language. But I assure the Senator that our language is very specific and very different from that which he criticized.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. NELSON of Nebraska. Madam President, I understand the passion of my colleague from Massachusetts. He has done such great work in this area, and I truly appreciate and respect what he has done and the fact that he has taken a very careful look at what we are proposing.

I suspect, though, that he would maybe look at me as a person who came to the party late and wants to rework the invitation. You can't try to change something where there has been such a history without encountering some resistance to it. I understand there is resistance to wanting to change this because it was dealt with last year. But you don't weaken this bill by making it more certain.

I don't believe there is a problem. But if there is a problem within the Federal Employees Health Benefits Plan, then, as I understand it, a good standard there, we can correct that by passing this amendment and this Patients' Bill of Rights, and make Federal employees subject to the Patients' Bill of Rights.

My colleague from Massachusetts mentioned that there is perhaps a different manner of review for Federal employees where they have to go directly to the Office of Personnel Management rather than getting an internal or external review. We can correct that. We can make that plan subject to the Patients' Bill of Rights, and we can correct that. Or we ought to take a look at that independently.

But this does not change anything that would be detrimental to those individuals my colleague from Massachusetts mentioned.

For example, of the list of people, such as a person with a cleft palate, the only question about a person with a cleft palate is whether that treatment, in the judgment of the medical professional, the doctor, would be consistent with the standards of good medical practice in the United States. That
is the dynamic, and I am sure that it would. There is nothing static about this definition. It will continue to change as the good standards of medical practice in the United States change.

My good friend also mentioned something about making sure that we have our loved ones well protected. I agree with him and include the federal employees as part of our loved ones. I think we want these standards to apply to all Americans. The way in which you can do that is by adopting this amendment on medical necessity.

What it does not do is, it does not change the doctor’s decision making in relation to what kind of care to provide. What it does say is that it has to be consistent with the standards of good medical practice in the United States.

I, for the life of me, do not see what the resistance to this language is, other than the fact that we tried to do it a year ago. We had the Stanford definition. We talked about other definitions a year ago. Now we have come up with a definition which I think is an excellent definition that will do it, that will establish the standard for certainty, for predictability. And now we are saying it may weaken the Patients’ Bill of Rights. But certainty will strengthen this. There is no effort here to do anything that would not be consistent with— as a matter of fact, the language requires that the medical profession do something consistent with the standards of good medical practice. Whether it is an amputation, whether it is a cleft palate, whether it is deciding on cancer care, or whether it is deciding on other kinds of care, all we are saying is it ought to be subject to these standards. That is the only point that is being made.

Mr. President, how much time remains?

The PRESIDING OFFICER (Mr. CARPER). The Senator from Nebraska has about 4½ minutes remaining. The opposition has 13 minutes remaining.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. I am glad to yield— Mr. MCCAIN. Will the Senator allow me a couple minutes of time?

Mr. KENNEDY. Absolutely. Yes. Absolutely. The Senator from North Dakota was looking forward to talking, but whatever.

Do you want me to yield 3 minutes?

Mr. MCCAIN. How much time?

Mr. KENNEDY. I yield 3 minutes to the Senator.

Mr. MCCAIN. I thank the Senator from Massachusetts, and also the Senator from North Dakota. I would be glad to wait until after the Senator from North Dakota speaks, if he prefers.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Mr. President, I have major concerns about the Kyl-Nelson amendment and unfortunately, must oppose it. While I certainly respect the intentions of my dear friend and fellow Arizonian, JON KYL, I respectfully disagree with him regarding this proposal. I simply can't support mandating a Federal statutory definition of "medical necessity" that is vague and creates further confusion and barriers for patients attempting to get the medical care their doctor deems appropriate, and is covered by their HMO plan.

This amendment would put into statutory language a vague definition that allows health plans to determine whether services, drugs, supplies, or equipment are appropriate or necessary to prevent, diagnose, or treat a patient's condition, illness, or injury. While this appears reasonable, it simply is not.

One of the major hurdles currently facing patients is the repeated denial of their medical care on the basis that it is not medically necessary based on a vague or constraining definition. The health plans are intentionally denying that will establish the standard for certainty, for predictability. And now we are saying it may weaken the Patients’ Bill of Rights. But certainty will strengthen this. There is no effort here to do anything that would not be consistent with— as a matter of fact, the language requires that the medical profession do something consistent with the standards of good medical practice. Whether it is an amputation, whether it is deciding on cancer care, or whether it is deciding on other kinds of care, all we are saying is it ought to be subject to these standards. That is the only point that is being made.

Mr. President, how much time remains?

The PRESIDING OFFICER (Mr. CARPER). The Senator from Nebraska has about 4½ minutes remaining. The opposition has 13 minutes remaining. The opposition has 13 minutes remaining.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. I yield 8½ minutes to the Senator.

The PRESIDING OFFICER. The Senator from North Dakota is recognized for 8½ minutes.

Mr. DORGAN. Mr. President, this is a well-intentioned amendment, but it must be defeated because it is aimed right at the heart of this patients' rights bill, right at the core of the bill. The question is, Who is going to make the decisions? Who will make decisions about medical care? An HMO or an MD? Who do we want to make the decisions about medical care?

The McCain-Edwards-Kennedy bill allows doctors and patients to make fundamental decisions about their care. It will be based on medical necessity and appropriateness and supported by valid, relevant scientific and clinical evidence. In other words, if an HMO makes an arbitrary decision about some kind of a treatment they believe is not medically necessary, based on its own inadequate definition of "medical necessity," the reviewers would be able to overturn that and advocate treatment.

If this amendment were put before the Senate, the patient would be bound to the HMO's decision and have literally no options; the independent reviewer would have no authority whatsoever to recommend treatment if it was needed. The Senator from Massachusetts read a list, and he was challenged on that list. But the fact is, the list he read is absolutely correct.

Let met do this in English, if I can. The amendment, as I understand it, allows an HMO or managed care organization several different approaches to deal with the issue of what is medically necessary. How do you define medically necessary? Several different ways. One
Ethan Bedrick, or a young child with a cleft lip and a cleft palate, running into a wall that has a provider service saying: “These are not medically necessary procedures, and we will not cover them,” will have no ability to have an independent reviewer overturn that under the amendment that is offered today.

Mr. KENNEDY. Will the Senator yield?

Mr. DORGAN. I am happy to yield.

Mr. KENNEDY. For the benefit of the membership, we had scheduled a vote at 12:30. With the agreement of the leadership, it will be postponed until 2. At 1 o’clock, Senator Gregg will be here to offer an amendment for himself. At 2, it is the anticipation of the leadership that there will be two rollcall votes. We have not made the unanimous consent request yet, but that is the intention of the agreement of the two leaders. After the time expires, we will make that unanimous consent request.

Mr. REID. Will the Senator yield for a question?

The PRESIDING OFFICER. The Senator from Arizona.

Mr. REID. From 12:30 until 1 o’clock there will be general debate on the bill.

Mr. MCCAIN. If the Senator will yield?

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. I note the presence of the Senator from North Hampshire on the floor. We really have an issue of scope, an amendment we need to bring up, and of course the so-called Snowe compromise amendment as well. I hope we will be able to put both of those in some kind of order in some way today.

Mr. REID. Mr. President, the Senator from Arizona is absolutely right. Progress has been made but not nearly enough. Since Senator Gregg is here, I wonder if we could restate the unanimous consent request and have that entered at this time. The only suggestion I would make to Senator Kennedy is that we should have general debate from 12:30 to 1 on the legislation. Mr. KENNEDY. That is fine.

Mr. GREGG. Mr. President, I can’t guarantee that there would be a second vote on this unless the parties to that amendment are agreeable to that.

Mr. KENNEDY. Then I withdraw my request. I was asked to make that request, if there was going to be no objection, that was going to proceed. Otherwise, we will go ahead.

Mr. GREGG. Mr. President, I suggest the absence of a quorum.

Mr. KENNEDY. I had asked if the Senator would yield. The Senator from North Dakota has the floor.

Mr. DORGAN. Mr. President, how much time remains?

Mr. KENNEDY. I ask unanimous consent that the vote on that amendment be put off until 2 o’clock.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. It is the anticipation of the leadership that between 12:30 and approximately 1 o’clock there will then be general debate on the legislation. At 1 o’clock an amendment will be laid down by the Senator from New Hampshire or his designee. It is anticipated there will be a second vote at 2 which will be on that amendment.

Mr. GREGG. Mr. President, I can’t guarantee that there would be a second vote on this unless the parties to that amendment are agreeable to that.

Mr. KENNEDY. Is there a unanimous consent request pending?

Mr. GREGG. Mr. President, I can’t agree with my assertion. But I also understand that they are trying to craft something that defines what is medically necessary in a manner that would give a managed care organization three different options to restrict care.

In my judgment, the managed care organization will clearly select the option that has the least amount of coverage or the least cost to them. That is precisely why we are here in the first instance. We are trying to see if we can create a Patients’ Bill of Rights that allows a doctor and health care professionals to make judgments about what kind of treatment is appropriate. We have a story after a story about health care professionals making a decision about what kind of health care is necessary for a patient only to be told later that someone 1,000 miles away an insurance office decided, no, this was not medically necessary at all, and we won’t cover it. We don’t agree with the physician’s decision or recommendation for treatment.

The reason the AMA and nurses and others support this legislation of ours is that they believe very strongly that health care professionals ought to be the ones practicing medicine. The American Medical Association is very strongly opposed to this amendment.
I ask unanimous consent to print a letter the AMA has sent objecting to this amendment in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the American Medical Association, June 26, 2001]

AMA OPPOSES KYL-NELSON AMENDMENT THAT LETS MBAS—NOT MDS—MAKE MEDICAL DECISIONS

AFTER 7 YEARS, THE DEBATE HAS SUDDENLY COME FULL CIRCLE

WASHINGTON.—Today the American Medical Association (AMA) called on Congress to defeat a Kyl-Nelson amendment that would negate a core provision of the patients’ bill of rights. This new medical necessity amendment would allow insurance company bean counters to make medical decisions.

"Today, after seven years of debate, it seems some lawmakers want to start over at the beginning, with no sense of urgency," said Dr. Thomas R. Reardon, MD, AMA past president. "For patients and physicians alike, the debate is clear: Decisions about the health care a patient needs must be left to those who are focused on patients—not on the bottom line.

"The Kyl-Nelson amendment uses a medical necessity definition that allows health plans to determine whether services, drugs, supplies or equipment are appropriate to prevent, diagnose or treat a patient's condition, illness or injury," Dr. Reardon said. "This is a big step backward.

Insurers and business have repeatedly opposed defining medical necessity in legislation: "A federal standard of medical necessity will raise premiums, threaten quality, and jeopardize efforts to prevent abuse." (Blue Cross/Blue Shield, 2/99); "We fear a definition that we consider arbitrary and unethical. A federal standard of medical necessity will raise premiums, threaten quality, and jeopardize efforts to prevent abuse." (Blue Cross/Blue Shield, 2/99)

"We cannot accept a definition that is driven by profit, not patient need. This new definition is an attempt to strip the patients' bill of rights of its core provision," Dr. Reardon said.

Mr. DORGAN. They are opposed precisely because they understand this amendment absolutely unravels the central and vital section of this bill dealing with the patients' bill of rights. Our patients' rights legislation provides a structure by which doctors make decisions and then you have the opportunity for independent review if needed. But in the circumstance as proposed in the amendment up for debate, if we create definitions that allow diminishment of the level of care in terms of what is medically necessary, the independent reviewer will have their hands tied and patients will not get the care they deserve or need.

"This is a very carefully drafted bill. I am not in any way ascribing mal-intent to anyone who offers this amendment. This amendment will unravel the bill in a very significant way. We must defeat this amendment. We should defeat this amendment and preserve the patients' protections legislation that we have brought to the floor of the Senate. This has been going on 5 years. This is good legislation. We ought to pass it and defeat the amendment."

I yield the floor.

The PRESIDING OFFICER. The time controlled by the manager of the bill has expired.

Mr. KENNEDY. Mr. President, I think the Senator has 2 minutes. I have 2 minutes; is that correct?

The PRESIDING OFFICER. The sponsor of the amendment has 4 minutes remaining. All time has expired in opposition to the amendment.

Mr. DORGAN. Mr. President, that cannot be the case. The Senator from Massachusetts allotted 8 minutes to me. At that point, he had 16 minutes remaining. It cannot be the case that we have exhausted our time.

The PRESIDING OFFICER. The timer for the Senator from Massachusetts allotted 8 minutes to me. At that point, he had 16 minutes remaining. It cannot be the case that we have exhausted our time.

Mr. GREGG. I ask unanimous consent that the Senator from North Dakota have another 10 minutes, if he desires.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DORGAN. Mr. President, I yield my time to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I will take the 2 minutes which I otherwise might have had if we hadn't entered into the request.

Here we go again with greater hope in our hearts that we will be successful.

After the yielding back of the time, we intended to vote on the Nelson amendment. At the request of the leadership, I ask unanimous consent that the vote be put off until 2 o'clock.

Mr. REID. Reserving the right to object, I have been informed that there will be a motion to table made on the amendment. That will be done at the appropriate time.

Mr. KENNEDY. At 2 o'clock. It is anticipated that at 1 o'clock there will be an amendment from the Senator from New Hampshire or his designee. I am informed that it will probably be the Senator from Tennessee. Mr. ThomRson; and that we will begin the debate on that at 1 o'clock and that the time between 12:30 and 1 will be used for general debate.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I apologize to my friend for the interruptions because the Senator has been a patient during his presentation and is typically kind and generous to permit the workings here.

Here we have a good, solid definition in terms of medical necessity that has been reviewed, evaluated and has gotten broad support. It has bipartisan support. It also has the very, very strong support of the medical community: The American Medical Association, all of the cancer organizations, as well as the disability community. They all have great interest in what that definition is.

In too many instances in the past there have been definitions that have been offered and accepted that work to the disadvantage of patients. For example, definitions have been made that do not include palliative care for patients who have cancer or don't recognize the very special needs of the dial patient. We have a definition here. It is defined in the legislation. It has been reviewed. It is careful. It is predictable. It is certain. It does provide for doctors to exercise their best medical judgment. It is completely consistent with the purposes of the legislation.

As I mentioned, I have great respect for my friend and colleague. I think on this we should stay with the language which should be included and which has the broad support, virtually the unanimous support of the medical community.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. NELSON of Nebraska. Mr. President, I appreciate the opportunity to engage in a dialogue with my colleague from Massachusetts. As I indicated earlier, I respect his work and many years of effort in this field. I certainly respect his judgment. If I would disagree, it would be simply that there is a standard that is currently in place. As a matter of fact, last year they tried on numerous occasions to achieve a standard. They could not come up with one where they agreed. So they agreed to disagree and left the standard out.

We have an opportunity now to come up with a standard that is good enough for Federal employees and put that in this bill. If it is good enough for Federal employees, then of course I think it ought to be good enough for the rest of America.

As to the charts that were shown, I ask, is there anybody in this Chamber today who believes that under the definition of consistent with standards of good medical practice in the United States, any doctor would not have ordered that the cleft palate be treated? I understand the importance of having charts. I understand the importance of having faces put on the patients. I think it is important that, as we do that, it be very clear that we understand that these cases would be treated appropriately under the standards of good medical practice in the...
United States. So I think we really have an opportunity today to provide more clarity, so that doctors will have the authority to make medical decisions and order care will be able to do so consistent with standards.

There is no way that this amendment today is designed to take away any of the authority of the doctor at all, or any other health care provider. All that it is aimed at providing is a standard. If they had come up with a standard last year and it were included in the bill, I would not be raising the question this year. This issue today is about whether to have the standard or not. I can't imagine we are even debating it. We ought to be debating what the standard is. That isn't the debate we have today.

As a matter of fact, some of the objections that I've earlier about this amendment could be equally said of an amendment that I suspect the Presiding Officer will be supporting today a little later, and that is to make sure you don't have those exclusions from a policy, those exclusions from a contract, ignored by a medical examiner in the whole process of the review.

The important point here is that this will provide an opportunity, upon an internal or external review, for a medical reviewer to make good decisions, consistent with good medical practice, consistent with the needs of the patient, so that the conditions in those pictures that were shown here—very vivid descriptions—can and will be taken care of and will not be left open without a definition, without a standard. The boundaries would be set, but they would be far broad enough to cover that and any other condition that was discussed here as an example this afternoon.

It seems to me it is important that we establish a standard, and if I wanted to oppose what I am proposing today, I would come in and I would say that it was going to do something bad, that it was not going to permit something good. But that doesn't make it so. It is important to point out the language and deal with the reality of the words of this amendment, rather than setting up a straw man to attack and say that it is doing something or it won't do something that it is in fact doing.

Mr. President, how much more time is there?

The PRESIDING OFFICER. The Senator has about 8 seconds.

Mr. NELSON of Nebraska. I ask my colleagues to support this amendment and move forward with the important work of the Patients' Bill of Rights. We can do that. This will improve it and will not detract from it.

The PRESIDING OFFICER. The Senator is recognized.

Mrs. CLINTON. Mr. President, I have the greatest respect for my good friend, the Senator from Nebraska, and I rise reluctantly, but firmly, to oppose the amendment he is sponsoring, along with Senators Kyl and Nickles, because I am concerned only about the general issues that have not been raised by other opponents. I am concerned also by the American Medical Association's very strong and vigorous opposition to this amendment, which many of them very clearly have raised to me and my office, as well as, I believe, every other Senator, because of their deep concern that this would be a step backward, permitting health plans to determine the services, drugs, supplies, or equipment needed, or to diagnose, or treat a patient's condition, illness, or injury.

But I have a very specific reason for opposing it. I direct this to my good friend from Nebraska because this is something that deeply concerns me. This amendment allows health plans to define "medically necessary and appropriate" in a way that poses a great threat to all patients and families who require hospice and palliative care to treat the suffering associated with terminal illness.

The Washington Post, just a week ago, published a story outlining the various ways in which recent advances and end-of-life care have not yet reached children with terminal illnesses, causing an enormous amount of suffering for children and their parents and loved ones who have to watch that suffering at the end stages of a terminal illness. The article quotes one mother who says, looking back on her daughter's death, that "pain is such a huge problem."

There are two specific phrases within the safe harbor of the "medically necessary or appropriate" language that deeply concerns me. This amendment allows plans to define "medically necessary and appropriate" in a way that poses a great threat to all patients and families who require hospice and palliative care to treat the suffering associated with terminal illness. First, the amendment declares that care provided "for the comfort of the patient" is not medically necessary care.

Any health care professional—or really any person, such as myself—who has stood at the bedside of a dying friend or a loved one knows that comfort of the patient is absolutely necessary and is often the most appropriate goal of care in those last days, weeks, and even months sometimes. At the very center of palliative care, and particularly in the hospice movement, is the belief that each of us has a right to die free of pain and with our human dignity as intact as possible.

The Institute of Medicine report released this month concludes that "policies and practices that govern payment for palliative care hinder delivery of the care that is needed by patients."

A chapter of that report focuses on the terrible effects these policies have had on children. It found that services necessary to provide dying children and their families with comfort and counseling are not recognized and certainly not even reimbursed by many insurance programs.

I believe the definition of "medically necessary care" proposed by this Kyl-Nelson-Nickles amendment further would undermine access to hospice and palliative care services for patients suffering from terminal illness.

We have not done enough to relieve pain and suffering at the end of life. I served for many years on the board of a children's hospital. Back in those days, the idea of giving strong medication to a dying child was really not even considered a possibility for many reasons. People were afraid about the appropriate dosage. Some people were worried even with a dying child that the child might become addicted to strong pain relief medicine.

I have also seen friends who, at the end of their lives, had to cry out for and demand pain relief from an almost unbearable burden. They did not want to leave this wonderful life, but they knew that was going to happen and they wanted to do it in a way that relieved them and their loved ones of the agony that comes at the end of so many devastating illnesses.

There are many wonderful hospice programs in our country, and many academic development centers are developing comprehensive palliative care programs specifically to focus on patient comfort at the end of life.

The Kyl-Nelson-Nickles amendment places the comfort of dying patients and their families beyond the language of the legislation, really rendering it illegitimate; providing this comfort would no longer be medically necessary or appropriate.
I ask unanimous consent to print in the RECORD the article I referred to earlier, entitled "Children of Denial," from the Washington Post.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 19, 2001]

**CHILDREN OF DENIAL—RECENT ADVANCES IN END-OF-LIFE CARE HAVEN'T REACHED THE YOUNGEST PATIENTS**

(By Abigail Trafford)

The leukemia had come back. Liza Lister, 5, leaned on her mother's shoulder. As her mother later recalled, Liza asked, "Will I die soon?"

She quickly went on, "I want to die on your lap. I want to have my lullaby tape on." Just days after her fourth birthday, Liza had been diagnosed with acute lymphoblastic leukemia. Now her last chance for a cure, a bone marrow transplant, had failed.

Her parents, both physicians in New York City, had access to the most advanced therapies to wage war against her disease. But when a cure was no longer possible, they found themselves outside the mainstream of modern medicine.

Hospitals had no formal support system for families caring for a child who was going to die. There was no one to help parents come to terms with the prospect of suffering, education of doctors and nurses on how to treat patients with advanced illness in an era of expanding biomedical options.

A study published last year in the New England Journal of Medicine concluded that 70 percent of patients survive. "We have to turn our focus on the percent who are not surviving," said pediatric oncologist Jo-anna Hilden of the Cleveland Clinic. "It is very wrong when you put children through here," said cancer specialist Hilden of the Cleveland Clinic. "We were offered several options; one was to stop aggressive treatment and make him comfortable. They chose instead an experimental regimen of chemotherapy and radiation. The tumors disappeared."

"He's had four years of quality life," said his mother, June Csatí. "Derrick goes to school and has a close relationship with his older brother. Ben. His mother knows "we could always tell them we're done.'" But "I keep the faith. I think he could pull this off. He's willing. He's not being hurt by this."

"How can you stop? It's too worth fighting:" THE PAIN FACTOR

For many families, the crucial decision of whether to treat aggressively or let go takes place outside the pediatric intensive care unit (PIC). Doctors and nurses on the front lines remember the hard cases: The teenager with aplastic anemia who was in so much pain she couldn't be touched. The 13-month-old who was born prematurely and stayed on life-support machines virtually all her life until the technology was turned off.

"I wouldn't put my own children through what we put children through here," said Ivor Berkowitz, Director of the PICU at Johns Hopkins. "It is very wrong when you look at it in retrospect."

But he quickly adds that each case is unique and that there are no overall guidelines for treating children with advanced illness in an era of expanding biomedical options. Many children survive crises that would be fatal for adults.

"When do you change your goals?" Berkowitz continued. "Where do we set the bar? This is the biggest struggle in the ICU."

"The discussions are hard," said cancer specialist Hilden of the Cleveland Clinic Foundation. "Are we going to do experimental chemo for leukemia? Or shall we go to hospice? Shall we use a ventilator? That's the down-and-dirty stuff. That's not a 10-minute conversation."
Nori is covered by insurance, Hilden noted. "How wrong we were to think we could just say, 'I don't get paid to talk to parents about the death of their child.'"

All the while, children with debilitating illness faced the medical team to address symptoms such as fatigue, nausea, shortness of breath and depression.

Managing pain is difficult in children, particularly in those who are not able to talk. Physicians get virtually no training in pediatric palliative care. Doctors and nurses watch for increasing heart rates, crying, agitation or irritability. "It's very hard to tell what they're feeling," said physician Charles Berde, director of pain treatment services at Children's Hospital in Boston. "The parents say, 'My child screams all the time.' Is the child screaming from pain or something else?"

"Pain is such a huge problem," remembered psychiatrist Elena Lister, who described her daughter's death in the March issue of the Journal of Pain and Symptom Management. Liza, who died four years ago, suffered with pain even in her sleep.

When Liza was in the hospital, one of the doctors raised the concern that narcotic pain medications are addictive. "To me—who the hell cares if the child is pain even in her sleep? The pain is such an inhibitor for any remaining pleasure."

**Continuity of Care**

Several studies have shown that the involvement of the same physicians and nurses from beginning to end helps to minimize a child's pain and suffering.

"Continuity of care was key. To which I say, "Yes," said neonatologist Suzanne Toce, director of the palliative Footprints program at Cardinal Glennon Children's Hospital. Whether a child is cured or succumbs to a life-threatening condition, "you need to integrate palliative care into mainstream medicine," said Toce.

Sometimes when parents want to stop aggressive therapies before their physician does, they have to change doctors—accelerating their sense of isolation and abandonment at a time when they are in the child's hospitalization.

That's what happened to Kevin and Brandi Schmidt of St. Augustine, Fla. When their daughter Kourtney was 4 months old, she was diagnosed with a severe form of spinal muscular atrophy, a rare inherited disease. The Schmidts quickly learned that such children die within a year. As the muscles weaken, the child can't eat, swallow, cough, even breathe.

Kourtney underwent surgery to have a feeding tube inserted. She received extra oxygen to breathe. She had severe revisions several times.

But the Schmidts did not want to put Kourtney on chronic ventilation. "We went to see a little boy. He was 2 years old and hooked up to a machine. We couldn't see doing that to Kourtney," said Brandi Schmidt. "We wanted her to have a better quality of life. We didn't want to do any measures that would only extend her life."

The low-tech approach did not sit well at the medical center. "He wanted to take the big guns out," said brandi. "It was like all or nothing," said Mike Schmidt. "It was very peaceful."

**Focus on Children**

In a national survey by oncologist Hilden, bereaved parents were asked what they most wanted from their doctors in a palliative care program. She summed it up:

"Tell us exactly what different options mean. . . . Some parents, for example, didn't know that patients could talk on a ventilator. . . . Tell us how you can control pain, even at home. . . . Tell us that not pursuing curative therapy is okay. . . . Tell us the truth that they won't abandon us. . . . Tell us how to prepare for the funeral."

The American Academy of Pediatrics called last summer for regulatory changes in Medicare, Medicaid and private health plans to improve access to end-of-life services for children. Several comprehensive programs have been developed in such cities as St. Louis, Seattle, Buffalo, Boston and Baltimore. These programs offer supportive care from the time of diagnosis and follow some children for years. A study on end-of-life care for children is underway at the Institute of Medicine.

"We have to acknowledge that some kids are going to die," said Houston pediatrician Marcia Levetown, founder of the palliative Butterfly Program in Texas.

Research suggests that when children have an opportunity to discuss death, they are less anxious and feel less isolated from their parents and caregivers.

"What Liza taught us was not only can you talk about this, you must," said psychiatrist Lister. "Otherwise, the child dies and there's never been a chance for intimacy."

For many families, the intimate bonding that can occur during the dying process is what constitutes a "good" death. Teenager Allen Collins of Texas lived another year and a half after the second kidney transplant failed. "When I die, you wear hot pink or bright red," he told his mother. He got a new bike for Christmas. He was dead before dialysis center. Just before he died, he gave an elderly man at the center a harmonica. Then he ordered a lemon tree for his mom.

"He was saying his goodbyes," said Terri Wills. Adam suffered a massive stroke in October 1999, and was rushed to Children's Hospital in Galveston, where he died in his mother's arms in the Butterfly room. "It was the most beautiful thing I've ever experienced," she said. At Adam's funeral, the elderly man from the dialysis center played the harmonica. Four months later, the lemon tree arrived.

**Mrs. Clinton, Mr. President, I urge my colleagues to oppose this amendment not only for all the reasons others have enumerated but for this very specific issue. We are at the beginning of work that needs to be done in hospice care and palliative care, and I would hate to see us turn back the clock before we really started the race to determine what we should do to care for those who are in the last stages of life. I urge all of my colleagues to join me in opposing this amendment and to support the ongoing efforts to provide more pain relief, more palliative care and, yes, more comfort to those who are leaving this life. I thank the Chair.**

**The Presiding Officer.** The Senator from Texas, Mr. Gramm. Mr. President, I want to make two points. One has to do with a colloquy that was underway when I had to leave to introduce someone in committee about moving to the Defense supplemental appropriations and an effort to tie the exclusion of amendments on this bill to that effort. I also want to address the underlying amendment.

It never ceases to amaze me that when we debate these issues, we talk and benefits. I made what I thought was a rational judgment, and I decided not to pay more to get the extra coverage. I made a decision, and it involved cost and benefits.

One day in America, people enter into contracts to buy health care. Obviously, a big question in the bill before us is: Are those contracts binding? Are they binding on the purchaser of the health care? Are they binding on the seller?

As is usual with this bill, on page 35, gosh, it sure looks like they are binding. On page 35, line 14, it says in a bold headline: "No Coverage For Excluded Benefits."

Then you read on. It says:

Nothing in this subsection shall be construed to permit an independent medical reviewer to require that a group health plan, or a health insurance issuer offering health insurance coverage, provide coverage for items or services for which benefits are specifically excluded.

Gosh, it seems to me they are saying contracts are binding, but when you read on, as is true over and over in this bill, you find that exactly the opposite is true. When you read on, it says:

. . . except to the extent that the application of the exclusion or limitation involves a determination described in paragraph (2).
Then you go back two pages to find paragraph (2) and you find that paragraph (2) has to do with anything that is medically reviewable—it is not covered, except if it is medically reviewable—and all medical decisions are medically reviewable—and unless it has to do with “necessity and appropriateness.”

What this provision actually says is the contract is not binding. The medical reviewer can determine that someone needs care, and even if it is precluded by the contract, the plan is required to provide it.

God did not include wonderful to some people. Let’s take the standard option Blue Cross/Blue Shield policy. I have a limit of 60 days in the hospital. Let’s say I have the misfortune or someone in my family does that they are in the hospital for 60 days. The plan says you are not covered. I go before a reviewer and say: Look, I want the medical reviewers to determine as to whether I need this care or not. They determine I need it, they override the contract, and so I paid for the standard option Blue Shield policy, but I got the high option. Is that great and wonderful?

What do you think is going to happen when it is time for me to renew that insurance policy? What is going to happen is then I am going to have to pay for the high option. That is not going to be such a big deal for me because I can afford to pay the high option, but what about millions of Americans who cannot pay the high option?

If the medical review committees decide what people need, independent of the contract they entered into to provide care—I got a lower price by saying I did not want heart and lung transplant services in my policy, and yet I come down with an acute heart problem and my physician stands up in front of this board and says, I am going to die if I do not get this surgery. Then the review committee says it is medically necessary and under this bill it is covered, even though my plan I paid for the standard option Blue Shield policy, but I got the high option. Is that great and wonderful?

Today is Wednesday. Unless we begin to reach an accommodation on these issues, we are headed for a train wreck at the end of the week, and it is because the provisions of leadership to please not try to tie stampeding Members on this bill, by limiting their rights to offer amendments, to passing a defense supplemental appropriation that I assume we are all for.

Why not pass this bill? I would be willing to pass it on a voice vote so it could be done tonight, get it over with, and then focus our attention on this bill. I hope we don’t have an effort to tie limiting our rights on this bill to even bringing up the defense supplemental. That happens, the net result will be the defense supplemental will not be brought up. No one will benefit from that. It is not good public policy. I urge the two not be tied together.

I yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. I will respond to the plea from my friend from Texas, his plea that we finish this bill. No one wants to finish this bill more than the authors of the bill, Senators MCCAIN, KENNEDY, and EDWARDS. They have been working to compromise; they have been working with Republicans. That is the reason we are winning these votes on amendments; I because we are getting Republican and Democratic votes and carrying the majority. We also want to finish this bill and do things the right way.

Why do folks stand up and talk about issues that are already taken care of in this bill? I know there is a disagreement on the fine print. That is what the frustration level is. I hope my friend will work with Senator SNOWE as she seeks to craft a bipartisan amendment that deals with the employer liability.

Right now, as I read the bill, employers do not have liability; they cannot be sued unless they personally make mental question of this bill, and that is, Are contracts binding?

What we are saying in this bill is, no, not if they relate to health care. I think that is very dangerous. This is another reason, if we don’t fix it, the explosive cost of this provision unfixed is greater than the liability cost about which we spent most of our time talking.

I hope my colleagues vote for this amendment.

Now the final point. Senator BYRD and Senator STEVENS were talking about the necessity of passing a supplemental for national defense. I am for this defense supplemental. I want it to come forward. I don’t see why we can’t do it tonight and get it over with, provide the money for national security. I know there will be one controversial amendment. I think if you vote against it, maybe some will vote for it. However, there is no reason that tonight we cannot settle this issue and vote first thing in the morning.

Several of the people who spoke on the floor urge that we will not be allowed to go to that defense supplemental bill unless we have set out a limit on amendments to this patients’ bill of rights. I urge the majority leadership to not concommingle this bill with the defense supplemental. It may well be that in the end we will reach compromises on the 6 to 10 major issues on which we will have to reach some accommodation to see the bill go forward. I am encouraged by the willingness of Senator MCCAIN to sit down and talk. I hope it is the beginning of a recognition that this bill is not perfect and it can be improved.

This morning when we voted down an amendment that exempted small employers with employees from this massive liability burden that they can be sued for simply helping their employees buy health insurance, I took that as a very bad sign for this bill. I have to congratulate the majority that I urge this position of leadership to please not try to tie stampeding Members on this bill, by limiting their rights to offer amendments, to passing a defense supplemental appropriation that I assume we are all for.

My concern is, the clock is running. Today is Wednesday. Unless we begin to reach an accommodation on these issues, we are headed for a train wreck at the end of the week, and it is because the provisions of leadership to please not try to tie stampeding Members on this bill, by limiting their rights to offer amendments, to passing a defense supplemental. That happens, the net result will be the defense supplemental will not be brought up. No one will benefit from that. It is not good public policy. I urge the two not be tied together.
the decision to withhold care from the patient. Most employers do not do that. They contract with providers, and those providers will be held responsible.

I find it very interesting that my friends on the other side of the aisle—most of them, certainly not all of them—and we are happy to have Senator McCain and other Senators joining with us on many of these amend- ments—I find it intriguing that they keep talking about these poor HMOs and insurance companies. We know, and we have said it a number of times, all we want is to see HMOs treated in the same way in our society as we treat every other business, every other indi- vidual. If any of us goes outside this Chamber and we knock into someone and we hurt them, we are responsible. We are held accountable if it was our fault.

The reason we have the safest prod- ucts in the world is that we have the toughest liability laws and they act as prevention. People make safe products, one, because in their hearts want a good, safe product. But we have harsh laws if you intentionally hurt someone. If the brakes on the car don’t work, if the crib bars are too wide, wide enough so a child can be strangled, we have laws on the books. All we are saying to HMOs is, if you in fact hurt people, you should be held account- able as well.

Members can stand up and pick apart one sentence in the bill, but the fact is this debate goes much deeper. It is not about paragraph 1 on page 2; it is about the essence of what we are trying to do. Do patients deserve care that is prescribed by their physician or should they be at the mercy of some account- ant wearing a green eyeshade saying, no, the law cannot spend because our CEO will not make his $200 million this year.

Patients deserve to have their care prescribed by physicians. Certainly, physicians are making that statement to us. Almost every group in the country, and certainly every respected group, makes those decisions to support the McCain-Kennedy-Edwards bill. Patients deserve to be able to know their doctor is taking care of them. You would not go to a doctor to get a tax form filled out; you would not go to an accountant to get your health care. We should keep medicine with the peo- ple who went to school, with those who know what good care is, and we should keep the bean counting and the book- keeping with the people with the green eyeshades; they don’t have white coats. I would rather go to someone in a white coat if I am in trouble and need a course of treatment.

Do patients deserve the medications the doctor prescribe? The HMO says: We have another one we can substitute. If the doctor believes you need a cer- tain medication, you should have it.

Do patients deserve to get into a clinical trial if, in fact, they have no other recourse? Absolutely they do. That is why the Kennedy-Edwards-Ken- nedy bill is so important.

Let’s face it; HMO executives are making millions of dollars while deny- ning needed care to our people. This is about who you stand up for, who you fight for. I have many stories.

I ask the Chair what is the order now? It is 1 o’clock.

THE PRESIDING OFFICER. (Mr. WYDEN). The Chair advises that the Senator from Tennessee is expected to be recognized to offer an amendment.

Mrs. BOXER. I will yield then in 1 minute, if I might, and leave the floor at that time. But I want to sum up.

On Monday morning early I held a hearing in San Francisco. I had pa- tients and families of patients testify. I had doctors testify. I heard stories that absolutely brought tears to my eyes—not just to my eyes but to those of ev- eryone in that room.

No. 1, a husband whose wife was diag- nosed with breast cancer had to lit- erally put his work aside. He is in his 50s. He had to fight for her to get the treatment she deserves and needs be- cause the HMO was trying so hard to save money. He had to threaten to go to the Los Angeles Times and tell his story—threaten—in order to get the care she needs.

I had the mother of a little girl who was diagnosed with cancer in her eyes. She had to struggle and fight. She said: I gave up everything else I was doing. I could not be with my daughter.

This is wrong. Senators can offer amendments until the cows come home and I know one thing: It is delaying passage of this bill. It is delaying the chance to vote on a strong Patients’ Bill of Rights.

Bring your amendments on. We are voting them down, most of them. If some of them are good, we will support them. But voting down patients’ Bill of Rights that says to our people: You are paying for this care. You de- serve this care. If you are turned down for care, you deserve the right to a speedy appeal, and then for sure we want to hold the HMOs accountable if they hurt your family. We say: Treat them as we would anyone else in soci- ety.

I am grateful for the honor to speak on behalf of the underlying bill. I yield the floor.

THE PRESIDING OFFICER. The Sen- ator from Tennessee is recognized.

AMENDMENT NO. 839

Mr. THOMPSON. Mr. President, I do intend to offer an amendment shortly. I believe it is being finalized as we speak. We will have that before the Senate in a few minutes.

Listening to the debate, listening to the discussion this morning, I am once again reminded of what passes for policy discourse nowadays. I was reminded of the article that was written by David Broder in the Washington Post yesterday. Mr. Broder is obviously one of the most respected members of the press corps. Some refer to him as the dean. He is certainly not right of cen- ter. I don’t know what you would call him except a very thoughtful, highly respected individual.

As I listened to this debate this morning, I thought a few of his words would be appropriate. He says this:

The Senate debate over the Patients’ Bill of Rights has become, in large part, a battle of anecdotes. Backers of the Kennedy-McCain-Edwards bill, the sweeping legisla- tion President Bush has threatened to veto, come armed each day with stories about the youngsters whose brain tumor was missed because an HMO denied his parents’ request for a specialist referral or the mother whose breast cancer was ignored until it was too late.

Mr. Broder goes on later in the arti- cle and says:

Would that the issue were that simple and straightforward. But it is not. Anecdotal evi- dence, no matter how powerful, gives no guidance to the scope of the problem being addressed.

Later on in the article he says:

Still less do the anecdotes define the proper remedy. Instead, by narrowing the ques- tion to dramatic horror stories, they pull the debate away from the genuine policy trade- offs that must be made.

I could not agree with him more. The incessant recounting of horror stories and the using of these poor and help- less people as instruments in this de- bate, indeed, pull us away from the genuine policy decisions that have to be made.

I would like to discuss one of those stories briefly this morning. That is the sub- ject of the amendment I intend to in- troduce. It has to do with the exhau- sion of administrative remedies.

That sounds to be an arcane legal is- sue that should not be of much inter- est to very many people. I think in the opposite is the case. Basically what the exhaustion principle is saying is that under the law, generally speaking, if you have a remedy before you get to court, go ahead and use it before you go to court. The importance of that principle of exhausting your adminis- trative process—going through the administrative process before you leap to court—is firmly embedded in our system. We see it working all the time with regard to run-of-the-mill kinds of lawsuits.

We have lawsuits in State court where you have to go through a com- mission or some body or some bureau has a chance to make a determina- tion—usually because that entity has some expertise in the area. We give the entity, under looser rules of evidence and less expert witness, an opportunity to take the first pass at this problem. In the process of doing that, a lot of things shake out, a lot of frivolous claims are made obvious and
are dropped at that level. A lot of times the merits of a particular claim are statable in the State or wherever it is—often at the time, in the State system—sees that and they settle.

It is designed to have someone with some expertise, some objectivity, hash out the facts in a way that would be much faster than a court system, much less expensive than a court system, and would be to the benefit of everyone involved. It still doesn’t mean you can’t go to court later, but a lot of things get winnowed out in the process.

We know how clogged up our court systems are in many cases. In our Federal system, under the speedy trial act, the courts have to consider all the criminal cases first. With all the drug cases we have in Federal court and everything else, sometimes in some jurisdictions it takes as long as 4 years around your case heard in the Federal court system. So this administrative process before you ever go to court, in winnowing those cases down to the ones that really belong in court and providing expertise to the litigants, is very important.

In our system, also, when we go through that process and we get that determination made by those who have the first look, so to speak, with the expertise, then you give some credence to what they found. Then you can go to court, but you do not turn your back on the fact that this process has been followed and they came up with a certain result. The court can live with that result, usually, or it doesn’t have to if it doesn’t want to. But it is out there and it has served its purpose.

That is the general, overall system we have through our system. Not everything goes through this administrative process. It goes to court. A lot of things do. This Health Care Bill of Rights we are considering today does that.

It sets up independent decision-makers to consider these claims in a rather elaborate and detailed way before they ever get to court. The process that is set out in this bill is a good one. It sets forth a several-step process where experts who are independent and objective have a chance to take a look at a claim. We all know, with as many horror stories as are paraded around here by those who support this bill, that we cannot cover everything, all the time, for everybody, at any cost. And we always hear about those cases that are legitimate, after being looked at by all experts, not appropriate, this bill assumes there will properly be some cases that are not. If you are going to have some that aren’t decided in an appropriate way, you do. You set up a process to find out what is just. You set up a process to find out what is right.

How do you do that? This bill does a lot of things. It has an internal review process. It is an expertized process, first of all, to even grant or deny a claim.

Let’s say under the plan that someone comes in and their claim is denied. Maybe they haven’t worked there long enough. Maybe they don’t even work there at all. Maybe a determination is made that this is not a medical procedure that is covered or it is experimental. For whatever reasons, there are many cases that are denied.

Under this bill, there is a process to review that denial, even at the internal stage when the employer still has some say-so with regard to some of these plans. Especially even at that stage, this bill begins to set up expertise and objectivity.

At the internal review level, it says the person making that review cannot be associated with the prior decision. He has to be someone who is independent of that prior decision. It also says it has to be someone with expertise. It also says if it is a medical issue, it has to be a physician.

Even before we get to the external review, while it is still an internal review, this bill sets up expertise and independence in the process in order to make sure this claim is adjudicated or decided in an appropriate manner. All right. You go through that.

Let’s say the claim in this external review process is still denied. This person denies the claim. Then, under this bill, there is an external review process. At this stage of the game, the person is totally independent of the plan. The legislation demands that he be totally independent, that he have expertise, and that he have nothing to do with the plan or the employers or anything else. The bill spent several pages of setting up a procedure whereby he is objective and independent.

The Secretary here in Washington has authority to review what he is doing and to look at the cases he has considered to make sure he is not prejudiced in any way, where it looks as though he may be denying too many claims or something such as that. There are elaborate processes to make sure this external appeals process is fair, independent, and objective. All right.

Let’s say we go through that level. Let’s say that entity decides that there is a medical issue. Then they hand it over to yet another level of independent review. That is the independent medical review.

Once again, the bill sets up someone who is totally independent, totally objective, sets forth supervision by the Secretary, and sets forth how he is to be compensated to make sure he is well qualified.

This is the third level, you might say, in terms of some degree of independence and objectivity—totally at the last two levels and somewhat at the first level.

You have the internal review; you have the external review; and you have the independent medical review—all set up to make sure that someone who comes with a medical claim gets fair consideration, and you don’t have any big, bad, mean HMOs that we hear so much about making these decisions. They are not. These people are under this act.

What we do, and what we say in this amendment that I am going to submit is, let’s use it. What I have just described, let’s use it.

After setting up this process that ought to be used because it is a good process, this bill also says it can be circumvented at any time. It can be. A claimant can stop it if he doesn’t like it. Or, or you can go to court by alleging that they have received irreparable injury or damage—not that they are about to but that they have received it.

There are two things wrong with that: No. 1, you obviously lose the benefit of the administrative process. For example, part of the problem could be or may be the sole problem could be a question of coverage. You have this process set up. You are maybe in the middle of it. Why not just decide whether or not you are really covered under this bill? It is a factually intensive exercise under this plan: how long you have been working here, and that sort of thing.

The second thing that is wrong with the bill as it is now, and allowing them to circumvent this process that I have discussed by alleging irreparable injury—they do not use the word “allege,” but it is the same thing. The only way you can get into court is by alleging that you are really covered under this bill. It is a low threshold.

You can circumvent this process at any time, or this process at any time along the way.
The second thing wrong with it is that it doesn’t have a claimant in it because we are talking about money damages. To circumvent this process in order to allow a claimant to go over here in the middle of it and file a lawsuit for money damages, all he is doing is getting in line over at the courthouse. He doesn’t get an expedited determination. There is no provision in the bill that covers that situation also, under section 103 on internal appeals. At the internal appeals level, if the initial claim is turned down and if a person believes they are entitled to an expedited determination, even at that level, they can go forth and pursue that. Then, at the next level, at the external appeals level, if they believe they are entitled to an expedited determination under this new provision that they are entitled to expedited consideration—at either of those levels—they can get that. So the claimant is covered.

The claimant is covered under those situations, which allows us to go back to the basic legal proposition that I mentioned in the very beginning in relation to the exhaustion of the administrative remedies, which work so well in so many aspects of our judicial system, which is set up under this bill but then has massive carve-outs. That process should be allowed to work. There is one other point in this amendment, and then I will offer it; and that is, after you go through this process, after you exhaust your administrative remedies, after you go through the internal appeal, the external appeal, the independent medical review, and after you get a result—whatever that result is—the trier of fact, when you go to court, ought to know about it. Who may be at issue here is whether it is expeditious in reaching a just result. So let’s let doctors make that initial determination instead of lawyers. This is one of those issues that is doctors versus lawyers.

If you want to go to court, if you want to file a complaint at any time in the process, regardless of what has happened—regardless of whether or not anybody independent has had a chance to look at this—you are going to decide, with a lawyers’ bill, to do that. The way it is constructed right now, you can sue anytime, for anything, in any amount. We can discuss those issues later.

But with regard to this issue, exhausting administrative remedies, let’s let the doctor, let’s let the medical people have the first crack at it, which is the only way it knows. When we get that result in, it might resolve a lot of these potential lawsuits.

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows: The Senator from Tennessee [Mr. Thompson] proposes an amendment numbered 619.

Mr. THOMPSON. I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows: (Purpose: To require exhaustion of remedies)

On page 150, strike line 17 and all that follows through page 153, line 8, and insert the following:

```
(B) EXCEPTION FOR NEEDED CARE.—A participant or beneficiary may seek relief exclusively in Federal court under subsection 502(a)(1)(B) prior to the exhaustion of administrative remedies under sections 102, 103, or 104 of the Bipartisan Patient Protection Act of 2001 (if applicable) have been exhausted.

(C) RECEIPT OF BENEFITS DURING APPEALS PROCESS.—Receipt by the participant or beneficiary of the benefits involved in the claim for benefits during the pendency of any administrative processes referred to in subparagraph (A) or of any action commenced under this subsection.
```

I shall not preclude continuation of all such administrative processes to their conclusion if so moved by any party, and
But there is no substituting what many of my colleagues have brought to this Chamber; that is, the experiences of frustrated families with the system as it is currently designed and how it has dealt with the tragedies of their own lives.

Many of my colleagues have brought the experiences of frustrated families: People who get up every morning to work, pay for medical insurance, and participate in a managed care plan, only to find that in a moment of crisis in their own families, that which they purchased, that which they have relied upon, was not available to them.

As do my colleagues, I want to now share with you just two stories that give meaning to all the statistics and illustrate all the failures of the system.

I begin with Kristin Bollinger, a young girl from New Jersey, NJ. Kristin’s experiences illustrate some of the troubling practices of HMOs and how ineffective and unresponsive they can be in dealing with the needs of a child who requires long-term care when chronically ill.

Kristin suffers from a unique condition of seizures and scoliosis, both of which can be managed with proper treatment and care. Her family was forced in an HMO by their family’s employer in 1993. Kristin’s parents have been fighting to ensure their daughter receives specialized services ever since. The HMO told Kristin’s family she could no longer see a pediatrician and the specialists who had treated her all of her life. From birth, she had this condition. She saw a specialist, received specialized care. When Kristin needed to see a neurologist and other specialists, her parents had to pay for the specialists because they were not in the HMO. After a major surgery in 1997, Kristin’s specialties in specialized nursing care was canceled without notice. She wasn’t even told. The HMO even discontinued coverage for physical therapy because it was deemed medically unnecessary.

Eventually, after fighting months and even years, the care was restored. But here is a family dealing with repeated seizures, a child who was not able to function, massive medical bills, although they were in a managed care plan, not able to see the specialists who were deemed medically necessary and had to fight their way back to coverage while caring for a child—case in point.

What would have worked? First, a right to get to a specialist; second, after you have been receiving care from a specialist and your plan changes, the right to keep the specialist; third, when you are denied the right to an appeal, for someone with continuous seizures only to find that now you could not avail yourself of it. They were denied. In fact, the doctors answered. They were denied. In fact, the doctors answered.

Imagine the frustration, that the genius of medical science found a way to deal with the suffering of your child in continuous seizures only to find that now you could not avail yourself of it.

Morgan’s parents appealed the decision, the HMO. They were denied. The doctors wrote that they and only their specialists could provide an answer. They were denied. In fact, the doctors report their letters weren’t even answered.

The HMO provided Morgan’s parents instead with a list of in-network specialists. They were not even board certified. They could not perform. They were not even board certified. They could not perform. They were not even board certified. They could not perform. They were not even board certified. They could not perform.

Last Friday, after 2 years of fighting an appeal, Morgan’s parents received a two-sentence e-mail from her HMO that her original specialists, the doctors they had requested, would now be covered—2 years, no money, no care, no answers. It isn’t right. It is not a system that anyone in this Chamber can defend, to Kristin, to Morgan, to her parents, or to millions of other Americans who are paying for this managed care or whose employers are paying for it and getting what they are covered, and tomorrow morning they are but a single tragedy in life away from Morgan’s or Kristin’s experience. It could be anyone in this Chamber. It could be anyone we
They did it.

KENNEDY, MCCAIN, and EDWARDS.

In a moment of recognition that chronically ill patients can keep their doctors even if they are forced to change plans or their doctors leave the HMO. That is not only right and fair; it is just not being cruel to patients and children in these circumstances.

The truth is, the alternative Republican plan does not allow these decisions to be made by patients and doctors. It means that an HMO that does not have a pediatric neurologist can force a child to see someone who is not trained or capable.

What are the costs of all this? If you take this one element of the Patients’ Bill of Rights I have addressed, just this one narrow, critical element for the chronically ill patient who need these specialists and a continuum of care, if you just take this small element I have addressed, CBO estimates that it would add 2 percent to the cost of insurance. Is there a family in America, given these circumstances, who would not bear that burden? Is there an employer in the country that would not want their employees to have this peace of mind in coverage, just knowing that what they are already purchasing might now be relevant and available in a moment of need? Mr. President, I have participated in this debate over these years. I have offered the case. I have argued the politics. I have discussed the merits. I have reviewed the bill. Now I submit Kristin and Morgan’s cases as the most compelling cases of all of why there is only one piece of legislation available on this floor that truly addresses these circumstances. It is offered by Senators Kennedy, McCain, and Edwards.

The case is overwhelming, and I urge my colleagues across the aisle to join us. They will be proud and pleased that they did it.

I yield the floor.

Mr. REID. Mr. President, I suggest the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

Mr. KENNEDY, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

THE PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY, Mr. President, for the benefit of our colleagues, we are now still committed to voting at 2 o’clock on the Nelson amendment which we debated earlier today. We will then return to a conclusion of the Thompson amendment. We just saw that amendment a short while ago, and we are trying to study that more closely.

After the completion of the vote on the Nelson amendment, we will be able to indicate to Members when we will either vote on or dispose of the Thompson amendment.

There has been a proposal made to our colleagues on this side for votes going through the afternoon and times allocated to the different amendments and then into the evening, also being sensitive to the needs of our colleagues on the other side of the aisle for a window, and then returning to the Senate for consideration of legislation.

Hopefully, at the end of the vote at 2:30 p.m., we will be able to give the Members a clearer idea both of the substance and the time for moving the process along. We have had good debates on these issues to date. We still have work to complete on the issue on medical necessity. Also, our colleagues, Senators Snowe and DeWine, held the votes that at 11:30 this morning on their proposals, which hopefully we will consider later this afternoon, to tighten up language in the area of employer liability. We are familiar with the thrust of the proposal. It seems to be extremely valuable and helpful in resolving some of these issues.

We will move on hopefully to the issues of scope later in the afternoon and into the early evening.

This is how we hope to proceed. We are not sure whether the actual proposal is made, but we want to give assurance to Members we are making progress, and we will continue to move as rapidly as we can on the measure.

Again, the liability issue will be the last outstanding issue. There is still no consensus on that particular proposal. We will consider the alternatives in a timely way and hopefully be able to conclude the legislation in a timely way as the majority leader has stated. I thank all of our colleagues for their cooperation. These have been good substantive debates. We have had very few interludes. A number of our colleagues welcome the opportunity to express their views on the legislation, and we will try to accommodate as best we can when we see the opportunity to have a focused debate on a particular subject matter and dispose of that matter in a timely way. I thank all of our colleagues.

At the conclusion of this next vote, which we expect will start in just a very few moments, we will then have further news for Members.

I suggest the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

Mr. REID, Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

THE PRESIDING OFFICER. Without objection, it is so ordered.

CONGRESSIONAL RECORD—SENATE

12037

June 27, 2001

Mr. MCCAIN. Mr. President, I move to table amendment No. 818 and ask for the yeas and nays.

THE PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion. The clerk will call the roll.

Mr. NICKLES. I announce that the Senator from North Carolina. (Mr. HELMS), is necessarily absent.

THE PRESIDING OFFICER. (Mr. ENZI). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 54, nays 45, as follows:

{Rollcall Vote No. 200 Leg.)

YEAS—54

Akaka  Harkin  Johnson  Schumer

Baucus  Feingold  Johnson  Wyden

Bayh  Feingold  Jordan  Wyden

The motion was agreed to.

Mr. KENNEDY. I move to reconsider the vote.
Mr. KYL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Massachusetts.
Mr. KENNEDY. Mr. President, it is our understanding that the Senator from Arizona is going to offer an amendment at this time on behalf of a number of our colleagues.

Hopefully, we can have order, Mr. President. This is a very important amendment.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. GREGG. Mr. President, I ask unanimous consent that the pending Thompson amendment be laid aside without prejudice so that the Senator from Arizona may proceed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Nevada.

Mr. REID. Mr. President, it is my understanding that Senator from Arizona would agree to an hour of time evenly divided on his amendment.

Is that right?

Mr. MCCAIN. That would be agreeable. But I think we can do it in a shorter time than that, depending on the view of the Senator from New Hampshire on the amendment.

Mr. GREGG. I am not sure I have seen the amendment.

Mr. MCCAIN. I say to the Senator, I will get it to you right away. Why don’t we do that.

Mr. REID. I would also say, it is my understanding, having spoken to all the managers, that Senator Snowe of Maine is ready to offer the next amendment, whenever the time arrives that Maine is ready to offer the next amendment.

Mr. REID. Mr. President, would the distinguished Senator from Arizona yield to me so I might ask a question without his losing his right to the floor?

Mr. MCCAIN. I am always pleased to yield to the Senator from West Virginia.

Mr. BYRD. Mr. President, I thank the Senator.

The PRESIDING OFFICER. The Senator from West Virginia.

SUPPLEMENTAL APPROPRIATIONS

Mr. BYRD. Mr. President, earlier today the distinguished Senator from Alaska, Mr. STEVENS, and I entered into a colloquy with several other Senators here anent the possibility of reaching an agreement on the amendments that would be considered at such time as the majority leader calls up the supplemental appropriations bill. I have asked the distinguished Senator from Arizona to yield for that purpose again.

I wonder if it might be possible at this point to get an agreement, or at least to get ourselves on the way to an agreement, that would limit the number of amendments to be called up to the supplemental appropriations bill to those amendments that we have ascended on out there via the hot-line in the Cloakroom and a managers’ amendment, the contents of which Senator STEVENS and I are ready to reveal to any Senator who wishes to know what is in the managers’ amendment.

Mr. BYRD. I ask, with the permission of the Senator from Arizona—I am about to lose my voice for the second time in 83 years—the distinguished majority leader for a reaction to this request?

Mr. DASCHLE. Mr. President, I appreciate the chairman’s concern for moving the process along. And since we discussed this matter this morning, we have issued a hotline request for amendments. We have now received the response. A number of Senators have indicated a desire to ensure that they have been included in the managers’ amendment. Once that confirmation can be made, I think on our side we would be prepared to then enter into a unanimous consent agreement which would take on or schedule the debate with an appreciation for a managers’ amendment and a designated list of amendments that could be accommodated.

So we are just about at a position where I think a unanimous consent request could be propounded. If Senators could just check with the distinguished senior Senator from West Virginia and the Senator from Alaska to ensure that the managers’ amendment is as it has been reported to them, we will be able to move forward.

Mr. BYRD. Mr. President, I thank the distinguished majority leader. I wonder if we can’t set the hour of 3 o’clock as the time when the majority leader could propound a request in this regard.

Mr. DASCHLE. Mr. President, I would be happy to attempt to propound an agreement at 3 o’clock and see what happens. No harm done in making the effort.

Mr. BYRD. Yes. The distinguished Republican leader has already indicated his strong support for such an effort.

So I thank the majority leader. And I thank the distinguished Senator from Arizona for yielding.

The PRESIDING OFFICER. The majority leader.

Mr. DASCHLE. Mr. President, just to clarify, I would be happy to enter into a unanimous consent agreement that would limit the number of amendments and provide for an understanding about how the supplemental would be addressed. Of course, we cannot schedule the supplemental until we have completed our work on the Patients’ Bill of Rights. I know the senior Senator from West Virginia understood that.

Mr. BYRD. Yes, I do.

Mr. DASCHLE. But I wanted to clarify that for the sake of anybody who may have misunderstood.
Mr. KENNEDY. Would it be agreeable to have an hour, so we could get—

Mr. MCCAIN. Mr. President, I ask unanimous consent that there be 1 hour on this amendment evenly divided.

I withhold my unanimous consent request.

Mr. GREGG. Reserving the right to object, in just a minute I believe I will be able to respond.

Mr. REID. I did not hear the Senator. Mr. GREGG. I said, I believe we will be able to respond to the Senator in about a minute.

Mr. MCCAIN. I thank the Senator.

Mr. President, concerns have been raised that under this legislation, independent medical reviewers can order a health plan to provide items and services that are specifically excluded by the plan's coverage.

The amendment I am offering clarifies that the bill does not do this, and that specific limitations and exclusions on coverage must be honored by the external reviewers.

There are a number of safeguards already in the bill to ensure that external reviewers cannot order a group health plan or health insurer to cover items or services that are specifically excluded or expressly limited in the plain language of the plan document.

First, the external review entity who is responsible for determining which claims require medical review and which do not, may refer claims to independent medical reviewers only if the coverage decision cannot be made without the exercise of medical judgment.

I repeat: The external review entity, the one that is responsible for determining which claims require medical review and which do not, may refer claims to independent medical reviewers only if the coverage decision cannot be made without the exercise of medical judgment.

Second, even if the external review entity makes a mistake and forwards to the independent medical reviewer a claim for an item or service that is specifically excluded or expressly limited under the plan, the legislation states that the independent medical reviewer cannot require the health plan or insurer to cover such excluded benefits.

The amendment I am offering clarifies this limitation on the independent medical reviewer to make it perfectly clear that although we are relying on the independent medical reviewer to give us a second medical opinion when such a medical opinion is necessary to interpret the plan's coverage, we are not empowering them to disregard the plan's specific coverage exclusions and limitations.

The third safeguard and the one we are further strengthening with this amendment is designed to ensure the objectivity and quality of the external reviewers. The bill provides already for their certification and sets out factors that must be considered before they can be recertified, including the external reviewer's compliance with requirements for independence and limitations on compensation. To the recertification considerations already in the bill, this legislation additionally requires the certifying authority, before recertifying an external reviewer, to consider whether the external reviewer has breached the other safeguards by excluding a provision of items or services that are specifically excluded by the plan.

The amendment allows a health plan or insurer to petition the certifying authority to revoke an external reviewer's certification or deny recertification and requires the certifying authority to do this upon a showing of a pattern or practice of wrongfully referring for medical review claims that don't require medical decisions or of ordering the provision of specifically excluded benefits.

Finally, the amendment requires the General Accounting Office, within 1 year after the bill takes effect, to report to Congress on the number and the extent to which independent medical reviewers are requiring coverage for benefits that are specifically excluded under the plan or coverage.

I guess what we are saying here is that we are trying to make the language as tight as possible. We know the way it may be on the part of reviewers to violate the plan with regard to those procedures which may be specifically excluded. We will have follow-up action, including a requirement for taking into consideration, on recertification or even revocation of certification, a study by the General Accounting Office which will tell us about the extent to which independent medical reviewers are requiring coverage for benefits that are specifically excluded.

My friend from Arizona, Senator KYL, had a very good amendment. We could not quite go that far, and we came close to agreement. I hope this amendment does clarify some of the concerns.

It strikes the language on page 36 of the bill that says: Except to the extent that the application or interpretation of the exclusion or limitation involves the determination described in paragraph 3 of this section.

This removes what was viewed by many as a possible loophole. So we were willing to strike that portion of the bill in order to try to inspire some confidence that in no way does this legislation expect or anticipate or even allow in any way exclusions on coverage that are not specifically listed in the medical plan, in the insurance plan.

I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. BAYH. Mr. President, before my colleague Senator MCCAIN leaves the Chamber, I thank him for his leadership on this issue. He has demonstrated his courage in battle and in service to the country and is doing so again by leading this important battle for patient care for all Americans. I thank Senator MCCAIN for his leadership once again.

I thank my colleague Senator CARPER from Delaware. We stood together as Governors for many years, and we share a common interest in ensuring that patients have access to the treatments they need. I was thrilled that this conference report included many of the safeguards that we have been fighting for in the Senate and House, including the right of patients and their insurance companies to contest whether the external medical reviewer is acting appropriately.

I express my appreciation to Senators EDWARDS and KENNEDY for their leadership in this important battle on behalf of patients. I express my gratitude to two of our colleagues who are not on the floor at this time: Senator NELSON of Nebraska and Senator KYL from Arizona.

In particular, I thank Senator NELSON for his heartfelt work on the last amendment. Although unsuccessful, I know he cared deeply about striking the right balance. We share many of the same objectives, although we differ in terms of how to achieve those objectives. I salute Senator NELSON for his work in this regard. I hope our amendment will meet many of his concerns. I believe it does in terms of striking the right balance for the American people.

Our amendment accomplishes both of the important objectives that the American people seek in debating and enacting this Patients' Bill of Rights. First, we ensure that all decisions that involve medical discretion allowing in any way exclusions on coverage that are not specifically listed in the medical plan, in the insurance plan.

Second, this amendment seeks to accomplish quality medicine at affordable cost, keeping the prices as reasonable as possible for consumers and patients across the country. We do this by removing unnecessary ambiguity from this bill, thereby ensuring that we can accomplish quality medical treatment but keeping the risks, the uncertainty, and therefore the costs to patients and consumers as low as possible.

June 27, 2001

CONGRESSIONAL RECORD—SENATE 12039
The bottom line will be quality health care for all Americans at an affordable cost. That is the balance all of us should be seeking to strike in this debate. That is the balance this amendment will help us to accomplish.

Very simply, we seek to honor the original intent of this bill, that doctors should make medical decisions, that lawyers should draft contracts and practice law, but neither should be in the business of practicing the other’s profession. We have removed through this amendment ambiguous language that ran the risk of one encroaching on the other’s territory.

Specifically, let me read the provisions that will remain in the bill. They are explicit and unambiguous. I quote from the legislation:

Nothing in this subsection shall be construed to permit an independent medical reviewer to require that a group health plan or health insurance coverage provide coverage for items or services for which benefits are specifically excluded or expressly limited under the plan or coverage in plain language of the plan document.

Under the bill before this amendment, Mr. President, there had been several exceptions which had consumed the rule, making this clear except for express limitations or prohibitions under the terms of the contract null and void. We put a period at the end of this language, thereby making it very clear that the terms of the contract, in terms of contract language, will govern. This helps to keep the costs low because the uncertainty and the ambiguity will be removed.

At the same time, there can be no uncertainty or ambiguity that medical decisions involving the practice of medicine, anything involving medical discretion, will be fully reviewable by the external appeals process, as it should be.

In addition, there are other precautionary measures included in our amendment that I was interested in and I know the Senator from Delaware was interested in. He may elaborate on these provisions in just a few moments. These ensure that the independent reviewers are truly independent. We want to make sure they adhere to the provisions of this legislation, hopefully as amended by this amendment, and that we don’t lose the power of panels to cancel their authority by changing the terms of the contract where they are expressly provided for, and there is no ambiguity in the language in terms of limitations or exclusions from the terms of the contract.

Once again, this amendment will ensure that independent review panels do not exceed their authority, inappropriately driving up costs without improving the quality of health care for the American people.

Finally, we have a rare opportunity to achieve bipartisan consensus on this amendment.

Not only is Senator McCAIN helping to lead the charge once again, for which we are very grateful, but I listened with great interest and gratitude to something the Senator from Oklahoma, Mr. NICKLES, said last evening. He recited the very same language that I recited about exclusions and limitations in the contract. And then he quoted the end of those provisions and remove the exception language, that would be—use his word—"great." Mr. President, that is exactly what we have done. We have placed a period there and removed the exception language, thereby removing the ambiguity, the risk, the unnecessary cost to consumers without a health care benefit.

Senator THOMPSON, earlier today on the floor of the Senate, indicated that the action we have proposed in this amendment would also go a substantial way toward correcting what he thought was a potential defect in the legislation.

So I ask all Senators, regardless of political persuasion, who are interested in striking the right balance between quality health care on the one hand and affordability on the other hand to support this amendment. We have taken a step that some of those who have been concerned about the ambiguity in the language that have encouraged us to do, thereby ensuring quality affordable health care for every American. We can accomplish that with this legislation, with this amendment, I urge my colleagues to vote in the affirmative.

I yield the floor, and I thank my colleagues for their patience and attention.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. CARPER. Mr. President, I rise in support of the amendment. I am pleased to be an original coauthor with Senators BAYH and McCAIN. The Senator from Indiana is very modest in giving to others the credit, but this is really an idea that I first heard from him. Early this week, Senator BAYH and Senator McCAIN and myself were trying to deal with issue of medical necessity. It is a difficult issue around which there are competing interests—doctors, nurses, insurers, patients—who really find consensus hard to reach.

I thank Senator BAYH for helping us to find this middle ground on which I am encouraged that maybe we will have strong bipartisan support. I express my thanks to Senators McCAIN and KENNEDY and Edwards for their leadership in getting us here this day, and to my friend, Senator GREGG from New Hampshire, for his thoughtful comments, as well as those I heard on the floor this morning by Senator BAYH, from Senator NICKLES. As I recited, earlier today PHIL GRAMM of Texas echoed almost those same comments.

Before I return, I want to step back a little bit and go back in time. I used to be State treasurer of Delaware before I was a Congressman, and I was Governor, before I became a Senator. Senator BAYH was Governor of Indiana and was the secretary of state. We worked in those venues before we came here to work. With our State treasurer at the time, we administered benefits of State employees. Among the things I was mindful of was health care costs.

In the 1970s and 1980s, health care costs went up enormously. It was not uncommon to see increases then of 20, 25, or even 30 percent annually in the cost of health care for State employees. These really mirrored increases that insured to other employees outside the State of Delaware.

Along about the late 1980s, a dozen or so years ago, a number of people began working seriously in this town to figure out how to introduce some competition into the provision of medicine. In a fee-for-service approach in medicine, I might see my doctor and he says, “You are not well; I will order tests A, B, C and D,” and to be sure we will order E, F, G and H,” and he owns the lab where the tests are administered. Then he says, “Come back and we will see how you feel next week.”

There really wasn’t much impetus for controlling costs. As a result, costs spiraled out of control.

Managed care was designed and conceived to try to stop that spiraling and introduce some market forces and competition in order to control the cost of health care. It really succeeded better than I think any of its proponents had imagined. Those costs that were going up 20, 25, even 30 percent, back in the 1980s, by the time we got to the end of the 1990s, were going up by 2, 3 percent, in some years nothing at all. As we went about controlling costs, the concerns switched to a different area, and that different area was quality of health care.

Instead of a lot of our doctors and nurses making decisions, a lot of decisions for the care to be offered or given to us was made within the HMOs running the managed care operation. In some cases, they were doctors and nurses, and in some cases they were no medical professionals.

What we are trying to do in the context of the Patients’ Bill of Rights legislation is restore some balance to the system. We don’t want to see costs spiral out of control or employers cutting off health care for employees. By the same token, we want to make sure that more of the medical decisions that affect us if we are covered by an HMO, especially if it falls under a Federal regulation, which ERISA is—we want to make sure before getting the kinds of protections that insure to folks who are in State HMOs.

How do we do that and not lead us back to spiraling, out-of-control costs
in a way that is fair to doctors and nurses, and in a way that is fair to employers and the same time fair to the HMOs? The key to what we are trying to address is: I am in an HMO; I don’t like the decision my HMO renders with respect to my health care. I appeal that decision, and it is reviewed by an internal mechanism within the HMO. If they don’t provide a decision my doctor and I like, we can appeal to an external reviewer. In some cases, certainly in my State, an external reviewer can override the HMO’s decision and mandate the provision of that health care under a State-regulated plan.

What about in a case where there is a federally regulated HMO, one that falls under ERISA? What do you do in a case when the language of the plan explicitly excludes a treatment that a member of that plan desires? What do we do when the language of the plan explicitly excludes the very treatment that I or the member of a managed care plan desires?

Unexpectedly, the language of the bill as drafted says to the external reviewer that you have license to go beyond that which is explicitly excluded in treatment for a patient. That external reviewer can order additional explicitly excluded treatment for a patient. That might be great for the patient, might be appreciated by the patients’ doctors and nurses. But how fair is that to the insurer who is trying to cost out a plan, to charge for that plan and have a sum certain to operate with?

What Senator BAYH has fashioned, something that he and Senator NELSON and I worked on, is a way to provide that certainty for the insurer and also to provide certainty for the consumer, the patient, and the health care providers. It is a simple change—one endorsed, at least indirectly, by Senator NICKLES and today by Senator Gramm. By simply striking a couple lines in his bill and putting a period where a period ought to appear, we helped solve a problem. It doesn’t solve all of the problems in this bill, but it solves one of the problems. It is clear, clean, and easy to understand.

Let me close my remarks with some comments about another one of our colleagues who, before he was in the Senate, was a Governor, BEN NELSON of Nebraska. Before he was Governor, he was insurance commissioner for his State. He has forgotten more about these insurance matters than most of us will ever know. His insights and perspectives on these issues have been enormously helpful to me in this debate. I thank him for joining with Senator BAYH and me and others in the conversations that really led to the emergence of this proposal.

Senator NELSON offered an amendment with Senator KYI, a little bit earlier today to try to define medical necessity, which is really the kind of issue we are talking about here. People have been trying to do that for years without a lot of success. While we are not going to agree to change the language in the bill with respect to that, we can say here clearly, if a health plan that falls under the jurisdiction of ERISA explicitly excludes a particular kind of a service, then in all fairness the external review committee in reviewing an appeal, cannot override the explicit exclusion in that health care plan. That is fair; that is reasonable; it provides certainty for the insurer, and I think it is fair to consumers as well.

I am pleased to rise in support of it, and I hope that all of us in this Senate, Democrats and Republicans, and Independent as well, can support this amendment and be very much in favor of it.

I yield back my time.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EDWARDS. Mr. President, before I leave this book, I wanted to thank my friend from Delaware for all his work on this issue. It is very important to the progress we are making to finally protect patients in this country, along with Senator BAYH, who led this effort, and Senator Nelson and others involved in this issue. We very much appreciate all of their input.

The issue of medical necessity, which means how do we determine whether any particular care and is medically necessary for the treatment of the patient, is a critical issue in the bill. We have now agreed on language that we believe appropriately balances the interests of the contract between the insurance company or the HMO and the employer on the one hand, and the interest of the patient and having some flexibility on the other.

Basically what we have said in this amendment is if the contract explicitly excludes a particular treatment, a test, then that will be excluded from care, period, and the independent reviewers are bound by that language.

On the other hand, to the extent we need some flexibility in what is proper and good medical care, we have managed to maintain that. I think we have struck the right balance between the sanctity of the contract on the one hand, so people know they can rely on the provisions of the contract and, secondly, allowing enough flexibility to provide the proper care to patients when they go through the review process.

More important is this is another step in a very important process. When we began last week, we were confronted with trying to get real patient protections in this country with numerous obstacles—disagreement among our colleagues, different issues being raised by Members of the Senate and a written veto threat from the President.

As we have moved forward through the end of last week and through the mid part of this week, we have continued to make progress every step of the way. We keep resolving issues. We keep making progress.

On the issue of employer liability, about which many of our colleagues have expressed concern, making sure that employers around this country are protected from liability, we have worked with our colleagues—Senators SNOWE, Senator NELSON, Senator DeWINE, and others—to work out compromise language that satisfies a large number of Senators on both sides of the aisle so that there is consensus on the need to protect the employers, on the one hand, but keeping in mind the rights of the patients on the other. Issue resolved.

No. 2, scope: What this legislation covers and who it covers. Senator BAYH has fashioned a model in problem solving, in trying to get real patient protection. He has been working very hard on this issue. We believe we have reached a resolution that will result in an amendment being offered later today that strikes a compromise and a balance between the interests of the States, being able to maintain the work they have done in the area of patient protection, while at the same time making sure every single American has a floor on the level of patient protection.

On the issue of medical necessity, as a result of the work of many of my colleagues, we have been able to reach consensus. On the issue of scope, who is covered, we have been able to reach consensus. On the issue of employer liability, we have been able to reach consensus.

Every day we have continued to make progress, but the importance of this is not for what is happening specifically within this Chamber and what is happening in Washington, DC, and what is happening in our States. The winners in this process are the families of America because it is now becoming clearer and clearer that we may finally be able to provide those families with the protections they so desperately need and to which they are entitled.

That is what this debate has been about. That is what all this work among Republicans and Democrats in the Senate has been about. We have shown over the course of the last week that we can work together, we can find ways to provide real patient protection in this country. Up until now, we have a model in problem solving, in trying to give real protection to the families of this country so they can make their own medical decisions. That is what this debate has been about; that is what our work has been about.

We are not finished. We have important issues left to resolve, but I am confident, given the good will and hard work that has already been done, that if we continue in that same way, we will be able to reach a resolution and hopefully be able to put a bill on the
President’s desk and that he will sign a real Bipartisan Patient Protection Act that gives power to patients and lets them make their own health care decisions.

I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. NELSON of Florida, I thank the Chair. Mr. President, over the past few days of debate on this Patients’ Bill of Rights, we have heard the many horror stories of what happens to people when HMOs put profits ahead of patients. We have heard of one man in a wheelchair whose HMO ordered his oxygen tanks removed from his house; we heard of a youngster whose brain tumor was missed because the HMO refused to allow the necessary test; and we heard of others pleading with their HMO to get conventional medical procedures either for themselves or their families.

These, unfortunately, are not isolated examples. They are happening every day all across this country which is why the people of America are demanding reform and why we are seeing the public outcry now showing support for this legislation to the tune of 81 percent in favor of this legislation.

The people also realize the system is not working for the doctors either. Just last week, I learned of a doctor who is assessing his existing patients a $1,500 annual membership fee for the privilege of continuing their treatment. He wants to cull his current patient list from 3,000 patients down to 600, and by charging this annual membership fee, the doctor shrinks his practice and yet he maintains his profits. The patients who cannot afford the annual membership fee have to find another doctor. I find this outrageous and unethical, and it sets a bad precedent for the future of our health care industry.

All of these incidents and the debate over this legislation have made one thing very clear: Our health care system is failing most of the people in the country.

Mr. President, I rise today to reiterate my strong support for this Bipartisan Patient Bill of Rights. It represents a critical first step, an important first step in a long journey of thousands of miles of reforming America’s health care system.

In short, this legislation puts medical decisions back in the hands of doctors and patients instead of HMO bureaucrats. It gives patients the right to see a specialist when needed, fixing a system that so often blocks a woman’s access to necessary care. This legislation will ensure direct access for a woman to an OB/GYN if that is who she wants as a primary care physician.

This bill gives patients access to the emergency room without first seeking clearance from their health care provider. We have heard many horror stories recounted in the Senate of people denied access to a certain emergency room because they had to go to another.

This legislation also protects the doctor-patient relationship, a very sacred relationship, by ending restrictions on which health care options doctors can recommend. Currently, we know doctors say they fear retribution from the health insurance industry if they pursue more costly medical treatment for their patients.

This bill also prohibits HMOs from offering financial incentives to doctors for recommending limited care. It prohibits HMOs from punishing doctors who seek top-notch care for patients.

What we are trying to do in this legislation is reinject common sense and good medical practice in protecting the doctor-patient relationship so the patient can enter into knowing what is going to prescribe what is the very best medical treatment appropriate for the circumstances.

In spite of claims to the contrary, yesterday the American Medical Association reported in States with recently enacted accountability and legal remedies, the new laws did not produce any documented increase in the number of uninsured, one of the specious arguments that the opponents to this legislation have advanced.

The most crucial issue is whether a patient can seek legal recourse for the wrongdoing by a managed care company. This bill will enable patients to hold their insurance companies accountable for harmful actions. Under current law, if malpractice is committed, if there are grievous wrongs, a patient can recover from a doctor, from a hospital, from other providers, but he cannot recover from an HMO. That is one of the main fundamental principles of this legislation, to change that, so they can hold those HMOs accountable.

Before I came to the Senate, I was the elected insurance commissioner of Florida for 6 years. I saw how some insurance companies—and I don’t say all because I am proud of those insurance companies that would stand up for the rights of their patients and would stand up to protect their patients, but I saw how some insurance companies tried to put profits ahead of patients. Unfortunately, many patients often have little or no recourse.

There is no reason why HMOs should have special protection from lawsuits. The AMA has so stated and endorsed a patient’s right to sue. It is estimated more than 190 million Americans are enrolled in health plans, and 75 percent of them under current law are unable to sue their health plans for anything but the cost of denied treatment. Clearly, the status quo works for the industry, but it fails consumers. We need this legislation to enable people to be able to redress their wrongs in

State courts for damages limited only by State regulations, but that has been a long time coming. It has taken 5 years to get this legislation to the floor because for 5 years special interests have prevented this bill from becoming law. As a result, the people of Florida and the people throughout this Nation have suffered. We must end the industry strangle hold on this legislation and we must take the first meaningful steps toward overall health care reform.

I submit that this legislation is a major first step in the overall journey toward health care reform. We must put the people before the special interests. We must put an end to these consumer horror tales that we have heard with all too much frequency during the course of debate on this legislation.

I thank colleagues for the privilege of addressing this issue and for indulging me in my comments.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON of Florida. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that at 5 p.m. the Senate vote in relation to Senate McCain’s amendment No. 820; that prior to that vote, when the quorum call is ended and the unanimous consent agreement is reached, Senators BREAUX and COLLINS be recognized to offer a first-degree amendment on scope—they can, after the vote tonight, either stop or come back tonight, but we will have a vote at 5 o’clock for the convenience of some Senators—that the Breaux and Collins debate occur concurrently today, and when the Senate resumes consideration of the bill tomorrow, Thursday, at 9:15 a.m., there be 30 minutes for debate equally divided between Senators COLINS and BREAUX prior to votes in relation to these two amendments; that there be 2 minutes for debate equally divided before each vote with the first
vote occurring in relation to the Collins amendment; that upon the disposition of those amendments, Senator Gregg be recognized to offer an amendment relative to liability; that there be 1 hour for debate equally divided prior to a vote in relation to that amendment; that upon the disposition of Senator Gregg’s amendment, Senators Snowe and Frist each be recognized to offer a first-degree amendment, and that will be on liability; that there be 4 hours for debate equally divided in the usual form to run concurrently; that at the conclusion or yielding back of time, the Senate vote in relation to Senator Snowe’s amendment; that after disposition of her amendment, the Senate vote in relation to the Frist amendment; that no second-degree amendments be in order to any of the amendments listed in this agreement prior to the vote in relation to the amendments.

Mr. Gregg. Reserving the right to object, I ask if the Senator from Nevada would be willing to amend the agreement, so it would be Senator Gregg or his designee.

Mr. Reid. Absolutely.

Mr. Gregg. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. Collins. I ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 826
(Purpose: To modify provisions relating to preemption and State flexibility)

Ms. Collins. On behalf of myself, Senator Nelson of Nebraska, Senator Enzi, Senator Voinovich, Senator Hutchinson, and Senator Roberts, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine [Ms. Collins], for herself and Mr. Nelson of Nebraska, Mr. Enzi, Mr. Voinovich, Mr. Hutchinson, and Mr. Roberts, proposes an amendment numbered 826.

Ms. Collins. I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is located in today’s RECORD under “Amendments Submitted.”)

Ms. Collins. I am very pleased to join with my colleague from Nebraska as well as the other Senators whom I mentioned in offering this amendment. Our amendment will give true deference to State laws and the traditional authority of States to regulate insurance, ensuring that which each State addresses the specific patient protections provided in this legislation.

We should pass a strong, binding Patients’ Bill of Rights. We should pass a bill that holds HMOs accountable for promised care and that ensures that patients receive necessary care they need when they need it. However, we should do so in a responsible way that does not add excessive costs and complexity to an already strained health care system.

Congress should act to provide the important protections that consumers want and need without causing costs to soar and without preempting State insurance laws. We can do so by passing a carefully crafted bill.

I strongly believe we should not preempt or supersede but, rather, build upon the good work the States have done in the area of patients’ rights and protections. States have had the primary responsibility for regulating insurance since the 1940s. For more than 60 years, States have been responsible for protecting insurance consumers. As someone who has overseen a bureau of insurance in State government for 5 years, I know firsthand that our States’ bureaus of insurance do an excellent job of protecting consumers’ rights.

One of the myths in the debate on this legislation is that unless the Federal Government preempts State insurance laws, millions of Americans will somehow be unprotected in their disputes with HMOs. That simply is not true. For example, as this chart demonstrates, the States have been extremely active in passing patient protections. In fact, they have been way ahead of the Federal Government and they have acted without any prod or mandate from Washington. Look at this activity: 44 States have dealt with the issue of emergency room access; 49 States have passed laws prohibiting gag clauses in insurance contracts that restrict what a physician can tell a patient. Whether it is access to OB/GYNs, continuity of care, or many of the other issues such as internal or external appeals or patient information, the States have been extremely active in this area. Every single State has acted to pass some sort of patient protections.

As is so often the case, it has been the States that have led the way. They have been laboratories for insurance reform. Moreover, we know one size does not fit all. What may well be appropriate for one State simply may be unworkable or unneeded or too costly in another. What may be appropriate for California, which has a high penetration of HMOs, may simply not be necessary in a State such as Alaska or Wyoming where there is virtually no managed care. In such States, a new blanket of heavy-handed Federal mandates and coverage requirements simply drives up costs that impede rather than expand access to health insurance. That is why the National Association of Insurance Commissioners and the National Conference of State Legislators are very concerned about the language in the McCain-Kennedy bill.

The language in that bill will force States to adopt virtually identical Federal standards.

I recently received a letter from the president of the National Association of Insurance Commissioners. She writes that States have faced the challenges and produced laws that balance the two-part objectives of protecting consumer rights and preserving the availability and affordability of coverage. For the Federal Government to unilaterally impose its one-size-fits-all standards on the States could be devastating to State insurance markets.

I think we should heed that caution.

The Federal Government does have an important role to play in regulating the self-funded plans under ERISA. That is where our effort should be focused.

States are precluded from applying patient protections to these federally regulated plans, and that is why we need a Federal law to ensure that consumers, enrolled in insurance plans beyond the reach of State regulators, have strong patient protections. But the Federal Government should not be in the business of second-guessing and overriding and preempting the carefully crafted patient protections that have been negotiated by our State legislators and Governors to meet the needs of their States’ citizens. States which seized the initiative and acted on their own should not have to revise their carefully tailored laws simply to comply with a one-size-fits-all Federal mandate.

Under the McCain-Kennedy bill, the Federal Government would preempt existing State laws unless the State has enacted protections identical to the standards on the States could be dev- astating to State insurance markets.

A reasonable person’s interpretation of that standard is the States will have to pass new laws wiping out their carefully crafted work, that are virtually identical to the standards in the McCain-Kennedy bill.

The approaches taken by the 50 States to the same type of patient protections vary widely, and with good reason in many cases. Why should States that have already acted on their own to provide strong, workable patient protections have to totally change and make extensive changes in their laws? That is why the National Council of State Legislators supports the Collins-Nelson amendment. It is extremely important to State legislators that they do not have to spend valuable time rewriting and revising laws already on the books that meet the needs of their citizens.

In a recent letter to Senator Nelson and myself, the National Council of State Legislators wrote:

[We] support this amendment. States are best situated to provide oversight enforcement of the patient and provider protections
established in this legislation. The record of the States are looking for an approach that supports the traditional role of States in the regulation of insurance and that recognizes the differences in State insur ance environments. A mechanism for States to protect those markets.

Again, let me be clear. There is a role for the Federal Government, and that is to make sure that those plans, regulated under ERISA, beyond the reach of State regulators, include patient protections. That is why we need a Federal law to accomplish that goal.

It is all well and good and appropriate if Congress decides it wants to impose a specific requirement or mandate on these federally regulated insurance plans. But the Federal Government needs to be careful in respecting the good work the States have done.

Moreover, let's look at the practical consequences of what would happen under the McCain-Kennedy bill. If a State fails to revise its laws to conform to the Federal standard, under the McCain-Kennedy bill the Health Care Finance Administration, HCFA, would displace the State as the enforcer of insurance patient protection.

Talk about a right without a remedy. If there is no enforcement, there is no protection, and experience has already shown that HCFA is completely incapable of carrying out this responsibility.

The Health, Education, Labor, and Pensions Committee on which I serve has held yearly hearings to examine the problems that HCFA has experienced as it has attempted to implement and enforce the 1996 Health Insurance Portability and Accountability Act. There are many GAO reports. This one is entitled "Progress Slowly: Enforcing Federal Standards In Nonconforming States." That is because HCFA is totally ill-equipped to take on this task.

Our States' bureaus of insurance know how to do the job. They have been doing it for 60 years, and they have been doing it well. Consumers should be very concerned, since HCFA has already proven that it is not capable of enforcing existing Federal insurance standards in States that don't conform. In fact, HCFA has shown it cannot even assess the degree of compliance with those Federal laws, where HCFA does play a role. We should be very concerned that we are proposing an empty promise.

The States have the systems, the infrastructure necessary to receive and process consumer complaints in a timely fashion and to hold insurers accountable that they comply with State laws. To me, the bottom line is very simple. My constituents would much rather call the bureau of insurance in Gardiner, ME, than have to deal with the HCFA office in Baltimore, where they have a problem with their insurance.

Another problem of the McCain-Kennedy approach is that it would create a dual enforcement structure that would be extremely confusing for consumers and, frankly, completely unworkable. Under this bill, if some State laws met the new standards but others did not, who would be the regulator? Would it be HCFA or would it be the bureau of insurance? Would it be HCFA for some parts of the insurance contract and the bureau of insurance in the State for other parts of it?

This simply does not work. We would be creating a situation where a patient may have to go to a State bureau of insurance for questions or problems associated with certain patient protections and then try to deal with HCFA if the patient has problems or questions with other parts.

Therefore, Senator NELSON and I, supported by a number of our colleagues, are offering an amendment that will give true deference to State laws and the traditional authority of States to regulate insurance. At the same time, we will ensure that each State considers and addresses the specific patient protections proposed by this legislation.

First, our amendment would grandfather all State patient protection laws that are in place prior to the effective date of this act. That is October 1 of next year. A State would just certify to the Secretary of HHS that it has addressed one or more of the patient protection requirements to be in compliance with the law. This provision would also give States that have not considered these patient protections an incentive to act before the effective date to avoid Federal intrusion and challenges to their laws.

Second, by the effective date a State has been certified as compliant with all the patient protections in the legislation, it will immediately become eligible for funds from a new patient quality enhancement grant program. States that are in full compliance by the effective date of the legislation would be required to meet a higher standard in order to be eligible for funds under this new program. If a State has not acted by the effective date, it would have to certify to the Secretary, for each of the remaining protections, that either the State has enacted a law that is "consistent with the purposes of the Federal standard" or decline to enact a law because the adverse impact of the law on premiums would lead to a decline in coverage or simply because the existence of a managed care market in the State is negligible; it is just not relevant to that State.

Our amendment would recognize the States are the experts in this area. They have led the way. Consumers are best protected if we continue to respect the work the States have done and give them the States' traditional authority to regulate insurance.

I reserve the remainder of my time but yield to the Senator from Nebraska, my principal cosponsor, who is a true expert in this area. He knows more than any other Senator. I hope my colleagues will listen very carefully. It has been a great pleasure to work with him on this issue about which we both care a great deal.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. NELSON of Nebraska. I thank my colleague from the New England State of Maine for such a glowing recommendation. I hope my colleagues do not think I believe I know more than they do. But it is a subject I have spent a good deal of my life involved in as an insurance regulator and as a Governor, somebody who has dealt with the business of insurance.

I appreciate so much the opportunity to join with Senator COLLINS to bring their amendment to the attention of our colleagues.

It typically is a lot more instructive to talk about the importance of patient care and to talk about those who aren't getting good patient care and certainly to bring to our attention the folks who suffered great injustices under their current health care system. I respect that. I certainly am interested in that aspect. That is why I support a Patients' Bill of Rights. That is why I continue to do that.

But I have found that any bill which comes before this body or that comes before any legislative body is hardly ever such without some amendment and some improvement. I think what Senator COLLINS and I are offering today is in that category of an improvement.

When our founders created this Union they established a system of Government that, pursuant to our Constitution, provided for a divided Government consisting of our States, and under a well-considered principle of Federalism, a Government consisting of our States. We have been best served by this Government when we have permitted it to work for us. While pursuant to the 10th amendment, the Federal Government may preempt States in certain respects, it seems clear from that amendment and from the practice over the last 200-plus years that such preemption should be limited to those areas where the States have failed to act in some manner. This is not one of those cases.

The bill before us presents a dilemma for me and for my colleagues because most of us believe that, with some modifications, this is a good bill. The same may be said of the Prist-Breaux-Jeffords bill.

At the outset, let me state unequivocally that I support the purpose and the protection of this bill. What I don't support is its preemption of State laws in an unnecessary manner. Let me explain.

As my colleague has indicated by the chart, the States have acted. They
have acted rather aggressively and consistently and in many ways. As a matter of fact, they acted so aggressively and so consistently that some multi-State employers were having problems complying with the diversity of the State regulation of health insurance.

First, it was described as a pension issue to which they couldn't quite comply. Then they said, as long as we are getting a preemption, let's grant it in the health insurance area as well. So Congress exempted certain plans from State law. That level of exemption involves fewer than a score of States. We are faced with solving that problem.

Some have said, as long as we are solving that problem, let's move away from diversity and go to uniformity. I am not opposed to having uniformity. But to serve uniformity for uniformity's sake and ignore what the States have done, the fact is that under the principles espoused by Thomas Jefferson States have only been acting as laboratories of democracy by experimenting. Fortunately—and thank goodness—the States have experimented because it is from these experiments and from this diversity that we are now able to assemble for the protection of the ERISA plan group of patient protections.

The work is important about this. If we look at it to a certain extent that virtually all content is taken from various State laws, that is at least some form of congratulation to the States for their efforts. But they ought not to be rewarded by that great effort by the preemption where it is unnecessary.

The framers of the legislation that is before us as well as those of the Frist-Breaux-Jeffords bill have really worked hard to try to find a way to balance this out. I commend them for that. Their work is important about this. I appreciate their efforts. But whether the standard is substantially equivalent as in the McCain-Kennedy Edwards bill or in the Frist-Breaux bill consistent with or in a compromise that is under consideration right now which says substantially compliant, the fact is the States are going to have to come to the Federal Government with the plans and say, “Please let us out” or they will not be able to get out from under the requirements of this legislation unless they are substantially equivalent to.”

“Substantially equivalent to” means the filings of these State protections would have to be made by their Governors to the health and human services agency, and they will have to find out whether or not the plans that they are submitting are substantially equivalent—not whether they are good or bad but whether they are substantially equivalent.

The theory is, if they are substantially equivalent, they are at least as good as or better. But I don't know why we should engage bureaucrats in the Federal Government to try to look over the shoulders of the States that have seriously considered each and every one of these protections.

Why are we doing it? Because we want to solve the problem that exists. Why should we try to solve a problem where there is no problem?

Under the Collins-Nelson effort, we give States the opportunity to opt out if their plan is consistent with the purposes of this law.

It seems to me that we just simply make it clear that the States can continue to experiment. It is easy to suggest that the States have the incentive of the State to experiment, the experimentation will either wither or will at least stagnate.

We want to continue to be sure that there are incentives for the States to continue to experiment because I suggest to you right now this is a dynamic process. Over the next several years, we are going to find some better patient protections, and we are more likely going to find those from the States than we are engaged in the body of this legislative Chamber trying to find those answers.

I would prefer that experimentation continue. Then we can pick and choose the best of the class in each case.

I spoke with the Secretary of Health and Human Services, Tommy Thompson, also a former Governor, and I asked him whether he thought his agency could do this. He said simply that he doesn't think that it can.

Let me add that I think that translates into, “I can't unless I have a larger bureaucracy of several dozens or more Federal bureaucrats and more staff to look over and second-guess Governors and second-guess State legislatures.”

I asked if that is necessary. Quite frankly, I don't believe that it is. And with the stroke of the pen this bill can be amended so that it won't become law so States can opt out and Governors will have the opportunity, as State legislatures, to decide what is the policy that will work within their State.

We are looking for balance with this legislation. All of us want to balance being able to have the right kind of patient protections and the availability and affordability of insurance. The last thing we need to do is to tip the balance one way or the other and end up with a more severe problem than we are trying to solve with this effort.

I suggest to you that Thomas Jefferson might be looking at us at the moment. Furthermore, I think he would be pleased if we had a dual system that recognized that this Federal bill and these Federal protections would apply to the Federal plan, and we would allow the States to continue as they have to protect the people at that level and to serve to provide experimentation and better ideas along the way and permit us to allow them to continue as they have to protect the citizens.

I truly believe that government, when it is functioning at the local level, will function best and certainly can function better in this area than we can function.

Washington already has taken the step of exempting the Federal plans. Let us not now make a mistake of applying what we need to permit for those State plans where there is already much protection and probably even more protection.

Some States have passed during the past decade 1,100 laws and regulations dealing with consumers. Indeed, the States have been way ahead of the Federal Government in this area.

I have shown my colleagues the charts of the numerous laws that the States have passed during the past decade dealing with patients' rights. Each State has taken action on some of these consumer protections. They have done so without any mandate from Washington. They have done so because they want to make sure that in State regulated insurance plans these kinds of protections have been included.

In fact, the States have passed over 1,100 laws and regulations dealing with patient protections. So this is not a case where the States have failed to act and the Federal Government has to come to the rescue. Rather, it is a case where the States have been far ahead of the Federal Government. We have been slow to provide these kinds of State protections to federally regulated plans under ERISA. That should be the primary focus of this legislation.
Both the Senator from Nebraska and I support a strongPatients' Bill of Rights. We want to make sure, in writing this legislation, we do not wipe out the good work of State governments.

Every single State has at least one law on the books dealing with portions of the McCain-Kennedy bill. But no State law is identical to the provisions in the McCain-Kennedy bill. States have dealt with these issues in different ways, depending on the negotiations between the State legislatures and their Governors, to meet the needs of that particular State. There is no need to impose a one-size-fits-all Federal mandate on the States when they are already doing a good job.

When I was Commissioner of Professional and Financial Regulation in the State of Maine, we had a very active bureau, the insurance regulation, have to go back and revisit its laws, reenact them, and rewrite them to meet the dictates of the McCain-Kennedy bill? That just does not make sense.

I think we should respect the work that has been done by the States in this area by honoring the laws that already exist and are on the books. We can encourage those few States—and they are just a handful—that have not acted in some area to do so, and then to bring their plan to the Federal Government or to tell us why they chose not to.

Why does it make sense for a State such as Wyoming or Alaska, which has virtually no managed care, to have to adopt a host of new laws that are irrelevant to their insurance market?

States have been active and have taken a very strong role in trying to protect the patients within their States. The State legislatures, and the regulators have all worked together to try to create an environment in which patients are protected. They have succeeded in doing that.

The one missing piece, though, is not in what the States have failed to do but in what the Government today at the Federal level, in Congress, is now trying to do, and that is to cover the federally exempted plans.

There would not be any discussion in this Chamber today about this bill if it had not been for the exemption granted in 1974, as a result of Congress' action to exempt certain plans from State laws.

There is no criticism of what the States have or have not done. There isn't any suggestion that the States have not been active or that the States have not attempted to do a good job or that they have not done a good job.

What we have is, overcoming an omission to something that has not been done; that is, applying these protections to the Federal laws that have been exempt from State law. That is exactly what this is about.

I certainly want to praise, again, Senator Kennedy, who has been extraordinarily tolerant of those of us who have had something to say about his labor of love. He has been very tolerant. He has been very helpful. And he has been very suggestive about solutions along the way. I want him to know that I personally appreciate that.

I am somewhat embarrassed to be suggesting that I might have some area of improvement, given the fact that he has worked on this for so long. It is a fact that I could not find a thing to say. I feel like somebody who came to the party late who now wants to rewrite the invitation.

It seems to me that this bill is such that it can involve some additional improvement. This is an area where there is clearly some room for improvement, given the fact that the States have the opportunity to make their case—not that they need to be treated as though their laws are substantially equivalent—but to give them the opportunity to come in and say: We have done this. We chose not to do this in our State after carefully considering it. The Governor may have wanted it, but the legislature, in its infinite wisdom, chose not to do it, or vice versa. It works that way. That system ought to be continued.

It will serve the people of our great Nation very well: The people of South Dakota, the people of Maine, the people of Nebraska, the people of Massachusetts, the people everywhere, because it has served this Nation so very well and has served the people so very well.

That is a minor modification. I think it has major implications, but it is a minor modification to say that the Governors can certify, and they can see to it that they have attempted to deal with these cases in their way, that they do not have to do it our way. That is the difference.

I hope that my colleagues will see it that way and will find the capacity to continue to recognize that States have done, are doing, and can continue to do a good job. Even though there is an effort made to limit the amount of the preemption, I believe this preemption simply goes further than is necessary and further than we certainly would like to have it go.

That is what the National Conference of State legislatures have said and other State organizations have said. They would prefer to have less preemption and a better recognition of their efforts and a recognition that they will continue to work to increase the level of patient protection.

I yield to my colleagues from Maine.

The PRESIDING OFFICER. The Senator from Maine.

Ms. COLLINS. Madam President, I know we are about to vote shortly on another amendment.

Let me just summarize this part of the debate—we will be resuming the debate after the vote—by quoting a letter from the National Association of Insurance Commissioners to Senator Nelson and myself. They raise exactly the point that Senator Nelson and I have raised:

Members of the NAIC are also concerned about enforcement. As you know as a former state regulator, if there is no enforcement, then there is no protection. States have developed the infrastructure necessary to receive and process consumer complaints in a timely fashion and ensure that insurers comply with the laws. The federal government does not have this capability, and these proposals (before the Senate) do not provide States with the resources to develop such capability.

It has taken the Health Care Financing Administration (HCFA) years to develop the infrastructure required to enforce the Health Insurance Portability and Accountability Act (HIPAA) which included only six basic provisions that most states had already enacted. The proposed patient protection bills are far more complicated than HIPAA and will require considerable oversight.

If we pass the McCain-Kennedy bill without this amendment, we are holding forth a hollow promise to consumers.

AMENDMENT NO. 820

The PRESIDING OFFICER. The hour of 5 o'clock has now arrived. Under the previous order, the question now is on agreeing to the McCain amendment No. 820.

Mr. REID. Madam President, on behalf of Senator Daschle, this will be the last vote of the evening. There will be further debate on the two amendments now pending. The next vote will be at 9:45 a.m. tomorrow.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?
Mr. BREAUX. Madam President, this amendment is offered on behalf of myself, Senator Jeffords, Senator Kennedy, and Senator Edwards as well. It attempts to deal with the question of whether States would be allowed to continue their programs dealing with Patients' Bill of Rights or will it be dealt with on a Federal level.

We have tried to bring about an agreement between all of the parties and, to a large extent, we have been successful in the sense that we have taken ideas and concepts that have been brought before this body on previous occasions and implemented them in this amendment, a provision that I think makes a great deal of sense.

A great deal of the credit should go to the staffs who have been negotiating this amendment for several days in order to bring it to the attention of our colleagues.

Most of our colleagues recognize the need that States have addressed this problem in a fashion that guarantees to patients that they will have certain rights, and they should be allowed on a State level to run and manage these programs. Very few people would be suggesting the Federal Government knows the answers to all of these problems.

My State of Louisiana, for example, is a State that has already enacted into law some 39 guarantees under our State program, guaranteeing to patients that they will be protected when they deal with their insurance companies and their managed care companies. They can be assured that these rights, in fact, are in place.

There are a number of other States that have done the same thing. The point is that while we in Washington are passing a national Patients' Bill of Rights, those States that have already done this. They were ahead of the Federal Government. They did it before us, and these States should be allowed to continue to run their State programs as they see fit.

What we have suggested in the original Frist-Breaux-Jeffords legislation is that a State would not have their programs superseded by the Federal Government if their plans were consistent with the Federal statute.

The decision on 'substantially comply' whether it is or is not being complied with, is a decision of the Secretary of Health and Human Services, who will look at the State plans and make a determination as to whether or not they substantially comply with the Federal statute. They have time lines within which they have to make that decision. I think that is appropriate so they do not just languish in Washington. They have a certain period in which they have to make a decision on a request by the State to be in substantial compliance with the Federal statute.

The decision on 'substantially comply,' whether it is or is not being complied with, is a decision of the Secretary of Health and Human Services, who will look at the State plans and make a determination as to whether or not they substantially comply with the Federal statute. They have time lines within which they have to make that decision. I think that is appropriate so they do not just languish in Washington. They have a certain period in which they have to make a decision.

The amendment (No. 820) was agreed to.

Mr. REID. I move to reconsider the vote.

Mr. DURBIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. REID. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. BREAUX. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 830

(Purpose: To modify provisions relating to the standard with respect to the continued applicability of State law)

Mr. BREAUX. Madam President, I ask for the reporting of an amendment that is at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The amendment at the desk tries to reach an agreement and compromise that recognizes the role of the States is very important. Our language simply says the State plan will not be superceded by the Federal Government when the State plan substantially complies with the patient protection plan we have written on the Federal level.

Where do we get that language, ‘substantially complies?’ I think that is very important. ‘Substantially complies’ is the test that we instituted when we passed the so-called SCHIP programs for children's health insurance. We basically said in that legislation the States would be able to carry on their State programs for insuring children if it substantially complied with the guidelines of the Federal Government. That language is in the existing law of this Government; it is being interpreted by HHS, and they interact with the States now on the ‘substantially comply with’ test. They know how to handle it; they know what it means; they have interacted with the States on this basic test.

We take that language from that legislation and incorporate it into what we are doing with the Patients' Bill of Rights. Senator Jeffords was a major author of that SCHIP program, and he will speak to this issue. We took the language, the test of ‘substantially comply,’ and we now have that in place in this amendment.

The decision on ‘substantially comply,’ whether it is or is not being complied with, is a decision of the Secretary of Health and Human Services, who will look at the State plans and make a determination as to whether or not they substantially comply with the Federal statute. They have time lines within which they have to make that decision. I think that is appropriate so they do not just languish in Washington. They have a certain period in which they have to make a decision.

The difference in our approach and my colleague from Maine and my colleague and friend from Nebraska is, if States decide to take a walk on this, if a State decides, we don't care what you are doing in Washington, folks, we are not going to pass any Patients' Bill of Rights in this State, and we are not listening to anything you are suggesting, they have a certain period in which they have to make a decision on a request by the State to be in substantial compliance with the Federal statute.

One defect in their amendment is that the only penalty the State can potentially suffer is to have grant money for this program terminated. Therefore, you could have a situation where
the State simply thumbs its nose at the concept of a national patient protection right and does not enact anything like it. I think that would be a serious mistake.

I think it is in the interests of this Nation to have a Patients' Bill of Rights that can be enforced, and what we have offered as a reasonable compromise between the Kennedy bill and the Frist-Breaux-Jeffords bill I think is one that is balanced, it has been well thought out, and uses language that is already in Federal law as the "substantially comply" test is already being enforced by the Secretary of Health and Human Services.

I encourage Members, after having a chance to look at what we have offered, to be supportive of this compromise effort.

I yield the floor.

Mr. JEFFORDS. I will follow up on the Senator's explanation of what we are trying to do, to make sure we have a less complicated situation with respect to who is in charge and with whom to deal.

We have some problems, but the biggest problem, in what was the Kennedy-Kassebaum bill called HIPAA, was we made the mistake of using such language that it ended up that many of the States declined to do anything, in which case the Federal Government, under the bill, came in and tried to do it. That has not worked out. This comes from experience in trying to recognize the States will do a good job and want to do a good job and this is the best place to do it. We will do nothing that prevents that from continuing.

Senator COLLINS has worked hard on this to make sure we come up with something that will be signed into law and allow the President to sign it into law. The protections in the Frist-Breaux-Jeffords Patients' Bill of Rights apply to all 170 million Americans covered by the private sector group health plans, individual health plans, and fully insured State and local government plans. It covers all of them.

At the same time, our legislation recognizes the Federal Government does not have all the answers. States need to play the primary role in enforcing the bill's requirements with respect to health insurers. However, if a State does not have the law or does not adopt the law similar to the new Federal requirements, Federal fallback legislation will apply.

Our amendment strikes a new compromise under scope between the Frist-Breaux-Jeffords standard of "consistent with" and the much more pre-emptive standard in the McCain-Edward-Kennedy bill that states laws "be substantially equivalent to" and "as effective as" the new Federal patient protections. This leaves a lot of indefiniteness in the situation. The Breaux-Jeffords amendment uses a new standard - the State "could be certified if it "substantially complies" meaning that the State law has the same or similar features as the patient protection requirements and has a similar effect.

Also, we require that the Secretary give deference—try your best to make sure the State can do it if they want to do it—to the State's interpretation of the State law involved and the compliance of the law with the patient protection requirement. This amendment represents a true compromise. We believe it will make it less likely that the Federal Government will have to enforce these new standards and more likely that it will get signed into law. I think we have made a good improvement. I am hopeful it will be accepted. I urge its acceptance. I yield the floor.

Mr. NICKLES. Madam President, I will make a couple of comments. I compliment my colleagues, Senator COLLINS and Senator NELSON, for offering an amendment which does recognize States' roles in enforcement of insurance contracts. Unfortunately, I don't believe that is the case under the Breaux-Jeffords amendment. We will have to make a decision: Do we believe States should regulate insurance? Or should the Federal Government? Do we believe one size fits all?

I understand there is a little change and there may be some improvement over the underlying bill, but the improvement is very small. The underlying bill, the McCain-Kennedy-Edward bill, has language in it that says all these protections that we are getting ready to tell the States they have to do, the States have to have "substantially effective" as the standards we are getting ready to pass in the bill.

I think the Senator from Maine said there are 1,100 State protections—State protections dealing with OB/GYN, State protections dealing with clinical trials, and so on. Almost none of the States has identical protections as what we are getting ready to mandate.

Unfortunately, the language that is now being talked about may be an improvement. Instead of "substantially equivalent," it says "substantially compliant" with the Federal standard. "Substantially compliant" was written in the legislation, and that was, if they did this, they would get a pot of money. That is a little different scenario than coming up with: States, you must do this or we will regulate your State insurance—even though the States have always done it. Historically, the Federal Government has never regulated State insurance.

Under the McCain-Kennedy bill or now under the Breaux-Jeffords substitute, you are still going to have the Federal Government telling the States, comply with what we are doing, or else we will supersede your regulation and the Health Care Finance Administration is going to do it.

There are a couple of problems with that. HFCA can't do it. Maybe nobody cares. Maybe we should just go ahead and pass this. We might just pass it and laugh at it because I absolutely know, with certainty, HFCA can't do it.

The Secretary of HHS, Secretary Thompson, basically made that statement before the Finance Committee on June 19. HFCA is already overloaded. They haven't even enforced the Medicare rules we passed years ago. They are not even enforcing HIPAA that we passed several years ago.

Under HIPAA that is the Kennedy-Kassebaum bill that deals with portability. There are all sorts of things that have not complied. We have testimony that HFCA is not enforcing that. They are supposed to. We passed a couple of other bills. Guess what. HFCA is still not enforcing those. There is one dealing with mental parity. They have never enforced it. They never have. They are well aware they are not enforcing it; that they are not compliant. We have records of that. I will submit a bunch of these for the Record tomorrow. HFCA cannot do it.

Yet what are we doing? We are getting ready to say if it is not substantially compliant with the new Federal regulations, HCFA is going to come running at the charge and enforce these regulations, which they were not doing.

The National Association of Insurance Commissioners basically says the same thing. These are State insurance commissioners who are full-time. They are not part-time. I should not say we are part-time Senators. As Senators, we are working part-time on regulating insurance and we are getting ready to mandate a lot of things to the States they will not be able to do, or we are getting ready to say States do it the way we tell you to do it or the Federal Government is going to come charging in and take over. I want everyone to know that is not what we are doing and even "substantially compliant" is going to have a State takeover.

Here is one of their paragraphs. They say—

"Members of the National Association of Insurance Commissioners are also concerned about enforcement. As you know—

And this letter is written to Senator COLLINS—

as a former State regulator, if there is no enforcement, then there is no protection. States have developed the infrastructure necessary to receive and process consumer complaints in a timely fashion and ensure that insurers comply with the law. The Federal Government does not have this capability and the proposals do not provide any
resources to Federal agencies to develop such capabilities. It is taking the Health Care Finance Administration years to develop the infrastructure required to enforce the health insurance portability and accountability act, HIPAA, which included only 6 basic provisions and already had exceptions. The proposed patient protection bills are far more complicated than HIPAA, and will require considerable oversight.

HIPAA had a few patient protections that almost all States already had, a few States still do not have, and HFCA has yet to really enforce those protections. Now we are going to give dozens of protections and have HFCA determine whether or not the States are substantially compliant with our new protections.

I will give an example. In the State of Delaware, they are in the process of passing a patient protection bill. They have an emergency room provision that the State of Delaware is passing, they don't have poststabilization care included in their provision. We do, under this bill. This bill requires ambulance coverage. Guess what. The State of Delaware did not include ambulance, for whatever reason. So we are going to tell the State of Delaware, a bureaucrat at HFCA is going to say: State of Delaware, you did not do it good enough. Your legislature is going to have to go back, pass a bill, have the Governor sign it, have some expansion to make sure that your ER provision is as good as the one we are getting ready to mandate.

I could go on and on. There is an OB/GYN patient protection that basically has unlimited access to OB/GYN and gynecologists. Great. Guess what. The protection we have given to beneficiaries, patients in the Federal Employees Health Benefits Plan, gives one visit. It is not nearly as aggressive.

As a matter of fact, that points out something that maybe a lot of people have missed about all these patient protections. I have heard countless times saying we are going to have the one-size-fits-all Federal Government supersed the States. States, you are substantially compliant with what we tell you to do or else we are going to take over.

I have had the pleasure of chairing the conference last year, where we negotiated patient protections. I negotiated with them my friend and colleague from Massachusetts and other Democrats. We came up with a basic agreement on most of the patient protections. But we never agreed whether or not they should supersed the patient protection laws that are in the States. I would never agree with that and I still will not agree with it.

For whatever reason, I fail to see, when you have 44 States, as the Senator from Maine has shown, that have ER protections in their States—I fail to see that we can write an emergency room provision that is so much better than every State, that we know best what should be in Maine or Oklahoma or the State of Washington or in Massachusetts, what should be in the ER provision just in Delaware.

I really do not like the idea of having a bureaucrat at HFCA determining whether or not those laws are substantially compliant and if that bureaucrat determines they are not substantially compliant, then they have to rewrite their law. There are legislators who were elected in the various States. The insurance commissioners work with these laws and the enforcement of the laws day in and day out. I doubt we have the infinite wisdom, when we are coming up with mandated provisions, to know we should superecede all those States.

I do not have a lot of patient protections in the States that do a much better job than what we have done on the Federal level. I don't doubt there are State protections that are not as aggressive and/or not as expensive as that with which we are getting ready to make them in substantial compliance.

Again, I urge my colleagues to support the Nelson-Collins amendment. I think it is an excellent amendment. It is one that has been well thought out. It is one that is supported by two of my friends and colleagues, Senator Collins and Senator Nelson worked as insurance commissioners in their States. They worked at those jobs for years. They know what they are talking about. They know the Federal Government cannot enforce it. They know the Federal Government should not regulate insurance within the States.

Unfortunately, that is what we are getting ready to do. So this is a most important amendment, and I urge my colleagues to use a little common sense. If we end up passing this amendment and, heaven forbid, should it become law, I will just make a little preposterous. Can a man or woman who happens to be serving overseas, or maybe in the United States, and they have something go wrong and they have poor care, can they sue the Federal Government? The answer is no.

Are they entitled to the protections that are being mandated on every private sector plan in America? The answer is no.

So there are some things that are really wrong. I think one of the things that is wrong is saying we are going to have the one-size-fits-all Federal Government supersed the States. States, you are substantially compliant with what we tell you to do or else we are going to take over.

I have the pleasure of chairing the conference last year, where we negotiated patient protections. I negotiated with them my friend and colleague from Massachusetts and other Democrats. We came up with a basic agreement on most of the patient protections. But we never agreed whether or not they should supersed the patient protection laws that are in the States. I would never agree with that and I still will not agree with it.

For whatever reason, I fail to see, when you have 44 States, as the Senator from Maine has shown, that have ER protections in their States—I fail to see that we can write an emergency room provision that is so much better than every State, that we know best what should be in Maine or Oklahoma or the State of Washington or in Massachusetts, what should be in the ER provision just in Delaware.

I really do not like the idea of having a bureaucrat at HFCA determining whether or not those laws are substantially compliant and if that bureaucrat determines they are not substantially compliant, then they have to rewrite their law. There are legislators who were elected in the various States. The insurance commissioners work with these laws and the enforcement of the laws day in and day out. I doubt we have the infinite wisdom, when we are coming up with mandated provisions, to know we should superecede all those States.

I do not have a lot of patient protections in the States that do a much better job than what we have done on the Federal level. I don't doubt there are State protections that are not as aggressive and/or not as expensive as that with which we are getting ready to make them in substantial compliance.

Again, I urge my colleagues to support the Nelson-Collins amendment. I
Federal enforcement. It still has HCFA making a determination whether or not you are substantially compliant, and that's by my colleagues.

I urge my colleagues to support the Collins-Nelson amendment. That would be a giant step, and one which I might mention that Governors around the Nation are going to wake up to. They have been asleep. But Governors around the Nation, Democrats and Republicans, who want to maintain State control and regulation over insurance are going to wake up to what we are doing one of these days and they are going to be coming up saying: What are you doing? Congress, you can't regulate insurance. You haven't been doing that. You don't know how to do it. What in the world do you think you are doing?

We are going to hear from them. I would venture to say that Democratic as well as Republican Governors are going to be outraged should this provision invade the scope, preempting the States to dealing to the extent that the Federal Government knows best when it comes to patient protection—and not even giving real credibility to what the States have already done; not giving them a grandfather. They have already enacted legislation dealing with those particular patient protections. The Collins-Nelson amendment grandfather States that have done patient protections. We should recognize what they are doing and give them credit for it—not try to supersede it with a Government-knows-best solution.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Madam President, I rise in support of the Collins-Nelson amendment. I thank them for their foresight and pointing out to this entire Body that Washington doesn't always know best. In this particular case, they are not only saying Washington does not always know best but Washington is incapable of doing the job that this bill gives them to do, even if Washington knew best.

This is a very important amendment. The people who are proposing this bill ought to look at the overburdened responsibilities that the Health Care Financing Administration already has and it is not able to do.

It is from that point that I want to speak about my support for the Collins-Nelson amendment.

I want to make very clear that, as most of my colleagues, I believe that any patient protection we pass must be meaningful and enforceable. But the provisions that the Collins-Nelson amendment deals with, and that they strike and change, are the provisions of the laws, a decade and a half ago. The States have already enacted legislation putting responsibilities on those particular patient protections. The Collins-Nelson amendment grandfather States that have done patient protections. We should recognize what they are doing and give them credit for it—not try to supersede it with a Government-knows-best solution.

The Washington bureaucrats who work there are not going to be able to take the action necessary to give patient protection any additional new responsibilities. In this particular task of enforcing broad new Federal patient protections is clearly inappropriate.

Our new Secretary and Administrator have walked into myriad backlog regulations that hinder already effective and effective work that the taxpayers expect to be done by this agency.

Just last week at a hearing we were having on agency reforms before the Senate Finance Committee that deals with this issue, we had Secretary Thompson and Administrator Scully pleading with us to keep new tasks away from the agency so that the catchup with these existing responsibilities can be done.

I quote Secretary Thompson on that very point. He used the new name, the Center for Medicare Services. He said:

The Center for Medicare Services right now is overloaded with HIPAA and with the privacy rules and regulations, with Medicare and Medicaid, and SCHIP, and so on.

Rather than listing all of the other responsibilities, he said:

I do not think we can really take on any more responsibilities.

That is the Secretary who has the responsibility of carrying out the laws that we already passed, along with the regulations that have to be written to enforce those laws. He would like to get those out of the way before he gets any additional new responsibilities.

I urge my colleagues to support the Collins-Nelson amendment. That would be a giant step, and one which I might mention that Governors around the Nation are going to wake up to. They have been asleep. But Governors around the Nation, Democrats and Republicans, who want to maintain State control and regulation over insurance are going to wake up to what we are doing one of these days and they are going to be coming up saying: What are you doing? Congress, you can't regulate insurance. You haven't been doing that. You don't know how to do it. What in the world do you think you are doing?

Washington is incapable of doing the job that this bill gives them to do, even if Washington knew best.
June 27, 2001

CONGRESSIONAL RECORD—SENATE 12051

I do not presume that Senator KENNEDY and Senator MCCAIN meant for this provision of their legislation to be meaningful in its enforcement. But, as a practical matter, if HCFA is already overloaded, and if they are already not writing the regulations for legislation that has been passed over the past 10 years, the ultimate result of passing this bill this way—putting this responsibility on the Health Care Financing Administration—is that it will not be enforced any more than the nursing home laws, which as I said were left unenforced for 8 years.

So I have come to the conclusion that the Collins-Nelson amendment is the right thing to do. Why fool the American people? Washington bureaucracies do not always know best. And we, as Congressmen, if we have not lost touch with the average American, and if we exercise a little common sense, we ought to be able to show to a majority of this body—and for a majority of this body to understand—that if HCFA cannot carry out the law, if they have not carried out a lot of mandates of the Congress of the United States in the past decade, why would you put more responsibilities on their back? If you want patient protection, then let it be done where it can be done, and that is in those States that have meaningful enforcement laws already for patient protection, because this amendment allows States to maintain the hard-fought patient protections they have put in place for their own citizens. And the amendment encourages States to develop even stronger protections.

So I urge my colleagues to support this approach, one that recognizes the vital role that States play in tailoring patient protections to best meet the needs of the respective citizen.

I thank the Chair.

The PRESIDING OFFICER (Mr. DAYTON). The Senator from Wyoming.

Mr. ENZI. Thank you, Mr. President.

I appreciate the other side allowing us this opportunity to state our case at the beginning because of some important considerations we have.

I particularly congratulate the Senator from Maine, SUSAN COLLINS, for her tremendous efforts on this entire Patients’ Bill of Rights. On any issue in which she gets involved, you will find that she studies it to a greater depth than anyone. She does additional research; she gets all of the help she can; she gets to the point where she understands what she is doing; and then she works with others to make it better. It does not happen a lot around here. But she is one dedicated Senator who is always willing to look at a better idea.

She has teamed up, in this particular instance, with Senator NELSON, a neighbor of mine, from Nebraska. One of the reasons this is an interesting team is that they have both been State insurance commissioners. They both understand the State side of this. They both understand what is in the bill. I would not want to imply that every- body does not, but these are two people who absolutely understand what is going on in the bill. They have teamed up and said there is a way that we can provide the protection that we can get the States involved, and that we can enlarge the scope. They put it together. I congratulate them for their tremendous efforts.

For 2 weeks, I have been saying that on 80 percent of this bill both sides agree. On eighty percent of it we agree. It is that other 20 percent where there are some philosophical differences.

I have seen—both in legislating that I did before I got to the Senate and since I have arrived—that one of the keys to passing legislation is to put a good title on the bill. That is something we agree on 100 percent: The Patients’ Bill of Rights is a great title. What you do with that can be an abuse of the title. One of the exceptions of this bill, there is an abuse of that title.

There are some substantial changes that need to be made. One of those is, who is going to administer it? There are two very different philosophies involved in the administration of this bill. One side says: Washington knows best. Bring it back to Washington. If the bureaucracy isn’t big enough now, we will make it big enough. And we will put enough in it that we will be able to solve it.

For anybody in America who has ever had to work with the Washington bureaucracy, picture the difference between Washington and your local and State government. When you call Washington, have you ever gotten to talk to the same person twice? That means that when you call in today with a problem that you have to explain, they do not take care of it—because they really do not have the involvement that they do if they know you—you have to call them back. Well, you would not know by tomorrow; you would not know by next week. You would be lucky to know by next month. But next month, when you are sure Washington has not solved your problem, you have to call again. And I guarantee you, you will talk to a different person who will say: What is your problem? And after you have gone through all of the explanation again, they will say: We will get back to you on it. And you are going to spend another month getting back to them on it.

Contrast that with State and local calls that you have had to make. You can almost always talk to the same person again, so the problem that you discussed yesterday they still remember today. And you do not have to wait a month for an answer because they are doing the job efficiently.

There are various ranges of bureaucracies and efficiencies in Washington, also. This bill has chosen to give the jurisdiction to that agency that is doing the poorest job. Don’t believe me? Don’t believe them? What I ask you to do is call your doctor and ask them what they think of HCFA. Call it HCFA; it is the Health Care Financing Administration. But they call it HCFA because that is a four-letter word in the eyes of those who decided that they know better and they want to handle your problem.

Find out how efficient HCFA is. I am certain under the new administration that it will be more effective, but it will take a long time recovering from the problems it has right now. Yes, we can throw more money at it. Is that where you want your tax money to go?

Right now, your States are paying for that. We are going to duplicate and supersede, without saving you a dime and in fact costing you more.

Does the Federal Government do a better job? One of the things I have been working on since I have been here is OSHA. OSHA allows two different processes. One is State plan States. That is where the States do the work. The other is the Federal plan. That is where the Federal Government takes care. I can tell you that the accidents are less in the State plan States for the reasons I mentioned before. A bureaucracy operating out of Washington, trying to handle the whole country as a one-size-fits-all problem can’t do the same job as the people at home in your State.

What are some of the things they have to handle? I will tell you, the new reason that HCFA is going to become a bigger cuss word is called HIPAA. This has to do with portability of insurance. The change in some of my phone calls this week has been calls from doctors and hospitals. They weren’t concerned about a Patients’ Bill of Rights yet. They were concerned about the HIPAA privacy rules. Ask your doctors and your hospitals what they think about that.

Privacy is important to all of us, but they have managed to muffle that one. The same agency that people are calling me and complaining about right now is related to where we are going to turn over, under the opposing amendment, all of the workload.

This week and last week you heard about a number of amendments. One of the things I am very proud of is that
all of those amendments were different solutions that needed to be done on this 20 percent of the bill where there is a competition. As recently as last year, this fact was reaffirmed by the General Accounting Office. GAO testified before the Health, Education, Labor, and Pensions Committee saying:

In brief, we found that many states have responded to managed care consumers' concerns about access to health care and information disclosure. However, they often differ in their specific approaches, in scope and in form.

Wyoming has its own unique set of health care needs and concerns. Every State does. For example, despite our elevation, we don't need the mandate regarding skin cancer that Florida has on the books. My favorite illustration of just how centralized a system of health care mandates would be comes from my own time in the Wyoming Legislature. It is about a mandate I voted for and still support today. Unlike Massachusetts or California, for example, in Wyoming we have few health care providers, and their numbers virtually dry up as you head out of town. We don't have a single city with competing hospitals. So we passed an "any willing provider" law that requires health plans to contract with any provider in Wyoming who is willing to do so.

While that may sound strange to my ears in any other context, it was the right thing for Wyoming to do. But I know it is not the right thing for Massachusetts. I wouldn't dream of asking them to shoulder the same kind of mandate for our sake when we can simply, responsibly apply it within our borders. That is what States have been doing with the 1,100 laws they have passed dealing with patients' bills of rights.

What is even more alarming to me is that Wyoming has opted not to enact health care laws that specifically relate to HMOs. But that is because there are ostensibly no HMOs in Wyoming. There is one which is very small. It is operated by a group of doctors who live in town, not a nameless, faceless insurance company. Yet the sponsors of the underlying bill insist they know what is best for everybody. So they want to require the State of Wyoming to enact and actively enforce—that is what the opposing amendment does, enact and actively enforce—what they say is the right thing for our State. They want to regulate under 15 new laws a style of health insurance that doesn't even exist in our State.

It requires States to forsake laws that they have already passed dealing with patient protections included in the bill, if they are not the same as the new Federal standard. The technical language in the bill reads "substantially equivalent" or some other variation of the application of," and under the process of certifying these facts with the Secretary of Health and Human Services, the State will have to prove that their laws are "substantially equivalent" and one other variation of words. There are a whole bunch of words that could be used there.

There could be a whole series of amendments to undermine the Collins amendment. This is one of them.

The proponents of this language—whichever version you care to look at, except for Collins—say that it won't undo existing State laws that are essentially comparable, but that isn't what their bill requires. Under either appeals process, too. This is the Breaux-Jeffords amendment—they are going to force States to change laws that they have already reviewed, that they believe already work in their States.

Is it that the proponents aren't overly concerned with the implementation of the law versus being able to say that their bill meets the political test of covering all Americans, regardless of existing, meaningful protections that State legislatures have enacted? If the laws just have to be comparable, why don't they use that phrase? I will get into this issue in more detail as the debate proceeds. I believe we can compromise. I don't think this is the compromise. I like the language of the Collins amendment. The only hard proof that we have right now is that States are, by and large, good regulators, while the Federal Government has done a lousy job. The General Accounting Office has been reporting to us that since we passed the Health Insurance Portability and Accountability Act in 1996. And that is the "consumer protection enforcement" mechanism around which the bill before us is written.

Wyoming currently requires that the plans provide information to patients about coverage, copays and so on, much as we would do in this bill; a ban on gag clauses between doctors and patients; and an internal appeals process to dispute denied claims. I am hopeful that the State will soon enact an external appeals process. The General Accounting Office has been reporting to us that since we passed the Health Insurance Portability and Accountability Act in 1996. And that is the "consumer protection enforcement" mechanism around which the bill before us is written.

As consumers, we should be down-right angry at how some of our elected officials are responding to our concerns about the quality of our health care and the alarming problem of the uninsured in this country.
out of the insurance market. I keep mentioning that insurance in this country is provided on a voluntary basis. We have had amendments that dealt with small businesses to see if they could get any kind of relief. Most of them are strained to the maximum. The smaller your business, the higher your potential risk, so the higher the rates you pay. Insurance is risk protection. We discriminate against the smaller businesses on rates because it is actuarially more difficult to calculate that.

Under this bill, we have had some opportunities to provide some relief to those small businessmen. It hasn’t happened. They have been ignored. I will be bringing an amendment that will deal with the large businesses, I am almost exclusively in a small business. Tomorrow, I will be bringing one that deals with the big self-insured, self-administered companies to see if there is going to be any hope of relief for those people who provide the best insurance in this country.

Mr. President, we will be committing two fouls against consumers if we do not adopt the Collins-Nelson amendment. The first would be to eliminate all meaningful patient protections that are not exactly like the Federal law. Second would be to put in enforcement responsibilities with the agency that has already said it can’t do the job. Add to that the third foul that the rest of the bill prices millions of people out of health insurance and we have done anything but hit a home run for patients.

I urge my colleagues to consider the valuable experience and wisdom of the amendment sponsors, as well as the urging of the National Council of State Legislatures. Think about the divergence of philosophy. Do you want your health care to be one size fits all in Washington, determined by HIPAA and HCFA, or do you still want your States to be involved? Do you want your States to have the control? Do you want your States to be able to continue the kind of service they have been providing through your State legislatures that can make decisions based on your State and your needs?

I yield the floor.

EXHIBIT 1
NATIONAL CONFERENCE OF STATE LEGISLATURES,
Hon. Susan Collins,
U.S. Senate,
Washington, DC.
Hon. Ben Nelson,
U.S. Senate,
Washington, DC.

Dear Senator Collins and Senator Nelson:

On behalf of the National Conference of State Legislatures, I would like to take this opportunity to commend you for authoring an amendment to S. 1052, the pending Patients’ Bill of Rights legislation. Your amendment and the important work states have done regarding the regulation of managed care entities and supports the continued role of states in the regulation of health insurance.

The amendment substantially addresses concerns we expressed in our recent letter to you and your colleagues. In that letter we encouraged you to seeking state patient and provider protection laws; and provide a transition period between the enactment of federal legislation and the effective date of the Act to provide such state an opportunity to preserve their authority to regulate managed care entities. This amendment also addresses our concern regarding the adequacy of the infrastructure to enforce the patient and provider protections established in the bill. Finally, it is important to emphasize that the proposed amendment recognizes that insurance markets differ among the states and a “one size fits all” approach may have adverse results among states and within regions of a state. This amendment permits a state to certify adverse impact and head off disruption in its insurance market.

NCSL supports this amendment. States are best situated to provide oversight and enforcement of the patient and provider protections established in the legislation. The record of the states shows that they are capable of doing the job. We are looking for an approach that supports the traditional role of states in the regulation of insurance and that recognizes the differences in state insurance markets and provides a mechanism for states to protect those markets.

NCSL supports passage of Patients’ Bill of Rights legislation that makes a promise that can be fulfilled. We believe state oversight and enforcement is an integral part of ensuring fulfillment of the promise and we look forward to continuing to work with you to develop legislation that will improve the quality of health care without adversely affecting access to care.

Sincerely,

Garrett Coleman,
Texas House of Representatives,
Chairman, NCSL Health Committee.

The PRESIDING OFFICER. The Senator from Maine is recognized.

Ms. COLLINS. Mr. President, I will be brief because I see the Senator from Massachusetts also desires to speak. First, I thank my colleague and friend from Wyoming for his extraordinarily generous comments and also for his excellent statement. As a former State senator, he has a great deal of experience in this area. As a businessman, he knows what it is to provide health insurance and to try to provide good benefits for his employees. I am grateful for his support.

Very briefly, I want to respond to a couple of comments that have been made tonight. The former chairman of the Finance Committee, Senator Grassley, talked about the burden on HCFA. I think this is very important because the McCain-Kennedy bill—and, unfortunately, the amendment offered by my friend from Louisiana continues this problem—that HCFA is somehow going to be able to step into the role of insurance regulator, which is something the States have performed well for more than 50 years.

Finally, I make the point that one should look—and I encourage the Senator from Louisiana to look—at the provisions of his State’s laws on consumer and patient protections. They are not identical to the standards in the McCain-Kennedy bill. For example, when you look at the Louisiana law dealing with emergency room access, we find that Louisiana has a law, but that it is crafted in a different way than the McCain-Kennedy bill. So now we have to decide, is it substantially compliant with the provisions of the bill, which would be the standard the Senate from Louisiana would have? It differs in some respects—on reimbursements, on how much is covered, on post stabilization care.

If the State of Louisiana drafted a law dealing with emergency room access, they would have to second-guess that law? Why should we substitute our judgment for the judgment of the good people of the State of Louisiana?
I remind my colleagues that the States have not fallen down on the job. There are more than 1,100 patient protections out there far beyond the confines of this bill.

Unfortunately, while the Breaux-Jeffords amendment is an improvement over the underlying bill, it is still fatally flawed. We may differ on details and they have been doing it in a bipartisan way.

And they have been attempting to do, as my colleagues have been trying to do, wrestle with it, but the President has really did not take a position against it, for the Frist-Breaux bill, basically supported the medical necessity provisions which are included in the McCain-Edwards legislation. They are virtually identical to those in the underlying bill, and the President indicated support of the medical necessity provisions. Those are enormously important.

We come to the third of the major issues, and that is scope. Who is going to be covered, and for what particular protections? The President again indicated in his principles for a bipartisan bill that it proposes to all Americans—Americans; that a Federal Patients’ Bill of Rights should ensure that every person—not just some people, not just a few people in some States, not just some who are covered for certain protections in a few States—but that all Americans, every person enrolled in a health plan, enjoy strong patient protections. Those are words that he used.

The Breaux amendment is consistent with that particular principle. It is not drafted exactly the way I would like to have it drafted. It does not go to the extent I would like to have gone to guarantee the strong protections which Americans deserve. But nonetheless, in a very important way, the Breaux amendment complies with this particular provision. It will ensure that all Americans are going to be covered and that they will have strong protections. The Breaux proposal ensures that protections for Americans will remain in the States. They will be the primary regulator under the Breaux proposal. That is the way it was drafted, and it is a preferable way to ensure not only what the President has stated, but what I think I have heard stated by my good friend, the Senator from Tennessee, our ranking member on the HELP Committee, and others.

As a matter of fact, every proposal that the House of Representatives considered in their debate last year—I believe there were four major proposals offered by Republicans—all of them included all Americans. That was not a debatable point. It is tonight, and tomorrow morning, we will have the opportunity to see where the Senate is going to stand.

I will make a few points, and if I am not correct, Senator Collins will correct me. If I am correct, and the amendment just prior to the time the Senator offered it, although clearly we were very much aware this amendment was coming and Senator Collins told us about that. I will make a statement and, if people are wrong, the Senator from Maine will correct me.

If her amendment is passed tomorrow, or whenever we pass the final legislation, there will be no guarantee of one new protection for most Americans. Do my colleagues understand what I am saying? If the Collins amendment succeeds and is passed, when it goes into law, there will not be one new protection for most people in this country. There will not be any protection for the children who need specialty care; there will not be any new protections guaranteed for women who need clinical trials; there will be no new protections in a wide range of provisions that are included in the underlying legislation. None, unless—unless—the States go about the business of applying and providing them.

Let me be very clear about it, with the passage of her amendment, there is not one new protection from an HMO making the medical decisions they have made in the past.

It seems to me that is why we are here because we have, for the last 5 years, been battling to make sure families in this country receive protections, whether they are in Massachusetts, Nevada, or Maine.

Let’s look at what the circumstances are of some of the States. First, there is an authorization for $500 million, a pool—new funds of $500 million. That is in the amendment. Where we are going to get the money for those funds is not in there. We have authorized funds on many other issues and they have not been appropriated. Welcome to the club. This relies on a $500 million appropriation.

When this is passed, there will still be 39 States that do not require any access to clinical trials. In the United States, you might work in Massachusetts today, and maybe you will be transferred to Nevada, and then transferred to another State after that. Let me make it clear to you and your family you had better make sure you are one of the 11 States that have clinical trials. Most of the States that have clinical trials are for cancer, but don’t include other life-threatening diseases.

When I came to the Senate, you worked at the shipyard, your father worked there, and your grandfather worked there. You graduated from high school and had a good life. Then in the workforce today may have nine different jobs over the course of their life, moving all over the country. We ought to get a dartboard to find out where the protections are in the various States for you and your family, moving from one company to another.

There are 39 States that do not require clinical trials. Zero States affirmatively require timely access to specialists. If we pass the Collins amendment, there will be a signing ceremony at the White House—hopefully and after the bill is in effect, someone will say: I thought when I had a child who had cancer and we went to
our HMO, we would get the guarantee of accessing a specialist. And now that is overridden. I thought we were going to get the protections we needed. I listened to the debate in Washington that said we could get special care.

No, no, no, that is not so, because they passed the Collins amendment. The Collins amendment says, only if the States provide it do they get access to specialists.

We have 20 States that do not ban financial incentives for providers to delay or deny care. What is happening in HMOs is, as we heard in the numerous committee hearings we have held, there are financial incentives and disincentives for doctors on the procedures they recommend in terms of treating patients. Do we do anything about that? No, no, we are not going to do anything about that care. 20 States, not if you live in one of those 20 States. They will have incentives and disincentives for the doctors.

Tell me what consumer knows about that. Ask any Member of the Senate, if they didn’t have a briefing card before them, whether their State does or does not ban financial incentives. They will not have to worry because we have good Federal employee health insurance. We will not have to worry. But I doubt whether any Member knows whether their State prohibits it or not.

There is nothing under the Collins amendment that will make sure states ban inappropriate financial incentives. Under the underlying bill, there is a prohibition on their use. No HMO ought to provide incentives or disincentives to doctors in terms of providing or recommending necessary treatment. Do what we have to learn from this? We have hearings, we find out, we see the affected families, and then move. Washington does not know best, in this case, ensuring we do not have inappropriate financial incentives? We ought to be able to agree on that. Is that a vast intrusion on States rights?

The bill goes on. We have seven States that have not adopted a prudent layperson standard for emergency care. If you live in one of those seven States and you think you are having a heart attack and go to the emergency room, you may end up without that care.

We have seen a number of States that are going to represent our fundamental policies of legislation. CHIP and HIPAA. When we passed the CHIP program we provided incentive and promise. That is not the issue. The issue is, we gave the States the certain criteria that had to be met, and if they met those criteria the Federal provisions did not apply.

Mr. President, 49 of 50 States have done that. I monitored that program closely in our HELP committee. Even when I was not chairman, we had meetings with the previous administration to find out what was happening with that program. I am familiar with it. We don’t have complaints from the States. We are not hearing from the States about the heavy hand of the Federal Government for establishing CHIP. They can say they were getting money for that. Fine; they were also ensuring that children would have the range of services that would meet needs—not the complete range of services I would like to see. We still don’t provide the compensation we can see in that that we ought to provide for children.

Dental work was left out, along with many other services that children need, but we find States conforming to the package that was developed.

The other reference was with regard to HIPAA. I have heard that speech from the Senator from Oklahoma now eight times. He gets better at it each time he talks about HIPAA and HCFA. I pointed out, when the GAO recommended $11 million so HCFA would be able to implement HIPAA, he was the one who led the fight against the $11 million, and he was successful. They put in $2 million. And he led the fight to strike out that $2 million so HCFA would not implement it because they wanted greater flexibility in the States so the insurance companies—that is my conclusion—would be less interfered with. I have had that argument and I will not spend time on it now.

The fact is, tonight there are only five States which are not in complete compliance with HIPAA. It has taken time. Many of the criteria placed upon the States are similar to what is in the Breaux proposal. Personally I would like to see a stronger provision. At the time we pass this bill, I would like to see all Americans have protections. We have taken those steps in the past on other issues.

We decided as a pattern of national policy we were going to pass Federal laws to outlaw child labor in this country. We didn’t say: You can go ahead and use children in the factories for 10 or 12 hours a day who you want to. We passed laws. Anyone can visit now in Lawrence and Lowell, go through the mill, look at the museums and read the poems and letters of 9- and 10-year-old children trapped in those factories for 10 or 12 hours a day who wrote as they looked outside and saw other children play. We went through that as a nation and passed federal laws to prohibit that.

We also said, we will pass a minimum wage law. We know there are many here who are upset. We passed laws in order to protect our environment because we recognize that environmental issues go through various States and the environmental issues know no borders. I make the same case with regard to medical care. They are asking not that way in the old days, but it is that way today.

We made the same judgment with regard to civil rights. You can say, well, these patient protections are not of the dimension of the last several civil rights. I think there is a lot you can say about that. But if you listen to the HMO victims whom many of us have heard, if you see the failure of the recommendations of doctors and nurses and medical professionals—the failure of their recommendations because of an HMO bureaucratic many miles away, and you see how lives have been destroyed and how families have been absolutely destroyed—we can see the answer there. Why should we not give that kind of protection to families in this country?

Americans, I think, are under a lot of pressures today. Working families are under a lot of pressure. They are not asking for something. They are asking for good jobs with a good future. They are asking for schools where their children can learn. They are asking for health insurance that is going to cover them. They want clean water, they want clean air, they want safety and security in their communities, they want to own their own home, they want a national security and defense that are going to protect our interests, and they want human rights policies abroad that are going to represent our fundamental values.

They are not asking for much. But one of the things we can do is protect them when they do get that health insurance. We will be back. We give the other side the assurance the bill will be back. All those speeches we have heard over these past days asking why are we doing this when we have so many people uninsured—we will be back with legislation on the uninsured. We hope for support from so many of those who have been speaking recently about how we ought to make sure people are going to be covered. We will be back to try to make sure we deal with those individuals.

But when you have an opportunity to relieve families of the anxiety so every time they go to a doctor they are going to get the best the doctor can prescribe and the best the nurse can give when your worst moments, that guarantees every family in America, you are going to ease their anxiety when they have a sick one.

Why are we going to play roulette? Let’s say you live in Massachusetts today, or Florida, or New Mexico tomorrow. You shouldn’t have to worry, which one is going to give strong patient protections?
Mr. KENNEDY. Mr. President, I thank the Senator for her correction. The figures are, of the 195 million Americans with private health insurance, the 56 million who are the self-insured would have coverage. This would leave out the 139 million who are not in self-insured plans, as I understand it. These include state and local public service employees. These include firemen. These would be the police officers. These would be the self-employed. There are 139 million who would not have a federal floor of protections. I have read through this, so I appreciate what the Senator has said.

Listen to this. Under this proposal, there is going to be some $500 million that is going to be out there. A State can make a proposal for a new program, and they can receive grants for the works forum.

They say the States can pass laws which are consistent with the purposes of the Federal standard. But they can keep the money and decline to enact a law because of the adverse impact of a law on premiums which would lead to a decline in coverage. So they could get the money to pass it. But, if there is a judgment that there might be a decline in coverage, they could, I guess, keep the money. They do not have to do anything further to enact a law if the managed-care market in the State is negligible. There is no additional responsibility for them to take action for additional protections. They still get money from their fund.

I make the point that during the course of this debate there have been a lot of different ways of trying to cut the protections. We heard in our Health, Education, Labor and Pensions Committee about the kinds of abuses that are taking place across the country. President Bush has recognized that. He indicated that he wanted every person covered. We want to have every person covered. We don’t want to carve out a third and say they will be covered, but we will leave out two-thirds who will not be covered with a great many of these protections.

I continue to believe in the power of this issue and its impact on families. Why are we going to draw a distinction between neighbors on the same street? One neighbor’s fire department or their family goes to a doctor, and the kind of medical advice their doctor gives to them for their child is overridden by an HMO, and they don’t have protections, but his neighbor is protected because his employer self-insures? What possible fairness is there in that? What is the possible justice in that?

We should be interested in protecting all families. The President understands that. Hopefully the Senate will understand that.

If it were left up to me, I would make sure that all of these protections were guaranteed. But we have the Breaux amendment which says: Wait. We are
going to say if States have taken action in these areas, there is going to be deference given to the State. There is going to be no control or supervision by the State in protecting these areas.

I would have liked to see it stronger. But what is very important is guaranteeing some floor of protections.

Finally, we are talking about common-sense protections. We are talking about access to the emergency room, specialty care, OB/GYN, and continuity of care. If a woman is pregnant, and the HMO and her employer end their relationship, at least she can see her obstetrician until after the baby is born.

We are talking about prescription drug formularies. If the doctor recommends a certain medically necessary drug and it is not included in the formulary, the patient can still get the needed drug. There is going to be a shared expense by the patient as well as the HMO. That has been worked out. We use the same cost sharing that is used in the various formularies.

Point of service: There is a closed panel, and a need for outside expertise. Clinical trials are so important. Every one of the protections that is guaranteed are in existence today either in Medicare and Medicaid, or they have been recommended by the insurance commissioners, or they were unanimously recommended under President Clinton’s panel, which was bipartisan and included distinguished representatives of all aspects of the health delivery system. Those are the only ones.

Finally, as we are hopefully coming fairly close to the end of this debate. We have the support of almost every health organization, every professional medical organization, every patients’ organization, every children’s organization, every women’s organization, every disability group, and every cancer organization for this kind of protection.

The reason is very simple. They are out there on the firing line day in and day out. They understand what is happening to families. These are trained men and women who have given their lives for the protection of good health care for families in this country. They have seen what is happening and how many times they are being overruled. They have stated that is what is necessary.

The scope and protections that Senator Breaux has included are what they strongly support. We will have a chance to say another word about this tomorrow.

Mr. EDWARDS. Mr. President, will the Senator yield for a question?

Mr. KENNEDY. I thank my friend from Maine.

I am glad to yield.

Mr. EDWARDS. Let me ask the Senator, as somebody who has been involved in this issue for so long, as the Senator knows, we have been working very closely with Senator Breaux on his amendment in an effort to make sure that all Americans are covered. One of the guiding principles of our efforts in this area is to make sure that families have protections provided in this legislation so that all families in this country can make their own health care decisions. We have worked with Senator Breaux very closely on his amendment to make sure there is a floor for every family in America.

Will the Senator comment on whether, under the amendment of the Senator from Maine, every family in America will in fact get the minimum protections as provided in our bill as opposed to the language we worked out with Senator Breaux?

Mr. KENNEDY. As the language is constructed, they will only provide the protections to these self-insured and not to everyone else who has received their health insurance through other means—the self-employed, those who are getting it through state and local employment, those working for employers who purchase health insurance plans. There are 130 million Americans who will not have those protections.

As I mentioned earlier, they will have to rely on protections from the States. There are States that do not require access to clinical trials. There are States that do not require timely access to appropriate, accessible specialists.

I mentioned earlier the ban on inappropriate financial incentives. Twenty States don’t ban plans from giving financial incentives and disincentives to doctors to delay or deny care. They won’t have those protections.

The point I mentioned earlier was that we are a society in movement. We find so many families are moving from State to State. Members of families are moving with jobs and going back and forth.

We have to ask ourselves ultimately and finally—as the Senator pointed out, this is a federal floor of protections—if you are in a State with clinical trials, why should you have to make sure they have a similar protection requiring access to the clinical trials which your wife might need, but you move to another State and find there is no access to clinical trials?

That is strictly because of the protections that you might have in a particular State. It makes absolutely no sense. We ought to have that basic federal floor. I know that Senator Breaux shares with me.

The way the Breaux amendment has been devised, it gives the maximum deference to the States if they provide protections in these areas. I mentioned just a half dozen different protections. We could have 20 again this evening. I will not take the time to do so, but they are illustrative of the protections. These are pretty common-sense protections.

The PRESIDING OFFICER (Mr. MILLER). The Senator from North Carolina, Mr. EDWARDS, Mr. President, the debate on the floor amendments is critical to the issue of whether all Americans—all families in this country—will have access to the protections provided for in this Bipartisan Patient Protection Act. That is the reason this vote tomorrow morning is critical to the vitality of this bill.

We have worked very closely with Senators on both sides of the aisle to ensure that two things are accomplished with respect to coverage: No. 1, that every American is covered by this legislation and, No. 2, we give deference to States that, through their own work, have established good systems for patient protection. We honor those State legislatures and that State legislation.

So that is the purpose of this amendment, the Breaux amendment. It strikes the right balance between making sure every American is covered—every family is covered—on the one hand and, secondly, giving deference to the States that have already done good work in this area.

We need to ensure that we do not take away the protections we are providing for all Americans by exempting a huge chunk of Americans, which, unfortunately, the Collins amendment would do.

The Breaux amendment, though, is one in a series of consensus agreements that have been reached on this legislation. Starting with the issue of scope, which the Breaux amendment addresses, we now have an agreement which I think a great majority of the Senate will be able to support and be comfortable with.

On the issue of the independence of the appeals, we have an amendment that will be supported. I believe, by virtually all of the Senate, establishing the principle that we believe the HMOs should not have direct control over who is on the independent appeal panel.

On the issue of exhaustion of remedies—exhaustion of the appeals process before a case can go to court—we are working very closely with the Senator from Tennessee to reach a bipartisan consensus on that issue. We have made great progress, and I am optimistic about it.

On the issue of employer liability, from the outset we had—the sponsors of the legislation, along with the Presiding Officer—as a principle that it was important that employers be protected, period. We have worked very hard with Senator SNOWE and Senator NELSON from Nebraska, and other Senators on both sides of the aisle, to ensure that is being done. Tomorrow morning we will offer an amendment on that issue.

We have worked our way through a series of hurdles, going from the issue
So I thank my colleagues for all their work on this issue.

I ask my colleagues to vote, tomorrow morning, against the Collins amendment and for the Breaux amendment, which is a bipartisan consensus that has been reached. And we will continue our work toward providing the American people the protection they need and they deserve.

Thank you, Mr. President. I yield the floor.

Mr. HELMS. Mr. President, I regret I was not present to cast my vote on the motion to table the amendment offered by the Senator from Arizona (Mr. KYL) and the Senator from Nebraska (Mr. NELSON). I wish the RECORD to reflect that had I been present, I would have voted "nay."

The PRESIDING OFFICER. The Senator from Nevada.

SUPPLEMENTAL APPROPRIATIONS

Mr. REID. Mr. President, Majority Leader DASCHLE was asked earlier today, on several occasions by Senator BYRD and Senator STEVENS, if he would bring to the floor a unanimous consent request that there be a time set on the supplemental appropriations bill that is now with the Appropriations Committee that would set a time certain for filing of amendments on this most important legislation.

Such a request has been cleared by Senator DASCHLE and the majority, but objection has been raised by the minority. So the request by Senators BYRD and STEVENS cannot be met tonight. Hopefully, this request will be cleared by the minority tomorrow so that there can be a time certain set for the amendments on this, as I said, most important piece of legislation, the supplemental appropriations bill.

I suggest the presence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that there be a period for morning business, with Senators permitted to speak for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFSHORE OIL

Mr. NELSON of Florida. Mr. President, I want to take a moment while the leadership of the Senate is, at this very moment, deciding which course the rest of the day will take with regard to this important legislation, the Patients' Bill of Rights. While we have a moment in which we might reflect on other items, I want to draw to the attention of the Senate the considerable concern of 16 million Floridians that the Bush administration is trying to drill for oil and gas off the shores of the State of Florida.

It is most instructive, if one looks at a map of the Gulf of Mexico, where colored in on the gulf waters are the active drilling leases, will see clearly that, from the central Gulf of Mexico all the way to the western Gulf of Mexico, almost all of the waters of the gulf are shaded in, indicating active oil and gas drilling leases. Indeed, there is a reason for that. It is because the reserves were there, the oil and gas deposits are there, the future reserves are expected to be there. As a matter of fact, I believe it is 80 percent of all economic recoverable oil reserves are on the Outer Continental Shelf—which not only includes the Gulf but also the Atlantic and Pacitic—80 percent of the Nation's known, recoverable gas reserves in the central and western Gulf and 60 percent of the future recoverable oil reserves are in that area too. They are no in the area off the State of Florida.

The State of Florida has consistently taken the position that we should not have oil and gas drilling because of the high cost and potential damage to our environment and to our economy. One of our primary industries is the tourism industry, which so often is dependent upon those pure, sugary white beaches being unspoiled by millions of visitors who come to Florida to enjoy the sunshine and the waters and the beaches can do so without having to worry about having oil spread across those beaches.

I can tell you that 16 million Floridians, in unison, do not want oil lapping up on our beaches. The cost to our environment and the cost to our economy would be simply too high.

Why, you would ask, other than that the oil and gas reserves are in the central and western Gulf, is there not any drilling off the coast of Florida? It goes back to the early 1980s, under the Reagan administration and a Secretory of the Interior, James Watt. He offered tracts for lease from as far north as Cape Hatteras, NC, in the Atlantic, south all the way as far as Fort Pierce, FL.

I had the privilege of being a Member of the House of Representatives at the time. So I went to work, knowing the people of my congressional district, in the early 1980s, didn't want oil lapping up onto their beaches. We were able to persuade the Appropriations subcommittee on the Department of the Interior appropriations bill to insert language that said no money appropriated under this act shall be used for...
offering for lease tracts such and such, and then listed the tracts all the way from North Carolina south to Fort Pierce, FL. And we prevailed in the appropriations.

The administration left Floridians alone on offshore oil drilling for a couple of years but came back under a new Secretary of the Interior and tried again. This time it was harder to stop. This time it escalated all the way to the full House Appropriations Committee. But we finally prevailed, interestingly, not on the threat to the economy or to the environment of Florida, and indeed the United States eastern coastline, but prevailed by getting NASA and the Defense Department to own up to the fact that you cannot have oil rigs down there in the footprint of where you are dropping solid rocket boosters into the space shuttle and where you are dropping first stages off the expendable booster rockets that are being launched out of the Cape Canaveral Air Force station. And we have not been bothered since the early 1980s, in Florida, about offshore oil drilling—until now.

The bush administration is pressing a 6-million-acre lease off the northwest coast of Florida in a strange configuration called lease-sale 181, of which the bulk of the 6 million acres is 100 miles offshore but a stovepipe runs northward to within about 20 miles of the Alabama coastline, which is about 20 miles, then, from the white sands of Perdido Key, State of Florida.

In a meeting of the Vice President with a Florida congressional members delegation, the Vice President suggested a compromise, which was to knock off that stovepipe coming off the bulk of the 6 million acres. That is no compromise. It is unacceptable because that is still oil drilling off the State of Florida where the future reserves are shown to be not as abundant. The tradeoff to 16 million Floridians is simply not worth what potentially could be discovered in oil and gas—the despoliation of our environment and the killing of our economy.

Thus, it was such welcome news when we learned last week that the other side of the Capitol, the House of Representatives, added to the Interior appropriations bill an amendment that would prohibit such drilling. The vehicle was the Interior appropriations bill. It prohibits it for only 6 months. It will be my intention, and certainly the intention of my wonderful colleague, the distinguished senior Senator from the State of Florida, Mr. Graham, that we in the future will offer amendments either to the Interior appropriations bill, to bring it in conformity with the House-passed bill, or more likely amendments that would cause a prohibition of lease-sale 181 as well as offering similar amendments to the authorizing bill that will come out of Chairman Bingaman’s committee.

I want our colleagues to be clear. This is an issue of enormous magnitude to 16 million Floridians. It happens to be of the same concern to New Jersey, the State of the Senator who sits as Presiding Officer, as well as all the States in New England which value so much the pristine waters and the waters particularly as you get on north of New Hampshire and Maine—to those waters that produce such delicacies as the Maine lobsters. This is a matter of grave concern to many of us.

It is time to draw the line in the sand—hopefully, not a line that will be washed over by oil on our beaches’ sands but, rather, a line that will indicate the unanimity of 16 million Floridians, joined by their sister States along the eastern seaboard, of opposition to offshore oil drilling.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator Kennedy in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred April 15, 1998 in Boise, Idaho. Mark Bangerter was brutally beaten because of his perceived sexual orientation. As a result of this attack, Mr. Bangerter was left with severe facial injuries and blindness in one eye.

I believe that government’s first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

HUNGER AND POVERTY IN AFRICA

Mr. LEVIN. Mr. President, it is my pleasure to join with Senators Leahy and HAGEL in submitting S. Con Res. 53, which encourages the development of strategies to reduce hunger and poverty in sub-Saharan Africa.

In the year 2000, almost 200 million Africans, fully a third of the total population, went to sleep hungry and 31 million African children under the age of five were malnourished. One child out of seven dies before the age of five, and one-half of these deaths are due to malnutrition. Nearly half of sub-Saharan Africa’s population, some 291 million people, live on less than $1 a day, and almost 85 percent of the world’s 41 heavily indebted poor countries are in sub-Saharan Africa.

These problems are compounded by epidemics of HIV/AIDS, tuberculosis, malaria, cholera, and other diseases now ravaging the continent. The human costs are staggering. Almost 4 million people are infected with AIDS every year, adding to the over 25 million already infected. Over 75 percent of the people worldwide who have died of AIDS lived in Africa. One million people each year, mostly children, die from malaria.

Hunger only adds to the spread of disease, rendering the poor and malnourished too weak to defend against AIDS and other infectious diseases. Even if treatment clinics are available, those suffering from hunger are unable to afford fees for care or medicine to aid them with their battle against the illness.

Despite funding shortfalls, the U.S. Agency for International Development, USAID, and other U.S. government agencies and organizations, non-governmental organizations, NGOs, and private sector companies are presently implementing many innovative programs directed toward alleviating hunger and poverty in Africa. These efforts are tremendously significant, but these actions are not enough to keep poverty and hunger from growing in many African countries. Many of our experts have concluded that the United States is not tapping into the full range of interest, ability, experience and capacity available to address this problem. The introduction of our Resolution, which addresses these issues, coincides with the conference of The Partnership to Cut Hunger in Africa, an independent effort formed by U.S. and African public and private sector institutions, international humanitarian organizations and higher educational institutions. Michigan State University continues to play a strong leadership role in this effort. The University, serving as co-chair of the Partnership, is one of the institutions that is using the University of Michigan, Michigan State University, the University of Pennsylvania, the University of Hawaii, and The World Bank, as one of the Partnership’s co-chairs and was instrumental in arranging conference-discussion activities in the Senate this week.

The goal of the Partnership is to formulate a vision, strategy, and action plan for renewed U.S. efforts to help African partners cut hunger dramatically by 2015. For three days this week, the Partnership’s 22 distinguished policy experts and practitioners from the U.S. and 8 African countries will share their views on hunger in Africa and will open a dialogue on the role the U.S. might play in diminishing hunger and poverty in Africa. On Thursday, June 28, 2001, Partnership experts will culminate their 3-day conference with a roundtable discussion on Capitol Hill, during which time they will share their findings and action plan to effectively combat hunger and poverty in Africa. I am honored to have the opportunity to join in hosting this event.

I ask unanimous consent that the members of the Partnership to Cut Hunger in Africa and the Partnership's
THE CHALLENGE OF BiotERRORISM

Mr. AKAKA. Mr. President, I rise to address the threat of bioterrorism to our Nation’s security.

President Bush has asked Vice President CHENEY to “oversee the development of a coordinated national effort so that we may do the very best possible job of protecting our people from catastrophic harm.” He also asked Joseph Lhota, Director of the Federal Emergency Management Agency, FEMA, to create an Office of National Preparedness to implement a national effort.

On May 9, 2001, Attorney General Ashcroft testified before a Senate Appropriations subcommittee that the Department of Justice is the lead agency and in sole command of an incident while in the crisis management phase, even if consequence management activities, such as casualty care and evacuation, are occurring at the same time. Clearly, FEMA and the Department of Justice need to work together to shoulder the burden of responding to a large scale event. What is unclear, however, is how the Department of Justice will know that its crisis management skills are needed during a bioterrorism event.

When will a growing cluster of disease be recognized as a terrorist attack? How do we differentiate between a few individuals with the flu and a flu-like epidemic perpetrated by terrorists? When will it be called a crisis? When will the FBI or Justice be called in to handle the newly declared “crisis”? In the case of a bioterrorist attack, the response will most likely be the same as if it was a naturally occurring epidemic. The key question is not “how to respond to an attack” but “are they prepared to respond to any unusual biological event?”

What would happen if a bioterrorist attack occurred today? It would not be preceded by a large explosion. Rather, over the course of a few days or a couple of weeks, people would start to get sick. They would go to hospitals, doctor’s offices, and clinics. Hopefully, a physician in one hospital would notice similarities between two or three cases and contact the local public health officials. Maybe another physician would do the same and maybe, finally, the Center for Disease Control would be notified. So, the first responders would not be a Federal agency.

Across the country, local law enforcement, fire, HAZ MAT and emergency medical personnel are doing a tremendous job preparing and training for terrorist attacks, and I commend their efforts. But, in the scenario I described, they would not be our first line of defense. Instead, the first responders for a biological event would be the physicians and nurses in our local hospitals and emergency rooms. We need to ensure that hospitals and medical professionals are prepared to deal with this threat. This is not the case today.

This past November, emergency medical specialists, health care providers, hospital administrators, and bioweapon experts met at the Second National Symposium on Medical and Public Health Response to BioTerrorism. A representative of the American Hospital Association, Dr. James Bentley, spoke about the challenges hospitals are confronting and stated that “we have driven over the past twenty years to reduce flexibility and safeguards.” Flexibility and safeguards are exactly what is needed by a hospital to go from “normal” to “surge” operations. Surge operations do not require the extreme scenario of thousands of casualties from a bioweapon. Dr. Thom Mayer, chair of the emergency department at Inova Fairfax Hospital, was quoted in the Washington Post, on April 22, 2001, stating that 20 or 30 extra patients can throw an emergency department into full crisis mode.

J.B. Oreinstein, an emergency room physician, in a recent Washington Post op-ed, wrote about the “State of Emergency” the dedicated men and women working in our hospitals and clinics are already facing with the added burden of bioterrorism. Until a year ago, hospitals dealt with surges for only a few days or a week a year during the winter flu, cold and icy sidewalk season. Now, mini-surges occur in the spring, summer and fall due to decreasing numbers of emergency rooms, beds available in any hospital, and qualified nurses. On May 9, 2001, the Society for Academic Emergency Medicine convened a special meeting in Atlanta to discuss “The Unprecedented Emergency: Are we prepared for a bioterrorism event?”

As Chairman of the Subcommittee on International Security, Proliferation and Federal Services, I am concerned that we are not addressing a fundamental problem. Would a biological event be a national security/law enforcement incident with public health concerns, or would it be a public health crisis with a law enforcement component? I hope that the effort led by Vice
President Cheney will address specifically this question and that the unique problems military weapons present are beyond any national plan to counter terrorism. I ask unanimously that the text of Dr. Orenstein’s article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

(From the Washington Post, April 22, 2001)

**STATE OF EMERGENCY**

(By J.B. Orenstein)

It’s a typical bad-day crowd in my ER: Here’s a wailing baby who developed a blue spell in front of her panicked mom. This 62-year-old gentleman came in with chest pain 36 hours ago; his worrisome EKG and equivocal lab tests should have put him inside for observation, but, because there’s no room in the ICU so he’s been waiting here for 24 hours. This lady, razor sharp at 89, suddenly started acting “not right,” so her granddaughter brought her in the Thompson room for three hours, but can’t get into treatment because chest-pain guy, blue baby and 18 other patients are packed in the treatment rooms we haven’t been able to admit.

Our communications nurse just told an approaching ambulance to find someplace else to take its potentially critical passenger because we had no place to put him. Not in the ER, not in an ICU, not even in a plain old bed in a ward. The official term for what’s happening here is “saturation,” but down in the pit this is known as a bottleneck.

And it’s happening too often, in more hospitals than ours. On May 9, the society for Academic Emergency Medicine will convene a special meeting in Atlanta on “The Unraveling Safety Net.” The meeting was called in December because panic buttons were being pushed in overcrowded ERs across the country—Boston, St. Louis, Chicago, New York. It was a medical version of the California power crisis, with our rolling blackouts coming in to simulate “divestiture.”

“Up until a year or two ago, we faced this nerve-racking logjam for only a few days or weeks in winter, when flu and cold viruses turn into more serious, even fatal pneumonias. Patients with chronic lung diseases fall prey to respiratory and intestinal viruses, depression fills the psych wards and slippery ice keeps the orthopedists busy. But now we’re seeing mini-surges in the spring, summer and fall as well.

When I started at Inova Fairfax Hospital in 1991, the ER treated 55,000 patients in the course of the year. Last year the number was 70,000. This is in keeping with the national picture. In 1988, there were 81 million visits to U.S. emergency rooms, according to the National Center for Health Statistics. The number for 1998: 104.1 million. Meanwhile, over the same decade, the number of emergency departments fell from about 5,200 to just over 4,500. The average annual visit volume rose from 15,500 to 21,800—that’s more than 50 percent.

In all of American medicine, the only place that has been able to keep up, and guarantees Americans the right to a physician, 24-7, is the emergency room. This is because of the 1986 “anti-dump- ing” law, the Emergency Medical Treatment and Labor Act, or EMTALA. Hospitals are forced by the Health Care Finance Administration and recently upheld by the U.S. Supreme Court, EMTALA is a civil right extended to all Americans regardless of their ability to pay. It is the safety net’s external support. Without it, the savings also come at a price: recent studies indicate that the majority of nursing personnel, finding other career options that are less physically demanding, are more emotionally rewarding and coming with a higher rate of pay. EMTALA does, however, also mean that the American Hospital Association, told a Senate subcommittee earlier this year. And men aren’t making up for the shortfall. And even experienced nurse, last did floor work more than 10 years ago, and though conditions were tough enough then, may recoil at what she would do if she went back now: More and sicker patients on an exponentially higher number of beds; less time getting to know the person who is the patient; and therefore less ability to catch early signs of deterioration; widespread use of “health techs”—people who take vital signs and dispense pills but have no training for more meaningful interaction.

No wonder students at nursing schools dread the first few years following graduation, because before they can get to the challenging, rewarding places to work, such as ERs or ICUs, they have to get experience on inpatient wards.

It’s crowding in those ICUs that puts the whole system under stress. A half-century ago, when medical sophistication was more limited, the ICU was the place to go for surgery patients. Now it’s the only place with roughly equal capacity—the only place we can perform the same level of care—is the ER. This ties up our nurses and blocks the bed from the next guy waiting to get in.

And chances are, that next guy is in pretty bad shape. Most people who come to the ER are in trouble: A heart attack, a stroke, a brain injury. It’s a rapid fire explosion in medical technology and therapies.

A heart attack—there’s something for everything: More and more medication and less invasive procedures. If a patient is going to die, it’s going to die on the operating table, not in the ER. Life-support at mega-hospitals like Inova Fairfax, our hospital, is now the stuff of science fiction.

And it most assuredly was, that would be back in the 1980s. Back then, the ER was the only place with roughly equal capacity—the only place we can perform the same level of care—is the ER. This ties up our nurses and blocks the bed from the next guy waiting to get in.

And chances are, that next guy is in pretty bad shape. Most people who come to the ER are in trouble: A heart attack, a stroke, a brain injury. It’s a rapid fire explosion in medical technology and therapies.

I hope they haven't been waiting till May to coming up with some solutions. If they have, the dire statistics of other ER docs and public health researchers. Maybe they've been through, after all. Net'' meeting in Atlanta in three weeks, intrinsic value of nursing is already luring a more nurses will come received, or are negotiating for, approval for today.''

They're right: I muddle through each shift worrying about patients trapped in the waiting room or ambulances that can't discharge their patients at the door. I must humbly apologize because I do not know the patients they sent in specifically for urgent treatment—pain control, antibiotics, whatever—cool their heels for hours on end. I go home exhausted and aggravated with whatever—Cool their heels for hours on end. I go home exhausted and aggravated with whatever—Cool their heels for hours on end.

And we're right. The system will somehow muddle through. As a nursing student, I've seen patients sent in specifically for urgent treatment—pain control, antibiotics, whatever. I've seen them cool their heels for hours on end. I've gone home exhausted and aggravated with whatever—Cool their heels for hours on end.

Doctors and nurses have a bottom line that determines patient care. When we can't provide care, the system fails. Our hospitals and administrators and department chiefs assume that excellent patient care is a non-negotiable standard. But every winter, and increasingly at other times, the crash of the system is quite catastrophic in these accumulated pressures. When forced to manage patients through an overwhelmed system, I must know if I'm doing a good job any more. As a result, I often find myself phoning the patient the next day, checking in: "Everything okay today?"

Many of the region's hospitals have received, or are negotiating for, approval for more beds. Where more nurses will come from is another problem. Anthony Disser, the chief executive nurse at Fairfax, says the intrinsic value of nursing is already luring a more nurses will come received, or are negotiating for, approval for today. He gained a decisive edge on his competition by embracing information technology earlier than anyone else in his business. He knew the numbers and metrics of his business better than anyone else in his business. He was a fine citizen, and a good friend who will be missed, but whose influence, I know, is "a widening ripple, down a long eternity." The world is a better place for his having lived. I ask that my letter be printed in the Record.

DEATH OF ROBERT MCKINNEY

Mr. BINGAMAN. Mr. President, earlier today I sent a letter to the oldest daily newspaper in the West, "The New Mexican" regarding the death of its publisher, Robert McKinney. Robert McKinney was well known to the Senate. His decades of service to this country, in one capacity or another, and his remarkable career in business and publishing brought him into contact with many of us, and with colleagues who have preceded us in this body. He and Clinton Anderson, later a Senator for New Mexico, were great friends, and worked together on the San Juan-Chama water project for our State.

Five presidents called on him for service from Harry Truman through Richard Nixon. He put his prodigious skills to work at various times at the Department of the Interior, the Atomic Energy Commission, and the Department of the Treasury. Under President Kennedy, he served as our Ambassador to Switzerland.

He was a fine citizen, and a good friend who will be missed, but whose influence, I know, is "a widening ripple, down a long eternity." The world is a better place for his having lived. I ask that my letter be printed in the Record.

The letter follows:

LETTER TO THE EDITOR OF "THE NEW MEXICAN"

To the Editor: With so many others, I was saddened earlier this week when word came of the death of Robert McKinney whose American life made him one of the world’s distinguished citizens. When he died in New York on Sunday night, this man of the American West had forged great successes in business, journalism, international diplomacy, public service and public policy in the course of his ninety years. He was a man of "life well lived" and much of it was lived in New Mexico where he was the deeply respected publisher of this newspaper.

He was a singular individual with a wide-ranging mind, vast talents, and varied interests. He brought his considerable energy to

ADDITIONAL STATEMENTS

TIMOTHY J. RHEIN

Mr. BREAUX. Mr. President, I rise today to pay tribute to Timothy J. Rhein, who recently retired after 34 years with American President Lines, Ltd. APL is today one of the world's largest shipping and intermodal lines, and a globally recognized brand, thanks in large part to Tim Rhein's leadership. I came to know Tim through his appearance before the Subcommittee on Merchant Marine, and I can personally attest to his commitment to merchant shipping and his leadership in the U.S. shipping industry. His rise to president and chief executive officer of APL from 1996 to 1999, and then to chairman, was marked by key decisions in a difficult business. He was instrumental in expanding APL from primarily an Asia-America business into a truly global operation. He gained a decisive edge on his competition by embracing information technology earlier than anyone else in his business. He knew the numbers and metrics of his business better than anyone else. He was rarely at a loss for an answer before our committee, and always worth listening to.

And he worked very hard at developing one particular line of business—the U.S. military—to the point where our government is today APL's largest customer. One of the reasons for that is his understanding of logistics, of managing supply lines, a critical skill to the military as well as to APL's multinational corporate customers.

But without doubt his toughest decision was to negotiate the sale of APL to a non-U.S. buyer, in order to protect all of APL's stakeholders and to preserve the APL presence and brand. APL was the oldest continuously operating shipping company in America, and a premier US-flag shipping company. He stuck his neck out on that one, put his reputation on the line, and negotiated the sale personally—and successfully.

Tim Rhein understood his business. He was a nimble and gutsy decision-maker, and we in Washington will miss his understanding and knowledge as we continue our pursuit of a policy to promote a strong U.S. flag maritime shipping presence. I hope he will continue to avail us of his knowledge and wise counsel.

Good luck in your retirement, Tim Rhein.
bear on issues from architecture to atomic energy, war to peace, land use to poetry. He was most certainly a force for good in this world. I was honored to have the benefit of his counsel and the gift his friendship. I will miss him.

JEFF BINGAMAN, United States Senator.

UNVEILING OF TIGER STADIUM COMMEMORATIVE STAMP

Mr. LEVIN. Mr. President, it is with great pride that I pay tribute to a special place in my hometown of Detroit that for the last century has inspired not only our city but our country. This year we are commemorating the tricentennial of the founding of a city that to Americans has long meant great automobiles. To Detroiters, it also means great sports teams and inspiring hero-athletes. Indeed, as Detroit enters its fourth century, our pride in our city is equaled by our pride in the house these heroes built—our storied Tiger Stadium.

Today at home plate, the people of Detroit will gather to unveil one of eleven new stamps commemorating Baseball’s Legendary Playing Fields. Of those eleven ballparks, only four still stand, and one is right in Detroit, where baseball was the pastime at The Corner of Michigan and Trumbull for more than a century.

The history of this stadium is in so many ways the history of our city. The spirit of hard work and determination that has always defined Detroit revealed itself early. When the Great Depression hit Detroit harder than most American cities, it was the 1935 World Champion Tigers—and the renowned “G-Men”: Charlie Gehringer, Goose Goslin, and Hank Greenberg—who renewed the hopes of an entire city. Detroit would forever after be the City of Champions, with four World Series titles to prove it.

When the riots and ruin of 1967 left deep scars of division across our city, it was the 1968 World Champion Tigers led by Al Kaline, Willie Horton, Bill Freehan, Denny McLain and Mickey Lolich who led one of the greatest comebacks in baseball history and who, in their unforgettable victory, united us to celebrate as one city.

It is no exaggeration to state that the heroes of Tiger Stadium also point us to a better America. By the time over the years, the name may have changed, the address for baseball in Detroit was the same the Corner of Michigan and Trumbull. It is still one of oldest ballparks in one of the oldest cities in America. In it we feel our hometown pride in a national landmark. Our city. Our ballpark. The new commemorative stamp to be unveiled today celebrates their common spirit, and it gives me great pride today to join the people of Detroit, in praise of both.

REMEMBERING KAREN KITZMILLER

Mr. LEAHY. Mr. President, I rise today to remember a very special Vermonter, and a good friend, Karen Kitzmiller. Karen, at the young age of 53, lost her long battle with breast cancer on May 20 of this year. In East Montpelier, her home town, on May 20 of this year, I joined hundreds of family, friends, colleagues, and admirers who gathered together to share their memories of Karen, and to honor her life.

For the past 11 years Karen Kitzmiller served as Montpelier’s Democratic State representative in the Vermont Legislature. Her legislative achievements were many, but most outstanding was her work on the House Health and Welfare Committee. Karen was a determined advocate and principal leader on behalf of the health and well-being of Vermonters. She fought to prevent tobacco companies from targeting children with advertisements designed to encourage youth smoking. To help patients appeal coverage denials by health maintenance organizations, Karen dedicated her efforts to the establishment of Vermont’s health care ombudsman. She devoted considerable energies to the expansion of health care coverage for the uninsured. This spring, after almost four years of effort, she witnessed the Governor sign legislation to ensure that uninsured patients who volunteer to participate in cancer treatment clinical trials are provided with health care coverage.

Karen was diagnosed with cancer more than four years ago, and yet through it all, she did not give up her work on behalf of Vermonters. She continued to serve in the Legislature, she continued her commitment to cancer survivor in efforts to promote awareness about the importance of support groups, and she helped to establish the annual Breast Cancer Conference in Burlington. These are just a few of the lasting contributions that will serve as a tribute to Karen’s life for years to come.

Karen leaves behind a loving family—her husband, Warren, and two daughters, Amy and Carrie. Amy is a student at the University of Virginia, studying public policy and women’s studies, and Carrie is a student at the University of Pennsylvania studying at the School of Arts and Sciences. I had the privilege
of sponsoring Amy as a Senate Page in 1996 and as an intern in my Montpelier office in the summer of 2000. They are both bright young women. I knew their mother was very proud of them both. Although their loss is great, the Kitzmillers can take some small comfort in knowing how special Karen was to so many people. Her strength, her courage, and her compassion served as inspiration to all those who were fortunate enough to come in contact with her. She will be missed by all.

TRIBUTE TO SHERRY YOUNG
• Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Sherry Burnett Young of Concord, NH, on being named as recipient of the Athena Award. The award is presented to an individual who has demonstrated excellence in her business or profession, served the community in a meaningful way and assisted women in reaching their full potential.

Sherry is founder and director of the Rath, Young and Pignatelli law firm of Concord, NH. She began her legal career with Orr and Reno, P.A., of Concord, as an estate and trust attorney. She involved in community service with several organizations including: Horizon Bank Board of Directors, New England Legal Foundation, Business and Industry Association of New Hampshire, and the New England Council. Some of her civic and charitable activities include: New Hampshire Historical Society Board of Trustees, Concord Hospital Board of Trustees, Greater Concord Chamber of Commerce and New Hampshire Chapter of the American Red Cross.

Sherry is affiliated with professional memberships at the American Bar Association and the New Hampshire Bar Association. She is the first woman selected to serve as State Capital Law Firm, a global association of independent law firms throughout the Americas, Europe, Asia and Africa. In 2000, she was named as one of the top environmental lawyers in New Hampshire by New Hampshire Magazine.

She is a graduate of Cornell University and Franklin Pierce School of Law and lives in Concord with her husband, Gary, and her three children: Garrett, Valerie and Alanna.

I commend Sherry for her dedicated service and contributions to the citizens of New Hampshire and am proud to call her a friend. Her exemplary performance and civic awareness have benefitted the lives of the people of our State. It is an honor and a privilege to represent her in the Senate.

TRIBUTE TO RON WELLIVER
• Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Ron Welliver of Nashua, NH, on being named as Police Officer of the Year by the Nashua Exchange Club.

Ron has been a dedicated member of the Nashua police force and his community for more than twenty years. An exemplary citizen, he has contributed to the civic needs of Nashua serving as a football coach at Fairgrounds Junior High School and baseball coach at Bishop Guertin High School in Nashua.

Ron is a team player at the Nashua Police Department who accepted his award by giving praise and recognition to his fellow police officers. During his career he has worked in nearly all areas of the Nashua Police Department including: detective, undercover narcotics and recruiter assignments.

Ron and his wife, Sue, reside in the Nashua area with their two daughters.

I commend Ron Welliver for his dedicated service to the people of Nashua and our entire State. He is a role model to the local community, and risks his own safety as a law enforcement officer to protect the citizens of Nashua. It is truly an honor and a privilege to represent him in the Senate.

TRIBUTE TO DR. GLENN DUBOIS
• Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Dr. Glenn DuBois for his service to the State of New Hampshire as Commissioner of the New Hampshire Community Technical College System.

Glenn has taught for more than ten years working with students of all ages and from diverse ethnic and racial backgrounds. He has served for many years in State college and university positions and was appointed by the Governor to the Workforce Opportunity Council and Governor’s Kid’s Cabinet.

He has served in many other capacities including: New Hampshire Governor’s Information Technology, New Hampshire Post Secondary Education Commission, Job’s for New Hampshire’s Graduates Program and the New Hampshire Police Standards and Training Council.

Glenn has been the recipient of many awards including: Distinguished Administrative Performance, President’s Recognition, Award, Distinguished Service Award by the State University of New York, the highest recognition given by that State, and most recently he currently was named as New Hampshire’s Leader for the 21st Century.

Glenn is a tribute to his community and his profession. His ability, dedication and determination to serve the students and citizens of our State is commendable. It is an honor and a privilege to represent him in the Senate.

TRIBUTE TO CHUCK CLEMENT
• Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Chuck Clement of Rochester, NH, on being named by the Rochester Chamber of Commerce as Business Leader of the Year 2001.

Chuck Clement is a third generation owner of Eastern Propane. Thanks to Chuck’s leadership and management skills, Eastern Propane is now the 23rd largest retailer in the Nation providing propane, oil, kerosene, diesel fuels, and service throughout New England.

Chuck has provided his customers with high quality service and has implemented several service programs to further enhance his business. Due to his commitment to the community of Rochester, he has moved his central office from Danvers, MA, to Rochester, NH, his new hometown.

He encourages his employees to give back to the community by donating their time and efforts to organizations including: Strafford County YMCA, Greater Rochester Chamber of Commerce and Greater Rochester Chamber of Commerce. Chuck was among the first supporters of the Rochester Public Library Fund and the Rochester Opera House Fund drives.

Chuck’s outstanding contribution and leadership in his business and community are commendable. His exemplary performance and civic awareness have benefitted the community of Rochester and our entire State. It is an honor and privilege to represent him in the Senate.

TRIBUTE TO LAURA MONICA
• Mr. SMITH of New Hampshire. Mr. President, I rise today to pay tribute to Laura Monica of Bow, NH, for being named by the Greater Manchester Chamber of Commerce as Small Business Person of the Year 2001.

Laura is president and founder of High Point Communications Group Inc. located in Bow, NH. Her firm is a strategic communications company that works with companies, non-profit organizations and government agencies throughout New England and the United States. High Point specializes in the areas of public relations, marketing, corporate communications, media relations and media training.

Laura is a contributor to the local community and is active in many civic organizations including: Greater Manchester Chamber of Commerce, Leadership New Hampshire, Greater Manchester American Red Cross, American Cancer Society New Hampshire Division, and Greater Manchester United Way.

She is active in professional organizations and is a member of the Public Relations Society of America and is a former member of the Bank Investor Relations Association and the National Investor Relations Institute.

Laura received her BA from the University of New Hampshire graduating magna cum laude and received her MPA from the University of New Hampshire graduating summa cum

CONGRESSIONAL RECORD—SENATE 12065

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON BLOCKING PROPERTY OF PERSONS WHO THREATEN INTERNATIONAL STABILIZATION EFFORTS IN THE WESTERN BALKANS—MESSAGE FROM THE PRESIDENT—PM 30

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs.

To the Congress of the United States:

Pursuant to section 204(b) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(b) (IEEPA), and section 301 of the National Emergencies Act, 50 U.S.C. 1631, I hereby report that I have exercised my statutory authority to declare a national emergency in response to the unusual and extraordinary threat posed to the national security and foreign policy of the United States by (i) actions of persons engaged in, or assisting, sponsoring, or supporting, extremist violence in the former Yugoslav Republic of Macedonia, southern Serbia, the Federal Republic of Yugoslavia (FRY), and elsewhere in the Western Balkans region, and (ii) the actions of persons engaged in, or assisting, sponsoring, or supporting acts obstructing implementation of the Dayton Accords in Bosnia or United Nations Security Council Resolution 1244 of June 10, 1999, in Kosovo. The actions of these individuals and groups threaten the peace in or diminish the security and stability of the Western Balkans, undermine the authority and objectives of the United Nations, the North Atlantic Treaty Organization (NATO), and other international organizations and entities present in those areas and the wider region, and endanger the safety of persons participating in or providing support to the activities of those organizations and entities, including United States military forces and Government officials. In order to deal with this threat, I have issued an Executive order blocking the property and interests in property of those persons determined to have undertaken the actions described above.

The Executive order prohibits United States persons from transferring, paying, extends jurisdiction over, or otherwise dealing in the property or interests in property of persons I have identified in the Annex to the order or persons designated pursuant to the order by the Secretary of the Treasury, in consultation with the Secretary of State. Included among the activities prohibited by the order are the making or receiving by United States persons of any contribution or provision of funds, goods, or services to or for the benefit of any person designated in or pursuant to the order. In the Executive order, I have also directed to take actions within the activities described above. Specifically, I have made a determination pursuant to section 203(b)(2) of IEEPA that the operation of the IEEPA exemption for certain humanitarian donations from the scope of the prohibitions would seriously impair my ability to deal with the national emergency. Absent such a determination, such donations of the type specified in section 203(b)(2) of IEEPA could strengthen the position of individuals and groups that endanger the safety of persons participating in or providing support to the United Nations, NATO, and other international organizations or entities, including U.S. military forces and Government officials, and the security and stability of the region. The Secretary of the Treasury, in consultation with the Secretary of State, is authorized to issue regulations in exercise of my authority under IEEPA to implement the prohibitions set forth in the Executive order. These regulations are also directed to take actions within their authority to carry out the provisions of the order, and, where appropriate, to advise the Secretary of the Treasury in a timely manner of the measures taken.

I am enclosing a copy of the Executive order I have issued. The order was effective at 12:01 a.m. eastern daylight time on June 27, 2001.

I have issued the order in response to recent developments in the former Yugoslav Republic of Macedonia, southern Serbia, and elsewhere in the Western Balkans region. I have turned increasingly to the use of extremist violence, the incitement of ethnic conflict, and other obstructionist acts to promote extremist or criminal agendas that have threatened the peace in and the stability and security of the region and placed those participating in or supporting international organizations, including U.S. military and government personnel, at risk.

In both Macedonia and southern Serbia, individuals and groups have engaged in extremist violence and other acts of obstructionism to exploit legitimate grievances of local ethnic Albanians. These groups include local nationalists who fought with the Kosovo Liberation Army in 1998–99 and have used their wartime connections to obtain funding and weapons from Kosovo and the ethnic Albanian diaspora. Guerrilla attacks by some of these groups against police and soldiers in Macedonia threaten to bring down the democratically elected, multi-ethnic government of a state that has become a close friend and invaluable partner of NATO. In March 2001, guerrillas operating on the border between Kosovo and Macedonia attempted to fire upon U.S. soldiers participating in the international security presence in Kosovo known as the Kosovo force (KFOR). Guerrilla leaders subsequently made public threats against KFOR.

In southern Serbia, ethnic Albanian extremists have used the Hardline Safety Zone (GSZ), originally intended as a buffer between KFOR and FRY/Government of Serbia (FRY/GoS) forces, as a safe haven for staging attacks against FRY/GoS police and soldiers. Members of extremist groups in southern Serbia have on several occasions fired on joint U.S.-Russian KFOR patrols in Kosovo. NATO has negotiated the return of FRY/GoS forces to the GSZ, and facilitated negotiations between Serb political leaders and ethnic Albanian insurgents and political leaders from southern Serbia. A small number of the extremist leaders have since threatened to seek vengence on KFOR, including U.S. KFOR.

Individuals and groups engaged in the activities described above have boasted falsely of having U.S. support, a claim that is believed by many in the region. They also have aggressively solicited funds from United States persons. These fund-raising efforts serve to fuel extremist violence and obstructionist activity in the region and are inimical to U.S. interests. Consequently, the Executive order I have issued is necessary to restrict any further financial or other support by United States persons for the persons designated in or pursuant to the order. The actions we are taking will demonstrate to all the peoples of the region and to the wider international community that the Government of the United States strongly opposes the recent extremist violence and obstructionist activity in Macedonia and

---

Kosovo. The actions of these individu-
southern Serbia and elsewhere in the Western Balkans. The concrete steps we are undertaking to block access by these groups and individuals to financial and material support will assist in restoring peace and stability in the Western Balkans region and help protect U.S. military forces and Government officials working towards that end.

GEORGE W. BUSH.

REPORT ON THE FEDERAL LABOR RELATIONS AUTHORITY FOR FISCAL YEAR 2000—MESSAGE FROM THE PRESIDENT—PM 31

The PRESIDING OFFICER laid before the Senate the following message from the Representatives of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs.

To the Congress of the United States:

In accordance with section 701 of the Civil Service Reform Act of 1978 (Public Law 95–454; 5 U.S.C. 7104(e)), I transmit herewith to you the Twenty-second Annual Report of the Federal Labor Relations Authority for Fiscal Year 2000.

GEORGE W. BUSH.

MESSAGES FROM THE HOUSE

At 3:05 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2299. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes; to the Committee on Appropriations.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 172. Concurrent resolution recognizing and honoring the Young Men's Christian Association on the occasion of its 150th anniversary in the United States; to the Committee on the Judiciary.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–2587. A communication from the Chief Financial Officer and Plan Administrator, First South Agricultural Credit Association, transmitting, pursuant to law, the annual pension plan report of the Fiscal Year 2000; to the Committee on Governmental Affairs.

EC–2588. A communication from the Assistant Attorney General, Office of Legislative Affairs, Department of Justice, transmitting, pursuant to law, the Report of the Attorney General for the period July 1 to December 31, 2000; to the Committee on Foreign Relations.

EC–2589. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Change of Official EPA Mailing Address; Additional Technical Amendments and Corrections” (FRL7672-2) received on June 25, 2001; to the Committee on Environment and Public Works.

EC–2590. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled “Oil Pollution Prevention and Response; Non-Transportation-Related Facilities” (FRL7672-3) received on June 25, 2001; to the Committee on Environment and Public Works.

EC–2591. A communication from the Council for Indian Affairs, Department of Housing and Urban Development, transmitting, pursuant to law, the report of a rule entitled “Section 8 Homeownership Program; Pilot Program for Homeownership Assistance for Disabled Families” (RIN23577-AC24) received on June 26, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2592. A communication from the Council for Regulations, Office of Public and Indian Housing, Department of Housing and Urban Development, transmitting, pursuant to law, the report of a rule entitled “Voluntary Conversion of Developments from Public Housing Stock; Required Initial Assessment” (RIN23577-AC02) received on June 25, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2593. A communication from the Acting Assistant General Counsel for Regulations, Special Education and Rehabilitative Services, Department of Education, transmitting, pursuant to law, the report of a rule entitled “NIDRR—Community-Based, Research Projects on Technology for Independence; Resource Centers for Community-Based Disability and Rehabilitation Research Projects on Technology and Assistive Technology Outcomes and Impacts and Assistive Technology Research Project for Individuals with Cognitive Disabilities” received on June 23, 2001; to the Committee on Health, Education, Labor, and Pensions.

EC–2594. A communication from the Acting Assistant General Counsel for Regulations, Office of the General Counsel, Office of Postsecondary Education, Department of Education, transmitting, pursuant to law, the report of a rule entitled “Federal Work-Study Programs; Federal Supplemental Educational Opportunity Grant Program, and Special Leveraging Educational Assistance Partnership Program” received on June 25, 2001; to the Committee on Health, Education, Labor, and Pensions.

EC–2595. A communication from the Railroad Retirement Board, transmitting, pursuant to law, the annual report on the financial status of the railroad unemployment insurance system for 2001; to the Committee on Health, Education, Labor, and Pensions.

EC–2596. A communication from the Director of the Policy Directives and Instructions Branch, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, the report of a rule entitled “Regulations Under the DNA Analysis Backlog Elimination Act of 2000” received on June 25, 2001; to the Committee on the Judiciary.

EC–2597. A communication from the Deputy Assistant Attorney General, Department of Justice, transmitting, pursuant to law, the annual report of the Office of Police Enforcement Education for calendar year 2000; to the Committee on the Judiciary.

EC–2598. A communication from the Deputy Assistant Attorney General, Office of Legislative Affairs, Department of Justice, transmitting, pursuant to law, the report of a rule entitled “Elimination Requirements After Denial of the Earned Income Credit” (RIN1545-AY6) received on June 22, 2001; to the Committee on Finance.

EC–2599. A communication from the Director of the Policy Directives and Instructions Branch, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, the report of a rule entitled “Removing Russia from the list of countries whose citizens or nationals are ineligible for transit without visa (TWO) privileges to the United States under the TOWV procedures” (RIN15–AG9) received on June 14, 2001; to the Committee on the Judiciary.

EC–2600. A communication from the Chief of the Regulations Unit, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled “Eligibility Requirements After Denial of the Earned Income Credit” (RIN1545-AY6) received on June 22, 2001; to the Committee on Finance.

EC–2601. A communication from the Chief of the Regulations Unit, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled “Removal of the Federal Reserve Banks as Federal Depositories” (RIN1545-AV16) received on June 25, 2001; to the Committee on Finance.

EC–2602. A communication from the Chief of the Regulations Unit, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled “Bureau of Labor Statistics Price Indexes for Department Stores—May 2001” (Rev. Rul. 2001–35) received on June 26, 2001; to the Committee on Finance.

EC–2603. A communication from the Chief of the Regulations Division, Bureau of Alcohol, Tobacco, and Firearms, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled “Recodification
of Regulations on Tobacco Products and Cigarette Papers and Tubes (RIN1512–AC41) received on June 26, 2001; to the Committee on Finance.

EC–2604. A communication from the Chief of the Regulations Division, Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled “Diamond Mountain District, Viticultural Area” (RIN1512–AA07) received on June 26, 2001; to the Committee on Finance.

REPORTS OF COMMITTEES
The following reports of committees were submitted:
By Mr. BYRD, from the Committee on Appropriations:

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS
The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. HARKIN (for himself, Mr. WELLSTONE, Mr. KENNEDY, Mr. SARBANES, Mr. AKAKA, Mr. BINGAMAN, Mr. DODD, Mrs. MURRAY, Mr. LEAHY, Ms. MIKULSKI, Mr. FEINGOLD, Mr. KERRY, Mr. LEVIN, Mr. BAUCUS, Mr. ROCKEFELLER, and Mrs. BOXER):
S. 1107. A bill to amend the National Labor Relations Act and the Railway Labor Act to prevent discrimination based on participa-

sion in labor disputes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. SPEYER:
S. 1112. A bill to provide Federal Perkins Loan cancellation for public defenders; to the Committee on Health, Education, Labor, and Pensions.

By Mr. SPEYER:
S. 1115. A bill to amend section 1562 of title 38, United States Code, to increase the amount of Medal of Honor Roll special pension, to provide for an annual adjustment in the amount of that special pension, and for other purposes; to the Committee on Veterans’ Affairs.

By Mr. SPEYER:
S. 1114. A bill to amend title 38, United States Code, to increase the amount of edu-
cational benefits for veterans under the Montgomery GI Bill; to the Committee on Veterans’ Affairs.

By Mr. KENNEDY (for himself, Mr. STEVENS, Mr. INOUYE, Mrs. HUTCHISON, and Mr. CORZINE):
S. 1115. A bill to amend the Public Health Service Act with respect to making progress toward the goal of eliminating tuberculosis, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. INOUYE (for himself, Mr. STEVENS, Mr. CORZINE, Mrs. HUTCHISON, and Mr. CORZINE):
S. 1116. A bill to amend the Foreign Assist-
ance Act of 1961 to provide increased foreign assistance for tuberculosis prevention, treat-

ment, and control; to the Committee on For-
egnign Relations.

By Mr. DURBIN:
S. 1117. A bill to establish the policy of the United States for reducing the number of nu-
clear warheads in the United States and Rus-

sian arsenals, for reducing the number of nu-
clear weapons of those two nations that are on high alert, and for expanding and accel-

erating programs to prevent diversion and proliferation of Russian nuclear weapons, fissile materials, and nuclear expertise; to the Committee on Foreign Relations.

ADDITIONAL COSPONSORS

At the request of Mr. ROCKEFELLER, the name of the Senator from Colorado (Mr. CAMPBELL) was added as a cospon-
sor of S. 88, a bill to amend the Internal Revenue Code of 1986 to provide an incentive to ensure that all Americans gain timely and equitable access to the Internet over current and future genera-
tions of broadband capability.

At the request of Mr. ALLARD, the name of the Senator from Wisconsin (Mr. FEINGOLD) was added as a cosponsor of S. 409, a bill to amend title 38, United States Code, to clarify the standards for compensation for Persian Gulf veterans suffering from certain undiagnosed illnesses, and for other purposes.

At the request of Mr. WELLSTONE, the name of the Senator from Nevada (Mr. REID) was added as a cosponsor of S. 460, a bill to provide for fairness and accuracy in high stakes educational decisions for students.

At the request of Mr. HAGEL, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 466, a bill to amend the Individuals with Disabilities Education Act to fully fund 40 percent of the average per pupil expenditure for programs under part B of such Act.

At the request of Mr. JEFFORDS, the name of the Senator from Delaware (Mr. CARPER) was added as a cosponsor of S. 556, a bill to amend the Clean Air Act to reduce emissions from electric powerplants, and for other purposes.

At the request of Mr. JOHNSON, his name was added as a cosponsor of S. 561, a bill to provide that the same health insurance premium conversion arrangements afforded to Federal em-
ployees be made available to Federal annuitants and members and retired members of the uniformed services.

At the request of Mr. BIDEN, the name of the Senator from Rhode Island (Mr. CHAFFEE) was added as a cosponsor of S. 570, a bill to establish a permanent Violence Against Women Office at the Department of Justice.

At the request of Mr. GRAHAM, the names of the Senator from Massachu-
setts (Mr. KERRY), the Senator from Michigan (Mr. LEVIN), and the Senator from Connecticut (Mr. DODD) were added as cosponsors of S. 592, a bill to amend titles XIX and XXI of the Social Security Act to provide States with the option to cover certain legal immi-
grants under the medicaid and State children’s health insurance program.

At the request of Mr. BREAUX, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 677, a bill to amend the Internal Revenue Code of 1986 to repeal the re-
quired use of certain principal repay-
ments on mortgage subsidy bond fi-
nancing to redeem bonds, to modify the purchase price limitation under mort-
gage subsidy bond rules based on me-
dian family income, and for other pur-
poses.

At the request of Mr. HATCH, the name of the Senator from Arkansas (Mr. HUTCHINSON) was added as a cosponsor of S. 677, supra.
At the request of Mr. Smith of New Hampshire, his name was added as a cosponsor of S. 677, supra.

At the request of Mr. McCain, the name of the Senator from Ohio (Mr. Voinovich) was added as a cosponsor of S. 718, a bill to direct the National Institute of Standards and Technology to establish a program to support research and training in methods of detecting the use of performance-enhancing drugs by athletes, and for other purposes.

At the request of Mr. Chaffee, the name of the Senator from Indiana (Mr. Bayh) was added as a cosponsor of S. 830, a bill to amend the Public Health Service Act to authorize the Director of the National Institute of Environmental Health Sciences to make grants for the development and operation of research centers regarding environmental factors that may be related to the etiology of breast cancer.

At the request of Mrs. Hutchison, the name of the Senator from Maryland (Mr. S. A. S. Sarbanes) was added as a cosponsor of S. 839, a bill to amend title XVIII of the Social Security Act to increase the amount of payment for inpatient hospital services under the Medicare program and to freeze the reduction in payments to hospitals for indirect costs of medical education.

At the request of Mr. Dayton, the name of the Senator from Michigan (Mr. Levin) was added as a cosponsor of S. 847, a bill to impose tariff-rate quotas on certain casein and milk protein concentrates.

At the request of Mr. Grassley, the name of the Senator from Florida (Mr. Graham) was added as a cosponsor of S. 860, a bill to amend the Internal Revenue Code of 1986 to provide for the treatment of certain expenses of rural letter carriers.

At the request of Mr. Reid, the name of the Senator from Arkansas (Mr. Hutchinson) was added as a cosponsor of S. 866, a bill to amend the Public Health Service Act to provide for a national media campaign to reduce and prevent underage drinking in the United States.

At the request of Mr. Enzi, the name of the Senator from Alaska (Mr. Stevens) was added as a cosponsor of S. 906, a bill to provide for protection of gun owner privacy and ownership rights, and for other purposes.

At the request of Mr. Breaux, the name of the Senator from Vermont (Mr. Leahy) was added as a cosponsor of S. 920, a bill to amend the Internal Revenue Code of 1986 to provide a credit against income tax to individuals who rehabilitate historic homes or who are the first purchasers of rehabilitated historic homes for use as a principal residence.

At the request of Mr. Harkin, the names of the Senator from Vermont (Mr. Leahy), the Senator from Kentucky (Mr. McConnelly), the Senator from Wisconsin (Mr. Feingold), the Senator from New Jersey (Mr. Torricelli), the Senator from Minnesota (Mr. Dayton), and the Senator from New Jersey (Mr. Corzine) were added as cosponsors of S. 926, a bill to prohibit the importation of any article that is produced, manufactured, or grown in Burma.

At the request of Mrs. Clinton, the name of the Senator from Delaware (Mr. Biden) was added as a cosponsor of S. Res. 117, a resolution honoring John J. Downing, Brian Fahey, and Harry Ford, who lost their lives in the course of duty as firefighters.

At the request of Mr. Harkin, the names of the Senator from New Jersey (Mr. Corzine), the Senator from Illinois (Mr. Durbin), and the Senator from Florida (Mr. Nelson) were added as cosponsors of S. Con. Res. 9, a concurrent resolution condemning the violence in East Timor and urging the establishment of an international war crimes tribunal for prosecuting crimes against humanity that occurred during that conflict.

At the request of Mr. Campbell, the name of the Senator from Pennsylvania (Mr. Santorum) was added as a cosponsor of S. Con. Res. 34, a concurrent resolution congratulating the Baltic nations of Estonia, Latvia, and Lithuania on the tenth anniversary of the reestablishment of their full independence.

At the request of Mr. Hagel, the names of the Senator from Wisconsin (Mr. Kohl), the Senator from Maryland (Ms. Mikulski), and the Senator from New Jersey (Mr. Corzine) were added as cosponsors of S. Con. Res. 53, concurrent resolution encouraging the development of strategies to reduce hunger and poverty, and to promote free market economies and democratic institutions, in sub-Saharan Africa.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. Harkin (for himself Mr. Wellstone, Mr. Kennedy, Mr. Sarbanes, Mr. Akaka, Mr. Bingaman, Mr. Dodd, Mrs. Murray, Mr. Leahy, Ms. Mikulski, Mr. Feingold, Mr. Kerry, Mr. Levin, Mr. Baucus, Mr. Rockefeller and Mrs. Boxer).

S. 1107. A bill to amend the National Labor Relations Act and the Railway Labor Act to prohibit discrimination based on participation in labor disputes; to the Committee on Health, Education, Labor, and Pensions.

Mr. Harkin. Mr. President, I, along with 15 of my colleagues are introducing a bill today that addresses an issue we haven’t talked enough about in the Senate in recent years—but it’s a critically important issue that we cannot continue to ignore.

I’m talking about workers’ rights—specifically the erosion of a worker’s fundamental right to strike, to protect that right.

Today, we are introducing the Workplace Fairness Act. This may sound familiar to many of my colleagues here in the Senate. It was a bill my good friend and former colleague Senator Howard Metzenbaum from Ohio introduced in the 102nd and 103rd Congress.

The Workplace Fairness Act would amend the National Labor Relations Act and the Railway Labor Act by prohibiting employers from hiring permanent replacement workers during a strike. It would also make it an unfair labor practice for an employer to refuse to allow a striking worker who has made an unconditional offer to return to go back to work.

Why do we need this legislation?

Because right now, a right to strike is a right that is too often permanently replaced—to lose your job. Every cut-rate, cutthroat employer knows they can break a union if they are willing to play hardball and ruin the lives of the people who have made their company what it is. In my own state of Iowa—Titan Tire Company out of Des Moines, is trying to drive out the union workers with permanent replacements—the union has been on strike for three years now.

Over the past two decades, workers’ right to strike has too often been undermined by the destructive practice of hiring permanent replacement workers. Since the 1980s, permanent replacements have been used again and again to break unions and to shift the balance between workers and management.

Titan Tire just outside is just one of many examples.

On May 1, 1998, the 650 members of the United Steelworkers of America, Local 161, who work in Des Moines Titan Tire plant, were forced into an Unfair Labor Practice Strike.

During the contract negotiations preceding this strike, Titan International Inc., President and CEO, Morry Taylor, attempted to eliminate post-retirement medical benefits and illegally move jobs and equipment out of the plant. He also forced employees to work excessive mandatory overtime, sometimes working people as many as 26 days in a row without a day off.

Well, the membership decided that Titan’s final offer was impossible to accept, and they voted to strike. Two
months later, in July, 1998, Titan began hiring permanent replacement workers.

During the past three years, approximately 500 permanent replacement workers have been hired at the Des Moines plant. And little or no progress has been made toward reaching a fair settlement. In fact on April 30, 2000, the day before the second anniversary of the Titan strike, Morrie Taylor predicted that the strike would never be settled.

Workers deserve better than this. Workers aren’t disposable assets that can be thrown away when labor disputes arise.

When we considered this legislation in 1994, the Senate labor and Human Resources Committee heard poignant testimony about the emotional and financial hardships caused by hiring permanent replacement workers. We heard about workers losing their homes; going without health insurance because of the high costs of COBRA coverage; feeling useless when they were permanently replaced after years of loyal service.

The right to strike—which we all know is a last resort since no worker takes the financial risk of a strike lightly—is fundamental to preserving workers’ rights to bargain for better wages and better working conditions. Without the right to strike, workers forfeit their fair share of bargaining power.

Permanent striker replacement not only affects the workers who were replaced. It affects other workers in competing companies. When one employer in an industry breaks a union, hires permanent replacements, and cuts salaries and benefits, it affects all the other companies in the industry. Now they have a chance to compete with the low-wages and shoddy benefits of a cut-rate, cut-throat business—or they have to follow suit.

Also, workers faced with being replaced are forced to make a choice. They can either stay with the union and fight for their jobs, or they can cross the picket line to avoid losing the jobs they’ve held for ten or twenty or thirty years.

Is this a free choice, as some of our colleagues would suggest? Or is this blackmail that takes away the rights and the dignity of the workers of this country? What does it mean to tell workers, “you have the right to strike”—when we allow them to be summarily fired for exercising that right?

In reality, there is no legal right to strike today. And because there is no legal right to strike, there is no legal right to bargain collectively. And since there is no legal right to bargain collectively, there is no level playing field between workers and management.

In other words, Management gets to say that you must bargain on their terms—or find some other place to work. If you’re permanently replaced, that means you’re out of work; you lose all your pension rights; you lose your seniority; you lose your job forever.

How did this happen? We’ve got to go back to the 1930’s for the answer.

In response to widespread worker abuses—and union busting—Congress passed the National Labor Relations Act—the Wagner Act—in 1935 and it was signed into law by President Roosevelt. The Wagner Act guarantees workers the right to organize and bargain collectively and strike if necessary. It makes it illegal for companies to interfere with these rights. In fact, it specifies the right to strike and states: ‘Nothing in this act—except as specifically provided herein—shall be construed so as to interfere with or impede or diminish in any way the right to strike.’

In 1938, the Supreme Court dealt the Wagner Act a mortal blow in the case National Labor Relations Board (NLRB) versus Mackay Radio and Telegraph Co. In that case, the Court said that Mackay Radio could hire permanent replacement workers for those engaged in an economic strike.

There are two types of strikes: economic and unfair labor practices. Employers must rehire employees in unfair labor practice strikes. The NLRB determines if the strike is economic or based on unfair labor practices. Unions cannot know in advance whether NLRB will rule that their employer has engaged in unfair labor practices. So any employee participating in a strike runs a risk of permanently losing his or her job.

What’s interesting is that following the Court’s ruling, companies did not take advantage of this loophole until the 1980s. Before then, they recognized that doing so would upset the level playing field. For almost 40 years, management rarely hired permanent replacements.

That began to change in the 1980s. Since then, hiring permanent replacements has become a routine practice to break unions and shift the balance between workers and management.

Again, the Workplace Fairness Act would restore the fundamental principle of fair labor-management relations—the right of workers to strike without having to fear losing their jobs.

Permanent striker replacement keeps us from moving forward as a nation into an era of high-wage, high-skilled, highly productive jobs in the global marketplace. Without the right to strike, workers’ rights will continue to erode. The result will be fewer incentives and less motivation to produce good work, and companies will also suffer with less quality in their products.

Obviously, this legislation won’t be adopted this year. But we are introducing it today to signal my intent on raising it and other fundamental labor law reforms in the next session of Congress. It’s time for us to level the playing field for hard-working Americans.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1197

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. PREVENTION OF DISCRIMINATION DURING AND AT THE CONCLUSION OF LABOR DISPUTES.

Section 8(a) of the National Labor Relations Act (29 U.S.C. 158(a)) is amended—

(1) by striking the period at the end of paragraph (5) and inserting ”; or”; and

(2) by adding at the end thereof the following new paragraph:

“(6)(i) to offer, or to grant, the status of a permanent replacement employee to an individual for performing bargaining unit work for the employer during a labor dispute; or

“(ii) to otherwise offer, or grant, an individual any employment preference based on the fact that such individual was employed, or indicated a willingness to be employed, during a labor dispute over an individual who—

“(A) was an employee of the employer at the commencement of the dispute;

“(B) has exercised the right to join, to assist, or to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection through the labor organization involved in the dispute; and

“(C) is working for, or has unconditionally offered to return to work for, the employer.”.

SEC. 2. PREVENTION OF DISCRIMINATION DURING AND AT THE CONCLUSION OF RAILWAY LABOR DISPUTES.

Paragraph Fourth of section 2 of the Railway Labor Act (45 U.S.C. 152) is amended—

(1) by inserting ”(a)” after “Fourth.”; and

(2) by adding at the end thereof the following:

“(b) No carrier, or officer or agent of the carrier, shall—

“(1) offer, or grant, the status of a permanent replacement employee to an individual for performing work in a craft or class for the carrier during a dispute involving the craft or class; or

“(2) otherwise offer, or grant, an individual any employment preference based on the fact that such individual was employed, or indicated a willingness to be employed, during a dispute over an individual who—

“(A) was an employee of the carrier at the commencement of the dispute;

“(B) has exercised the right to join, to organize, to assist in organizing, or to bargain collectively through the labor organization involved in the dispute; and

“(C) is working for, or has unconditionally offered to return to work for, the carrier.”.

Mr. WELSTONE. Mr. President, I am pleased to join my good friend Senator HARKIN as an original cosponsor of the Workplace Fairness Act of 2001. This measure, along with the “Right to Organize Act of 2001,” which I introduced yesterday, are two of the most important pieces of legislation that will come before the Senate this year.
Together, these measures strengthen workers' rights to organize, to join a union, and to advocate for fair collective bargaining and fair agreements. Together, these measures produce the basic platform for healthy economies, healthy communities, and healthy families.

Specifically, the Striker Replacement Act is designed to combat an unfair labor practice which strikes at the very heart of the collective bargaining process in this country: the permanent replacement of striking workers. The goal of this Act is to restore the labor-management balance in today's workplace by preventing the fundamental right to strike from being transformed into a right to be fired.

The record shows that permanent replacement of striking workers has been used with increasing frequency to undermine sector employers, emboldened by the Reagan Administration's permanent replacement of striking Federal employees in the early 1980s, began to use the permanent replacement of striking workers as a means of bypassing collective bargaining agreements and bringing in new hires often screened for their anti-union biases.

The process is fairly simple: require major and unreasonable concessions of a union; force them to strike; permanently replace them with workers unsympathetic to the union; and move to decertify the union. This should be called what it is: outright union busting. And it should not be tolerated.

The purpose of the Railway Labor Act and the National Labor Relations Act was to respond to the persistent—and sometimes violent—denial by certain employers of the right to organize and bargain collectively. The resulting strikes and waves of growing unrest in the 1930's were held by the courts to have severely burdened free and open commerce across the country. As a result, the Railway Labor Act and the National Labor Relations Act were passed, guided by two fundamental principles: 1. Employees have a right to pursue their interests collectively without fear of employer reprisals; and 2. Questions about representation must be separated from substantive issues in dispute. Government-supervised procedure should be established to ensure fair representation; while collective bargaining should be the forum for settling the remaining substantive disputes.

This system and these principles are sound. Workers have a right to organize without being retaliated against for exercising that right. And they have a right to negotiate wages, benefits, and other items through collective bargaining. But these principles only work if the right to strike, in the words of the National Labor Relations Act, is not "interfered with or impeded or diminished in any way." In 1938, the Supreme Court in the Mackay Radio case cut a huge swath through these guiding principles by creating the striker replacement doctrine. Under this doctrine, affirmed in subsequent decisions, such as Belknap v. Hale (1983) and TWA v. IPFA (1989), even though it is unlawful to fire a striking worker, it is not unlawful to permanently replace him or her.

The distinction between firing and permanent replacement, is ludicrous—and it is untenable. The central practical reality—as any man or woman who has exercised his or her right to strike and has paid the consequences can tell you—in either case, whether it is called a firing or a permanent replacement—the employee loses their job because he or she has exercised the right to strike. That's the reality. That's the harsh reality.

The measure we are introducing today is a simple one. It does two things: 1. It amends the National Labor Relations Act and the Railway Labor Act to prohibit employers from hiring permanent replacement workers during a strike, or giving employment preference to cross over employees, and 2. It makes it an unfair labor practice for an employer to refuse to allow a striking worker to return to work if that worker has unconditionally offered to return to work. It's that simple. These are fundamental protections. These are protections that are part of the basic compact with the American worker created by the National Labor Relations Act and the Railway Labor Act. It is long past time that workers seeking to better their lives, their families, and their communities are given access to a collective bargaining process that is fair and even-handed. It is long past time that workers be allowed to advocate for reasonable terms and conditions of their employment without fear of devastating retribution.

Finally, this measure not only meets the needs of workers, their families, and their communities. It also serves the interest of our nation in a global economy. As others have pointed out, if we are to remain strong and competitive as a nation, we must develop a highly motivated and skilled workforce and we must create stable worker-employer relations based on mutual respect and a mutual commitment to a joint economic enterprise. This will only happen if we level the playing field and support a just, sound, and effective collective bargaining process.

This measure, the Workplace Fairness Act, is one key to achieving these goals. I urge my colleagues to join me in supporting this legislation.

By Ms. SNOWE (for herself and Ms. COLLINS):
S. 1108. A bill to authorize the transfer and conveyance of real property at the Naval Security Group Activity, Winter Harbor, Maine, and for other purposes; to the Committee on Armed Services.

Ms. SNOWE. Mr. President. I rise today with my colleague from Maine to introduce legislation facilitating the land conveyance at Winter Harbor; ME. First, may I note that this bill is the product of countless hours of hard work and deliberation by the communities it affects—Winter Harbor and Gouldsboro—the State of Maine, and the Maine Delegation. I would like to thank those involved: Chairmen Stan Torrey and Tom Mayor and members of the Gouldsboro and Winter Harbor Base Reuse Committees; Jean Marshall, the Defense Conversion Coordinator for Eastern Maine Development; Linda Pagels and Roger Barto, Town Managers for Winter Harbor and Gouldsboro; and Commander Edwin Williamson, Commanding Officer of Naval Security Group Activity Winter Harbor, for their efforts in crafting legislation that all concerned can support.

Maine and the Navy have always had a special relationship, and that relationship extended to Winter Harbor. The Navy arrived in Winter Harbor in 1919 to establish a radio station for transatlantic communications developed into a complex network of sophisticated equipment that became Winter Harbor Naval Security Group Activity. Throughout the two World Wars and subsequent Cold War, the men and women stationed at Winter Harbor provided invaluable services in our Nation's defense.

Maine and the Navy have always had a special relationship, and that relationship extended to Winter Harbor. The Navy arrived in Winter Harbor in 1919 to establish a radio station for transatlantic communications developed into a complex network of sophisticated equipment that became Winter Harbor Naval Security Group Activity. Throughout the two World Wars and subsequent Cold War, the men and women stationed at Winter Harbor provided invaluable services in our Nation's defense.

Unfortunately, the advent of new technology has made the equipment and mission of Winter Harbor obsolete. With the announcement that the Winter Harbor Naval Activity would close in June 2002, the communities began the laborious process of planning for life without the good neighbors of Winter Harbor NNGA.

With this base closing, Maine will lose an economic base it has depended on for over 80 years. At its high point, Winter Harbor had approximately 250 sailors, 140 civilian employees, and thousands of family members in residence and the base became an economic focal point for the region with an estimated $11 to $15 million being contributed to the local economy on an annual basis.
SECTION 1. LAND TRANSFER AND CONVEYANCE, Gouldsboro to make the most of this people of Winter Harbor and port this initiative and allow the good for their assistance in crafting this leg-

SEC. 3. FINANCIAL ASSISTANCE.
(a) GRANT ASSISTANCE FOR TOWN OF WINTER
HARBOR.—(1) The Secretary of the Navy shall, by grant, provide financial assistance to the Town of Winter Harbor, Maine, to be appropriate to reimburse the Town for costs incurred in making improvements to the water and sewer systems of the Town for the benefit of the Naval Security Group Ac-
activity, Winter Harbor, Maine, located in Hancock County, Maine.
(2) The amount of the grant under para-
(1) in fiscal year 2002 shall be $68,000.
(3) The amount of the grant under para-
(1) in each of fiscal years 2003 and 2004 shall be the amount, not to exceed $68,000, jointly determined by the Secretary and the Town to be applied to reimburse the Town as described in that paragraph in the applicable fiscal year.
(b) GRANT ASSISTANCE FOR SCHOOL ADMIN-
istrative District.—The Secretary shall, by grant, provide financial assistance to the School Administrative District (SAD) operating Sumner High School, Sullivan, Maine, for the purpose of offsetting the loss of impact aid under title VIII of the Ele-
mentary and Secondary Education Act of
SEC. 3. AUTHORIZATIONS OF APPROPRIATIONS.

(a) TRANSFERS OF FUNDS TO DEPARTMENT OF INTERIOR.—There is hereby authorized to be appropriated for the Department of the Interior, $6,400,000 for purposes of the transfers of funds required by section 2.

(b) GRANTS.—There is hereby authorized to be appropriated the following amounts for grants to the Department of the Interior for fiscal years 2000 and 2001 as a result of the closure of the Naval Security Group Activity, Winter Harbor, Maine:

(1) For fiscal year 2000, $154,000.

(2) For each of fiscal years 2003 and 2004, such amounts as may be necessary.

(c) SUPPLEMENT NOT SUPPLANT.—The amounts authorized to be appropriated by this section for the Department of Defense or for the Department of the Navy, for a fiscal year are in addition to any other amounts authorized to be appropriated for such Department for such fiscal year under any other provision of law.

(d) AVAILABILITY.—Amounts authorized to be appropriated by this section for a fiscal year are available until expended, without fiscal year limitation.

Ms. COLLINS. Mr. President, I am pleased to be joining my distinguished colleague, Senator SNOWE, today in introducing this legislation, the Naval Security Group Activity at Winter Harbor Conveyance Act. This conveyance legislation will authorize the transfer of land, which has been under the control of the Naval Security Group for some seventy plus years back to the Department of the Interior, and to the State, ultimately to be put to good use by our local communities.

Over the past seven decades, the Navy has performed a key national security mission called Classic Wizard at Winter Harbor. The Navy has played a significant role in the economic development of the local communities as Maine residents and Navy personnel have supported this mission. As the requirement for the Classic Wizard mission at Winter Harbor is coming to an end, and as technology advances, this naval activity will be ending its ties to the base in the summer of 2002.

While the Navy will be missed, it has worked hand-in-hand with me and the other members of the Maine delegation, the Department of Interior, National Park Service, and our local communities in creating a viable economic development and reuse plan for the naval base and its associated property.

As part of its reuse plan for the site, the National Park Service has proposed developing a research and education center at the Schoodic Point. The center would accommodate and promote a variety of research activities including wildlife genetics and serve as a base for permanent and visiting scientists to conduct interdisciplinary research.

I worked with the National Park Service in the development of its proposal, and I have offered to help make the concept a reality. Maine Governor Angus King shares my support for the proposed research and learning center and has expressed willingness to work as a partner in the effort to establish a wildlife genetics laboratory at the center. We believe that such a laboratory would generate good jobs and promote the region’s economy. The work done at Schoodic Point would also complement the world class research underway at other area facilities in the area such as The Jackson Laboratory, the Mount Desert Island Biological Laboratory, and the University of Maine’s Cooperative Aquaculture Research Center.

The National Park Service’s proposed reuse of the peninsula also includes an educational component that would promote the public’s understanding of the important natural and cultural resources that are a part of our national park system. Moreover, those who have visited Schoodic would agree that the remarkably beautiful 100 acres are worthy of being a part of Acadia National Park, one of our Nation’s greatest natural treasures.

It is important for the Federal Government to lend a hand to communities that are struggling to cope with the adverse effects of a base closure. Our legislation, which was developed in consultation with the local communities, the State, the Department of the Interior and the Navy, provides the options and opportunities that the region needs to move beyond the loss of the Naval Security Group Activity at Winter Harbor. I will work to secure approval of this bill by the Senate Armed Services committee and the full Senate.

By Mr. ENZI:

S. 1110. A bill to require that the area of a zip code number shall be located entirely within a State, and for other purposes; to the Committee on Governmental Affairs.

Mr. ENZI. Mr. President, I rise to announce the introduction of a bill that would help preserve the identity of American communities that have struggled with the United States Postal Service to acquire their own, individual zip codes. The bill would do this by prohibiting the Postal Service from extending zip codes across State boundaries.

This bill was introduced in response to concerns raised by the community of Alta, WY. Alta is a small, rural town situated next to the Wyoming-Idaho border at the western base of the Grand Teton Mountains. Because of treacherous travel conditions to the east of Alta, the Postal Service made the decision to serve Alta residents out of the post office in neighboring Driggs, ID. The decision of the Postal Service was based on the cost to Alta of Wyoming and it simply would be too dangerous to require the Postal Service to cross the Teton mountain range in the winter to deliver mail to Alta. In providing this service, however, the post office has not provided Alta residents their own zip code, as Driggs post office, but has required them to use the Driggs zip code even though Alta residents live in an entirely different State.

While this may not seem like a big deal on its face, there are a number of technical complications that arise in the lives of Alta residents because the Postal Service has not been willing to extend the courtesy of an Alta zip code. By requiring Alta residents to use the Driggs zip code, the Postal Service has created a lot of confusion for Alta residents who attempt to conduct business with mail order companies. What sales tax do they pay? Idaho or Wyoming? Although the Postal Service maintains that zip codes are not used to identify specific locations, other companies use zip codes as an important location code that is necessary to adequately conduct their business. Sales tax is often programmed by zip code, and car insurance, homeowner’s insurance, even our Federal and State income taxes use zip codes as an indicator of where and where to pay taxes.

The requirements of this bill will not be onerous for the Postal Service to implement. It will not require the service to build new facilities or even to change its method of operations. All it will do is require the Postal Service to identify those communities whose mail service crosses State boundaries and to assign them the necessary identification number that they need to provide the rest of the world a clear and concise description of where they live and who they are.

I urge my colleagues to support this most important legislation.

By Mr. CRAIG (for himself, Mr. CONRAD, Mr. ALLARD, Mr. BAUCUS, Mr. BINGAMAN, Mr. BURNS, Ms. COLLINS, Mr. CRAPO, Mr. DASCHLE, Mr. DAYTON, Mr. DORGAN, Mr. ENZI, Mr. GRAMM, Mr. GRASSLEY, Mr. HAGEL, Mr. HELMS, Mrs. HUTCHISON, Mr. JEFFORDS, Mr. JOHNSON, Mr. KENNEDY, Mr. KERRY, Mr. LEAHY, Mr. LUGAR, Ms. MUKOSKI, Mrs. MURRAY, Mr. NELSON of Nebraska, Mr. REED, Mr. ROBERTS, Mr. SARBANES, Mr. SMITH of New Hampshire, Mr. SMITH of Oregon, Mr. THOMAS, and Mr. WELLSTONE):

S. 1111. A bill to amend the Consolidated Farm and Rural Development Act to authorize the National Rural Development Partnership, and for other purposes; to the Committee on Agriculture, Nutrition and Forestry.

Mr. CRAIG. Mr. President, I rise today with Senator CONRAD to introduce the National Rural Development Partnership Act of 2001—a bill to codify the National Rural Development Partnership, NRDP or the Partnership, and
provided a funding source for the program. I am pleased that Senators AL- 
lard, Baucus, Bingaman, Burns, Col- 
lins, Enzi, Gramm, Grassley, Hagel, 
Helms, Hutchinson, Jeffords, Johnson, 
Kennedy, Kerry, Leahy, Lugar, Mi- 
koski, Murray, Ben Nelson, Reed, 
Roberts, Sargent, Bob Smith, Gordon, 
Santorum, Thomas, and Wellstone are 
joining us as original cosponsors.

The Partnership was established under the Bush administration in 1990, 
by Executive Order 12720. Although the partnership has existed for ten years, it 
have never been formally authorized by Congress. The current basis for the 
existence of the partnership is found in the Consolidated Farm and Rural De- 
velopment Act of 1972 and the Rural Development Policy Act of 1980. In ad- 
dition, the bill specifically authorizes the partnership and State 
rural development councils, SRDCs.

The partnership is a nonpartisan interagency grouping whose mission is to 
“contribute to the vitality of the Nation by strengthening the ability 
of all rural Americans to partici- 
porate in determining their futures.” The NRDCC and SRDCs do something no 
other entities do: facilitate collabora- 
tion among Federal agencies and 
between Federal agencies and State, 
local, and tribal governments and 
the private and non-profit sectors to 
increase coordination of programs and 
services to rural areas. When success- 
ful, these efforts result in more effi- 
cient use of limited rural development 
resources and actually add value to the 
efforts and dollars of others.

On March 8, 2000, the Subcommittee on Forestry, Conservation, and Rural 
Revitalization held a hearing on oversight hearing on the operations 
and accomplishments of the NRDCC and 
SRDCs. The subcommittee heard from a number of witnesses, including of- 
cials of the U.S. Departments of Agri- 
culture, Transportation, and Health 
and Human Services, State agencies, 
and private sector representatives. The hearing established the need for some 
legislative foundation and consistent funding. The legislation we introduced 
last year and are re-introducing this 
Congress accomplishes just that.

This legislation formally recognizes the existence and operations of the 
partnership, the National Rural De- 
velopment Coordinating Committee, 
NRDCC, and SRDCs. In addition, the 
legislation gives specific responsibili- 	ies to each component of the Partner- 
ship and authorizes it to receive con- 
gressional appropriations.

Specifically, the bill formally estab- 
lishes and indicates it is composed of the NRDCC and SRDCs. NRDCC is estab- 
lished for empowering and building the capacity of rural com- 
munities, encouraging participation in 
flexible and innovative methods of add- 
ressing the challenges of rural areas, 
and encouraging all those involved in 
can be equally engaged and to share equally in decisionmaking. This legislation also identifies the role of the Federal Government in the part- nership as being that of partner, coach, 
and facilitator. Federal agencies are 
challenged to make senior-level 
officials to participate in the NRDCC 
and to encourage field staff to partici- 
pate in SRDCs. Federal agencies are 
also authorized to enter into coopera- 
tion agreements with, and to provide 
grants and other assistance to, State 
rural development councils, regardless 
of the form of legal organization of a 
State rural development council.

The composition of the NRDCC is 
specifically representative from each Federal agency with rural 
responsibilities, and governmental and 
non-governmental for-profit and non- 
profit organizations that elect to par- ticipate in the NRDCC. The legislation 
outlines the duties of the council as 
interagency working group whose mis-
cillate coordination among Federal 
agencies and between the Federal, 
State, local and tribal governments 
and private organizations; enhance the 
effectiveness, responsiveness, and 
delivery of Federal Government pro-
grahs; gather and provide to Federal 
agencies information about the impact 
of government programs on rural 
areas; review and comment on policies, 
regulations, and proposed legislation; 
provide technical assistance to SRDCs; 
and develop strategies for eliminating 
administrative and regulatory impedi-
ments. Federal agencies do have the 
ability to opt out of participation in the 
council, but only if they can show how 
they can more effectively serve rural 
areas without participating in the 
partnership and council.

This legislation provides that states 
may participate in the partnership by 
entering into a memorandum of under- 
standing with the NRDCC; and to 
create a State Rural Development 
Council (SRDC). SRDCs are required to operate in a nonpartisan and nondiscrimi-

natory manner and to reflect the di-
versity of the States within which they 
are organized. The duties of the SRDCs are to facilitate collaboration among 
State agencies at all levels and the 
private and non-profit sectors; to 
harness the effectiveness, responsive- 

ness, and delivery of Federal and State 
Government programs; to gather infor-
mation about rural areas in its State 
and share it with the NRDCC and other 
State agencies; to coordinate with the 
private sector, and provide technical 
assistance to SRDCs; and to provide 
the criteria for the distribution of Federal funds to rural areas; to provide comments to the NRDCC and others on policies, 
regulations, and proposed legislation; as-
sist the NRDCC in developing strate-
gies for reducing or eliminating im-
pediments; to hire an executive direc-
tor and support staff; and to fundrais- e.

As I have stated before, this legisla-
tion authorizes the partnership to re-
ceive appropriations as well as author- 
zizing and encouraging federal agencies to make grants and provide other 
forms of assistance to the partnership 
and authorizing the partnership to ac-
cept private contributions. The SRDCs 
are required to provide at least a 33-
percent match for funds it receives as a 
result of its cooperative agreement with the Federal Government.

As you know, too many parts of rural 
America have not shared in the boom 
that has brought great prosperity to 
urban America. We need to do more to 
ensure that rural citizens will have op-
portunities similar to those enjoyed by 
urban areas. To do so, we do not nec-
ecessarily need new government pro-
grahs. Instead, we must do a better job 
of coordinating the many programs 
available from USDA and other Federal 
agencies that can help rural commu-
nities. With the passage of this legisla-
tion, the NRDCC and SRDCs will be 
better situated to provide that much need-
ed coordination.

Mr. CONRAD. Mr. President, I am 
pleased to join Senator Larry Craig 
and 31 of our colleagues today in the 
introduction of the National Rural De-
This bill is similar to S. 3175 which 
Senator Craig and I sponsored last 
year during the 106th Congress. I am 
pleased that so many members from 
both sides of the aisle have recognized 
the importance of this measure by 
agreeing to join as original cosponsors.

The National Rural Development 
Partnership Act had its legislative 
alternative, Order 12720, issued by President George 
H. Bush in 1990. Through the issuance 
of this order, the U.S. Department 
of Agriculture was assigned the respon-
sibilities of creating the partnership 
and providing assistance to States that 
voluntarily enter into a memorandum of under-
standing with the NRDCC. The intent of the legislation is the same. At least 40 States have 
now formed partnership councils to co-
ordinate rural development activities of 
Federal, State, local, and tribal govern-
ment agencies with private support 
agencies, to address community and eco-

demic development needs, and 
to coordinate community and job 
building activities in rural areas. The 
funding for these activities has been 
voluntary from various Federal agen-
cies, including the Departments of 
Health and Human Services, Labor, 
Transportation, Veterans, and State 
agencies. The U.S. Department of Agri-
culture has historically provided the 
largest support staff, and to fundrais-

The needs of rural America are great. The demands on the Federal budget are 
also great. If we are to make optimum use of hard-to-find Federal, State,
The existing partnerships are doing an outstanding job in coordinating activities like police and building jobs in areas that have historically lacked high paying opportunities. While we recognize the continuing importance of the agriculture industry in many States, especially a State like North Dakota, we recognize that, unless we diversify our economy, we will continue to see out migration from the rural areas into the already crowded metropolitan areas of our country.

Again, I am pleased to join this bipartisan effort.

By Mr. DURBIN (for himself, Mr. CHAFEE, Mrs. FEINSTEIN, Mr. BINGAMAN, Mr. AKAKA, Mr. KERRY, Mr. SARBANES, Mr. JOHNSON, and Mr. INOUYE):

S. 1112. A bill to provide Federal Perkins Loan cancellation for public defenders; to the Committee on Health, Education, Labor, and Pensions.

Mr. DURBIN. Mr. President, today I rise with Senator CHAFEE to reintroduce legislation to include full-time public defense attorneys in the Federal Perkins Loan Cancellation Forgiveness Program for law enforcement officers. This bill would provide parity to public defense attorneys and uphold the goals set forth by the Supreme Court to equalize access to legal resources. Senators FEINSTEIN, BINGAMAN, AKAKA, KERRY, SARBANES, JOHNSON, and INOUYE are original cosponsors of this bipartisan bill. Representative Tom Campbell of California introduced a companion bill in the House in the 106th Congress.

Under section 465(a)(2)(F) of the Higher Education Act of 1965, a borrower with a loan made under the Federal Perkins Loan Program is eligible to have the loan canceled for serving full-time as a law enforcement officer or correction officer in a local, State, or Federal law enforcement or corrections agency. While the rules governing borrower eligibility for law enforcement cancellation have been interpreted by the Department of Education to include prosecuting attorneys, public defenders have been excluded from the loan forgiveness program. This policy must be amended.

Like prosecutors, public defense attorneys play an integral role in our adversarial process. This judicial process is the most effective means of getting at the truth and rending justice. The United States Supreme Court in a series of cases has recognized the importance of the right to counsel in implementing the Sixth Amendment’s guarantee of a fair trial and the Fourteenth Amendment’s due process clause requiring counsel to be appointed for all persons accused of offenses in which there is a possibility of a jury trial being imposed.

Absent adequate counsel for all parties, there is a danger that the outcome may be determined not by who has the most convincing case but by who has the most resources. The Court rightly addressed this possible miscarriage of justice by requiring counsel to be appointed for the accused. Public defenders fill this Court mandated role by representing the interests of criminally accused indigent persons. They give indigent defendants sufficient resources to present an adequate defense, so that the public goal of truth and justice will govern the outcome.

The Department of Education’s interpretation of the statute to include public defenders from the loan forgiveness program undermines the goals set forth by the Supreme Court to equalize access to legal resources. It creates an obvious disparity of resources between public defenders and prosecutors by encouraging talented individuals to pursue public service as prosecutors but not as defenders. The criminal justice system works best when both sides are adequately represented. The public interest is served when indigent defendants have access to talented defenders. One of the ways to facilitate this goal is by granting loan cancellation benefits to defense attorneys.

Moreover, public defense attorneys meet all the eligibility requirements of the loan forgiveness program as set forth in current Federal regulations. They belong to publicly funded public defender agencies and they are sworn officers of the court whose principal responsibility is to the criminal justice system and are essential in the performance of the agencies’ primary mission. In addition, like prosecuting attorneys, public defenders are law enforcement officers dedicated to upholding, protecting, and enforcing our laws. Without public defense attorneys, the adversarial process of our criminal justice system could not operate.

I urge my colleagues to join me, Senator CHAFEE, Senator FEINSTEIN, Senator BINGAMAN, Senator AKAKA, Senator KERRY, Senator SARBANES, Senator JOHNSON, and Senator INOUYE in supporting the goal of equalized access to legal resources, as set forth in the Constitution and elucidated by the Supreme Court, by providing parity to public defenders and allowing them to join prosecutors in receiving loan cancellation benefits.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

**CONGRESSIONAL RECORD—SENATE**

June 27, 2001

S. 1112

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FEDERAL PERKINS LOAN CANCELLATION FOR PUBLIC DEFENDERS.

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Education has issued clarifications that prosecuting attorneys are among the class of law enforcement officers eligible for benefits under the Federal Perkins Loan cancellation program.

(2) Like prosecutors, public defenders also meet all the eligibility requirements of the Federal Perkins Loan cancellation program as set forth in Federal regulations.

(3) Public defenders are law enforcement officers who play an integral role in our Nation’s adversarial legal process. Public defenders fill the Supreme Court mandated role requiring that counsel be appointed for the accused, by representing the interests of criminally accused indigent persons.

(4) In order to encourage highly qualified attorneys to serve as public defenders, public defenders should be included with prosecutors among the class of law enforcement officers eligible to receive benefits under the Federal Perkins Loan cancellation program.

(b) AMENDMENT.—Section 465(a)(2)(F) of the Higher Education Act of 1965 (20 U.S.C. 1070e(a)(2)(F)) is amended by inserting ‘‘, or as a full-time public defender for service to a local or State government, or to the Federal Government (directly or by contract with a private, nonprofit organization),’’ after ‘‘agencies’’.

(c) EFFECTIVE DATE.—The amendment made by this section shall apply to—

(1) loans made under part E of title IV of the Higher Education Act of 1965, whether made before, on, or after the date of enactment of this Act; and

(2) service as a public defender that is provided on or after the date of enactment of this Act.

(d) CONSTRUCTION.—Nothing in this section or the amendment made by this section shall be construed to authorize the refunding of any repayment of a loan.

By Mr. SPECTER:

S. 1113. A bill to amend section 1562 of title 38, United States Code, to increase the amount of the Medal of Honor Roll special pension, to provide for an annual adjustment in the amount of that special pension, and for other purposes; to the Committee on Veterans’ Affairs.

Mr. SPECTER. Mr. President, I have sought recognition at this time to comment on legislation that I have introduced today to increase the special pension that is available to Medal of Honor recipients, and to provide for automatic adjustments in that special pension to reflect annual increases in the cost of living. When the Congress enacted the Medal of Honor pension, it stated, in the 1916 Senate Report, Report No. 246, 64th Congress, accompanying enactment, that the special pension was then necessary to serve as a “recognition of superior claims on the gratitude of the country,” and to “reward... a modest way startling deeds of individual audacious heroism in the face of mortal danger when war is on.” The legislation that I have introduced today has
June 27, 2001

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1113

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. INCREASE AND ANNUAL ADJUSTMENT OF MEDAL OF HONOR ROLL PENSION.

(a) INCREASE IN AMOUNT.—Subsection (a) of section 1562 of title 38, United States Code, is amended by striking "$600" and inserting "$1,000, as adjusted from time to time under subsection (e)".

(b) ANNUAL ADJUSTMENT.—That section is further amended by adding at the end the following:

"(e) Effective as of December 1 each year, the Secretary shall increase the amount of monthly special pension payable under subsection (a) of section 1562 of title 38, United States Code, by the same percentage that benefit amounts payable under title II of the Social Security Act (42 U.S.C. 401 et seq.) are increased effective December 1 of such year as a result of a determination under section 215(i) of that Act (42 U.S.C. 415(i))."

(c) EFFECTIVE DATE.—(1) Except as provided in paragraph (2), the amendments made by this section shall take effect on the date of the enactment of this Act, and shall apply with respect to months that begin on or after that date.

(2) The Secretary of Veterans Affairs shall not make any adjustment under subsection (e) of section 1562 of title 38, United States Code, as added by subsection (b) of this section, in 2001.

By Mr. SPECTER:

S. 1114. A bill to amend title 38, United States Code, to increase the amount of educational benefits for veterans under the Montgomery GI Bill; to the Committee on Veterans' Affairs.

I have sought recognition at this time to comment briefly on legislation that I am introducing today to increase educational benefits paid to veterans under the Montgomery GI bill, MGIB. This bill is the same as a bill, H.R. 1291, that was passed by the House, under the leadership of the chairman of the House Committee on Veterans' Affairs, Representative CHRISS SMITH, on June 19, 2001, by a vote of 416-0. I introduce the same legislation here in the Senate, and urge my colleagues to join with me to complete the task of increasing veterans' Montgomery GI bill benefits.

This legislation, once it is fully phased in over a three year period, would increase the basic monthly benefit paid to veterans with at least three years of service who have returned to school from $650 to $1,100. With this 85 percent increase in MGIB benefits, the largest percentage increase in the history of the Montgomery GI bill, a veteran with three years of service would be able to afford the average cost of tuition, fees, books, and room and board at a four-year public college or university, and still have money left over for transportation expenses or other personal expenses. This legislation would provide greater educational freedom for veterans who are constrained by the current benefit amount; it would open up the possibility of attendance at more expensive educational institutions. And it is the national security interests of the United States by providing a substantial inducement for young men and women to serve in the military.

When I became chairman of the Senate Committee on Veterans' Affairs at the start of the 105th Congress in 1997, I committed to increasing MGIB benefits which, due to budget constraints, had been woefully inadequate. I am pleased to report that that picture has changed; the basic MGIB benefit has increased by 52 percent from $427 to $650 per month, and in addition, service members now have the opportunity to "buy-up" an additional $150 in monthly benefits by spending a portion of their level of available benefits to $800 per month, an increase of 87 percent since 1997. Despite this significant progress, however, I remain concerned that the benefit usage rate among young veterans is too low, and that it may not yet be a sufficient inducement to assist the Department of Defense in recruiting high quality young men and women to serve in the military.

Of the young veterans eligible for MGIB benefits, only 57 percent choose to avail themselves of this extraordinary opportunity. According to a recent report by the Department of Veterans Affairs, VA, a significant reason for this trend in MGIB benefit usage among young veterans is that the MGIB benefit amount is too low, and that it may not yet be a sufficient inducement to assist the Department of Defense in recruiting high quality young men and women to serve in the military.

The primary purposes of the MGIB is to assist the Department of Defense, DOD with service member recruitment. When DOD asked new recruits in 1997 to list the reasons they joined the military, money for college ranked second only to "a chance to better myself in life" among the answers given. Even so, tight labor market and the availability of other Federal education aid have resulted in
DOD difficulty in meeting recruiting goals. The Assistant Secretary of Defense, for Force Management Policy reports that a benefit level of approximately $1,000 per month would increase high-quality accessions without having a negative impact on reinenements. . . . This, my proposed legislation, which would, in phases, increase the monthly benefit to $1,100, is consistent with DOD’s position that increased MGIB benefits are necessary for it to attract high-quality recruits.

Attracting high-quality young men and women into the military is not only in the interest of the Department of Defense, it is in the national interest of all of our citizens. The United States Commission on National Security/21st Century, chaired by our former colleague Senator Gary Hart and Warren Rudman, recently called on Congress to enhance national security by significantly enhancing the Montgomery GI Bill by providing a benefit that would pay for the average education of four-year U.S. colleges. The Commission emphasized that the “GI bill is both a strong recruitment tool and, more importantly, a valuable institutional reward for service to the nation in uniform.” I thank the Commission for recognizing the important role the GI bill has played, and will continue to play, in ensuring the security of our country.

I commend the chairman of the House Committee on Veterans’ Affairs, Representative Chris Smith, who has taken the lead on this issue in the House during this first year of his chairmanship. Under Mr. Smith’s leadership, the House did its part on June 19, 2001, by passing H.R. 1291 by a resounding vote of 416-0. I urge my Senate colleagues to join with me to complete the task here in the Senate. I ask unanimous consent that the text of the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 1114

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INCREASE IN RATES OF BASIC EDUCATIONAL ASSISTANCE UNDER MONTGOMERY GI BILL.

(a) IN GENERAL.—(1) Section 3015(a)(1) of title 38, United States Code, is amended to read as follows:

“(1) for an approved program of education pursued on a full-time basis, at the monthly rate of—

“(A) for months occurring during fiscal year 2002, $890.

“(B) for months occurring during fiscal year 2003, $950.

“(C) for months occurring during fiscal year 2004, $1,000.

“(D) for months occurring during a subsequent fiscal year, the amount for months occurring during the previous fiscal year increased under subsection (b); or

(2) Section 3015(b)(1) of such title is amended to read as follows:

“(b) CPI Adjustment.—No adjustment in the monthly benefit to $1,100, is consistent with DOD’s position that increased MGIB benefits are necessary for it to attract high-quality recruits.

By Mr. KENNEDY (for himself, Mr. STEVENS, Mrs. HUTCHISON, and Mr. CORZINE):

S. 1115. A bill to amend the Public Health Service Act with respect to making progress toward the goal of eliminating tuberculosis, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. KENNEDY. Mr. President, it is a privilege to join my colleagues Senator STEVENS, Senator INOUYE, Senator HUTCHISON, and Senator CORZINE in introducing the Comprehensive Tuberculosis Elimination Act. This bipartisan legislation will provide enhanced authority and greater resources to State, local and Federal health officials to do all they can to combat this deadly infectious disease in our country.

Tuberculosis is the world’s leading infectious killer. Its growth has been propelled by the global HIV epidemic, and multi-drug resistant strains have become increasingly prevalent around the world. The World Health Organization estimates that more than one-third of the world’s population is infected with tuberculosis. Every year, there are 8 million new cases of active tuberculosis and 2 million deaths from tuberculosis. This disease causes more deaths among women worldwide than all other causes of maternal death combined.

These harrowing statistics illustrate the truth behind the saying that diseases know no borders. Senators INOUYE, STEVENS, and HUTCHISON and I have already introduced the Stop TB Now Act, which focuses on international tuberculosis control. The bill we are introducing today will deal with tuberculosis in our own country. Only through enactment of both of these measures can we be sure of defeating this readily treatable and preventable disease.

Today’s bill is intended to fulfill the recommendations of the landmark report issued by the Institute of Medicine last year, entitled “Ending Neglect: The Elimination of Tuberculosis in the United States.” Our measure will create a national plan for the eradication of tuberculosis. It will enhance tuberculosis-related research, education and training through the Centers for Disease Control and Prevention. It will also expand support for various research and international tuberculosis research through the National Institutes of Health.

In the United States, tuberculosis has been going through what the Institute of Medicine calls “recurrent cycles of neglect” by public health authorities, “followed by resurgence” of the disease. In the late nineteenth century, tuberculosis was one of the leading causes of death in America. As cities swelled with waves of European immigration, millions of individuals and families were forced into overcrowded tenements and unhealthy workplaces. Many fell victim to outbreaks of deadly infectious diseases. In 1886, the leading cause of death among infants was tuberculosis, followed by infant diarrhea.

Although medical science and public health were in their infancy in those days, the need to combat tuberculosis was clear even then. In 1882, Robert Koch first isolated the organism that causes this disease, providing physicians and scientists with a microbial foundation for science-based public health action. In the early twentieth century, health advocates and physicians formed an association dedicated to fighting tuberculosis, which today is the American Lung Association. Their work helped to bring about more sanitary living conditions and workplaces for the poor, stronger public health laws, and the use of sanatoriums to treat people with tuberculosis.

In this century, the possibility of actually eradicating tuberculosis arose following the development of effective antibiotics in the 1960s. But the country failed to capitalize on scientific opportunities or undertake the kind of broad public health campaign that we undertook so successfully against polio. As a result, scientific interest and public health funding for tuberculosis control waned in the following decades. After years of decline, specific Federal funding for tuberculosis control was actually eliminated in 1972.

Our country paid the price for this complacency in the 1980s. A resurgence of cases and an alarming growth in the prevalence of drug-resistant tuberculosis strains challenged public health and shook the confidence of experts. Through great effort and difficulty, we renewed our national commitment to fighting tuberculosis. But the effort took longer than necessary, and the Nation suffered needless deaths and illness as we worked to bring the number of new tuberculosis cases to its current, all-time low.

Today, we have a historic opportunity to eradicate tuberculosis in the United States. We have a generation of public health officials who have lived through and successfully combated the recent resurgence of the disease. And
By Mr. INOUYE (for himself, Mr. STEVENS, Mr. KENNEDY, Mrs. HUTCHISON, and Mr. CORZINE):

S. 1116. A bill amend the Foreign Assistance Act of 1961 to provide increased foreign assistance for tuberculosis prevention, treatment, and control; to the Committee on Foreign Relations.

Mr. INOUYE. Mr. President, I rise today to join my colleagues, Senator STEVENS, Senator KENNEDY, Senator HUTCHISON, and Senator CORZINE, to introduce the Stop Tuberculosis Now Act of 2001, a bill that responds to the dire need of the United States and the rest of the world to stop the terrible infection that is threatening citizens in every country of the world.

Tuberculosis is the biggest killer of young women and people with AIDS in the world today, and two million people will die of tuberculosis this year alone. Although tuberculosis is preventable and treatable, last year there were more than 17,000 new cases of tuberculosis in the U.S. Among these cases were new strains of tuberculosis that are resistant to many traditional antibiotics that were very successful in the past. Due to its infectious and resistant nature, tuberculosis cannot be stopped at national borders, and virtually every international airport in the U.S. therefore is a port of entry for carriers of tuberculosis. Thus, it will be impossible to control tuberculosis in the U.S. until we control it worldwide.

Because of this dire situation, we are introducing the Stop Tuberculosis Now Act, which calls for a U.S. investment in international tuberculosis control of $200 million in 2002, with a focus on expanding the proven, low cost direct observation therapy system, DOTS, tuberculosis treatment for countries with high rates of tuberculosis infection. DOTS tuberculosis treatment involves a health worker observing and ensuring tuberculosis patients take their prescribed medication that is needed to stop a tuberculosis infection successfully. The current projection for implementing an international tuberculosis treatment program is $1 billion. The U.S. share of this program would be $200 million. This is a small price to pay in order to stop this terrible infectious disease which brings such misery and death, to the U.S. and the rest of the world.

This bill would amend the Foreign Assistance Act of 1961 and declare that a major objective of the U.S. foreign assistance program is to control tuberculosis. Congress would designate the World Health Organization and other health organizations to develop and implement an international tuberculosis control program, including expanding the use of the strategy of DOTS tuberculosis treatment method and strategies to address multi-drug resistant tuberculosis. The particular focus of this program would be in countries with the highest rates of tuberculosis infection. The program would set as goals the cure of at least 95 percent of tuberculosis cases detected and the reduction of tuberculosis related deaths by 50 percent, by December 31, 2010.

I ask unanimous consent that the test the bill be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1116

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Stop Tuberculosis (TB) Now Act”.

SEC. 2. FINDINGS.

Congress finds the following:

(1)(A) Tuberculosis is one of the greatest infectious causes of death of adults worldwide, killing 2,000,000 people per year—one person every 15 seconds.

(B) Globally, tuberculosis is the leading cause of death of young women and the leading cause of death of people with HIV/AIDS.

(2) An estimated 8,000,000 individuals develop active tuberculosis each year.

(3) Tuberculosis is spreading as a result of inadequate treatment and it is a disease that knows no national borders.

(4) With over 40 percent of tuberculosis cases in the United States attributable to foreign-born individuals and with the increase in international travel, commerce, and migration, elimination of tuberculosis in the United States depends on efforts to control the disease in developing countries.

(5) The threat that tuberculosis poses for Americans derives from the global spread of tuberculosis and the emergence and spread of strains of multi-drug resistant tuberculosis (MDR–TB).

(6) Up to 50,000,000 individuals may be infected with multi-drug resistant tuberculosis.

(7) In the United States, tuberculosis treatment, normally about $2,000 per patient, skyrockets to as much as $250,000 per patient to treat multi-drug resistant tuberculosis, and treatment may not even be successful.

(8) Multi-drug resistant tuberculosis kills more than one-half of those individuals infected in the United States and other industrialized nations and without access to treatment it is a virtual death sentence in the developing world.

(9) There is a highly effective and inexpensive treatment for tuberculosis. Recommended by the World Health Organization as the best curative method for tuberculosis, this strategy, known as directly observed treatment, short course (DOTS), includes least effective diagnosis, treatment, monitoring, and recordkeeping, as well as a reliable drug supply. A centerpiece of DOTS is observing patients to ensure that they take their medication and complete treatment.

SEC. 3. ASSISTANCE FOR PREVENTION, TREATMENT, AND CONTROL.

(a) ADDITIONAL PREVENTION, TREATMENT, AND CONTROL.—Section 104(c)(7)(A) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)(7)(A)) is amended—

(1) in clause (i), by adding at the end before the semicolon the following: “by expanding the use of the strategy known as directly observed treatment, short course (DOTS) and strategies to address multi-drug resistant tuberculosis (MDR–TB) where appropriate at the local level, particularly in countries with the highest rate of tuberculosis”;

(2) in clause (ii)—

(A) by inserting after “the cure of at least 95 percent of the cases detected” the following: “by focusing efforts on the use of the directly observed treatment strategy (DOTS) strategy or other internationally accepted primary tuberculosis control strategies”;

and

(B) by striking “and the cure” and inserting “the cure”.

(b) FUNDING REQUIREMENT.—Section 104(c)(7) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)(7)) is amended—

(1) by redesignating subparagraph (B) as subparagraph (C); and

(2) by inserting after subparagraph (A) the following: “by focusing efforts on the use of the directly observed treatment strategy (DOTS) strategy or other internationally accepted primary tuberculosis control strategies and tuberculosis Drug Facility of WHO’s Stop TB Partnership.”

(c) ANNUAL REPORT.—Section 104(c)(7) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)(7)) is amended—

(1) by redesignating subparagraph (C) as subparagraph (D); and

(2) by inserting after subparagraph (D) the following:

“(C) In conjunction with the transmission of the annual report for enactment of authorizations and appropriations for foreign assistance programs for each fiscal year, the President shall transmit to Congress a report that contains a summary of all programs, projects, and activities carried out under this paragraph for the preceding fiscal year, including a description to which such programs, projects, and activities have made progress to achieve the goals described in subparagraph (A)(ii).”

(d) AUTHORIZATION OF APPROPRIATIONS.—

Subparagraph (D) of section 104(c)(7) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)(7)), as redesignated by this Act, is amended by striking $60,000,000 for each of the fiscal years 2001 and 2002” and inserting “$60,000,000 for fiscal year 2001 and $200,000,000 for fiscal year 2002”.

By Ms. LANDRIEU:

S. 1117. A bill to establish the policy of the United States for reducing the
number of nuclear warheads in the United States and Russian arsenals, for reduction of the number of nuclear weapons of those two nations that are on high alert, and for expanding and accelerating programs to prevent diversion and proliferation of Russian nuclear weapons, fissile materials, and nuclear expertise; to the Committee on Foreign Relations.

Ms. LANDRIEU. Mr. President, when Winston Churchill addressed the student body at Westminster College in 1946, he declared to the United States that “with the power of the world, our men have joined an awe-inspiring accountability to the future . . . you must not only feel the sense of duty done, but also the anxiety lest you fall below that level of achievement.” Over the course of the cold war, we did not fail in our duty, nor should we in the new century.

In the same speech he laid before the whole world the rhetoric that would define the cold war. In describing the Sphère of Soviet influence in Eastern Europe, Mr. Churchill described an Iron Curtain which the ancient capitals of Warsaw, Prague, and Budapest were held. With the fall of communism in the early part of the last decade, the United States has had to re-shape its review of Eastern Europe. No longer do we view the countries of Poland, the Czech Republic, or Hungary as isolated adversaries, but as partners in the very alliance that carried us through the cold war. In the same way that we have looked to reforming our relationship with the countries of the old Warsaw Pact we must find new ways to view Russia. It is difficult to fathom that in the 21st century we view Russia as a declared ally on the world stage while maintaining a nuclear posture at home which treats her as an enemy. It is time that we transform our nuclear doctrine from one that reflects the thinking of the cold war to one that fits in the context of the 21st century and addresses what is perhaps the greatest threat to our security.

When President Bush met with Mr. Putin a few weeks ago, he expressed that the United States and Russia can find a “common position” on a “new strategic framework”. President Bush declared that the two countries are friends and that it is time for the U.S. and Russia to act that way. In context of this historic meeting, it is time that we “work together to address the world as it is, not as it used to be, it is important that we not only talk differently, we must also act differently.”

I rise today to introduce legislation that I call the NTRA, which the President to seek in his own words: “ . . . a broad strategy of active non-proliferation . . . to deny weapons of terror from those seeking to acquire them . . . to work with allies and friends who wish to join us in this solemn task against the harm they, WMD can inflict.”

The Nuclear threat Reduction Act of 2001, NTRA, would make it the policy of the United States to reduce the number of nuclear warheads and delivery systems held by the U.S. and Russia to the lowest possible number consistent with national security. It would enable the President to reduce our nuclear stockpile while negotiating such reductions with the Russians that are transparent, predictable and verifiable. To do such a thing would be a mark of principled leadership. It would acknowledge that it is no longer necessary to maintain large stockpiles of nuclear arms by the United States and Russia and that we must continue to do so would be unacceptable.

On May 22, 2000 President Bush stated “The premices of cold war targeting should no longer dictate the size of our arsenal” I agree with the President more. The current level of nuclear weapons maintained by the United States comes at a great cost to ourselves financially and poses a significant threat to our security. The current level of nuclear protection that we maintain forces the Russians to keep a similarly robust force which they cannot afford. The crumbling infrastructure of the Russian Military continually raises the risk of accidental launch or greater proliferation. Indeed, the legislation being considered today would ensure that once parts of the Russian arsenal are dismantled, they will be kept safe, they will be accounted for, and they will eventually be destroyed.

The savings from reducing our nuclear arsenals are substantial. A recent CBO report estimated that $1.67 billion could be saved by retiring 50 MX Peacekeeper missiles by 2003. We could use this money to address shortfalls in our nuclear security systems held by the U.S. and Russia that are transparent, predictable and verifiable. To do such a thing would be a mark of principled leadership. It would acknowledge that it is no longer necessary to maintain large stockpiles of nuclear arms by the United States and Russia and that we must continue to do so would be unacceptable.

Finally, the NTRA requires the President to formulate and submit to Congress a strategic plan to secure and neutralize Russia’s nuclear weapons and weapons usable materials over the next eight years. The plan would have to include administrative and organizational reforms necessary to provide effective coordination of these programs and to reflect the priority that the President attaches to them. The President himself has advocated such a strategy and I call on him to implement it.

In closing, the Nuclear Reduction Act of 2001 would help us fulfill the duty that comes with being the world’s last remaining superpower. By preventing the spread of nuclear materials and technology, reducing the nuclear stockpiles of the United States and Russia, and by taking our missiles off of high-alert status, we can fulfill that duty. I ask the other Members of the Senate to join me in support of this measure.

**TEXT OF AMENDMENTS**

SA 819. Mr. THOMPSON proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 150, strike line 17 and all that follows through page 155, line 18, and insert the following:

"(9) REQUIREMENT OF EXHAUSTION.—

"(A) IN GENERAL.—A cause of action may not be brought under paragraph (1) in connection with any denial of a claim for benefits of any individual until all administrative processes under sections 102, 103, and 104 of the Bipartisan Patient Protection Act of 2001 shall be exhausted.

"(B) EXCEPTION FOR NEEDED CARE.—A participant or beneficiary may seek relief exclusively in Federal court under subsection 502(a)(1)(B) pursuant to the exhaustion of administrative remedies under sections 102, 103, and 104 of the Bipartisan Patient Protection Act of 2001 if it is demonstrated to the court that the exhaustion of such remedies would cause irreparable harm to the health of the participant or beneficiary.

"(C) RECEIPT OF BENEFITS DURING APPEALS PROCESS.—Receipt by the participant or beneficiary of benefits in connection with any denial of a claim for benefits of any individual until all administrative processes under sections 102, 103, and 104 of the Bipartisan Patient Protection Act of 2001 shall be exhausted.

"(D) ADMISSIBLE.—Any determination made by a reviewer in an administrative proceeding under section 103 of the Bipartisan Patient Protection Act of 2001 shall be admissible in any Federal court proceeding and shall be presented to the trier of fact.

"(E) REPORT.—Not later than 12 months after the general effective date referred to in section 401, the General Accounting Office shall prepare and submit to the appropriate committees of Congress a report concerning—

(A) the information that is provided under paragraph (3)(D);

(B) the number of denials that have been upheld by independent medical reviewers and the number of denials that have been reversed by such reviewers; and

(C) the extent to which independent medical reviewers are requiring coverage for benefits that are specifically excluded under the plan or coverage.

SA 820. Mr. MCCAIN (for himself, Mr. BAYH, Mr. CARPINO, and Mr. EDWARDS) proposed an amendment to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; as follows:

On page 148, line 11, insert the following:

"(D) EXCLUSION OF SMALL EMPLOYERS.—

"(I) Definition.—In clause (i), the term 'small employer' means an employer—

"(I) that, during the calendar year preceding the calendar year for which a determination under this subparagraph is being made, employed an average of at least 2 but not more than 15 employees on business days; and

"(II) maintaining the plan involved that is acting, serving, or functioning as a fiduciary, trustee, or plan administrator, including—

(aa) a small employer described in section 3(16)(B)(ii) with respect to a plan maintained by a single employer; and

(bb) one or more small employers or employee organizations described in section 3(16)(B)(iii) in the case of a multi-employer plan.

(V) Compliance with the requirements of this section shall not be subject to the scope of employer size.

For purposes of this subparagraph:
CONGRESSIONAL RECORD—SENATE

June 27, 2001

SA 823. Mr. ALLARD submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

At the end of the bill, add the following:

SEC. 16. NINE-YEAR EXTENSION OF MEDICARE COST CONTRACTS
Section 1876(h)(5)(C) of the Social Security Act (42 U.S.C. 1395mm(h)(5)(C)), as redesignated by section 634(1) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-508), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended by striking ‘‘2004’’ and inserting ‘‘2014’’.

SA 824. Mr. ALLARD submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

At the end of the bill, add the following:

SEC. 16. NINE-YEAR EXTENSION OF MEDICARE COST CONTRACTS
Section 1876(h)(5)(C) of the Social Security Act (42 U.S.C. 1395mm(h)(5)(C)), as redesignated by section 634(1) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-508), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended by striking ‘‘2004’’ and inserting ‘‘2013’’.

SA 825. Mr. ALLARD submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

At the end of the bill, add the following:

SEC. 17. SEVEN-YEAR EXTENSION OF MEDICARE COST CONTRACTS
Section 1876(h)(5)(C) of the Social Security Act (42 U.S.C. 1395mm(h)(5)(C)), as redesignated by section 634(1) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-508), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended by striking ‘‘2004’’ and inserting ‘‘2015’’.
consistent with the purposes of the patient protection requirement to which the law relates; or
(III) that specified additional information is needed.

A notice under this clause shall include an explanation of the basis for the determination of the Secretary and shall identify specific deficiencies in the State certification.

(ii) PROHIBITION.—With respect to a State that has been notified by the Secretary under clause (i)(III) that specified additional information is needed, the Secretary shall make a determination with respect to such State within 60 days after the date on which such specified additional information is received by the Secretary.

(C) APPROVAL FOR FAILURE TO MEET DEADLINE.—If the Secretary fails to meet the deadline applicable under subparagraph (B) with respect to a State certification, the certification shall be deemed to be approved.

(D) STATE CHALLENGE.—A State that has a certification disapproved by the Secretary under paragraph (B)(i)(I) may challenge such disapproval in the appropriate United States district court.

(ii) CERTIFICATION OF ALL OR SELECTIVE PROTECTIONS.—A certification under this subsection may be submitted with respect to all patient protection requirements or selective requirements.

(iii) RULE OF CONSTRUCTION.—
(A) IN GENERAL.—The term "effective date" means October 1, 2002.
(B) EFFECTIVE DATE.—The amendments to sections 112 through 119 of title 42 of the United States Code (relating to timely access and choice of health care) made by subsection (c)(2) of section 1210 note (42 U.S.C. note) are amended—
(1) in the subsection heading by striking the first 2 words and inserting "INDEFINITE"; and
(2) by striking "as provided in section 1210(d)", in the form of a notice provided not later than 30 days before the date on which such notification is received by the Secretary applicable to the State under this subsection, $500,000,000 for fiscal year 2002, and such sums as may be necessary for each subsequent fiscal year.

(e) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a State with a certification that has been approved under subsection (b) from amending or otherwise modifying State laws or regulations that the approval was based upon.

(f) LIMITATION ON DELEGATION OF FUNCTION.—The Secretary may not delegate the duties and authority provided under section (b) to the Center for Medicare and Medicaid Services.

(g) NONAPPLICABILITY OF PROVISIONS.—Nothing in this section shall be construed to apply the patient protection requirements to States except as specifically provided for in this section.

(i) DISCLOSURE.—In this section:
(A) EFFECTIVE DATE.—The term "effective date" means October 1, 2002.

(B) PATIENT PROTECTION REQUIREMENT.—The term "patient protection requirement" means any one or more of the following requirements:
(A) section 111 (relating to consumer choice options);
(B) section 112 (relating to choice of health care professional);
(C) section 113 (relating to access to emergency care);
(D) section 114 (relating to timely access to specialists);
(E) section 115 (relating to patient access to obstetric and gynecological care);
(F) section 116 (relating to access to pediatric care);

(G) section 117 (relating to continuity of care), but only insofar as a replacement issuer assumes the obligation for continuity of care.

(H) section 118 (relating to access to needed prescription drugs).

(J) section 120 (relating to coverage for individuals participating in approved clinical trials).

(K) section 121 (relating to required coverage for minimum hospital stays).

(L) section 122 (relating to access to information).

(iii) of information relating to any material reduction to the benefits or information described in such subsection or subsection (b) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003; and

(iv) of information relating to the dispensing of a participant, beneficiary, or enrollee or relating to the plan or issuer otherwise reducing coverage or benefits as described in clause (iii), in the form of a notice provided not later than 30 days before the date on which the reduction takes effect; and

SA 827. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

At the appropriate place in title V, insert the following:

SEC. 121. PATIENT ACCESS TO INFORMATION.

(a) REQUIREMENT.—

(B) DISCLOSURE.—

(A) IN GENERAL.—A group health plan, and a health insurance issuer that provides coverage in connection with health insurance coverage, shall provide for the disclosure to participants, beneficiaries, and enrollees—

(i) of the information described in subsection (b) at the time of the initial enrollment of the participant, beneficiary, or enrollee under the plan or coverage;

(ii) of such information on an annual basis—

(C) SELF-INSURED PLANS.—Notwithstanding this section, the patient protection requirements of this Act shall apply to self-insured group health plans as provided for under section 714 of the Employee Retirement Income Security Act.

(d) PATIENT QUALITY ENHANCEMENT GRANTS.

(A) IN GENERAL.—Beginning on the effective date, the Secretary shall award grants to eligible States to enable such States to carry out activities to promote high quality health care.

(B) ELIGIBILITY.—To be eligible to receive a grant under this subsection, a State shall—

(i) be a State described in subsection (c)(1); and

(ii) prepare and submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require.

(C) USE OF FUNDS.—A State may use amounts awarded under this subsection to carry out activities to promote increased health care quality, educate consumers on health care products, provide health care coverage, improve patient safety, carry out enforcement activities with respect to compliance with State patient protection laws, and carry out other activities determined appropriate by the Secretary.

(D) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection, $500,000,000 for fiscal year 2002, and such sums as may be necessary for each subsequent fiscal year.

(E) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to prohibit a State with a certification that has been approved under subsection (b) from amending or otherwise modifying State laws or regulations that the approval was based upon.

(F) LIMITATION ON DELEGATION OF FUNCTION.—The Secretary may not delegate the duties and authority provided under section (b) to the Center for Medicare and Medicaid Services.

(G) NONAPPLICABILITY OF PROVISIONS.—Nothing in this section shall be construed to apply the patient protection requirements to States except as specifically provided for in this section.

(i) DISCLOSURE.—In this section:
(A) EFFECTIVE DATE.—The term "effective date" means October 1, 2002.

(B) PATIENT PROTECTION REQUIREMENT.—The term "patient protection requirement" means any one or more of the following requirements:
(A) section 111 (relating to consumer choice options);
(B) section 112 (relating to choice of health care professional);
(C) section 113 (relating to access to emergency care);
(D) section 114 (relating to timely access to specialists);
(E) section 115 (relating to patient access to obstetric and gynecological care);
(F) section 116 (relating to access to pediatric care);

(G) section 117 (relating to continuity of care), but only insofar as a replacement issuer assumes the obligation for continuity of care.

(H) section 118 (relating to access to needed prescription drugs).

(J) section 120 (relating to coverage for individuals participating in approved clinical trials).

(K) section 121 (relating to required coverage for minimum hospital stays).

(L) section 122 (relating to access to information).

(iii) of information relating to any material reduction to the benefits or information described in such subsection or subsection (b) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003; and

(iv) of information relating to the dispensing of a participant, beneficiary, or enrollee or relating to the plan or issuer otherwise reducing coverage or benefits as described in clause (iii), in the form of a notice provided not later than 30 days before the date on which the reduction takes effect; and

SA 828. Mrs. HUTCHISON submitted an amendment intended to be proposed by her to the bill S. 1052, to amend the Public Health Service Act and the Employee Retirement Income Security Act of 1974 to protect consumers in managed care plans and other health coverage; which was ordered to lie on the table; as follows:

Beginning on page 98, strike line 2 and all that follows through line 21 on page 109, and insert the following:

SEC. 121. PATIENT ACCESS TO INFORMATION.

(a) REQUIREMENT.—

(B) DISCLOSURE.—

(A) IN GENERAL.—A group health plan, and a health insurance issuer that provides coverage in connection with health insurance coverage, shall provide for the disclosure to participants, beneficiaries, and enrollees—

(i) of the information described in subsection (b) at the time of the initial enrollment of the participant, beneficiary, or enrollee under the plan or coverage;

(ii) of such information on an annual basis—

(I) in conjunction with the election period of the plan or coverage if the plan or coverage has such an election period, or

(ii) in the case of a plan or coverage that does not have an election period, in conjunction with the beginning of the plan or coverage;

(iii) of information relating to any material reduction to the benefits or information described in such subsection or subsection (b) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003; and

(iv) of information relating to the dispensing of a participant, beneficiary, or enrollee or relating to the plan or issuer otherwise reducing coverage or benefits as described in clause (iii), in the form of a notice provided not later than 30 days before the date on which the reduction takes effect; and

In this section:

CONGRESSIONAL RECORD—SENATE
used in making coverage determinations by

(1) any in- and out-of-network benefits;

(2) any in- and out-of-network benefits;

(3) any specific exclusions or express limi-

(B) any out-of-pocket expense for

(C) any specific exclusions or express limi-

(2) Cost Sharing.—A description of any cost-

(3) Compensation Methods.—A summary
description by category of the applicable
methods (such as capitation, fee-for-service,
salary, bundled payments, per diem, or a
combination thereof) used for compensating
potential or treating health care profes-
sionals (including primary care providers
and specialists) and facilities in connection
with the provision of health care under the
plan or coverage.

(c) Additional Information.—The infor-
mational materials to be distributed under
this section shall include for each option avail-
able under the group health plan or health
insurance coverage described in the follow-
ing:

(1) Benefits.—A description of the covered
benefits, including—

(A) any in- and out-of-network benefits;

(B) any specific exclusions or express limi-
tations on benefits described in section
104(b)(3)(C);

(D) any other benefit limitations, includ-
ing any annual or lifetime benefit limits and
any monetary limits or limits on the number of
visits, days, or services, and any specific
coverage exclusions; and

(E) any definition of medical necessity used
for determining whether a particular item,

(F) any cost-sharing requirements, includ-
ing—

(1) any premiums, deductibles, coinsur-
formance, copayment amounts, and liability
for balance billing, for which the participant,

(2) any maximum out-of-pocket expense

(C) any specific exclusions or express limi-
tations on benefits described in section
104(b)(3)(C);

(3) Choice of Primary Care Provider.—A
description of the circumstances and condi-
tions under which participation in clinical trials
is covered under the terms and conditions of the plan
or coverage, and the right to obtain coverage
for approved clinical trials under section 119
if such section applies.

(7) Clinical Trials.—A description of the

(6) Speciality Care.—A description of the
requirements and procedures to be used by
participants, beneficiaries, and enrollees in
accessing specialty care and obtaining refer-
als to participating and nonparticipating
specialists, including any limitations on
choice of health care professionals referred
determined by the plan or issuer.

(5) Preauthorization Requirements.—A
description of the requirements and pro-
cedures to be used to obtain preauthorization
for health services, if such preauthorization
is required.

(4) Translation Services.—A summary
description of any translation or interpreta-
tion services (including the availability of
printed information in languages other than
English, audio tapes, or information in
Braille) that are available for non-English
speakers and participants, beneficiaries,
and enrollees with communication disabilities
and a description of how to access these
items or services.

(14) Accreditation Information.—Any in-
formation that is made public by accrediting
organizations in the process of accreditation
if the plan or issuer is accredited, or any ad-
cisional quality indicators (such as the re-
sults of enrollee satisfaction surveys) that
are made public by the plan or issuer.

(15) Notice of Requirements.—A descrip-
tion of procedures used and require-
ments (including circumstances, timeframes,
and appeals rights) under any utilization re-
view program under sections 101 and 102,
including any drug formulary program under
section 118.

(17) External Appeals Information.—Ag-
gregate information on the number and out-
come of external medical reviews, relative
to the sample size (such as the number of
covered lives) under the plan or under the
coverage of the issuer.

(16) Utilization Review Activities.—A de-
scription of procedures used and require-
ment for obtaining coverage for approved
clinical trials under section 119 if such
section applies.

(9) Emergency Services.—A summary of
the rules and procedures for accessing emerg-
cency services, including the right of a par-
ticipant, beneficiary, or enrollee to obtain
emergency services under the prudent
layperson standard under section 113, if such
section applies, and any educational infor-
mation that the plan or issuer may provide
regarding the appropriate use of emergency
services.

(10) Claims and Appeals.—A description of
the procedures and process to be used
in determining whether a particular item,

(8) Prescription Drugs.—To the extent
the plan or issuer provides coverage for prescrip-
tion drugs, a description of how to obtain
coverage for prescription drugs included in a for-
mulary, a description of any provisions and
cost-sharing required for obtaining on-
and off-formulary medications, and a descrip-
tion of the rights of participants, beneficiaries,
and enrollees in obtaining access to access to
prescription drugs under section 118 if such
section applies.

(11) Advance Directives and Organ Dona-
tion.—A description of procedures for ad-
vanced directives and organ donation deci-
sions that the plan or issuer maintains such
procedures.

(12) Information on Plans and Issuers.—
The name, mailing address, and telephone
number or numbers of the plan admin-
istrator and the issuer to be used by partici-
ants, beneficiaries, and enrollees seeking
information about plan or coverage benefits
and services, payment of a claim, or author-
ization for services and treatment. Notice of
whether the benefits under the plan or cov-
erage are provided under a contract or policy
of insurance issued by an issuer, or whether
benefits are provided directly by the plan
sponsor who bears the insurance risk.

SEC. 303. LIMITATION ON CERTAIN CLASS ACTION LITIGATION.

Section 302 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1132), as amended by section 302, is further amended by adding at the end the following:

"(1) in general.—Any claim or cause of action that is maintained under this section in connection with a group health plan, or health insurance coverage issued in connection with a group health plan, as a class action, derivative action, or as an action on behalf of any group of 2 or more claimants, may be maintained only if the class, the derivative claimant, or the group of claimants is limited to the participants or beneficiaries of a plan that is established or maintained by a single or jointly established plan sponsor. No action maintained by such class, such derivative claimant, or such group of claimants may be joined in the same action with any action maintained by another class, derivative claimant, or group of claimants or consolidated for any purpose with any other proceeding. In this paragraph, the term ‘group health plan’ and ‘health insurance coverage’ have the meanings given such terms in section 738."
of a State law under this subsection solely because it provides for greater protections for patients than those protections otherwise required to establish substantial compliance.

(5) Petitions.—

(A) Petition PROCESS.—Effective on the date on which the provisions of this Act become effective, as provided for in section 401, a group health plan, health insurance issuer, participant, beneficiary, or enrollee may submit a petition to the Secretary for an advisory opinion as to whether or not a standard or requirement under a State law applicable to the plan, issuer, participant, beneficiary, or enrollee that is not the subject of a certification under this subsection, is superseded under subsection (a)(1) because such standard or requirement prevents the application of a requirement of this title.

(B) Opinion.—The Secretary shall issue an advisory opinion with respect to a petition submitted under subparagraph (A) within the 60-day period beginning on the date on which such petition is submitted.

(d) Definitions.—For purposes of this section:

(1) State law.—The term “State law” includes all laws, decisions, rules, regulations, or other State action having the effect of law, of a State, of the United States applicable only to the District of Columbia shall be treated as a State law rather than a law of the United States.

(2) State.—The term “State” includes a State, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, any political subdivisions of such, or any agency or instrumentality of such.

On page 132, between lines 11 and 12, insert the following:

SEC. 203. COOPERATION BETWEEN FEDERAL AND STATE AUTHORITIES.

Part C of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–91 et seq.) is amended by adding at the end the following:

SEC. 2793. COOPERATION BETWEEN FEDERAL AND STATE AUTHORITIES.

“(a) Agreement with States.—A State may enter into an agreement with the Secretary for the delegation to the State of some or all of the Secretary’s authority under this title to enforce the requirements applicable under title I of the Bipartisan Patient Protection Act with respect to health insurance coverage offered by a health insurance issuer and with respect to a group health plan that is a non-Federal governmental plan.

“(b) Delegations.—Any department, agency, or instrumentality of a State to which authority is delegated pursuant to an agreement entered into under this section may, if authorized under State law and to the extent consistent with such agreement, exercise the powers of the Secretary under this title which relate to such authority.’’.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, June 27, 2001 at 10 a.m., in open session to consider the nominations of Doinel M. Aviles to be Assistant Secretary of the Navy (Financial Management and Comptroller); Reginald Jude Brown to be Assistant Secretary of the Army (Manpower and Reserve Affairs); Steven A. Cambone to be Deputy under Secretary of Defense for Policy; Michael Montelongo to be Assistant Secretary of the Air Force (Financial Management and Comptroller); and John J. Young, Jr. to be Assistant Secretary of the Navy (Research, Development and Acquisition).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the sessions of the Senate on Wednesday, June 27, 2001 at 9:30 a.m. to hold a nomination hearing as follows:

Nominees: Mr. Clark Kent Ervin, of Maryland, to be Coordinator for Counterterrorism, with the rank of Ambassador at Large to be introduced by Hon. Paul S. Sarbanes.

Mr. Clark Kent Ervin, of Maryland, to be Coordinator for Counterterrorism, with the rank of Ambassador at Large to be introduced by Hon. Paul S. Sarbanes.

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, June 27, 2001 at approximately 11:15 a.m. to hold a nomination hearing as follows:

Nominees: Mr. Pierre-Richard Prosper, of California, to be Ambassador at Large for War Crimes Issues.

Mr. William A. Eaton, of Virginia, to be Assistant Secretary of State (Administration).

General Francis Xavier Taylor, of Maryland, to be Coordinator for Counterterrorism, with the rank of Ambassador at Large to be introduced by Hon. Paul S. Sarbanes.

Mr. Clark Kent Ervin, of Texas, to be Inspector General, Department of State to be introduced by Hon. Phil Gramm.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, June 27, 2001 at approximately 11:15 a.m. to hold a nomination hearing as follows:

Nominees: Mr. Pierre-Richard Prosper, of California, to be Ambassador at Large for War Crimes Issues.

Mr. William A. Eaton, of Virginia, to be Assistant Secretary of State (Administration).

General Francis Xavier Taylor, of Maryland, to be Coordinator for Counterterrorism, with the rank of Ambassador at Large to be introduced by Hon. Paul S. Sarbanes.

Mr. Clark Kent Ervin, of Texas, to be Inspector General, Department of State to be introduced by Hon. Phil Gramm.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a markup on “Protecting the Innocent: Ensuring Competent Counsel in Death Penalty Cases” on Wednesday, June 27, 2001 at 10:00 a.m., in SD 226. No witness list is available yet.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. DORGAN. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Wednesday, June 27, 2001 at approximately 1:30 p.m. to receive testimony from the U.S. Commission on Civil Rights regarding its latest report on the November 2000 election and from other witnesses on election reform in general.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DORGAN. Mr. President, I ask unanimous consent that the Select
Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, June 27, 2001 at 2:30 p.m., to hold a hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ECONOMIC POLICY

Mr. DORGAN. Mr. President, I ask unanimous consent that the Subcommittee on Economic Policy of the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on June 27, 2001 to conduct a hearing on "The Reauthorization of the Defense Production Act."

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT, RESTRUCTURING AND THE DISTRICT OF COLUMBIA

Mr. DORGAN. Mr. President, I ask unanimous consent that the Subcommittee on Oversight of Government Management, Restructuring and the District of Columbia of the Committee on Governmental Affairs be authorized to meet on Wednesday, June 27, 2001 at 10:00 a.m., for a hearing to examine "Finding a Cure to Keep Nurses on the Job: The Federal Government’s Role in Retaining Nurses for Delivery of Federally Funded Health Care Services."

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY, JUNE 28, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:15 a.m. on Thursday, June 28. I further ask consent that on Thursday, immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the Patients’ Bill of Rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, tomorrow the Senate will convene at 9:15 a.m. and resume consideration of the Patients’ Bill of Rights. There will be 30 minutes of debate on the Collins and Breaux amendments regarding scope, with two rollcall votes beginning at approximately 9:45 a.m. Additional rollcall votes will occur throughout the day and into the evening.

The majority leader has told me it is his hope that we will complete this bill tomorrow rather than on Friday or Saturday. We have made great progress today. The minority manager, Senator GREGG, has done very good work. We have our managers—Senator MCCAIN, Senator KENNEDY, and Senator EDWARDS—who have done outstanding work. We have really made great headway. So the light at the end of the tunnel is there. It is up to us whether we take that opportunity to finish this.

Then there is the supplemental appropriations bill which needs to be done, and also the organizing resolution.

ADJOURNMENT UNTIL 9:15 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 7:18 p.m., adjourned until Thursday, June 28, 2001, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate June 27, 2001:

NATIONAL TRANSPORTATION SAFETY BOARD

JOHN ARTHUR HAMMERSCHMIDT, OF ARKANSAS, TO BE A MEMBER OF THE NATIONAL TRANSPORTATION SAFETY BOARD FOR THE REMAINDER OF THE TERM EXPIRING DECEMBER 31, 2002, VICE JAMES E. HALL, RESIGNED.

DEPARTMENT OF VETERANS AFFAIRS

CLAUDE M. KICKLIGHTER, OF GEORGIA, TO BE AN ASSISTANT SECRETARY OF VETERANS AFFAIRS (POLICY AND PLANNING), VICE DENNIS M. DUFFY, RESIGNED.
The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. Shaw).

Designation of the Speaker pro Tempore

The Speaker pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
I hereby appoint the Honorable E. CLAY SHAW, Jr. to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

Prayer

Bishop Michael Tyrone Cushman, General Overseer, National Association of the Church of God, West Middlesex, Pennsylvania, offered the following prayer:

Dear Kind and Gracious Heavenly Father, it is with praise and adoration we bow before You on this wonderful day. It is with awe and honor we worship Your holy presence and invite You to dwell in the midst of these men and women who were made by Your hands and fashioned for this very moment.

We acknowledge that all wisdom comes from You. We confess this morning that You are our eternal Father and You are the very essence of love itself, and that we are created in Your loving just and merciful image, and that Your ultimate will is that we love each other unconditionally as we are loved by You.

Please, Kind Sir, bless us this day with the spirit of reconciliation. Endow us with a fresh anointing of grace and tolerance. Empower us to deliberate through the dilemmas and conflicts of purpose and opinion. Equip us to accept what we cannot change. Embolden us to change the unacceptable and enlighten us with uncanny wisdom to strike the compromises that glorify You and dignify every human being.

Now, My Father, bless this House, O Lord we pray. Keep it safe by night and day. In the strong name of Jesus we trust and pray. Amen.

The Journal

The Speaker pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. McNULTY. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The Speaker pro tempore. The question is on the Speaker's approval of the Journal.

The question was taken: and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. McNULTY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The Speaker pro tempore. Pursuant to clause 8, rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

Pledge of Allegiance

The Speaker pro tempore. Will the gentleman from Texas (Mr. BRADY) come forward and lead the House in the Pledge of Allegiance.

Mr. BRADY of Texas led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

Welcome to Guest Chaplain, Pastor Michael Tyrone Cushman, Sr.

(Mr. SCHIFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHIFF. Mr. Speaker, I would like to join you in welcoming today's distinguished guest chaplain, Pastor Michael Tyrone Cushman, Sr., and thank him for leading the House in prayer. As first General Overseer of the National Association of the Church of God, Pastor Cushman is responsible for more than 400 churches in the United States, Caribbean, and Africa.

For 22 years, Reverend Cushman served at the Pasadena Church of God in Pasadena, California, one of the most thriving churches in our region. Pastor Cushman distinguished himself as a force for racial reconciliation and more harmonious human relations in southern California. In his new position, his mission is to unify the black and white branches of the Church of God.

I am proud to say, that although Dr. Cushman will travel the world in his new position, he and his wife, Jacqueline, will maintain a home in Altadena, California, which I am proud to represent. Although we will sorely miss his influence in our community on a daily basis, I am happy to note that he will maintain an advisory role at the Pasadena Church of God.

I am proud to welcome Chaplain Cushman here today as our guest chaplain.

America's Energy Policy

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, while California experiences blackouts, and respirating equipment that is needed for those critically ill goes silent, Gray Davis is hyperventilating and pointing fingers at Washington.

Let us review the Democratic energy policy over the last 8 years under the past administration. Let me see: Hazel O'Leary, Secretary of Energy, goes to the Taj Mahal and spends $1 million of taxpayer money to beautify it before she arrives.

Let me see: Bill Richardson, while on his watch, loses our Nation's energy secrets, and we become vulnerable to outside influences.

During the last campaign, when energy prices were skyrocketing, the Clinton White House's brilliant idea was to reduce and use the oil from the strategic reserves.

Sound bite politics from their side, sensitive politics from ours. We are working on the energy needs of America. We are seeking a plan that will revolutionize the way we are dependent on oil. We are looking at a conservation model. We are looking at new technology. We are coming up with answers, not rhetoric.

I admonish the Democrats to start participating and stop finger-pointing. And Gray Davis could lead the parade by stop spending $30,000 of taxpayer money a month for political consultants and start working with energy consultants to save his State.

Sign Discharge Petition on Cost-Based Energy Pricing

(Mr. INSLEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. INSLEE. Mr. Speaker, last week, in California, three former employees...
of generators of electricity testified that they turned off their equipment at the demand of their bosses that resulted in driving up electric prices on the west coast. This House should do something about that.

What I urge my colleagues to do is to come to the well of the House and sign a discharge petition for a bill that will create a short-circuit to stop the meltdown of the energy market on the west coast. I do that on behalf of the small business people who are losing their businesses today, last week, next week, because of the thousand percent increases in wholesale electrical rates on the west coast, which are unprecedented, wrong, unconscionable, and should be illegal.

The Federal Energy Regulatory Commission, finally, because we dragged them kicking and screaming for the last 4 months, finally did something a few days ago, but it is clear it is not enough. We need to keep their feet to the fire. I urge my colleagues to sign the discharge petition in the well of the House today.

Mr. TRAFICANT. Mr. Speaker, the pit bull is the most ferocious dog in the world, but nobody told that to Margaret Hargrove of Florida. When a pit bull clamped his massive jaws around her small Scot terrier’s neck, Margaret ferociously bit the pit bull back.

Now, if that is not enough to sanitize your fire hydrant, folks, the pit bull then turned on Margaret and attacked her. Margaret then attacked the pit bull so ferociously that she drove him away.

Beam me up. Do not take this woman to a drive-in movie. Do not forget to feed her terrier. My colleagues, never bite Margaret Hargrove of Florida.

I yield back the need to hire Margaret Hargrove at the Internal Revenue Service to straighten those people out.
CALIFORNIA AND THE WEST COAST ELECTRICITY MARKET HAS BEEN ILLEGALLY MANIPULATED

(Mr. FILNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FILNER. Mr. Speaker, evidence continues to mount that California and the west coast electricity market has been illegally manipulated, and consumers are entitled to billions of dollars for illegal overcharges since last summer.

We just heard about the need for production. Let me tell my colleagues what is happening to plants in California. Last week in sworn testimony to the State senate, three employees of the Duke energy plant in my district in Chula Vista, California, testified that they took the plant out of production for economic reasons. That is to boost the price of electricity at times, including the worst emergencies that were declared in California. At stage 3 alerts, the generators were taken down. They were told to throw away spare parts, so it would take longer to correct any problems that did appear. The manipulation of the market is clear. The illegal manipulation of the market is clear.

Mr. Speaker, all my colleagues should sign the discharge petition at the well this morning to make sure that we get a vote on restoring equanimity to the electrical markets of California, and consumers get refunds for illegal prices.

PRICE CAPS ARE A BAD IDEA

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, even though they violate every principle of free market economics, every principle of common sense, even though they would not produce one drop of oil or one watt of electricity, some Members keep calling for price caps.

Many of us have been trying to explain to the government—has-all-of-the-answers crowd why price caps are a bad idea. But, Mr. Speaker, some Members would rather score political points by claiming to have an easy answer, even though they will really be harming the consumers they pretend to be defending.

The Department of Energy released a study that showed that price controls would cause the California blackouts to get worse. There is no easy fix to this energy crunch, and we should not trust anyone who tells us it is possible to cure it through boosting production and greater conservation. If we have more supply and lower prices, there is no other way.

PATIENTS' BILL OF RIGHTS WILL NOT GENERATE LAWSUITS

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, it is interesting to hear this controversy being expressed as we cannot do this, and we cannot do that. Although I am here to talk about the Patients' Bill of Rights, I believe that the industry recognizes that something must be done to help Americans with the energy crisis, and I believe cooler heads would welcome the opportunity to put a moratorium on pricing.

But, Mr. Speaker, I want to talk about the misrepresentation of the Patients' Bill of Rights by its opponents, and I want to say there is no evidence that the insured will sue employers recklessly. There is no evidence that there will be frivolous lawsuits by those who are insured. I come from the State of Texas that has had a Patients' Bill of Rights for almost 5 years.

There is evidence that the Patients' Bill of Rights, the Ganske-Dingell bill, will provide every American the right to choose their own doctors and restore the patient and physician relationship, that it will cover all Americans with employer-based health care insurance, that it features all external reviews of medical decisions conducted by independent and qualified physicians and not HMO bureaucrats, that it will hold HMOs accountable. That is the evidence. We need to pass a real Patients' Bill of Rights.

RULE OF LAW PROHIBITS HARVESTING OF STEM CELLS FROM HUMAN EMBRYOS

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, I rise today as a strong advocate of the rule of law and the right to life. That is why I urge the administration to faithfully execute the 1996 law adopted by this Congress prohibiting the use of taxpayer dollars to finance the harvesting of stem cells from human embryos. Just last month the administration tried to trample this law through regulations is no excuse for this administration to fail in its oath to faithfully execute the laws adopted in this Congress. The clear language of the 1996 law, the high principle of the sanctity of human life and the enormous promise of adult stem cell research all argue that this President and this administration should choose life.

PUT MEDICAL DECISIONS BACK IN THE HANDS OF DOCTORS AND PATIENTS

(Ms. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. McCOLLUM. Mr. Speaker, let us put medical decisions back in the hands of doctors and patients and ahead of special interests and their slick TV commercials. Let us pass a strong Patients' Bill of Rights.

In my home State of Minnesota, I worked very hard, and in Minnesota, like many other States, we have strong patient protection laws. Those who are covered under Minnesota law have access to specialists when they need them. Every American deserves that right. No one should have to jump through hoops or swim a sea of red tape to get the doctor they need when they need to see one. A patient's doctor knows when they need to see a specialist, and Americans should not have to wait for approval by some profit-driven bureaucrats.

Mr. Speaker, I urge my colleagues to support the bipartisan Ganske-Dingell bill. It is time for sound, responsible managed care reforms and meaningful patient protection.

THE RIGHT APPROACH TO ENERGY

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, today Californians are experiencing rolling blackouts, rising energy costs and out-of-control gasoline prices. I fear that this will happen in the other States if we are not careful. The solution to our current energy crisis is simple; choose competition, not more regulation and price controls like the discharge petition that the Democrats are talking about.

Governor Davis, with the support of environmentalists and government control advocates, raised barriers and actively sought to prohibit the construction of new power plants. Now the Democrats in Washington want to make the Gray Davis approach to energy the national approach to our energy here in Washington.

Mr. Speaker, it is clear what the results will be if they achieve their goal. What is happening in California will happen in the rest of the country. Blackouts will roll from California all the way to the eastern seaboard. From family to farmer, all Americans will be affected. We do not want this to happen.

We need to have choice and competition, let there not be a recurrence. Let us take the right approach to energy, and work to increase production, reduce regulation and encourage conservation.
IT IS TIME TO PASS A REAL PATIENTS’ BILL OF RIGHTS

(Mr. DAVIS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAVIS of Illinois. Mr. Speaker, emergency room nurses are in town, and I commend and congratulate them for the outstanding work they do. This is also a great time to pass a real Patients’ Bill of Rights, one like the Ganske-Dingell bill that ensures that medical decisions come before business decisions, one that ensures that doctors and patients and nurses have the opportunity to decide what kind of treatment there ought to be. It ensures that external review of individuals who do not have a self-interest are the ones making the decisions and recommendations.

Mr. Speaker, it is not like the bill that was introduced yesterday, that allows HMOs to do their own reviewing, to have their own internal reviews to determine whether or not what they are doing is good and right. That is like having the fox guard the chicken house.

Mr. Speaker, if we want to be real, we will pass the Ganske-Dingell bill for real patients’ rights.

AMERICA HAS RESPONSIBILITY TO MEET MORE OF OUR OWN ENERGY NEEDS

(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, even though President Bush inherited the energy problem, I appreciate that he is shooting straight with the American people about what it will take to have reliable, affordable and environmentally clean energy for our country.

America, we do have the responsibility to meet more of our own energy needs. Common sense tells us we will need a balanced game plan based on conservation, on new technology and new supply. There are no shortcuts, no Band-Aids, no steps that we can skip.

The discharge petition Members see today is, more Hollywood theatrics, more Band-Aids, and we simply cannot afford it. If we work together, Republican and Democrat, CEO and environmentalist, we are capable, and we can achieve energy independence.

Mr. Speaker, this issue is more than economics, it is one of national security. As long as America relies on OPEC and foreign countries for more than half of our daily energy needs, we are vulnerable. And there is no need why the most prosperous Nation in the world cannot take responsibility for our own energy needs. It is time for America to take responsibility for America’s energy.

THE PHARMACEUTICAL INDUSTRY IS AT IT AGAIN

(Mr. SANDERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SANDERS. Mr. Speaker, the pharmaceutical industry is at it again. This industry which has spent $200 million in the last 3 years to defeat all efforts to limit the cost of prescription drugs, this industry which uses 300 paid lobbyists here on Capitol Hill, continues to charge the American people by far the highest prices in the world for the same exact prescription drugs.

Mr. Speaker, American women should not have to go over the Canadian border to buy tamoxifen, a breast cancer drug, for one-tenth the price that it is charged in the United States. Seniors should not have to go to Mexico or Europe to pick up the same drugs for a fraction of the price.

Mr. Speaker, in a globalized economy, prescription drug distributors and pharmacists should be able to purchase and sell FDA safety-approved medicine at the same prices as in other countries. The passage of reimportation will lower the cost of medicine in this country by 30 to 50 percent. Let us pass the Sanders-Crowley-DeLauro amendment in the agriculture appropriations bill, which will allow Americans to get fair prices for their prescription drugs.

AMERICA NEEDS TO BE NET Exporter OF POWER, NOT Net Importer

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, to my colleagues out West, I want to remind them the best way to get to a most efficient market is allow the market to work. If this country wants low-cost, reliable electricity, we must have a diverse energy portfolio. We must have coal, nuclear, hydro, renewables, and expand our base load generating capacity. If we want low-cost fuel, we need to drill for it and transport it and refine it. States need to be net exporters, not net importers of power generation.

Our country needs to be a net exporter of power, not a net importer of power.

Mr. Speaker, I applaud the State of Illinois and Governor Ryan for passing and signing the Empower Illinois Act, which will incentivize clean coal technology and generation in southern Illinois, and I applaud my colleague, the gentleman from Virginia (Mr. BOUCHER) and the gentleman from Kentucky (Mr. WHITFIELD), and support the Neely Jones Act. It is the same thing with a national energy policy, that we will push through the Committee on Energy and Commerce on the floor of the House later on this fall.

SOLVING ENERGY PROBLEMS

(Mr. HAYWORTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYWORTH. Mr. Speaker, if we could harness some of the wind power this morning, we could solve our energy problem. If we could take the blame game and convert it to Btus, we would have energy to last for a long time.

Mr. Speaker, we ought to bring in a lot of different people and put them under oath in front of the Committee on Resources, in front of our various oversight committees, and get the answer. I do not countenance any misconduct by anyone, but I will tell you what is interesting: when the Governor of California had a chance to put emergency generators online, he said, Oh, no. If those folks are not going to be union employees, I do not want to see them generators.

When the Governor of California had a chance to work out these problems, he took $1 million from the same utility companies my friend from Oregon
Along with conservation efforts, technological advancements will allow us to meet our energy needs for decades, even centuries to come. New technologies, like gasoline-electric hybrid cars, clean coal, hydrogen fuel, second-generation geothermal, and other such innovators, will allow us to solve the problems like those in California, while ensuring a clean environment as our legacy for our children.

Mr. Speaker, California’s fast-paced society is not capable of supporting itself through energy shortages and rolling blackouts. Neither is the rest of the country. However, since Governor Gray Davis has been showing more interest in his political consultants rather than his constituents, the crisis in his homeland has begun spreading like a catastrophe and has put the Nation on the brink of engulfing other States. It is time to take action now.

SUPPORT THE BIPARTISAN PATIENTS’ BILL OF RIGHTS
(Mr. BROWN of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROWN of Ohio. Mr. Speaker, let us get down to basics. Some health plans systematically obstruct, delay and deny care. Some health plans provide excuses instead of coverage. The bipartisan Patients’ Bill of Rights has enough teeth in it to deter health plans from cheating their enrollees and ensure enough definition in it to protect health plans and employers from frivolous lawsuits.

Yesterday, my Republican colleagues, the gentleman from Kentucky (Mr. FLETCHER), the gentleman from Louisiana (Mr. TAUZIN) and the gentleman from California (Mr. THOMAS), introduced legislation endorsed by President Bush and written by the largest insurance companies in the country. It does not give enrollees the right to sue. The language is drafted so that the right to sue cannot actually be exercised.

The Republican bill is a sham. I ask President Bush to work with us to put insurance interests aside, to put campaign contributions from insurance interests aside, to work with us in the bipartisan Patients’ Bill of Rights. That is the bill that protects patients. That is the bill that restores the patient-physician relationship.

SUPPORT PRESIDENT’S SOUND ENERGY PLAN
(Mr. RYUN of Kansas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYUN of Kansas. Mr. Speaker, President Bush has outlined what I think is a sound energy policy that is both forward thinking and sensible, but opposed by his plan sound like a broken record, accusing the President of being anti-environment.

The assertion that we must choose between sound energy policy and healthy environment is simply not true. As an example, we need to look no further than the clean air standards for California, which have helped to bring the air pollution for fuel resulted in refineries using additives that produced clean air, but polluted the groundwater. That is, until the development of ethanol.

Ethanol is a biofuel that is produced from corn and grain sorghum. It protects our quality of air by reducing tailpipe emissions and greenhouse emissions. And as an added bonus, ethanol can provide help for our economy, especially our American farmers, and not for OPEC. I, for one, would rather depend upon the good graces of a Kansas farmer than foreign oil producers.

Mr. Speaker, I urge my colleagues to support the President’s sound energy policy.

REDUCING SUPPLY TO INCREASE PRICES
(Mr. TIERNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TIERNEY. Mr. Speaker, people this morning have been talking about the energy situation, and I think it is important to talk calmly for a moment about some of the things that have been happening.

I happen to be a member of the Subcommittee on Energy of the Committee on Government Reform, and we have had hearings with the American Petroleum Institute and others from the industry testifying before us. Also, Senator WYDEN in the Senate has taken testimony on this matter.

It is important for the American people to know that there is strong evidence that the industry acted to make sure that they reduced supply so that they could raise costs. Senator WYDEN had thick documents, which I have just put on record in our committee hearing, showing over the last decade of the nineties there was too much refinery backlog for the companies, so they acted, or at least indicated they were going to act, to make sure that those refineries shrunk. Over 50 of them have closed.

Therefore, we did not have the kind of supply that we needed; and of course, that drove up demand and drove up price. Now that that is up there, the companies will tell you the reason we do not have enough fuel at reasonable prices is because we do not have enough refineries.

Now they are looking for the triple play. Instead of producing more and getting that in the pipeline and having more refineries, they now want to do away with environmental regulations. This is not something we should allow to happen. We should keep our eye on that industry and make sure we get something done for the consumer.
CALIFORNIA ENERGY CRISIS

(Mr. HERGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HERGER. Mr. Speaker, we have an energy crisis. Eight years of Clinton-Gore no-growth energy and Federal environmental policies have left us facing frequent shortages.

In my home State of California, the population has grown by 4 million people over 10 years. The economy has doubled in half that time. Sadly, the radical environmentalists have prevented the construction of new power plants.

The equation is simple: more people and no power plants equal blackouts. Rather than place blame, President Bush has proposed a responsible solution that seeks to address our dire situation, supply while offering incentives to reduce demand.

While California is already the most energy efficient State in the country, the President’s comprehensive policy will promote new power plant construction. It is not necessarily political, but it recognizes that there are no quick fixes to the years of policies that forced us deep into the dark.

SUPPORT BIPARTISAN PATIENT PROTECTION ACT

(Ms. DeLAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DeLAURO. Mr. Speaker, Americans need a Patients’ Bill of Rights. Every single day we hear stories of patients whose health has been seriously jeopardized because their health plan has denied coverage. Each day 35,000 patients experience a delay in needed care and 7,000 patients per day are denied referral to a medical specialist.

Doctors are unable to make the best medical decisions for their patients because their hands are tied by the insurance companies. What we need to do is to return those medical decisions back to doctors and patients and out of the hands of insurance companies. We need a Patients’ Bill of Rights that grants access to specialists, allows patients to choose their own doctors, lifts physician gags that prohibit doctors from talking about medical options, allows for access to emergency rooms, and, yes, holds HMOs accountable for negligent actions.

These patient protections are long overdue. The Republican leadership has watered down meaningful bipartisan legislation to protect another special interest, the managed care organizations. They want to give HMOs special protection from lawsuits, while weakening patients’ ability to hold health plans accountable.

Vote for Dingell-Norwood. Support the bipartisan Patient Protection Act.

CONGRESSIONAL RECORD—HOUSE

BECOMING ENERGY SELF-RELIANT

(Mr. REHBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REHBERG. Mr. Speaker, let us put all the political posturing and gamesmanship aside and be honest: the major causes of high energy prices this summer will be the lack of domestic energy production and the absence of new investments in the electricity generation facilities needed to meet the growth experienced over the last decade.

That is why becoming more energy self-reliant is so important. If we want an uninterrupted supply of energy, then we need more American oil, American gas, and clean coal. In Montana alone, we have several hundred years’ worth of natural gas and coal deposits. Current estimates place place coal resources on the current 250 billion tons, two-thirds of which is low-sulfur, clean-burning coal.

In developing these resources, it is important that we keep in mind that America has some of the highest environmental standards and most advanced technology in the world. Our strict laws do a good job of ensuring our environment is protected.

The bottom line is this: relying upon foreign sources of energy for the first time is a clear indication that America is a country that pays a utility bill or puts gas in the tank within the last month and knows we have an energy crunch in this country.

SUPPORT A REAL PATIENTS’ BILL OF RIGHTS

(Ms. CARSON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. CARSON of Indiana. Mr. Speaker, as many of you know, when I was elected to the United States Congress, prior to being sworn in, I had to walk into a hospital in Indianapolis, Indiana, and announce that I believed I was on the verge of a heart attack. Because I was an elected Member of Congress, I did not have to get permission from anybody to get the best medical services that Indianapolis, Indiana, had to offer. That is why I stand before you today on behalf of all of the people who seek the services from HMOs who do not happen to be a Member of the United States Congress.

The President of the United States claims credit for the HMO reform bill that passed in Texas when he was Governor. You would think that a person who claims credit for an issue would work hard to put it into practice at his new job.

It is not right for the HMOs to take money from people they are supposed to serve and then deny them the service when those same people need help. We need to pass the Patients’ Bill of Rights bill that holds health plans accountable when they harm a patient, protect patients from paying out of pocket for emergency room services, provide an independent appeal process, and guarantee that treatment decisions are based on medical, and not financial, concerns. Those were included in Texas law.

The President needs to stop trying to negotiate away from his own law, and support the same bill he said he supported in Texas, the Dingell-Ganske-Norwood Patients’ Bill of Rights.

A BALANCED APPROACH TO ENERGY

(Mrs. WILSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. WILSON. Mr. Speaker, it costs $1.60 cents a gallon when I filled up my tank on the corner of Alameda and 4th Street this weekend. Anybody in this country that pays a utility bill or puts gas in the tank within the last month knows we have an energy crunch in this country.

I think everybody, most everybody, knows that Band-aids are not answers, and there are not any quick fixes that are going to solve the problems of energy in this country. I need a balanced, long-term approach, no Band-aids, no quick fixes, to give us stability in our energy markets.

I think it is too important to do anything but the right thing. That is going to require all of us to work together to do the right thing. We need to start with conservation. We made tremendous progress in this country with conservation in the last 20 years; and we are not going back, and nobody wants to. But we also have to increase the supplies of energy in this country, responsibly explore for energy in nonpark land, and give ourselves a mix of supply. It is only the balanced approach that will give us the energy that we need.

BAN DRILLING FOR OIL AND GAS UNDER GREAT LAKES

(Mr. STUPAK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STUPAK. Mr. Speaker, I rise today to remind my colleagues that today as we do the energy and water bill there will be an amendment by the gentleman from Michigan (Mr. Bonior), the gentleman from Ohio (Ms. KAPTUR), the gentleman from Ohio (Mr. LaTOURETTE), and myself to ban the practice of drilling for gas and oil underneath the Great Lakes.
CONGRESSIONAL RECORD—HOUSE

June 27, 2001

Ms. SOLIS. Mr. Speaker, I would just like to let our colleagues know that today in the State of California, one of the newest generators on Energy Over-sight and talked about all the earnest effort that he has made, and Californians, to conserve energy.

Now, we deserve more attention and support by FERC and this administration. We should provide more energy funding for renewable energy, for con-servation, and obviously provide relief for those ratepayers, the people that pay the bills. We expect to see a refund. Maybe it will not be the $9 billion that Gray Davis is asking for, but surely the people of California and the Western States that are suffering from this energy crisis deserve the very best atten-tion. They are grappling with this problem. They need to have our sup-port.

Mr. Speaker, I ask all Members today to sign the discharge petition, because it is necessary for us to send a message to all citizens of the United States that we are with them on the energy conservation measures.

THE JOURNAL

The SPEAKER pro tempore (Mr. SHAW). Pursuant to clause 8 of rule XX, the pending business is the question of the Speaker’s approval of the Journal. The question is on the Speaker’s ap-proval of the Journal.

The question was taken, and the SPEAKER pro tempore announced that the ayes appeared to have it.

Mr. McNULTY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic de-vote, and there were—yeas 368, nays 49, answered “present” 1, not voting 15, as follows:

[Roll No. 195]

YEAS—368

CONGRESSIONAL RECORD—HOUSE

Whereas two civilians and dozens of firefighters were injured by the blaze, including firefighters Joseph Vosilla and Brendan Manning who were severely injured; whereas John J. Downing of Ladder Company 163, an 11-year veteran of the department and resident of Port Jefferson Station, and a husband and father of two, lost his life in the fire.

Whereas Brian Fahey of Rescue Company 4, a 14-year veteran of the department and resident of East Rockaway, and a husband and father of three, lost his life in the fire: Now, therefore, be it

Resolved, That the House of Representatives—

(1) honors John J. Downing, Brian Fahey, and Harry Ford, who lost their lives in the course of duty as firefighters, and recognizes them for their bravery and sacrifice;

(2) extends its deepest sympathies to the families of these three brave heroes; and

(3) pledges its support and to continue to work on behalf of all of the Nation's firefighters who risk their lives every day to ensure the safety of all Americans.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Virginia (Mrs. JO ANN DAVIS) and the gentleman from Illinois (Mr. DAVIS) each will control 20 minutes. The Chair recognizes the gentlewoman from Virginia (Mrs. JO ANN DAVIS).

HONORING JOHN J. DOWNING, BRIAN FAHEY, AND HARRY FORD, WHO LOST THEIR LIVES IN DUTIES AS FIREFIGHTERS

Whereas Mrs. JO ANN DAVIS of Virginia, Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H. Res. 172.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Virginia?

There was no objection.

Mrs. JO ANN DAVIS of Virginia, Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Resolution 172, and I commend its sponsor, the distinguished gentleman from New York (Mr. GUTTENBERG) for introducing it.

This resolution honors three fighters, John J. Downing, Brian Fahey, and Harry Ford, who lost their lives fighting a fire in Queens, New York, earlier this month.

The resolution also expresses the deepest sympathies of this House for their families. Finally, Mr. Speaker, it pledges that the House will continue to support and work for all American firefighters who risk their lives every day to keep us all safe.

On June 17, 2001, 350 firefighters and numerous police officers responded to a 911 call that sent them to Long Island General Supply Company in Queens, New York; and an explosion in a two-story building had turned the 128-year-old, family-owned store into a heap of broken bricks, twisted metal, and shattered glass; whereas all those who responded to the scene served without reservation and with their personal safety on the line;
Two civilians and dozens of firefighters were injured by the blaze, including two firefighters who were severely injured.

The three firefighters who died were veteran firefighters. Mr. Downing had served for 11 years; Mr. Fahey for 14 years; Mr. Ford for 27. They left behind grieving families. Mr. Downing was a husband and father of two.

Mr. Fahey is survived by his wife and three children. Mr. Ford was a husband and father of three. Nothing this House can say or do, Mr. Speaker, will lessen the losses these families have experienced. At best, we can hope that they will be somewhat comforted by our recognition and appreciation for their loved ones' bravery.

As the House considers this resolution, I also ask my colleagues to remember the dangers and risks that firefighters voluntarily assume every day across the country. By honoring these brave men, we will also honor the sacrifices of all those firefighters who lay their lives on the line day in and day out to protect their neighbors.

On a personal note, Mr. Speaker, I will add that I am the wife of a retired city fire chief. I am personally acquainted with the dangers and challenges that firefighters encounter and extend my sympathies to these families that have lost their fathers and husbands. Those of us whose family members have served as firefighters without suffering serious injuries can count our blessings and can empathize with the loss they must feel. I encourage all Members to support this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself such time as I may consume.

On Father's Day, three brave firefighters died when a massive explosion suddenly ripped through a Queens hardware store, burying them under a avalanche of rubble.

John J. Downing, Brian Fahey, and Harry Ford lost their lives when what seemed like a routine fire turned into a five-alarm blaze. The devastation marked the deadliest day for the New York Fire Department since three firefighters were killed in a pre-Christmas 1998 high-rise blaze in Canarsie, Brooklyn.

The names of Downey, Fahey, and Ford will one day be added to the Fallen Fire Fighter Memorial Wall in Memorial Park in Colorado Springs, Colorado. In front of the memorial wall is a statue called, “Somewhere Everyday.” Somewhere every day firefighters are engaged in acts of heroism and saving lives, as these firefighters were doing on Father’s Day. The “Somewhere Everyday” statue depicts a firefighter descending a ladder and taking the last step of a successful rescue while clutching a child safely within his arms. The rubble from the fire forms the base of the tribute.

In the rubble of the Long Island General Supply Company building are the shattered lives of three wives, eight children, and other family, friends, and colleagues. The memorial is dedicated to them and all that they have lost. I would only hope that they find comfort in knowing that Downey, Fahey, and Ford died doing what they loved and fulfilling their promise to keep their communities safe and the lives and homes of the people they served secure.

Mr. Speaker, I urge support for this resolution.

Mr. Speaker, I ask unanimous consent that I be allowed to yield the rest of my time to a fellow fireman from New York (Mrs. MALONEY) to manage.

The SPEAKER pro tempore (Mr. SHAW). Is there objection to the request of the gentleman from Illinois (Mr. GRUCCI)?

Mr. GRUCCI. Mr. Speaker, I thank the gentlewoman for yielding me this time.

Mr. Speaker, first of all, I would like to take this moment to thank my fellow colleagues in the New York delegation, Governor George Pataki, the Committee on Government Reform, and the Congressional Fire Services Caucus for joining me in honoring these brave men today.

House Resolution 172 honors the memory of the three heroes who lost their lives in the line of duty on Sunday, June 17, 2001. It was a sad Father's Day, when eight children lost their dads and three wives became widows. These men, Harry Ford, 50, of Long Beach; Brian Fahey, 46, of East Rockaway; and John J. Downing, 40, a resident of Port Jefferson Station in my congressional district gave their lives fighting a fire in an effort to save the lives and properties of the people of New York. On that day, as on every other day in their careers, they lived up to the motto of the New York City Fire Department, “New York’s Bravest.”

Along with their fellow firefighters from Rescue Company 14 and Ladder Company 13, Harry Ford, John Downing, and Brian Fahey responded to what they believed was an ordinary five-alarm commercial fire at 2:20 p.m. at a hardware store in Astoria, Queens. As they were battling the blaze, the explosion ripped through the building, trapping firefighters Downing and Ford beneath the rubble of the building’s facade and firefighter Fahey beneath the basement stairwell.

Their fellow firefighters valiantly worked to save them, some waffing off the chemical attentions they themselves needed for injuries sustained in the explosion, as they desperately removed the rubble with their hands. Sadly, these three men had perished.

John Downing, a resident of New York’s First Congressional District, was a loving father of two children, Jo-anne, 7, and Michael, 3, and the husband of Anne, who he married 11 years ago. He was one of seven children in the Downing family, growing up in Woodside, Queens. John was one of four Downing children who went on to pursue public service as a career, joining his brother Dennis as a firefighter, while his brothers James and Joseph became police officers.

Everyone who knew John called him a hero in every sense of the word. Every day he was on the job for the past 11 years as a firefighter. John always gave his all and did his best, whether it was fighting fires or helping firefighters to work better. Everyone in the firehouse knew they could count on John. Knowing this, it was no surprise when firefighter Downing was on the front page of the New York Daily News 3 years ago. He was pictured on that front page as a hero once again, rescuing passengers from a commercial jet that had gone off the runway at LaGuardia Airport into the chilling waters of Flushing Bay.

Firefighting was not John’s entire life, though. He was a family man, doting over his two children and devoted to his wife. In recent weeks, he had been working a second job to bring his family on their first real summer vacation to Ireland, to visit the relatives of his family and his wife. Sadly, when the alarm for his last fire came in, John was just 2 hours away from ending his shift and beginning that vacation. And the alarm he put down the study book he had been reading, preparing to take the exam to become a lieutenant in the fire department, grabbed his gear and answered his last call.

Like other firefighters, these brave men risked their lives every day that they went to work, all in the name of protecting their fellow man. We all sleep a little easier each night, go to work with an easier mind every day, and entrust our children in our schools because we know that men and women like John Downing, Harry Ford, and Brian Fahey stand ready to protect our lives, our families, and our homes.

Colleagues, please join me in supporting this resolution that recognizes the heroism and sacrifice of all firefighters, and particularly of these three brave men.

Mr. Speaker, I will submit for the RECORD the full letter from Governor George Pataki, but the letter simply says: “The five-alarm blaze that engulfed the Long Island General Supply
Company presented a tremendous hazard to Astoria, Queens, neighbors. More than 350 firefighters responded to the scene to ensure the safety of these citizens and their community. In the ensuing battle to extinguish the fire, 50 firefighters were injured, and sadly these three firefighters gave the ultimate sacrifice. Their efforts prevented the fire from spreading; and as a result, no civilians were injured. This tragedy serves as a reminder to all of us that, each day, New York State’s bravest perform their duty with the highest degree of distinction and valor by forsaking their own lives to the benefit of others.

Thank you for offering this resolution and providing the House of Representatives the opportunity of honoring not only these men but all firefighters who readily risk their lives throughout the Nation.” Signed in the signature of Governor George E. Pataki.

Hon. FELIX GRUCCI, House of Representatives, Washington, DC.

DEAR CONGRESSMAN GRUCCI: I want to commend you for your efforts in honoring John J. Downing, Brian Fahey and Harry Ford, the courageous firefighters who tragically lost their lives in the line of duty on June 17, 2001. We all continue to mourn for the family and friends of our fallen heroes.

The five-alarm blaze that engulfed the Long Island General Supply Company presented a tremendous hazard to its Astoria, Queens neighbors. More than 350 firefighters responded to the scene to ensure the safety of these citizens and their community. In the ensuing battle to extinguish the fire, 50 firefighters were injured, and sadly these three firefighters gave the ultimate sacrifice. Their efforts prevented the fire from spreading and caused the violent explosion that took the lives of these men. Because the tragedy does not reoccur so that the selfless sacrifices of these three men, heroes to all New Yorkers, were not in vain.

One of my colleagues is the author of the Fire Safety Act, and I yield to the gentleman before he returns to his committee.

Mr. PASCRELL. Mr. Speaker, we are here to salute brothers Downing, Fahey, and Ford. Too many times, my brothers and sisters here in the Congress, we have forgotten the other half of the public safety equation.

Our words are significant and important. I join with the gentlewoman in sympathy, but we need to do something in the House of Representatives that sends a clear message to all 32,000 fire departments and all 1 million firefighters that we stand with them; otherwise, their deaths will have been in vain.

Mr. Speaker, I encourage Members to join and fund what we say we are going to do. God bless these heroic men and their families.

I thank Congresswoman MALONEY of New York and Congressman GRUCCI for allowing me the opportunity to speak on this important resolution.

As a former mayor of a medium-sized city, I know the importance of fire protection and the role that we play in what I call the Public Safety Equation. And although their role is often forgotten, firefighters risk their lives every day to save ours.

On June 17, 2001, three more firefighters gave their lives in the line of duty. John J. Downing, Brian Fahey, and Harry Ford—all long-time veterans of their respective fire companies and all men with families—made the ultimate sacrifice as they battled a fire in Queens, New York on that fateful day.

It is important to remember these men and those before them, because they truly are heroes.

And it is important that we put our money where our mouths are, and not just sing the praises of firefighters at local parades and in
small town meetings. Instead, we need to make sure that we are providing adequate support for fire departments around the country to supplement their responsibilities.

Next month, the VA–HUD Appropriations bill will be marked up. This bill will include, hopefully, continued funding for the Firefighter Assistance Grant Program that was authorized last year.

This bill will provide competitive grants directly to the over 32,000 paid, part-paid and volunteer fire departments across America.

As a result of the unity and commitment of firefighting community and its supporters, the President has returned funding for this program to his budget.

In order for this program to really help firefighters, it must be funded appropriately—and that is $300 million.

And let’s provide this funding with the same bipartisan zeal that we have displayed throughout the process. That is only appropriate. When firefighters run into a burning building, they don’t ask the people they are saving if they are Democrats or Republicans—and we owe them the same commitment.

Let’s not just speak our thanks on the House Floor. Let’s demonstrate our support and provide firefighters with the resources they need to do their job.

Let’s do it for John J. Downing, Brian Fahey, and Harry Ford and their families. Let’s do it for every firefighter in every department in every state. It’s the least we can do.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I commend our colleague, the gentleman from New York (Mr. GRUCCI) for his continued dedication to our Nation’s firefighters and for the work he has done, along with Members on both sides of the aisle in bringing this resolution before the House today.

Each year, thousands of men and women risk their lives to protect the lives and property of all of American communities. Sadly on June 17, Father’s Day, three firefighters died in their line of duty fighting fire in Astoria, Queens; Brian Fahey and Harry Ford, from Rescue Company 4, and John Downing, from Ladder Company 163, were not only firefighters and fathers, they were prime examples of experienced men that our New York communities have to offer. Brian Fahey was a 14-year veteran, a skilled instructor, who left behind a wife and three children.

John Downing had three children and was planning a trip to Ireland; and Harry Ford, who was a father of three, was cited nine different times for his outstanding bravery. All three were Irish Americans whose lives will not be forgotten by their families or their communities.

Mr. Speaker, we are here today honoring their lives and giving thanks for the outstanding courage and bravery of these three heroes. They are within the sound of my voice, what I did on the day of the burial of those six heroes in Worcester, the next time when taking a stroll in the neighborhood when walking past a fire house, stop by, say hello and say thank you to the firefighters. Look them in the eye and say thank you for putting their lives on the line for us and our families 365 days a year.

At the same time, let us take advantage of this opportunity to again pledge our support for all the dedicated firefighters who work each day risking their lives protecting both the lives and property of our citizens. It is unfortunate that it takes a tragic event such as this to initiate a dialogue of the profound sentiment we all feel about our brave firefighters, our police officers, our soldiers, and all of the men and women who ask them to risk their lives for the sake of others. Every town, community, and nation is founded on the sacrifices of those men and women willing to risk their lives for the betterment of others. I urge my colleagues to join in fully supporting this measure, H. Res. 172.

Mrs. MALONEY of New York. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. McNULTY).

Mr. McNULTY. Mr. Speaker, I am honored to join my colleagues today in saluting and expressing our condolences to their families.

What happened on Father’s Day this year is a very sad reminder of what happens all too often in this country. It reminded me specifically of that sad day a couple of years ago when we lost six of our firefighters in that tragic fire in Worcester, Massachusetts.

Mr. Speaker, I have spent a lot of time with firefighters during the course of my career. I had the tremendous honor of serving as the mayor of my hometown, as my father did before me and as he does to this very day at the age of 90. In the course of our careers, we had the opportunity to work with and interact with many outstanding firefighters. Today I spend some of my leisure time with my firefighter friends at Engine 1 in Troy, New York, named for the late Harry Dahl, who gave 44 years of his life in the fire service in the city of Troy. New York. I have seen firsthand the dangers that firefighters face every single day of their lives.

Also a few years back, from the neighboring city of Watervliet, responding to a mutual alarm in Troy, New York, our fire chief, Tommy McCormack, lost his life in the line of duty.

Mr. Speaker, nothing can bring back John or Brian or Harry, but I suggest that there is something that we can do. We can express our gratitude to all of the firefighters who are serving us today. And so today I suggest to all of those who are within the sound of my voice, what I did on the day of the burial of those six heroes in Worcester, the next time when taking a stroll in the neighborhood when walking past a fire house, stop by, say hello and say thank you to the firefighters. Look them in the eye and say thank you for putting their lives on the line for us and our families 365 days a year.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. FOSSELLA).

Mr. FOSSELLA. Mr. Speaker, I commend my friend from Long Island, the gentleman from New York (Mr. GRUCCI) for bringing this resolution to the floor.

Mr. Speaker, for those of us who honored our fathers on Father’s Day, it was pouring rain that day. The whole morning looked like the day was going to be ruined. About 2:00 the sun came out in Staten Island and worked its way eastward. There was a call in Queens about that time, and it seemed to be a routine fire. It did not look like it was a big deal until we discovered the news which has been echoed here, that three brave firemen lost their lives.

The purpose here today is to take a moment to honor those men who bravely gave their lives; and to say to the other firemen that their brothers did not die in vain. Their families who survived, the children, our hearts and prayers go out to them; and I hope through their faith they are able to come through this tragedy with the knowledge that others share their grief.

Mr. Speaker, the New York Fire Department in particular is a wonderful resource. In Staten Island, we have lost too many firefighters: Captain John Drennan, Scott Lapedera, George Lenner, Chris Sidenberg. These are young heroes who died way before their time.

Mr. Speaker, so to the families especially, know that Members of Congress, Democrats and Republicans, really honor what those brave men did; and we will miss them.

Mrs. MALONEY of New York. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. CROWLEY).

Mr. CROWLEY. Mr. Speaker, I rise today in support of my colleagues, the gentleman from New York (Mr. GRUCCI) and the gentlewoman from New York (Mrs. MALONEY), and thank them for offering this resolution to memorialize John Downing, Brian Fahey, and Harry Ford, three of New York’s bravest.

They were members of the New York City Fire Department who were killed in the line of duty on Father’s Day, Sunday, June 17. Each of these men was a decorated veteran of the fire department. Harry Ford was a 27-year veteran; Brian Fahey had served for 14 years; and John Downing had served for 11 years. Words alone cannot express the sadness that we all feel about the deaths of these men. I can only begin to express my sympathy for their families, especially the eight children now left behind.

This resolution has been introduced in my district in the Seventh Congressional District in Queens. Harry Ford and Brian Fahey worked at the elite Rescue 4 Unit just up the block from where I
grew up, and John Downing of Engine Company 163 also stationed in Woodside, although lived on the Island, grew up in Woodside, was schooled in St. Sebastian School, and was buried out of St. Sebastian’s Church on Friday.

Mr. Speaker, last Friday I had the opportunity to attend the funeral of John Downing, and I sat with his family and the families of the other firefighters that were killed, the Ford and Fahey families. I sat with his colleagues, including my first cousin, Battalion Chief John Moran, who was injured in that fire and spent 2 days in the hospital himself after smoke inhalation trying to recover Mr. Fahey’s body.

Mr. Speaker, I was reminded by this experience that the New York City firefighters were the bravest men and women in the United States. Heroic action taken by the men and women of the New York Fire Department is something that occurs on a daily basis. To those who worked alongside them, I want to take the opportunity to say thank you for the job that they do every day. I am heartened to see the outpouring of sympathy and affection that has been expressed throughout New York and in my home district of Woodside for these brave men who fell in the line of duty on Father’s Day.

Mr. Speaker, I hope we can let the example of these three heroes serve as an example for all of us. Mr. Speaker, these heroes made the ultimate sacrifice in the line of duty. I know? Members join me in paying tribute to their sacrifice in the line of duty. We are the beneficiaries; and it is only when something as tragic as this Father’s Day incident occurred, that it drives home to us just how brave they are, just how much they put their lives on the line, day in and day out. I cannot imagine what a dangerous job, I cannot imagine what a tragic death, than what these three firefighters went through.

Mr. Speaker, let me say my best wishes and condolences to the families of the other firefighters. Many of them are volunteers. I want to give my highest respect to Harry Ford and Brian Fahey are both constituents of mine, Harry Ford from Long Beach and Brian Fahey from East Rockaway, his wife and three children. They really epitomize what the New York City Fire Department is all about. Of course, as the gentleman from New York (Mr. Crowley) said, John Downing grew up in the community adjacent to Woodside, where I also grew up, and which is now so ably represented by the gentleman from New York (Mr. Crowley).

I say this, I make the personal connection only because I think too often we take for granted that so many of the men and women we know who are firefighters are doing such a courageous job day in and day out, and yet we take it for granted; we assume they are going to do the job. It is only when something so tragic and momentous as this terrible Father’s Day incident occurred, that it drives home to us just how brave they are, just how much they put their lives on the line, the line in and out. I cannot imagine what a dangerous job. I cannot imagine what a tragic death.

So I today join with all of my colleagues in expressing not only our condolences, but also our thanks and gratitude for what firefighters in New York City, Long Island, throughout our State and throughout our Nation do. Every day they put their lives on the line, we are the beneficiaries; and it is unfortunate that it takes something as tragic as this Father’s Day disaster to remind us of just how deserving these men and women are of our undying thanks and gratitude.

Mr. Speaker, I yield 2 minutes to my friend, the gentleman from New York (Mr. Israel).

Mr. Israel. Mr. Speaker, let me thank my distinguished colleague, the gentlewoman from New York (Mrs. Maloney), as well as my friend and neighbor, the gentleman from Long Island, New York (Mr. Grucci), for bringing this resolution to the floor.

Mr. Speaker, even as a new member of the Congressional Fire Services Caucus, I believe that no Member of Congress’ words can adequately describe the loss that we have suffered. So I would like to include in the Record today excerpts of a recent Newsday editorial entitled, “For Firefighters, Risk of Death Is All in a Day’s Work.”

The editorial said: “The editors and job has not changed that much over the years.” George Burke of the International Association of Firefighters said yesterday. “While most people run away from disasters, firefighters are paid to run straight into them. And for all of the recent equipment advances, emergencies still are the precious few.” A building filled with working firefighters can suddenly explode like a bomb. Or a flaming roof can collapse. Or a wooden floor can give away without warning. All of this may easily explain why fire fighting is still the nation’s most dangerous public sector job.

On Father’s Day afternoon three members of the New York Fire Department, Harry Ford, John Downing and Brian Fahey, died as they tried to protect residents of Astoria, Queens, from the dangers of a horrific hardware store fire. All told, the three men leave behind eight children.

In addition, two other FDNY members were seriously injured in the disaster, Joseph Voslilla and Brendan Manning, and some 50 more were less seriously hurt. This goes with the territory as well. Burke says 40 percent of all firefighters nationally suffer an injury in the line of duty every year.

“We have lost 3 very brave firefighters,” Mayor Rudolph Giuliani said on Sunday of Ford, Fahey and Downing. “This is one of the most tragic days that I can remember.”

The mayor is right about that, and I join the rest of the New York delegation and all Members of Congress in offering my condolences to the families and fellow workers of these selfless men.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. Weldon).

Mr. WELDON of Pennsylvania. Mr. Speaker, as my colleagues know, I would not be in this body, I would not be in politics, were it not for the fire service. I grew up in a firehouse family, and I became president and chief of my fire company, went back and got a degree in fire protection and helped train the firefighters from 80 companies before I came here.

It is tragic that we have to come to talk about the fire service when we have funerals. I have been to hundreds of firefighter funerals in this city, in New York, and around the country.

We have lost over 100 firefighters. Many of them are volunteers. Because we have 1.2 million firefighters in the country out of 32,000 departments, each year 100 of them die.

We come today to pay the respects for three more heroes who made the ultimate sacrifice, three ordinary people doing extraordinary things, who left behind children, who had dreams. In fact, John Downing was about to go on his vacation the day after he was killed in that tragic fire. Harry Ford and Brian Fahey were outstanding professionals in every sense of the word.

We come today to honor them, and I want to give my highest respect to
Mr. WEINER. 

The total funding for the fire service up until last year was zero, nada, even though we are now asking them to deal with international incidents, like terrorism. The World Trade Center bombing, which I attended, was handled with Fire Department firefighters from New York City.

So I say the highest honor that we can bestow upon these three individuals is to renew our efforts to increase funding to give the proper technology to these heroes nationwide. They deserve thermal-imaging protection. They deserve turnout suits. They deserve the kind of GPS systems to allow them to do their job. They deserve the training to deal with toxic gasses, and maybe even putting a man down on someone's face in the well-recognized effort to save a cat out of a tree. Firefighters are our best friends.

And to those eight children of those brave heroes, we have a responsibility to support the families, and to all the unspoken heroes who risk their own lives to save others like them. Perhaps this is an opportunity for us the next time we walk by our local firehouse to stick our head in and say thank you.

To those eight children who lost their fathers on Father's Day, there are no words that can comfort you, except that you should know that your fathers were true American heroes and we in the United States House of Representatives pay tribute to them today.

Mrs. MALONEY of New York. Mr. Speaker, I yield 2 minutes to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentlewoman for yielding me time. I thank the sponsor of this legislation, and I come as a friend to the floor of the House.

The last couple of days I have been talking about Houston and the tragedies that we have faced. In facing those tragedies, the key element of helping to recover those people who were in need in Houston were firefighters. So I come today to pay honor to the New York firefighters, John Downing and Brian Fahey and Harry Ford, who lost their lives on Father's Day.

This is simply a statement to say that those of us grown up looking at the firefighters as major heroes, tall, now men and women, still continue to admire them for the sacrifice they make every day on our behalf.

Firefighters save lives on a daily basis, whether it is resuscitating a victim; whether it is getting a frightened family out of a burning building; whether it is dealing with hazardous toxic wastes, and maybe even putting a small child on someone's face in the well-recognized effort to save a cat out of a tree. Firefighters are our best friends.

And to those eight children of those wonderful men, might I say to you that your fathers will continue to be American heroes. How sad that they lost their lives on Father's Day; but how important it is for us to never, never forget.

Tonight and every other night we might think in our prayers to say thank you for the firemen and women who serve the kind of job that none of us desire; and as a tribute to these three brave American heroes, I pledge my continued support to make the building, so they are not trapped by toxic gasses, so they know what funding to give the proper technology and training, which I attended, was handled with Fire Department firefighters from New York City.

On Sunday, June 17, 350 firefighters and numerous police officers responded to an emergency call at the Long Island General Supply Company in Queens, NY. During the course of the battle to save the blaze, two civilians and dozens of firefighters were injured, two of whom were injured severely. Tragically, three firefighters were killed in the course of their duty as firefighters: John J. Downing of Ladder Company 163, a husband, a father of two, and an 11-year veteran; Brian Fahey of Rescue Company 4, a husband, a father of three, and 14-year veteran; and finally, Harry Ford of Rescue Company 4, a husband, a father of three, and 27-year veteran.

Mr. Speaker, this resolution honors these great heroes of our community who made the ultimate sacrifice of their lives so that we all may sleep better and safer at night. This resolution expresses our deepest sympathy for their families of these brave heroes, and pledges our support and work on behalf of all our heroes.

To all of those who lost in this blaze, the families, and to all the unspoken heroes who fight for us and risk life and limb each and every day, this Congress expresses its sincerest gratitude on behalf of the American people. Your commitment and sacrifice will live on in all of us forever.

Mrs. MALONEY of New York. Mr. Speaker, I include for the RECORD information for the memorial for all of our fallen heroes and our tributes today for our three heroes from New York City.

The Memorial, Memorial Park, Colorado Springs, CO

“Somewhere—Everyday”

“Somewhere—Everyday”, is the copyrighted title given to the 11 foot, “Heroic” bronze Memorial statue by Artist and Sculptor Mr. Gary Coulter since it is with this frequency that somewhere every day Fire Fighters are engaged in acts of heroism and saving lives. All the firefighters give the ultimate sacrifice . . . their lives, in the line of duty. Mr. Coulter has captured the last step of a successful rescue while clutching a child safely within sheltering arms. The rubble of fire forms the base of this magnificent tribute of dedication and heroism. Mr. Coulter designed, with purpose, unequal beams of the 17 foot tall ladder. In the “art” world, “unequal, parallel, lines define infinity”. As Gary stated, Fire Fighters acts of heroism does just that . . . it will always be that way!

“Somewhere—Everyday” weighs 2,600 pounds, its base extends 40 feet into the ground to bed rock. Somewhere—Everyday, was delivered to the Fallen Fire Fighter Memorial Committee in 1987 after nine months of work and a cost of $60,000. This remarkable sculpture was dedicated October 15th, 1987.

The Memorial statue is the Wall-of-Honor containing names of Fire Fighters that have died in the line of duty since 1976. There have been countless numbers of Fire Fighters prior to this year that have made the ultimate sacrifice. 1976 is however when the United States Congress passed a bill titled the Public Service Officers Benefit and the United States Congress passed a bill titled the Public Service Officers Benefit and the Uniformed Services Officers Benefit Act and began real recording of deaths in the line of duty of Fire Fighters. This does not take away any feelings the Brotherhood of Fire Fighters. This does not take away any feelings the Brotherhood of Fire Fighters. This does not take away any feelings the Brotherhood of Fire Fighters. This does not take away any feelings the Brotherhood of Fire Fighters. This does not take away any feelings the Brotherhood of Fire Fighters.
June 27, 2001

CONGRESSIONAL RECORD—HOUSE

line-of-duty. It is further reason to identify, in silent tribute, the immeasurable numbers of devoted, courageous acts of heroism for accurate inscriptions.

Fire Fighters are all: Part kid, adult, husband, father, or mother. They all are in real life human and have families. A Fire Fighters’ family struggles daily as their “Hero goes off to work without security to knowing if their loved one will be hurt before seeing him/her again. They all know the dangerous profession that has been chosen by their special person. With every call, there is uncertainty tugs at heart-strings” in a way that only a Fire Fighters’ Wife, Husband, Mother, Father or Family feels. It is to them that this Memorial is dedicated. Special people... caring and living in a very special way.

—LAMENTATIONS"

A gallant, noble sacrifice, a selfless life laid down:
So rare this servant’s worth, no greater treasure found.
No greater act of decency, no greater human love,
No greater courage demonstrated by lives they gave.

This tribute to unselfish hearts today will testify,
that health and safety have a price,
and brands upon our memory forever will the gravestones shield
into tomorrow cast,
that health and safety have a price,

This tribute to unselfish hearts today will testify,
that health and safety have a price,
and brands upon our memory forever will the gravestones shield
into tomorrow cast,
that health and safety have a price,

I urge all Members to support this resolution.
Mr. HOYER. Mr. Speaker, I rise today in support of honoring New York City firefighters John Downing, Brian Fahey, and Harry Ford. Mr. Speaker, these three brave men made the ultimate sacrifice on June 17th when they responded to a fire at a hardware store in Queens in the early afternoon.

Some might have called it a routine call. All three men were veterans of the department and had between 11 and 27 years of experience in one of theliest departments in the country. Undoubtedly they had all been on this type of call hundreds of times before.
Unfortunately, no call in the fire service is ever really routine. Every 82 seconds in this country the call for help goes out to America’s firefighters. And when that alarm bell rings, the men and women of the fire service know all too well that the call could be their last.
Every year in this country we lose about 100 firefighters in the line of duty. A number that I consider appallingly high. An additional 45,000 firefighters suffer injuries—some of them permanently debilitating. When you factor in training accidents and injuries sustained responding to calls, the number tops 88,000.
I did not know firefighters Downing, Fahey, or Ford. But they say that the measure of a man’s character is his service to others. By this standard these men were giants for the sacrifice they made. I urge all of my colleagues to support this resolution.

Mr. WALKER. Mr. Speaker, I also rise in support of House Resolution 172 to honor fallen New York City Firefighters John J. Downing of Ladder Company 163, Brian Fahey, and Harry Ford both of Rescue Company 4. These men made the ultimate sacrifice in carrying out their sacred duties this past Father’s Day, June 17th when responding to what trag ic fire at the Long Island General Supply Company in Queens, New York our state lost three brave heroes, three dedicated fathers, and three devoted husbands. Words can not de scrive the debt of gratitude we as a nation owe these fine men. I join my Colleagues in expressing my deepest sympathies to their families.

At 2:20 p.m. that Sunday the alarm came in. As they had done so many times in the past, for so many years, Firefighters Downing, Fahey and Ford responded to the call without hesitation. At first, the blaze appeared to be small, but as it burned outside, a massive explosion erupted turning the 128-year-old store into a heap of rubble. In the wake of the blast, these brave men had answered their final alarm trying to enter the building to do a job they had accomplished so many times before.

Much like the 1.7 million firefighters across the nation including the volunteers and paid professionals in my own district in Central New York, these men and their families knew and accepted the risks associated with the nature of their work. Each and every day, when ever the fire whistle blows, fire bell rings, or fire pager sounds, the firefighters in our country respond in an instant, working to protect and secure the lives and property of others and ready to make the same sacrifices that were made for our Quee Father’s Day.

As we honor our fallen heroes from New York City, we must also remember the brave men and women who fight fires on a daily basis in our country. From fighting structure fires to rescuing entrapped victims at motor vehicle accidents, our nation’s firefighters are fearless in practicing the laws of God, as they are brave in protecting the lives and property of their fellowmen. Firefighters Downing, Fahey, and Ford took this spirit to the ultimate limit. We are fortunate to have so many firefighters like these men, firefighters who believe in what they are doing, and who will fight to the very end for what they believe. For this, I pay tribute to them as well as to all the brave firefighters across our nation.

Mrs. JONES of Ohio. Mr. Speaker, I rise today to talk about issues of public safety. H. Res. 172, honoring the fallen firefighters from the Father’s Day blaze in New York City, was on the floor this afternoon commemorating the heroic efforts of those firefighters. John Downing, Brian Fahey, and Harry Ford were dedicated and experienced firefighters whose service to the city they loved was truly inspirational.

It strikes me that being a firefighter is one of the most physically challenging and dangerous professions possible. The men and women who undertake firefighting as a career are at risk every day trying to keep their fellow citizens safe from fires but also are responsible for an ever-growing number of tasks. Today’s firefighters are responsible for hazardous material clean up, response to terrorist threats and emergencies, and providing information to citizens on fire safety techniques.

America’s colleges let out for the summer recently but not without some loss of innocence for our children. Fire can affect our kids as much as it affects the lives of firefighters. I have introduced H.R. 2145, the Campus Fire Prevention Act, in an effort to address the safety of college students. My legislation will provide funds for the installation of fire sprinklers and other fire suppression devices in college dormitories, fraternities and sororities.

Even one death is too many; one injury is too much when it comes to our children. The tragedy at Seton Hall University in 1998 opened the eyes of parents and students to the risks of living in dormitories that had not been outfitted with sprinklers or other
fire suppression. My bill will provide matching funds to a university or organization that applies given approval by the Department of Education and the Fire Administration.

This past school year in Ohio there were four students killed in campus fires. A December fire at the University of Dayton killed one male student in a house fire in a building owned by the university. In May 2001, two fires killed students at John Carroll University and Ohio University. Both students were scheduled to graduate this year. Unfortunately this is not unique to Ohio, there were fire related injuries and fatalities throughout America’s universities.

I encourage my colleagues to join me in enacting H.R. 2145, it is a common sense measure that has already gained 43 cosponsors. Data has demonstrated fire sprinklers work in protecting property and preventing injury. In buildings with functional fire sprinklers there has not been a fire resulting in more than two fatalities.

We should honor the fallen firefighters from New York by helping to prevent future tragedies for firefighters and other innocent Americans.

TALKING POINTS

How often do fires occur in school, college, and university dormitories and fraternity and sorority houses? In 1997, the latest year for which national fire statistics are available, an estimated 1,500 structure fires occurred in school, college, and university dormitories and fraternity and sorority housing. These fires resulted in no deaths, 47 injuries, and $7 million in direct property damage. Between 1993 and 1997, an estimated average of 1,600 structure fires occurred each year, resulting in eight fatal fires known to NFPA, representing a total of 16 deaths over the five years of 1993–1997, 66 injuries, and $8.9 million in direct property damage per year.

How many fires occur specifically in fraternity and sorority housing? Between 1997, an annual average of 154 structure fires occurred in fraternity and sorority housing, resulting in 18 injuries, and $2.9 million in direct property damage per year.

What are the most common causes of fires at school, college, and university dormitories and fraternity and sorority housing? The leading cause of fire in these types of occupancies is incendiary or suspicious causes. The second and third causes of these on- and off-campus housing fires are cooking and smoking, respectively.

How often are smoke or fire alarms and fire sprinklers present in dormitory fires? In 1997, smoke or fire alarms were present in 93% of all dormitory fires, but sprinklers were present in only 28% of these fires. These figures apply only to properties where fires occurred; the overall fraction of properties with these active systems is probably higher. On average, direct property damage per fire is 36% lower in dormitory fires where sprinklers are present compared to those where sprinklers are not present.

H.R. 2145—the Campus Fire Prevention Act is identical to legislation introduced in the Senate by Senator JOHN EDWARDS of North Carolina and designated S. 399.

The bill is intended to supply money for colleges to retrofit sprinklers in dorms and allows fraternities and sororities to access the $100,000,000 in money each year over 5 years.

The bill provides money in the form of federal matching grants for the installation of fire sprinkler systems and other fire suppression or prevention technologies in college living situations (including sororities and fraternities). Priority would be given to any organization applying for the money from the bill with an ability to fund the fire suppression without accessing the funds under the bill.

Grants would be administered through the Department of Education in consultation with the U.S. Fire Administration.

The bill does not mandate using fire sprinkler systems in dorms, only provides funds for those who would like to make their residents safer.

Currently there are 43 cosponsors to H.R. 2145 and it has received endorsements from many campus organizations like the College Parents of America and the National Association of Student Personnel Administrators.

Mrs. Mccarthy of New York. Mr. Speaker, I extend condolences to the families of John J. Downing, Brian Fahon, and Harry Ford. Each of them will be sorely missed. We are forever in your debt and can never repay your loss. More than just firefighters, these men were husbands, fathers, and upstanding members of their communities. They paid the ultimate sacrifice and taught us a powerful lesson about honor, bravery, and sacrifice. These are traits that all firefighters possess. It is a shame that only through such tragedies we recognize this fact.

They were great firefighters, husbands, and fathers. Since the tragic June 17 event, America learned of the vibrant and rich lives of these three men. In the process, we developed a love for them and cried with their families as they mourned their losses. John J. Downing, an 11-year veteran, husband and father of two; Brian Fahon, a 14-year veteran, husband and father of three; Harry Ford, a 27-year veteran, husband and father of three will not be forgotten. Mr. Downing became famous for his bravery in the 1992 USAir plane crash into Flushing Bay. Mr. Fahy was considered one of the fire department’s elite, he worked in the rescue department. Mr. Ford was cited for bravery ten times during the course of his career, including rescuing a baby from a burning building. It is clear to everyone they were exceptional at their job.

These men did not die in vain. Today, as we recognize their bravery, let us pledge our support to work on behalf of all of the nation’s firefighters who risk their lives every day to ensure the safety of all Americans.

Mr. Ackerman. Mr. Speaker, I rise today with mixed emotions as we pay tribute to firefighters John J. Downing, Brian Fahy and Harry Ford. As I stand here I cannot help but feel both sadness and admiration, both respect and grief. While this tragedy is unfortunately close-to-home for New Yorkers, people all over the world are paying homage to these three men today.

Sadeness, Mr. Speaker; that these brave men’s lives were tragically taken from their families, friends and communities on June 17, 2001 when they dutifully responded to the call to put out a deadly fire that was destroying the Long Island General Supply Company in Amityville, New York.

Admiration, Mr. Speaker; for these three firefighters who exemplified the word: Heroes. These three heroes woke-up every morning, ready and willing to fight any fire that threatened our community. These three heroes who worked so that the rest of us could enjoy our lives free from worry or concern of a deadly fire.

Respect, Mr. Speaker; for these three heroes who were dedicated to a career as firefighters that required them to work to protect individuals that they may never have known. When they were called on to rescue these people from fires, these three heroes did so with the same commitment that they would feel for protecting their own families.

And grief, Mr. Speaker; for the devoted wives, loving children and proud communities that are without these three heroes as a result of this horrific tragedy.

Mr. Speaker, I rise today in unity with the entire NY Congressional delegation and ask our colleagues in the House of Representatives today to join us in honoring the memory of firefighters John J. Downing, Brian Fahy and Harry Ford.

The Speaker pro tempore (Mr. Fossella). The question is on the motion offered by the gentleman from Virginia (Mrs. Jo Ann Davis) that the House suspend the rules and agree to the resolution, House Resolution 172.

The question was taken.

The Speaker pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mrs. Maloney of New York. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The Speaker pro tempore. Pursuant to clause 8 of rule XX and the Chair’s prior announcement, further proceedings on this motion will be postponed.

BROWN V. BOARD OF EDUCATION 50TH ANNIVERSARY COMMISSION

Mrs. Morella. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2133) to establish a commission for the purpose of encouraging and providing for the commemoration of the 50th anniversary of the Supreme Court decision in Brown v. Board of Education, as amended.

The Clerk read as follows:

H.R. 2133

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that as the Nation approaches May 17, 2004, marking the 50th anniversary of the Supreme Court decision in Oliver L. Brown et al. v. Board of Education of Topeka, Kansas et al., it is appropriate to
establish a national commission to plan and coordinate the commemoration of that anniversary.

SEC. 2. ESTABLISHMENT.

There is established a commission to be known as the ‘Brown v. Board of Education 50th Anniversary Commission’ (referred to in this Act as the ‘Commission’).

SEC. 3. DUTIES.

In order to commemorate the 50th anniversary of the Brown decision, the Commission shall—

(1) in conjunction with the Department of Education, plan and coordinate public education activities and initiatives, including public lectures, writing contests, and public awareness campaigns, through the Department of Education’s ten regional offices; and

(2) in cooperation with the Brown Foundation for Educational Equity, Excellence, and Research in Topeka, Kansas (referred to in this Act as the ‘Brown Foundation’), and such other public or private entities as the Commission considers appropriate, encourage, plan, develop, and coordinate observances of the anniversary of the Brown decision.

SEC. 4. MEMBERSHIP.

(a) NUMBER AND APPOINTMENT.—The Commission shall be composed as follows:

(1) A majority of the Senators from the States in which the lawsuits decided by the Supreme Court were filed and the District of Columbia.

(2) Eleven individuals appointed by the President from their respective States.

(3) Two representatives of the judicial branch, the Department of Education, and the NAACP Legal Defense and Education Fund.

(4) Two representatives of the Brown Foundation.

(5) Two representatives of the NAACP Legal Defense and Education Fund.

(6) One representative of the Brown v. Board of Education National Historic Site.

(b) TERMS.—Members of the Commission shall be appointed by the President after receiving recommendations as follows:

(A) Members of the Senate from each of the States in which the lawsuits decided by the Supreme Court were filed and the District of Columbia shall be representatives from such States.

(B) The Delegate to the House of Representatives from the District of Columbia shall be a representative from the District of Columbia.

(C) The Delegate to the House of Representatives from the Commonwealth of Puerto Rico shall be a member selected by the Congress of the Commonwealth.

(D) The President may designate another representative from the District of Columbia to be a member selected by the President.

(c) VACANCIES.—A vacancy in the Commission shall be filled in the same manner as the original appointee.

(d) COMPENSATION.—

(1) IN GENERAL.—Members of the Commission shall serve without pay.

(2) TRAVEL EXPENSES.—Each member shall receive travel expenses, including per diem in lieu of subsistence, in accordance with applicable provisions under subchapter I of chapter 59 of title 5, United States Code.

(e) QUORUM.—A majority of members of the Commission shall constitute a quorum.

(f) MEETINGS.—The Commission shall hold its first meeting not later than 60 days after the date of enactment of this Act. The Commission shall subsequently meet at the call of the Chair or a majority of its members.

(g) EXECUTIVE DIRECTOR AND STAFF.—The Commission may secure the services of an executive director and staff personnel as it considers appropriate.

SEC. 5. POWERS.

(a) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take under this Act.

(b) GIFTS AND DONATIONS.—

(1) AUTHORITY TO ACCEPT.—The Commission may accept and use gifts of money, property, or personal services.

(2) DISPOSITION OF PROPERTY.—Any books, manuscripts, miscellaneous printed matter, memorabilia, relics, or other materials donated to the Commission which relate to the Brown decision, shall, upon termination of the Commission—

(A) be deposited for preservation in the Brown Foundation Collection at the Spencer Research Library at the University of Kansas in Lawrence, Kansas; or

(B) be disposed of by the Commission in consultation with the Librarian of Congress, and with the express consent of the Brown Foundation and the Brown v. Board of Education National Historic Site.

(c) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

SEC. 6. REPORTS.

(a) INTERIM REPORTS.—The Commission shall transmit interim reports to the President as soon as practicable before December 31 of each year. Each such report shall include a description of the activities of the Commission during the year covered by the report, an accounting of any funds received or expended by the Commission during such year, and recommendations for any legislation or administrative action which the Commission considers appropriate.

(b) FINAL REPORT.—The Commission shall transmit a final report to the President and the Congress not later than December 31 of each year. The report shall account for the disposition of any other properties, not previously reported.

SEC. 7. TERMINATION.

(a) DATE.—The Commission shall terminate on such date as the Commission may determine, but not later than February 1, 2005.

(b) DISPOSITION OF FUNDS.—Any funds held by the Commission on the date the Commission terminates shall be deposited in the general fund of the Treasury.

SEC. 8. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $250,000 for the period encompassing fiscal years 2003 and 2004 to carry out this Act, to remain available until expended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland? There was no objection. Mrs. MORELLA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 2133. It is important legislation introduced by the gentleman from Kansas (Mr. RUNYON).

Mr. Speaker, May 17, 2004, will mark the 50th anniversary of the Supreme Court’s landmark decision in Brown v. Board of Education in Topeka, Kansas. In recognition of the importance of that decision, this bill will establish the Brown v. Board of Education 50th Anniversary Commission to plan and coordinate the commemoration of that anniversary.

Mr. Speaker, of all the landmark decisions handed down by the Supreme Court, few are as well-known as Brown v. Board of Education, and few have been as important.

In Brown, a unanimous Supreme Court effectively ended the separate but equal doctrine in education, ruling that racially segregated schools violated the equal protection clause of the 14th amendment. Despite the court’s ruling, dual school systems were not abolished quickly or smoothly, but in the end, Mr. Speaker, they were abolished, further buttressing our Constitution’s promise of equality under the law.

In order to commemorate the 50th anniversary of the Brown decision, the Commission shall hold public education activities and initiatives, including public lectures, writing contests and public awareness campaigns. The Commission will be comprised of representatives from the judicial branch, the Department of Education, the NAACP Legal Defense and Education Fund, and the Brown Foundation, as well as individuals from States in which the cases leading to the Brown decision were filed and the District of Columbia. These States were, incidentally, Delaware, Kansas, South Carolina, and Virginia. There will also be representatives from Massachusetts in recognition that the first legal challenge to segregated schools was filed there in 1849.

The Commission will terminate when its work is done, but not later than February 5, 2005.

Mr. Speaker, the Court’s opinion in Brown v. Board of Education has touched the lives of all of us, and I urge all Members to support this important legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I rise in support of this resolution, and I yield 3 minutes to the gentleman from Maryland (Mr. CUMMINGS).

Mr. CUMMINGS. Mr. Speaker, I thank the gentleman for yielding me this time.
Today, Mr. Speaker, I rise in support of H.R. 2133 to establish a commission for the purpose of encouraging and providing a focus on education and providing a 50th anniversary of the life-changing Supreme Court decision of Brown v. Board of Education.

In Brown v. Board of Education, the Supreme Court Justices called for racial integration of public schools. Public schools were, with struggle, desegregated and, subsequently, African American youth made enormous progress in various areas, such as high school completion, better test scores, greater college enrollment and obtaining college degrees.

As a result of this important decision, African Americans greatly increased our numbers in many occupational fields which, before Brown, had a scarce but equal doctrine enshrined in public education. This monumental decision led to gains in equal education opportunities for minority children that were not provided for nor even considered under the Plessy v. Ferguson decision. This cemented African American community leaders' actions against the tragedy of segregation in America's schools.

Chief Justice Warren delivered the Court's opinion on May 17, 1954, stating that "segregated schools are not equal and cannot be made equal, and, hence, they are deprived of the equal protection of the laws." Originally taught using dull strategies and rote learning tools, minority students are now able to gain the tools necessary for future success in college and in the workplace.

While African American educational attainment has improved, the amount of education needed to have a real chance in life has grown even more. Yes, the Brown v. Board of Education altered the economic, political and social structure of this great Nation and helped change the face of America. It is for this reason that I strongly urge my colleagues to vote in favor of this very important resolution commemorating this significant decision.

However, I also urge my colleagues to remain committed to the principles of equality in education. As we consider our budget and legislative measures with a focus on education, we must be ever mindful of the critical importance of ensuring that all of this Nation's youth be well prepared to face the challenges and become productive members of this great society.

As we reflect on Brown v. Board of Education, let us remember that a priority focus on education is key, but equity and parity in education is critical.

Mrs. MORELLA. Mr. Speaker, it is my pleasure to yield 7 minutes to the gentleman from Kansas (Mr. Ryun), the introducer of this very important resolution.

Mr. RYUN of Kansas. Mr. Speaker, today we speak of "no child left behind" in our education system, and providing our children with the highest quality education is a value that we all hold dear.

For example, many students never learned that the Brown v. Board of Education was a combination of cases originally filed in Delaware, South Carolina, Virginia, the District of Columbia, in addition to Kansas, and that the final legal challenge occurred in Massachusetts. None of these original cases succeeded in the district court, and all were appealed to the U.S. Supreme Court. At this juncture, they were combined and became known jointly as the Oliver L. Brown, et al., v. The Board of Education of Topeka Kansas, et al. The High Court decided to hear these cases because each sought the same relief from segregated schools for African Americans.

We should also remember that Thurgood Marshall served as a legal strategist and counsel for the school segregation cases. Marshall later became the first African American to serve on the U.S. Supreme Court.

Brown v. Board of Education is undoubtedly the most revolutionary case striking down segregation, and as we approach the 50th anniversary of Brown v. The Board on May 17, 2004, it is only fitting that we commemorate this decision by ensuring that our Nation fully understands the case and the responding effects that it has had on our Nation.

Mr. Speaker, H.R. 2133 will establish a commission to help education Americans on the history and ramifications of this landmark cases in preparation for the 50th anniversary of the Brown decision.

The Commission will work in conjunction with the Department of Education to disseminate print resources to schools, plan and coordinate public education events, including public lectures, writing contests and public awareness campaigns.

Working in cooperation with both the public and private sector, the Commission will be comprised of representatives from the Committee on the Judiciary, the Department of Education, as well as the NAACP, Legal Defense and Education Fund, and the Brown Foundation. In addition, individuals chosen from the States in which the lawsuits were originally filed, which were Delaware, Kansas, South Carolina, Virginia, and the District of Columbia, and from the first State that had the first legal challenge, Massachusetts, will also serve on this Commission.

Equal opportunity is granted by our Constitution, but making equality a reality for all Americans requires real struggle and sacrifice. We must not forget the sacrifices made in order to give equality to all Americans.
The U.S. Supreme Court offered us this reflection in the opinion rendered in the Brown case, and I quote: “It is doubtful that the child of undifferentiated and ungraded school children is reasonably expected to succeed in life if he is denied the opportunity for an education.” Education is the metal that holds the framework of our democratic society together. Brown v. Board of Education guarantees this opportunity.

Mr. Speaker, I ask my colleague to join me in honoring this historic and far-reaching Supreme Court decision and support H.R. 2133.

Mr. Davis of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first of all, let me commend and congratulate the gentleman from Kansas for introducing this very important bill. As a matter of fact, I rise in support of this legislation to establish the Brown v. Board of Education 50th Anniversary Commission.

The Commission, in conjunction with the Department of Education, is charged with planning and coordinating public education activities and initiatives, writing contests and public awareness campaigns. In cooperation with the Brown Foundation for Educational Equity, Excellence and Research, the Commission must submit recommendations to Congress to encourage, plan, develop observances of the anniversary of the Brown decision.

The 50th anniversary of the Brown decision will take place on May 17, 2004. This Commission is going to need every second of the next 3 years to commemorate the Brown decision in a meaningful way.

Brown v. Board of Education is to be commemorated for what it did to address the disparities in the American education system 47 years ago, and to help break down the disparities that we struggle with today. Like in the 1930s and 1950s, the best hope for racial, social and economic equality lay in education. That is why in 1951, Oliver Brown and the parents of 12 other black children filed a lawsuit against the Topeka Board of Education protesting the city’s segregation of black and white students.

That is also why, Mr. Speaker, today parents all across America, particularly parents of children of color, are demanding that elected officials improve the American educational system.

In 1997, 93 percent of whites aged 25 to 29 had attained a high school diploma or equivalency degree compared to 87 percent of African Americans and just 62 percent of Hispanics.

Among those with high school degrees, 93 percent of whites had completed a bachelor’s degree or higher, compared to just 16 percent of African Americans and 18 percent of Hispanics. Given the increasing importance of skill in our labor market, these gaps in educational attainment translate into large differences by race and ethnicity in earnings, such as wages and employment.

American schools are integrated, but they still are not equal. They are not equal because we still do not understand in many places what it takes to make schools effective. Are we prepared?

How do we prepare all of our children to meet the challenges of tomorrow? For some people, charter and private schools are the answer. For others, it is school vouchers and class size reduction. One thing is for sure, if we do not break down the disparities in the educational system, the cycle of poverty will continue among children who attend poor and inner-city schools. A good, solid public education system is basic for the future of all Americans.

The historic Brown v. Board of Education was announced on May 17, 1954 by Chief Justice Warren. Justice Warren’s words are timeless. He stressed the fact that public education was a right which must be made available to all on equal terms.

I trust that the commission will remember these words when planning for observances of the 50th anniversary of the Brown decision. And even as we discuss this resolution today and prepare for its passage, there is still not equal funding for school districts even in my own state, the land of Lincoln, the State of Illinois, where some school districts receive as much as three times the funding of other districts; and if that is not separate but equal, unequal, then I do not know how to define it.

Mr. Speaker, I hope that we all will remember this as we seek to improve the American educational system. I urge all of my colleagues to join in supporting this resolution.

Mr. Speaker, I reserve the balance of my time.

Mrs. Morella. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. Tiahrt).

Mr. Tiahrt. Mr. Speaker, I thank the gentleman from Maryland (Mrs. Morella) for yielding me the time.

Mr. Speaker, I rise today in strong support of H.R. 2133. We are soon coming up on the anniversary of the landmark Supreme Court decision. On May 17, 1954, the United States Supreme Court eradicated the separate but equal doctrine and integrated our public school system.

Most Americans have heard about Brown v. Board of Education trial, but few completely understand this very important case.

I commend the gentleman from Maryland (Mrs. Morella) and the gentleman from Illinois (Mr. Davis) for introducing this legislation to establish a commission to help educate Americans on the history and ramifications of Brown v. Board of Education in preparation for the 50th anniversary of this case.

Education is, perhaps, the most important tool for fulfilling one’s dreams. The American dream, the wonderful belief that any child in America, any child, regardless of color or economic background, has the ability to make his dream a reality. In order to help children, our children, in the pursuit of their dreams, we need to make sure they have a good education.

Last month, we showed our commitment to this goal by voting on an education plan to Leave No Child Behind. Unfortunately, in 1954, African Americans were denied the chance to have equal access to our public school system.

Their parents, realizing the importance of education, did everything possible to educate their children while at the same time fighting the segregated system.

They also realized that beyond the 3 R’s, it was important for all children to learn respect for all people. The Brown decision was more than just an end to the practice of segregation in our schools; it was also a wonderful beginning. The beginning of a public school system that could more accurately reflect the belief that all men and women are created equal and should be treated as such.

Integrated schools are beneficial to all students and the Nation as a whole. For this reason, we should make sure that Brown v. Board of Education case is properly taught and understood.

I share the belief of the gentleman from Kansas (Mr. Yun) that for the 50th anniversary of this landmark case we should help make history come alive for our Nation’s school children. In doing so, we could help the newest generation of Americans realize the importance of liberty and democracy.

Mr. Davis of Illinois. Mr. Speaker, I yield 3 minutes to the dynamic gentleman from Lenexa, Kansas (Mr. Moore).

Mr. Moore. Mr. Speaker, I thank the gentleman from Illinois (Mr. Davis) for yielding me the time.

Mr. Speaker, I rise today to speak in strong support of a very important piece of legislation, H.R. 2133. On May 17, 1954, in the case of Brown v. Topeka Board of Education, the United States Supreme Court unanimously declared that separate educational facilities are inherently unequal and, as such, violate the 14th amendment to our United States Constitution, a Constitution which guarantees to all citizens equal protection of the laws.

This was a critical point in time, because it began an era of social responsibility, equity, and justice that this country has not seen since the end of the Civil War.

The legacy of the Brown decision is its impact on the whole of American society and its contribution to the civil
rights movement. When you think of the civil rights movement, the 1954 Brown decision is clearly a watershed. Would we have had a Rosa Parks in 1955 without a Reverend Oliver L. Brown fighting for equal education in Topeka, Kansas in 1951. Maybe, but without the definitive court ruling of what was right, what was constitutional, we would not have desegregation in Little Rock, Arkansas.

The Brown decision sliced the issue of inequality wide open, putting it in the morning newspaper and on the evening news. Brown is important for four very basic reasons.

Number one, it was the beginning of the end of racial segregation authorized by law in this country.

Number two, it overturned laws permitting segregated public schools in Kansas. Mr. Speaker, I would also like to thank my esteemed colleague, the gentleman from Georgia (Mr. LEWIS), that the Brown case; I would like to acknowledge the dedication and hard work of Cheryl Brown Henderson, a Kansan, who brought to my attention the national importance of this 50th anniversary of the court decision.

Ms. Henderson has been mentioned as the daughter of Oliver L. Brown, the lead plaintiff in this case; and I commend her for her dedication. I commend her father for his courage. Her lead plaintiff; and I commend her for the many and varied ways she has led to her across America sharing the lessons of this and other landmark civil rights cases.

My own interest in this historic case began as a student at the University of Kansas. Paul Wilson, was the junior Kansas assistant attorney general assigned to defend Topeka Board of Education. Largely through happenstance, Wilson wound up arguing before the Supreme Court in one of his first cases as an attorney.

Each spring for many years, Professor Wilson spoke at a noon forum on his involvement in Brown v. Topeka Board of Education. Each year, the talk grew more and more popular, attracting an ever larger crowd of students. The stories he held about that experience were fascinating stories of buying his first suit to a trip to Washington, D.C., riding a train for his first time outside the State of Kansas, filling out the paperwork to be admitted to the bar of the District of Columbia. One of my professors, Paul Wilson, spoke at a noon forum on his involvement in Brown v. Topeka Board of Education.

Besides preserving his memories of the facts of the Brown case in his classroom speeches, Professor Wilson had a unique perspective to analyze the case and how the decision's message would carry the decision's message. Not until Brown were the civil rights cases.

The Supreme Court ruling made a monumental impact on human rights struggles worldwide. The laws and policies struck down by this ruling were the products of prejudice and discrimination. Ending the legal practice of these behaviors caused social and ideological implications we continue to feel in our country today.

We are fast approaching the watershed of 2004. This decision could impact how people learn about the case and would carry the decision's message into the 21st century. Mr. Speaker, let us remember what the Brown v. Board of Education decision was all about. It was all about blacks exercising their citizenship and rights as a people, one Nation under God. Given our dark history concerning slavery and the citizenship rights of blacks and others in this country, we remember the Dred Scott decision. The question in the Dred Scott v. Sanford case where a black slave from Missouri claimed his freedom on the basis of 7 years of residency in a free State.

On March 6, 1857, nine justices filed in the basement of the U.S. Capitol, led by Chief Justice Taney, and they asked the question then, "can a negro, whose ancestors were imported into this country, and sold as slaves, become a member of the political community entitled to the protection of the Constitution of the United States, and as such become entitled to all the rights, privileges and immunities guaranteed by that instrument to the citizen?"

The Supreme Court decision then did not serve justice to Dred Scott.

Thirty-nine years later, the answer to this question became much more resounding in the Supreme Court case of Plessy v. Ferguson as a sad chapter in the pages of history. In this landmark decision of 1896, the court found that the doctrine of separate but equal concerning segregation of public facilities did not violate the Constitution. Separate schools for whites and blacks became a basic rule in southern society, legitimized in this doctrine that legalized segregation known as "Jim Crow."

For years, this decision affected many black boys and girls and kept them from achieving an equitable education that would enable them under the Constitution of the United States.

In the midwest town of Topeka, Kansas, a little girl named Linda Brown had to ride the bus five miles to school.
each day, although a public school was located only four blocks from her house.

The school was not full, and the little girl met all the requirements to attend, but one that is. Linda Brown was black, and blacks were not allowed to go to white children’s schools. In an attempt to gain equal educational opportunities for their children, 13 parents with the aid of the local chapter of the NAACP filed a class action suit against the Board of Education of Topeka Schools. Prior to becoming our first African American Justice of the Supreme Court of the United States, Thurgood Marshall presented a legal argument that resulted in the 1954 Supreme Court decision that separate but equal was unconstitutional because it violated the children’s 14th amendment rights by separating them solely on the classification of the color of their skin. This ruling in favor of integration was one of the most significant strides America has taken in favor of civil rights.

So we come today, Mr. Speaker, in support of a resolution to commemorate that day and to commemorate that time and to commemorate the exciting events that took place then as we look forward to events taking place even now. So I would urge all of my colleagues to join in support of this resolution.

Mr. Speaker, I reserve the balance of my time.

Mrs. MORELLA. Mr. Speaker, I associate myself with the remarks of the gentleman from Illinois (Mr. DAVIS). Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Virginia (Mr. FORBES), our newest Representative over here on this side.

Mr. FORBES. Mr. Speaker, it is an honor and privilege to speak for the first time as a Member of the House of Representatives on an issue of great importance to me and my constituents, a quality public education available to all that leaves no child behind.

The legislation before us today prepares for the commemoration of the historic 1954 Supreme Court decision Brown v. Board of Education. It establishes and funds a commission that will plan and coordinate activities for the 50th anniversary of the case just 3 years away.

Mr. Speaker, children should not have an inferior education because of the color of their skin. But before the Brown decision, textbooks, classrooms and buildings were second-class for black students as compared to the rest of our Nation. This was wrong.

In May 1954, the Supreme Court sided with citizens in Topeka, Kansas, and said that it is not lawful to separate school children because of their race. When the Topeka case made its way to the United States Supreme Court, it was combined with the other cases from Delaware, South Carolina, Washington, D.C. and my home, the Commonwealth of Virginia. This comprehensive case became known as Oliver L. Brown, et al., v. Board of Education of Topeka.

I thank the gentleman from Kansas (Mr. Ryun) for his leadership on this bill as well as the entire Kansas delegation. Let us work tirelessly to strengthen the educational system in our country through ideas and technology with accountability, proper funding, and reform.

From the finest towns in America to the worst neighborhoods in our inner cities, we must never lose sight of the unconditional commitment to our children. We must never forget that barriers were broken and hurdles were overcome to get to where we are now.

Education is first, last, and always about our children. They need and deserve an equal opportunity to excel, to achieve and be the best they can be. Brown v. Board of Education opened the doors for all of our children to learn on a level playing field. We should be thankful, remember our past, learn from our history, and plan for our future.

I thank the gentlewoman from Maryland (Mrs. MORELLA) for yielding me this time. I urge passage of the legislation.

Mr. DAVIS of Illinois. Mr. Speaker, how much time do I have remaining?

Mr. DAVIS of Illinois. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentleman very much for yielding me this time. I urge the passage of this legislation.

This legislation resulted in a different education for many of us who studied on the floor of the House today. To acknowledge and to organize a commission to celebrate the 50th anniversary of the Supreme Court decision in Brown v. Board of Education reminds us of those heroes like Thurgood Marshall and Constance Baker Motley and others who pursued the rights of children to be educated fairly and justly in the courts of the United States. How different our education and our lives would have been had we not had the opportunity to fight against segregated and unequal schools.

The process that was designed in the 1800s that, in fact, you could be educated unequally was finally eliminated by this case to ensure that we would have an equal education. It is our challenge to keep the spirit of this Supreme Court decision alive. It is our challenge to ensure that public schools are at their very best, and that those children who sit in our public schools today, those who are special needs children, those who are at-risk children, can experience the kind of education that Thurgood Marshall intended, and that was, of course, that we take away the unequality of education and promote equality.

Secondly, I would say that, over the years, we have had an attack on affirmative action. That is affirmatively reaching out to help education and to help promote equality.

The Brown v. Board of Education was a symbol of fighting for equality and affirmatively seeking to create an opportunity for children educated together. I think my message now is to thank those who organized and well knew that they had to fight for justice, to thank those youngsters prepared to be the plaintiffs in the case, and to thank those lawyers.

This Commission will be a commission that will be well-respected, giving us the structure and the ability to honor those and celebrate the 50th anniversary of this enormous decision that changed the lives of so many of us as well as changed the life and the values of the American society to believe truly in the equality of education.

Mrs. MORELLA. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mrs. BIGGERT).

Mrs. BIGGERT. Mr. Speaker, I thank the gentlewoman for yielding.

Mr. Speaker, I rise today to lend my support to H.R. 2133. This legislation commemorates through the establishment of a commission the 50th anniversary of the Brown v. Board of Education Supreme Court decision, which sparked the end of school segregation based on race in this country.

It goes without saying that school segregation and desegregation were among America’s most controversial social issues during the last half of the 20th century. Along with many Americans, I can clearly recall scenes of violence and upheaval that took place in the 1950s, 1960s and 1970s in places as diverse as Boston and Little Rock as our Nation’s public schools made the transition to integration.

We have much to be thankful for as a result of the Supreme Court’s decision some 50 years ago. Today our children and our children’s children find themselves interacting daily in the school setting with other boys and girls of different colors and backgrounds, broadening their perspectives and expanding their horizons in ways that were not experienced by previous generations.
Today we no longer see the blatant and blanket denial of educational opportunity to children based solely on the color of their skin. As a result of the Brown decision, we as a society no longer accept the flawed doctrine outlined in the earlier case of Plessy v. Ferguson that separate means equal.

These are all things that should be rightfully celebrated and commemorated, but before we go patting ourselves on the back while claiming that education segregation is dead, we may first want to take a closer look at our public schools. What we will find is that, while race is no longer the basis for segregation in some States, homelessness is the basis for segregation. Some 47 years after the historic Brown v. Board of Education ruling, Congress may inadvertently be endorsing de facto segregation of homeless children.

Mr. Speaker H.R. I, passed in May by this body, contains a grandfather clause permitting school districts that currently receive Federal dollars that segregate homeless children in separate schools or classrooms may continue to do so. This is contrary to what the Federal law currently says. It is also contrary to the spirit of Brown v. Board of Education that we commemorate today.

I am hopeful that this body will reconsider this provision in conference before we send it to the President for his signature. Now, that would be a fitting tribute to the decision made by the U.S. Supreme Court on May 17, 1954.

Mr. Speaker, I congratulate the gentleman from Kansas (Mr. Ryun) on this legislation, and I yield back the balance of my time.

Mr. Davis of Illinois. Mr. Speaker, I would like to associate myself with the remarks made by the gentleman from Illinois (Mr. Biggers) regarding homelessness and homeless children and where they fit in the school systems that we have to today.

Mr. Speaker, I yield the balance of my time to the gentlewoman from Ohio (Mrs. Jones).

Mrs. Jones of Ohio. Mr. Speaker, first of all, I would like to commend my colleagues, the gentleman from Illinois (Mr. Davis) and the gentlewoman from Maryland (Mrs. Mink) for their work on this particular piece of legislation.

Mr. Speaker, I rise today in support of this bill which would establish a commission to commemorate the 1954 Brown v. Board of Education decision. Back on May 17, 1954, the Supreme Court unanimously declared that separate educational facilities are inherently unequal and, therefore, violate the 14th amendment to the United States Constitution.

Back on May 17, 1954, I was 5 years old, attending the Cleveland Public Schools, which, at that time, was one of the best public school systems in the Nation. I rise in support of this Commission and speak to the issue that, even though we have done a lot since Brown v. Board of Education, our school systems are still segregated. That school system that I loved and enjoyed as a child is now a predominantly African American school system, and the funding for schools, public schools is no longer as high or as good as it used to be back when I was in elementary school.

On May 8 in Cleveland, however, we worked and passed a $3.7 million bond issue for school construction. It would raise $355 million, which would be matched by $500 million from the State of Ohio. They are greatly needed in the city of Cleveland, as I am confident they are needed across this country, to bring those crumbling public school systems back to the level that we wish that all of our children would enjoy in public schools.

I thank my colleagues for giving me the chance to commemorate Brown v. Board of Education.

Mr. Speaker, the Court’s opinion in Brown v. Board of Education has touched the lives of all of us. I urge all Members to support this legislation.

I just want to comment on the fact that my first teaching assignment in Maryland was during the early transitional years of integration in Poolesville, Maryland.

This year I delivered the high school commencement address at that same place, a caring community which has as its slogan, “Where everyone knows your name.”

My thanks to the gentleman from Illinois (Mr. Davis) for handling the important resolution on the aisle. I also want to thank the gentleman from Indiana (Mr. Burton), chairman of the Committee on Government Reform, the gentleman from Florida (Mr. Scarrow), Subcommittee on Civil Service, the gentlewoman from California (Mrs. Waxman), and the gentleman from Illinois (Mr. Davis), the ranking members respectively of the Committee on Government Reform and Oversight and Subcommittee on Civil Service, for expediting the consideration of this measure.

Again, I encourage all Members to support this resolution.

Mrs. Mink of Hawaii. Mr. Speaker, I rise in strong support for H.R. 2133, which establishes a commission to encourage and provide for the commemoration of the 50th anniversary of the Supreme Court decision in Brown v. Board of Education of Topeka, Kansas. This unanimous landmark decision marked the beginning of the end for de jure racial segregation in public facilities. On May 17, 1954, the Supreme Court declared that separate educational facilities are inherently unequal and, as such, violate the 14th amendment to the United States Constitution, which guarantees all citizens equal protection of the laws.

The Brown v. Board of Education 50th Anniversary Commission will work with the U.S. Department of Education to plan and coordinate public education activities and coordinate observances of the anniversary.

It is important that we revisit our history to see how far our nation has evolved. I am sure that it is hard for young people today to believe that only 50 years ago children were prohibited from attending certain public schools simply because of their race. The blatant racism behind the disingenuous claim of providing “separate but equal” facilities for African American children was recognized and repudiated by the Supreme Court.

The Supreme Court decision did not mean the end of segregation, however. Many states and localities continued to fight efforts to integrate the schools for many years. And today, economic inequalities mean that many of our schools remain effectively segregated. None of this was a major turning point in eliminating Jim Crow laws and practices that sought to marginalize and isolate minorities.

It is fitting that our nation begin preparations to commemorate this important anniversary in 2004. We need to look back at where we started, celebrate the progress we have made thus far, and re dedicate ourselves to creating that more perfect union that will truly deliver on the promise of equal opportunity for all Americans.

Mr. Watts of Oklahoma. Mr. Speaker, On May 17, 1954, in the landmark case aimed at ending segregation in public schools—Brown versus the Board of Education—the United States Supreme Court issued a unanimous decision that “separate educational facilities are inherently unequal”, and as such, violate the 14th Amendment to the United States Constitution, which guarantees all citizens, “equal protection of the laws.” This decision effectively denied the legal basis for segregation in Kansas and other states with segregated classrooms and would forever change race relations in the United States.

The United States Constitution guarantees liberty and equal opportunity to the people of the United States. Historically, however, these fundamental rights have not always been provided. America’s educational system is one such example.

In the early beginnings of U.S. history, education was withheld from people of African descent. In some states it was against the law for African Americans to even learn to read and write. Later, throughout America’s history, the educational system was used to separate schools for children based solely on race. In many instances, the schools for African American children were substandard facilities with out-of-date textbooks and insufficient supplies.

In an effort to ensure equal opportunities for all children, African American community leaders and organizations across the country utilized the court system in order to change the educational system. The Brown decision initiated educational reform throughout the United States and brought all Americans one step closer to attaining equal educational opportunities.

As the great abolitionist and orator Frederick Douglass once said, some people know the value of an education because they have one,
but I know the value of an education because I did not have one. Therefore, we must continue working to make sure that all of America’s children receive the very best education imaginable.

I urge all of my colleagues to join me today in supporting the establishment of a commission to encourage and provide for the commemoration of the 50th anniversary of the Brown versus Board of Education Supreme Court decision.

Mrs. MORELLA. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question was taken. The yeas and nays were ordered. The yeas and nays ordered. The Chair’s prior announcement, further to rule XX and the order against consideration of the bill.

The yeas and nays were ordered.

Mr. SESSIONS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 180 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 180

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the Bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. After general debate the bill shall be considered for amendment under the five-minute rule. The amendment printed in the report of the Committee on Appropriations accompanying this resolution shall be considered as adopted in the House and in the Committee of the Whole. Points of order against provisions in the bill, as amended, for failure to comply with clause 2 of rule XXI, which prohibits unauthorized or legislative provisions in an appropriations bill, except as specified in the rule.

The bill shall be considered for amendment by paragraph, and the Chair is authorized to accord priority in recognition to Members who have preprinted their amendments in the Congressional Record.

Finally, the rule provides for one motion to recommit with or without instructions.

Mr. Speaker, the legislation before us is an open rule providing for the consideration of the bill. The Energy and Water Development Appropriations Bill for 2002. This legislation provides for funding in this bill continues the strong record of conservation and preservation by the Republican Congress.

Mr. Speaker, I would like to commend the chairman of the Subcommittee on Energy and Water Development of the Committee on Appropriations, the gentleman from the First District of Alabama (Mr. CALahan), and the Democrat ranking member, the gentleman from Indiana (Mr. Visclosky), for their hard work in bringing this bill to the floor. Their staffs have done a great job in the drafting of this bill.

Mr. Speaker, this bill is considered noncontroversial. This rule, like the underlying legislation, deserves strong bipartisan support.

Mr. Speaker, I reserve the balance of my time.

Mr. HASTINGS of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to thank the gentleman from Texas for yielding me the time. It is a pleasure to serve on the Committee on Rules with my good friend and colleague, the gentleman from Texas (Mr. Sessions), and I thank him for welcoming me as the newest member of the Committee on Rules.
Mr. Speaker, I rise in support of the Energy and Water Appropriations bill for fiscal year 2002 and in support of the rule. I also would associate myself with the remarks made by the gentleman from Texas about the many particulars that are set forth in the bill that are meritorious, in my view, for the entire body.

I want to congratulate the chairman of the subcommittee, the gentleman from Alabama (Mr. Callahan), and the ranking member, the gentleman from Indiana (Mr. Visclosky), for their work on this bill and for their appreciation of the importance to the entire country of the necessary public works projects it funds.

I am especially pleased, from a parochial point of view, that this bill contains nearly $20 million for the continued restoration of the Florida Everglades. Congress and the State of Florida made a historic agreement last year to save this international treasure, and I am thrilled that Congress continues its commitment through this bill.

Additionally, Mr. Speaker, this bill contains a number of significant projects important to my south Florida district, as well as those that are my colleagues that are in that area; and I would like to highlight a few of them for just a moment.

In my home of Broward County this bill funds beach erosion and renourishment projects to the tune of $2.5 million. These funds are critical to protecting and enhancing Florida’s pristine beaches and the businesses that thrive because of them.

In northeast Dade County this bill contains funding for a study of flood patterns in the county and remediation of flooding that continually occurs in some of the poorest neighborhoods of this area.

Mr. Speaker, I am pleased that this bill contains projects that would greatly benefit the constituents of myself and those of my colleague, the gentleman from Florida (Mr. Foley), in Ft. Pierce, in St. Lucie County, and a number of projects that greatly improve conditions in Palm Beach County that are relevant to my other colleagues, the gentleman from Florida (Mr. Shaw), the gentleman from Florida (Mr. Wexler), and the gentleman from Florida (Mr. Foley), as well as myself.

Mr. Speaker, this is a good bill; and the rule is fine as far as it goes. As the gentleman from Texas (Mr. Sessions) noted, it allows for amendment to the dollar amounts contained in the committee-reported bill. The committee Republicans chose not to allow the gentlewoman from Nevada (Ms. Berkley) the right to offer an amendment relating to transportation of high-level nuclear waste. This is most unfortunate, in my view, as I believe the Berkley amendment would have made the bill better.

Also, Mr. Speaker, let me add my support for the amendment which will be offered by my friend and colleague, the gentleman from Florida (Mr. Davis), which will allow construction of the Gulf Stream pipeline to continue unabated.

Again, Mr. Speaker, I thank the chairman and ranking member for bringing in an excellent bill to the House. This is a bipartisan bill that helps millions of Americans from coast to coast, and I urge passage of the bill and adoption of the rule.

Mr. Speaker, I reserve the balance of my time.

Mr. Sessions. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. Hastings), a member of the Committee on Rules.

Mr. Hastings of Washington. Mr. Speaker, I want to thank my good friend and colleague on the Committee on Rules, the gentleman from Texas (Mr. Sessions), for yielding me this time; and I want to congratulate my friend, the newest member of the Committee on Rules, the gentleman from Florida (Mr. Hastings), on his first rule.

Mr. Speaker, I rise in strong support of this rule and this underlying legislation. I would like to begin by commending the chairman, the gentleman from Alabama (Mr. Callahan), and the ranking member, the gentleman from Indiana (Mr. Visclosky), as well as the chairman of the full Committee on Appropriations, the gentleman from Florida (Mr. Young), and the ranking member, the gentleman from Wisconsin (Mr. Obey), on their leadership in bringing this excellent piece of legislation to the floor. This is the first bill of the gentleman from Alabama as chairman of the Committee on Energy and Water Development, and I commend him on his openness and his support. They have carefully balanced the priorities in a very tight budget year to ensure that the cleanup of former nuclear sites stays on schedule.

As chairman of the Nuclear Cleanup Caucus here in the House, I have been privileged to work closely with the committee this year to ensure that cleanup sites throughout the Nation continue their significant progress, ensuring that the legacy of World War II and the Cold War is cleaned up. While I have been supportive of the President’s goal to cap the overall spending increase at 4 percent, I have to admit that I was deeply troubled by the administration’s initial request on cleaning up the Nation’s former nuclear weapons sites.

Earlier this year, the Committee on the Budget responded to that by including in the committee-reported budget resolution language directing to an additional $1 billion in the Environmental Management Account. I am pleased that the Committee on Appropriations has, in the past 2 weeks, included an additional $880 million for cleanup in the supplemental and the legislation we will consider today. This will allow for the Federal Government to keep its legal and moral commitments to the communities that surround these sites.

The Department of Energy has negotiated innovative contracts that mirror commercial practices to transform the cleanup program and ensure that more dollars are spent on cleanup. These negotiated contracts ensure that the American taxpayer receives more cleanup dollars for less by requiring efficiencies to do more with less. Without this additional funding for the Environmental Management program, these aggressive contracts would have had to be re-negotiated, thus eliminating the benefits they provide.

This legislation will increase funding by nearly $700 million over the administration’s request. This will reverse the proposed reductions at the major sites throughout the country. Specifically at Hanford the additional dollars provided in this legislation will provide full funding for the construction of the Waste Treatment Project. This is the home of over 60 percent of the radioactive waste of this country; and yet it is the only facility, Hanford, that lacks a treatment capability. It is essential that this project be funded in fiscal year 2002 in order to ensure maximum benefit to the taxpayer and the safety of the Pacific Northwest.

Further, the legislation allows for the River Corridor Initiative to begin at the Richland Operations Office. This innovative approach will allow for the acceleration of cleanup along the River Corridor and will shrink the Hanford site from 560 square miles to 75 square miles by the year 2012.

This is an aggressive schedule which will save American taxpayers hundreds of millions of dollars over this time period.

Mr. Speaker, this legislation provides the first step to what I hope will be the full transformation of this project to a closure contract in fiscal year 2003. Further, the legislation will allow for continued efforts to remove spent nuclear fuel which has been standing 100 yards from the Columbia River for 25 years, and to move it away from the river into safe storage.

I would like to commend the gentlewoman from Alabama (Ms. Callahan) and the gentleman from Florida (Mr. Young) for their excellent work. I would also like to thank my colleagues on the Nuclear Cleanup Caucus, the contractors and the stakeholders that came together in a unified manner to ensure that these increases became a reality.

Mr. Speaker, I support the rule and the underlying legislation.
June 27, 2001

Mr. HASTINGS of Florida. Mr. Speaker, I reserve the balance of my time.

Mr. SESSIONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, I congratulate the gentleman from Florida (Mr. HASTINGS), having been appointed to the prestigious and important Committee on Rules. Florida is proud of his service in the Congress, and we are proud that 3 of 13 Members who serve on the Committee on Rules are from Florida, two Republicans, the gentleman from Florida (Mr. Goss) and the gentleman from Florida (Mr. DIAZ-BALART). And now the gentleman from Florida (Mr. HASTINGS) joins the Committee on Rules, and my great State is going to benefit by the gentleman's leadership.

Let me also commend this bill of the Subcommittee on Energy and Water. The gentleman from Florida (Mr. HASTINGS) clearly laid out some of the very important projects that are occurring in our districts, such as Port St. Lucie, the inlet maintenance project, some shoreline protection that will occur throughout our counties; but I also want to call attention to an amendment that will be offered by one of our colleagues that will seek to reduce the Federal allocations towards beach renourishment. I believe that has been made in order. What that basically says is that we will reduce the Federal share of beach renourishment projects in places like Florida.

The gentleman from Florida (Mr. HASTINGS) and I clearly want to underscore the need for Federal involvement, and we also want to give a little education here, because some people assume that beach renourishment projects are folly, that they are a waste of tax dollars, that they are something that the local jurisdictions should do, and we need not concern ourselves with these issues in Congress.

As the gentleman from Florida (Mr. HASTINGS) and I know, many of the areas where the most severe beach erosion is occurring are just south of inlets that were designed and constructed by the Corps of Engineers for some commerce at times, and some were natural security issues. So in Palm Beach County, for instance, at the south end of our inlet, we are constantly vigilant because of shoreline that is eroding because of that unnatural cut that occurred.

Mr. Speaker, therein lies the nexus by which we ask and continue to urge Congress to fund these shoreline protection agreements. They are vital to tourism. We are parochial in our approach, and we are concerned about tourism; but it has more to do with ecological factors, such as nesting turtles, reef renourishments. All of these are impacted by a degradation of our beaches.

Mr. Speaker, I stand opposing an amendment that will be offered later; although supporting the fine work in this bill. There are some phenomenal projects that I will call Members' attention to again, whether it is the Department of Energy or other related accounts, the President's initiative on energy, or on strategically positioning ourselves to be more self-reliant on energy needs.

Mr. Speaker, the gentleman from Alabama (Mr. CALLAHAN) has done a masterful job of meeting not only the needs of 50 States, but also the concerns of Members.

Mr. Speaker, as a Member from the Florida delegation, I want to apologize to the gentleman from Alabama (Mr. CALLAHAN) because we were unaware during debate last week on a very contentious issue that the gentleman was out of the Capitol with the President attending some business with the President of the United States in Alabama. We would not have excluded him from debate if we had known that was the case. We meant no disrespect. As a delegation, we are absolutely opposed to the drilling question, but never would we have done it as an attempted embarrassment of the fine chairman and the fine job he has done.

Mr. Speaker, I want to commend the rule. I urge Members to support its adoption, the underlying bill; and again, I would ask my colleagues to pay special attention to an amendment that would cut the government's responsibility on shoreline protection and urge the defeat of that same amendment.

Mr. HASTINGS of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman from Florida (Mr. FOLEY) for his kind comments regarding my ascension to the Committee on Rules.

Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. UDALL).

Mr. UDALL of Colorado. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of the rule and in general support of the bill. I want to in particular touch on three issues briefly. I want to thank the committee, thank House for continuing to fund the nuclear facilities closure projects across the country, but in particular the one in my district at Rocky Flats. Rocky Flats is close to the center of my congressional district. It is just a few miles from population centers that exceed 2 million people. This is a very important project to clean up and close this facility.

I also thank the committee for the inclusion in the bill of initial funding for a small flood control project in Arvada, Colorado. There has been an important partnership there along Van Biber Creek, and these are important moneys that will begin to put this capital project in place.

Finally, I want to emphasize my support for the committee's work in increasing the levels of funding for DOE's renewable energy programs. Initially, the administration slashed these important budget items by $138 million, almost 36 percent, and I think this was shortsighted; but we have worked hard over the last 2 years to boost funding for these programs, and I want to acknowledge the gentleman from Tennessee (Mr. WAMP) on the Renewable Energy and Energy Efficiency Caucus for the good work the gentleman has done.

In general, Mr. Speaker, although no bill is perfect, this one is awful close, and I very much appreciate the opportunity to speak today in support of it.

Mr. HASTINGS of Florida. Mr. Speaker, I yield back the balance of my time.

Mr. SESSIONS. Mr. Speaker, I yield myself a much time as I may consume.

Mr. Speaker, just as it is the first rule for the gentleman from Florida (Mr. HASTINGS) to manage in the Committee on Rules, we also like to thank such a good friend of all of ours. It is a time to say hello; and a time to say good-bye.

Mr. Speaker, this is a fair and open rule supported by my colleagues, and I would ask my colleagues to support this rule.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SIMS) said, The question is on the resolution.

The question was taken; and the ayes appeared to have it.

Mr. HASTINGS of Florida. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 of rule XX, following this 15-minute vote on House Resolution 180, the Chair will reduce to 5 minutes the minimum time for electronic voting on the two motions to suspend the rules on which the Chair determined further proceedings earlier today.

The vote was taken by electronic device; and there were—yeas 425, nays 1, not voting 7, as follows:
ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SHIMKUS). Pursuant to clause 8 of rule XX, the Chair will now put the question on each motion to suspend the rules on which further proceedings were postponed earlier today in the order in which that motion was entertained.

Votes will be taken in the following order:

House Resolution 172, by the yeas and nays; and

H.R. 2313, by the yeas and nays.

Both of these will be 5-minute votes.
CONGRESSIONAL RECORD—HOUSE

BROWN v. BOARD OF EDUCATION 50TH ANNIVERSARY COMMISSION

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 2133, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Maryland (Mrs. MORELLA) that the House suspend the rules and pass the bill, H.R. 2133, as amended, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device and there were—yeas 414, nays 2, not voting 17, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

The motion to reconsider was laid upon the table.
Mr. CALLAHAN. Mr. Speaker, I ask unanimous consent to remove my name as a cosponsor of H.R. 2180.

The SPEAKER pro tempore. Pursuant to clause 1 of rule XXI, all points of order are reserved.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2180

Mrs. BONO. Mr. Speaker, I ask unanimous consent to remove my name as a cosponsor of H.R. 2180.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

GENERAL LEAVE

Mr. CALLAHAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill, H.R. 2311, making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes, and that I may be permitted to include tabular and extraneous materials.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

The SPEAKER pro tempore. Pursuant to House Resolution 180 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes, with Mr. SIMPSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY) each will control 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. CALLAHAN).

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is my privilege to bring before the body today the fiscal year 2002 appropriations bill for energy and water needs facing this country. We have tried desperately to work with all the Members on both sides of the aisle to bring before you today a fair bill, a bill that has addressed most of the concerns of the Members who have contacted us. Mr. Chairman, there have been extensive contacts with us. In our deliberations we have come forward with a bill that I think provides the administration with ample funds for energy and water and reclamation needs in this country.

The bill agrees with President Bush that we should constrain government growth. I am happy to report that this bill constrains government growth because it is only increased about a one-half of 1 percent over the FY year 2001 level of funding.

The total funding in H.R. 2311 is $23.7 billion. This is $147 million, as I said, less than one-half of 1 percent, more than fiscal year 2001, for energy and water development programs.

Title I of the bill provides funding for the civil works program of the Corps of Engineers. The Subcommittee on Energy and Water Development is unanimous in its belief that these programs are among the most valuable within the subcommittee’s jurisdiction. The national benefits of projects for flood control, for navigation and shoreline protection substantially exceed project costs. The bill acknowledges the importance of water infrastructure by funding the civil works program at $4.47 billion, an increase of only $58 million over last year’s appropriation.

Within the amount appropriated to the Corps of Engineers, $163 million is for general investigations, $1.67 billion is for the construction program, and $1.86 billion is for operations and maintenance. In addition, the bill includes $347 million for the flood control, Mississippi River and Tributaries project.

The bill also funds the budget request for the regulatory program and the Formerly Utilized Sites Remedial Action Program.

In title II, which is for the Bureau of Reclamation, we spend $842 million, an increase of only $26 million over fiscal year 2001. Title III provides $18 billion for the Department of Energy, an increase of $444 million over fiscal year 2001.

So in all three areas of jurisdiction the bill is within the suggested constraints that President Bush has submitted to us, whereby we control excessive government growth spending. We are very pleased to have done that.

We sought to maintain level funding for basic research in science programs; and we provided $3.17 billion, an increase of $6.5 million over the budget request. Funding of $276.3 million has been provided for construction of the Spallation Neutron Source, the same as the budget request. We have sought to respond to all of the needs, and we visited some of the projects throughout the country in trying to determine where our priorities ought to be.

I think if there is anything, Mr. Chairman, that pleases me, it is the way we have been able to work in a bipartisan fashion with the minority. We have been able to respond, as I said earlier, to most every legitimate need, we feel, that has been brought before us for our consideration. I am happy to have the support of so many Members of Congress in helping us draft this legislation.

Mr. Chairman, I owe a debt of gratitude to the hard work of the dedicated members of the Subcommittee on Energy and Water Development. They have labored under difficult constraints to produce a bill that is balanced and fair. I am especially grateful to the gentleman from Indiana (Mr. VISCLOSKY), our ranking minority member. It is in large part due to his efforts that we present a bill that merits the support of all Members of the House.

Mr. Chairman, I urge all Members to support H.R. 2311 as reported by the Committee on Appropriations.

Mr. Chairman, I include the following charts for the RECORD.

Mr. Chairman, I reserve the balance of my time.

Mr. VIECLOSKY. Mr. Chairman, I yield myself such time as may con-
sume.

Mr. Chairman, I would encourage at the outset of my remarks all of the Members of the body to support the en-
ergy and water appropriation bill. I would also at the outset note that the long-standing Alabama and Indiana connection, as they call it, that was es-

established many years ago by Mr. Bevill from Alabama and Mr. Myers from In-
diana, has now been reestablished on that particular subcommittee.

I want to very sincerely thank the gentleman from Alabama (Chairman CALLAHAN) for his leadership on the sub-
committee. He has been a leader. He has been trusting of all of us on this subcommittee, he has been fair, and he has been decisive. He has put together a very good work product in a bipartisan fashion, and I strongly support it.

I also do want to thank all of the members of the subcommittee, who have worked so hard also to put this legislation together.

Last, I want to especially thank those who have done the work, the staff: Bob Schmidt, Jeanne Wilson, Kevin Cook, Tracy LaTurner, Paul Tumminello, the personal staff of the gentleman from Alabama (Mr. CAL-
LAHAN), Mike Sharp and Nancy Tippins; and our side of the aisle, David Killian, Richard Kaelin, and Jennifer Watkins, a former staffer. I do appreci-
ate the work that the staff has done.

The President asked for $1 billion worth of cuts for the programs rep-
resented by this legislation; and under the leadership of this subcommittee, those cuts have essentially been re-
stored.

We are $187 million over the current year level, that is less than a 1 percent increase, but this bill does meet crit-

ical demands faced in the infrastruc-
ture and energy arena by our Nation. I am particularly happy that as far as water infrastructure, there is a $591 million plus-up in this bill, and some of the other attributes I would mention is the increase in environmental funding over the administration request. This funding increase is essential to achiev-
ing long-planned program milestones, assuring compliance with the law, and avoiding unnecessary stretch-outs that could simply lead to higher costs.

I am also very happy that in the non-proliferation accounts, we have in-
creased the amount over the Presi-
dent’s request by $71 million, and the current bill now has $774 million con-
tained therein. I do think it is impor-
tant for all of my colleagues to under-
stand that the gentleman from Ala-
bama (Mr. CALLAHAN) indicated during markup that he plans to conduct a

CONGRESSIONAL RECORD—HOUSE 12115

June 27, 2001

$12 billion. Clearly, the resources as far as the allocations do not exist.

Mr. Chairman, Alabama has done an exceptional job with the resources we were given. This is a very good bill. However, I do think the ad-
ministration and the Congress some-
day, whether it is water or other eco-
nomic infrastructure, has to face the fact that we need to invest more money.

Mr. Chairman, I reserve the balance of my time.

Mr. CALLAHAN. Mr. Chairman, I yield such time as he may consume to the gentle-
man from Florida (Mr. YOUNG), the chairman of the full com-
mittee, and the gentleman who is res-
ponsible for marshalling all 13 of these appropriation bills through this body and through the conference.

I also want to thank the gentleman from Florida (Mr. YOUNG) for his leadership on this issue.

I also do want to congratulate the chairman of this subcommittee. He and the ranking member have done an out-
standing job in bringing disagreements together to agreements. They have a great bill. There will be some dif-
fosses that we will be discussing here later this afternoon, but they have done a really good job. They have worked together very well in a good bi-
partisan fashion, and they have pro-
duced a bill of which both the chair-
man as well as the ranking member can be very proud. The staff of the sub-
committee, too, have done yeoman’s work.

I take this little extra time, Mr. Chairman, to say that one of the con-
versations that we will probably have this afternoon will have to do with en-
ergy. We have enough problems with energy because of our heavy reliance on foreign sources. We have problems with those foreign sources on occasion. We cannot afford to have any energy wars here at home with each other. So we need to be careful how we approach all of these issues so that we do not get into a battle with ourselves over en-
ergy.

A major industrial Nation like the United States, which is a large con-
sumer of energy, must also understand the importance of producing energy, because if we totally rely on energy sources from abroad, we will find our-
selves in real tight spots on occasion, which we do on occasion.

So when we get to those issues later today, let us understand that we are all on the same team, and that we are not going to start any energy wars between one section of the country and another; that we are going to work together to work out what is right and best for the people of the United States of America, who are energy consumers.

But again, I wanted to say that the gentleman from Alabama (Mr. CAL-
LAHAN), the chairman of the sub-
committee, has done a beautiful job with this bill with the help of the gen-
tleman from Indiana (Mr. VIECLOSKY),
Mr. Chairman, we will be filing the Agriculture Bill this afternoon and hopefully will have it on the floor tomorrow. The subcommittees have marked up two more appropriations bills this morning, so we really are moving quickly. We got off to a late start because we received our specific numbers and budget justifications late, but we are catching up, and we are catching up pretty effectively.

Mr. VISCLOSKY. Mr. Chairman, I yield such time as she may consume to the gentlewoman from California (Ms. ROYBAL-ALLARD), a valued member of the subcommittee.

Ms. ROYBAL-ALLARD. Mr. Chairman, I rise for the purpose of engaging in a colloquy with the gentleman from Alabama (Mr. CALLAHAN) on the subject of security procedures at the Department of Energy headquarters.

Members of this House were appalled when they learned about the incident involving our colleague, the gentleman from Oregon (Mr. WU), at the Department of Energy headquarters a few weeks ago. The gentleman from California had been invited by DOE to be a guest speaker at a celebration honoring the contributions of Asian Pacific Islander Americans to this country. But when he arrived at DOE headquarters, he was refused admittance and asked three different times whether he was an American citizen, even after producing an official card identifying him as a Member of Congress.

An Asian American aide accompanying the gentleman from California (Mr. WU) was also refused admittance, despite producing a congressional identification card.

As the representative of the 33rd Congressional District of California, I am proud to represent an active community of Asian Pacific Islander Americans in Los Angeles. Understandably, we were very upset at this incident and the implication of discrimination by an official government agency.

I, therefore, want to take this opportunity to thank the gentleman from Alabama (Mr. CALLAHAN) for including in the bill a $4 million increase for transmission reliability and to direct the Department of Energy to initiate field-testing of advanced composite conductors. I just want to clarify that these additional funds will be used explicitly for Aluminum Matrix Composite conductors; is that correct?

Mr. CALLAHAN. Mr. Chairman, will the gentlewoman yield?

Ms. ROYBAL-ALLARD. Mr. Chairman, I yield to the gentlewoman from Alabama.

Mr. CALLAHAN. Mr. Chairman, I appreciate very much the gentlewoman's interest in this matter, and I know that we are all concerned about this incident. As the gentlewoman has requested, we have directed DOE to consider its security procedures and to report back to us.

Ms. ROYBAL-ALLARD. Mr. Chairman, reclaiming my time, I thank the gentleman for providing me with this opportunity to report to our colleagues on how we have responded to this disturbing incident. I very much appreciate the gentleman's willingness to work with me to ensure that DOE's security procedures are not only effective, but that they are also in keeping with our American values against discrimination.

Mr. CALLAHAN. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey (Mr. FRELINGHUYSEN), a member of our subcommittee, and a very important member of our subcommittee.

Mr. FRELINGHUYSEN. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I rise today in support of the energy and water appropriations bill for this fiscal year. I wish first to thank the gentleman from Alabama (Mr. CALLAHAN), the chairman of the subcommittee, for his leadership on our subcommittee's work, and to the gentleman from Indiana (Mr. VISCLOSKY), the ranking member of this bipartisan approach to our bill, and my thanks to the subcommittee staff for their tireless efforts in putting this bill together.

The gentleman from Alabama (Mr. CALLAHAN) has produced a bill that ensures our Nation's continued commitment to work in partnership with our States and local communities to address such vital needs as flood control, shore protection, environmental restoration, and improving our Nation's many waterways. By doing so, we are helping meet our critical economic, environmental and public safety needs in virtually every State in the Nation, and we are doing so in keeping with our 302(b) allocation, which means we are working within the confines of a balanced Federal budget.

As the chairman can attest and has attested, there are many more requests for funding than our budget allocation can provide for. The No New Start policy contained in this bill is difficult, but very necessary. We are focusing our limited dollars on ongoing projects that are on schedule and on budget.

The chairman deserves special recognition for rejecting forthright the proposition that we should change in midstream the Federal Government's funding formula commitments to these ongoing projects. For more than 170 years, the Federal Government has worked in partnership with our States and local communities to provide solutions to critical flooding, dredging and environmental problems, as well as beach and shore protection. In my home State of New Jersey, these projects have kept our port of New York and New Jersey open for business, and prepared us for the future of bigger ships.

I want to thank the chairman in particular for his strong support of dredging for our port, and with this bill we are helping to keep 127 miles of our beaches in my State open for visitors from around the world. This is a $30 billion industry of tourism for our State. It employs over 800,000 people.

Finally, to help protect people, their homes and businesses from the ravages of flooding, we are helping to purchase wetlands for natural disaster areas, and we are working alongside local governments in Somerset and Morris Counties and elsewhere to develop long-term solutions to keep people safe and our communities whole in the event that floods reoccur, and they will.

Let me also address part of our bill which provides funding for the Department of Energy. Here we have focused our critical dollars on the central programs where the Federal Government funding can truly make a difference. I especially want to thank the chairman for his support of $248 billion for the fusion program and $25 million for laser research. In the President's national energy plan, fusion energy was actually highlighted as having the potential to serve as an inexhaustible and an abundant clean source of energy. The President's energy plan suggests that fusion should be developed as a next-generation technology, and I agree.

Finally, let me say a word about funding for the renewable energy resources, since they are a focus of so much public attention. Let us be clear. Everyone supports renewables, and we fund these programs at $376 million. In fact, in the 7 years I have served on this subcommittee, we have invested over $2.2 billion in renewable energy. This year's added funding maintains our commitment to renewables.

Mr. Chairman, I rise in support of this bill, and I urge my colleagues to do the same.

Mr. VISCLOSKY. Mr. Chairman, I would simply follow up on the colloquy that the gentlewoman from California and the gentleman from Alabama had and would note that the committee directs the Secretary to report back by September 1 of this year in anticipation of the conference. So I do appreciate the chairman's cooperation.

Mr. Chairman, I yield such time as he may consume to the gentlewoman from Minnesota (Mr. SABO).

Mr. SABO. Mr. Chairman, I thank my colleagues for including in the bill a $4 million increase for transmission reliability and to direct the Department of Energy to initiate field-testing of advanced composite conductors. I just want to clarify that these additional funds will be used explicitly for Aluminum Matrix Composite conductors; is that correct?

Mr. CALLAHAN. Mr. Chairman, will the gentlewoman yield?

Mr. SABO. Mr. Chairman, I yield to the gentlewoman from Alabama.
Mr. CALLAHAN. The gentleman from Minnesota (Mr. SABO) is correct.

Mr. SABO. Reclaiming my time, I thank the gentleman from Alabama for his response.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. GARY G. MILLER).

Mr. GARY G. MILLER of California. Mr. Chairman, I would like to inquire about a provision in the Committee Report. In title III, describing the Committee’s funding priorities for the Department of Energy’s Energy, Biomass, Biofuels and Energy Systems program, the report states “$1 million to support a cost-shared agricultural waste methane power generation facility in California.”

With regard to this California project, I ask the gentleman from Alabama (Chairman CALLAHAN) is it the same effort proposed by the Inland Empire Utilities Agency in cooperation with the dairies located in the Chino Dairy Preserve?

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. GARY G. MILLER of California. I yield to the gentleman from Alabama.

Mr. CALLAHAN. The gentleman from California is correct.

Mr. VISCLOSKY. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. EDWARDS), a member of the Subcommittee on Energy and Water Development.

Mr. EDWARDS. Mr. Chairman, I rise in support of this important legislation, and I would like to speak about both its process and its product.

Regarding the process in developing this legislation, I commend the gentleman from Alabama (Mr. CALLAHAN), who is not new to a position of being chair in this House, he is not new to the subcommittee; but this is his first term as a chairman of this subcommittee. Through his leadership, working with the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, this was truly put together on a fair and bipartisan basis with the intention of what is good for the country in different regions of the country, not what is good for one party or another.

Mr. Chairman, I regret sometimes that the amount of press attention to legislation in Washington is inversely proportional to the importance of that legislation and how well it is handled. There may not be a lot of coverage of this today in many parts of the country, because it was done on a bipartisan basis without squabbling and infighting.

In terms of the product of this bill, I rise to speak about it because many people in this House and throughout the country do not pay a great deal of attention to the work of this subcommittee, especially because much of its work is designed for prevention, flood prevention and nuclear proliferation prevention.

If this committee does its work well, people never know how important the work of the Subcommittee on Energy and Water has actually been to their lives.

Mr. Chairman, let me pay special tribute to the gentleman from Alabama (Chairman CALLAHAN) for his strong leadership efforts supported by the gentleman from Indiana (Mr. VISCLOSKY) in seeing that at a time of great flood and, in the wake of Tropical Storm Allison, we did not cut the funding for the Army Corps of Engineers flood control projects as had been originally proposed.

In an area of which I have great personal interest, the area of nuclear non-proliferation, I think most Americans would be surprised to know that in Russia today, there is enough nuclear grade plutonium and enriched uranium to build 80,000 nuclear bombs.

This subcommittee’s work is to try to help Russia to get control of that nuclear material so that, God forbid, we do not wake up some day, weeks or months or years from now and read about a major American city having lost millions of its citizens because of the terrorists getting their hands on some nuclear material from the former Soviet Union, not putting it on the tip of a nuclear missile, but putting it in a backpack and parking it in a pickup truck in a major American city.

The gentleman from Alabama (Chairman CALLAHAN) especially deserves the appreciation of American families for saying that we must make an increased investment to ensure that that nuclear material should not get into the hands of terrorists throughout the world.

We may never know how much of a debt of gratitude we owe the gentleman from Alabama (Chairman CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY), as his partner in fighting to increase that funding. But I thank the gentleman from Alabama personally as a Member of Congress and as a father for the effort in that particular area, as well as the important work of this subcommittee and flood control and energy renewable research.

Mr. Chairman, I rise in strong support of this legislation. It was handled well. The product is a good one.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky (Mr. WHITFIELD).

Mr. WHITFIELD. Mr. Chairman, I also want to congratulate the gentleman from Alabama (Chairman CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY), the ranking minority member, for their leadership, and I look forward to the passage of this legislation.

Mr. VISCLOSKY. Mr. Chairman, I yield such time as he may consume to the gentleman from Arizona (Mr. PASTOR).

Mr. PASTOR. Mr. Chairman, first of all, I would like to congratulate the gentleman from Alabama (Mr. CALLAHAN), the Chairman of the Subcommittee on Energy and Water Development, and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member on the subcommittee, for the fine work they have done in bringing this bipartisan bill forward.

I also would like to thank both of the gentleman for the subcommittee has provided for cylinder maintenance and the construction of an on-site low-level waste disposal cell, will keep us on a steady path towards a safer workplace and a safer community.

Mr. Chairman, the employees at the plant and the citizens living and working in the area adjacent to the plant deserve no less.

On one separate issue, I understand that with the constraint of money, obviously, that the bill recommends a slight reduction in the DOE’s Office of Environmental Safety and Health. To the extent that this reduction might impact the very important medical monitoring program at Paducah for current and former workers, I hope that the gentleman from Alabama (Chairman CALLAHAN) might consider restoring those funds, if it is possible, as the bill moves forward.

The monitoring program is a key component of the newly established DOE workers compensation program, which funds have just now been implemented Nationwide.

Again, I want to thank the gentleman from Alabama (Chairman CALLAHAN), the gentleman from Indiana (Mr. VISCLOSKY), the ranking minority member, for their leadership, and I look forward to the passage of this legislation.

Mr. VISCLOSKY. Mr. Chairman, I want to thank the gentleman from Arizona (Mr. PASTOR).
of us who live in Maricopa County are very appreciative of it.

We do so with thanks to the sub-committee for funding the various flood control studies and habitat restoration of the various tributaries of the Salt River. Also, those of us who represent Tucson are very thankful, because, in this bill, we fund many projects that deal with habitat restoration and flood control in southern Arizona.

Mr. Chairman, I look forward to working with the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, to deal with the issue of the Nogales Wash and to see how we can fund that flood control project; but I would urge my colleagues to support this bill, it is bipartisan.

Mr. Chairman, I wish to thank the staff that have worked very hard on this bill.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Montana (Mr. REHBERG).

Mr. REHBERG. Mr. Chairman, I would like to engage in a brief colloquy with the gentleman from Alabama (Chairman CALLAHAN).

Mr. Chairman, I want to commend the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY) for their action to restore over $30 million in funds which were eliminated from the fiscal year 2002 budget for the U.S. Department of Energy’s Office of Science and Technology within the Environmental Management program.

The Office of Science and Technology has a very important mission in developing and implementing means to clean up contaminated Federal property throughout the country, and it deserves the continued and strong support of the Congress.

Mr. Chairman, I am concerned about the continuation of the important work of DOE’s Western Environmental Technology Office, or WETO, located in Butte, Montana. At this facility, the National Energy Technology Laboratory provides critical support to DOE’s Office of Science and Technology. Their activities help facilitate DOE’s demonstration, evaluation, and implementation of technologies that promise to provide much needed solutions to the environmental cleanup challenges at various DOE sites.

DOE’s Research and Development contract for the Western Environmental Technology Office, originally awarded in fiscal year 1997, has been extended through the end of fiscal year 2003. That contract extension provided that DOE would fund WETO at the following levels: $6 million in fiscal year 2001, $0 million in fiscal year 2002, and $4 million in fiscal year 2003. Consistent with this contract and schedule, the Energy and Water Development Appropriations Act for fiscal year 2001 provided $6.5 million for WETO to carry out its important functions.

It is critically important to preserve this commitment to WETO and continued funding as scheduled. I would add, Mr. Chairman, that the operations and activities of WETO are very important to the economy in Montana. Many professionals have chosen western Montana as their home while they serve our Nation’s challenge to clean contaminated DOE’s sites.

I ask the gentleman from Alabama (Mr. CALLAHAN) if he would agree that it is the committee’s intent that DOE’s agreement with WETO be honored and funded to the maximum extent possible?

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. REHBERG. I yield to the gentleman from Alabama (Mr. CALLAHAN).

Mr. CALLAHAN. Absolutely. I would agree with the gentleman from Montana. If the Department of Energy has signed a contract with the facility, then it should be honored to the maximum extent possible.

Mr. REHBERG. Reclaiming my time, I thank the chairman for his consideration of this very important program.

Mr. VISCLOSKY. Mr. Chairman, I yield 1 minute to the distinguished gentleman from New York (Mr. CROWLEY).

Mr. CROWLEY. Mr. Chairman, I thank the gentleman from Indiana (Mr. VISCLOSKY) for yielding me such time.

Mr. Chairman, I rise in strong support of the energy and water bill before us today. I want to thank and congratulate the gentleman from Alabama (Chairman CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, for their great work in drafting a solid bipartisan bill that will address some of the important energy and infrastructure needs of our Nation over the next year.

In particular, I want to thank the committee for including $4.14 million in this bill for the cleanup of Flushing Bay and Creek in my congressional district in Queens.

This funding will be used for the badly needed dredging of parts of this water body to clean up old sediment and other debris that has built up in the bay, which has hampered economic development and the free flow of commerce, as well as trapped pollution and pollutants and other contaminants in that body of water.

The pollution build-up in Flushing Creek Bay and creek has resulted in foul odors and water discoloration, making this body of water a blight on our community, but this investment by the committee in the cleanup will make Flushing Bay and its creek the envy of Queens County.

Mr. Chairman, once again, I want to thank the gentleman from Alabama (Chairman CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, for their hard work and support of this project for the people of my district in Queens, New York.

Mr. CALLAHAN. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Mr. GRAVES).

Mr. GRAVES. Mr. Chairman, I, too, want to commend the gentleman from Alabama (Chairman CALLAHAN) for his work on this bill.

Mr. Chairman, I rise today in strong support of this bill, specifically the language included to prohibit the Corps of Engineers from using funds to implement a spring rise in the Missouri River.

The National Fish and Wildlife Service recommends implementing higher water levels in the spring and lower levels in the fall. While this artificial water rise would help improve the breeding habitat of three species, least tern, piping plover, and pallid sturgeon, the higher spring water level increases the risk for flooding in towns and on valuable farmland.

The spring rise would devastate communities in my district and all along the Missouri and Mississippi Rivers. When water is released from upstream dams in the Dakotas and Montana, it takes 12 days to reach St. Louis, where the Missouri meets the Mississippi. Once water is released, it cannot be retrieved. Any rains during that 12-day period would make it impossible to control the amount of flooding that would occur.

As we saw earlier this month, the Missouri and Mississippi Rivers often flood naturally; we do not need any additional government-imposed floods. Unless you have been in one of those communities where a flood has hit, you cannot appreciate how devastating a flood can be.

This is not a new proposal. Mr. Chairman, similar language has been included in the last five energy and water appropriation bills. I urge my colleagues to put the needs of the people living and working along the river above the needs of the piping plover and/or the least tern.

Mr. VISCLOSKY. Mr. Chairman, I yield 2 minutes to the gentlewoman from California (Ms. MILLENDER-MCDONALD).

Ms. MILLENDER-MCDONALD. Mr. Chairman, I rise today first to commend the gentleman from Alabama (Mr. CALLAHAN), the Chairman of the Subcommittee on Energy and Water Development, and the gentleman from Indiana (Mr. VISCLOSKY), the ranking member, for their consistent leadership in addressing the Nation’s water infrastructure needs.

Mr. Chairman, I support this bill, and I appreciate their support of the request that I submitted. I am pleased that $5.5 million of this year’s appropriation bill will go towards the West Basin Municipal Water District located...
in my district, and these funds will assist in the development of the Harbor/South Bay Water Recycling Project in Los Angeles County. The Harbor/South Bay Water Recycling Project will yield clear and measurable long-term returns from this short-term investment.

Mr. KIND. Mr. Chairman, I thank the gentleman very much and thank the ranking Member who is California based on this committee who actively advocated on my behalf, and I thank them very much and thank the ranking member and the chairman.

Mr. CALLAHAN. Mr. Chairman, I reserve the balance of my time.

Mr. VISCLOSKY. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin (Mr. Kim).

Mr. KIND. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in support of this bill and commend the subcommittee leadership on their very timely and efficient work on this important piece of legislation.

I was especially happy to see the committee’s recognition of better preserving and protecting the Mississippi River Basin. As co-chair of the bipartisan Mississippi River Task Force, I was happy to see them increase funding by a few million dollars to the important Environmental Management Program above what the Administration requested in their budget.

This is a five-State collaboration program that also involves USGS, the Army Corps of Engineers, Fish and Wildlife Service, which involves Habitat Restoration Projects along the Mississippi River and a long-term resource monitoring scientific program to better understand and share the environmental concerns regarding dredging. In short, dredging and the disposal of dredge materials can only be conducted in such a manner as to not adversely impact surrounding waterways.

Over the past years, I have expressed to the Army Corps of Engineers my concern regarding proposals calling for the establishment of containment islands and borrow pits. I have also met with citizens and groups who have expressed similar concerns.

June 27, 2001

CONGRESSIONAL RECORD—HOUSE

12119

in my district, and these funds will assist in the development of The Harbor/South Bay Water Recycling Project in Los Angeles County. The Harbor/South Bay Water Recycling Project will yield clear and measurable long-term returns from this short-term investment.

Mr. CALLAHAN. Mr. Chairman, I reserve the balance of my time.

Mr. VISCLOSKY. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin (Mr. Kim).

Mr. KIND. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in support of this bill and commend the subcommittee leadership on their very timely and efficient work on this important piece of legislation.

I was especially happy to see the committee’s recognition of better preserving and protecting the Mississippi River Basin. As co-chair of the bipartisan Mississippi River Task Force, I was happy to see them increase funding by a few million dollars to the important Environmental Management Program above what the Administration requested in their budget.

This is a five-State collaboration program that also involves USGS, the Army Corps of Engineers, Fish and Wildlife Service, which involves Habitat Restoration Projects along the Mississippi River and a long-term resource monitoring scientific program to better understand and share the environmental concerns regarding dredging. In short, dredging and the disposal of dredge materials can only be conducted in such a manner as to not adversely impact surrounding waterways.

Over the past years, I have expressed to the Army Corps of Engineers my concern regarding proposals calling for the establishment of containment islands and borrow pits. I have also met with citizens and groups who have expressed similar concerns.

Containment islands, Mr. Chairman, are not appropriate. In the draft, Dredged Material Management Plan, the Army Corps of Engineers found containment islands to be too costly and claimed they were not going to be considered as a viable option. In fact, according to the Corps, pits located directly off Coney Island, the East Bank Pits, and Staten Island, for example, the CAC Pit, that were identified by citizen groups as being designated for near-term disposal activity have been studied extensively and are no longer being considered for any action. However, I want to ensure that the Corps has held to these statements and these options are officially removed from consideration.

We have a responsibility to protect our waterways and marine life from potentially harmful pollutants. The use of emerging technologies and innovative ideas, such as using dredged material for abandoned coal mine reclamation, as well as upland disposal options in the future, will help to ensure the economic benefits of dredging and protecting the environment, I believe, are not mutually exclusive.

Therefore, Mr. Chairman, I would like to work with you as this moves to conference with the Senate to address this important issue.

Mr. CALLAHAN. Mr. Chairman, the gentleman yield?

Mr. FOSSELLA. I am happy to yield to the gentleman from New York for bringing this matter to our attention. I want to pledge to him to work with him and the Army Corps of Engineers to address this as this bill moves forward. I will do all that I can to help him. I know of his passion to protect the waterways of the coast of Staten Island, and I want to do everything I can to help him protect those waterways.

Mr. FOSSELLA. Mr. Chairman, I thank the gentleman very much for his support and leadership.

Mr. VISCLOSKY. Mr. Chairman, I understand that the majority has no further speakers. I yield back the balance of my time.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to comment that we worked very hard to get this bill to the position it is in today. This is just the first of several steps in the process as we all know. It has to go through the conference committee. Then it has to go through a conference committee after that. I want the Members to know that we are going to do everything we can to protect what we have in this bill and that I am sure my colleagues have the same commitment from the gentleman from Indiana (Mr. VISCLOSKY).

But I echo in Mr. VISCLOSKY’s earlier statement and would like to thank the
staff members that have formulated and drafted this bill. It is a very complicated bill, and it requires a lot of talent. Bill Schmid, and Joanne Wilson and Kevin Cook, Paul Tumminello and Tracey Laturner, along with my staff, Nancy Tippins and Mike Sharp, have done a tremendous job in writing and drafting this very complicated piece of legislation.

But we are happy to have received the support we have received from all Members of Congress.

Mr. Chairman, I yield such time as he might consume to the gentleman from Iowa (Mr. Latham), a member of our subcommittee.

Mr. LATHAM. Mr. Chairman, I thank the chairman very much for yielding me this time.

Mr. THUNE. Mr. Chairman, I yield the gentleman from South Dakota (Mr. Thune).

Mr. THUNE. Mr. Chairman, I thank the gentleman from Iowa for yielding to me.

Mr. Chairman, I intend to rise today to speak to section 106 of the bill before us. Section 106 would prevent the U.S. Army Corps of Engineers from revising the Missouri River Master Water Control Manual that includes anything that includes a so-called spring rise. Mr. Chairman, I have to express my strong objection to that particular provision.

For most of my colleagues here in the House, this debate may not be familiar. It is primarily a regional issue with divisions that break along regional lines, but its significance is much broader.

I appreciate the concerns that the proponents of section 106 have regarding downstream flooding and the continued viability of navigation. However, I believe there is a way to address upstream and downstream concerns as we modify the master manual to account for those competing priorities.

I believe we can forge a balanced approach to the operation of the river. We must consider all of the impacts and do this in a way that balances the needs of all the States concerned.

In addition to recreation flood control navigation, we must consider the impacts changes would have on hydro-power, water supply, and environmental and cultural resources.

The Corps has been working diligently to account for all of these concerns, but there are strong and vocal views on all sides of any solution that they propose. As a result, Mr. Chairman, I would like Congress to look for a new way to deal with this problem that involves consensus building among the various stakeholders.

In the past, the Missouri River Basin Association, a group made up of representatives of the governors of each of the eight basin States and representatives of the Indian tribes has had success in finding common interest among the disparate views of the upstream and downstream States.

As a result, I like to know if the chairman of the subcommittee, the gentleman from Alabama, would be willing to work with me to consider a solution that would help bring consensus to this issue.

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield?

Mr. LATHAM. I am happy to yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, I thank the gentleman from South Dakota (Mr. Thune) for his interest in this issue. I am well familiar with this issue through previous conversations that we have had throughout the years, and I know of the great importance it is to him and upstream States.

I appreciate his concerns and would welcome any solution and input that he may have. I would also encourage him to work with his colleagues and the gentleman from Iowa (Mr. Latham), in order to reach a result.

Mr. THUNE. Mr. Chairman, if the gentleman from Iowa will further yield, I thank the chairman for his continued openness and remaining open to working with me on this and as well as for his support of a number of South Dakota priorities that are included in this energy and water appropriation bill.

I also appreciate his suggestion that I work with the gentleman from Iowa (Mr. Latham) on this solution.

Mr. LATHAM. Mr. Chairman, I appreciate the interest of the gentleman from South Dakota (Mr. Thune) in this issue and his willingness to consider some middle ground on this divisive matter.

Our States have so much in common, yet there clearly are differences on this issue. Nonetheless, I do think it is worth considering these areas of the master manual debate where we do agree and work together toward an answer that would satisfy the concerns of upper and lower basin States.

I do not expect this to be an easy task as we all know but would welcome the gentleman's input in the process, and I am willing to work with him to consider various options.

Mr. Chairman, I yield to the gentleman from South Dakota (Mr. Thune).

Mr. THUNE. Mr. Chairman, I thank the gentleman for their cooperation. As I stated earlier, while I am disappointed this provision likely will be voted on by the House today, I am encouraged by the willingness of my colleagues to work with me on a balanced consensus-based approach to revise the Missouri River Master Manual.

Mr. CALLAHAN. Mr. Chairman, I yield 3 minutes to the gentleman from Mississippi (Mr. Wicker), a member of the subcommittee with the gentleman from Alabama (Chairman Callahan) and also the gentleman from Indiana (Mr. Visclosky), our ranking minority member. I appreciate their hard work and cooperation in producing this bipartisan piece of legislation.

I particularly want to thank the gentleman from Alabama (Chairman Callahan) for crafting a bill which recognizes the benefits of making needed investments today in order to save money tomorrow.

Let me just give the committee two examples of this. One excellent example is the substantial increase in funding for the environmental management cleanup activities at our Nation's nuclear laboratories and facilities. H.R. 2311 provides over $7 billion for the purpose of this cleanup. This is an increase of over a quarter of $1 billion over last year's amount. This increase will allow cleanup timetables to stay on schedule and save unnecessary future costs.

I am also pleased that this bill reflects the importance of our Nation's water infrastructure. Mr. Chairman, our Nation's waters do not recognize State lines as we all know. Over 40 percent of the Nation's water flows by the borders of my home State of Mississippi. Flood control and maintaining navigable waterways are national issues. By making the necessary investments in these activities, we will avoid the greater cost in the future that we would have if we were not having the proposed spending today.

So, Mr. Chairman, I urge the support from all of my colleagues for this bipartisan bill which fund our Nation's priorities and, of course, within the context of a balanced budget.

Mr. CALLAHAN. Mr. Chairman, I yield 2 minutes to the gentleman from Alabama (Mr. Everett).

Mr. EVERETT. Mr. Chairman, the cities of Dothan, Enterprise, Ozark, Daleville and the U.S. Army Aviation Center at Fort Rucker, Alabama have formed a partnership in support of a regional reservoir to meet their water supply needs.

The geological Survey of Alabama has a 3-year study to locate a reservoir to serve these areas experiencing water, severe water supply shortages and is currently working with the Corps of Engineers on a needs assessment which should be completed in a few months.

Does the Chairman understand the importance of this project to the cities mentioned and to the Army Aviation
June 27, 2001

Training Center and that this is not a new project?

Mr. CALLAHAN. Mr. Chairman, will the gentleman yield.

Mr. EVERETT. I am glad to yield to the gentleman from Alabama.

Mr. CALLAHAN. Mr. Chairman, I do understand these communities are suffering water shortages primarily because the gentleman from Alabama (Mr. EVERETT) tells me about it every night. Every time we get in a 5-minute lull he expresses to me his serious concerns about these problems, which I think will worsen in the near future, and that the corporation of the Corps is needed as soon as possible.

I pledge to work with the gentleman and find an appropriate resolution to this situation as this process moves forward, probably in conference.

Mr. EVERETT. I appreciate the chairman's comments.

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume to advise my colleagues that I do not have any further speakers. But, once again, let me remind the Members that this is the first stage of this process and that we have been fairly generous, I think, in recognizing all of the demands of all the Members on both sides of the aisle. I pledge, along with the gentleman from Indiana (Mr. VISCLOSKY), to try to protect all the projects we have in here as it goes through the process.

As my colleagues well know, the process could involve removal of some of these projects in the Senate, it could include removal of some of these projects in conference, but I am going to do everything I can to make absolutely sure the Members who support this bill especially, that their projects are preserved.

Mr. MATSUI. Mr. Chairman, I would like to thank Chairman CALLAHAN and Ranking Member VISCLOSKY, and the Members of the Subcommittee for their support of Sacramento flood control projects included in the Fiscal Year 2002 Energy and Water Appropriations bill. As this body knows, with a mere 85-year level of protection, Sacramento has been identified by the U.S. Army Corps of Engineers as one of the most at-risk areas in the nation. At risk are roughly half-a-million people and $40 billion in economic value. This includes 1,200 public facilities, 130 schools, 26 nursing home facilities, 7 major hospitals, major interstate highways, and the Capitol to the world's sixth largest economy. Thank you.

Thankfully, this Subcommittee has again generously funded numerous project requests in my Sacramento district essential to the ongoing flood work necessary to address this dire situation. Specifically, I thank the subcommittee for the $8 million allocation for continued construction modifications to Folsom Dam. These flood outlet modifications represent the linchpin to Sacramento's flood control system, providing a doubling of Sacramento's flood protection and giving to the flood plain its first major improvements to flood control in more than 40 years. I am grateful for the $15 million included for the American River Watershed Common Elements which will provide much needed improvements to more than 36 miles of Sacramento's levees, the last line of defense against catastrophic flooding. I also would like to thank the Members for their efforts in securing additional funding for a series of smaller, yet no less critical, regional flood control projects. This includes projects for Sacramento River bank protection, work on the Lower Strong and Chicken Ranch Slough, Maggie Creek, and funds to allow for ongoing studies for American River Watershed flood control.

It is my hope that as this legislation continues to move through the legislative process, serious consideration is given to funding 'new starts' construction projects. The South Sacramento damage area represents protection to more than 100,000 people and 41,000 structures from a network of creeks and small rivers in the region. This project was authorized in the 1999 Water Resources Development Act and is now ready for construction. Although it recognizes the extremely tight budgetary constraints confronting this subcommittee, the perilous situation that these streams pose to the South Sacramento region makes initial construction funding essential. I ask for your support in providing funding for this critical new start project in the conference committee.

Again, on behalf of my Sacramento constituents, I remain grateful for your past and continued support of these vital, life-saving projects. Thank you for your efforts in supporting essential federal assistance to the most pressing public safety issue confronting the region.

Mr. BEREUTER. Mr. Chairman, this Member would like to commend the distinguished gentleman from Alabama (Mr. CALLAHAN), the Chairman of the Energy and Water Development Appropriations Subcommittee, and the distinguished gentleman from Indiana (Mr. VISCLOSKY), the Ranking Member of the Subcommittee, for their exceptional work in bringing this bill to the Floor.

This Member recognizes that extremely tight budgetary constraints made the job of the Subcommittee much more difficult this year. Therefore, the Subcommittee is to be commended for its diligence in creating such a fiscally responsible measure. In light of these budgetary pressures, this Member would like to express appreciation to the Subcommittee and formally recognize that the Energy and Water Development Appropriations bill for fiscal year 2002 includes funding for several water projects that are of great importance to Nebraska.

This Member greatly appreciates the $11 million funding level provided for the four-state Missouri River Mitigation Project. The funding is needed to restore fish and wildlife habitat lost due to the Federally sponsored channelization and stabilization projects of the Pick-Sloan plan. This includes wetlands, and flat floodplains needed to support the wildlife and waterfowl that once lived along the river are gone. An estimated 475,000 acres of habitat in Iowa, Nebraska, Missouri and Kansas have been lost. Today's fishery resources are estimated to be only one-fifth of those which existed in pre-development days. In 1986, the Congress authorized over $50 million to fund the Missouri River Mitigation project to restore fish and wildlife habitat lost due to the construction of structures to implement the Pick-Sloan plan.

In addition, this measure provides additional funding for flood-related projects of tremendous importance to residents of Nebraska's First Congressional District. Mr. Chairman, in 1993 temporarily closed Interstate 80 and seriously threatened the Lincoln municipal water system which is located along the Platte River near Ashland, Nebraska. Therefore, this Member is extremely pleased that H.R. 2311 continues funding in the amount of $350,000 for the Lower Platte River and Tributaries Flood Control Study. This study should help formulate and develop feasible solutions which will alleviate future flood problems along the Lower Platte River and tributaries.

This Member is also pleased that this bill includes $100,000 in funding requested by this Member for the feasibility phase of a Section 206 wetlands restoration project in Butler County, Nebraska. The key element of the plan is the incorporation of a wetlands restoration project northwest of David City, Nebraska. This restoration was supported by a Natural Resources Conservation Service preliminary determination of wetlands potential for a 160-acre tract northwest of David City, Nebraska. Under the proposed project, storm water that currently travels northwest of David City will be diverted west before reaching the city, and then channeled south along a county road before being detained in the proposed wetlands area. The storm water will then slowly be released from the wetlands area so that there are no negative impacts to downstream landowners.

It is also important to note that this legislation includes $200,000 requested by this Member which would be implemented through the Lower Platte South Natural Resources District on behalf of the Lower Platte River Corridor Alliance. This amount represents the 50% Federal share under Section 503 of the Water Resources Development of 1996, to assess and plan for water quality infrastructure and improvements in the Lower Platte River Watershed concentrating on dixt drinking water and wastewater needs within the Lower Platte River Corridor between and including the communities of Ashland and Louisville, in Saunders and Cass counties, Nebraska.

This Member is also pleased that H.R. 2311 includes $1,800,000 for the Missouri National Recreational River, which could be used for projects such as the Missouri River Research and Education Center at Ponca State Park in Saunders and Cass counties, Nebraska.

This is the Missouri River is one of the most historic, scenic and biologically diverse rivers in
North America. The proposed research and education center will serve as a "working" interpretive center for the river and include interactive exhibits. It will provide a timeline for the vast riverine ecosystem as well as an upstream view of the beginning of the Missouri National Recreation River. When completed the center will also include a classroom/conference room facility.

This Member recognizes that this bill includes $656,000 for the Sand Creek Watershed project in Saunders County, Nebraska, and $400,000 for the Antelope Creek project in Lincoln, Nebraska. However, this funding is to be used for preconstruction engineering and design work. This Member believes that it is critically important that the final version of the FY2002 Energy and Water Development Appropriations legislation include some funding for construction of these projects.

Funding for these projects is particularly urgent. The Antelope Creek Basin is a cooperative effort in Nebraska between the state highway agency and water development agencies which makes this project more cost-effective and feasible. Specifically, the dam for this small reservoir is to be a structure that the Nebraska Department of Roads would construct instead of a dam as part of the new state expressway in the immediate vicinity of Wahoo, Nebraska. Immediate funding would help ensure that this coordinated effort could continue.

Construction funding is also needed for the Antelope Creek project. It would be a significant setback to the project timetable if the Corps does not receive construction funding for the project in FY2002. Delays in other components of the project would also likely result.

Finally, this Member is also pleased that H.R. 2311 provides $275,000 in funding for the Missouri National Recreational River Project. This project addresses a serious problem by protecting the river banks from extraordinary and excessive erosion rates caused by the sporadic and varying releases from the Gavins Point Dam. These erosion rates will impact future work on the river by the Federal Government.

Again, Mr. Chairman, this Member commends the distinguished gentleman from Alabama (Mr. CALLAHAN), the Chairman of the Energy and Water Development Appropriations Subcommittee, and the distinguished gentleman from Indiana (Mr. VISCLOSKY), the ranking member of the Subcommittee, for their support of projects which are important to Nebraska and the 1st Congressional District, as well as to the people living in the Missouri River Basin.

Ms. PELOSI. Mr. Chairman, as we consider the Energy and Water bill today here in Washington, California and the West are in the throes of an energy crisis. Now is the time to launch a collaborative effort that will increase funding for renewable energy programs by 50%.

Mr. CALLAHAN. Mr. Chairman, I yield back the balance of my time.

The Chair. All time for general debate has expired.

Pursuant to the rule, the bill shall be considered for amendment under the 5-minute rule. The amendment printed in House Report 107-114 is adopted.

During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered out of order.

Mr. TANCREDO. Mr. Chairman, I rise to offer an amendment.

The Chair. The Clerk will read.

The Clerk reads as follows:

H. R. 2311
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following amendments shall be adopted to this bill: (reduced by $9,900,000). Pursuant to the rule, the amendment offered by Mr. TANCREDO and the amendment offered by Mr. CALLAHAN, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered out of order.

TITLE I
DEPARTMENT OF DEFENSE—CIVIL
DEPARTMENT OF THE ARMY
CORPS OF ENGINEERS—CIVIL
The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes.

GENERAL INVESTIGATIONS
For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, restudy of authorized projects, investigations, and, when authorized by laws, surveys and detailed studies and plans and specifications of projects prior to construction, $153,260,000, to remain available until expended: Provided, That the Secretary of the Army, acting through the Chief of Engineers, is directed to use $1,000,000 of the funds appropriated herefore in to continue preconstruction engineering and design of the Murrieta Creek, California, flood protection and environmental enhancement project and is further directed to proceed with the project in accordance with cost-sharing established for the Murrieta Creek project in Public Law 106-377: Provided further, That the Secretary of the Army, acting through the Chief of Engineers, is directed to use the feasibility report prepared under the authority of section 206 of the Flood Control Act of 1948, as amended, as the basis for the Rock Creek-Keddy Slough Flood Control Project, Butte County, California, and is further directed to use $200,000 of the funds appropriated herein for preconstruction engineering and design of the project: Provided further, That in conducting the Southwest Valley Flood Damage Reduction Study, Albuquerque, New Mexico, the Secretary of the Army, acting through the Chief of Engineers, shall include an evaluation of flood damage reduction measures that would otherwise be excluded from the feasibility analysis based on policies regarding the frequency of flooding in the drainage areas, and the amount of runoff.

AMENDMENT OFFERED BY MR. TANCREDO
Mr. TANCREDO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TANCREDO:
Page 2, line 18, after the dollar amount, insert the following: “(reduced by $9,900,000).” Pursuant to the rule, the amendment offered by Mr. TANCREDO, the amendment offered by Mr. CALLAHAN, the Chair may accord priority in recognition to a Member offering an amendment that he has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered out of order.

Mr. CALLAHAN. Mr. Chairman, I reserve a point of order against the amendment.

Mr. TANCREDO. Mr. Chairman, today I am offering this amendment to the Energy and Water Appropriations Bill that will increase funding to the Department of Energy’s Renewable Energy Integration Program by $3 million with a corresponding offset for the Army of Corps of Engineers’ General Investigations Account. That account, by the way, is currently receiving about a $33 million increase above the President’s budget.

Recent electricity and gas shortages in California and other Western States, along with an expanding recognition of environmental issues, have highlighted the need for clean renewable power. Concentrating solar power technologies offer a near-term opportunity for large-scale and cost-effective production of renewable energy.

An addition to these accounts would also allow the concentrated solar power program to continue its core long-term research and development activities that will help advance the next-generation trough and dish technologies. The focus would include identifying and implementing advanced converter options for modular dish systems. In fiscal year 2000, the CSP program began working with the National Renewable Energy Lab’s high-efficiency photovoltaic team on the development of a high-efficiency concentrating photovoltaic converter as an alternative to the Stirling engine converter historically supported by the CSP program.

A $5 million increase in the Biomass/ Biofuels Energy System line item would launch a collaborative effort that would advance computational science and bioinformatics developed by the national labs and universities to develop a biorefinery simulation model that enables virtual testing and prototyping of biorefinery systems and components. The simulation model will provide a useful tool to test new concepts as well as provide a basis for industry to develop future design tools for biorefineries.

Mr. Chairman, this is an important amendment because I think it is, again, a matter of priorities. Certainly there is undeniable need for an investment in alternative energy research. No one denies that.
I want to actually thank the committee for their attention to this detail and for restoring the budget, the original budget, for NREL. The reason for that is that there are these two additional needs, and it is simply a matter of priorities.

It seems to me that with taking a part of the budget that has received a $33 million increase above the President's request, taking a part of that, reducing it by only approximately $9 million and putting it into this kind of research, is the correct priority.

We will be talking certainly on the floor here about various issues dealing with the Corps of Engineers, the integrity of the programs operated by the Corps of Engineers, and the integrity of the reports that they commission and are commissioned by others to do to determine whether or not a project is necessary. There are significant problems, to say the least, in this particular area.

Recently, for example, one of the reports that was done by the Corps of Engineers has been criticized by the Inspector General, not only criticized, but there is an allegation of manipulation of data, so much so that there is a criminal investigation under way with regard to that particular endeavor. This is an area in which we should not be increasing the amount of appropriations; we should be decreasing it, or at least we should be forcing the Corps of Engineers to reform itself in a way that would reflect our concerns about the poor administratve tactics they have employed so far.

The fact is that the committee itself added over 12 new studies that the administration did not request. Some of these studies stretch the boundaries of the Corps' jurisdiction. Again, we will be talking as time goes by, I know, Mr. Chairman, that we would like to see some responsibility for that; but there is an allegation of manipulation of data, so much so that there is a criminal investigation under way with regard to that particular endeavor.

The Congress of the United States takes some responsibility for that; but for that purpose, I would ask for the support of this amendment.

The CHAIRMAN. Does the gentleman from Alabama insist on his point of order?

Mr. CALLAHAN. No, sir. I withdraw my point of order, but I would like to rise in opposition to the amendment.

The CHAIRMAN. The gentleman is recognized for 5 minutes.

Mr. CALLAHAN. Mr. Chairman, I appreciate the gentleman's decision is coming from, but this appropriations process is long and involved. We invited every Member of Congress to submit their suggestions to us as to how we could best formulate this bill. The sponsor of this amendment did not choose to bring this to our attention, nor did he request that we consider this during our regular process. But what he is doing in his amendment is taking $9.9 million for this project specifically, and he is taking it out of the Corps' operating budget.

We went through a long deliberative process trying to establish how much money the Corps needed to operate, and in our deliberations we finally decided this was the amount of money that we need. This is not the time to accept this without any hearings or any indication as to what is best for the Corps or what is best for its program.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

I would join the committee in opposition to the amendment. I appreciate what the gentleman wants to do; but as I pointed out in my opening remarks, the Chair, myself, as well as members of the subcommittee and the full Committee on Appropriations, have added $100 million even to the renewable accounts.

Secondly, while the gentleman pointed out that our figure is $33 million over the President's budget request for general investigations for the Army Corps, I would also point out the President's request of $500 million was under the President's fiscal year, and we are still $32 million under this current funding year level. The Army Corps cannot take all that, as I am adamantly opposed to the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. TANCREDO).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. TANCREDO. Mr. Chairman, I demand a recorded vote.

The Clerk read as follows:

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by laws; and detailed investigations, studies, or maintenance of existing projects (including those for development with participation or under consideration for participation by States, local governments, and other groups) and made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction), $1,671,850,000, to be derived from the Inland Waterways Trust Fund, for one-half of the costs of construction and rehabilitation of inland waterways projects, including rehabilitation costs for the Lock and Dam 12 Mississippi River, Iowa; Lock and Dam 24, Mississippi River, Illinois and Missouri; Lock and Dam 5, Mississippi River, Minnesota, and London Locks and Dam, Kanawha River, West Virginia; projects; and of which funds are provided for the following projects in the amounts specified:

San Timoteo Creek (Santa Ana River Mainstem), California, $10,000,000; Indianapolis Central Waterfront, Indiana, $9,000,000; Southern and Eastern Kentucky, Kentucky, $4,000,000.

Clover Fork, City of Cumberland, Town of Martin, Pike County (including Levisa Fork and Tug Fork Tributaries), Bell County, Floyd County, Martin County, and Harlan County, Kentucky, elements of the Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River, Kentucky, $15,450,000; Provided, That $15,000,000 of the funds appropriated herein shall be deposited in the San Gabriel River Basin and Tributaries Fund established by section 110 of division B, title I of Public Law 106-554, of which $1,000,000 shall be for remediation in the Central Basin Municipal Water District; Provided further, That using $1,000,000 of the funds appropriated herein, the Secretary of the Army, acting through the Chief of Engineers, is directed to modify the Natural Bridge Reservoir, Kentucky, project at full Federal expense to provide additional water supply storage for the Upper Kentucky River Basin; Provided further, That $1,000,000 of the funds appropriated herein, the Secretary of the Army, acting through the Chief of Engineers, is directed to undertake design deficiency repairs to the Bois Brule Drainage District, Missouri, project authorized and constructed under the authority of the Flood Control Act of 1986 with cost sharing consistent with the original project authorization; Provided further, That in accordance with section 323 of the Water Resources Development Act of 1999, the Secretary of the Army is directed to increase the authorized level of protection of the Bois Brule Drainage and Levee District, Missouri, project from 50 years to 100 years using $700,000 of the funds appropriated; provided that the project costs allocated to the incremental increase in the level of protection shall be cost shared consistent with section 103(a) of the Water Resources Development Act of 1986, notwithstanding section 202(a) of the Water Resources Development Act of 1996.

FLOOD CONTROL, MISSISSIPPI RIVER AND TERRITORIES, ARKANSAS, IOWA, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI, AND TENNESSEE

For expenses necessary for prosecuting work of flood control, rescue work, repair, reconstruction, or maintenance of control projects threatened or destroyed by flood, as authorized by law (33 U.S.C. 702a and 702g-1),
$347,665,000, to remain available until expended.

OPERATION AND MAINTENANCE, GENERAL
