Mr. ROHRABACHER. Mr. Speaker, reclaiming my time, let me say that means one would clear-cut all of the jungles to get rid of the CO₂ buildup if that was true.

Mr. LANTOS. Mr. Speaker, I yield back the balance of my time.

Mr. CHABOT. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. KIRK).

Mr. KIRK. Mr. Speaker, I thank the gentleman from Ohio (Mr. CHABOT) for yielding me this time.

Mr. Speaker, I rise in strong support of H.R. 231. I would like to particularly thank the gentleman from Ohio (Mr. PORTMAN) for his strong leadership on this issue. He is one of our environmental leaders here in the Congress, and I salute him.

I also want to thank the gentleman from Illinois (Mr. HYDE), the gentleman from California (Mr. LANTOS), and the gentleman from Nebraska (Mr. BEREUTER) for bringing this legislation to the floor and thank Tim Miller from the staff of the gentleman from Ohio (Mr. PORTMAN) for his work.

Under President Bush’s 1990 Enterprise for the Americas Initiative Act, the United States sponsored many debt-for-nature swap programs. The Tropical Forest Conservation Act, based on this idea, was first introduced by the gentleman from Ohio in 1997 with bipartisan support and was signed into law in 1998.

As a congressional staffer, I had the honor to work on that legislation and help him achieve that goal. I am pleased to support this bill which continues in that tradition.

Bangladesh is the first country which benefited from this program. Because Bangladesh has been able to restructure its debt, it was able to create a national forest fund of almost $9 million, which went to protecting the Mangrove Swap area, home to over 500 wild tigers. Currently, there are 11 nations on three continents interested in considering debt forgiveness under this program, including places like Belize and El Salvador.

I think the United States has an important national interest in supporting the protection of the world’s natural resources, including tropical forests. Tropical forests are home to half of all known plants and animals. We are losing an area equal to a football field a minute, and this must stop.

The gentleman from Ohio (Mr. PORTMAN) is our leader on this issue and built on the work of the previous Bush and Clinton administrations. Later this year, the Congress will consider legislation building on this model to protect coral reefs. Coral reefs are home to most aquatic plants and animals. Many reefs are disappearing, and most of them are in developing countries.

I salute the leaders on this issue, commend the gentleman for this legislation, and urge the House adoption of this bill.

Mr. BLUMENAUER. Mr. Speaker, I rise today in support of the Tropical Forest Conservation Act Reauthorization. This bill extends the Tropical Forest Conservation Act of 1998, which passed in this body and was signed into law by President Clinton. Today’s bill allows the U.S. Agency for International Development to relieve some of the foreign debt owed to the United States. In return, participating nations agree to establish trust funds to protect local tropical rainforests and other environmentally sensitive areas. This bill authorizes $225 million to be spent over the next three fiscal years to pay for this important conservation program and for the cost of debt forgiveness.

This innovative tool, the so-called “debt for nature swap”, helps countries with undeveloped natural resources reduce their foreign debts by buying it back and agreeing to spend a portion of the proceeds on conservation projects. This is especially vital because tropical forests contain half of the world’s known species of plants and animals. They contain a diversity of organic materials that could lead to the development of life-saving new medicines and tropical forests help slow global climate change by absorbing carbon dioxide. Increasingly, however, these fragile forests are succumbing to logging, road-building, and overdevelopment. Since 1950, half of the world’s tropical forests have disappeared and they are disappearing at a rate of 30 million acres each year. The countries that carry the heaviest debt constitute significantly to this loss because they extract valuable natural resources in order to generate needed revenue.

A recent report in the Journal of Science highlights the problems affecting Brazil’s tropical forests. The report states that the rapid growth of Brazil’s population has led to the equally rapid expansion of railroads, pipelines, and highways into the delicate Amazon forest areas. The devastation of the Brazilian rainforest will take place in only 20 years because of a $40 billion project to encourage development.

In tropical countries throughout the world, the deterioration of the rainforest will have dramatic and devastating effects on wildlife habitat, genetic diversity, the quality of watersheds and the global climate. The United States, being one of our role as an economic leader, should promote creative solutions such as the one contained in this bill.

Mr. GILMAN. Mr. Speaker, at this time I want to thank the gentleman from Ohio (Mr. PORTMAN) for reminding us of tragedy of the rapidly disappearing tropical forests, and the importance of protecting the world’s most diverse ecosystems.

Tropical forests contain approximately half of the world’s species of plants and animals. Unfortunately, over half of the tropical forests on Earth have disappeared, and, with more than 30 million acres which are lost each year, the destruction of these valuable ecosystems continues.
The majority of those forests are located in developing nations that are plagued by poverty and massive debt burdens. The Tropical Forest Conservation Act offers up to $325 million in debt relief to developing nations in exchange for the sustained protection of threatened tropical forests. These conditions also include the creation of a favorable climate for private sector investment, cooperation on narcotics measures, on state-sponsored terrorism, and a democratically elected government. This bill enjoys wide bipartisan support, support from the administration, and from various environmental groups. I urge support for this bill, and, once again, commend the gentleman from Ohio (Mr. PORTMAN) for introducing legislation to extend this important environmental program.

The SPEAKER pro tempore (Mr. SIMPSON). The question is on the motion offered by the gentleman from Ohio (Mr. CHARBON) that the House suspend the rules and pass the bill, H.R. 2131, as amended.

The question was taken; and (twethirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: “A bill to reauthorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004, and for other purposes.”

A motion to reconsider was laid on the table.

Mr. DREIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. DREIER. Mr. Speaker, the Committee on Rules is planning to meet this week to grant a rule which may limit the amendment process on campaign finance reform legislation. Let me say that I and Members of the Committee on Rules and our staff have been working very closely with the key authors of this very important legislation, the gentleman from Connecticut (Mr. SHAYS) and the gentleman from Massachusetts (Mr. MEEHAN), and we have the distinguished chairman of the House Committee on House Administration, the gentleman from Ohio (Mr.NEY), here, and we have been working with him on that.

I would like to say that the Committee on House Administration, as we all know, reported H.R. 2360, the Campaign Finance Reform Citizen Participation Act of 2001, as well as H.R. 2356, the Bipartisan Campaign Reform Act of 2001 on June 28; and the reports are expected to be filed later this afternoon.

While we have made no final decision on which version will actually end up being the base text for further amendment, I would like to ask Members to draft their amendments to both bills, both the Committee on Rules in the Ney legislation as they were introduced in the House.

Members must submit 55 copies of each amendment and one copy of a very brief explanation of each amendment on the Committee on Rules in room H-313 no later than 8 p.m. today. So they have until this evening, Tuesday, June 10.

Members should use the Office of Legislative Counsel to ensure that their amendments are properly drafted and should check with the Office of the Parliamentarian to be certain that their amendments comply with the Rules of the House.

Mr. Speaker, I am going to run upstairs to see if there are any amendments that have been filed.

AUTHORIZING ROTUNDA OF CAPITOL TO BE USED FOR A CEREMONY TO PRESENT CONGRESSIONAL GOLD MEDALS TO THE ORIGINAL 29 NAVAJO CODE TALKERS

Mr. NEY. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 174) authorizing the Rotunda of the Capitol to be used on July 26, 2001, for a ceremony to present Congressional Gold Medals to the original 29 Navajo Code Talkers.

The Clerk read as follows:

H. CON. RES. 174
Resolved by the House of Representatives (the Senate concurring), That the Rotunda of the Capitol is authorized to be used on July 26, 2001, for a ceremony to present Congressional Gold Medals to the original 29 Navajo Code Talkers. Physical preparations for the ceremony shall be carried out in accordance with such conditions as the Architect of the Capitol may prescribe.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Ohio (Mr. NEY) and the gentleman from New Mexico (Mr. UDALL) each will control 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. NEY).

Mr. NEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, during the Second World War, the United States Government called upon 29 Navajo men from the Navajo Nation to support the military effort by serving as Marine Corps radio operators. The actual number of enlistees later increased to over 350.

The Japanese had deciphered the military code developed by the United States for transmitting messages and the Navajo Marine Corps radio operators, who became known as the Navajo Code Talkers, developed a new code using their language to communicate military messages in the Pacific.

Throughout its extensive use, the code developed by these Native Americans proved unbreakable. The Navajos were people who had been discouraged from using their own language. Ultimately the same language would be credited with saving the lives of many American soldiers and several successful United States military engagements during World War II. It is an extreme honor to bring this legislation to the floor today authorizing a ceremony to be held in the Capitol Rotunda presenting Congressional Gold Medals to the original 29 Navajo Code Talkers.

Their contribution to this Nation proved immeasurable.

Mr. DREIER. Mr. Speaker, will the gentleman yield?

Mr. NEY. I yield to the gentleman from California.

Mr. DREIER. Mr. Speaker, I thank my friend, the gentleman from Ohio (Mr. NEY) for yielding.

Mr. Speaker, I would simply like to congratulate the gentleman on his statement and say that we anxiously towards that program which will be held later this month.

I, last week, had the opportunity to meet with some people at MGM, and the motion picture which is going to be coming out on the work of the Navajo Code Talkers should be fascinating. I have the trailer upstairs. I have not seen it yet, but I know from the early reports we have seen that it will be a wonderful presentation of the work of these courageous people and the role that they played during the Second World War.

I would like to strongly support the effort that is being led by the gentleman from Ohio (Mr. NEY), and it looks to me as if the gentleman from New Mexico (Mr. UDALL) is also working on this. I believe that it should be picked to the motion picture and a wonderful ceremony here, and I thank my friend for the leadership role he has played on this.

Mr. NEY. Mr. Speaker, I want to thank the chairman of the Committee on Rules, the gentleman from California (Mr. DREIER), for his support on this important measure.

Mr. Speaker, I reserve the balance of my time.

Mr. UDALL of New Mexico. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, during the Second World War, the United States Government called upon 29 Navajo men from the Navajo Nation to support the military effort by serving as Marine Corps radio operators. The actual number of enlistees later increased to over 350.

The Japanese had deciphered the military code developed by the United States for transmitting messages and the Navajo Marine Corps radio operators, who became known as the Navajo Code Talkers, developed a new code using their language to communicate military messages in the Pacific.

Throughout its extensive use, the code developed by these Native Americans proved unbreakable. The Navajos were people who had been discouraged from using their own language. Ultimately the same language would be credited with saving the lives of many American soldiers and several successful United States military engagements during World War II. It is an extreme honor to bring this legislation to the floor today authorizing a ceremony to be held in the Capitol Rotunda presenting Congressional Gold Medals to the original 29 Navajo Code Talkers. Their contribution to this Nation proved immeasurable.
I would also like to thank the 14 Members on both sides of the aisle who joined as original cosponsors to this measure.

During the 106th Congress, Senator Jeff Bingaman introduced legislation to honor the Navajo Code Talkers who played a pivotal role in World War II. I introduced the companion measure so that both Chambers could support these original 29 heroic men with the Congressional Gold Medal. In addition, a Silver Medal will be presented to the other Navajo Code Talkers who later followed the original 29.

Thanks to Senator Bingaman’s efforts, language was included in the last year omnibus bill to honor these men. This was an effort that I and many of my colleagues supported in the House. These Code Talkers will soon receive their long overdue recognition for their service and the honor they brought to our country and to their people. This is a historic moment for the Navajo Nation and one that all World War II veterans will remember.

The medals that the President will present to these 29 men on behalf of Congress will express our appreciation for their dedication and service as Navajo Code Talkers. Of the 29 original Navajo Code Talkers, 5 are still alive today. They are John Brown, Jr., of Navajo, New Mexico; Chester Nez of Albuquerque, New Mexico; Allen Dale June of West Valley City, Utah; Lloyd Oliver of Phoenix, Arizona; and Joe Palmer of Yuma, Arizona.

Mr. Speaker, during World War II, the Navajo Code Talkers took part in many assaults conducted by the U.S. Marines in the Pacific. In May 1942, the original 29 Navajo recruits attended Marine Boot Camp and worked to create the Navajo Code. The Navajo Code Talkers created messages by first translating Navajo words into English and then using the first letter of each English word to decipher their meaning. Because different Navajo words might be translated into different English words for the same letter, the code was especially difficult to decipher.

The use of Native American languages in coded military communications was not new to World War II. Choctaw Indians, for example, served as Code Talkers in World War I. The idea of using Navajo as code in World War II came from a veteran of World War I, Phillip Johnston. Johnston knew of the military’s search for a code that would withstand all attempts to decipher it. He was also the son of a missionary, raised on the Navajo Indian Reservation, spoke fluent Navajo, and believed that the Navajo language was the answer to the military requirement for an indecipherable code, given that it was an unwritten language of extreme complexity.

The Navajo Code Talkers served in all six Marine divisions, Marine Raider battalions and Marine parachute units. They transmitted messages by telephone and radio in a code derived from their Native language, a code, I may add, that was never broken by the Japanese. The Navajo code remained so valuable that the Department of Defense kept the code secret for 23 years after World War II. Therefore, the Code Talkers never received the recognition they deserved.

The ceremony on July 26 will at long last pay full tribute to the brave Americans who used their Native language to help bring an end to World War II in the Pacific. I would also like to mention that a separate ceremony is being planned for later this fall in Arizona or New Mexico to present a silver medal to each man who later qualified as a Navajo Code Talker.

In closing, I must say that the Navajo language imparts a sense of feeling, history and tradition to all the Code Talkers who served valiantly in World War II. To the five Code Talkers who are with us today, to their families, and to those who are with us in spirit, I say a few words in Navajo, which I will translate. Dine bizaad chooz’ fdgso siilatsooi niha nidaazba Aadoo ak’ah dadesdili. Nitsaago ba ahee dakanilzin.

Aheee. Which in English translates to, “Let me express my deep gratitude to the Navajo Code Talkers who provided and helped to develop an ingenious code based on your language, and become the communications link to and from the front lines of the Allies in the Pacific War.” Through the Navajo Code Talkers’ bravery, their sacrifice, and the unbreakability of the code, the United States was able to communicate with one another.

Mr. Speaker, it is with great pride that I urge my colleagues to come together and support this resolution, support our Navajo veterans and every veteran who sacrificed their very lives for the liberties and freedoms we enjoy today.

Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. Kildee), the cochair of the Native American Caucus, who has also been a staunch leader on Native American issues in this body for many years.

Mr. KILDEE. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, I rise today in strong support of House Concurrent Resolution 174, the resolution sponsored by the gentleman from New Mexico (Mr. Udall), that authorizes the use of the Capitol Rotunda on July 26, 2001, for a ceremony to present the Congressional Gold Medal to the original Navajo Code Talkers.

I am honored to have been an original cosponsor of H.R. 4527, the legislation sponsored by my good friend the gentleman from New Mexico (Mr. Udall) that authorizes the President of the United States to award the gold medal on behalf of the Congress to each of the original Navajo Code Talkers.

I also want to acknowledge the work of Senator Jeff Bingaman for his efforts in getting the Senate version of the bill included in the Consolidated Appropriations Act of Fiscal Year 2001.

Mr. Speaker, awarding these medals to the brave Navajo men that served this country at a time when using the Navajo language to develop a unique and unbreakable code to communicate military messages in the Pacific is long overdue.

The United States Marine Corps recruited and enlisted 29 Navajo men to serve as Marine Corps radio operators. These men are referred to today as the Navajo Code Talkers. The number of Code Talkers would later increase to over 350. So successful was the code that the Code Talkers were sworn to secrecy, and oath they honored until 1968, when the Department of Defense declassified the code.

Mr. Speaker, the heroic efforts of these men saved the lives of many, including probably my own brother Kenneth Robert Kildee, and hastened the end of World War II in the Pacific theater.

I ask my colleagues for their support of this resolution so that Congress, through the presentation of the Congressional Gold Medal, can finally express the gratitude of an entire Nation to these brave men for the contributions they made during a time of war and the valor with which they served their country.

Mr. UDALL of New Mexico. Mr. Speaker, I yield 6 minutes to the gentleman from American Samoa (Mr. Faleomavaega).

Mr. FALFOMAVAEGA. Mr. Speaker, I fully would want to acknowledge the original sponsor of this legislation, the gentleman from New Mexico (Mr. Udall), for his leadership and for bringing this legislation to the floor. I would also be remiss if I did not express my gratitude to the gentleman from Ohio (Mr. Ney), the chairman of the Committee on House Administration, for his support, and also the gentleman from Maryland (Mr. Hoyle), the ranking member of the Committee on House Administration, for his support in bringing this legislation.

Mr. Speaker, as a former student of Brigham Young University, it was my privilege to know many students who are Americans of Navajo descent. If I could, I would like to say a fond hello in Navajo, Yateeh.

Mr. Speaker, I am honored as an original cosponsor to stand today in support of House Concurrent Resolution 174 to authorize the use of the Rotunda of the Capitol to be used later this month for a ceremony to present...
Congressional Gold Medals to the original 29 Navajo Code Talkers, a ceremony that is certainly long, long overdue.

Mr. Speaker, the idea of using an Indian language as a code was first tried during World War I by the Canadians. The Canadians used Chocotaw Indians in their effort, but the experiment was not successful. The failure of this effort is attributed to the Indians knowing very little English and there being no equivalent terminology for the military terms.

The next effort to use an Indian language for a code during wartime was made by the Americans in World War II. The origin of this effort is credited to Phillip Johnston, who was the son of missionaries who did a lot of work among the Navajo Indians, Mr. Johnston and two others came up with the Navajo language as a code. Its syntax and tonal qualities make it unmistakable; 2. Each code word must have some logical connection to the actual word; 3. Each code word should be unusual and creative; and, 4. No code word should be easily confused with another.

While developing the code, the Navajo were placed in battle simulations, and transmissions were monitored by military code breakers and Navajos who did not know the code. No one broke the code during these tests.

Mr. Speaker, the first 30 Code Talkers were sent into battle, and the pilot program was a success. Eventually 350 Code Talkers were employed in battle, including the battles of Guadalcanal, Tarawa, Saipan, Iwo Jima and Okinawa. At Iwo Jima alone, the Navajo Code Talkers passed over 800 error-free messages in a 48-hour period.

The bottom line, Mr. Speaker, is that thousands of lives of our soldiers, sailors and Marines were saved due to the outstanding job our Navajo Code Talkers made as part of our war effort during World War II, especially in places I had previously mentioned.

About 4 years ago, Mr. Speaker, I was privileged to meet with the late Senator John Chafee from Rhode Island to represent the Congress at a special ceremony whereby our government had authorized construction of a parliamentary building for the Solomon Islands Government as a gift from the people of the United States to commemorate one of the most fierce battles that took place in the South Pacific, the battle of Guadalcanal, where thousands of Marines lost their lives, and the late Senator John Chafee was among the few 19-year-old Marines who fought in that terrible battle. It was a moving experience for both Senator Chafee and I to visit the remnants of that terrible conflict. The Navajo Code Talkers were a critical part of our success in the war in the Pacific.

Mr. Speaker, I am pleased that 29 of the original Code Talkers will be recognized later this month for their work. Because of the secrecy placed on the program, the valor the Navajo displayed during World War II was not recognized for decades. Their code was finally declassified in 1968, and it was only declassified then because electronic equipment had been developed that would be sufficient to meet military needs. The Navajo Code Talkers were also used in Korea in the 1950s, and even in Vietnam in the 1960s.

Mr. Speaker, again, I thank the gentleman from Maryland (Mr. HOYER), for his dedication to this issue, and also the gentleman from New Mexico (Mr. UDALL) for his tremendous support of a very important issue.

Mr. Speaker, I also want to thank the ranking member, the gentleman from Maryland (Mr. HOYER), for his dedication to this issue, and also the gentleman from New Mexico (Mr. UDALL) for his tremendous support of a very important issue.

Mrs. WILSON. Mr. Speaker, I rise today in support of H. Con. Res. 174, authorizing a ceremony in the Rotunda of the Capitol to present Congressional Gold Medals to the original 29 Navajo Code Talkers.

At the start of World War II, operations in the Pacific were compromised because the Japanese were breaking U.S. radio codes. Philip Johnson, the son of a missionary to the Navajos and one of the few non-Navajos, who spoke their language fluently, suggested using Navajo for secure communications.

In the 1940s, Navajo was an unwritten language and is extremely complex. It answered the military requirement for an indecipherable code. Its syntax and tonal qualities make it unintelligible to anyone without extensive exposure and training. It has no alphabet or symbols, and is spoken only on the Navajo lands of the American Southwest.

In 1942, Navajo men were recruited by the Marines to be radio operators, called Navajo Code Talkers. Most of them were barely out of high school and from the reservation just north of Gallup, New Mexico. The Navajo Reservation is about the size of the state of West Virginia and is located in my state of New Mexico and extends into Arizona.
The Navajo radiomen served from 1942 to 1945, and often the code talkers were in the forefront of battles of the Pacific. The Japanese never broke the Navajo code or captured a Navajo Code Talker. The code talkers are credited with saving thousands of American lives.

The Navajo Code Talker’s work remained classified until 1968 because the Pentagon was unsure whether the Navajo Language might be needed again.

The Navajo Code talkers played an important role in winning the war in the Pacific. They deserve our thanks and support.

Mr. MCCOLLUM. Mr. Speaker, I am pleased to support H. Con. Res. 174 today to authorize the use of the rotunda to honor and celebrate the heroic work of the Navajo Code Talkers. I thank my colleague from New Mexico, Mr. TOM UDALL, for sponsoring this resolution.

During World War II, about 400 Navajo tribe members served as code talkers for the United States Marines. They transmitted messages by telephone and radio in their native language—a code that the Japanese never broke. Navajo is an unwritten language of extreme complexity and one estimate indicated that fewer than 30 non-Navajos could understand the language at the outbreak of World War II. Navajos demonstrated that they could encode, transmit and decode a three-line message in English in just 20 seconds. Machines of the time required 30 minutes to do the same job.

This resolution does great justice by recognizing the contributions of these great people to our nation’s collective security and history.

Mr. PALLONE. Mr. Speaker, in May 1942 twenty-nine Navajos entered boot camp and later went to Camp Pendleton to develop a code that used the Navajo language as its basis. They worked at finding new words or meanings for military terms, which had no actual Navajo translation as well as an alphabetical way of spelling out other words. So began the career of the Navajo Code Talkers who were the secret weapon of the Marine Corps against Japan. Their unbreakable code would play a vital part in the United States ability to win World War II.

The man credited for the idea of a code based on Navajo language goes to Philip Johnston, an engineer in Los Angeles. His father had been a Protestant missionary; therefore, as a child he moved to a Navajo reservation where he grew up and learned the culture and the language. Knowing that the Navajo language had been orally handed down from the time required 30 minutes to do the same job.

This resolution does great justice by recognizing the contributions of these great people to our nation’s collective security and history.

Mr. PALLONE. Mr. Speaker, in May 1942 twenty-nine Navajos entered boot camp and later went to Camp Pendleton to develop a code that used the Navajo language as its basis. They worked at finding new words or meanings for military terms, which had no actual Navajo translation as well as an alphabetical way of spelling out other words. So began the career of the Navajo Code Talkers who were the secret weapon of the Marine Corps against Japan. Their unbreakable code would play a vital part in the United States ability to win World War II.

The man credited for the idea of a code based on Navajo language goes to Philip Johnston, an engineer in Los Angeles. His father had been a Protestant missionary; therefore, as a child he moved to a Navajo reservation where he grew up and learned the culture and the language. Knowing that the Navajo language had been orally handed down through the centuries was Johnston’s main argument for this code. He argued that it was a system that would not have to be changed on the regular basis. And because it had never been written down it could not result in falling into the hands of the enemy.

Ironically, Navajos were subjected to alienation in their own homeland and discouraged from speaking their language yet they still came willingly forward and used their language to defend their country and help develop the most successful military code of the time.

The code was such a success that the Department of Defense kept the Code secret for 23 years after World War II. It was finally de-classified in 1968. The Code Talkers had been sworn to secrecy, an oath they kept and honored. Imagine these unsung heroes returned home with no special recognition for what they had accomplished and sadly over the years some have died never receiving the honor and accolades that they so deserved.

The time has come for us to recognize the Navajo Code Talkers with a Congressional Gold Medal—the most distinguished honor a civilian can receive. It is for that reason I support House Concurrent Resolution 174, authorizing use of the rotunda to present Congressional Gold Medals to the original 29 Navajo Code Talkers. This honor has been a long time in coming.

Mr. NEY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. NEY) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 174.

The question was taken.

Mr. NEY. Mr. Speaker, on that I decline extraneous material on H. Con. Res. 174.

I 2826

Merrills, Dingell, Jackson of Illinois, and Conyers changed their vote from "yea" to "nay.

Mr. GIBBONS changed his vote from "nay" to "yea."

Mr. TIERNEY changed his vote from "yea" to "present."

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. WYDEN). Pursuant to clause 8 of rule XX, the Chair will reduce to 5 minutes the minimum time for voting on each additional motion to suspend the rules on which the Chair has postponed further proceedings.

EXPRESSING SENSE OF CONGRESS IN SUPPORT OF VICTIMS OF TORTURE

The SPEAKER pro tempore. The pending question is the suspension of the rules and agreement to the concurrent resolution. H. Con. Res. 168. The Chair requests the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Florida (Ms. ROS-LEHTINEN) that the House suspended the rules and agreed to the concurrent resolution. H. Con. Res. 168, on which the yeas and nays are ordered.

This is a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 409, nays 0, not voting 24, as follows: [Roll No. 212]
So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded on the table. For a motion to reconsider was laid on the table.

AUTHORIZING ROTUNDA OF CAPITOL TO BE USED FOR A CEREMONY TO PRESENT CONGRESSIONAL GOLD MEDALS TO THE CEREBRAL PALSY ACT LEADERS

The SPEAKER pro tempore (Mr. Isakson). The pending business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 174.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. Ney) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 174, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 409, nays 0, not voting 24, as follows:

<table>
<thead>
<tr>
<th>Yea</th>
<th>Nay</th>
<th>Not Voting</th>
</tr>
</thead>
<tbody>
<tr>
<td>409</td>
<td>0</td>
<td>24</td>
</tr>
</tbody>
</table>

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded on the table. For a motion to reconsider was laid on the table.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. Isakson). Under the Speaker’s announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

AGRICULTURAL APPROPRIATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. Smith) is recognized for 5 minutes.

Mr. SMITH of Michigan. Mr. Speaker, tomorrow we are going to be taking up the agricultural appropriation bill;
and I would like to for a couple of minutes discuss, number one, the seriousness of the agricultural problem; but, secondly, how we should distribute some of this Federal money to farmers. There are a lot of us that would hope that these extra funds go to help support the traditional family farmers in this country. However, our farm programs since we started them back in 1994 have tended to favor the large farmer. And so what has happened over the years is the small farmer has been forced out because of the advantages of Federal farm policy to the middle-sized and larger farmer; and the middle-sized farmer, figuring that they might survive, have bought out the small farmer and become bigger.

Specifically, we have legislation that says the price support for farmers in this country through the Federal Government should be limited to $75,000. If a farmer wants to include their spouse or usually their wife for a separate producer entity, then they have to jump through all kinds of hoops to borrow money in the spouse's name and then document that it was invested in the farm operation, then the farm operation can pay it back. It is a disadvantage.

My amendment tomorrow does essentially three things: it says automatically the wife is included as a producer without jumping through these bureaucratic hoops, eligible for an additional $75,000 payment limitation. The average size of a farm in this country now, Mr. Speaker, is about 448 acres. But some farms, some huge, giant corporation-type farms are up to 80,000 acres and 100,000 acres; and there is no payment limitation on those farms. So as you go from millions of dollars go out to those huge farming operations.

My amendment tomorrow says, let us stick to our guns of the historic $75,000 limitation but automatically include spouses. That would move it up to $150,000. And let us make sure that there is no loophole such as forfeiting a nonrecourse loan or such as certificates that can be issued by the Federal Government in lieu of forfeiture of that particular loan, because those certificates, the alternative of those forfeitures of that loan, has resulted in approximately $400 million extra payment going to those giant farmers.

Mr. Speaker, I request that my colleagues look at this amendment, that they consider the policy of how we want to spend this extra money, that they face the decision of what should farm programs try to do in this country; and I would suggest humbly that part of what we should be trying to do is help the small family farmers. The large farmer already has a competitive advantage, simply because of the size of their operation. We expand that advantage as we pay them on the bushels produced on each acre or the tons produced. Whether it is rice or corn or soybeans or cotton, we help that large farmer.

I feel it is important that we look at this policy, and I would request that my colleagues look at my amendment that will reaffirm the historical provision of limiting those payments to $75,000 rather than the $150,000 per producer that was passed out on a suspension vote late in June when the House went through that particular legislation without the opportunity for any amendments.

ELECTRICITY CRISIS IN CALIFORNIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. FILNER) is recognized for 5 minutes.

Mr. FILNER. Mr. Speaker, the electricity crisis continues 1 year later in San Diego, in California and the West. Scores of businesses in my hometown of San Diego have bought out the small farmer. People on fixed incomes are suffering because they have to make choices between buying food and prescription drugs and air conditioning. This should not be happening in America.

Now, we have called for price controls, we have called for a refund of the overcharges, and people from my State on the other side of the aisle have said, Let the free market work. Price controls don't work. I say to my colleagues, there is no free market. The system is completely out of whack. There is an energy cartel which dominates our lives in California.

I want to give you a specific example, Mr. Speaker, of how the market in California is being manipulated by this energy cartel and what we in San Diego hope to do about it.

There is a 700 megawatt power plant in my district. We call it the South Bay Power Plant. It is operated by the Duke Energy Corporation. It looks like in the last year, Mr. Speaker, Duke Energy has made close to $800 million off that plant while 65 percent of the businesses in our area face bankruptcy. They paid for the operation of that plant in 3 months for what they thought would take 5 years or more to pay off.

Now recently, five former employees of Duke Energy, five former employees of the South Bay Energy Plant, testified under oath, testified with 100 years of experience in that plant, Mr. Speaker, and what they said should be taken very seriously by anybody studying this crisis. They said that the generators were turned up and down not because of the need of the people of San Diego or of California but because of the price at a given moment that the market was bringing. In fact, a 250 megawatt generator was turned off at a time when we had blackouts in San Diego, at a time when people were sent home from their jobs and not getting paychecks, at a time when there were near-fatalities at a traffic intersection because the lights were off, at a time when elevators had people stuck in them. Yet the biggest generator in our county was turned off.

Mr. Speaker, further said that they were told to throw away spare parts so maintenance would take a lot longer, supply could be withheld and the prices increased. They talked about how the trading floor where the prices were set for electricity was in direct contact with the generating floor; and so the generators were ramped up and down, as I said, not by the need of California or of San Diego, but by the price that could be gotten. So Duke Energy has stolen $800 million from the citizens of San Diego and of California. They have charged up to $4,000 a megawatt hour for something that cost $30 only a year ago. That, Mr. Speaker, is not the free enterprise system at work; that is stealing from people who could not afford the cost.

Now, to add insult to injury, Mr. Speaker, that theft took place from a power plant which the citizens of San Diego own. Yes, Mr. Speaker, we own that plant through the San Diego Unified Port District, a public agency; and that public agency, at very, very good terms for the lessee, leased the plant to this Duke Energy Corporation to operate, as the lease says, in the public interest. Well, that lease has not been operated in the public interest. That lease has allowed Duke Energy Corporation to steal hundreds of millions of dollars from the people of San Diego.

Mr. Speaker, since the public owns the South Bay Power Plant, I call upon the San Diego Unified Port District to take back that plant and to operate the lease in the public interest.

IN MEMORY OF SANDY POLICE CHIEF SAM DAWSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. MATHESON) is recognized for 5 minutes.

Mr. MATHESON. Mr. Speaker, it is with great sadness that I come before the House today to memorialize the death of Police Chief Sam Dawson of Sandy, Utah. Chief Dawson, who served faithfully for 7 years as the head of the police department of Utah’s fourth largest city, passed away July 2, 2001, doing what he loved best, riding his Harley-Davidson motorcycle.

Chief Dawson lived up to the sign he had on his desk that said, "Lead, follow, or get out of the way." Chief Dawson was a leader for 30 years in Utah law enforcement. He started as a Salt Lake County sheriff’s deputy in 1971. He became the chief police investigator for the Salt Lake county attorney’s office after that and became the head of Sandy City’s police department in 1994.
Chief Dawson was an outspoken leader in his field. In the year 2000 he spearheaded a project to produce and distribute a video called “Your Kid May Have a Secret,” which describes the growing problem of methamphetamine use in Utah communities. Keeping true to his style, Chief Dawson sent a copy to every county sheriff and every city police chief, asking them to freely distribute the video throughout the State.

Chief Dawson was also a leader among his peers. He led an effort to increase the size of the Sandy Police Department while at the same time increasing officer pay. He succeeded at both, increasing his department by 30 officers during his tenure and significantly increasing the wages of those who worked for him.

In closing, Mr. Speaker, I end with the words of Lieutenant Kevin Thacker of the Sandy Police Department. He said, “Sam Dawson will be greatly missed by all who knew him. He will always be remembered for his leadership abilities and dedication to the community. His death leaves a void in the police department.”

Mr. Speaker, I would encourage the Members of the House of Representatives to join me in heartfelt appreciation for the service this great man provided my community. I would also like to ask the House to join in extending our deepest condolences to the wife of Chief Dawson, Bridgett Dawson, and her three children, Sam Jr., Chris, and Angela.

POSTAL BOARD OF GOVERNORS DECISION REGARDING 6-DAY MAIL DELIVERY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, earlier today Mr. Robert Rider, chairman of the Postal Board of Governors, released a statement indicating that 6-day mail delivery would continue without any further study. The Postal Board of Governors had commissioned a study on April 3 to study cost savings associated with reducing delivery service to 5 days.

In response to the idea of cutting mail delivery to 5 days, I, along with the gentleman from New York (Mr. MCHugh), the gentleman from California (Mr. Waxman), and the gentleman from Indiana (Mr. Burton), introduced H. Res. 154, a bill to preserve 6-day mail delivery.

The bill we introduced enjoys wide bipartisan support and has more than 55 cosponsors. This bill is the companion to Senate Resolution 71 introduced by Senator HARKIN. I applaud the Postal Board of Governors’ decision today to continue 6-day mail delivery.

This decision means that businesses, advertisers, and others who want to reach citizens on Saturday will be able to do so.

In addition, citizens who receive paychecks, Social Security, food coupons, and other important mail will not see an interruption in their basic service. Also, it means that postal workers and letter carriers, it will win because cutting mail delivery to 5 days could have led to mail piling up, delivery delays, and other problems.

I commend the leadership and efforts of Moe Biller, and the American Postal Workers Union; Vincent Sombrutto; George Gould and the Letter Carriers; Kevin Richardson and the Printers; Jerry Cerasale and the Direct Marketing Association; and all of those who worked to preserve 6-day mail delivery.

Truly, Mr. Speaker, the Postal Service is an important entity in all of our communities. As chair of the Postal Caucus, I look forward to the continued focus on the U.S. Postal Service and assuring its viability not only today but into the future.

Mr. Speaker, knowing that the agriculture appropriations bill is going to be on the floor tomorrow, let me just take a moment and remind us that the sugar subsidy program is keeping prices extraordinarily high and is driving candy makers and food processors out of my community and out of many other communities throughout the country because they end up paying an enormously high price for sugar, which is the main ingredient used in their product. As a matter of fact, Brach's Candy Company, located in the heart of the community where I live, just announced that they are going to move their plant to Argentina. Fifteen hundred people will be out of work. So as we look at agriculture appropriations and rewrite our agricultural policy, let us be reminded that the sugar subsidies are bad for my community, bad for the City of Chicago, bad for the food processors and candy makers and bad for America.

PEOPLE WITH DISABILITIES CAN SERVE IN HOUSE OF REPRESENTATIVES OR ANY FIELD OF ENDEAVOR WITH JUST MINOR CHANGES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. Langevin) is recognized for 5 minutes.

Mr. Langevin. Mr. Speaker, just a few weeks ago, I was up here speaking as the proud sponsor of a resolution honoring Erik Weihenmayer, a young man who inspires not only people with disabilities but all of us struggling to overcome our own obstacles and challenges. As the first blind person to summit Mount Everest, he illustrates the immense power of the human spirit.

However, while it is important to pay homage to such remarkable people, I believe it is equally important that we honor those who make such special achievements possible.

Tonight I would like to pay tribute to the gentleman from Illinois (Speaker Hastert); the gentleman from Missouri (Mr. Gephardt), the minority leader; the gentleman from Ohio (Mr. Ney); and the gentleman from Maryland (Mr. Hooyer), the ranking member of the Committee on House Administration; the gentleman from Rhode Island (Mr. Kennedy); the Committee on Armed Services and the Committee on Small Business and all their dedicated staff, as well as those who manage the floor activity on a daily basis. They have all provided tremendous support to me as a freshman Member of the United States Congress.

My experience illustrates the compassionate understanding one can receive from his colleagues and employers once they are aware of his or her needs. I have been overwhelmed by just how considerate and flexible my colleagues have been in ensuring that I can work effectively in Congress.

When I dreamed of running for this office, I was not sure how accessible the congressional buildings would be, but from the moment I was elected in November of last year, the hardworking engineers, architects, design managers, and my fellow Members of Congress made it clear that they would do whatever was necessary to make my office, the committee on which I serve, and the House floor accessible.

One of the products of this generous response to my needs, in fact, is the lectern and microphone that I am using right now. It took months to design and build this remarkable podium and ensure it can be easily raised and lowered and is truly a work of art.

I gratefully recognize all the time and resources that were dedicated to making this lectern, to installing additional voting machines on the floor, and placing ramps in my committee rooms and providing accessible office space. What everyone involved in this process may not realize, however, is that beyond enabling me to better serve my constituents, they have also opened the doors for people with disabilities to serve in this Chamber in the future.

As I have said many times before, I may be the first quadriplegic elected to the United States Congress but most certainly I will not be the last. The invaluable message that has been delivered in making this Chamber accessible is that any one of the nearly 53 million people with disabilities in this country can become a Member of the United States Congress or can serve in any other field of endeavor with just minor changes.

Mr. Speaker, people with disabilities are an integral but underutilized part...
of our workforce. With minor accommodations they can become an even more important part of our society and be involved in strengthening America’s communities, businesses, and government. That is why I am so thankful to President Bush, who has highlighted the need to make workplaces, housing, education, technology, and our society in general, more accessible to all Americans. The President’s new Freedom Initiative is an important proposal which calls for funding of a broad range of programs that together can help create countless new opportunities for many Americans who continually face unnecessary obstacles because of their disabilities.

Mr. Speaker, I am eager to work with President Bush to make this new Freedom Initiative a reality. To this end, I recently sent a letter co-signed by 23 of my colleagues to the House appropriators seeking their support in providing funds for the President’s proposals. This is an issue on which we can all agree, regardless of our political background and help open doors for millions of people who are eager to conquer new challenges.

Mr. Speaker, once again, I extend my heartfelt thanks to the dozens of people who have made my tenure in Congress possible. Ensuring that some day every workplace in America will be able to respond to the special needs of employees in the same way is one of my top priorities. Congress. What that happens, we will all benefit from the remarkable talents and contributions of the millions of Americans with disabilities who are eager to pursue their dreams just as I have.

TRIBUTE TO BIRDIE KYLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. RAHALL) is recognized for 5 minutes. Mr. RAHALL. Mr. Speaker, in the rush to greatness upon which many of us embark in this city, in the heat of the TV camera lights, in the chaos of clashing interests, it is important that we pause and take stock of those who brought us here, keep us here, and help make us. So this evening I thank and I pay respect to my long-time legislative director Birdie Kyle who passed away over my recent work period.

Birdie once wrote, ‘I am a native West Virginian born in Fayette County at MacDunn but raised up on Cabin Creek in the coalfields. I was born in a one-room abandoned boxcar. When I was little, my older sister tormented me when she felt like it by calling me ‘Old Boxcar Bill.’ I do not remember which made me the madder, being reprimanded that I was born in a boxcar or being called Bill when I was a girl. Probably both.

That was Birdie Kyle writing for West Virginia’s Goldenseal Magazine in 1980.

Well, Boxcar Bill traveled far from her humble beginnings, but she never lost sight of the hills of home or the people there.

Birdie Kyle, a true coal miner’s daughter, a native West Virginian in every sense, served West Virginia and our Nation in the Congress for more than 3 decades. Birdie served with me since 1989, and I appreciate deeply her loyalty and dedication. Before that, she spent most of her career with the late Senator Jennings Randolph.

Her mainstay of work for the Senator and for me was education. For Birdie, education was not a part of one’s life. It was life itself. Teachers captivated her. Students compelled her. Books were with her always, from her earliest moments to her latest nights. If books were her backbone, words were her blood.

Birdie’s letters, more often than not, prompted replies, and I got more kudos from her letters than anything.

Her list of responsibilities in my office over the years reads like a record of the republic itself: Education to health care, the Postal Service to the Middle East. As one person who called to express their sympathy said, ‘She knew everything and everybody.’

How true. She could converse on every subject, but that was not her most unique attribute. She did not care if one was king or commoner. She was going to sway you to her belief before you left the building, and most of the time she did.

Will there ever be another Birdie Kyle? No. Can one person fill her shoes? No.

Birdie was, in addition, the poet laureate of the White House at Christmas and on my birthday she composed wonderful verses that not only made me feel special but it was so wonderful I started believing it.

She gave me my voice on many issues, issues of life and death, on wealth and poverty, on education and ignorance, health care and child care.

Her deep compassion infected us all. In a city where a lot of people can make a buck off an issue, Birdie poured her heart and soul into those issues and sought nothing in return.

Her family, her mother, her sisters, her children, and grandson all meant everything to Birdie. In fact, I think she would have liked to adopt me because sometimes she thought I needed a mom in town, and she was probably right.

Each time that she came in to see me in my office to offer her advice and wisdom, she would tap lightly on my door. No one ever else did that. I knew that I was in trouble for a vote I had cast on the floor that day contrary to her suggestions, or I was in store for a witty argument on an upcoming vote in this body.

There will be many days and many nights ahead when I will miss that tapping at my door, but I will have many, many years of good counsel and many years of friendship upon which to reflect and rely.

Washington is a city of monuments hewn of stone and sewn with mortar. We can admire these great people and we should, but Washington is also the city that spreads forth the ray of hope for our Nation and our world. Birdie Kyle spent her life igniting that hope.

I was honored to know and work with Birdie. Without her, I would not have been as good a representative as good a person as I am. Many of us in this body can say that about our staff.

About right now, somebody up there in heaven is getting a morning briefing from Birdie, and I am sure it is not a pretty sight with all that needs to be righted in the world. We all know that heaven is in good hands with Birdie Kyle up there at the helm.

Ms. NORTON. Mr. Speaker, I come to the floor this evening because of a shocking story that appeared on the front page of the Washington Post this morning about a secret deal between, of all people, of all organizations, the Salvation Army, to support charitable choice in exchange for the issuance of a White House regulation, OMB Circular No. A–102, that would deny assistance to Somalian or local charities that do not relate to their religious charities to adhere to their nondiscrimination laws as they apply to gay men and women. Now, of course, these nondiscrimination laws have to do with the activities of these religious charities that do not relate to their religions.

A political deal should be beneath the dignity of the Salvation Army, given its long Christian heritage, not to mention the President of the United States. It is a deal to discriminate under the table.

According to the lead document, this cannot be done in the legislative process very easily, so they had to do it by regulation. Charitable choice already contains a fatal flaw, because, as put forward by the administration, it would allow a religious organization to discriminate using government money by requiring people it hires to do a government task to be of their religion.

That is a clear violation of Title VI and of the Constitution of the United States.

I am a former Chair of the Equal Employment Opportunity Commission. I
strongly support an exemption in the law that I administered, Title VII, which allows a religious denomination an exemption to the antidiscrimination law in hiring people of their own religion with their own money. But we cannot give the Baptists and the Lutherans and the Catholics and the Jews our money and say you can discriminate when you perform services in our name. That is already a problem with the bill.

But in order to make it perfectly clear, in case that does not survive, that at least people who are gay and lesbian should not be discriminated against, this would be done by regulation.

Mr. Speaker, why the Salvation Army would engage in this deal is really perplexing. The Salvation Army already pays taxes for different folks. Some of the government to do their wonderful work. They get it because they abide by government regulations that say when you use government money, you cannot proselytize, you cannot engage in religion, because this is America, and this is what we have stood for, for everybody. So they already get money, just like Catholic charities and just like Lutheran charities and just like Jewish charities all get money, and they have accepted it, and I hope they will continue to get it on the basis that everybody else who does the government’s work accepts it, and that is as long as we are doing the government’s work, then your money is the public money, and we cannot discriminate against anybody when giving those services.

This body has already a long history of discriminating against gays and lesbians in the District of Columbia, because here is any religious freedom under our law that allows equal protection for people of a different sexual orientation, then somebody hops up here and tries, and often succeeds, in overturning the law. Now we are trying to do to do what you do to the District of Columbia to hundreds of localities and States in the United States.

I hope everybody understands what it feels like to intrude in the affairs of local jurisdictions in a federalist society, a society where we say, look, different folks. Some of us behave one way with respect to our laws, others another way. Some people have chosen to protect gay men and lesbians against discrimination, and I say God bless them. In the 21st century we should not be discriminating against any Americans based on a characteristic that has nothing to do with performance. Sexual orientation has nothing to do with performance, and the last people, the last organizations that should be engaged in such discrimination are organizations that go by the name “Christian,” and the Salvation Army should be ashamed of itself that it has been caught red-handed.

ed on the front page of the Washington Post in the column where you put war and peace. Thank God that they were exposed.

NATURAL RESOURCES

The SPEAKER pro tempore. Under the Speaker’s ruling of January 3, 2001, the gentleman from Colorado (Mr. McInnis) is recognized for 60 minutes as the designee of the majority leader.

Mr. McInnis. Mr. Speaker, I am a little surprised by the previous speaker and her unrelenting attack against the Salvation Army. She apparently got the merits for this attack from one newspaper article. I have heard the gentlewoman previously speak from here. I think she is well-educated. She is certainly away with numerous sources when she speaks. That is why I am very surprised that she takes one newspaper article and launches an attack against the Salvation Army, which I would like to say to the gentlewoman, that ownership of newspapers has changed since she came.

I do not think a speaker, I do not think one should stand up here and make California look like some poor innocent victim in the Western United States who somehow is picked out of 50 States and is the only State in the kind of crisis they are in, and then have one stand up here and accuse the power companies of theft. I do not know whether there has been theft or not, but let me tell you, the problem is much broader than a power company like Duke Energy.

The problem that you have got out there is you have got to face a couple realities. Number one, conservation is absolutely critical, and it is going to be a component anywhere — 50 States, California, and, frankly, the rest of the Nation, can avoid getting into the same spot that California got into by adopting some pretty simple methods of conservation.

Conservation does not mean you have to suffer in your life-style. There are a lot of very simple things that you can do in your life-style that do not give you a negative impact, that do not serve as an inconvenience for you. Just think of them: Shut the lights off when you leave the room; make sure your oil every 3,000 miles by the quick-lubes. There are a lot of things we can consider. Conservation is very critical for California.

The second thing that is very critical for California is you have got to get over that habit of excess you would say, or almost an idealism that you have locked into, and that is “not in my backyard.” In other words, let the other 49 States build the power plants,
let the other 49 States worry about electrical transmission lines, let the other 49 States worry about natural gas exploration and oil exploration, et cetera, et cetera. You cannot do that, California. California, you are going to have to help yourself. You are going to have to help pull yourself up by the bootstraps.

Now, let me say, I am a fan of California. I like the State of California, and California is a State. We have 50 States. We are unified like brothers and sisters. We should not abandon California. I do not think we should stand up here and bash California. But we need to be frank with each other. California, quit pointing the finger at everybody else. California, quit saying it is everybody else’s fault. You know what you need to do is help pull yourself out of that hole. And we should help, too. I do not think California should be left to die on the vine out there, so to speak.

California, after all, if it were a country, it would be the seventh most powerful in the world. It is huge in economics for this country, and every State of the Union is dependent upon good economic health in the State of California. But I think it is grossly unfair for any of my colleagues to stand up here and make it sound like it is everybody’s fault but California’s, and that everybody ought to pitch in but California, and that California has been abused here and California has been abused there.

There are a lot of good minds in California, and a lot of those people will say, you know, we have to have conservation, number one; and, number two, we have got to have power plants. The fact is we need electricity in our everyday lives. We need oil. We need gas. We need it in a balanced fashion. And, to California’s credit, although in many cases they may have gone overboard, in many cases California has been the leading State in demanding that the energy production be clean production, in demanding that we have higher efficiencies, and, to California’s credit, just here in the last month or 2 months, California is responding to conservation. My understanding is their conservation has resulted in about 10 percent reduction in the demand for energy that that State is having.

So, the only reason I am making my comments, which are a little off the subject of which I wanted to talk about this evening, water, although when we talk about water, we are going to talk about energy and the renewable energy of water and its resource, my purpose in commenting is I just think somebody has to stand up here when some of my colleagues take this microphone and talk about “poor old California” and how it is everybody else’s fault.

You know, California, what you try to do, I will tell you what got California in this mess. They had a new theory of deregulation, and they went out to the customers in California and said, “We will offer the same, no matter what happens out here in the market. We will buy on the spot market, and, regardless of what happens, the average will always allow us, even though it goes up and down, the average will allow you to be sold power at the same price. Something for nothing. That is exactly what they promised, something for nothing.

For a little while it worked. Forty-nine other States did not adopt that policy. Forty-nine other States did not think they could get something for nothing. Forty-nine other States allowed power production to be built in their State. Forty-nine other States allowed electrical transmission lines. Forty-nine other States allowed natural gas transmission lines. But California thought they discovered something new, and that is by denial, by guaranteeing flat rates, and by shoving the obligations on the other 49 States, they thought they could sail through this, and they have not been able to.

Now, what is happening out there, I think that the Governor finally, I notice a couple of weeks ago he went over and cut the ribbon for a new power generation facility. Finally they are going to allow some generation to be built in that State. Finally this “not in my backyard” is going to be adjusted, not eliminated, because I do not think it should be put in every backyard, but it is going to be adjusted, and California is going to get back on its feet.

I do not think California is in for the kind of crisis that some people on this floor think it is going to be in for. It has been a good lesson not just for the States of California, but for all 50 States, that, look, we need to plan for our future. We have an obligation to have some kind of vision into the future, to talk about what the energy needs are not only of today’s generation, but what we can do for energy for tomorrow’s generation, and that means serious discussions on alternative energy, although, as you know right now, do not be led down the path that alternative energy today is the answer.

If you took all the alternative energy in the world, all of the alternative energy in the world, and devoted every bit of it to the United States, it only supplies 3 percent of our needs.

So, do not exaggerate what alternative energy can do for us today. But we should focus on what alternative energy can do for us tomorrow. All 50 Statemen have got to get on board. What happened in California was a warning shot to the entire Nation, and that is, we need to have an energy policy. That is exactly what has been missing here in the last few years. During the Clinton administration we had zero energy policy.

I am very interested, by the way, to read the newspapers. I cannot find a newspaper, and maybe there is one out there, maybe the Wall Street Journal, but I cannot find much coverage or any kind of criticism of the Clinton administration for not having an energy policy for the last 8 years. But I can pick up any newspaper on a daily basis and see criticism against the current administration because they are trying to develop an energy policy.

We need to put all of these things on the table. We need to discuss and debate and analyze exactly what it is that we have put on that table. We need to add things or take things off. But in the end we need a product that is called an energy policy that will solve California’s problems belong to the future of this country, that will allow us to avoid the very kind of crisis that California got into, that will allow us less dependency on foreign oil.

But we will not get that without some type of policy, and we will not come to that policy without some kind of debate. But instead, they are criticizing the debate; instead they are criticizing the administration in trying to put an energy policy together to put some ideas on the table and let us have discussions on this floor. Do not continuously, colleagues, come to this floor and criticize. Everybody is to blame for California. Do not come to this floor, colleagues, and try and let all of us believe that the answer to this, the sole answer to this, is alternative energy or more conservation. All of those factors have to come together for the answer that we need.

As much as you want to deny it, the fact is where we have got to have more electrical generation, I think we are going to be responsive to that. In fact, in the rest of the Nation, in the other 49 States we are going to have a number of States that will have an electrical glut in about a year. Part of the problem is we do not have the electrical transmission lines to move that electricity. But my point is this, and that is that it is unfair for my good colleague from the State of California to speak at this microphone and act as if it is somebody else’s fault to the energy companies in the other 49 States. This was a problem that was brought upon themselves. It is a problem that all of us should help them get out of, but they have got to lead. They have got to have a little self-help. They have got to pull themselves up by their own bootstraps. And for the rest of us, colleagues, we have to sit down and work with the administration and come up with an energy policy that gives us some hope for the future.

Let me move from that subject to another subject. A subject that is near and dear to my heart. It is going to be a boring subject to my colleagues.
know that many of you will probably find yourself snoring or not find this of particular interest, because it is about water.

Water is one of the most wonderful things of our life. It is one of the more wonderful creations of God, if one believes in God, which I do. It is something that obviously we all know sustains life. It sustains a number of different factors in life.

Water is pretty boring. Why? Because we have been blessed in most cases with plenty of water. As long as water runs out of the faucet, as long as the toilet flushes, as long as there is drinking water out of the sink it is not such a big issue. It is when it stops that all of the sudden it becomes a big issue.

Just the same as energy, I think we need to have a vision for water in the future. Water is the lifeblood of every generation and generations of people that have preceded us, we have seen vision for water. We have seen different types of utilizations of water and different planning for water for future generations. But in order for us to continue that kind of vision, we need to understand what water is about and what it has that is so valuable to our everyday lives.

So I thought I would start out and visit just a little about the importance of our water.

Let me say, first of all, in the State capital, my district is obviously in Colorado, my district is the highest district in the Nation, so I am at the highest elevation in the Nation. Up in my district, it snows year-round up top of those mountain peaks. It is cold up there. It gets high. That is where a lot of this Nation's water comes from, are off the mountain peaks in my congressional district. So I think I know a little about water.

In our State capital of the State of Colorado, if any of my colleagues ever have an opportunity to go visit, go take a look at it. It is a beautiful building to start off with, but it has a number of different murals throughout the capitol building. Do you know what you see in every mural in the State capitol building in Colorado? Somewhere in that mural, you will see water, because water is the lifeblood of the West. Water is the lifeblood everywhere; but in the West, we are in a unique part of this Nation. There is a distinct difference between the eastern United States and the western United States.

Mr. Speaker, one-half of the Nation is blessed with a lot of water. In fact, in the eastern United States, you see lawsuits or disagreements about: hey, put that water on my neighbor's land. I do not want that water. In the West, the suits are just the opposite. In the West, there are range wars fought, not only over sheep and cattle, but over water. They say water out there in the West does run like blood, and it is fought over with blood, and that it is as valuable as blood. That is the importance of water in the West; and there is a distinct vision for water.

But in the State capital there in Colorado, there is this language: “Here is a land where life is written in Water. The West is where the Water was and is Father and Son of old Mother and Daughter following Rivers up immensities of Range and Desert, thirsting the Sundown ever crossing a hill to climb a hill still Drier, naming tonight a City by some River a different Name from last night’s camping Fire. Look to the Green within the Mountain cup; Look to the Prairie parched for Water lack; Look to the Sun that pulls the Oceans up; Look to the Cloud that gives the oceans back. Look to your Heart and may your Wisdom grow to know the power of Lightning and to peace of Snow.” That is Thomas Hornsby Ferry. That is a saying in our capitol. That is why water is so critical.

Let us look over a few statistics that are important. First of all, the interest rate for water, as long as we do not use the water, is about one percent. If we look at all of the water in the world, all of the water in the world, 97 percent of the water is the salt water; 97 percent. So only 3 percent of the water we have in the world is drinking-type of water, is nonsalt water, is clear water. And of the remaining 3 percent, if we took 75 percent of that 3 percent, that is all tied up in the ice caps up in the polar ice caps. So when we take a look at the amount of water worldwide, without the technological advances that perhaps the future will bring us for salinity and desalinization, we find that there is not really a large amount of water that we can use out of that big pot of water out there.

When we look at our country, we can see that stream flow in the United States; and as I said earlier, there is a difference between the eastern United States and the western United States, but 73 percent of the stream flow in the United States is in the eastern United States. It is not in the western United States. So we have 73 percent in the East, and then in the Pacific Northwest we have another 12 percent, and then the rest of the West, which makes up over half of the Nation, has a vast in quantity of land. If we take the West, minus the Pacific Northwest, which consists of more than half of the Nation, we have 14 percent of the Nation's water. So in other words, more than half of the Nation has 14 percent of the water to provide life. That is pretty amazing.

So we should understand that it is important that our water does not come on a consistent basis and it does not come in the same amount of quantity every year, year after year. In fact, day after day, the quantity of water that we have varies in the West, and it is not at all consistent. Some years we have great snowfall; but it gets too warm in the spring too early, and it runs off before we can use it. Our farmers were great snowfall, so we have drought. In much of the West right now we are facing drought conditions.

The critical issue to remember about the West when we talk about water is that in the West, we have to store our water. We are going to talk about the mighty Colorado River. The State of Colorado is called the “Mother State of Rivers,” and we will go into that. It has four major rivers that come out of Colorado. In fact, the Colorado River out of the State of Colorado provides drinking water for 25 million people, 25 million people. So my good friends in Phoenix or Las Vegas or Tucson, you are totally dependent upon the Colorado River. As a matter of fact, in the State of Colorado, we get about 16 inches a year, 16 inches a year. In some of the communities here, they get 2, 3, 4, 5, 6, 18 inches in a heavy rain storm in a day, and that is pretty remarkable. So in the West, we have to be able to store our water, because when we do have a lot of water, we do have a lot of water during one period of time generally, and that is called spring runoff. When the high snows come into the mountains in the wintertime and it accumulates and accumulates and accumulates, and then in the springtime, when the flowers start to pop up, everything starts to green, the snow starts to melt, and very rapidly, and for about 30 to 90 days, for about 30 to 90 days, really probably 30 to 60 days, all the water we need in the West. It is called the spring runoff. We have all the water we need. But the problem is, for the balance of the year, we do not.

That is in part one of the reasons we need to store our water in the West, why we need to have dams in the West.

Now, in the East there are some radical environmental organizations, Earth First and some of the groups like that. Frankly, the national Sierra Club, which has never supported a water storage project in the history of that organization, they would like to make people in the East believe that in the West, a dam is an abuse of the environment, that these dams are nothing but atrocious toys for construction companies. We are totally dependent in the West.

Mr. Speaker, any family or friends that we have in the West, they are totally dependent on our capability to continue that vision for water. By know when the first dam was that we could find on the Colorado River? One thousand years ago. One thousand years ago the Anasazi Indians down at Mesa
This is about water for agriculture. I watched with some interest the fact that out in the West the Federal Government has shut down farmers because they need to protect the sucker fish. I do not know enough about the dispute to argue on either side of that, but it has been on the national news the last few days. Watch and see how critical that issue becomes. It is critical for life out there in the West.

Look at this chart. See if the Members are as interested in this as I am. Direct use of the water. This is water we would use every day. The average person uses two gallons to drink and cook in, two gallons of water.

Imagine, at the grocery store, we all have an idea what a gallon of milk jug looks like. Two of those are necessary just for the drinking and cooking. For flushing the toilet for one’s own personal use, we need about five to seven of those gallons of water.

We have the grocery cart. We have two gallons for drinking and cooking. Now we have to put six, between five and seven, so say six more gallons for the use of the toilet. If we do wash that day we will have to put 20 more gallons into the shopping cart.

Now it is time for a second shopping cart. If we use the dishwasher that day, we will need 25 more gallons into that shopping cart. Then, if we take a shower because we sweated so much from putting all of that water into the shopping carts, it is another nine gallons. Now take a look at what growing food takes, because growing food is what uses the most water. But what is the most beautiful aspect of water? What is the key ingredient of water? It is a renewable resource. One person’s waste is another person’s water.

I remember 1,000 years ago in Colorado when they came out and said that what we need to do, they demand that we go and lay concrete in all the ditches; line the ditches, because that water seeping into the ground is a huge waste of water.

Do Members know what happens when we line a ditch and stop the seepage of the water within that ditch? We may be drying up a spring of somebody 3 miles away. Unfortunately, Mr. Speaker, it is not hard to make technology today to look underneath the Earth and see where every little vein of water goes and how it connects.

The generations that will follow us will find it fascinating, because they will have the technological apparatus to take a look and say, gosh, this ditch provides for this spring, which is 10 miles away, and this aquifer, which has been under the ground for thousands of years, it probably to this aquifer which connects over here and pops up in a spring somewhere. Those are the kinds of things that this future generation will be able to see that we cannot see today.

But what we do know today is that water is, number one, renewable. It is not like gasoline, where we use a gallon of gasoline and it is gone forever. It is not like natural gas, where we turn on the heater and bring the natural gas through. It is gone forever. It is not like nuclear with uranium, it is gone. Water is renewable, and that is why it is so important.

Take a look. Most of the use of water is in agriculture. Now, it is interesting to me. In fact, I had the privilege, really the privilege, of being up in Jackson Hole, Wyoming. I happen to think I have the prettiest district in the Nation. I have resorts, Aspen, Durango, I have all the mountains in Colorado, but Jackson Hole comes pretty close.

I was up in Jackson Hole. It was just beautiful, gorgeous. Of course, there is the national park, Yellowstone, the Tetons National Park. I would love to discuss, and I intend to one of these nights soon, talk about the national parks and how important the national parks are for our Nation, and how many millions of people enjoy our national parks every year.

But what was interesting is that we were looking out at Jackson Lake, which is north of Jackson Hole. As we were looking out there, they have a dam out there. What is what created the lake was the dam. I was listening. Somebody said, “Well, the unfortunate thing about this dam is that the Idaho farmers, the Idaho farmers get the top 36 feet. They get the first 36 feet of storage. It is let out into the Snake River, and then it goes to the farmers in Idaho. That is really bad.”

I thought, bad? This person is probably going to eat a potato for lunch. This person was probably going to eat lots of agricultural products during her day that were provided by water. Agriculture is a bad thing, but we have to make the connection. We could not have a lot of agriculture in the West if we did not have the water storage to provide for it.

In fact, what we would do is have very, very little agriculture in the West, very little way to sustain life in the West. The same thing with the Anasazi 1,000 years ago. When they ran out of the capability to have water for storage, the storage would not hold enough for them, they became extinct. That is why water is so important. That is why, when we look at a dam, we should look at what all it provides.

Take a look at agriculture. This is amazing. One loaf of bread, I will bet Members and visitors would eat one loaf of bread, from the time we cultivate the soil to raise the wheat and to be able to process the wheat, to be able to turn it into a loaf of bread, we will have gone through 150 gallons of water, 150 gallons of water. That is what is necessary to have the final product of one loaf of bread.

One egg, this is almost unbelievable, 120 gallons for one egg. We have to raise the chicken, give the chicken water, the chicken has to have the water on a regular basis, the egg has to be cleaned and processed, there is water within the egg, et cetera, et cetera. It is 120 gallons.

To produce one quart of milk, we have to have 223 gallons of water; for one quart of milk, one quart, 223 gallons; for a pound of tomatoes, 125 gallons; a pound of oranges, 47 gallons; a pound of potatoes, 23 gallons.

So here is what happens, just so we have a comparison. Out of 50 glasses of water, 50 of those glasses of water out of these, how were they used? Forty-four glasses of that would be used for agriculture, for our food products, 44 of those 50 glasses. Three glasses would be used by industry, two glasses would be used by cities, and half a glass would be used in the country for rural areas. Water is critical.

Mr. Speaker, this gives us somewhat of an idea of just how important it is for all of us in our everyday life. Let me focus us back. Mr. Speaker, to the State of Colorado, because Colorado is a very unique State. As I said, it is the highest point in the Nation. It is also the only State in the Nation out of 50 States whereupon all of its water runs out. It has no incoming water for its use that comes into the State of Colorado. It all goes out. This gives an idea of the quantity of water that goes out of Colorado, the average annual outflow of major rivers through 1985.

Now, this chart has it, but we numbers are off a little, but they are not off by a lot. They are still pretty close. These are acre feet. An acre foot is how much water it would take to put one
foot of water on an acre of land for 1 year, 4,540,000 acre feet right out of the Colorado River.

Up here off the Yampa River in the green, 1,576,000. Every point that we see here, here is the South Platte that goes into Nebraska, almost 400,000 acre feet of water. Down here on the Arkansas River, 133,000 feet, Over here, we have the Animas River, 700,000 acre feet. Here, of course, is the mighty Colorado.

This chart right here, Mr. Speaker, gives us an idea of the State of Colorado, which is a critical State for the West. Of all of the States in the West, I cannot think of any State that is more important for the water supply of the West. Remember, this is not just water for agriculture but it is water for hydroelectric power, it is water for recreation, et cetera. Here Colorado is the key State because of its high elevation, because of its snowfall, which provides the flow of water.

Colorado is really divided here into four major water basins: the Missouri; here we have the South Platte River; the Arkansas, we have the Arkansas River that goes through here. We also have down in here the Rio Grande, the Rio Grande River, which goes down near Alamosa, Colorado. Here on the Western side of the State we have the mighty Colorado River.

Remember that regarding the rivers in the West, as well as in the East, in the old days we used to have to live close to the rivers, but as man has evolved with technology, we can live further and further away from the rivers. So while the Colorado River, of which 70 percent of the water within that river basin is provided by the State of Colorado, and by the way, the Colorado River is one of the longest rivers in the Nation, but because of the technology, that water is moved.

For example, in Colorado it is moved from the western part of the State, my district, which has 80 percent of the water resources. There is a good quantity of water that is moved from our part of the State to the eastern part of the State, which has 80 percent of the population.

It is the same thing in Arizona. We have the Central Arizona Water Project, where we move water away from the basin into the cities, like Phoenix and Tucson or Los Angeles. We have the water project down in Los Angeles. So we move water from these basins. We have to have the capability to do that.

This real quickly just gives us an idea. I mentioned that the Colorado River is one of the longest rivers in the Nation. This gives us an idea. Now, out here we have the Gulf of California, but in actuality most of the water that is left, when it enters Mexico near Baja, it is used by the country of Mexico.

It is interesting that when the Colorado River was first divided up, they first divided up 4,540,000 acre feet of water a year that came down the Colorado River, 15 million acre feet. So they divided it, and in about 1922 they had what they called the Colorado River Compact. That is a 1,750,000 acre feet from the West, and probably of all the water compacted in the West, that is the most critical. It divided what we called the Upper Basin States and the Lower Basin States. The Upper Basin got 7 1/2 million acre feet, and the Lower Basin got 7 1/2 million acre feet of water every year.

But unfortunately, when those calculations were made, they were made when we had a very unusual year. We had the highest flow in any number of years, that is the highest record of flow. So in fact, we really do not produce 15 million acre feet of water on an average year out of the Colorado, which means that a lot of the Colorado River water is overapportioned.

Now, on top of the 15 million acre feet, here is an interesting story for us. In World War II, the United States was concerned, as was the country of Mexico, that the Japanese would try and invade the United States through the country of Mexico. So the Mexican authorities and the United States, the American authorities, got together. Mexico wanted the defense of their country. The Americans did not want the Japanese in Mexico, so the Americans agreed to supply reinforcements or troops to the country of Mexico to defend Mexico if the Japanese invaded.

The Mexican government, being the better negotiator of the two, said that we should want to keep the Japanese out of their country, and it is nice of us to protect them, but we ought to give them something for it, like 1 1/2 million acre feet of the Colorado River. So that is exactly what happened. In 1944, the United States government agreed to give the country of Mexico 1.5 million acre feet, 750,000 from the Lower Basin States, 750,000 from the Upper Basin States, of the surplus waters. Of course, there is a dispute over “surplus,” which is going on between the Upper Basin States and Lower Basin States.

They are getting too technical right now, my comments, but suffice it to say that the Colorado River Compact is really the point I want to make here. That is what has taken one of the longest rivers of the Nation and has divided it between the States that benefit from it. The Compromise drinking water for about 25 million people.

One of the first people to explore, and we have all heard this name before, was John Wesley Powell. He explored. This, of course, had been discovered before by the Spanish, by the Anasazis, et cetera, et cetera, but John Wesley Powell and his party mapped and explored the Colorado River.

CONGRESSIONAL RECORD—HOUSE
July 10, 2001

They used wooden boats, and Mr. Speaker, I am sure some of my colleagues have rafted in Colorado. We think we have some of the best rafting, if not the best rafting, in the Nation. It is pretty scary. Imagine before those rivers were controlled by dams, before we had flood control, imagine the kind of rafts back then. They were big woodlogs, he said, and he would see them today. That is what he went down on.

Think of the disease and unknown territory. In fact, some of them probably still believed the Earth was flat. It was a pretty challenging thing. You died at a young age if you wanted to go out and explore the West. But John Powell and his parties did exactly that. In 1869 he described the roll and boil of the rivers that pass through the treacherous passages, like the Grand Canyon, and the hard labor of the boat crews just to keep it going.

But John Wesley Powell mapped the Colorado River, and talked in his journal, in his diaries, and explained much of what he saw in the Colorado River. The result of the Colorado River, by the way, is what has provided absolute beauty, the Grand Canyon and the canyons in Utah.

Mr. Speaker, if Members have never been out to the West, go to Colorado first, and of course spend money in the Third District, but go further West and go into Utah and see those gorgeous canyons. Go into Arizona and see exactly what this mighty river has carved over all of these hundreds and thousands of years.

Here is a good example. The Colorado River carved many of the gorges and canyons in the Colorado plateau. Dead Horse Point State Park in eastern Utah preserves the natural state of Mecander Canyon, aptly named for the fantastic twists and turns the river etched into the soft sedimentary rock of the plateau.

When Members stand from this position, where my pointer is, and they look out, these are huge canyon walls. We can see where the river is from the green that goes through, that cuts through all of this. This was all cut by the Colorado River.

It is a fabulous study, our history of this Nation and what it has provided for us. But it is also critical for the life-style of the people out there.

Now, my colleagues will find that there is focused attention on the West. Remember that almost all of the Nation’s public lands are in the Western United States. They are not in the Eastern United States. Let me very quickly kind of give a brief history on how that occurred.

When we first settled our country, most of our population was on the eastern seaboard, and this country, this United States of America, wanted to grow. But back then, to grow, you had
to buy land. And if you bought the land, the title did not mean much. If you had a deed, you had a deed that said, you owned the State of Colorado or you own out there in the West this chunk of land, these millions of acres, but it did not mean much. The only way that you could obtain your land after you bought it was to get out there with a six-shooter on your side and possess the land. That is where the saying came from, the old saying that “possession is nine-tenth’s of the law.”

That is exactly what happened that created public lands in the West and almost no public lands in the East. Why? Because our leaders in Washington, D.C. knew we needed to settle the frontier. We had gotten the Louisiana Purchase, we had gotten a number of other lands, and we needed to somehow give incent for our people to settle in the West, to go west. “Go west, young man, go west,” as the saying went. So they decided to have land grants. They decided to have the Homestead Act, where if a person went out to Kentucky, and that was west to them, Kentucky was west, or go out to Missouri and Kansas and even to eastern Colorado, 160 acres back then could provide for a family. So they gave this land to the citizens of the United States who would go out and occupy the land, or possess the land on behalf of the United States of America. And after so many years, 5 or 6 years of working that land, you would own the land.

Well, the problem was when they got to the Colorado Rockies, guess what happened? One hundred sixty acres did not even feed a cow. So they came back to Washington and said people are going west but when they hit the mountains they are going around trying to figure a way to get to the ocean side, Kentucky and the Atlantic Ocean, but they are not staying in the mountains. How do we get them there? Somebody said maybe we should give them an equivalent amount of land. We give 160 acres in Kansas or even in eastern Colorado, let us give them what it would take, the equivalent amount of land, let us say 3,000 acres in the mountains. Somebody said, no, no, we cannot politically do that. There is no way we could give out 3,000 acres to a particular individual on the Pacific Ocean, but they are not staying in the mountains. How do we get them there? Somebody said maybe we should give them an equivalent amount of land. We give 160 acres in Kansas or even in eastern Colorado, let us give them what it would take, the equivalent amount of land, let us say 3,000 acres in the mountains. Somebody else said, no, no, we cannot politically do that. There is no way we could give out 3,000 acres to a particular individual out west.

So somebody came up with the idea, well, let us just go ahead in the west and and let us get the land, or to get the title. It is a lot like the Louisiana Purchase, the public lands, and the public land title is multiple use, “a land of many uses.” Let us have the West be a land of many uses. That is how we can get around that. We can get people to settle there. We will say, look, you do not get to put the land in your name, but you get to use it for yourself. Now, in recent times, that has been misinterpreted in many cases by some of the most extreme environmental radicals in the country. They say, look, the land in the West was intended to be held as public lands, aside for all future generations. While we are comfortable here in the East, they should set that land, those public lands in the West, aside. And they are doing the same kind of thing for the water.

Clearly, we have to have a balance. And to ask goodness we had somebody like Theodore Roosevelt, who took a look at Yellowstone and with awe and a great deal of thought and, frankly, a great deal of brilliance put that into a national park. We have wonderful national parks on those public lands. We are pretty proud of those public lands. My district has huge amounts of public lands. But we have to be able to utilize those public lands, and it is the same thing with our rivers.

We have huge Damns in the West. My point in speaking tonight is not to just have my colleagues walk out of here with some book knowledge on the topic of water, but to understand the difference between the Western United States and the Eastern United States when it comes to water and the necessity of water resources and the necessity to store water and the necessity to use hydropower.

By the way, in all of our discussions, especially of the last few months, when we have had debates and so on about the energy crisis, remember the cleanest energy producer out there is water. We do not need fuel to put water into a hydroelectric facility. All we do is take the energy of the water as it drops, turn a turbine, and we create electricity and then we can move the electricity.

My real focus here this evening is in front of my colleagues, especially those from the Eastern United States, to remember that life is different in the West. Sure, we are all American citizens and we are not saying we are being picked upon but we are saying there is a difference. There is a difference between night and day. A part of it is caused by the fact that most of the public lands in the West, they are not here in the East. It is very easy, colleagues, to put regulations on us in the West, on public lands, because those in the East feel no pain. The East does not have the Appalachians, and a chunk down there in the Everglades, but, in essence, when we talk about public lands in the East, we are talking about the local courthouse or the property around the courthouse.

When we talk about lands in the West, we are talking about 98 percent of some of our States, like Alaska. In my State alone, in my district alone, now get ahold of this, in my district I have 14 million acres of public lands. And there is water on there. And that water is absolutely essential, one, for diversion, and, two, for the protection of the environment that we have. But my focus here this evening is that I hope, as my colleagues leave and that as I conclude my remarks, that everyone understands how important water is in the West; that we are arid out there in the West.

We have over half of the Nation’s land in the Western United States, over half of it, and we have 14 percent of the water. That means that I think my colleagues have to approach us with a little more open mind. When we talk about water storage projects in the West, when we are trying to stop a bill, for example, backed by the national Sierra Club, that we understand their number one goal is to take down Lake Powell. Now, Lake Powell and Lake Meade, those dams provide 80 percent of the water storage for the West, yet the national Sierra Club wants to take it down. My colleagues, when the national Sierra Club comes and talks to you and wants you to sign on to taking down Lake Powell, please, please understand that life in the West, when it comes to water, when it comes to public lands is different than back here. Listen to our side of the story before you sign on to any of these bills that take fairly dramatic steps not in your area of the Nation but in our area of the Nation.

Before you sign on as a sponsor or co-sponsor, take a look at the impact it creates on us. Take a look at what it does to your colleagues; take a look at the history of the Nation. I have 25 charts here that I can walk through depicting life in the West since the Anasazi Indians and since the Spanish explorers. We can walk through the time of John Wesley Powell and about how the West has managed those resources. And with all due respect, I would venture to say that many of us in this room, many of my colleagues in this room, especially those from the East, have no idea of the kind of lifestyle that is required in the West, and the natural resources and our use of the natural resources and our conservation of the natural resources.

So, please, colleagues, do not let some of these organizations convince you that all of a sudden you are an expert in western water law. Do not let these experts or groups like the national Sierra Club convince you that your opinion is null and void on public lands, because those from the West feel no pain. We have 14 million acres of public lands. And there is water on there. And that water is absolutely essential, one, for diversion, and, two, for the protection of the environment that we have.
water project, which was promised to the Native Americans 30 or 40 years ago. They have very critical flow out there. This is a Nation where the Eastern United States should understand the problems of the West and understand that the water situation here is different than our water situation back there in the West.

My whole point here tonight is to tell my colleagues that in the West, as they say, our life is written in water and water is so, so critical. It has all come together. It all comes together when we begin to understand the geographical conditions, the historical conditions, the political conditions. Then we begin to say, you know, there is another side to this story that is important for all of us to understand.

Mr. Speaker, let me wrap up this portion of the quickest way to drive water out and use water just simply reiterating one point, and that is that there is a difference between the Eastern United States and the Western United States when it comes to natural resources. There is a difference between the Eastern United States and the Western United States when it comes to public lands. There are very few public lands in the Eastern United States. There are vast quantities of public lands in the West.

The concept of multiple use, a land of many uses, is how I grew up. When you would enter the government lands, which we are completely surrounded in my district, I have over 100 communities, I have a district larger than the State of Florida, and every community except one is completely surrounded by public lands, and when we enter the national forest and so on, if any of my colleagues have ever been out to the national parks or public lands, it says something like, “you are now entering the White River National Forest, and there used to be a sign under that that said, “a land of many uses.” A land of many uses.

Now we are seeing groups like the national Sierra Club or Earth First or more radical environmental groups coming out and saying they want to take that sign, “the land of many uses,” they want to take it off and put on a sign that says “no trespassing.” And it is the same thing with our water projects. The quickest way to drive water out of the West is to cut off their water. And it is not complicated. In the Eastern United States it would be very complicated to shut off the water. You have a lot of it. It rains all the time. In the West, all we have to do is take down a couple of dams.

Go ahead, let the national Sierra Club take down Lake Powell. You take down Lake Powell, and you will shut off a large portion of the west. You would take down the human population, and, by the way, a great deal of vegetation and animal population out there because we have been able to utilize that water and store that water so we can use it beyond the spring runoff. So keep in mind in the west life is written in water.

Let me use my final concluding remarks on a topic that is obviously totally unrelated, but I want to go back to my remarks at the beginning of this and that is on this energy issue. By the way, I heard some comments earlier today that we have no free market in the energy, that we need to have the government run the energy business in this country. Nothing would be worse than inviting the government into our front doors to begin running our energy companies for us. Nothing would be worse than allowing the government to intercede in the private marketplace.

Now, I am not speaking about stopping antitrust, where intercession is necessary, straightforward. I think that is on the book that is by Adam Smith, and he is right, a monopoly is a dangerous tool to management. But to intercede and to actually become almost socialistic like, where we would have the government supply the power and the transmission, and we would have the government guarantee it will all come at a reasonable price, we should not buy into this concept that the government is going to be able to give us something for nothing.

Take a look, for example, at the government’s intercession in lots of other different programs. In almost every case, when the government takes over or begins to think that it can do better than the private marketplace, we end up with lots of regulation, we end up with subsidies, and we never get something for nothing. This energy is a problem that we all have to work through.

The way we work through it is we put several components together. One of those critical components is conservation. Now, not every citizen can go out and find natural gas, not every citizen is going to be able to build a transmission line out there, and not every citizen can build a generation plant, but one thing that every citizen in our Nation can do is to help conserve. And if we want to keep the government out of our lives, we only need to help conserve energy. Because the more energy that we waste, the more energy the government will have to take over, the more temptation there is to have the government come in as a quick fix, as some kind of waving of the magic wand that the government is going to be able to deliver to us any kind of product at a cheaper price. The private marketplace does pretty good if we can all help.

So to conclude this portion of my remarks, let me say that I think it is incumbent upon every citizen in this country, and I speak to my colleagues, that we have to go out into our districts and encourage our constituents. Because if there is one thing that every citizen in this country can do to help alleviate the energy crisis, that exists primarily in California but is a warning shot to the rest of the Nation, it is to conserve.

And we can all do it by simply shutting off our lights, changing our car oil when the owner’s manual says it instead of when the lube market tells you to do it. I am optimistic about future energy of this country. Slowly but surely we are building an energy policy, and conservation is going to be an important part of it. You cannot conserve your way out of the situation that we are in.

Alternative energy is an important part, but do not overplay it. As I said earlier, if you took all of the alternative energy in the world and delivered it all to the United States, it would only supply 3 percent. Certainly this young generation behind us, their brilliant minds will be able to make that much, much larger because they will find ways to take energy out of water.

The first and most immediate thing we can do is come up with an energy policy as a government. We can urge our constituents to conserve. But the worst thing we can do is propose that the government put on price controls, that they take over industries, that they seize power plants and the government becomes your local utility. It would be the most inefficient operation in the history of our government. Do not let them do it. You cannot get something for nothing out of this government. If it is the government running it, you usually pay a higher price than if you as a community can have the private sector with checks and balances. I have spoken primarily about energy, about water.

Mr. Speaker, one last shot on water. And then I am done. That is keep in mind the East and West of this Nation, there are differences in water and differences in public lands. I would urge all of my colleagues in the East and all of their constituents in the East to please take the time before signing on a petition to take on Lake Powell or kick people off public lands, take a look at both sides of the story. If you take a look historically, politically, environmentally at both sides of the story, I think you would get a better understanding of what I have said to you tonight and a much deeper appreciation for our message from the West.

HIV/AIDS

The SPEAKER pro tempore (Mr. REBERG). Under the Speaker’s announcement of January 3, 2001, the gentlemanwoman from North Carolina (Mrs. CLAYTON) is recognized for 60 minutes as the designee of the minority leader.

Mrs. CLAYTON. Mr. Speaker, often times we act on perceptions rather
than reality, and when we discuss HIV and AIDS, indeed that has been one based on perception. Often times, when we have felt, who live in the rural South, have felt that AIDS was an issue of the North. Those of us who lived in small towns felt it was an issue of the big cities. Heterosexual persons thought this was only an issue for gays or that it was indeed white male gays. What we are finding is that those perceptions were ill-founded, and that the disease has affected all phases of the United States, particularly the South.

HIV/AIDS is becoming more prevalent in rural areas and in the South. AIDS cases in rural areas represent only about 5 percent of all reported HIV cases in 1995. Only 5 percent. However, the pattern of HIV infection suggests that the epidemic is spreading in rural areas throughout the United States. HIV in the rural South is growing at one of the fastest rates in the Nation. The Southeast as a whole has the highest number of those infected. The Southern region of the United States accounts for the largest proportion: that is, 34 percent, 34 percent of 641,886 AIDS cases. The latest figures we have is for 1997, and 54 percent of the 56,689 cases are among persons residing in rural areas.

However, according to a Boston Globe article, which I include for the Record, according to this article it references that in six Southern States, including my State, North Carolina, and South Carolina, Georgia, Alabama, and Mississippi as well as Louisiana, 70 percent of those with HIV are African American, and 25 percent are women, according to a Duke University study.

But more importantly, here is what it says. Both of these figures are higher than the national average, but few are saying anything about it, keeping the disease nearly invisible as it spreads. It is this silence that worries many AIDS activists, who are fearful that as the US government grapples with the out-of-control pandemic in parts of sub-Saharan Africa, it will neglect the increasingly costly programs to treat infected citizens. In these Southern states, there are waiting lists of people infected with HIV who want to get the drugs. At home, the nation’s initial position has been to put a lid on treatment funds. It has proposed no increase next year for the $1.8 billion Ryan White Care Act, which pays for AIDS cocktails for Americans not covered by Medicaid or other insurance programs. Abroad, the administration has put $200 million in additional HIV money into a newly created Global AIDS and Health Fund, a sum belittled by many advocates as a trivial response to a problem that Secretary of State Colin L. Powell calls a war without end. "It’s a modern-day leprosy here," said Dr. Mario G. Fiorilli, the only AIDS doctor in Halifax County in northeastern North Carolina. "Here, many fervently believe that God is punishing those with AIDS for their sins."

Women in rural North Carolina who would be identified only as Sylvia said she travels 180 miles to see an AIDS doctor three times a month, even though there is an AIDS specialist 40 miles away to the local doctor, "Everyone knows you have HIV," said Sylvia, a local PTA president and a Cub Scout den mother.

"It’s a modern-day leprosy here," said Dr. Maria G. Fiorilli, the only AIDS doctor in Halifax County in northeastern North Carolina. The great differences between the United States and Africa are the antiretroviral AIDS drugs are widely available here. But availability of drugs does not always guarantee access, and flat-funding of the Ryan White Act means that many newly infected Americans will be denied drugs, advocates say.

In interviews with several dozen AIDS caseworkers and patients in rural areas of North Carolina, many said that potentially thousands of people refuse to get tested for HIV, while others fail to adhere to the daily regimen of pills for a variety of reasons, including painful side effects. "I have friends and I don’t agree with them—who are sleeping around with it," said a man who asked to be identified only as J-Ray, a now-celibate drag queen who adheres to the strict drug regimen. "They’re just spreading it. That’s what’s going on here. You have people who are either too scared to get tested, or find they have it and basically don’t care at all. They’re just..."

Like many interviewed, J-Ray did tell friends. "We only have 150 members here in this town. My mother hugged me," he said. His father looked at me, and said, "Do you have life insurance?"

"I have," said Whittem-Goldstein, "and I’m happy."

When you think about the epidemics occurring through heterosexual transmission..."
Mr. Speaker, from 1981 to 1999, 26,522 people living with HIV and AIDS, including 8,189 adult adolescent males, 2,013 adult adolescent females, and 127 children, were reported in this year alone, the new AIDS cases. Most North Carolina HIV diagnoses report highly the male population, African Americans 72 percent, falling within the age group between 30 and 39. Thirty and thirty-nine are our most active, productive citizens. This is the time when people are forming families and building careers. This is the time when people ought to be the most productive in their community; but at this time we are finding within the age group 30 to 39, 72 percent are African Americans.

Mr. Speaker, this chart shows that persons living with HIV and AIDS, and this was as of the end of last year, the percentage by gender, 68.4 percent are male; 31.6 percent are females. And then when you begin to look at the ethnicity of it, 74.2 percent are African American or black; 19.3 percent are white non-Hispanic; 1.9 percent are Hispanic, and the Hispanic population is growing in our State, so that increase is in some way related to the growth. In fact, we are finding within the age group between 30 and 39, 72 percent are African Americans.

In the First Congressional District as well as in eastern North Carolina, including the third district, African Americans accounted for as much as 87 percent of HIV/AIDS cases that were reported in this year alone, the new cases that were reported.

The House of Representatives and the General Assembly of North Carolina recently passed under the leadership of Representative Wright a resolution declaring HIV/AIDS as a public health crisis, that we need to acknowledge that and get our community involved, that our faith-based community involved and our education system involved, because without the public recognition, we are not going to deal with that.
While only 1 percent of AIDS cases are found among teenagers aged 13 through 19, an additional 18 percent are found among those who are in their early 20s, who may have acquired the infection while they were teens because many of them had the infection, but we are now just discovering it while they are in their early 20s. Likewise, we are finding infection of teenagers is increasing. Additionally, some 26 percent are found among those who are now in their 20s, assuming they might have been infected some years earlier.

As of December 31, 1998, percent or 13,943 of all HIV disease reports in North Carolina were among those that were from 20 to 39, regardless of race. From 20 to 39. That is an astounding, large number of people. Let me repeat that: 13,943 were reported last year. Of those reported, 68 percent of those reported were between the ages of 20 and 39.

Now, earlier I had said that there was a correlation between STD, sexually transmitted disease, as a predictor of HIV.

I want to show you another chart as well. This is alarming because syphilis and gonorrhea and other transmitted disease, we thought those had been eliminated. In fact, I have a map that I do not have with me; but if you look at this map, it is almost completely eliminated, other than in the South and in one or two places in the Midwest. Completely eliminated. In fact, there is no reason why sexually transmitted disease should be growing. There indeed is a bacterium treatment for it; but it is growing in the South; and it is growing in my State in alarming numbers.

Although it cannot be said that the STDs cause AIDS, it must be said there is a correlation between them. Indeed, you can begin to see the large number of them growing in North Carolina. But also you see a high percentage of them being related to African Americans. Gonorrhea percentage, almost a relationship between what you see in gonorrhea and syphilis as the HIV chart. There is no reason for this. This is unexplainable why this is happening. One is a disease by a behavior pattern that we can correct, but also there is no public outcry in understanding this. One, we assign to the fact, well, this is their own doing and, therefore, we shouldn't be concerned.

There is a glaring racial disparity in North Carolina cases. Seventy-one percent of them are among African Americans. The infectious syphilis rate is almost 12 times greater for African Americans, 11 times greater for Native Americans, and eight times greater for Hispanics than the rate for non-Hispanic whites.

In 1998, half of all syphilis cases were confined to 1 percent, 1 percent now, of all the counties in the United States. These cases of syphilis were found in 28 counties, primarily located in the South, and three independent cities: Baltimore, District of Columbia, North Carolina had five nationally significant high syphilis morbidity counties: Guilford, not in my district, but certainly a large county in my State; Forsyth, again not in my district, but a large county in my State; Mecklenburg, which is our largest city; Wake County, which is our capital; and Robeson County, growing at significant rates higher than all of the other southern States.

The National Alliance of State and Territorial AIDS Directors, something called NASTAD, did a report. I have that report. This report is entitled “HIV Services in Rural Areas.” They studied New Mexico and South Carolina experiences.

Mr. Speaker, I include this study for the RECORD.

The HIV/AIDS Bureau (HAB) has set, as part of its policy agenda, an objective to document the experience of vulnerable populations with HIV/AIDS cases in rural areas. The HAB reported that it is difficult to monitor the quality of care that persons living with HIV/AIDS receive from local health care providers. In addition, the HAB reported that it is difficult to monitor the quality of care that persons living with HIV/AIDS receive from local health care providers. In addition, the HAB has identified barriers to overcome in the provision of services for persons living with HIV/AIDS in rural areas.

Providers acknowledged that travel options such as (1) commercial transportation services; (2) volunteer drivers; (3) staff home visits, or (4) mileage reimbursement for the use of a personal vehicle. However, in cases of acute illness, the lack of an adequate transportation plan may make a critical difference.

Inadequate Supply of Health Care Providers with HIV/AIDS Expertise—Providers express frustration about the lack of physicians with expertise in HIV treatment, despite the wide availability of training and certification opportunities. Providers also reported that it is difficult to monitor the quality of care that persons living with HIV/AIDS receive from local health care providers. In addition, the HAB has identified barriers to overcome in the provision of services for persons living with HIV/AIDS in rural areas.

Providers acknowledged that travel options such as (1) commercial transportation services; (2) volunteer drivers; (3) staff home visits, or (4) mileage reimbursement for the use of a personal vehicle. However, in cases of acute illness, the lack of an adequate transportation plan may make a critical difference.

Inadequate Supply of Health Care Providers with HIV/AIDS Expertise—Providers express frustration about the lack of physicians with expertise in HIV treatment, despite the wide availability of training and certification opportunities. Providers also reported that it is difficult to monitor the quality of care that persons living with HIV/AIDS receive from local health care providers. In addition, the HAB has identified barriers to overcome in the provision of services for persons living with HIV/AIDS in rural areas.

Providers acknowledged that travel options such as (1) commercial transportation services; (2) volunteer drivers; (3) staff home visits, or (4) mileage reimbursement for the use of a personal vehicle. However, in cases of acute illness, the lack of an adequate transportation plan may make a critical difference.

Providers acknowledged that travel options such as (1) commercial transportation services; (2) volunteer drivers; (3) staff home visits, or (4) mileage reimbursement for the use of a personal vehicle.
The Stigma Attached to HIV/AIDS—The stigma attached to HIV/AIDS may stem from community-wide denial that HIV is a problem that needs to be addressed. Medical providers may resist treating persons living with HIV/AIDS. In contrast, clients may be reluctant to seek services in rural areas “where being socially ostracized.

In addition, there may be a sense of mistrust toward and related health care providers by individuals within the community, especially if such service providers are unknown to the client or from outside the community.

Client Adherence to Treatment—With improved HIV/AIDS care and treatment, treatment adherence may become a more important concern. Promoting adherence to antiretroviral treatment regimens can be difficult when clients are isolated and face-to-face contact between case managers, physicians, treatment educators and persons living with HIV/AIDS is limited. It also is difficult to assure client adherence to treatment on a regular schedule if the ability to refill problematic, or if the client has issues of stigma to overcome.

Substance Abuse—Several providers noted that the provision of long-term substance abuse treatment is a significant service barrier in rural areas. Distance and limited client contact compound the challenge. Substance abuse treatment services may not be readily available outside of urban areas. There may be a sense of denial, both in the community and on the part of the clients, who are unfamiliar with and alcohol, because substance abuse is not identified openly as a problem in rural areas, resulting in little effort to secure treatment services.

Additional Needs of Communities of Color in Rural Areas—Communities of color, including African, Hispanic, Native, and Asian Americans, are at high risk for HIV infection. Rural communities of color, like other rural residents, experience the same barriers—stigma, poverty, and the absence of accessible care vulnerabilities of these communities to HIV is further compromised by additional factors: discrimination, distrust of the medical establishment and the health care system, and rural area’s limited resources, severe poverty and unemployment, and socioeconomic disadvantages and isolation.

State Components that Link HIV Services in Rural Areas

The providers interviewed for this monograph have developed and described various strategies for providing HIV services to clients living in rural areas based on client needs and available resources. State strategies include:

Addressing Clients’ Needs Beyond HIV—Service providers who address the entire range of client needs are more likely to maintain clients in care. Poverty, substance abuse, mental illness and other problems that are often associated with urban life also affect persons living in rural areas. For example, the Palmetto AIDS Life Support Services (PALS), in Columbia, SC, operates the Women’s Resource Center. Approximately 25 percent of the clients live in rural areas.

The center provides a range of services that address the needs, both HIV-related and those not related to HIV, of their female clients. PALS offers parenting classes, breast and cervical cancer screening, nutrition classes, exercise classes, social activities such as crafts and sewing classes, and a library that contains resources specific to women and HIV, creating a link between service provider and client.

Client-Centered Approach—It is not always practical to attempt to create a specific population in a rural area. The caseload is often small and resources are extremely limited. These circumstances necessitate that staff be culturally sensitive and focus on the individual, since the client or population, though small, may be very diverse. For example, one of New Mexico AIDS Service Providers Association in Native American and works with the organization’s Native American clients in Albuquerque. The case manager also understands the cultural importance of using Native American healing methods and administers NMAS’s complementary medicine program.

Flexibility—Service providers stressed the importance of designing and administering programs that are flexible enough to accommodate the unique needs of individuals living with HIV/AIDS. Many agencies allow clients to designate where they will meet with their case managers, whether at their home, a local health department or library, or even for lunch at a local restaurant. Such arrangements allow clients to identify a “safe site” in his or her community where individual confidentiality can be maintained and clients can present another challenge for providers. If a person living with HIV/AIDS cannot schedule an appointment during regular clinic hours and needs to see a physician in between weekly clinics, several service providers reported that the physicians will frequently allow offices to visit, even though they are contracted to do so.

Working with Available Resources—It is important to identify and link collaborative partners in rural networks, even with limited resources. For example, the Edisto Health Department in central South Carolina works with the Cooperative Church Ministries of Orangeburg (CCMO), a coalition of churches in the area that have combined their resources to offer some services such as a small food and clothing bank to persons living with HIV/AIDS. CCMO also administers the Housing Opportunities for People With AIDS (HOPWA) funds for the health department.

Creating Informal Relationships—Service providers in rural areas stressed the importance of informal relationships that repeatedly prove to be invaluable in identifying resources and service networks. These relationships may develop unexpectedly. The ACCESS Network in Hilton Head, SC works closely with “Volunteers in Medicine,” a medical staffed by retired health care professionals, who moved next door to ACCESS several years ago. Some ACCESS clients now receive services at the clinic more easily with the clinic’s staff to coordinate clients’ care. They also provide clinic staff with information on HIV/AIDS treatment developments. Peer providers represent informal relationships between their own physicians and infectious disease (ID) specialists outside their service area who are available for phone consultation. Peer counselors also cited the importance of working with local media to raise awareness about HIV/AIDS and the agency’s services by running public service announcements (PSAs) or providing coverage of agency activities and events.

Conclusion

Both New Mexico and South Carolina have implemented strategies that seem to be working well for their respective residents who are living with HIV/AIDS. Both states also have found it necessary to remain flexible in implementing these strategies to meet the needs of specific groups. Residents who have unique challenges from one geographic area to another within each state. The selection of these two states in no way suggests that other states are not exemplary in their efforts to ensure positive outcomes for their respective residents. The selection of these states simply presents an opportunity to inform other states that address HIV/AIDS in rural areas with other jurisdictions and stimulate national discussion among states on how best to meet the needs of persons living with HIV/AIDS.

HIV SERVICES IN RURAL AREAS: THE NEW MEXICO AND SOUTH CAROLINA EXPERIENCES

INTRODUCTION

AIDS cases in rural areas represent approximately five percent of the all AIDS cases in the United States. Long distances between residents and accessible health care services, social isolation as a result of stigma related to HIV/AIDS, lack of adequate, if any, health insurance coverage, insufficient medical facilities, few medical specialists, and limited support services like transportation and child care are one of the efforts of rural communities (see Appendix A) to serve residents living with HIV/AIDS.

State health departments, in collaboration with their health agency and organizations, are focusing on preventing new infections in rural areas, getting persons living with HIV into care (see Appendix B), and improving access to HIV healthcare services in rural areas. State health departments offer experienced insight, methodological research and analysis, and documented evidence of the success and failure of their strategies that collectively are designed to improve the quality of life for persons living with HIV/AIDS. State health departments also have the expertise to provide technical assistance and support for capacity building to local health care agencies and organizations that serve persons living with HIV/AIDS and to develop linkages between HIV/AIDS health care and related services in urban as well as rural areas.

Rural Areas is a monograph developed by the National Alliance of State and Territorial AIDS Directors (NASTAD), under a cooperative agreement with the HIV/AIDS and Health Services’ (NMAS) Office of Minority Health and AIDS Education and Services Administration (HRSA), U.S. Department of Health and Human Services. NASTAD conducted interviews with state AIDS directors and local service providers receiving Ryan White CARE Act funds in fall 1999. This monograph highlights activities in New Mexico and South Carolina, two states that have developed strategies to address the primary care and support service needs of people living with HIV/AIDS in rural areas. These two states were selected because they are located in regions of the United States that are sparsely populated and are characterized as rural with remote populations. Additionally, these two states have unique characteristics in their populations include a disproportionately high number of rural communities of color—African, Hispanic, and Native Americans—who are at high risk for new HIV infections.
AIDS cases reported in 1999: 125 (annual rate per 100,000 population).  
Cases of AIDS reported (Cumulative through June 2000): 1,828.
Ryan White CARE Act Title II Base Grant Award, FY 1999: $1,125,079.
FY 1999: $1,055,076.
Total Title II Funds, FY 1999: $2,476,155.
Over 75 percent of the cases of HIV/AIDS reported in New Mexico are attributed to male-male contact (MSM). Currently, there are only eight percent of reported cases of HIV/AIDS. Fifty-six percent of persons reported with HIV/AIDS are white, 35 percent are Hispanic, five percent are Native American, and four percent are African American. Over two-thirds of HIV/AIDS cases are reported in Bernalillo and Santa Fe Counties, where the cities of Albuquerque and Santa Fe are located. The number of cases reported in New Mexico’s other 31 counties range from zero to 129.
In July 1997 the HIV/AIDS/STD Bureau of the New Mexico Department of Health (DOH) created the HIV/AIDS Medical Alliance of New Mexico (HMA). The HMA is a capitated system that provides medical, case management, home care, support services including counseling, housing and nutritional assistance, and work re-entry programs through local medical groups among regionally-based organizations.
Under the HMA system, the state is divided into four districts: Albuquerque, Santa Fe, Las Cruces, and Roswell. Each of the four HMAs is a self-contained, multidisciplinary provider or an association of providers, designed to provide cost-effective continuum of care including a prevention focus. Racial/ethnic distributions for HIV/AIDS caseloads in each of the four HMA districts is reported in Appendix D.
The HMA model resulted from a field review conducted by DOH in November 1996. The review was conducted to identify and clarify shifts in the case and treatment of persons living with HIV/AIDS, such as the introduction of antiretroviral combination therapy and the impact of deeper penetration of the medical care system, and the need for a more effective continuum of care including a prevention focus. Access to adequate services diminishes the well-being of individual organizations. The HMA system allows HIV case management to be specialized within an agency and specific to the needs of persons living with HIV/AIDS. Before the HMAs, the state subcontracted with approximately 100 providers. Most of the providers did not specialize in HIV services and there was great variation in the case management and support services provided. The formation of the HMAs resulted in statewide availability of comprehensive case management and support services for persons living with HIV/AIDS.
Consolidation has been an important part of the HMAs. With the establishment of the HMAs, person living with HIV/AIDS enroll in and receive services from only one organization. Referral to services is facilitated because there is only one access point in each district and HMAs have publicized their services throughout their service area. Clients receive all necessary services from one provider, not various providers scattered throughout the state, as was the case before. Services from several providers greatly increased the possibility of breaches in confidentiality, a major concern for persons living with HIV/AIDS.
Service providers for each district were selected through a state request for proposal (RFP) process. The state review process identified services considered necessary for an integrated continuum of care for persons living with HIV/AIDS and their families. Findings from the state review process were used to develop the HMA model. Applicants are required to provide the identified services either directly or through contracts with other organizations. Providers have contracts for three years.
Key Factors in the Development of HMAs
According to Donald Torres, Section Head of the New Mexico’s DOH, HIV/AIDS Bureau, the HMA model works well for low incidence, rural states where the number of service providers is relatively small. Under these conditions, the service delivery network is compact enough that adjustments can be easily made across the program.
At the time of model was being considered there were only a few HIV-specific providers in the state. DOH contracted with various hospital systems to provide case management services but the contracts were not large enough to jeopardize the agencies’ viability if funding was discontinued. Therefore, more than 200 health systems did not resist the formation of the HMAs because it would not negatively impact the well-being of individual organizations.
Clients also were generally in favor of some change to the existing system. The development of the HMAs paralleled the move toward Medicaid managed care in the state which created an environment where people expected change in the health care delivery system. As with any major change, the move toward HMAs created some concerns. The development of the HMAs served as a focal point in the political debate on managed care. Additionally, there were concerns that the HMAs would not be sensitive to the needs of people of color and that they might divert funds from HIV prevention programs.
Two Years Later **

Since their establishment, HMAs have become identified as the source of HIV care in New Mexico. Of the approximately 1,300 persons living with HIV/AIDS, 1,100 persons living with HIV/AIDS access case management services throughout the HMAs. In New Mexico, anyone who tests positive for HIV/AIDS is eligible for HMA services. To be eligible for services through the HMA a person must: 1) have a documented diagnosis of HIV disease from a qualified licensed medical provider; 2) be a resident of the service area (district); and 3) have a documented income at or below 300% of the federal poverty level (FPL). Members may elect to enroll in a HMA other than the one providing service where they reside but HMAs do not recruit members from outside their service area.
Since their initiation, the HMAs have been integrated with other HIV services in the state. The DOH operates a health insurance continuation program. The program pays up to $600 per month for the premiums of a participating client’s existing health insurance. The program also reimburses the patient’s share (co-pays) for HIV medications under the New Mexico Medication Assistance Program (ADAP). The state will purchase health insurance for eligible clients through the state’s insurance risk pool. This reduces the amount of money spent by the HMAs for health care services.
The University of New Mexico’s Health Sciences Center’s University Hospital, a Ryan White CARE Act (RWCA) Title III grantee, administers the “Partners in Care Program.” Medical services are provided at the hospital in Albuquerque and the grantee also recruits physicians across the state to provide services to persons living with HIV/AIDS. To be eligible for the program, physicians must treat a certain number of persons living with HIV/AIDS. University Hospital physicians are available for consultation and the hospital also operates a hotline that may call willed question-related questions. HMA clients, especially in three of the four districts, often access medical services through the Title III program.
Successful Cost Containment
The New Mexico DOH reports significant cost savings as a result of implementing the HMA model. The cost of providing HIV-related care and support services, including medications, to New Mexico’s caseload of HIV/AIDS patients living with HIV/AIDS decreased from $5.2 million in 1995 to $8.2 million in 1996, a 37 percent increase. The increase was primarily due to the expense of antiretroviral medications. The cost of HIV care jumped significantly between 1995 and 1996, rose slightly in 1997, then in 1998 fell to the

Lack of Medical Providers with HIV Experience—According to the HIV service providers interviewed, local doctors do not take advantage of the availability of training opportunities to increase their knowledge of HIV treatment. In District 4, two practitioners interviewed, approximately 12 other physicians see one or two clients. With a large number of physicians, more training services and the informal nature of the relationship between the HMA and these physicians, it is difficult to monitor the quality of care clients receive.

Additionally, HMAs that do not have on-site medical services will be able to move toward a care team model with physicians, case managers and persons living with HIV/AIDS working together to develop a treatment strategy. Consolidation will improve the monitoring of clients' medical care. For more information about the activities of the four districts in the NM HMA system, please refer to Appendix D.

SOUTH CAROLINA

Total Population: 3,836,000
Area: 31,133 sq. miles
Population Density: 123 persons per sq. mile

HIV/AIDS Cases (cumulative reported through June 1999) (HIV reporting was initiated in February 1985)
people per 100,000 population: 25.7)

HIV cases reported in 1999: 961 (annual rate: 25.7).
HIV cases reported in 1998: 877.
Cases of AIDS reported (Cumulative): 8,352.
FY 1999: $4,968,208.

The HIV epidemic in South Carolina—In rural areas of the southeastern United States, the HIV epidemic is increasingly concentrated in the heterosexual population and, when associated with sexually transmitted diseases (STDs), especially syphilis, alcohol abuse and crack cocaine use. In South Carolina, 71 percent of HIV/AIDS cases reported in 1998 were women, 29 percent among women. African Americans made up 75 percent of reported HIV/AIDS cases. Twenty-seven percent of HIV/AIDS cases are attributed to male sexual contact (MSM), including MSM and injection drug use, 27 percent are attributed to heterosexual contact and nine percent to injection drug use (38 percent have no reported risk). One third (33 percent) of the people reported with HIV/AIDS in 1998 reside in rural areas.

Characteristics of Newly-Diagnosed People with HIV/AIDS: Urban vs. Rural—In January 1991—December 1998, the Department of Health and Environmental Control (DHEC) conducted the Supplement to HIV/AIDS Surveillance (SHAS) Project (supported by CDC). The project initially included Charleston County and the Edisto Health District (a three county area). A third county, Richland, was added in July 1995. Field staff conducted interviews with newly reported/diagnosed people with HIV/AIDS, 18 years of age or older, who were residents in the study area. This population of the project included 1,146 eligible persons were interviewed. Of these, 78 percent were from urban communities and 22 percent were from rural communities. Each of the four districts in the NM HMA system, please refer to Appendix D.

July 10, 2001

CONGRESSIONAL RECORD—HOUSE

Level. It is estimated that if the HMA system had not been implemented, the cost of HIV care in New Mexico would have increased between five percent and 20 percent in 1998. HMA implementation saved the state between $400,000 and $1.7 million. These savings are saving the lives of people being served increased. The net number of clients served increased by an average of six percent each year.

In the coming year, DOH plans to more thoroughly integrate the Title III grant with the HMA program. Even though training is available for physicians in outpatient areas, the HMAs report that care is still problematic and that some physicians lack the required expertise to provide quality HIV care. By integrating the Title III funds into the HMA system, HMAs will be able to select physicians in their districts who are motivated to treat persons living with HIV/AIDS and to develop their HIV-related expertise.

Additionally, these physicians are more likely to work with case managers and persons living with HIV/AIDS in the development of care plans. The state’s early intervention nurses also play a key role in linking persons living with HIV/AIDS with services. Five nurses are employed as post-test counselors. Persons living with HIV/AIDS are linked with early intervention nurses who conduct an initial assessment, refer clients to the appropriate resources for up-front clients who do not access care. The nurses also conduct partner notification services.

As of the end of 1999, DOH plans to expand the HMA system. The new fifth state-wide HMA will be added that will serve Native American people living with HIV/AIDS. It will be based in Albuquerque. The state also plans to contract with an agency to provide benefits advocacy services. The new contractor will help persons living with HIV/AIDS obtain benefits and also address emerging needs such as education and re-employment. Additionally, the contractor will provide advocacy services, including mediating grievances with HMAs. The contract will be awarded through a Request for Proposal (RFP) process.

Addressing Needs in Rural Areas

Each of the HMAs has developed a unique service delivery system based on available resources in the rural areas. All four districts serve clients who reside in rural areas. Albuquerque (District 1), Las Cruces (District 3) and Santa Fe (District 2) contain urban areas, where most clients reside, surrounded by rural areas. Roswell (District 4) is predominantly rural.

The New Mexico DOH has established different capitation rates for the HMAs based on the greater per client expense of serving clients in rural areas. The larger HMAs, Albuquerque and Santa Fe, are able to achieve some economies of scale because they serve a larger number of clients. Additionally, they have access to more resources, including more fundraising opportunities. In rural areas, it is not feasible to travel to each clinic and staff are required to travel as well. Due to the potential costs of mileage reimbursement and staff driving time. To facilitate access for clients in rural areas, the HMAs reimbursed clients for travel expenses (mileage) and all the HMAs have toll-free telephone numbers.

Quality Assurance Activities

DOH has adopted a variety of measures to assure the quality of services delivered by the HMA. The HMAs with the HMA system must maintain records on member enrollment status, provision of coverage, accountability, and individual treatment records on members. DOH also is monitoring a client satisfaction survey to assess whether the HMAs are meeting clients' needs and to develop a uniform protocol with the HMA service delivery system.

The New Mexico DOH initiated a process to identify statewide HIV/AIDS “best practices” that could be used to develop a cost-effective design and delivery of HIV/AIDS services throughout the state. The guidelines include five areas (1) to support the management and, where appropriate, the elevation of the quality of HIV/AIDS care throughout the state, (2) to improve access to quality care in both urban and rural areas, (3) to provide a measuring device against which HIV/AIDS care system services might be objectively evaluated, and (4) to provide a product with which they might competitively position their services.

The state guidelines present an integrated “care team” process based on collaboration between primary care physicians, case managers, and the client in the development of an individualized care strategy to delay or reverse the progression of HIV. The guidelines identify core services (clinical, prevention, practical support, educational support and mental health) and procedures for enrollment, assessment, chronic management, acute events and palliative care. To develop the guidelines, DOH held a retreat attended by the early intervention nurses, two HMAs (one urban and one rural), two physicians, three case managers, three persons living with HIV, four early intervention nurses, and representatives of the DOH. Guidelines also have been developed to address care management in rural areas.

Challenges

Accessing Services Based at the Main Office—The HMA has developed alternative approaches for clients living in rural areas because it is not possible to provide all the services that are available at the main office. In the field office in Farmington. For example, clients in rural areas requested that the food bank services be made more accessible. Instead of the three HMAs (five different sites throughout the service area) being open, the food bank services are open Monday-Friday 9 a.m. and 5 p.m. and the client in the development of an individualized care strategy to delay or reverse disease progression. The guidelines are to (1) to support the management and, where appropriate, the elevation of the quality of HIV/AIDS care throughout the state, (2) to improve access to quality care in both urban and rural areas, (3) to provide a measuring device against which HIV/AIDS care system services might be objectively evaluated, and (4) to provide a product with which they might competitively position their services.

The state guidelines present an integrated “care team” process based on collaboration between primary care physicians, case managers, and the client in the development of an individualized care strategy to delay or reverse the progression of HIV. The guidelines identify core services (clinical, prevention, practical support, educational support and mental health) and procedures for enrollment, assessment, chronic management, acute events and palliative care. To develop the guidelines, DOH held a retreat attended by the early intervention nurses, two HMAs (one urban and one rural), two physicians, three case managers, three persons living with HIV, four early intervention nurses, and representatives of the DOH. Guidelines also have been developed to address care management in rural areas.

Challenges

Accessing Services Based at the Main Office—The HMA has developed alternative approaches for clients living in rural areas because it is not possible to provide all the services that are available at the main office. In the field office in Farmington. For example, clients in rural areas requested that the food bank services be made more accessible. Instead of the three HMAs (five different sites throughout the service area) being open, the food bank services are open Monday-Friday 9 a.m. and 5 p.m.

Obtaining Client Feedback—Providing opportunities for clients to give feedback on their needs and the services they receive can be difficult. In order to facilitate this process, the District 4 HMA holds their Community Advisory Committee meetings at six different sites throughout the service area. The meetings are open to all clients. Local physicians who treat clients also are invited. At the meetings, clients can raise concerns about services and other personal issues. To encourage attendance, dinner is served and incentives, such as gift cards or vouchers, are provided. Twice a year, the HMA surveys clients about their needs. Of the findings of the survey, the HMA will tailor information provided at the meetings to client needs and depending on the topics, the agency will secure appropriate staff will attend. Treatment issues are always a popular topic at the meetings.
were completed as part of this study. The majority (62 percent) were male (minority 38 percent) and African American (77 percent). Approximately 47 percent of the Rural SHAS participants had never lived outside of the county in which the study was conducted. At the time of diagnosis, 29 percent of rural participants had AIDS, as compared to 34 percent in the urban counties.

Sixty-nine percent of rural participants were unemployed at the time of diagnosis, as compared to 57 percent in the urban counties; and sixty-nine percent of rural participants had household incomes of $10,000 a year or less, as compared to 30 percent in the urban counties.

The study also revealed that participants in rural areas were more likely to have used crack cocaine than those in urban areas (33 percent rural, 28 percent urban) but were less likely to have had a steady sexual partner (18 percent rural, 16 percent urban). Rural participants were more likely to have not used condoms with their steady sexual partner (46 percent rural, 38 percent urban) and were more likely to have received money or drugs for sex (12 percent rural, 18 percent urban).

The structure that evolved depended greatly on the resources available in the communities. For example, the Midlands AIDS Consortium, based in Columbia, SC serves both urban and rural areas. The consortium focused on establishing linkages through a system of subcontracts because there already were agencies providing HIV-related services. In other consortium regions, a single agency was identified and funded to provide HIV-related services that may or may not already have been region.

Quality Assurance—The Ryan White CARE Act Peer Review Committee oversees the activities of Title II consortia in the state. It is made up of eleven members, one for each consortium, and DHEC representatives. When the committee was formed in 1996, each consortium completed a self-assessment. The committee established a mission statement based on the findings of this process. For the last two years the committee has developed standards and guidelines that consortia can use as tools to assess services.

The committee has developed guidelines for case management services and is also developing outcome measures for primary care. To develop the guidelines for case management services, the committee surveyed all consortia and DHEC representatives. The committee then convened a series of meetings for additional input. Based on the committee's input, a draft of guidelines has been developed standards for intake, assessment, and discharge.

State Efforts to Link HIV Services in Rural Areas—Initially most of the services provided by the CARETEAM, the lead agency of the Waccamaw Care Consortium and based in Myrtle Beach, were concentrated in Horry County, near Myrtle Beach, and all staff members resided in this area. To meet with clients in the two southern counties required staff to make a round trip from the agency's office in the northern part of the service area. To alleviate some of the travel expenses, in the two southern counties hired. On days when case managers see clients in the southern part of the service area, these case managers could take clients into the area while serving them. Staff also may see clients at either the beginning or the end of the day, before or after they have been to the office.

Within a large service area, outlying areas may have access to fewer services and feel less connected to a service provider. In addition to improving services for clients, hiring staff from that area help to facilitate linkages with the community. CARETEAM found that as they increased their presence in the two southern counties, it was much easier for clients to access services in terms of raising awareness of HIV and of CARETEAM services.

Jeff Kimbro, Executive Director of CARETEAM, ‘‘We have worked hard to make sure that Georgetown and Williamsburg Counties feel they have a stake in the care and treatment of HIV.

Knowledge Level of Primary Care Providers—Because it does not have physicians on staff or have contracts with medical providers, the ACCESS Network has had to...
work hard to assure that physicians in the service area are knowledgeable about the treatment of HIV. Located in Hilton Head and Hampton, ACCESS Network is the lead agency for the Low Country CARE Consortium. Jerry Binns, President of ACCESS Network, physicians have become much more knowledgeable about HIV in the past few years but it is still necessary to provide educational opportunities.

ACCESS Network has used a variety of approaches. They regularly provide written materials on treatment developments to local practitioners, host informational meetings between ACCESS Network staff and local practitioners, organize educational presentations by experts (sometimes done with a grant), and foster relationships between local practitioners and HIV experts in the state who are available for phone consultation. While knowledge level is important in terms of the quality of care, ACCESS Network acknowledged that the stigma attached to HIV is still a barrier in terms of physicians’ willingness to engage in discussions about living with HIV/AIDS. Other deterrents include a fear of being perceived as an “AIDS doctor,” the perception that HIV/AIDS needs to be treated by the potential financial costs of treating people with HIV (low reimbursement rates), scheduling time to attend training activities, and the distance providers must travel for training. For more information about each of South Carolina’s consortium, please refer to Appendix E.

CONCLUSION

State Efforts that Support HIV Services in Rural Areas

Local providers in both states identified several ways that the state HIV/AIDS Program (Title II grantees) can support the delivery of HIV services in rural areas in program components that are often difficult to resolve.

Assistance in Diversifying Funding Sources—Although sources of financial support can be limited in rural areas, service providers expressed concern about being overly dependent on the state and the Ryan White CARE Act funding. Rarely do rural areas have access to a fundraising base or grant opportunities from foundations and corporate donors as do service providers in urban areas. States also acknowledged that many do not possess the organizational capacity to conduct fundraising activities or prepare grant proposals and/or contracts. Providers suggested that states provide technical assistance on fundraising, grant writing, and financial and organizational capacity building. States may have the resources to hire a fundraiser who can focus on identifying new sources of funding for HIV services in rural areas. States can assist in identifying funding sources in the private sector, and pass information about such sources to providers at the local level.

Identification of Outcome Measures—States can play a role in initiating and maintaining a process to develop outcome measures for rural medical and support services. While conducting this type of program evaluation, additional funding or support from other providers, it helps them to focus on the effectiveness of their services, account for funds, and demonstrate that they are improving the health status of persons living with HIV/AIDS in rural areas in which they provide services.

Posing Ryan White CARE Act Cross-
Title Collaboration—Especially in rural areas, service providers can be separated by significant distances making the establishment of linkages more difficult. The absence of established linkages in areas in which other CARE Act providers (Title III, IV, and SPNS) are present, but are not participating in the state’s Title II-funded activities, can lead to duplication of and/or significant gaps in care. States can play a role in facilitating cross-title collaboration within service areas to assure more coordinated service delivery.

Strengthening Prevention Efforts—Rural areas can be more conservative than urban areas and more resistant to HIV prevention efforts. State administration efforts can result in less public awareness which, in turn, may reinforce the perception that HIV is not a problem in rural areas. This lack of awareness on the part of the public, especially in rural areas, may lead to increased spread of HIV and delays in accessing services. Since states administer HIV prevention funds as well, they can provide leadership in recommending or mandating HIV prevention programs at the local level and providing technical assistance in implementing such programs. States can work to strengthen linkages between HIV counseling and testing services and HIV-related primary care and support services to facilitate access to care.

State Responses to the Challenges of Servicing Persons Living with HIV/AIDS—Both New Mexico and South Carolina have implemented strategies to meet the needs of specific groups of residents who have unique challenges from one geographic area to another within each state. The selection of these two states in no way suggests that other states are not conducting exemplary work to assure positive outcomes for their respective residents. The selection of these states simply presents an opportunity to share information with other jurisdictions and stimulate national discussion among states on how best to meet the needs of persons living with HIV/AIDS in rural areas.

INTERVIEWS

NEW MEXICO

David Barrett, HMA Director, District 2, Southwest C.A.R.E. Center, Santa Fe, 505/986-1084.
Kathleen Kelly, HMA Director, District 1, New Mexico AIDS Services, Albuquerque, 505/266-0911.
Kari Maier, HMA Director, District 3, Camino De Vida Center for HIV Services, Las Cruces, 505/532-0202.
Jane Peranteau, HMA Director, District 4, Pecos Valley HIV/AIDS Resource Center, Roswell, 800/957-1995.

Michelle Rojas, Title III Project Coordinator, Richland Community Health Care Association, 803/799-8407.

Tri-County Interagency AIDS Coalition

Karen Beckford, Executive Director, Help for the Pee Dee, 843/667-9414.

APPENDIX A: FEDERAL DEFINITION OF A RURAL AREA

The Bureau of the Census defines an urbanized area (UA) by population density. Each UA includes a central city and the surrounding densely settled territory that together have a population of 50,000 or more and a population density exceeding 1,000 people per square mile. A UA may cover parts of several counties. Additionally, places (cities, towns, villages, etc) with a population of 250 or more outside of a UA are considered to be urban.

OMB designates Metropolitan Statistical Areas (MSAs) as one city with 50,000 or more inhabitants or an urbanized area defined by the Bureau of Census) with at least 50,000 inhabitants and a total MSA population of at least 100,000 (75,000 in New England). Each MSA includes the county in which the central city is located and additional contiguous counties that are economically and socially integrated with the central county. A county that is included in an MSA is considered to be non-metropolitan. Periodically, OMB reclassifies counties on the
July 10, 2001

CONGRESSIONAL RECORD—HOUSE

12751

basis of Census data and population esti-
mat es, it is generally agreed that in rural areas, 
less additional encouragement or support is 
vided, easy geographical access to health and social services is lacking. How-
however, the definitions start to get blurry when 
considering some metropolitan counties that are so large they contain small towns and rural areas. By one estimate, based on 1980 
decennial census data, of the slightly over 32 
million people who live in large metropoli-
tan counties, approximately two million lived in urban areas while rural areas with an easy geographical access to central areas (Goldsmith, 1993).

APPENDIX B: CHARACTERISTICS OF U.S. RURAL POPULATION

In 1997, over 54 million Americans lived in rural areas, making up 20 percent of the U.S. population. During much of the 1990s, the rural population grew faster than urban popu-
lations.

Race/Ethnicity—Eighty-three (83) percent of rural residents are white, as compared to 69 percent of urban residents. African Americans make up nine percent of the rural popu-
lation, but account for 18 percent of all AIDS cases and comprise at least 557 federally recog-
nized tribes with each tribe having its own territory and speak more than one hundred 
languages and dialects. Generally Asian Americans live in more urban areas, as 
opposed to remote rural locations. As HIV/ 
AIDS infections increase throughout South and Southeast Asia, the likelihood of a rise in new infections among Asian Americans in the United States accelerates as families traverse back and forth between their home countries and the United States.

APENDIX D: NEW YORK AIDS SERVICES:

DESCRIPTIONS OF FOUR HMA DISTRICTS

District 1, Albuquerque (Counties served: 
Bernalillo, Cibola, McKinley, Sandoval, 
San Juan, Socorro, Torrance and Valencia).

Case load—80 clients.

Client Characteristics:
Male: 60%, Female: 40%.
African American: 6%, Hispanic: 37%, Na-

tive American: 7%, White: 50%.

Clients with a third party payer: 36%.
Rural clients: 14% (any client residing out-
side of Bernalillo County).

CAPITATION RATE:

Case Management: $221 per client/month.
Primary Care: $109 per client/month.

The state contracts with two agencies, 
both based in Albuquerque, to provide serv-
ices in the District 1 HMA. Since initiation 
of the HMA, New Mexico AIDS Services 
(NMAS) and the University of New Mexico, 
Health Sciences Center, Infectious Disease 
Clinic have worked closely to coordinate 
case management services and primary care, 
even though services are provided at sepa-
rate sites. In 2000, both case managers/ 
support services and clinical care will be 
available at one location in Albuquerque. 
The HMA also has a field office in Farm-
ington. One case manager is employed 
based in Farmington and clients in outlying 
areas can either access primary care in 
Albuquerque or from local physicians funded 
through the Title III program. If a client 
does choose to travel to Albuquerque, mileage 
are reimbursed.

The case manager in Farmington will 
handle the clients' visits or meet clients at a desig-
nated location. The Farmington case 
manager carries a caseload of approximately 40 
clients, in comparison to the 48–55 clients 
served by case managers funded be-
cause of the additional travel time required.

Regional community task force meetings 
are held four times a year for clients, fami-
ilies, and case managers to meet and share 
information about the meet-

ings are held in Farmington and two are held 
in other regions of the HMA. The meetings 
allow an opportunity for clients to provide 
feedback on services. Dinner is provided 
at the meeting to encourage attendance.

District 2, Santa Fe—(Counties served: 
Colfax, Harding, Los Alamos, Mora, Rio Arriba, 
San Miguel, Santa Fe, Taos, and Union).

Case load—285 are enrolled in the HMA—the 
maximum stipulated in the contract with 
the state (of a total of 317 clients).

Client Characteristics:
Male: 90%, Female: 10%.
African American: 4%, Hispanic: 37%, Na-
tive American: 2%, White: 5%.

Clients with a third party payer: 94% (43% 
are on CHIP).
Rural clients: 43% (any client residing out-
side of the City of Santa Fe).

CAPITATION RATE:

Capitation Rate: 
Under 300% FPL: $305/mo.
Over 300% FPL: $314/mo.

The District 2 HMA is administered by 
the Southwest C.A.R.E. Center (SCC), an 
AIDS service organization (ASO) based in Santa 
Fe. SCC’s clinic is staffed with physicians, 
nurses, and case managers and provides one-

stop shopping for clients. Centralized serv-
ices have allowed SCC to adopt a care team 
model, in which the case manager, physician 
and client work closely to determine an 
appropriate course of treatment and support 
for the client.

Many clients in outlying counties prefer to 
go to Santa Fe, if at all possible, because of 
the quality of primary care services provided 
and the Santa Fe clinic is reimbursed to 
all primary care and case management ap-
pointments. For those who prefer not to or 
cannot go to Santa Fe, case managers are 
available. Two case managers in Taos have 
about half the case-

load of those in Santa Fe due to the travel 
required to meet with clients.

District 3, Las Cruces—(Counties served: 
Grant, Hidalgo, Luna, Otero, and Sierra)

Case load—90 clients.

Client Characteristics:
Male: 63%, Female: 16% (1% other).
African American: 2%, White: 43%.

Rural clients: 50% (any client residing out-
side of the City of Las Cruces).

CAPITATION RATE:

Capitation Rate: 
$387 per client/month.

The agency’s medical director sees clients 
at the Las Cruces clinic. Private physicians 
participating in the state’s Title III program 
provide services outside of Las Cruces. Some 
clients see a physician in District 4 because 

District 4, Roswell—(Counties served: 
Chaves, Curry, De Baca, Eddy, Guadalupe, Lea, 
Lincoln, Quay, and Roosevelt)

Case load—82 clients.

Client Characteristics: 
Male: 81%, Female: 19%.
African American: 10%, Hispanic: 36%, 
White: 54%.

Rural clients: 100%.

CAPITATION RATE:

Capitation Rate: 
$314 per client/month.

The agency’s medical director sees clients 
at the Las Cruces clinic. Private physicians 
participating in the state’s Title III program 
provide services outside of Las Cruces. Some 
clients see a physician in District 4 because 

Pecos Valley HIV/AIDS Resource Center is 

an ASO that provides case management and 
health services and HIV prevention activities, 
including syringe exchange. The agency provides 
HIV counseling and testing, which serves as a direct link to 

This HMA does not provide on-site medical 

services. The staff nurse handles most of the
assessment and referral of clients. For example, the nurse at a mental health facility may become concerned if a pregnant woman does not come to counseling sessions for more than a few weeks in a row and feels that she or she cannot take medications without having his or her HIV status discovered. The case managers also will meet with clients at other times that the clients may decline and will drive clients to appointments if they prefer to meet at the agency’s office. The disease intervention specialist, who works for the same department that administers the HIV/AIDS program, will visit clients if they are in the area doing partner notification.

The health department provides both primary and specialty care. It contracts on an hourly basis (the most cost-effective way for the health department to provide care) with four general practitioners and an Infectious Disease (ID) Physician (there is only a small number of IDs in the state and most are in Charleston and Columbia). The ID physician consults with the four other physicians. The health department’s clinic for clients is open every Thursday from 5-9 p.m. Each week it is staffed by three physicians, including the ID physician. The presence of the physicians involved is a critical component. For example, some clients are resistant to attending the clinic, whether they fear loss of confidentiality or are just not emotionally prepared in their acceptance of their HIV status. The ID physician will see these clients in his office on a routine or emergent basis. For example, concerns about limited clinic hours is that clients may not have access to care when they need it. For example, if a client calls on Monday with a sore throat, the ID will have his clinic open until Thursday to see a physician. If the situation requires, the client is referred to the emergency room.

Once again, transportation can serve as a major barrier for clients attending the weekly clinic. The health department contracts with a transportation service. When they were considering the contract, it was discovered that if they paid by the mile they could only pay a contractor the health department’s standard reimbursement rate. This was far too low for a professional provider. Instead, the health department pays the provider a flat fee per week (about $10,000 per week) to bring his van by on any clinic day. The health department carefully monitors the contract to make sure it is cost effective.

Transportation is provided to medical visits by either volunteers or through contracts with individual drivers who are paid by the hour. CARETEAM has used taxis in the past but these proved to be too expensive. While some providers in rural areas have been reluctant to use volunteers to provide transportation, fearing clients will be resistant to riding with volunteers due to confidentiality concerns, this has not been the experience of CARETEAM. In the future, CARETEAM would like to acquire a van and transport clients on a part-time basis to provide transportation to clients.

CONGRESSIONAL RECORD—HOUSE

July 10, 2001

APPENDIX E: SOUTH CAROLINA’S LEAD PRIMARY CARE AND SUPPORT SERVICE AGENCIES

1. Tri-County Interagency AIDS Coalition—(Counties served: Bamberg, Calhoun, and Orangeburg)

   Caseload—355 clients.

   Client Characteristics:
   Male: 61%, Female: 39%.
   African American: 93%, White: 7%.
   Uninsured: 70%.
   Rural: 100%.

   The Edisto Health Department, based in Orangeburg, is the lead agency of the Tri-County Interagency AIDS Coalition. The health department estimates that there are between 500–700 persons living with HIV/AIDS in the service area and it plans to increase outreach efforts to bring more people into care.

   The lead agency administers all the Title II funds for the consortium, which is composed of ten agencies. There are few service providers in the area and many support services, such as the local food bank and clothing banks, are on a very limited basis. There are four general practitioners and two part-time nurse practitioners at four general practitioner sites that have been recruited (either paid per case or for a set number of hours). The health department has a memorandum of agreement (MOAs) to contract with another agency to provide case management services. This agency provides case management services before the HMA was formed and some of these clients have been transferred to the HMA. The HMA also contracts with another agency to provide case management services. This agency is dependent on client need. Approximately 30–40 percent of clients meet with their case manager at least once every two months. About ten percent of clients come to their appointment for an appointment but the case manager travels to the remaining 90 percent of clients. Travel time can be as long as 3.5 hours one way.

   2. Waccamaw Care Consortium, Myrtle Beach—(Counties served: Georgetown, Horry, and Williamsburg)

   Caseload—350 active clients (will serve nearly 450 over the course of the year)

   Client Characteristics:
   Male: 60%, Female: 40%.
   African American: 57%, Hispanic: 1%, White: 40%, Other: 1%.
   Uninsured and underinsured: 80%.
   Rural: 50%.

   CARETEAM, based in Myrtle Beach, is the lead agency of the Waccamaw Care Consortium, which is composed of ten agencies. Horry County is primarily middle class and the other two counties are more rural and have fewer resources. The lead agency provides the needed services.

   One of the challenges identified in service delivery in the region is that the service area is long and narrow, and the lead agency is located in the center of the region. It may take more than 1.5 hours, one way, to travel to the outlying areas because of the geographic configuration of the service area. CARETEAM allocates services in the near future who will be available for consultation.

   The clinic employs three full-time case managers, each with a caseload of approximately one hundred twenty clients. Most of the clients (about 80 percent) come into the clinic at least once a month and meet with their case manager at the same time. Case managers contact clients by phone at least once a month and meet with clients on a face-to-face basis at least once every three months (when applicable). Case managers will meet with clients at the office, clients’ homes, or at a designated location.

   The agency contracts with five physicians that have been recruited (either paid per month or per patient). Two of the doctors reside in the region. The other three are ID physicians that commute. The clinics are operated all day Monday and half day on Tuesday and Wednesday. Limited clinic hours have not been a problem since clients can see a physician during off-hours if necessary. All clinic are held off-site at three physicians’ offices located throughout the service area. A key component in the provision of primary care is the medical case manager, who is a medical technician. The medical case manager does all the administrative work, including scheduling appointments, filling out paperwork, and obtaining prescriptions assistance (i.e. state, ADAP, pharmaceutical companies) for the physician to cut down on their workload. The medical case manager is present at all clinics.

   Transportation is provided to medical visits by either volunteers or through contracts with individual drivers who are paid by the hour. CARETEAM has used taxis in the past but these proved to be too expensive. While some providers in rural areas have been reluctant to use volunteers to provide transportation, fearing clients will be resistant to riding with volunteers due to confidentiality concerns, this has not been the experience of CARETEAM. In the future, CARETEAM would like to acquire a van and transport clients on a part-time basis to provide transportation to clients.

   Pee Dee Care Consortium—(Counties served: Chesterfield, Darlington, Dillon, Florence, Marion and Marlboro)

   Caseload—410 clients.

   Client Characteristics:
   Male: 65%, Female: 35%.
   African American: 96%.
   Uninsured: 96%.
   Rural: 70%.

   The Pee Dee, an ASO based in Florence, is the consortium’s lead agency and the sole recipient of Title II funds. The agency provides case management services and on-site primary medical care. The agency’s medical clinic is open three days a week and staffed by a general practitioner. The agency will contract with an ID physician in the near future who will be available for consultation.

   The clinic employs three full-time case managers, each with a caseload of approximately one hundred twenty clients. Most of the clients (about 80 percent) come into the medical clinic at least once a month and meet with their case manager at the same time. Case managers contact clients by phone every six weeks. For the majority of clients, medical services are not the top priority. Instead, they are much more concerned with issues of daily living such as access to benefits, housing, food, and job training.

   In the consortium region, access to other community-based services is limited. Lack of transportation can impact access but there are other challenges. For example, the local food bank recently experimented with home-delivered, problem-centered, jeop-
the region, if it had to close, even tempo-
rarily it would have been difficult to ar-

range an alternative source of food for the

agency's clients.

Most clients can find some way to get to

the clinic, via the Rural Transit System, but

this travel can be time consuming and incon-

venient. The agency will help arrange local

transportation and will pay when neces-

sary. The agency would like to either es-

tablish a mobile clinic or find physicians in

the region who would donate office space in

which the agency could hold off-site clinics.

Low Country Care Consortium, Hilton Head—

(By Nancy J. Beaufort, Colleton, Hampton,

and Jasper)

Caseload—190 clients.

Client Characteristics:

Male: 68%, Female: 32%.

African American: 65%, Asian/Pacific Is-

lander: 1%, Hispanic: 5%, White: 29%.

Uninsured: 85%.

Rural: 100%.

ACCESS Network, located in Hilton Head

and Hampton, is the lead agency for the Low

Country Care Consortium, which serves a

county area in the southeastern section of

the state. The service area is about the

size of Delaware and Rhode Island combined

and has a population of about 200,000. The

consortium coordinates the entire service area

to be rural in nature.

ACCESS Network is an ASO providing a

full range of support services. In the service

area, primary care is provided by various

clinics, including Beaufort/Jasper Com-

prehensive Health Services, a Title III-fund-

ed provider, and private physicians. The

Title III provider was first funded in 1998 and

operates five local clinics serving Beaufort,

Hampton and Jasper Counties. This addi-

tional primary care facility allowed the con-

sortium to expand support services with Title

II funds that had been previously used for primary care.

ACCESS Network employs two case man-

agers, each serving a specific geographic area.

One serves approximately 110 clients, the other 65-85. The case managers focus on the

assessment of client needs through face-

to-face interaction. Most meetings with cli-

ents take place off-site, requiring significant

travel on the part of case managers. The

agency utilizes support personnel to carry

out the benefits management process and

complete paper work in order to provide suf-

ficient time for the case managers to meet

with clients. Contact with case managers de-

pends on the severity of the client's needs.

Approximately 20 percent of the caseload re-

quires intensive contact either daily or once

a week. Other clients see their case manager

every 6-9 months.

Case managers link clients with primary

care providers in the service region. There

are no formal linkages between ACCESS

Network and these providers. Primary care

is available from clinics operated by rural

health services, private physicians and non-

profit organizations. Since ACCESS is not formally linked to primary health care

providers, case managers play an important

role in assuring that clients access care. At

times the agency has needed if they already have

a physician that they would like to continue to

see and whether they have a source of

payment. If the client does not have a physi-

cian, the agency-based on geography and

ability to pay. Low-income clients are

treated in various local clinics that provide

services on a free or sliding-scale basis to eli-

gible clients.

Because the physicians in these clinics see

more HIV-infected clients, they often have
greater expertise in the treatment of HIV

than other physicians in the community. Cli-
sents who are not eligible for these clinics

(because of income level or they have private

insurance) may end up seeing local physi-
cians. The experience in treating HIV

patients is not formally linked to primary health care providers and there has been greater co-

ordination between physicians and case man-
ger. Physicians and case managers consult

about the clients' course of treatment and

other factors impacting the client's overall

wellbeing. Case managers also serve as a

treatment advocate for the client.

As in many rural areas, informal linkages

can be very beneficial in obtaining a full

range of medical and support services for cli-

ents. For example, situated next to ACCESS

Network's Hilton Head office is “Volunteers

in Medicine,” a clinic staffed by retired health professionals who provide free health

care. While it was a coincidence that the

clinic opened next door to ACCESS Network,

it has resulted in a close collaboration be-

tween the two agencies and allows case man-
gers to be more much involved in the care

of clients receiving treatment at the “Volun-
tees in Medicine” clinic.

Mr. Speaker, what this report talks about,
it kind of looks in depth at two rural States.

They chose New Mexico because it had a high incidence of mi-

norities and had a lot of rural cities with small towns in those areas

and Hispanics and Indians were in New

Mexico. They chose South Carolina again because of the smallness and the

rural nature of the State and the high

incidence of African Americans. What

they found in both of those cases is that

there are cultural and social challenges in both of those States.

In addition to all the things I talked

about earlier, there is a lack of Federal

dollars; there is a lack of public aware-

ness, inadequate housing and unstable

home environment. There is just a lack of

community understanding, of family

support, that they could not, in fact,

have the kind of support that would en-

able people in the South to get it. Also

there is a lack of transportation serv-

ces, in these areas, a lack of case man-

agement and services and a comprehen-
sive program to respond to AIDS pro-

grams, a lack of services to assist peo-

ple in understanding they need to stay

on their drug treatment and have a man-

agement system in these areas, a lack of

mental counseling or religious counseling in these areas, and a lack of

actually just an appreciation of the disease.

There are issues that indeed affect us

in more ways than we would think. But

my reason in bringing this, Mr. Speak-
er, is to have my colleagues to recog-
nize that AIDS is an issue that is affec-
ting the South and is going unno-
ticed. It is a silent disease killing peo-

ple and we can't ignore the perception that we have had. We need to un-
derstand the fact. We really need to

look and to see what we can do to curb and certainly the whole issue of sexu-

ally transmitted disease and it being a

predictor for the likelihood of getting

HIV, that ought to be addressed. Only

28 counties in more than 3,000 counties

in the country really have any signifi-
cant cases of sexually transmitted dis-
ease, and in North Carolina we cer-
tainly have it. There is a relationship.

We can fight that. We can fight that

only by education and awareness.

The final article I wanted to ref-

cence is indeed the impact it is having

on women. Again, one of the major

issues is the disease among white gay

men. That could not be further from the

truth. As I have said, although men constitute more than fe-

male, but the rate at which the growth

is going is happening much faster, as I

said earlier, again this is North Caro-

olina. And in North Carolina although 68

percent are male, roughly 32 percent

are female, that rate is growing faster

now for females than for males. And

the rate is growing faster for African

American females than it is for non-Af-

rican American females. This article is

from the New York Times. Again, Mr.

Speaker, I include the article for the

RECORD.

[From the New York Times, July 3, 2001]

AIDS EPIDEMIC TAKES TOLL ON BLACK WOMEN

By Kevin Sack

GREENWOOD, Miss.—Here is the rural

South, the image of AIDS today looks very

much like Tyeste W. Roney.

Not a gay white man. Not a crack-addicted

patient. But a 20-year-old black woman

with a gold stud in her nose, an orange ban-
danna covering her braids, and her nick-

name, Easha, tattooed on one leg.

Ms. Roney had known for years that she could contract

H.I.V. by having unprotected sex. Her moth-

er had been telling her so since Ms. Roney

was 13, when she lost her virginity. But ei-

ther the lesson did not stick, or Ms. Roney

did not have the power to negotiate safer sex

with older lovers. She says that many of the

men she can count as partners did not use

condoms.

In February, after enduring 10 days of

bleeding, Ms. Roney went to a health clinic.

First a nurse surprised her by telling her

that she had been pregnant and had miscarried. Then the nurse asked Ms. Roney

if she knew she was carrying the virus that

causes AIDS.

““I said, ‘Get out of here, that can’t be so,’” she

recalled. “I just broke down and cried. I

thought I wasn’t going to be here any-

more. Maybe a month.”

It is a scene that has become all too famil-

iar for poor black women here in the Mis-

sissippi Delta and across the rural south.

Even as the AIDS epidemic has subsided else-

where in the United States, it has taken firm

root among women in places like Greenwood.

And in North Carolina although 68

percent are male, roughly 32 percent

are female, that rate is growing faster

now for females than for males. And

the rate is growing faster for African

American females than it is for non-Af-

rican American females. This article is

from the New York Times. Again, Mr.

Speaker, I include the article for the

RECORD.

Sex is also sometimes exchanged for drugs, particularly crack cocaine, though this seems less common in larger towns in the southern part of the state.

Sharyn Janes, a professor of nursing at the University of Southern Mississippi, said she heard stories while conducting interviews with people at high risk of infection. One man, she said, told her that she once drove a woman out of town when she refused his demand for sex after he gave her crack. He told her that "nobody gets a free ride" and left her to walk home, Ms. Janes said.

TRACING SEXUAL NETWORKS

Because of the breadth and casualness of sexual networks here, an infection can be virtually impossible to track and control.

In the first half of 1999, for instance, health officials found that a biological cousin to 30 positive men in Greenwood who had had sex with 18 women over a three-year period. Two of the women had sex with both men. Five were infected with the virus, and they in turn had had sex with 24 other men.

A study of the cluster by the C.D.C. found that half of those interviewed had a history of other sexually transmitted diseases, that some of the H.I.V.-infected women were as young as 15, and that the median age of the infected women was 15, compared with 25 for the infected men.

"The teenager's concept is that this guy is older so he's going to know what he's doing and he'll take care of me," said Dr. Shannon L. Hader, a Centers for Disease Control researcher who studied the Greenwood cluster. "The reality is that older men have had more partners and are therefore more likely to have S.T.D.'s."

Clearly, Dr. Hader said, messages about prevention are not getting through. The rural South is politically conservative, and prevention programs in the schools tend to be episodic and focused on abstinence. Parents in the rural Greenwood community must grant written permission before their children can be taught about condoms. Many local pastors are also reluctant to encourage explicit discussions about sex.

Dr. Hader also found a lack of knowledge about H.I.V. treatment. Five of the seven infected members of the Greenwood cluster had no idea that those with H.I.V. could now live for long periods with the help of antiretroviral drugs. That misconception has made it difficult to get patients into care, where they could also receive information about not spreading the virus.

Those who do seek care have few options. Before Dr. Brimah opened his clinic here, AIDS patients had to travel more than two hours to Jackson or Memphis, a trip that many could not make. Sandra Moore, a 32-year-old Greenwood woman who first learned that she was infected with H.I.V. in 1996, would sometimes drive as far as New Orleans for treatment. Ms. Moore had withered to 60 pounds when she first visited Dr. Brimah, and was seemingly on the verge of death. Now, with medication, she has increased her weight to 105 pounds and talks of living to see her four young children graduate from high school.

The problem is also prohibitive for many here. The pills typically prescribed by Dr. Brimah can cost up to $1,200 a month.
OUTRAGEOUSLY HIGH DRUG PRICES

The SPEAKER pro tempore (Mr. REHBERG). Under the Speaker’s announced policy of January 3, 2001, the gentleman from Minnesota (Mr. GUTENNECHT) is recognized for 60 minutes.

Mr. GUTENNECHT. Mr. Speaker, I will later be adding some items to the RECORD.

Mr. Speaker, I rise tonight to talk about an issue that in some respects is a dirty little secret. Yet more and more of us in Washington and more and more seniors around the country know about this dirty little secret. It is about the outrageously high prices that Americans pay for prescription drugs.

Now, I think most Americans are appreciative to the pharmaceutical industry for the miracles they have created over the last number of years. We are all delighted that we have drugs today to treat conditions which just a few years ago were untreatable. We are not unappreciative to what the pharmaceutical industry has done. But the dirty little secret is that the Americans are paying the lion’s share, in fact, I might even argue that the Americans are paying the entire share of the research and development costs for these miracle drugs for all the other consumers around the rest of the world.

Several years ago, I talked to some seniors back in Minnesota and they talked to me about going to Canada to buy prescription drugs. But they told me that when they came back after they had their little vials of whatever drug it was, whether it was Claritin or Coumadin or Glucophage or whatever the drug would be, when they would try to reorder that drug from the pharmacy up in Winnipeg or wherever they had bought the drugs in from Canada, when they tried to reorder the drugs and when the drug came into the United States, they were stopped by the FDA. The FDA then sent a very threatening letter to those seniors saying that if they tried to do this again that, in effect, they could be prosecuted.

Now, if one was a 78-year-old grandmother getting a letter from the Food and Drug Administration in effect saying that she could be prosecuted, that what she is doing is illegal and if she tries to do this again, there are serious consequences, that is a very threatening thing to happen to a senior.

Now, they told me this story. They told me what was happening in their trips, their bus trips to Canada. I have to be very honest. It really did not register with me. In fact, it was not until almost 2 years later when a seemingly unrelated event occurred.

What happened was hog prices to our hog producers, to our farmers in Minnesota, the prices collapsed. In fact, they reached Depression-era prices. Hogs dropped to $6 per hundred weight. Now, to put this in perspective, the hog producers are selling for about $69 to $70 per hundred weight. So now hogs are profitable again. But we had a tremendous collapse in the price of hogs.

Now, to make matters worse there was a packing plant up in Canada that was supposed to come on line. There was some construction delays. For whatever reason the plant was delayed in being brought online. The net result was there were thousands of Canadian hogs, at perhaps the worst time in the history of hog production in the United States, thousands of hogs were coming across and making a disaster even worse.

Not surprisingly many of our hog producers complained about all of these Canadian hogs coming into our markets. Those of us who represent those districts we brought those complaints and concerns to some of the Federal officials in Washington. The answer we got was relatively short and simple. “Well, that is NAFTA, the North American Free Trade Agreement. That is what free trade is all about. You support free trade, do you not, Congressman GUTENNECHT?” I had to say, “Yes, I do.”

It was then that the light bulb really went on. Because I said if we are going to have free trade in terms of pork bellies, we ought to have free trade in terms of Prilosec.

I began to do some research. I feel sometimes like that little boy who came in and asked his mother a question. His mother was busy, and she said, “Why do you not go ask your father?” And the little boy said, “Well, I do not want to know that much about it.”

I began to do some research. I feel sometimes like that little boy who sometimes become the more I have learned about this prescription drug issue, the more angry I become.

There is really something wrong with a system that says that American consumers on average pay $69.99 for a month’s supply of Allegra 120 while our friends in Europe can buy the same drug for $20.88.

If you look at this list, this is not a complete list, in fact, this is not even my list. These numbers were compiled by a group who have been studying this issue for more years certainly than I have, a group called the Life Extension Foundation, Mr. (recently) Mr. (recently) they sent us a listing. They had done a study between the United States and Europe, and here are some of the numbers.

I hope people will look at this. Let us look at commonly prescribed drugs for senior seniors. I know it is commonly prescribed because my 82-year-old father takes Coumadin. He is fortunate. He worked for a union employer all of his life. He has a pretty generous prescription drug benefit in his insurance package; and as a result, he does not pay the full price. But if he did, and millions of American seniors do pay full price for Coumadin, the average price in the United States for a month’s supply of Coumadin is $377.47. That exact same drug in Europe sells for an average of $8.22.

Let us look at Glucophage. That is a drug that is taken principally by diabetics. If you are a diabetic in the United States and you are on Glucophage, you are probably going to be on it for the rest of your life. A 30-day supply here in the United States sells for an average of $30.12. That exact same drug made in the same Pfizer facility in Europe sells for only $4.11.

Let me say that again. The price in the United States, $30.12. The exact same drug in Europe sells for $4.11.

Mr. Speaker, this is indefensible. This is unsustainable. There is no one here in this body, there is no public policy maker in America, that can defend this chart. What is worse, the pharmaceutical industry cannot defend this chart. We have had representatives of what we call PHRMA into our office. We have showed them this chart and said please explain this chart.

These are multinational companies. Many of them are based in Europe. Many of the big pharmaceutical companies now are based in Geneva or London or Paris. How is it that you are willing to sell these drugs so much cheaper in European Union countries than you are here in the United States? Now the interesting thing is they do most of the research here in the United States and we are paying half of this. We want the research to remain here in the United States. But the dirty little secret is, we subsidize the starving Swiss.

CONGRESSIONAL RECORD—HOUSE July 10, 2001
July 10, 2001

CONGRESSIONAL RECORD—HOUSE

I am saying with the simple amendment that I intend to offer tomorrow. There is only time to notice the playing field. I do not believe in price controls. I do not believe in more government regulations. I think in the long run both price controls and government regulations are the wrong way to go at that. Just do a brief study of the former Soviet Union, because for over 70 years there is an experiment that failed. They tried to set prices. They tried to control markets. Mr. Speaker, markets are more powerful than armies. What the Soviet Union proved more than anything else is that you cannot hold back markets. We are in the Information Age, Mr. Speaker, and these kinds of numbers, these huge differences between what Americans pay and what Europeans pay for exactly the same drugs, that system could only survive before the Information Age. Now people can get on their computer, they can go online and find this information, and they can find out that in Switzerland they are able to buy Baxin for half the price that we pay in the United States. Once Americans realize this, because information is power, once Americans realize the huge differences that they pay for the same drugs, they are not going to stand for it. They are going to start marching on this Congress and they are going to demand that we do something.

In fact, how many times do we hear at some of our town hall meetings, Congress needs to do something? Well, I am going to go back to the point I made earlier. I do not support price controls, and the truth is some of the countries in the European Union have price controls. I think it is a bad idea, and I do not want to join them. But some of the countries in the European Union do not have price controls. Switzerland does not have price controls. Germany does not have price controls. A German can go in and buy drugs in Switzerland or a German can go in and buy drugs in France or in any other country. The European Union allows free markets within that area.

It is interesting, because just a few years ago we passed the North American Free Trade Agreement and some pork bellies can go across the borders, and fruits and vegetables can go across the borders and lumber can go across the border. There is nothing to stop one of my constituents from going to Winnipeg, Manitoba and buying a Chevrolet. As a matter of fact, I do not think there is anything that will stop that consumer from going online and on the Web and ordering almost any product they want from Winnipeg, Manitoba; or Paris, France; or Rome; or Frankfurt, Germany; or anywhere else. There is only one product which we for some reason have singled out and said American consumers do not have access to world market prices, and those are pharmaceuticals.

Now I am not here tonight to beat up on the pharmaceutical industry. As I said earlier in the discussion, I am appreciative that the pharmaceutical industry has done. Almost every one of us has a relative, a neighbor, a parent, a child, that has benefited from the research that the pharmaceutical industry has done.

Before I yield to my friend, the good doctor, the gentleman from Des Moines, Iowa (Mr. GANSKE), I want to talk about the three ways that we as Americans subsidize the pharmaceutical industry, because this is not largely understood. The truth of the matter is, we subsidize the pharmaceutical industry in three different ways. First of all, we subsidize them through the Tax Code. What the pharmaceutical industry is saying today is we take your investment tax credit for research and most of it is done here in the United States. I said earlier in my discussion I am delighted that they do the research here in the United States. The numbers that we have, the latest numbers that the pharmaceutical industry in the last year that we have numbers for spent about $12 billion here in the United States on research, and that is good.

What they do not say is that on the tax forms, most of these corporations are so profitable that they are at the 50 percent tax bracket, that at least half of that gets written off on their Federal income tax form. More of that gets written off on their State income tax form. Now what they are also eligible in some circumstances for is an investment tax credit. So we subsidize the pharmaceutical industry and the research that they do through the Tax Code.

Secondly, this year we will spend close to $14 billion through the NIH and other various government agencies, including the Defense Department, on basic research, most of which is available to the pharmaceutical industry free of charge. In other words, we are putting all this money into NIH and through NIST and other science agencies, also through the Department of Defense, and most of that information, once a discovery is found, is made available to the public and to the pharmaceutical industry for free. So there is about $14 billion worth of public research that is paid for by the American taxpayers. That is the second way we subsidize the research that they do.

The final way that we subsidize them is in the prices that we pay. These are outrageous. These are indefensible. Again, I am not here to really beat up on the pharmaceutical industry, because they are only doing what any industry does, which is work in terms of exploiting a market opportunity that we have given them. We give them a 17-year patent in which they can sell these drugs in the United States and really no one can compete against them. In other words, we give them a monopoly and on balance I think this system to avoid where we are exploiting this market opportunity. No, it is not "shame on the pharmaceutical industry for creating this kind of an environment." It is shame on us. It is shame on our own FDA for allowing this system to avoid where we are free to choose. Americans are paying for all of the research and most of the profits of the large pharmaceutical companies, many of which are not even based here in the United States.

I am delighted to have joining us today one of the physicians who serves here in the House, the gentleman from Des Moines, Iowa (Mr. GANSKE), a former wrestler and Iowa Hawkeye, a good friend, and one who is not afraid to take on giants. I have to tell the gentleman, I reread the story from the Book of Samuel to my son David and it was a powerful story. And sometimes when I think about the huge pharmaceutical industry and the simple little amendment, I feel like David, who went out on to that field, and he took from his sack a small stone, and he slung it at Goliath, and that is sort of where we are with this small amendment.

But I want to welcome the gentleman from Iowa (Mr. GANSKE), who is one, as I say, who we do not always agree, but, I will tell you, I have always admired and respected, and we are delighted to have the gentleman here tonight to talk a little bit about pharmaceuticals.

I will yield to the gentleman.

Mr. GANSKE. I thank the gentleman from Minnesota and would like to enter into a colloquy with him.

I think the gentleman is pointing out an important difference in the price in the United States for some of those drugs and the price in Europe. Now, correct me if I am wrong, but most of those European countries do not have price controls; is that correct? Some do, some do not.

Mr. GUTKNECHT. Some do, some do not. We do not want to get into a debate, because, in truth, I do not support price controls. I think the best way to break the backs of price controls is to have open markets, because once the pharmaceutical industry and European countries realize that American consumers are going to be buying from them at their prices, I think it is going to force the European Union and the pharmaceutical industry to come to a better agreement so we level the playing field. That is really what I am trying to say.

Yes, some have price controls, some do not. Every country has a slightly different regimen in how they deal with monopolies.

Mr. GANSKE. But it is a fair statement that the prices are significantly
lower for the very same prescription drugs that are made in the United States that are sent overseas, that they are significantly lower, some times half as much or even a quarter as much, in some countries, as they are in the United States. Is that not a fair statement?

Mr. GUTKNECHT. That is absolutely correct. As I say, these are not my numbers. This was an Independent Life Extension Foundation study done just recently between the United States and countries in the European Union.

Let me put out, and the gentleman is more familiar with some of these drugs than I am, that Glucophage, which is a drug that I understand that once many diabetes patients take, they take it daily, in fact I guess they have given them a new patent now. Instead of a twice-a-day tablet, there is a once-a-day tablet, which gives them an extra 17 years on their patent.

We are talking about seven times more, so if a patient who is going to have to take that perhaps for the next 30 years, you start multiplying that difference, we are talking about thousands and thousands and thousands of dollars, multiplied by, I do not remember the exact number, but something like 35 percent of all Medicare expenditures are in one way or another related to diabetes-related illnesses.

I believe the amendment we are talking about ultimately, when fully implemented, when consumers have access and understand how it works, could save American consumers $30 billion a year.

Mr. GANSKE. I want to just pin this down. The gentleman would say it is fair to say that there are many countries in the world where the prices are significantly less than they are in the United States; even though the drugs are exactly the same, they are made in the United States, they are shipped overseas, where they do not have price controls in those countries, but that the price is set by what the market will bear. Would the gentleman say that is a correct statement?

Mr. GUTKNECHT. That is a correct statement based on all of the evidence and research that I have received from independent agencies. That is correct. In fact, we even have an independent study of Canada, where they do have price controls, but they are not as firm as some people think. But a study done by the Canadian Government suggests that they are saving Canadian consumers hundreds of millions of dollars.

Mr. GANSKE. Now, the difference, the reason that we have these very high prices in United States, as versus, say, Switzerland, is because we cannot reimport those drugs from Switzerland into the United States because we have a Federal law that prevents that from happening. Is that the correct story?

Mr. GUTKNECHT. There again, the FDA holds that, yes, we have that law. Now, last year in Congress we passed legislation by overwhelming votes, it was something like 376 to 25 here in the House, 88 to 1 in the Senate, essentially going on record that we want to make it clear that law-abiding citizens should not be prevented from bringing legal drugs back into the United States, especially for personal use, like the law, in my opinion, today is not clear.

What we want to do with the amendment that I intend to offer tomorrow is clarify the legislative intent so there is no misunderstanding between the pharmaceutical industry, the FDA and American consumers that law-abiding citizens who have a legal prescription from a physician do have the right, using mail order, using the Web, using other methods, the telephone, they can order a medication made in England or Ireland and be able to order that drug and have it brought back in the United States, so long, again, as it is a legal, non-narcotic drug. That is the amendment I intend to offer. That, I believe, will ultimately level the playing field between the prices that Americans pay and what consumers in other countries pay, regardless of whether or not they have price controls.

Mr. GANSKE. That would mean, for instance, that a citizen in Minnesota could cross the border into Canada with a prescription and get it filled there, or a citizen in Texas or Arizona or New Mexico could cross the border and get a prescription filled there, and that would not be illegal. They could bring that back into the United States. That is the gist of the gentleman’s amendment; is that correct?

Mr. GUTKNECHT. That is correct.

Mr. GANSKE. Okay. Now, then, we had hearings in my committee, the Committee on Commerce, talking about how there are some counterfeit drugs that get into the market. These hearings primarily focused on some very expensive drugs, like growth hormones, that are used for body building and other types of uses and sometimes can cost as much as $2,000 a vial. It has been reported in the press that some of that medicine is not real, that there has been adulteration or false packaging.

Now, my understanding is that this has happened within the United States. Is that the gentleman’s understanding?

Mr. GUTKNECHT. Absolutely. The counterfeit drugs that some of these people are talking, or adulterated drugs, first of all, I want to make it clear, my amendment does not make them legal. We are only talking about drugs that are otherwise legal in the United States, where people have a legitimate prescription from a doctor. But in my opinion, it is that, you are quite right, sir. Where this really happens, is when people travel.

For example, let me give you a story from one of the ladies at one of my town hall meetings. She has a skin condition, I think called eczema or psoriasis, but, anyway, she has a skin condition and had a dermatologist in Rochester, Minnesota, has prescribed a particular ointment only available with a prescription, and in Minnesota it sells for about $310 for one tube. She was traveling in Ireland a couple of years ago and began to run out of this cream. She went to a pharmacy in Ireland, she had her prescription with her, she went into the local pharmacy, took her prescription, they had exactly the same drug, in exactly the same tube, made by exactly the same company, and it was $30.

Now, when she got back to the United States, she said to herself, because she needs about a tube of this every month, at $310 in the United States, as versus, $30 in Ireland, a savings of $280 a year to this one individual.

She looked at the tube, and on the tube or on the box that it came in, it had the name of the pharmacy, and it had the telephone number. So what she did was a lot of American consumers would do to save $1,200 a year. She picked up the phone, made a $2 phone call to Ireland and said, could I get that prescription refilled? The pharmacist over there said, absolutely. So she ordered it from a retailer in the United States and had it shipped to her home, is there?

Mr. GUTKNECHT. No. In fact, if the FDA wants to test it, and frankly, I want the FDA to enforce laws against illegal drugs. But can I just show the gentleman another chart, because I think it talks to this very point.

The problem with the FDA is not that they do not have the power to inspect; it is that they spend all of their time chasing legal drugs and law-abiding citizens. They are focusing on the wrong end.

Last year, for example, instead of stopping illegal drugs imported by illegals, they detained 18 times more packages coming in from Canada than from Mexico.

We do not have a problem with Canada. We know a lot about the pharmacies in Canada. They have strong and stringent regulations in Canada. Does the FDA detain 90 times more packages from Canada? This was last year. Last year the FDA detained 90 times more packages from Canada than from Mexico.
They are chasing law-abiding citizens bringing legal drugs in. What they need to do is focus on the traffic that the gentleman is talking about. We know you have adulterated drugs, where you have got illegal drugs, where you have got all kinds of mischief going on, which, incidentally, the gentleman and I both know that as long as we try to play by the rules that the FDA has set in place now, you are going to get more of. Because more and more consumers who cannot afford some of these very expensive drugs, as we talked about before the gentleman arrived, Zithromax 500, $486 in the United States, $76 in Europe, what you are going to do is get more and more law-abiding citizens trying to figure out, how can I get those drugs, either legally or illegally, in the United States? Because the truth of the matter is that a drug somebody cannot afford is neither safe nor effective.

Mr. GANSKE. So let me get this straight. What the gentleman would like is he would like the FDA to have enhanced to the point that not only drugs coming into the United States from other countries are checked to make sure they are valid, but also to make sure that shipments that originate within the United States are not adulterated and are real drugs, too. And I believe at the bottom of the gentleman’s other thought, the gentleman points out that we appropriated additional millions of dollars for border enforcement last year.

Mr. GUTKNECHT. And the FDA refused to use it, and that is why we need this amendment this year, is to clarify what we said last year, stop chasing law-abiding citizens with legal drugs and legal prescriptions. Let me suggest this: I do not know how many of our colleagues have gotten a package recently from UPS or Federal Express, I believe even the Post Office does it now, but they put a bar code on those packages. The truth of the matter is I believe that within a matter of months, if the FDA was serious about this and did not want to pursue law-abiding American citizens who are trying to save a few bucks on their prescription drugs, they could create a bar coding technology to know where that package came from, when it was shipped, and, frankly, they could even put what is in it.

In fact, we now have the technology, and it is used in most hospitals, the software was developed in Minneapolis, Minnesota, I can put them in touch with the people that developed it, in virtually every hospital now, when you go in the hospital, they put a bar-coded bracelet around your arm, and when they dispense prescription drugs in the hospital they bring them in, they take the wand across your brace-let and a wand across the bar code on the package so that they know, they can literally go back to their computer and know that at 3:10 p.m. this afternoon, you were given two tablets of Tylenol, or whatever the drug happened to be.

That kind of technology is not science fiction. This is available today. And if the FDA is serious about this, we can help them solve the problem.

The real issue is do I not think the FDA wants to solve the problem. They continue to commingle illegal drugs with legal drugs, and they continue to pursue the law-abiding citizens bringing in legal drugs, and yet there are literally millions of dollars of illegal drugs not only coming in from outside the United States, but, as the gentleman suggested, they are originating in the United States, and little or nothing is being done about that.

Mr. GANSKE. Mr. Speaker, I think this is a very, very important point; and I hope that some of our colleagues are in their offices working tonight, and this is a presentation, because for sure, when the gentleman’s amendment comes up, we are going to hear tomorrow all kinds of horror stories about how an adulterated drug or a fake substance could be imported from the United States so the patient would not be getting the medication that they need, or even worse. But the real point is that that can happen within the United States just as easily, and that what we really want is what we want the FDA to do its job, both on drugs that would come back into this country, but also on drugs that would be moving within this country, from one State to another State.

It is easy to think, if we have a drug that could cost $2,000 a vial, that we could create some labels in New York, put some substance into that vial, and ship it over to California and have a big scam operation going on. I mean, that is happening within the United States.

But what the gentleman is talking about for the vast majority of our senior citizens or others who need medications are not that that vial of growth hormone that costs $2,000, but the difference in, if the gentleman would put the other chart up with some of the examples of the prices, let us take, for example, Coumadin. That is a blood thinner. In the United States, it is going to cost $37 for a 30-day supply; in Europe it will cost $8.22. It does not make sense for organized crime to get involved with changing labels for a drug of that price range when it is going to an individual.

Now, if we are talking about wholesale, larger shipments, then I think it is a legitimate concern; but it is also one that I would answer just like we did last year, by appropriating more money for the FDA to step up its surveillance and make sure that it does not happen. But I will tell the gentleman something. If we take that drug that costs $500, the Zithromax, $486 for a 30-day supply, we can have just as big a concern within the United States as from anything coming from overseas.

So I believe that these issues are being mixed up in an effort to basically defeat what I see as a free market approach to helping bring drug prices down in the United States. We have very high prices here because there is protection for the high prices here when we cannot introduce competition with lower-priced drugs, the same drugs from overseas. If we would allow our constituents to be able to order that drug from Pharmaworld in Geneva, Switzerland, at half the price, we know what would happen here. We know that the competition would drive the prices down at our pharmacies in this country too.

Mr. GUTKNECHT. Mr. Speaker, as I said earlier, markets work.

Mr. GANSKE. Or, for example, some-one’s local pharmacist would be able to order that drug from the overseas supplier at the lower price and would be able to pass those savings on to the consumer. That is why this idea passed the House of Representatives with 350-plus votes just a year or so ago. But I believe, then, that the opponents to that legislation brought forward this issue of the fact that there are fake drugs that are occasionally found and then used that to try to knock down the whole idea of increased competition from overseas.

Really, the solution is simply, both within the United States and from drugs that could come in from abroad, making sure that the FDA does its job. This is part of a bill that I introduced on prescription drugs. The other main concern, the main concern of that bill is that for low-income seniors, we would allow them to utilize the State Medicaid drug programs up to 175 percent of poverty and get a Medicaid card and be able to go to their local pharmacist; and I believe that there is a way to work with the pharmaceutical houses on that issue and avoid a national drug pricing mechanism. That is a little different issue, but the idea that the gentleman from Minnesota (Mr. GUTKNECHT) has, I think, is a legitimate one, and it basically is a free market approach that just makes the market a little bigger. It makes it more global than a protectionist policy that stops at our borders that prevents the very same drugs made in the United States, made in New Jersey and shipped overseas as versus consumed here, the very same drugs, from coming back in at a somewhat less price.

So tomorrow, when we debate this, we will probably not have that much time. It will probably be a time-limited amendment. There have been a lot of opponents that have been putting newspaper ads into newspapers around the country or even running television
and radio ads on this issue; but I will tell the gentleman, I have a lot of constituents back home in Des Moines, Iowa, who, when they go down to Texas for the winter, they take their prescriptions, they go across, they look at the labels, they see it is made in the United States, the same drug, they bring it back for half price. The gentleman’s amendment tomorrow would allow them to continue to do that. I think that it would be somewhat difficult for many Members of this House to switch their vote from supporting that idea last year to voting against it this year.

I yield back to the gentleman from Minnesota.

Mr. GUTKNECHT. Mr. Speaker, I agree with the gentleman. I think Members understand this issue, and it really is a choice between are you going to stand with your seniors who are having a difficult time affording their prescription drugs, or are you going to defend the FDA bureau and the pharmaceutical industry. I think that really is the vote. At some point, if they vote, particularly if they change their vote this year, they are going to have to explain this chart to their constituents. They are going to have to explain why they should have to pay $30.12 for Glucophage in the United States when their European friends can buy it for $4.11.

Let me talk briefly, if I can, about the whole issue of safety because frankly, that is an area where our opponents have really focused in and there have been a lot of scare tactics, as the gentleman mentioned, running newspaper ads and radio ads and television. But the interesting thing is at least in my area, my seniors are a whole lot smarter than those ads, because most of the calls that are coming in are saying absolutely, this is the right thing to go. They understand that price difference. They understand safety. They understand that they are willing to take a slight risk. The most important thing is when they go down to the local pharmacy, they might get the wrong medication. It might get in the wrong bottle. There is always some element of risk.

Out there in New York Harbor, it is called the Statue of Liberty, but it is not called the Statue of Security. We always take some risk. I cannot say that my amendment is risk-free, but as the gentleman indicated, the system today is not risk-free. But here is the interesting thing. In all of the advertising, they do not mention any people who have been injured by bringing legal drugs into the United States with a prescription. Not one. There is no known study that demonstrates that public health has been injured by patients importing legal medications with a prescription under the order of their doctor.

What is more, millions of Americans have no prescription drug coverage. And as I said earlier, a drug that one cannot afford is neither safe nor effective. That is when people start cutting up the tablets to start, and they start looking back to street vendors or people who may be selling adulterated drugs. Let us just talk about safety, because when we mention the FDA, we talk about drugs and medical devices and so forth, but we forget that part of the reason this amendment is in order to the agriculture appropriations bill is because it is the Food and Drug Administration. They get their money through the agriculture appropriation bill.

I asked my staff a few weeks ago, I said, now, wait a second. We import literally hundreds of thousands of pounds of raw meat every day. We import millions of pounds of fruits and vegetables. There must be some that people get sick, because I remember a couple of years ago, there were some kids who had gotten sick, about 200 kids who got sick from eating strawberries imported from Mexico. Maybe the gentleman remembers the story; but somehow, that some pathogen had gotten on the strawberries and they got sick. Well, what did the FDA do about that? The truth is, almost nothing.

Mr. GANSKE. Mr. Speaker, if the gentleman would yield, in that situation, what Congress responsibly does is it provides the resources to the USDA to do those inspections at the border. That is why, for instance, we have increased our funding for making sure that Foot and Mouth Disease does not get into the United States. That is why last year we appropriated $23 million extra dollars for the FDA to do its appropriate job with monitoring to make sure that drug shipments that will come back in are the real thing.

But still, let us get back to this point, and that is that one can go down to the local pharmacy, they have their medicine from somewhere in California or New Jersey or Florida. What is their level of confidence? Their level of confidence is that we have an FDA that monitors that every so often. But every so often, once in a while, very rarely, especially with this particularly very, very high-priced drugs, they have found that there have been some fraudulent drug. They are doing their job when they find that. And they will do their job if Congress appropriates the appropriate amount of money to monitor any medicines coming back into the country from Switzerland or Germany or Ireland or Canada. I mean, it is not a problem that cannot be solved.

Mr. Speaker, I would tell the gentleman, the savings to the individual that we are talking about is the difference between, as the gentleman has already said, is the difference between many times their having the drug at all for their heart failure or for their high blood pressure or for other serious conditions. There is no question. We would not be dealing with the issue of high cost of prescription drugs in this country. It would not be a major issue of such a big issue in the last presidential campaign if this were not a real problem.

So I commend my colleague from Minnesota for talking about this. I look forward to the debate tomorrow on this amendment. I do think that the gentleman’s amendment is well thought out because, correct me on this, but there is nothing in the gentleman’s amendment that would prevent any funding for the FDA to do its job; is that correct?

Mr. GUTKNECHT. No, it just simply says you cannot use the money to pursue law-abiding citizens who have a legal prescription.

Mr. GANSKE. But there is no de-coupling the funding overall for the FDA’s surveillance.

Mr. GUTKNECHT. No. We have made it clear to the FDA, as we did last year, you tell us what you need to do this job, and we will see that you get the funding. They asked for $23 million. We appropriated $23 million. Then after we had appropriated the $23 million and literally let them write the language, they reneged on the deal. So this year, in effect we are saying, and we really mean it.

Now, in conference committee I am willing to work with them to get this done.

Mr. Speaker, I do want to come back briefly, and I know the gentleman has to go; but I want to come back to the safety issue. There is another secret that the FDA does not want to talk about, and I started to mention how many tons of raw meat and fruits and vegetables come into the United States. There has been concern about pathogens and what they can cause. The gentleman is right. We import many, many tons of raw meat and fruits and vegetables every day. We import 322,000 pounds of pork. We import 1.6 million metric tons of beef into the United States. We import 320,000 pounds of pork. We imported from Mexico a grand total of 3.1 million metric tons of fruits and...
vegetables from Mexico. We imported from South America over $72 million worth of fruits and vegetables from South America.

Now, we import a lot of food into this country every single day. Here are the numbers. According to their study, the total percentage of food that was contaminated with either salmonella, shigella, and I am probably not saying that right, or E. Coli, the total percentage of that sample that they took was 4.4 percent.

Now, we know people get sick every single day in the United States. I have had food poisoning twice in my life. We know there are thousands of people who get sick from food poisoning, from salmonella. We know that is serious. What is the FDA doing to inspect every single piece of produce, every pork belly, every piece of beef that comes into the United States?

Do Members know what they are doing? It would not be fair to say nothing, but it would be almost fair. Almost nothing is done.

I just want to make one last point, and it is this. What the FDA is doing in terms of prescription drugs is they are going to build a wall about a mile high. Yet, when it comes to food that we eat every day, of which, by their own study, 4.4 percent is contaminated with salmonella and other dangerous pathogens, there is almost no inspection, almost none. It comes right across the border.

If we are going to say we have to be absolutely certain of every single package of pharmaceuticals, then by golly, should we not say the same for fruits, for vegetables, for pork bellies? That is all I am saying. I am willing to work with them, and with new technology I think we can have a system that will be far safer than it is today, but they do not want to work with us.

Mr. GANSKE. Continuing the gentleman's analogy, Mr. Speaker, what the gentleman is saying is that there is not anyone in this House who is going to propose that we cut off all imports of beef or vegetables or fruits that come into the United States. Nobody is proposing that. If there is a problem related to pathogens in meat or in some of those vegetables, that is why we have the USDA. That is why we have an inspection process. That is why we appropriate a certain amount of money.

If there is a problem, then we will appropriate more funds for the inspection to make sure that our food and vegetables coming into the United States are safe. But as the gentleman has pointed out on prescription drugs, there is no known scientific study demonstrating a threat of injury to patients importing medications with a prescription from Americanized countries.

When we went to the Food and Drug Administration last year, we said, "If there is an increase in the flow of reimported drugs, what do you think you need to do to adequately inspect those to make sure there is not a problem?" They told us, and we appropriated that. We can continue under this amendment. The real question is, do we allow some competition to help lower the cost of prescription drugs. I think it will be a very interesting vote here on the floor tomorrow on this amendment, because I think that the opponents to last year's legislation have seized upon a red herring. They have seized upon the fact that even within the United States there have been a few examples of exceptionally high-priced drugs where there has been fraud. Then they say, "Well, see, if there have been a few cases here in the United States, that could happen from drugs imported from abroad."

I think my response and the gentleman's is that that would be that is even more reason why we adequately fund the FDA, but it can happen in the United States just the same as it could happen on a reimported drug. That is not a reason per se to argue against reimportation.

Mr. GUTKNECHT. Mr. Speaker, here is another chart that basically says we have to do something to bring our prices into line. Last year the average senior in the United States, well, seniors in the United States get a cost of living adjustment in Social Security of 3-1/2 percent. Total expenditures on pharmaceuticals went up 19 percent. We cannot continue this. This will eat us out of house and home. This kind of thing, this is what is causing consumers to look at ways that they can save some money.

This chart, as I say, when our colleagues vote tomorrow, and I have prepared this and I will make this available to any Member who wants to mail it to those in their district explaining. A, the problem, the chart, the differentials, and it also answers the four most commonly asked questions or arguments against this simple little amendment. Anybody who wants a copy can get a copy of the amendment. It is a very simple amendment.

Mr. GANSKE. Mr. Speaker, I wonder if the gentleman would mind reading that amendment.

Mr. GUTKNECHT. I would be happy to. It is now in the CONGRESSIONAL RECORD, "Amendment to H.R. 2330 as reported offered by Mr. GUTKNECHT of Minnesota."

"At the end of Title VII, insert after the last section preceding any short title the following section, section 7: None of the amounts made available in this act to the Food and Drug Administration may be used under Section 801 of the Food and Drug and Cosmetic Act to prevent an individual who is not in the possession of an FDA-approved prescription drug within the meaning of Section 801(g), and I am not a lawyer, but we had three very smart ones help write this, "of such act from importing a prescription drug that, 1, appears to be FDA approved; 2, does not appear to be a controlled substance; and we do not refer to the title under this amendment, we are not talking about any controlled substances or narcotics, "or, number 3, and appears to be manufactured, prepared, propagated, compounded, or processed in an establishment registered pursuant to section 503 of such act."

In other words, it has to be made in an FDA-approved plant. It has to be sold through FDA-approved channels. It has to be sold with a legal prescription.

Again, simply put, this says the FDA cannot spend its resources chasing law-abiding citizens who are bringing in legal drugs with a legal prescription. That is all we are saying in this amendment. We are not talking about bulk reimportation.

Mr. GANSKE. If the gentleman will yield further, Mr. Speaker, there is nothing in the gentleman's amendment that reduces the amount of funding to the FDA.

Mr. GUTKNECHT. No. It just says they cannot spend the money chasing law-abiding citizens. Go after the people who really are the problem.

More importantly, I would love to see the FDA do a better job of policing the fruits and vegetables, and the pork bellies and all the beef and raw meat that come into this country every day. I do not want to scare people, but that was a scary number to me. Does it not bother the gentleman that 4.4 percent of the samples that they tested had either salmonella, shigella, or other dangerous pathogens present on the product? That bothers me.

The gentleman has a pretty good solution to some of this. It is electronic pasteurization. That is the term I like to use. Frankly, I think we need to move down that path. But this is the scary thing. If the gentleman has ever had food poisoning, in some respects I think it is far more dangerous than people trying to save a few bucks on coumadin by buying it through a pharmacy in Winnipeg, Manitoba.

Mr. GANSKE. If the gentleman will yield further, Mr. Speaker, speaking from personal experience, I have had a life-threatening experience with food poisoning, which became a case of encephalitis. It is a scary thing. I believe that the USDA is doing a pretty good job on its inspection of meat and vegetables, fruit. I would certainly be in favor of additional funding for that, and I am in favor of additional funding to help the FDA monitor the validity of drugs in this country, as well as that that would be imported or reimported.

I just want to commend my colleagues, the gentleman from Minnesota, for bringing this important issue to the attention of our colleagues.

Mr. GUTKNECHT. I thank the gentleman from Iowa (Mr. GANSKE) for
coming down to visit with us tonight. This is a very important issue.

Ultimately, one has to open up the markets and allow American consumers to have access to prescription drugs at world market prices. I believe that this simple little amendment, once fully implemented, could save American consumers $30 billion. I may be wrong; it may be $28 billion, it may be $31 billion, but even here in Washington, that is a lot of money. If one is a consumer that needs a drug, like that lady with that ointment, and one can save $1,200 a year buying the same drug that comes from the same manufacturer from the same FDA-approved facility simply by picking up a phone and making a $2 phone call to Ireland, I do not think we as public policymakers should stand idly by and allow that taxpayer to pay for and ultimately American consumers, and particularly American senior consumers, we should not and cannot stand idly by and allow our own FDA to stand between those people and lower prescription drug prices.

I just want to close with a few other points. Some say a Medicare drug benefit will eliminate the need for importation and open markets. Mr. Speaker, if we think about that argument for even a moment, we will realize that simply shifting high drug prices to the government only transfers these huge pharmaceutical bills to the American taxpayers.

Moreover, Medicare coverage will not help the millions of Americans who currently have no prescription drug benefit. So simply shifting the burden of $300 billion, or whatever the number we ultimately come up with, and I support expanding the Medicare program. In fact, I think the gentleman from Iowa (Mr. GANSKE) has the best program in doing it through the Medicaid systems that every State already has in place.

But it is not an answer to just create a new entitlement funded by the Federal Government. If we do not get control of prices of prescription drugs, if we continue to allow what really amounts to unregulated monopolies, where American consumers, through the Tax Code, through the research dollars, paid for the drug, ultimately through the prices that they pay for, if we stand idly by and say, well, I guess American consumers have to pay for all of the research of all the governments and all the other people of the rest of the world, then shame on us. Shame on us. We have an opportunity tomorrow to set the record straight.

We do not necessarily want price controls in the United States. We do not want a huge bureaucracy and more regulations. But we do want to have access to markets.

In a couple of weeks, we are going to have another great debate about free trade. The President of the United States, I have supported giving the President what they call a fast track trading authority. Now I think we have a somewhat different name, advanced trade authority or trade promotion authority. There is some other term for it.

Basically, I support giving the President more latitude to negotiate trade agreements. I support that idea. I support free markets.

However, Mr. Speaker, I support free markets when it comes to American consumers, too. We cannot just have free markets when it benefits large corporations, we have to have free markets when they benefit consumers, too. This idea that we are going to stand idly by and allow American consumers to pay three, four, five, six, seven times more for the same prescription drugs in the Information Age, as they say back home, that dog will not hunt.

I do not know if we are going to win this debate tomorrow on the amendment or not. I do not know what is going to happen. We have given every good argument. We have talked about free trade, about safety, about prices, about how we can help American consumers.

I do not know whether we are going to win this amendment tomorrow, but we are going to fight a good fight. We are saying to the administration, it is time for them to decide, are they going to stand on the side of the big pharmaceutical industries? Are they going to defend an FDA bureaucracy which cannot even protect American consumers all that well from food-borne pathogens? Or are they going to stand with American consumers, stand with seniors?

I will say this, if the FDA decides that they want to take Grandma to court for trying to save an extra $35 on a three-month supply of coumadin, some of the people in this room are going to be there on the courthouse steps to meet them.

This is an important issue. It amounts to billions of dollars. It is the right thing to do. It is good policy, and ultimately, it means good things for American consumers.

Frankly, I think in the long light of history it will be good for the pharmaceutical industry, because it will force the Europeans to rethink their pricing structures. It will level the playing field. That is what we want to do, and we hope tomorrow, with the support of the Members of this Congress, we are going to get that done and send a clear message to the world that we stand with American consumers, we stand with free markets.

It is time for us to say the subsidization of the starving Swiss must end.
CONGRESSIONAL RECORD—HOUSE
JUNE 26, 2001

OATH OF OFFICE MEMBERS, RESIDENT COMMISSIONER, AND DELEGATES
The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1884 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

I, AB, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.

Honorable J. RANDY FORBES, 4th Virginia.

EXECUTIVE COMMUNICATIONS, ETC.
Under clause 8 of rule XII, executive communications were taken from the Speaker’s table and referred as follows:

2743. A letter from the Acting Administrator, Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting the report of the agency’s final rule—Cranberry Marketing Order [Docket Nos. FV01–929–2 FR and FV00–929–7 FR] received July 2, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

2744. A communication from the President of the United States, transmitting the District of Columbia Fiscal Year 2002 Budget Request Act and Fiscal Year 2001 Supplemental Budget Request, pursuant to Public Law 105–33 section 11701(a)(1) (111 Stat. 780; H. Doc. No. 107–94); to the Committee on Appropriations.

2745. A letter from the Secretary, Department of Defense, transmitting a letter on the approved retirement of Lieutenant General James C. King, United States Army, and his advancement to the grade of lieutenant general on the retired list; to the Committee on Armed Services.

2746. A letter from the Secretary, Department of Defense, transmitting a letter on the approved retirement of Lieutenant General Donald L. Peterson, United States Air Force, and his advancement to the grade of lieutenant general on the retired list; to the Committee on Armed Services.

2747. A letter from the Secretary, Department of Defense, transmitting the Department’s revisions to both the Fiscal Year (FY) 2001 and FY 02 Annual Materials Plan (AMP); to the Committee on Armed Services.

2748. A letter from the Secretary, Department of Defense, transmitting the Department’s review of policy on payment of claims; to the Committee on Armed Services.

2749. A letter from the Assistant General Counsel, Department of the Treasury, transmitting the Department’s final rule—Resolution Funding Corporation Operations (RIN: 1505–AA79) received June 5, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2750. A letter from the Assistant General Counsel, for Regulations, Department of Housing and Urban Development, transmitting the Department’s final rule—Mortgage Insurance Premiums in Multifamily Housing Programs [Docket No. FR–4679–1–01] (RIN: 2502–AH84) received July 3, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2751. A letter from the Acting Deputy Assistant Secretary for Congressional and Intergovernmental Relations, Department of Housing and Urban Development, transmitting the Federal Housing Administration’s (FHA) Annual Management Report for Fiscal Year 2001, pursuant to 5 U.S.C. 1505–AH64; to the Committee on Financial Services.

2752. A letter from the Chairwoman, Federal Deposit Insurance Corporation, transmitting a copy of the Corporation’s Annual Report for calendar year 2000, pursuant to 12 U.S.C. 1827(d); to the Committee on Financial Services.

2757. A letter from the Director, Office of Management and Budget, transmitting a report on the Cost Estimate For Pay-As-You-Go Federal Reform Proposals; to the Committee on the Budget.

2758. A letter from the Deputy Assistant Secretary for Policy, Planning and Innovation, Department of Education, transmitting Final Regulations—Federal Family Education Loan Program and William D. Ford Federal Direct Loan Program, pursuant to 5 U.S.C. 1232(f); to the Committee on Education and the Workforce.

2759. A letter from the Deputy Director, National Institute on Disability and Rehabilitation Research, Department of Education, transmitting Final Priorities—Improving Vocational Rehabilitation Services for Individuals who are Blind or have Severe Visual Impairments and on Improving Vocational Rehabilitation Services for Individuals Who Are Deaf or Hard of Hearing, pursuant to 20 U.S.C. 1232(f); to the Committee on Education and the Workforce.

2760. A letter from the Deputy Director National Institute on Disability and Rehabilitation Research, Department of Education, transmitting Final Priorities—Strategies for Promoting Information Technology (IT)-based Educational Opportunities for Individuals with Disabilities, Stategies for Promoting Information Technology (IT)-based Employment and Training Opportunities for Individuals with Disabilities, and Strategies for Individuals Who Are Blind, pursuant to 20 U.S.C. 1232(f); to the Committee on Education and the Workforce.

2761. A letter from the Acting Assistant General Counsel for Regulations, Department of Education, transmitting the Department’s final rule—American Indian and Alaska Native Education Research Grant Program—received June 22, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Education and the Workforce.

2762. A letter from the Acting Assistant General Counsel for Regulations, Department of Education, transmitting the Department’s final rule—School Finance Accountability and Uniformity Program—received June 22, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Education and the Workforce.

2764. A letter from the Secretary, Department of Commerce, transmitting the third annual report mandated by the International Anti-Bribery and Fair Competition Act of 1998; to the Committee on Energy and Commerce.

2765. A letter from the Secretary, Department of Commerce, transmitting the Department’s report on the effectiveness of delivery of electronic mail as compared with the delivery of written records via the U.S Postal Service and private express mail services, pursuant to section 105(a) of the Electronic Signatures in Global and National Commerce Act of 2000; to the Committee on Energy and Commerce.

2766. A letter from the Regulations Coordinator, Department of Health and Human Services, transmitting the Department’s
transmitting the Department's final rule—Delegations, Grants, Cooperative Agreements, and Related Fund Management (RIN: 1512–AC19) received July 2, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

2009. A letter from the Chief, Regulations Unit, Internal Revenue Service, transmitting the Service's final rule—Notional Principal Contracts—received July 3, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

2010. A letter from the Chief, Regulations Unit, Internal Revenue Service, transmitting the Service's final rule—Notional Principal Contracts—received June 26, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

2012. A letter from the Assistant Secretary, Department of Defense, transmitting notification that the proposed plan for the U.S. Army Communications—Electronics Command, and related National Security Agency Engineering Community (RDEC), have been approved under authority of the National Defense Authorization Acts for Fiscal Years 1995 and 2000; jointly to the Committee on Armed Services and Government Reform.

2013. A letter from the Board Members, Railroad Retirement Board, transmitting the 2001 annual report on the financial status of the railroad unemployment insurance system, pursuant to 45 U.S.C. 369; jointly to the Committees on Ways and Means and Transportation and Infrastructure.

2014. A letter from the Secretary, Department of Health and Human Services, transmitting a draft bill entitled, “Medicare Contraction Reform Amendments of 2001”; jointly to the Committees on Ways and Means and Energy and Commerce.

2016. A letter from the General Counsel, Department of Defense, transmitting a draft of proposed legislation to authorize appropriations for fiscal year 2002 for military activities of the Department of Defense, to prescribe military pay and allowances for fiscal year 2001, and for other purposes; jointly to the Committees on Armed Services, International Relations, Energy and Commerce, Education and the Workforce, Veterans' Affairs, the Judiciary, Transportation and Infrastructure, Resources, Government Reform, the Budget, and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HANSEN: Committee on Resources. H.R. 271. A bill to direct the Secretary of the Interior to convey a former Bureau of Land Management administrative site to the city of Carson City, Nevada, for use as a senior center (Rept. 107–122). Referred to the Committee of the Whole House on the State of the Union.

Mr. HANSEN: Committee on Resources. H.R. 698. A bill to establish the Oil Region Authority Acts for Fiscal Years 1995 and 1996 approved under authority of the National Defense Authorization Act for Fiscal Year 1995 and 2000; jointly to the Committee on Armed Services and Government Reform.

Mr. RABON: Committee on Transportation and Infrastructure. H.R. 2356. Referral to the Committees on Energy and Commerce and the Judiciary discharged from further consideration. H.R. 2356 referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

TIME LIMITATION OF REFERRED BILL

Pursuant to clause 2 of rule XII, the following action was taken by the Speaker:

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

[Submitted July 10, 2001]

By Mr. TOM DAVIS of Virginia (for himself, Mr. MORAN of Virginia, Mr. DUKAS, and Mr. SESSIONS): H.R. 2435. A bill to encourage the secure disclosure and protected exchange of information about cyber security problems, solutions, test practices and test results, and related matters in connection with critical infrastructure protection; referred to the Committee on Government Reform, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HANSEN (for himself, Mr. YOUNG, Mr. TAYLOR of Texas, Ms. CUBIN, Mr. THORNBERRY, Mr. OTTER, and Mr. CALVETT): H.R. 2436. A bill to provide secure energy supplies for the United States, and for other purposes; referred to the Committee on Resources, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. SMITH of Ohio: H.R. 2437. A bill to deem hospitals in Hillsdale County, Michigan, as being located in the Kalamazo-Battle Creek, Michigan, Metropolitan Statistical Area for purposes of reimbursement under the Medicare Program; to the Committee on Ways and Means.

By Mr. BOEHLERT: H.R. 2438. A bill to elevate the Environmental Protection Agency to Cabinet-level status and redesignate such agency as the Department of Environmental Protection; to the Committee on Government Reform.

By Mr. ROSS (for himself, Mr. BERRY, Mr. PICKERING, Mr. THOMPSON of Mississippi, Mr. SHOWS, Mr. FORD, Mr. SMITH of Arkansas, Mr. SMITH of Mississippi, Mr. THOMPSON of California, Mr. TURNER, and Ms. HARMAN): H.R. 2439. A bill to amend the Agricultural Marketing Act of 1946 to require retailers of farm-raised fish inform consumers, at the final point of sale to consumers, of the country of origin of the commodities; to the Committee on Agriculture.

By Mr. TOM DAVIS of Virginia: H.R. 2440. A bill to rename Wolf Trap Farm Park as ‘‘Wolf Trap National Park for the Performing Arts’’, and for other purposes; to the Committee on Resources.

By Mr. BAKER: H.R. 2441. A bill to amend the Public Health Service Act to redesignate a facility as the National Hansen’s Disease Programs Center, and for other purposes; to the Committee on Science.

By Mr. GRUCCI: H.R. 2442. A bill to provide veterans benefits to certain individuals who serve in the United States Armed Forces during a period of war; to the Committee on Veterans’ Affairs.

By Mr. LAMPSON: H.R. 2443. A bill to promote the development of the United States space tourism industry, and for other purposes; referred to the Committee on Science, and in addition to the Committee on Government Reform, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MYRICK: H.R. 2444. A bill to suspend temporarily the duty on 9,19-Anthrachinone,1,8-di-hydroxy-4-[4-(2-hydroxyethyl)phenoxy]lamo]-5-nitro-; to the Committee on Ways and Means.

By Mr. MYRICK: H.R. 2446. A bill to suspend temporarily the duty on Benzene-sulfonic acid, 2,2,2-tris(1-ethyl-1,2-ethanediyl)bis(4-fluoro-1,3,5-triazine-4,2-diyl)iminato[2-(aminocarbonylamino)-1-phenoxy]azo]bis[5-(4-sulfophenyl)azo]-, sodium salt; to the Committee on Ways and Means.

By Mr. MYRICK: H.R. 2447. A bill to suspend temporarily the duty on a mixture of 2-Naphthalenesulfonic acid, dimethylaminoethyl chloride, dimethylaminoethyl sulfonate, and dimethylaminoethyl sulfonamide; to the Committee on Ways and Means.

By Mr. MYRICK: H.R. 2448. A bill to suspend temporarily the duty on 6-amino-4-hydroxy-5-[2-(hydroxy-kappa.O)-4-nitrophenyl]azo-o-kappa.N1]-N-methyl-2-naphthalenesulfonamidato(2-)[6-(aminokappa.N1)-5-naphthalenesulfonato(3-)-], disodium; to the Committee on Ways and Means.

By Mr. MYRICK: H.R. 2449. A bill to suspend temporarily the duty on 4-

By Mr. GRUCCI: H.R. 2450. A bill to elevate the Environmental Protection Agency to Cabinet-level status and redesignate such agency as the Department of Environmental Protection; to the Committee on Government Reform.

By Mr. TOM DAVIS of Virginia (for himself, Mr. MORAN of Virginia, Mr. DUKAS, and Mr. SESSIONS): H.R. 2451. A bill to require recreational facilities to report information concerning deaths and certain injuries and illnesses to the Secretary of Health and Human Services, for the purposes of increasing delivery of public safety officers; to the Committee on Resources.

By Mr. SHAWS (for himself, Mrs. LOWEY, Mr. ROTHMAN, Mr. LIPINSKI, and Mr. PASCRELL): H.R. 2451. A bill to authorize grants for the construction of memorials to honor men and women of the United States who were killed or disabled while serving as law enforcement or public safety officers; to the Committee on Resources.

By Mr. SHAYS (for himself, Mrs. LOWEY, Mr. ROTHMAN, Mr. LIPINSKI, and Mr. PASCRELL): H.R. 2451. A bill to authorize grants for the construction of memorials to honor men and women of the United States who were killed or disabled while serving as law enforcement or public safety officers; to the Committee on Resources.

By Mr. SIMMONS (for himself and Mr. NEAL of Massachusetts): H.R. 2452. A bill to amend the Quinebaug and Shetucket Rivers Valley National Heritage Corridor Act of 1994 to provide for implementation of the management plan for the Quinebaug and Shetucket Rivers Valley National Heritage Corridor to the Committee on Resources.

By Mr. UPTON (for himself, Mr. MORAN of Virginia, Mr. GREENWOOD, Mr. ROEMER, Mr. PICKERING, Mrs. ROUKEMA, and Mr. ROHABECH): H.R. 2453. A bill to amend the Foreign Assistance Act of 1961 to improve injection safety in intravenous or other disease control programs administered under that Act; to the Committee on International Relations.

By Ms. WATSON: H.R. 2454. A bill to redesignate the facility of the United States Post Service located at 5472 Crenshaw Boulevard in Los Angeles, California, as the ‘‘Congressman Julian C. Dixon Post Office Building’’; to the Committee on Government Reform.

By Mr. TOM DAVIS of Virginia (for himself, Mr. GRUCCI, Mr. MORELLA, Mr. SCHAPPER, Mr. McCOVY, Mr. PETERSON of Minnesota, and Mr. MORAN of Virginia): H. Con. Res. 181. A concurrent resolution expressing the sense of Congress regarding the United States Congressional Philharmonic Society and its mission of promoting musical excellence throughout the educational system and encouraging people of all ages to commit to the love and expression of musical performance; to the Committee on Education and the Workforce.

By Mr. DELAY (for himself, Mr. HALL of Ohio, Mr. LEWIS of Georgia, Mr. WOLF, Mr. BIGGERT, Mr. SOUDER, Mr. TURNER, Mr. SHOWS, Mr. PITTS, Mr. PETERSON of Minnesota, Mr. HOSTETTLER, Mr. TANCREDO, Mr. McINTYRE, and Mr. PICKERING): H. Con. Res. 184. A concurrent resolution providing for a National Day of Reconciliation; to the Committee on House Administration.

MEMORIALS

Under clause 3 of rule XII, memorials were presented and referred as follows:

123. The SPEAKER presented a memorial of the House of Representatives of the State of Illinois, relative to House Resolution No. 466 memorializing the United States Congress to pass legislation reforming the Federal Freedom to Farm law and the sugar support program to correct the inequities; to the Committee on Agriculture.

124. Also, a memorial of the House of Representatives of the Commonwealth of Pennsylvania, relative to House Resolution No. 11 memorializing the United States Congress to call for a repudiation of the agreement reached last year to allow the Navy to resume firing training on the island of Vieques; to the Committee on Armed Services.

125. Also, a memorial of the Legislature of the State of Louisiana, relative to House Resolution No. 140 memorializing the United States Congress to study the feasibility of insurance coverage for loss, damage, or diminution in value to property caused by drought; to the Committee on Financial Services.

126. Also, a memorial of the House of Representatives of the Commonwealth of Pennsylvania, relative to House Resolution No. 214 memorializing the United States Congress to fully fund its obligations under the
CONGRESSIONAL RECORD—HOUSE
July 10, 2001
12767

Individuals with Disabilities Education Act; to the Committee on Education and the Workforce.

127. Also, a memorial of the House of Represent-atives of the State of Illinois, relative to House Resolution No. 366 memorializing the United States Congress to support ethanol and biodiesel as included as part of any lasting energy policy; to the Committee on Energy and Commerce.

128. Also, a memorial of the House of Rep-representatives of the State of Illinois, relative to House Resolution No. 468 memorializing the United States Congress and the Environmental Protection Agency to increase Illinois' nitrogen oxide emission allowances budget; to the Committee on Energy and Commerce.

129. Also, a memorial of the Senate of the Commonwealth of Pennsylvania, relative to Senate Resolution No. 92 memorializing the United States Congress to offer condolences to the people of the State of Israel and especially to the families of those victims who suffered losses in the terrorist attack on June 30, in Tel Aviv; Strongly condemn that attack and any use of terrorism in order to achieve political gains or for any other reason; and, Reaffirm the desire of the people of the United States to assist the parties in their efforts to achieve a full and lasting peace; to the Committee on International Relations.

130. Also, a memorial of the Senate of the State of Louisiana, relative to Senate Resolution No. 76 memorializing the United States Congress to direct the Minerals Management Service of the United States Department of the Interior to develop a plan for impact mitigation relative to the Outer Continental Shelf oil and gas lease sales in the Gulf of Mexico; to the Committee on Resources.

131. Also, a memorial of the Senate of the State of Louisiana, relative to Senate Resolution No. 50 memorializing the United States Congress to express its desire to the National Marine Fisheries Service that the pending charter boat moratorium in the Gulf of Mexico not be implemented; to the Committee on Resources.

132. Also, a memorial of the House of Represent-atives of the Commonwealth of Penn-sylvania, relative to House Resolution No. 230 memorializing the United States Congress to make the $1.5 billion of Federal moneys already earmarked for abandoned mine land reclamation available to states to clean up and make safe abandoned mine lands; to the Committee on Resources.

133. Also, a memorial of the Legislature of the State of Louisiana, relative to House Concurrent Resolution No. 95 memorializing the United States Congress to ratify the Southern Dairy Compact; to the Committee on the Judiciary.

134. Also, a memorial of the Senate of the State of Louisiana, relative to Senate Resolution No. 75 memorializing the United States Congress to repeal mandatory minimum sentences; to the Committee on the Judiciary.

135. Also, a memorial of the House of Rep-representatives of the State of Illinois, relative to House Resolution No. 370 memorializing the United States Congress to support re-form of our Federal immigration laws to allow working immigrants in the Illinois to work towards becoming citizens through a legalization program; to the Committee on the Judiciary.

136. Also, a memorial of the House of Rep-representatives of the State of Illinois, relative to House Resolution No. 340 memorializing the United States Congress to initiate an in-vestigation of possible collusion among petroleum companies resulting in rapid unex-plained price increases in motor fuel throughout the Midwest; to the Committee on the Judiciary.

137. Also, a memorial of the Legislature of the State of Louisiana, relative to House Concurrent Resolution No. 86 memorializing the United States Congress to support, with additional funding, the expeditious implementation of the proposed Maurepas Swamp diversion from the Mississippi River; to the Committee on Transportation and Infrastructure.

138. Also, a memorial of the Legislature of the State of Louisiana, relative to House Concurrent Resolution No. 24 memorializing the United States Congress to urge the United States Army Corps of Engineers to replace the proposed St. Claude Avenue Bridge and the Claiborne Avenue Bridge in Orleans Parish with tunnels or fixed high-rise bridges in conjunction with a project to replace the Inner Harbor Navigation Canal lock; to the Committee on Transportation and Infrastructure.

139. Also, a memorial of the House of Rep-representatives of the State of Michigan, relative to House Resolution No. 36 memorializing the United States Congress to enact legislation to provide for government-fur-nished markers for the graves of all veterans to the Committee on Veterans’ Affairs.

140. Also, a memorial of the House of Represent-atives of the State of Michigan, relative to House Concurrent Resolution No. 23 memorializing the United States Congress to take certain actions to increase efforts to halt the illegal dumping of foreign steel in this country; to the Committee on Ways and Means.

141. Also, a memorial of the House of Represent-atives of the Commonwealth of Penn-sylvania, relative to House Resolution No. 228 memorializing the United States Con-gress to fully fund and deploy as soon as technologically possible an effective, afford-able global missile defense system, including a sea-based system except theater and long-range missiles, space-based sensors and ground-based interceptors and radar; to pro-tect all Americans, United States troops sta-tioned overseas, and our nation’s allies from ballistic missile attack; jointly to the Com-mittees on Armed Services and International Relations.

142. Also, a memorial of the Legislature of the State of Maine, relative to Joint Resolu-tion No. 651 memorializing the United States Congress to support significant reforms to our nation’s voting system; jointly to the Committees on House Administration and the Judiciary.

143. Also, a memorial of the Legislature of the State of Maine, relative to House Concurrent Resolution No. 167 memorializing the United States Congress to fully fund the Estuary Restoration Act of 2000; jointly to the Committees on Transportation and Infrastructure and Resources.

144. Also, a memorial of the House of Rep-representatives of the State of Missouri, relative to House Concurrent Resolution No. 14 memorializing the United States Congress to support the Railroad Retirement and Survivors Improvement Act introduced in the 107th Congress; jointly to the Committees on Transportation and Infrastructure and Ways and Means.

145. Also, a memorial of the Senate of the State of Missouri, relative to Senate Concur-rent Resolution No. 10 memorializing the United States Congress to support the Rail-way Retirement and Survivors Improvement Act introduced in the 107th Congress; jointly to the Committees on Transportation and Infrastructure and Ways and Means.

146. Also, a memorial of the House of Rep-representatives of the State of Michigan, relative to House Resolution No. 197 memorializing the United States Congress to enact the Steel Revitalization Act of 2001; jointly to the Committees on Financial Services, Education and the Workforce, and Ways and Means.

147. Also, a memorial of the Legislature of the State of Louisiana, relative to House Concurrent Resolution No. 129 memorializing the United States Congress to fully imple-ment the Gulf Hypoxia Action Plan in co-operation with the Gulf of Mexico/Mis-issippi River Watershed Nutrient Task Force; jointly to the Committees on Science, Resources, and Transportation and Infra-structure.

PRIVATE BILLS AND RESOLUTIONS

Under clause 3 of rule XII, Mr. QUINN introduced a bill (H.R. 2455) to authorize the Secretary of Transportation to convey the vessel U.S.S. SPHINX to the Dunkirk Historical Lighthouse and Veterans Park Museum for use as a military museum; referred to the Committee on Armed Services.

ADDITIONAL SPONSORS

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 2330

OFFERED BY: MR. SMITH OF MICHIGAN

Amendment No. 30: Add before the short title at the end the following new section: Sinc... None of the funds appropriated or otherwise made available in this Act may be used to pay the salaries of personnel of the Department of Agriculture who permit the payment limitation specified in section 1001(2) of the Food Security Act of 1985 (7 U.S.C. 1308(e)(2)) to be exceeded in any manner.

H.R. 2360

OFFERED BY: MR. ROEMER

Amendment No. 1: Insert after title III the following:

H.R. 2360

OFFERED BY: MR. ROEMER
of subparagraph (A) during a period in which the candidate may accept such a contribution; and

(III) the limits under subsection (d) with respect to any expenditure by a State or national committee of a political party shall not apply.

(D) OPPOSITION PERSONAL FUNDS AMOUNT.—The opposition personal funds amount is an amount equal to the excess (if any) of—

(i) the greatest aggregate amount of expenditures from personal funds (as defined in section 304(a)(6)(B)) that an opposing candidate in the same election makes; over

(ii) the aggregate amount of expenditures from personal funds made by the candidate with respect to the election.

(2) TIME TO ACCEPT CONTRIBUTIONS UNDER INCREASED LIMIT.—

(A) IN GENERAL.—Subject to subparagraph (B), a candidate and the candidate’s authorized committee shall not accept any contribution, and a party committee shall not make any expenditure, under the increased limit under paragraph (1)—

(i) until the candidate has received notification of the opposition personal funds amount under section 304(a)(6)(B); and

(ii) to the extent that such contribution, when added to the aggregate amount of contributions previously accepted and party expenditures previously made under the increased limits under this subsection for the election cycle, exceeds 110 percent of the opposition personal funds amount.

(B) EFFECT OF WITHDRAWAL OF AN OPPONING CANDIDATE.—A candidate and a candidate’s authorized committee shall not accept any contribution and a party shall not make any expenditure under the increased limit after the date on which an opposing candidate ceases to be a candidate to the extent that the amount of such increased limit is attributable to such an opposing candidate.

(3) DISPOSAL OF EXCESS CONTRIBUTIONS.—

(A) IN GENERAL.—The aggregate amount of contributions accepted by a candidate or a candidate’s authorized committee under the increased limit under paragraph (1) and not otherwise expended in connection with the election which such contributions relate shall, not later than 50 days after the date of such election, be used in the manner described in subparagraph (B).

(B) CONTRACTS.—A candidate or a candidate’s authorized committee shall return the excess contribution to the person who made the contribution.

(I) LIMITATION ON REPAYMENT OF PERSONAL LOANS.—Any candidate who incurs personal loans made after the date of enactment of the Bipartisan Campaign Reform Act of 2001 in connection with the candidate’s campaign for election shall not repay (directly or indirectly), to the extent such loans exceed $10,000, such loans from any contributions made to such candidate or any authorized committee of such candidate after the date of such election.

(b) NOTIFICATION OF EXPENDITURES FROM PERSONAL FUNDS.—Section 304(a)(6) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431) is amended—

(1) by redesignating subparagraph (B) as subparagraph (E); and

(2) by inserting after subparagraph (A) the following:

(20) ELECTION CYCLE.—The term election cycle means the period beginning on the day after the date of the most recent election for the specific office or seat that a candidate is seeking and ending on the date of the next election for that office or seat. For purposes of the preceding sentence, a primary election and a general election shall be considered to be separate elections.

(21) PERSONAL FUNDS.—The term personal funds means an amount that is derived from—

(A) any asset that, under applicable State law, at the time the individual became a candidate, the candidate had legal right of access to or control over, and with respect to which the candidate had—

(i) legal and rightful title; or

(ii) an equitable interest;

(B) income received during the current election cycle of the candidate, including—

(i) a salary and other earned income from bona fide employment;

(ii) dividends and proceeds from the sale of the candidate’s stocks or other investments;

(iii) requests to the candidate;

(iv) income from trusts established before the beginning of the election cycle;

(v) income from trusts established by or under the control of the election cycle of which the candidate is the beneficiary;

(vi) gifts of a personal nature that had been customarily received by the candidate prior to the beginning of the election cycle; and

(vii) proceeds from lotteries and similar legal games of chance; and

(C) a portion of assets that are jointly owned by the candidate and the candidate’s spouse equal to the candidate’s share of the asset under the instrument of conveyance or ownership, but if no specific share is indicated by an instrument of conveyance or ownership, the value of ½ of the property.

OBSERVED BY: Mr. ROEMER

AMENDMENT No. 2: Insert after title III the following:

TITLE IV.—REQUIRING CANDIDATES USING CORPORATE AIRCRAFT TO REIMBURSE CORPORATION AT CHARTER RATE

SEC. 401. REQUIRING CANDIDATES USING CORPORATE AIRCRAFT TO REIMBURSE CORPORATION OR UNION AT CHARTER RATE.

Section 316 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441b) is amended by adding at the end the following new subsection:

(1) No candidate, agent of a candidate, or person traveling on behalf of a candidate may use an airplane which is owned or leased by a corporation for travel in connection with a Federal election unless the candidate, agent, or person in advance reimburses the corporation an amount equal to the usual charter rate for such use.

(2) Paragraph (1) shall not apply with respect to the use of an airplane which is owned or leased by a corporation which is licensed to offer commercial services for travel.
The Senate met at 10 a.m. and was called to order by the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Gracious Father, almighty Sovereign of our beloved Nation, and loving Lord of our lives, our hearts overflow with gratitude. Thank You for the privilege of living in this land You have blessed so bountifully. You have called this Nation to be a demonstration of the freedom and opportunity, righteousness and justice You desire for all nations. Help us to be faithful to our destiny. May our response be spelled out in dedicated service.

Dear God, empower the women and men of this Senate as they seek Your vision and wisdom for the problems we face as a nation. Proverbs reminds us that “When the righteous are in power, the people rejoice.” We rejoice in the Senators in both parties who seek to be right with You so they will know what is right for our Nation. You have told us, “Righteousness exalts a nation.”—Proverbs 14:34.

Lord, we live in times that challenge faith in You. As a nation, secularity often replaces spirituality and humanistic materialism substitutes for humble mindedness. Bless the Senators as they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership. Grant them wisdom, grant them courage, for they give dynamic leadership.

The Honorable E. BENJAMIN NELSON led the Pledge of Allegiance, as follows: I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

PLEDGE OF ALLEGIANCE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE
PRESIDENT PRO TEMPORE
Washington, DC, July 10, 2001
To the Senate:
Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska, to perform the duties of the Chair.
ROBERT C. BYRD, President pro tempore.

Mr. NELSON of Nebraska thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

SUPPLEMENTAL APPROPRIATIONS ACT, 2001

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1077, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1077) making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

Pending:

Reid (for Schumacher) amendment No. 862, to rescind $250,000 for the printing and postage costs of the notices to be sent by the Internal Revenue Service before and after the tax rebate, such amount to remain available for debt reduction.

Reid (for Feingold) amendment No. 863, to increase the amount provided to combat HIV/AIDS, malaria, and tuberculosis, and to offset that increase by rescinding amounts appropriated to the Navy for the V-22 Osprey aircraft program.

Craig (for Roberts) amendment No. 864, to prohibit the use of funds for reorganizing certain B-1 bomber forces.

Voinovich amendment No. 865, to protect the social security surpluses by preventing on-budget deficits.

Byrd (for Conrad) amendment No. 866 (to amendment No. 865), to establish an off-budget lockbox to strengthen Social Security and Medicare.

Conrad amendment No. 867, to provide funds for emergency housing on the Turtle Mountain Indian Reservation.

Stevens (for McCain) amendment No. 868, to increase amounts appropriated to the Department of Defense.

Stevens (for Hatch) amendment No. 869, to provide additional funds for military personnel, working-capital funds, mission-critical maintenance, force protection, and other purposes by increasing amounts appropriated to the Department of Defense, and to offset the increases by reducing and rescinding certain appropriations.

Stevens (for Craig) amendment No. 870, to provide additional amounts to repair damage caused by ice storms in the States of Arkansas and Oklahoma.

Stevens (for Craig) amendment No. 871, regarding the proportionality of the level of non-military exports purchased by Israel to the amount of United States cash transfer assistance for Israel.

Bond amendment No. 872, to increase amounts appropriated for the Department of Defense.

Reid (for Hollings) amendment No. 873, to increase funding for the Low-Income Home Energy Assistance Program, with an offset.

Reid (for Johnson) amendment No. 875, to amend the Higher Education Act of 1965 to make certain interest rate changes permanent.

AMENDMENTS Nos. 866 AND 865

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be 2 hours of concurrent debate, equally divided, in relation to the lockbox amendments, Nos. 866 and 865. The Senator from Nevada.

Mr. REID. Mr. President, I ask the time I consume not be charged against either Senator CONRAD or Senator VONNOCH.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. REID. First of all, as has been announced, we have now resumed consideration of the supplemental appropriations bill. The majority leader indicated that both Senator STEVENS and Senator BYRD have every intention of finishing this bill today so we can go on to the Interior appropriations bill tomorrow. The majority leader has authorized me to state it is his wish we could complete that legislation sometime on Thursday—Interior appropriations. If we did that, the majority leader said there would be no votes on Friday. So it would be really good if we could do that. It will take a lot of cooperation from everyone.

The majority leader has also asked me to express his appreciation to everyone for the cooperation on the Patients’ Bill of Rights. It was a very contentious issue. Both sides worked, offered very difficult amendments for everyone to consider. It was done. It was done in an expedient way, and we arrived at a conclusion at an earlier time than people expected.

There are 14 amendments today. We have every expectation that some of them will be accepted by the managers of the legislation. Others, perhaps, can be worked out. The two managers of the bill have asked that we work to try to get time agreements on each of the amendments, and we will do that. We hope we can arrive at a situation today where there can be votes at 2:15, as has been announced earlier. We expect, with the cooperation of Senator VONNOCH and Senator CONRAD, that can be done, and we will work toward the end.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. BYRD. Mr. President, I suggest the absence of a quorum. I ask the time be equally charged against both sides.
The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. Mr. President, how much time remains on the Conrad amendment as a result of the quorum call?

Mr. VOINOVICH. Mr. President, one of the primary reasons I wanted to serve as a U.S. Senator was to have an opportunity to bring fiscal responsibility to our Nation and help eliminate the terrible debt with which we will surely burden our children and grandchildren. As my colleagues know, for decades successive Congresses and Presidents spent money on things that, while important, they were unwilling to pay for or do without. In the process, we ran up a staggering debt and mortgaged our future.

Today, our national debt is at $5.6 trillion, which costs us over $200 billion every year in interest payments. From the time I arrived in the Senate, I have been working to rein in spending and lower our national debt. Over the past 2½ years, I have sponsored and cosponsored a number of amendments designed to bring fiscal discipline to the Federal Government.

For instance, in 1999 and 2000, we offered an amendment to use the entire on-budget surplus to pay down the debt. Also, in an effort to bring spending under control, Senator ALLARD and I offered an amendment in June of 2000 to direct $12 billion of the fiscal year 2001 on-budget surplus toward debt reduction. The amendment passed by an overwhelming margin of 95–3 and committed Congress to designate the on-budget surpluses to reduce the national debt, keeping those funds from being used for additional Government spending.

Our amendment provided the mechanism to assure that Congress will begin the serious task of paying down the debt. Further, this past April, Senators Frist, Enzi, and I offered an amendment to the fiscal year 2001 budget resolution designed to tighten the enforcement of existing spending controls. Our amendment created an explicit point of order against directed emergency spending. Given this commitment to fiscal responsibility, the huge spending increases we have seen in the past 2 years have been troubling for me and for a lot of other Members of this body. I am worried that they will lead us back to our deficit spending and debt accumulation.

I was encouraged, however, with the budget that the President sent to us this year. The President’s budget relies equally on the three primary principles. I refer to them as the “three-legged stool.” They are tax cuts, restrained spending, and debt reduction; all three of them fit together. This isn’t just what the President said. It’s what Federal Reserve Chairman Alan Greenspan called for in his groundbreaking testimony before the Senate Budget Committee earlier this year. Chairman Greenspan said that he hoped the recent increases in Federal spending was only an aberration. He went on to say that we needed a tax reduction because surpluses were accumulating so fast that they were overwhelming our ability to repay the national debt without having to pay a premium. This is precisely what the President’s tax cut did.

The President’s proposal to cut taxes was responsible precisely because it was coupled with two other legs of this budgetary stool. Without limits on spending and maximum efforts to pay down the debt, I could not have supported in good conscience the proposed tax cuts.

Ultimately, Congress passed the budget that achieves all three objectives of the three-legged stool. It cuts taxes, restrains spending to a responsible level, and pays down the available publicly held debt over a 10-year period. Little did we know how the tax cut would be needed to jump start the economy and restore consumer confidence. I don’t think we knew that until recently when we saw what has been happening to our economy.

Hopefully, with the tax reduction, lower interest rates, and action by Congress to curb energy costs, we will see an improvement in the economy and a restoration of the public’s confidence in the economy.

We have taken the first step to implement the budget agreement by enacting the President’s proposed tax cuts with a large bipartisan majority. Tax cuts are now law and are a done deal. I know some Members of this body believe that those tax cuts were too much. But the fact is that a majority of us felt they were reasonable and less than what the President asked for.

But our work is not yet finished. We still need to enact legislation to lock in the other two legs of the budgetary stool. I am concerned that we need a restraint on spending and pay down the debt. That is precisely what our amendment does. It is the teeth that ensures that we will pay down the debt and limit spending.

Lockboxing the Social Security surplus is the key to protecting our accomplishments thus far and enforcing our budget agreement.

I want to call your attention to this chart, which basically shows that all during the 1990s we had the deficit, but that deficit would have been much larger than was reported because we used the Social Security surplus to pay for things that Congress was unwilling to pay for or to do without. So as you can see, all the way up until the year 2000, there was no surplus whatsoever. It was only until 2000 that we saw a real on-budget surplus, and it wasn’t until 1998 that we weren’t using the Social Security surplus. The point is that we do not want to return to what we were doing in the past, and that is using the Social Security surplus.

I think that my colleagues can see on this chart, and so can the American taxpayers, that the Social Security surplus, if you can see this, is significant all the way during this next decade. What my amendment would basically do is to make sure that all of this money is used to pay down the debt and to restrain spending by the Members of this Senate.

I have every reason to believe if we don’t pass this amendment, there is a good chance this money will be used to pay for spending.

Mr. President, as you can see, Congress has not been able to resist spending Social Security surplus. An earlier supporter of the Abraham-Domenici Social Security lockbox that was first offered in 1999.

I voted in favor of the lockbox on several occasions. Laying out a thoughtful and well-reasoned budget plan is not enough to guarantee we do not stray back to spending the Social Security surplus. Good intentions are not enough.

Our lockbox strengthens the existing point of order against spending the Social Security surplus. Our lockbox makes it out of order to use the Social Security surplus in any one of the next 10 years, contrasted with the current budget resolution. This is an important improvement.

The existing point of order is written so it is possible to use the Social Security surplus in the future and is not possible to call a point of order. My amendment would prevent that.

My amendment contains an automatic enforcement mechanism. If OMB reports that the Federal Government will spend the Social Security surplus, an automatic across-
the-board sequester will be put in place by OMB, and the size of the sequester will offset the use of the surplus. Is this the ultimate enforcement mechanism? If the Social Security surplus looks as if it will get spent, OMB stops it from happening. This mechanism is our safety valve which will ensure we stay on course to limit spending and pay down our debt.

Spending cuts under my amendment would cut into both discretionary and mandatory spending. Mandatory spending for the most needy in society would not be affected by these cuts. My amendment would exclude Social Security, food stamps, and other programs that are excluded from sequesters under the Deficit Control Act of 1985, and to prevent an inadvertent sequester, my amendment builds in a margin of error. By the time we reach half of 1 percent of outlays. Because it is so hard to calculate the aggregate level of spending from year to year, I think this is a reasonable measure and OMB supports it. It would prevent inadvertent sequesters.

My amendment is straightforward and relies on existing law. I primarily build on existing budget process and mechanisms. We all know Social Security is off budget, and my amendment reinforces that position.

My amendment does not modify any budgetary conventions or pretend Social Security is something that it is not. Everyone knows the Budget Act points of order have their limitations. Someone has to call them, and too often no one does call them.

Take the use of Budget Act points of order against appropriations bills. The appropriations bills that pass early in the session can contain outrageous spending increases and they are immune from the Social Security point of order because they do not threaten the Social Security surplus. It is only when we take up the last appropriations bills that it is obvious that the cumulative effect of our actions might cause a problem.

Until we take up the last appropriations bill, it is pure conjecture as to whether we might spend the Social Security surplus. The use of omnibus appropriations bills makes this all the more problematic. By the time we reach that last appropriations bill around here, it is too late. Large spending increases could have already been done, and we all know how bad Congress wants to get out of town when that last bill rolls around. For this reason, no one is willing to call a point of order that threatens to derail the train or a carefully worked out compromise needed to pass the last appropriations bills.

This is the shortcoming of points of order, and that is why we need an automatic enforcement mechanism to protect the Social Security surplus. The existence of an automatic Social Security sequestration will force Congress to act. I am no fool, however. I know that if Congress want to spend money, it will. With 60 votes, we can do just about anything here, and just as we raise the discretionary spending caps and the debt ceiling, we can vote to undo this mechanism, but it will force Congress to act and put Congress on record as violating the Social Security surplus. People of America should know that is what we are doing. It should not be hidden.

My colleague across the aisle, on the other hand, relies exclusively on points of order to enforce his lockbox which we will be hearing more about and, in my opinion, this is a serious weakness. We in Congress spend and spend. For fiscal year 2001, with strong encouragement of the Clinton administration, my colleagues in Congress increased nondefense discretionary spending by a staggering 14.3 percent. I want everybody to hear that—14.3 percent. If we add 14 percent growth in non-defense discretionary spending, and we increased overall spending by 8 percent. We grew the size of the Federal Government by 8 percent. We spend, and we spend.

As we begin to consider spending for fiscal year 2002, the President presented a modest, responsible budget that called for a 4-percent growth rate. Congress tackled on more spending and passed a bipartisan budget that called for a 4.7-percent increase in Federal spending. We spend.

We then took up an education bill intended to reform schools in an effort to ensure we were properly preparing our children for the 21st century, a goal I wholeheartedly support. Unfortunately, reform in Congress means more spending. We passed an education bill that authorized an incredible 62-percent increase in Federal spending on education—and, we spend.

If I can refer to this chart, my colleagues can see just what has happened to spending in Congress in the last couple of years. The budget caps that were put in place in 1997 in the budget agreement were supposed to cap spending in 1998 at 52.7, in 1999 at 53.3, in 2000 at 53.7, and in 2001 at 54.2. The red line is what we actually spent. Look at this increase. Starting in 1997, we increased spending.

From looking at that, one can see that walling off the Social Security trust fund from spending is something that has to be done. We have proven time and again that we are very good at one thing: spending other people’s money. I remind the President and others that prior to 1999 we were spending that Social Security surplus regularly. This amendment ensures we will not spend that money. It ensures it will go where it belongs: paying down the national debt and providing a firewall against irresponsible spending. We must make sure history does not repeat itself.

If, however, the economic prosperity this Nation has enjoyed recently continues to fade—and I hope it is just a temporary lull—and the President’s pro-
jections are likely to be revised downward and that Social Security surplus will, again, be in the crosshairs. It will be in the crosshairs because Congress’s yearning for spending has not abated, for example, as I mentioned, the 62-per-
cent increase in education. The President now is asking for more money in defense spending.

Given the spending trajectory and the possibility of continued economic softness and that the surplus will not be as large as projected, we could be bumping against the Social Security trust fund. We cannot let that happen. There is a real risk of it happening. We need to rein in the spending and pro-
tect Social Security sequestration will force Congress from happening. We need to lockbox it. Once locked, the Social Security surplus will go to our debt reduction as our budget and the President’s original plan intends and Federal Reserve Chairman Alan Greenspan has recommended.

It is Congress’s irresponsible record of spending that has accumulated the $5.6 trillion in debt that now hangs over our children and our children’s children. Paying off the debt will free up the 11 percent of the Federal budget which currently goes to debt service so we can focus on other needs such as Social Security reform.

There is what at first appears to be an alternative to my amendment, and that is the amendment offered by my colleague from North Dakota, the chairman of the Budget Committee. Unfortunately, I do not think it measures up to the amendment I have offered. I would like to take a moment to explain the second amendment of my colleague from North Dakota.

Its enforcement measure, in my opinion, is not as tough as mine. Therefore, my colleague’s measure can easily be dodged by a Congress under pressure to spend more or which simply lacks the same commitment to debt reduction and spending restraint we have shown in our budget resolution.

The Senate’s amendment purports to lockbox the Medicare surplus, but there is no Medicare surplus. It is money that does not exist. The Part B deficit exceeds the so-called Part A surplus. For fiscal year 2002, the net position of the Medicare Program, when we combine Part A and Part B, we have a negative $52 billion that is coming from the general fund. Medicare is an on-budget account, unlike Social Security, which is currently in a huge deficit and which relies upon direct infusions from the general fund.

I note that some tried harsh words to differentiate between Parts A and B, but the fact is we are still talking about the same program. Considering
them separately and pretending they are off budget are simply not intellectually honest deceptions and are a fault that needs to be based on legislation. If you want the appearance of action, coupled with the security of inaction, don’t vote for my amendment, vote for the amendment of the Senator from North Dakota.

I want to be frank with the President and my colleagues in the Senate. Many gave thought to the idea of “lockboxing” Part A of Medicare. I think our colleagues know there is a Part A and Part B. Part A is funded by deducting money from people’s Social Security check and by everyone paying into the Medicare trust fund. We take in more money than is spent out for Part A.

However, Part B, which is the non-hospital portion of Medicare, does not take in enough money. The Medicare Part A surplus projected for the year 2002 is $36 billion; Medicare Part B deficit is $88 billion. In effect, we are taking $52 billion out of the general fund of the United States to support Medicare. I am sure a lot of people getting Medicare today think the money coming out of their Social Security, the money sons and daughters are paying into the Medicare fund, is taking care of it. That is not the case. That is not the case. When you combine Part A and Part B, the taxpayers of the United States subsidize Medicare. There is not enough money in the Medicare fund from the money coming in every year and the money being taken out of people’s Social Security and the money they pay in for Part B. We are subsidizing it. To talk of a Medicare surplus when you see these numbers, is not fair. The surplus projected for the next 10 years shows the Medicare surplus for Part A is $393 billion. Whoopee. Part B, the deficit is $1.36 trillion. The overall subsidy coming from the general fund of the United States is $643 billion. For us to talk about lockboxing this, to me, really does not make sense. I know some talked about doing this last year, but the only reason it was brought up was the concept it would help restrain spending. When you see the total budget picture, the Medicare surplus is part of the on-budget surplus. It is in deficit. We ought not talk about locking off something that is not there.

I urge my colleagues to reject the Conrad second-degree amendment because I don’t think it will be enacted. In my opinion, it is a poison pill. It pretends there is a sacrosanct Medicare surplus which does not exist and which was never walled off. I predict today if the second-degree amendment is passed by the Senate, the entire provision will be removed from the conference report of this bill. That money is going to be needed to pay for spending in the budget we now have, particularly if we increase education 62 percent, as some colleagues would like to do, and we entertain the President’s request for more money for defense.

On the other hand, if you want to make sure the money is there to follow through on what we promised the American people, if we want to pay down the debt as we promised—we want to pay down the debt and we want to restrain spending—if we want to do that without gimmicks, the pure Social Security lockbox that will do that, I request my colleagues support this amendment.

I am not proposing this today for political reasons. It is popular. I want to lockbox Social Security. I want to lockbox Medicare. The fact is, this is a very serious business. I testified before Congress in 1985 as president of the National Association of Medicare Trust Funds that at this time, spending was out of control. What happened was during the Reagan years—some of my colleagues might not like to hear it—we reduced taxes, but at the same time we reduced taxes which was supposed to stimulate the economy, at the same time we increased spending astronomically. What President Reagan received was money for the defense initiative, and what the other colleagues received was money for domestic spending. It was during that period of the 1980s where we saw the national debt skyrocket, and we gobbled up Social Security.

We need to be fiscally responsible. The way to do that is lockbox Social Security so it can be used for deficit reduction; lockbox it so it can not be used for spending. I think we can leave here with our head high and it will be something we may very well need by the end of this year if things do not work out as we hoped.

The PROTECTOR, the Senator from North Dakota.

Mr. CONRAD. Mr. President, the Senator from Ohio and I see the same problem, but we have a different approach to solving the problem.

The Senator from Ohio says the Social Security is endangered. I agree. I say not only is the Social Security trust fund endangered but so, too, is the Medicare trust fund. Despite the words from the Senator from Ohio, there really is a Medicare trust fund. It really is in surplus. We know that. That is from the reports from this administration. Those are what the reports from the Congressional Budget Office make very clear.

Here is the “Medicare Budget Outlook,” from chapter 1, from the CBO, table 1-7 “Trust Fund Surpluses.”

Under “Medicare, Hospital Insurance (Part A),” the trust fund is in surplus each and every year of the years under consideration.

Part B, referenced by the Senator from Ohio, is in rough balance. What the Senator from Ohio has confounded with his charts, is that Part A has always been funded in one way, under one formula, and Part B has been funded under a different formula. Part B is funded by premiums paid by Medicare beneficiaries and by general fund contributions. That is not in deficit as asserted by the Senator from Ohio. That is incorrect. Long ago, Congress determined Part B would be funded in part by contributions from the general fund, in part by premiums. We decide that level of contribution from the general fund as a matter of law. We make that determination. It has nothing to do with the Part B trust fund being in surplus or deficit. In fact, the reports of the Office of Management and Budget and the reports of the Congressional Budget Office make very clear. Those are what the reports of the Office of Management and Budget make very clear.

I vote for the amendment of the Senator from Ohio protects the Social Security surpluses in each and every year, takes the Medicare Part A trust fund surplus off budget, just as we have done with Social Security, and gives Medicare, the same protections as Social Security and contains strong enforcement for both. This is an amendment that received 60 votes on the floor of the Senate last year. Sixty Members voted for protecting both Social Security and Medicare. I hope we will do that again.

To go to the specific comparison of the two amendments I think would be useful to our Members.

First, on the question of taking Medicare off budget, my amendment does so, to provide the same protection we have provided to Social Security. The basic idea is a simple one. Should we be using Medicare trust fund money or Social Security trust fund money for other purposes? Should we be using that money to fund the other operations of Government? My answer would be that at a time of economic growth we simply should not. We should not be raiding trust funds, retirement funds, health care funds, to pay for other functions of Government. We should not be using Medicare trust fund money to pay for national defense. We should not be using Medicare trust fund money or Social Security
trust fund money to pay for education. We should not be using trust fund money to pay for tax cuts. We did not put the money in there to pay for the park system. The fundamental reason not to is we need that money to make the funds solvent.

We have the baby boom generation coming along. If we use that money for other purposes, it is not available to pay down debt or to address the long-term liability in those programs. The fundamental effect is we dig the hole deeper before we start refilling it.

My amendment would take the Part A trust fund off budget and protect it just as we do Social Security. The Voinovich amendment does not. He does not protect Medicare like Social Security.

The second question is, Does it protect Medicare surpluses? My amendment, the Conrad amendment, does. It creates supermajority points of order against any legislation that would decrease the Medicare trust fund or increase trust fund deficits in any fiscal year. The Voinovich amendment has no such provision.

On the third question of protecting Medicare against cuts, yes, on the Conrad amendment. We exempt Medicare trust funds from mandatory sequestrations. We do not think those funds that are dedicated to Medicare should be used to cover up the deficit in other places in the budget. We do not think Social Security funds should be used for that purpose. We do not believe Medicare funds should be used for that purpose. We have already separately taxed people for Medicare and Social Security. They are in surplus. To take their funds to pay for other functions of the Federal Government is just wrong.

There is a private sector entity in America that could raid the retirement funds of their employees and use them to fund the other operations of the company. That is illegal. It would be illegal under Federal law if any private sector organization tried to do it.

Why don’t we apply the same principle to ourselves? Why don’t we say: Look, trust fund money? That is a different category. It is a different category from other spending. If we are going to do that, we have to treat the Social Security trust fund and Medicare trust fund in the same way. My amendment does. The amendment of the Senator from Ohio simply does not.

In fact, the amendment of the Senator from Ohio would require Medicare to be cut further. If there could be cut, defense could be cut, any other part of Federal spending could be cut; it is undifferentiated. It doesn’t matter whether it is a trust fund or other operations of Government; under the amendment of the Senator from Ohio, today, tomorrow, the next year. I do not think that is right. I do not think it is right to treat the Medicare trust fund the same way as other Federal programs when there is a shortfall in Social Security—to cut Medicare to make up for this shortfall. I do not think that is the right principle at all.

The fourth question: Do we protect on-budget surpluses? Yes, under the Conrad amendment we create a supermajority point of order against the budget resolution or other legislation that would cause or increase an on-budget deficit for any fiscal year; in other words, taking out Social Security and Medicare, treating them as trust funds. That is what they are supposed to be, that is what they are designed to be, and we ought to treat them as such. The amendment of the Senator from Ohio is the same as my amendment in that regard.

Protecting Social Security? The two are the same.

On the final question, providing for cuts in Medicare, education, defense, and other programs, no, my amendment does not provide new sequestrations beyond existing mandatory and discretionary sequestrations under the Budget Enforcement Act. The amendment of the Senator from Ohio amends the Budget Enforcement Act to sequester spending in any year the estimated on-budget spending exceeds one-half of 1 percent of total estimated outlays, regardless of what caused the deficit—regardless of what caused it.

Under his proposal, even if it was a tax cut that caused the shortfall, you have to go out and cut Medicare; you have to go out and cut defense; you have to go out and cut education, even though it was not a spending increase that caused the problem. If it was, instead, a shortfall in revenue or if, instead, it was a provision that created the problem—a tax cut, for example, that caused the shortfall—his answer is the same in every case: You cut spending. It doesn’t matter what the cause of the problem is; you treat them all the same. I do not think that makes sense or stacks up.

Under the amendment my colleague from Ohio is offering—I call it the Republican broken safe because there is not a penny reserved for Medicare—you are protecting Social Security, which my amendment does as well, but he does nothing for Medicare. I do not think that is the way we want to go.

I will go back to my colleague from New Mexico, who I see is on the floor now. This was his statement back in 1998:

For every dollar you divert to some other program you are hastening the day when Medicare falls into bankruptcy, and you are making it medically impossible to solve the Medicare problem in a permanent manner into the next millennium.

He was exactly right when he made that statement. That is why I offer this amendment today, to protect Social Security and Medicare, because that is the way they were designed, that is the way they were set up, and that is the way we ought to treat them.

This chart shows we are already in trouble. Under the budget that was passed, with the tax cut that was passed, with the economic slowdown that is occurring, in the fiscal year 2001, the year we are in right now, you can see we started with a $275 billion forecasted surplus, but $156 billion of that is Social Security money and $28 billion is Medicare trust fund money. When you take those out, you have $92 billion left. Then you take out the tax bill. That is $74 billion. If you take out what we arefun ding the President’s request for billions based on the economic downturn. That puts us in the hole this year by $17 billion. That puts us into the Medicare trust fund by $17 billion.

That is before any appropriations bill has passed. No appropriations bill has passed. There is no spending beyond what is in the budget. There have already be in trouble. And for next year you can see the same pattern, but it is more serious in that we are using all of the Medicare trust fund next year, plus we are using some of the Social Security trust fund—only $4 billion but, nonetheless, that number shows that with the economic slowdown this year, we can anticipate lower receipts next year. If you look at all of the numbers and you look at how much of the money is in the trust funds, you find that we have a problem this year and next year.

If we go even further and look at the next 10 years, what we see is that we have problems in the Medicare trust fund in the first 4 years. Every year we are into the Medicare trust trust fund just based on the budget that has passed, based on the tax cut that has passed, based on the economic downturn we see so far. And that is before we consider the President’s request for billions based on the economic downturn. We are into the trust funds already before we consider the President’s defense requests, before we consider any new money for education.
Remember, we just passed an authorization bill with over $300 billion of new money for education. This is before the Voinovich money for natural disasters. And we typically have $5 to $6 billion for natural disasters every year. This is before the tax extenders are passed. Those are popular provisions. They are research and development tax credits—does anybody believe we are not going to extend the research and develop tax credit? Does anybody believe we are not going to extend the wind and solar tax credits? If we do, it is not in the budget. And it just makes the problem more severe.

I say to my colleagues, we are into the trust funds before any of these additional measures, before the President’s defense requests, before any new money for education, before money for natural disasters, before the tax extenders are provided for, before the alternative minimum tax problem is fixed. And I am not talking about a total fix to the alternative minimum tax; I am talking about a tax on the problem created by this tax bill that has been passed. Just fixing that matter is a $200 billion cost. This is before any further economic revisions. And we have been alerted by the Congressional Budget Office to expect a further downward revision to the long-term forecast because of the weakening economy.

Colleagues, what could be more clear? We have a responsibility to deal not just with the short term but with the long term as well.

Mr. REID. Will the Senator yield for a unanimous consent agreement?

Mr. CONRAD. I would be happy to yield.

Mr. REID. Mr. President, these unanimous consent requests have been cleared by both leaders and both managers of the bill that is now before us. And we are passed. Those are popular provisions. They are research and development tax credits—does anybody believe we are not going to extend the research and develop tax credit? Does anybody believe we are not going to extend the wind and solar tax credits? If we do, it is not in the budget. And it just makes the problem more severe.

I say to my colleagues, we are into the trust funds before any of these additional measures, before the President’s defense requests, before any new money for education, before money for natural disasters, before the tax extenders are provided for, before the alternative minimum tax problem is fixed. And I am not talking about a total fix to the alternative minimum tax; I am talking about a tax on the problem created by this tax bill that has been passed. Just fixing that matter is a $200 billion cost. This is before any further economic revisions. And we have been alerted by the Congressional Budget Office to expect a further downward revision to the long-term forecast because of the weakening economy.

Colleagues, what could be more clear? We have a responsibility to deal not just with the short term but with the long term as well.

Mr. REID. Will the Senator yield for a unanimous consent agreement?

Mr. CONRAD. I would be happy to yield.

Mr. REID. Mr. President, these unanimous consent requests have been cleared by both leaders and both managers of the bill that is now before us.

Mr. REID. Further, Mr. President, I ask unanimous consent that with respect to the Hollings amendment No. 973, there be 45 minutes for debate equally divided between Senators VOINOVICH and CONRAD—and this would go back to the time when they started their debate earlier today, which there is probably—

Mr. DOMENICI. Reserving the right to object.

Mr. REID. Pardon me.

Mr. DOMENICI. I am reserving the right to object.

Mr. REID. If I could complete the request—on the subject of both the Voinovich amendment No. 865 and the Conrad amendment No. 866, that at 2:15 p.m. there be 2 minutes for debate equally divided between Senators VOINOVICH and CONRAD prior to a vote in relation to the Conrad amendment; that following the disposition of his amendment—that is, the Conrad amendment—there be 6 minutes equally divided between Senators VOINOVICH and CONRAD followed by a vote in relation to the Voinovich amendment, as amended, if amended. I want to make sure it is clear, all time already consumed by Senator VOINOVICH and Senator CONRAD be charged against the 90 minutes. I also say, to alleviate any questions anyone might have, there will be points of order raised against both amendments.

The PRESIDING OFFICER (Mr. CARPER). Is there objection?

Mr. DOMENICI. Reserving the right to object, and I will not object—maybe I didn’t hear it—did you reserve some time for the Senator from New Mexico to speak?

Mr. REID. Senator VOINOVICH has some time. I assume that is where your time will come from, because we are already working under a time agreement that was entered into yesterday.

How much time remains for Senator VOINOVICH?

The PRESIDING OFFICER. Twenty-four minutes.

Under the unanimous consent request, there would be 21 minutes remaining.

Mr. REID. Twenty-one minutes.

I ask Senator VOINOVICH, would you yield some of that time to the ranking member of the Budget Committee?

Mr. VOINOVICH. I would be more than happy to.

Mr. DOMENICI. You said you would?

Mr. VOINOVICH. Yes. Absolutely.

Mr. DOMENICI. I will not use over 10 minutes, I say to the Senator. It would be 7 to 10 minutes.

Mr. VOINOVICH. Fine.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. Thank you.

Mr. President, I ask unanimous consent that with respect to the Feingold amendment No. 863, there be 30 minutes for debate divided as follows prior to a vote in relation to the amendment: 20 minutes under the control of Senator FEINGOLD; 10 minutes equally divided between the chairman and ranking member, with no second-degree amendments in order prior to the vote.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. REID. Mr. President, let me just pick up where I left off and point out that what we are in the process of—surpluses now with respect to Medicare and Social Security, we all know what is to come. The Congressional Budget Office has alerted us. The Comptroller General of the United States has alerted us. The Social Security Administration has alerted us. Medicare has alerted us. And they all have told us the same thing: That when we get past this decade—in the next decade when the baby boomers start to retire—these surpluses turn to massive deficits. That is what happens. The cash deficits begin in the year 2016, and then they grow geometrically as more and more baby boomers retire.

What should worry us, that should alert us that we should not be using the trust funds for other purposes. We should not be using the Medicare and Social Security trust funds to fund other operations of Government. Yet we are poised to do that this year. We are poised to do it to an even greater degree next year. And we are poised to do it for the next decade even in a time of strong economic growth.

That is what happens. The administration is not forecasting an economic slowdown next year or the years thereafter; they are forecasting strong economic growth. In that context, the numbers reveal we will be using trust fund monies to fund the other operations of the Federal Government. I do not think that is right.

Mr. Novak said, in a column yesterday, that I am—what did he say?—an antique fiscal conservative.

Whatever name one applies to it doesn’t make much difference to me. It doesn’t have anything to do with antiquity. It has to do with common sense. You don’t take trust fund money to fund other programs when you know what is to come, and there is no one in this Chamber who doesn’t know what is to come. We know we are facing a demographic tidal wave unlike anything we have ever seen in our Nation’s history. We are going to go from a time of surpluses in these trust funds to deficits.

One of the ways to deal with it is not to use the money in the trust funds for

CONGRESSIONAL RECORD—SENATE

July 10, 2001
other purposes. That is the heart and soul of my amendment. We ought to pass it.

Does that mean you are forced to have a tax cut in a time of economic slowdown? No, absolutely not. We have an economic slowdown now. I proposed $60 billion of tax cuts, of fiscal stimulus this year. That was part of the proposal I put before my colleagues—far more fiscal stimulus than the President proposed. That isn’t the correct suggestion, that somehow we would force tax increases or spending cuts at a time of an economic slowdown.

They are not forecasting an economic slowdown for this year or next year or the year thereafter. They are forecasting strong economic growth. We see from the numbers that their plan has put us into the trust funds of Medicare. There has not been a tax cut this year in terms of economic growth. That doesn’t make sense to this Senator. I don’t think it makes any sense at all.

My colleague on the other side put up a chart suggesting that spending is out of control, that that is the problem. I have to give the other side of the story. That may be the popular view, but it doesn’t match the facts.

This chart shows Federal spending as a share of the economy has gone down each and every year for the last 9 years. There hasn’t been some big spending splurge. He talks about one part of Federal spending. That is the chart he had. The chart he had was not all Federal spending. No, the chart he had was one part of Federal spending that has shown significant increases. He didn’t tell Members that he was showing a chart that has just one-third of Federal spending. He didn’t say that. He made people believe that was all of Federal spending on that chart. He knew and I know that that is not the case. He knows and I know that the proper way to compare Federal spending is as a share of our gross domestic product because that takes out the effects of inflation. That is the way to make the best comparison.

What do we see when we do that? We see that Federal spending in 1992 was 22 percent of gross domestic product. Federal spending in this year, 2001, is going to be 18 percent of gross domestic product. There has not been a tax cut or spending increase. That is an accurate characterization to the American people.

The fact is, the share of money out of national income going to the Federal Government has gone down dramatically, from 22 percent of gross domestic product to 18 percent of gross domestic product today. That is about a 20-percent reduction, not some big spending binge. That has been a reduction in the share of national income going to the Federal Government for spending. That is a fact.

Under the budget we passed, spending is not going up as a share of gross domestic product or as a share of our national income; Federal spending is going to continue to decline. It is going to go down as a share of gross domestic product. That will be the lowest level since 1951.

Facts are stubborn things. The fact is, we do not have runaway Federal spending. We have Federal spending going down and gone down sharply as a share of our national income, which every economist asserts is the appropriate way to measure so that we take out the effects of inflation and show real trends, what is really happening.

This is what has happened to Federal spending. Right now it is at the lowest level since 1966 on a fair comparison basis, measured as a share of gross domestic product. We can see we did have sharp increases back in the 1980s. That is true, but it is not true since then. We can see Federal spending as a share of GDP has gone down and gone down sharply, gone down to the lowest level since 1966. We are poised, with the budget under which we are operating, to go down to the level last seen in 1951.

This is an important subject. We do have a growing problem of dipping into the trust funds to finance the other operations of Government, even in a time of economic growth. It is economic growth that is forecasted next year.

Those are the numbers that are being used to make these analyses. The problem is significant and growing. I urge my colleagues to take a stand and vote to protect not only the Social Security trust fund but the Medicare trust fund as well. That is common sense.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico. Mr. Voinovich. Mr. Voinovich. I yield 10 minutes to the Senator from New Mexico.

The PRESIDENT. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I am not here in the Chamber to discuss the economics of the next 4, 5, 6, 10 years, nor am I here to conduct an argument with the Budget chairman with reference to the economy, and what we are getting versus what we projected. In due course, we will get some projections that are authentic and we will be down here to talk about the shortfall, which perhaps is a shortfall in revenue, but we have nothing official. We have a statement out of the White House. There is a formula that could be applied if the economy comes down by $x amount or the tax take could be reduced by a certain amount.

My colleague Senator Conrad is building a proposed set of hearings around that. I look forward to them.

For now, let me say the biggest thing that has happened with reference to the surplus is, No. 1, the Congress, led by the Senate, decided to increase the stimulus this year in this remaining part of the year. They decided in conference and then voted, with very large votes, that $72 billion would be given back to the American people during the remainder of this year. That is a very large sum. It is the most prudent thing we could have done.

Looking back, I am very glad we did it. The only thing we have going governmentally that might help this economy is to get some of these tax dollars back into the hands of taxpayers to see if it will build on their confidence as consumers or if they will use it to purchase items that are currently under the rubric of heavy inventories that are driving the economy down.

No. 1, the only big thing we have done and causing this downturn to be around $72 billion in the first year, this year, and about $30 billion plus next year. To the extent that that reduced the surplus, I guess one would have to ask: Should we now undo that tax measure?

I understand perfectly it is going to propose as an amendment that we reduce the tax cuts. I don’t know if it is in the first year or what, but the Senate followed our good friend, Senator Hollings, here in the Chamber while we were doing the budget resolution and said we should do more in the first and second years, and essentially the conference on the tax bill gave in to the proposals coming forth from this body.

The second thing that has happened is even though the Congressional Budget Office had dramatically reduced the expectation of growth, they went from about a 5.1 growth to an estimate for the relevant year of 2.5 percent, so we were operating on a rather conservative set of economics, but what has happened is a shortfall in the American economy, or the downturn, which has gone on pretty long—much longer than many expected—is apparently going to cause some diminution, some lessening of the taxes coming into the coffers than was expected. We don’t have the exact information from how or from whence.

So we have a tax cut that is our best hope of bringing this economy back and causing this downturn to be around $70 billion this year and the $30 billion-plus next year are probably as close to what the economic doctor...
would have prescribed to us if he were looking at the veins of our economy and saying we better make some of them bigger. So that happened. The economic estimate went from 5.5 plus to 2.5 by the CBO. Apparently, it is coming down beyond that, but for how long and how much, I don’t know. We will be getting our numbers together and we can have a very interesting debate. What do we do if, in fact, this recession, this downward trend, lasts a little longer than expected? What do we do with reference to the shortfall in revenues? Do we increase taxes? Of course not. Do we just cut everything in the Federal programs 10 percent or 8 percent? Of course not. We won’t do that.

Today, we have an amendment by the new chairman of the Budget Committee in this Chamber to shift $300 billion in 2002 and nearly a trillion dollars over 10. For what does that cry out? It cries out for reform of the Medicare system, and it cries out loudly for a different delivery system and prescription drugs.

Incidentally, there is $300 billion sitting in this budget to be used for prescription drugs and when we get a bill. But we have said all of the moneys that are part of Medicare should be used to reform this, and certainly, Medicare money should be used as part of a reform measure, including prescription drugs.

The second point is that it was voted down in the Senate on a point of order. This splits Medicare in half. For the first time, we had half of Medicare off-budget, half of Medicare on budget. That doesn’t mean anything to anyone out there. But it is just totally the wrong way to help solve the long-term problems in our economy, and certainly, in this Chamber hope that as part of prescription drugs we actually reform Medicare so that it can deliver more for less? It is a 25- or 30-year-old regime, in terms of what is paid for and deducted and all of those things. Those should be made modern in the reform package.

This amendment won’t permit that because it says the portion of the trust fund that is for Medicare Part A is totally off-budget, but Part B is on budget.

From my standpoint, we are going to just encourage more gimmicks when we do this kind of thing. We are all aware that the surpluses were generated because we shifted home health services from Part A to Part B in 1997—part of I believe was a way of saying Medicare looks better—but at the same time we took one of the biggest components of their responsibility away from them. Anybody can do better on money if they have five or six components, somebody says: Well, don’t count three of them; we will put them somewhere else and you can run around and say all you owe are two mortgages and the other three are sitting over there somewhere and you are not going to do anything about them.

I believe the most important thing we can do—and everybody has priorities—the most important thing we can do this year—and I think the President is taking the first step tomorrow—is to get started on Medicare reform. My concept would be that the money in Medicare, Part A and Part B—and the $300 billion in this budget for additional prescription drugs—we package all that and pass a Medicare bill this year. I think that is the right thing to do.

I could talk a lot longer about trust funds and how they relate to the budget of the United States. But, for today, I believe the chairman of the Appropriations Committee, or the ranking member, whose bill is on the floor, will make a point of order. The distinguished majority whip has said a point of order will be made. I think it will be made in each case by a different Senator, one from each side of the aisle. This violates the Budget Act and therefore a point of order lies against it. I don’t think anybody who votes for that is going to make it stick that they are against Medicare.

As a matter of fact, one might make the argument that if the Conrad amendment is adopted and made law, which is a long way from now, you might make it harder to get reform in prescription drugs because you will be working off some arbitrary lines that are set now and left part on budget. So we need reform, not just shuffling money around.

I look forward to many days of discussions with my friend, the new chairman. I look forward with enthusiasm to discussing what is happening to the American economy. What should we do since the lull is a little longer? I think we ought to start talking about that.

I yield the floor and thank the Senator from Ohio for yielding time to me. The PRESIDING OFFICER. The Senator from Ohio has 10 minutes remaining. The Senator from North Dakota has just over 17 minutes. The Senator from North Dakota is recognized.

Mr. COYHAD. Mr. President, we always welcome the sage observations of the former chairman of the Budget Committee and, probably not surprisingly, we disagree. There is nothing in my amendment that precludes reform of Medicare. I not only serve on the Budget Committee, I serve on the Finance Committee, I have been part of every reform effort on Medicare that has occurred. So I am in favor of Medicare reform, and there is nothing in my amendment that prevents further Medicare reform.

In fact, I believe this amendment is part of Medicare reform because it recognizes that the trust funds of Social Security and Medicare both deserve protection. That is the reality. That is what is at the heart of this discussion and debate today.

Make no mistake, this talk about Medicare being in deficit is just erroneous. Let’s review the Congressional Budget Office report.

Here is Medicare. Under the table that is headlined “Trust Fund Surpluses,” Medicare Part A, which is financed out of payroll deductions, is in surplus each and every year of the 10 years of the forecast period.

Medicare Part B is in rough balance over the 10 years. In some years, it is down $1 billion and then it is in surplus by $3 billion, $2 billion, $2 billion. The fact is Part B is in rough balance over the 10 years.

The Senator says it is a deficit. It is not a deficit. It is a funding mechanism that we decided on in Congress for Medicare Part B. Part of the money comes from premiums. Part of the money comes from the general fund. It is not in deficit.

The report of the Congressional Budget Office shows very clearly it is in rough balance. Part A is in clear surplus.

If you allow the money that is in surplus in the trust funds of Medicare to be used for other purposes, which we are now poised to do because of an unwise fiscal policy that has been put in place, guess what happens.

What does that mean? I do not think we want to force the Medicare trust fund to go broke faster. It does not make sense to me.

The Senator from Michigan is seeking time. I yield 5 minutes to the Senator.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 5 minutes.

Ms. STABENOW. I thank the Chair. Mr. President, I thank our Budget Committee chairman for his leadership on this issue. I am proud to be cosponsoring the amendment he has offered to protect Medicare and Social Security.

I ask unanimous consent to add my name as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. STABENOW. Mr. President, this is a very simple, straightforward debate: Are we going to protect Social Security and Medicare trust funds for their intended purpose, or are we going
to allow them to be used for other purposes?

This is Mr. Voight from Ohio speaks about Social Security trust funds, and I share his concern about protecting them, but that is not enough without including Medicare. I find it so interesting that in the Budget Committee we have heard testimony from the Secretary of the Treasury about protecting Social Security, and we have heard from the OMB Director about protecting Social Security, but nowhere do they talk about protecting Medicare.

Then we turn around and review over 30 years of reports regarding the Medicare trust fund, the solvency of the Medicare Part A trust fund. For over 30 years, we have acted as if there is a Medicare trust fund.

Now we are being told magically this year with the new administration, there is no trust fund. I find that quite amazing. In fact, there is a Medicare Part A trust fund. It is in surplus. It goes for important health care purposes. Just ask our hospitals. It is important we protect those dollars for those who receive healthcare through Medicare.

I also find quite interesting the logic that if, in fact, there is not a Medicare trust fund, there is no surplus; then rather than putting money into Medicare in order to strengthen it, we should spend it for other items. That is basically what we are hearing; that it is all right to spend Medicare for something other than health care for seniors and the disabled because somehow, through accounting mechanisms, we decided there is no trust fund.

The Conrad amendment, which is so fundamental and so important to the people of our country, simply says we will not spend Social Security and Medicare trust funds for something other than the intended purpose. This is absolutely critical. Those of us who stood in this Chamber and expressed concern about the budget resolution, expressed concern that, in fact, Medicare and Social Security would be used to pay for the tax cut that passed, to pay for other spending, the reason Senator EVAN BAYH, Senator OLYMPIA SNOWE, I, and others offered something called a budget trigger during that debate was simply to say we did not want to be in this situation and that phase-in of the tax cuts would be suspended if we were dipping into Medicare and Social Security.

That received 49 votes, not quite enough for adoption. We now move on throughout the year, and we find ourselves, as our Budget chairman has indicated, poised to spend Medicare health care dollars for other purposes, not in the future but this year and every year until 2016.

The Conrad amendment simply says we will not do that; we will protect the sacred promise of Social Security and Medicare; we will not spend Social Security or Medicare for other than the intended purpose.

This is Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Nine minutes forty seconds.

Mr. VOINOVICH. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Nine minutes forty seconds, and the Senator from North Dakota controls 9 minutes exactly.

Mr. VOINOVICH. Mr. President, I will make a couple of remarks and let the Senator from North Dakota finish up on his time, and then I want to give Senator GRAMM of Texas the last part of my time, if that is acceptable to the Chair.

The PRESIDING OFFICER. The Senator from Ohio may proceed.

Mr. VOINOVICH. Mr. President, we have a saying in Ohio, especially north of Route 40, that you cannot make a silk purse out of a sow’s ear. We are talking about a Medicare Part A surplus, and to not also recognize that we have a Part B Medicare responsibility and argue that we have a surplus when the facts show that when we put A and B together they are in deficit some $52 billion—there is no such thing as a Medicare surplus, if you are looking at Medicare as it really is, and that is Part A and Part B. In this budget, we are going to have about $36 billion more than what we expected in Part A, but on Part B—that is the out of hospital—we are going to be in deficit some $38 billion. When we put the two of them together, we are in deficit $52 billion.

How can one talk about a Medicare surplus when we are in debt $52 billion? If we take the next 10 years, we are going to take in $393 billion more in Part A, but in Part B we are going to have to subsidize $1.36 trillion, and it all works out to be a deficit of $643 billion.

The point I am making is this: There is no Medicare surplus; it is a fiction. If we are to go along with the amendment of the Senator from North Dakota, in fact, what is going to happen is it will be used to pay down debt, and we will not have it to reform Medicare, which we need to do. We will not have it to pay for the prescription drug benefits that the American people are demanding we provide, and honestly they are going to do something about it this year. I urge my colleagues to vote against that amendment and to support the real pure lockbox of Social Security that I suggest today.

I point out to the Senator from North Dakota that the sequester does not take Medicare or Social Security. It exempts those under the Budget Act of 1985 so you don't have to worry, if the sequester goes into force, taking anything—Social Security and some of the other things to which the Senator made reference. It is written in my amendment and references the 1985 budget agreement.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, my staff says the Senator is incorrect when he says his amendment protects Medicare from the sequester, protects Social Security. They assert after examining the amendment that it does not protect Medicare from a sequester.

More importantly is the question of whether there is a trust fund surplus. I ask the Senator from Ohio, does he dispute the report of the Congressional Budget Office? The report of the Congressional Budget Office is as clear as it can be on page 19. I refer the Senator to "Trust Fund Surpluses." There is Social Security. We all know it is in surplus. Medicare, hospital insurance, Part A, is in surplus every single year. Part B is in rough balance over the 10 years.

The Senator from Ohio has confused the funding mechanism for Part B. The funding mechanism is part of the cost, for Part B is premiums paid by those who are Medicare eligible and the other part is a general fund contribution. It is not in deficit. It is a choice made by Congress as to how to fund Part A, which are payroll deductions. That is how it is funded. It is in surplus. Part B is funded by premiums for part of the costs and by general fund contributions for the other part. It is not in deficit. It is a decision made by the Congress. Part A is in surplus; Part B is in rough balance.

To suggest there is no surplus, I ask the Senator, what is his conclusion, this money doesn't exist? There is no surplus in Part A and I don’t think so. It is as clear as it can be.

If one says there is no surplus and make it a jump ball, make this money
available for other purposes, that is what will happen around here. That is the implication of the Senator's position. It is not a fund that is a wise position. I don't think it is a prudent position. It is a position that says we can use this money for any purpose; it doesn't matter. It doesn't matter that we have a trust fund. It doesn't matter that these moneys are supposed to be protected. We will use them any place.

That is exactly what got us back into trouble in the 1980s. We raided every trust fund in sight and put this in the deficit ditch and exploded the deficits and exploded the debt. I don't want any part of repeating that process.

I yield the floor.

Mr. VOINOVICH. I yield time to the Senator from Texas.

Mr. GRAMM. I thank the Senator from Ohio. There is only one person in this Congress who has done anything to control spending thus far, and his name is GEORGE VOINOVICH of Ohio. He got 35 Members of the Senate to sign a letter urging the President to veto spending bills that were over budget, that threatened the viability of Social Security and Medicare, and threatened the surplus. I congratulate him on that. He has proposed a mechanism to be sure we do not spend the Social Security surplus.

First of all, let me make it clear there is not a Medicare surplus. If ever there has been a fraud, this is it. It is true that one part of Medicare has a surplus of $29 billion. But it is also true that the other part of Medicare has a deficit of $73 billion, so Medicare in terms of taking general revenue, losing money, is running a deficit of $44 billion.

Even the surplus in Part A is the product of a gimmick from the Clinton administration where we took the fastest growing part of Part A, home health care, and "saved" $74 billion by paying for it out of Part B rather than Part A.

I am tempted to vote for the Senator from North Dakota's amendment because it makes it harder to spend money. I would have to say that the distinguished chairman of the Budget Committee has a power that no other Member of the Senate has because under the budget resolution he unilaterally controls $423.8 billion worth of reserve funds, and simply by saying no, he cannot be spent. No one is in a better position than the distinguished chairman of the Budget Committee to deal with the crisis that he has talked about.

When Senator DOMENICI was chairman, we had a surplus. We were not spending any of the so-called surplus in Medicare. We were not spending a penny of the Social Security surplus. We had general surplus in the rest of the budget. Now that the Senator from North Dakota has taken control and apparently things have almost spontaneously gone to hell, it seems to me he has a lot of explaining to do. I look forward to hearing it.

But the bottom line is, we have a proposal before us that sets up a process to make it much harder to spend the Social Security surplus. Then, if we spend it, it has an enforcement mechanism through a sequester. Every Member of the Senate that means it when they say no, anything about Social Security ought to support the amendment of the distinguished Senator from Ohio.

In my opinion, the case for the amendment of the Senator from North Dakota is a much weaker case. There is not a Medicare surplus. There is a surplus in one part of it, there is a deficit in the other. The surplus is a surplus by taking the fastest growing part out of it during the Clinton administration and putting it into Part B. So the whole thing is kind of a fabrication. On the other hand, if we actually did not allow the surplus to be—quote—spent, it would be harder to spend money. But there is another paradox, and that is you could not even spend it for Medicare.

So whatever you do on the amendment of the Senator from North Dakota, I urge you to support the amendment of the Senator from Ohio.

The PRESIDING OFFICER. Time controlled by the Senator from Ohio has expired. The Senator from North Dakota has 5½ minutes remaining.

The Senator from North Dakota.

Mr. CONRAD. Mr. President, the Senator from Texas is wrong about the amendment of the Senator from Ohio. I just say this. Some of what the Senator from Texas says I agree with. I really do think we have a circumstance that requires us to think very carefully about how we are going to deal with requests for additional spending, requests for additional tax reductions, because, as I calculate it, the cupboard is bare. We are already into the trust funds or are poised to be if the items in the budget resolution enacted. We are into the trust funds, just based on the tax cut that has passed, based on the budget resolution that has passed, and based on reductions in revenue because of the economic slowdown.

Tongue in cheek, the Senator from Texas suggests it is my ascension to chairman of the Budget Committee that somehow led to these events. I can assure the Senator from Texas that it was not my becoming chairman of the Budget Committee that led to the economic slowdown, and it was not my ascension to the Budget Committee chairmanship that led to the passage of the budget resolution. I opposed it. It wasn't my position as Budget Committee chairman that led to the passage of the tax bill. I opposed it because I predicted then we would face the circumstance I believe we face now. That is, we have just done too much and the result is we have a problem. I am not for raising taxes at a time of economic slowdown. I am not for cutting spending at a time of economic slowdown because that would counter fiscal stimulus, and we need fiscal stimulus.

But look at things. But look at things when the administration projects strong economic growth, it does not seem wise to me that we use the trust funds of Social Security and Medicare for other purposes. That just does not seem to be a wise thing to do. My amendment would prevent us from doing it.

It would not absolutely prevent us because you could get around it with 60
voters. That is always true here. The Senator from Texas talks about the power that he has. The power I have is actually rather limited. The power I have is to release reserve funds that are in the budget, but any action I take can be overcome by 60 votes in the Senate.

I have sent the very clear signal to the Secretary of Defense and the administration with respect to their request for additional spending for defense. By the way, I believe we need more money for defense. But, given our fiscal situation, the question becomes, will it be taken out of the trust funds of Medicare and Social Security, or will it be paid for by spending cuts elsewhere, or will it be paid for by additional revenue? I do not believe it should come out of the trust funds of Medicare and Social Security. I think that is wrong. I think that is a mistake.

I think the amendment of the Senator from Ohio is deficient. No matter what the cause of the shortfall is, he has one answer. His answer is spending everywhere else, other than Social Security. I do not think that is the right answer. I think everything has to be on the table, revenue and spending cuts, especially if the problem is caused by tax cuts that were too big. No matter what the cause, whether it is economic downturn, whether it is a tax cut that was too big, he has only one answer: Cut all spending other than Social Security. I do not think that is a balanced response. Let me go again to the question of spending. I ask the Chair how much time is remaining on my side?

The PRESIDING OFFICER (Mrs. CARNahan). The Senator has 55 seconds.

Mr. CONRAD. Again, the Senator from Texas talked about spending being out of control. I just beg to differ. I do not think that is what the record shows. As a share of GDP, Federal spending has gone down each and every year for the last 9 years, from 22 percent of GDP to 18 percent this year. Under the budget resolution that passed, Federal spending as a share of gross domestic product is going to be at the lowest level of the last 9 years, from 22 percent of GDP down to 16.3 percent, the lowest level of GDP since 1951. Discretionary spending, domestic discretionary spending is going to be at the lowest level in our history.

So, please, let's not be telling the American people there is some big spending binge that has been going on here and put up a chart such as the one the Senator from Ohio has put up there that has just one part of Federal spending.

AMENDMENT NO. 873

The PRESIDING OFFICER. The time of the Senator has expired. Under the previous order, the Senate will now debate the amendment of the Senator from South Carolina.

Mr. HOLLINGS. I thank the distinguished Chair. Madam President, I want to yield to the distinguished ranking member of our Finance Committee because he has a conflict. We want to try to accommodate that.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Madam President, I yield myself such time as I might consume. I will not consume all the time that has been allocated to our side. I will not be here to allocate other time, so anybody who wants to speak in opposition to the Hollings amendment is free to yield themselves what time I might have remaining.

Even though Senator HOLLINGS has not discussed his amendment—he is very strongly opposed—I have strong opposition to his amendment because his amendment would repeal the retroactive marginal rate cuts enacted on July 6, this year, barely 1 month ago. My opposition to the amendment is that we do not have a slowing economy. The bill before the Senate is an appropriations bill, not a finance bill. As the senior Finance Committee Republican, I must oppose this tax amendment on an appropriations bill.

Furthermore, if Senator HOLLINGS were to prevail, this appropriations bill would become a Senate-originated revenue bill and, as such, it would be blue-slipped when sent to the other body. In other words, this amendment, if added to the underwriter supplemental appropriations bill, would kill the appropriations bill we are now considering, a bill that is so badly needed.

As bad as this amendment is procedurally, it is even worse substantively. This amendment would repeal all the retroactive marginal rate reductions in a recently passed tax bill. Those tax rate cuts are based principally on the new 10-percent bracket for the first $6,000 of income for single taxpayers and $12,000 of income for married taxpayers. The new tax per cent bracket is the basis, then, for the advanced refund checks of $300 for single people and $600 for married couples that will soon by mailed out by the Treasury Department starting July 23. So the Hollings amendment, then, would stop these checks dead in their tracks. A vote for the Hollings amendment is a way to say no to American taxpayers who now expect to receive the refund checks.

These checks and the other retroactive rate cuts are, of course, a stimulus in the tax legislation that we just enacted. Just when the economy is slowing down and when the economy, then, is in need of a stimulus, the Hollings amendment would pull the rug out from under any attempt to stimulate it. Frankly, I cannot think of a proposal more damaging to the potential return to economic growth than the amendment on which we will soon vote.

Soon, in a separate speech, I am going to discuss in some depth the tax legislation just enacted. Let me point out one important fact for one to chew on in the meantime. According to the Congressional Budget Office, Federal taxes are at an all-time high of 20.6 percent of the economy. That is higher than taxes were even in World War II. Individual income taxes are at record levels as a percentage of the GDP. The tax legislation returns this overpayment—which is dragging down American workers, investors, businesses, and collectively the American economy—to the people.

What the Hollings amendment really says is, return taxes to their record levels. The Hollings amendment says high taxes are no problem and should be ignored in a slowing economy. Think about this, my fellow Senators. This amendment, in effect, raises taxes at a time we have a slowing economy. Madam President, I yield the floor and thank Senator HOLLINGS for yielding to me to make these remarks at this point ahead of him.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Madam President, the distinguished then-chairman of the Finance Committee, when they reported out the tax cut, did not include a rebate, did not include a tax cut for this present fiscal year, 2001. But to not have it in all of a sudden has become, in his words, dangerous: Oh, this is a dangerous thing, I am just doing what he, as the chairman of the Finance Committee, reported out.

I have said: Look, let's not have a tax cut for the year 2001. That is exactly what President Bush said when he submitted his tax cut: Let's not have a tax cut for 2001. We will begin in 2002. That is what is the House of Representatives said when they passed the tax cut. They said: Don't have it for 2001. Let's begin in 2002.

Now, all of a sudden, to do that has become dangerous? a constitutional question? I originated this particular rebate, which I ask now to be repealed, in the Senate. The Senate did not raise a constitutional point of order that it was a revenue measure that should be disallowed. The House of Representatives voted for it, without question, without point of order, without constitutional question. They did not blue-slip it when it got over to the House of Representatives. Now where are we? We now talk about campaign finance in the morning paper and say the House is debating it and they are only going to have 1 day of debate. But we are only going to have 15
minutes of debate here this morning on campaign finance because that is all this is. Nobody thinks now the minimal rate, the little rebate going to work. I have not found anybody who really thinks mailing somebody $300 or $600 is all of a sudden going to trigger a recovery in a $10 trillion economy—let me emphasize this. When it got to be about February and March, and I really began to worry about the economy, wondering if there was anything that could be done, yes, there was a rebate being discussed. So I went to the financial minds on Wall Street and the economists—because I am a former chairman of the Budget Committee, and I know whom to call and whom to talk to—and I said: Look, do you think a rebate will work? They said: It’s 50–50, a flip of the coin. It might, but probably will not. To make sure it worked they told me the rebate ought to be at least 1 percent of the gross domestic product of $10 trillion, which is $100 billion. And it certainly ought to cover as many taxpayers as possible.

So we set out with $100 billion, and we included the 95 million income-tax payers and the 25 million payroll-tax payers, and do you know what those rascals did? Listen to this. They gimmickled: The corporate taxes due in September—namely, fiscal year 2001—we are going to move that over to October so we will have enough money for the campaign next year.

Talk about campaign financing. Where are we going to take it away? We are going to take it away from, of all people, Dicky Flatt.

The Senator from Texas is always talking about little Dicky Flatt who pulls the wagon and pays the taxes and builds the country and sits around the kitchen table. Poor Dicky Flatt gets nothing. Does this government say? Let’s put everybody in Dicky Flatt’s shoes. If he and the 25 million payroll-tax payers, and do you know what those rascals did? Listen to this. They gimmickled: The corporate taxes due in September—namely, fiscal year 2001—we are going to move that over to October so we will have enough money for the campaign next year.

is up to us to take care of the fiscal policy, the long-range interest rates and everything else.

A headline from the Financial Times reads, “Hard Landing Alert Sounded for U.S. Economy.” And again, Mort Zuckerman, editor in chief of U.S. News and World Report, says that consumer spending, capital spending, and exports are declining rapidly, that the economy is in worse shape than it looks.

With that confronting us, why are we running around borrowing some $40 billion to mail around knowing it is not going to do any good, confronting fund Social Security, funding Medicare, funding the education increase of $30 billion a year, funding that requires that Secretary Rumsfeld wants of $18 billion? I retain the remainder of my time and suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll. Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. REID. I have spoken to Senator Hollings. He has no more time he wishes to use. The opposition has used some of his time. I don’t think we have any more time. The hour of 12:30 is quickly approaching. I ask unanimous consent that we recess for our Tuesday morning conferences of the parties at this time.

The PRESIDING OFFICER. Under the previous order, the hour of 12:30 p.m. having arrived, the Senate will now stand in recess until the hour of 2:15 p.m.

Thereupon, the Senate, at 12:28 p.m., recessed until 2:16 p.m., when called to order by the Presiding Officer (Mr. Cleland).

SUPPLEMENTAL APPROPRIATIONS ACT, 2001—Continued

AMENDMENT NO. 865

The PRESIDING OFFICER. There will be 2 minutes equally divided before the vote on the Conrad amendment.

The Senator from North Dakota is recognized.

Mr. CONRAD. Mr. President, the amendment I am offering today is an amendment I offered last year that got 60 votes on the floor of the Senate. Earlier this year, it got 53 votes on the floor of the Senate. It says we should protect both the Social Security and the Medicare trust funds. We already provide some protection of the Social Security trust fund. It would strengthen those protections. We would also provide those same protections to the Medicare trust fund. Both of these trust funds deserve protection. If we don’t provide it, the money will be used for other purposes.

I hope my colleagues will support this amendment.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. VOINOVICH. May I ask, how much time do we have?

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. VOINOVICH. Thank you.

Mr. President, I urge my colleagues to vote against the Conrad amendment. In fiscal year 2002, the overall Medicare Program would require over $50 billion in general tax revenues. Over the next 10 years, the Medicare Program would require over $600 billion in general tax revenues. We can’t lockbox something that simply does not exist. It is a fiction.

This amendment, in my opinion, will harm our ability to reform Medicare and also harm our ability to provide a prescription drug benefit that is so long due for the American people.

Furthermore, the Conrad amendment does not contain any real teeth in terms of a Social Security lockbox. It lacks any automatic enforcement mechanism to protect Social Security. I urge my colleagues to vote no on the amendment and against the waiver of the point of order.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, on behalf of myself and the chairman of the Appropriations Committee, Senator Byrd, I raise a point of order that this amendment violates section 306 of the Budget Act.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. CONRAD. Mr. President, pursuant to section 904 of the Congressional Budget Act, I move to waive the applicable section of that act for the purpose of the pending amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Senator from New York (Mrs. CLINTON), the Senator from New York (Mr. SCHUMER), and the Senator from North Carolina (Mr. EDWARDS) are necessarily absent.

Mr. NICKLES. I announce that the Senator from Pennsylvania (Mr. SANTORUM), is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 42, nays 54, as follows:
surplus in any single year of the next decade. More important, our amendment contains an automatic enforcement mechanism. If OMB reports that the Federal Government will spend the Social Security surplus, an automatic across-the-board cut in spending, a sequester will be put in place. The size of this sequester will offset the use of the surplus. This is the ultimate enforcement mechanism. If the Social Security surplus looks like it will get spent, the OMB stops it from happening. This will ensure we stay the course on limiting spending and pay down the national debt as we promised when we passed the budget resolution.

Spending cuts under this amendment would impact both discretionary and mandatory spending. Mandatory spending for the most needy in society would not affect.Beside sequesters. My amendment would exclude Social Security, food stamps, and other programs that are excluded from sequesters under the Deficit Control Act of 1985. In reality, about $33 billion of mandatory spending is subject to sequester. Hopefully, we would never have to use the sequester.

This amendment is straightforward. It relies largely on existing law. It primarily builds upon the existing budget process. We all know Social Security is off budget and any amendment reinforces that position. Our amendment does not modify any budgetary conventions, nor does it pretend Social Security is something it is not. We must make sure history does not repeat itself. For years the Social Security surplus has been an all too readily available source of cash for Congress to spend. However, since 1999, there has been a political consensus not to return to spending the Social Security surplus as a part because we had an on-budget surplus that supplied the extra money.

If, however, the economic prosperity that this Nation enjoyed recently continues to fade, although I hope this is a temporary situation, surpluses are likely to be revised downward. Then the Social Security surplus will again be in the crosshairs. It will be in the crosshairs because of Congressional yearning for more spending.

If you ask me, we are not there to follow through on what we promised the American people, if you want to pay down the debt, if you want to control spending, and if you want to do it in an accountable, enforceable way, without gimmicks, vote for this amendment. I think everyone in this room knows this is the right thing to do. I urge my colleagues to vote for this amendment and urge them to vote for waiving the point of order that will be raised against it.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

The Senator from North Dakota.

Mr. CONRAD. Mr. President, the Voinovich amendment does nothing to protect Medicare. Just a few short months ago, every member of the Republican caucus voted for protection for both Medicare and Social Security. What has occurred that would lead them now to forget Medicare?

This is not a wise course. In the name of protecting Social Security, this amendment would cut Medicare. The sequester that is provided for in this amendment says, if we are on the edge of going into Social Security, cut Medicare, cut defense. It is one-trick pony. It does not matter whether the deficiency was caused by a tax cut, by an economic downturn, or by excessive spending, the answer to each and every one of them is the same: cut spending. It does not matter if the problem was caused by a big tax cut; it does not matter if the problem was caused by an economic downturn, the answer is cut spending. It is not a balanced approach.

The assertion that there is no Medicare surplus simply does not fit the facts. This is the report of the Congressional Budget Office. On page 19, under the table “Trust Fund Surpluses,” it shows Social Security in surplus, it shows Medicare Part A in surplus, it shows Medicare Part B in rough balance.

The argument that the Senator from Ohio is making is that because we have chosen, as a Congress, to fund Part B, in part by general fund transfers, that means Medicare is in deficit. That is not the case. That is not the definition of the Congressional Budget Office; that is not the definition of the Office of Management and Budget. All of them assert there is a surplus in Part A and rough balance in Part B.

We, as an Congress, have made the determination to finance Part B, by premiums in part, by general fund transfer in part.

This is not an amendment we should adopt.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, we already have a Social Security lockbox. The pending amendment contains matter within the jurisdiction of the Senate Committee; therefore, I raise a point of order against the amendment pursuant to section 306 of the Congressional Budget Act.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. VOINOVICH. Mr. President, I move to waive the applicable provisions of the Budget Act and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The question is on agreeing to the motion.

The clerk will call the roll.

Mr. REID. I announce that the Senator from New York (Mrs. CLINTON) and the Senator from New York (Mr. SCHUMER) are necessarily absent.

Mr. NICKLES. I announce that the Senator from Pennsylvania (Mr. SANTORUM) is necessarily absent.

The PRESIDING OFFICER (Mr. JOHNSON). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 43, nays 54, as follows:

(Roll Call Vote No. 222 Leg.)

The PRESIDING OFFICER. On this vote, the yeas are 43 and the nays are 54. This three-fifths of the Senate duly chosen and sworn not having voted in the affirmative, the motion is rejected. The point of order is sustained and the amendment falls.

Mr. STEVENS, Mr. President, I move to reconsider the vote and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 873

The PRESIDING OFFICER. There will now be 4 minutes of debate equally divided before a vote in relation to the Hollings amendment. The Senator from South Carolina is recognized.

Mr. HOLLINGS. Mr. President, in the first part of April when we passed my amendment authorizing a rebate, we had a $102 billion surplus. Now, as of 3 o'clock this afternoon, according to the Secretary of the Treasury, the public debt is $417 billion—a anybody can read it on the Internet—the debt now, instead of being a surplus, has increased since the beginning of the fiscal year to $36 billion in the red. In
other words, we don’t have the $41 billion for a rebate. We have to go out and borrow it.

Common sense says that rather than going out and borrowing money and throwing it to the winds, increasing the debt, the public would prefer that we pay down the debt. At least that is what we are doing. If you look on the screen on channel 2, the Republican channel says “abolishes a tax rebate.” “President Bush and Congress promise to the American people...”

They didn’t promise it. It was my amendment. I promised, as the financial world advised me, that it should apply to all taxpayers. What they have done is broken my promise. Nothing is in this bill for the 25 million payroll-tax payers. In other words, you and I, Mr. President, will get a rebate, unless you vote for my amendment. But the payroll-tax payers, such as Dicky Flatt—I don’t know where the Senator from Texas is, but Dicky Flatt, the fellow who hikes and pays the taxes, and builds the country, and sits around the kitchen table” gets nothing.

Now, come on. If there is a conscience around here, let’s talk sense. Save that $41 billion. We need it for defense. We need it for education. We have increased education spending to $25 billion a year, $250 billion over 10 years. We need it for prescription drugs. Let’s don’t throw the money around and then cry the rest of the year here that we don’t have the money.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. GRASSLEY. Mr. President, I rise in strong opposition to the Hollings amendment. The Hollings amendment would repeal the retroactive marginal rate cuts enacted on June 7th of this year. That is barely over 1 month ago.

My opposition to the amendment is based on both procedural and substantive grounds.

On the first problem the amendment’s procedural problems, it is clear that, if adopted, this amendment will cause the underlying supplemental appropriations bill to violate the origination clause of the U.S. Constitution. If sent to the House, the bill would certainly be “blue-slipped.” So, this amendment, if adopted, kills the supplemental.

The second problem is the substance of the amendment. This amendment would repeal all of the retroactive marginal rate reductions in the recently passed tax bill. Those rate cuts are based principally on the new ten percent bracket for the first $6,000 of income for taxpayers and $12,000 of income for married couples.

The retroactive new ten percent bracket is the basis for the advance refund checks of $300 for a single person and $600 for a married couple. The Hollings amendment stops these checks dead. The Hollings amendment is a way to say no to American taxpayers who now expect to receive refund checks. A vote for the Hollings amendment is a vote against the stimulus in the tax bill we just passed.

Mr. LIEBERMAN. Mr. President, I will vote for the Hollings amendment and wish to explain my reasoning. The amendment focuses on the consequences of the massive tax cut, namely that we are facing a Hobson’s choice—either raid the Social Security and Medicare HI trust funds or forgo needed spending on defense, education and other priorities. This is a choice that will bedevil us for years to come until we come to our senses regarding a tax cut that is not acceptable.

The Hollings amendment seeks to avoid this Hobson’s choice by rescinding a portion of the excessive tax cut. I would prefer that he rescinded aspects of the tax cut other than the rebates. I was an early advocate of rebates to help us with the current economic slowdown. I was disappointed in the rebate that was finally adopted in the tax bill because it is not being paid to tens of millions who filed tax returns, but I still support rebates.

If we don’t face reality regarding the tax cut, however, we will be faced again and again with the Hobson’s choice regarding the trust funds. We have urgent priorities to modernize our defense establishment and to fund the education reform initiative, both issues where I have expended considerable effort over the years. The problem we will face is that so much of the government’s revenue base has now been spent that any national priority that requires more defense or education, will have to be shelved or funded at the expense of the trust fund surpluses.

As Chairman CONRAD has explained, the President’s budget plan means we may well raid these trust funds this year even if we do not go forward with these urgent priorities. We won’t know for sure until the new budget estimates are provided in August and at the end of the fiscal year, but we may spend down these trust funds even if we do not exceed the budget resolution limits.

I applaud Senator HOLLINGS for raising this issue, and for seeking to avoid this Hobson’s choice. While this amendment affects rebates that I support, it brings needed attention to the overall box the Administration has placed us in and the difficult choices we will have to make. This amendment attempts to avoid our dipping into the trust funds. It is only as if we want to take the money back from the people before we ever give it to them.

They are saying: Congress did something right. And those who look at the American economy say: Hey, they did something right. It is about the right time to have a big tax cut.

I do not believe you will find one economist of renown and repute in the United States who will say in the middle of this downturn we should increase taxes. Ask somebody. I asked a bunch of them. They said this might not be the greatest tax plan, but cut the taxes and leave it alone.

I say to my friend, Senator HOLLINGS, he did a good thing when we had the budget resolution before us. He was ahead of us. He said put more of it in the early years. We went off to conference and followed his admonition. Now he thinks that is too much.

The checks that are in the mail, if they could get at them, knowing the power of Congress, could be stopped in a week if we adopted this amendment.

It is the wrong thing to do to the people; it is the wrong thing to do for the American economy, and certainly for
the Congress it is absolutely the epit
ome of moving in the wrong direction
when the country has problems.
I yield the floor.

The PRESIDING OFFICER. The ques
tion is on agreeing to amendment No.
873. The ayes and nays have been or
dered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Sen
ator from New York (Mrs. CLINTON) and
the Senator from New York (Mr. SCHU
MER) are necessarily absent.

Mr. NICKLES. I announce that the Sen
ator from Pennsylvania (Mr. SANTOR
UM) is necessarily absent.

The PRESIDING OFFICER. Are there
any other Senators in the Chamber des
iring to vote?

The result was announced—yeas 3,

NOTVOTING—3

The amendment (No. 873) was re
jected.

Mr. REID. Mr. President, I move to re
consider the vote and I move to lay that
motion on the table.

The motion to lay on the table was
agreed to.

Mr. REID. Mr. President, I ask unan
imous consent that when the Senate con
siders the following amendments, they
be considered with the following limita
tions, with no second-degree amend
ments in order prior to the vote in rela
tion to the amendment: Wellstone amend
ment No. 874, there will be 60 minutes
equally divided and controlled in the usual
form; on the Schumer amendment, No. 862,
there will be 30 minutes equally divided and
controlled in the usual form.

The PRESIDING OFFICER. Is there
objection?

Mr. STEVENS. Reserving the right to
object.

The PRESIDING OFFICER. The Sen
ator from Alaska.

Mr. STEVENS. I suggest the absence
of a quorum so we may examine this
amendment for just a minute.

The PRESIDING OFFICER. The clerk
will call the roll.

The assistant legislative clerk pro
ceeded to call the roll.

Mr. STEVENS. Mr. President, I ask
unanimous consent the order for the
quorum call be dispensed with.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. STEVENS. I have no objection.

The PRESIDING OFFICER. Without
objection, it is so ordered.

The PRESIDING OFFICER. The Sen
ator from Nevada.

Mr. REID. Mr. President, I suggest
the absence of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The assistant legislative clerk pro
ceeded to call the roll.

Mr. WELLSTONE. Mr. President, I ask
unanimous consent the order for the
quorum call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. REID. I say to my friend from
Minnesota, we almost have this worked
out so that everyone will know what is
happening until the end of the day. I
know my friend from Minnesota is anx
ious to offer his amendment. We have
imposed upon him to offer his amend
ment out of order. If we wait another 2
or 3 minutes, everything could be done.
I ask if my friend objects if we go into
a quorum call for a couple more min
utes.

Mr. WELLSTONE. Mr. President, I was
trying to accommodate Senators.

I suggest the absence of a quorum.

Mr. BYRD. Will the Senator yield be
fore he puts in the quorum call?

Mr. WELLSTONE. I yield.

Mr. BYRD. I merely want to say, in
explanation, that the Senator from
Minnesota was about to proceed at my
request. I did not know the state of the
situation. I apologize for that. But I
thank the Senator for yielding.

Mr. REID. I say to my friend, before
we go into a quorum call, that very ef
ficient staff have typed up a couple dif
ferent versions of a unanimous consent
request, the final one of which should
be here momentarily. I have been con
ferring with the minority manager, and
we should have it just about wrapped
up. I say to my friend from West Vir
ginia.

Mr. BYRD. Mr. President, if the Sen
ator would yield, in the words of Alex
ander Pope: 'Thou art my guide, phi
losopher, and friend.'

Mr. WELLSTONE. Mr. President, has
my colleague suggested the absence of
a quorum?

The PRESIDING OFFICER. No.

Mr. WELLSTONE. I suggest the ab
sence of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The legislative clerk proceeded to
call the roll.

Mr. REID. Madam President, I ask
unanimous consent that the following be
the only first-degree amendments re
maining in order to S. 1077, that any
votes ordered with respect to these
amendments occur in the order in which
the amendment is debated, and that no
second-degree amendment be in
order prior to a vote in relation to the
amendments in order prior to the vote
in the usual form; McCain amendment
No. 874; Bond amendment No. 872, with
30 minutes equally divided and con
trolled in the usual form; McCain amend
ment No. 869; Feingold amendment No.
868; Schummer amendment No. 862; a
man
agers' amendment, with 5 minutes
equally divided; provided further that
there be 30 minutes of general debate
on the bill, with Senators McCAIN and
GRAMM of Texas controlling 5 minutes
each, and the remainder equally con
trolled by the two managers, Senators
BYRD and STEVENS; that upon the use or
yielding back of all time, the Senate pro
ceed to vote in a stacked sequence,
with 5 minutes equally divided and con
trolled between each vote, and that
the votes, after the first vote, be 10
minute votes, and that the first vote in
the sequence not occur prior to 7:45
this evening.

Madam President, we are hopeful and
confident we can make the 7:45 time.
We have spent a little time trying to
come up with this agreement. This has
been gone over with Senator BYRD.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The legislative clerk proceeded to
call the roll.

Mr. STEVENS. Madam President, I ask
unanimous consent that the order for the
quorum call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. STEVENS. Wellstone amendment
No. 873, Bond amendment No. 872, with
30 minutes equally divided and con
trolled between each vote, and that
the votes, after the first vote, be 10
minute votes, and that the first vote in
the sequence not occur prior to 7:45
this evening.

Madam President, we are hopeful and
confident we can make the 7:45 time.
We have spent a little time trying to
come up with this agreement. This has
been gone over with Senator BYRD.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk
will call the roll.

The legislative clerk proceeded to
call the roll.

Mr. STEVENS. Madam President, I ask
unanimous consent that the order for the
quorum call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. STEVENS. Madam President, I ex
press my appreciation to my friend from
Minnesota who is his usual cour
teous self. He has been very patient. I
yield the floor for the Senator from Minnesota.

Mr. WELSTONE. Madam President, I call upon amendment No. 874. The PRESIDING OFFICER. The amendment is pending. Mr. WELSTONE. I thank the Chair. Madam President, this amendment would increase funding for what is called the LIHEAP, the Low Income Energy Assistance Program. It would provide $150 million in emergency funding for this fiscal year for the LIHEAP program.

The amendment would be offset directing the Secretary of Defense to rescind $150 million in fiscal year 2001 funds out of administrative costs.

There have been many General Accounting Office Inspector General studies of the Pentagon budget that have talked about administrative waste going far beyond $150 million. Out of the whole budget, we are just saying take $150 million from all of the administrative waste—talking about tens of billions of dollars—and transfer that to the Low Income Energy Assistance Program.

This is a safety net program which provides essential heating and cooling assistance to almost 5 million low-income people, many of them senior citizens, many of them disabled, many of them working poor, many of them working poor families with children.

Let me explain why I bring this amendment to the floor. Right now, national estimates show—and this is shameful—that only 13 percent of the households eligible for the Low Income Energy Assistance Program actually receive any assistance at all. That is because since 1985, accounting for inflation, the truth is, the funding has declined. For many low-income families, the energy costs are as much as 20 percent of the monthly budget.

The Low Income Energy Assistance Program is a lifeline program that provides additional grants of money to people when they are in dire need of such assistance. When they don't get this help, if they are elderly, they don't buy the prescription drugs they need. They don't eat what they should be eating.

They don't have enough money for food. I am not exaggerating.

I am also talking about cooling assistance. While I come from a cold-weather state, the LIHEAP emergency cooling assistance, and for many States that is not unimportant. There are poor people, many of them elderly, who run into a lot of difficulty. We have had some summers when they died from exposure to the heat, struggling with whatnot and without any cooling assistance whatsoever.

I recognize the hard work that has been done by the Senate Appropriations Committee. In his supplemental request to the Congress, President Bush requested only $150 million of additional emergency funding. I am sorry. I have to say it: This does not represent “compassionate conservatism.” It was inadequate. The President's request would not even have been enough to assist low-income families who are currently in arrears from this past year's devastating winter.

Chairman BYRD and Chairman STEVENS, recognizing the inadequacy of the administration's request, doubled it. They deserve the credit for doing so. However, while the $150 million requested by the President was inadequate, the $300 million certainly does a better job, but it is far from adequate. It doesn't meet the needs of millions of people, and seniors who are facing unbelievable energy costs no matter where one goes in the United States.

In addition, all of the LIHEAP funds appropriated for this year have been released, and nearly half the States have already exhausted or nearly exhausted their funding.

It is clear that we are currently nearing a crisis situation. A study was just completed by the National Energy Assistance Directors Association, and they found that 28 States and the District of Columbia were either out of funding or had very low balances; States reporting that they were out of funds: The District of Columbia, Iowa, Kansas, Maine, Minnesota, Montana, New Hampshire, New Mexico, Rhode Island, Washington, and Wisconsin; States reporting very low balances: Alabama, Colorado, Delaware, Georgia, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, Nevada, New York, North Carolina, Texas, Vermont, Virginia, and Utah.

This survey also found that arrearages and threats of shutoffs increased to 4.3 million households. This past winter was a living hell for a lot of low-income people. Energy costs in the State of Minnesota went up 40 percent. We have this deadly combination of our increased demand for assistance this winter season, and summer programs have greatly benefitted low-income households, providing them with more fuel for their money.

The amendment could be offset again by directing the Secretary of Defense to transfer $150 million from the whole Pentagon budget in administrative expenses for fiscal year 2001. I want to remind colleagues that the President has requested $343 billion for the defense budget in the next fiscal year, at a time when the Department can't even complete an internal audit. I am just saying transfer $150 million in administrative expenses.

This amendment is clear. It is a lifeline program. It is a lifeline program. It is for the most vulnerable citizens in our country. We have not provided the funding and the assistance that is necessary, and it is the reason I bring this amendment to the floor—recognizing the good work of the Appropriations Committee. As a Senator from Minnesota, I listed all sorts of other States that are in trouble right now either for cooling assistance or in trouble as they look to this next year.

We ought to be providing the funding. This is just one vote that calls on us to try to get our priorities straight.
The President’s $150 million was hardly compassionate conservatism; doubling it was good work, but it doesn’t come close to the needs. The next 3-month period doesn’t come close for what is needed for cooling assistance, doesn’t come close for what use States can make to provide assistance to people so they don’t get cut off by utilities. It doesn’t provide advance funding for States such as Minnesota that are going to wind up in a real financial crunch next year because the home heating costs are going to be high and we are not going to provide the necessary funding.

At the very minimum, can’t we take $150 million in administrative costs from the whole Department of Defense budget, which is well over $300 billion, and put it into emergency low-income energy-assistance tax cuts. It is really working poor people, for children, for the elderly, and for the disabled?

I say to my colleagues that we know right now this has been a successful program. We also know that the program has to be under-funded, and we know firsthand that over half the States in the United States of America are out of money. I gave you a report on which States are almost out of money. We have a hot summer month coming up, I do not believe that we should pass this opportunity to utilize the supplementary emergency vehicle, which is for emergency purposes, to bring additional relief to vulnerable citizens in this country. This amendment is a modest step in this direction, and I urge my colleagues to support it.

Also, because I know that the chairman and the ranking minority member want to continue to move things forward, I believe I have made my case, but I also want to kind of put this into a broader context. It is really working poor people, for children, for the elderly, and for the disabled.

I say to my colleagues that we know right now this has been a successful program. We also know that the program has to be under-funded, and we know firsthand that over half the States in the United States of America are out of money. I gave you a report on which States are almost out of money. We have a hot summer month coming up, I do not believe that we should pass this opportunity to utilize the supplementary emergency vehicle, which is for emergency purposes, to bring additional relief to vulnerable citizens in this country. This amendment is a modest step in this direction, and I urge my colleagues to support it.

Also, because I know that the chairman and the ranking minority member want to continue to move things forward, I believe I have made my case, but I also want to kind of put this into a broader context. It is really working poor people, for children, for the elderly, and for the disabled.

So we have amendments proposed that will add to the Pentagon budget and take away from workforce development, take away from displaced worker funds. On the Iron Range in Minnesota, LTV just shut down; 1,400 workers are out of work.

I say to my colleague from West Virginia, take away from the steel loan fund. What kind of tradeoffs are we getting into? This is becoming a zero-sum game. We have a strong defense, but we don’t help people who are out of work. We don’t help rebuild industries that are so critical, as a matter of fact, to our communities. We don’t put more money into education, and we don’t have money for prescription drugs or for job training.

We passed the Patients’ Bill of Rights. I am proud of this piece of legislation. The whole question of health security for all is still out there. Affordable child care: We all say we are for the children. Where is the funding for Head Start, and for affordable child care, and for affordable higher education?

What about veterans? Who is going to make the commitment to a decent health care budget for veterans? Who is going to do anything about homeless veterans?

I am just telling you that this is a small amendment, but this small amendment tells a larger story. I am not raiding Medicare or Social Security. I am not doing any of that. This is just a transfer. I am just saying, out of the huge, over $300 billion budget—the huge, over $300 billion budget—$150 million in administrative costs can be transferred to this program so that we can do a little bit better by way of helping vulnerable citizens in our country.

That is the amendment. I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from West Virginia.

Mr. BYRD. Madam President, I yield time in opposition to the distinguished Senator from Hawaii. Mr. INOUYE.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. INOUYE. Madam President, the Wellstone amendment, dealing with the Low Income Home Energy Assistance Program, is a very noble goal. I have no quarrel with this goal but, most respectfully, this matter has been addressed in this bill.

The amendment that is proposed would cut funding for the Department of the National Guard. It has a time when we are trying our best to increase funding. The amendment would allow the Secretary of Defense to choose which programs under his jurisdiction would be curtailed.

I think it is not a bad idea to curtail funding, but this blank check to administrative programs would force the Secretary to identify those that he considers of lower priority. I always ask myself: In a Senate of 100 Members, can we ever agree upon what is of more priority?

Most respectfully, I inform my colleagues that the Secretary could take funding from several items that this body has supported over DOD’s reluctance, and we have done this for many years.

For example, we have a fund for the Youth Challenge Program which takes high school dropouts and turns their lives around. It is a most successful program that is under the auspices of the National Guard. It has saved our Nation countless millions of dollars. We have kept these young students out of prison. We have kept them out of crime. I do not think any one of us would want to cut off that program. This amendment could very well force the Secretary to stop programs to clean up the environment. One may ask: In what environmental program is the Defense Department involved? Over the years, we have been closing bases, and all of our military bases, because the production of the National Guard. We have unexploded ordinance in the target ranges. There is oil pollution all over the place because we have had oil dumps. If the communities want to use these bases, how can they go about it under our laws? They have to be clean before people of the United States can utilize the bases that have been closed by the action of Congress. Do we want to stop that program?

Then we speak of our cultural heritage. The Department of Defense now has a Legacy Program which protects cultural heritage.

There is a program I am certain the author of this measure wants to see
continued, and that is the program which supports Native American tribes. For example, at this moment, we are closing clinics and hospitals, not only here but in Europe. We constantly find that our Native Americans do not have proper hospital facilities, and so we get these old, secondhand beds, old secondhand operating tables, and we end up using x-ray machines to help the first citizens of this land. Is that high priority or low priority?

Then we come to the National Guard. This has been a battle from day one. Is the National Guard of low priority or is it of high priority?

These are the types of programs the Secretary is likely to curtail or cut out to carry out the intent of this amendment. I argue that we are already underfunded in the Department of Defense. That is why we are hopeful this Senate will approve this measure which will add $5.5 billion to the Department. This amendment is a noble one, but I believe the wrong amendment. Others can speak more knowledgeably about the adequacy of funding. I know it is a worthwhile program, but understand, it is already fully funded for this fiscal year.

I have had people ask me: Why is the Department of Defense spending money for defense when we do not use an aircraft, when we do not use the carriers, when we do not use the submarines? Thank God, Madam President, we do not use the submarines. Thank God we do not have to use the bombers. Thank God we do not have to use the carriers because if we were using them, we would be at war. But since we are prepared, potential adversaries think twice before they decide to get into action with us.

Much as I admire the purpose, much as I admire the noble goal, I urge my colleagues to vote against the amendment. I yield back any time remaining.

The PRESIDING OFFICER. Who yields time? The Senator from Minnesota.

Mr. WELLSTONE. Madam President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Minnesota has 12 minutes 20 seconds.

Mr. WELLSTONE. I will take 3 minutes. I say to my colleague, I want to respond to my good friend from Hawaii by saying three things. First, there is not a better person in the Senate. I hate disagreeing with him. I listened carefully, and I want him to know in the language of this amendment, I make it clear:

In determining the accounts to specify, the Secretary of Defense shall take into consideration the need to promote efficiency, cost-effectiveness, it aims productively within the Department of Defense, as well as to maintain readiness and troop quality of life.

We do not talk about taking money out of any of the programs. We are not talking about cutting programs that are especially important for youth or especially important for Native Americans. We do not talk about anything that goes away from readiness and troop quality of life.

The only thing we are talking about is administrative expenses. The Pentagon has not even been able to complete its internal audit. We all know there is way more than $150 million in administrative waste in an over $300 billion budget. I am saying do not take it out of programs, and I am certainly saying do not take it out of anything that deals with troop quality of life or readiness. I am simply saying take it out of the administrative waste and put it into the Low Income Home Energy Assistance Program.

Mr. BYRD. Would the distinguished Senator from Hawaii yield me 3 minutes?

Mr. INOUYE. I yield 3 minutes.

Mr. BYRD. Madam President, this amendment would add another $150 million to the Low-Income Home Energy Assistance Program, in addition to the $300 million already included in the bill. The additional LIHEAP funds are offset by an administrative cut in the Department of Defense to which Mr. INOUYE has very ably addressed his remarks in opposition thereto.

I am a strong supporter of LIHEAP; it helps many low-income households facing rising fuel costs, pay to heat their homes. However, both the House and the Senate committee-reported version of this supplemental already recommend an additional $300 million for LIHEAP, which is double the amount recommended in the President's budget request. The committee-reported bill brings the fiscal year 2001 LIHEAP appropriation to $2 billion, and with the carryover funds from the prior year, funds available for LIHEAP would total $2.155 billion in fiscal year 2001. This compares to $1.844 billion in fiscal year 2000—an increase of $311 billion.

I commend the distinguished Senator from Minnesota. He makes a very compelling argument. Ordinarily I would want to support him in the position he has taken. However, the committee-reported supplemental, as I have already indicated, is a balanced bill; it is a fair bill. While I would like to provide additional resources for energy assistance to low-income people in the country, I believe the best way to quickly get supplemental LIHEAP funding to members of Congress is to approve the committee bill without this amendment so that the bill can be more immediately sent to conference and on to the President for his signature.

If I have any time remaining, I yield it back.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. On behalf of the committee, I move to table the amendment.

Mr. REID. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays are ordered.

The PRESIDING OFFICER. The vote will occur in a stacked sequence later this evening.

The Senator from Missouri.

AMENDMENT NO. 872

Mr. BOND. I call up amendment numbered 872, The PRESIDING OFFICER. The amendment is pending.

Mr. BOND. Madam President, in recent years we have witnessed some very serious and troubling discussions in the Appropriations Defense Subcommittee. We have noticed how American fighting men and women are being committed to engagements of all kinds all around the world. We know that the budget for the Defense Department has come down dramatically. When the Berlin Wall fell we could probably save 30 percent or more of our military budget because we could cut back and still maintain the force we needed. We were in a position where we were supposedly able to pursue two major regional contingencies at once. That was the theory.

Unfortunately, as we went farther and farther into more assigned missions, it became very questionable whether we could even do that. We asked questions from both sides of the aisle in our Appropriations Defense Subcommittee hearings about the resources we were providing for the Department of Defense. I believe it was
about 2 years ago about this time of year we had then-Secretary of Defense Bill Cohen before our committee, a former member of this body. We all respect him greatly.

I asked point blank: Mr. Secretary, do we have the money that is necessary to support our fighting men and women?

I believe his answer was something like: We do not have the resources available for the missions we have been assigned.

That was the beginning of the realization we had grossly underspent the Department of Defense.

I am very pleased we have a defense supplemental before the Senate. I know these are tight times. There has been an effort to work with the administration, with the bipartisan leadership of both houses, to find how we can provide vitally needed resources for the Department of Defense. My personal view is we may not have provided enough.

That is why I have offered this amendment.

On May 24 of this year, the Associated Press ran a story on cannibalization, the lack of military spare parts. According to a GAO report, the Pentagon system for dispensing spare parts for airplanes, tanks, and other equipment is broken and officials are not sure how to fix it. At least 154,000 times a year a military mechanic takes a part from one airplane and puts it on another because a new spare part is not on hand, according to the GAO.

This cannibalization is a very questionable process. It is a waste of time and money. It costs 1 million extra work hours a year and risks damaging the aircraft, as well as the morale of the mechanics doing the work, several testified. Cannibalized, a multi-million-dollar aircraft can sit idle for months or years, said Neal Curtin, GAO Director of Defense Issues. In one case, about 400 parts were removed from a plane that eventually had to be shipped by truck to the maintenance depot to be rebuilt. Witnesses said the cannibalization is widespread because the services are trying to maintain readiness on an aging fleet in a time of increased deployments.

LTG Michael Zettler, Deputy Chief of Staff, Air Force Installation, said cannibalization is only used when it is absolutely mission critical, and acknowledged in a prepared statement that it is done more than is desirable but blames some of it on design problems showing up years after abuse, resulting in a widespread need for more parts than specified, and fewer companies are making fewer parts—having left the market during the Pentagon 1990 downsizing.

Pentagon spokesman RADM Craig Quigley said: You do what you need to do given the availability of parts. It is largely an issue of funding. I use the family car as a good example. The older it gets, the more repairs you will do, but it is expensive to buy a new car.

This follows an earlier report that said the Department inventory management is ineffective and results in excessive stocks of some parts more than others. Though the problem has been under scrutiny since 1990 and the services have formed committees, study groups, and programs to fix it, no one has the statistics on how big the problem is, according to the GAO Director. Because they view cannibalization as a symptom of spare part shortages, they have not closely analyzed other possible causes or made concerted efforts to measure the full extent of the practice.

The Pentagon has been unable to document how many times it is done, the reasons, or how much time and money is spent and determine which cannibalizations are necessary, what alternatives are available, what improvements or changes need to be implemented, to what extent morale would be increased by reducing the workload.

My point in going through that article is simply to note that we are in a sorry situation where we are preparing to send our air men and women into combat without the spare parts we need. We grab a part from a Hangar Queen, another aircraft that is increasingly disabled, and take that one part to keep the planes flying. That means the planes we are cannibalizing are less and less able to carry out their assigned mission.

My amendment is, I believe and I hope, a responsible amendment which adds $1.430 billion for the fiscal year to the Defense Department. I believe the money is desperately needed by forces assigned. Because they view cannibalization as the best way to solve the problem, the problem is increasing.

I applaud and thank the President for his initiative in submitting this supplemental, but I do differ with the administration’s view that the funding currently provided is sufficient. Saying we will solve the problem in fiscal year 2002 is not going to help the problems we currently face as a result of the circumstances we have created. Our troops are tired of hearing us say help is on the way, only to be disappointed when it never comes.

It is time for us to show them that we, indeed, want to provide them the resources they need efficiently and safely to do the missions we give them. There are far too many examples of services being forced into situations where they must borrow from operations and maintenance accounts just to keep operations going and to purchase much-needed spare parts and equipment. Meanwhile, infrastructure continues to deteriorate at an alarming rate.

I will have printed in the Record excerpts from testimony of our most senior military personnel before the House Armed Services Committee in September of last year. For the benefit of my colleagues, allow me to read just a few.

From Admiral Vern Clark, Chief of Naval Operations, Department of the Navy:

I currently have a backlog of . . . $5.5 billion in infrastructure . . . We are currently not funding this account sufficiently so that we arrest the growth in critical backlog and we have to do better.

General Shelton had this to say:

We can ill afford to take from the current readiness accounts today. In fact, in some cases I think you’ve heard the Chiefs say they’ve still got shortfalls . . . We have
I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Madam President, I yield myself just a couple of minutes.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I have great respect for the Senator from Missouri. I am constrained to advise him, Senator Byrd and I gave our word to the Director of the Office of Management and Budget that we would not include any emergency funds in this supplemental appropriations bill this year. We did so because we were informed that there was, in fact, a substantial increase request to be presented by the President for the year 2002. We have, as all Members of the Senate know, received that request. It is substantial—over $18 billion. The amendment of the Senator from Missouri could not be spent before that would be available anyway.

So I hope the Senator might consider relying upon us to work with him in this measure and help us honor our commitment to the Director of the Office of Management and Budget.

I see my good friend from Hawaii seeks some time. Would he like to comment also?

Mr. INOUYE. Yes, if I may.

Mr. STEVENS. I yield to the Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. INOUYE. I wish to advise my colleagues that in crafting this supplemental bill we considered two criteria, and both of them were requested by the Republican administration, requested by the Department of Defense.

First, any program receiving supplemental funding must be able to execute this funding during the current fiscal year. The current fiscal year ends in 2 1/2 months, just a few days away. Second, that the funding could not wait until fiscal year 2002. It is the view of President Bush that the supplemental request has satisfied this objective.

I believe the modest changes made by the committee have improved this measure, increasing readiness and health care funding by $229 million.

I will remind the Senate that from fiscal year 2001, the Congress added $49 billion to the DOD budget, much of it for various programs that concern the distinguished Senator from Missouri, in some cases operation and maintenance funds appropriated for the same activities identified in the supplemental request, such as spare parts, base operations, and depot maintenance.

My point is, the Defense Subcommittee has a demonstrated record of considering both the funded and the unfunded requirements of the Department before marking up a piece of legislation.

The funding provided in this bill, most respectfully, I believe meets the urgent needs of the military within the funding constraints set by the budget resolution for fiscal year 2001 approved by this body.

This act avoids emergency spending to demonstrate fiscal restraint. Much of the funding proposed by this amendment could not be spent responsibly in 2 1/2 months. The Department would struggle to obligate the funds before the end of the fiscal year. Some would even be obligated to cover workload at the maintenance depots that would carry over to next year in violation of the Department's own restrictions.

I point out to the Senator from Missouri that the Appropriations Committee has addressed programs that he seeks to fund with his amendment. Specifically, runway repairs for the Masirah Airfield in Oman are addressed in the amendment. The committee has addressed the Army's second destination transport costs. Those funds were reduced in the bill passed by the House. It seems that the unfunded requirement list submitted to the Senator is currently outdated.

So for all the above reasons, Madam President, I therefore must oppose this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Madam President, I wonder if the Senator from Missouri would yield 2 or 3 minutes to the Senator from Arkansas.

Mr. BOND. Madam President, I would be happy to yield.

The PRESIDING OFFICER. The Senator from Missouri controls 36 seconds.

Mr. BOND. How much?

The PRESIDING OFFICER. The Senator from Alaska controls 10 minutes in opposition.

Mr. BOND. How much in support?

The PRESIDING OFFICER. The Senator from Missouri controls 36 seconds.

Mr. BOND. Thirty-six seconds. I would like to reserve the 36 seconds.

Mr. STEVENS. I yield the Senator from Arkansas 4 or 5 minutes.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. HUTCHINSON. Madam President, I thank the Senator from Alaska for yielding a brief period of time out of the military construction question.

I express my gratitude and my appreciation to Senator Stevens for his willingness to accept into the managers' amendment an amendment I had proposed that provides $24 million in emergency funding that is offset in the amendment but is essential for cleanup from devastating ice storms in the States of Arkansas and Oklahoma.

I also express my appreciation to the chairman, Chairman Byrd, for his cooperation in this very vital funding.

I will make my comments brief. I know there are many desiring to speak and many amendments we are considering. But while December of 2000 has
come and gone, and many have forgotten those many months ago, it will not be a thing it is quickly forgotten in the State of Arkansas. It is certainly a time I will never forget.

For many, it was anything but a merry holiday season. On December 12, and again on December 26, Arkansas was hit by major winter storms. The Arkansas Department of Emergency Services said: “These two storms combined created the most widespread and financially devastating disasters in our state’s history.”

Life in most parts of Arkansas came to a halt as snow, sleet, and 2 to 4 inches of ice covered much of my State for weeks. To the Senator from Alaska, that may not sound like much, but I will tell you, the damage, the devastation that was done was unparalleled and unprecedented in Arkansas history.

As a result of the December 12 storm, more than 250,000 Arkansans lost power, that was considered the worst storm in 70 years.

By the time the first storm passed, more than 40 counties in Arkansas had been declared disaster areas. FEMA officials came in and said they would be in the State to do preliminary damage assessments on December 26, but they could not do it on December 26 because on Christmas morning Arkansans awoke to sleet, which turned to freezing rain by late afternoon and continued for 3 days. Western Arkansas was covered with more than 3 inches of ice. Power lines were down, homes and vehicles were damaged by falling limbs, and over half a million electrical customers lost their power just at the time I will never forget.

Arkansas received a Federal disaster declaration on December 29. Eventually, 65 out of 75 Arkansas counties were declared disaster areas.

Despite the recovery efforts, many scars are going to remain in Arkansas for years and years to come. It is July and the Forest Service personnel are still working to remove damaged timber, reopen roads and trails, and repair facilities.

The Ouachita National Forest in western and central Arkansas took the brunt of the damage. The weight of the ice brought down an estimated 500 million board feet of timber. Now that Forest Service personnel have fought their way into many of the most remote areas of the forest, that estimate may increase to as much as 800 million board feet.

I personally visited the forest this spring. I was shocked at the extent of the damage. All 1.8 million acres of the Ouachita National Forest were damaged to some extent. Twenty-six hundred miles of roads and six hundred and twenty-five miles of trails were closed or blocked. Roads, trails, and recreation areas in the heaviest damaged areas remain closed even to this day.

Now fire experts have evaluated the fuel loading in the forest and found that it is, to some 10 times normal levels. Normally, there is about 5 tons of timber lying on the forest floor per acre. After the storms, that number jumped from 40 to 60 tons per acre. And in the hardest hit areas you get a little idea of what’s happening: in some of the worst hit areas have 90 tons of fuel per acre.

Wildfires on a 1.8 million-acre forest are difficult to respond to under normal conditions, but roads and trails into the most remote parts of the Ouachita are still impassable. So as the threat of fire grows with each passing summer month, my main concern is for the 843,000 Arkansans living along and around the Ouachita National Forest. And that doesn’t include the three Ranger districts in Oklahoma that are of interest to Senator NICKLES and Senator INHOFE as well.

The Forest Service is doing everything it can, but if the situation does not change, in the next two summers we will see uncontrollable wildfires in the Ouachita National Forest.

So I appreciate this $24 million being included in the managers’ amendment. I repeat the words of the Arkansas Department of Emergency Services: “These two storms combined created the most widespread and financially devastating disasters in our state’s history.” It is now impacting tourism. It is impacting our entire economy.

I have been working with the Forest Service, and I believe this $24 million will provide the kind of relief to ensure the proper cleanup of that fuel in the Ouachita National Forest.

The Senator’s time has expired.

Mr. Hutchison. I thank Senators Stevens and Byrd and yield the floor.

The PRESIDING OFFICER. Who yields time?

The Senator from Missouri.

Mr. Bond. Madam President, I claim the remaining time I have.

I appreciate very much the very strong statements made by the chairman and the ranking member of the Defense Appropriations Subcommittee. These are men of great experience, dedication, and understanding. I look forward to working with them to achieve what we think is vitally important in filling the readiness gap.

Madam President, I would like to have been able to pass the amendment that I have introduced, but having learned to count in third grade and not to count any more, I will not object to my amendment be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wisconsin.

Mr. Feingold. Madam President, I ask unanimous consent that the Senator now turn to my amendment, No. 863.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Feingold. Madam President, I ask unanimous consent that Senator McCain be permitted to offer his amendment upon completion of debate on the Feingold amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Feingold. Madam President, I ask unanimous consent that the Senator from Illinois, Mr. Durbin, and the Senator from Massachusetts, Mr. Kerry, be added as original cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Feingold. Madam President, this amendment strengthens America’s contribution to the Global Fund for HIV/AIDS, Tuberculosis, and Malaria, the plagues of the 21st century, and some of the foremost threats to security in the world. To pay for this funding increase, my amendment would make additional rescissions in procurement funds for the troubled V-22 Osprey program.

The global HIV/AIDS pandemic threatens security and stability around the world in a chillingly comprehensive way.

As Dr. Donald Berwick movingly wrote last month in the Washington Post:

The earth has AIDS; 36.1 million people at the end of the year 2000. In Botswana, 36 percent of adults are infected with HIV; in South Africa 20 percent. Three million humans died of AIDS in the year 2000, 2.4 million of them in sub-Saharan Africa. That is a Holocaust every two years; the entire population of Oregon, Iowa, Connecticut or Ireland dead last year, and next year, and next. More deaths since the AIDS epidemic began than in the Black Death of the Middle Ages. It is the most lethal epidemic in recorded history.

The International Crisis Group, or ICG, is a well-respected private, multinational organization founded to build international capacity to prevent and contain conflict. Many of my colleagues are familiar with their reports on international hot spots from Macedonia to Burundi.

The ICG recently released a report entitled “HIV/AIDS as a security issue.” This report states:

Where it reaches epidemic proportions, HIV/AIDS can be so pervasive that it destroys the very fibre of what constitutes a nation: individuals, families and communities; economic and political institutions; military and police forces. It is likely then to have broader security consequences, both for the nations under assault and for their neighbors, trading partners, and allies.

The report goes on to note that the crisis also affects personal security. As was noted on this floor recently, some reports indicate that if current trends continue, 15-year-olds in some of the most severely-affected countries will actually be more likely than not to die of AIDS.
The crisis affects economic security. Analysts predict that in Botswana, the pandemic will reduce government revenues, while the threat of fighting the disease increase by 15 percent.

The crisis affects communal security. In Lusaka, Zambia, I visited an orphanage, of sorts, where committed volunteers worked by day with nearly 500 children orphaned by AIDS. But by night, there was space for only fifty of these children. The rest were on the streets.

By 2002, some 40 million African children will have lost one or both parents to the disease. In Zimbabwe, even the healthy find it increasingly difficult simply to attend the many funerals of their families and friends and still fulfill their job responsibilities.

The crisis affects national security. According to UNAIDS, in sub-Saharan Africa, some military forces have infection rates five times higher than those of their civilian populations.

The crisis affects international security. Sub-Saharan Africa is in the midst of an urgent crisis. Infection rates are on the rise in Eastern Europe, Central Asia, South Asia, and the Caribbean. The consequences of this pandemic at all societal levels poses a serious threat to international peace and stability. Our country's prosperity and progress cannot be divorced from the global context in which we live.

That HIV/AIDS is a security issue is no longer revolutionary thinking. In January of last year, the National Intelligence Council produced an intelligence estimate entitled “The Global Infectious Disease Threat and Its Implications for the United States,” a report which framed the issue in much the same fashion.

Secretary of State Colin Powell said recently that he “know[s] of no enemy in war more insidious or vicious than AIDS, an enemy that poses a clear and present danger to the world.”

But while many have absorbed the astounding—in many ways terrifying—statistics about this crisis, and many, including our Secretary of State, appear to have grasped its terrible implications, the U.S. policy response remains woefully inadequate.

We have a real need for the need to do more. Today we have an opportunity to act.

Of course, addressing AIDS takes leadership, and as the chairman of the Committee on Foreign Relations, I am aware of the difference that energized leadership, such as that exhibited in Uganda and Senegal, makes and that it makes a critical difference when countries take on in a meaningful manner the fight against AIDS.

But America’s leadership is required as well. UN Secretary General Kofi Annan has called for a global fund to fight AIDS, tuberculosis, and malaria. This is a true emergency affecting national security. The United States must answer the call.

My amendment would increase funding for this vital effort by $593 million. And the funding in this amendment is completely paid for. According to the Congressional Budget Office, this amendment is budget neutral. The amendment offsets the increased funding, dollar for dollar, with reductions in procurement of the troubled V-22 Osprey program.

Over the last 2 decades, HIV/AIDS has infected 60 million people, killed more than 20 million people, slashed life expectancies, and has left millions of orphans in its wake. We now know to a certainty the national security reality of the AIDS pandemic. But even after 20 years of research, development, and testing, in my view, we still don’t know if the V-22 Osprey will work.

This amendment would not endanger the integrity of the Osprey production line, nor would it affect money that has been obligated as of April 2001. But serious questions and concerns continue to cloud the Osprey program. Thirty Marines have died in Osprey crashes since 1991. Unanswered questions remain regarding the validity of maintenance records and the safety and viability of this aircraft.

The final report of the blue ribbon panel appointed by former Secretary of Defense William Cohen to review the program recommended a “phased approach” to proceeding with the Osprey program. The blue ribbon panel concluded that the Osprey “is not ready for operational use.”

I agree with that conclusion. I also concur with the panel’s recommendation that procurement should be reduced to the minimum necessary to maintain the production line until the myriad design and safety problems are addressed and further testing is done to ensure that this aircraft is safe. My amendment does just that.

The underlying bill rescinds $513 million in Osprey procurement funds—$150 million from the Navy and $363 million from the Air Force. While I am pleased that the underlying bill zeros out the Air Force procurement budget for the Osprey, it still leaves about $944 million in the Navy’s aircraft procurement account for a program that has been grounded indefinitely and that is headed back into the research, development, testing, and evaluation stage for the foreseeable future.

The committee report accompanying this bill says that this funding will be used to procure eleven of the Marine Corps version of the aircraft, the deeply flawed MV-22. This is five fewer Ospreys than were authorized for fiscal year 2002, but in my view, it is still eleven more than we should build this year.

My amendment would rescind an additional $594 million intended for the Osprey from the Navy’s aircraft procurement account. It leaves enough funding in place to maintain the integrity of the production line and it does not affect the funding that the Navy has obligated for this program as of April 2001.

Based on the formula that was used when the Navy suspended production on two other troubled aircraft programs, the T-45A and the SH-60F, the minimum required to sustain the production line for the MV-22 is about $350 million. In the case of the T-45A, the Navy maintained the production line with 28 percent of its original funding; and 34 percent of the funding was maintained for the SH-60F. The $350 million that my amendment would leave in place is the average of what the Navy left in place to maintain the production lines for these two programs.

We know the Osprey is broken. The Navy and Marine Corps are working on ways to fix it. And we should allow that process to move forward. But, we should not spend scarce taxpayer resources on building new Ospreys that will require costly and extensive retrofitting later.

So I think this is a great example of where we have to make a choice, and I think the choice is clear.

My amendment would scale back funding on a troubled program that plainly needs a thorough review. And it would increase our response to the world’s greatest urgent threat to human life, the AIDS pandemic.

AIDS is a security issue, but it is also unquestionably a moral one. Our response is a measure of our humanity. We are not civilized, we are not just, and we cannot lay claim to common decency, if we simply accept millions of deaths and dismiss them as simply the problem of another continent.

Sadly, we are living in a time of plague. We have an obligation to fight it. History will judge us all.

Last month, the UN General Assembly conducted a special session on the pandemic. Let us begin today to match our response to our rhetoric. This amendment is fiscally responsible, it is the right thing to do, it is in the U.S. interest, and it reflects our national values. I urge my colleagues to support it.

I reserve the remainder of my time and I yield the floor.

The PRESIDING OFFICER. Who yields time to the Senator from Arkansas?

Mr. BYRD. How much time do we have, I ask the Chair?

The PRESIDING OFFICER. The Senator from Arkansas?

Mr. BYRD. How much time does the Senator from Arkansas want?

Mrs. LINCOLN. If either the Senator from Alaska or the Senator from West
Virginia will yield it. I will need about 3 or 4 minutes.

Mr. BYRD. I yield 4 minutes to the Senator.

Mrs. LINCOLN. Madam President, I am simply here to extend my heartfelt thanks to the chairman of the Appropriations Committee and to Senator STEVENS from Alaska for the people of Alaska.

Right before we broke for the Fourth of July recess, I joined with my colleague, JIM INHOFE from Oklahoma, in writing to both the chairman and the ranking member to express to them our concern on behalf of our constituents. During the winter of 2001, our home States of Arkansas and Oklahoma suffered through some of the most devastating storms in recorded history. On December 29, 2000, President Clinton declared a major disaster for our States, triggering the release of Federal funds to help people and communities recover from the severe ice storms that had blanketed our home States.

Unfortunately, the assistance provided to date has not been sufficient in getting our communities back on their feet. Farmers, ranchers, and timberland owners have been hardest hit. These ice storms added more than 10 times the normal amount of downed timber on the ground in Arkansas' Ouachita National Forest.

This year, Arkansas and Oklahoma have the potential to have one of the worst fire seasons in our history. With the massive amount of fuel on the ground, wildfires will burn extremely hot and fast, which will make it difficult to control or to contain. With the funding outlined in the emergency supplemental bill, our residents can complete the cleanup effort while also working to prevent massive forest fires this fall.

It would not be possible without the wonderful bipartisan working relationship of these two gentlemen who have worked steadfastly with both of our delegations to make sure we can provide our residents with what they need in order to keep our families, our forests, and certainly our communities safe. I thank both of these Senators on behalf of my constituents in Arkansas for the work they have been willing to put into this effort.

I yield back my time.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. I thank the distinguished Senator from Alaska for her exceedingly kind remarks concerning my efforts and the efforts of my distinguished colleague, Senator STEVENS from Alaska. There need not be any doubt in anybody's mind that the Senator stands up for her constituents and ably represents them. This is just another example of that. Madam President, how much time remains?

The PRESIDING OFFICER. The Senator from West Virginia has 2½ minutes. The Senator from Alaska has 5 minutes. The Senator from Wisconsin has 8½ minutes. The Senator from Alaska is recognized.

Mr. STEVENS. I thank the Senator from West Virginia for allowing me to proceed on this amendment. I do oppose the amendment Senator FENGOLD has offered. I do so because of my great interest in this system.

The V-22 represents the best new technology that has been developed for the Department of Defense. It is a system that is being developed by the military air system that I have seen in my time in the Senate. Unfortunately, it has had some bad circumstances, and we all regret deeply the difficulty it has had.

I have spent a considerable amount of time with the Marines, in particular, on this system and have discussed them personally with the Commandant of the Marine Corps. I will be very brief in saying that I believe this amendment is untimely and it is not in the best interests of our Marine Corps system.

I do believe, as the Commandant has written to me today, that the V-22 Osprey is the Marine Corps' No. 1 aviation priority. I think we should be very slow to terminate or disturb such a system which is being developed in the best interests of our men and women in the Marine Corps.

In particular, if it proves successful, as I pray it will, it will take our men and women across the beach. We will not see visions again in any war of our people hitting the beach and being slaughtered at the edge of the water. They will be able to fly from smaller ships and all over the place and enter into any battle zone by air, and they will have a better opportunity of survival and success in defending our Nation's interests in a time of war. It is a military asset of great value to our Department of Defense. I intend to oppose the amendment.

I ask unanimous consent that the letter sent to me today by General James L. Jones, Commandant of the Marine Corps, be printed in the Record.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HON. TED STEVENS, U.S. SENATE, WASHINGTON, DC.

DEAR SENATOR STEVENS, the restructuring of the V-22 program as recommended by the Panel to Review the V-22 results in proposed changes to the FY01 funding profile. Those changes were presented in the Administration's FY2001 Supplemental request.

Your committee subsequently marked the program, making adjustments to the Navy funding and zeroing the Air Force procurement funding. While the Marine Corps would prefer that the amendment remain a part of the bill, the Air Force continues to support the V-22 program as recommended by the Committee.

Mr. STEVENS. I yield the remainder of my time to the Senator from Hawai'i.

The PRESIDING OFFICER. The Senator from Hawai'i is recognized.
Mr. INOUYE. Madam President, I realize that time is limited. If I may, I will quote from the letter dated July 10, 2001, from the Commandant of the U.S. Marine Corps, GEN James L. Jones. I believe this one paragraph, the third paragraph, says it all:

As you know, Senator Stevens, the V–22 Osprey is the Marine Corps' number one aviation priority. It will revolutionize combat assault in a manner not seen since the introduction of the helicopter more than 50 years ago. The V–22 Osprey is the only vertical lift assault weapon aircraft that provides the combination of range, speed, and payload, which fulfills the Marine Corps' medium lift requirement. The Osprey met or exceeded all Marine Corps' key performance requirements. It carries three times as much, five times as far, twice as fast as the Vietnam era CH–46 Sea Knight it is replacing. The V–22 Osprey is a key enabler, allowing Marine expeditionary forces to rapidly respond to unpredictable, unstable situations throughout the world.

Mr. INOUYE. Madam President, this amendment will wipe out the V–22 program, and if at a later time we find it necessary to revive that program, it will cost billions.

I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time? The Senator from Wisconsin.

Mr. FEINGOLD. Madam President, of course, I have enormous regard for both speakers in opposition, the Senator from Alaska and the Senator from Hawaii, but I want them to know how carefully we crafted this amendment to avoid the consequence they both mentioned.

This amendment does not kill the Osprey program. It is not inconsistent with the statement of the Senator from Alaska that this may well turn out to be the best new technology. It is not inconsistent with the Commandant's letter where he says this is the No. 1 priority of the Marines. We do not contradict that at all.

In fact, I respect the fact there is a real effort out there to try to fix the problems with the Osprey. This does not kill the Osprey program. I understand some of our people sadly have died in these helicopters, but I also know yesterday there was an unfortunate accident involving the helicopters that they want to replace.

I want to be candid about this. There may well be a need for an improved helicopter. This amendment does not kill the Osprey program, and that is the only argument that has been made against it.

The amendment is carefully crafted. What this amendment allows is to have the research and the consideration that needs to be done on the Osprey actually completed, to have the tests done, to make sure people are going to be safe in this helicopter, and at the same time allow Senators to vote to do what they must do: To enhance the international effort against the AIDS pandemic. It is truly a win-win proposition that does not threaten the Osprey.

Specified by, in response to the Commandant's letter that was just printed in the RECORD, it simply is incorrect in terms of the budget implications. This amendment does not shut down the production line. That is what is being suggested, but it does not. There are still Ospreys in various stages of construction that are being built with both fiscal year 1999 and fiscal year 2000 resources. We do not impact those Ospreys. They will continue to be produced on the production line.

More important, the experts at the GAO have specifically stated a very different conclusion. According to the GAO, the Osprey production line is currently being maintained with the completion of between four and seven planes per calendar year. Four planes were delivered to the Marines in 1999; five were delivered in 2000; six planes have been completed since December 2000 but have not yet been delivered because the fleet remains grounded and no flight testing of those planes can take place.

Each Osprey costs about $83 million to produce. This amendment carefully leaves in place—it does not wipe out the program—$350 million in fiscal year 2001 money, plus the $102 million the Navy has already obligated, for a total of $452 million remaining in the program.

At $83 million per aircraft, this $452 million would purchase five Ospreys, and given the current production rate, as I just pointed out, no more than seven Ospreys have been delivered in any one calendar year anyway.

In my view and in the view of the blue ribbon panel, this program should be reduced from maintaining the production line until the aircraft undergoes redesign and further testing. It is still unclear how much retrofitting will need to be done on the existing Ospreys and how much it will cost or if it will be cost-effective or even possible to retrofit the existing Ospreys. The Department of Defense has said it will take about 1 year to do the additional research and testing needed to determine the status of the Osprey program.

Clearly, if we are talking about budget prudence and caution and making sure we do not waste millions of dollars, this amendment is the way to go. It is prudent to wait and see what the results of the tests are, obviously, before we increase the rate of production above the current five to seven per year.

I reiterate, we do not kill the Osprey program. We do not stop it. We simply make sure we only use it at the minimum level that it is currently and could be used and maintain the production line so it can be studied and so the additional resources that would have gone to it make a serious contribution to the fight against HIV/AIDS around the world.

Madam President, how much time do I have remaining?

The PRESIDING OFFICER. Four minutes.

Mr. FEINGOLD. Madam President, I yield 5 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Madam President, I think the Senator, I hope my colleagues who are following this debate in their offices will pause for a moment to consider what we are about. How many times have we come to this Senate Chamber and voted for resolutions, voted for ideas that say we are pledged to fighting the AIDS epidemic in Africa? Sadly, it has almost become commonplace.

We voted for amendments and budget reductions because, frankly, they are messages we send out for the world to read. But this amendment from the Senator from Wisconsin is real. It is an amendment which comes up with millions of dollars to deal with a crisis that faces the world; not just a crisis facing the United States, it faces the world.

This crisis is the AIDS epidemic in Africa. The Senator from Wisconsin visited Africa a week or two before I did last year. We both talked about it. It was a profound, transforming experience to visit a continent that is consumed with disease and to realize that people with whom you are having casual conversations are likely to be the casualty of those diseases. Whether it is AIDS, tuberculosis, or malaria, Africa is dying.

The question for all of us who live in this prosperity and wealth in the rest of the world is whether we care, and if we care, it is not enough to pass a resolution saying we care. The important test is whether we will put our money on the table. That is the test not only for this President but this administration, it is the test for all of us.

I support this amendment. I believe the Senator from Wisconsin is showing real leadership, and if all of the Senators who have voted for the resolutions expressing their heartfelt concern about this epidemic in Africa will come forward and vote for this amendment, I think we will have shown that we are prepared to put our money where our mouths have been.

I still think back to those moments in Africa when I was visiting. I just read on the way over here some of the things I had written and about which I had written. I thought about going to a clinic in Mbale, Uganda, and listening to a beautiful choir of Ugandans who were all dying from AIDS, who set up in front of us and sang a song entitled "Why Her, Why Me?" It was a profound, transformative experience.

As I looked into their eyes, I thought: I will never forget this, ever, the courage I saw in that clinic.
Their courage should be matched by our commitment. This disease, this epidemic is not just destroying Africa; it is for the rest of the world. Will we respond to this holocaust of the 21st century or will we turn away and say the most prosperous nation in the world cannot come up with a singular symbolic contribution to end this scourge? 

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Wisconsin.

Mr. BYRD. Madam President, I thank the Senator from Illinois not only for his tremendous eloquence but for his genuine compassion and commitment on this issue. It is moving to me to see a Senator stick to this effort and be willing to race down to the Chamber and speak in such a moving way. I thank him and hope we get the kind of vote this clear choice deserves. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Madam President, in 1983, at my request, we started the Army's infectious disease section to determine whether there could be a cure for AIDS or prevention of its transmission. Since that time, we have spent more money than all the world put together in trying to defeat AIDS. The way to help our great friends in Africa is to find a way to cure AIDS but not to take money from a system that needs protection under the Department of Defense.

Mr. BYRD. Does the Senator have anything further?

Mr. FEINGOLD. If the other Senators yield their time, I will yield mine.

Mr. BYRD. I have a brief statement. Mr. FEINGOLD. I reserve my time. Mr. BYRD. I intend to move to table if the Senator would like to speak prior to that motion.

Mr. FEINGOLD. If the Senator wants to proceed, I have no objection.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. I oppose the amendment proposed by the Senator from Wisconsin, Mr. FEINGOLD. This amendment provides funding to address the AIDS epidemic, which is a problem of astounding proportions affecting millions in the world today. There is a very laudable purpose behind the amendment. Unfortunately, in my opinion, the committee-reported bill which contains $100 million for the Global AIDS Program is a fair and commendable approach under the present circumstances and at the present time. The $100 million for the Global AIDS Program was included in the committee bill at my own request. I made the request at the urging of the distinguished majority leader, Mr. DASCHLE. The President's request supplemental funds for this purpose, but we worked in committee to identify non-controversial offsets for this important program.

I believe the committee has produced a fair bill, a responsible bill, a balanced bill. I believe the most effective way to get this aid to the people who need it is to approve the committee bill, without this amendment, so the bill can be taken to conference and sent to the President for his signature. I shall move to table and I do so with apologies to the distinguished Senator from Wisconsin who is, as I have already indicated, offering an amendment that is laudable. I think we have responded in the committee, and under the circumstances I think the committee bill should be approved as is with respect to this amendment.

I move to table the amendment, and I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays are ordered. The vote will be delayed until later this evening under the previous order. Under the previous order, the Senator from Arizona is recognized to debate his amendment numbered 869, with 2 hours equally divided. The Senator from Arizona.

Mr. MCCAIN. Madam President, I am not quite ready with the amendment so I suggest the absence of a quorum. I understand the time will be taken from my allotted time.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MCCAIN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona.

AMENDMENT NO. 869, AS MODIFIED

Mr. MCCAIN. Madam President, I ask unanimous consent to send a modification to my amendment to the desk.

The PRESIDING OFFICER. Is there objection to the Senator's modification of his amendment?

Mr. BYRD. Madam President, reserving the right to object—I have no intention of objecting—if we may just study the modification momentarily?

Mr. MCCAIN. Yes. Madam President, I suggest the absence of a quorum, the time to be taken from both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MCCAIN. Madam President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Madam President, I remove my reservation.

The PRESIDING OFFICER. Without objection, the amendment is so modified.
Mr. McCain. I want to explain the modifying amendment removes the offsets of title XI of the maritime sub-
sidies and also the cut in the Export-
Import Bank subsidy. So the remaining
offsets will remain. I will go through
those in a few minutes, but I want to
emphasize that both the Export-Import
Bank and the Maritime
Guaranteed Loan Program have also
been removed. There have been in-
creases in the amounts of offsets for
transit planning and research to $90
million and job access to $116 million.
So I will now be glad to discuss that
with the managers of the bill, if they
have any additional questions.
I am pleased to have the support and
cosponsorship of Senators Lieberman,
Landrieu, Kyl, and Carnahan as co-
sponsors to this amendment.
Basically what it does is it adds a
total of $847.8 million in additional
spending, all of it for personnel, opera-
tions and maintenance, and a very
small amount, $45 million, for procure-
ment. So virtually all of this—$800 mil-
lion—should go toward—should go toward
the men and women in the military, the
Reserve personnel, including funds to re-
move sailors and Marines from food
stamps, and operations and mainte-
nance, which, as we all know, is very
badly understaffed—$800 million.
This amendment funds the bare min-
imum that the military services have
said they need. We must prioritize our
spending and, in my judgment, fully
funding the readiness of our forces
must be our first obligation. This
amendment will add $847.8 million to the
deficit of President’s supplemental
appropriations bill for fiscal year 2001,
yet it will not exceed the budget reso-
lution caps because it is fully offset by 12
separate rescissions from non-de-
fense programs. This amendment will
increase the President’s supplemental
budget request from $5.5 billion to $6.34
billion. Most of the funding offsets in
the amendment were added last year
by Congress in the fiscal year 2001 ap-
propriations bills and will not be obli-
gated by this October, according to
various agency heads. In other words,
much of the money I propose to rescind
will not be spent this year—no matter
how seemingly worthy the cause.
Later this month, the President will
send to Congress his Omnibus Onni-
bus Reprogramming Request for Fiscal
Year 2001. I am told that the re-
programming request is about $850
million. The services will have to repro-
togram or transfer critical money from
other key readiness and modernization
accounts to adequately pay and train
our service men and women. Our mili-
tary services, stretched thin and over-
worked, are raiding Real Property
Maintenance readiness funding—al-
ready $16 billion underfunded—and other key accounts, just to ensure that
they can pay much-needed bonuses to
retain servicemembers.
We have sailors, soldiers, airmen, and
marines—some still on food stamps—
living in very old, dilapidated homes
because the military services keep re-
programming critical funds to shore up
other equally urgent needs. In Arizona,
for example, there are marines at
Yuma Marine Corps Air Station living
in World War II-era barracks. Base
officials have warned that they have de-
ferred maintenance for the past 10
years because they need to fund higher
priorities—and who can blame them.
We should fund the services ade-
quately, instead of forcing them to
make a Hobson’s choice.
Recent terrorist threats have clearly
demonstrated the dangerous impact of
the military funding shortfalls. In late
June, U.S. Navy 5th Fleet warships in
ports of the Persian Gulf, the Red Sea,
and the Gulf of Oman were ordered to
sea, after several reports that Osama
Bin Laden, the world’s most notorious
terrorist, was said to be planning a
comprehensive attack on U.S. and
 Israeli targets in the Mideast.
The U.S. ships had to leave port,
since the U.S. Coast Guard—which had
primary responsibility for protecting
U.S. Naval ships after the USS Cole at-
tack—had to pull out its port security
due to lack of adequate funding for
the U.S. Navy, whose budget already is underfunded. The U.S. Navy then had to implement
an emergency Presidential recall of
Navy Reservists, resulting in a nearly
$2 million unfunded liability not ad-
dressed in this supplemental. This
amendment pays for these critical
increases in military readiness and reforming our mili-
tary is as strong today as it was then.
It is my firm belief that as elected offi-
cials, providing for a strong national
defense is our most serious obligation.
Anyone who dismisses our readiness
problems, our concerns with morale
and personnel retention, and our defi-
cienies in everything from spare parts
to training is blatantly ignoring the
dire reality of this situation.
Too often in the last century, we
ignored warnings from the military that
our armed forces were too weak to
meet the many grave challenges they
face. Today, we must listen to our com-
manders, so as not to repeat the mis-
takes of the past.
There are also some who believe that
they need at least $30 billion more
per year for modernization and readi-
ness accounts. Listen to detailed testi-
mony before the House and Senate
Armed Services Committees on Sep-
ter 27, 2000. We examined, eight months ago—by our current Joint Chiefs on the
underfunded needs of our military ser-
vice, and the dramatic, harmful con-
sequences likely to occur if we fail to
adequately fund these requirements.
General Henry H. Shelton, Chairman of the Joint Chiefs of Staff:
[Continuing to improve our current readi-
ness posture to desired levels while preparing
for tomorrow’s challenges will require addi-
tional sources. The $60 billion pro-
jected by the QDR [for procurement] will not
be enough to get the job done.
General Shelton concludes:
[Our long-term ability to sustain our military equipment posture is in direct cause is due to the negative effects of a higher
than planned tempo of operations on our aging equipment. This high tempo and the
associated wear-and-tear require more fre-
frequent maintenance and repair, further high-
lighting the need for recapitalization and
modernization of our forces. Moreover, we
have not been able to procure enough new
equipment to reduce the average age of our
force structure. It is also important to note
that we believe this higher maintenance
tempo also has an impact on the
hardworking troops attempting to main-
tain this aging equipment, which directly
impact retention of our quality force. At
posts, camps and stations, such items as
housing, fuel lines and water lines, as well as
facilities where people work and live, have
outstripped their useful life. . . . and this
dire reality impacts our ability to make a de-
cent quality of life for our troops. . . . How
much more funding is needed? . . . Well in
excess of $60 billion is needed to maintain our
readiness.
Gen. Eric Shinseki, U.S. Army Chief of Staff, testified that $30 billion more
per year is a move in the right direc-
tion, but even that does not take into
account Army transformation costs or shortages in critical ammunition needs.

We have training shortfalls in institutional training, training support, training range modernization, and combat training center modernization. Real Property Maintenance is currently funded at 75 percent of requirement, a funding level that will not slow or prevent the ongoing deterioration of existing Army facilities. At this rate, it will take the Army about 157 years to fully revitalize our infrastructure.

Any of my colleagues who read the recent study conducted by the U.S. Army about the personnel situation in the U.S. Army today should be appalled and deeply disturbed by the findings of the U.S. Army about the lack of confidence amongst the young men and women about their leadership, about their future, about their lack of desire in retention. We are losing captains in the U.S. Army at a greater rate than at any time in the history of the U.S. Army.

Adm. Vern Clark, Chief of Naval Operations, concurred in testimony that $30 billion more in total each year is required.

I am concerned about the inventory levels of Precision Guided Munitions. We are still below the current warfighting requirement. The shortfall of precision munitions is a major driver for our forces. As our current inventory, execution of a second MTW will rely more on the use of non-precision munitions, thereby increasing the risk to our pilots and the potential for collateral damage.

Madam President, I have a lot of quotes.

Admiral Clark continues:

It is critical that we begin to fund 100 percent of modernization, maintenance, recapitalization and training requirements. We have not been doing that. Improving the quality of our work is critical to both Real Property Maintenance and MILCON, both of which are seriously underfunded.

Admiral Clark continues:

[Manpower is our most urgent challenge. In retention we remain below our goal.] Today—

He is talking about last September—

I am 14,000 people short: almost 8,000 at sea, and 6,000 ashore. That has to be reversed soon. We are at war for people. It has to be rectified in our budget.

Gen. Michael E. Ryan, Air Force Chief of Staff, testified that the Air Force needs at least $1.5 billion more per year for modernization alone, including $220 million for basic ammunition:

We are at a point where failure to rectify modernization and readiness shortfalls can be directly proportional to how much time an aircraft is not available because of not having parts in stock or because maintenance is delayed on the aircraft to make it ready. Some of our units are not getting as much flying as they should get, because of lack of aircraft. The mission capable rates of our aircraft have declined by over 10 percent since 1991. Mission capable rates are directly proportional to how much time an aircraft is not available because of not having parts in stock or because maintenance is delayed on the aircraft to make it ready. Some of our units are not getting as much flying as they should get, because of lack of aircraft. The mission capable rates of our aircraft have declined by over 10 percent since 1991. Mission capable rates are directly proportional to how much time an aircraft is not available because of not having parts in stock or because maintenance is delayed on the aircraft to make it ready. Mission capable rates are directly proportional to how much time an aircraft is not available because of not having parts in stock or because maintenance is delayed on the aircraft to make it ready.

The Commandant of the Marine Corps, Gen. James L. Jones, testified that the Marine Corps needs at least $4.3 billion Real Property Maintenance backlog.

The amendment will help our service men and women recognize their Government’s firm commitment to: Adequately provide for modernization; ensuring equipment maintenance—including reversing the deficiency in spare parts availability—is adequately funded; sufficiently funding critical training needs, including flying hours; beginning to resolve the broad pay and benefits disparity that affects our service men and women; starting to reverse the high rates of attrition across the services; continuing to take service members off the food stamp rolls; and ensuring at least minimum force protection efforts to help prevent further U.S.S. Cole-type terrorist attack.

I urge your support for this critical amendment.

Madam President, I outlined shortfalls and deficiencies within the Department of Defense that far exceed—far, far exceed—this $847 million amendment.

But I would point out that this administration, with my wholehearted support, and this Secretary of Defense are doing everything they can to restructure and reorganize the military and impose necessary savings. I believe we have a good faith effort on the other side of the river at the Pentagon. I am proud of the efforts Secretary Rumsfeld is making. I look forward eagerly to supporting him in whatever conclusions and recommendations they make because he has gathered together some of the best military minds in America to come up with these proposals.

But they have not been forthcoming yet. We have some very deep and severe short-term needs. I was fully expecting—fully expecting—when this administration came in that there would be significant increases, including in this supplemental appropriations bill. I appreciate the efforts of the managers. But I say to the managers, it is not enough, nor is this amendment enough. But I cannot imagine why these urgent needs, which are being addressed on a personnel and operations and maintenance basis, would be rejected.

There may be some questions about the offsets.

There is a $30 million offset from the Department of the Treasury “Salaries & Expenses” for the 2002 Winter Olympics security. In this rescission we only
cut half of the money added for the Olympics by the Senate Appropriations Committee during markup of the supple-
mental bill that still leave $30 million for this program, adding to the $220 million in total Federal funding in the fiscal year 2002. It is difficult to un-
derstand why the need for Federal funding for safety and security pur-
poses determined that the games have more than quadrupled since the 1984 Summer Games in Los Angeles and more than doubled since the 1996 Summer Olymp-
ics in Atlanta.

Compared to the 23 venues spread over a 500-square-mile area used for the Los Angeles Olympic Games and the 31 venues located in 8 cities that spread from Miami, FL, to Washington, DC, for the Atlanta Games, the Salt Lake Games will utilize only 14 venues located in the significantly smaller geographical perimeter. Yet the cur-
total amount of Federal funding for safety and security purposes, which includes this $80 million in supplemental fund-
ing, is $220 million. The total funding for safety and security for Los Angeles, $65 million, and Atlanta, $96 million, combined was far less than what will be spent on the Salt Lake Winter Games. Last year’s GAO report demon-
strated that taxpayers have shelled out $1.3 billion in subsidies for Salt Lake City alone.

As to the NASA shuttle electric aux-
iliary power units, $19 million: This amendment would rescind the remain-
ing $19 million of FY 2001 funds for this program, whose implementation NASA has chosen to terminate. According to NASA, the anticipated remaining fund-
ing for FY 2001 is $19 million. Follow-
ing the results of the EAPU review process that found technical flaws and cost overruns in the program, NASA has determined that the prudent course of action at this time is to terminate EAPU im-
plementation while NASA formulates a plan on how to proceed with this up-
grade project. The electric auxiliary power unit, EAPU is one of the several upgrade programs that NASA is de-
veloping for the Space Shuttle program.

As to the NASA life and micro-
gravity research, $40 million: The FY 2000 VA/HUD appropriations bill earmarked $40 million for a space shuttle mission, R-2 for life and micro-gravity research. Due to delays in overhauling the Shut-
tle Columbia the shuttle mission has been delayed and will not be launched in 2001. The supplemental appropri-
ations bill would broaden the use of the $40 million for life and micro-gravity research that was earmarked for a spe-
cial shuttle mission and other Space Station research in FY 2001. This amend-
ment would rescind this ear-
mrk.

As to the Commerce Department’s “Advance Technology Program,” known as ATP, $67 million: This amendment would rescind the funds that the Commerce Department carried over from last fiscal year and again and again expects to be left over again at the end of this fiscal year. The President’s FY 2001 request for the program was $67 million; this amendment funds rescission of no funds for the program. Historically, I have fought this program as cor-
porate welfare, because it has given awards to Fortune 500 companies such as General Electric, Dow Chemical, the 3M Company, and Xerox. As to the Labor Department unspent balances in worker employment train-
ing activities, $141.5 million: This is the same amount rescinded by the other body for this program. The House supplemental appropriations bill rescinded $359 million from the $1.8 bil-
lion in advanced funding provided in the FY 2001 Labor/HHS Appropriations Act for adult and dislocated worker employment and training activities. The Transportation Department $237.5 mil-
lion from these employment and training activities. We increase the amount rescinded by $141.5 million from these same activities so that we merely do the same thing as the House did and rescinded $359 million in total. Even with the rescission, States will still have $5.1 billion available to sup-
port these activities in 2001—$455 mil-
lion over amounts available in 2000. The reason for this rescission is that when the advance appropriations were provided, it was not anticipated that there would be such high levels of unspent balances in these programs.

As to the Transportation Department Job Access Reverse Commute Grants Program, $76 million: This offset in the amount of $76 million represents sur-
plus funds from the Job Access Reverse Commute Program account that re-
mained unused at the end of FY 2000. The enacted FY 2001 budget authority for this account was approximately $100 million and allocated to the surplus funds from FY 2000, this account con-
tained nearly $176 million. I have been infor-
mated by the budget office of the Department of Transportation that this account has a current unobligated balance of $146 million, which means that in the past 9 months of the cur-
rent fiscal year, only about $30 million has been spent. We are thus rescinding only $76 million out of the total amount, leaving nearly $30 million for the Transportation Department to use over the next 82 days for this purpose.

The Transportation Department transit planning and research, $34 mil-
lion: The offset of $34 million is surplus funds which remained in the transit planning and research account at the end of fiscal year 2000.

As to the Commerce Department International Trade Administration, Export Promotion Program, $19 mil-
lion: The International Trade Adminis-
tration Export Promotion Program helps U.S. industries export their prod-
ucts. This program amounts to a cor-
porate subsidy. There is no need to bur-
den the American taxpayers with this program. U.S. industries wishing to ex-
port goods and services should pay for this type of counseling themselves. The fiscal year 2001 supplemental appropriations bill appropriated $64.7 million to this program. According to the Department of Commerce, $21 million remains un-
expended in this account.

As to the Emergency Steel Guarant-
ee Program, $128.6 million: These are loan guarantees to qualified steel companies. There remains $128.6 million in unspent balances in the ac-
count for fiscal year 2001 out of a total appropriation of more than $129 mil-
lion. I am told that none of this money will be spent in the 82 days left in this fiscal year.

As to the Treasury Department U.S. Customs Service Byrd antidumping amendment funds rescission, $200 mil-
lion: The ‘‘corporate subsidy offset’’ was added in the fiscal year 2001 Agriculture appropriations conference report—the wrong way to do business, I say to the managers of the bill, the wrong way to do business. However, the important point is that the entire sum of money collected dur-
ing the current fiscal year under this law is not being spent. CBO scores the Byrd amendment at $200 to $300 million annually, and the chief financial offi-
cer of the Customs Service confirms this figure for fiscal year 2001. None of the money that is being collected throughout fiscal year 2001 will be dis-
bursed to companies this year. In fact, it will not be disbursed until the sec-
ond quarter of fiscal year 2002. The money that has been collected since the law was signed in October 2000 but which will not be disbursed in fiscal year 2001 is currently sitting unused in the general treasury.

I am philosophically opposed to this program. Loophole trade policy by taking antidumping duties levied to protect U.S. companies and actually redistributing duties collected to those very companies, providing them a dou-
bble reward: punitive tariff rates for im-
ports from overseas competitors, as well as a slush fund of public money.

Again, the point here is that none of the $200 million collected annually for this program will be spent this year and sufficient funds will be collected next. I fear this was the way the law’s fiscal year 2002 obligations.

I have described the offsets because every one of those programs which this money is being reduced from, most of it unused at this time, pales in signifi-
cance to the importance of taking care of the men and women in the military. Which is more important, decent hous-
ings for the men and women in the military or Commerce Department inter-
national trade administration export promotion programs?

We have to always set priorities. I argue that the priority that exists today and that those of us on this side of the aisle promised the American
people as a result of the election last year was that we would do a much better job of taking care of the men and women in the military than had been happening in the previous 8 years.

I strongly urge adoption of this amendment.

I yield such time as the Senator from Texas may consume.

The PRESIDING OFFICER (Mr. Corzine). The Senator from Texas is recognized.

Mr. GRAMM. Mr. President, I rise in support of this amendment. I support the amendment for a lot of reasons.

The most important reason I support it is that this is an amendment where a Member of the Senate has actually gone through a $2 trillion budget, a budget that spends $7,000 per man, woman, and child in America, and found a way to be below either the lower priority or the things for which he would increase funding in the military.

It never ceases to amaze me that in a government where we spend $2 trillion—no, $7 trillion—year after year, Members of the Senate stand up and offer amendments to increase spending on some favored program, and almost never, ever do they suggest that there is something in the Federal Government that is a lower priority than the thing they believe is a high enough priority to increase spending to fund.

I think you can quarrel, though I do not quarrel, but you can quarrel with almost any one of the choices the Senator from Arizona has made. But you can’t quarrel with the logic of the Senator from Arizona, which is that our job is setting priorities. He argues that operation and maintenance, housing, and improved capacity in the military exceed in value the list of the $800 million of expenditures he would reduce or terminate in order to fund his amendment.

I believe these kinds of amendments need to be encouraged. I am in support of the amendment and I intend to vote for it. Let me also say that it is hard for me to judge the statements being made about defense. I can’t forget that many of the same people who are now saying that there is virtually no limit to what we could use in defense, either they or their predecessors, 2 or 3 years ago, were saying that everything was great in an administration that was dramatically reducing the real level of defense spending.

I believe we do need a top-to-bottom review at the Pentagon. I agree with the Senator from Arizona that a good-faith effort—perhaps the best effort in 10 or 20 years—is being undertaken by the Secretary of Defense. That effort is not going to produce results that will be uniformly happy, and I would have to say that all of the proposals that have been looked at—and I agree with all the people who, with unhappiness and bluster, say it was done the wrong way, we weren’t notified, and there are 101 explanations for being opposed to something or to another—but the bottom line is, we had an effort underway to undo the one proposal to reprogram that had been made by the Pentagon. I think, quite frankly, that sets a very bad precedent. So I believe we do need a comprehensive review.

My dad was a sergeant in the Army. That is the extent of my knowledge about the military. I believe in a strong defense. I am proud of my record in supporting defense. I think I have a base of support for people who wear the uniform that is virtually second to none. But whether or not we need to be in a position to fight two major conflicts at once is something subject to question. I am a lot more concerned about modernization and recruitment and retention than I am about continuing to keep production lines alive. I think Eisenhower clearly was right when he warned us so long ago that even with our best intentions about defense, defense spending would be driven by political interests—something he called the "industrial military complex."

Let me sum up what I came over to say today. First of all, I commend the Senator from Arizona for being the first person in this Congress and the first person in a long time who really not only thought we ought to spend money on something we weren’t spending it on, but who was willing to actually name things he was willing to take it away from. It is interesting that all over America every day families make these kinds of choices. The washing machine breaks down and so they have to make choices. Maybe they don’t go on vacation. Or Johnny falls and breaks his arm and so they have to make choices and it costs money. They have to make choices, and they are hard choices. We never seem to make any of those choices. I am attracted to this amendment because it does make those choices, whether you agree with them or not.

Secondly, I believe we need more money for defense, but I think it has to come in the context of a dramatic reform of defense spending. I think one of the worst things we can do is to simply have a dramatic increase in defense spending without going back and making fundamental decisions about where the money needs to be spent. So I am not unhappy with where we are in terms of a comprehensive review. Once we have a new plan, once we set new priorities, then I am willing to do what the Senator’s amendment has done, which is to take money away from lower priority uses. But I do think it is important that we know what we want to do.

So I commend our colleague for the amendment. I support it. I did want to go on record as saying that I am concerned that many of our colleagues are ready to stop the one effort the administration has made in terms of changing our priorities. I think that sends a very bad signal. I think whether it affects individual States—and this is one that happens to negatively affect my State—I don’t think we can take the position that every program change ought to be opposed if it affects our particular State. I think in the end you have to look at the big picture. I think we are all expected to work for the interests of our States, but, in the end, it is the interest of the common defense of the country that defense spending is about.

I thank the Senator for yielding me time and for his amendment. I don’t have any doubt that, looked at in the aggregate, the $800 million of programs he believes would be the better $800 million or any one individual might be, the merits of those programs pale by comparison to the merits of the programs he has proposed to take the money from and use for the purposes of defense funding. That is what our appropriations committees are supposed to do, and unfortunately, it is not, and I think our Government is diminished as a result.

I yield the floor.

The PRESIDING OFFICER. Who yields time to the Senator from Minnesota?

Mr. WELLSTONE. I wonder if I might yield myself 10 minutes to speak in opposition to the McCain amendment.

The PRESIDING OFFICER. Of whose time does the Senator wish to consume?

Mr. WELLSTONE. In opposition to the McCain amendment.

Mr. STEVENS. There is an hour in opposition to the McCain amendment. On behalf of the chairman, I yield the Senator 10 minutes.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for 10 minutes.

Mr. WELLSTONE. Mr. President, first of all, I think we would be making a mistake to gut some important domestic programs that I think are critical to our being competitive in the global economy. I think it is critical that we make sure we also live up to the national security of our own country, which is the security of local communities where people really have the opportunity for dislocated workers to rebuild their lives, where we are able to make investments in industries that are critical to the economic life of our communities and our country.

I don’t doubt the judgment of the Senator from Arizona on some of the new spending that he believes is critical for defense. I argue that I believe we should be able to find this money within DOD’s budget.

I want to go over inspector general reports, which point to a very bloated, wasteful Pentagon budget, where there
is more than enough money to meet my colleague's challenge. I think the American worker, with the help of the administration, could do that. Much more could be done with the $800 billion in pork, like the $294 million for high-speed rail in California that is never going to be used. I think the American worker could contribute a great deal more than the $141.5 million that the Senator is suggesting, and I think it is a mistake. The Senator's amendment would rescind $141.5 million, and that is on top of the $217 million that we have already rescinded for job training programs under the Workforce Investment Act. My colleague from Arizona said the workforce investment decision was designed to bring the Senate rescission to what the House did but, in fact, the House did not rescind any funds. So I think my colleague is in error on that point.

More important, I think it is a mistake in these times. I am speaking as a Senator from Minnesota, but as I said earlier, on the Iron Range—which is a second home for me and my wife Sheila in terms of where we feel about the people up there—we saw LTV Company pull the plug, and 1,300 steelworkers are out of work. These are tac­onite workers. These were $60,000-a­year jobs, including health care. These families are trying to recover. These workers are now dislocated. They are looking for other work. In farm country and in rural parts of the State, many people have been left behind.

I think it is simply the wrong pri­ority to make additional cuts to ad­ditional rescissions in assistance for dis­located workers. It is just not right. It is not right. Moreover, in the Work­force Investment Act, which I wrote with Senator DeWINE in a bipartisan effort, we did things to make sense by way of streamlining and having a good public-private partnership, and by way of being consistent in terms of what our national priorities are, which I think is all about, again, the importance of human capital, the importance of education, the importance of people having the skills training and the peo­ple finding employment so they can support themselves and their families. I do not think it makes sense to make additional cuts in this priority pro­gram.

My colleague also would rescind nearly $127 million from the Steel Loan Guarantee Program. I do not know, but there are a lot of Senators, and I know there are Republicans as well, who come from a part of the country that is interested in the industrial sector is really im­portant, where we have had an import surge, where many workers, hard­working people—you cannot find any more hard-working people—are now losing their jobs, and we are talking about how to make an investment in this industry.

By the way, the steel industry is one of those industries that is critical to our national security, in the critical role the steel industry has played by way of contributing to de­fense, much less the infrastructure of highways and bridges within our own country.

Again, I find myself in major dis­agreement with this amendment.

Finally, I am going to look for resources for the new needs identified by Senator MCCAIN, I think we can find it right out of this bloated Pentagon budget. I have no doubt there is at least $1 billion of waste that the Sec­retary of Defense can identify. Let me talk about what the Pentagon inspec­tor general found by way of book­keeping entries that could not be tracked or justified:

- We identified deficiencies in internal con­trols and account systems related to General Property, Plant and Equipment; Inventory; Environmental Liabilities; Military Retire­ment Health Benefits Liability; and material lines within the Statement of Budgetary Re­sources. We identified $1.1 trillion in depart­ment-level accounting entries to financial data used to prepare DOD component financial statements. This was only supported by inadequate audit trials or by sufficient ev­i­dence to determine their validity.

This is not a new problem. In fiscal year 1999, the inspector general re­ported there was $3 trillion in en­tries that could not be corroborated.

Six years ago, the General Account­ing Office put the Pentagon’s financial manage­ment on its list of agencies that are at high risk for waste, fraud, and abuse.

The inspector general also has un­covered many other examples of gross overcharges in the Pentagon’s accounting system. A March 13, 2001, report listed the following gross abuses:

- The Pentagon paid $409.15 for a wash­room sink that cost the vendor $39.17, a 699-percent markup.
- The Pentagon paid $2.10 for a body protection plug that cost the vendor 48 cents, a 335-percent markup.
- The Pentagon paid $2.10 for a screw that cost the vendor 48 cents, a 335-percent markup.
- The Pentagon paid $409.15 for a wash­room sink that cost the vendor $39.17, a 945-percent markup.

The source: Office of Inspector General, Department of Defense report. This was March 13, 2001.

If we want to find the money, let’s look at some of the administrative waste within the Pentagon. We can surely find that money. We can surely make that transfer instead of going after priority programs that are also all about our national defense.

I argue, again, part of the definition of national defense is the security of local communities where dislocated workers return to rebuild their lives, to develop their skills, to find gainful employment where we have industries that have the capital that can generate the jobs on which people can support their fam­i­lies.

Why in the world would we want to make cuts in these programs? I believe this amendment reflects the wrong pri­orities, and I hope my colleagues will vote no.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. The Senator from Wyoming wishes to have time. I yield him 7 minutes from the time in opposi­tion to Senator MCCAIN.

Mr. MCCAIN. Mr. President, I thank the Chair.

Mr. President, I congratulate the Appropriations Committee for the fact they covered all of the expenditures. Senator MCCAIN be­lieved the expenditures, but before we vote for Sen­ator MCCAIN’s amendment, I ask that we give some serious concern to from where some of this money is coming.

I serve on the Small Business Com­mittee, and we have worked on a num­ber of ways to be sure people who lost jobs could have additional training. So I rise today to express some serious concern over the use of workforce in­vestment funds to offset 2001 supple­mental appropriations. While I do sup­port the transition from the Job Training purposes outlined in the underlying bill, dramatically reducing funding for State and local workforce development programs to pay for it does not seem prudent.

The problem, I recognize the pressures placed on the appropriators, but I would have expected that the Members responsible for oversight of such pro­grams would have been consulted as to the impact of such cuts on the pro­gram’s ability to fulfill its purpose.

The programs authorized by the Workforce Investment Act were agreed to through a strong bipartisan process, led by Senators DeWINE, KENNE­DY, Jeffords, Wellstone, and myself. I fear, given the apparent willingness to cut funding for the act, that we did too good of a job in 1998 when Workforce Investment Act was enacted. What I mean by that is that we successfully streamlined the often duplicative and dis­organized college and work pro­grams in existence prior to 1998. So now, if these rescissions are adopted, there will not be any alternative work­force investment programs for people to access. The point is, this money is the program. None of us can support this rescission and walk away thinking another workforce initiative will simply absorb our constituents.

Moreover, a retroactive cut of this size will compound the challenges that many States are already facing during the transitional period, under the Workforce Partnership Act, which my colleagues know as JTPA, to the Workforce In­vestment Act. Also—and no one is re­ally talking about this part—since States were due a portion of their an­nual allotment on July 1, they are now going to have to turn around and send a large portion of that back to Wash­ington in the form of a rebate check. This just does not seem right to me.

I do not have any formulas at hand to demonstrate the value of workforce de­velopment programs in the face of a slowed economy. It is simply too early too soon, but what I can offer my col­leagues is common sense. Now is not
the time for us to scale back basic skills training, re-training of displaced workers, or innovative initiatives designed to revitalize economic development in struggling communities. It is these communities that need our help, and that is help that we promised last year in the "regular" FY 2001 appropriations bill.

Again, my hope is that the dilemma facing our appropriators is not easy. There is consensus that we need to provide immediate additional resources to our military, our farmers and others whose distress is our responsibility. I also recognize that identifying unobligated current year appropriations in July is like finding a needle in a haystack, but rescinding funds from people who are trying to make themselves employable, to make themselves contributing members of society, and to stop only skimming fat off the top. This cuts to the bone in Wyoming and in countless other States. My State, for instance, was due to receive $555,420 on July 1 for displaced workers. I know this does not sound like a lot to those of you from larger States, and it is not a lot even in Wyoming, but it is crucial in Wyoming in the effort to address the counties that have been hard hit by unemployment. Now so instead of $555,420, we will receive 62 percent of that, or $345,000. That is a 38 percent cut of already appropriated money. We are not talking about cutting a request; it is already appropriated and should have been sent.

I can assure Members it will have an adverse impact on the progress we have made in the implementation of the Workforce Investment Act and will impact getting people retrained for currently useful jobs. My concern over this rescission is clear, and I will not belabor my opposition. I ask that the able managers of the bill reconsider using workforce investment funds to offset supplemental spending. I am happy to work with them and their House counterparts as they reconcile the two bills in conference.

I yield the floor.

Mr. INOUYE. Mr. President, I thank my friend from Alaska for yielding time. I wish to remind you of a comment I made in crafting this supplemental bill the Department of Defense considered two criteria. These requirements were that any program receiving supplemental funding must be able to execute this funding during the current fiscal year, and the current fiscal year has just about 2½ months remaining, and that the funding cannot wait until fiscal year 2002.

I also wish to remind the Senate that from fiscal year 1994 to fiscal year 2001 the Congress of the United States added $49 billion to the Department of Defense budget, much of it to the very programs that concern Senators from Arizona. Some of the unfunded requirements addressed by the Senator in this amendment were identified by the Secretary of Defense and February before the Bush administration began its own defense review. And some of these items are funded in the fiscal year 2002 request.

We are committed to working with the Defense Department to avoid a supplemental next year and fund all legitimate requirements. Many of the items identified by the distinguished Senator will be funded in fiscal year 2002 or through the omnibus reprogramming request.

We understand the Senator's amendment seeks to fund anticipated costs that DOD expects to materialize later this year. I wish to underline "anticipated costs" because the intent of the Senator's amendment to cover this cost is its merit. However, the committees of jurisdiction, the Armed Services Committee and the Appropriations Committee, have yet to receive this request. We have not received a request from the Department of Defense. The increases in question have not been scrutinized by either of those committees. Therefore, we cannot validate to our colleagues this day that the amounts identified by the distinguished Senator from Arizona are the ones that the Department of Defense truly needs. We understand and support the concept that the Senator offers in the amendment, but we do not believe we can support the amendment until the committees have had a chance to study, to scrutinize the specific details of the request.

Until such time, we cannot advise our colleagues that this is what DOD really needs. Therefore, I must stand in opposition to the McCain amendment.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Mr. President, I will read from an article in the Washington Post dated May 31, 2001, titled "Bush Eyes Additional $5.6 Billion For Military: Increase Is Far Less Than Services Expected," by Robert Suro and Thomas Ricks, Washington Post staff writers.

In part it states:

The supplemental budget request . . . does not include any new money for ballistic missile defense which [Rumsfeld] has depicted as a top priority, or for the weapons systems and operating costs that he said the Clinton administration had grossly underfunded. Some senior military officers and defense experts said yesterday the president's request is so small that it will not fully cover the Pentagon's current expenses.

"This request is the barebones, just the items that are absolutely to get by, and no one has any illusions that it is anything more than that," said a senior military officer speaking on the condition of anonymity.

The article goes on to say:

In the early days of the new administration, top military officials said they hope to get much more, at least $3 billion to $10 billion, in a supplemental that would, in effect, be the first installment of a Bush buildup. But the White House and Defense Secretary Donald H. Rumsfeld decided they would take care of only immediate needs in modifying this year's defense budget. New priorities will not be fully felt until the 2003 budget.

Although relatively small sums are at play, compared to that of the Bush defense budget, some senior military officers have complained: "On the campaign trail he said over and over, 'Help is on the way,'" said a military officer. "Well, we are going to need help when the fourth quarter of this budget year rolls around, and it is not going to be there."

In principle, supplemental spending requests are meant to provide relatively small amounts for contingencies that arise after the Federal budget is enacted. But the Pentagon, unlike other Federal agencies, has regularly used supplemental funds to fill out identity funds for basic operations, maintenance, and supplies. Rumsfeld has warned that in the event of a war or a large-scale attack, the outcome will be determined by the Pentagon's ability to mobilize its forces, and that the United States needs to be able to weather a potential crisis.

I certainly hope that will be the case. I challenge a Member of this body to find any member of the U.S. military leadership, any chief petty officer or corporal, who would tell them this is enough, that what is in the supplemental is enough.

I reserve the remainder of my time.

Mr. STEVENS. I yield 10 minutes to the Senator from Utah.

The PRESIDING OFFICER. The Senator from Utah.

Mr. BENNETT. Mr. President, I don't intend to be an expert in military matters, and I yield to those who do understand those matters. But I have to rise to oppose Senator McCain's amendment with respect to one of the offsets he has created that would cut the provisions in the supplemental in half for those funds that would be appropriated in support of the Olympic Games.

I understand concern about the Olympics. I understand the sense that this is a sporting event. What is the Federal Government doing with respect to a sporting event? But I have to point out a few things with respect to the Olympics that take it out of the realm of the pure sporting event.

The Senator from Arizona has talked about the Olympics in Atlanta as well as the Olympics in Los Angeles. I attended the Olympics in Los Angeles because I was living there, and I recognize that we live in a very different world than we did in 1984. The Olympics in Atlanta was the first Olympics at which we had a bomb in the United States, and as a result of the bomb at the Centennial Olympic Park, the whole structure that came following that, President Clinton issued Presidential Decision Directive No. 62, PDD 62, designating this as a Presidential event, changing the security arrangements of the Olympics forever. The whole circumstance surrounding the Olympics now, as a result of PDD 62 are focused on international terrorism in a way that they were not in the more simple...
days of the Los Angeles Olympics in 1984 or certainly even in Atlanta.

Now that PDD 62 was created as a Presidential event, we as a government are now faced with these circumstances. And $52 million of the $62 million called for in the supplemental go to the Treasury Department and to the Secret Service for a variety of functions surrounding PDD 62 and its requirements. The first deals with the core mission of the Secret Service which has to do with protecting the President, protecting foreign dignitaries, and dealing with counterterrorism. We are going to have an unprecedented number of foreign dignitaries attending these Olympics. That goes with every new Olympics. Every time there is a new Olympics, more foreign dignitaries show up than 4 years before.

We must understand that the venues for these games, they being winter Olympics, are not focused around a stadium or a park. We are talking about a 900 square mile area, including some of the most mountainous territory in the United States. To protect all of that area requires a tremendous amount of effort on the part of the Secret Service. That is what the money is going for.

There is a question of customs. We are getting people from all over the world to come to the Olympics—people who want to run this event. We are talking about 900 square miles, they are going to protect athletes and turn out to be terrorists, as well as athletes, their coaches, families, and, of course, spectators.

Dealing with customs in the Treasury Department is where part of this money will go. The ATF, the Bureau of Alcohol, Tobacco and Firearms, energized obviously by the experience in Atlanta where there was a bomb that went off, is now making sure that a great deal more activity is done to prevent that from happening in Atlanta. It is only prudent to do this. That is $52 million of the $60 million we are talking about in this supplemental going to the Treasury Department for those kinds of functions.

The other $8 million goes to the Justice Department, the Agriculture Department, and the Interior Department. You would ask: What does Agriculture and Interior have to do with the Olympics? The fact is that a very large portion of the Olympics will take place on Forest Service land, which is policed by the Department of Agriculture, and BLM land, which is policed by the Department of the Interior. It is important that the adequate facilities to deal with this, but, in the heightened activity surrounding the Olympics, they will have to pay their people overtime. They will get their people there. They have the trained people to do it, but they will have to pay airfare. There will have to be lodging. They will have to pay overtime. These agencies have been putting together this information.

We can complain maybe this should have been done in the previous bill, it should have been taken care of in the 2001 appropriations bill and we should have to use it before us as a supplemental, but the fact is, if we do not get it prior to the end of this fiscal year, the proper preparations will not be able to be made.

This money is in the 2002 bill. The full $60 million is in the 2002 bill, which, in the normal course of governmental activity, that would be the proper way to do it. The fact is, however, we cannot change the time of the Olympic games. That is set in concrete, and if we do not do the money in a more readily available upfront manner, we will find we are facing the challenge of trying to have the money in the pipeline while the games are taking place.

It seems in this situation, in the middle of the summer when the Sun is shining and it is hot outside, that this may not be a matter of that much pressing urgency. But if we have an international incident at the Olympics in Utah in 2002—if a foreign dignitary is attacked; if a terrorist attack goes on to try to embarrass any country—ours or any other—if there is a lapse in security and the fingers start to be pointed, as to where were the Americans, why weren't they prepared—it will be a difficult thing to say we wanted to put it off, we wanted to take it out of the supplemental and have it take place in the 2002 budget; we were only saving 4 or 5 months, but we wanted to use the money for something else for that 4- or 5-month period. I do not want to run that risk. I do not want to have the opportunity handed to an international terrorist that says the American Secret Service is underfunded and others involved with policing the public lands have not been able to get their overtime in the right appropriations bill; we waited too late; the preparations were not made; therefore, we had this event.

I respectfully suggest we reject the amendment of the Senator from Arizona, and, instead of having this money come in the 2002 bill, have it stay where it is now, in the supplemental bill. It will be easier to get a delay on some of these other things for 4 months, things that do not have a firm time scale connected to them, than it will be to have this money delayed for the Olympics.

I yield the floor.

Mr. HATCH. Mr. President, today I rise to speak against Senator McCain's amendment to the fiscal year 2001 supplemental appropriations legislation. I fully appreciate the sentiment underlying this amendment, and I assure everyone that the men and women of our Armed Forces deserve nothing but the best in living conditions, pay, and working environment. I understand that this amendment would enhance the operations and maintenance of the services. I have always supported legislation that provides for our airmen, and marines. However, I find that one of the offsets to Senator McCain's amendment is totally without merit.

I am vehemently against section 3003, paragraph (c) in Senator McCain's amendment which reduces the salaries and expenses in the Department of Treasury by $30 million. The amendment does not address what the $30 million is for, but I will tell you this funding is for security for the 2002 Winter Olympics. It pays the salaries and expenses of law enforcement personnel.

Senator McCain's amendment seeks to add funding to the military that would not dramatically improve our national security but the $30 million that he takes away from the Treasury Department's budget can have a dramatic impact on safety at this international event.

For several years now we have worked very hard to ensure the public safety of this major international event. The law enforcement budget has been carefully planned, fully justified, and endorsed by this body. Any reduction to this budget would have a severe impact on the security of the Olympics and impose unacceptable risks. I am sure my colleagues agree that the safety of the Olympic athletes and spectators is of paramount importance, and a national responsibility when this Nation agreed to host the 2002 Olympic Games.

Mr. SARBANES. Mr. President, I rise to express my serious concern about a provision in Senator McCain's amendment which I believe significantly undermines the commitment we made in the Transportation Equity Act for the 21st Century. (TEA-21), to address our citizens' mobility needs. This provision would have severely undermined the two crucial programs that the Federal Transit Administration: the Job Access and Reverse Commute Program, and the Transit Planning and Research Program.

TEA-21 created the Job Access and Reverse Commute Program to provide transit grants to assist states and localities in developing flexible transportation services to connect welfare recipients and other low-income people to jobs and other employment-related services. In addition, the program provides support for transportation services to suburban employment centers from urban, suburban, and rural locations. These programs enhance our communities' ability to meet the needs of our most vulnerable citizens.

Even in a time of low unemployment, a person who cannot get to the workplace cannot hold a job. Not everyone can afford access to an automobile, especially those who are looking for employment. Public transportation can be a vital component in helping these individuals leave the welfare rolls and enter the workforce.
In fact, investment in public transportation benefits all Americans. As the numbers emerging from the 2000 Census show, the face of America has changed in recent years. The fact is that two-thirds of all new jobs are now located in the suburbs, while much of the workforce lives in the city. For millions of Americans, transit is the answer to this spatial mismatch. And as cities and towns across America are discovering, public transit can stimulate the economic life of any community. Studies have shown that a nearby transit station increases the value of local businesses and real estate. Increased property values mean more tax revenues to states and local jurisdictions; new business development around a transit station means more jobs.

I am therefore quite concerned to see that the McCain amendment would take over $200 million away from transit programs. This amendment would be a significant setback in our efforts to make transit services more accessible and improve the quality of life for all Americans. I urge my colleagues to vote against it.

Mr. BAUCUS. Mr. President, I rise today to further explain my opposition to the pending amendment offered by my good friend from Arizona, Senator MCCAIN. The Senator’s amendment seeks to address worthwhile objectives such as providing for the operation and maintenance of our armed forces and increasing funding for personnel needs. I support these goals and believe they should be addressed.

However, the offset for this amendment troubles me for two reasons and it is because of these reservations that I cannot support the amendment offered by Senator MCCAIN. The first issue is the specific funding rescissions in the designated offset. For example, the amendment rescinds $141,500,000 in Department of Labor funding earmarked for Dislocated Worker Employment and Training Activities and Adult Employment and Training Activities.

This funding is critical for my home State of Montana because we are in the midst of an energy crisis that has to date been responsible for over 1000 lost jobs. Retraining dollars are essential for helping these newly laid-off workers develop new skills and learn new trades so they can more quickly rejoin the workforce in a state that is already struggling economically.

The second issue is the lack of separation between non-defense and defense funding that this amendment proposes. The separation of defense and non-defense spending has served us well in meeting our nation’s budget priorities and has been the subject of past and future discussions. Utilizing non-defense funding to offset the additional spending of this amendment sets a precedent that I do not believe we should set. We should fund the priorities, laid forth by Senator MCCAIN, in a timely manner, but we should not use existing funding in non-defense programs to accomplish our goal.

Mrs. CLINTON. Mr. President, I rise today in opposition to provisions in the McCain amendment, and in underlying bill S. 1677, which funds discretionary spending programs supported under the Workforce Investment Act, including the Dislocated Worker Employment and Training Program and the Adult Employment and Training Activities. The underlying bill also provides $141,500,000 in Department of Labor funding earmarked for Dislocated Worker Employment and Training Activities in order to pay for important increases in funding for title I education services and Low Income Home Energy Assistance Program. I support the need to increase essential funds for students in the highest-poverty schools and for low-income individuals who are being hardest hit by increasing energy costs. Indeed, I signed on in support of the increases for title I and LIHEAP. I do not think, however, we should increase funding in any or any other programs by taking money away from New York workers at a time when these employment and training programs are most in need and are beginning to meet their potential.

At this time when upstate New York is facing more notice of layoffs, we should not be cutting back our support for dislocated workers. Last year, over 25,000 New York workers received notices within the designated offset. An increase of over 7,000 workers from 1998. Over the past several months, we have learned that hundreds of workers at the Xerox facility in Webster, N.Y., will soon find themselves out of work; several hundred New Yorkers who have spent years working for Nabisco in Niagara Falls also recently received notice that they would no longer have a job. Corning announced just yesterday that it will have to close three factories, resulting in a loss of nearly 1,000 jobs.

At a time when we see signs of our economic weakening, this bill would reduce funds specifically designated to assist workers who are victims of mass layoffs and plant closures. With the rescission in the base bill alone, New York can expect to lose approximately 29 percent of its dislocated worker funds. I have received hundreds of letters from New Yorkers—not only from concerned workers, but also from businesses that need trained workers.

Why are my colleagues suggesting that we should rescind WIA funds at a time when our economy is weakening and many workers will need these critical funds to be retrained and relocated in new jobs?

They are claiming that States are not spending and obligating funds quickly enough. I agree. But, I also agree that States and local communities have made tremendous progress in implementing the Workforce Investment Act.

Let’s get the facts straight. States were not required to implement the Workforce Investment Act until July 1, 2000. Beginning July 1, 2000, States had 2 years to spend funds and were required to obligate 80 percent of their funds. Many counties in New York are doing a tremendous job—Chautauqua County, for example, has obligated 95 percent of its dislocated worker funds, as well as 95 percent of adult funds; the Town of Hempstead has allocated 90 percent of both its dislocated and adult worker funds; as has Erie County—all of which can expect to lose funds under this rescission.

I do know that there are at least eight counties in New York that have struggled in their implementation—working to get up to 19 Federal partners at the local level to offer services in One Stop training centers—and, as a result have obligated 70 percent or less of their funds. These counties need to do better and the State needs to do better in supporting their efforts. But, the way to do this is not by taking money away from a fledgling program that is aimed to assist our workers most in need of training and assistance.

I oppose these efforts to undermine the new Workforce Investment Act. I agree with accountability of Federal dollars, but I do not agree that we should unnecessarily punish workers before allowing the program to get up and running.

Mr. MCCAIN. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 15 minutes.

Mr. MCCAIN. Mr. President, I think the Senator from Minnesota, Mr. WELLSTONE, may be mistaken. In fact, $359 million was rescinded in the House supplemental from the programs. I think he was inaccurate in his statement that none was rescinded.

Let me assure the Senator from Utah may have to leave the floor. The Senator from Utah fails to mention that we have already shelled out $1.3 billion—"b," billion—in subsidies for the Salt Lake Olympics, far more than any other Olympics in history, far more, for all kinds of pet projects.

I asked 3 years ago, a simple request of the Senator from Utah, if he would give us an assessment of how much in Federal dollars would be needed. Of course, I never got an answer. In fact, we had a little dialog on the floor of the Senate.

Never once, never on any occasion has the Commerce Committee, of which I am a ranking member, had a request for authorization for funds for the Salt Lake City Olympics—never once. Not on any single occasion, even though I have requested time after time, the committee of oversight that authorizes the funds and what may be required has never, ever been approached.

Why not? Perhaps one of the reasons might be because we found out in a
GAO report that the taxpayers have shelled out $1.3 billion already for the Salt Lake City Olympics for every kind of imaginable kind of project, none of which—or very little of which had to do with security. It had to do with land acquisitions; it had to do with all kinds of things. Of course, we have never yet had a request for an authorization.

What do we find? We find a supplemental appropriations bill for $30 million for security. It sounds good. Why was the request not made a long time ago? Perhaps, if the Senator from Utah had complied with the simple request that I made as chairman of the oversight committee, that we could get some kind of estimate as to how much it would cost the taxpayers, we would not be in this whole drilling drill which we are going through now.

I, again, urge the Senator from Utah to tell us how many of the taxpayers' dollars are going to be needed to fund the Olympics, No. 1; and, No. 2, seek authorizations through the authorizing committee for those funds—which happens to be the Committee on Commerce, Science, and Transportation.

I point out on this amendment that the Office of Management and Budget and the Department of Defense have not voiced objections. In the interests of straight talk, they have not expressed support for this amendment either. But there has not been any objection raised by the Office of Management and Budget or by the Department of Defense to this amendment. I hope Senators will take that into consideration.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska. Mr. STEVENS. Mr. President, how much time remains in opposition?

The PRESIDING OFFICER. There remains 34 minutes.

Mr. STEVENS. Mr. President, I share many of the concerns that have been expressed by my colleague from Arizona. I am sure he understands I join him in the desire that we assure the adequate protection and support for our men and women in the armed services. I do think the amendment of the Senator is well intentioned. It is consistent with the priorities identified by Secretary Rumsfeld in his budget request for the fiscal year 2002. That request provides for a substantial increase, which I shall discuss further. In defense spending, commencing with October 1 of this year—82 days away.

By the time this bill gets to the President, probably it will be 75 days; by the time he signs it, it will be about 70 days; by the time the money could be released by the Comptroller of the Department of Defense, that is about 60 days later. So we are talking about the same time because their machinery over there is designed to follow through on the amendment that has already been submitted by the Senator. It is my duty to join the Senator from Arizona, and others, in stating that we think this matter is better addressed in the fiscal year 2002 Defense authorization and appropriations bills.

The Senator from Arizona talks about authorization. This matter is before the Armed Services Committee now. The Secretary has testified before that committee. They may come up with different priorities. I believe the Senator is right; we have a role in helping to determine the priorities for defense spending.

We share that with the House of Representatives. Congress has the power of the purse. I do believe we should use it. In the hope that Senator McCain, just prior to the Fourth of July recess, would join me in vigorously opposing the amendment to the budget the Secretary of Defense to this amendment. I hope the Senator is right; we have a role in helping to determine the priorities for defense spending.

Several items in this amendment are likely to be accommodated in the Department's annual omnibus reprogramming. Every year, as we get down to this last quarter, the Department comes to us with reprogramming requests which are approved, under existing law, by the Appropriations Committees of both the House and the Senate. That is statutory. We gave the Department of Defense, this year, through the Defense Appropriations Act, the authority to shift $2 billion from one fund to a fund of higher priority. We have to approve that, of course, but that lifted the ceiling considerably. Annually, the Department presents to Congress reprogramming requests which shift from one purpose to another alternative higher priority. That is what we should do. We should let the Department shift these funds and tell us where they want them shifted to, if they wish to do so.

But I am constrained to point out that the budget resolution for this fiscal year contains what we call a wall. It is a wall between defense and nondefense spending. The Department of Defense to this amendment because of the attempt to shift money from nondefense accounts to defense accounts for this fiscal year.

Later this month we are going to review the $350 billion spending proposal for the Department of Defense for 2002. I am sure that as a member of the Armed Services Committee, Senator McCain will work very hard on these matters. I am certain he will assist in determining whether the priorities are correct as submitted by the Secretary, with the approval of President Bush.

I do not believe we should shift funds from the nondefense priorities until we are certain that the funds are in excess of those programs' needs. As a matter of fact, I do not think we should do it at all because that was our commitment, that we would keep a wall between defense and nondefense spending. The budget resolutions for the last 4 years believe 5 billion for that wall. And we have adhered to it.

We, in the Appropriations Committee, have been quite clear about that. I have to confess, I did suggest that some of the defense moneys go to the Coast Guard, but I made that request because I believe they are a semimilitary agency. They carry out some military functions, and they have to have military equipment, military training, and military assets on board their ships. But we have vigorously defended the concept of the wall. Those people who vote for the McCain amendment are, for the first time, going to set the Senate on record as abandoning the concept of the wall.

I have asked the Parliamentarian if this is subject to a point of order because of this fact, and I have to ascertain that later. But I, for one, believe in the wall because we put it up to protect defense spending, not the other way around.

I don’t want to get political here, but in the last few years the President was not as much in favor of defense spending as the Congress, and therefore we protected the defense spending with the wall. I do not see any reason now for us to turn around and renge on the commitment we have made to protect defense spending, not the other way around.
of Defense in his request for 2002. I think we understand that.

We are concerned that envelope as far as we can. But clearly the mon-
ey that has been requested now put this administration on record of re-
questing more monies—I think almost $80 billion more—than the level of 2001 that will be spent in 2002 for defense. And that is—what?—less than 3 months

I really have objection to the McCain amendment because of where the money comes from. It cuts $41.5 million from the dislocated workers assistance program. It rescinds $100 million from the job training program. The com-
mittee bill already took some money from this dislocated workers program, but ours is from unexplained balances of the program. This rescission takes it from the program, actually cuts job training programs for dislocated work-
ners. And I will vote against that as a separate amendment.

Senator McCain's amendment also makes substantial reductions, signifi-
cant reductions, in the international space station account. This is at a time of extreme need. I have been spending some time looking into the space pro-
gram because of my extreme con-

And that is—what?—less than 3 months

I hope other Members will take a look at it to see where these moneys are coming from. They start on page 3 of the amendment. Not only are the funds reduced from the space account I just mentioned, there are funds from the National Institute of Standards and Technology, under the heading "Industrial Technology Services," that are reduced by $67 million for the Advanced Technology Program. There is another $19 million from the Depart-
ment of Commerce for the Interna-
tional Trade Administration. There are moneys that were provided under the Emergency Steel Loan Guarantee and Emergency Oil and Gas Guarantee Loan Act.

I do appreciate the fact that the Sen-
ator has deleted the suggested reduc-
tions in the Maritime Guarantee Loan Program Account.

We also have a suggestion to take from the Department of Labor for the Employment and Training Administration under the heading "Training and Employment Services" and for the dis-
located worker account, as I men-
tioned, $41.5 million; adult employment and training activities, $100 million. Then from the Department of Trans-
portation—here again, I think this would be subject to a point of order—as I understand TEA–21, there is a wall in that, too. That money cannot be used for other purposes, but the amendment of the Senator from Arizona would take $90 million from the transit planning and research and $16 million from job access and reverse commute grants under the Federal Transit Administra-
tion.

All of this, to me, means that I ap-
preciate the amendment that disturb me. I hope other Members will take a look

I cannot support it. I hope the Senate will not support the Senator's amend-
ment. At the appropriate time, I will make a motion to table the Senator's amendment. I do not wish to do so at this time because he still has time re-

I ask how much time do I have re-

The PRESIDING OFFICER. The Sen-
ator has 20 minutes 30 seconds. The Senator from Arizona has 12 minutes.

Mr. STEVENS. I reserve the remain-
der of my time.

The PRESIDING OFFICER. The Sen-
ator from Arizona.

Mr. McCa

There being no objection, the ma-

APPENDIX III.—FEDERAL FUNDING AND SUPPORT PLANNED AND PROVIDED TO THE 2002 WINTER OLYMPIC GAMES IN SALT LAKE CITY
Mr. McCAIN. It includes things such as land acquisition, Olympic infrastructure, Olympic park-and-ride lots, light rail downtown to the University of Utah, Olympic intelligent transportation system, commuter rail, intermodal centers, the list goes on and on of the $1.3 billion that has already been spent before we tack some more onto this supplemental appropriations bill. I hope the Senator from Alaska will also work very hard to remove the non-defense appropriations from the defense appropriations bills.

I yield 7 minutes to the Senator from Connecticut and reserve the remaining 4½ or 5 minutes for me before all time expires.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. LIEBERMAN. Mr. President, I rise to support the amendment offered by my friend from Arizona. I do so because I think this amendment makes two very important points. Those are points that have strength and with which I want to identify whether or not this amendment has any possibility of passing.

The two points are these: First, that we are not spending enough on our national security; second, Congress has recently adopted and the President has signed a tax cut package that will make it increasingly difficult for us in the months and years ahead to find the resources to meet the needs of our defense systems and structures and forces. Those are the two critical points.

We have in recent years tried in Congress, and succeeded on a bipartisan basis, to significantly increase the recommended budget levels to sustain real growth in our defense spending. Beginning in the mid-1980s and going through about 2 or 3 years ago, every year spending on defense got chopped in real dollars. That was a peace dividend, people said. In fact, when you look at the construction of spending in the Federal Government over the last decade or so, most of it comes at the expense of defense; some of it obviously justified by the end of the cold war.

At the end of the cold war, America emerged in a very different world as the one superpower with extraordinary responsibilities for maintaining the peace in our own interest and the world’s interest around the world.

As I say, we began to turn that around. In real dollars we began to increase defense spending 2 or 3 years ago.

Continuing this support must be a priority. We have to provide for immediate needs in the fiscal year 2001 supplemental and to begin to fund levels to maintain current readiness, as well as to modernize and transform our forces in the coming defense budget. I am deeply concerned that if we do not, we may jeopardize our capacity to defend our interests here and abroad.

I have heard what my friend from Arizona has said, I couldn’t agree with him more about the statements made last year that “help is on the way.” In some sense, it appears that the check may have been lost in the mail because although there are increases in defense this supplemental appropriations and in the budget President Bush has recommended, they are inadequate to the needs of our defense. That is where I hope we in this body and Members of Congress, the other body, will join together on a bipartisan basis to give the Department of Defense the funds it needs to protect us.

The defense supplemental for fiscal year 2001, as has been said, is $5.6 billion, which, as I understand it, is about half of the amount that the service chiefs asked for. Although the fiscal year 2002 budget request from the administration is an increase, again, I don’t think it is enough to meet our national security needs.

For instance, by any calculation, both procurement and research and development for the Army are less than that appropriated last year.

Navy procurement is lower by almost $2 billion than last year. As Admiral Clark, the Chief of Naval Operations, testified at the Armed Services Committee today, we are now a 314-ship Navy and on a course to head to 240
Mr. BYRD. Mr. President, how much time remains?

The PRESIDING OFFICER. There are 20 minutes under the Senator’s control.

Mr. BYRD. I thank the Chair.

Mr. President, I yield myself such time as I may consume.

The amendment the President has requested, is not assumed in the budget resolution and is not authorized. Many of the items that would be funded in the McCain amendment will be considered as part of the annual DoD omnibus reprogramming request. DoD will cover many of these costs with their own offsets rather than through cutting non-defense programs. Many of the non-defense offsets contained in the amendment are objectionable:

Job training: The McCain amendment rescinds an additional $141.5 million from the FY01 job training funds, $41.5 million from dislocated workers and $100 million from adult job training. This is in addition to the $217.5 million rescission already included in the bill. Increasing the rescission above the $217.5 million risks actual cuts on job training services.

Security at Winter Olympics: The McCain amendment would cut $30 million from the Committee bill. The committee approved the funds to provide security for participants and visitors to the 2002 Salt Lake City Winter Olympics. The federal government is mandated under Presidential Decision Directive 62 to provide security for officially designated National Security Special Events. These funds were requested and fully paid for.

Advanced Technology Program: The amendment would rescind $77 million from the National Institutes for Standards and Technology Advanced Technology Program. ATP is a valuable and well-managed innovation program. From the telegraph to the Internet to biomedical research, government investment has spurred the development of new technologies and new fields, which have had great impact on and held enormous benefit for the American people. According to the National Academy of Sciences’ National Research Council, ATP’s approach is funding new technologies that contribute to important societal goals.

International Trade Administration, Trade Development: The amendment would rescind $19 million. TD is responsible for negotiating and enforcing industry sector trade agreements such as those on autos, textiles and aircraft. TD’s mission is extremely important in the era of trade agreements such as NAFTA and the African Free Trade Agreement.

Oil/gas: $114.8 million has already been rescinded from the Emergency Oil and Gas Loan Guaranteed Loan Program to help pay for the Radiation Exposure Compensation Act, RECA, and Global AIDS. This funding is no longer available for rescission.

Steel: The amendment would rescind $126.8 million from the oil and gas and steel loan guarantee programs. The committee bill already rescinds $114.8 million from the oil and gas program. If the entire $126.8 million rescission came from the steel loan guarantee program, then the ability of the steel loan guarantee board to help the steel industry receive needed capital would be eliminated. This reduction would come at a time when a record number of steel companies have filed for bankruptcy (eighteen companies) and steel prices have fallen below levels that prevailed during the depths of the 1998 steel crisis.

Access to Work: The McCain amendment would rescind over 80 percent of Access to Work funding. This program has been very successful at starting new programs at transit agencies to get welfare recipients who want to hire them. Many studies have shown that one of the biggest problems in getting welfare recipients off the welfare roles and on to payrolls is transportation—getting them to work.

Antidumping: In the last 4 years, continued dumping or subsidization has been found in roughly 80 percent of all administrative reviews conducted by the Department of Commerce. Industries affected include many parts of agriculture, chemicals, consumer goods, industrial goods and components, and metals. The amendment would rescind $230 million from the Treasury program established last year to assist companies impacted by unfair foreign trade practices. This rescission would eliminate the program just when it is anticipated that the first offset disbursements will be made by Customs toward the end of November 2001.

NASA: The amendment would rescind $40 million from Life and Micro-Gravity research. In FY 2000, Congress funded $10 million for a life and microgravity mission aboard the space shuttle. However, due to delays in overhauling the Space Shuttle Columbia, and the need to accelerate the Hubble space telescope servicing mission, NASA was forced to rescind the launch date May 2002. As a result of the delay, the committee included language that lifted a restriction on the use of the funds to give NASA the flexibility to reprogram the funds for a Shuttle mission that will include a life and microgravity research experiment.

If the amendment had been included in the Omnibus Energy Bill and the conference report, NASA would have been able to profit from the steel crisis by rescinding $126.8 million from the oil and gas and steel loan guarantee programs. The conference report rescinded $114.8 million from the oil and gas program. If the entire $126.8 million rescission came from the steel loan guarantee program, then the ability of the steel loan guarantee board to help the steel industry receive needed capital would be eliminated. This reduction would come at a time when a record number of steel companies have filed for bankruptcy (eighteen companies) and steel prices have fallen below levels that prevailed during the depths of the 1998 steel crisis.

The PRESIDING OFFICER. There are 20 minutes under the Senator’s control.

Mr. BYRD. I yield the floor.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.
July 10, 2001

CONGRESSIONAL RECORD—SENATE

12809

units. As part of the space shuttle safety upgrades program, NASA initiated an effort to develop an electric auxiliary power unit (EAPU) in FY 2000 to upgrade the existing power units to make them safer and more reliable. However after the initial development phase, it became clear that there were significant technical hurdles that could not be overcome without a significant increase in the budget.

While this particular program was canceled by NASA, the overall Space Shuttle Safety Program remains a top priority. NASA will redirect the remaining funds to address other key safety and reliability upgrades for the space shuttle. There is no higher priority than protecting our astronauts.

Transit research and planning: The McCain amendment would virtually eliminate funding for transit planning and research — $90 million, provided in the FY 2001 Transportation Appropriations Act.

Mr. President, I hope the Senate will oppose and defeat the amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. REID. Will the Senator from West Virginia yield me 5 minutes?

Mr. BYRD. Mr. President, I gladly yield 5 minutes to the distinguished majority whip.

Mr. REID. Mr. President, will someone get Senator McCain? He wanted to close. He has about 4 minutes remaining.

I want to spend a little time speaking tonight before we have these series of votes. Floor staff has been kind enough to gather for me some information. Since the leadership has changed in the Senate, we indicated we were going to try to do things faster than we have in the past. One area we are addressing is the time we waste waiting for Senators to arrive. One reason for this is the Senate has 9 or 10 months, so it is 45 or 50 hours a year wasted waiting for Senators to arrive.

I hope people will not be upset about this—they hate to turn in a vote when there are people not here because people yell at them, but we need to move along and do this. It is going to be bipartisan. We are going to do our best to make sure it is fair to everybody. Remember, we are talking about 50 hours a year wasted just in not having our votes, not in 10 minutes, but in 20 minutes; not in 10 minutes—sometimes we have 10-minute votes—not having those votes in 10 minutes but 15 minutes. I am talking about the time wasted over the 20-minute time limit.

I hope people will not be upset about this. I know some will. Maybe if we get in the habit of calling the votes on time, Senators will come on time.

I thank Senator BYRD for yielding me time. Senator McCAIN is not yet here. I suggest the absence of a quorum. The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senator from Missouri wishes 5 minutes of the time in support of the McCain amendment.

Mr. REID. There are not 5 minutes. There are 4 minutes.

The PRESIDING OFFICER. There are 4 minutes left for Senator McCAIN.

Mr. STEVENS. We will be glad to accord the Senator from Missouri 5 minutes of our time. The Senator is right; let’s hold the time and let Senator SCHUMER start his amendment.

Mr. REID. Mr. President, I ask unanimous consent that the McCain amendment be set aside, and that the 4 minutes be reserved for Senator McCAIN and Senator BYRD, and we go to the Schumer amendment, which is the last amendment in order tonight.

Mr. STEVENS. Reserving that right to object, I wish the Senator would allow me that time tonight. Senator from Alaska. I have 2 minutes; Senator McCAIN has 4; the Senator from Missouri has 5 minutes.

Mr. REID. That will be taken from the Senator’s time?

Mr. STEVENS. Yes.

The PRESIDING OFFICER. Does the Senator so modify the request?

Mr. REID. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from New York is recognized.

Mr. SCHUMER. I thank the Chair. I believe it is by the unanimous consent of the Senate from Nevada.

The PRESIDING OFFICER. The amendment is pending.

Mr. SCHUMER. I thank my friend, the Presiding Officer. Amendment No. 862 is an amendment I have sponsored with Senator REED of Rhode Island, Senator REID of Nevada, Senator DODD, Senator LIEBERMAN, Senator CORZINE, and Senator JOHNSON.

It is a very simple amendment. It requires in this emergency supplemental $33.9 million for advance mailings from the IRS to the General Treasury.

I ask for the yeas and nays if they have not been ordered. Have they been ordered?

The PRESIDING OFFICER. They have not been ordered.

Is there a sufficient second? There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. SCHUMER. I thank the Chair. I believe I have 15 minutes to debate on this side.

The PRESIDING OFFICER. The Senator has 14½ minutes.

We could visit with constituents who come here. A lot of time we are waiting for other Senators to vote and we are not able to have our constituents or, if we do see them, we give them the bum’s rush. We could participate in congressional hearings more deliberately with an extra 45 or 50 hours. We could make telephone calls we simply do not have time to make. We could do something such as go home and visit with our families and have dinner.

I hope everyone understands, there will be people who are going to miss votes, but in fairness to everyone here, that is the way it has to be. I hope committee chairs will allow members to leave early. It is very difficult for us to say: Turn in the vote.

What we are doing is not partisan. Democrats and Republicans are just as responsible for the standing and waiting around. I wish it were just the Republics and we could blame them for it, but it is us. We are just as bad as they are.

There are going to be Democrats who will complain: Why did you terminate the vote? I had something real important to do. I was having dinner with my son; I was at a key point in the hearing. The excuses, most of them, are very valid. But in fairness to all 100 Senators, we have to have a time limit that is enforced.

I say that the staff, which is very good about this—they hate to turn in a vote when there are people not here because people yell at them, but we need to move along and do this.

Mr. SCHUMER. The motion to table and go on to the last amendment in order is in order.
Mr. SCHUMER. I ask the Chair to notify me after I have consumed 7 of those minutes.

The PRESIDING OFFICER. The Chair will do so.

Mr. SCHUMER. Mr. President, this amendment is a simple one. There is money in this supplemental appropriation that is unnecessary, and we don’t send out notices when the next week to 112 million taxpayers telling them they will get a rebate. The amendment is a simple one. It rescinds that money and gives it back to the committee. It does not spend it on any other specific purpose, but rather at this time when we are all desperate for money—we just spent 2 hours on Senator MCCAIN’s amendment cutting money from domestic programs so we can fund defense—this $33.9 million is needed.

Why do I think this money should be rescinded? Because the notices they will fund are unnecessary, they are inappropriately political, and they cost money that can be spent on other things, and I will talk about each. Unless we change the notices so that we send each taxpayer a notice that they are going to get a rebate. The rebate is self-explanatory. It has been in all the newspapers. More people will have read it in their newspapers than a notice they get from the IRS. And if, indeed, we thought it necessary to do which I don’t think we should, it is certainly unnecessary to do it as a separate notice which will cost all this extra money.

The idea that we have to notify taxpayers that they are getting a rebate doesn’t make sense. We have never done it before—not in the 1975 rebate, not when we have changed other tax laws. We have never done it.

Secondly, I do not agree with it because it is a political message. The message in this notification of the rebate says: We are pleased to inform you that the United States Congress passed, and President George W. Bush signed into law, the Economic Growth and Tax Reconciliation Relief Act of 2001 which provides long-term relief for all Americans who pay income taxes.

It sounds to me a bit like a political ad. The IRS has always had a reputation for being apart from politics. When the IRS gets too political we try, justifiably, to pull it back. Yet here from the IRS is a notice. We don’t send notices out to people when bad things happen: We are happy to let you know because of laws that the President proposed and the Congress passed that you will get a lien on your property, that your property will get a lien because you haven’t paid your taxes. We just put on the lien. We don’t send out notices about all the other changes in the law. We publish them in the Register and then we go forward.

Finally, of course, I support this amendment because we are in very tough times. How many Americans would make it their highest priority to spend this $33.9 million on sending a notice of rebate?

My colleague from Nevada, when I yield time to him, will give examples of the alternatives on how we could spend the money. Clearly, there are better purposes.

Secretary O’Neill wrote me that it wasn’t feasible for mechanical reasons to include notification with the check itself. I take that to mean that, despite a quarter of a century of dramatic technological advances and the impressive stewardship of Commissioner Rossotti, hailed as a world-renowned technology expert, the IRS is unable to get two pieces of paper into the same envelope—or less able than it was in 1975 because they did it then.

Now, to boot, 529,000 taxpayers will receive an inaccurate notice, erroneously informing them that they will receive a larger rebate than they will actually get. Some have said if we don’t send this notice, there will be lots of phone calls deluging the IRS. Where are they in the tax season? I think they can handle the phone calls. I argue that knowing a small percentage of these notices are erroneous will trigger more phone calls than if we didn’t send this false message at all.

The bottom line is simple: We know why this mailing is being sent. We now see political figures on television, Governors and mayors, putting their faces on, saying: Come to my State for tourism; or, sign up for our children’s health care plan.

All we know what the purpose is, but never before has the Federal Government stooped to this level. And never before has the IRS, which I think we all agree must remain above politics, been used for such a message. This notification is necessary and can be accomplished in other ways. It is political, in an agency which should remain above politics. And it wastes a badly needed $33.9 million.

This amendment was narrowly defected in, the House. I hope this body can fund defense—this $33.9 million is needed.

[...]

Mr. GRASSLEY. Mr. President, I yield myself such time as I may consume. We are hearing a great deal about politics in the debate regarding this amendment of the Senator from New York. We hear the notices in the mail to inform taxpayers of the rebate checks are somehow about “politics.” We hear the language used in a notice is about politics.

Let me assure that the only thing that is about politics is the amendment before the Senate. I make very clear the notices are being issued, being sent by Congress, because we gave that direction in the legislation we passed. I read from the conference report of the recently passed tax cut bill. Page 127 of the report says:

The conferees anticipate that the IRS will send notices to most taxpayers, approximately one month after enactment. The notices will inform taxpayers the computation of their checks and the approximate date by which they can expect to receive their check. This information should decrease the number of telephone calls made by taxpayers to the IRS inquiring when their check will be issued.

That is a quote from the conference report of the Congress of the United States, directing the Treasury Department to do what has been labeled as pure politics. This is a statement of the conference report. That is why these notices are being issued.

We are seeking to reduce confusion of taxpayers and minimize the burden on IRS employees. The National Treasury Employees Union, the union that negotiates with the Treasury Department, representing those employees, supports the issuance of the letters being criticized.

I urge you to support efforts to cut funding for the mailing of a notification to taxpayers with regard to their tax rebates.

I ask unanimous consent to have this letter printed in the RECORD. There being no objection the letter was ordered to be printed in the RECORD, as follows:

THE NATIONAL TREASURY EMPLOYEES UNION,

I am writing with regard to funding included in the FY 2001 supplemental funding bill, H. R. 2216, that was ordered to be printed in the RECORD, as follows:

The National Treasury Employees Union is a world-renowned technology expert. The IRS is unable to get two pieces of paper into the same envelope—or less able than it was in 1975 because they did it then.

I am writing with regard to funding included in the FY 2001 supplemental funding bill, H. R. 2216, that was ordered to be printed in the RECORD, as follows:

The National Treasury Employees Union, the union that negotiates with the Treasury Department, representing those employees, supports the issuance of the letters being criticized. I urge you to support efforts to cut funding for the mailing of a notification to taxpayers with regard to their tax rebates.

I ask unanimous consent to have this letter printed in the RECORD. There being no objection the letter was ordered to be printed in the RECORD, as follows:

THE NATIONAL TREASURY EMPLOYEES UNION,

I am writing with regard to funding included in the FY 2001 supplemental funding bill, H. R. 2216, that was ordered to be printed in the RECORD, as follows:

We all agree must remain above politics, and it wastes a badly needed $33.9 million.

This amendment was narrowly defected in, the House. I hope this body can fund defense—this $33.9 million is needed.
Mr. GRASSLEY. Mr. President, these concerns about the impact on services at the IRS are very real. The newsletter, Tax Notes, reported on June 9, 2001, that when Minnesota issued rebate checks, the U.S. West Company had to cut off phone service to the tax agency in Minnesota because the volume of calls brought down the system for the entire Minnesota State capital exchange.

In addition, notices are important to prevent taxpayers being subject to con games. The USA Today newspaper reported on July 5, 2001, that taxpayers are receiving solicitations from con artists offering to calculate their refund for $14.95. These letters being found fault with will go far in preventing frauds and cons such as reported in USA Today.

Some want no notices at all sent, and some want the words of the notice changed. Why are they upset? Because the letters start out by mentioning that we, the Congress, passed a bill that cuts taxes—the bill that provides long-term tax relief for all Americans who pay income taxes and was passed by the Congress, in fact, and was signed by the President of the United States.

That is the only way you increase or decrease taxes. It is not done by some magic wand being waved by somebody in Washington, DC. But this comes as a shock, supposedly, to my colleagues. Some people are a little too busy with their lives to be thumbing through the Congressional Record after work, like why we do, but our constituents don’t do this.

So this letter provides a little overview and guidance, so people have some contact as to what the letter discusses. It should be clear this is not the first time the President by name has been mentioned in some IRS notice. For example, a little less than 2 years ago the IRS sent out a notice mentioning President Clinton. Can you believe that? They sent out a notice mentioning President Clinton.

I have searched the Congressional Record in vain to find any complaints from any Senator about that specific notice.

Also, if this notice were only about politics, why would the administration also send out a notice to 32 million taxpayers, informing them they will not receive a refund check? That hardly seems a political thing to do. It is said we often find our own faults in others. Mr. SCHUMER. Will the Senator yield?

Mr. GRASSLEY. I do not think I will yield. The last time I yielded to you on the bankruptcy bill I did not get through my speech. I want to finish my speech and then if you want to ask me a question, I will do it.

Mr. SCHUMER. Second question.

Mr. GRASSLEY. No, I will not. Please, I appreciate the man, he is a friend of mine, and I do not have any ill will towards him, but I just do not want to yield at this point.

Would I suggest this amendment is about politics? I could not suggest this amendment is about politics. But here is what we have to do. We have to think of the reality of it. We are trying to make Government work. When you are sending out $60—some billion in checks, you want to make sure they go to the people they are supposed to go to, and you want to know that the people know this is happening and what they are supposed to do with it.

Some suggest we should have the notices, but the wording should be changed. As stated earlier, I believe the wording is important to better inform taxpayers. Further, to rewrite and reprint this notification of millions of dollars and delay the notices by weeks. Delay would undermine the whole point of the notice: To better inform the people prior to checks being issued.

Remember, you want to get the checks out on time because of the stimulus benefit that comes from this. That is not just my saying this as a Republican because you want to remember, the last week of March people on one side of the aisle said we ought to have an immediate tax rebate to help the economy. So that is something we both agreed should be done.

This notice, the Treasury Department informs me, will actually be cost-effective. If there is no notice, the IRS will not be able to perform other valuable and important activities. The language regarding notices is in the conference report because of concerns about the impact of issuing checks on IRS operations.

Finance Committee staff has met with the Treasury Department several times to ensure that the notice and check effort to ensure it is properly managed.

I reserve the remainder of my time.

The PRESIDENT PRO Tempore. The Senator from New York.

Mr. SCHUMER. Mr. President, I yield 2 minutes to a cosponsor of the amendment, the Senator from South Dakota. Mr. JOHNSON. Will President, I congratulate the Senator from New York for the fiscal responsibility he is exhibiting with this amendment. The amount of money to be saved, again, is $34 million, roughly. Mr. President, $34 million—this is astonishing, $34 million to send out. This doesn’t pass the laugh test, frankly.

If I were to go home to my home State of South Dakota and talk to people in the street to tell them we are going to send some checks—by the way, which I voted for—I was happy for the stimulus package, but we are going to add $34 million to the cost, from the taxpayers, to brag about what we did in advance—they would not know whether to laugh or whether to cry.

Are we going to do this now when we do Patients’ Bill of Rights? Are we going to send out a $34 million mailing? How about ag disaster payments? What else are we going to pass this year about which we are going to send out to everybody in the country what a wonderful job we are doing for them, thanks to your dollars?

I don’t know whether or not it is political. What I care about is if you are going to carefully mind the people’s money, this is not how you ought to go about doing it.

I congratulate the Senator from New York for a little common sense, something I see all too seldom in the course of this debate.

Thank you to the Senator from New York. It seems to me this amendment deserves support. Let’s save $34 million, put it back in the kitty where the American people can have it for their benefit.

I yield.

The PRESIDENT PRO Tempore. Who yields time?

Mr. GRASSLEY. I yield 6 minutes, or the remainder of my time, to the Senator from Idaho.

The PRESIDENT PRO Tempore. The Senator from Idaho.

Mr. CRAIG. Mr. President, the Senator who is just leaving the floor needs to know that $34 or $33 million represents about 30 cents a letter. I think both he and I wish we could send out any kind of campaign solicitation for 35 cents or 30 cents a letter. It seems to be a pretty efficient operation to me. But here is what the IRS is saying today. Even though the Senator from New York is talking politics, the IRS is talking fraud. The IRS is talking scam. The IRS is trying to warn the American taxpayer, who may or may not receive a rebate check, that they better beware that there is somebody out there who wants to take $14 or $15 or $20 of their money.
Let me refer to a scam operation known as Revenue Resource Center in Boca Raton, FL. Send in your check for $34.95 and they will calculate for you what your rebate is going to be.

The IRS is already going to calculate for you what your rebate is going to be. The Senator from New York knows that. What the Senator ought to be saying is: Bravo, IRS, you may be stopping a multi-multi-million-dollar scam operation.

The IRS has identified scams in four other States: in Mississippi, Missouri, Ohio, and Oklahoma, and they are anticipating there will be a good many others before this is over with.

What does the IRS do in its letter? Not only does it say the Congress and the President provided this, on an effort your check and here it says here is how the calculation was made. If you have a question, make a phone call. Here is the phone number.

That sounds pretty responsible to me. I suggest that is the kind of government we ought to have. Is it political? I don't think it is. The Senator from Iowa mentioned that President Clinton was mentioned in an IRS letter. I have a copy of that IRS letter. Bravo. Bravo. Whether we take credit for it—in fact, it was the Senator from New York who, in 1995 said: When you do something you ought to tell your constituent about it. So he quoted himself in the New York Daily News.

Is there anything wrong with what is going on? There is nothing wrong with what is going on, in fact. I think what the Senator from New York and I know is you take this form right here; it is called 2001 Form 16-D. It looks like an official IRS form. Let me tell you it is a scam that is being developed by this group from Boca Raton, FL.

Right here it says:

If you got $14.95 from a few hundred thousand or a few million taxpayers, my guess is you walk away with a bundle because you have a mailing address and you have a computer and you have a printer.

What the IRS is saying when they notify the taxpayer is: You are going to get your rebate and here is how it is going to be calculated.

They are even saying to some taxpayers: You are not going to get a check, and here is why you are not going to get a check.

My guess is this may have a lot less to do with politics, at least from the standpoint of the IRS, and a great deal more to do with efficiency of government. But most important, should not we go the extra step so we avoid the scam that the great genius of the human mind creates when they see an opportunity to take advantage of an older person, or an innocent person who might be concerned that somehow they are not going to get their appropriate check? So they are going to fill out this form and send it in to a group in Boca Raton, FL?

That is what the issue is all about. So we are going to use $34 million at a cost of about 30 cents a letter to about 150 million Americans to notify them that all the information they need is right there available to them, even how their check was calculated, and all of that is going to be made available by the IRS. And, oh, by the way, yes, you are right, Senator from New York. The front paragraph says: And this tax relief was provided for you by the Congress—I believe that is Democrat and Republican—and by the President of the United States, George W. Bush.

Let's stop the scam artists. Let's notify the American people when they are going to get it, how they are going to get it, and how it is calculated. It seems like the right thing to do—not the political thing to do.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. SCHUMER. Mr. President, I yield 4 minutes to the cosponsor of this legislation, the Senator from Nevada.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, this legislation has nothing to do with scams. It has nothing to do with partisan politics. It has everything to do with saving $34 million of taxpayer money. As the Senator, for whom I have the greatest respect, and the 19 members of the Finance Committee say, this will provide a little review and guidance. Yes, it will, for $34 million.

There are a lot of domestic programs in need of funding. Thirty-four million dollars would do much for education. We could do something that deals with dropouts. Three thousand children are dropping out of school every day.

We could do something about the national treasure of Nevada and California called Lake Tahoe. It is deteriorating every day because of pollution. We could stop it if we had the money. It is a program that we need to help. There are water systems all over America, in rural America, that need help. We could do part of that with this money.

Our Nation is facing an energy shortage. The Energy and Water Subcommittee would do so much for you with $34 million dollars would mean a lot to our subcommittee.

We ought to do so many things.

Veterans: There has been a cutback in the veterans' budget this year by $30 million. We could take $34 million and provide help to the veterans. Grants are provided to the States for extended care facilities, specifically talking about veterans. On Medicare prescription drugs, we could do a little bit. But that would certainly be something we could do.

Senator CHAFEE and I have a bill that gives centers of excellence $30 million a year so they can study links between veterans and the environment. That is certainly more important than a $34 million notice that is going to go out.

There are disasters happening all the time. We used to have $250 million for Federal projects. That was deleted. It is wrong. The State of Washington found out how much that program helped.

This is something for which I don't blame the President. I don't blame the Finance Committee. I don't blame anybody. I think what we should do, though, is recognize that dollars are very scarce. We should do everything within our power to provide additional money for the programs that are desperately needed. And do that. It is more than the letter that would give a little bit of review and guidance, as my friend from Iowa said.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, how much time remains?
Mr. STEVENS. Mr. President, parliamentary inquiry: Is it not the case that the Senate finish the Schumer amendment before we go back to the McCain amendment?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. Is the Senator from New York willing to yield the remainder of his time?

Mr. SCHUMER. No. Mr. President, I believe I have 2 minutes. I would like to conclude. If the other side would like to use their 1 minute remaining, I would then yield. I will wait for them.

Mr. GRASSLEY. Mr. President, I yield myself the remaining time.

There are three things to remember:

Remember that the union members working this issue for the Treasury Department to make sure the Government’s work is done right and done on time said it is very important that these notices be mailed out. That letter is a matter of record and is printed in the Record.

No. 2, remember that Congress ordered these letters to be sent. It is a conference report from which I have already quoted. But remember we said that.

No. 3, these letters are already printed and in the envelopes. There was a lot of labor put into this process. There was a lot of effort put into it. If you want to waste that money, you waste that money by voting for this amendment.

I yield the remainder of my time.

The PRESIDING OFFICER. The Senator from New York.

Mr. SCHUMER. Mr. President, first, in reference to the debate we have heard, give me a break. This letter, if you read it, is not going to reduce fraud. If we want to reduce fraud, we contain it right with the check—not a letter that people are going to read through a month and a half in advance and then get the check. That is a bogus argument.

Second, President Clinton put his name on the notice that was on 527. The letter of the Secretary of the Treasury is wrong. All that was printed in the Record. President Clinton did not send out 112 million pieces of paper bragging about what he was going to do.

The bottom line is simple. We all know what is going on here. This is not an attempt to help the taxpayers; this is an attempt to pat ourselves on the back because we did something good. We could spend billions of dollars doing that. We all know that the same goal could be accomplished by putting the same notification in the same letter as the check. We are not doing that either.

At a time, I appeal to my colleagues, when we are scrugging around for $5 million here and $10 million there, the chairman of the Appropriations Committee and the ranking member are trying their best as the members of the committee to find the dollars we need, give me a break. This is not the best, the hundredth best, or the thousandth best way to spend $34 million to send a notification putting ourselves on the back that you are going to get a rebate check and there is going to be a long-term tax reduction. It is an absurdity.

If any of us cares about fiscal responsibility and balancing the budget, we will vote for this amendment.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. The time on the amendment has expired.

The question occurs on the McCain amendment.

The Senator from Arizona withholds 4 minutes. The Senator from Missouri withholds 5 minutes.

Who yields time?

Mr. MCCAIN. Mr. President, I understand the Senator from Alaska is giving time to the Senator from Missouri. Is that correct?

Mr. STEVENS. Mr. President, that is correct—in order to accommodate the Senator’s request.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mrs. CARNAHAN. Mr. President, I rise to support the McCain amendment. Our military has a number of pressing needs that simply are not being met this year. I have seen this first hand in my home State of Missouri. Senator McCain has done the hard work by requesting that Federal agencies identify funds that are not being spent in this fiscal year. These funds should be available and can be put to good use for basic military operations and supplies.

This amendment will provide $500 million for quality-of-life improvements for our military personnel, $600 million for operations and maintenance of our military equipment, and $65 million for the protection of our fleet in the Arabian Gulf. Senator McCain has identified these needs, and he has uncovered the resources to relate to them.

I urge my colleagues to vote for this amendment.

I yield the remainder of my time to Senator DODD.

The PRESIDING OFFICER (Mr. DAYTON). The Senator from Connecticut.

Mr. DODD. I thank my colleague from Missouri.

Mr. President, I want to take a couple of minutes to speak. I know others have spoken at length about this underlying supplemental appropriations bill.

I say to the Senator from Alaska, the Senator from Missouri yielded me her remaining time.

I commend the Senator from West Virginia and the Senator from Alaska and the Senator from Hawaii. It is a hard job. It is not easy. We are talking 80 days. And those days are shrinking as long as we take to resolve this in the supplemental.

There are a number of amendments that have been offered that under normal circumstances and the benefits probably support. The LEHAP amendment is a very important amendment for those of us who come from the Northeast. I find many down the list that are very appealing.

One think our colleagues on the Appropriations Committee have done a good job. I do not suggest that my good friend from Arizona, and others, are not making a good case that additional resources may be necessary to help our service men and women to improve equipment, but it seems to me that we are just a few days away from dealing with a larger issue, the budget issue, in which these matters could be addressed.

So when it comes to the pending amendment, I am going to reject the additional spending that is being proposed and support the committee’s desire to adopt this supplemental, if we can.

I notice, as well, there are arguments being made that some of these funds have been unexpended. I appreciate that. That is true. That is the case, but it is also the case that we are not yet at the end of the fiscal year.

One of the things I want to see us discourage is agencies rushing out to spend dollars so that they will not face the kind of arguments they get here, where we are a few months away from the end of the fiscal year and we start demanding that agencies spend money quickly because an amendment may be offered to take any unexpended funds. That is irresponsible spending, it seems to me.

So there are a number of areas here that are being targeted as resources to pay for some of these amendments that I hope my colleagues will take some note of.

Worker training is one. Again, all of us understand the need for worker training. We have just heard news in the last few days that there has been a loss of some 125,000 jobs in the month of June alone in the United States. I do not need to tell anyone in this Chamber how job training and worker training programs can make a difference for those people. Those people getting new jobs, getting the skill levels, also contribute to the strength of America.

Certainly, the job access program is another one that has been tremendously helpful to so many millions of Americans across the country.

So while all the money has not yet been expended in job access or job training programs, we are still several months away from the end of the fiscal year. In light of some of the new unemployment figures, those dollars may be very necessary before the end of the fiscal year.

So again, my compliments to those on this committee crafting this supplemental appropriations bill. It is not perfect. They have not argued it is perfect. But I think it has done a good
Mr. KYL. Mr. President, I want to simply urge the support of my colleagues for the amendment that my colleague, Senator McCain, has offered the time. The temptation to support a number of these amendments is strong. But I think we ought to resist that temptation and support the work of this committee, and then get about the business of dealing with the various appropriations bills as they come to this Chamber.

If there is any time left, I will be glad to yield it to those who may want to debate this amendment further. But if not, I would yield back whatever time may remain.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

Mr. McCAIN. Mr. President, I have 4 minutes remaining?

The PRESIDING OFFICER. That is correct.

Mr. McCAIN. I yield 1 minute to the Senator from Arizona, Mr. KYL.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, I want to simply urge the support of my colleagues for the amendment that my colleague, Senator McCain, has brought forward. We have to care about the lives and the safety, as well as the ability to carry out the mission that we have entrusted to, of the young men and women in our military.

What Senator McCain is doing is nothing more than taking the word of the military—the chiefs and the other military leaders of our country—about what they need, and providing a small amount of that as a part of this supplemental appropriations bill—$847 million worth.

All of that money is offset from programs, frankly, that either can be deferred or from funds which are not going to be spent before the beginning of the next fiscal year. So there is very little in terms of loss of any program from the offsets. But this money would make a huge difference to the men and women of our military, if we can get it into the pipeline before October 1.

So I hope my colleagues will support the amendment of Senator McCain to help the folks in our military and enable them to do the job we have entrusted them to do.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. McCAIN. Mr. President, I yield myself what time is remaining.

The PRESIDING OFFICER. The Senator has 2 minutes 45 seconds.

Mr. McCAIN. Mr. President, I outlined in some detail the testimony of the service chiefs last September: The need for $30 billion more than the current defense budget dollars. In a few days the Defense Department will come over with a reprogramming request. That will be for $850 million, which is really what this request is all about.

What is a reprogramming request? It is a requirement to take money out of one category and put it into another because the wheels are about to come off. They are going to have to take money from existing programs and put it into what this amendment is all about: Personnel, readiness, operations and maintenance, and the lives of the men and women in the military. This amendment puts money in the right accounts, and that is readiness and personnel.

Nothing is more important than the men and women in the military and national defense. The Department of Treasury salaries and expenses isn't more important than defense. The NASA Shuttle Electric Auxiliary Power Units are not more important than defense. The Life and Micro-Gravity Science Research is not more important than defense. The Advance Technology Program is not more important than defense. The Job Access & Reverse Commute Grants Program is not more important than defense, nor is Export Promotion Programs or Emergency Loan Guarantees.

So, Mr. President, the men and women of our military are suffering. They need help. I promised them that help during the last campaign. This is one very small way of beginning to deliver. I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am constrained to point out to the Senate that part of the Budget Act gives us the power, in the Appropriations Committee, to make allocations to specific portions of the budget. We have 13 separate bills.

The allocation to the Defense Department under the Defense appropriations bill for 2001 I made when I was chairman—and Senator Byrd from West Virginia has modified that slightly, but it is still a limitation—it is a limitation that prevents us from transferring money from one bill to another without the consent of the Senate.

The amendment of the Senator from Arizona would increase the amount allocated to the Department of Defense for 2001 in excess of the current budget allocation that both Senator Byrd as chairman, and I, when I was chairman, submitted to the Senate. The amendment by the Senator from Arizona has the effect of consequence of exceeding our allocation.

I make a point of order against the McCain amendment under section 302(i) of the Budget Act. If adopted, this would exceed the allocation for the Department of Defense for 2001.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. McCAIN. I am deeply, deeply disturbed that the Senator from Alaska would not allow an up-or-down vote on this amendment, which is paid for—which is paid for. And if we are going to play that kind of parliamentary game, the Senator from Alaska can plan on a lot of fun in the ensuing appropriations bills.

I move at this point to waive all points of order that may lie against this amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. STEVENS. I raise a question about this.

All points of order?

Mr. McCAIN. That may lie against this amendment.

Mr. STEVENS. Parliamentary inquiry: Is that in order under the Budget Act? This is a specific point of order. There are other points of order I may want to try, too.

The PRESIDING OFFICER. The Senator may make a motion to cover all Budget Act points of order.

Mr. McCAIN. I ask for the yeas and nays.

The PRESIDING OFFICER. There is a sufficient second. The vote will be delayed under the current sequence.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the previous order, there will now be 30 minutes of general debate on the bill.

Mr. STEVENS. Mr. President, don't we have a managers' amendment still on the agenda?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. Now that Senator McCain's time has expired, that is in order?

The PRESIDING OFFICER. That would be appropriate at this time.

AMENDMENT NO. 76

Mr. BYRD. Mr. President, I shall send to the desk a managers' amendment. It consists of a package of amendments. These have been cleared on both sides, and I believe there is no controversy on them.

The first items are amendments by Senator Stevens, Senator Lincoln, and Senator Hutchison for storm damage repair and relief in Arkansas and Oklahoma and emergency response and firefighting needs in Alaska. The amendment provides a total of $26,500,000 with the necessary offsets.
July 10, 2001

The next amendment is offered by Senator INHOFE concerning the Education Impact Aid Program. No additional funds are involved.

Next is an amendment by Senator BOXER to provide $1,400,000 for the so-called "sudden oak death syndrome". This is from within existing funds in the U.S. Department of Agriculture.

Next is an amendment by Senators DORGAN and CONRAD to provide $5 million for emergency housing for Indians on the Turtle Mountain Indian Reservation in North Dakota. It, too, is fully offset.

Next is an amendment by Senator MCCONNELL making a slight modification in the Energy Employees Occupational Illness Compensation Program Act. No funding is involved.

Next is an amendment to establish the new Senate committee ratio for the Joint Economic Committee as a result of the recent change in the Senate majority. This requires an amendment to the underlying law; it is fully offset.

An amendment concerning the B-1 bomber for Senators ROBERTS, MILLER, CRAIG, CLELAND, CRAPO, and BROWNBACK.

An amendment for Senator PATSY MURRAY and Senator CANTWELL providing $2 million for drought assistance in Yakima Basin in the State of Washington. It is fully offset.

Finally, an amendment by myself to provide $5 million for providing relief from the severe recent flooding in my State of West Virginia. This amendment is also fully offset.

Over the last several days and nights, thousands of West Virginians have been digging out from the mud and muck left behind from severe flooding over the weekend.

Throughout southern West Virginia, especially, the rain fell hard and fast, dropping an average of rain across the region before the clouds finally let up. By then, the damage was done. The Guyandotte River was measured at 18 feet at Pineville, 5 feet above flood stage and above the 1977 record of 17.76 feet. The Tug Fork was at 17.5 at Welch, 7.5 feet over its banks and more than 4 feet above the previous high.

It is an almost indescribable scene for many families who have watched their homes and their belongings washed away by the torrent of flood waters. For many families, this latest flood comes just a few weeks after they finished cleaning up from May's heavy rains that prompted a Federal disaster declaration from President Bush.

Today, West Virginia's streams, creeks, and rivers are carrying refrigerators, stoves, cars, and trucks. Tree branches are filled with ruined clothing and debris. Water and sewer systems are washed out. Roads and bridges are buckled. Power is out. More than 3,000 homes have been damaged or destroyed.

In the McDowell County town of Kimball, the community is covered with thick mud. One woman described it aptly when she said: "This whole town is gone.

For everyone, there is a feeling of disbelief at the devastation. But there is also a strong determination to recover.

In an effort to speed Federal assistance, the managers' amendment contains $5 million to boost the recovery effort. This is the amount that the Natural Resources Conservation Service has stated that it needs to remove debris and obstructions to waterways that pose a threat to private property or human safety. This is just a small step in the recovery process, but it is an important step to make.

I personally thank the thousands of National Guardsmen, local firefighters, sheriffs' departments, police officials, Red Cross volunteers, State Office of Emergency Services personnel, and the countless others who have worked to save lives over the last few days. Their efforts have helped to prevent this disaster from taking an even larger toll on West Virginia.

Mr. President, I send the amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD), for himself and Mr. STEVENS, proposes an amendment numbered 876.

Mr. BYRD. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

Mr. MCCAIN. I object. I want the managers' amendment?

Mr. BYRD. I am asking that they be withdrawn and inserted in lieu thereof.

Mr. MCCAIN. Mr. President——

Mr. BYRD. The amendment by Senators PATTY MURRAY and MARIA CANTWELL providing $2 million for drought assistance in the State of Washington. It is fully offset. I ask unanimous consent that Senator MURRAY's name be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, the name of Senator PATSY MURRAY was inadvertently omitted from the sponsorship of the $2 million drought assistance in the State of Washington. I add that name at this time. So it will read: An amendment by Senators PATSY MURRAY and MARIA CANTWELL providing $2 million for drought assistance in the Yakima Basin in the State of Washington. It is fully offset. I ask unanimous consent that Senator MURRAY's name be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. The Senator will yield, I ask unanimous consent that the amendment be amended to add a million dollars for FEMA for the disaster storm Allison. I will present an amendment to the desk in writing.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BYRD. Mr. President, I ask unanimous consent that the amendment be amended to add a million dollars for FEMA for the disaster storm Allison. I will present an amendment to the desk in writing.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. The Senator has 5 minutes in his own right.

Mr. REID. The PRESIDING OFFICER has 5 minutes in general debate on the amendment.

Mr. MCCAIN. The Senator has 5 minutes under the managers' amendment.

The PRESIDING OFFICER. The Senator has 5 minutes in general debate. He may use it now.

Mr. MCCAIN. Mr. President, the amendment is debatable?

The PRESIDING OFFICER. There are 5 minutes equally divided on the amendment.

Mr. MCCAIN. Mr. President. The PRESIDING OFFICER Who yields time?

Mr. STEVENS. The Senator has 5 minutes under the managers' amendment.

The PRESIDING OFFICER. The Senator has 5 minutes in general debate time. He may use it now.

Mr. MCCAIN. Mr. President, parliamentary inquiry: Is this concerning the amendment on the B-1 that is included in this, or is this in addition to the 5 minutes?

The PRESIDING OFFICER. Senator BYRD has 5 minutes of general debate on the bill. There are 5 minutes evenly divided between the two managers on the managers' amendment. Senator BYRD has 5 minutes in his own right.

Mr. MCCAIN. On the managers' amendment, none of us had ever seen it. It was just presented. I notice that there is an emergency for an additional amount for State and private forestry, $750,000 to the Kenai Peninsula Borough Spruce Bark Beetle Task Force for emergency response and communications equipment, and $1.75 million to be provided to the municipality of Anchorage for emergency firefighting equipment and response to respond to wildfires in Spruce bark beetle-infested forests. Provided, that such
The motion to lay on the table was agreed to.
Mr. REID. Mr. President, I ask unanimous consent that all remaining amendments be withdrawn.

The PRESIDING OFFICER. Is there objection?
Without objection, it is so ordered.

The PRESIDING OFFICER. Is all time yielded back?
Mr. STEVENS. Mr. President, I will file the amendment I referred to for the managers' amendment.

The PRESIDING OFFICER. Is all time yielded back on the bill?
Mr. STEVENS. Mr. President, I am informed that we have just made an error. I ask unanimous consent that in section 210(f) of the managers' amendment the figure "$38.5 million" be "$38.5 million.

The PRESIDING OFFICER. Is there objection?
Without objection, it is so ordered.

The modification is as follows:

On page 48, after line 3, insert the following:

"FEDERAL EMERGENCY MANAGEMENT AGENCY DISASTER RELIEF"

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. $1221 et seq.), $1,000,000, to remain available until expended for costs related for tropical storm Allison.

On page 14, after line 25, insert the following:

"SEC. 2106. Of funds which may be reserved by the Secretary for allocation to State agencies under section 16(h)(1) of the Food Stamp Act of 1977 to carry out Employment and Training programs, $39,500,000 made available in prior years are rescinded and returned to the Treasury."

The PRESIDING OFFICER. Is all general debate time yielded back?
Mr. BYRD. I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Idaho.
Mr. GRAHAM. Mr. President, I thank the Senator from Arizona for working with us on the amendment he has just discussed. It is a question of notification. We have not blocked—nor would we want to block as a Senate—the ability for low-income families, many of them with disabilities, many elderly, many working poor with children.

Unfortunately, right now, only about 13 percent of households are able to benefit because this program is so severely underfunded. The money comes from administrative expenses in the whole Pentagon budget. It does not come from any programs. It does not come from readiness or quality of life for our armed services. It comes out of administrative inefficiencies, and believe me, from inspector general to the General Accounting Office, there is way more than $150 million when it comes to administrative inefficiency.

A study by the National Energy Assistance Directors Association says that 28 States and the District of Columbia are out of money or about to run out of money. These are our States that are telling us: We do not have the money for cooling assistance this summer; we do not have the money to help those in arrears and could be faced with utility shut off; we do not have the money as we approach this winter.

Last year, energy prices went up 40 percent. The very least we can do is to give this program, which is so important to the most vulnerable citizens in this country, an additional $150 million to help us over the next 3 months. It is not taken out of any significant program.

I am going to vote for this bill, but I certainly think, in the overall Pentagon budget of over $900 billion, we can find the $150 million in administrative inefficiencies.

I thank my colleagues.

The PRESIDING OFFICER. Who yields time in opposition?
Mr. STEVENS. Mr. President, I yield back the time in opposition to the Wellstone amendment.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the motion to table amendment No. 874. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Wyoming (Mr. THOMAS) is necessarily absent.

The PRESIDING OFFICER. Are any other Senators in the Chamber desiring to vote?

The result was announced—yeas 77, nays 22, as follows:

(Rollcall Vote No. 224 Leg.)

YEAS—77

Akaka          Alano          Allen          Bayh          Bennett          Biden          Bond          Brownback        Brownning         Burns          Byrd          Campbell       Carnahan       Carper          Chafee          Chайл                    Clemans          Clinton          Cochran          Collins          Craig          Craig-Alexander  Daschle          DeWine          Dodd          Domenici          Dole

Peightel          Barkley         Senate          Kennedy         Kerry          Kohl

Wyden
The motion was agreed to.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I move to reconsider the vote and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. We will have order in the Senate.

Mr. REID. Mr. President, under the order previously entered, all the rest of the votes will be 10-minute votes. We were able to stick with our 20 minutes on this one. We will stick with 15 on the others and move this along as quickly as possible.

**AMENDMENT NO. 863**

The PRESIDING OFFICER. The question occurs on the amendment of the Senator from Wisconsin. Who yields time?

The Senator from Wisconsin.

Mr. FEINGOLD. Mr. President, the Feingold-Durbin-Kerry amendment would increase funding for the Global Fund for AIDS, TB, and Malaria by $500 million, and it would offset that increase in funding by rescinding funds from the Navy V-22 Osprey aircraft procurement account.

This is a chance for this body to move beyond rhetoric and take action in a fiscally responsible fashion to address the greatest health crisis of our time, a pandemic that has killed 22 million people and may infect 100 million by the year 2005.

U.S. leadership in the fight against AIDS is desperately needed now. Obviously, there are problems with the Osprey program. Thirty Marines have died in Osprey crashes since 1991. This troubled program is currently suspended, pending the outcome of investigations and further research, testing, and evaluation.

My amendment does not endanger the integrity of the Osprey production line. Let me repeat this. This amendment does not kill the Osprey program and does not affect the ongoing construction of planes that are being built with money from fiscal years 1999 and 2000.

What we have here is a clear choice, to use funds that are currently allocated somewhat irrationally and to redirect them towards fighting AIDS, an unquestionably worthwhile purpose that reflects our values, serves our interests, and may well be the greatest challenge confronting the world today.

I urge my colleagues to support this amendment and oppose the motion to table.

The PRESIDING OFFICER. Who yields time in opposition?

The Senator from Hawaii.

Mr. INOUYE. Mr. President, this amendment will wipe out the V-22 Osprey program. One of the best-kept secrets in the United States is the role the U.S. Army has played in the battle against AIDS. The U.S. Army, Department of Defense, has spent more money than all the countries spent by the United States in the battle against AIDS. Our research has come closest to victory. We have, in the next fiscal year, 2002, the full amount requested by the administration.

We have not forgotten the problem. Yes, the United Nations has passed a resolution, but we are still waiting for other countries to come forth with their moneys. Our country will come forth with our money but not at the expense of the V-22 Osprey.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the motion to table amendment No. 863.

The yeas and nays have been ordered. The clerk will take the roll.

Mr. NICKLES. I announce that the Senator from Wyoming (Mr. THOMAS) is necessarily absent.

The PRESIDING OFFICER. The Senator from Wisconsin (Mr. FEINGOLD) is yielded back. The question is on agreeing to the motion to table amendment No. 863.

The result was announced—yeas 79, nays 20, as follows:

The motion was agreed to.

Mr. REID. I move to reconsider the vote.

The clerk will then lay that motion on the table.

The motion to lay on the table was agreed to.

**AMENDMENT NO. 869**

The PRESIDING OFFICER. The question recurs on the McCain amendment. There are 5 minutes of debate evenly divided.

Who yields time?

The Senator from Arizona.

Mr. MCCAIN. Mr. President, this amendment is not objected to by the Department of Defense or the Office of Management and Budget. The amendment adds a bare minimum to fund defense readiness and personnel programs. It is $850 million. There are offsets. Whenever there are offsets, there are some objections.

Nothing is more important, I believe at this time, than national defense. And this money is earmarked for the men and women in the military and their operations and maintenance accounts.

Very soon the administration will come over with a reprogramming request for the defense. If the tables were turned, I would obviously be violently opposed to taking money from defense and putting it into nondefense. I feel obligated to support the amendment set forth now for 4 years. For 4 years, we have agreed to the amount to be spent for defense and the amount to be spent for nondefense.

This amendment takes money exclusively from nondefense and puts it in defense. If the tables were turned, I would obviously be violently opposed to taking money from defense and putting it into nondefense. I feel obligated to defend the process which has saved the defense accounts over the past 4 years, and I urge that the McCain amendment be tabled.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. STEVENS. I yield back my time.

The PRESIDING OFFICER. The motion to table was previously made.

Mr. REID. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

12817

NOT VOTING—1

Thomas

The motion was agreed to.

Mr. BENNETT. I move to reconsider the vote.

The amendment (No. 862) was re-considered. The motion to lay on the table was agreed to.

AMENDMENT NO. 862

The PRESIDING OFFICER. There are now 5 minutes of debate evenly divided with respect to the Schumer amendment. Who yields time?

The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I rise in opposition to the Schumer amendment. Earlier today, we had a 3–94 vote on the Hollings amendment. You will remember the vote of 3–94 earlier today when the Senate rejected the Hollings amendment on repealing the tax decrease of a month ago. I think that was a vote of this body saying send the checks. The conference report was not only the same bill directed the IRS, for very good reasons, to issue these notices that the Schumer amendment wants to repeal. We have had the Treasury Em-
ployees Union saying send out a notice to inform the taxpayers so that the Treasury employees could be able to do their jobs, well, without always being on the phone informing the taxpayers of what their tax refund might consist. So if this amendment would pass, it would keep the taxpayers in the dark. It would help the scam artists preying on the poor and elderly, as we have been told before. It would play havoc with the important work of the IRS. So I strongly urge my colleagues to vote no on this amendment.

The PRESIDING OFFICER. Who yields time?

The Senator from New York is recognized.

Mr. SCHUMER. Mr. President, this amendment is simple. It has nothing to do with the tax cuts and getting back your checks. It has to do with perhaps the most foolish exercise that is part of this bill: $33 million so we can send people a notice that they are going to get a check. Well, if we were awash in money, maybe we should do that. But we are not. We are living in fiscal conservatism—some of us so we are putting the money in the mail. It has to do with perhaps your checks. It has to do with perhaps your checks. It has to do with perhaps

The motion to lay on the table was agreed to. The amendment (No. 862) was reconsidered. The motion to lay on the table was agreed to.

AMENDMENT NO. 862

The PRESIDING OFFICER. There are now 5 minutes of debate evenly divided with respect to the Schumer amendment. Who yields time?

Mr. STEVENS. I move to reconsider the vote.

The amendment (No. 862) was rejected.

The motion to lay on the table was agreed to.

Mr. STEVENS. That is all the amendments; is that correct?

The PRESIDING OFFICER. The Senator is correct.
Mr. NELSON of Florida. I would like to ask the Senator from Alaska to confirm my understanding of the intent of the provision regarding Fort Greely, AK, in section 1205 of this supplemental. I understand this provision will allow the Secretary of the Army to modify a previously made determination that the property in question was surplus to the needs of the Army and to the needs of the Federal Government. Modifying this decision will allow the Secretary of the Army to retain this property until such time as a determination is made as to whether this property is needed for any defense purpose.

Is that the intent of this provision?

Mr. STEVENS. The Senator from Florida is correct. Clarifying the ability of the Army to retain this property will allow the Secretary of the Army to retain it until a future decision is made.

Mr. NELSON of Florida. I thank the Senator from Alaska for this clarification. I was concerned that this provision was an attempt to predetermine a missile defense deployment decision.

Mr. LEVIN. I, too, thank the Senator from Florida for this clarification.

WORKFORCE INVESTMENT ACT DISLOCATED WORKER FUNDING

Mr. WELLSTONE. Mr. President, I want to enter into a colloquy with my good friend from Iowa, the chairman of the Appropriations Subcommittee on Labor, Health and Human Services, and Education, and my friend from Pennsylvania, the ranking member of that subcommittee. I wonder if they will have time to answer some questions regarding job training programs under the legislative jurisdiction of a subcommittee that I chair, the Subcommittee on Employment, Safety and Training.

Mr. HARKIN. I will be delighted.

Mr. WELLSTONE. I know my friend agrees with me that the supplemental appropriations bill before us presents a difficult situation affecting programs funded by his Subcommittee. We both are very strong supporters of the $300 million in low-income energy assistance funding and the $161 million in title I education spending in the bill. That spending is urgently needed. The problem is that we must try to pay for that supplemental spending from a pot of money that is simply too small. The bill as reported by the Appropriations Committee thus would offset a portion of that important new spending by making a rescission from unspent funds in a job training program for dislocated workers. I know my friend is also a supporter of that important program, and I appreciate that the full Committee reiterated its support for the program in the committee report.

Mr. HARKIN. Yes, my good friend is correct. We are now having to make some very, very difficult choices—ultimately important choices—out of the pot of resources we are working with is too small. And you have correctly stated both what the committee has done as well as the committee's strong support for the job training program under the Workforce Investment Act. Our intent is to carefully monitor the need for dislocated worker assistance to ensure that this commitment is met and to take that need into account as we take up funding for fiscal year 2002.

Mr. WELLSTONE. I thank the Senator. As I understand it, one of the factors that the committee observed was a variation among the States in the rate at which each State was drawing down to clarify how it is we find ourselves in allocations. My State of Minnesota, for example, has obligated virtually all of its dislocated worker funding for this program year and will have expended nearly 85 percent of its funding. Other States—for a number of understandable reasons—are predicted to have significant unexpended balances by the end of the fiscal year. To avoid undue hardships for States, such as Minnesota, that have been expending funds at the expected pace, my understanding is that the bill contains a "hold harmless" provision. That is, it provides a mechanism for excess unspent funds to be re-allotted to States that have reached their limits up to the levels these States would have received but for the rescission. Is that correct?

Mr. HARKIN. Yes. That is correct. In addition, subsequent to our full committee action, we received Congressional Budget Office scoring that has allowed inclusion of language post-poning the bill until the Secretary of Labor reallocates the excess unexpended balances to the States. Our goal with respect to the Dislocated Worker Program has always been to try to ensure that no state finds itself without the resources to meet its obligations. We believe that is accomplished through the "hold harmless" provisions.

Mr. WELLSTONE. I thank my good friend from Pennsylvania. Now I want to clarify how it is we find ourselves in this situation of having to make such difficult choices. Am I correct that at least part of the reason we are faced with a pot of resources that is so small is because of decisions made during the budgeting process to cap supplemental discretionary spending at $6.5 billion, to avoid triggering a governmentwide sequester during fiscal year 2001?

Mr. HARKIN. Yes. My friend is absolutely correct.

Mr. WELLSTONE. And, of course, it is also true that a huge portion of the supplemental appropriations is going to support defense spending; is that correct? So, another part of the reason that we are faced with these difficult choices on where to find the resources to support urgently needed programs that provide a safety net for American families is because of the priority being given to defense spending; is that correct?

Mr. HARKIN. Yes.

Mr. WELLSTONE. Is it fair to say this is just the tip of the iceberg? That the truly perverse choices we are being asked to make today between educating our children, heating our homes, and training dislocated workers are ominous harbingers of things to come as the full impact of the $1.3 trillion tax cut is felt? Is that fair to say?

Mr. HARKIN. Again, my good friend is absolutely correct. Many of us predicted during the debate on the tax cut that we would be facing precisely these impossible choices. It is upon us and it will only get worse.

Mr. WELLSTONE. I thank my good friend. This is not a happy day, and I agree with the Senator's predictions that it will only get worse. I think we need to look for some solutions to this larger problem. It seems to me inevitable that we must re-visit the unfortunate fiscal and budgetary priorities that have been set.

CRISIS IN ARMY AVIATION

Mr. BIDEN. Mr. President, I had planned to offer an amendment to this supplemental appropriations that would have alleviated the emergency shortages of utility helicopters in the Army National Guard. Senators LEAHY, BOND, CARNAN, DODD, LIEBERMAN, and CARPER were cosponsors of the amendment and some have short statements that they will enter.

Amendment would have procured 20 new Blackhawks for those Guard units in States with the most serious shortages of modern lift helicopters. It is my understanding that there are between seven and nine States that are at a critical level, having no modern aviation assets.

Delaware is one of those States. The people of my State expect the Army Guard to be there when emergencies hit. Unfortunately, the Army Guard may not be there because they do not have lift helicopters that are flyable. Let me repeat that and be more specific. Since January, the Delaware National Guard has had no more than two UH-1 Huey helicopters that were flyable—two out of a fleet of twenty-three, and they have had two only rarely. The norm has been one. One vintage Vietnam-era helicopter out of a fleet of twenty-three is all they have had to fly for 6 months—6 months. This is absolutely insupportable. Pilots cannot fly and stay proficient and the people who depend on the Guard cannot be sure of their assistance in emergencies.

A week ago, the Secretary of Defense released his amended budget for 2002. Unfortunately, there was only enough
funding for 12 new Blackhawk helicopters for the Army. This is incredible. It is completely insufficient to deal with this problem. Over the next 5 years, the Army is retiring over 700 Vietnam-era helicopters that are no longer safe to fly, but nothing is replacing them. Instead of the 330 Blackhawks that are needed—130 for the active duty and 200 for the National Guard—less than 70, or about twenty percent of the requirement, are funded.

I have a copy of a letter sent to all of the leaders of the congressional defense committees and the appropriations committees that details this critical problem. It describes the concern these generals have that their ability to do their national security missions today is severely impaired and that the situation will only get worse, as the trained pilots and technicians leave the Guard because they are not able to do their missions or even train for them. The letter was signed by the 50 Adjutant Generals of the United States.

I ask consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL GUARD ASSOCIATION OF THE UNITED STATES,
Hon. DANIEL K. INOUYE,
Ranking Member, Subcommittee on Defense, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR SENATOR INOUYE: The FY2001 Army Aviation Modernization Plan requires the Army National Guard to significantly reduce its aviation force structure by retiring over 700 grounded Vietnam vintage utility aircraft by FY2004. These aircraft have been replaced for 230 UH-60L MEDEVAC helicopters. However, less than 20% of these helicopters are funded from FY2002 through FY2007. Virtually every state is currently short its required H-60 helicopters, and many states’ capability to perform their national security mission including protecting our nation against the threat of weapons of mass destruction is severely impaired by the lack of flyable aircraft.

The H-60 helicopter is the number one unfunded equipment requirement in the Army National Guard. As the Defense Committees discuss the FY2001 supplemental and the FY2002 defense budget, we request your support in the long term we need your support for a multi-year procurement of H-60s at a rate of 60 aircraft per year for the next five years.

This problem has reached a critical phase. Without the procurement of additional H-60 aircraft for our aviation force to train and utilize, it will soon face a significant loss of valuable pilots and technicians. Your support for funding will assist in our efforts to continue to modernize the aging National Guard fleet and provide our nation with the best equipped and most relevant National Guard possible.

Sincerely,

Mr. BIDEN, I have repeatedly asked the Army how it plans to address the immediate needs of States like Delaware and the larger issue of a clear crisis in Army aviation. A crisis that impacts the readiness of our Army today and in the future. It was my hope that we would have a plan early this year. Nine months later, I am still waiting for a comprehensive plan from the Army and I see no evidence that the new budget addresses this problem.

I ask the distinguished Chairman of the Defense Appropriations Subcommittee, who I know has long supported adequate funding for our National Guard units, to seriously consider the problem this amendment was intended to address. Twenty new Blackhawks this year is only the tip of the iceberg, but I believe we have a genuine crisis on our hands. It was an emergency nine months ago and it has only gotten worse today. Certainly, that is true in the state of Delaware and I have heard nothing from the Army to make me think that the same is not true in aviation units throughout the nation.

If, as I understand to be the case, the distinguished managers of this bill believe that this funding cannot be designated as emergency funding, then I hope that they will pledge to adequately address this issue within the fiscal year 2002 defense budget. I cannot go home to Delaware and tell them that we are aware of this crisis, have been for almost a year, and yet did nothing and have no plans to do anything. This problem must be addressed this year.

Mr. INOUYE, The Appropriations Subcommittee on Defense has consistently been a strong supporter of, and advocate for, the National Guard. We have historically provided significant additional funding for the National Guard where critical shortfalls were identified.

As my distinguished colleague from Delaware is aware, we have only recently received the budget request for the Department of Defense and there are ongoing discussions that the top line will ultimately be for fiscal year 2002. However, we have appropriated additional funding for National Guard Blackhaws for several years;
July 10, 2001

CONGRESSIONAL RECORD—SENATE

for example, in fiscal year 2001, the Defense Appropriations Committee added funding for the purchase of 6 additional Blackhawk and 11 aircraft in fiscal year 2000. I agree with you that the National Guard must be provided sufficient funding to carry out their important responsibilities and aviation missions and we will do all that we can to address your concerns in the fiscal year 2002 Appropriations bill. Mr. BIDEN. I thank my colleague, and with his assurances, I will not offer this amendment. I do so only because of his assurances that we will deal with this aviation crisis in the fiscal year 2002 defense bill and because I believe this supplemental is so vital to our military that I do not wish to endanger its speedy passage. I yield the floor.

Mr. LEAHY. Mr. President, I enthusiastically support Senator BIDEN’S coloquy. As a cochair of the Senate Guard Caucus, I find it alarming that of the 1,865 Army National Guard helicopters nationwide, over 1,000 were recently grounded because of a lack of spare parts. As recently as May it was reported that only 40 percent of the fleet of Army National Guard helicopters were flying.

Our skyrocketing maintenance costs require ever increasing resources just to maintain our aging fleet. Consequently our modernization accounts remain insufficient to replace aging aircraft, creating a vicious cycle. Senator BIDEN’S effort today draws needed attention to the alarming trends that we have seen in Army aviation within the past few years.

Mr. BIDEN. I thank my colleague, and with his assurances, I will not offer this amendment. I do so only because of his assurances that we will deal with this aviation crisis in the fiscal year 2002 defense bill and because I believe this supplemental is so vital to our military that I do not wish to endanger its speedy passage. I yield the floor.

Mr. LEAHY. Mr. President, I rise today to lend my support to the spirit and the Biden amendment. The National Guard suffers from a serious shortage of helicopters, and it is critical that the Senate do more to address this threat to the readiness of the citizen-soldier force.

The National Guard needs at least an additional 200 helicopters. This is not a number pulled out of thin air. It is the minimum number of aircraft needed to carry out the Army Aviation Modernization Plan, which was developed by the office of the Chief of Staff of the Army. It is the road map for the entire Army’s helicopter inventory for the next 50 years. The plan will streamline the Army’s aviation regiments. It reduces the overall number of helicopters in the Army’s inventory, including the National Guard, while increasing capabilities through technological advances. Specifically, the service will retire 700 Vietnam-era UH-1 Hueys, in exchange for 330 advanced UH-60L Blackhaws.

In streamlining and modernizing this force, the plan reaffirms the critical role of our citizen-soldiers in our Nation’s defense. It recognizes that the National Guard is doing more than ever to defend the Nation, whether at home or abroad. Indeed, every Member of the Senate will certainly tell you what a difference these helicopters have made in a flood or medical emergency, while every field commander will similarly point out the critically important role of National Guard aviation assets in a combat environment.

But the plan also has a much more practical bent. It seeks to avoid a looming crisis in National Guard aviation. The Guard’s current inventory of UH–1 Blackhawk and AH–1 Cobra helicopters is old, expensive, and increasingly unsafe to operate. Units that possess upwards of 15 aging Huey and Cobra helicopters, may have only 2 to 6 aircraft actually flying. By legislative mandate, the National Guard must remove all of these obsolete aircraft from the flight-line when their units take full advantage of additional Kiowa helicopters, they will be hard-pressed to maintain qualified pilots and an acceptable state of readiness when newer aircraft do not arrive to replace them.

Given the Army’s sensible plans and the looming dangers to National Guard aviation readiness, I have been surprised and disappointed by the Army’s reluctance to buy more UH-1’s. For the past several fiscal years, the Army has requested only 10 helicopters a year. In this fiscal year, the service has asked for a 12. It will take well over 20 years to complete the plan at that pace.

I am especially disappointed by this meager request because the National Guard Caucus, including members with helicopter units in their States, have expressed its concern to the Army several occasions. At every one of these briefings, meetings, and extended discussions Army leaders have admitted that a service exists. Yet, when the budget request moved forward, we get this paltry number. I recognize that fiscal realities limit what Congress can do to rectify this situation on the supplemental. Nonetheless, I urge the Senate to examine this situation closely when it reviews the fiscal year 2002 defense budget.

I look forward to working with the Defense Appropriations Subcommittee, fellow Guard caucus cochair Senator BOND, and longtime caucus member Senator BIDEN on this issue. I thank Senator BIDEN in particular for offering this amendment and bring further attention to this problem.

Mr. FEINGOLD. Mr. President, I offered an amendment to the supplemental appropriations bill to increase funding for the Global Fund for AIDS, TB and malaria. My amendment was an attempt to get this Senate to put its money where its mouth is, and in a fiscally responsible fashion to make a significant contribution to the multilateral effort to fight the AIDS pandemic—a contribution that could leverage more funds from other donors. In the wake of the recent U.N. special session on AIDS, it seemed especially appropriate to take concrete action rather than rely on mere rhetoric.

The amendment failed, but I do not want that vote to leave anyone with the impression that there is no will in this Senate to address the global AIDS pandemic. Some were uncomfortable with the offset, which involved rescinding funds from the troubled V–22 Osprey procurement program for the remainder of the 2001 fiscal year. I believed that the offset was reasonable. Some were uncomfortable with the emergency designation in the amendment. The emergency designation was necessary, because the bill was already up against the cap on non-defense spending. It was also accurate. The AIDS epidemic is, unquestionably, an emergency.

While these issues may have led my amendment to defeat today, I do believe that this Senate will take meaningful action to address it. The very fact that the supplemental contains $100 million for the Global Fund is a testament to the efforts of the appropriators and the leadership. Indeed, I suspect that many Senators, including many colleagues who opposed my amendment, are left uneasy by the AIDS-related consequences of the vote on my amendment, and I believe that unease will only strengthen our collective resolve to work together, in a bipartisan and inclusive fashion, to make certain that the U.S. takes meaningful action to strengthen prevention efforts, improve AIDS awareness and education, increase global access to treatment, support vaccine research, improve health infrastructure, provide services to orphans, and support the Global Fund at an appropriate level—one far exceeding $200 million.

Mr. McCONNELL. Mr. President, I rise today in support of language which was included in the amendment to S. 1007. I am pleased that Senators BYRD and STEVENS have agree to accept my language which will extend compensation to Department of Energy employees and DoE contractor employees who suffered kidney cancer due to exposure to radiation while working at a DoE defense nuclear facility or nuclear weapons testing site.

Last year, Congress passed the Energy Employees Occupational Illness Compensation Program Act as part of the FY 2001 Department of Defense Authorization bill. This measure provides $150,000 lump sum payments as well as payments for medical coverage to Department of Energy employees and DoE contractor employees who suffered kidney cancer due to exposure to radiation while working at a DoE defense nuclear facility or nuclear weapons testing site.

In streamlining and modernizing this force, the plan reaffirms the critical role of our citizen-soldiers in our Nation’s defense. It recognizes that the National Guard is doing more than...
Mr. CAMPBELL. Mr. President, today I take this opportunity to express my support for the fiscal year 2001 Appropriations bill. This bill contains funding, not only for the defense and security of our country, but also funding for the health and well-being of American citizens. The $84 million included in this bill will pay the IOU’s our Nation made to these terminally ill workers. Hundreds of these beneficiaries live in Colorado and they are in desperate need of that money that was promised to them last year. Dying has a way of making people desperate, especially when the money promised by IOU’s could then be used for their care. There are many times we in this body act because we can. In this matter, we have the opportunity to act because we ought to.

I thank my friends and colleagues, Senators DOMENICI, and BINGLAMAN, for their assistance and support with this, as many of their constituents are claimants as well.

I would also like to express my strong support for additional funding for the Animal Plant Health Inspection Service (APHIS). The $35 million included in this bill will allow APHIS to strengthen border inspections and improve monitoring of emerging animal and plant diseases, including Mad Cow disease, Foot-and-Mouth disease, and other livestock diseases. There has never been a case of Mad Cow disease in the United States, and there has not been an outbreak of Foot-and-Mouth Disease since 1929. But, considering the potentially disastrous effects if either disease spreads to our country, we must do everything we can to protect the American food supply. As a rancher myself, and having heard from fellow cattlemen, I share their growing concern about the potential devastating impact of these diseases. Colorado is home to 12,000 beef producers and 3.15 million head of cattle—more than the human population of states 20 or more times the size of Colorado. We must do all we can to protect them. I would like to thank my friend and colleague Senator KOHL, for his support and assistance in this effort.

Finally, I would like to express my gratitude to Chairman BYRD and Senator STEVENS for their leadership and support of this bill, and particularly for their support of funding for RECA and APHS.

Mr. President, I urge my colleagues to join me in support of this important funding bill.

Mrs. FEINSTEIN. Mr. President, I want to first express my appreciation to the chairman of the Appropriations Committee for his work on the fiscal year 2001 supplemental appropriations bill. It is only through his persistence and determination that we are able to bring this bill to floor within the spending limits proposed by the President.

I want to specifically thank Chairman BYRD for his work on an issue of great importance to California. This bill includes $20 million in disaster assistance to crop growers in the Klamath Basin of northern California and southern Oregon, who, along with a total loss of income from a lack of water, I am very grateful that Chairman BYRD saw the true emergency in this situation.

This year, the Klamath Basin is facing one of the worst, if not the worst drought in the Klamath River Project’s 90-year history. Federal disaster declarations have been issued by the USDA for Modoc and Siskiyou Counties in California and Klamath County, OR. Economic losses to the farming communities have been estimated at up to $220 million.

Over 200,000 acres of farmland are irrigated in the Klamath River Basin. There are roughly 1500 farming families in the Klamath Irrigation Project.

The Endangered Species Act requires the Bureau of Reclamation to review its programs with consultation from the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, with the obligation to protect endangered species. In Klamath this includes two species of suckerfish, the coho salmon, and the bald eagle. In addition to the Endangered Species Act, the Bureau of Reclamation must protect tribal fishing and water rights.

What little rainfall that has occurred this year must be first applied to minimize endangered fish species losses and then to mandatory Tribal Treaty obligations. This leaves literally no water for about 85 percent of the Klamath Project-dependent farmers. And this problem is not going to go away. Based on Bureau of Reclamation estimates, there will not be enough water for all users in 7 out of the next 10 years in the Klamath Basin.

Lack of water in the Klamath Basin is a problem that requires a long term solution. I am committed to working with the administration and my colleagues here in the Senate to develop that solution.

Unfortunately, a long-term solution will not help the farmers today. That is
BYRD recognizes this need. I want to continue to work on the R2 mission, or a suitable equivalent, and look forward to supporting NASA’s human space flight funding within the National Aeronautics and Space Administration. NASA. In its report, the Appropriations Committee included language removing a restriction placed on $40 million in fiscal year 2000 Human Space Flight funding. The restriction required these funds to be used for a dedicated shuttle research mission. With various delays in the shuttle manifest, the STS 107 mission has been rescheduled for May 2002. Removing the restriction will allow NASA to use the $40 million to cover costs associated with the delay of STS 107 mission and for research to be conducted aboard the International Space Station.

The followon shuttle dedicated research mission, also known as “R2,” is now not expected to fly until at least 2004. This mission was intended as a “gap-filler” to support the scientific community during construction of the International Space Station. At the same time, the agency is proposing to decrease funding for Space Station research in order to pay for cost overruns associated with building the vehicle itself. The life and microgravity science community is already under funded. Continuing to delay the “R2” mission will only exacerbate the research community’s already strained situation.

While I do not oppose this reprioritizing of funds, I agree with my colleagues on the Appropriations Committee about the need to balance such requests with maintaining life and microgravity research conducted aboard the shuttle and space station. While NASA certainly needs to meet its obligations, I am concerned that the redirection of these funds will ultimately preclude NASA from pursuing the dedicated research flight entirely. The Senate language associated with the supplemental appropriations bill directs NASA to consult with Congress on the research planned for the R2 mission in the context of the future funding required to support space station research. I expect NASA to continue to work on the R2 mission, or a suitable equivalent, and look forward to working with NASA and my colleagues on the Appropriations Committee in receiving and reviewing these research plans.

ISRAELI PURCHASES OF U.S. GRAIN

Mr. CRAIG. Mr. President, I have offered an amendment to the fiscal year 2001 supplemental appropriations bill regarding the purchase of U.S. grain by Israel. This issue is of concern because Israel has stated its intention to cut its U.S. grain purchases by more than 22 percent. I opposed this.

Historically, in every year since the Camp David Accords of 1978, Israel has agreed to purchase 1.6 million metric tons of grain grown by American farmers and to ship at least half that amount in United States-flag commercial vessels. These are purchases important to American agriculture and to the U.S. citizen merchant mariners critical to our national security. Every year, these purchases have been consistent, until now.

Starting in 1979, and in every year since then, Israel has entered into a side letter agreement with the United States for the purchase of grain, recognizing that the cash transfer economic assistance Israel has received replaced, in part, an adverse importuity import assistance program for Israel.

Despite a level of U.S. aid in every year since 1984 that has been higher than the 1979-1983 level, Israel never increased grain imports. Had proportionality been maintained, Israel’s purchases should have reached 2.45 million tons at least at one point. The commitment to purchase never grew as Israel’s economic support fund assistance grew. America, in generous friendship, didn’t push for those purchases to grow. And, as economic assistance to Israel has recently decreased, Israel’s commitment to purchase didn’t change until now.

The Government of Israel has announced its intention to reduce grain purchases by more than 22 percent this year, from 1.6 million tons to 1.24 million tons. This is not proportional, but disproportional. U.S. economic assistance to Israel has declined only 12.5 percent this year. If Israel’s purchases of U.S. grain rose to increasing levels of U.S. economic aid, then these purchases should not be tied to a recent downward fluctuation in economic aid. Such an overreaction ignores history, is disappointing in view of our long-term friendship and overall relationship, and ignores the express intent of this Congress in providing aid in the past.

Several times in recent years, Congress has enacted laws providing that, in administering assistance, the President would guard against policies that would curtail such exports from the United States to Israel.

The amendment I offered this week simply would have reiterated for fiscal year 2001 the past Congressional commitment that this year’s side letter agreement should be in accordance with terms as favorable as last year’s agreement. I was prepared to pursue that amendment further. I remain concerned and disappointed over this year’s side letter. However, with most of fiscal year 2001 past, with the need for this supplemental bill to move quickly for the benefit of our national defense and our men and women in uniform, and based upon discussions with the Chairman and Ranking Member of the Foreign Operations Subcommittee, I am willing to withdraw at this time. I would like to yield to these two colleagues for a discussion on this matter.

Mr. LEAHY. The Senator is correct in stating that Congress, and our subcommittee, has had a longstanding interest in this area and has consistently monitored this issue. We are prepared to turn very shortly to consideration of the fiscal year 2002 foreign operations appropriation bill. I believe that would be the best vehicle for consideration of this issue, in the regular order, when we can consider all the policy ramifications for the entire, upcoming year. I can assure the Senator of our continued attention to this matter, and of thoughtful, thorough consideration.

Mr. HATCH. Mr. President, I want to take this opportunity to comment specifically on Chapter 1 of the supplemental appropriations legislation, S. 1077, and the provision of funding for the Radiation Exposure Compensation Act, or RECA as it is more commonly known.

Since the enactment of RECA in 1990 and the subsequent amendments in 2000, thousands of Americans have received compensation based on their unknowing exposure to harmful radiation caused by the government’s nuclear production and testing activities.

As many of my colleagues will recall, last year, Congress passed the Radiation Exposure Compensation Amendments of 2000, S. 1515. This law made important changes to the 1990 Act by updating the list of compensable illnesses—primarily cancers—based on scientific and medical information gathered over the past decade.

However, even before the enactment of RECA 2000, the Trust Fund became financially depleted. Starting in the Spring of last year, approved claimants began receiving “IOUs” from the Department of Justice rather than their checks.

As many of us are totally dismayed that the RECA Trust Fund is depleted. It is totally unfair for the government to issue IOUs rather than checks to the hundreds and potentially thousands of

Mr. LEAHY. The Senator is correct in stating that Congress, and our subcommittee, has had a longstanding interest in this area and has consistently monitored this issue. We are prepared to turn very shortly to consideration of the fiscal year 2002 foreign operations appropriation bill. I believe that would be the best vehicle for consideration of this issue, in the regular order, when we can consider all the policy ramifications for the entire, upcoming year. I can assure the Senator of our continued attention to this matter, and of thoughtful, thorough consideration.

Mr. HATCH. Mr. President, I want to take this opportunity to comment specifically on Chapter 1 of the supplemental appropriations legislation, S. 1077, and the provision of funding for the Radiation Exposure Compensation Act, or RECA as it is more commonly known.

Since the enactment of RECA in 1990 and the subsequent amendments in 2000, thousands of Americans have received compensation based on their unknowing exposure to harmful radiation caused by the government’s nuclear production and testing activities.

As many of my colleagues will recall, last year, Congress passed the Radiation Exposure Compensation Amendments of 2000, S. 1515. This law made important changes to the 1990 Act by updating the list of compensable illnesses—primarily cancers—based on scientific and medical information gathered over the past decade.

However, even before the enactment of RECA 2000, the Trust Fund became financially depleted. Starting in the Spring of last year, approved claimants began receiving “IOUs” from the Department of Justice rather than their checks.

As many of us are totally dismayed that the RECA Trust Fund is depleted. It is totally unfair for the government to issue IOUs rather than checks to the hundreds and potentially thousands of
individuals who are expected to be approved for compensation.

I know that my colleagues on the Appropriations Committee agree, and that is why they have included $84 million for RECA claims in this bill. It is my understanding that these funds are the amount necessary to cover all approved claims pending at the Justice Department through the end of this fiscal year. And that is good news.

The bad news is that we still face a shortfall in funding over the course of the next 10 years. That is why I introduced legislation, S. 698, along with my distinguished colleagues Senator DOMENICI and Senator DASCHLE to provide permanent funding for the RECA trust fund. Such action would provide certainty to the thousands of claimants for whom the program was enacted.

As I am sure my colleagues recognize, for the Federal Government to promise compassionate compensation to the RECA downwinders and workers and then not honor that commitment is simply unacceptable. It is inexcusable for the government to pledge this compensation and then issue nothing more than a simple IOU. This strikes at the very heart of our citizens' ability to have confidence in their government.

I have met with many of the RECA claimants in my state. It does not take long to see the pain and suffering they have endured over the years. This pain and suffering, I would add, has taken a toll on their lives and the lives of their families as well. Most of these individuals are now retired; they live on modest incomes and fear that their declining health will only exacerbate their limited family finances.

And I urge my colleagues, to ignore the overwhelming and personal human tragedy that many of these individuals already have died as a result of the injuries they sustained while working for the government’s nuclear production program. Today, we have the opportunity to right a wrong through passage of this legislation, and I hope that we do so at the earliest opportunity.

In closing, I particularly want to thank my good friend Senator DOMENICI and his excellent staff, for their work on the Appropriations Committee in securing these funds. Senator DOMENICI and I have worked together since 1990 on RECA. We have done so in the name of thousands of individuals across many states who were literally innocent victims of our nation’s nuclear weapons program. I am appreciative for all Senator DOMENICI has done to make this program the success it has been.

Mr. WARNER. Mr. President, my amendment to the bill will redesignate Building 1500 at the Norfolk Naval Shipyard, Portsmouth, VA, as the Norman Sisisky Engineering and Management Building. I am joined by my Virginia colleague, Senator GEORGE ALLEN.

As a Navy veteran of World War II, Congressman Sisisky was proud to be a part of one of the most extraordinary chapters in American history, when America was totally united at home in support of our 16 million men and women in uniform on battlefields in Europe and on the high seas in the Pacific—all, at home and abroad, fighting to preserve freedom.

During our 18 years serving together, Congressman Sisisky’s goal, our goal, was to provide for the men and women in uniform and their families.

The last 50 years have proven time and again that one of America’s greatest investments was the G.I. Bill of Rights, originated during World War II, which enabled service men and women to graduate the institutions they could rebuild America’s economy. The G.I. Bill was but one of the many benefits that Congressman Sisisky fought for and made a reality for today’s soldiers, sailors, airmen, and Marines.

His strength of public life was supported by his wonderful family; his lovely wife Rhoda and four accomplished children. They were always by his side offering their love, support, and counsel.

He worked tirelessly throughout Virginia’s 4th District, however, there was always a special bond to the military installations under his charge. As a former sailor, the Norfolk Naval Shipyard was high among his priorities. He knew the workers by name and the monthly workload in the yard. In consultation with his family and delegation members, we chose this building at the shipyard as a most appropriate memorial to our friend and colleague.

I waited until the special election was concluded for Virginia delegation could join together on this legislation.

Norman Sisisky was always a leader for the delegation on matters of national security. We are honored to join in this bi-partisan effort to remember Congressman Norman Sisisky and his life’s work; ensuring the Nation’s security and the welfare of the men and women in uniform and their families.

Along with my remarks, I would like to congratulate the Commander Chief of the Atlantic Fleet, Admiral Bob Natter. Admiral Natter worked very closely with Norman Sisisky throughout his career and joins me and the entire Virginia delegation in supporting the naming of Building 1500; the Norman Sisisky Engineering and Management building.

Admiral Bob Natter, Commander in Chief, Atlantic Fleet writes:

"It is highly fitting to name the Norfolk Naval Shipyard’s Engineering and Management building at the Navy’s oldest and most historic shipyard after Representative Norman Sisisky. Mr. Sisisky was on hand in 1983 for the dedication and ribbon cutting of this building, which has become the most recognizable building on the shipyard. He was an inspiration and service to our Navy, this great shipyard, and its many employees mirror the Norfolk Naval Shipyard motto of “Service to the Fleet, any ship, anytime, anywhere.”

From improvements in quality of life to the facilities that have made the Norfolk Naval Shipyard one of the finest yards in the nation, Mr. Sisisky strongly supported the best interests of our Navy and our Nation. Among a wide range of projects at the shipyard, he supported a new bachelor enlisted quarters which today houses 300 Sailors and served as a model for the entire Navy. He was an ardent supporter of a waterfront improvement project that significantly expanded shipyard capabilities, including the capacity to conduct simultaneous repair and construction projects at the shipyard. He was personally dedicated to keeping this great public shipyard competitive, in cost and in unparalleled quality.

Perhaps most of all, the Sailors of the Atlantic Fleet and the dedicated men and women of the Norfolk Naval Shipyard who work tirelessly on our ships and submarines knew Norm Sisisky was their strongest supporter and would fight for their best interests. His presence at nearly every important Navy event in the community made him a popular, recognizable and appreciated friend among uniformed Sailors and civilians alike. He has made an indelible mark on this community and a lasting contribution to the Atlantic Fleet. We are honored to have this centerpiece of the Norfolk Naval Shipyard named after Norman Sisisky, a great patriot who will forever be remembered as a great friend of the Navy."

Mr. COCHRAN. Mr. President, I am pleased that the supplemental appropriations bill which we will vote on today includes much needed funding for education.

Federal support to improve the educational opportunities of disadvantaged students is provided under title I of the Elementary and Secondary Education Act. Earlier this year, the Department of Education announced the allocation of title I funds for qualified schools. The Department was forced to make cuts in the expected funding for all of these school districts, due to a shortfall in the amounts appropriated for this purpose last year.

This bill provides $161 million to cover that shortfall; $2.4 million of these funds will be allocated to schools in my State. With this funding, schools in Mississippi will be able to continue to provide essential learning resources to students from preschool through 12th grade.

In April of this year, in his capacity as chairman of the Senate Subcommittee on Labor, Health and
July 10, 2001

CONGRESSIONAL RECORD—SENATE

12825

Human Services, Education and Related Agencies, Senator SPECTER authorized me to chair a hearing in Mississippi because it was important to me as a former Mississippi Senator. The panel of witnesses included Mississippi Department of Education officials and local school superintendents. The resounding message from the hearing was that title I funds making good classroom learning opportunities available to all of Mississippi's students.

One of the most compelling statements was that of Yazoo City School Superintendent, Dr. Daniel Watkins and the other witnesses from Montgomery Elementary School in Louise, MS. I want to share with the Senate some of his testimony, which I quote here:

I began my educational career in 1964 in Louise. My mother was a single parent with 7 children.

My first 3 years at elementary school were in a room without a bulletin board, a chair, a desk, or any textbooks. I was simply handed the plans. This question-and-answer method of teaching is what the big deal is. I think the best way to explain what happened is to sit down with an architect and sketch out their ideas of what they want their house to look like. The architect would then take these sketches and form a blueprint, the final plan that gives the instructions to the carpenter who would in turn remodel the house.

The carpenter would never dream of deviating from this blueprint. After all, his job is to follow the architect's instructions, and respect his wishes. It really wouldn't matter if he thought his ideas were better than the architect's. No family in their right mind would ever hire a carpenter who wanted to re-design their old house, the first thing they would do is sit down with an architect and sketch out their ideas of what they want their house to look like. The architect would then take these sketches and form a blueprint, the final plan that gives the instructions to the carpenter who would in turn remodel the house.

This is exactly what happened with the announcement to pull the B-1's from the Air National Guard. The Air Force is now on the verge of reversing a longstanding policy by saying that our national defense needs would be better served if the B-1's were flown exclusively by the Active Duty forces. This decision was made in spite of the facts that the blueprint for our national defense needs would be better served if the B-1's were flown exclusively by the Active Duty forces.

It is as if the carpenter has decided to remodel their old house, the first thing they would do is sit down with an architect and sketch out their ideas of what they want their house to look like. The architect would then take these sketches and form a blueprint, the final plan that gives the instructions to the carpenter who would in turn remodel the house.

The decision to cut and realign the B-1 national defense needs was made in the early 90's.

I am pleased to be joined by my colleague from Oregon, Senator Smith, and my colleagues from California, Senators FEINSTEIN and BOXER, in thanking the Chairman and Senator STEVENS for their inclusion of this important provision in this supplemental appropriations bill.

As you know, Mr. Chairman, I have come to the floor today to speak out on the Air Force's decision to substantially cut America's B-1 Bomber force. As many of my colleagues know, as part of the 2002 Defense budget amendment, the Air Force announced its intentions to remove the B-1 Bomber from the Air National Guard Wings at McConnell Air Base in Kansas, and Warner Robins Air Force Base in Georgia, and consolidate the remaining bombers at two active duty Air Force bases in Texas and South Dakota.

The Air Force intends for this proposal to take effect immediately after funds become available following the passage of the 2001 supplemental appropriations bill, and desires that the entire project be completed in a year or so. The Air Force justified this announcement to Congress by stating that this cut was a good way to realize cost savings in 2002 Defense Budget.

his previous statements, Secretary Rumsfeld has acknowledged that future combat missions will depend on long-range precision strike bombers which are capable of reaching their targets from airbases within the United States. How can the Air Force make a decision to cut the B-1 Bomber fleet when such a decision seems to run contrary to Secretary Rumsfeld’s previous statements?

As a member of the Foreign Relations Committee, I fully agree with this assessment. It is becoming increasingly difficult for the U.S. to rely on other country’s airstrips to stage our Air Force operations. We must look to platforms that enable us to conduct missions from the safety of America’s shores.

No other bomber in today’s Air Force can match the B-1 for accomplishing these missions. The B-1 has more payload capacity than the Stealth B-2, and is much faster than either the B-2 and B-52.

While I agree that stealth technology is important to our Air Force, we should be cautious about becoming overly reliant on it. If we cannot always depend on stealth for surprise and protection, we will have to return to speed and maneuverability. The B-1, is the only bomber today that meets this requirement.

So if the Air Force still needs the B-1, why cut the fleet from 93 to 60? One excuse is that it will be cheaper, and that the Active Duty can accomplish this mission better than the Air National Guard.

But according to figures released by the Guard Wing at McQuillen, the Air Force is simply wrong in this estimation. Consider just a few simple facts:

The average B-1 Mission Capable rate for the Air National Judd is 61.5 percent. The active component only rates 53.4 percent.

The average Total Mission Capable rate for the Air National Guard is 19.9 percent, compared to the Active Duty’s rate of 24.6 percent.

The Kansas Air National Guard opotes one of the Air Force’s two Engine Regional Repair Centers and the Georgia Unite Provides avionics systems support for all the B-1’s providing high-level expertise in reducing costs.

When confronted with these figures, how can the Air Force conclude that the Active Duty can accomplish this mission in a more cost-effective manner than the Air National Guard? I am pleased that Senators Roberts and Cleland will be calling on the General Accounting Office to see if this decision would make more economic sense that keeping the Guard flying the B-1.

A force structure decision should never have been made without the guidance of a new national security blueprint. Even more important, such a decision should never have been made on false economic assumptions. We cannot afford to make hasty decisions.

Today, I join a bipartisan group of Senators consisting of Senators Roberts, Cleland, Miller, Craig, and Crapo in offering an amendment to the 2001 Defense Supplemental Bill that will prohibit 201 funds from being used to carry any orders to cut or transfer the B-1. In spite of the Air Forces announcement, we offer this amendment to put the Air Force on notice that hasty decisions regarding our national security are unacceptable to Congress.

Mr. DODD. Mr. President, I understand the very difficult job the Appropriations Committee has faced in producing this supplemental appropriations bill and I commend the leadership of the committee for its work.

However, it is very unfortunate that it was necessary to cut $317 million in critical dislocated worker funding. I hope that this will be a short-lived reduction and that it will be possible to eliminate this cut in conference. Further, I urge the committee to also reject the administration’s proposed further $500 million reduction in training programs in the fiscal year 2002 appropriations.

In the 105th Congress the Workforce Investment Act was overwhelmingly supported on a bipartisan basis. Few issues that we debate in Congress are as important to the future of this country as the lifelong education and training of our workforce. We live in an era of a global economy, emerging industries and company downsizing. It is imperative that our delivery of services meet the employment and educational needs of the 21st century.

We now are embarking on the creation of a streamlined and vitally necessary workforce development system. More authority is given to State and local representatives of government, business, labor, education, and youth activities. There is a true collaborative process between the state and local representatives to ensure that training and educational services provided will be held to high standards.

Our global economy is creating wonderful opportunities for American workers, but also great stress and anxiety. Today, the knowledge and skills workers must have on the job changes very rapidly. Companies and even industry segments enter and leave our economy very rapidly. Companies cut nearly 125,000 jobs in June. The Department of Labor reported that new claims for unemployment benefits increased by 7,000. On one day alone at the end of June three separate companies announced plans to eliminate 800 jobs in Connecticut. In the technology sector alone, almost 1,000 jobs cuts have been announced in Connecticut since the beginning of the year.

I urge the committee to re-evaluate these cuts to the dislocated worker program. Now is not the time to be short-changing our workers or our communities.

Mr. STEVENS. Mr. President, this is the first bill that Senator Byrd has handled now as chairman of the Appropriations Committee, and I in my new role as ranking member of the Appropriations Committee. I thank Senator Byrd for his courtesy. I have not seen the supplemental handled as fairly and evenly as this has been. We have responded to almost every request made by Senators from either side. I congratulate the Senator for this night and for the fact that the bill presented by the Appropriations Committee has been sustained.

Mr. DODD. Mr. President, I tender my thanks to my friend, Senator Stevens, without his able cooperation and assistance all the way, we would not have completed this bill today.

Mr. STEVENS. Have the yeas and nays been ordered?

Mr. BYRD. The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. STEVENS. Mr. President, I ask for the yeas and nays.

Mr. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays will be required after the clerk reads the bill for the third time.

The bill was ordered to be engrossed for a third time and was read the third time.

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of H.R. 2216, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2216) making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

The PRESIDING OFFICER. Under the previous order, after the enacting clause of H.R. 2216 is stricken, and the text of the Senate bill S. 1077, as amended, is inserted in lieu thereof.

Mr. BYRD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas have been ordered.

The PRESIDING OFFICER. Under the previous order, the question is on the engrossment of the amendment and third reading of the bill.
The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass?

The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Wyoming (Mr. THOMAS) is necessarily absent.

The PRESIDING OFFICER (Mr. NELSON of Florida). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 98, nays 1, as follows:

[Rollcall Vote No. 228 Leg.]

YEAS—98

Akaka, Dorgan, Lugar
Allen, Edwards, McConnell
Baucus, Ensign, Mikulski
Bayh, Enzi, Miller
Bennett, Feinstein, Murkowski
Biden, Fitzgerald, Murray
Bingaman, Feist, Nelson (FL)
Bond, Graham, Nelson (NE)
Boxer, Graham, Nickles
Breaux, Grassley, Reid
Brownback, Greg, Reid
Bunning, Hagel, Roberts
Burns, Harkin, Rockefeller
Byrd, Hatch, Rockefeler
Campbell, Hollings, Sarbanes
Carnahan, Hatchinson, Sessions
Carper, Robbison, Sessions
Chafee, Inhofe, Smith (OK)
Clinton, Jeffords, Smith (OR)
Cooper, Johnson, Snowe
Collins, Kennedy, Stabenow
Conrad, Kerry, Stabenzow
Corinne, Kohl, Stevens
Craig, Kyl, Thompson
Crapo, Landrieu, Thurmond
Daschle, Leahy, Torricelli
Dayton, Levin, Voinovich
DeWine, Lugar, Warner
Dodd, Lincoln, Wellstone
Domenici, Lott, Wyden

NAYS—1

Feingold

NOT VOTING—1

Thomas

The bill (H.R. 2216), as amended, was passed.

(The bill will be printed in a future edition of the RECORD.)

Mr. GRAHAM. I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. I move the Senate insist on its amendment to H.R. 2216 and request a conference with the House of Representatives, and the Chair be authorized to appoint conference on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. BYRD, Mr. INOUYE, Mr. HOLLINGS, Mr. STEVENS, and Mr. COCHRAN conferees on the part of the Senate.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT OF CONFERENCE—H.R. 1

Mr. REID. Mr. President, I ask unanimous consent that with respect to H.R. 1, the elementary and secondary education bill, the Senate insist on its amendment and request a conference with the House and the Chair be authorized to appoint conferees.

There being no objection, the Presiding Officer appointed Mr. KENNEDY, Mr. DODD, Mr. HARKIN, Ms. MIKULSKI, Mr. JEFFORDS, Mr. BINGAMAN, Mr. WELLSTONE, Mrs. MURRAY, Mr. REED of Rhode Island, Mr. EDWARDS, Mrs. CLINTON, Mr. LIEBERMAN, Mr. BAYH, Mr. GREGG, Mr. FISRT, Mr. ENZI, Mr. HUTCHINSON of Arkansas, Mr. WARNER, Mr. BOND, Mr. ROBERTS, Ms. COLLINS, Mr. SESSIONS, Mr. DEWINE, Mr. ALLARD, and Mr. ENSIGN conferees on the part of the Senate.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that the Senate go into a period of morning business with Senators permitted to speak for up to 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ASSIGNMENTS

Mr. DASCHLE. Mr. President, I ask unanimous consent that the following Committee assignments be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AGRICULTURE

Senator Harkin, Chairman; Senators Leahy, Conrad, Daschle, Baucus, Lincoln, Miller, Stabenow, Ben Nelson, Dayton, and Wellstone.

ARMED SERVICES

Senator Levin, Chairman; Senators Kennedy, Byrd, Lieberman, Cleland, Landrieu, Reed, Akaka, Bill Nelson, Ben Nelson, Carnahan, Dayton, and Bingaman.

APPROPRIATIONS

Senator Byrd, Chairman; Senators Inouye, Hollings, Leahy, Harkin, Mikulski, Reid, Kohl, Murray, Dorgan, Feinstin, Durbin, Johnson, Landrieu, and Reed.

BANKING

Senator Sarbanes, Chairman; Senators Dodd, Johnson, Reed, Schumer, Bayh, Miller, Carper, Stabenow, Corzine, and Akaka.

COMMERCE

Senator Hollings, Chairman; Senators Inouye,Rockefeller, Kerry, Breaux, Dorgan, Wyden, Cleland, Boxer, Edwards, Carnahan, and Bill Nelson.

ENERGY

Senator Bingaman, Chairman; Senators Akaka, Dorgan, Graham, Wyden, Johnson, Landrieu, Bayh, Feinstein, Schumner, Cantwell, and Carper.

ENVIRONMENT

Senator Jeffords, Chairman; Senators Reid, Baucus, Graham, Lieberman, Boxer, Wyden, Carper, Clinton, and Corzine.

FINANCE

Senator Baucus, Chairman; Senators Rockefeller, Daschle, Breaux, Conrad, Graham, Jeffords, Bingaman, Kerry, Torricelli, and Lincoln.

FOREIGN RELATIONS

Senator Biden, Chairman; Senators Sarbanes, Dodd, Kerry, Feingold, Wellstone, Boxer, Torricelli, Bill Nelson, and Rockefeller.

GOVERNMENT AFFAIRS

Senator Lieberman, Chairman; Senators Levin, Akaka, Durbin, Torricelli, Cleland, Carper, Carnahan, and Dayton.
CONGRESSIONAL RECORD—SENATE

July 10, 2001

This agreement temporarily solves one of the most difficult to solve water issues on the Rio Grande. I can’t think of an issue that affects more New Mexicans, for this reason I decided that it was essential that I be in New Mexico and therefore, necessarily absent.

I would have voted for the First Substantive Version of the Patients Bill of Rights had I been in Washington.

ON THE FAIRNESS OF THE ADMINISTRATION OF THE DEATH PENALTY

Mr. FEINGOLD. Mr. President, “The system may well be allowing some innocent defendants to be executed.”

Were these the words of Governor George Ryan, the Illinois Governor who placed a moratorium on executions last year? They could have been, but they were not. Were these the words of an attorney defending someone facing the death penalty? They could have been. Rather, these were the remarkable words of Supreme Court Justice Sandra Day O’Connor—the same Justice O’Connor who has generally supported the death penalty during her twenty years on the Court, the same Justice O’Connor who has championed states’ rights, including the right to carry out executions, the same Justice O’Connor who joined or wrote key opinions that made it more difficult for defendants facing the death penalty to have their state sentences overturned in federal court, and the same Justice O’Connor who voted in favor of allowing executions of teenage children who committed crimes after age 16 or 17.

Justice O’Connor said, “After 20 years on the high court, I have to acknowledge that serious questions are being raised about whether the death penalty is being fairly administered in this country.” She uttered these words at a meeting before the Minnesota Women Lawyers in Minneapolis last Monday. Coincidentally, Justice O’Connor made these remarks on the 25th anniversary of the Supreme Court’s 1976 Gregg v. Georgia decision, which reinstated the death penalty as we know it today. Only four years earlier, in 1972, the Court had found the death penalty unconstitutional. But in Gregg, the Court found that sufficient safeguards had been implemented to allow states to resume use of the death penalty.

Since the Gregg decision, over 700 people have been executed in the United States and today over 3,700 people sit on death row awaiting execution. Since the Gregg decision, the rate of executions have increased: from one execution in 1981 to 98 executions in 1999, 85 in 2000, and 39 so far this year.

Rather, these were the remarkable words of Supreme Court Justice Sandra Day O’Connor—the same Justice O’Connor who has generally supported the death penalty during her twenty years on the Court, the same Justice O’Connor who has championed states’ rights, including the right to carry out executions, the same Justice O’Connor who joined or wrote key opinions that made it more difficult for defendants facing the death penalty to have their state sentences overturned in federal court, and the same Justice O’Connor who voted in favor of allowing executions of teenage children who committed crimes after age 16 or 17.

Justice O’Connor said, “After 20 years on the high court, I have to acknowledge that serious questions are being raised about whether the death penalty is being fairly administered in this country.” She uttered these words at a meeting before the Minnesota Women Lawyers in Minneapolis last Monday. Coincidentally, Justice O’Connor made these remarks on the 25th anniversary of the Supreme Court’s 1976 Gregg v. Georgia decision, which reinstated the death penalty as we know it today. Only four years earlier, in 1972, the Court had found the death penalty unconstitutional. But in Gregg, the Court found that sufficient safeguards had been implemented to allow states to resume use of the death penalty.

Since the Gregg decision, over 700 people have been executed in the United States and today over 3,700 people sit on death row awaiting execution. Since the Gregg decision, the rate of executions have increased: from one execution in 1981 to 98 executions in 1999, 85 in 2000, and 39 so far this year.

Rather, these were the remarkable words of Supreme Court Justice Sandra Day O’Connor—the same Justice O’Connor who has generally supported the death penalty during her twenty years on the Court, the same Justice O’Connor who has championed states’ rights, including the right to carry out executions, the same Justice O’Connor who joined or wrote key opinions that made it more difficult for defendants facing the death penalty to have their state sentences overturned in federal court, and the same Justice O’Connor who voted in favor of allowing executions of teenage children who committed crimes after age 16 or 17.
She also said, “Perhaps most alarming among these is the fact that if statistics are any indication, the system may be failing some innocent defendants to be executed.”

Justice O'Connor now joins Supreme Court Justices Harry Blackmun and Lewis Powell, who also late in their lives came to reconsider their support of the death penalty.

But most importantly Justice O'Connor now joins the growing chorus of Americans who are concerned about the risk of executing the innocent and the fairness of the administration of the death penalty.

Congress can and should play a role in ensuring fairness. We can create an independent, blue ribbon panel to review the fairness of the administration of the death penalty at the state and federal levels. With so many serious concerns about how the death penalty is applied by the States and Federal Government, a simple, yet necessary, step is to create a commission to review these concerns. In addition, the Federal Government and all States that authorized the use of capital punishment should suspend executions while a thorough review of the death penalty system is undertaken.

I am pleased to be a cosponsor of legislation introduced by Senator Leahy that will take some important steps towards reducing the risk of executing the innocent, the Innocence Protection Act. But more can be done and Congress should do more. Congress should create a national commission on the death penalty and support a moratorium on executions while the commission conducts its work.

If we can agree that the system is flawed and runs the risk of executing innocent people, then we can also agree that we should undertake a thorough top-to-bottom review of the death penalty system. And while we do so, it is simply unjust to proceed with executions. I urge my colleagues to sponsor the National Death Penalty Moratorium Act. Congress should do everything it can to prevent even one innocent person from being sentence to death.

I yield the floor.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator Kennedy in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I will describe a terrible crime that occurred December 20, 1991 in Russian River, CA. A 45-year-old gay man, Joseph Mitchell, was stabbed to death along Highway 116 by a hitchhiker. Paul Daniel Huycck, 19, was arrested in Springfield, Oregon the first week of January 1992 in connection with the crime. He was charged with murder and violation of parole.

I believe that government’s first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substantive. I believe that by passing this legislation, we can change hearts and minds as well.

NEW MEXICO FLOOD AND FEMA

Mr. DOMENICI. Mr. President, I rise today to thank my colleagues for acting quickly last summer in sending support to the Los Alamos community following the Cerro Grande fires. This support was due to the work of County officials, the Federal Emergency Management Agency and the Army Corps of Engineers helped control another act of mother nature that befell Los Alamos this past week.

Torrential rainstorms struck the region resulting in substantial flooding. In some areas the water swelled 60 feet as 1.75 inches of rain fell in less than one hour. Roads flooded and pavement was uprooted. Although at least six homes were evacuated, post fire flood mitigation efforts prevented a much greater calamity.

Federal and local officials recognized a year ago that some of the fire damage created infrastructure problems that could lead to future flooding. This foresight proved decisive against the rushing floodwaters.

For example, the largest bridge in the town of Los Alamos—which spans the Pueblo Canyon—was saved by Congress’ authorization of the Army Corps of Engineers. Last year, recognizing the potential for floods, the Corps extended an 18-inch culvert to 7 feet in record time. I visited the culvert site during construction and was very impressed with the skill, dedication, and professionalism of the Corps of Engineers crew.

During the recent storms, the water swelled 55 feet and was within five feet from the top of the bridge. The bridge withstood the pressure, which it could not have done without the culvert. Without that culvert, the waters would have flowed over the roadway and probably destroyed the road and bridge. It would have cost $15 million to replace the bridge.

More importantly, if the bridge had been destroyed half of the community would have been cut off from the laboratories and from all paved access to services and hospital facilities. Instead of direct access to the town, residents would have had to drive 20 miles on dirt roads that traverse deep canyons.

Fortunately, Mr. President, this culvert and other mitigation measures protected Los Alamos from its second natural disaster in two years. This is in large part due to the actions of my colleagues in Congress, and for that I extend my utmost gratitude. This assistance helped the people of Los Alamos to once again persevere against the odds.

SOUTH CAROLINA PEACHES

Mr. HOLLINGS. Mr. President, I rise to recognize South Carolina’s peach farmers for their hard work and their delicious peaches.

Today, peaches from my home State have been delivered to offices throughout the Senate and the U.S. Capitol. Thanks to South Carolina’s peach farmers, those of us here in Washington will be able to cool off from the summer heat with some delicious peaches.

For a relatively small State, South Carolina is second in the Nation in peach production. In fact, this year farmers across my State planted more than 16,000 acres of peaches. However, a hurricane has reduced this year’s crop size by 40 percent. Nevertheless, South Carolina’s peach farmers wanted to give us, here in Washington, a taste of South Carolina. And as my colleagues can attest, these are some of the finest peaches produced anywhere in the United States.

As we savor the taste of these peaches, we should remember the work and labor that goes into producing such a delicious fruit. While Americans enjoy peaches for appetizers, entrees and desserts, most do not stop to consider where they come from. Farmers will be laboring all summer in the heat and humidity to bring us what we call the “perfect candy.” What else curbs a sweet tooth, is delicious, nutritious and satisfying, but not fattening?

The truth is, our farmers are too often the forgotten workers in our country. Through their dedication and commitment, our Nation is able to enjoy a wonderful selection of fresh fruit, vegetables, and other foods. In fact, our agricultural system, at times, is the envy of the world.

As Senators and their staff feast on these delicious peaches, I hope they will remember the people in South Carolina who make this endeavor possible: The South Carolina Peach Council, David Winkles and the entire South Carolina Farm Bureau. They have all worked extremely hard to ensure that the U.S. Senate gets a taste of South Carolina.

I am sure everyone in our Nation’s Capitol will be smiling as they enjoy these delicious South Carolina peaches.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Monday, July 9, 2001, the Federal debt stood at $5,709,925,391,754.47, five trillion, seven
hundred nine billion, nine hundred twenty-five million, three hundred ninety-one thousand, seven hundred fifty-four dollars and forty-seven cents during the past 25 years.

During those years, Court TV has provided the Nation with an extraordinary civics lesson, enabling Americans to see their own criminal justice system first-hand. Viewers have seen some of the nation’s finest judges, prosecutors and defense attorneys at work and have watched the judicial process unfold—with the benefit of expert commentators and analysts. As part of that civics lesson, Court TV has enabled viewers to watch live trial coverage—for the first time ever—of cases involving such issues as, among other things: appellate arguments, breach of contract, jury selection, libel, medical malpractice, negligence, parole hearings, product liability, and even war crimes.

Mr. President, Court TV has also made a special commitment to helping reduce youth violence. Its public affairs initiative, “Choices and Consequences,” has received the cable television industry’s highest public service award, the Golden Beacon Award, for its efforts to keep our Nation’s children out of our Nation’s courts. A middle school curriculum, based on trial coverage of youth offenders, has been provided to more than 10,000 schools. A new high school curriculum, which addresses bullying among other issues, is now available online and through Court TV’s “Cable in the Classroom” Feed. Cable television operators in more than 50 cities in 24 states, plus the District of Columbia, have also partnered with Court TV in supporting “Your Town” town meetings, which have addressed a wide range of issues affecting adolescents and have been aired nationally.

Earlier this year, Court TV chairman and CEO Henry Schleiff was honored to be joined by the Speaker of the U.S. House of Representatives, J. Dennis Hastert, as well as Minority Leader Richard Gephardt and our colleague, Senator Sam Brownback, among other Congressional leaders, in announcing a new “media literacy” campaign designed to help students distinguished between the positive and negative images that they see in all forms of media—and to help them understand the consequences of actions in the real world that may seem inconsequential onscreen.

Today, I am pleased to recognize the important contribution that Court TV has made to public understanding of the judicial branch of Government and to criminal justice issues more broadly, and we applaud and encourage its continued efforts to work with our nation’s schools to reduce youth violence and help students understand that choices made at an early age can have consequences for a lifetime.

CELEBRATING THE 150TH ANNIVERSARY OF THE PHOENIX HOME LIFE MUTUAL INSURANCE COMPANY

Mr. DODD, Mr. President, I rise today to congratulate the Phoenix Home Life Mutual Insurance Company as it celebrates its 150th anniversary.

From its modest birth in 1851 as the Hartford-based American Temperance Life Insurance Company, the Phoenix has evolved into one of the largest and most well-respected insurance companies in the world. It has weathered the storms of the nineteenth and twentieth centuries—including civil war, depressions, and world wars. But true to its name, the Phoenix has emerged from these and other trials with an unswerving commitment to corporate innovation, social progress, and community service.

The Phoenix has espoused the principle—one that encourages employees to invest human capital as a means of promoting community development. As a result, Phoenix serves as a paradigm for businesses truly committed to improving the quality of life of the people they serve. In 2000 alone, the Phoenix Foundation contributed $1.6 million to charitable organizations across the country.

The Phoenix encourages its employees to devote 80 hours of company and personal time to community activities each year. The company also rewards its top 20 professional advisors through the Donor Award Program, which enables award recipients to designate up to $2,000 to a local charity. Over the years, the Donor Award Program has provided vital funds to many organizations, including the Juvenile Diabetes Foundation, the American Cancer Society, and the Make-a-Wish Foundation. Furthermore, Phoenix field offices have established a plethora of independent donation programs—many of which have benefited organizations such as the American Cancer Society, Habitat for Humanity, the YMCA, and the March of Dimes Birth Defects Foundation.

I am proud that the Phoenix’s commitment to community development has helped many local organizations in the State of Connecticut. By lending their professional expertise, leadership, and time to a number of local outreach initiatives, Phoenix employees have worked assiduously to make a difference in their communities. For example, Phoenix employees in the Hartford office work in conjunction with Foodshare each summer to deliver vegetables donated by Connecticut farmers to area soup kitchens and homeless shelters. And in 1999, a group of Phoenix employees planned and organized Connecticut’s first Adoption and Foster Care Exposition—an event that successfully promoted greater public awareness of these two important social issues.

The Phoenix has made significant contributions to the education of children. Through long-term partnerships with local schools such as the Fred D. Wish Elementary School in Hartford, Phoenix employees have worked individually with students in grades three through six to sharpen math skills and proficiency in the language arts. As a result, schools are seeing improved student attendance and higher student test scores. Phoenix also contributed $75,000 toward the establishment of the College Bowl, two Hartford-based organizations that provide education, culture, citizenship, health, and physical education programs for neighborhood children and
July 10, 2001

EXECUTIVE AND OTHER COMMUNICATIONS

Clark Kent Ervin, of Texas, to be In-
pector General, Department of State.
Nominee: Mr. President for the
Committee on Foreign Relations, I re-
port favorably the following nomina-
tion list which was printed in the
RECORDs of the dates indicated, and
ask unanimous consent, to save the ex-
 pense of reprinting on the Executive
Calendar that these nominations lay at
the Secretary’s desk for the informa-
tion of Senators.
The PRESIDING OFFICER. Without
objection, it is so ordered.
Foreign Service nominations begin-
ing Stephen K. Morrison and ending
Joseph Laurence Wright II, which
nominations were received by the Sen-
ate and appeared in the CONGRESSIONAL
RECORD on June 12, 2001.
* Nomination was reported with rec-
ommendation that it be confirmed sub-
to the nominee’s commitment to
respond to requests to appear and test-
ify before any duly considered com-
mittee of the Senate.
(Nominations without an asterisk were
reported with the recommenda-
tion that they be confirmed.)

INTRODUCTION OF BILLS AND
JOINT RESOLUTIONS

The following bills and joint resolu-
tions were introduced, read the first
and second times by unanimous con-
sent, and referred as indicated:

By Mr. BREAUX:
S. 1158. A bill to amend the Internal Rev-
ue Code of 1986 to modify the active busi-
sness definition relating to distributions of
stock and securities of controlled corporations; to the Committee on Finance.

By Ms. COLLINS (for herself and Ms. SOWE):

S. 1159. A bill to direct the Secretary of the Army to repair and extend a wave attenuation system to protect fishermen and other boaters and promote the welfare of the town of Lubec, Maine; to the Committee on Environment and Public Works.

By Mr. ROCKEFELLER:

S. 1160. A bill to amend section 1714 of title 38, United States Code, to modify the authority of the Secretary of Veterans Affairs to provide dog-guides to blind veterans and authorize the provision of service dogs to hearing-impaired veterans and veterans with spinal cord injuries, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. CRAIG (for himself, Mr. MCCONNELL, Mr. COCHRAN, Mr. ENZI, Mr. BURNS, Mr. KRIST, and Mr. HUTCHINSON):

S. 1561. A bill to amend the Immigration and Nationality Act to streamline procedures for the admission and extension of stay of nonimmigrant agricultural workers; to provide a stable, legal, agricultural work force; to extend basic legal protections and better working conditions to more workers; to provide for a system of one-time, earned adjustment to legal status for certain agricultural workers; and for other purposes; to the Committee on the Judiciary.

By Mr. SARBANES (for himself, Mr. BIDEN, Mr. McCAIN, Mr. CAMPBELL, Ms. MUKULSKI, and Mr. CARPER):

S. J. Res. 18. A joint resolution memorializing fallen firefighters by lowering the United States flag to half-staff on the day of the National Fallen Firefighters Memorial Service in Emmitsburg, Maryland; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. FEINSTEIN (for herself and Mrs. BOXER):

S. Res. 124. A resolution congratulating the University of the Pacific, and its faculty, for the university's 150th anniversary; considered and agreed to.

By Ms. CANTWELL (for herself and Mrs. MURRAY):

S. Res. 125. A resolution commemorating the Major League Baseball All-Star Game and congratulating the Seattle Mariners; considered and agreed to.

ADDITIONAL COSPONSORS

S. 345

At the request of Mr. ALLARD, the name of the Senator from Maryland (Ms. MIKULSKI) was added as a cosponsor of S. 345, a bill to amend the Animal Welfare Act to strike the limitation that permits interstate movement of live birds, for the purpose of fighting, to States in which animal fighting is lawful.

S. 367

At the request of Mrs. BOXER, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. 367, a bill to prohibit the application of certain restrictive eligibility requirements to foreign nongovernmental organizations with respect to the provision of assistance under part I of the Foreign Assistance Act of 1961.

S. 411

At the request of Mr. LIEBERMAN, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. 411, a bill to designate a portion of the Arctic National Wildlife Refuge as wilderness.

S. 530

At the request of Mr. GRASSLEY, the name of the Senator from Iowa (Mr. HARKIN) was added as a cosponsor of S. 530, a bill to amend the Internal Revenue Code of 1986 to provide a 5-year extension of the credit for producing electricity from wind.

S. 543

At the request of Mr. WELLSTONE, the names of the Senator from New Jersey (Mr. TORRICELLI) and the Senator from Washington (Mrs. MURRAY) were added as cosponsors of S. 543, a bill to provide for equal coverage of mental health benefits with respect to health insurance coverage unless comparable limitations are imposed on medical and surgical benefits.

S. 550

At the request of Mr. DASCHLE, the name of the Senator from Nebraska (Mr. NELSON) was added as a cosponsor of S. 550, a bill to amend part E of title IV of the Social Security Act to provide equitable access for foster care and adoption services for Indian children in tribal areas.

S. 562

At the request of Mr. GRAHAM, the name of the Senator from Arkansas (Mrs. LINCOLN) and the Senator from New Jersey (Mr. TORRICELLI) were added as cosponsors of S. 562, a bill to amend titles XIX and XXI of the Social Security Act and to modify the credit for medical and long term care services for Indian children.

S. 583

At the request of Mr. KENNEDY, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 583, a bill to amend the Food Stamp Act of 1977 to improve nutrition assistance for working families and the elderly, and for other purposes.

S. 638

At the request of Mr. DOMENICI, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 638, a bill to amend the Internal Revenue Code of 1986 to provide the same capital gains treatment for art and collectibles as for other investment property, and to provide that a deduction equal to fair market value shall be allowed for charitable contributions of literary, musical, artistic, or scholarly compositions created by the donor.

S. 756

At the request of Mr. GRASSLEY, the name of the Senator from Alaska (Mr. MURkowski) and the Senator from Iowa (Mr. HARKIN) were added as cosponsors of S. 756, a bill to amend the Internal Revenue Code of 1986 to extend and modify the credit for electricity produced from biomass, and for other purposes.

S. 803

At the request of Mr. LIEBERMAN, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. 803, a bill to enhance the management and promotion of electronic Government services and processes by establishing a Federal Chief Information Officer within the Office of Management and Budget, and by establishing a broad framework of measures that require using Internet-based information technology to enhance citizen access to Government information and services, and for other purposes.

S. 805

At the request of Mr. COCHRAN, the name of the Senator from Montana (Ms. COLLINS) was added as a cosponsor of S. 805, a bill to amend the Public Health Service Act to provide for research with respect to various forms of muscular dystrophy, including Duchenne, Becker, limb girdle, congenital, facioscapulohumeral, myotonic, oculo-pharyngeal, and emery-dreifuss muscular dystrophies.

S. 824

At the request of Mr. GRAHAM, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 824, a bill to establish an informatics grant program for hospitals and skilled nursing facilities.

S. 829

At the request of Mr. BROWNBACK, the names of the Senator from Indiana (Mr. BAYH) and the Senator from Massachusetts (Mr. KENNEDY) were added as cosponsors of S. 829, a bill to establish the National Museum of African American History and Culture within the Smithsonian Institution.

S. 833

At the request of Mr. DODD, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 833, a bill to amend the Federal Food, Drug, and Cosmetic Act to improve the safety and efficacy of pharmaceuticals for children.

S. 847

At the request of Mr. DAYTON, the name of the Senator from Washington (Ms. CANTWELL) was added as a cosponsor of S. 847, a bill to impose tariff-rate quotas on certain casein and milk protein concentrates.

S. 883

At the request of Mr. GRASSLEY, the name of the Senator from Nevada (Mr. REED) was added as a cosponsor of S. 883, a bill to amend the Internal Revenue Code of 1986 to provide for the
treatment of certain expenses of rural letter carriers.

S. 896

At the request of Mr. REID, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 866, a bill to amend the Public Health Service Act to provide for a national media campaign to reduce and prevent underage drinking in the United States.

S. 890

At the request of Mrs. LINCOLN, the name of the Senator from North Dakota (Mr. DORGAN) was added as a cosponsor of S. 866, a bill to amend title XVIII of the Social Security Act to provide adequate coverage for immunosuppressive drugs furnished to beneficiaries under the medicare program that have received an organ transplant, and for other purposes.

At the request of Mr. BAUCUS, the name of the Senator from Georgia (Mr. MILLER) was added as a cosponsor of S. 897, a bill to amend title 39, United States Code, to provide that the procedures relating to the closing or consolidating of a post office be extended to the relocation or construction of a post office, and for other purposes.

S. 896

At the request of Mr. ENZI, the name of the Senator from New Hampshire (Mr. SMITH) was added as a cosponsor of S. 897, a bill to amend title 39, United States Code, to provide that the procedures relating to the closing or consolidation of a post office be extended to the relocation or construction of a post office, and for other purposes.

S. 904

At the request of Mr. SCHUMER, the name of the Senator from Ohio (Mr. DeWINE) was added as a cosponsor of S. 904, a bill to amend the Iran and Libya Sanctions Act of 1996 to extend authorities under that Act.

S. 899

At the request of Mr. BINGAMAN, the name of the Senator from Massachusetts (Mr. COCHRAN) was added as a cosponsor of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

S. 1002

At the request of Ms. SNOWE, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1002, a bill to amend the Internal Revenue Code of 1986 to modify certain provisions relating to the treatment of forestry activities.

S. 1006

At the request of Mr. HAGEL, the name of the Senator from Illinois (Mr. FITZGERALD) was added as a cosponsor of S. 1006, a bill to provide for the energy security of the United States and promote environmental quality by enhancing the use of motor vehicle fuels from renewable sources, and for other purposes.

S. 1021

At the request of Mr. LUGAR, the name of the Senator from New Hampshire (Mr. SMITH) was added as a cosponsor of S. 1021, a bill to reauthorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004.

S. 1032

At the request of Mr. FRIST, the name of the Senator from Connecticut (Mr. LIEBERMAN) was added as a cosponsor of S. 1032, a bill to expand assistance to countries seriously affected by HIV/AIDS, malaria, and tuberculosis.

S. 1033

At the request of Ms. STABENOW, the name of the Senator from New York (Mr. SCHUMER) was added as a cosponsor of S. 1033, a bill to amend the Federal Water Pollution Control Act to protect 1/5 of the world’s fresh water supply by directing the Administrator of the Environmental Protection Agency to conduct a study on the known and potential environmental effects of oil and gas drilling on land beneath the water in the Great Lakes, and for other purposes.

S. 1125

At the request of Mr. McCONNELL, the names of the Senators from New Hampshire (Mr. GREGG), the Senator from Hawaii (Mr. INOUYE), the Senator from Maryland (Ms. MIKULSKI), and the Senator from Alabama (Mr. SESSIONS) were added as cosponsors of S. 1125, a bill to conserve global bear populations by prohibiting the importation, exportation, and interstate trade of bear viscera and items, products, or substances containing, or labeled or advertised as containing, bear viscera, and for other purposes.

S. 1135

At the request of Mr. GRAHAM, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1135, a bill to amend title XXV of the Social Security Act to provide comprehensive reform of the medicare program, including the provision of coverage of outpatient prescription drugs under such program.

S. RES. 121

At the request of Mr. KERRY, the names of the Senators from Indiana (Mr. LUGAR), the Senator from Oregon (Mr. WyDEN) and the Senator from Missouri (Mrs. CARNahan) were added as cosponsors of S. Res. 121, a resolution expressing the sense of the Senate regarding the policy of the United States at the 53rd Annual Meeting of the International Whaling Commission.

S. CON. RES. 11

At the request of Mrs. FEINSTEIN, the name of the Senator from Maryland (Mr. SARRANES) was added as a cosponsor of a concurrent resolution expressing the sense of Congress to fully use the powers of the Federal Government to enhance the science base required to more fully develop the field of health promotion and disease prevention, and to explore how strategies can be developed to integrate lifestyle improvement programs into national policy, our health care system, schools, workplaces, families and communities.

S. CON. RES. 34

At the request of Mr. CAMPBELL, the names of the Senator from Pennsylvania (Mr. SPECTER) and the Senator from Connecticut (Mr. LIEBERMAN) were added as cosponsors of S. Con. Res. 34, a concurrent resolution congratulating the Baltic nations of Estonia, Latvia, and Lithuania on the tenth anniversary of the reestablishment of their full independence.

S. CON. RES. 45

At the request of Mr. SMITH of New Hampshire, his name was added as a cosponsor of S. Con. Res. 45, a concurrent resolution expressing the sense of Congress that the Humane Methods of Slaughter Act of 1958 should be fully enforced so as to prevent needless suffering of animals.

AMENDMENT NO. 862

At the request of Mr. SCHUMER, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of amendment No. 862 proposed to S. 1077, an original bill making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

AMENDMENT NO. 863

At the request of Mr. FEINGOLD, the names of the Senators from Illinois (Mr. DURBIN) and the Senator from Massachusetts (Mr. KERRY) were added as cosponsors of amendment No. 863 proposed to S. 1077, an original bill making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

AMENDMENT NO. 865

At the request of Mr. VOINOVICH, the names of the Senators from Colorado (Mr. ALLARD), the Senator from Illinois (Mr. FITZGERALD), and the Senator from Nebraska (Mr. HAGEL) were added as cosponsors of amendment No. 865 proposed to S. 1077, an original bill making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

AMENDMENT NO. 866

At the request of Mr. SMITH of New Hampshire, his name was added as a cosponsor of amendment No. 866.

At the request of Mr. FEINGOLD, his name was added as a cosponsor of amendment No. 866, supra.

At the request of Mr. CONRAD, the name of the Senator from Missouri (Mrs. CARNahan) was added as a cosponsor of amendment No. 866, supra.

AMENDMENT NO. 869

At the request of Mr. KYL, his name was added as a cosponsor of amendment No. 869 proposed to S. 1077, an original bill making supplemental appropriations for the fiscal year ending July 10, 2001.
Amendment No. 870

At the request of Mr. INHOFE, his name was added as a co-sponsor of amendment No. 870 proposed to S. 1077, supra.

Amendment No. 870

At the request of Mr. HUTCHINSON, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a co-sponsor of amendment No. 870 proposed to S. 1077, supra.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BREAUX:

S. 1158. A bill to amend the Internal Revenue Code of 1986 to modify the active business definition relating to distributions of stock and securities of controlled corporations; to the Committee on Finance.

Mr. BREAUX. Mr. President, I rise today to introduce tax legislation which proposes only a small technical modification of current law, but, if enacted, would provide significant simplification of routine corporate reorganizations. The legislation is identical to S. 773 which I introduced on April 13 of last year.

This proposed change is small but very important. It would not alter the substance of current law in any way. It would, however, greatly simplify a common corporate transaction. This small technical change will alone save corporations millions of dollars in unnecessary expenses and economic costs that are incurred when they divide their businesses.

Past Treasury Departments have agreed, and I have no reason to believe the current Treasury Department will feel any differently, that this change would bring welcome simplification to section 355 of the Internal Revenue Code. Indeed, the Clinton Administration in its last budget submission to the Congress had proposed this change. The last scoring of this proposal showed no loss of revenue to the U.S. Government, and I am aware of no opposition to its enactment.

Corporations, and affiliated groups of corporations, often find it advantageous, or even necessary, to separate two or more businesses. The division of AT&T from its local telephone companies is an example of such a transaction. The reasons for these corporate divisions are many, but probably chief among them is the ability of management to focus on one core business.

At the end of the day, when a corporation divides, the stockholders simply have the stock of two corporations, instead of one. The Tax Code recognizes this is not an event that should trigger tax, as it includes corporate divisions among the tax-free reorganization provisions.

One requirement the Tax Code imposes on corporate divisions is very awkwardly drafted, however. As a result, an affiliated group of corporations that wishes to divide must often engage in complex and burdensome preliminary reorganizations in order to accomplish what, for a single corporate entity, would be a rather simple and straightforward spinoff of a business to its shareholders. The small technical change I propose today would eliminate the need for these unnecessary transactions, while keeping the statute true to Congress's original purpose.

More specifically, section 355, and related provision of the Code, permits a corporation or an affiliated group of corporations to divide on a tax-free basis into two or more separate entities with separate assets. There are numerous requirements for tax-free treatment of a corporate division, or 'spinoff,' including continuity of historical shareholder interest, continuity of the business enterprises, business purpose, and absence of any device to distribute earning and profits. In addition, section 355 requires that each of the divided corporate entities be engaged in the active conduct of a trade or business. The proposed change would alter none of these substantive requirements of the Code.

Section 355(b)(2)(A) currently provides an attribution or "look through" rule for groups of corporations that operate active businesses under a holding company, which is necessary because a holding company, by definition, is not itself engaged in an active business.

This lookthrough rule inexplicably requires, however, that 'substantially all' of the stock of the holding company consist of stock of active controlled subsidiaries. The practical effect of this language is to prevent holding companies from engaging in spinoffs if they own almost any other assets. This is in sharp contrast to corporations that operate businesses directly, which can own substantial assets unrelated to the business and still engage in tax-free spinoff transactions.

In the real world, of course, holding companies may, for many sound business reasons, hold other assets, such as non-controlling, less than 80 percent, interests in subsidiaries, controlled subsidiaries that have been owned for less than three years, which are not considered "active businesses" under section 355, or a host of non-business assets. Such holding companies routinely undertake spinoff transactions, but because of the awkward language used in section 355(b)(2)(A), they must first undertake one or more, often a series of, preliminary reorganizations solely for the purpose of complying with this inexplicable language of the Code.

Such preliminary reorganizations are at best costly, burdensome, and without any business purpose, and at worst, they seriously interfere with business operations. In a few cases, they may be so costly as to be prohibitive, and cause the company to abandon an otherwise sound business transaction that is clearly in the best interest of the corporation and the businesses it operates.

There is no tax policy reasons, tax advisors agree, to require the reorganization of a consolidated group that is clearly engaged in the active conduct of a trade or business, as a condition to a spinoff. Nor is there any reason to treat affiliated groups differently than single operating companies. Indeed, no one has ever suggested one. The legislative history indicates Congress was concerned about non-controlled subsidiaries, which are inadequately addressed, no consolidated groups.

For many purposes, the Tax Code treats affiliated groups as a single corporation. Therefore, the simple remedy I am proposing today for the problem created by the awkward language of section 355(b)(2)(A) is to apply the active business test to an affiliated group as if it were a single entity.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1158

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

SECTION 1. MODIFICATION OF ACTIVE BUSINESS DEFINITION.

(a) IN GENERAL.—Section 355(b)(2) of the Internal Revenue Code of 1986 (defining active conduct of a trade or business) is amended by adding at the end the following: "For purposes of subparagraph (A), all corporations that are members of a consolidated group (as defined in section 1504) shall be treated as a single corporation."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to distributions or transfers after the date of the enactment of this Act.

By Ms. COLLINS (for herself and Ms. SNOWE):

S. 1159. A bill to direct the Secretary of the Army to repair and expand a wave attenuation system to protect fishermen and other boaters and promote the welfare of the town of Lubec, Maine; to the Committee on Environment and Public Works.

Ms. COLLINS. Mr. President, I rise today to introduce the Lubec Safe Harbor Act of 2001.

Small communities up and down the coast of Maine literally depend upon the sea for their survival. From the rich fishing grounds that supply Maine’s great fishing industry to the beautiful coastlines that draw tourist
by both land and water, the sea provides Maine's coastal communities with their livelihood. But while the sea provides life and income to Maine's coastal communities, it can also take back what it gives.

One small community in Maine that has been particularly hard hit by the sea's fury is Lubec. In 1997, a winter storm took the lives of two Lubec fishermen. Earlier this year, storms destabilized the existing wave attenuation system in Lubec and consequently caused extensive damage to the Lubec marina. The destruction has been very difficult for this small town, whose existence, like many coastal Maine communities, is largely dependent on fishing and tourists who arrive by boat. Without the safe harbor, the town of Lubec's fishermen are further at risk.

Today, I am introducing legislation that directs the Army Corps of Engineers to construct a wave attenuation system for the Town of Lubec. For the sake of the safety of the fishermen of Lubec and the well-being of the community, this legislation directs the Army Corps to begin work immediately. My legislation authorizes $2.2 million dollars for the Army Corps to complete this project.

Call upon my colleagues to recognize the urgency of this situation. The longer Lubec goes without a safe harbor, the greater the risk to the lives of Lubec's fishermen, and the greater the threat to the economic well-being of this community. I ask my colleagues to help me pass this legislation as soon as possible.

I am pleased to be joined in this effort by my colleague from Maine, Senator Snowe. I know she will also work very hard on behalf of the people of Lubec to see this legislation enacted.

By Mr. ROCKEFELLER:
S. 1160. A bill to amend section 1714 of title 38, United States Code, to modify the authority of the Secretary of Veterans Affairs to provide dog-guides to blind veterans and authorize the provision of service dogs to hearing-impaired veterans and veterans with spinal cord injuries, and for other purposes; to the Committee on Veterans' Affairs.

Mr. ROCKEFELLER. Mr. President, I am pleased to introduce legislation today that would make guide dogs more available to veterans in need. Service dogs, or "guide dogs", have traditionally been viewed as being helpful only to those who are visually impaired. However, in recent years, primarily as a result of the Americans With Disabilities Act, there has been a push to find alternative methods of providing assistance to people with various kinds of disabilities. While there have been many technological developments in this field, there still remains a need for long-term assistance that allows for the most possible independence on the part of the disabled individual.

Specifically, my legislation would enable the Department of Veterans Affairs to provide hearing-impaired veterans and veterans with spinal cord injury or dysfunction, in addition to blind veterans, the ability to obtain service dogs to assist them with everyday activities.

There are numerous ways in which service dogs can assist their owners. Tasks such as opening and closing doors, turning switches on and off, carrying bags, and dragging a person to safety in the case of an emergency are just a few of the standard duties for service dogs. Their ability to perform these types of duties makes them invaluable to those who require day-to-day aid. Having this sort of assistance can make a big difference in terms of offering not only physical support, but companionship as well.

Various types of evidence illustrate the value of companion pets, not just to the disabled, but to everyone. The Journal of the American Medical Association published a trial study a few years ago that examined the impact of service dogs on the lives of people with disabilities—both in terms of economic and social impacts.

With regard to social considerations, researchers found that all participants had increased levels of self-esteem, independence, and community integration. The economic benefit was exemplified through a sharp decrease in the number of paid assistance hours. Overall, the JAMA study concluded that service dogs can greatly improve the quality of life for the disabled.

In closing, I extend my thanks to the Paralyzed Veterans Association, who assisted me invaluably in preparing this legislation. Their hard work and dedication to this issue have been a great help, and I am proud to have worked with them to develop this bill.

I urge my Senate colleagues to join me in seeking to provide greater accessibility to assistance for disabled veterans. They have sacrificed for all of us, and deserve every effort we can make to restore their sense of independence.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1160
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MODIFICATION AND ENHANCEMENT OF AUTHORITY TO PROVIDE DOG-GUIDES AND SERVICE DOGS TO VETERANS WITH DISABILITIES.

(a) ENHANCEMENT OF AUTHORITY—Subsection (b) of section 1714 of title 38, United States Code, is amended to read as follows:

"(b)(1) The Secretary may provide a dog-guide trained for the aid of the blind, and

(2) Any veteran with a spinal cord injury or dysfunction who is entitled to disability compensation with—

(A) a dog-guide trained for the aid of the blind; and

(B) any other equipment for aid in overcoming the disability of blindness.

(3) In providing a dog-guide or service dog to a veteran under this subsection, the Secretary may pay travel and incidental expenses (under the terms and conditions set forth in section 111 of this title) of the veteran and from the veteran's home and incurred in becoming adjusted to the dog-guide or service dog, as the case may be.

(b) CONFORMING AND CLERICAL AMENDMENTS—The section is amended to read as follows:

"1714. Fitting and training in use of prosthetic appliances; dog-guides and service dogs.

(2) The table of section at the beginning of chapter 17 of that title is amended by striking the item relating to section 1714 and inserting the following new item:

"1714. Fitting and training in use of prosthetic appliances; dog-guides and service dogs."

By Mr. CRAIG (for himself, Mr. McCONNELL, Mr. COCHRAN, Mr. ENZI, Mr. BURNS, Mr. Frist, and Mr. HUTCHINSON):
S. 1161. A bill to amend the Immigration and Nationality Act to streamline procedures for the admission and extension of stay of nonimmigrant agricultural workers; to provide a stable, legal, agricultural work force; to extend basic legal protections and better working conditions to more workers; to provide for a system of one-time earned adjustment to legal status for certain agricultural workers; and for other purposes; to the Committee on the Judiciary.

Mr. CRAIG. Mr. President, I am pleased to have joined several colleagues this week in introducing a new, improved version of the Agricultural Job Opportunity, Benefits, and Security Act, the "AgJOBS" bill.

We are facing a growing crisis, for both farm workers and growers. We want and need a stable, predictable, legal work force in American agriculture.

Willing American workers deserve a system that puts them first in line for available jobs with fair, market wages. We want and need all workers to receive decent treatment and equal protection under the law.

Consumers deserve a safe, stable, domestic food supply.
July 10, 2001

American citizens and taxpayers deserve secure borders and a government that respects the rule of law. Yet Americans are being threatened on all these counts, because of a growing labor shortage in agriculture, while the only program currently in place to respond, the H-2A Guest Worker Program, is profoundly broken.

The problem is only growing worse. Therefore, we are introducing a new, improved bill. The name of the bill says it all—“AgJOBS”.

Our farm workers need this reform bill.

There is no debate about whether many, or most, farm workers are aliens. They are. And they will be, for the foreseeable future. The question is whether they will be here legally or illegally.

Immigrants not legally authorized to work in this country know they must work in hiding. They cannot even claim basic legal rights and protections. They are vulnerable to predation and exploitation. They sometimes have been stuffed inhumanly into dangerously enclosed truck trailers and car trunks, in order to be transported, hidden from the view of the law, around the clock. In fact, they have been known to pay “coyotes”, labor smugglers, $1,000 and more to be smuggled into this country.

In contrast, legal workers have legal protections. They can assert wage, safety, and other legal protections. They can bargain openly and join unions. H-2A workers, in fact, are even guaranteed housing and transportation.

Clearly, the status quo is broken.

Domestic American workers simply are not being found to fill agricultural jobs.

Our own government estimated that half of the total 1.6 million agricultural work force are not legally authorized to work in this country. The estimate is probably low: it’s based on self-disclosure by illegal workers to government interviewers.

Some actually have suggested that there is no labor shortage, because there are plenty of illegal workers. This is not an acceptable answer.

Congress has shown its commitment over the past few years to improve the security of our borders, both in the 1996 immigration law and in subsequent appropriations.

Between computerized checking by the Social Security Administration and audits and raids by the Immigration and Naturalization Service, more and more employers are discovering they have undocumented employees; and more and more workers here illegally are being discovered and evicted from their jobs.

Outside of H-2A, employers have no reliable assurance that their employees are legal.

It’s worse than a Catch-22, in the law actually punishes the employer who could be called “too diligent” in inquiring into the immigration document of prospective workers. The H-2A status quo is slow, bureaucratic, and inflexible. It does nothing to recognize the uncertainties farmers face, from changes in the weather to global market demands.

The H-2A status quo is complicated and legalistic. The Department of Labor misses statutory deadlines in processing the applications. The solution we need is the AgJOBS Act of 2001.

This is win-win legislation.

It will elevate and protect the rights, working conditions, and safety of workers. It will help workers, first domestic American workers, then other workers. The same for foreign guest workers, find the jobs they want and need.

It will assure growers of a stable, legal supply of workers, within a program that recognizes market realities. The adjusted-worker provisions will also give growers one-time assistance in adjusting to the new labor market realities of the 21st Century.

It will assure all Americans of a safe, consistent, affordable food supply.

I invite the rest of my colleagues to join us as cosponsors; and I urge the Senate and the House to act promptly to enact this legislation into law.

I ask unanimous consent that a summary of this bill be included in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

**The Agricultural Job Opportunity, Benefits, and Security Act of 2001**

AgJOBS II is legislation reforming the current, cumbersome H-2A agricultural guest worker program and, for non-H-2A agricultural workers, creating a program in which employers can hire workers from outside the U.S. who are already here, legally or illegally, and who can work in agriculture.

This bill builds on the significant progress made last year, in legislation, hearings, and the introduction of the AgJOBS I (S. 184), the original Agricultural Job Opportunity, Benefits, and Security Act (AgJOBS) and other proposals and ideas discussed before and since, among Members of Congress, the Administration, and the agriculture community.

This new bill also addresses many of the best ideas in similar legislation introduced in the 104th Congress (S. 184, the original Agricultural Job Opportunity, Benefits, and Security Act (AgJOBS)) and other proposals and ideas discussed before and since, among Members of Congress, the Administration, and the agriculture community.

The new bill would replace the current cumbersome with a streamlined “attestation” process like the one now used for H-1B tech workers, speeding up certification of H-2A employers and the hiring of guest workers.

The new bill sets the prevailing wage as the standard, minimum wage for guest workers admitted under the H-2A program, instead of the unrealistic “premium” wage currently mandated on H-2A employers (called the Adverse Economic Wage Rate), that often combines completely dissimilar worker categories in computing one wage rate.

Participating employers would continue to furnish housing and transportation for H-2A workers. Other current H-2A labor protections for both H-2A and domestic workers would be continued.

Highlights of the new status adjustment program

To qualify for adjustment to legal status, an incumbent worker must have worked in the United States in agriculture for at least three years in any 12-month period during the last 18 months. The average non-casual farm worker works 150 days a year.) The bill creates a time-adjustment opportunity, only for experienced and valued work force who are already in the United States by July 4, 2001.

To earn adjustment of status and the right to stay and work legally in the United States, a qualified worker must continue to work in U.S. agriculture at least 150 days each year, in each of 4 of the next 6 years.

During this 4-6 year period, the adjusting worker would have non-immigrant status and would be required to return to his or her home country for at least 2 months a year, unless he or she is the parent of a child born in the United States (i.e., a U.S. citizen), gainfully employed, actively seeking employment, or prevented by a serious medical condition from returning to work. The worker may also work in another industry, as long as the agriculture work requirement is satisfied. The worker would have to check in once a year with the INS to verify compliance with the law and report his or her work history.

Upon completion of the status adjustment program, the adjusted worker would be eligible for legal permanent resident status. Considering the time elapsed from when a worker first applies to enter the adjustment process, this gives an adjusted worker advantage over regular immigrants beginning the legal immigration process at the same time.
By Mr. SARBANES (for himself, Mr. BIDEN, Mr. McCAIN, Mr. CAMPBELL, Ms. MUKULSKI, and Mr. CARPER), to recognize the courage and commitment of America’s fire service and to pay special tribute to those firefighters who have made the ultimate sacrifice in the line of duty. Specifically, this legislation requires that the United States flag be flown at half-staff at all Federal facilities on the occasion of the annual National Fallen Firefighters Memorial Service at Emmitsburg, Maryland.

Our Nation’s firefighters are among our most dedicated public servants. Indeed, few would question the fact that our fallen firefighters are heroes. Throughout our Nation’s history, we have recognized the passing of our public servants by lowering our Nation’s flag to half-staff in their honor. In the past, this list has included elected officials, members of the Armed Services and America’s peace officers. In my view, our fallen firefighters are equally deserving of this high honor.

For the past nineteen years, a memorial service has been held on the campus of the National Fire Academy in Emmitsburg, to honor those firefighters who have given their lives while protecting the lives and property of their fellow citizens. Since 1981, the names of 2,081 fallen firefighters have been inscribed on plaques surrounding the National Fallen Firefighters Memorial, a Conventionally designated monument to these brave men and women. On October 7, at the 20th Annual National Fallen Firefighters Memorial Service, an additional 33 names will be added.

Over the years, I have worked very closely with the National Fallen Firefighters Foundation to ensure that the National Fallen Firefighters Memorial Service is an occasion befitting the sacrifices that these individuals have made. In my view, lowering the United States flag to half-staff is an essential component of this “Day of Remembrance.” It will be a fitting tribute to the roughly 100 men and women who die each year performing their duties as our Nation’s career and volunteer firefighters. It will also serve to remind us of the critical role played by the 1.2 million fire service personnel who risk their lives every day to ensure our safety and that of our communities.

I ask unanimous consent that this joint resolution be printed in the Record and urge my colleagues to support its swift passage.

There being no objection, the joint resolution was ordered to be printed in the Record, as follows:

S.J. Res. 18. A joint resolution memorializing fallen firefighters by lowering the United States flag to half-staff on the day of the National Fallen Firefighters Memorial Service in Emmitsburg, Maryland; to the Committee on the Judiciary.

Mr. SARBANES, Mr. President, today I am introducing legislation, together with my colleagues Senators BIDEN, MCCAIN, CAMPBELL, MUKULSKI and CARPER, to recognize the courage and commitment of America’s fire service and to pay special tribute to those firefighters who have made the ultimate sacrifice in the line of duty. Specifically, this legislation requires that the United States flag be flown at half-staff at all Federal facilities on the occasion of the annual National Fallen Firefighters Memorial Service at Emmitsburg, Maryland.

Our Nation’s firefighters are among our most dedicated public servants. Indeed, few would question the fact that our fallen firefighters are heroes. Throughout our Nation’s history, we have recognized the passing of our public servants by lowering our Nation’s flag to half-staff in their honor. In the past, this list has included elected officials, members of the Armed Services and America’s peace officers. In my view, our fallen firefighters are equally deserving of this high honor.

For the past nineteen years, a memorial service has been held on the campus of the National Fire Academy in Emmitsburg, to honor those firefighters who have given their lives while protecting the lives and property of their fellow citizens. Since 1981, the names of 2,081 fallen firefighters have been inscribed on plaques surrounding the National Fallen Firefighters Memorial, a Conventionally designated monument to these brave men and women. On October 7, at the 20th Annual National Fallen Firefighters Memorial Service, an additional 33 names will be added.

Over the years, I have worked very closely with the National Fallen Firefighters Foundation to ensure that the National Fallen Firefighters Memorial Service is an occasion befitting the sacrifices that these individuals have made. In my view, lowering the United States flag to half-staff is an essential component of this “Day of Remembrance.” It will be a fitting tribute to the roughly 100 men and women who die each year performing their duties as our Nation’s career and volunteer firefighters. It will also serve to remind us of the critical role played by the 1.2 million fire service personnel who risk their lives every day to ensure our safety and that of our communities.

I ask unanimous consent that this joint resolution be printed in the Record and urge my colleagues to support its swift passage.

There being no objection, the joint resolution was ordered to be printed in the Record, as follows:

S.J. Res. 18. Whereas 1,200,000 men and women comprise the fire service in the United States; Whereas the fire service is considered one of the most dangerous jobs in the United States; Whereas fire service personnel selflessly respond to over 16,000,000 emergency calls annually without reservation and with an unwavering commitment to the safety of their fellow citizens; Whereas fire service personnel are the first to respond to a fire, medical emergency, spill of hazardous materials, natural disaster, act of terrorism, or transportation accident; and Whereas approximately 100 fire service personnel die annually in the line of duty: Now, therefore, be it Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That each year, the United States flags on all Federal facilities will be lowered to half-staff on the day of the National Fallen Firefighters Memorial Service in Emmitsburg, Maryland.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 124—CONGRATULATING THE UNIVERSITY OF THE PACIFIC, AND ITS FACULTY, STAFF, STUDENTS, AND ALUMNI ON THE UNIVERSITY’S 150TH ANNIVERSARY.

Mrs. FEINSTEIN (for herself and Mrs. BOXER) submitted the following resolution; which was considered and agreed to:

S. Res. 124

Whereas the University of the Pacific, founded in 1851 as California’s first chartered university, is the oldest institution of higher education in the state; Whereas the University of the Pacific has established the first Conservatory of Music in California’s San Joaquin Valley; Whereas the University of the Pacific’s alumni are leaders in California and the western States in the professions of government, judicial, educational, religious, musical and theatrical performance, business, and engineering; and Whereas in recognition of the historic chartering of the University of the Pacific by the California Supreme Court, the Chief Justice of California is joining with others to recognize fulfillment of the University of the Pacific’s Charter of Establishment: Now, therefore, be it

Resolved, That the Senate—
(1) recognizes the University of the Pacific as a leader and pioneering innovator in higher education; and
(2) congratulates the University of the Pacific, and its faculty, staff, students, and alumni on the occasion of the Sesquicentennial Anniversary of the granting of the University of the Pacific’s charter.

SENATE RESOLUTION 125—COMMORATING THE MAJOR LEAGUE BASEBALL ALL-STAR GAME AND CONGRATULATING THE SEATTLE MARINERS

Ms. CANTWELL (for herself and Mrs. MURRAY) submitted the following resolution; which was considered and agreed to:

S. Res. 125

Whereas the City of Seattle and the Seattle Mariners franchise are honored to host the Major League Baseball All-Star Game (in this resolution referred to as the “All-Star Game”) for the second time, and the first time at beautiful Safeco Field; Whereas the game of baseball is widely considered America’s pastime, inspiring, challenging, and bringing together generations of all backgrounds; Whereas the 72nd All-Star Game on July 10, 2001, is the fans’ tribute to the skill, work ethic, dedication, and discipline of the best players in the game of baseball; Whereas the players selected for the All-Star Game are an inspiration to baseball fans across the world; Whereas 4 Seattle Mariners players (Bret Boone, Edgar Martinez, John Olerud, and Ichiro Suzuki) were selected by fans from around the world to start for the American League in the All-Star Game, and American League All-Star Game Manager Joe Torre chose three Mariners pitchers (Freddy Garcia, Jeff Nelson, and Kazuhiro Sasaki), and one Mariners outfielder (outfielder Mike Cameron) to be on the All-Star Game roster, and Mariners Manager Lou Piniella to be an assistant coach; Whereas Ichiro Suzuki, in his first year in Major League Baseball, received more votes to play in the All-Star Game than any other player; Whereas the Seattle Mariners have reached the All-Star break with a record of 49-48, the fourth best record at such point in the season in the history of Major League Baseball; Whereas this remarkable record has been reached not only by the individual efforts of the team’s 8 All-Stars, but because of the teamwork and timely contributions of every teammate and an extraordinary coaching staff led by Manager Lou Piniella; Whereas the teamwork, work ethic, and dedication of the players and coaches of the
Seattle Mariners have been an inspiration to baseball fans across the world and have contributed to the success of All-Star baseball. The resolution congratulates the Seattle Mariners baseball team for their remarkable achievements and the skill, discipline, and dedication necessary to reach such heights.

AMENDMENTS SUBMITTED AND PROPOSED

SA 876. Mr. BYRD (for himself, Mr. STEVENS, and Mr. HUTCHINSON) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

TEXT OF AMENDMENTS

SA 876. Mr. BYRD (for himself, Mr. STEVENS, and Mr. HUTCHINSON) proposed an amendment to the bill S. 1077, making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes, as follows:

On page 31, after line 3, insert the following:

\section*{STATE AND PRIVATE FORESTRY}

For an additional amount for “State and Private Forestry” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended.

For an additional amount for “State and Private Forestry”, $750,000 to be provided to the Kenai Peninsula Borough Spruce Bark Beetle Task Force for emergency response and communications equipment and $1,750,000 to be provided to the Municipality of Anchorage for emergency fire fighting equipment and response to wildfires in spruce bark beetle infested forests, to remain available until expended: Provided, That these funds shall be provided as direct lump sum payments within 30 days of enactment of this Act.

\section*{NATIONAL FOREST SYSTEM}

For an additional amount for the “National Forest System” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $10,000,000, to remain available until expended.

On page 31, after line 14, insert the following:

“For an additional amount for “Capital Improvement and Maintenance” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $4,000,000, to remain available until expended.”

On page 31, after line 22, insert the following:

\section*{NATURAL RESOURCES CONSERVATION SERVICE WATERSHED AND FLOOD PREVENTION OPERATIONS}

For an additional amount for “Watershed and Flood Prevention Operations”, to repair damages to waterways and watersheds, resulting from natural disasters occurring in West Virginia on July 7 and July 8, 2001, $5,000,000, to remain available until expended.

On page 14, after line 25, insert the following:

SEC. 2106. Of funds which may be reserved by the Secretary of Agriculture and transferred to State and regional agencies under section 16(h)(1) of the Food Stamp Act of 1977 to carry out Employment and Training programs, $38,500,000 made available in prior years are rescinded and returned to the Treasury.

On page 14, after line 23, insert the following:

SEC. 2107. In addition to amounts otherwise available, $2,000,000 from amounts pursuant to 15 U.S.C. 713a-4 for the Secretary of Agriculture to make available financial assistance related to water conservation to eligible producers in the Yakima Basin, Washington, as determined by the Secretary.

On page 41, between lines 6 and 7, insert the following:

SEC. 2703. IMPACT AID.

(a) OPPORTUNITY THRESHOLD PAYMENTS.—Section 8003(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7703(b)(3)(B)(iv) (as amended by section 1209 of the Impact Aid Authorization Act of 2000) (as enacted by law section 1 of Public Law 106–398)) is amended by inserting “or less than the average per pupil expenditures of all the States” after “of the State in which the agency is located.”

(b) FUNDING.—The Secretary of Education shall adjust payments under section 8003(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 from the $825,000,000 available under the heading “Impact Aid” in title III of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by section 1 of Public Law 106–398) by $11,000,000,000 based in part on an average amount equal to 30% of the average per pupil expenditures of all the States determined for fiscal year 1999.

On page 33, after line 7, add the following:

SEC. 2809. SADDEN OAK DEATH SYNDROME.

In addition to amounts transferred under section 422(a) of the Plant Protection Act (7 U.S.C. 7772(a)), the Secretary of Agriculture shall transfer to the Forest Service, pursuant to that section, an additional $1,400,000 to the States of California, Oregon, Washington, and Idaho to carry out research and development activities to arrest, control, eradicate, and prevent the spread of Sudden Oak Death Syndrome, to be derived from the unobligated balances available to the Secretary for the acquisition of land and interests in land.

On page 46, after line 2, insert the following:

\section*{NATIVE AMERICAN HOUSING BLOCK GRANTS}

For an additional amount for “Native American Housing Block Grants”, $5,000,000, to remain available until expended: Provided, That these funds shall be made available to the Turtle Mountain Band of Chippewa for emergency housing, housing assistance and other assistance to address the housing problems at the Turtle Mountain Indian Reservation: Provided further, That these funds shall be used for the acquisition of land and interests in land.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, July 10, 2001, at 9:30 a.m., in open session to receive testimony on the fiscal year 2002 budget amendment, in review of the defense authorization request for fiscal year 2002.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet on Tuesday, July 10, 2001, at 9:30 a.m. on climate change.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Tuesday, July 10, 2001, to hear testimony regarding The Role of Tax Incentives in Energy Policy, Part I.
Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, July 10, 2001 at 2:15 p.m. to hold a business meeting.

The committee will consider and vote on the following agenda items:

- The Honorable Robert D. Blackwill, of Kansas, to be Ambassador to India.
- The Honorable Wendy J. Chamberlin, of Virginia, to be Ambassador to the Islamic Republic of Pakistan.
- Mr. William A. Eaton, of Virginia, to be Assistant Secretary of State (Administration).
- Mr. Clark K. Ervin, of Texas, to be Inspector General, Department of State.
- Mr. William S. Farish, of Texas, to be Ambassador to the United Kingdom of Great Britain and Northern Ireland.
- Mr. Anthony H. Giola, of New York, to be Ambassador to the Republic of Malta.
- Mr. Douglas A. Hartwick, of Washington, to be Ambassador to the Lao People's Democratic Republic.
- The Honorable Daniel C. Kurtzer, of Maryland, to be Ambassador to Israel.
- Mr. Howard H. Leach, of California, to be Ambassador to France.
- Mr. Pierre-Richard Prosper, of California, to be Ambassador at Large for War Crimes Issues.
- Mr. Clark T. Randt, Jr., of Connecticut, to be Ambassador to the People's Republic of China.
- Mr. Charles J. Swindells, of Oregon, to be Ambassador to New Zealand, and to serve concurrently and without additional compensation as Ambassador to Samoa.
- General Francis X. Taylor, of Maryland, to be Coordinator for Counterterrorism, with the rank of Ambassador at Large.
- The Honorable Margaret D. Tutwiler, of Alabama, to be Ambassador to the Kingdom of Morocco.
- The Honorable C. David Welch, of Virginia, to be Ambassador to the Arab Republic of Egypt.
- FSO promotion list—Mr. Morri-son, et al., dated June 12, 2001.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, July 10, 2001 at 2:30 p.m. to hold a nomination hearing on Mrs. Lori A. Forman, of Virginia, to be an Assistant Administrator (for Asia and Near East) of the United States Agency for International Development.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the Subcommittee on Airland of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, July 10, 2001, at 2:30 p.m., in open session, to receive testimony on the F-22 Aircraft Program, in review of the defense authorization request for fiscal year 2002 and the Future Years Defense Program.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ENZI. Mr. President, I ask unanimous consent that Patrick Thompson, who is from my committee staff, be granted the privilege of the floor during the remainder of the debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 125 submitted earlier today by Senators Cantwell and Murray.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 125) commemorating 72nd Major League Baseball All-Star Game and to congratulate the Seattle Mariners on hosting the All-Star game and on their extraordinary start to the season.

There being no objection, the Senate proceeded to consider the resolution.

Ms. CANTWELL. Mr. President, today I rise to introduce a resolution to commemorate the 72nd Major League Baseball All-Star Game and to congratulate the Seattle Mariners on their extraordinary start to the season.

The game of baseball is widely considered America's pastime. Walt Whitman once said: "I see great things in baseball. It's our game—the American game. It will take our people out-of-doors, fill them with oxygen, give them a larger physical stoicism, tend to relieve us from being a nervous, dyspeptic set, repair these losses, and be a blessing to us."

Baseball also has been a reflection of our nation's struggles and triumphs. During the Civil War, soldiers played baseball during their free moments, whether in a fort or in a prison camp. In 1942, President Franklin Delano Roosevelt requested that professional baseball continue during the war effort to help maintain our nation's morale, even as baseball stars such as Ted Williams and Bob Feller-contributed to the war effort on the front lines as soldiers. During the civil rights movement, Jackie Robinson epitomized the struggle of African Americans as he broke baseball's color barrier and continued to fight prejudice throughout his career. Now today, as our world has changed, this resolution will add to our nation's calendar a day to honor the 150th anniversary of the University of the Pacific.

The University of the Pacific has remained throughout its history, devoted to the teaching and development of students by a faculty of outstanding scholars. It has prepared more than 60,000 students for lasting achievement and responsible leadership in their careers and communities.

The University of the Pacific is also a trailblazer in higher education. Pacific was the first university in the West to enroll women and to introduce coeducation. It also established California's first medical school and music conservatory.

I am pleased to sponsor this resolution to congratulate the University of the Pacific, and its faculty, staff, students, and alumni on the university's 150th anniversary.
All-Star Managers Joe Torre and Bobby Valentine. It is also a broader celebration as fans are treated to not only the All-Star game between the National League and the American League, but other events as well, including a FanFest featuring interactive games and displays, a homerun derby by baseball's greatest sluggers, a game between the top minor league baseball prospects of the American League and National League, and a softball game featuring All-Star game legends and other celebrities.

It is an honor and pleasure for the City of Seattle to once again host this celebration. In 1979, Seattle hosted the 50th All-Star game in just the third season for the Seattle Mariners. After two years of planning, Seattle gave baseball fans what is still considered one of the All-Star Game's single greatest celebrations in the history of the event.

That year, the Mariners were represented by only one All-Star, first baseman Bruce Bochte. A deserving player on a struggling team, Bochte had a pinch-hit run-scoring single that evening—the first hit and RBI for a Mariners All-Star.

This season, as Seattle hosts the 72nd All-Star Game, the Mariners are represented by eight players and Manager Lou Pinella. The eight Mariners players are the most to participate from one team since the 1960 Pittsburgh Pirates also had eight players. This collection of talent—and the hard work, discipline, and determination that these players have demonstrated to reach All-Star status—is at the core of one of the best starts in Major League Baseball history. The Mariners have compiled a 63–24 record, the fourth best of all time after 87 games. Importantly though, the team's success has resulted not only from the talents of All-Stars Bret Boone, Mike Cameron, Freddy Garcia, Edgar Martinez, Jeff Nelson, John Olerud, Kazuhiro Sasaki, and Ichiro Suzuki, but the contributions and teamwork of each player and coach.

The work of Mariners General Manager Pat Gillick must also be recognized. Mr. Gillick has shrewdly made trades and acquired free agents who have contributed to the improvement of the Mariners both years he has been with the franchise. The result has been a team of remarkable consistency, discipline, and talent. Last year the Mariners finished with a franchise-record 91 victories and this year they are on pace to win over 110 games.

Once again, I would like to commemorate the 72nd Major League Baseball All-Star game and the remarkable start by the Seattle Mariners.

Mr. REID. Mr. President, I ask unanimous consent that the resolution and preamble be agreed to en bloc, and the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD.

EXECUTIVE SESSION

NOMINATION OF EUGENE HICKOK, OF PENNSYLVANIA, TO BE UNDER SECRETARY OF EDUCATION

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session and the HELP Committee be discharged from the consideration of the following nomination: Eugene Hickok, to be Under Secretary of Education, that the nomination be considered and confirmed, the motion to reconsider be laid upon the table, that any statements thereon be printed in the RECORD, the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination considered and confirmed is as follows:

The Department of Education Eugene Hickok, of Pennsylvania, to be Under Secretary of Education.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to legislative session.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY, JULY 11, 2001

Mr. DASCHLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 10 a.m. on Wednesday, July 11. I further ask consent that on Wednesday, immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and there be a period for morning business until 10:30 a.m. with Senators permitted to speak for up to 10 minutes each, with the following exception:

Senator Specter from 10:15 to 10:30 a.m. The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DASCHLE. Mr. President, on Wednesday, the Senate will convene at 10 o'clock in the morning with a period for morning business until 10:30 a.m. We expect to begin consideration of the Interior appropriations bill on Wednesday.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. DASCHLE. If there is no further business to come before the Senate, I now ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 10:23 p.m., adjourned until Wednesday, July 11, 2001, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate July 10, 2001:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Melody R. Bennet, of Pennsylvania, to be an Assistant Secretary of Housing and Urban Development, Vice Alan C. Dackell, III.

SECURITIES AND EXCHANGE COMMISSION

Sandy Pitt, of North Carolina, to be a Member of the Securities and Exchange Commission for a Term expiring June 1, 2005, Vice D. Bruce Hunt, Jr., Term Expired.

DEPARTMENT OF ENERGY

Theresa Alvillar-Speak, of California, to be Director of the Office of Minority Economic Impact, Department of Energy, Vice James B. Lewis, Resigned.

DEPARTMENT OF ENERGY

J. Richard Blanesdell, of Florida, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Common Wealth of the Bahamas, Vice James E. Rice, Term Expired.

Thomas C. Hubbard, of Tennessee, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Greece.

Lawrence Berger, of Texas, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Kazakhstan.

Thomas J. Miller, of Virginia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Greece.

OVERSEAS PRIVATE INVESTMENT CORPORATION

Ross J. Connelly, of Maine, to be Executive Vice President of the Overseas Private Investment Corporation, Vice Kirk K. Robertson, Resigned.

DEPARTMENT OF LABOR

Emily Stover Derocco, of Pennsylvania, to be an Assistant Secretary of Labor, Vice Raymond L. Bramucci.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Joan N. Del, of West Virginia, to be Commissioner on Children, Youth, and Families, Department of Health and Human Services, Vice Patricia C. Monroy, Resigned.

THE JUDICIARY

James R. Gritzner of Iowa, to the United States District Court for the Southern District of Iowa, Vice Charles R. Wolfr, Retired.

Michael J. Milloy, of Iowa, to the United States Circuit Judge for the Eighth Circuit, Vice George G. Fagg, Retired.
CONFIRMATION

Executive nomination confirmed by the Senate July 10, 2001:

MICHAELE P. MILLS, OF MISSISSIPPI, TO BE UNITED STATES DISTRICT JUDGE FOR THE NORTHERN DISTRICT OF MISSISSIPPI, VICE NEAL S. BIGGERS, RETIRED.

CONFIRMATION

EXECUTIVE NOMINATIONS

DEPARTMENT OF EDUCATION

EUGENE HICKOK, OF PENNSYLVANIA, TO BE UNDER SECRETARY OF EDUCATION.
Mr. BERRY. Mr. Speaker, I rise today to pay tribute to a great American soldier and citizen, and I am proud to recognize Colonel Daniel W. Krueger in the Congress for his invaluable contributions and service to the Mid-South region and our nation.

Colonel Krueger has served for the past three years as the Memphis District Command for the U.S. Army Corps of Engineers, and he has distinguished himself by focusing on meeting the region’s water resource needs, reducing costs, and decreasing project delivery time without sacrificing quality. His exceptional leadership skills guided the Memphis District into the 21st Century with an engaged workforce dedicated to open communications, improved safety, and mission-focused training.

Key projects completed under his command include: Hickman Bluff Stabilization, White’s Creek, Francis Bland Floodway, and the initial on-farm construction phase of the Grand Prairie Demonstration Project.

He has dedicated his life to serving his fellow soldiers and citizens as a leader in both his profession as an engineer and his military service, and he deserves our respect and gratitude for his contributions.

On behalf of the Congress, I extend congratulations and best wishes to this faithful servant, Colonel Daniel W. Krueger, on his successes and achievements.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

SPEECH OF

HON. MIKE ROGERS
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 27, 2001

Mr. ROGERS of Michigan, Mr. Chairman, I want to commend my colleague from Michigan.

This is a solution though, that is looking for a problem. There is not one State in the Great Lakes Basin that allows off-shore drilling, not one. In Michigan, there is a moratorium on new directional angle drilling wells. What are we doing with this amendment?

This amendment is not about protecting the Great Lakes. For instance, it does nothing to address the potential for diversion of our fresh Great Lakes water. This amendment goes in a direction that I hope many in this chamber find disagreeable as it deeply involves the federal government in Great Lakes decision-making.

Trust my Governor. I trust the Governors of the Great Lakes States to be in charge of the water of the Great Lakes States.

As a matter of fact, underneath the Great Lakes today, there are roughly 22,000 barrels of crude oil that float per hour under the Great Lakes. There are 550 off-shore wells operated by Canadians. This bill addresses none of that. There are 5 million tons of oil bobbing around on the Great Lakes every year via cargo ship, which leads to an average of 20 spills a year on our Great Lakes. This amendment does nothing to address any of those issues.

This amendment is not about protecting the Great Lakes; instead, it is about the federal government going into the State of Michigan and telling the legislators in Lansing that they do not know what they’re doing. There are some great protections of our Great Lakes, and I trust those Governors, and I trust those Great Lakes state legislators to do the right thing.

I want to say it again, because this is very important, and I’ve heard it 10 times if I’ve heard it once, that somebody is out there trying to build an oil rig in the Great Lakes and that President Bush is leading the charge. This is ridiculous. There is not one State in the Great Lakes Basin that permit off-shore drilling. Not one. There is a moratorium on new licenses for directional drilling in the State of Michigan today. So what is the purpose for the Bonior Amendment?

Mr. Chairman, I do not believe that a bureaucracy in Washington, D.C., whose only experience with Michigan’s Upper Peninsula is a picture in the National Geographic, is better equipped to protect our shoreline and our Great Lakes. I want the people who live on the Great Lakes to make those decisions. The governor from Ohio talked about HOMES, the acronym by which schoolchildren learn the names of the Great Lakes. HOMES is appropriate because the people who make their homes in the Great Lakes States should be making decisions about the Great Lakes. Why? Because we live there. We see the water, we see the pollution, we fought back and reclaimed Lake Erie. We can again eat the fish that swim in our lakes. Why? Because the people of the Great Lakes States took action. It is nothing that Congress did. That is why this argument should not be taking place on the floor of the United States House, it should be taking place in the legislatures of the Great Lakes States.

Mr. Chairman, I am passionate about the Great Lakes, but we have a true difference of opinion on the proper role of Congress in this debate. For example, look at the issue of water diversion. There is a bill in this House to empower Congress to decide what happens on diversion issues in the Great Lakes. The last I checked, the dry states of the Plains and Southwest could use a bit more extra water; and, the last I checked, there are more members from those states in this chamber than from Great Lakes States. These issues have no business in this Chamber. It has all the business in the chambers in our State legislatures back home.

This is a solution that is looking for a problem.

There is a package of bills in the House to address this issue in a manner that doesn’t encroach on our States’ rights. One concerns the diversion and export of Great Lakes water. Another is a resolution urging States to continue the ban on off-shore drilling in our Great Lakes and that goes after those 550 wells currently in operation in Canada.

It is important to remember that what the Federal Government can give us, they can take away. Pretty soon, maybe the faces of this Chamber will change, and maybe pretty soon the folks in this Chamber will decide that we want oil production from the Great Lakes.

And since most of the members of this Chamber do not reside in the Great Lakes Basin, nor do the Washington, D.C. bureaucrats overseeing federal policy, the decision may come from Washington to tap into the Great Lakes oil reserves.

There is only one thing that can protect us from that: Our state legislators and our governors of the Great Lakes States.

Mr. Chairman, I want to urge this body to reject the Bonior Amendment, to throw out all the rhetoric about how without this amendment there will be polluted water, people rushing to put oil rigs on the Great Lakes, and how oil will start gushing into the waters of Lake Michigan or Superior. This is just absolutely untrue.

What I would encourage the gentleman from Michigan to do is to work with us. We should take a look at studying the quality of those pipes that are pumping those 22,000 barrels an hour under the Great Lakes today. Let us get together and tell Canada, get off the water. Shut down those rigs that are pumping on the water as we speak. We should work together to ensure that those ships bobbing around on the Great Lakes carrying 5 million tons of oil are safe and don’t continue to average 20 spills each year.

Does the gentleman want to do something for the Great Lakes? Let us partner with our states and help solve this issue. The federal government should not come in and flex its muscles and tell state legislators that they really don’t know what they are doing.

I used to be an FBI agent, and when I would walk into a local police station and tell them the federal government was here to help, I can tell you I never received a warm welcome. And I can tell you that passing legislation like the Bonior Amendment ensures that Congress will not receive a warm welcome in the State halls of Lansing and other Great Lakes capitals.

Mr. Chairman, this is an important issue. It is an extremely important issue. I grew up on the Great Lakes in Michigan, and I want to keep them clean and clear.

EXTENSIONS OF REMARKS

July 10, 2001

HONORING THE EFFICIENCY OF NISSAN'S SMYRNA PLANT

HON. BART GORDON
OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. GORDON. Mr. Speaker, I rise today to honor the hard work and dedication of the employees of Nissan's Smyrna, Tennessee, plant. Their work ethic has produced the most efficient car and small truck assembly plant in North America.

The Harbour Report, an annual study in productivity that's used as an industry benchmark, has picked the Smyrna plant as the most efficient for seven consecutive years. At a time when the sluggish economy forced most automakers to slow production at their assembly plants, Nissan's Smyrna plant boosted its overall productivity by seven percent. That's a real indication of the know how and dedication of the plant's workforce.

Since June 16, 1983, when the first automobile rolled off the Smyrna plant's assembly line, Nissan has contributed immensely to the area's quality of life with good-paying jobs and responsive corporate citizenship. Nissan's corporate commitment to diversity within its employee population, supplier base and dealer body, encourages a variety of ideas and opinions that inspire the team behavior that wins these kinds of accolades.

My home is in Rutherford County, Tennessee, where the Smyrna plant is located. I was excited when I heard the news that Nissan was building a new plant in Smyrna. As the plant was being built, I watched its progress knowing that good-paying jobs were coming to Middle Tennessee. Since its completion, I have visited the plant on numerous occasions.

One of my more memorable visits came on the day the 1 millionth vehicle rolled off the assembly line. On that day, a young lady who worked at the Smyrna plant stopped at the door to give me a large bouquet of flowers. The crowd that had gathered for the special occasion. She recalled for us the time she and her children were waiting at a traffic light in their car when a Nissan pickup truck pulled up to the same traffic light. She said her children asked if she had built the vehicle. With a wide smile and obvious pride, she told us that she responded to the question with an emphatic, "Yes, I did."

That young woman's story is a perfect example of the pride all Nissan employees have in their workmanship. I congratulate each and every Nissan employee at the Smyrna facility for a job well done.

HONORING THE EFFICIENCY OF NISSAN'S SMYRNA PLANT

TRIBUTE TO CHARLES "CHICKEN" JEANS

HON. MARION BERRY
OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 10, 2001

Mr. BERRY. Mr. Speaker, I rise today to pay tribute to a great Arkansan and an outstanding citizen, and I am proud to recognize Charles "Chicken" Jeans in the Congress for...
PAYING TRIBUTE TO KATHERINE E. WHITE

HON. MIKE ROGERS
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. ROGERS of Michigan. Mr. Speaker, I rise today to congratulate Katherine E. White of Ann Arbor, Michigan for being named a 2001–2002 White House Fellow by President Bush.

Lyndon Johnson once said “a genuinely free society cannot be a spectator society.” Through her hard work and service, Katherine White has proven to be anything but a spectator.

Mrs. White is an assistant professor of law at Wayne State University where she teaches about intellectual property laws.

In previous experience, Mrs. White was a Fulbright Senior Scholar, a Major in the U.S. Army Judge Advocate General’s Corp, as well as a legal clerk for Judge Randall R. Rader, U.S. Court of Appeals. She currently serves on the National Patent Board and is a member of the University of Michigan’s Board of Regents. She was chosen out of a field of 540 applicants to receive a White House Fellowship.

Therefore Mr. Speaker, I respectfully ask my colleagues to join me in paying tribute to Katherine E. White for appointment as one of the 12 new White House fellows.

EXTENSIONS OF REMARKS

FRENCH HERITAGE WEEK IN THE U.S. VIRGIN ISLANDS

HON. DONNA M. CHRISTENSEN
OF THE VIRGIN ISLANDS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mrs. CHRISTENSEN. Mr. Speaker, I rise today on behalf of all the people of French descent in my district, the U.S. Virgin Islands, on the occasion of the annual observance of French Heritage Week, an event that revolves around Bastille Day—which commemorates the destruction of the Bastille, the state prison in Paris, France, on July 14, 1789, which brought about one of the most significant movements in world history—the French Revolution.

The destruction of the Bastille, Mr. Speaker, was a significant act of bravery that not only altered the French Republic but also became the symbol of democracy and human rights and the founding event for the movement towards liberty and liberal democracy around the world.

Today, I am proud to represent a striving and vibrant community of people of French descent who have inhabited the U.S. Virgin Islands for centuries—contributing their expertise in fishing, farming, the professions and other vocations that have made significant differences in the political, social, cultural and economic progress and growth on the Territory.

Among the many treasures that make the Virgin Islands unique and special is our diversity. In particular, the French community has been a cultural asset through its presence and the many cultural, business and civic activities it promotes. One event put on by the Virgin Islands French Community that comes to mind, is the Father's Day celebration held each year in Frenchtown. Here, the French community recognizes the value in our fathers sponsors a weeklong celebration in their honor.

I am especially pleased and privileged to be able to pay homage to our French Community and the Virgin Islands community at-large during the 2001 French Heritage Week celebrations. While it is not generally known, my maternal great grandmother was a Parisian, and so I proudly claim kinship, although my command of the French language is limited.

This U.S. Virgin Islands French Heritage Week is a celebration of our heritage and national pride—two things that are important to the survival of any society. I congratulate Senator Lorraine L. Berry, a law firm member of the Virgin Islands Legislature, for her continual efforts to enlighten her fellow Virgin Islanders on the rich traditions of French culture and history.

On behalf of my family, staff and myself, I wish to congratulate members of the French community of the U.S. Virgin Islands for their many contributions to our community and for so generously sharing their history, culture and crafts with each generation of Virgin Islanders.

May God continue to bless our citizens of French decent and may they continue in the rich and strong democratic traditions of their motherland, France. Best wishes for an eventful, fulfilling “French Heritage Week.”

TRIBUTE TO WILLIAM JACKSON BEVIS, SR.

HON. MARION BERRY
OF ARKANSAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. BERRY. Mr. Speaker, I rise today to pay tribute to a great Arkansan and an outstanding citizen, and I am proud to recognize William Jackson Bevis, Sr. in the Congress for his invaluable contributions and service to his community, to our state, and our nation.

William was born on August 14, 1922, in Pulaski County, Arkansas. He married Mary Jo Barnett in 1942, and they were blessed with three sons, Bill Bevis, Jr., Don R. Bevis, and Bob Bevis. William was President of W.J. Bevis & Sons, Inc. and owner of William J. and Mary Jo Bevis Farms. He attended Peabody School and graduated from Scott High School in 1941. He was elected to Lonoke County Agriculture Conservation and Stabilization Service Commission in 1950 and served off and on for 25 years. He served 20 years on the District Soil and Water Conservation Board and was appointed by then-Gov. Dale Bumpers to chair a study of water diversions from the Arkansas River to the eastern Arkansas Delta. He served on the Lonoke School Board from 1962 and 1972. William was elected to the Federal Land Bank Board and served 15 years, 10 years as chairman. He was President of Farm Credit Services of Central Arkansas for 10 years and was appointed by Farm Credit of St. Louis to a task force for Missouri, Illinois, and Arkansas, to restructure regulations for farm loans and credit in these states.
He was appointed by then Gov. David Pryor to the State Board of Corrections for a five-year term. He was appointed by then Gov. Bill Clinton to the Arkansas Agriculture Museum Board in Scott and he, along with Governor Clinton and State Rep. Bill Foster were instrumental in securing funding for this preservation project for the farming community of Scott. ’This,’ as said by William, ’is a project that is very dear to me.’

William was a life-long member of All Souls Church in Scott. He has served as Sunday School Superintendent, Chairman of the church Board of Directors, and as All Souls Church Trustee until the age of 75.

Sadly, William died last month. He was pre-deced in death by one son, Judge Don Bevis of Cabot, and he is survived by his wife of 58 years, Mary Jo Bennett Bevis, two sons—Rep. Bill Davis, Jr. and his wife Kay of Scott and Bob Bevis and his wife Liz of Scott—along with numerous grandchildren and great-grandchildren and a host of friends.

On behalf of the Congress, I extend sym- pathies and condolences to the family of Wil- liam Jackson Bevis, Sr. His name commands respect and honor from all who knew him.

TRIBUTE TO MRS. OLLYE BALLARD CONLEY OF HUNTSVILLE, ALABAMA

HON. ROBERT E. “BUD” CRAMER, JR.
OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. CRAMER. Mr. Speaker, I rise today to honor Mrs. Ollye Ballard Conley on her June 30th retirement after more than 35 years of dedicated service to the Huntsville City school system. Mrs. Conley has made the students of the Huntsville community shine through her creation of a top-notch magnet school, the Academy for Science and Foreign Language. Her career in education is extensive and very impressive. Beginning as a teacher in Limestone County, Mrs. Conley has spent time teaching in Germany with the Department of Defense as well. After returning to Hunts- ville, her career took off and she soon rose through the ranks to become an administrator and then principal. She has led the schools of University Place, Rolling Hills and most re- cently the Academy for Science and Foreign Language to be more efficient, better orga- nized schools. She believes in mission and her mission has been to provide the best envi- ronment possible for children to excel. She is innovative bringing in new curriculums such as the National Service-Learning program. The Academy is the only middle school in Alabama and only one of 34 nationwide to implement the service-learning program. She has shared her knowledge and the benefits of the service-learning program as a Regional Trainer for the Southern Region Corporation for National Service-Exchange.

Mrs. Conley believes that an education does not have to be limited to the classroom. Along with her students whom she inspires to achieve more and give back to their commu- nity, she established the first annual Commu- nity Day at Glenwood cemetery earning the Huntsville Historical Society Award and the Alabama Historical Commission Distinguished Service Award.

On behalf of the United States Congress and the people of North Alabama, I want to personally thank Mrs. Conley and pay tribute to her for her being an unsung hero. The dif- ference she has made in countless children’s lives over the years is incalculable. I would like to extend my best wishes to her, her fam- ily, friends and colleagues as they celebrate her well-deserved rest and a job well done.

INTRODUCTION OF THE CYBER SECURITY INFORMATION ACT OF 2001

HON. TOM DAVIS
OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. TOM DAVIS of Virginia. Mr. Speaker, I am pleased to rise today to reintroduce legis- lation with my good friend and colleague from northern Virginia, Representative, JIM MORAN. Last year, we introduced H.R. 4246 to facili- tate the protection of our nation’s critical infra- structure from cyber threats. We aggressively pushed forward with the legislation and held a productive Subcommittee hearing with the then-Subcommittee on Government Manage- ment, Information, and Technology on the im- portance of the bill. Based on comments made at that hearing, we have worked hard with a wide range of industries to refine and improve this legislation. Today, we are again intro- ducing this legislation with the full partnership of the private sector. Over the past several months, I have worked with the industry lead- ers from each of our critical infrastructure sec- tors to draft consensus legislation that will fa- cilitate public-private partnerships to promote information sharing to prevent our nation from being crippled by a cyber-terrorism threat.

In the 104th Congress, we called upon the previous Administration to study our nation’s critical infrastructure vulnerabilities and to identify solutions to address these vulnerabilities. Through that effort, a number of steps were identified that must be taken in order to eliminate the potential for significant damage to our critical infrastructure. Foremost among these suggestions was the need to en- sure coordination between the public and pri- vate sector representatives of critical infra- structure. The bill we are again introducing today in the first step in encouraging private- sector cooperation and participation with the government to accomplish this objective.

Since early spring of this year, Congress has held a number of hearings examining the ability of our nation to cope with cyber security threats and attacks. For instance, the House Energy and Commerce has held numerous hearings regarding the vulnerability of specific Federal agencies and entities, and how those agencies are implementing—or not imple- menting—the appropriate risk management tools to deal with these threats. The House Judiciary Subcommittee on Crime has held a number of hearings specifically looking at cybercrime from both a private sector and a federal law enforcement perspective. These hearings have demonstrated the importance of better, more efficient information sharing in protecting against cyber-threats as is encom- passed in the legislation I have introduced today.

Also, the National Security Telecommuni- cations Advisory Committee (NSTAC) met in early June of this year to discuss the neces- sary legislative action to encourage industry to voluntarily work in concert with the federal government in assessing and protecting against cyber vulnerabilities. The bill I am in- troducing today was endorsed at the June meeting. In recent months, the Bush Adminis- tration has aggressively been working with in- dustry to address our critical infrastructure pro- tection needs and ensure that the federal gov- ernment is better coordinating its’ cybersecurity efforts. I look forward in the coming weeks to working with the Administra- tion to enhance the public-private partnership through industry-government systems to help in order to truly protect our critical infrastructure.

The critical infrastructure of the United States is largely owned and operated by the private sector. Critical infrastructures are those systems that are essential to the minimum op- erations of the economy and society.

Our critical infrastructure is comprised of the finan- cial services, telecommunications, information technology, transportation, water systems, emergency services, electric power, gas and oil sectors in private industry as well as our National Defense, and Law Enforcement and International Security sectors within the gov- ernment. Traditionally, these sectors operated largely independently of one another and co- ordinated with government to protect them- selves against threats posed by traditional warfare. Today, these sectors must learn how to protect themselves against unconventional threats such as terrorist attacks, and cyber in-trusions.

These sectors must also recognize the vulnerabilities they may face because of the unprecedented technological progress we have made. As we learned when planning for the challenges presented by the Year 2000 rollover, many of our computer systems and net- works are now interconnected and commu- nicate with many other systems. With the many advances in information technology, many of our critical infrastructures are linked to one another and face increased vul- nerability to cyber threats. Technology interconnectivity increases the risk that prob- lems affecting one system will also affect other connected systems. Computer networks can provide pathways among systems to exploit vulnerabilities that industry and government must in- troduce to data and operations from outside locations if they are not carefully mon- itored and protected.

A cyber threat could quickly shutdown any one of our critical infrastructures and poten- tially cripple several sectors at one time. Na- tions around the world, including the United States, are currently training their military and intelligence personnel to carry out cyber at- tacks against other nations to quickly and effi- ciently cripple a nation’s daily operations.

Cyber attacks have moved beyond the mis-chievous teenager and are now being learned and used by terrorist organizations as the lat- est weapon in a nation’s arsenal. During this past spring, around the anniversary of the
The unintended consequences they could face shared with the government and it is not shared within some industries but it is not regarding a cyber threat or vulnerability is now our nation’s critical infrastructure. Information has established many information sharing or- American people. Today, the private sector tion to produce the best outcome for the fidently share information with the federal gov- ernment within a defined framework, federal sector could share information with the gov- ernment about the virus. If the private sector could share information with the gov- ernment within a defined framework, federal agencies could have been made aware of the threat earlier.

Last month, NIPC and FedCIRC received information on attempts to locate, obtain control of and plant new malicious code known as "W32-Leaves.worm" on computers previously infected with the SubSeven Trojan. SubSeven is a Trojan Horse that can permit a remote user to gain complete control of an infected machine, typically by using Internet Relay Chat (IRC) channels for communica- tions. In June 1998 and February 1999, the Director of the Central Intelligence Agency testified before Congress that several nations recognize that cyber attacks against computer systems represent the most viable option for leveling the playing field in an armed crisis against the United States. The Director also stated that several terrorist organ- izations believed information warfare to be a low cost opportunity to support their causes.

That is why I am again introducing legisla- tion that gives critical infrastructure industries the assurance they need in order to con- fidently share information with the federal gov- ernment. As we learned with the Y2K model, government and industry can work in partnership to produce the best outcome for the American people. Today, the private sector has established many information sharing or- ganizations (ISOs) for the different sectors of our nation’s critical infrastructure. Information regarding a cyber threat or vulnerability is now shared within some industries but it is not shared with the government and it is not shared across industries. The private sector stands ready to expand this model but have also expressed concerns about voluntarily sharing information with the government and the unintended consequences they could face for acting in good faith. Specifically, there has been concern that industry could potentially face antitrust violations for sharing information with the government. To protect their shared information be subject to the Freedom of Infor- mation Act, or face potential liability concerns for information shared in good faith. My bill will address all three of these concerns. The Cyber Security Information Act also respects the privacy rights of consumers and critical in- frastructure operators. Consumers and opera- tors will have the confidence they need to know that information will be handled accu- rately, confidentially, and reliably.

The Cyber Security Information Act is close- ly modeled after the successful Year 2000 In- formation and Readiness Disclosure Act by providing a limited FOIA exemption, civil litiga- tion protection for shared information, and an antitrust exemption for information shared among private sector companies for the pur- pose of protecting, avoiding, communicating or disclosing information about a cyber-security related problem. These three protections have been requested by the U.S. Chamber of Com- merce, the National Association of Manufac- turers, the Edison Electric Institute, the Infor- mation Technology Association of America, Americans for Computer Privacy, and the Electronics Industry Alliance. Many private sector companies have also asked for this im- portant legislation.

This legislation will enable the private sec- tor, including ISOs, to move forward without fear from the government so that government and industry may enjoy a mutually cooperative partnership. This will also allow us to get a timely and accurate assessment of the vulnerabilities of each sector to cyber attacks and allow for the formulation of proposals to eliminate these vulnerabilities without increasing government regulation, or expanding un- funded federal mandates on the private sector. This will position the ISOs to play a leadership role in developing the necessary technical ex- pertise to establish baseline statistics and pat- terns within the various infrastructures, as clearinghouses for information within and among the various sectors, and as reposi- tories of valuable information that may be used by the private sector. As technology con- tinues to rapidly improve industry efficiency and operations, so will the risks posed by vulnerabilities and threats to our infrastructure. We must create a framework that will allow our protective measures to adapt and be up- dated quickly.

It is my hope that we will be able to move forward quickly with this legislation and that Congress and the Administration will work in partnership to provide industry and govern- ment with the tools for meeting this challenge. A Congressional Research Service report on the ISOs proposal describes the information sharing model as one of the most crucial pieces for success in protecting our critical in- frastructure, yet one of the hardest pieces to implement. Through the Cyber Security Information Act of 2001, we are remov- ing the primary barrier to information sharing between government and industry. This is landmark legislation that will be replicated around the globe by other nations as they too try to address threats to their critical infra- structure.

Mr. Speaker, I believe that the Cyber Secu- rity Information Act of 2001 will help us address critical infrastructure cyber threats with the same level of success we achieved in ad- dressing the Year 2000 problem. With govern- ment and industry cooperation, the seamless delivery of services and the protection of our nation’s economy and well-being will continue without interruption just as the delivery of serv- ices continued on January 1, 2000.

Hon. ——
U.S. House of Representatives, Washington, DC

DEAR REPRESENTATIVE: We, the undersi- gned, representing every sector of the United States economy, write today to strongly urge you to become an original co- sponsor of the Cyber Security Information Act to be shortly introduced by Representa- tives Tom Davis and Jim Moran. This impor- tant bill will strengthen information sharing legal protections that shield infrastructures from cyber and physical at- attacks and threats.

Over the past four years, industry-govern- ment information sharing regarding vulnerabilities and threats has been a key element of the federal government’s critical infrastructure protection plan. Critical in- dustry established information sharing organ- izations, including Information Sharing and Analysis Centers (ISACs) and the Partner- ship for Critical Infrastructure Security (PCIS), have been set up to support this ini- tiative. The National Plan for Information Systems Protection, version 1.0, also calls for private sector input about actions that will facilitate industry-government informa- tion sharing.

As representative companies and industry associations involved in supporting the ongo- ing development of a National Plan for crit- ical infrastructure protection, we believe that Congress can play a key role in facilitat- ing this initiative by passing legislation to support the Plan’s strategic objectives.

Currently, there is uncertainty about whether creating new law mandates for the private and industries that voluntarily share sen- sitive information with the federal govern- ment to unintended and potentially harmful consequences. This legislation will have a chilling effect on the growth of all informa- tion sharing organizations and the quality and quantity of information that they are able to gather and share with the federal government. As such, this situation is an im- pediment to the effectiveness of both indus- try and government security and assurance managers to understand, collaborate on and manage their vulnerability and threat envi- ronments.

Legislation that will clarify and strength- en existing Freedom of Information Act and antitrust exemptions, or otherwise create new means to promote critical infrastruc- ture protection and assurance would be very helpful and have a catalytic effect on the ini- tiatives that are currently under way.

Companies in the technology, communica- tions, information technology, fi- nancial services, energy, water, power and gas, health and emergency services have a vital stake in the protection of infrastruc- ture assets. With over 90 percent of the coun- try’s critical infrastructure owned and/or op- erated by the private sector, the government must support information sharing between the public and private sectors in order to en- sure the best possible security for all our
citizens. A basic precondition for this cooperation is a legal and public policy framework for action.

Businesses also need protection from unnecessary restrictions placed by federal and state antitrust laws on critical information sharing that would inhibit identification of R&D needs or the identification and mitigation of vulnerabilities. There are a number of precedents for this kind of collaboration, and we believe that legislation based on these precedents will also assist this process.

Faced with the prospect of unintended liabilities, we also believe that any assurances that Congress can provide to companies voluntarily collaborating with the government in risk management planning activity—such as performing risk assessments, testing infrastructure security, or sharing certain threat and vulnerability information—will be very beneficial. Establishing liability safeguards to encourage the sharing of threat and vulnerability information will add to the robustness of the partnership and the significance of the information shared. Thank you for considering our views on this important subject. We think that such legislation will contribute to the success of the institutional, information-sharing, technological, and collaborative strategies outlined in Presidential Decision Directive—63 and version 1.0 of the National Plan for Information Systems Protection.

Why Information Sharing is Essential for Critical Infrastructure Protection

**Frequently Asked Questions**

**What are Critical Infrastructures?**

Critical Infrastructures are those industries identified in Presidential Decision Directive—63 and version 1.0 of the National Plan for Information Systems Protection, deemed vital for the continuing functioning of the essential services of the United States. These include telecommunications, information technology, financial services, oil, water, gas, electric energy, health services, transportation, and emergency services.

**What Is the Problem?**

90% of the nation's critical infrastructures are owned and/or operated by the private sector. Incidents are inter-connected through networks. This has made them more efficient, but it has also increased the vulnerability of multiple sectors of the economy to attacks on particular infrastructures. According to the Carnegie-Mellon Computer Emergency Response Team (CERT), cyber attacks on critical infrastructures have increased exponentially in the past three years. This trend is expected to continue for the foreseeable future. In our free market system, it is not feasible to have a centralized-government monitoring function. A voluntary national industry-government information sharing system is needed in order for the nation to create an effective early warning system, find and fix vulnerabilities, become best practices and create new safety technologies.

**How Do Industries and the Government Share Information?**

Based on PDD–63 and the National Plan, a number of organizations have been created to foster industry-government cooperation. These include Information Sharing and Analysis Centers (ISACs). ISACs are industry-specific and have been set up in the key financial services, telecommunications, IT, and electric energy industries. Others are in the process of being organized. ISACs vary in their membership structures and relationship to the government. Most of them have a formal government sector liaison as their principal point of contact.

**What Are Current Concerns?**

Companies are concerned that information voluntarily shared with the government that reports on or concerns corporate security may be subject to FOIA. They are also concerned that lead agencies may not be able to effectively control the use or dissemination of sensitive information because of similar legal requirements. Access to sensitive information may fall into the hands of terrorists, criminals, and other individuals and organizations capable of exploiting vulnerabilities and harming the U.S. Unfiltered, unmediated information may be misinterpreted by the public and undermine public confidence in the country’s critical infrastructures. Also, competitors and others may use that information to the detriment of companies, or as the basis for litigation. Any and all of these possibilities are reasons why the current flow of voluntary data is minimal.

**What Can Be Done?**

Possible solutions include creating an additional exemption to current FOIA laws. There are currently over 80 specific FOIA exemptions throughout the body of U.S. law, so it is clear that exemptions voluntarily shared information that could affect national security is consistent with the intent and application of FOIA. Another solution is to build on existing relevant legal precedents such as the 1998 Y2K Information and Readiness Disclosure Act, the 1981 National Cooperative Research Act, territorially limited court rulings, and individual, advisory Department of Justice Findings.

**Why Pursue a Legislative Solution?**

The goal is to provide incentives for voluntary information sharing. Legislation can add legal clarity that will provide one such incentive, as well as also demonstrate the support and commitment of Congress to increasing critical infrastructure assurance.

**PERSONAL EXPLANATION**

**HON. SHELLEY BERKLEY**

**OF NEVADA**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, July 10, 2001**

Ms. BERKLEY. Mr. Speaker, flight delays caused me to miss rollcall votes Nos. 186, 187, and 188. Had I been present, I would have voted “yes” on No. 186, “yes” on No. 187, and “yes” on No. 188.

**CELEBRATING THE DEFENSE LOGISTICS AGENCY’S 40TH ANNIVERSARY**

**HON. JAMES P. MORAN**

**OF VIRGINIA**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, July 10, 2001**

Mr. MORAN of Virginia. Mr. Speaker, I rise today to congratulate the Defense Logistics Agency’s 40th anniversary. The Defense Logistics Agency has a distinguished history as the nation’s combat support agency. Its origins date back to World War II when America’s entrance into the global conflict required the rapid procurement of large amounts of munitions and supplies. When the agency was first founded, managers were appointed from each branch of the armed services for this task.

In 1961, the Department of Defense centralized management of military logistics support by establishing the Defense Supply Agency. After 16 years of increasing responsibilities, the Defense Supply Agency expanded its original charter and was renamed the Defense Logistics Agency in 1977.

I would like to commend the Defense Logistics Agency’s impeccable record of supporting defense and humanitarian missions. It serves as a testament to the agency’s commitment to provide seamless support of our armed forces around the world and to extend a helping hand to victims of all types of adversity.

As the world has changed and evolved, the Defense Logistics Agency has adapted and proven its ability to streamline. Agency employees have shown dedication to improving quality, reducing costs and improving responsiveness to our warfighter customer needs. They have also demonstrated their ability to embrace the latest technologies of today’s competitive business world, which has resulted in saving the taxpayers billions of dollars.

The Defense Logistics Agency’s record of achievement serves as an example of government service at its best, highlighted by two Joint Meritorious Service Awards.

On behalf of my colleagues, I would like to praise the individual efforts of the men and women involved in the Defense Logistics Agency, and thank them for making the Agency a world-class organization. In honor of the 40th anniversary of the Defense Logistics Agency, we are proud of the Defense Logistics Agency’s past endeavors and look forward to a bright and successful future of continued commitment and service to our nation.

Mr. Speaker, I ask you to join me in extending congratulations and best wishes to the employees of the Defense Logistics Agency on this memorable occasion and achievement.

**TRIBUTE TO JAMES H. MULLEN**

**HON. MARION BERRY**

**OF ARKANSAS**

**IN THE HOUSE OF REPRESENTATIVES**

**Tuesday, July 10, 2001**

Mr. BERRY. Mr. Speaker, I rise today to pay tribute to a great Arkansan and outstanding educator. I am proud to recognize James H. Mullen in the Congress for his invaluable contributions and service to his community, to our state, and to our nation.
For over three decades James Mullen of DeWitt, Arkansas has made a profound impact on the lives of people. Born in Mendenthal, Mississippi, James served in the United States Air Force during World War II. After being honorably discharged, he used the GI benefits to attend Mississippi State University, where he earned a degree in agriculture. That government investment would reap tremendous returns.

After graduating from Mississippi State, James moved to DeWitt, an area primarily dependent on its agrarian strengths. It was his responsibility to assist other veterans in developing their agricultural proficiency.

In 1955, James accepted a job with the DeWitt Independent School system teaching agriculture. For the next eleven years he would remain in this position. His influence far exceeded his teaching responsibilities.

It was not uncommon for young men to seek him out for personal counsel. His home was always open to young men who needed a listening ear, wise counsel, or any type of support. On one occasion a former student came to James and informed him he was going to quit college because of lack of funds. Although James didn’t have the money to loan the student, he did the next best thing and went to the bank and secured a personal loan.

Each summer, in addition to visiting in the home of each student, James would take a group of students to camp. He had the unique ability to have fun with the students while maintaining an authoritarian position. On one visit to summer camp, the students destroyed his hat. With James, there were two things you never messed with: his hat or his pipe! Before nightfall, he had driven all those boys to town and required them to purchase a new hat. He never lost control!

In 1966, James joined the Arkansas State Department of Education as Associate Director of Petit Jean Vocational Technical School in Morrilton, Arkansas. He would remain in that position until 1970 when he was named Director of the Crowley’s Ridge Vocational Technical School in Forrest City, Arkansas. At Crowley’s Ridge, he inherited a fledgling institution and successfully restored the integrity of the institution.

Construction of the Rice Belt Vocational Technical School was approved in 1974. Community leaders from DeWitt would accept no other than James Mullen as first choice to head the school. Building a school from the ground had been his ambition, and he quickly acquiesced to return to his adopted hometown. Because of the strong foundation laid by James and others, Rice Belt stands as a model institution for continuing education.

James is probably most proud of his long marriage to Mary Helen, and his children: Terry Mullen of Canyon Lake, Texas and Steve Mullen of Burleson, Texas.

James H. Mullen is an educator, advisor and friend to many. He has dedicated his life to serving his fellow citizens as a leader in both his profession and his community, and he deserves our respect and gratitude for his priceless contributions. On behalf of the Congress, I extend congratulations and best wishes to my good friend James H. Mullen, on his successes and achievements.

WE MUST NOT REWARD CHINESE TYRANNY BY GIVING THE OLYMPICS TO BEIJING

HON. TOM LANTOS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 10, 2001

Mr. LANTOS. Mr. Speaker, I rise today to call the attention of my colleagues to a powerful testimonial that appeared in today’s Wall Street Journal by three human rights heroes, Wei Jingsheng, Vladimir Bukovsky, and Gerhard Loewenthal who are united in opposition to China’s bid to host the 2008 Summer Olympics. The authors are witnesses to and victims of human rights violations by three of the most brutal regimes of recent history, Communist China, the Soviet Union, and Nazi Germany. In the article, they urge the International Olympic Committee (IOC), when it votes on the host city for the 2008 Olympics in Moscow this Friday, July 13th, to avoid the shameful decision of two past IOC’s to award the games to totalitarian states—Germany in 1936, and the Soviet Union in 1980.

The Chinese leadership in Beijing has argued strenuously that “politics” should be kept out of the IOC’s decision. They assert that the potential candidates should only be judged by their ability to build a new sports facility, construct a new subway stop or erect more shining hotels. But focusing on bricks and mortar—and turning a blind eye to the egregious human rights violations taking place every day in China—does not remove politics from the Olympics. It simply permits a brutal regime to exploit the Olympics to prop up its faltering legitimacy—as Nazi Germany did in 1936 and the Soviet Union did in 1980—by basing itself on the reflected glow of the Summer Games.

Four months ago, I was joined by my colleagues from California, Mr. Cox and Ms. Pelosi, and by Mr. Wolf from Virginia in introducing H. Con. Res. 73, which expresses strong opposition to Beijing’s Olympic bid due to China’s horrendous human rights record. This resolution was overwhelmingly approved by the International Relations Committee on March 27th by a vote of 27-8. Unfortunately, the leadership has failed to schedule a vote on the resolution.

Mr. Speaker, I ask that the entire article “Don’t Reward Beijing’s Tyranny,” by Wei Jingsheng, Vladimir Bukovsky, and Gerhard Loewenthal and published in the July 10th edition of The Wall Street Journal be placed in the Congressional Record. I urge my colleagues to consider the poignant testimony provided in this article to the tragic human suffering that was contributed to by granting the Olympics to Nazi Germany in 1936 and the Soviet Union in 1980. In the hope of preventing a similar travesty in 2008, I call on the leadership to immediately schedule a vote on H. Con. Res. 73. The House must be given an opportunity to express its views on this critical moral issue.

DON’T REWARD BEIJING’S TYRANNY
Wei Jingsheng, Vladimir Bukovsky and Gerhard Loewenthal

The International Olympic Committee should not offer the 2008 Olympic Games to the one-party dictatorship of the Chinese government. Such a decision would not only be harmful to the interests of the Chinese people, but it could also threaten the interests of China’s neighbors and ultimately world peace. That’s hardly what the Olympic spirit is all about. The IOC offered the 1936 games to Nazi Germany. Adolf Hitler and his party exploited that opportunity to fan their political fanaticism, and ultimately initiated a war that caused tens of millions of deaths. Although the Olympic Games were not the cause of World War II, they were indeed one of the tools Hitler used for his purposes. Does the IOC feel no shame for offering the games to a regime that killed six million Jews and many more? I. Gerhard Loewenthal, am one of the witnesses and victims of that tragedy.

The IOC offered the 1980 games to the Communist Soviet Union, which cruelly oppressed its own people and the Eastern Europeans, and sought control of the rest of the world too. The Soviet Communist Party used the games as an opportunity to shore up faith in their system. Moscow also started a war in Afghanistan that resulted in many Soviet and Afghan deaths. Only the effort and unity of various peace-loving parties turned back that aggression and stopped the spread of the war. Does the IOC feel regret for helping the Soviet dictators? I, Vladimir Bukovsky, witnessed the disaster of the former Soviet Union and the Eastern European countries.

Apparently ignorant of history, the IOC may now be on the verge of giving the Chinese Communist dictatorship the honor of hosting the 2008 Olympic Games. The Chinese Communist government is already challenging the sovereignty of Taiwan, inciting nationalism and fanaticism in China, in an effort to encourage and prepare for military aggression that could threaten China’s neighbors and ultimately world peace.

Beijing will surely use this opportunity to oppress those Chinese who fight for human rights and democracy. This oppression will delay China’s democratic progress and extend the life of a dictatorial and corrupt government. I, Wei Jingsheng, have seen what the Chinese people have had to suffer for the last half century. I protest the wrongful deaths of 80 million Chinese under the Communists. I do not want to see more disasters in the future.

All three of us are pleading with you, the members of the IOC, to cast your votes for the 2008 host city with your conscience, to avoid the regret you may have when the future replays the nightmares we have.

Mr. Wei spent 18 years in Chinese prison for dissident activity. Mr. Bukovsky spent 12 years in Soviet prison for opposing the government. Mr. Loewenthal, a Jew, is a German TV journalist and a concentration camp survivor.

EXTENSIONS OF REMARKS
The Senate met at 10 a.m. and was called to order by the Presiding Officer, the Honorable Mark Dayton, a Senator from the State of Minnesota.

PRAYER
The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Dear God, we belong to You. You gave us our talents, nurtured us by parents and teachers and friends, opened doors of opportunity we could never have pried open without You, and gave us creative vision of what we were to accomplish. You have been the author of our insights and the instigator of solutions to problems. We praise You for all that You have provided us so we can serve our Nation. We thank You for the people You have sent to the Senate. Today we especially thank You for Gary Sisco as he completes his time of service as Secretary of the Senate. We thank You for his deep faith, his commitment to the work of Government through the Senate, and his loyalty to all of us as friends. We humbly thank You for all that we have and are because of Your incredible generosity. Amen.

PLEDGE OF ALLEGIANCE
The Honorable Mark Dayton led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE
The Presiding Officer. The clerk will please read a communication to the Senate from the President pro tempore (Mr. Byrd).

The assistant legislative clerk read the following letter:

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable Mark Dayton, a Senator from the State of Minnesota, to perform the duties of the Chair.

Robert C. Byrd, President pro tempore.

Mr. Dayton thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME
The Acting President pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS
The Acting President pro tempore. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond the hour of 10:30 a.m. with Senators permitted to speak therein for up to 10 minutes each.

RECOGNITION OF THE ACTING MAJORITY LEADER
The Acting President pro tempore. The Senator from Nevada.

ORDER OF PROCEDURE
Mr. Reid. Mr. President, I ask unanimous consent that the Senator from Pennsylvania be given his full 15 minutes. The two 15-minute spots would take us probably to 10:35 or thereabouts. I ask unanimous consent that Senator Specter control the first 15 minutes.

The Acting President pro tempore. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—S. 2217
Mr. Reid. Mr. President, I further ask unanimous consent that the Senate proceed to H.R. 2217 at 10:35 this morning. I note to anyone within the sound of my voice, we have been in touch with Senator Craig and Senator Kyl who had some suggestions last night in moving to this bill. Their questions have been answered.

The Acting President pro tempore. Without objection, it is so ordered.

The Senator from Pennsylvania.

NOMINATION OF ROBERT MUELLER
Mr. Specter. Mr. President, I have sought recognition this morning to comment about the confirmation hearings which are scheduled later this month for Mr. Robert Mueller to be Director of the Federal Bureau of Investigation. That position arguably is as important as any position in the United States of America, perhaps even the most powerful position.

The statutory 18-year term is 2 years longer than the maximum a President may serve under the Constitution. The Director of the FBI has power over the largest investigative organization in the world, global in its exposure.

There are an enormous number of problems which have befallen the agency in recent years. The confirmation hearing will provide a unique opportunity for oversight for the U.S. Senate to seek to establish standards as to what the FBI should be doing in cooperation with congressional oversight.

The FBI is a well-respected organization. I have had very extensive opportunities to work with the FBI. After graduation from college, I was in the Air Force Office of Special Investigations for 2 years and had training from the FBI. The commanding officer of the OSI was a former top aide to Director J. Edgar Hoover. I worked with the FBI on the prosecution of the Philadelphia Teamsters, an investigation which was conducted by the McClellan committee with the counsel, Robert Kennedy, and saw their very fine work. Then, as Assistant Counsel to the Warren Commission, I worked with the FBI; then as district attorney of Philadelphia and for the last 20 years extensively on the Judiciary Committee.

I have great respect for the Federal Bureau of Investigation. At the same time, my experience has shown me that there is an over concern by the personnel of the FBI with their so-called institutional image and that there cannot be a concession of any problems, which is really indispensable if problems are to be corrected.

(Disturbance in the visitors' galleries.)

The Acting President pro tempore. Will the Sergeant at Arms restore order in the galleries.

Mr. Specter. We have a nominee who has been put forward by the President who has very impressive credentials: United States Attorney in Boston, United States Attorney in San Francisco, 3 years as Assistant Attorney General in the Justice Department, where I had contacts and saw his impressive work.

He will be succeeding a man, Director Louis Freeh, who came to the Bureau with extraordinary credentials and overall did a good job, although he presided over the Bureau at a time when there were many institutional failures. I analogize Director Freeh to the little boy on the Netherlands dike running around putting his finger in all the holes to try to stop the water from coming through. With so many holes and so many problems, it was not possible.

I believe similarly that the Congress, including the Senate and the Senate Judiciary Committee, has not been sufficiently active on oversight. These hearings will give us an opportunity to set standards as to what the FBI
should be doing in response to oversight activities by the Senate Judiciary Committee.

I have an opportunity to talk for the better part of an hour yesterday to FBI Director-designee Mueller and went over quite a number of issues that I intend to ask him in the public forum.

I comment about these today because the Senate ought to be preparing for this hearing with unique care for this very important position.

One of the matters I intend to discuss with Mr. Mueller in the confirmation hearings is the failure of the FBI to turn over for congressional Senate oversight a memorandum dated December 9, 1996, which was written at a time when there was a question as to whether Attorney General Reno was going to be reappointed by President Clinton. At that time the criminal investigation was just being started. There was a conversation by a top FBI official Esposito, with a top Department of Justice official Lee Radek, and FBI Director Freeh wrote this memorandum to the file to Mr. Esposito and Mr. Reno. Referring to a meeting that he had with the Attorney General on December 6, Director Freeh wrote this memo December 9:

I also advised the Attorney General of Lee Radek’s comment to you that there was a lot of “pressure” on him and the Public Integrity Section regarding this case because the “Attorney General’s job might hang in the balance” (or words to that effect).

This memorandum did not come to the attention of the Judiciary Committee until April of 2000, some 3½ years later, when, in my capacity as chairman of the subcommittee on Department of Justice oversight, a subpoena was issued for all of the FBI records relating to the campaign finance investigation. When this memo was discovered, Director Freeh was questioned as to why he hadn’t turned it over for Judiciary Committee oversight, because it was the view of many that it absolutely should have been done.

Director Freeh defended his inaction on the ground that it would have compromised his relationship with Attorney General Reno. But notwithstanding that fact, it is my view that this is a further example of the Judiciary Committee must undertake. This will be the subject of my questioning of Mr. Mueller during the confirmation hearing.

Director Freeh declined to appear voluntarily before the Judiciary Committee or the subcommittee to comment about this memorandum, and the committee decided not to issue a subpoena, which I thought should have been done.

It is my view that when a matter of this importance comes to light there ought to be a public inquiry as to what happened between the Attorney General and the Director of the FBI. It takes a congressional committee to get to the bottom of that. When Attorney General Reno testified, she said, “I don’t recall that, but if that had come to my attention, I certainly would have done something about it.” In my view, anybody who is going to be confirmed for FBI Director has to have a commitment to making this sort of information available to Senate oversight.

Another matter which I intend to question Mr. Mueller about is the insistence of the FBI on not cooperating with Senate oversight where there is a pending criminal investigation. Now, I understand the sensitivity of a pending criminal investigation, having some experience as a prosecutor myself, but the case law is plain that congressional oversight is so fundamental and so important to the FBI’s operation as it may proceed even as to pending criminal investigations. But that has not been honored by the Department of Justice or by the FBI. And in the case involving Dr. Wen Ho Lee, the subcommittee on Department of Justice oversight was briefed at every turn by the FBI refusing to make available information, citing a pending criminal investigation.

Now, the chairman of the committee and the ranking member, or chairman and the ranking member of the subcommittee, have standing, it seems to me, on a discrete inquiry, carefully controlled, where the prosecution would not be compromised. That is the role of oversight. But when Wen Ho Lee was indicted on December 11, 1999, immediately, the FBI used that as a reason to resist any further Senate oversight. And there was a real question of why the FBI and the Department of Justice allowed Dr. Lee to remain at large after a search of his premises in April of 1999 was conducted, and then he was at liberty, at large, until December when an arrest warrant was issued. Suddenly, he became more problematic than public enemy No. 1, when he was put in manacles and solitary confinement which had all the earmarks of an effort at the top of the Justice Department and FBI to coerce a guilty plea.

After the guilty plea was entered, Judiciary Committee oversight had been thoroughly conducted, and the F.B.I. were well aware of what was going on because Dr. Lee was still being de-briefed. Here again, I believe the Judiciary Committee is entitled to a commitment that oversight will be respected, and the case law will be respected, and that there may be oversight even on pending criminal investigations.

In the case of Hanssen, who has just entered a guilty plea on an arrange-ment to avoid the death penalty, it raises some very fundamental questions that need to be answered as to procedures in the Federal Bureau of Investigation. Although this matter did not come to light until very recently, in August of 1986, Hanssen’s voice was recorded by an FBI wiretap on his Soviet contact’s telephone. In 1992, Hanssen improperly accessed his supervisor’s computer. In 1997, Hanssen began to search the FBI computerized case database for his name, his home address, and for terms referring to espionage activities.

A question arises, what steps have been taken by the FBI to detect a spy such as Hanssen? There was a very strong report issued by an inspector general of the CIA after Aldrich Ames was detected as a spy, and the inspector general of the CIA, Fred Hitz, wrote this in the report:

We have no reason to believe that the directors of Central Intelligence who served during the relevant period were aware of the deficiencies described in this report.

That relates to Aldrich Ames.

But directors of Central Intelligence are ordered to ensure that they are knowledgeable of significant developments relating to crucial agency missions. Sensitive human source reporting on the Soviet Union and Russia during and after the cold war was such a mission, and certain directors of Central Intelligence must therefore be held accountable for serious shortcomings in that regard.

Now, what that does essentially is to say that the Directors are at fault, even though they didn’t know about Aldrich Ames, or have reason to know about Aldrich Ames, because the presence of spies in the Central Intelligence Agency so threatens national security that the Directors have an obligation to find out about it. If you make it an absolute responsibility, that, according to the CIA inspector general, would put the pressure on the Directors to find out about it.

The three Directors of the Central Intelligence Agency who were in office during the time Aldrich Ames functioned—freeh, woolsey, and woolsey—responded with a very hot letter denying responsibility and saying that the standard set by the CIA inspector general was too high. Well, this is a subject I have discussed preliminarily with Mr. Mueller and intend to ask him about.

It is a very tough standard to say that a public official is liable for matters that he didn’t know about or didn’t have reason to know about. But if our Nation’s secrets are to be safeguarded, and if we are to be secure from spies such as Ames and Hanssen, this is a matter that we are going to have to determine as to what is the appropriate standard.

When I talked to Mr. Mueller, I didn’t ask him for a response, but this is another subject that will be probed during the course of the confirmation hearings. The issues of management in the FBI are just gigantic; they are enormous. We have seen repeated failures by the Federal Bureau of Investigation to come forward with documents in a timely manner. In the
Yesterday, we discussed at some length the rector of the FBI. There was no doubt as to guilt or as to the justification for the death sentence which was imposed, but there was an obligation on the part of the prosecutor to turn over all the papers. There had been some controversy about sentencing. Here you had a 5-month delay where the Federal Bureau of Investigation had reason to know that all those documents were not turned over.

The question is: What is to be done in the management of the Federal Bureau of Investigation to avoid this sort of an error? In an age of computerization and mechanization, we search for an answer and really must find a way that the FBI will correct these kinds of problems.

A similar issue was confronted in the Waco matter. It was an incident which occurred on April 19, 1993, where the compound was attacked and where so many people lost their lives in one of the most controversial incidents in American history, but it was not until August of 1999 that the FBI suddenly found a whole ream of records. Here again, management responsibilities require something much, much better than this.

The incident at Waco is really a very sad chapter in American history for many reasons: The confrontation, the deaths, the failure of congressional oversight, the failure of candid disclosure by the officials who were in charge.

On April 28 of 1993, Attorney General Reno and then FBI Director William Sessions testified before Congress that no pyrotechnic tear gas rounds were used at Waco. The hostage rescue team commander, Richard Rogers, who was present for their testimony but who did not testify, did not correct them.

Regrettably, that is an occurrence which has happened too often where there is a concern about the FBI institutional image which blinds people who ought to be coming forward and who ought to be making a disclosure as to what the facts were when there is congressional oversight and you have critical people such as the Attorney General of the United States and by the Director of the FBI.

When Mr. Mueller and I talked yesterday, we discussed at some length the culture of the Federal Bureau of Investigation and the difficulties of even the Director finding out what is going on in his own bureau. This is a challenging task which Robert Mueller is going to have to confront.

In the context of what has happened with Wen Ho Lee, Waco, McVeigh, Hansen, and the campaign finance investigation, these are issues which need to be very thoroughly explored in the confirmation hearing, and we ought to come to some common understanding between those of us who have oversight responsibilities on the Judiciary Committee and the Director of the FBI as to what his standard will be and what we think the standard should be so that we can come to a meeting of the minds or so that we may not confirm a Director who does not measure up to what's expected, which is required as a matter of legitimate oversight.

At the same time, as I suggested before, Congress has not done its job on oversight. We had the incident at Waco on April 19 of 1993. In my view, there should have been a prompt, detailed, piercing oversight investigation of what went on there. It was not until former Senator Danforth undertook that investigation in 1999 that anything really was done.

Who can say as to the bombing of the Oklahoma City Federal building 2 years to the day after the Waco incident, when the Oklahoma City bombing occurred on April 19, 1995, whether that was related to the Waco incident or whether it might have been prevented had there been vigorous congressional oversight?

In 1995, I served as the chairman of the Subcommittee on Terrorism and moved to have oversight hearings at that time on both Waco and Ruby Ridge and to have a great deal more needed to be done. Finally, the subcommittee was permitted to have oversight as to Ruby Ridge.

That was an incident where Randy Weaver was on the mountain and refused to come down. There was a veritable army which approached him and had a firefight, and a U.S. marshal was killed in the process.

The oversight in which the Terrorism Subcommittee got to the bottom of the matter, and to the credit of FBI Director Louis Freeh, the FBI changed the rules of engagement related to the use of deadly force in what was a very important matter.

When we finished the hearings, Mr. Weaver said in the hearing room, had he known there was going to be this kind of congressional oversight, he would have come down from the mountain if he had believed there would be an inquiry and an appropriate resolution.

It was at that time that militia were springing up in some 40 States across the United States. If Congress exercises appropriate oversight, it is my view that will do a great deal to quell public unrest and public doubts as to what is happening with Federal action in a place such as Ruby Ridge and Federal action in a place such as Waco.

In summary, these are matters which are of the utmost importance when we will be confirming the next Director of the FBI, an occurrence which happens only once every 10 years because it is a 10-year turn, although a Director may leave earlier. Louis Freeh is leaving after 8 years, a term of office longer than the maximum a President may serve under the Constitution. The Justices of the Supreme Court have enormous power on 5–4 decisions establishing the law of the land, but there are four others who go with the one deciding vote.

The FBI, with all of its power—most of what it does is necessarily confidential and secret—ought to be subject to very profound changes in FBI management on the items which have been mentioned and an attitude that will not emphasize the institutional image to the sacrifice of not having appropriate congressional oversight—whether having appropriate congressional disclosure of the memorandum referred to, having appropriate congressional disclosure when a matter is pending, even if it is a criminal matter.

Mr. President, I ask unanimous consent that the full text of the memorandum from Director Freeh, dated December 9, 1996, be printed in the Congressional Record.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMORANDUM

As I related to you this morning, I met with the Attorney General on Friday, December 6, to discuss the above-captioned matter.

I stated that DOJ had not yet referred the matter to the FBI to conduct a full, criminal investigation. It was my recommendation that this referral take place as soon as possible.

I also told the Attorney General that since she had declined to refer the matter to an Independent Counsel it was my recommendation that she select a first-rate DOJ legal team from outside Main Justice to conduct the inquiry. In fact, I said that these prosecutors should be "junk-yard dogs" and that in my view, PIS was not capable of conducting the thorough, aggressive kind of investigation which was required.

I also advised the Attorney General of Lee Radek's comment to you that there was a lot of "pressure" on him and PIS regarding this case because the "Attorney General's job might hang in the balance" (or words to that effect). I stated that PIS people would be enough for me to take him and the Criminal Division off the case completely.

I also stated that it didn't make sense for PIS to call the FBI the "lead agency" in this matter while operating a "task force" with DOC IGs who were conducting interviews of
key witnesses without the knowledge or participation of the FBI.

I strongly recommend that the FBI and hand-picked DOJ attorneys from outside Main Justice run this case as we would any matter of such importance and complexity. We left the conversation on Friday with arrangements to discuss the matter again on Monday. The Attorney General and I spoke today and she asked for a meeting to discuss the "investigative team" and hear our recommendations. The meeting is now scheduled for Wednesday, 12/11/96, which you and Bob Dole will also attend.

I intend to repeat my recommendations from Friday's meeting. We should present all of our recommendations for setting up the investigation—both AUSAs and other resources. You and I should also discuss and consider whether on the basis of all the facts and circumstances—including Huang's recently released letters to the President as well as Radek's comments—whether I should recommend that the Attorney General reconsider referral to an Independent Counsel. It was my recommendation that DOJ declined to allow the FBI to play any role in the Independent Counsel referral deliberations. I agree with you that based on the DOJ's experience in other matters—which has only referred to an Independent Counsel because the FBI and I intervened directly with the Attorney General—it was decided to exclude the FBI from the investigation-making process.

Nevertheless, based on information recently reviewed from PIS/DOC, we should determine whether or not an Independent Counsel referral should be made at this time. If so, I will make the recommendation to the Attorney General.

Mr. SPECTER. Mr. President, I ask unanimous consent that an extract of a report from CIA Inspector General Frederick Hitz be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

We have no reason to believe that the DCIs are hand-picked DOJ attorneys from outside Main Justice. The DCIs have a proven record of being aware of the deficiencies described in this report. But DCIs are obligated to ensure that they are knowledgeable of significant developments related to crucial Agency missions. Sensitive human source reporting on the Soviet Union and Russia during and after the Cold War clearly was such a mission, and certain DCIs must therefore be held accountable for serious shortcomings in that reporting.

Mr. SPECTER. I thank the Chair and yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Michigan.

PRESCRIPTION DRUGS

Ms. STABENOW. Mr. President, I rise to express grave disappointment and concern. Yesterday the Secretary of Health and Human Services, Tommy Thompson, indicated he would not get the best price for American-made, FDA-safety-approved medications from other countries such as Canada.

Last year, Congress passed a bill that says we will no longer protect the prices charged in this country that disadvantage our citizens by stopping us from free commerce across the border. I supported this effort in the House of Representatives. I find it ironic, at a time when our President talks about wanting free trade authority and expanding free trade, that we stop our citizens at the border from being able to benefit from free trade regarding the purchase of prescription drugs.

Yesterday, the Secretary of Health and Human Services said he was concerned about the safety of reimported prescription drugs. We addressed those concerns in legislation already approved by the Senate. Further, I have introduced legislation called the Medication Equity and Drug Savings Act, S. 215, the MEDS Act, that addresses the safety concerns expressed by former Secretary Shalala. The Act guarantees in the clearest terms that American labels will be used on the wholesale products that come from another country and that there will be complete safety precautions to make sure Americans will be receiving American-made, safe, FDA-approved drugs.

What is the difference in cost for prescription drugs? The difference is clear when I stand in Detroit, MI, and I look across the river, I know that prices for FDA-approved drugs can truly reduce the costs of one of the most important parts of the health care system today—medicines for our people, for the families of America, We deserve a break. Unfortunately, the roadblock was maintained yesterday. It is time to take down the barrier at the border and allow our people to buy prescription drugs wherever they can get the best price. I urge we act as quickly as possible.

Mr. BURNS. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BURNS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will begin consideration of H.R. 2217, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2217) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30th, 2002, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes, namely:

CONGRESSIONAL RECORD—SENATE 12857
Provided further, That balances in the Federal budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That such sums recovered from or paid by a party in advance of or as reimbursement for remedial action or response activities conducted by the Department pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), $9,978,000, to remain available until expended: Provided, That no payment shall be made to other than the Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California Railroad grant lands and is deposited to the General Fund in the Treasury in accordance with the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (30 Stat. 876).

FOREST ECOSYSTEMS HEALTH AND RECOVERY FUND (REVOLVING FUND, SPECIAL ACCOUNT) In addition to the purposes authorized in Public Law 102–381, funds made available in the Forest Ecosystem Health and Recovery Fund can be used for the purpose of planning, preparing, and monitoring salvage timber sales and forest ecosystem recovery activities such as release from competing vegetation and density control treatments. The Federal share of receipts (defined as the portion of salvage timber sales and improvements on the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing corridor of roads on or adjacent to such grant lands; $106,061,000, to remain available until expended: Provided, That 25 percent of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California Railroad grant land fund and is deposited to the General Fund in the Treasury in accordance with the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (30 Stat. 876).

FIRE PROTECTION, PROTECTION, AND ACQUISITION For rehabilitation, protection, and acquisition of lands and interests therein, and improvement of Federal rangelands pursuant to section 401 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), notwithstanding any other Act, sums equal to 50 percent of all monies received during the prior fiscal year under section 318(c)(4)(E)(xiii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That no payment shall be made to other than the Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California Railroad grant lands and is deposited to the General Fund in the Treasury in accordance with the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (30 Stat. 876).
mineral leasing receipts from Bunkhead-Jones lands to the Department of the Interior pursuant to law, but not less than $10,000,000, to remain available until expended: Provided, That not to exceed $600,000 shall be available for administrative expenses.

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for costs of providing copies of official public land documents, for monitoring construction, operation, and termination of uses in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under Public Law 94–579, as amended, and Public Law 93–153, to remain available until expended: Provided, That notwithstanding any provision to the contrary of section 305(a) of Public Law 94–579 (43 U.S.C. 1735(a)), any moneys that have been or will be received pursuant to that section, whether as a result of forfeiture, compromise, or settlement, if not appropriated such amounts as may be contributed under Public Law 94–579, as amended, and Public Law 93–153, to remain available until expended: Provided, That notwithstanding any provision to the contrary of section 305(c) of that Act, that any such moneys shall be considered as appropriated and may be expended under the authority of this Act by the Secretary to improve, protect, or rehabilitate any public lands administered through the Bureau of Land Management which have been damaged by the action of a person, source developer, purchaser, permittee, or any unauthorized person, without regard to whether all moneys received from such sale are used on the exact lands damaged which led to the action: Provided further, That any such moneys that are in excess of amounts needed to repair damage to the exact land for which funds were collected may be used to repair other damaged public lands.

MISCELLANEOUS TRUST FUNDS

In addition to amounts appropriated to be expended under existing laws, there is hereby appropriated such amounts as may be contributed under section 307 of the Act of October 21, 1976 (43 U.S.C. 1701), and such amounts as may be advanced for administrative costs, surveys, appraisals, and costs of making conveyances of omitted lands under section 211(b) of that Act, to remain available until expended.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, relocation, operation, repair, and alteration of temporary structures, and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; up to $100,000 for payments, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Bureau; miscellaneous and emergency expenses of enforcement activities authorized or approved by the Secretary and to be accounted for solely on her certificate: Provided, That notwithstanding 44 U.S.C. 501, the Bureau may, under contract for cost-sharing and partnership arrangements authorized by law, procure printing services from cooperators in connection with jointly produced publications for which the cooperators share the cost of printing either in cash or in services, and the Bureau determines the cooperators are capable of meeting accepted quality standards: Provided further, That section 2(b) of title 30, United States Code, is amended:

(1) In section 289(a), by striking the first sentence and inserting, ‘‘The holder of each unpatented mining claim, placer claim, or tunnel right, or tunnel or water right pursuant to the mining laws of the United States, whether located before, on or after the enactment of this Act, shall pay to the Secretary of the Treasury of the United States $100 per claim or site’’; and

(2) In section 289, by striking ‘‘and before September 30, 2006’’ and substituting ‘‘and before September 30, 2006’’;

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

For necessary expenses of the United States Fish and Wildlife Service, by direct expenditure and economic studies, conservation management, investigations, protection, and utilization of fishery and wildlife resources, except whales, seals, and sea lions, maintenance of the herd of low-horned cattle on the Wichita Mountains Wildlife Refuge, general administration, and for the performance of other authorized functions related to the planning of and coordination of contracts, grants, cooperative agreements and reimbursable agreements with public and private entities, $845,714,000, to remain available until September 30, 2001, except as otherwise provided herein, of which $31,000,000 is for conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That balances in the Federal Infrastructure Improvement account shall be transferred to this appropriation, and shall remain available until expended: Provided further, That not less than $2,000,000 shall be provided to local governments in southern California for planning associated with the Natural Communities Conservation Planning (NCCP) program and shall remain available until expended: Provided further, That not less than $2,000,000 for high priority projects which shall be carried out by the Youth Conservation Corps, defined in section 250(c)(4)(E)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided further, That not to exceed $9,000,000 shall be used for implementing subsections (a), (b), (c), and (d) of section 4 of the Endangered Species Act, as amended, for species that are indigenous to the United States (except for processing petitions, developing and implementing proposed federal regulations, and taking any other steps to implement actions described in subsection (c)(2)(A), (c)(2)(B)(i), or (c)(2)(B)(ii)): Provided further, That not to exceed $50,000,000, to remain available until expended, may at the discretion of the Secretary, not to exceed 2,000,000, to remain available until expended, to be for the conservation activities described in section 250(c)(4)(E)(iv) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided further, That the amount provided herein is for the Secretary to establish a Private Stewardship Grants Program to provide grants and other assistance to individuals and groups engaged in private conservation efforts that benefit federally listed, proposed, or candidate species, or other at-risk species.

STEWARDSHIP GRANTS

For expenses necessary to carry out the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460l–6 through 11), and to the Land and Water Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That the amount provided herein is for a Landowner Incentive Program established by the Secretary that provides matching, competitively awarded grants to States, the District of Columbia, Tribes, Puerto Rico, the United States Virgin Islands, the Northern Mariana Islands, and American Samoa, to establish, or supplement existing, landowner incentive programs that provide technical and financial assistance for the acquisition, rehabilitation, and restoration, to private landowners for the protection and management of habitat to benefit federally listed, proposed, or candidate species, or other at-risk species on private lands.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND

For expenses necessary to carry out section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), as amended, $91,000,000, to be derived from the Cooperative Endangered Species Conservation Fund, to remain available until expended, and to be for conservation spending category activities pursuant to section 251(c) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of discretionary spending limits: Provided, That the amount provided herein is for the Secretary to establish a Private Stewardship Grants Program to provide grants and other assistance to individuals and groups engaged in private conservation efforts that benefit federally listed, proposed, or candidate species, or other at-risk species.

NATIONAL WILDLIFE REFUGE FUND

For expenses necessary to implement the Act of October 17, 1978 (16 U.S.C. 715a), $14,410,000.

NORTH AMERICAN WETLANDS CONSERVATION FUND

For expenses necessary to carry out the provisions of the North American Wetlands Conservation Act, Public Law 101–213, as amended, $42,000,000, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E)(vi) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

MULTINATIONAL SPECIES CONSERVATION FUND

appropriations for rhinoceros, tiger, Asian elephant, and other species of wildlife as are exempt from any sanctions imposed against any country under section 102 of the Arms Export Control Act (22 U.S.C. 279aa–1).

STATE WILDLIFE GRANTS

INCLUDING RECEIPTS

For wildlife conservation grants to States and to the District of Columbia, Puerto Rico, Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa, under the provisions of the Wildlife Conservation and Recovery Act of 1956 (16 U.S.C. 669b–1), the Fish and Wildlife Coordination Act, for the development and implementation of programs for the benefit of wildlife and their habitat, including species that are not hunted or fished.

$100,000,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and to be for the conservation activities defined in section 205(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That the Secretary shall, after deducting administrative expenses, apportion the amount provided herein in the following manner: (A) to the District of Columbia and to the Commonwealth of Puerto Rico, each a sum equal to one-half of 1 percent thereof; and (B) to Guam, American Samoa, the U.S. Virgin Islands, and the Commonwealth of the Northern Mariana Islands, each a sum equal to not more than one-fourth of 1 percent thereof: Provided further, That the Secretary shall apportion the remaining amount in the following manner: 30 percent based on the ratio to which the land area of such State bears to the total land area of all such States; and 70 percent based on the ratio to which the population of such State bears to the total population, based on the most recent U.S. Census; and the amounts so apportioned shall be adjusted equitably so that no State shall be apportioned a sum which is less than one percent of the total amount available for apportionment or more than 10 percent: Provided further, That the Federal share of planning grants shall not exceed 75 percent of the total costs of such projects and the Federal share of implementation grants shall not exceed 90 percent of the total costs of such projects: Provided further, That the non-Federal share of such projects may not be derived from Federal grant programs: Provided further, That no State, territory, or other jurisdiction shall receive a grant unless it has developed, or committed to develop, by October 1, 2001, a comprehensive wildlife conservation plan, consistent with criteria established by the Secretary of the Interior, that considers the broad range of the State’s wildlife and associated habitats, with appropriate priority placed on those species with the greatest conservation need and taking into consideration the relative level of funding available for the conservation of those species: Provided further, That any amount apportioned in 2002 to any State, territory, or other jurisdiction that remains unobligated as of September 30, 2003, shall be reapportioned, together with funds apportioned in 2004, in the manner provided hereinafter.

Of the amounts apportioned in title VIII of Public Law 106–291, $49,890,000 for State Wild- life Grants are rescinded.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed 74 passenger motor vehicles, of which 69 are for replacement only (including 22 for police-type use); 11 for law enforcement and adjacent to reservation areas caused by operations of the Service; options for the purchase of land at not to exceed $1 for each option; facilities interconnected by conservational uses on conservation areas as are consistent with their primary purpose; and the maintenance and improvement of aquaria, buildings, and other facilities associated with the operation of the Service due to which the United States has title, and which are used pursuant to law in connection with management and investigation of fish and wildlife resources: Provided further, That the notwithstanding 4 U.S.C. 501, the Service may, under cooperative cost sharing and partnership arrangements authorized by law, procure printing and related services from state, local, or Federal governments, or with jointly produced publications for which the operators share at least one-half the cost of printing either in cash or services and the Service determines the cooperators are capable of meeting accepted quality standards: Provided further, That the Service may accept donated aircraft as replacements for existing aircraft: Provided further, That notwithstanding any other provision of law, the Secretary of the Interior may not spend any of the funds appropriated in this Act for the purchase of lands or interests in lands to use as an extension of or any existing unit of the National Wildlife Refuge System unless the purchase is approved in advance by the House and Senate Committees on Appropriations in compliance with procedures contained in Senate Report 105–56.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

For expenses necessary for the management, operation, and maintenance of areas and facilities administered by the National Park Service (including special road maintenance service to trucking permittees on a reimbursable basis), and for the general administration of the Nation Park Service, $1,761,190,000, of which $19,881,000 for research, planning and interagency coordination in support of land acquisitions for Everglades restoration shall remain available until expended, and of which $17,181,000, to remain available until September 30, 2003, is for maintenance repair or rehabilitation projects for constructed assets, operation of National Parks, and Arts and Cultural Resources Projects, management software system, and comprehensive facility condition assessments; and of which $2,000,000 is for the Youth Conservation Corps, of which $1,000,000 is for the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That the Secretary may accept donated aircraft as replacements for existing aircraft: Provided further, That the amount provided $30,000,000 shall be for the conservation activities defined in section 205(c)(4)(E)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

HISTORIC PRESERVATION FUND

For expenses necessary in carrying out the Historic Preservation Act of 1966, as amended (16 U.S.C. 470), and the Omnibus Parks and Public Lands Management Act of 1996 (Public Law 104–333), $74,000,000, to be derived from the Historic Preservation Fund, to remain available until expended, for the support of Federal activities, including activities defined in section 205(c)(4)(E)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That of the amount provided $30,000,000 shall be for the conservation activities defined in section 205(c)(4)(E)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

CONSTRUCTION

For construction, improvements, repair or replacement of physical facilities, including the modifications authorized by section 104 of the Everglades National Park Protection and Expansion Act of 1989, $338,585,000, to remain available until expended, of which $60,000,000 is for conservation activities defined in section 250(c)(4)(E)(i) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

LAND AND WATER CONSERVATION FUND

CONTRIBUTION FOR ANNUITY BENEFITS

For reimbursement (not heretofore made), pursuant to provisions of Public Law 85–157, to the District of Columbia on a monthly basis for benefit payments to District Police Officers, to United States Park Police annuitants under the provisions of the Policeman and Fireman’s Retirement and Disability Act (Act), to the extent payments are made by those active Park Police members covered under the Act, such amounts as hereafter may be necessary for the purposes of such Act.
Emergency Deficit Control Act of 1985, as amended, of such excess, plus interest on $164,424,000 is for the State assistance program including $4,000,000 to administer the State assistance program, and of which $11,000,000 shall be for grants, not covering more than 50 percent of the costs of any acquisition to be made with such funds, to States and local communities for purposes of acquiring lands or interests therein, within the Everglades watershed (consisting of lands and waters within the boundaries of the South Florida Water Management District, Florida Bay and the Florida Keys, including the areas known as the Frog Pond, the Rocky Glades and the Eight and One-Half Square Mile Area) under terms and conditions deemed necessary to improve the hydrological function of the Everglades watershed; and $16,000,000 may be for project modifications authorized by section 104 of the Everglades Protection Act of 1978, as amended. Provided further, That funds provided under this heading, $15,000,000 may be for Federal grants to the State of Florida for the acquisition of lands or waters, or interests therein, within the Everglades watershed (consisting of lands and waters within the boundaries of the South Florida Water Management District, Florida Bay and the Florida Keys, including the areas known as the Frog Pond, the Rocky Glades and the Eight and One-Half Square Mile Area) under terms and conditions deemed necessary to improve the hydrological function of the Everglades watershed; and $16,000,000 may be for project modifications authorized by section 104 of the Everglades Protection Act of 1978, as amended. Provided further, That funds provided under this heading for assistance to the State of Florida to acquire lands within the Everglades watershed are contingent upon new matching non-Federal funds to the State and shall be subject to an agreement that the lands to be acquired will be managed in perpetuity for the restoration of the Everglades: Provided further, That none of the funds provided for the State Assistance program may be used to establish a contingency fund.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed 237 for police-type use, 11 buses, and 8 ambulances: Provided, That none of the funds appropriated for the National Park Service may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1933. Provided further, That none of the funds appropriated for the National Park Service may be used to implement an agreement for the redevelopment of the southern end of Ellis Island until such agreement has been submitted to the Congress and shall not be implemented prior to the expiration of 30 calendar days after the date of when the Speaker of the House of Representatives and the President of the Senate of a full and comprehensive report on the development of the southern end of Ellis Island containing the facts and circumstances relied upon in support of the proposed project.

None of the funds in this Act may be spent by the National Park Service for activities in direct response to the United Nations Biodiversity Convention.

The National Park Service may distribute to operating units based on the safety record of each unit the costs of training programs designed to improve workplace and employee safety, and to encourage employees receiving workers’ compensation benefits pursuant to chapter 81 of title 31 to return to their pre-injury positions for which they are medically able.

UNITED STATES GEOLOGICAL SURVEY SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses of the United States Geological Survey to perform surveys, investigations, and research covering topography, geology, hydrology, biology, and the mineral and biological resources of the United States, its territories and possessions, and other areas as authorized by 43 U.S.C. 31, 1332, and 1340; classify lands as to their mineral and water resources; give engineering supervision to power permission and Federal Energy Regulatory Commission licenses; administer the minerals exploration program (30 U.S.C. 641); and publish and disseminate surveys and reports concerning activities; and to conduct inquiries into the economic conditions affecting mining and materials processing industries (30 U.S.C. 3, 21a, and 1603; 50 U.S.C. 961(c)) and related purposes as authorized by law and to publish and disseminate data; $102,474,000, of which $64,318,000 shall be available only for cooperation with States or municipalities on resources investigations; and of which $16,400,000 shall remain available until expended for conducting inquiries into the economic conditions affecting mining and materials processing industries; and of which $8,000,000 shall remain available until expended for satellite operations; and of which $23,226,000 shall be available until September 30, 2003 for the operation of the Cooperative Research Units: Provided, That none of these funds provided for the biological research activity shall be used to conduct new surveys on private property, unless specifically authorized in writing by the property owner: Provided further, That of the amount provided herein, $25,000,000 is for the conservation activities described in section 250(c)(4)(E)(viii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided further, That no part of this appropriation shall be used to pay more than one-half the cost of topographic mapping or water resources data collection and investigations carried on in cooperation with States and municipalities.

ADMINISTRATIVE PROVISIONS

The amount appropriated for the United States Geological Survey shall be available for the purchase of not to exceed 33 passenger motor vehicles, of which 48 shall be for replacement only, including not to exceed 237 for police-type use, 11 buses, and 8 ambulances: Provided, That none of the funds appropriated for the National Park Service may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1933. Provided further, That none of the funds appropriated for the National Park Service may be used to implement an agreement for the redevelopment of the southern end of Ellis Island until such agreement has been submitted to the Congress and shall not be implemented prior to the expiration of 30 calendar days after the date of when the Speaker of the House of Representatives and the President of the Senate of a full and comprehensive report on the development of the southern end of Ellis Island containing the facts and circumstances relied upon in support of the proposed project.

None of the funds in this Act may be spent by the National Park Service for activities in direct response to the United Nations Biodiversity Convention.

The National Park Service may distribute to operating units based on the safety record of each unit the costs of training programs designed to improve workplace and employee safety, and to encourage employees receiving workers’ compensation benefits pursuant to chapter 81 of title 31 to return to their pre-injury positions for which they are medically able.
MARYLAND must first complete all Surface Mining Reclamation and Treatment Fund, the State of any amounts greater than 10 percent of its title IV grants are deposited in an acid mine drainage abatement and treatment projects, except that before the State to undertake acid mine drainage abatement and treatment fund, the United States Government to pay for construction or facilities improvement and repair agreements and for unmet welfare assistance programs contained in 43 CFR part 12, the Secretary and the Academy of Public Administration’s August 1999 report shall be available for tribal contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs for distribution to other tribes, this action shall not diminish the Federal Government’s trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe’s ability to access future appropriations.
funds available to the Bureau shall be used to support exploration for any offshore mineral resources beyond the grade structure in place or approved by the Secretary of the Interior at any school in the Bureau school system as of October 22, 1999. Funds made available pursuant to this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1146 of the Education Amendments of 1978, (25 U.S.C. 2001)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 30, 1989, may continue to operate in that school for the remainder of that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not have access to such schools as Bureau schools. Charter schools shall be a continuation of the Bureau's local educational unit functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 35 of title 31, United States Code (commonly known as the "Federal Tort Claims Act").

DEPARTMENTAL OFFICES

INSULAR AFFAIRS

ASSISTANCE TO TERRITORIES

For expenses necessary for assistance to territories under the jurisdiction of the Department of the Interior, $76,450,000, of which: (1) $71,922,000 shall be available until expended for technical assistance, including maintenance assistance, disaster assistance, insular management controls, coral reef initiative activities, and tribal control and management; (2) grants to the Judiciary in American Samoa for compensation and expenses, as authorized by law (48 U.S.C. 1661(c)); grants to the Government of American Samoa, in addition to current local revenues, for construction and support of governmental functions; grants to the Government of the Virgin Islands as authorized by law; grants to the Government of Guam, as authorized by law; and grants to the Government of the Northern Mariana Islands as authorized by law (Public Law 94–241; 90 Stat. 272); and (2) $4,528,000 shall be available for salaries and expenses of the Office of Insular Affairs: Provided, That all financial transactions of the territorial and local governments herein provided for, including such transactions of all agencies or instrumentalities established or used by such governments, may be audited by the General Accounting Office, at its discretion, in accordance with chapter 31 of title 31, United States Code: Provided further, That Northern Mariana Islands Covenant grant funding shall be provided according to those terms of the Agreement of the Special Representatives of the People United States Financial Assistance for the Northern Mariana Islands approved by Public Law 104–134: Provided further, That of the amounts provided for technical assistance, not to exceed $2,000,000 shall be made available for transfer to the Disaster Assistance Direct Loan Financing Account of the Federal Emergency Management Agency for the purpose of offsetting the cost of compliance with the repayment obligation of the Government of the Virgin Islands on Community Disaster Loan 441, as required by section 504 of the Congressional Budget and Impoundment Control Act of 1976 (25 U.S.C. 661c): Provided further, That of the amounts provided for technical assistance, sufficient funding shall be made available for a grant to the Close-Up Foundation: Provided further, That the funds for the program of operations and maintenance improvement are appropriated to institutionalize routine operations and maintain an array of operations in American Samoa, Guam, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia, to include operations and maintenance needs, improved capability of local operations and maintenance institutions and agencies (including management and educational training), and project-specific maintenance (with territorial participation and cost sharing to be determined by the Secretary), to maintain a territorial commitment to timely maintenance of its capital assets: Provided further, That any appropriation for disaster assistance under this heading in this Act or previous appropriations Acts may be used as non-Federal matching funds for the purpose of hazard mitigation grants provided pursuant to section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5766):

COMPACT OF FREE ASSOCIATION

For economic assistance and necessary expenses for the Federated States of Micronesia and the Republic of the Marshall Islands as authorized by section 218 and 233 of the Compact of Free Association, and for economic assistance and necessary expenses for the Republic of Palau as provided for in sections 122, 221, 223, and 233 of the Compact of Free Association, $23,245,000, to remain available until expended, as authorized by Public Law 99–239 and Public Law 99–658.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For necessary expenses for management of the Department of the Interior, $67,541,000, of which not to exceed $8,300 may be for official reception and representation expenses, and of which up to $1,000,000 shall be available for workers compensation payments and unemployment compensation payments associated with the orderly closure of the United States Bureau of Mines: Provided, That all necessary expenses of the Office of the Solicitor: $44,074,000.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

For necessary expenses of the Office of Inspector General, including $3,827,000 to be transferred, as needed, to the Department of the Interior or other departments or agencies of the Federal Government, for salaries and expenses of the Office of Inspector General: $13,601,000.

OFFICE OF SPECIAL TRUSTEE FOR AMERICAN INDIANS

FEDERAL LAND ACQUISITION PROGRAMS

For operation of trust programs for Indians by direct expenditure, contracts, cooperative agreements, compacts, and grants, $99,224,000, to remain available until expended: Provided, That the funds for trust management improvements may be transferred, as needed, to the Bureau of Indian Affairs “Operation of Indian Programs” account and to the Departmental Management “Salaries and Expenses” account: Provided further, That funds made available to Tribes and Tribal organizations through contracts or grants obligated during fiscal year 2002, as authorized by section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, and be replenished by a supplemental appropriation which must be requested as promptly as possible.
SEC. 104. Appropriations made to the Department of the Interior to conduct offshore oil and natural gas preleasing, leasing, and related activities, on lands within the North Aleutian Basin planning area.

SEC. 105. Appropriations made in this title shall be available for obligation in connection with contracts issued for services or rentals for periods not in excess of 12 months beginning at any time during the fiscal year.

SEC. 106. Annual appropriations made in this title shall be deemed to alter the Secretary's statutory authority.

SEC. 110. No funds provided in this title may be expended by the Department of the Interior for the conduct of offshore leasing and related activities placed under restriction in the President's moratorium statement of June 12, 1998, in the areas of northern, central, and southern California; the North Atlantic; Washington and Oregon; and the eastern Gulf of Mexico south of 26 degrees north latitude and east of 86 degrees west longitude.

SEC. 111. Advance payments made under this title to Indian tribes, tribal organizations, and tribal consortia pursuant to the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.) may be invested by the Indian tribe, tribal organization, or consortium before such funds are expended for the purposes of the grant, compact, or annual funding agreement so long as such funds are—

(1) invested by the Indian tribe, tribal organization, or consortium only in obligations of the United States, or in obligations or securities that are guaranteed or insulated by the United States, or in a mutual or other fund or corporation established under the Securities and Exchange Commission and which only invest in obligations of the United States or securities that are guaranteed or insulated by the United States;

(2) deposited only into accounts that are insured by an agency or instrumentality of the United States, or are fully collateralized to ensure that funds are—

(a) invested in obligations of the United States, or in obligations or securities that are guaranteed or insulated by the United States; or

(b) deposited only into accounts that are insured by an agency or instrumentality of the United States, or are fully collateralized to ensure protection of the funds, even in the event of a bank failure.

SEC. 112. Appropriations made in this Act for the Bureau of Land Management and Office of Special Trustee for American Indian Affairs and Office of Special Trustee for American Indian Affairs and Office of Special Trustee for American Indian Affairs and Office of Special Trustee for American Indian Affairs and Office of Special Trustee for American Indian Affairs shall be available for operation of warehouses, and other equipment in connection with their use for wildland fire operations, such reimbursement to be credited to appropriations currently available at the end of the fiscal year.

SEC. 113. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever considered necessary to contribute to the efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections 333 and 334 of title 31, United States Code: Provided, That reimbursements for costs and supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 114. Appropriations made to the Department of the Interior to conduct offshore oil and natural gas preleasing, leasing, and related activities, on lands located outside Sale 181, as identified in the final Outer Continental Shelf 5-Year Oil and Gas Leasing Program, 1997–2002.

SEC. 115. Notwithstanding any other provision of law, the Secretary of the Interior is authorized to distribute Tribal Priority Allocation funds, including tribal base funds, to alleviate tribal funding inequities by transferring funds to address identified, unmet needs, dual enrollment, overlapping service areas, or inaccurate distribution methodologies. No tribe shall receive a reduction in Tribal Priority Allocation funds of more than 10 percent in fiscal year 2002.

SEC. 116. Funds appropriated for the Bureau of Indian Affairs for postsecondary schools for fiscal year 2002 shall be allocated among the schools proportionate to the unmet need of the schools as determined by the Postsecondary Funding Formula adopted by the Office of Indian Education Programs.

SEC. 117. (a) The Secretary of the Interior shall take such action as may be necessary to ensure that the lands comprising the Huron Cemetery in Kansas City, Kansas (as described in section 123 of Public Law 106–291) are used only in accordance with the previous right granted to the United States; and (b) the lands of the Huron Cemetery shall be used only for the purposes of the United States as determined by the Postsecondary Funding Formula adopted by the Office of Indian Education Programs.

SEC. 118. Notwithstanding any other provision of law, in conveying the Twin Cities Research Center under the authority provided by Public Law 104–134, as amended by Public Law 104–298, the Secretary may accept and retain land and transfers of other forms of reimbursement: Provided, That the Secretary may retain and use any such reimbursement until expended and without further appropriation for: (1) the benefit of the National Wildlife Refuge System within the State of Minnesota; and (2) all activities authorized by Public Law 100–696; 16 U.S.C. 669c.

SEC. 120. Notwithstanding any other provision of law, the National Park Service may authorize, through cooperative agreement, the Golden Gate National Parks Association to provide (fee-based) educational, interpretative, and visitor services functions within the Crissy Field and Fort Point areas of the Presidio.

SEC. 121. Notwithstanding any other provision of law, for the purpose of reducing the backlog of Indian probate cases in the Department of the Interior to conduct offshore leasing and related activities placed under restriction in the President’s moratorium statement of June 12, 1998, in the areas of northern, central, and southern California; the North Atlantic; Atlantic; Washington and Oregon; and the eastern Gulf of Mexico south of 26 degrees north latitude and east of 86 degrees west longitude.

SEC. 122. Appropriations made in this title shall be deemed to alter the Secretary's statutory authority.

SEC. 123. No funds provided in this title may be expended by the Department of the Interior for the conduct of offshore oil and natural gas preleasing, leasing, and related activities, on lands located outside Sale 181, as identified in the final Outer Continental Shelf 5-Year Oil and Gas Leasing Program, 1997–2002.
sec. 122. tribal school construction demonstration program. (a) definitions. in this section—

construction. the term "construction", with respect to a tribally controlled school, includes the construction or renovation of that school.

indian tribe. the term "indian tribe" has the meaning given in section 4(e) of the indian self-determination and education assistance act (25 u.s.c. 450b(e)).

secretary. the term "secretary" means the secretary of the interior.

tribally controlled school. the term "tribally controlled school" has the meaning given in section 521 of the tribally controlled schools act of 1988 (25 u.s.c. 2511).

department. the term "department" means the department of the interior.

demonstration program. the term "demonstration program" means the tribal school construction demonstration program.

(b) demonstration program. the secretary shall carry out a demonstration program to provide grants to indian tribes for the construction of tribally controlled schools.

(1) subject to the availability of appropriations, in carrying out the demonstration program under subsection (b), the secretary shall award a grant to each indian tribe that submits an application that is approved by the secretary under paragraph (2). the secretary shall ensure that an eligible indian tribe currently on the department's priority list for construction or replacement educational facilities receives the highest priority for a grant under this section.

grant applications. an application for a grant under this section shall—

(a) include a proposal for the construction of a tribally controlled school of the indian tribe that submits the application; and

(b) be in such form as the secretary determines appropriate.

grant agreement. as a condition to receiving a grant under this section, the indian tribe shall enter into an agreement with the secretary that specifies—

(a) the costs of construction under the grant;

(b) that the indian tribe shall be required to contribute to the costs of the construction in an amount equal to 50 percent of the costs; and

(c) any other terms, conditions or provisions that the secretary determines to be appropriate.

eligibility. grants awarded under the demonstration program shall only be for construction or replacement tribally controlled schools.

effect of grant. a grant received under this section shall be in addition to any other funds received by an indian tribe under any other provision of law. the receipt of a grant under this section shall not affect the eligibility of an indian tribe receiving funding, or the amount of funding received by the indian tribe, under the tribally controlled schools act of 1968 (25 u.s.c. 2501 et seq.) or the indian self-determination and education assistance act (25 u.s.c. 450 et seq.).

sec. 123. white river oil shale mine, utah. (a) sale. the administrator of general services (referred to in this section as the "administrator") shall sell all right, title, and interest in the chinese wall, the ventilation/fan building, the mining office building, the ventilation/fan building, the mine headframe, and the miscellaneous mine-related equipment.

(b) description of improvements and equipment. the improvements and equipment referred to in subsection (a) are the following improvements and equipment associated with the mine:

(1) mine service building,

(2) sewage treatment building,

(3) 100,000 gallon underground storage tank,

(4) water treatment building/plant,

(5) ventilation/fan building,

(6) water storage tanks,

(7) mine headframe and headframe,

(8) miscellaneous mine-related equipment.

(c) description of land. the land referred to in subsection (a) is the land located in union county, utah, and is known as the "white river oil shale mine" and is described as follows:

(1) t. 10 s., r. 24 e., salt lake meridian, sections 1 through 14, through 19, through 20, 33, and 34.

(2) t. 16 s., r. 25 e., salt lake meridian, sections 18 and 19.

(d) use of proceeds. the proceeds of the sale under subsection (a)—

(1) shall be deposited in a special account in the treasury of the united states; and

(2) shall be available until expended, without further act of congress.

(1) first, to reimburse the administrator for the direct costs of the sale; and

(2) second, to reimburse the bureau of land management for service for the costs of closing and rehabilitating the mine.

(e) mine closure and rehabilitation. the closing and rehabilitation of the mine (including closing of the mine shafts, site grading, and surface revegetation) shall be conducted in accordance with—

(1) the regulatory requirements of the state of utah, the mining safety and health administration, and the occupational safety and health administration; and

(2) other applicable law.

sec. 124. the secretary of the interior may use or contract for the use of helicopters or motor vehicles on the shenon and hart national wildlife refuges for the purpose of capturing and transporting horses and burros. the provisions of subsection (a) of the act of september 8, 1959 (73 stat. 470; 18 u.s.c. 47(a)) shall not be applicable to such use. such use shall be in accordance with land management procedures prescribed by the secretary.

sec. 125. upon application of the governor of a state, the secretary shall—

(1) agree, in writing, to a transfer not to exceed 25 percent of that state's formula allocation under the heading "national park service, land acquisition and state assistance" to increase that state's allocation under the heading "united states fish and wildlife service, state wildlife grants" or (2) transfer not to exceed 25 percent of the state's formula allocation under the heading "united states fish and wildlife service, state wildlife grants" to increase the state's formula allocation under the heading "national park service, land acquisition and state assistance".

sec. 126. section 819 of public law 106–58 is hereby repealed.

sec. 127. moore's landing at the cape roanoke division in south carolina is hereby named for george garris and shall hereafter be referred to in any law, document, or record of the united states as "garris landing".

title i—related agencies

department of agriculture forest service

forest and rangeland research

for necessary expenses of forest and rangeland research as authorized by law, $242,822,000, to remain available until expended.

state and private forestry

for necessary expenses of cooperating with and providing technical and financial assistance to states, territories, possessions, and other agencies, and for forest health management, cooperation, education, and research, $30,000,000, to remain available until expended.

national forest system

for necessary expenses for the forest service, not otherwise provided for, for management, protection, improvement, and utilization of the national forest system, $1,324,491,000, to remain available until expended, including 50 percent of all moneys received during prior fiscal years as fees collected under the land and water conservation fund act of 1965, as amended, for the purposes of section 4 of the act (16 u.s.c. 460l–6a(i)): provided, that unobligated balances available at the start of fiscal year 2002 shall be displayed by extended budget level item in the fiscal year 2003 budget justification: provided further, that notwithstanding any other provision of law, the funds provided under this heading, $5,000,000 shall be made available to kake tribal corporation as an advanced direct lump sum payment to implement the kake tribal corporation land transfer act (public law 106–263).

wildland fire management

for necessary expenses for forest fire suppression activities on national forest land systems, for emergency fire suppression on or adjacent to such lands or other lands under fire protection agreement, and for emergency re-establishment of burned-over national forest systems lands and water, $1,115,394,000, to remain available until expended: provided, that such funds including unobligated balances under this heading, are available for repayment of advances from other appropriations accounts previously transferred for such purposes: provided further, that not less than 50 percent of any unobligated balances remaining (exclusive of amounts for the reasonable fuels reduction at the end of fiscal year 2001 shall be transferred, as repayment for past advances that have not been repaid, to the fund established pursuant to section 3 of public law 71–319 (16 u.s.c. 576 et seq.): provided further, that notwithstanding any other provision of law, $4,000,000 of funds appropriated under this appropriation shall be used for fire science research joint fire science program: provided further, that all authorities for the use of funds, including
the use of contracts, grants, and cooperative agreements contained in the Rangeland Research appropriation, are also available in the utilization of these funds for Fire Science Research: Provided further, That funds provided for shall be available for the expenses necessary to rehabilitate and restore, hazard reduction activities in the urban-wildland interface, support to federal emergency response, and wildfire suppression activities of the Forest Service: Provided further, That amounts under this heading may be transferred as specified in the report accompanying this Act to the State and Private Forestry account; (4) the Cooperative Forest Rangeland Research Act; and (5) the Capital Improvement and Maintenance accounts to fund state fire assistance, volunteer fire assistance, and forest health management, vegetation and watershed management, heritage site rehabilitation, wildlife and fish habitat management, trails and facilities maintenance and restoration: Provided further, That transfers of any amounts in excess of those specified shall require approval of the House and Senate Committees on Appropriations in compliance with reprogramming contained in this report. Provided further, That the costs of implementing any cooperative agreement between the Federal government and any non-Federal entity may be shared, and shall be approved by the affected parties: Provided further, That in entering into such grants or cooperative agreements, the Secretary may consider the enhancement of local and small business employment opportunities for rural communities, and that in entering into procurement contracts under this section on a best value basis, the Secretary may take into account the ability of an entity to enhance local and small business employment opportunities in rural communities, and that the Secretary may award procurement contracts under this section to entities that include local nonprofit entities, Youth Conservation Corps or related partnerships with State, local or nonprofit youth groups, or small or disadvantaged businesses: Provided further, That:

(1) In expending the funds provided with respect to this Act for hazardous fuels reduction, the Secretary of the Interior and the Secretary of Agriculture may conduct fuel reduction treatments on Federal lands using all contracting and hiring authorities available to the Secretary of the Interior, or the National Marine Fisheries Service of the Department of Commerce, for the costs of carrying out their responsibilities under the Emergency Forest Service Act of 1978 (16 U.S.C. 1570 et seq.) to consult and conference as required by section 7 of such Act in connection with wildfire fire management activities in fiscal years 2001 and 2002; and (B) Only those funds appropriated for fiscal years 2001 and 2002 to Forest Service (USDA) for wildfire fire management are available to the Secretary of Agriculture for such transfer or reimbursement.

(C) The amount of the transfer or reimbursement shall be as mutually agreed by the Secretary of Agriculture and the Secretary of the Interior or Secretary of Commerce, as applicable, or their designees. The amount shall in no case exceed the actual costs of consultation and conferencing in connection with wildfire fire management activities affecting National Forest System lands.

For necessary expenses to cover necessary expenses for emergency rehabilitation, wildfire suppression and other fire operations of the Forest Service, $165,000,000, to remain available until expended: Provided, That an additional $50,000,000 for emergency rehabilitation and wildfire suppression, and $65,000,000 is for other fire operations: Provided, That the entire amount appropriated in this paragraph by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, shall be available only to the extent an official budget request for a specific dollar amount, that includes designation of the entire amount of the request as an emergency requirement, is made in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, is transmitted by the President to the Congress.

For an additional amount to liquidate obligations previously incurred, $274,147,000.

CAPITAL IMPROVEMENT AND MAINTENANCE

For necessary expenses of the Forest Service, not otherwise provided for, $541,280,000, to remain available until expended for construction, reconstruction, maintenance and acquisition of buildings and other facilities, and for construction, reconstruction, repair and maintenance of Forest Service roads as authorized by 16 U.S.C. 532–538 and 23 U.S.C. 101 and 205, of which $61,000,000 is for conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act: Provided, That fiscal year 2001 balances in the Federal Infrastructure Improvement Fund account for the Forest Service shall be transferred to and merged with this appropriation and shall remain available until expended, Provided further, That the amount appropriated in this heading shall be available for the decommissioning of roads, including unauthorized roads not part of the transportation system, which are no longer needed: Provided further, That no funds shall be expended to decommission any system road until notice and an opportunity for public comment has been provided on each decommissioning project: Provided further, That the Forest Service shall transfer $300,000, appropriated in Public Law 106–291 within the Capital Improvement and Maintenance Appropriation: Provided further, That the State and Private Forestry appropriation, and shall provide these funds in an advance direct lump sum payment to Purdue University for planning and construction of a hardwood tree improvement and generation facility.

LAND ACQUISITION

For expenses necessary to carry out the provisions of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 660–4 through 11), including administrative expenses, and for acquisition of land or waters, or interest therein, for the purposes of such Act, to be derived from the Land and Water Conservation Fund, $128,877,000, to be derived from the Land and Water Conservation Fund, to remain available until expended, and for the conservation activities defined in section 259(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

ACQUISITION OF LANDS FOR NATIONAL FORESTS AND RANGELAND RESEARCH

For acquisition of lands within the exterior boundaries of the Cache, Uinta, and Wasatch National Forests, Utah; the Toiyabe National Forest, Nevada; and San Bernardino, Sequoia, and Cleveland National Forests, California, as authorized by law, $1,609,000, to be derived from forest receipts.

ACQUISITION OF LANDS TO COMPLETE LAND EXCHANGES

For acquisition of lands, such sums, to be derived from funds deposited by State, county, or municipal governments, public school districts, or urban Indian tribes under this Act, as amended (6 U.S.C. 844a), to remain available until expended.

RANGE BETTERMENT FUND

For necessary expenses of range rehabilitation, protection, and improvement, 30 percent of all moneys received during the prior fiscal year, as fees for grazing domestic livestock on lands in National Forests in the 16 Western States, pursuant to section 401(b)(1) of Public Law 94–579, as amended, to remain available until expended, of which not to exceed 6 percent shall be available for administrative expenses associated with on-the-ground range rehabilitation, protection, and improvements.

GIFTS, DONATIONS AND REQUESTS FOR FOREST AND RANGELAND RESEARCH

For expenses authorized by 16 U.S.C. 1642(b), $92,000, to remain available until expended, to be derived from the fund established pursuant to the above Act.

MANAGEMENT OF NATIONAL FOREST LANDS FOR SUBSISTENCE USE

For necessary expenses of the Forest Service to manage federal lands in Alaska for subsistence uses under title VIII of the Alaska National Interest Lands Conservation Act (Public Law 96–487), $5,480,000, to remain available until expended.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations to the Forest Service for the current fiscal year shall be available for: (1) purchase of not to exceed 132 passenger motor vehicles of which eight will be used primarily for law enforcement purposes and of which 130 shall be for replacement; acquisition of 215 passenger motor vehicles from excess sources, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed 50 for police work only, and acquisition of sufficient aircraft from excess sources to maintain the operable fleet at 195 aircraft for use in Forest Service wildland fire programs and other Forest Service programs: Provided that other provisions of law, existing aircraft being replaced may be sold, with proceeds derived or trade-in value used to offset the purchase price for replacement aircraft; (2) services pursuant to 7 U.S.C. 2225, and not to exceed $100,000 for employment under 5 U.S.C. 3109; (3) purchase, erection, and alteration of buildings and facilities improvement; (4) acquisition of land, water, and interests therein, including the Oscoda-Wurtsmith land exchange in Michigan, pursuant to 7 U.S.C. 428a; (5) the costs for the replacement of equipment.
CONGRESSIONAL RECORD—SENATE

July 11, 2001

12867

authorized by 5 U.S.C. 5901–5962; and (7) for debt collection contracts in accordance with 31 U.S.C. 3718(c).

None of the funds made available under this Act shall be obligated or expended to abolish any existing program, or close any regional office for the National Forest System Administration of the Forest Service, Department of Agriculture without the consent of the Senate Committee on Appropriations, or to transfer Federal funds to a non-Federal recipient.

Any appropriations or funds available to the Forest Service may be transferred to the Wildland Fire Management appropriation for forest fire suppression if the National Forest System lands or related to burned-over or damaged lands or waters under its jurisdiction, and fire preparedness due to severe burning conditions and only if all previously appropriated emergency contingency funds under the heading “Wildland Fire Management” have been released by the President and apportioned.

Funds appropriated to the Forest Service shall be available for assistance to or through the Agency for International Development and the Foreign Agricultural Service in connection with forest fire suppression in a development, technical assistance, and assistance in foreign countries, and shall be available to support forestry and related natural resource activities outside the United States, its territories and possessions, including technical assistance, education and training, and cooperation with United States and international organizations.

None of the funds made available to the Forest Service under this Act shall be subject to transfer under the provisions of section 702(b) of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 177) or 7 U.S.C. 147b unless the proposed transfer is approved in advance by the House and Senate Committees on Appropriations in compliance with the reprogramming procedures contained in House Report No. 105–163.

None of the funds available to the Forest Service may be reprogrammed without the advance approval of the House and Senate Committees on Appropriations in accordance with the procedures contained in House Report No. 105–163.

Funds appropriated to the Forest Service shall be transferred to the Working Capital Fund of the Department of Agriculture without the approval of the Chief of the Forest Service.

Funds appropriated to the Forest Service shall be available to conduct a program of not less than $2,000,000 for high priority projects within the scope of the approved budget which shall be carried out by the Youth Conservation Corps, defined in section 250(c)(4)(E)(xii) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

Of the funds available to the Forest Service, $2,500 is available to the Chief of the Forest Service for official reception and representation expenses.

Pursuant to sections 405(b) and 410(b) of Public Law 101–593, of the funds available to the Forest Service, up to $2,250,000 may be advanced for necessary expenses, that is expenses not directly related to specific programs or to the accomplishment of specific work on-the-ground, from any funds available to the Forest Service: Provided, That the Forest Service shall implement and adhere to the definitions of indirect expenditures established pursuant to Public Law 105–277 on a nationwide basis without flexibility for modification by any organizational level except the Washington Office, and when changed by the Washington Office, such changes in definition shall be reported in writing to be submitted by the Forest Service: Provided further, That the Forest Service shall provide in all future budget justifications, planned indirect expenditures in accordance with the definitions, summarized and displayed to the Regional, Station, Area, and detached unit office level. The justification shall display the estimated source and amount of indirect expenditures, by expanded budget line item, of funds in the Service’s annual budget justification. The display shall include appropriated funds and the Knudson–Van- dendyke–Brown Brush Disposal Project, Work–Other, and Salvage Sale funds. Changes between estimated and actual indirect expenditures shall be reported in subsequent budget justifications: Provided, That during fiscal year 2002 the Secretary shall limit total annual indirect obligations from the Brush Disposal, Knudson–Vandenberg, Reforestation, Salvage Sale, Work Roads and other funds to 20 percent of the total obligations from each fund. Obligations in excess of 20 percent which would otherwise be charged to the above funds may be charged to other funds appropriated to the Forest Service subject to notification of the Committees on Appropriations of the House and Senate.

Any appropriations or funds available to the Forest Service may be used for necessary expenses in the event of law enforcement emergencies as necessary to protect natural resources and public or employee safety: Provided, That such amounts shall not exceed $750,000.

The Secretary of Agriculture may authorize the sale of excess buildings, facilities, and other properties owned by the Forest Service and located on the Green Mountain National Forest, the revenues of which shall be retained by the Forest Service and disbursed by the Secretary without further appropriation and until expended for maintenance and rehabilitation activities on the Green Mountain National Forest.

DEPARTMENT OF ENERGY

Fossil Energy Research and Development (Including Transfers of Funds)

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 94–163), including the acquisition of interest, including defeasible and equitable interests in any real property or any facility or for plant or facility acquisitions, equipment, construction, land, leases, management reviews, land purchase negotiations and similar non-litigation related matters, $297,000,000., to remain available until expended: Provided further, That such funds may be used for assistance to private industry and for assistance to public agencies and institutions for precommercial development of fossil energy technologies and for activities to support the Congressionally authorized fossil energy research and development programs, to carry out the purposes of Public Law 88–379, to carry out the purpose of Public Law 89–699, to carry out the purpose of Public Law 90–448, and to carry out the purposes of Public Law 91–517, to provide for the support of fossil energy research and development activities the Congressionally authorized fossil energy research and development programs, to carry out the purposes of Public Law 88–379, to carry out the purpose of Public Law 89–699, to carry out the purpose of Public Law 90–448, and to provide for the support of fossil energy research and development activities.
CONGRESSIONAL RECORD—SENATE
July 11, 2001

12868

disposal of mineral substances without objection- al environmental consequences, as defined in section 300c-2 of Public Law 99–509 (15 U.S.C. 4907); Provided further, That notwithstanding section 300c(d)(2) of Public Law 99–509, such sums shall be allocated to eligible programs as follows: $123,000,000 for State demonstration assistance grants and $28,000,000 for State energy conservation grants.

ECONOMIC REGULATION
For necessary expenses in carrying out the activities of the Office of Hearings and Appeals, $1,996,000, to remain available until expended.

STRATEGIC PETROLEUM RESERVE
Appropriations under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

PROCLAMATIONS, DEPARTMENT OF ENERGY
Appropriations made under this Act, transfers of sums may be made to other agencies of the Department for the performance of work for which the appropriation is made. None of the funds made available under this Act shall be available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriations Act.

The Secretary is authorized to accept lands, buildings, equipment, and other contributions to the department for use in connection with the procedures or projects in cooperation with other agencies, Federal, State, private or foreign: Provided, That revenues and other moneys received by or in connection with the activities of the Strategic Petroleum Reserve and the Strategic Petroleum Reserve Laboratory may be used to support Department of Energy activities not included in this account.

ALTERNATIVE FUELS PRODUCTION (RESCISION)
Of the unobligated balances under this heading, $2,000,000 are rescinded.

NAVAL PETROLEUM AND OIL SHALE RESERVES
For expenses necessary to carry out naval petroleum and oil shale reserve activities, not to exceed $17,371,000, to remain available until expended:

ELK HILLS SCHOOL LANDS FUND
For necessary expenses in fulfilling installment payment requirements for the settlement entered into by the United States and the State of California on October 11, 1996, as authorized by section 3415 of Public Law 104–106, $38,000,000, to remain available until October 1, 2002 for payment to the State of California for the State Teachers' Retirement Fund from the Elk Hills School Lands Fund.

ENERGY CONSERVATION
For necessary expenses in carrying out energy conservation activities, $870,805,000, to remain available until expended: Provided, That $251,000,000 shall be for use in energy conservation programs as defined in section 300c-2 of Public Law 99–509 (15 U.S.C. 4907): Provided further, That notwithstanding section 300c(d)(2) of Public Law 99–509, such sums shall be allocated to eligible programs as follows: $123,000,000 for State demonstration assistance grants and $28,000,000 for State energy conservation grants.

For necessary expenses in carrying out the activities of the Office of Hearings and Appeals, $1,996,000, to remain available until expended.

For expenses necessary to carry out the Department of Energy shall make project selections no later than one hundred and twenty days following enactment of this Act, proposals shall be submitted no later than ninety days after the issuance of the request for proposals, and the Department of Energy shall project selections no later than one hundred and twenty days after receipt of proposals: Provided further, That funds shall be expended in accordance with the provisions governing the use of funds contained in the heading "Energy Conservation and Energy Efficiency Programs": Provided further, That the Department may include provisions for repayment of Government contributions to individual projects or an amount up to the Government contribution to the project on terms and conditions that are acceptable to the Department including repayments from sale and licensing of technology resulting from domestic and foreign transactions: Provided further, That such repayments shall be retained by the Department for future coal-related research, development and demonstration projects: Provided further, That any technology selected under this program shall be considered a Clean Coal Technology and any project selected under this program shall be considered a Clean Coal Technology Project, for the purposes of 42 U.S.C. §7651n, and Chapters 51, 52, and 60 of title 40 of the Code of Federal Regulations: Provided further, That revenues and other moneys received by or in connection with the activities of the Strategic Petroleum Reserve facility development and operations and program management activities pursuant to the Energy Policy and Conservation Act of 1975, as amended (42 U.S.C. 621 et seq.), $159,000,000, to remain available until expended, of which $8,000,000 shall be available for maintenance of a Northeast Home Heating Oil Reserve.

ENERGY INFORMATION ADMINISTRATION
For necessary expenses in carrying out the activities of the Energy Information Administration, $75,499,000, to remain available until expended.

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY
For necessary expenses in carrying out the activities of the Office of Hearings and Appeals, $1,996,000, to remain available until expended.

Indian Health Services
For expenses necessary to carry out the Act of August 5, 1954 (68 Stat. 674), the Indian Self-Determination Act, the Indian Health Care Improvement Act, and the Public Health Service Act with respect to the Indian Health Service, $2,388,614,000, together with payments received during the fiscal year pursuant to 42 U.S.C. 238b for services furnished by the Indian Health Service: Provided, That funds made available to tribes and tribal organizations through contracts, grant agreements, or any other agreements or compacts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 450), shall be deemed to be obligated at the time of the grant or contract award, and the amount made available to the tribe or tribal organization without fiscal year limitation: Provided further, That $15,000,000 shall remain available until expended for the Indian Health Astrophic Health Emergency Fund: Provided further, That $439,776,000 for contract medical care shall remain available for obligation until September 30, 2003: Provided further, That funds provided in this Act may be used for one-year contracts and grants which are to be performed in two fiscal years, so long as the total obligation is recorded in the year for which the funds are appropriated: Provided further, That the amounts collected by the Secretary of Health and Human Services under the authority of title IV of the Indian Health Care Improvement Act shall remain available until expended for the purpose of achieving compliance with the applicable conditions and requirements of title XIX of the Social Security Act (exclusive of planning, design, or construction of new facilities): Provided further, That funding contained herein, in any earlier appropriations Acts, to be used for scholarships programs under the Indian Health Care Improvement Act (25 U.S.C. 1613) shall remain available for obligation until September 30, 2003: Provided further, That funds received by tribes and tribal organizations under title IV of the Indian Health Care Improvement Act shall be reported and accounted for and available to the receiving tribes and tribal organizations until expended: Provided further, That notwithstanding any other provision of law, of the amounts provided herein, not to exceed $288,234,000 shall be for payments to tribes and tribal organizations for contract or grant support costs associated with contracts, grants, self-governance compacts or annual funding agreements between the Bureau of Indian Affairs and a tribe or tribal organization pursuant to the Indian Self-Determination Act of 1975, as amended, prior to, or during fiscal year 2002, of funds made available to tribes and tribal organizations for such costs associated with the Navajo Nation’s new and expanded contracts, grants, self-governance compacts or annual funding agreements: Provided further, That funds provided in this Act may be used, as needed, to carry out activities typically funded under the Indian Health Facilities accounts.

Indian Health Facilities
For construction, repair, maintenance, improvement, and equipment of health and related
auxiliary facilities, including quarters for personnel, to provide an appropriate facility: Provided further, that from the funds appropriated herein, $5,000,000 shall be designated by the Indian Health Service as a contribution to the Yukon-Kuskokwim Health Corporation (YKHC) to continue a priority project for the acquisition of land, planning, design and construction of 79 staff quarters at Bethel, Alaska, pursuant to the negotiated project agreement between the YKHC and the Indian Health Service: Provided further, That this project shall not be subject to the construction provisions of the Indian Self-Determination and Education Assistance Act (42 U.S.C. 2004a), the Indian Sanitation Facilities Act) and Public Law 86–121 (the Indian Sanitation Facilities Act) and Public Law 86–121 (the Indian Sanitation Facilities Act) and Public Law 86–121 (the Indian Sanitation Facilities Act) and Public Law 86–121 (the Indian Sanitation Facilities Act) and Public Law 86–121 (the Indian Sanitation Facilities Act). Reimbursable goods and services, or technical assistance. The appropriation structure for the Indian Health Service may not be altered without advance approval of the House and Senate Committees on Appropriations.

NOTES

For necessary expenses of the Office of Navajo and Hopi Indian Relocation as authorized by Public Law 93–319, $15,148,000, to remain available until expended: Provided, That funds provided under this Act are to be used to relocate eligible individuals and groups including evictees from District 6, Hopi-partitioned lands residents, those in siphon housing, and all others certified as eligible and not included in the preceding categories: Provided further, That none of the funds contained in this or any other Act may be used by the Office of Navajo and Hopi Indian Relocation to evict any single Navajo or Navajo family who, as of November 30, 1985, was physically domiciled on the lands partitioned to the Hopi Tribe unless a new or replacement home is provided for such household: Provided further, That no relocatee will be provided with more than one new or replacement home: Provided further, That the Office shall relocate any certified eligible relocatees who have selected and received an approved homesite on the Navajo reservation or selected a replacement residence on the Yuma Reservation: Provided further, That the land acquired pursuant to 25 U.S.C. 640d–10, INSTITUTE OF AMERICAN INDIAN AND ALASKA NATIVE CULTURE AND ARTS DEVELOPMENT

For payment to the Institute of American Indian and Alaska Native Culture and Arts Development, as authorized by title XV of Public Law 99–458, as amended (20 U.S.C. 56 part A), $4,540,000.

SMITHSONIAN INSTITUTION

SALARIES AND EXPENSES

For necessary expenses of the Smithsonian Institution, as authorized by law, including research in the fields of art, science, and history; development, preservation, and documentation of the National Collections; presentation of public exhibits and performances; publication, dissemination, and exchange of information; publication and conduct of education, training, and museum assistance programs; maintenance, alteration, operation, lease (for terms not to exceed 30 years), and protection of buildings, facilities, and approaches; not to exceed $100,000 for services as authorized by 5 U.S.C. 3109; up to five replacement passenger vehicles; purchase, rental, repair, and cleaning of vehicles; $9,345,000, to remain available until expended: Provided, That funds made available in this Act to the Indian Health Service to provide goods and services to those entities, on a reimbursable basis, including payment in advance with subsequent adjustment, and the reimbursements received therefrom, along with the funds received therefrom, shall be deemed to be funds provided by the Indian Self-Determination Act, may be credited to the same or subsequent appropriation account with which the funds are included, and not to remain available until expended. Reimbursements for training, technical assistance, or services provided by the Indian Health Service will continue, included in the appropriation structure set forth in this Act. With respect to functions transferred by the Indian Health Service to tribes or tribal organizations, the reorganization of the Indian Health Service is authorized to provide goods and services to those entities, if the Indian Health Service is not reimbursed for such services. Provided, That from the funds provided under this Act, the Indian Health Service is authorized to provide goods and services to those entities.
available until expended, and including such funds as are necessary to support American overseas research centers and a total of $125,000 for the Council of American Overseas Research Centers: Provided, That funds appropriated herein are available for advance payments to independent contractors for performance of research services or participating in official Smithsonian presentations: Provided further, That the Smithsonian Institution may expend Federal appropriations designated in this Act for lease or rent payments for long term and swing space, as rent payable to the Smithsonian Institution, and such amounts may be deposited in the general trust funds of the Institution to the extent that federally supported activities are housed in the 900 H Street, N.W. building in the District of Columbia: Provided further, That this use of Federal appropriations shall not be construed as debt service, a Federal guarantee of, a transfer of risk to, or an obligation of, the Federal Government: Provided further, That no appropriated funds may be used to service debt which is incurred to finance the costs of acquiring the 900 H Street building or of planning, designing, and constructing improvements to such building.

REPAIR, RESTORATION AND ALTERATION OF FACILITIES

For necessary expenses for repair, alteration, and restoration of buildings, branches, and facilities owned or occupied by the Smithsonian Institution, or by contract or otherwise, as authorized by section 2 of the Act of August 22, 1949 (63 Stat. 623), including not to exceed $200,000 for services as authorized by 5 U.S.C. 3109, $67,900,000, to remain available until expended, of which $10,000,000 is provided for maintenance, repair, rehabilitation, and alteration of facilities at the National Zoological Park: Provided, That contracts awarded for environmental systems, protection systems, and exterior repair or renovation of buildings of the National Gallery of Art may be negotiated with selected contractors and awarded on the basis of contractor qualifications as well as price.

CONSTRUCTION

For necessary expenses for construction, $25,000,000, to remain available until expended.

ADMINISTRATIVE PROVISIONS, SMITHSONIAN INSTITUTION

None of the funds in this or any other Act may be used to initiate the design for any proposed expansion of current space or new facility without consultation with the House and Senate Appropriations Committees.

None of the funds in this or any other Act may be used for the Holt House located at the National Zoological Park in Washington, D.C., unless identified as repairs to minimize water damage, monitor structure movement, or provide interim structural support.

None of the funds in this or any other Act may be used to make any changes to the existing Smithsonian science programs, including closure of facilities, relocation of staff or redirection of functions and programs, without approval by the Board of Regents and recommendations received from the Science Commission.

None of the funds available to the Smithsonian may be reprogrammed without the advance written approval of the House and Senate Committees on Appropriations in accordance with the procedures contained in House Report No. 105-163.

NATIONAL GALLERY OF ART

SALARIES AND EXPENSES

For the upkeep and operations of the National Gallery of Art, the protection and care of the works of art therein, and administrative expenses, as authorized by the Act of March 24, 1937 (50 Stat. 51), as amended by the public resolution of April 13, 1939 (Public Resolution 9, Seventy-sixth Congress), including necessary expenses for the construction of the Gallery for membership in library, museum, and art associations or societies whose publications or services are available to members only, or to public at a price lower than to the general public: purchase, repair, and cleaning of uniforms for guards, and uniforms, or allowances therefor, for selected employees as authorized by law (5 U.S.C. 590-590d); purchase or rental of devices and services for protecting buildings and contents thereof, and maintenance, operation, repair, or renovation of buildings, approaches, and grounds; and purchase of services for restoration and repair of works of art for the National Gallery of Art by contracts made, without advertising, with individuals, firms, or organizations at such rates or prices and under such terms and conditions as the Gallery may deem proper, $68,967,000, of which not to exceed $3,026,000 for the special exhibition program shall remain available until expended.

REPAIR, RESTORATION AND RENOVATION OF BUILDINGS

For necessary expenses for repair, restoration and renovation of buildings, grounds and facilities occupied or owned by the National Gallery of Art, by contract or otherwise, as authorized by 5 U.S.C. 3109, to remain available until expended: Provided, That contracts awarded for environmental systems, protection systems, and exterior repair or renovation of buildings of the National Gallery of Art may be awarded to selected contractors and awarded on the basis of contractor qualifications as well as price.

J ohn F. Kennedy Center for the Performing Arts

OPERATIONS AND MAINTENANCE

For necessary expenses for the operation, maintenance and security of the John F. Kennedy Center for the Performing Arts, $15,000,000.

CONSTRUCTION

For necessary expenses for capital repair and restoration of the existing features of the building and site of the John F. Kennedy Center for the Performing Arts, $19,000,000, to remain available until expended.

Woodrow Wilson International Center for Scholars

SALARIES AND EXPENSES

For expenses necessary in carrying out the provisions of the Woodrow Wilson Memorial Act of 1969, including hire of passenger vehicles and services as authorized by 5 U.S.C. 3109, $7,796,000.

National Foundation on the Arts and Humanities

NATIONAL ENDOWMENT FOR THE ARTS

GRANTS AND ADMINISTRATION

For necessary expenses to carry out the National Foundation on the Arts and Humanities Act of 1965, as amended, $68,234,000 shall be available to the National Endowment for the Arts for the support of projects and productions in the arts through assistance to organizations and individuals pursuant to sections 6(c) and 5(g) of the Act, for program support, and for administering the functions of the Act, to remain available until expended.

NATIONAL ENDOWMENT FOR THE HUMANITIES

GRANTS AND ADMINISTRATION

For necessary expenses to carry out the National Endowment for the Humanities Act of 1965, as amended, $109,882,000 shall be available to the National Endowment for the Humanities for support of activities in the humanities for the purposes of section 7(h): Provided, That this appropriation shall be available for obligation only in such amounts as may be equal to the total amounts of gifts, bequests, devises of money, and other property accepted by the chairman or by grantees of the Endowment under the provisions of section 11(a)(2)(B) and 11(a)(3)(B) during the current and preceding fiscal years for which equal amounts have not previously been appropriated.

Institute of Museum and Library Services

GRANTS AND ADMINISTRATION

For carrying out subtitle C of the Museum and Library Services Act of 1996, as amended, $26,899,000, to remain available until expended.

Challenge America Art Fund

For necessary expenses as authorized by Public Law 89–209, as amended, $17,000,000 for support for arts education and public outreach activities to be administered by the National Endowment for the Arts, to remain available until expended.

Administrative Provisions

None of the funds appropriated to the National Foundation on the Arts and Humanities may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1913. Provided, That none of the funds appropriated to the National Foundation on the Arts and Humanities may be used for official reception and representation expenses: Provided further, That funds from nonappropriated sources may be used as necessary for official reception and representation expenses.

Commission of Fine Arts

SALARIES AND EXPENSES

For necessary expenses of the Commission of Fine Arts, as authorized by Public Law 89–209, (20 U.S.C. 956(a)), as amended, $7,000,000.

Advisory Council on Historic Preservation

SALARIES AND EXPENSES

For necessary expenses of the Advisory Council on Historic Preservation, as authorized by Public Law 89–665 (40 U.S.C. 164), $1,174,000: Provided, That the Commission is authorized to charge fees to cover the full costs of its publications, and such fees shall be credited to this account and offsetting collection, to remain available until expended without further appropriation.

National Capital Arts and Cultural Affairs Advisory Commission

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Endowment for the Arts Act of 1965, as amended, $3,130,000: Provided, That none of these funds shall be available for compensation of level V of the Executive Schedule or higher positions.

National Capital Planning Commission

SALARIES AND EXPENSES

For necessary expenses, as authorized by the National Capital Planning Commission Act of 1982 (40 U.S.C. 71-71i), including services as authorized by 5 U.S.C. 3109, $7,253,000: Provided, That all appointed members of the Commission will be compensated at a rate of $200 per day, or the daily equivalent of the annual rate of pay for positions at level IV of the Executive Schedule for each day such member is engaged in the actual performance of duties.

United States Holocaust Memorial Museum

For expenses of the Holocaust Memorial Museum, as authorized by Public Law 106–292 (36

MATCHING GRANTS

To carry out the provisions of section 10(g)(2) of the National Foundation on the Arts and the Humanities Act of 1965, as amended, $15,622,000, to remain available until expended, of which $11,622,000 shall be available to the National Endowment for the Humanities for the purposes of section 7(h): Provided, That this appropriation shall be available for obligation only in such amounts as may be equal to the total amounts of gifts, bequests, devises of money, and other property accepted by the chairman or by grantees of the Endowment under the provisions of section 11(a)(2)(B) and 11(a)(3)(B) during the current and preceding fiscal years for which equal amounts have not previously been appropriated.
(a) EXCEPTIONS.—The provisions of subsection (b) shall not apply to any program, budget activity, subactivity, or project funded by such Acts, as the case may be, that have been affected by reduced timber harvests from trees classified as giant sequoia (Sequoiadendron giganteum) which are located within areas in which timber-dependent areas in the States of Washington, Oregon, and California, and pay the third-party contractor in accordance with the standard procedures employed by the Bureau of Land Management in the retention of third-party contractors.

SEC. 311. Notwithstanding any other provision of law, the Secretary of the Interior shall provide an annual application for the purposes of this section of the National Endowment for the Arts—

(a) The Chairperson shall only award a grant for the purposes specified in this section to the extent that priority is given to providing services or awarding financial assistance for projects, productions, workshops, or programs that serve underserved populations.

(b) The term ‘‘underserved population’’ means a population of individuals, except as otherwise provided by law.

SEC. 312. All of the funds made available in this Act for any program, subprogram, or project funded by such Acts shall be available for any purpose to carry out the purposes of such Act, except that such funds shall be obligated or expended as follows:

(1) the Chairperson shall only award a grant to any individual or a State, or any institution of higher education, that has been affected by reduced timber harvests from trees classified as giant sequoia (Sequoiadendron giganteum) which are located within areas in which timber-dependent areas in the States of Washington, Oregon, and California.

(2) The Chairperson may make grants for the purposes specified in this section to the extent that priority is given to providing services or awarding financial assistance for projects, productions, workshops, or programs that serve underserved populations.

SEC. 313. In providing services or awarding financial assistance for projects, productions, workshops, or programs that serve underserved populations, the Chairperson shall consider the benefits to the local economy in the areas in which the funding is provided, including the employment of local residents and the retention of jobs in the local economy.

SEC. 314. In providing services or awarding financial assistance for projects, productions, workshops, or programs that serve underserved populations, the Chairperson shall consider the benefits to the local economy in the areas in which the funding is provided, including the employment of local residents and the retention of jobs in the local economy.
In such cases, the agency may use the Reacre- 
osystem to provide for additional operations until a subsequent operator can be 
found through the offering of a new prospectus.

SEC. 327. The authority to enter into steward- 
ship and end result contracts provided to the Forest Service in accordance with section 347 of 
title III of section 101(e) of division A of Public 
Law 105–277 is hereby expanded to authorize the 
Forest Service to enter into an additional 28 
contracts subject to the same terms and condi- 
tions as provided in that section: Provided, That 
of the additional contracts authorized by this 
section, at least 18 shall be allocated to Region 1 
and at least 3 to Region 6.

SEC. 328. Any regulations or policies promul- 
gated or adopted by the Departments of Agri- 
culture or the Interior regarding recovery of 
costs for processing authorizations to occupy 
and use Federal lands under their control shall 
adhore to and incorporate the following prin- 
ciples arising from Office of Management and 
Budget Circular, A–25; no charge should be 
made for a service when the identification of 
the specific beneficiary is obscure, and the service 
costs are considered primarily as benefiting broad- 
ly the general public.

SEC. 329. Notwithstanding any other provision 
of law, for fiscal year 2002, the Secretary of Ag- 
culture, acting through the Chief of the Forest 
Service shall:

(1) extend the special use permit for the Sioux 
Culture or the Interior regarding recovery of 
gated or adopted by the Departments of Agri- 
culture or the Interior regarding recovery of 
gated or adopted by the Departments of Agri- 
culture or the Interior regarding recovery of 
gated or adopted by the Departments of Agri- 
culture or the Interior regarding recovery of 
gated or adopted by the Departments of Agri-

...
Mr. REID. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent the order for the quorum to be terminated.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I am very honored to join with my colleagues, the distinguished Senator from Montana, Mr. BURNS, in bringing before the Senate H.R. 2217, the Interior and related agencies bill for fiscal year 2002, as amended, by the Senate Appropriations Committee.

This is the first of the 13 annual appropriations measures to be considered by the Senate this year. In my opinion, this is a well-crafted bill. It balances both the needs of the American people and the resources available to the committee. We have only so much money available and we're not going to spend what we ain't got.”

That being the situation then, I urge my colleagues to adopt this bill in a timely fashion so we can proceed to conference with the House of Representatives. We have gotten a late start to this year and we have to work hard and long to catch up. Darkness may have fallen, from time to time, before we catch up on these appropriations bills.

H.R. 2217 provides more than $1.2 billion in much-needed funding to attack the deferred maintenance problems at our national parks, our national wildlife refuges, our national forests, and other federal recreational facilities across the nation. The bill would provide $1480 million to the National Park Service, $108 million to the Fish and Wildlife Service, $78 million to the Bureau of Land Management, and $541 million to the Forest Service for literally hundreds, hundreds and hundreds of important maintenance projects.

In addition, the bill restores $35 million in abandoned mine clean-up funds that were unwisely proposed to be cut by the administration. We are not going down that road, Mr. President. It restores nearly $80 million in proposed cuts to the budget of the U.S. Geological Survey, a matter of great importance to many of our colleagues. The bill fully funds the construction needs of the next six schools on the priority list of the Bureau of Indian Affairs, while increasing funding for the Indian Health Service. It increases funding for important energy research programs overseen by Department of Energy, another issue of particular importance to those from the West. Finally, this bill provides nearly $895 million in funding for various cultural agencies: agencies such as the Smithsonian Institution, the National Gallery of Art, the Kennedy Center for the Performing Arts, the National Endowment for the Arts, the National Endowment for the Humanities, and the Office of Museum Services.

I am proud of the fact that the committee has kept its previous commitment and has fully funded the Conservation Spending Category established in title VIII of last year’s Interior appropriations bill. Included in that amount is $406 million for federal land acquisition; $221 million for State and other conservation programs such as endangered species programs and wetland conservation programs; $137 million for historic preservation programs; an additional $50 million for the Payment-In-Lieu-of-Taxes program; and $180 million for Federal infrastructure improvements.

This is a well-balanced bill, given the demands placed on the committee as a result of 1,799 Member requests versus the resources available to it. Despite that, I know there are Members who are passionate about some of the programs funded in this bill, and they would like to increase funding in one area or another. I appreciate that. I respect the right of every Member to come to the floor and offer such an amendment. But let me unfurl the warning flag. As reported by the Appropriations Committee, this bill is fully consistent with the 302(b) allocation provided to the Interior Subcommittee.

In short, in plain, simple, mountain language, that means there is no extra money on the table waiting to be spent—none, no extra money waiting on the table, waiting to be spent.

Friends, Romans, countrymen, lend me your ears: There is no extra money on the table. Any amendment proposing to increase spending in one area of the bill will have to be offset with a cut in some other area. Any Senator who wishes to add money may have to show that a great stillness fell over the chamber upon my saying that. I have heard rumors that some Senators are concerned that we are working too late, too long, too hard.

It is mortifying to hear such rumors. I can remember when for Easter Sunday we were out on Friday and came back here on Monday. We didn’t use to have so-called “breaks.” We were also in session Monday through Fridays, and sometimes we were in on Saturdays.

God made the universe—all of creation, the beasts of the fields, the fowl of the air, fruits and herb yielding seed—and he made men, not in 3 days. He didn’t have a 3-day work week.

We have gotten used to 3-day work-weeks here; come in late on Tuesday, vote late on Tuesday, vote late on Wednesday, vote Thursday, and be out Friday, out Saturday, and out Sunday. God said keep the Sabbath day holy. But that is not why the Senate lets out on Sunday.

Let us not be stunned if we are asked to work a little later or a little longer. I would be happy to start voting on Monday and vote late on Friday. I would just as soon be here as to be at home on Saturday mopping the floor. Let some of these Senators learn how to mop the floor for their wives. Then they, too, will probably be married 64 years, as I have been. Mop the floor, keep the wrists and the fingers strong. There is no arthritis in my fingers. They tremble, but the bones are strong. The wrists are strong. You would be surprised how many men I can wrestle to their knees with these strong wrists. These strong wrists come from mopping the floors. Yes. I mop. I do the dishes. I dust. It is good for me. It keeps me humble. I even clean the commodes around my house. Things have changed in this country. It used to be that we all worked the inside of the house and went outside to the toilet. But anymore we eat on the outside of the House and go inside to the toilet.

A Senator? Surely, a Senator wouldn’t be concerned about working a little longer or a little later. We have become spoiled. It is all right for Senator REID and me to become spoiled on Fathers’ Day. But to say that we don’t want to vote on Mondays, and we don’t want to vote on Tuesdays until after the conference—we didn’t even have weekly conferences here when I was majority whip. We Democrats didn’t have conferences every Tuesday. We didn’t need them.

When I ran for the office of United States Senator for the eighth consecutive 6-year term, I didn’t say just sign me up for 3 days a week. I didn’t say that some Senators think we are working too hard in the Senate. Let the record show that a great stillness fell over the chamber upon my saying that. I have
too long, too late, too many days a week. I hope the majority leader will keep us in late tonight. I hope he will keep us in late tomorrow night, if we don't finish this bill. I hope he will say we will be in Friday, and with votes, if we don't finish this bill today. And if we aren't finished by Saturday, I hope the leader will say: Let's go at it, boys. We will be in Saturday.

But if there is a Senator who is complaining about working too hard, Mr. Majority Whip, tell them where my office is. While we are on this bill, I am for working. I want to get this bill finished. We have 12 more appropriations bills behind this bill.

I urge my colleagues to come to the floor today to offer any amendment they may have and to allow us to conclude debate on this measure no later than this bill. There can be w.a. Larry Byrd and my little dog, Billy Byrd. The bill and report have been available for more than a week, and Senator Burns and I are here ready and willing to work with our colleagues.

Mr. President, at this time, my colleague, Mr. Burns, for his steady hand and for the leadership he has demonstrated in the markup, in the hearings on the bill, and for his splendid cooperation, for his always charitable attitude toward other Senators, and for his fairness. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Mr. President, I thank my good friend and colleague from West Virginia, the chairman of the Interior Appropriations Subcommittee. I am recommending that this body pass the Interior appropriations bill for fiscal year 2002.

I join my colleague in what he said in relation to folks who would complain about working too much. I come from an agricultural background. I was raised on a small farm in northwest Missouri. My dad always had a little saying: When you look like a mule, you're not to work like one. So I guess I have hired on for the duration.

We will get this bill completed. I was lucky enough to hold the chairmanship of this Interior Subcommittee earlier this year, and I made it a priority to move this bill forward in a non-controversial and bipartisan way. I was extremely pleased to learn, when the Senator from West Virginia took control of the gavel, that he also shared this vision. He and his staff have been extremely gracious in dealing with all the requests before the subcommittee.

The bill up for consideration is a delicate balance of meeting our Nation's needs while remaining fiscally responsible.

Not everyone will be happy with every portion of this bill—it has never happened with this particular piece of legislation since I have been in the Senate for the last 12 years—but I can guarantee you, the bill is extremely fair. We had to make some tough choices, but I believe those who have worked with us to put this bill together will agree that the chairman has done an exemplary job in dealing with the resources we had available to us in the subcommittee.

The bill before us provides over $18.5 billion in budget authority. This number is $343 million above the President's request; however, it is over $470 million less than has been requested by the House of Representatives and almost $230 million below last year's appropriations for the same activities.

The unprecedented and unsustainable increases of previous years have been checked, but we have still upheld our commitments as stewards to our public lands. If time will allow, I would like to highlight some of the accomplishments in this bill.

The Bureau of Land Management receives a substantial increase in funding to help address our Nation's energy needs while balancing these needs with the ongoing maintenance necessary to keep our public lands healthy.

Initiatives of which I am especially proud include an increase in excess of $15 million over last year's level for energy and minerals management to help address the current backlog in energy-related permitting, an increase above the budget request for noise research, control, and outreach, and the highest funding level ever for the payments in lieu of taxes account.

Let me tell you, I am especially thankful to our chairman. Noxious weeds is not a great—for the lack of another word—"sexy" issue. When you start talking about things around Washington, DC, folks do not think a lot about weeds, but they are something that we deal with across this Nation. On one hand our payments in lieu of taxes, which means in the areas of counties that have a big preponderance of BLM land, they are paid, as if taxes will be collected on that land, by the Government. In other words, if the Federal Government has made the choice they want to own that land, then they have to pay taxes like everybody else—county taxes—that go to support schools, public services, roads, and other demands of local government.

Our commitment to the Nation's wild spaces is continued in the U.S. Fish and Wildlife Service budget, which has received a $52 million increase over last year's level. This helps us to address habitat needs while working with private landowners through brand new initiatives such as the Landowner Incentive Program. These new initiatives will allow us to focus on a new era of working across land-ownership lines to do what is best to help the species and their needs.

The National Park Service remains one of my top priorities. After all, I have two of the really crown jewels of the National Park System in my State: Yellowstone Park, of which part is in the State of our friends to the south, in Wyoming, and Glacier National Park. It receives an increase of almost $161 million above a year ago. This funding helps address our crumbling infrastructure in our most treasured public areas while increasing our assistance to States to protect the areas that are high on their priority lists.

I am also pleased the bill provides $11 million for grants to preserve Civil War battlefields.

Also, within the Bureau of Indian Affairs, no other priority is higher on my list than the education of our Native American children. We have been able to continue our aggressive attack on the construction backlog of schools in Indian country by providing funds to replace the next six schools on the Bureau of Indian Affairs' replacement list. Again, the chairman has done an admirable job in attempting to meet my request for the increase in the operating funds available to tribally controlled community colleges. It remains one of my top priorities, and I hope to work with the chairman to increase the funding level even further in future years.

We have seen great strides made, especially in the 2-year colleges on our reservations. In fact, the gentleman who operates one of the tribal colleges in our State is probably one of the best educators I have ever known, and the impact he has had on his people on that reservation has been tremendous. Additionally, I am pleased that we have been able to match the President's request for trust reform and management issues. And there are many.

The Forest Service's largest initiative in recent years is the new Interagency Fire Plan, and I am pleased to report that we have been able to fund the efforts of the Bureau of Land Management and the Forest Service to address the dangerous build-up of fuel in our national forests and adjacent lands.

Fire operations will continue to drain hundreds of millions of dollars again this year as we enter another historic fire year, but the investment in hazardous fuel reductions will pay off tenfold in future years.

Last year was a devastating fire year in the West. We are still experiencing drought in those areas. We can expect fires again this year.

Unfortunately, the Department of Energy received massive proposed cuts in this year's budget request. However, I believe the chairman has restored these accounts in a very responsible manner. Working with the rest of the committee and me, he has focused the energy accounts toward technologies that will increase efficiency and the cleanliness of our aging power infrastructure, while addressing the negative impacts of power generation.
We have started a new clean fuels initiative and increased our research in methods to control and capture greenhouse emissions. The conservation accounts under the Department of Energy also receive substantial increases over last year, including an addition of over $60 million from last year's weatherization assistance, and large increases to make our buildings and transportation methods more efficient.

Finally, the conservation spending category created in last year's final appropriations negotiations has been retained, and the compromise of last year has been upheld both in the spirit and in the execution. The bill contains $1.32 billion for the conservation spending category, continuing our focus on protecting our wild areas while taking care of our publicly owned facilities.

Clearly, a bill of this magnitude is difficult to craft, especially considering the volume of requests that we field in this subcommittee every year and those with which we have to deal. I thank the chairman for his willingness to address the requests of all Members to the best of his ability. I urge our colleagues to recognize his generosity and take a hard look at the bottom line prior to attempting to amend this bill.

I also ask our colleagues to respect our collective request that legislative riders be avoided so we can get this bill to the President as soon as possible.

Mr. CONRAD. Mr. President, I am pleased to rise today in support of H.R. 2217, the Interior and Related Agencies Appropriations Act for Fiscal Year 2002.

The Senate provides $18.5 billion in nonemergency discretionary budget authority including an advance appropriation into 2003 of $86 million, which will result in new outlays in 2002 of $11.5 billion. When outlays from prior-year budget authority are taken into account, discretionary outlays for the Senate bill total $17.6 billion in 2002. Of that total, $1.32 billion in budget authority and $1.03 billion in outlays falls under the new cap for conservation spending. The remaining amount counts against the general purpose cap for discretionary spending. The Senate bill is within its Section 302(b) allocations for both general purpose and conservation spending.

In addition, the Senate bill provides new emergency spending authority of $355 million for wildland fire management, which will result in outlays of $167 million. In accordance with standard budget practice, the budget committee will adjust the appropriations committee's allocation for emergency spending at the end of conference.

I commend Chairman Byrd and Senator Stevens for their bipartisan effort in moving this and other appropriations bills quickly, in order to meet our responsibilities to maintain an effective federal government. Their bill limits the use of the contentious legislative riders that have hampered its predecessor, and provides vital funding to manage our nation's natural resources, to support better and more efficient use of our energy supplies, and to meet our commitments to Native American tribes.

I urge the adoption of the bill.

Mr. President, I ask for unanimous consent that a table displaying the budget committee scoring of this bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 2217, INTERIOR AND RELATED AGENCIES, 2002

<table>
<thead>
<tr>
<th>General purpose</th>
<th>Conservation</th>
<th>Mandatory</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Senate-reported bill.</td>

</table>

House-passed:

| Budget Authority | 17,151 | 1,026 | 59 | 18,236 |
| Outlays | 16,626 | 1,026 | 59 | 17,721 |

President's request:

| Budget Authority | 17,621 | 1,025 | 77 | 18,323 |
| Outlays | 17,726 | 1,025 | 77 | 18,426 |

Notes: Details may not add to totals due to rounding. Totals adjusted for inclusion of emergency funding ($125 million in budget authority and $147 million in outlays) and inclusion of 2002 advance appropriation of $186 million (budget authority and outlays). The Senate Budget Committee increases the Senate's 302(c) allocation for emergencies when a bill is reported out of conference.

Prepared by SBC Majority Staff, 7–10–01.

Mr. CONRAD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, will the Senator from West Virginia yield for a comment?

Mr. BYRD. Yes.

Mr. REID. Mr. President, around here it is easy for us to forget people. I want the record to reflect what a good job Slade Gorton did on this bill during the time he was chairman of this subcommittee. Slade is not in the Senate anymore. The record should be spread with the fact that he did an outstanding job when he was chairman of the subcommittee.

He was always willing to listen to us. He held meetings and was very inclusive. I don't want to dwell on it other than to say that I have not forgotten Slade Gorton and the good work he did on this bill. I am confident that his successor, the Senator from Montana, will do just as well. I have known Senator I learned a lot from Senator Gorton from the way he handled things. I hope we will all remember Slade Gorton for his dedication to the Senate and the good work he did.

Mr. BYRD. Mr. President, I join the distinguished Democratic whip in recalling Slade Gorton. Slade Gorton was an outstanding chairman of this subcommittee. On many occasions, I lauded Slade Gorton's chairmanship. He was eminently fair, preeminently knowledgeable of the bill. In conferences, he knew everything that a Senator ought to know about the projects and the items at issue between the two Houses. I have never seen a more cut and dry explanation than the one he made at the conference.

Along this line, let me say that on yesterday, and the day before, we worked hard to complete the supplemental appropriations bill. Senator Stevens is the former chairman of the Appropriations Committee in the Senate, about whom I have no hesitancy in saying, he was the best chairman of the Appropriations Committee that I have seen in my 43 years in the Senate, including Robert Byrd. I have no hesitancy, not a bit, in lauding a Republican. I have no hesitancy in saying, "He is a better man than I am."

I have seen some great chairmen of this committee, the Appropriations Committee. Senator Byrd, to me, was the finest Senator, the best Senator with whom I have ever served in my 43 years in the Senate. He was chairman of the Appropriations Committee at one time. There have been other great Senators, such as Senator Stennis of Mississippi. He was always courteous, always the gentleman. Then there was Senator Mark Hatfield.

But times have changed and chairmen have to change in accordance with the times and the circumstances. So in our time, in our day, Ted Stevens is the best. I don't mind thinking I might have been second. But I won't dare say that. It is a bit like Publius Cornelius Scipio Africanus Major, who defeated Hannibal in the Battle of Zama in 202 B.C. He met Hannibal at Ephesus, and they walked together upon one occasion and he asked Hannibal, "Who was the greatest general?" Hannibal thought for a moment, and then he said, "Pyrrhus the Greek from Epirus was the greatest. The second was Alexander. The third was I, Hannibal." Whereupon, Scipio Africanus Major asked, "Where would you have placed yourself if I had not defeated you at
congressional record—senate

july 11, 2001

zama?" hannibal thought for a moment, and then said, "i would have been first.

i did have the good fortune to chair this committee for 6 years. but ted stevens i salute. he is a republican, yes, but a great one, a fine gentleman, a gentleman always, somebody who keeps his word. and he doesn't put politics at the apex of all things that matter. well, with his assistance and his leadership, on yesterday we passed the supplemental appropriations bill. the president requested $6.5 billion and that bill did not exceed that request one thin dime.

the senators' amendments were offset. the amendments that senators offered and were considered, if they were adopted, if they had to do with money, were offset. senators had offsets—meaningful offsets, not "waste, fraud and abuse." there is no doubt but that there is some waste, fraud, and abuse in the budget in every department, i would say, in this government. but we don't offset with false offsets. we had everything appropriately offset.

there wasn't a single amendment designated as an "emergency" in this senate. the president had complained about the use of "emergencies." mr. stevens and i believe there is a time and place for emergencies, yes, but there is no question but that the designation of "emergency" has been overdone in both houses. and in the supplemental appropriations bill that passed the house, there are $473 million in emergencies. not $1 in the bill that passed the senate was designated as an emergency.

where is the president going to stand on this when the bill goes to conference? i hope he will let us know. what is his position going to be with regard to the amendments that were in the republican-controlled house bill? the first question that was ever asked in the history of the human race was, when god entered the garden of eden in the shadow of the evening, in the cool of the day, and he started looking for adam. adam had hidden himself, and god said: "adam, where art thou?" that was the first question ever asked in the history of mankind. "adam, where art thou?"

so if, indeed, in my small way as a direct descendent of adam, let me ask the question of the president: mr. president, where art thou in regard to the emergencies that were in the republican-controlled house bill? the first question that was ever asked in the history of the human race was, when god entered the garden of eden in the shadow of the evening, in the cool of the day, and he started looking for adam. adam had hidden himself, and god said: "adam, where art thou?" that was the first question ever asked in the history of mankind. "adam, where art thou?"

so if, indeed, in my small way as a direct descendent of adam, let me ask the question of the president: mr. president, where art thou in regard to the $473 million in emergencies that are contained in the house-passed bill? let us know, mr. president, where art thou? if i get a chance to ask the president, i am going to say: mr. president, where art thou with respect to the $473 million that was added as emergencies in the house bill? where art thou? let us know who would like to know.

in any event, that is the kind of bill we passed in this senate. no emergencies, not one! mr. stevens and i had the opportunity to serve without ted stevens and his help, his assistance, his leadership on that bill, the cooperation of senators and staff on both sides, the help of our distinguished democratic, and our leaders, we could not have accomplished that. so i take this opportunity to compliment our colleagues.

amendment no. 877

mr. byrd. mr. president, i send a technical amendment to the desk.

the presiding officer. the clerk will report.

the bill clerk read as follows:

the senator from west virginia [mr. byrd] proposes an amendment numbered 877.

mr. byrd. mr. president, i ask unanimous consent that the senator proceed to the consideration of the amendment and that it be adopted.

the presiding officer. without objection, it is so ordered.

the amendment is as follows:

(purpose: to make a technical correction)

on page 152, line 4, strike "$17,181,000" and insert "$17,460,000".

mr. byrd. mr. president, i ask unanimous consent that the senator proceed to the consideration of the amendment and that it be adopted.

the presiding officer. without objection, it is so ordered.

is there further debate on the amendment? if not, the question is on agreeing to the amendment.

the amendment (no. 877) was agreed to.

mr. byrd. mr. president, senator burns and i are here. we are at our posts of duty. we are ready to entertain any requests for an amendment by any senator. the clock is running.

mr. burns. we are open for business.

mr. byrd. the sign is out: open for business. senator burns and i join in urging the leadership and all senators to let us know of any amendments senators intend to offer by no later than 4 p.m. today, and it will be my hope that at 4 p.m. we can close out the window for amendments. i hope all senators within the sound of my voice and all staffs within the reach of our joint voice will be alerted to the fact that when the clock strikes 4 this afternoon, we expect to close out the window on all amendments.

mr. reid. will the senator from west virginia yield for a comment?

mr. byrd. absolutely; gladly.

mr. reid. as directed by the two managers of this bill, we have asked both cloakrooms to clear their request: that there be a filing of amendments by 4 o'clock today, which gives people ample time, many hours. it was announced even prior to the break that the interior bill would be the first bill brought up, and we even indicated when it would be brought up. so i hope we can get this cleared right away.

i say to my friend, the junior senator from montana, who has done such a good job in getting this bill to this point, the holding on that side. maybe if we go into a quorum call senator burns will be gracious enough to see if he can move this along. until that happens, my experience is this bill is in a flounder.

mr. byrd. i thank the distinguished whip.

mr. burns. mr. president, it is my hope that we can do this by 4 o'clock this afternoon. there is no need for us to dillydally around here when we have other things to do. i only have one thing i have to do at 2 o'clock this afternoon. i have to introduce a couple of judges who have been nominated to the montana district court system. by the time i get that done, 4 o'clock should be going.

we should be talking about amendments right now. there is no reason why we cannot move this bill to final conclusion tomorrow.

mr. reid. i believe the senator from west virginia still has the floor, if i can make another comment.

mr. byrd. sure.

mr. reid. it is my thought, if the two managers agree, that at 12:30 p.m., if there is still a problem with hotlining, a unanimous consent request be made and if anybody objects to it, they are going to have to come here in person to object to it. that is my suggestion. on a bill as important as this, we need to have the senators, not the staff lurking in some of these rooms around the capitol complex making objections for their senators.

after we go into a quorum call, upon consulting with the two managers, i make the suggestion that perhaps that is what we should do.

mr. byrd. mr. president, i thank the distinguished senator from nevada, the majority whip, for his suggestion. i like it. we have just heard senator burns voice his opinion.

mr. burns. we will do everything we can to get that taken care of. we do not want to close anybody out either, understanding the sensitivity of that. i believe we have made a reasonable request. i thank the chairman.

i suggest the absence of a quorum.

mr. byrd. mr. president, i ask unanimous consent that the order for the quorum call be rescinded.

the presiding officer. without objection, it is so ordered.

recess

mr. byrd. mr. president, there being no senators seeking recognition and having discussed the following request with the distinguished majority whip and the distinguished manager on
CONGRESSIONAL RECORD—SENATE

July 11, 2001

the other side of the aisle, it appears it might be best if the Senate stood in re-
cess until 12:15 p.m., during which time
some Senators can more usefully and hopefully that will speed up the entire process to
some extent.
I, therefore, ask unanimous consent that the Senate stand in recess until the hour of 12:15 p.m. today.
There being no objection, at 11:39 a.m., the Senate recessed until 12:15 p.m. and reassembled when called to order by the Presiding Officer (Ms. STABENOW).

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—Continued

The PRESIDING OFFICER. The Sen-
ator from Nevada.

Mr. REID. With the consent of Sen-
ator BYRD, I ask unanimous consent all first-degree amendments to H.R. 2217, the Interior appropriations bill, be filed at the desk by 4 p.m. today, Wednesday, July 11.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 880

Mr. BYRD. Madam President, I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD) proposes an amendment numbered 880.

Mr. BYRD. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 157, line 7, insert "Protection" after the word "Park".

Mr. BYRD. Madam President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

AMENDMENT NO. 879

Mr. DURBIN. Madam President, I have an amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. DURBIN), for himself and Mr. DAYTON, proposes an amendment numbered 879.

Mr. DURBIN. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: to make available by this Act shall be used to conduct any preleasing, leasing, or other related activity under the Act of June 8, 1906 (16 U.S.C. 431 et seq.), except to the extent that such a preleasing, leasing, or other related activity is allowed under the Presidential proclamation establishing the monument.

Mr. DURBIN. Madam President, I note that the Republican ranking member is not on the floor at this time. I will proceed and, of course, afford all opportunity for him for comment or rebuttal or perhaps a speech in support of amendments that I want to make sure I extend that courtesy to him since he is not currently in the Chamber.

The amendment I bring before us today is one that is very straightforward. I suppose I could have had it read, and it would have made it very clear what I am setting out to do. It basically will prohibit any preleasing or other related activity within the boundaries of a national monument.

What it boils down to is, there are certain lands in the United States which have been designated as important national treasures. We call them national monuments. Virtually every President in the last century, save three, decided to designate certain areas of land in America that were so important they wanted to preserve them so that future generations could enjoy the bounty which God has left us.

There are those, of course, who see that land not as a great treasure to be valued but as a resource to be used. The purpose of my amendment is to stop oil and gas drilling on national monuments across the United States.

We owe the existence of many of America’s natural treasures to pione-
ers of yesterday. Their appreciation of our rugged, untamed new country gave them the foresight to preserve many of our natural resources and public lands for future generations to enjoy.

Theodore Roosevelt was one such pioneer. In 1906, he established Devils Tower, WY. Unfortunately, not every President has been inspired by Teddy Roosevelt. Sadly, I come to the floor today because of threats by this new administration in Washington to at least consider the option of drilling for oil and gas in these national monuments across the United States.

Some leaders in Washington lack the foresight of our Founding Fathers and pioneers. They hide today behind the shield of an ‘energy crisis’—an energy crisis, which they believe that we have to change all the rules, saying we can no longer keep this land at least protected so future generations can enjoy it. They say because of our need for energy we have to break a lot of rules; we have to start drilling in the Arctic National Wildlife Refuge: we have to start drilling in the national monuments; we have to start looking for oil and gas in places that a lot of Americans honestly believed we had declared a bipartisan idea. These are treasures that don’t know the difference between parties. The treasurers which our children and future genera-
tions should enjoy. Roosevelt said this at one point, and his words I think tell the story: "We must ask ourselves if we are leaving future generations an environment that is as good or better than what we found."

That is simple. That inspired him in 1906 to create the first national monu-
mament at Devils Tower, WY. Unfortunately, not every President has been inspired by Teddy Roosevelt. Sadly, I come to the floor today because of threats by this new administration in Washington to at least consider the option of drilling for oil and gas in these national monuments across the United States.

President Bush needs to realize that damaging these irreplaceable lands is
This amendment is addressing a new mindset that says when it comes to today’s national monuments, it is a different story. They are up for grabs. We are involved in an energy crisis. People can drill for oil and gas on these new monuments designated by President Clinton. That is shortsighted. It loses vision when it comes to what our country is all about and should be all about.

The Bureau of Land Management has the responsibility of managing public lands across the United States, and we have thousands and thousands of acres. I see Senator HARRY REID from Nevada is here. I don’t know what percentage of his home State is Federal land—

Mr. REID. It is 87 percent.

Mr. DURBIN. It is 87 percent. Many Western States have similar percentages. Federal land within their boundaries. In the earliest days of our country, of course, there wasn’t a great hue and cry to have private ownership in this land. The Federal Government owned it, and some of it may never have been surveyed when it becomes to residential or commercial development. But the Federal Government took the responsibility under an agency known as the Bureau of Land Management. This is kind of the landlord of America’s public lands. The Bureau of Land Management has determined that 95 percent of the lands they manage across the United States are already available for oil and gas leasing. So if you hear an argument from the other side that now we have to go and drill into the national monument lands because we have nowhere else to look for oil and gas and precious minerals, that is just not the fact. Ninety-five percent of the Federal lands managed by the Bureau of Land Management are already available for oil and gas leasing.

Instead of hopping onto the drilling bandwagon, we should first focus on energy exploration in existing areas before we turn to these precious national monuments. I am afraid that the President and many of the people in the energy industry talk about oil and gas development as though it were the cure for all of our energy woes in America—drill and burn, drill and burn, drill and burn. There is much more to the challenge that faces our Nation.

The President has to acknowledge that the longstanding supply and demand balance in the United States will not be solved overnight, and it won’t be solved with 30th and 20th century thinking. Our Nation consumes 9.1 million barrels of oil a day. We import about half of that—more than half, frankly. Oil production from Federal lands—all Federal lands—supplies about one-tenth of our total oil needs. This isn’t enough to bring U.S. energy independence or significantly meet the U.S. demand. It is interesting that the Wilderness Society—

Mr. REID. Will the Senator from Illinois yield for a question?

Mr. DURBIN. Yes.

Mr. REID. First, I ask the Senator to list me as a cosponsor.

Mr. DURBIN. Madam President, I ask unanimous consent that that be the case.

The PRESIDING OFFICER (Mrs. CARNANAN). Without objection, it is so ordered.

Mr. REID. I say to my friend, is the Senator aware that the U.S. Geological Survey has estimated that the reserves within the 15 national monuments designated since 1996 would produce 15 days’ worth of oil and 7 days’ worth of natural gas for our country? Is the Senator aware of that?

Mr. DURBIN. The Senator is right. Those are the numbers I was about to bring to the floor.

Mr. REID. I am sorry.

Mr. DURBIN. I am happy to have the Senator add that to the debate. Frankly, if we are talking about energy needs in America and drilling in places we haven’t drilled before, whether in the Arctic National Wildlife Refuge or national monuments, certainly someone has to make a compelling argument there is so much energy there that America cannot turn its back. The statistics the Senator from Nevada has quoted and an analysis by the Wilderness Society come to the same conclusion.

The total economically recoverable oil from the monuments that I protect in this amendment is the equivalent of 15 days, 12 hours, 28 minutes’ worth of energy for the United States. Economically recoverable gas, as a portion of total U.S. consumption, is 7 days, 2 hours, 11 minutes.

Where would we give up for that small opportunity to bring that much energy into the picture in the United States? Frankly, we would be drilling in areas which have been designated as special and important treasures that the United States should preserve.

I am glad we are having this national debate about energy conservation and energy efficiency. It is important that we have it, but it is also important that we do not believe the answer to all of our energy problems is to find new places to drill.

Just last week I joined my colleagues, Senator FITZGERALD of Illinois and Senator DEBBIE STABENOW of Michigan, at a press conference on the banks of Lake Michigan on a rainy Tuesday before the Fourth of July. As hard as it is to believe, there is one Governor of a State adjoining Lake Michigan who now believes we should drill for oil and gas in Lake Michigan and the Great Lakes. There are those of us who think that, too, is a rash judgment and one we can come to regret.

A lot of people say: It would only be a small little derrick or a small drill
out there. I had the experience, I guess it has been over 15 years ago or close to it, of going up to Alaska after the Exxon Valdez. I always think of Exxon Valdez, if I remember correctly, was about the size of three football fields. It was a long vessel. When it ran ashore and when its tanks and all its crude oil spread out across the area, it devastated wildlife and left contamination for decades to come.

When we talk about drilling for oil and gas, we have to be careful that we do it in a responsible environmental way so that we do not run the risk of contamination or ruination of important national treasures, such as the Great Lakes, the Arctic National Wildlife Refuge, or the national monuments designated by President Clinton.

As we can see from the situation in California, if we take away the rodeo, it does not work. When they saw the high prices, they reduced their consumption by over 11 percent in a short period of time. It is a lesson to all of us. We can all do better, every single one of us. Before we jump into drilling into these pristine areas, should we not have a national policy that talks about sustainable, renewable fuels and energy conservation?

I am afraid this administration focuses on drilling and drilling and drilling, and that is just not the answer to all of our challenges.

This land is protected as national monuments because we realize all of the Nation’s public landscapes are not appropriate for oil and gas drilling. These lands have intrinsic value. Just because there may be some energy there, even if it is very limited, does not mean we need to drill for it and run the risk of contamination and ruining these great national treasures.

The monuments belong to the American people. The Government has agreed to hold these lands in trust for our generation and future generations to appreciate. The President of the United States, as a successor to George Washington, as a successor to previous Presidents, was given the responsibility of protecting these lands—first and foremost, protect our national heritage—not destroy them.

This energy crisis should not be used as an excuse for us to do things we will rue in the days and years to come. Exploiting our national monuments for a tiny bit of mineral resources will not ease energy prices today, tomorrow, or even next year.

Let’s not be misguided. Let’s focus the energy debate on responsible energy development, renewable energy, efficiency, and conservation efforts. I urge my colleagues to support my amendment.

In talking to my colleagues with this quote, again from Theodore Roosevelt whose words still ring true today:

Conservation means development as much as it does protection. I recognize the right hand duty of this generation to develop and use the natural resources of our land, but I do not recognize the right to waste them or to rob by wasteful use the generations that come after us.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Madam President, I oppose this amendment. It seems we want to make a blanket assertion on what we should do with our monuments. We have to remind ourselves that we are energy deficient.

As for Montana, where there was a national monument created, there are 77,000 acres of privately held land. Even the former Secretary of the Interior, Bruce Babbitt, recommended that oil and gas production in that area should be sustained.

There was a public process. The resource advisory committees in each of these areas made the same recommendation: Gas and oil production could be sustained without harming the land in that national monument.

These areas have also been studied. They have been studied by different committees whose members live in the area. They understand that land and the recommendations that were made.

In Montana we want to contribute something to the energy situation in this country. So far, no one has come up with any solid replacement to oil and gas production for transportation or power generation fuels.

I, therefore, urge my colleagues to oppose this amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Mrs. MURRAY. I thank the Chair.

Madam President, I rise today to support the amendment that will protect our national monuments from energy exploration. I am pleased to be a cosponsor of this important amendment, and I thank Senator DURBIN from Illinois for his work and tremendous efforts on behalf of our national heritage and our national monuments.

The truth is, we should not need an amendment to protect our country’s national monuments from energy exploration. These unique landscapes, including the Hanford Reach National Monument in my home State of Washington, were designated as national monuments because they are important in their own right and they deserve to be protected.

We should not need an additional amendment to keep oil derricks out of these lands, but unfortunately that is where we find ourselves today. The Bush administration has proposed exploring for energy even in our national monuments.

When I go home every weekend and talk to my friends and neighbors and go to the grocery store, my constituents come up to me and ask: Is nothing sacred anymore? Drilling in our national monuments is just wrong. This amendment says the Federal Government should not promote energy exploration on our most precious lands, on our heritage.

I recognize the need to find new sources of energy. The Federal Government has always actively promoted the extraction of new energy resources. This can and will continue. During the Clinton administration, thousands of new drilling permits were actually issued for Federal lands. Since the early 1980s, the projection of natural gas on Federal lands has been increasing steadily. Efforts to find energy on our Federal lands must continue. But attempts to find energy in our national monuments must never begin.

Today, 95 percent of Bureau of Land Management lands in the Western United States are open to coal, oil, and gas leasing. We do not need to open up our national monuments, as well. I realize this is a challenging time because we are facing an energy crisis. In my home State of Washington, we are experiencing huge increases because of the many factors involved, including a drought and too little energy production and a spike in gas prices.

Thousands of my constituents are out of work because of high energy costs. No one needs to tell anyone in Washington State we have to increase energy production. We know we need to increase capacity and that is what we are doing. We are working to site new generation capacity. On the Oregon and Washington border, we are constructing the country’s largest wind farm. We have natural gas plants going up. We have a proposal for a coal-fired plant. We are upgrading our transmission system to deliver new generation supplies.

I know what we need to do and we are taking action. But we know we don’t need to drill for natural gas in our national monuments.

The Hanford Reach National Monument is a national treasure. It includes the last free-flowing stretch of the Columbia River. It is the most productive spawning ground for threatened salmon in the entire Columbia River Basin. It is home to threatened sage grouse and 2 plant and 40 insect species that are brand-new to science.

The monument also includes and borders important historic and cultural features. The area is rich in important Native American, early pioneer, and nuclear production history. The Hanford Reach National Monument may be the most unique monument in the entire country.

I have heard some people suggest that the national monument designations made by President Clinton were motivated by economic involvement, and without consideration of energy production values. That is simply not true. I have been working since my first year in the Senate, 9
years ago, to protect the Hanford Reach. I introduced legislation in the previous Congress to protect that area. We held numerous public meetings, we got lots of local input from local leaders, local folk, and we debated a lot of different proposals.

The administration had 8 years of knowledge provided by the consideration of various protection proposals. The plans considered irrigation, farming, and the potential for gas outside the monument’s boundaries. The plan considered commercial development of lands by ports and cities. In fact, the final designation even included a provision ensuring a new right-of-way for energy transmission lines to go across the Hanford Reach. All of those considerations helped define the final boundaries of that national monument. So for some to suggest now that we never thought about our future energy needs is just plain wrong.

In the end, the final decision was that the geological and historical values of the Hanford Reach mandate protection as a national monument. We knew what we were doing by that designation. We knew we were choosing to protect the unique and vital habitats. We knew we were honoring important cultural sites, and we intended to leave this legacy to future generations.

Protecting certain areas for generations to come is an admirable goal. These designations were made after full consideration. This Congress should not now in any way undermine those legacies in favor of the energy industry. We should not have to fight back these attacks on our very limited protected lands.

I believe we should preserve these ecological and historic treasures for future generations. These lands belong to all of us. We are responsible for protecting them. That is why the Durbin amendment is so important. I urge my colleagues to support it. I thank my colleague from Illinois.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. FEINGOLD. Madam President, I rise today to support also the amendment offered by my colleague from Illinois, Mr. DURBIN. I am proud to join him in this effort and to be an original cosponsor of his amendment.

My colleague from Illinois seeks to make certain that amendment language offered by the Congressman from West Virginia, Mr. RAHALL, which would prohibit drilling for oil and gas and mining in our national monuments is included in the Senate bill. The Rahall amendment passed the House overwhealmingly by a vote of 242-173.

Madam President, I support this amendment because I believe that to not speak loudly against the Bush administration’s proposals to re-open many of these monuments under the guise of our present energy concerns is a dereliction of responsibility for this body and this Senator. It is the responsibility of this body to review areas designated as national parks. I have biked the Grand Staircase or not additional designations should be conferred—such as creating a national park or a wilderness area out of lands administratively protected as a monument.

Presidents have designated about 120 national monuments, totaling more than 70 million acres, and given that Congress has done its review, most of this acreage is no longer in monument status. For instance, Grand Canyon National Park initially was proclaimed a national monument but was converted by Congress into a national park.

Congress should responsibly exercise its authority, and be clear about its intent, which this amendment does. This amendment prohibits the administration from proceeding with drilling for oil and gas and mining in our national monuments. This amendment will prevent these activities which are incompatible with federal land use designations Congress might confer until we truly examine these areas. Monument designations create expectations on behalf of our constituents, Madam President, that these areas are protected and we should work to make certain that is so.

I am aware that Presidential establishment of national monuments under the Antiquities Act of 1906 has protected valuable sites but also has been contentious. President Clinton used his authority 22 times to proclaim 19 new monuments and to enlarge 3 others. The monuments were designated during his last year in office, with one exception, and I will speak about that exception later. President Clinton’s 19 new and 3 enlarged monuments comprise 5.9 million Federal acres. Only President Franklin Delano Roosevelt used his authority more often—23 times—and only President Jimmy Carter created a new monument acreage—56 million acres in Alaska.

The monument actions, regardless of one’s position on them, were needed because Congress had not acted quickly enough to protect these Federal lands. The best response to concerns about the monument process is to support my colleague from Illinois, Mr. DURBIN, and not allow modifications to the monuments that some perceive were created unfairly to be made in an equally concerning fashion.

My constituents do not support expansion of oil and gas drilling and mining in lands designated by Presidential declarations. I personally know the value of wild areas, and the threats that mineral, coal and oil and gas exploration pose. Though I have not been to all the monuments designated by President Clinton, I have hiked the Grand Staircase-Escalante National Monument, an area that the Senator from Illinois and I believe should be designated as wilderness.

I hiked down a 65-degree slope to Upper Calf Creek Falls in the Grand Staircase. It was a challenging and rewarding trip. Upper Calf Creek meanders along a shallow valley with several deep clear pools before the upper falls, where the creek drops 88 feet over a cliff face at the head of Calf Creek Canyon. This deepens gradually for 2.5 miles south there are wide pools below the 126-foot lower falls. The path to the falls is down a steep slope of white slickrock marked by cairns of dark, volcanic pebbles then across flatter sandy ground to the canyon edge, with a total elevation loss of almost 600 feet. My experience is that this monument is a spectacular place and one with new tremendous recreational value and use. I should be preserved that way.

I use my Upper Calf Creek trip as an example of why the Senator’s amendment is needed. We should be preserving our options with these lands, not opening them for development. I support this amendment and urge my colleagues to do so as well.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. I don’t know if any Senators are here to speak in opposition. If there are none, I will yield to them. I would like to speak and close debate, but I want to make certain the other side has ample opportunity to express its point of view.

Mr. BURNS. I ask the Senator from Illinois, as I understand it, the amendment prevent any further drilling, or does it bar all drilling, even though there are rights there in the first place?

Mr. DURBIN. The amendment clearly states if there is existing drilling, existing rights, it does not in any way interfere upon the conversion of new drilling, new leasing in these areas.

Mr. BURNS. If that resource is there and it can be done in an environmentally sensitive way, why is that bad on energy?

Mr. DURBIN. I say to the Senator from Montana, I don’t believe either of us would consider drilling on the Capitol Mall or perhaps in the Grand Canyon near it. There are certain things you draw the line and say we know there may be energy resources, but if we are so desperate in this country that we have to reach that point, we have gone too far.

I think when you look at the estimated resources available in these monuments, they are so minuscule in terms of our national energy picture, many of us believe it is far better to say to future generations: Listen, we found another way to find energy, to conserve energy. We didn’t spoil something that future generations will treasure.

Mr. BURNS. We had the Secretary of the Interior up in Montana. In the
upper Missouri, which was designated as a national monument, I tell my good friend from Illinois, we asked the Secretary of Interior to find the geysers well and then find the pipeline that carried the gas from the wellhead into the main pipeline. He could not find it. He could not find either one of them—he tried by air and by land—until we showed him where they were.

What I am saying is we should consider the new technologies and how we regard our lands, especially the big open lands. I am not talking about a monument such as The Mall; I am talking about land that is in bigger country that is very seldom ever walked upon by the people who probably own the grazing lease. We still allow grazing in national monuments. Very seldom are those lands ever walked on by anybody else.

We have an area in Montana that is going to demand some more attention in the next 2 or 3 years because it is along the Missouri River and that was the route of Louis and Clark. Of course, this was the 200th anniversary of the Louisiana Purchase, and the trek of Louis and Clark will draw a little more attention to that area.

But tell me why we would completely close out the possibility, even under emergency conditions, in areas where we could develop that energy—and especially natural gas, which is the cleanest of all energy that is coming from the fossil fuels we take from the Earth—why we would close out that possibility.

Mr. DURBIN. I say this to the Senator from Montana, whom I respect. We come at this with a different attitude towards national monuments and national lands. I think we do have a genuine difference of opinion. I am aware, and I am sure my colleague is, too, that 95 percent of the Federal public lands under the management of the Bureau of Land Management are currently open for oil and gas drilling. I do believe it is not unreasonable to say that 5 percent of the Federals lands that we own are so important to our national heritage that we are not going to go in and drill.

No matter whether you can sneak in there and come out again and folks say, "We were not even sure they were there," every time you do that you run a risk—I am sure the Senator from Montana knows that—that it will not be as clean an operation as you want it to be. You run a risk you will change an ecological balance in an area that has been the same for centuries. I think it is not unreasonable for us to say, as we do in our normal lives, there are certain places that are treated differently than others. We treat our church a little differently than we treat our shopping malls. We just view them differently. I think when it comes to our national treasures, our national monuments, it is not unreasonable to say these are areas which will be treated differently.

Mr. BURNS. And with my good friend, it is that kind of mind-set that said we are going to save the suckerfish in Klamath Falls, OR, and it takes precedence over 1,500 families and their future and our ability to provide food and fiber for this country. This is a trash fish. That is going on right now in that basin.

That is what I am saying. When we take a look at what our attitude is about a certain thing and hide behind the screen of green, I think we have entirely thrown all logic on the management of those lands, then we may have to readdress how we look at all lands, even those that exist in the State of Illinois. That is what I am saying. It is something that creeps into the mind-set, that it is all right to disrupt our lives and our families—even though we do it right and in an environmentally sensitive manner—because of a mind-set. I think that is where we have a basic philosophical difference on how we manage land.

I look at it much differently. I know you come from down there not too far from where I was raised. I was raised in Missouri. I never thought about water rights until I went west, where there wasn't any. There wasn't any water. Those things become very important. But they never entered our life when I lived in the lower Midwest.

I just think it is a mistake whenever we close up an area because of a mind-set that we cannot do it right and we here in Washington, DC, are basically in a better position to make the decision, more than having the decision made locally. The Senator from Washington says we had local input. We did the boundaries originally. We looked at the land that was sensitive, and we set it aside.

I agree with that. There are areas in the Missouri Breaks that I think should be set aside and even made wilderness. The river is already a protected river. I agree with that.

But whenever you take one broad swipe across a huge amount of land, especially when you have 77,000 acres of in-holdings and you have to cross public lands just to get to them, then we make a decision here that impacts people's lives in a real way. Those people have futures. That is why I oppose this amendment. I am not calling for the repeal of the Antiquities Act. What I am saying is we are impacting our own Nation's ability to produce food and fiber and energy because of a mind-set that sounds so green, and fuzzy.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. I thank the Senator from Montana. I know his opinions are heartfelt. He and I have talked about this on the floor on previous occasions. But I hope we can put this in some perspective.

America is a great nation. God has blessed us with resources that many nations around the world envy. Fortunately, leaders in this country with foresight decided long ago that there were certain treasures, national treasures in America, that needed to be protected and preserved.

Mark my words, when they made those suggestions, they were not always popular. There were people who had ideas that something else could be done with that national park or that national monument. But those leaders stood their ground and said, We can find other ways to provide for the occupations and professions of people living in these States. We can find other sources of energy. We do not have to spoil a national asset, part of our national heritage that we can never ever reclaim.

The Senator from Montana talked about national monuments, and, I guess, the energy potential that they offer to the United States. Here is a summary from the U.S. Geological Survey, about the economically recoverable oil and gas from national monuments.

I might remind those following the debate that it is now President Bush who wants to initiate new drilling for oil and gas in national monuments—protected lands set aside by the previous administration to be preserved for future generations. This President wants to let the oil and gas companies come in and drill on these lands.

When the Senator from Montana talked about trash fish, I can't argue the story. I don't know that side. This is not trash. This is a national monument. This is a beautiful span of land set aside for future generations by the previous President.

Please, if you will, in this rare piece of real estate in America, oil and gas drilling. Have we reached that point? This is not trash. This is a treasure. We shouldn't take it lightly when it comes to oil and gas drilling in America's treasures.

Let me give you an example of some of the national monuments and what the geological survey estimates is available there if we follow President Bush's recommendation to go ahead and keep drilling; let's find new areas for oil and gas drilling in these national monuments.

In the Upper Missouri River Breaks in Montana, which the Senator from Montana made reference to earlier, the economically recoverable oil from that entire national monument is the equivalent of one hour's worth of gas consumption in the United States.

I didn't take those numbers because the Senator mentioned his own State, but I just to put this in some perspective.

We are going to go drilling in these national monuments to try to recover one hour's worth of energy for our
country. And what do we leave behind? If we are lucky, not much—maybe a few footprints in the soil. But we can never predict that they haven’t spoiled or changed that forever.

All of the economically recoverable oil from all of the national monuments—where President Bush now wants to go drill—is the equivalent of 15 days, 12 hours, and 28 minutes of America’s energy consumption. All of the economically recoverable gas as a portion of the total U.S. consumption from these monuments where the President now wants to go drilling is the equivalent of 7 days, 2 hours, and 11 minutes’ worth of America’s energy.

I listened to the news this morning. I hear there is a bill over in the House of Representatives on energy, and they are talking about perhaps for the first time and for the first time in the history of fuel efficiency standards for SUVs and trucks in this country. That is not radical thinking. I think it is sensible. I voted for it in the Senate. Just a little bit of energy conservation and a little bit of fuel efficiency makes this debate totally meaningless. With just a little change in Detroit we can save more oil than we can possibly derive from monuments. But the oil and gas companies want to get in there, and they want to make a profit. They have put these national treasures in the United States on the altar of greed and profit and the bottom line. That is just plain wrong.

I don’t think I will prevail on this amendment. But I tell you that, as Senator FEINGOLD from Wisconsin, Senator MURRAY from Washington, and Senator REID from Nevada said, this is worth a fight.

You don’t get many opportunities to cast a vote while on the floor of the Senate and have this kind of lasting impact for generations to come. This is worth a fight. This is worth a vote.

I hope some of the Republican Members who come to the floor will remember one of the greats in their political party, Teddy Roosevelt, whose bust is just right outside this door—who really defended conservation for America and made his party the proud patriarch for conservation in America. I hope they will remember when they come to the floor of the Senate how it is better to do something that the oil and gas companies that just want to get their dirty hands on our national monuments.

We can do a lot better in this country. The oil and gas people have 85 percent of the Federal land to deal with. They do not need the 5 percent that we should be preserving and protecting for future generations. This amendment says to them: Keep your hands off of it. Leave it for future generations. Let’s find other ways to meet our energy needs that are environmentally sensible and responsible.

If I lose on this amendment, and if the Bush administration goes forward with the oil and gas drilling, a lot of people will, frankly, never know it. How many of us visit all these national monuments? But someone or someone who go to look for that treasure that was set aside will find it is no longer the treasure it once was; it has been used; it has been exploited; it has been spoiled and perhaps even ruined in the name of profit. The starting point, for those following the debate, is these are public lands. This is not private property. These are national monuments and public lands. They are lands that belong to all of us as Americans. It is not just the 285 million alive today but our children and grandchildren as well. If we don’t have the courage to stand up and say protect and preserve a small portion of it for future generations, then we are turning our back on the legacy of wise stewardship that has guided this country for so many years. It has been 95 years since a Republican President named Teddy Roosevelt had the courage to stand up and say they were going to protect that heritage. Ninety-five years later, another Republican President says, no; we are going to drill for oil and gas in that heritage.

What a difference. We will put an end to it with this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. CRAIG. Madam President, there is a great deal of what my colleague from Illinois has said that I just won’t disagree with at all. This is an important thing to be corrected, though, in his statement because we must deal with facts here when we are talking to the American people about the choices they will have to make depending on the policies we create.

First, the Bush administration is not advocating drilling in all of the monuments of the lower 48 States. That is a falsehood. What is important to say is that the Bush administration is proposing an energy policy that would open up public lands to be explored for the purpose of finding additional energy resources to determine whether or not they ought to be developed. That is a very real and different statement than the one my colleague from Illinois just made, that drilling or allowing exploration in national monuments is the right policy.

What is important about this debate is a choice that we are asking the American people to make. I think it is an important choice. I think it is worthy of the debate that we are having.

Energy security, the right of the family to know that their energy is secure, that their lights won’t go out, or the cost of driving their minivan or their SUV is going to double or triple over the next couple of years, or the very economic security and the power of big oil and OPEC to dictate that because policy-makers were asleep at the switch or used false arguments to cause fear amongst the American people—if that is true, then shame on those policymakers. But brave to the policymaker that is willing to stand up for the security of our country and the security of the American family.

That is what is important. Should the mom have to pay three or four times what she is paying now to drive her son or her daughter to a soccer game? Well, her costs have doubled in the last year. The reason they have doubled is because this country has not had a national energy policy. We had to go begging to the thieves in the Middle East, the OPEC crowd. That was the policy of the past administration—grab my tin cup and beg and let mom pay at the gas pump.

Was it the right policy? I don’t think it was. I am not even going to suggest that drilling or allowing exploration in monuments is right. I think it is wrong.

But what I will suggest to you today and to my colleague from Illinois is, do we have to make very hard-line choices in a world of modern technology and the talent that we possess today? Can we not shape an environment and shape a national economy that are compatible?

I agree with my colleague from Illinois. If you want to step back 30 years and use the argument of 30 years ago, then I win. If he is opposed to drilling or if he is opposed to exploration, that is correct. And I lose, if I am for it being based on 30-year-old technology. If you want the technology of today and tomorrow, then my guess is that it is a bit of a tossup.

We have preserved and protected the environment. But most importantly, we haven’t forced mom to go to the gas pump and double her prices.

I recently talked to a young man who is vice president of a new technology company out in California. We know what has gone on out in California, and we can pick losers and winners and those to blame. I will tell you what was wrong with that young man. He had not made any bad choices. He was not laying off people; he was not driving a minivan; he has an economy car; and he has a house. But he said: Senator Craig, I am frightened I am going to lose my job. I have spent 20 years building a retirement, and the company I work for is teetering today because their energy costs have tripled, their profitability is disappearing, and they are laying off people.

That is as a result of this Senate, and others, not making the right policy choices over the last decade. That is why that young man in California is frightened today about his future.

What does that have to do with national monuments or the 23 new monuments that former President Clinton created in the lower 48? I believe it has something to do with it. I believe it has to do with the fundamental question that is being asked of my colleague from Illinois today, and that I ask of...
July 11, 2001

CONGRESSIONAL RECORD—SENATE

all of us: Can we live together compatibly in an environment in which we can apply new technologies to have abundant energy resources to serve our Nation’s needs. I am not arguing with that. I accept that.

This amendment says that for 5 percent—1 acre out of 20—we are going to treat it differently. These are national monuments. These are special lands. These are not your run-of-the-mill pieces of real estate. These are lands designated by President Clinton, and monuments that have been designated by previous Presidents, that are being protected and treated differently. The Durbin amendment says: No oil and gas drilling or mining in the new national monuments designated by President Clinton because I want to be able to take my grandson one day to take a look at them and see the beauty that God created and not have to duck the pipelines and the trucks and all the economic activity of people trying to make a buck off Federal public lands.

Ninety-five percent of the Federal public lands are open to this exploration. For 5 percent there should be a different standard. Yes, there should be a hard-line choice.

Let me address for a second the issue that has been brought up over and over again: What about our energy crisis? We do face an energy challenge. There are no doubt about it. In my home State of Illinois, across the United States, in the last calendar year we have seen some terrible examples. Home heating bills have gone up dramatically in my home State of Illinois, and other places; electric bills in the State of California; gasoline prices between Easter and Memorial Day—that has now become the play period for big oil companies. They run the gasoline prices up a buck a gallon between Easter and Memorial Day, and then after every politician gets a head of steam and starts screaming at them, they bring them back down. I would like to believe this has something to do with whether or not we are going to drill for oil in a national monument, but I doubt it. We are victims of oil companies now that are making decisions that have little or nothing to do with supply and demand. This is the only industry I know that can consistently guess wrong in terms of the supply available to sell and make record profits. And they have done it consistently for 2 straight years.

So to argue that the only way to deal with our energy challenge and the OPEC stranglehold is to start drilling for oil and gas in precious lands set aside as national monuments is shortsighted. Are we so bereft of original and innovative ideas in Congress and in Washington that we cannot think of another way to help provide modern, sustainable, reliable energy to America other than to drill for oil and gas in our national monument lands? I do not think so.

I think there are other ways—sustainable energy sources—things that work, things you will be proud of, 21st century thinking—not the drill-and-burn thinking of the 20th century and the 19th century that has
inspired this administration to decide that, unlike President Teddy Roosevelt, this Republican President is ready to start exploring and looking for oil and gas in these national monuments.

We can end our dependence on foreign oil, but we don’t have to do it at the expense of America’s national and natural treasures. I urge my colleagues in both political parties to agree with me that setting aside 5 percent of Federal lands, keeping them separate and sacred, is worth the investment. We can find another answer, an answer that preserves those lands for future generations and still meets the energy needs of America.

If there are other Senators seeking recognition on this amendment, I yield the floor.

The PRESIDING OFFICER (Mr. INHOFE). The Senator from Utah.

MR. BENNETT. Mr. President, there has been a lot of historic revision going on with respect to the creation of national monuments. I rise to set the record straight.

The record is available for those who will research it, but for those who may have been listening to this debate, it needs some accuracy in terms of what happened.

I was involved in it right from the public beginning, but I cannot say I was involved in it from the real beginning because the creation of the Grand Staircase-Escalante National Monument was done in the dark. It was done without consultation with any member of the Utah delegation. And when members of the Utah delegation called the administration and asked what was going on, we were told: It is not happening.

To say very specific, in one example, let me describe to the Members of the Senate and to the Chair an exchange I had with Katie McGinty, chairman of the Council on Environmental Quality.

First, to put this in historic context, a story appeared in the Washington Post saying that President Clinton was considering a major national monument in the State of Utah. Immediately after that story appeared, the administration denied it and said it was just a consideration, just an idea, and under no circumstances were they that far along in serious consideration of a national monument.

Understand that the law required, under NEPA and appropriate environmental laws, that there be full public examination and consultation. The administration knew that. So they said, no, there will be no consultation because this is just an idea.

I had had experience. I called Bruce Babbitt, Bruce Babbitt and I had a very frank relationship. Even though we agreed on many things, we could be honest with each other. I called Bruce Babbitt. He was appropriately professional; he didn’t let out any secrets.

But he let me know that it was perhaps more than just an idea.

I said: What should we be worried about? He told me of some things we should be worried about in a theoretical sense. In case this was a real monument, we should be worried about the following. I wrote him a letter about them.

Finally he called me. He said: Come down to the Department of the Interior and we will talk about this. And with the other members of the Utah delegation, Senator Hatch and Congressman Hansen, I went down to Department of the Interior. It was on a Saturday morning when there was nobody else around. We sat in his conference room. Katie McGinty was there, along with a large number of his staff.

I asked him repeatedly and directly: Mr. Secretary, will the President announce the creation of a national monument on Wednesday of this coming week, as the press is speculating that he will?

Bruce Babbitt, being a careful lawyer, looked at me and said: No decision has been made. He didn’t say yes and he didn’t say no. He just said: No decision has been made.

I took that, from my experience with the Clinton administration, to mean “yep, it is a done deal; I can’t tell you about it, but it is done.”

So convinced that the monument was going to be created, on Monday morning, in my office, Katie McGinty was there as the leading administration spokesperson on this issue. And I said: Ms. McGinty, you say this is under consideration but no decision has been made. Given the consideration, can you give me a copy of the map so that I can see what lands are under consideration?

She looked me in the eye and said: Senator, there is no map. We are not that far along. This is just an idea. There is no map.

I said: As soon as there is a map, can I have a copy?

Oh, yes, Senator, as soon as we have a map, but we are not that far along.

That was Monday morning. On Wednesday morning I get a phone call from Leon Panetta, Chief of Staff to President Clinton.

Leon Panetta said: Senator, I am calling to tell you that this afternoon in Arizona, President Clinton will announce the formation of the Grand Staircase-Escalante National Monument, the details of where it will be and everything with respect to it.

I held my anger because Mr. Panetta obviously had nothing to do with this. This was a done deal outside even the office of the Chief of Staff of the White House.

I said: National monuments require— and I listed all of the things that were involved in the creation of a national monument.

He said: Yes, national monuments require all those things. There will be a 3-year period after the creation of the monument in which we will deal with those issues.

Every one of those issues should have been dealt with publicly and openly prior to the creation of the national monument, but all of them had been held in secret.

I expressed my disappointment in that. Mr. Panetta, in a moment of candor said: Well, Senator, we have 3 years in which to try to clean it all up.

When Katie McGinty appeared before the appropriations subcommittee, I sat with the subcommittee and I said to her: I want to see all of the documents relating to this decision. You didn’t create this out of whole cloth in a 24-hour period.

I made very clear that I did not believe her earlier statement that there was no map and no consideration if, in less than 48 hours, the President made a complete public disclosure of it. Presidents don’t do things in 24-hour periods. Something as major as this doesn’t just happen overnight. It isn’t an immediate decision. It is staffed out somewhere.

I said to her: I want to see all of the documents relating to the decision to create this national monument.

Oh, yes, Senator. I will provide this. It was a completely open process.

And then we got a map. I discovered, by the way, that the map had been in circulation among environmental groups for 3 months prior to the time when I asked her for a copy, and she told me none existed.

We looked at the map to see how carefully drawn the boundaries were of this national treasure we were hearing about. In one of the towns in Utah, the high school football field was in the national monument. The map was drawn in secret. The map was drawn with people who would not consult with those who knew what was going on, and they had drawn the line so wildly that they had picked up the football field of a high school, thinking that was part of the national monument.

One of my constituents found his front driveway in the national monument. He had to drive across national monument lands to get to his home because they had ignored the procedures so fully, they were so anxious to do this in secret and not consult with anybody so that they would have a political coup to announce in the middle of a Presidential campaign, that they made those kinds of mistakes.

Is it now so sacred a land that we cannot take the football field out and turn it back to the high school?

Is it so sacred a piece of land that we can’t give the man his driveway back?

I ask those questions rhetorically because we did that. In one of the previous Congresses, we redrew the boundaries and took out the football field.
and the driveway and some other mistakes that were made. I got my first set of documents from Katie McGinty, which I found in the State fore and a travel bureau brochure. I went back to the Appropriations subcommittee meeting. It is not usually my style, but I am afraid I embarrassed her by holding these up and saying, “You are suggesting that these are the basis of a decision to lock up 1.7 million acres in my home State? You are saying this is the complete record? I am sorry, I cannot accept that.”

Finally, at a later time, we got the complete file that she had with respect to the creation of this monument. I will say this in her defense. She did not shred any documents. When she turned the documents over to me, the file was complete. It contained the following documents but we can only read the first since it is in the file. In the first few months before, where she says, “We will have to abandon the project of trying to find lands in Utah that qualify for a national monument because it is clear there are none that do. Let’s forget Utah project because we can’t find any lands that will qualify.” And then, what I consider the smoking gun, there was a 5% by 8½ piece of paper in which she had written in her own hand a note to the Vice President. The Vice President had been her boss. She was on his staff while he was a Senator. That would explain the familiarity of the note. It said: AI, the enviros have $500,000 to spend on this campaign, either for us or against us, depending on what we do in Utah. Signed, Katie.

I can’t touch for that being the exact language, but that is close enough. I read and reread that note many times. The national monument was being created in southern Utah in the dark to stimulate the expenditure of $500,000 of campaign activity on behalf of the Clinton—Gore ticket in 1996. There was the entire motivation following on the earlier document where she said there aren’t any lands that qualified.

Now, the Senator from Illinois had these are special lands and that they can explore for oil and gas on 95 percent of the public lands. This is reminiscent of a statement President Clinton made when he announced that monument. He said, “Mining jobs are good jobs, but we can’t find any lands that will qualify.” So we will set this land apart so there won’t be any mines here.”

If I had been there and had the opportunity to have an exchange with President Clinton, I would have said: President Clinton, you are exactly right. We cannot have mines everywhere. We can only have mines where there are minerals. Sure, you say 95 percent of the land is open for exploration. But nobody there wants to look at that. Nobody wants to explore lands where there are no mineral resources. Why was this land set aside in a national monument?

The Senator from Illinois says he wants to take his grandson out some day to look at the beauty of the land. His grandson is supposed to look at it right now. You will have the same reaction we are getting from tourists who are coming. We were told when this was created that we would have an economic bonanza of tourists coming to look at this magnificent piece of scenery. I have gone to the county commissioners of the counties around there and said, “How much tourism have you had?” They said, “None.” None! This has so much publicity, surely people have come from all over the world to see this scenic wonder. Yes, they come—one day. They say we have come to see this magnificent scenery President Clinton talked about on the rim of the Grand Canyon and the backdrop to make the announcement. That is scenic and it is worth coming from all over the world to see. That was his visual aid when he talked about the land in Utah. The folks show up from Germany and Japan and elsewhere to look at the land in Utah, but they say: This doesn’t look any different than any of the other BLM land we can see. What is the big deal?

They don’t come back. We have seen two counties be destroyed economically since the creation of the Grand Staircase-Escalante Monument, as people were afraid to invest in those counties. They were not very viable to begin with and have no tourism. With all of the publicity, there is no tourism.

All right. I suggest to the Senator from Illinois, if he wants to take his grandchild to see this grand scenery, he can do it, and it will be there in future generations because he can do it without telling nobody, and to do it in such a way that it will never be subject to public comment or oversight in the future. And to do it in such a way that it will never be subject to public comment or review. We will do it in secret. We will do it without telling anybody, and
when members of the Utah delegation ask us about our plans, we will lie to them.

I am sorry to be that strong, but that is what happened because I asked the question directly, and I was given the answer directly, and the answer was a lie, demonstrable, provable in the Record. The answer I got was a lie.

Now we are being told: Oh, these are special lands that we must preserve for our grandchildren, when in fact the genesis of this monument makes it clear these are special lands primarily because of the mineral resources that are in them, the energy sources that are there, the low-sulfur coal which, by the way, if mixed with more traditional coal, would lower emissions at every power plant where it was used.

For those who are concerned about green energy, the Interior Department and the folks at the BLM have, indeed, come up with a long-term management plan for the monument that probably belong in national monument status? The answer is yes, we are, but it should be done in the first place.

And I do not impugn the motives of other members of the Utah delegation, and the citizens of Utah feel about our State. We want to do it with everybody participating, we want to do it intelligently. We want to do it in a way that makes sense. We want to do it with everybody participating in the process who will come to the table and talk to us. We want to hear every idea. We want to hear every point of view.

We don't want to see a repeat of what Katie McGinty and others in the Clinton administration did, of creating something in the dark, cramming it down people's throats without any opportunity for comment, and then declaring that it is forever and ever inviolate. That process only breeds ill will. That process only creates bad feelings. There is no place for that kind of process to ever be repeated.

My objection to the amendment by the Senator from Illinois is—and he would enshrine the results of that process—not the process; he had nothing to do with the process. He didn't know what was going on. If he had, given his sense of fair play, he probably would have objected to it, but he would enshrine the results of that process into law forever. That, frankly, doesn't make sense. It is a process that does not deserve to be rewarded with that kind of perpetual reference. We need to deal with our lands in a way that is good for the lands, a way that is good for the people, a way that is good for
our posterity, and enshrining what was done in the case of the Grand Staircase-Escalante Monument is not the way and not the way it should be. I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, I ask unanimous consent that Senators Feinstein and Boxer be added as cosponsors to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURBIN. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DURBIN. I ask the majority whip if this is appropriate, we have a unanimous consent that the amendment be scheduled for 2:45. If this is appropriate, we have a unanimous consent that the rollcall vote on my amendment.

Mr. DURBIN. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURBIN. I will work on the exact time.

Mr. DURBIN. I will suspend a unanimous consent request on a specific time.

I will respond to my colleague and friend, the Senator from Utah, Mr. BENNETT. I have heard him speak before about the Grand Staircase-Escalante National Monument. He is a man of great control and moderation. I can tell it brings his blood pressure to a high level to recall the creation of this particular monument. He has heartfelt feelings about this process and he has expressed them, hopefully, in private.

I do say in fairness that one of the people he mentioned several times on the floor is someone I respect very much and worked with for many years, Miss Katie McGinty, who worked for the Clinton administration. I found her to be entirely professional and ethical, with the highest integrity and great skill. I want to make certain that is part of the record.

I also do want to make note of the following for the record, as well. With regard to the Grand Staircase-Escalante National Monument, the Bureau of Land Management has utilized an extensive process to develop a management plan to administer the new monument. The planning team included five representatives nominated by the Governor of Utah, Mike Leavitt. Over 28 meetings were held and over 9,000 comments considered prior to finalizing the monument management plan in February of 2000. In addition, following establishment of the monument, the Department of the Interior worked closely with the State of Utah to negotiate a major land exchange that traded State and Federal land so as to help maximize the value of State lands for the benefit of Utah's schoolchildren and provided a $50 million payment to the State.

My amendment addresses whether or not we will drill for oil and gas and mine minerals, particularly coal in this case, in the Grand Staircase-Escalante National Monument.

I make the following comments for the record: According to the U.S. Geological Service, all of the recoverable oil in the Grand Staircase-Escalante National Monument would provide for America's energy needs for a total of 4 hours. All of the recoverable gas in the Grand Staircase-Escalante National Monument would provide for America's energy needs for 1 hour.

On the issue of coal, fortunately, we are not at the mercy of anything like OPEC when it comes to coal in the United States. The U.S. Department of the Interior has estimated we have 250 years worth of coal reserves right here in the United States. The Senator has said repeatedly that the coal in this monument itself will light all the lights in San Francisco for a long period of time. I suggest all the coal in the United States could light the lights of most of the western civilization for a pretty substantial period of time. We could light it, but we would do it.

I have three times more coal in my State of Illinois than the Senator from Utah believes he has in his State, at least by estimates from the Department of Energy.

The Interior Department bought back all of the Federal coal leases within the Grand Staircase at a cost to taxpayers of $20 million. There are no existing leaseholders, no coal development taking place in this national monument. So those who were there were compensated when they left.

Let me go back to what this amendment is all about and why I have offered it. The Bush administration said they are prepared to explore the possibility of drilling for oil and gas in national monuments. When visiting Washington, D.C., and you hear the words “national monument” you think of the Washington Monument and the Lincoln Memorial. But national monuments under Federal lands are tracts of land set aside by Presidents over the centuries out west, who really think if they can get their hands on this land there and they can do anything they think, they will be able to see something spectacular in American history, that they are able to leave for their children, grandchildren, and their children and grandchildren, that they will be able to see something spectacular in American history.

I encourage my colleagues to join me in voting for this amendment. It had a strong bipartisan vote in the Senate and in the House of Representatives and, yes, in the White House as well, to preserve this national heritage.

I encourage all my colleagues to join me in voting for this amendment. It had a strong bipartisan vote in the Senate and in the House of Representatives and, yes, in the White House as well, to preserve this national heritage.

I encourage all my colleagues to join me in voting for this amendment. It had a strong bipartisan vote in the Senate and in the House of Representatives and, yes, in the White House as well, to preserve this national heritage.
Mr. MURKOWSKI. Mr. President, I listened with great attention to the debate concerning the amendment that is before us. I would like to specifically identify the amendment in some detail because I think Members should have an understanding of just what the intention of the Senator from Illinois is.

In the amendment, the specific purpose is to prohibit the use of funds for the conduct of preleasing, leasing, and related activities within national monuments established under the act of June 8, 1906. It is further appropriate to reflect on the concluding sentence of the amendment, which states:

... a national monument established under the Act of June 8, 1906 (16 U.S.C. 431 et seq.), except to the extent that such a preleasing, leasing, or other related activity is allowed under the Presidential proclamation establishing the monument."

What we have here, in the establishment of a monument, in the normal course of events, is a Presidential proclamation. And in that proclamation it is specifically addressed as to what can occur within the monument.

I really question the necessity of the amendment. I question the applicability of the amendment. I question the application of the amendment. I question the purpose and objective of the amendment.

I am not one of the managers of the bill, but one of the more expeditious alternatives would be to accept the amendment because the amendment does not do a thing. It implies that you are not going to have any funds for preleasing and related activities—and I assume we mean oil and gas or mineral exploration in national monuments—but then it goes on and says: "except to the extent that such preleasing . . . or other related activity is allowed under the [authority of the President]." Which basically states the authorization for the proclamation establishing the monument. Hopefully, that is clear.

I assume there are some out there who would say, we do not want oil and gas or mineral exploration occurring in our national monuments. We have heard from Senators who have had some experience with national monuments, the creation of these monuments under the Antiquities Act. Certainly one of the more recent States is the State of Utah and the case of the Grand Staircase-Escalante episode where a monument was created with very significant acreage. It took off the development scenario of some coal leases that the Senator was going to use to fund their educational system. I think, unfortunately, the application of the Antiquities Act in that particular case was inappropriate.

Our previous President took that action without the knowledge of the Governor of Utah, and without the knowledge of the congressional delegation of Utah. Furthermore, he did not have the compassion to even make the announcement in the State of Utah. I believe it was made in Arizona.

So the application of the Antiquities Act, traditionally, on national monuments is well established. But the criteria of what can be done in those national monuments are ordinarly left up to the Presidential proclamation establishing the monument, which certainly is the case in the amendment pending before this body. I hope Senators, upon reflection, will recognize that this particular amendment really accomplishes no purpose.

One of the issues that concern me, however, is the implication and the lack of understanding of terminology associated with the designation of public land.

We have all seen the concern expressed on the floor—both in the House and in the Senate—as to the issue of developing resources offshore or within our States or within specific designated areas. But I would like to share with you a chart that shows the designated areas that have been taken off limits in recent years by State and Federal action. It is kind of interesting to note the entire east coast—from Maine to Florida—has been removed from any OCS (Outer Continental Shelf) activity. And the merits of those actions speak for themselves. These States simply do not want any activity off their shore.

We saw an agreement on lease sale 181 in Florida the other day where a significant portion of the lease was removed. Yet the inconsistency is, Florida wants very much to receive a portion of the energy that would come from exploration offshore in the gulf. It is kind of hard to have it both ways, but some would like that.

The chart also shows the Pacific coast—the entire area from Washington State to California—is off limits. In other words: NIMBY, Not In My Backyard. We have in the overtrust belt the States of Wyoming, Colorado, Utah, and Montana. These are States that have oil and gas development and production. As a consequence of the roadless area promulgated by the previous administration, we have seen a significant area of prospect for oil and gas, particularly natural gas, taken off limits. There were estimates to be about 22 to 23 trillion cubic feet of natural gas in this overtrust area. We have taken it off limits. That means basically no resource development.

There you have it. With the exception of Texas, Mississippi, Louisiana, and Alabama, that support OCS leasing—we find ourselves in a position where we have an energy crisis. We find ourselves in a position where we are becoming more and more dependent on sources overseas coming into the United States.

We debate the merits of the inconsistency in our foreign policy where we find ourselves dependent on 750,000 barrels of oil a day from Iraq, from our old friend Saddam Hussein, where we fought a war in 1991 and 1992. We lost 148 U.S. lives in that war. And now we are importing oil from that country. We buy Iraq's oil, put it in our airplanes, and then go bomb him while enforcing a no-fly zone, basically a blockade in the air. We risk U.S. lives in that. We have flown over 230,000 individual sorties over Iraq.

So here we are putting our own area off limits, going overseas, not really where we want to be.

Whether it comes from a scorched-earth refinery or a scorched-earth oil field in OPEC, we find ourselves subject to the cartel of OPEC. Cartels are illegal in the United States. We would not even pass the test associated with that type of business in this country because we have antitrust laws, but we are, in effect, supporting the viability of the OPEC cartel by becoming more and more dependent.

I am sure the Presiding Officer remembers back in 1979, we had gas lines going around the block in this country. We had the Arab oil embargo at the Yom Kippur war. We had the public indignant, outraged because there were gas lines around the block. We were 37-percent dependent on imported oil at that time. Today, we are 57-percent dependent. The Department of Energy says the way we are going, we are going to be 63- or 64-percent dependent by the year 2007 or 2008. Where is it going to stop?

People generalize, very conveniently, that we have alternatives: We have renewables; we have solar power; we have wind power; we have new technology. If
you really think about it, most of these sources are for stationary power generation. But they do not move America. They do not move the world. Mr. President you, and I, and others, do not fly in and out of Washington, DC, on hot air. Somebody has to produce the oil, refine it, and put the kerosene in the jet. Only then do you take off. Whether it is your planes or your trains or your automobiles or your boats, America and the world are dependent on oil. And we are becoming more and more dependent on one source, and that is OPEC.

We are sacrificing our national security interests; there is no question about it. To give a recent example, just a few weeks ago, Saddam Hussein didn't get his way with the U.N. So he cut his oil production. He pulled 2% million barrels of oil a day off the world market. We thought OPEC would make up that difference. They took one look at it and said: No, we are going to hold off. So we were short that month. This month alone, about 60 million barrels were held off the world market. It kept the price up.

Look at what happened in this last year with OPEC in developing their internal discipline. They developed a floor and a ceiling on oil: $22 was the floor; $28 was the ceiling. It has gone over that. They have a discipline. We are becoming more and more dependent on that source, and we are becoming more and more exposed from the standpoint of our national security.

Where is it going? We are debating an amendment that doesn't do a thing to address supply. We should be debating an energy bill at this time in a timely manner. We have over 400 wells in Louisiana refuges alone. It is important that the public understand the difference between national monuments and national wildlife refuges. Oil production in national refuges is allowed, subject to the authority of the President. We have salt water conversion.

Here are the States. We have 17 refuges in Louisiana, Alabama, Mississippi, four in California, Montana, Michigan, my State of Alaska. These are activities that are authorized under the terminology of refuges.

This chart shows where these refuges are. It is important that the public understands the difference between national monument designation under proclamation by the President and what is allowed in them by the proclamation and refuges. In Alabama, there is the Choctaw National Wildlife Refuge. Oil production in national refuges and wetlands management districts is a concept that has long been fostered by the Congress. It is specifically the balanced use of Federal funds and the reality that it is accepted and is commonplace.

This is oil and gas activity in 30 refuges, and there are 118 refuges from coast to coast where we are safely exploring for oil and gas. We have over 400 wells in Louisiana refuges alone. And we have 118 refuges in Arkansas, Kansas, Louisiana, Texas, Alaska—the Kenai National Wildlife Refuge—North Dakota, Mississippi, Michigan, and Montana.

I am not going to get into a presentation of the merits of ANWR. What makes it any different than any of the others? Certain not from the establishment of the terminology "refuge." ANWR is included as a refuge, therefore oil and gas activity is allowed, subject to the authority of the Congress. That is what that debate is all about.

But as we look at the reality associated with the energy crisis, we have to recognize we are going to have to look for relief. You are not going to get it from alternatives. You are not going to get it from renewables. In spite of the fact that I support the technology, I support the subsidy, I support continued taxpayer support of these, they still constitute less than 4 percent of the total energy mix. We have expended over the last 10 years. It has been money well spent, but it is not going to replace our dependence on conventional sources of energy.

How did we get into this thing? Why are things different now? I could talk about oil and gas, but if we look at foreign oil dependence—now at 56 percent, up to 66 percent by the year 2010—the national security interest of this country is in jeopardy. What are we going to use as leverage?

In 1973, we created the Strategic Petroleum Reserve. Some people say that can be our relief. Do you know what we found out when the previous administration took 30 million barrels out of the Strategic Petroleum Reserve? We found out we didn't have the refining capacity to refine it into the heating oil that was needed to meet the crisis at that time in the Northeast Corridor. We were genuinely concerned.

When we took those, we simply found we had to offset what we would ordinarily import. We didn't have the refining capacity. I think we achieved, out of that 30 million barrels, somewhere in the area of a 1-day supply of heating oil for the Northeast Corridor. It just won't work. If you don't have the refining capacity, you can have all the oil in the ground you want, it isn't going to do the job. You are not going to be able to increase, if the need is there, any more than the extent of the consumption about $5 billion a year.

The reason things are different this time is we have natural gas prices that have soared. They have gone up as high as $10. They are down now, thank God, but we are still using our reserves faster than we are finding them. We haven't had a new nuclear plant licensed in this country in 10 years. We haven't had a new coal-fired plant of any consequence built in this country since 1995, and coal is our most abundant domestic energy resource.

We have technology for clean coal. Nothing has been done in that area. Why? It isn't because the supply isn't adequate; it is because we haven't had...
the conviction to come to grips with the reality of the law of supply and demand. Even Congress can't resolve the law of supply and demand; it can only increase the supply or reduce the demand.

Demand has gone up and supply hasn't. That is why it is different this time. I indicated that there have been no new gasoline refineries in 10 years. So if we look at our increased dependence on foreign oil, increased price of natural gas, nuclear plants—nuclear is 22 percent of our stationary energy—no new gasoline refineries, no new coal-fired plants, and to top it off, we find our capacity to transmit our natural gas and electricity is inadequate. Why? Because we have become more of an electronic society. We leave our computers on; we leave our air-conditioning on. We have become, perhaps, a more fuel-efficient refrigerator and use half of the energy, but if the old one isn't worn out, you won't do it.

The point is that the "perfect storm" has come together in the sense of energy. We have an energy crisis. As a consequence of that crisis, I would have hoped that we would be debating how to address this energy situation as opposed to debating the merits of a national monument determination that isn't going to result in any significant activity. Other than some of the media might be misled that it is going to terminate any activity in areas of national monuments, which it will not. We have skyrocketing energy prices, gas shortages, and I guess I will conclude with a reference to, again, how important energy is, how we have a tendency to take it for granted.

You know, the American standard of living is based on one thing: affordable and adequate supplies of energy. That is why if we don't keep up with the increased demand by increasing the supply by conservation, alternatives, renewables, we are going to jeopardize that standard of living. And with it goes our economic security, and with it goes our national security.

I think we all feel exposed to the potential of being held hostage by a foreign leader such as Saddam Hussein. We have our job security at risk—to keep Americans working and create more jobs. Energy certainly powers our economy on in times such as this, and that is America's technology and ingenuity.

We have the capability to meet the challenges associated with a responsible environmental sensitivity and the reality that we can do things better. But there is no magic to it. Somebody has to produce this energy. It has to come from some identifiable source. I am speaking primarily of what moves America, and right now that is oil. I wish we had another alternative, but for the foreseeable future, we simply do not.

As a consequence of that reality, we have before us an energy plan. I intend to work cooperatively with Senator Bingaman toward a chairmain's mark. We have an outline given by the President and the Vice President and their energy task force report. So I guess even more so, if you will, on the process in the Senate. It is moving in the House. The House is moving on an energy bill. We should be moving on it here. I am very pleased to see that it is now in the Democratic leadership's recommendations.

We haven't gotten a schedule on it at this time, but I hope we will in the very near future.

So, again, we get back to the debate at hand with regard to the amendment, prohibiting preleasing-related activities within national monuments by disallowing any funding and, yet, recognizing in the amendment to the extent that such a preleasing or other related activity is allowed under the Presidential proclamation establishing the monument, would seem that the amendment is neutral to the issue of supply, neutral to the issue of whether or not there is any authority for oil or gas and mineral activity within any new national monuments that might be created in the future is certainly not applicable to those already in existence.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I believe all debate on this amendment is completed, and the yeas and nays have been ordered.

The PRESIDING OFFICER. That is correct, the yeas and nays have been ordered.

Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the vote on or in relation to the Durbin amendment occur at 4:10 p.m. today.

The PRESIDING OFFICER. Is there objection?

Mr. BURNS. Mr. President, I move to table the Durbin amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Reserving the right to object, I ask the Senator to allow an amendment to his motion to table—that there be no second-degree amendments allowed to the amendment prior to the vote.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Is there objection to the request to have the vote occur at 4:10 p.m.?

Mr. BURNS. I move that the Durbin amendment be tabled, and I ask for the yeas and nays, which vote will occur at the agreed time.

The PRESIDING OFFICER. First, the Senate needs to address the request raised by the Senator from Nevada of having the vote at 4:10 p.m. He pronounced a unanimous consent request to have the vote at 4:10 p.m. Is there objection?

Mr. BYRD. What was the request, what is the request?

Mr. REID. Mr. President, I say to my friend, the manager of the bill, we will have a motion to table the amendment at 4:10 p.m. today, and prior to the vote there will be no second-degree amendments to the Durbin amendment.

Mr. BYRD. A vote on the motion to table would occur at 4:10 p.m. today.

Mr. BURNS. Yes.

The PRESIDING OFFICER. The Senator from Nevada asked unanimous consent the vote occur at 4:10 p.m. There has been no objection. The Senator from Montana has moved to table and asked for the yeas and nays at 4:10.

Mr. BURNS. And the vote occur at the agreed time at 4:10.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. BYRD. What was the request, and then 4:15?

Mr. BURNS. The meeting with the President and the group downtown was not in until 4:15. We are going to begin the vote at 4:10 and they will have time to vote; 4:15 had nothing to do with it. We agreed at 4:10 to table the Durbin amendment.

Mr. BYRD. I remove my reservation.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second on the motion to table.

The yeas and nays were ordered.

Mr. REID. I ask unanimous consent the Senator from New Jersey be allowed to speak for up to 10 minutes as if in morning business.
The PRESIDING OFFICER. Without objection, it is so ordered.

The remarks of Mr. TORRICELLI are located in today’s RECORD under “Morning Business.”

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER (Mr. JOHNSON). Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the vote now scheduled for 4:10, on a motion to table, be rescheduled for 4:20. This has been cleared with the Senate Manager.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURBIN. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURBIN. Mr. President, in 10 minutes or so, the Senate will be voting on my pending amendment. I believe the Senator from Montana has been given authority to offer a motion to table the amendment. But I want my colleagues who come to this Chamber to understand what the nature of this amendment is because it is very simple and straightforward.

My amendment will simply prohibit new mineral leases from being issued in designated national monuments. It does not affect any existing, valid right, or prevent leasing in any area that was authorized for mineral activity when the monument was established.

That description is pretty legal. Let me try to translate it so that those who have not followed this debate will understand what is at issue.

We have designated, in this country, various national monuments. These are tracts of land which Presidents of the United States, since Teddy Roosevelt, have set aside by saying that they have certain national monument lands, in fact, that many of our national parks began as national monuments.

When you look at former national monuments, they include the Grand Canyon—designated first as a national monument—Glacier Bay, Zion National Park, and Acadia National Park.

So though I use the term “national monument,” most Americans are familiar with the term “national park.” Although they are not the same legally, the fact is that many of our national parks began as national monuments.

We have taken great care when it comes to these national monuments to say that they are so special and important that we will be careful what we do with them once we have designated them as treasures for our Nation to protect.

The reason I have offered this amendment is because it is very important to say to any oil company or mining company: Please come take a look at our national monuments as a possible place to drill and to make a profit.

Some will argue—and they have in this Chamber—that it is shortsighted for us to limit any drilling for oil and gas or the mining of minerals at a time when our Nation faces a national energy crisis or an energy challenge. I disagree. Of all the Federal land owned in the United States by taxpayers, 95 percent of it is open to oil and gas drilling company or mining company: Please come take a look at our national monuments as a possible place to drill and to make a profit.

Some will argue—and they have in this Chamber—that it is shortsighted for us to limit any drilling for oil and gas or the mining of minerals at a time when our Nation faces a national energy crisis or an energy challenge. I disagree. Of all the Federal land owned in the United States by taxpayers, 95 percent of it is open to oil and gas drilling and mining. We have said, if you can find those resources on that public land, we believe it will not compromise the environment nor jeopardize an important national treasure to go ahead and drill. But for 5 percent—one acre out of 20—of Federal public lands which we have designated as special lands—monuments; some may someday be a national park—in those lands we do not want to have that kind of exploration and economic exploitation.

If some step back and say: You must be turning your back on a great amount of energy resources if the Durbin amendment is enacted and prohibiting oil and gas drilling on these national monument lands, in fact, that is not the case at all. The U.S. Geologic Service did a survey of these national monument lands to determine just how much oil and gas there would be available. After they had done their survey, they established that all of the mineral potential on all of these lands combined has economically recoverable oil as a portion of total U.S. consumption that amounts to 15 days, 12 hours, and 28 minutes of energy. When it comes to gas, 7 days, 2 hours, and 11 minutes in terms of our national energy consumption. It is a tiny, minuscule, small part of the energy picture.

I have listened to some of my colleagues from other States talk about our energy crisis. You would believe that the only way we could keep the price of a gallon of gasoline under control is to allow the oil companies to go in and drill on lands that have been set aside by administrations to be protected. I do not believe we have reached that point where the energy crisis or challenge should be used as a battering ram to beat down that which we hold sacred in this country. I think it is pretty clear, on a bipartisan basis, that at least Senators in this Chamber do not want to see us drill for oil in the Arctic National Wildlife Refuge, as President Bush has proposed.

I think it is also clear when it comes to drilling off our coastal shores, there are many States, including the State of Florida—coincidentally, governed by a man with the same surname as the President—that don’t want to see drilling offshore. They think it is too dangerous when it comes to spoiling the beaches and the recreational activity that are part of the States of Florida, California, and others.

This amendment says there is also an area of America we should take care not to exploit as well, and it is the national monument space.

The Senator from Montana has offered a motion to table my amendment. He opposes it. He has stated his position very effectively. But I would implore my colleagues on both sides to understand that this is a bipartisan amendment. It is an amendment which was supported by Democrats and Republicans in the House of Representatives because when it comes to conservation and the protection of our natural resources, why in the world should this be a partisan issue?

Teddy Roosevelt was a great Republican. Franklin Roosevelt was a great Democrat. All of these Presidents set aside land that was important for future generations.

I am certain that some Republican Presidents—other than Bush in the future—will do the same. And I hope that Democratic Members of Congress will respect it. But if we are going to show respect for these national monuments,
we have to understand that allowing for the drilling of oil and gas runs the risk of spoiling a national treasure.

I hope this Senate, on a strong bipartisan vote, will reject the motion to table offered by the Senator from Montana and will enact the Durbin amendment which protects these lands and says to the Bush White House: Help us find other sources of energy, other sources of energy that do not compromise important and pristine areas in this country.

There are things we can and should do as a nation to deal with energy: Sustainablility, clean energy; finding ways to conserve; having Congress accept its responsibility when it comes to fuel efficiency in the vehicles that we drive.

These are the things that are going to help us be a better nation in the 21st century. To stick with the philosophy and notion of the 19th and 20th centuries, to drill and burn our way into the future is so shortsighted. To think we would even consider going to lands such as national monument land that has such special value to every American citizen would be a serious mistake.

I urge all of my colleagues to vote against the motion to table and, once it has been defeated, to support the passage of the Durbin amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BURNS. Mr. President, I ask unanimous consent that I may summarize my argument.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. Reserving the right to object, Mr. President.

Mr. BURNS. I will be very short.

Mr. DURBIN. I have no objection.

Mr. BURNS. The figures the Senator cited are from a USGS survey taken in 1995. Those figures have changed and moved up. No. 2, if he doesn't want people to drill there, where can they drill? How many people in this body or in this town drove an automobile or rode something here that required energy? How many? Do we close off the whole Nation because somebody is making a profit? Do we take the same mindset into agriculture, into production agriculture, as they have in Klamath Falls where 1,500 farmers cannot irrigate because of a suckerfish? It is a mindset.

I move to table this amendment for the simple reason that it will impact the country. You say only 5 percent or 2 percent of the acreage. I say to the Senator: $5 is not very much to some of us. But it is when you don't have it. We have that possibility with this kind of a mindset.

I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Wyoming (Mr. THOMAS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 42, nays 57, as follows:

[Rollcall Vote No. 229 Leg.]

YEAS—42

Allen  Conn  Daschle  Dickerson  Specter
Allen  Craig  DeWine  Edwards  Swanger
Bennett  Grassley  Durbin  Feingold  Voinovich
Bond  Hagel  Breaux  Harkin  Allen
Brownback  Helms  Running  Hutchinson  Bennett
Campbell  Inhofe  Burns  Sessions  Hollings
Cochran  Kyl  Craig  Smith (MI)  Bunning
Cornyn  Landrieu  Crapo  Steven  Bunning
Ensign  Lugar  Enzi  McConnell  Voinovich
Frist  McCain  Risch  Voinovich  Burns
Nickles  Inhofe  Hatch  Sessions  Lott
OREGON—3

NAYs—57

Akaka  Allard  Baucus  Bayh  Biden
Bennett  Breaux  Brown  Breaux  Byrd
Bingaman  Bayh  Bayh  Byrd  Cantwell
Carnahan  Bayh  Bingaman  Byrd  Cantwell
Carper  Bayh  Bingaman  Byrd  Cantwell
Chafee  Bayh  Bingaman  Byrd  Cantwell
Chambliss  Bayh  Bingaman  Byrd  Cantwell
Clinton  Bayh  Bingaman  Byrd  Cantwell
Collins  Bayh  Bingaman  Byrd  Cantwell
Conrad  Bayh  Bingaman  Byrd  Cantwell
Corzine  Bayh  Bingaman  Byrd  Cantwell
Daschle  Bayh  Bingaman  Byrd  Cantwell
Dayton  Bayh  Bingaman  Byrd  Cantwell

NOT VOTING—1

Thomas

The motion was rejected.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. DASCHLE. I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The yeas and nays have been ordered on the amendment.

Mr. NICKLES. I ask unanimous consent to vitiate the yeas and nays.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment.
The amendment (No. 879) was agreed to.

Mr. DASCHLE. I move to reconsider that vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DASCHLE. Mr. President, we have been working with the distinguished managers of the bill. I would like to propose a unanimous consent request. I think it has the agreement of both sides. I have consulted with the managers of the bill.

I ask unanimous consent the Nelson amendment be the next order of business; that it be debated for a period of 3 hours, equally divided, and that the vote occur following the expiration of the 3 hours tonight.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, I thank the distinguished Senator from Florida.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. I do not object. Would the distinguished majority leader make that verbiage “not to exceed 3 hours”?

Mr. DASCHLE. Mr. President, I would so ask, that it not exceed 3 hours; that the time be equally divided, and that there be no second-degree amendments.

The PRESIDING OFFICER. Is there objection?

Mr. NICKLES. Reserving the right to object, I ask the majority leader, I think there were two Nelson amendments, one was a 1-year and one is a permanent ban. Would you tell us which one this is?

Mr. REID. One is a year and one is 6 months.

Mr. NELSON of Florida. It is the 6-month amendment identical to the House provision, amendment No. 893.

Mr. NICKLES. I shall not object.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 893

Mr. NELSON of Florida. Mr. President, I call up amendment No. 893.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida [Mr. NELSON] proposes an amendment numbered 893.

Mr. NELSON of Florida. I ask unanimous consent the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose to prohibit the use of funds to execute a final lease agreement for oil and gas development in the area of the Gulf of Mexico known as “Lease Sale 181”)

On page 194, between lines 9 and 10, insert the following:

SEC. 1. LEASE SALE 181.

None of the funds made available by this Act shall be used to execute a final lease agreement for oil or gas development in the area of the Gulf of Mexico known as "Lot 181", as identified in the Outer Continental Shelf 5-Year Oil and Gas Leasing Program, before April 1, 2002.

Mr. BYRD. Will the distinguished Senator yield for a unanimous consent request without losing his right to the floor?

Mr. NELSON of Florida. Of course, I yield.

Mr. BYRD. I ask unanimous consent the committee amendment be agreed to, that the bill as thus amended be considered original text for the purpose of further amendment, and that no points of order be waived by this request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The committee amendment was agreed to.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Florida.

The PRESIDING OFFICER (Ms. LANDRIEU). The Senator from Florida.

Mr. NELSON of Florida. Madam President, in offering this amendment, let me frame the amendment so everyone understands the context of the amendment. In the House of Representatives’ discussion of the Interior appropriations bill some 3 or 4 weeks ago, a bipartisan amendment was offered by two Members of Congress from Florida.

The amendment that was attached by an overwhelming vote in the House of Representatives was with regard to a proposed lease sale, designated as 181, in the Gulf of Mexico, for the purpose of drilling for oil and gas. The House of Representatives, in a fairly substantial bipartisan vote passed a prohibition of the offer to auction that lease sale for 6 months. Specifically, this amendment tracks the House amendment identically, in essence saying no money appropriated under this act, the Interior appropriations bill, can be used for the purpose of offering for oil and gas drilling lease sale 181.

Lease sale 181 was originally proposed as a tract of some 6 million acres. It is in the eastern planning area of the Gulf of Mexico, an area that heretofore has not been violated with any drilling.

When the White House saw that there was considerable opposition, almost unanimous, from the Florida congressional delegation, the White House scaled back the proposal from approximately 6 million acres to some 1.5 million acres. It is in a location that starts to violate the eastern planning area of the Gulf by some 1.5 million acres, in which drilling for oil and gas could occur.

Why am I opposed to that? I could say that clearly the people of Florida have expressed their opinion over and over and over again, in huge numbers, with huge majorities, whether that be in the expressions through previous bills in previous years, by both the Senate and the House delegations from Florida, or whether that has been in the body in which I last served as an elected, statewide cabinet official of the State of Florida, in resolutions by the Governor and the cabinet of Florida opposing offshore oil drilling off Florida.

Why is there such intensity in Florida about not having drilling in the eastern planning area of the Gulf? It is simply this: We have a $50 billion-a-year industry of tourism. A lot of that tourism is concentrated along the coast of Florida. The Good Lord has given us the beneficent sugary white, powdered sand beaches. The beauty of those beaches has attracted, over decades and decades—indeed, over the last century—people to come to Florida to enjoy our beautiful environment.

It is without question in most Floridians’ minds that they see the possibility of oil spills from drilling off of Florida in the eastern Gulf planning area and it would be a devastating economic blow—a spike right to the heart in our $50 billion-a-year tourism industry.

Floridians happen to have another reason for not wanting drilling. That is the fact that we are very sensitive about our environment. As a matter of fact, so much of our tourism is inextricably intertwined with protecting our environment and protecting it. The bottom line is that Floridians simply do not want waves of oil lapping onto the beaches.

I think we will hear testimony today by those who are on the opposite side of the issue who will say that drilling for oil and gas in the offshore Continental Shelf became a lot safer. That well may be the case. But the fact is that according to the Minerals Management Service, the chance of an oil spill in lease sale 181 is all the way up to a 37-percent chance of an oil spill and that slick floating across the waters of the Gulf of Mexico and washing up onto the beaches of Florida where so much of our prized environment is displayed for the wonderful people who come to enjoy the natural bounty and beneficence of Florida.

I want to draw your attention to this map of the Gulf of Mexico. This map is very revealing with regard to the Florida story. I have talked to Senators in this Chamber who have had the White House tell them their side of the story. When they see this map, they say: I had no idea it was like that.

This map tells a completely different story. The story they are being told by the White House is that a compromise has been made that is acceptable, a compromise in which originally lease sale 181 included 6 million acres, part of which was this stovepipe that came
up close to the Alabama shoreline, which was, in fact, within about 30 miles of Perdido Key, which is our westernmost beach in the State of Florida.

What they are being told by the White House is that the compromise of shrinking lease sale 181 is acceptable because it narrows it down, as represented here by the yellow, to a tract of 1.5 million acres instead of 6 million. They point out that it is 100 miles from Pensacola Beach, and that it is some 280 miles from Clearwater and St. Petersburg. Whereas, the original lease sale 181 was 213 miles from the west coast of Florida, and still 100 miles from here up to the top of the stovepipe. Of course, it was much closer.

But what they are not telling is the full story, and that is what I wanted to show here.

The green color indicates the existing drilling leases in the Gulf of Mexico. Beyond this boundary is the eastern planning area in which there is no drilling for the simple reason that Floridians have insisted each year that the threat is too great and the risk is too great to despoil our beaches and our environment.

As well as that, the estimated future reserves were expected to be very little. In all of the Outer Continental Shelf, which includes not only the Atlantic seaboard, all of the gulf, as well as the Outer Continental Shelf off of the west coast of the United States, California, Oregon, and Washington, 80 percent of the future gas reserves are estimated to be in the area that is already being drilled in the Gulf of Mexico—not in the eastern gulf planning area. And 60 percent of the future oil reserves are estimated to be in that area that is already being drilled know the gulf planning area and the central planning area—not in the eastern planning area.

We come to the table quite naturally to make our case to the Senate, having had the case overwhelmingly made to the House already that if the future reserves are mostly off the States of Texas, Louisiana, Mississippi, and Alabama, the area already being drilled, and the future reserves are not here, why take the risk of an oil spill that would despoil some of the world’s most beautiful beaches that support the economy of Florida. To repeat myself, the Minerals Management Service says the chance of a spill in lease sale 181 is up to 37 percent. That is a risk simply not worth taking.

I think this map tells the whole story. This area has not been violated—an area called the eastern planning area. Now in the attempt at a so-called compromise, the White House is pushing 1.5 million acres that now go eastward into this area that has not been violated in the past.

As you can see, with all of this drilling activity, that yellow spot right there on this map of the Gulf is what I call the proverbial camel’s nose under the tent. You can see that dirty little nose working underneath the edge of that tent.

What is going to happen in the future? That camel is going to start crawling into that tent, and that drilling is going to proceed in an inevitable manner eastward straight for Tampa Bay. The people of Florida think that is too much of a risk.

We could talk about energy and a lot of the things that we ought to be doing that are not the subject of this particular amendment, but I am compelled to bring up the fact that, good-naturedly, if we but improve the miles per gallon for new automobiles manufactured—and there is another very controversial lease sale, the Arctic National Wildlife Refuge—by 3 miles per gallon on all new vehicles—not the existing vehicles, new vehicles—it would save the equivalent amount of energy that would be produced by all of the oil to be drilled in the Arctic.

So as we approach an energy crisis, and I am looking forward to having a debate when the Department of Energy authorization bill comes to this Chamber—what Senator Graham of Florida and I will probably be offering at that point is a complete moratorium. But for purposes of this Interior Appropriations bill, I am offering an amendment that is identical to what was adopted in the House so that if adopted here this will not be an issue in the conference committee but, rather, would be accepted in the conference committee and would become a 6-month moratorium on the offering of this lease sale.

So perhaps what we ought to do is to rethink to White House’s energy policy of drill, drill, drill. Drill in the areas where the future reserves are already proven. Drill in the areas where the States do not object to the drilling off their shore. Drill in the area where a State such as Louisiana really does not have the God-given beaches, the white sand beaches that we have in Florida that are so much a part of our economy.

Save energy by conservation. Use our technological prowess to produce an automobile that will have a much higher miles-per-gallon average.

I had the pleasure of riding in one of these hybrids. I could not believe it. It was just as comfortable. The car was just as roomy. The car had just as much pickup. In the hot summer Florida Sun, the air-conditioning worked just as well as any other car. All of the electrical demands of radio and CDs and tape players were all there, with no sacrifice.

As we drove down the road, I, as the passenger, could not help but have my eyes riveted to the TV screen in the middle of the console that showed how the engine would be running partly from the gasoline and partly from the battery, and when it was not running the battery, in fact, was recharging—a vehicle known as a hybrid. And I was astounded for my host, the driver, the owner of the vehicle, to tell me that, in fact, this hybrid got a total, in city driving, of 53 miles per gallon; that the battery, in fact, was recharging—what Senator Graham of Florida has been insisting each year that drilling for the simple reason that Florida, the area already being drilled in the Gulf of Mexico, is too much of a risk.

But I bring that point up to say that we have an old country saying here in Florida: There are many ways to skin a cat. And you don’t just have to skin that cat by saying: We are going to drill, drill, drill; and we are going to do it to the risk of a $50 billion a year tourism economy in Florida. We know in the state of Florida that by 2010, 80 percent of our tourism, our tourist dollars, will be coming from outside the nation, that the Exxon Valdez tanker did to the shores of Alaska. We also know what the winds and the wave currents can do with an oil slick in carrying it hundreds of miles within days. And, ladies and gentlemen, Senators all, it is not fair and it is not worth the risk to Pensacola and Port Walton Beach and Destin and Panama City and Mexico Beach, and all these fragile areas of the ecosystem around Apalachicola Bay, and the big bend of Florida, and down into Cedar Key and the mouth of the Suwannee River, and coming on down to the white sand beaches of Clearwater Beach and St. Petersburg, and then into the very fragile ecosystems of Tampa Bay, and the Port Manatee County and Bradenton, down to the way south past Sarasota, down near Charlotte, and into Port Myers—some of the most beautiful beaches in the world—and south of Port Myers to Naples—one of the hottest spots for new people to come to Florida and enjoy the environment of Florida—just south of there to Marco Island—a place known as the “Ten Thousand Islands”—one of the most productive fisheries in the world, and not to speak of coming on around into the Florida Straits into this beautiful land known as the Florida Keys—something that ballads have been made famous by people such as Jimmy Buffett who would tell you the same thing that I am telling you today: It is not worth the risk to the Florida environment nor to our economy. That 37-percent risk of oil drilling off of Florida could produce an oil spill that would become a slick that could travel, by wind and wave action, miles within days to despole these Florida beaches.

So I make a plea on behalf of 16 million Floridians that the Senate will debate this, understand it. Do not confuse
it by saying that this line is not over the Alabama line. Where is the Alabama line? The Alabama-Florida line runs up here as shown on this map. These are the waters of the Gulf of Mexico. And this line right here is the line of demarcation, the beginning of the eastern gulf planning area that has never been violated by drilling.

So do not listen to the arguments that this is not over the line. This is over the line, 1 1/2 million acres over the line. That simply is not worth the risk to us.

There are others who have a similar set of circumstances. I want to remind the Senators, the Senators of the Great Lakes, they do not want drilling off their shores. The Senators of New England, especially off of Maine, and that great lobster industry, they do not want the drilling there. The Senators of the eastern seaboard, with all of their tourism and ecological activities, don’t want the drilling there. The Senators off the west coast of the United States don’t want the drilling there.

The fact is, the drilling has not occurred here for years because the future reserves are simply not there. I am expecting others and I expect to be joined by my senior Senator, Mr. GRAHAM. What I will do is reserve the remainder of my time.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BREAUX. Madam President, parliamentary inquiry: What is the time sequence and who is in control of the time?

The PRESIDING OFFICER. There are 3 hours evenly divided on this amendment, and the Senator from Florida has used 25 minutes. There is an hour and a half remaining on the opposing side.

Mr. BREAUX. I yield myself 10 minutes from the time in opposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana is recognized.

Mr. BREAUX. Madam President, the subject matter is energy. I just came from a meeting with the Vice President and a group of Senators, both Republicans and Democrats, who are trying to see what we can do as a Congress to come up with an energy policy that makes sense for this country.

It is very clear that the United States at this time is in dire circumstances with regard to how we get energy, how much we get, and how much it costs. Over the last several weeks and the last couple of months, we have seen the price of gas go up. We have seen people panicking because they cannot afford their electricity bills because of the high price of natural gas. We see the uncertainty of areas of this country suffering blackouts and businesses having to close and suffer economic damage because they don’t have enough energy.

At the same time, we import 57 percent of the energy we consume every day from foreign sources. Many of these foreign sources are undependable. They are not our allies, and they certainly do not have the best interests of the United States as the premise for their operations. Yet 57 percent of our energy comes from overseas. It comes from organized cartels that regularly do things for which, if done in this country, they would go to the penitentiary.

What they do every day is fix prices of energy that we have to buy from them. They tell us how much we are going to have to pay by controlling the amount they produce. Yet we as a nation, in the year 2001, have been commodities, how we governed and energy policy to govern how we exist when it comes to energy supplies.

If we imported 57 percent of the food we eat, people would be marching on the capital of this country saying that is an unacceptable condition. Because our food obviously is important to our national security and the way we live in America. That is absolutely true. But it is no less true that when we import 57 percent of the energy, that is an unacceptable set of circumstances we must address.

How do we address it? Unfortunately, one of the ways that we have, over the years and over several administrations and over several Congresses, was to say what we were not going to do. We have said that we are not going to look for oil in the Outer Continental Shelf, which has some of the most promising resources of any place in the world off the coast of the United States; that we are not going to do anything from Canada; that those areas are too valuable and should not be touched; and through congressional moratoriums and through Presidential moratoriums, basically everything from Key West to the border of Canada is off limits: Don’t touch it.

In addition to that, when we look over to the west coast, which happens to have some of the States that consume by far the greatest amount of energy per capita, we have said, through moratoriums and Presidential, that we are not going to do anything from Canada on the west coast all the way to Mexico on our southern border because those areas are pristine, they are nice, we should not have the potential for having an oil spill.

The only area of our Outer Continental Shelf in which we have had production, which produces the greatest amount of natural gas, the greatest amount of oil and gas, and has done so for the last 60 years, of the offshore areas is the Gulf of Mexico.

We have said we are not going to touch ANWR. We are not going to touch the Arctic National Wildlife Refuge. We will not touch the monuments. We will not touch the east coast. We will not touch the west coast. But go drill for oil and gas in the Gulf of Mexico.

I represent Louisiana. I am happy with that policy because it provides jobs. It provides energy. We make a contribution to solving the energy policy of this country. We understand it. We have developed the industry. We know its faults. We know what it can do and what it cannot do, and we have done it for 60 years. The technology that has been developed in the Gulf of Mexico is the technology that is used worldwide.

Less than 2 percent of the oil that is spilled in the oceans of the world comes from offshore exploration and production activities. Where does it come from? It comes from seepage, which is natural. It comes from ballast discharges from ships. And it comes from rusty, leaky tankers that import oil from all over the world.

The Senator from Florida mentioned the Exxon Valdez. That was not a drilling accident, that was a ship accident. That was a tanker delivering oil, as they do every day to the ports of the United States, where we import 57 percent of the oil that we use, coming to this country in tankers that have a far greater risk than any risk that possibly could occur from drilling activities in the offshore waters of the entire United States.

The State of Florida, under a Democratic Governor, Lawton Chiles, our good friend and our former colleague with whom I served in the Senate, and a Democratic President of the United States—at that time, President Clinton—agreed to a lease sale 181. It was sold under a Democratic administration, and it was agreed to by a Democratic Governor. The original sale has the potential to supply Florida with as much as 7 years of the natural gas they use every day to do all their homes in the summer and to possibly heat their homes if it gets cold enough in the winter months. That sale can provide 7 years of their natural gas supplies.

They import 59 percent of the natural gas they use, yet now they say: We are going to object to a sale that has been worked out, carefully crafted, proposed by a Democratic administration, approved by a previous Democratic Governor, because it has the potential to damage their coastline.

We have done that in Louisiana for 60 years. While the beaches of Florida may be prettier than the beaches of Louisiana, I argue that the value of the coastal estuarial area is less valuable in Louisiana and Texas and Alabama and Mississippi than it is on the coast of Florida. In fact, I argue that the coastal estuaries of Louisiana are far more important in the sense that
they are the habitat for waterfowl, for
ducks, and for geese, and for finfish,
and for shrimp, and for oysters, and for
fur-bearing mammals, and for a great
thing that is important to an ecosys-

We have been able to preserve those
areas and to do so while producing the
largest amount of oil and gas for our
neighbors in the other 49 States in the
history of this country. We have done
so successfully. We have done so in a
balanced fashion, and we have done so
with a minimum impact. Is it perfect?
Of course not, but nothing is perfect.

It is fine to drive around in battery-
operated cars. I am all for that. It is
great to have windmills, and it is great
to have geothermal power. What is not
great is to import 57 percent of our en-
ergy from foreign sources which are
underdeveloped and only allow 25 percent.
If we start blocking the Gulf of Mexico?
Are we going to fight to open up Cali-
ifornia? Are we going to fight to open
up George’s Banks? That is not going
to happen.

I fully believe we make a very serious
mistake to say: Oh, let them do it over
there, but not in my backyard. We will
consume; we want it cheap; we want a
plentiful supply; but, by golly, don’t do
it in my backyard. Do it somewhere
else. We are too good to have oil and
gas production off our coast because
our beaches are clean.

Well, my beaches and coastline are
also very valuable, but we also show
that it can be done in a compatible
fashion to produce energy needs for
this country and at the same time pre-
serve and protect the environment and
wetlands.

The Democratic bill offered by the
chairman, Senator Bingaman, calls for
goffs, with lease sale 181. A
Democratic President proposed lease
sale 181, and a previous Democratic
Governor of the State of Florida ap-
proved lease sale 181. I don’t know
what has happened, and I don’t under-
stand the politics of it, but something
has changed. The administration, in an
effort to say, all right, we are going to
do something—I think what they did
was terrible. They took sale 181 and cut
it by 75 percent. They said we are going
to cut out 75 percent of the size of this
lease sale and only allow 25 percent. I
think that was a terrible decision. I
was told that.

For them to now say Congress has to
come in and postpone all of that—even
the 25 percent remaining—is abso-
lutely, in my opinion, unacceptable. If
we are going to have an energy policy
in this country that makes sense, we are
going to have to have a balanced
policy. I suggest that saying “not in
my backyard, never, ever, don’t want
to see it, let’s get it from somebody
else” is unacceptable, not prudent, and
is bad public policy. I think it is some-
thing that should not be adopted. At
the appropriate time, I am sure we will
have a vote on this. I hope colleagues
will join with me in saying that at
least in the Gulf of Mexico we can
have sensible exploration, which will be
willing to have a reasonable exploration
program in an area where we have al-
ready done it for the past 60 years.
I reserve the remainder of my time.

The PRESIDING OFFICER. Who
yields time?

Mr. NICKLES. Madam President, I
suggest the absence of a quorum.

The PRESIDING OFFICER. Without
objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to
call the roll.

Mr. NICKLES. Madam President, I
ask unanimous consent that the order
for the quorum call be rescinded.

The PRESIDING OFFICER. Without
objection, it is so ordered.

Mr. NICKLES. Madam President, I
yield my time back in opposition to
the amendment.

The PRESIDING OFFICER. The Sen-
ator from Oklahoma is recognized for
10 minutes.

Mr. NICKLES. Madam President, I
listened to my colleague and friend
from Florida on his amendment that
would basically block any production
in a large area of waters, not only off
the coast of Florida, but also off Ala-
abama, Mississippi, and Louisiana.

I have great respect for State sov-
ereignty and for listening to Senators
who are dealing with areas surrounding
their States. When they talk about the
Everglades, I want to listen. I want
them to listen to me when I talk about
Oklahoma. I have a tendency to give
great deference to Senators from their
home States. I think the Senators from
Alaska know Alaska much better than
we do, and we should listen when they
have recommendations to make about
their lands, the development of it, and
the balance of policies.

I also think we should listen to Gov-
ernors. I know this lease sale 181 was
somewhat controversial. I was kind of
disappointed. I know originally Gov-
ernor Bush of Florida was opposed to
it. He is not opposed to the modifica-
tion. The amendment of the Senator
from Florida would stop any lease in
this entire area. This lease, as modi-
ified, has been reduced by 75 percent.
The lease that we now have, which the
administration has negotiated with the
Governors of Florida, Alabama, Mis-
sissippi, and Louisiana, has been
agreed to by all of the Governors, in-
cluding the Governor of Florida.

So I am thinking, wait a minute, I
want to listen to the Senator from
Florida and give him some deference,
but this is not just off the coast of
Florida. This is not even close to the
cost of Florida. This is 285 miles from
Tampa—285 miles. If someone visits
the coast of California, they will see a
lot of refineries that are in full oper-
tion. This is within 3 miles of the coast
of California, which also prides itself
on beautiful beaches and shoreline.
They don’t want those desecrated in
any way. Neither do I. I happen to be a
fan of the beaches, and I want to keep
them as pristine as possible. But I want
to use common sense, too—285 miles
from Tampa, 138 miles from Panama
City, 100 miles from Pensacola.

I heard my colleague say, “This is
in Florida waters.” It is not in Florida
waters. This actually goes down the
borderline, and it is on the Alabama
side. The negotiated deal—and maybe
this was to get the Governor of Florida
to support this deal, but all of the
lands directly south of Florida were
take it permanently.

I agree with my colleague from Lou-
siana; I think the administration gave
up too much in the negotiation. They
took a lot of potential area—area that
is well beyond the boundaries—and said
don’t go any further. Those lands, I heard my colleague from Flor-
ida say that there is not much there.
Well, we don’t know because there hasn’t been any exploration. There is
not simultaneous desecration of the
beaches because somebody happens to
done exploring to find out whether
there is any potential for gas.

I am bothered by the fact that maybe
there are people saying, yes, we know
this is an energy problem, but don’t
touch it in my backyard. I understand
that. But this is not somebody’s back-
yard when it is 285 miles away or it
is 100 miles from the closest point to
someone’s State. That is not in their
backyard; that is a long way away.

We have a lot of facts that show that
shares royalty and lands that are
offshore areas that are close to lands
and get a higher royalty. This is not
close; this is in Federal waters a long
way from the State of Florida. The
very fact that the Governors of Ala-
abama, Mississippi, Louisiana, and Flor-
ida support this modified sale tells me
it is a reasonable compromise and one
that should not be vitiated or post-
poned indefinitely.

I know one amendment says to post-
pone indefinitely and another says for
a certain period of time. It basi-
cally says: We don’t want to drill or
explore or have oil and gas, but, inciden-
tally, we would like to have a pipeline
to run from Mobile, AL, down to south-
ern Florida because we are going to
need gas.

As a matter of fact, the State of
Florida is the third largest consumer
of petroleum products in the country. Yet
they are saying don’t drill or touch or
explore anywhere. They are 285 miles
from our coast. I find that to be in-
consistent. Are we going to say you don’t
get to use natural gas or oil? Don’t
they use oil and gas? Yes, they are the
third largest consumer of petroleum products in the country. It is a growing State. It is a coastal State. There is nothing inconsistent with having some exploration off the gulf coast.

If you listen to my colleagues from Louisiana, Mississippi, and Alabama, there is a lot of drilling off the coast of Louisiana. If you look at the map in the Venice area, and so on, there is a lot of activity in those areas. They have been able to do it in ways that preserve the beautiful environment of southern Louisiana and Mississippi. Southern Mississippi and southern Alabama also have a coast, and they have casinos, and they have a lot of tourism in those areas. They are concerned about them. It can be done in an environmentally safe and compatible manner and in a way that provides energy resources on time needed to keep the lights on, to keep the economy growing, to keep the tourists renting cars and visiting the beaches and enjoying the Florida coast. To say we want to have a moratorium on any exploration this far removed—285 miles from Tampa or 100 miles from the coastal point in Florida—I think goes way too far. At some point, somebody is going to have to say, wait a minute; use a little common sense.

I do not think, with all due respect, this amendment should be adopted. I understand the intention. I do not question the motivation of my colleagues from Florida for offering the amendment, but when the Florida Governor supports this modified lease, when the other Governors who are logistically much closer to this potential lease support it, I say let this go forward; let’s not block it; let’s not block it indefinitely; let’s not make this dependence on unreliable sources even greater.

That is exactly what we are doing. Some people are asking the question: How did we get into this energy crisis? Why are we importing 56, 57 percent of our gas needs? And that number will increase as the years go by, especially if we adopt these kinds of amendments. If my colleagues want to increase our dependence on unreliable sources, such as in the Middle East, on Saddam Hussein, people who have partial agendas directly contrary to ours, then support this amendment. It is very shortsighted for energy policy; it is very shortsighted for the well-being and future national security of our country; and it is very shortsighted for the people of Florida who need energy, who happen to live in one of the growing, thriving economies in our country which needs energy—oil and gas.

This amendment is a serious mistake. I urge my colleagues to support it. When we make a motion to table the amendment, I urge our colleagues to support that motion. Madam President, I yield the floor.

The PRESIDING OFFICER. Who yields time? The Senator from Louisiana.

Mr. BREAUX. Madam President, I am not sure who controls the time in opposition. I yield whatever time the Senator needs. Ten minutes?

Mr. MURKOWSKI. I am looking for the brilliant staff to plead my case.

The PRESIDING OFFICER. The Chair recognizes the Senator from Louisiana.

Mr. BREAUX. I will take 5 minutes off the time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BREAUX. Madam President, so that people who may be watching on their monitors in their offices can understand a couple things about lease sale 181, this lease sale did not happen overnight. As I indicated before, when President Clinton was serving in office and negotiating with Governor Lawton Chiles—two Democrats—on this lease sale 181, President Clinton said: We are going to set off limits all the areas in the eastern Gulf, but we are going to have lease sale 181.

In 1996 when they released the plan, the Governor of Florida, Lawton Chiles, expressed his appreciation for Minerals Management designating lease sale 181 to not be within 100 miles of the coast of Florida. It is 70 miles off the coast of Louisiana. It is much closer to Louisiana, but in no case is it within 100 miles of the coast of Florida. It is 285 miles from Tampa, 213 miles from their coast, 138 miles from Panama City. It is only 70 miles, as I indicated, from the coast of Louisiana.

In 1996 when we had a Democratic Governor and a Democratic President, they thought this compromise was fine and agreed to the compromise at that time and said this is something that fits into our plans for energy and thank you very much for making sure it does not come within 100 miles of the coast of Florida. That was their agreement.

It has proceeded forward under those terms until, because of opposition of the current Governor of Florida, the administration lopped off 75 percent of the sale in addition to that agreement in 1996. This amendment takes the remaining 25 percent and says we cannot have that either.

As the Senator from Oklahoma has indicated, when one is talking about a balanced energy policy in the country, this is something that is not acceptable.

The other point I will make is we have done exploration in the eastern Gulf of Mexico for decades. This is not a first movement into the eastern Gulf of Mexico. Drilling for natural gas and oil has occurred in the eastern Gulf of Mexico for more than three decades. For more than three decades we have had activities off the Destin Dome, which I happen to love, which is a beautiful part of the country. I spent many summers on the beautiful beaches in Destin.

They have not gotten anything. They have had extensive exploratory wells. Shell had in the past a bunch of dry holes right off Pensacola.

We have been drilling in the eastern Gulf for three decades. I suggest it has been done without any problems, without any spills or anything of that nature.

We have a compromise based on a compromise based on a compromise. Yet today we have an effort to say even those compromises are unacceptable.

If you have a State that imports 99 percent of the natural gas they consume, they, too, have an obligation to help contribute to the supply of something that is clearly the cheapest burning fuel in the world.

Unfortunately the area they knocked off, the top area, is the area that has the greatest potential for natural gas because the natural gas fields are flowing off the coast of Louisiana, moving in a northeast way. All the activity has been in that area. That is where the natural gas is. Unfortunately, it has already been removed. That is where most of the natural gas potential is.

As I indicated, the Minerals Management survey said if you have wholesale gas, that could supply as much as 14 years of the natural gas needs for the State of Florida. We have a compromise that people have knock off the area, the projection is, even lopping this off, it has enough potential natural gas alone to supply Florida with 7 years of their natural gas needs for cooling, operating their industries and businesses, and also for heating in the winter whenever it might be necessary on those rare days.

To say this compromise is still not acceptable is, in fact, unacceptable and the amendment should be tabled.

Mr. NICKLES. Will my colleague yield?

Mr. BREAUX. I will be happy to yield.

Mr. NICKLES. I know in the State of Louisiana and I know also in the State of Texas there is a lot of activity off the coast. I asked my staff to find out what percent of our domestic oil production and gas production right now comes from the Gulf of Mexico. They told me about 23 percent of our domestic oil and gas of our gas is produced in those areas.

That is a big chunk of our domestic production: A fourth of the oil and almost a third of our gas. Has that produced any harm to the ecology, to the environment, to the coast of Louisiana, to the wildlife which is so abundant in the southern part of the State of Louisiana?

Mr. BREAUX. The Senator makes a very good point. I answer his question with two points. Some in Florida—and I understand their argument—say we have beautiful beaches; we do not want oil to be spilled around our beaches.
I do not want it to happen either. I argue the wetlands in Louisiana, which are about 25 percent of all the wetlands in North America, with the wildlife—the birds, the ducks, the geese, fish, shrimp, oysters, fur-bearing animals, alligators—all of that ecosystem which is probably the most complicated anywhere in the world. It has been called the salad bowl of Florida. What is the true understanding of what this risk is? What are we talking about developing? We are talking about developing, in this lease sale, a significant, known deposit of natural gas.

When you take natural gas out of the reserve and you take it ashore and condition it, basically you are taking out the impurities, the wet gas. You are taking the oil that happens to be mixed in, you are taking it ashore, conditioning it, and then moving the clean gas, in theory, to Tampa where it would be utilized for the benefit of Floridians.

What is the risk associated with that conditioned gas? It is pretty minimal. If you had some kind of fracture of that pipeline, you are not talking about unconditioned gas, which includes oil and various components associated with hydrocarbons; you are talking about pure, conditioned gas. It would bubble up and dissipate. You are not talking about moving crude oil or the risks associated with crude oil from a pipeline.

We have heard of the NIMBY theory: not in my backyard. I think that has been pretty well exercised. But one of the things that is frustrating—obviously, I do not have a constituency in Florida, but I am sensitive to the concerns of my friend from Florida relative to what is good for his State. But at what point do we have a reasonable definition of what is offshore of my State or the State of Louisiana or any other State? This is 265 miles, in one case, to this area which is now the alternative that has been agreed upon. According to my understanding, it has been agreed upon by basically all the parties concerned.

The Secretary of the Interior modified the boundaries of the lease sale in response to the concerns of the State of California, the Governor of California. The indication by this agreement is there will be absolutely no new leases off the coast of Florida. They have modified the sale to one-fourth of the original lease area. What constitutes a reasonable determination of what is offshore? We used to have the 3-mile limit. We have the 12-mile limit. We have the economic zone. Now we are moving out to 265 miles to offshore and we are saying that is offshore. I think we have to be reasonable.

Therefore, the amendment proposed by my colleague from Florida that would cancel the authorization for the lease sale, as I believe, to state in my own opinion, is rather unrealistic. I want to show another chart because I think it reflects a reality that is occurring. That is the NIMBY theory: not in my backyard. We have taken the entire east coast off limits for oil and gas exploration. We have taken an area of the over-thrust belt in Montana, Colorado, Wyoming, a number of States known to have significant deposits of natural gas. As I recall, it is about 23 trillion cubic feet of natural gas that was found in this area, known to exist, available for commercial recovery, and with the last administration banning road access into these areas we made these areas off limits. Where is the energy going to come from in this country?

If we look at realities associated with the status of the OCS leasing program as evidenced by the next chart, I think we can get a better understanding of just what is happening.

These are various provinces. These estimates show oil and gas potential reserves; whether you start in Washington-Oregon or northern California or central California, southern California, you note and identify reserve estimates of considerable merit. The only problem is the areas were withdrawn from leasing through January 30, 2012. These were done, for the most part, without any public hearing process before congressional bodies. These were done at the request of individual Members, attaching riders to legislation moving on the floor. So they really have not been subject to any debate. Some have been included in previous Interior appropriations bills. If you look at the entire east coast, you will look at the North Atlantic area, the mid-Atlantic area, the South Atlantic area, all with considerable oil and gas potential from the estimations of the estimated reserves. They, too, are off limits—everything in the buff color.

If we go down to Florida the same thing is true in the eastern Gulf of Mexico; it is off limits. The remaining area, the blue area, is off the coast of Texas, Louisiana, Mississippi, and Alabama. The occupant of the chair is well versed, obviously, in the significance of what oil and gas development does in the State of Louisiana. But why should Louisiana alone, and to a degree Texas and Alabama and Mississippi, have to bear the brunt of the requirements of the rest of the Nation when they do not have to share in any of the impact?

The occupant of the chair was very active in CARA legislation last year, which was to suggest that, indeed, these States impacted deserve some consideration associated with the impact of activity off the shores of Louisiana, Texas, Alabama, and Mississippi—and we have on the table that was not resolved to the satisfaction of those of us who supported it. That was, indeed, unfortunate. We are going to come back again. Because if you are...
looking to just a few States to support the rest of the Nation, those States that have to bear that impact are enti-
tled to some consideration. The con-
sideration was to come from the Fed-
eral account associated with oil and
gas funding that came into the Treas-
ury.

I think we have, if you will, an obli-
gation to address the responsibility of
those States that have to bear this bur-
den and have not been given the cour-
tesy, or the consideration of any shar-
ing of funds that go into the general
fund, a portion of which should cer-
tainly go to these States.

As we look at reality, again the red
indicates existing leases; the buff color
is the national marine sanctuaries; we have our balance of payments. I could go on
security of this Nation. We sacrifice as
of war in the minds of many.

ocean when you stop all shipping. That
poses is similar to what you do in the
hand we are enforcing an air embargo.
we are importing oil and on the other
relationship with Iraq, on the one hand
can't capability in producing energy.
who have traditionally had a signifi-
merits of the OPEC cartel and others
to be beholding more and more to the
improvements in producing energy.

I think the amendment by the Sen-
ator from Florida really is unneces-
sary. You have an agreement now. It
appears that most parties are happy.
Again, if the argument of the Sen-
ator from Florida prevails, then to
what extent are we going to limit, if
you will, reasonableness in deter-
moving where a lease sale offshore can
take place, if one can't take place as
proposed in the amendment between
213 and 285 miles offshore?
For the time being, that pretty well
account for my opinion. The ne-
necessity of recognizing where energy
comes from and the reality that we
have a workable compromise which
which certainly seems fair and equitable.

When you consider reasonableness on
the distance from the coast of Florida,
the reality that Florida will benefit in
land from either, Louisiana, Missis-
sippi, or Alabama, then across coun-
try and down into Florida, Floridians
will then be paying undoubtedly a
higher price. But the most efficient
way to transport their gas is through a
pipeline to Tampa.

The PRESIDING OFFICER (Mr.
REED). Who yields time?
Ms. LANDRIEU. Mr. President, I do.

The PRESIDING OFFICER. Without
objection, the request of the Senator
from Louisiana is agreed to.

The Senator from Florida.
Mr. NELSON of Florida. Mr. Presi-
dent, I want to respond to some of the
things that have been said on the floor.
The Senator from Alaska has referred
to the proponents of this amendment
taking their bodies in front of the
train, a vehicle, or whatever. I gladly
do so because of the stakes that are in
this for the State of Florida.

I would like to point out that accord-
ing to the statistics compiled by the
Department of Interior, during the pe-
riod between 1980 and 1999—almost two
decades—some 3 million gallons of oil
was spilled from Outer Continental
Shelf oil and gas operations in 73 inci-
dents. In addition, in one incident in
April of this year, more than 90,000 gal-
ions of salt water and crude oil spilled
out of a pipeline in Alaska's North
Slope, becoming the fourth major inci-
dent there.

I point out the Department of Inte-
rior statistics simply to counter the
perception that all of the Senators who
have spoken in opposition to this amend-
ment, of invading the eastern Gulf by drilling in an area which here-
tofore has been off limits to drilling,
come from an oil-producing State.
What do you expect? They articulate
the interests of the economic engines
of their State. But when they give the
impression that, in fact, offshore oil
drilling is so safe, that there is no risk,
and say instead the risk is in tankers, indeed, we know the risk in tankers because we saw what happened with the Exxon Valdez. But then when they point out the fact that oil drilling and gas drilling is so safe and there are no spills, that is not what the facts say as compiled by the Department of the Interior.

Some 3 million gallons of oil from Outer Continental Shelf have been spilled in 73 incidents in time period between 1980 and 1999.

I want to clear up another statement that was made. It is stated there is all this oil out there. That is contrary to all of the engineering and the technology we have seen.

Indeed, let me tell you what has been estimated is in this lease sale 181. It is not some huge find. In this new lease sale, of all of whom are from 10 days’ worth—10 days, T-E-N, 1–0—of energy for this country. Is that worth the risk to an industry that needs to protect its beaches and its environment? I say that it is not worth the tradeoff. It is not worth the risk.

As a matter of fact, the Natural Resources Defense Council has stated that in the eastern Gulf of Mexico, where the oil and gas industry has been pressing to drill—this area that, as you can see, is not violated, including this area shown on the map that is shaded in yellow, which is the subject of the lease sale we are trying to block—indeed, it said 60 percent of the Nation’s undiscovered economically recoverable Outer Continental Shelf oil and 80 percent of the Nation’s undiscovered economically recoverable Outer Continental Shelf gas is located in the central and western Gulf of Mexico.

So protecting this area that for years we have been the moratorium on because of its sensitivity to the ecology and economy of the surrounding areas—protecting that area will still leave a vast majority of the Nation’s Outer Continental Shelf oil and gas available to the industry.

According to one study that even minimizes the risk of an oil spill, the chance of an oil spill in this area is as high as 37 percent. That is according to the Minerals Management Service.

So I want to respond to my colleagues, Senator Daschle, all of whom are from the oil and gas States against the one State of Florida, and for the sake of our Nation of this moratorium. For the sake of Florida, and for the sake of our Nation, I ask for your support.

I reserve the remainder of our time and yield the floor.

Mr. DASCHLE. Mr. President, we have been consulting with Senators on both sides of the aisle. I appreciate very much the help and cooperation of both our managers. I am now at a point where I can make a unanimous consent request.

I ask unanimous consent that the vote in relation to Senator Nelson’s amendment No. 893 occur tomorrow morning following the swallower of the cloture vote on the motion to proceed to the House bankruptcy bill, H.R. 333, and that there be 4 minutes of debate equally divided between the votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, in light of this agreement, there will be no further votes today. We will resume consideration of the bill tomorrow after the cloture vote. The managers have indicated to me that they believe we can finish the bill tomorrow. If we finish the bill tomorrow and dispose of the Griles nomination tomorrow, then we will have no other roll call votes on Friday or on Monday. There will be tomorrow, as I noted in the unanimous consent request, a debate for a period of 3 hours, beginning at 9 o’clock, on the House bankruptcy bill, H.R. 333.

Following that, we will then come back to the Nelson amendment on which we have 4 minutes of debate equally divided.

The PRESIDING OFFICER. Under the previous agreement, the Senator from Louisiana is recognized.
That might make some sense initially in its first blush. However, the fact is, every State produces some food products, some produce wonderful oranges. I have enjoyed them every year. Louisiana produces some as well. The State of the Presiding Officer has commodities of which it is proud. Some of us grow cotton. Some of us grow soybeans. Some of us grow wheat. Some of us run cattle. Some of us grow other food products. We all contribute to the overall food supply of this Nation.

While we don’t all grow the same crop, while we don’t all run the same kind of cattle or livestock, every State in the Union contributes to the food supply of this Nation. That is the way it should be.

Every State should also contribute to the energy supply of the Nation. We have great resources in oil and natural gas. In addition, there is clean coal, nuclear and hydropower. We have a diversity of fuels to choose from in this nation and we should make use of all of them.

This attitude of “I want to consume the power, but I refuse to produce the power” has got to come to an end. It is not fair. It is not right. It is not smart. If we get caught up in this hysteria, we are going to leave this Nation into a dangerous place where our businesses are hurt and our economy cannot survive.

Let me talk about the State of Florida.

The State of Florida is the third largest consumer of petroleum products in the Nation. The State of Florida only produces, however, roughly 2 percent of the petroleum that it consumes and a very small percentage of the natural gas.

From 1960 to 1994, Florida’s electrical demand increased 700 percent. It is not the only State that has increased its demands, but it has been one of the fastest growing States. We are all happy and proud of the development in Florida and we want Florida to continue to grow and to expand, as we want all of our States in this Union to grow and to prosper but it must hold up it’s end of the bargain as well.

From 1960 to 1994, Florida’s fossil fuel use for electrical generation, made necessary by this extraordinary growth in population and electrical demand, has increased 551 percent. More than 80 percent of Florida’s electrical demand is met today by fossil fuels.

Right now Florida, as every State, uses energy produced by fossil fuels. In south Florida, the natural gas demand for electricity generation purposes is expected to double by the year 2008. However, there are no increases in the number of new nuclear power or hydroelectric power foreseen in Florida to supplement this need.

There is rising demand in Florida but it makes it quite difficult for those of us from Alabama and Florida to want to help in Florida when they are not willing to help themselves. It makes it very difficult for us to help Florida when they are not willing to help themselves.

There is not yet the significant increase in solar or wind production in Florida or generally in the United States, to adequately take the place of fossil fuels. Although those technologies are very promising we have not made the adjustment yet. I disagree with the President’s decision to cut funding for those kinds of research and development projects. We need to increase funding.

In addition, from 1995 to 2002, a minimum of 24 new electrical generating plants will be added to Florida’s power grid, and 21 out of the 24 new plants to get the gas that are being designed today have to run by natural gas.

This amendment doesn’t make sense for Florida. It doesn’t make sense for Louisiana, Alabama, Texas, Mississippi, or the Nation but it certainly does not make sense for Florida. Florida needs more natural gas, not less.

I grew up on the beaches of Florida and appreciate their beauty. My family vacations all over the gulf coast. The compromise announced by the Administration, which is threatened by this amendment, allows us to salvage almost half of the natural gas and oil resources from the original lease sale area and is more than 100 miles from any part of Florida’s coast.

It is not just Louisiana or Florida waters where there is gas and oil but the waters of the United States. In this day and age we can drill with minimal footprints and minimal risk to not only the Florida coast, but the entire Gulf coast. States such as Florida, Mississippi, Alabama and Georgia with the power we need to grow.

I want to talk about that growth for a minute. When we talk about growth, we are talking about jobs, about people creating wealth, about people having a dream to start a business, about a new family buying their first home, and the electricity they need to run that home. This is about people who need to get to work, and the transportation they need to get to work. This isn’t about mere statistics. If we can’t power our economy, how can people feed their children and families?

Let me talk about risk for a moment.

We have had people come on the floor and say we can’t risk the beaches. However, in reality there is minimal risk. As the senior Senator from Louisiana pointed out, there is minimal risk associated with drilling. There is more risk from the possibility of oil spills when tankers have to transport the oil to our country.

This amendment, and others like it, will not decrease the risk, it will increase the risk because we will have more tankers coming into this Nation. The environmental leaders should be strong enough in this Nation to stand up and admit this.

There are also other risks to consider. The risk of a recession. I want the President to know I strongly disagree with his decision to modify this lease sale. He should have held his ground. We should be exploring for oil and gas in this entire lease sale area as originally proposed. If we do not supply states such as Ohio, California, Illinois or Louisiana, with the oil and natural gas to generate the power they need, we risk jeopardizing the economic future for our Nation. So if we are going to talk about risk, let’s not just talk about environmental risk, let’s talk about other risks to this Nation.

Another important risk to consider is tax revenues. The risk of a compromise announced by the Administration, which is threatened by this amendment, allows us to salvage almost half of the natural gas and oil resources from the original lease sale area and is more than 100 miles from any part of Florida’s coast.

It is not just Louisiana or Florida waters where there is gas and oil but the waters of the United States. In this day and age we can drill with minimal footprints and minimal risk to not only the Florida coast, but the entire Gulf coast. States such as Florida, Mississippi, Alabama and Georgia with the power we need to grow.

I want to talk about that growth for a minute. When we talk about growth, we are talking about jobs, about people creating wealth, about people having a dream to start a business, about a new family buying their first home, and the electricity they need to run that home. This is about people who need to get to work, and the transportation they need to get to work. This isn’t about mere statistics. If we can’t power our economy, how can people feed their children and families?

Let me talk about risk for a moment.

We have had people come on the floor and say we can’t risk the beaches. However, in reality there is minimal risk. As the senior Senator from Louisiana pointed out, there is minimal risk associated with drilling. There is more risk from the possibility of oil spills when tankers have to transport the oil to our country.

This amendment, and others like it, will not decrease the risk, it will increase the risk because we will have
CONGRESSIONAL RECORD—SENATE
July 11, 2001

S. RES. 127

COMMENDING GARY SISCO FOR HIS SERVICE AS SECRETARY OF THE SENATE

Mr. LOTT. Mr. President, I ask unanimous consent that the Senate now proceed to the immediate consideration of S. Res. 127, which is at the desk, and that the resolution be read in total.

The PRESIDING OFFICER. The clerk will report the resolution.

The legislative clerk read as follows:

A resolution (S. Res. 127) commending Gary Sisco for his service as Secretary of the Senate:

S. Res. 127

Whereas, Gary Sisco faithfully served the Senate of the United States as the 29th Secretary of the Senate from the 104th to the 107th Congress, and discharged the difficult duties and responsibilities of that office with unfailing dedication and a high degree of competence and efficiency; and

Whereas, as an elected officer, Gary Sisco has upheld the high standards and traditions of the United States Senate and extended his assistance to all Members of the Senate; and

Whereas, through his exceptional service and professional integrity as an officer of the Senate of the United States, Gary Sisco has earned the respect, trust, and gratitude of his associates and the Members of the Senate; Now, therefore, be it

Resolved, That the Senate recognizes the notable contributions of Gary Sisco to the Senate and to his Country and expresses to him our appreciation for his dedicated professional integrity as an officer of the Senate and all Members of the Senate; and

Resolved, That the Secretary of the Senate shall transmit a copy of this resolution to Gary Sisco.

There being no objection, the Senate proceeded to consider the resolution.

Mr. LOTT. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 127) was agreed to.

The preamble was agreed to.

Mr. LOTT. Mr. President, I wanted the entire resolution to be read in the Record. I did want a complete record of the appreciation of the entire Senate for Gary Sisco who has served so capably over the past 5 years as the Secretary of the Senate.

I appreciate Senator Daschle joining me for this time because he knows, as I know, that we have some very dedicated officers of the Senate and other employees of our floor staff who put in long hours and do a great job in making this institution function the way it should. We do not say thank you enough to those who serve in the Chamber with us who make it possible for us to do our job, and we do not say thank you enough to the officers of the Senate, people such as the Secretary of the Senate, the Sergeant at Arms, the Chaplain, and others who work every day to help make this place function.

I have a very personal warm feeling for Gary Sisco. He is from Tennessee. He was born in Bolivar, TN, a small blue-collar town. He grew up in strictly a blue-collar family. I believe his father did serve for a period of time as sheriff in that county in Tennessee.

I got to know him only because of my friend, the Senator from Tennessee, the Senator who lives in Bolivar, the Senator who now sits in that same Senate, the Senator who represents the people of this State in the United States Senate, the Senator who represents this State in the Senate. I got to know him as a friend.

He wound up having a blind date with his now wife, thanks to the arrangement of my wife, Mary Sue Sisco from Pascagoula, MS.

He went on to work with IBM after graduation and was involved in gubernatorial campaigns in Tennessee. He served Gov. Lamar Alexander, and then wound up in Washington and worked for Gary Adams as his administrative assistant. He worked for Howard Baker reaching the position of executive assistant. He then returned to Tennessee and had a very successful business life.

Five years ago, I called on him and said: We need somebody who understands computers, somebody who understands how to manage a pretty good size operation, somebody who has political instinct and knows and loves the Senate. You are the man.

He left his business in Nashville, TN, and came to Washington and has been in the position of Secretary of the Senate for 5 years. He has done a wonderful job.

The only thing I ever asked of him was: Gary, when we have a few things we want to discuss, will you have time to discuss them? He would always say yes. I do not think I have ever had to ask him if he was going to be there, because he was always there.

I believe Gary Sisco has achieved more than any of us could have expected. He has served and contributed in every aspect of this institution.

SASCHLE. Mr. President, first, I compliment the distinguished minority leader on his remarks. I appreciate very much the opportunity to address the resolution this afternoon.

Five years ago, Gary Sisco came to Washington and came to the Senate as Secretary of the Senate with the full confidence of then-majority leader Trent Lott. Today he leaves the Senate, leaves his job as Secretary of the Senate, and I believe the Senate also has that feeling for them.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. DASCHLE. Mr. President, first, I compliment the distinguished minority leader on his remarks. I appreciate very much the opportunity to address the resolution this afternoon.

In conclusion, we do not want to drive this industry off the shores of our Nation to other places in the world. We need our military presence there for economic as well as national security reasons.

I urge my colleagues to vote against this amendment. With all due respect to my good friend, the Senator from Florida, this is not the right direction in which to lead our Nation.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. LOTT. Mr. President, this is not related to the issue at hand, although I want to speak on that under whatever time I am entitled. This is under leader time on a resolution. I believe Senator Daschle will be joining me momentarily. We want to be sure to do this when we both can be here.

As Senator Daschle has noted, the mark of a good and able public servant is one who leaves his job in a better position he is, Senator Daschle had agreed, frankly, that the officers of the Senate should stay on through this session of Congress, whether or not the majority might change. So I know he would have kept his word and Gary could have stayed, but he submitted his resignation, and I agreed that I think the majority leader should have officers of the Senate of his selection. It was the right thing to do, but it was his idea; it was not mine.

Senator Daschle has been very gracious in the way he has treated the employees in the Office of the Secretary of the Senate. He has selected an outstanding, capable, experienced person and one who also understands the Senate very well, Jeri Thomson. I know she will continue the great legacy Gary Sisco has built.

To my colleagues in the Senate, I thank them all for the courtesies and support they have given to Gary Sisco, and I wish my friend the very best in his next career.

Some of us, as Senator Daschle and myself, have been here in the Congress many, many years now, in my case 28 years. I have to confess, in a way, I am a little envious of a guy who was in the business world, back in the Senate arena, and is now going out to the next stage of his life. I am sure it will be an outstanding one.

I, again, extend my best wishes to Gary Sisco, his wife Mary Sue, and their children. I know they will always have a special feeling in their hearts for the Senate, and I believe the Senate also has that feeling for them.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. DASCHLE. Mr. President, first, I compliment the distinguished minority leader on his remarks. I appreciate very much the opportunity to address the resolution this afternoon.

In conclusion, we do not want to drive this industry off the shores of our Nation to other places in the world. We need our military presence there for economic as well as national security reasons.

I urge my colleagues to vote against this amendment. With all due respect to my good friend, the Senator from Florida, this is not the right direction in which to lead our Nation.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. LOTT. Mr. President, this is not related to the issue at hand, although I want to speak on that under whatever time I am entitled. This is under leader time on a resolution. I believe Senator Daschle will be joining me momentarily. We want to be sure to do this when we both can be here.

As Senator Daschle has noted, the mark of a good and able public servant is one who leaves his job in a better position

SEC. 2. The Secretary of the Senate shall

shall transmit a copy of this resolution to Gary Sisco.

There being no objection, the Senate proceeded to consider the resolution.

Mr. LOTT. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. The resolution (S. Res. 127) was agreed to.

In conclusion, we do not want to drive this industry off the shores of our Nation to other places in the world. We need our military presence there for economic as well as national security reasons.

I urge my colleagues to vote against this amendment. With all due respect to my good friend, the Senator from Florida, this is not the right direction in which to lead our Nation.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. LOTT. Mr. President, this is not related to the issue at hand, although I want to speak on that under whatever time I am entitled. This is under leader time on a resolution. I believe Senator Daschle will be joining me momentarily. We want to be sure to do this when we both can be here.

As Senator Daschle has noted, the mark of a good and able public servant is one who leaves his job in a better position
than when he came. I can say without equivocation Gary Sisco has met that test. It has been my pleasure to work with him, I want to admire him and respect him, and I also respect the position he has taken with regard to this particular resignation.

I confirm exactly what Senator LOTT has just noted, that because of my respect not only for Senator Lott but for Gary Sisco and the Sergeant at Arms, it was my view, in keeping the continuity of the officers of the Senate, as well as because they were serving us so well, they had every right and could have every expectation that regardless of what may happen to the majority in the Senate, they would have the full confidence and have the full support of both caucuses for the duration of this Congress.

Gary Sisco has made his decision, and I respect it, but I do so with a great deal of appreciation. I do so with the hope that he will come back often. I do so with a realization that in this business we get to work with quality people, people who give back to their country, to their community, and to each of us in ways that I think is admirable. He has done so. Our country owes him a debt of gratitude. This Senate owes him a debt of gratitude.

On behalf of our caucus, I thank him for all he has given us. I yield the floor.

Mr. LOTT. Mr. President, again, I thank Senator Daschle for coming to the Chamber and making that statement, and I look forward to working with him and the new Secretary of the Senate to continue the very efficient and fine way the Senate has been conducted, in the way the Office of the Secretary of the Senate has been run. I know he will do a great job.

Mr. President, I do not know who is controlling the time now, but I want to be yielded time to speak against the pending amendment.

Several Senators addressed the Chair.

Mr. SESSIONS. Mr. President, will the majority leader yield for 1 minute to comment on Mr. Sisco?

Mr. LOTT. I will be happy to do so.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. LOTT. I yield to Senator Sessions from Alabama.

Mr. SESSIONS. Mr. President, I thank the Republican leader and the Democratic leader and others for their kind comments about Gary Sisco.

In short, he is one of the finest people I know. He served the Senate with great integrity, ability, and fidelity. He has a wonderful family, high personal values, the kind of person you like to call your friend, you want to have in your home. He has served so well, and he leaves with grace and style quite in harmony with his whole lifestyle. I thank Senator LOTT for raising this point, and I join in his compliments.

Mr. LOTT. I believe the time has been off the leader time.

The PRESIDING OFFICER. That is correct.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—Continued

AMENDMENT NO. 893

Mr. LOTT. Mr. President, I rise to speak against the pending amendment. My question is, If we are not going to have exploration in the Gulf of Mexico in a limited area for oil and gas, where are we going to do it? Not in the Atlantic along the coast. Not in the Pacific along the coast. Some people say not in Alaska in the area that has been pursued. Then I believe we can do it effectively, efficiently, responsibly, and productively in the Gulf of Mexico.

For years, exploration in the gulf and, in fact, drilling activity occurred primarily in Texas and Louisiana waters. Then, in more recent years it has moved over under Mississippi and Alabama. It has been very productive.

This is an interesting map to which others have referred. The Florida coastline goes to Pensacola, Alabama with Mobile, Biloxi, and New Orleans. I live right here; that is where my house sits. I can step off my front porch and put a rock in the Gulf of Mexico. I can sit out on my front porch and I can see a natural gas well working right in this area. In the daytime you can see it. It is clear. And at night sometimes they flare it off. It has never been a problem and it is producing natural gas. As a matter of fact, it is closer to my front doorstep, literally, than it is to Panama City, Florida, or Pensacola, or Biloxi. I can sit down and I am perfectly comfortable with this. There is no risk.

Those who live in the gulf area know that some of the most effective drilling and exploration drilling anywhere in the world is done in the gulf. It has become more efficient, with greater accuracy. If there has ever been a spill in the gulf, it must have been very minor and certainly never affected my State, I don’t believe, since we have had the drilling off the coast of Alabama and Mississippi. I don’t believe we have ever had one.

It also is a wonderful place to fish around the oil rigs. We take old liberty ships out and sink them in the gulf so they will form fishing mounds. It is very effective. The rig serves the same purpose.

But now we have people who say we should not have it in the Gulf of Mexico, or we should delay it even further, even though there has been a compromise. I think this whole area should be opened up for lease. But now it is down to just this green area, a very small area. The Governors of the States that are involved—Louisiana, Mississippi, Alabama, and I believe this compromise provision is supported everywhere—Job Bush—all of our leaders with all of the people who live in this area support this.

What are we going to do? We are depending on foreign oil for 56 percent of our energy needs, and it is going up. It will be 60 percent. Can we get everything we need just from wind and sun? If we triple what we got from those areas, it wouldn’t get us at 6 percent. As I said before, maybe we will have to harness some of the speeches around here to produce more energy needs in this country. But we need exploration for oil and gas. We need to look at greater use of nuclear power. We need to take advantage of clean coal technology. We do need alternative sources of energy—wind, solar, hydro. We need energy to keep the economy growing. I do so with a realization that in this Congress, if the American people realize this, the economy will have difficulty paying for the cost of the oil, of the electricity, of the gas. This makes no sense.

Are we going to have this national security risk, facing the danger of loss of freedoms in America? Who thinks gasoline prices will not go up again next summer? They are. And so will diesel fuel prices. The families won’t be able to afford to drive to their vacation spots. The small business men and women are going to have to pay their electricity bills. The farmers will have difficulty paying the cost of diesel fuel for their tractors. It will ripple through the economy.

This is probably the most serious problem this country faces today. Meanwhile, we fiddle in Washington while the country has a heat stroke and is threatened with not having the energy to keep the economy growing. I think the American people realize this is a very serious problem. Some people shy away from calling it a crisis, OK, don’t use that word. There is no imminent danger now. But there could be tomorrow, there could be next week.
Mr. GRAHAM. Mr. President, I am proud of my colleague from Florida, Senator BILL NELSON, as we offer my amendment to help assure that America will have a policy of energy that is also a policy for our economic future and for the protection of important environmental treasures.

Let us clearly understand what the amendment we offer will do. It will provide for a short, 6-month delay in the leasing of property in the area that is known as lease sale 181. This short delay, 6 months from the time the bill is enacted, will allow time to make some important decisions before we are committed to an option that may not be in the best interests of our Nation.

This is also an issue, while it is today in the eastern Gulf of Mexico, the exact same issues which I will speak about are relevant to other areas of the country which share a similar concern, whether or not it is on the Atlantic coast. I heard this weekend of concerns off the northeast coast regarding a proposal for drilling in an area that has been very significant parts of the American tradition and history of commercial fishing for hundreds of years.

We know our friends who live in the area of the coastal lakes are concerned about proposals for drilling in Lake Huron and Lake Superior—again, areas that have in the past been off limits for drilling. California is another area that has expressed concern about the proposals for drilling under the rules as they currently exist.

While this may be characterized as a Gulf of Mexico issue, or even more specifically a Florida issue, it raises important implications for the Nation.

Mr. NELSON of Florida, I yield to my colleague, the senior Senator from Florida.

Mr. NELSON. Senator DASCHLE said we will focus on appropriations bills. He is right for doing that. We should try to help him move the energy bill. We will not get to a free-standing energy bill probably until the fall. But we should do it. In the meantime, we should not take this step of prohibiting or delaying exploration and development of the resources that we know are in the Gulf of Mexico.

My beach is closer to this area than the beaches in Florida. I say, bring it on. I am worried about the future of my country and my children’s economic future. I urge my colleagues, this should be an overwhelming bipartisan defeat on an amendment that really, in view of all that has gone on, should not be passed.

I thank my colleague from Louisiana for yielding me this time.

The CHIEF JOE OFFICER. The Senator from Florida.

Mr. NELSON of Florida. I yield to my colleague, the senior Senator from Florida, such time as he consumes.

Mr. GRAHAM. Mr. President, I am proud of my colleague from Florida, Senator BILL NELSON, as we offer this amendment to help assure that America will have a policy of energy that is also a policy for our economic future and for the protection of important environmental treasures.

Let us clearly understand what the amendment we offer will do. It will provide for a short, 6-month delay in the leasing of property in the area that is known as lease sale 181. This short delay, 6 months from the time the bill is enacted, will allow time to make some important decisions before we are committed to an option that may not be in the best interests of our Nation.

This is also an issue, while it is today in the eastern Gulf of Mexico, the exact same issues which I will speak about are relevant to other areas of the country which share a similar concern, whether or not it is on the Atlantic coast. I heard this weekend of concerns off the northeast coast regarding a proposal for drilling in an area that has been very significant parts of the American tradition and history of commercial fishing for hundreds of years.

We know our friends who live in the area of the coastal lakes are concerned about proposals for drilling in Lake Huron and Lake Superior—again, areas that have in the past been off limits for drilling. California is another area that has expressed concern about the proposals for drilling under the rules as they currently exist.

While this may be characterized as a Gulf of Mexico issue, or even more specifically a Florida issue, it raises important implications for the Nation.

Let me discuss two of those issues to which the 6-month delay we are requesting through this amendment.

First, the current laws that govern Outer Continental Shelf drilling in my judgment are imbalanced. They do not take into consideration to other factors in addition to energy production, factors such as economic and environmental needs. We are all aware that America has needs for increased energy production. We are not insensitive to that. But we also are not myopic, that that is the only issue America needs to take in the balance in making these judgments. We believe balanced legislation on Outer Continental Shelf drilling would include the other factors that might be affected by that drilling. Let me give, as an example, what is happening today as a result of our law.

A number of years ago, leases were granted in these areas that are within 40 miles of the coast of Florida. Those are depicted on this map in the light pink and blue. The blue area is what is called Destin Dome. It is an area that is approximately 35 miles south of Pensacola. That lease has been outstanding for a number of years but was dormant. Then a few years ago the owner of that lease, the Chevron Oil Company, made an application for a drilling permit, to start production on that property. What was discovered was that basic environmental analysis, which in my judgment should have preceded the base being granted in the first place, had not been done and it was deferred until the drilling permit was requested. As an example of those basic studies, one of them is the Coastal Zone Management Act. The Coastal Zone Management Act is administered in a joint program between the U.S. Department of Commerce and the various coastal States affected. The result of that analysis of the Coastal Zone Management Act was a determination by the State of Florida that it was a violation of the act and of the management plan, which had been approved by the U.S. Department of Commerce, to drill on this Destin Dome. That has now precipitated a series of litigation and administrative actions which have drawn the process out for many years.

In my judgment, the lesson of Destin Dome is let’s do the environmental surveys before we grant the lease, before we create the expectations that a lease carries with it, before people apply for the permit to drill, so we have satisfied ourselves on environmental, economic, and the other considerations that this is a property which will be appropriate to drill should a lease be granted.

One of the things we could do, during this 6 months of deferral, would be to do an analysis of our current law to see if it is appropriately representing the wide range of interests that should be considered. We know we are going to be doing a major energy bill sometime in the next few months. Our Republican leader has indicated he thinks that will be on the Senate floor sometime this fall. I know the chairman of the Energy Committee is driving a schedule that would have it come through committee this month. So we are not talking about long delays. We are talking about legislation that is viable at this moment and would be the appropriate means by which to raise these issues as to whether our current laws are adequate to represent the range of interests.

The second point I would make, that in my opinion justifies the 6-months delay in those leases which the House of Representa

CONGRESSIONAL RECORD—SENATE

July 11, 2001
July 11, 2001

Mr. BURNS. Mr. President, I watched the debate with a great deal of interest. I can only think of the amendment that I introduced last night offered by the Senator from Illinois. The Minerals Management Service has been working on this lease sale for quite a while, and includes the current 5-year Outer Continental Shelf Oil and Gas Program. This was put on the table under the Clinton administration. The service prepared the draft EIS. They have ensured that the proper public hearings have taken place, including the hearings in Pensacola, Tallahassee, and Mobile. But despite the fact that service has jumped through all of the required administrative hoops, some opponents are now trying to foul the whole thing up in the end game right before the lease, of course, is finalized.

When we took over the Land and Water Conservation Fund, it is interesting that Members who have been leaning towards voting for this amendment are the same Members who have submitted healthy requests for money out of this Land and Water Conservation Fund for some of their projects. It is also interesting to note that in this very bill, Florida has approximately $22 million in items that are funded under the Land and Water Conservation Fund. It is likely that State has been the single largest drafter on the Land and Water Conservation Fund in the last 5 years. That money is derived from royalties from offshore drilling and production. It is ironic to note that the State of Florida is actually the third largest consumer of petroleum products. However, it only produces about 2 percent of the petroleum that it consumes.

Basically, this amendment on the surface appears to be one of those 'not in my backyard' kinds of situations or games. To top it off, this amendment totally ignores the fact that last week the administration announced that it decided to reduce the size of the lease sale and in particular decided to make sure that the lease sale is much further away from Florida's shores.

A while ago, we had the amendment of the Senator from Illinois. Now we have the proponents of this amendment pleading with us to heed the local concerns for the protection of Florida's beaches, of which I would concur. I will say right now that I think the offshore drilling probably does less damage than the tankers that go up and down and unload in the Gulf of Mexico every day. They want those decisions to be made locally. But when it comes to voting on an issue that affected the West, they disregarded that.

When voting, I ask my fellow Members to put to mind the fact that this is a legislative rider that could ultimately reduce the amount of funds contributed to the Land and Water Conservation Fund, and it might interfere with our country's ability to produce its own oil and gas during a time when the country is facing a very serious energy crunch.

If local concerns are in play in Florida, why aren't they in Montana? I call that the lack of fairness. I think that is all we ever want in this body—fairness.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. SESSIONS. Mr. President, this is a very serious national issue. It is not a Florida issue in any strict legal sense at all.

I used to be the U.S. attorney and represented the Federal Government. I know that these Federal waters are 260 miles away from Tampa, FL. It is a Federal decision about whether to lease or not to lease. Now they want to take it from it.

As a resident of Mobile, AL, which is right here at the tip of OCS central planning area, I am pretty familiar with the facts in this case and what happens.

Obviously, I have to say I am a little bit disappointed. The President of the United States, in my view, made a mistake when he cut back huge portions of this lease that is on that map to accommodate and appease the political leaders in Florida. What did he get? They still opposed the lease and are still opposing it right on this floor.

Yet this map shows a dotted line from my hometown of Mobile, AL, over to Tampa, FL. I wonder if anybody knows what those dotted lines reflect. They reflect a pipeline. That pipeline is being built at this moment. It started in June. The pipeline is to take natural gas produced in the western Gulf to Tampa, FL, and to south Florida to its surging demands for natural gas. Yet when it comes time for them to go along with a national goal of producing natural gas way out in the Gulf of Mexico, far from where you can see it from land, they say: Oh, no. We can never allow that to happen.

They have fought it natural gas production consistently. I am really concerned about this position. We have natural gas here in the Gulf of Mexico. It is being produced off the shores of Alabama, Mississippi, Louisiana and Texas. They have fought to transport that gas over to Florida. What is that going to do to the price of natural gas for the homeowners in Alabama and electricity users in Alabama?

They are going to bid it up. This demand on the limited supply in the western Gulf of Mexico is going to drive up the price of natural gas for the people in Alabama; and, at the same time, Florida refuses to allow any production in Federal waters 100 or more miles from their shore.

This is a national issue. One reason, in my view, we have an economic slowdown—and I do not think anybody can dispute it—is an increase in energy.
prices. Fifty-seven percent of our fossil fuels comes from outside the country. And that amount is growing. What does that mean? That we risk America's wealth in America as a whole. You may producing States and not to go off to an annual basis.

percent of our general fund budget on interest on that fund contributes over 10 gas production in state waters has these oil and gas wells. Offshore oil and gas rigs about 1 mile off the gulf shore's—1 mile.

picture of a 40-pound ling, a great fish. Let me tell you, we do not just have oil and gas wells off the Alabama, Mississippi, Texas, and Louisiana coast 100 miles away, we have them right up in Mobile Bay, in some instances less than a mile from homes. I drove over to Gulf Shores right near Pensacola this Saturday to visit my brother-in-law, and he was there with his grandson. They were so proud. They had a picture of a 40-pound ling, a great fish. Where did they catch it? Under an oil rig about 1 mile off the gulf shore's—1 mile.

We have never had a problem with these oil and gas wells. Offshore oil and gas production has helped to generate for the State of Alabama a trust fund of $2 billion. The interest on that fund contributes over 10 percent of our general fund budget on an annual basis.

America has benefited from that. That supply has allowed American money to stay in Alabama and the producing States and not to go off to Saudi Arabia. It has helped to build wealth in America as a whole. You may say: "What's the money for Alabama. The truth is, Alabama is not going to get a dime out of this lease except as any other State would under the Land and Water Conservation Fund. The proposed lease sale is in Federal waters. It is not in State waters. But we have produced oil in State waters right off the beaches, right in the bay here, and we have had no problems. People fish around it on a regular basis. It has created a steady flow of income and has been good for America. The President, in trying to be accommodating, agreed to cut back this lease sale to less than one-quarter of the original area proposed by President Clinton. He tried to do that. He moved it off on the Alabama side—nothing in the Florida waters—to try to accommodate Florida. And the Florida politicians are still not happy. But they want this pipeline built. They want this pipeline built so they can get natural gas. And why do they want the natural gas? Because it is needed to fuel the new cleaner burning electricity plants they need to heat and cool their homes, shops and offices.

What is particularly valuable in the Gulf are the huge reserves of natural gas. The wells in the remaining lease area are going to be a mixture of oil and gas. But the neck, the "stovepipe", that the President shut off as part of his compromise to appease Florida's political leaders was virtually all natural gas.

So I think the Senators from Florida are asking a bit much. I would ask them to think about this. Is not this the philosophy that got California in the fix they are in today? For decades California was facing the question of offshore drilling: No. Nuclear power: No. Coal plants: No. Electric plants: No. Energy is going to come from foreign sources or our own resources. We should not threaten our economy. We should not press down on what is needed to fuel the new cleaner burning electricity plants they need to heat and cool their homes, shops and offices.

But energy is going to come from somewhere. It is either going to come from foreign sources or our own sources. We should not threaten our economy. We should not press down on what the world needs to heat and cool their homes, shops and offices. It is going to hurt us economically.

The demands in Florida are significant. Thirty percent of all natural gas produced in America comes out of the gulf, and Florida will consume huge amounts. Their demand is going to double in the next 15 years, and in 15 years over 12 new electric plants will be needed for the next 20 years, according to experts.

Yes, we should conserve. Yes, I hope people will use those hybrid automobiles. I would like to have one myself. I don't know why everybody doesn't buy one. There must be some reason they don't buy them. If they are so wonderful, why doesn't everybody go buy one? But they have potential. I am interested in looking at them and support the efforts of our automakers to improve efficiency. But it is a free country. Are we going to make everybody go out and buy one? The PRESIDING OFFICER. The Senator's time has expired.

Mr. SESSIONS. Mr. President, I ask unanimous consent for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, I will just say that I believe the President has submitted a scaled-down, fair, and reasonable proposal—too scaled down, frankly. It ought to have satisfied those who would object. Unfortunately, it has not. We have had to have this debate. And though it is healthy to have the debate, I am confident that the amendment will be defeated and that this small production area will be opened for the benefit of American taxpayers and the American economy. I thank the Chair and yield the floor. The PRESIDING OFFICER. The Senator from Florida.

Mr. NELSON of Florida. Mr. President, how many minutes remain in opposition?

The PRESIDING OFFICER. Forty-one minutes twenty-one seconds.

Mr. NELSON of Florida. I do not intend to take that. I see all of the staff smiling at me.
But I would like to summarize. I would like to see if I can bring to closure on a page setting any energy policy in this country that is very important not only to us along the Gulf coast but to the Nation as a whole.

I want to mark the contrast in the debate that you have heard: Every Senator who has spoken in opposition to this amendment to stop oil drilling off Florida in the eastern Gulf of Mexico planning area is from an oil State.

Senator GRAHAM, my senior colleague from the State of Florida, has eloquently pointed out a number of things. He pointed out in his summary that these light-colored areas are active leases but no drilling has occurred. Senator GRAHAM and I have offered a bill to buy back these leases, just as President George Herbert Walker Bush had proposed buying back a bunch of leases off the Ten Thousand Islands off of Naples, off of Port Myers that occurred about a decade ago. We want to get rid of these, including the lease called the Destin Dome, where Chevron has an active permit to drill.

Let me give you some statistics about Chevron and its offshore rigs in the Gulf of Mexico and what they have experienced between 1956 and 1995.

There were 10 gas blowouts and an additional 5 blowouts of oil and a combination of gas. There were 65 fires and explosions at least 28 originated from natural gas, 14 significant pollution incidents, and 40 major accidents, resulting in at least 19 fatalities. There were five pipeline breaks or leaks.

I don’t have any particular reason to cite this with regard to Chevron, except that Chevron came up because they have an active lease that is ready to be drilled 30 miles off of some of the world’s most beautiful beaches called the Destin Dome. What Senator GRAHAM and I would like to do is to see us buy back that lease so that drilling, with a safety record and a blowout record as has been shown by the facts—and remember, facts are stubborn things—so that that won’t occur right off of the sugary white sand beaches of Destin, FL.

We would like to reacquire that lease, just as the first President Bush had acquired so many leases down here threatening the 10,000 islands of the Florida Keys.

That is not the issue here today. The issue today is taking these active drilling leases in the central and western planning areas of the Gulf of Mexico and thrusting eastward toward the coastline of Florida with a new sale of 1.5 million acres.

They had 1 million acres in this original lease sale 181. They knew they were not going to pass it. They knew there was too much political opposition. So what they have done is they have scaled it back to 1.5 million acres, thinking they can get it through.

It is, in fact, the eastward inevitable march of drilling into the eastern planning area, an area that heretofore has not been violated with this drilling.

Let me cite some more statistics as we wrap up this debate. The Department of the Interior, on the day that the Senate and the House goes home for the Fourth of July, on Monday, July 2, announces this deal, that they are shrinking 181. In the course of that announcement, out comes a news bulletin: Secretary Norton announces area of proposed 181 lease sale on Outer Continental Shelf. And in that, the release states: The area also contains 185 billion barrels of oil.

You have heard the statistics of how much oil there is. The fact is, it is not 185 billion barrels of oil; it is 185 million barrels of oil that MMS, a part of the Department of the Interior, estimates is in this lease sale 181.

So I raise the question again, since this equates to about 10 days’ worth of oil and gas energy for this country, is it worth the risk to the beaches of Florida, this eastward march that will inextricably, inexorably happen, is it worth the risk? It is not.

I said earlier in my remarks, if ever I have seen anything that looks like the nose of a camel suddenly under the tent, it is that yellow-colored, 1.5 million-acre eastern planning area that has no drilling.

Back in the middle 1980s, I was a junior Congressman from the east coast of Florida. The Reagan administration had a Secretary of the Interior named James Watt. James Watt was absolutely intent on drilling for oil off the entire eastern coast of the United States and was offering for lease sale leases from as far north as Cape Hatteras, NC, all the way south to Fort Pierce, FL. I went to work, as the Congressman from the middle eastern coast of Florida, to try to defeat that. And we defeated it in the appropriations bill, in an appropriations subcommittee on this very same Interior Department appropriations.

They left me alone. And 2 years later, they came back. This time they had worked the full Appropriations Committee in the House so that they thought they had the votes. And they were running that train down the track for oil drilling from North Carolina to south Florida. The only way that we beat it was to finally get NASA and the Department of Defense to own up to the fact that off the east coast of Florida, where we were launching the space shuttle, you couldn’t have oil rigs out there where you were dropping the solid rocket boosters from the space shuttle launches and where you were dropping off the first stages of the expendable booster rockets that were going out of the Cape Canaveral Air Force Station.

They have left us alone on oil drilling until now. That was almost 16, 17 years.

What we happened to do was call the Pensacola Naval Air Station.

Fast forward 17 years. We decided to call one of the greatest military installations in the world, the naval air station at Pensacola, the place where almost every naval aviator has learned to fly, and we asked if this lease sale 181 were to have a spill—remember, I cited statistics earlier that the Minerals Management Service says this lease sale has up to a 37-percent possibility of having an oilspill—so we said to the executive officer at the Naval Air Station Pensacola: What would happen to Pensacola Naval Air Station and to the Air Force installations at Eglin Air Force Base at Fort Walton and Hurlburt Air Force Base near Fort Walton Beach?

No. 1, for both of those military complexes, virtually all testing, training, and operations over water would cease until the oil slick was completely cleaned up.

No. 2, flights would cease due to the hazards to pilots if they had to egest over oily water.

No. 3, water training and equipment testing would cease.

No. 4, test firing of weapons would cease.

In other words, the Pensacola Naval Air Station would virtually cease to operate as one of our greatest national assets.

We have not even talked about something that is a natural phenomenon in the State of Florida. Look at this peninsula. It is a land that I call paradise, but paradise happens to be a peninsula that sticks down into something known as hurricane highway, for in the course of the summer and into the early fall, because the Lord designed the Earth this way, hurricanes spring up in the Gulf, they spring up in the Atlantic, and they go from the Atlantic into the Gulf. It is an additional reminder of the additional hazards of Florida offshore oil drilling.

As we bring to a close this 3-hour debate, the risk of spill, according to the Department of Defense, on this lease 181 is all the way up to 37 percent. This lease sale, by the Department’s own recognition, is only going to have about 10 days of oil and gas for the entire country. It is not going to lessen the dependence on foreign oil.

My goodness, the United States has 5 percent of the world’s population, 3 percent of the reserves, but we consume 25 percent of the world’s oil. We
cannot drill our way out of dependence on foreign oil. We have to have a balanced energy policy which includes the use of technology to get our hands on solar-gallon in our transportation, as well as conservation, as well as being balanced with drilling.

I recite the statistic I cited that of all the future reserves, they are not in the eastern gulf planning area. Sixty percent of the Nation’s undiscovered economically recoverable Outer Continental Shelf oil is in the central and western gulf area where they are already drilling, and for natural gas, of the entire Outer Continental Shelf, 80 percent of the future reserves are from the central and western areas, not from the eastern area.

I come back to the point at which we began 2 hours ago: Is it worth the risk? Is it worth the tradeoff: Little oil and gas, and yet the first invasion of the eastern planning area, a huge invasion, a million and a half acres? Is it worth the risk to an economy of a State that has sandy beaches on which its economy is so dependent because of a $50 billion-a-year tourism economy? Is it worth it to the estuaries of Apalachicola, the Big Ben, and the Ten Thousand Islands, Tampa Bay, and the Caloosahatchee River, and the sandy beaches from Tampa all the way to Marco Island? It is not worth the risk. It is not worth the tradeoff.

That is why for years we see, as depicted by the green color, the active drilling leases off Texas, Louisiana, Mississippi, and Alabama, but not off Florida in the eastern planning area of the gulf.

I know the White House is putting on a full-court press. I know the oil and gas industry, through all of their innumerable lobbyists, are putting on a full-court press. We heard the Senators from each of the oil States. Not one non-oil-producing State spoke against this. Yet we have our hands full because the full court lobbying press by every special interest involved in drilling in oil and gas is going to be working this issue as hard as it can be fore our vote that is going to occur sometime late tomorrow morning.

I ask my colleagues to consider the risk to their Outer Continental Shelf and to consider what is in the best interest of the Nation.

I am deeply honored that this is one of the first great debates in which I have engaged, in which I have joined so many of those with whom I argued in many of the other debates, such as budget, education, and the Patients’ Bill of Rights. This, however, is one of the great debates that will take place, and it is an honor for me to have participated in it.

Mr. President, I yield the floor.

Mr. DOMENICI. Mr. President, OCS Lease Sale 181 is an essential element of a national energy policy that will provide affordable and secure supply of energy.

Sale 181, the most promising domestic opportunity for newly-available leases in many years is a resource rich area for supplies of natural gas and oil. It will play an important role in meeting the Nation’s energy needs.

Sale 181 is the work-product of more than five years of planning and preparation by the Federal Government, affected States, and industry, and should proceed as scheduled in December 2001.

The Nation’s demand for natural gas is expected to grow significantly.

According to a 1999 National Petroleum Council study, the nation’s demand for natural gas is expected to increase by 32 percent to 29 trillion cubic feet by 2010 and by 41 percent to 31 trillion cubic feet by 2015.

Current demand is 22 trillion cubic feet. Natural gas is essentially a North American commodity.

If the Nation is to meet its growing natural gas demand, access to gas resource rich areas like the Sale 181 area is an indispensable element of the energy policy agenda.

Major reserves of oil and natural gas are believed to exist in the eastern gulf. According to a study conducted in conjunction with the 1999 National Petroleum Council study, the Sale 181 area may hold 7.8 trillion cubic feet of natural gas and 1.9 billion barrels of oil.

This is enough natural gas to supply 4.6 million households for 20 years and enough oil to fill the Strategic Petroleum Reserve for three and one-half years or make enough gasoline to fuel 3.1 million cars for 20 years.

This is also three and one-half times the amount of oil currently in the Strategic Petroleum Reserves.

Sale 181 was recently modified to ensure a balance between state and federal interests.

Key affected constituencies include Alabama, Florida, and the Department of Defense were consulted during development of the current five-year plan to ensure that all concerns were addressed.

For example, the sale area was drawn to insure it was consistent with the State of Florida’s request for no oil and gas activities within 100 miles of its coast, including limiting the number of tracts offered for lease.

In 1996, Florida Governor Lawton Chiles expressed appreciation to MMS for developing a program that recognized the need to exclude any tracts within 100 miles of Florida’s coasts.

The sale area, with full recognition by Florida, including Florida congressional delegation, was specifically excluded from current leasing moratoria language under both Congressional action and President Clinton’s 1996 Executive order.

Other tracts are expected to be deferred to assure smooth operations when the military and industry operate in the same area.

Sale 181 is a regional opportunity that impacts 5 Gulf States; all 5 Gulf States were consulted. Mississippi, Alabama, Louisiana, and Texas support Sale 181.

These States will enjoy significant economic benefits as a result of exploration and production activities in the area.

In addition, the coastal area of Louisiana will be the most heavily impacted of the five States.

The impact on Florida will be minimal. Many tracts in the sale area are closer to Louisiana, Mississippi, and Alabama than to Florida. In fact, Cuba is closer to Florida shore than is this lease.

Parts of the sale area come within about 40 miles of Mississippi, 64 miles of Louisiana, and about 16 miles of Alabama.

Florida could benefit significantly from Sale 181. Florida’s population is expected to grow by 29 percent between now and 2020.

Florida’s natural gas demand for natural gas is expected to grow by 142 percent during the same period.

About two-thirds of this growth in demand is for natural gas to generate electricity.

Some of the potential 7.8 trillion cubic feet of natural gas that could be produced from Sale 181 could help meet the State’s significant demand for natural gas during this time.

Making more natural gas available to Florida utilities for electricity generation should lead to better air quality in the state.

Mr. MCCAIN. Mr. President, I would like to clarify for the RECORD why I voted to table the Durbin amendment to H.R. 2217, the Interior Appropriations bill for fiscal year 2000.

First of all, once national monuments are designated, similar to other federal designations, those lands are withdrawn from any further mining activity, with exception to existing leases. My understanding is that nearly all of the recent monuments designated by the prior Administration are protected in this manner. Only one of the newly established monuments in Colorado has specific provisions in its proclamation that could potentially allow some type of oil or gas mining development. Unless the Congress or the President by executive action changes the terms of the original proclamation that established these monuments, these lands are protected. I would imagine that such changes would be difficult to approve.

The second reason I opposed this amendment is that I object to the process by which many of these monuments were designated by the previous Administration. If important land use issues like this one had been thoroughly evaluated during an open and fair public process prior to the monument designation, the Senate would
not have to vote on this type of amendment. The use of the 1960 Antiquities Act is not an acceptable way to unilaterally cut off millions of acres of land from public use by fiat nor does it allow for the type of open and fair input to those living and working on and near those lands. Our democratic process should promote such procedural fairness and consultation.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein for up to 5 minutes each. The PRESIDING OFFICER. Without objection, it is so ordered.

CAMPAIGN FINANCE REFORM

Mr. TORRICELLI. Mr. President, no matter what other issues are discussed in this Senate, what other concerns are brought before the body, the Nation's attention is turned again to the issue of campaign finance reform, the seemingly never-ending effort to restore integrity to this process and change the Nation's campaign finance laws.

In March, the Senate passed a comprehensive and workable piece of legislation; it required 2 weeks and 22 amendments. One of those amendments I offered together with my colleagues, Senator CORZINE, Senator DURBIN, and Senator ENSINN. It was the other part of the equation: As we reduce the amount of money that is raised, to reduce the amount that must by necessity be spent.

Campaign spending in America is easily defined. It is used for television advertising; it is the cost of the Senate campaign goes to a television network.

This amendment was passed overwhelmingly by the Senate. I take the floor today because it is now in jeopardy. It is unenforceable, void. The American people have demanded a control on the amount of political money being spent in America, unconscionable while this Congress has fought for campaign finance reform, the broadcast industry is fighting to the death to reverse this amendment in the House of Representatives and allow the television networks to charge whatever they want to charge for political advertising.

I take the floor today as one who has voted for campaign finance reform since I came to the Congress 18 years ago. I have always voted for campaign finance reform. I always want to vote for it because I believe the system must be fundamentally changed to restore integrity to the system and gain the confidence of the American people. I take the floor to make this very clear: Reducing campaign fundraising without reducing the cost of campaigns is not reform. That reduces the amount of communication. It makes it more difficult for third political parties and candidates to communicate their message. This cannot be reform. This is silencing political debate in America.

The bill that passed this Senate reduced the amount of soft money, eliminated the amount of soft money and, correspondingly, I am glad to report, dealt with this cost of advertising.

In 1971, the Congress believed we had faced this problem and required the charging of the lowest unit charge. Over 30 years, the law became ineffective. That is why I offered this amendment. This chart shows, by 1990, an audit by the FEC found that 80 percent of television stations were failing to give the lowest rate. These are examples from around the country. The price of a 30-second advertisement on the local network was below the lowest rate that should have been offered: NBC in New York, 21 percent higher than by law should have been charged; WXYZ in Detroit, 124 percent; KGO, San Francisco, 62 percent. These are the numbers that convinced 69 Democrats and Republicans in the Senate to pass this amendment.

The second reason for the amendment is that stations are charging candidates the lowest rate, looking back 365 days. So they cannot simply charge the lowest rate available on that day, which they were not doing anyway, but had to look back for what was the lowest rate during the course of the year. The fact is, the broadcast industry in America has been profiteering at the expense of the political system. There is not another democracy in the world where the public airwaves, licensed to private companies, are used for profiteering and price gouging when a public candidate attempts to communicate with people in the country.

The patterns are quite clear. This chart indicates the percentage of ads sold above or below the lowest unit cost per station. Below the unit rate, Philadelphia, KYW, 9 percent; Detroit, WXYZ, 8 percent; Los Angeles, one of the better in the country, is only 63 percent. NBC in New York, 15 percent of their ads are sold in accordance with the 1971 law at the lowest unit rate.

It isn't that the law isn't being obeyed; it is being violated wholesale. Compliance with the law is the rare, rare, exception.

Here is the magnitude of the problem. In the 2000 political season, political advertisers spent $1 billion on television ads; $1 billion was raised, fundraiser by fundraiser, mailer by mailer, telephone call by telephone call. And an extraordinary percentage of this advertising, if it had been paid for at the lowest unit rate, would have saved hundreds of millions of dollars in political fundraising.

My message out of this, I hope, is clear. I speak not to my colleagues, but I speak to the broadcast industry, to the network television, which since the 2000 Presidential campaign have carried on a campaign of their own, criticizing the political community, attacking individual candidates, railing against the problems of political fundraising.

Instead of being part of the problem, be part of the solution. Campaign finance reform does not simply mean the Democrat and Republican Parties. It means ABC, NBC, CBS. It means you. Get your lobbyists out of the House of Representatives, out of these Chambers, and be part of a solution of campaign finance reform. Allow a balanced piece of legislation to pass this Congress that deals with this problem.

The National Association of Broadcasters has been fighting against this reform; it is now standing on its own, convinced there are two myths: First, that this will lead to perpetual campaigns because the low rates will mean this will go on and on forever in advertising.

That simply is not the case. The low rates will only allow the lowest rates for 365 days. Mr. SHAYS and MEEHAN have only proposed 180 days. That is the extent, in the primary season, campaigns are taking place anyway. The campaigns will not be longer; they will just be less expensive. And that is the problem for the broadcasters.

Second, that this is somehow unconstitutional, that we are taking private property. For 30 years this has already been the law, The broadcasters, as a condition of their license, are required to do public broadcasting, sometimes children's broadcasting. They comply with all kinds of Federal requirements as a condition of having a public license. This is one more, but it is not new, new requirement. For 30 years we have required them to sell at the lowest unit rate. They simply are not doing it. We are just strengthening the law; we are not fundamentally changing the law.

Third, they allege the amendment could force a TV station to sell a 30-second spot during a prime time television show for a de minimus amount of money. Actually, that would not be bad if it were true, but it is not. The FCC, in mediating pricing disputes under the law, has always taken viewshipers levels into account, that they must be comparable. You cannot take a 2 o'clock in the morning television show that sells at a discount rate and compare it with prime time. It simply is not true.

Fourth, the broadcasters say lowering the costs of candidate advertising will result in candidates running more ads. As my friend MITCH MCCONNELL commented on occasion, the Nation does not suffer from too much political discussion. It would not be a bad thing if there were more advertising, discussing more issues. But that is probably not the result of this amendment.
It simply means candidates will raise less money because of campaign finance reform and hopefully be able to have the same amount of advertising because rates are lower.

This is all part and parcel of eliminating a major source of revenue for the broadcasters, and that is the problem. Political advertising is a paid form, in my judgment, of community service. This is not running a public service ad for the Boy Scouts, but it should not be akin to charging General Motors to advertise a new car either. And that is exactly what has happened.

Here, political ads have now become the third highest source of revenue for the broadcasters. In 1996, the automobile industry was the source of 25 percent of advertising dollars in America. Political candidates, using the public and Los Angeles and Chicago any issues under campaign finance law restrictions, are 10 percent of advertising dollars in America. This is growing faster than any other component of advertising in the Nation. Political advertising is not an industry; it is how we conduct public policy in a democracy. That is why we have offered this amendment as well.

This legislation will be voted upon in the House of Representatives in another day. The House of Representatives has a choice that was before this Senate. The local broadcasters have spent $19 million since 1996 to lobby this Congress. They have spent $11 million to defeat no fewer than 12 campaign finance bills that would have reduced the cost of candidate advertising. It is unconscionable and it is wrong. It is also hypocrisy. The very news departments and executives that come to this Congress and complain about the state of politics in America, the lack of confidence, the declining levels of integrity in the public discourse because of campaign fundraisers, are now a principal obstacle to reform.

I want to vote for McCain-Feingold when that legislation returns to this Senate after a conference, but I will make it very clear: Restricting campaign fundraising with no restriction on the cost of campaign advertising, in the region of the country in which I live, and Los Angeles and Chicago, there is no way the broadcasters will be able to communicate with the public. There will be no independent means of the political parties actually getting their message to American voters.

I am prepared to vote to limit campaign spending, to eliminate soft money, but the test, in my judgment, at least for the region of the country in which I live, is whether we can overcome this hurdle of the broadcasters as well.

Mr. President, I hope the House of Representatives meets its responsibility. I hope we can get a bill that in good conscience many of us in the Senate can vote to support.

I yield the floor.

H-2A REFORM

Mr. BURNS. Mr. President, I rise today to express my support of the Agriculture Job Opportunity, Benefits, and Security Act of 2001. I am proud to join my colleague Senator CRAIG as a cosponsor of this important legislation.

I am a strong believer that American workers should have the first chance to have American farm and ranch jobs. However, when there are not enough American workers, our agricultural producers should be able to find farmworkers elsewhere. Under the current H-2A program, producers are required to go through a lengthy, uncertain, and undoubtedly costly process to demonstrate to the Federal Government that American workers are not available in order to gain authorization for guest workers. During this long process, Montana crops are not being harvested and cattle and sheep herds are not being tended to the degree they require. A General Accounting Office study recently found that the Government’s inefficiency in processing such claims discourages use of the program. As a result, the Federal Government estimates that only half of this country’s 1.6 million agricultural workers are authorized to work in the U.S., and the figure may be higher since the estimate is based on self-disclosure by illegal workers.

Let me give you an example of how H-2A reform will benefit real producers. We have a number of large sheep producers in Montana. All of these sheep need to be sheared in the spring of the year, and as any sheep rancher will tell you, this is a job that needs to be done quickly, safely, and accurately. Shearers need to pay close attention to detail; lest sheep could be severely injured. With the number of sheep ranches in this country dwindling, there are few Americans who shear professionally, so guest workers from countries such as Argentina must be brought in to do the job. Reform of the H-2A program would make this process easier for our sheep producers.

It is high time we reformed the H-2A program. This legislation will replace the current system with a more efficient process for certification of H-2A guest workers. It will also replace the current, unrealistic premium wage mandated for H-2A employers with the standard, minimum wage. Employers will continue to furnish housing and transportation to H-2A workers.

This bill makes sense for producers in Montana, Senator CRAIG’s home State of Idaho, and other agricultural States across the country. It also provides a better environment for our guest workers. I look forward to working with my colleagues on this important legislation.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred January 14, 1999 in El Dorado, AR. Thomas Gary, 38, was run over by a truck he owned after he suffered a blow to the head and shotgun injuries that killed him. Chuck Bennett, 17, who has been charged with the crime, claimed that Gray made a sexual advance toward him.

I believe that government’s first duty is to defend its citizens, to defend them against the harm that comes out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, at the close of business yesterday, Tuesday, July 10, 2001, the Federal debt stood at $5,710,436,329,428.99, five trillion, seven hundred ten billion, four hundred thirty-two million, three hundred twenty-nine thousand, four hundred twenty-eight dollars and ninety-nine cents.

One year ago, July 11, 2000, the Federal debt stood at $5,662,956,000,000, five trillion, six hundred sixty-two billion, nine hundred fifty million.

Five years ago, July 10, 1996, the Federal debt stood at $5,148,771,000,000, five trillion, one hundred forty-eight billion, one hundred twelve million.

Ten years ago, July 11, 1991, the Federal debt stood at $3,533,712,000,000, three trillion, five hundred thirty-three billion, seven hundred twelve million.

Fifteen years ago, July 10, 1986, the Federal debt stood at $2,071,214,000,000, two trillion, seven-one billion, two hundred fourteen million, which reflects a debt increase of more than $3.5 trillion, $3,639,222,329,428.99, three trillion, six hundred thirty-nine billion, two hundred twenty-two million, three hundred twenty-nine thousand, four hundred twenty-eight dollars and ninety-nine cents during the past 15 years.
PAYING TRIBUTE TO THE KNOLL MOTEL IN BARRE, VERMONT

Mr. LEAHEY. Mr. President, I rise today to pay tribute to the Knoll Motel in Barre, VT, a pioneer establishment of the VT tourism industry.

In April 2000, the Knoll Motel celebrated its 50th anniversary of offering warm and courteous hospitality to tourists of the Green Mountain State. Founded in April of 1950, it is the state’s first and longest operating motel.

During the period following World War II, the number of Americans traveling for recreational purposes increased dramatically. As more and more citizens traveled the country’s expanding network of highways, the touring public were in need of economical and conveniently located overnight accommodations. Responding to this trend, tourism industry establishments that catered to the needs of family highway travelers. Recognizing the economic potential associated with the growing tourist industry in Vermont, Stanley and Minnie Sabens established the Knoll Motel on 1015 North Main Street in Barre. Located near the State Capital, Montpelier, and what eventually became Interstate 89, the original eight-room facility became a model for the motel industry in Vermont, where tourism is vital to the success of the state’s economy.

Keeping with Vermont’s proud tradition of family-owned businesses, Stanley Sabens II has assumed the management of the Knoll Motel, a family-owned and operated motel serving as the first President of that organization. In her thirty-two year career working on behalf of the motel industry in Vermont, she has advanced the causes of both Doyon and her Native culture, but to all who knew and loved her. Again our deepest sympathies to her family and friends. She will always be remembered with great fondness.

IN MEMORY OF ROSEMARIE MAHER

Mr. MURKOWSKI. Mr. President, I rise today to speak in remembrance of a wonderful Alaskan, Mrs. Rosemarie Maher, the President and Chief Operating Officer of the Doyon Native Regional Corp. based in Fairbanks, Alaska.

On Monday, I attended the moving memorial service in Fairbanks in Rosemarie’s Maher’s honor, who tragically died quite suddenly last week at far too young an age—53. Along with my wife Nancy, I want to express our deepest sympathies to Rosemarie’s husband, Terry J. Maher, their children; Malinda and husband Jim Holmes, Warren J. and wife Angela Westfall, and Kerry Rose and Kevin Maher, and all other family members.

I also want to express my condolences to the employees and all of the nearly 14,000 shareholders of Doyon Ltd. upon the death of a very dedicated and talented woman, whose success was advanced by the leadership of both Doyon members and of all Alaska Natives.

Rosemarie Maher showed uncommon grace and perseverance during her three decade career working on behalf of Alaska Natives. For 21 years, she served as a member of the Doyon corporation’s board of directors and assumed the role of daily leadership of the corporation under such difficult circumstances in winter 2000.

Rosemarie Maher began her involvement in Alaska Native organizations and public service while still in her 20’s. As a devoted wife and mother, she helped to steer development of several organizations, including the Interior Village Association and the Tanana Chiefs Conference. In 1979, she was first elected to the Doyon Ltd. Board of Directors. Seven years later, she was elected Chairman of the Board, a position she held until her appointment as President and Chief Executive Officer after the tragic plane crash in January 2000 of long-time Doyon President Morris Thompson.

Mrs. Maher was born in a fish camp on the Nabesna River near her home of Northway along the Alaska Highway in Central Alaska. As a child she was raised as a traditional Athabascan Indian, but as a young teen she was educated at Sheldon Jackson School in Sitka and later at East High School in Anchorage. After graduating from high school, she trained at Alaska Business College and in 1969 moved to Fairbanks, working for several U.S. Government agencies.

During the mid 1970s, Mrs. Maher moved back to Northway where she was elected President of the Northway Village Council and helped form the Upper Tanana Alcohol Program in the Tok area. She also played a key role in the incorporation of Greater Northway Inc., the non-profit organization formed to administer local infrastructure and economic development projects in the region. She was a shareholder of Northway Natives Inc., the Alaska Native Claims Settlement Act Village Corporation for Northway, serving as the first President of that organization. She also was President of Naabia Niign, a Northway Native subsidiary.

From 1976 to 1984 she entered governmental public service as a member of the Alaska Gateway School District Board and was a director of the Northwest Regional Education Lab, a non-profit, federally and privately funded educational research organization based in Portland, Ore. She also was a member of the Teamsters Union, working summers in road construction and hazardous waste cleanup between 1992 and 2000.

At the statewide level, Rosemarie served as Co-Chair of the Alaska Federation of Natives from 1997–2000 and was a member of the Alaska Board of Game. She also served as a member of the Governor’s Commission on Local Governance and Empowerment and on the Governor’s Highway and Natural Gas Policy Council.

Rosemarie truly did commit her life to the success of Alaska Native corporations and to the betterment of her neighbors and all of Alaska Natives. Her death is a great loss, not just to Doyon and her native culture, but to all who knew and loved her. Again our deepest sympathies to her family and friends. She will always be remembered with great fondness.

MESSAGES FROM THE HOUSE

At 12:15 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 170. Concurrent resolution encouraging corporations to contribute to faith-based organizations.

MEASURES REFERRED

The following bill was read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2131. An act to reauthorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004, and for other purposes; to the Committee on Foreign Relations.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 168. Concurrent resolution expressing the sense of Congress in support of victims of torture; to the Committee on the Judiciary.

H. Con. Res. 170. Concurrent resolution encouraging corporations to contribute to faith-based organizations; to the Committee on Banking, Housing, and Urban Affairs.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with
accompanying papers, reports, and documents, which were referred as indicated.

EC–2711. A communication from the Assistant General Counsel for Regulatory Law, Office of Procurement and Assistance Policy, Department of Energy, transmitting, pursuant to law, a report of a rule entitled “Employee Retirement Income Security Act of 1974; Rules and Regulations for Administrative and Enforcement; Claiming, Determination, and Payment of Annuity” (RIN1991–A585) received on July 9, 2001; to the Committee on Energy and Natural Resources.

EC–2712. A communication from the Director of the Office of Regulations Management, Veterans Health Administration, Department of Veterans Affairs, transmitting, pursuant to law, the report of a rule entitled “Payment or Reimbursement for Emergency Treatment Furnished at Non-VA Facilities” (RIN2900–AK08) received on July 10, 2001; to the Committee on Veterans’ Affairs.

EC–2713. A communication from the Acting Administrator of the Small Business Administration, transmitting, pursuant to law, a report concerning Minority Small Business and Capital Ownership Development for Fiscal Year 2000; to the Committee on Small Business and Entrepreneurship.

EC–2714. A communication from the Counsel for Legislation and Regulations, Office of Community Development, Department of Housing and Urban Development, transmitting, pursuant to law, the report of a rule entitled “Designation of Round III Urban Empowerment Zones and Renewal Communities” (RIN2506–AC09) received on July 9, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2715. A communication from the Counsel for Legislation and Regulations, Office of the Secretary, Department of Housing and Urban Development, transmitting, pursuant to law, the report of a rule entitled “Prohibited Purchasers in Foreclosure Sales of Multifamily Projects with HUD-Held Mortgages and Sales of Multifamily HUD-Owned Projects” (RIN2506–AC08) received on July 9, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2716. A communication from the Chairman and CEO of the Pension Benefit Guaranty Corporation, transmitting, pursuant to law, the report of the Office of the Inspector General for the period from October 1, 2000, to March 31, 2001; to the Committee on Governmental Affairs.

EC–2717. A communication from the Acting Chief Administrative Officer/Secretary of the Postal Rate Commission, transmitting, pursuant to law, the report of a vacancy and the designation of acting officer for the position of Chairman/Commissioner, received on July 10, 2001; to the Committee on Governmental Affairs.

EC–2718. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, a report relative to sexual harassment complaints and sexual misconduct for Fiscal Year 1998; to the Committee on Armed Services.

EC–2719. A communication from the Secretary of Defense, transmitting, pursuant to law, the report of a retirement; to the Committee on Armed Services.

EC–2720. A communication from the Secretary of the Navy, transmitting, pursuant to law, a report relative to the Administrative/Management Support function at Naval Air Systems Command, Naval Air Warfare Center Aircraft Division at Lakehurst, Ocean County, New Jersey; to the Committee on Armed Services.

EC–2721. A communication from the Assistant Secretary of the Pension and Welfare Benefits Administration, Department of Labor, transmitting, pursuant to law, the report of a rule entitled “Employee Retirement Income Security Act of 1974; Rules and Regulations for Administrative and Enforcement; Claiming, Determination, and Payment of Annuity” (RIN1210–AA61) received on July 9, 2001; to the Committee on Health, Education, Labor, and Pensions.

EC–2722. A communication from the Assistant Secretary for Administrative and Management, Department of Labor, transmitting, pursuant to law, the report of the discontinuation of service in acting role for the position of Deputy Administrator of the Federal Old-Age, Survivors, and Disability Insurance Program (OASDI), the report of the discontinuation of service in acting role for the position of Administrator of the Federal Executive Retirement System (EX–V), and the report of the discontinuation of service in acting role for the position of Deputy Administrator of the Federal Service Retirement System (FSRS) (RIN2724–AA53) received on July 10, 2001; to the Committee on Health, Education, Labor, and Pensions.

EC–2723. A communication from the Assistant Secretary for Administrative and Management, Department of Labor, transmitting, pursuant to law, the report of the designation of acting officer for the position of Wage and Hour Administrator, EX–V, received on July 10, 2001; to the Committee on Health, Education, Labor, and Pensions.

EC–2724. A communication from the Acting Assistant Attorney General for Administration, Justice Management Division, Department of Justice, transmitting, pursuant to law, the report of the Implementation of the Automated Immigration Lookout System (NAILS); Immigration and Naturalization Service (INS) (Justice/INS–032) received on July 10, 2001; to the Committee on the Judiciary.

EC–2725. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report relative to the Refugee Resettlement Program for the period from October 1, 1998 through September 30, 1999; to the Committee on the Judiciary.

EC–2726. A communication from the Chief of the Division of General and International Law, Maritime Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Service Obligation Reporting Requirement for USMMA Graduates and State Maritime Schools Graduate’s Records Program” (RIN2725–AA29) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2727. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Boeing Model 757–200, 200PF, 200CB, and 757 300 Series Airplanes” ((RIN2120–AA64)(2001–0275)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2728. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Dornier Model 328–300 Series Airplanes” (RIN2120–AA64)(2001–0274) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2729. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Empresa Brasileira de Aeronautica SA Model EMB 120 Series Airplanes” ((RIN2120–AA64)(2001–0281)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2730. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Raytheon Model BAe 125 Series 900A (C–29A and U–125 Military), 1000A, and 1000B Airplanes; Hawker 800 (U–125A Military) Airplanes, and Hawker 800 XP and 1000 Series Series Airplanes” ((RIN2120–AA64)(2001–0276)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2731. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Boeing Model 747–120, 140, 100PF Series Airplanes” ((RIN2120–AA64)(2001–0277)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2732. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Eurocopter France Model EC 155B Helicopters” (RIN2120–AA64)(2001–0280) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2733. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Boeing Model 747–100, 200, 300 and 747SP Series Airplanes” ((RIN2120–AA64)(2001–0272)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2734. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Raytheon Model BAe 125 Series 900A (C–29A and U–125 Military), 1000A, and 1000B Airplanes; Hawker 800 (U–125A Military) Airplanes, and Hawker 800 XP and 1000 Series Series Airplanes” ((RIN2120–AA64)(2001–0276)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2735. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Boeing Model 757–200, 200PF, 200CB, and 757 300 Series Airplanes” ((RIN2120–AA64)(2001–0277)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2736. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Airbus Model A330 and A340 Series Airplanes” ((RIN2120–AA64)(2001–0271)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2737. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Kaman Aerospace Corp Model K 1200 Helicopter” (RIN2120–AA64)(2001–0279) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2738. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Eurocopter France Helicopters” (RIN2120–AA64)(2001–0289) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2739. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Boeing Model 747–100, 200, 300 and 747SP Series Airplanes” ((RIN2120–AA64)(2001–0272)) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.
transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Bell Helicopter Textron Canada Model 407 Helicopters” (RIN2120–AA64)(2001–0267) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2741. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: Boeing Model 747–100, 200, 300, 747 SP and 747 SR Series Airplanes; Powered by P and W JT9D–3 and –7 Series Engines” (RIN2120–AA64)(2001–0265) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2742. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Airworthiness Directives: McDonnell Douglas Model DC 9–41, 81, 82, 83, and 87 Series Airplanes and MD 88 Airplanes” (RIN2120–AA64)(2001–0264) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2743. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled “Fisheries of the Exclusive Economic Zone Off Alaska—Amendment to the Steller Sea Lion Emergency Interim Rule” (RIN0648–AO66) received on July 10, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2744. A communication from the Acting Director of the Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Fisheries of the Exclusive Economic Zone Off Alaska—Amendment to Late Red King Crab Standard for the Second Half of 2001” (RIN0648–AO66) received on July 10, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2745. A communication from the Acting Director of the Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Fisheries of the Exclusive Economic Zone Off Alaska—Amendment to the Steller Sea Lion Emergency Interim Rule (removes seasonal allocation of Pacific halibut prohibited species catch associated to the “shallow water trawl fishery” and closes that fishery)” (RIN0648–AO66) received on July 10, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2746. A communication from the Acting Director of the Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Access Charge Reform, CC Docket No. 96–262, Order” (CC 01–166) received on July 10, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2747. A communication from the Acting Director of the Office of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled “Atlantic Highly Migratory Species Fisheries; Atlantic Bluefin Tuna Recreational Fishery; Retention Control Action; Amendment to a rule entitled “VISAS: Documentation of Nonimmigrants Under the Immigration and Nationality Act: Application for Nonimmigrant Visas: XIX Olympic Games and XIX Paralympic Games: Winter Games and World Cup 2002 Sports Events” (22 CFR Part 42) received on July 5, 2001; to the Committee on Foreign Relations.

EC–2748. A communication from the Assistant Secretary of Legislative Affairs, Department of State, transmitting, pursuant to law, the report of a rule entitled “VISAS: Documentation of Immigrants under the Immigration and Nationality Act, as amended—Diversity Visas” (22 CFR Part 42) received on July 5, 2001; to the Committee on Foreign Relations.

EC–2749. A communication from the Associate Administrator for Procurement, National Aeronautics and Space Administration, transmitting, pursuant to law, the report of a rule entitled “Security Requirements for Unclassified Information Technology Resources” (48 CFR Parts 1804 and 1852) received on July 9, 2001; to the Committee on Commerce, Science, and Transportation.

EC–2750. A communication from the Secretary of the Army and the Secretary of Agriculture, transmitting, pursuant to law, a report relative to the interchange jurisdiction of Army and National Forest Service lands at Fort Leonard Wood Military Reservation in Missouri; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2751. A communication from the Congressional Review Coordinator of Policy and Program Development, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled “Foot-and-Mouth Disease Status of Uruguay Because of Foot-and-Mouth Disease” (Doc. No. 00–11–2) received on July 15, 2001; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2752. A communication from the Acting Administrator of the Agricultural Marketing Service, Fruit and Vegetable Programs, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled “Tart Cherries Grown in the State of Michi- gan, et al.; Modifications to the Rules and Regulations under the Tart Cherry Marketing Order” (Doc. No. FV01–930–3 IFR) received on July 10, 2001; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2753. A communication from the President of the United States, transmitting, pursuant to law, a report relative to Federal Climate Change Expenditures; to the Committee on Foreign Relations.

EC–2754. A communication from the Deputy Director of the United States Trade and Development Agency, transmitting, pursuant to law, the report of the discontinuation in acting role and a nomination confirmed subject to the advice and consent of the Senate.

EC–2755. A communication from the Assistant Administrator for Legislative Affairs, Department of State, transmitting, pursuant to law, a report concerning the Central African Republic; to the Committee on Foreign Relations.

EC–2756. A communication from the Assistant Secretary of Legislative Affairs, Department of State, transmitting, pursuant to law, a report concerning the Central African Republic; to the Committee on Foreign Relations.

EC–2757. A communication from the Assistant Secretary of Legislative Affairs, Department of State, transmitting, pursuant to law, the report of a rule entitled “VISAS: Documentation of Immigrants under the Immigration and Nationality Act, as amended—Diversity Visas” (22 CFR Part 42) received on July 5, 2001; to the Committee on Foreign Relations.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LEVIN for the Committee on Armed Services.

*Douglas Jay Feth, of Maryland, to be Under Secretary of Defense for Policy.

*Jessie Hill Roberson, of Alabama, to be an Assistant Secretary of Energy (Environmental Management).

*Jack Dyer Crouch, II, of Missouri, to be an Assistant Secretary of the Army.

*Steven John Morello, Sr., of Michigan, to be General Counsel of the Department of the Army.

*Michael Montelongo, of Georgia, to be an Assistant Secretary of the Air Force.

*Michael W. Wynne, of Florida, to be Deputy Under Secretary of Defense for Acquisition and Technology.

*Dionel M. Aviles, of Maryland, to be an Assistant Secretary of Defense.

*Thomas P. Christie, of Virginia, to be Director of Operational Test and Evaluation, Department of Defense.

*Susan Morrissey Livingston, of Montana, to be Under Secretary of the Navy.

*Peter W. Rodman, of the District of Columbia, to be an Assistant Secretary of Defense.

*Reginald J. Brown, of Virginia, to be an Assistant Secretary of the Navy.

*Reginald J. Brown, of Virginia, to be an Assistant Secretary of the Navy.

*Alberto Jose Mora, of Virginia, to be General Counsel of the Department of the Navy.

*Stephen A. Cambone, of Virginia, to be Deputy Under Secretary of Defense for Policy and Materiel Readiness.

*William A. Navas, Jr., of Virginia, to be an Assistant Secretary of the Navy.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first
ADDITIONAL COSPONSORS

S. 170
At the request of Mr. Reid, the name of the Senator from Utah (Mr. Hatch) was added as a cosponsor of S. 170, a bill to amend title 10, United States Code, to permit retired members of the Armed Forces who have a service-connected disability to receive both military retired pay by reason of their years of military service and disability compensation from the Department of Veterans Affairs for their disability.

S. 222
At the request of Mr. Voinovich, the name of the Senator from Georgia (Mr. Cleland) and the Senator from Michigan (Mr. Levin) were added as cosponsors of S. 356, a bill to establish a National Commission on the Bicentennial of the Louisiana Purchase.

S. 356
At the request of Ms. Landrieu, the name of the Senator from Arkansas (Mr. Barton) was added as a cosponsor of S. 356, a bill to establish a National Commission on the Bicentennial of the Louisiana Purchase.

S. 358
At the request of Mr. Breaux, the name of the Senator from Delaware (Mr. Carper) was added as a cosponsor of S. 358, a bill to amend the Social Security Act to establish a Medicare Prescription Drug and Supplemental Benefit Program and for other purposes.

S. 392
At the request of Mr. Salls, the name of the Senator from New Hampshire (Mr. Smith) was added as a cosponsor of S. 392, a bill to grant a Federal Charter to Korean War Veterans Association, Incorporated, and for other purposes.

S. 527
At the request of Mrs. Hutchison, the name of the Senator from Arkansas (Mr. Hutchinson) was added as a cosponsor of S. 527, a bill to amend the Internal Revenue Code of 1986 to exempt State and local political committees from duplicate notification and reporting requirements made applicable to political organizations by Public Law 106-230.

S. 654
At the request of Mr. Torricelli, the name of the Senator from New Jersey (Mr. Kennedy) was added as a cosponsor of S. 654, a bill to amend the Internal Revenue Code of 1986 to increase, and make permanent the exclusion from gross income for amounts received under qualified group legal services plans.

S. 694
At the request of Mr. Leahy, the name of the Senator from Florida (Mr. Graham) was added as a cosponsor of S. 694, a bill to amend the Internal Revenue Code of 1986 to provide that a deduction equal to fair market value shall be allowed for charitable contributions of literary, musical, artistic, or scholarly compositions created by the donor.

S. 706
At the request of Mr. Kerry, the name of the Senator from Washington (Ms. Cantwell) was added as a cosponsor of S. 706, a bill to amend the Social Security Act to establish programs to alleviate the nursing shortage, and for other purposes.

S. 721
At the request of Mr. Hutchinson, the name of the Senator from Washington (Ms. Cantwell) was added as a cosponsor of S. 721, a bill to amend the Public Health Service Act to establish a Nurse Corps and recruitment and retention strategies to address the nursing shortage, and for other purposes.

S. 742
At the request of Mr. Cochran, his name was added as a cosponsor of S. 742, a bill to provide for pension reform, and for other purposes.

S. 744
At the request of Mrs. Hutchinson, the name of the Senator from Arkansas (Mr. Hutchinson) was added as a cosponsor of S. 744, a bill to amend section 527 of the Internal Revenue Code of 1986 to eliminate nondeductibility and return requirements for State and local candidate committees and avoid duplicate reporting by certain State and local political committees of information required to be reported and made publicly available under State law.

S. 778
At the request of Mr. Hagel, the name of the Senator from Iowa (Mr. Harkin) was added as a cosponsor of S. 778, a bill to expand the class of beneficiaries who may apply for adjustment of status under section 245(i) of the Immigration and Nationality Act extending the deadline for classification petition and labor certification filings. At the request of Mr. Edwards, his name was added as a cosponsor of S. 778, supra.

S. 805
At the request of Mr. Wellstone, the name of the Senator from Connecticut (Mr. Lieberman) was added as a cosponsor of S. 805, a bill to amend the Public Health Service Act to provide for research with respect to various forms of muscular dystrophy, including Duchenne, Becker, limb girdle, congenital, facioscapulohumeral, myotonic, oculopharyngeal, distal, and emery-dreifuss muscular dystrophies.

S. 834
At the request of Mr. Murkowski, the name of the Senator from Tennessee (Ms. Thompson) was added as a cosponsor of S. 834, a bill to provide duty-free treatment for certain steam or other vapor generating boilers used in nuclear facilities.
s. 836
At the request of Mr. Craig, the name of the Senator from Delaware (Mr. Carper) was added as a cosponsor of S. 836, a bill to amend part C of title XI of the Social Security Act to provide for coordination of implementation of administrative simplification standards for health care information.

s. 866
At the request of Mr. Dodd, the names of the Senator from New Jersey (Mr. Corzine) and the Senator from Delaware (Mr. Carper) were added as cosponsors of S. 838, a bill to amend the Federal Food, Drug, and Cosmetic Act to improve the safety and efficacy of pharmaceuticals for children.

s. 870
At the request of Mr. Reid, the name of the Senator from New Mexico (Mr. Domenici) was added as a cosponsor of S. 896, a bill to amend the Public Health Service Act to provide for a national media campaign to reduce and prevent underage drinking in the United States.

s. 913
The request of Mr. Smith of New Hampshire, the name of the Senator from Texas (Mrs. Hutchison) was added as a cosponsor of S. 870, a bill to amend the Internal Revenue Code of 1986 to provide additional tax incentives for public-private partnerships in financing of highway, mass transit, high speed rail, and intermodal transfer facilities projects, and for other purposes.

s. 917
At the request of Ms. Snowe, the name of the Senator from Rhode Island (Mr. Lugar) was added as a cosponsor of S. 913, a bill to amend title XVIII of the Social Security Act to provide for coverage under the medicare program of all oral anticancer drugs.

s. 919
At the request of Ms. Collins, the name of the Senator from West Virginia (Mr. Rockefeller) was added as a cosponsor of S. 917, a bill to amend title XVIII of the Social Security Act to provide for COLAs as they have lost.

s. 937
At the request of Mr. Cleland, the name of the Senator from Georgia (Mr. Miller) was added as a cosponsor of S. 937, a bill to amend title 38, United States Code, to permit the transfer of entitlement to educational assistance the Montgomery GI Bill by members of the Armed Forces, and for other purposes.

s. 972
At the request of Mr. Murkowski, the name of the Senator from Colorado (Mr. Allard) was added as a cosponsor of S. 972, a bill to amend the Internal Revenue Code of 1986 to improve electric reliability, enhance transmission infrastructure, and to facilitate access to the electric transmission grid.

s. 979
At the request of Mr. Burr, the name of the Senator from Maryland (Mr. Sarbanes) was added as a cosponsor of S. 979, a bill to amend United States trade laws to address more effectively import crises, and for other purposes.

s. 999
At the request of Mr. Bingaman, the name of the Senator from Maine (Ms. Collins) was added as a cosponsor of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

s. 1013
At the request of Mr. Levin, the name of the Senator from New York (Mrs. Clinton) was added as a cosponsor of S. 1018, a bill to provide market loss assistance for apple producers.

s. 1021
At the request of Mr. Lugar, the name of the Senator from New Jersey (Mr. Corzine) was added as a cosponsor of S. 1021, a bill to authorize the Tropical Forest Conservation Act of 1998 through fiscal year 2004.

s. 1098
At the request of Mr. Smith of Oregon, the name of the Senator from Arkansas (Mrs. Lincoln) was added as a cosponsor of S. 999, a bill to provide market loss assistance for apple producers.

s. 1140
At the request of Mr. Hatch, the name of the Senator from New Mexico (Mr. Domenici) was added as a cosponsor of S. 1140, a bill to amend chapter 5, Con. Res. 53, concurrent resolution encouraging the development of strategies to reduce hunger and poverty, and to promote free market economies and democratic institutions, in sub-Saharan Africa.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS
By Mrs. Feinstein (for herself and Mr. Thompson):
S. 1162. A bill to repeal the requirement relating to specific statutory authorization for increases in judicial salaries, to provide for automatic annual increases for judicial salaries, to provide for a 9.6 percent increase in judicial salaries, and for other purposes; to the Committee on the Judiciary.

Mrs. Feinstein. Mr. President, I rise, along with Senator Thompson, to introduce legislation to restore pay equity for our Federal judges. This legislation would guarantee judges automatic and annual cost-of-living adjustments, COLAs, just like other rank-and-file Federal employees.

In addition, the legislation would end a decade of Federal judicial salary neglect by giving judges a one-time salary increase of 9.6 percent. In the past decade, Congress has denied COLAs for judges in four separate years, in 1994, 1995, 1996, and 1998. This bill would restore to Federal justices the four COLAs they have lost.

In his year-end report on the state of the Federal Judiciary, Chief Justice William Rehnquist called the “the need to increase judicial salaries” the most pressing issue facing the Federal judiciary.

Simply put, while government service offers its own rewards, we should not create financial disincentives to service on the Federal bench.

Federal judges bear enormous responsibility as they preside over the most pressing legal issues. Often, they must render life-or-death decisions or preside over cases with millions of dollars at stake. For this vitally important work, they deserve appropriate compensation.

Recently, Congress took some action to restore equity in Federal salaries by doubling the salary of the President of the United States from $200,000 to $400,000.

Congress should now consider an appropriate pay adjustment for the Federal judiciary. As of January 2001, Federal district judges receive an annual salary of $145,000. If judges had received the COLAs to which they were entitled, a Federal District judge’s salary would actually be $164,700, nearly $20,000 higher.

Now, $145,000 is a lot more money than the salary of a typical worker but it is not so high when you compare it to equivalent positions of authority in the private sector. For example, the average partner in a major national law firm earns well over $500,000 per year.

It is even more striking to note that major national law firms are offering first-year associates salaries topping $125,000 a year. With bonuses, some of these newly minted lawyers are earning more than appellate judges.

The bottom line is that we cannot expect to keep our country’s best lawyers in service on the Federal bench if we continue to denigrate the salary of the post. Just since 1993, the salary of Federal judges, adjusted for inflation, has declined by 13 percent.
Not surprisingly, more and more judges are leaving the Federal bench. Between 1991 and 2000, 52 Federal judges resigned their seats, many of them for the purposes of returning to private practice. These 52 judges represent 40 percent of the 125 Federal judges who have left the bench since 1965.

Attorneys should not expect to become wealthy through an appointment as a Federal judge. Neither should judges expect to have their salaries eroded by Congress’ failure to give them Cost-of-Living Adjustments.

Preserving judicial salaries is vital to maintaining the high quality of our Federal judiciary. I look forward to working with my colleagues in the Senate to restore fairness to judicial compensation.

By Mr. CORZINE (for himself, Mr. CARPER, and Mr. SCHUMER):

S. 1163. A bill to increase the mortgage loan limits under the National Housing Act for multifamily housing mortgaged to the Committee on Banking, Housing, and Urban Affairs.

Mr. CORZINE. Mr. President, I am pleased to join with my distinguished colleague, Senator CARPER, in introducing legislation, the FHA Multifamily Housing Loan Limit Adjustment Act, that would improve access to affordable housing.

Our Nation currently faces a critical housing shortage. A report released recently by the Center for Housing Policy, “Housing America’s Working Families,” documented the overwhelming need for affordable housing. The report indicates that in 1997, nearly 14 million families had a critical housing need, meaning they lived in substandard housing conditions or spent more than half their monthly income on the cost of housing. The FHA Multifamily Housing Loan Limit Adjustment Act would provide America’s working families with increased access to affordable rental housing.

The bill is simple, it increases by 25 percent the statutory limits for multifamily project loans that can be insured by the FHA. This increase reflects the increased costs associated with the production of multifamily units since 1992, when these limits were last revised. The bill also would index the loan limits for inflation and increases to the Annual Construction Cost Index, which is published by the Census Bureau.

Rising construction costs have resulted in a shortage of moderately priced affordable rental units. Rent increases now exceed inflation in all regions of the country, and new affordable rental units have become increasingly harder to find. Because of the current dollar limits on loans, FHA insurance cannot be used to help finance construction in high-cost urban areas such as the New York/New Jersey metropolitan area, Philadelphia and San Francisco.

By increasing the limits on loans for rental housing we will create more incentives for public/private investment in communities through America and spur the new production of cooperative housing projects, rental housing for the elderly, and new construction or substantial rehabilitation of apartments by for- and non-profit entities.

Late last year, Congress sought, through a number of initiatives, to implement programs aimed at increasing the production of affordable housing for the millions of Americans who currently face critical housing needs. For example, we expanded the Low Income Housing Tax Credit, the one Federal program designed to produce new housing. We also enacted the production of housing vouchers. However, these programs were targeted largely at families with very low incomes. Currently, there are no programs designed specifically to provide access to affordable housing for the working middle class, the people who serve as the engine of our nation’s economy.

Far too many of these individuals, including vital municipal workers like teachers, nurses and police officers, are struggling to gain access to affordable housing even remotely near where they work.

Without this much-needed adjustment to the FHA multifamily loan limits, access to affordable housing for our working-citizens will continue to lag, thousands of more families will join the 14 million people who currently face severe housing needs and our nation’s economy will suffer.

This bill is modeled after bipartisan legislation introduced in the House by my colleague from New Jersey, Congresswoman MARGE ROUKEMA, and Congressman BARNEY FRANK of Massachusetts. The bill is supported by housing and community advocates and has also been endorsed by the National Association of Realtors, the National Association of Home Builders, the National Association of Realtors, and the Mortgage Bankers Association.

I hope my Senate colleagues will support the legislation and help us ensure that America’s working families have access to affordable housing.

Mr. CARPER. Mr. President, I am very pleased to join today with my distinguished colleague from New Jersey to introduce the FHA Multifamily Housing Mortgage Loan Limit Adjustment Act of 2001.

A recent report published by the National Housing Conference’s Center for Housing Policy found that in 1997, nearly 14 million families either lived in substandard housing or spent more than half their income on housing costs. This affordable housing shortage also comes at a time of limited resources. Thus, we have to find the best use of each dollar at our disposal, as well as the most effective use of existing Federal programs to stimulate production and substantial rehabilitation.

The Federal Housing Administration’s, FHA, multifamily mortgage insurance is an important financing device for housing production. Unfortunately, production through this public/private partnership has been low in recent years. One of the reasons for FHA’s absence from the rental housing market is that the multifamily loan limits have not been increased since 1992. While the annual Construction Cost Index, published by the Census Bureau, has increased over 23 percent since 1992, FHA’s multifamily loan limits have remained static.

These rising construction costs have contributed to FHA’s inability to be a significant participant in the production of multifamily housing. Increasing these loan limits by 25 percent, as this legislation does, is something Congress can do today to address immediately the shortage of affordable rental housing. This bill modifies a current federal program, FHA’s underwriting, to make that program more effective. Importantly, this legislation also indexes the loan limits to the Annual Construction Cost Index.

I ask my colleagues to join with Senator CORZINE and me to increase these multifamily loan limits so that more working families will have access to affordable rental housing.

By Mr. EDWARDS:

S. 1164. A bill to provide for the enhanced protection of the privacy of location information of users of location-based services and applications, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. EDWARDS. Mr. President, I rise today to introduce much-needed legislation to protect the privacy of consumers who use technologies that can pinpoint their location. Under my bill, the Location Privacy Protection Act, any company that monitors consumers’ physical location will be prohibited from using or disclosing that information without express permission from the consumer. And third parties that gain access to this information cannot use or disclose it without the individual’s permission first.

Within the next few years, new technologies will allow companies to know our location any time of day or night. Our cell phones, pagers, cars, palm pilots and other devices will enable companies to constantly track where we go and how often we go there. These services can have enormous advantages. For example, public safety and rescue teams can save lives with systems that enable them to quickly locate crash victims. Imagine being able to ask your cell phone for directions to the nearest Italian restaurant. Or imagine...
you are traveling in a new city and your pager alerts you when you are within a block of your favorite coffee shop, which happens to be serving a sale on coffee. The possibilities for location-based services and application are endless.

But these new technologies also raise serious privacy issues. Location information is very private, sensitive information that can be misused to harass consumers with unwanted solicitations or to draw inaccurate or embarrassing inferences about them. And in extreme cases, improper disclosure of location information to a domestic abuser or stalker could place a person in physical danger.

The wireless industry is unique in that it has worked with Congress to guarantee some privacy protections in the laws that have been carefully crafted to allow emergency medical services to use location information to obtain location information pursuant to an appropriate court order, it does not provide the FCC with extraordinary authority to control law enforcement can and cannot gain access to location information. Although I have concerns about unnecessary and surreptitious government surveillance, I believe that this issue is best addressed either separately, or at a later date. The purpose of my bill is primarily to lay down guidelines for when private persons, such as businesses, are able to use and disclose consumers’ location information.

The law needs to be strengthened, and we have the opportunity to do so while these location-based technologies are in their infancy. We have a unique opportunity to give consumers power over their location information before making more monetary progress with the law. It is impossible for consumers to prevent the buying and selling of this very personal information.

In sum, I believe the Location Privacy Protection Act is a common sense measure offered at an ideal time. I know that wireless carriers and many companies such as OnStar, ATX, Qualcomm and others care deeply about privacy. I applaud them for their efforts and I look forward to continuing working with them on this issue.

I ask unanimous consent that the text bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1164
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE. This Act may be cited as the “Location Privacy Protection Act of 2001”.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) Location-based services and applications allow customers to receive services based on their geographic location, position, or known presence. Telematics devices, for instance, permit subscribers in vehicles to obtain emergency road assistance, driving directions, or other information with the push of a button. Other devices, such as those with Internet access, support position commerce in which notification of points of interest or promotions can be provided to customers based on their known presence or geographic location.

(2) There is a substantial Federal interest in safeguarding the privacy right of customers of location-based services or applications to control the collection, use, retention of, disclosure of, and access to their location information. Location information is non-public information that can be misused to commit fraud, harassment, or other unwanted messages, to draw embarrassing or inaccurate inferences about them, or to discriminate against them. Improper disclosure of access to location information could also place a person in physical danger. For example, location information could be misused by stalkers or by domestic abusers.

(3) The collection and retention of unnecessary location information magnifies the risk of its misuse or improper disclosure.

(4) Congress has recognized the right to privacy of location information by classifying location information as customer proprietary network information subject to section 222 of the Communications Act of 1934 (47 U.S.C. 222), thereby preventing use or disclosure of that information without a customer’s express prior authorization.

(5) There is a substantial Federal interest in ensuring fair competition in the provision of wireless services and in ensuring the consumer confidence necessary to ensure continued growth in the use of wireless services. These goals can be attained by establishing a set of privacy rules that apply to wireless location information, regardless of the location of the customer’s service provider.

SEC. 3. PROTECTION OF LOCATION INFORMATION PRIVACY.

(a) RULEMAKING REQUIRED.—Not later than 180 days after the date of the enactment of this Act, the Federal Communications Commission shall complete a rulemaking proceeding for purposes of further protecting the privacy of location information.

(b) ELEMENTS.—Subject to the provisions of paragraph (2), the rules prescribed by the Commission under subsection (a) shall—

(A) require providers of location-based services and applications to inform customers, with clear and conspicuous notice, about their policies on the collection, use, disclosure of, retention of, and access to customers’ location information;

(B) require providers of location-based services and applications to obtain a customer’s express authorization before—

(i) collecting, using, or retaining the customer’s location information; or

(ii) disclosing or permitting access to the customer’s location information to any person who is not a party to, or who is not necessary to the performance of, the service contract between the customer and such provider;

(C) require that all providers of location-based services or applications—

(i) restrict any collection, use, disclosure of, retention of, and access to customer location information to the specific purpose that is the subject of the express authorization of the customer concerned; and

(ii) not subsequently release a customer’s location information for any purpose beyond the purpose for which the customer provided express authorization;

(D) ensure the security and integrity of location data, and give customers reasonable access to their location data for purposes of verifying the accuracy of, or deleting, such data;

(E) be technology neutral to ensure uniform privacy rules and expectations and provide the framework for fair competition among similar services.

(F) require that aggregated location information not be disaggregated through any...
means into individual location information for any purpose; and
(G) not impede customers from readily utilizing location-based services or applications.

(2) PERMITTED USES.—The rules prescribed under subsection (a) may permit the collection, use, retention, disclosure of, or access to a customer’s location information without prior notice or consent to the extent necessary to—

(A) provide the service from which such information is derived, or to provide the location-based service that the customer is accessing;

(B) initiate, render, bill, and collect for the location-based service or application;

(C) protect the rights or property of the provider of the location-based service or application, or protect customers of the service or application from fraudulent, abusive, or unlawful use of, or subscription to, the service or application;

(D) produce aggregate location information; and

(E) comply with an appropriate court order.

(3) ADDITIONAL REQUIREMENT.—Under the rules prescribed under subsection (a), any third party receiving access to, a customer’s location information from a provider of location services or applications pursuant to the express authorization of the customer, may disclose or permit access to such information to any other person without the express authorization of the customer.

(4) EXPRESS AUTHORIZATION.—

(A) FORM.—For purposes of the rules prescribed under subsection (a), any authorization for receiving access to, a customer’s location information from a provider of location-based service or application, whether or not such person is also a provider of commercial mobile service (as that term is defined in section 332(d) of the Communications Act of 1934 (47 U.S.C. 332(d))

(b) RELATIONSHIP TO WIRELESS COMMUNICATIONS AND PUBLIC SAFETY ACT OF 1999.—The rules prescribed by the Commission under subsection (a) shall apply to any person that provides a location-based service or application, whether or not such person is also a provider of commercial mobile service (as that term is defined in section 332(d) of the Communications Act of 1934 (47 U.S.C. 332(d)).

(c) RELATIONS TO FEDERAL LAW.—The rules prescribed by the Commission under subsection (a) shall apply to any person that provides a location-based service or application, whether or not such person is also a provider of commercial mobile service (as that term is defined in section 332(d) of the Communications Act of 1934 (47 U.S.C. 332(d)).

(d) RELATIONSHIP TO WIRELESS COMMUNICATIONS AND PUBLIC SAFETY ACT OF 1999.—The rules prescribed by the Commission under subsection (a) shall be consistent with the amendments to section 222 of the Communications Act of 1934 (47 U.S.C. 222) made by section 5 of the Wireless Communications and Public Safety Act of 1999 (Public Law 106-81; 113 Stat. 1268), including the provisions of section 222(d)(4) of the Communications Act of 1934, as so amended, permitting use, disclosure, and access to location information to provide safety, fire, services, and other emergency services providers for purposes specified in subparagraphs (A), (B), and (C) of such section 222(d)(4).

(e) TAKING TITLE V FUNDS.—

(1) IN GENERAL.—No State or local government may adopt or enforce any law, regulation, or other legal requirement addressing the provider location information that is inconsistent with the rules prescribed by the Commission under subsection (a).

(2) PREEMPTION.—Any law, regulation, or requirement that is inconsistent with the rules prescribed by the Commission under subsection (a) that is in effect on the date of the enactment of this Act shall be preempted and superseded as of the effective date of the rules prescribed by the Commission under subsection (a).

(3) DEFINITIONS.—In this section:

(1) AGGREGATE LOCATION INFORMATION.—The term “aggregate location information” means a collection of location data relating to a group or category of customers from which individual customer identities have been removed.

(2) CUSTOMER.—The term “customer”, in the case of the provision of a location-based service or application with respect to a device, means the person entering into the contract or agreement with the provider of the location-based service or application for provision of the location-based service or application for the device.

By Mr. BIDEN (for himself, Mr. KOHL, and Mr. REED):

S. 1165. To require that, upon a person being convicted of juvenile crime, promote accountability by and rehabilitation of juvenile crime, punish and deter violent gang crime, and for other purposes; to the Committee on the Judiciary.

Mr. BIDEN. Mr. President, I rise today to introduce, along with Senator KOHL and Senator REED, the Juvenile Crime Prevention and Control Act of 2001. This is a balanced bill that recognizes the need to get tough on juvenile crime and violence, attempts to break the dangerous link between kids and guns, and, most importantly, puts the Federal Government firmly behind the proposition that preventing juvenile violence is the most effective crime fighting measure any of us could craft.

Before I discuss the specifics of the bill, let me give a brief overview of the current state of juvenile crime in America. Juvenile crime, like almost all other categories of crime, is down. Last December’s released statistics that show the homicide arrest rate for juveniles down 68 percent from its 1993 peak. We are now experiencing the lowest rate of juvenile homicide arrests since 1986. Between 1994 and 1999, the arrest rate of juveniles for violent crimes, murder, rape, robbery, and aggravated assault, dropped 36 percent.

These statistics have not eased public concern about the scope and nature of juvenile crime. One 1998 poll showed that 62 percent of those asked believed juvenile crime was increasing. A poll conducted in 1999 revealed that 71 percent thought it likely that a shooting could occur in a school in their community. In the face of these popular perceptions, the Education Department reports that American children face a 1 in 2 million chance of being killed in their school.

Why the disparity? There are several reasons, in my opinion. First, and probably most importantly, the number of delinquent juvenile arrests of juveniles are unquestionably down, juvenile crime is still too high. The incidence of the most common crime committed by juveniles, property offenses, changed little throughout the last two decades. The rate of juvenile violent crime arrests has not yet returned to its 1988 level.

Second, and this cannot be understated, too many of our kids have access to guns, and those guns are finding their way into our Nation’s schools at an alarming rate. A report released last year by the Education Department revealed that over 3,500 students were expelled in 1998 and 1999 for bringing guns to school, that’s an average of 88 kids per school. The juvenile arrest rate for weapons crimes fell 30 percent from 1993 to 1999, but it too has not yet returned to 1988’s low point.

Third, the American people understand that crime cannot stay down forever. I like to say that fighting crime is like mowing the grass. If you don’t keep it cut, it just grows back up. We have good, demographic reasons to think this is particularly true in the case of juvenile crime. Today, there are approximately 39 million children younger than age 10. These kids, the children of the baby boom generation, stand on the edge of their teen years, the years when every reliable study reveals they are the most at-risk of turning to drugs and crime.

What does this mean for juvenile crime? Even if we do everything right, even if we fund programs that work, put incorrigible juveniles behind bars, crack down on gun crimes, the demographic inevitability of this so-called “baby boomerang” means there is likely to be a 20 percent increase in juvenile murders by 2005. Such a jump would increase the overall murder rate by 5 percent. Our challenge is to make sure that does not happen.

We need to take another look at the Juvenile Justice and Delinquency Prevention Act of 1974. That Act expired on September 30, 1996, and, despite the good efforts of several Congresses, Members on both sides of the aisle, and the prior Administration, it has not been reauthorized. We should get that job done in the 107th Congress. The bill I introduce today includes provisions to reauthorize the Act, to fine tune some of its grant provisions, and to make some common sense changes to our firearms laws, changes that respect the rights of gun owners, but hold them accountable.

My bill reauthorizes the Community Prevention Grant Program, commonly known as Title V. It funds this critical juvenile crime prevention initiative at $250,000,000 per year for the next six years and mandates that no State would receive less than $200,000 in annual prevention grants. These funding levels would more than double juvenile crime prevention funding, enough resources for localities to implement a comprehensive delinquency prevention strategy and then fund smart prevention programs that work. In Delaware, Title V funds have been used to sponsor programs to reduce school violence,
provide transition counseling to students returning to their local school from alternative school placement, reduce stress that these funds continue to flow to States and localities.

The bill also reauthorizes the Formula Grant Program for the next six years at $200,000,000 per year. I have included provisions to expand and the permissible uses of these funds so as to make clear that employment training, mental health treatment, and other effective programs that meet the needs of children and youth in the juvenile system could be funded. The bill reauthorizes state-level court through a reporting requirement. It emphasizes the disruption and prosecution of gangs. It extends the juvenile justice mentoring program, and adds a pilot program to encourage and develop mentoring initiatives that focus on entire communities. The bill also includes funds for grants to States to upgrade and enhance their juvenile felony criminal record histories.

My bill includes important provisions to continue the core protections for incarcerated youths that were included in the original Juvenile Justice and Delinquency Prevention Act of 1974. It continues the Act’s function of protecting children from abuse and assault by adults in jails by prohibiting any contact between juveniles and adult inmates. The bill ensures that children are not detained in any jail or lockup for adults, except for very limited periods of time and under very limited circumstances. And it continues current law’s requirement that States address the disproportionate number of minority children in confinement.

The bill authorizes $500,000,000 per year over the next six years for the Juvenile Accountability Block Grant program. While the formula has been almost the same for the last six years, this program has never been authorized. Its purpose is to strengthen State juvenile justice systems. States would receive funds as long as they implement or consider implementing graduated sanctions, though this condition can be lifted through a reporting requirement. The language I have included in my bill is drawn from H.R. 863, a measure which is currently working its way through the other body. I am supportive of that measure, as it will provide much needed funds for States to hire additional prosecutors, juvenile court judges, probation officers, and court-appointed defenders and special advocates. In years past, my State has used these funds to establish a Serious Juvenile Offender program through the Delaware Division of Youth Rehabilitative Services, which provides an immediate secure placement of violent youth offenders who have violated the terms of their probation. Delaware has also used these funds to expand diversionary programs such as Teen Court, thus reducing the time between arrest and disposition of juvenile offenders, and to add psycho-forensic evaluators in the Delaware Office of the Public Defender to identify and address mental illness as a cause for delinquent conduct. This is a good program and it needs to be authorized.

My bill also reauthorizes the Violent Crime Reduction Trust Fund. The Trust Fund, created in the 1994 Crime Bill, has been the key to our successful fight against crime over the past several years. Unfortunately, it expired in 2000. The Violent Crime Reduction Trust Fund was the vehicle for providing billions of dollars to State and local governments to implement a variety of law enforcement and crime-fighting initiative, from the COPS program to the Violence Against Women Act to youth violence programs. Without the Trust Fund, I fear we may not have the resources necessary to continue our struggle to keep our streets safe. I am pleased to include provisions in this bill that will extend the Fund through fiscal year 2007.

Finally, the bill I am introducing today includes several common sense gun safety provisions. First, it incorporates Senator Reed’s Gun Show Background Check Act. This language will ensure that criminals cannot purchase guns at gun shows, and I applaud Senator Reed for his leadership in this area. Second, I have included Senator Kohl’s Child Safety Lock Act. This moderate provision would require handguns to be sold with government-certified trigger locks. Studies indicate trigger locks save lives; I was pleased to see the Administration’s endorsement of this idea in its budget request for the upcoming fiscal year; and I thank Senator Kohl, for including his bill in this larger measure today. Third, the bill would extend the Brady Law to dangerous juvenile offenders. This provision would make it unlawful for any person adjudicated a juvenile delinquent for serious drug offenses or violent felonies to possess firearms. This is an important step toward getting guns out of the hands of criminals, and its enactment will prevent violent juveniles from accessing weapons and thus make it difficult for them to commit gun crimes as adults.

This is not a perfect bill, and I am not wedded to each and every line. I welcome comments from my colleagues, the juvenile justice community, and anyone interested in preventing and controlling juvenile crime. I am committed, however, to renewing our efforts to keep our children and our communities safe from crime and violence. I am committed to protecting our kids through meaningful prevention and intervention programs, to cracking down on drugs and the violence that accompanies them, and to ensuring that meaningful, appropriate and swift punishment is imposed on all juvenile offenders. I believe the Juvenile Crime Prevention and Control Act that I introduce today is an important step toward accomplishing these goals.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the “Juvenile Crime Prevention and Control Act of 2001”.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—JUVENILE CRIME PREVENTION AND CONTROL

Sec. 101. Findings; declaration of purpose; definitions.
Sec. 102. Juvenile crime control and prevention.
Sec. 103. Juvenile offender accountability.
Sec. 104. Extension of violent crime reduction trust fund.

TITLE II—PROTECTING CHILDREN FROM VIOLENCE

Subtitle A—Gun Show Background Checks
Sec. 201. Short title.
Sec. 203. Extension of Brady background checks to gun shows.

Subtitle B—Gun Ban for Dangerous Juvenile Offenders
Sec. 211. Permanent prohibition on firearms transfers to or possession by dangerous juvenile offenders.

Subtitle C—Child Safety Locks
Sec. 221. Short title.
Sec. 222. Requirement of child handgun safety locks.
Sec. 223. Amendment of consumer product safety act.

TITLE III—JUVENILE CRIME PREVENTION AND CONTROL

Sec. 301. Findings; declaration of purpose; definitions.
Title I of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5661 et seq.) is amended to read as follows:

TITLE I—FINDINGS AND DECLARATION OF PURPOSE

Sec. 101. FINDINGS.

“Congress finds that—
(1) the juvenile crime problem should be addressed through a 2-track common sense approach that addresses the needs of individual juveniles and society at large by promoting—
(A) quality prevention programs that—
(i) work with juveniles, their families, local public agencies, and community-based organizations, and take into consideration such factors as whether juveniles have ever been the victims of family violence (including child abuse and neglect); and
(ii) are designed to reduce risks and develop competencies in at-risk juveniles that will prevent, and reduce the rate of, violent delinquent behavior; and
"(B) programs that assist in holding juveniles in custody or that are implementing a system of graduated sanctions to respond to each delinquent act, requiring juveniles to make restitution, or perform community service for the damage caused by their delinquent acts, and methods for increasing victim satisfaction with respect to the penalties imposed on juveniles for their acts; and

"(2) action is required now to reform the Federal juvenile justice program by focusing on juvenile delinquency prevention programs to improve or protect juvenile and family involvement in the prevention and treatment of juvenile delinquency; and

SEC. 102. PURPOSES.

"(7) COMMUNITY-BASED.—The term ‘community-based’ means any activity related to juvenile delinquency prevention, control, diversion, treatment, rehabilitation, planning, evaluation, training, and research, including—

"(A) drug and alcohol abuse programs;

"(B) any program or activity that is designed to improve the juvenile justice system; and

"(C) any program or activity that is designed to reduce known risk factors for juvenile delinquent behavior, by providing activities that build on protective factors for, and develop competencies in, juveniles to prevent and reduce the rate of juvenile delinquent behavior.

"(18) JUVENILE DELINQUENCY PROGRAM.—The term ‘juvenile delinquency program’ means any program or activity related to juvenile delinquency prevention, control, diversion, treatment, rehabilitation, planning, evaluation, training, and research, including—

"(A) drug and alcohol abuse programs;

"(B) any program or activity that is designed to reduce known risk factors for juvenile delinquent behavior, by providing activities that build on protective factors for, and develop competencies in, juveniles to prevent and reduce the rate of juvenile delinquent behavior.

"(19) LAW ENFORCEMENT AND CRIMINAL JUSTICE.—The term ‘law enforcement and criminal justice’ means any activity related to juvenile delinquency prevention, control, diversion, treatment, rehabilitation, planning, evaluation, training, and research, including—

"(A) drug and alcohol abuse programs;

"(B) any program or activity that is designed to reduce known risk factors for juvenile delinquent behavior, by providing activities that build on protective factors for, and develop competencies in, juveniles to prevent and reduce the rate of juvenile delinquent behavior.

SEC. 103. DEFINITIONS.

"In this Act:

"(1) ADMINISTRATOR.—The term ‘Administrator’ means the Administrator of the Office of Juvenile Crime Control and Prevention, appointed in accordance with section 201.

"(2) ADULT INMATE.—The term ‘adult inmate’ means an individual who—

"(A) has reached the age of full criminal responsibility under applicable State law; and

"(B) has been arrested and is in custody for, awaiting trial on, or convicted of criminal charges.

"(5) COLLOCATED FACILITIES.—The term ‘collocated facilities’ means facilities that are related in the same building, or are part of a related complex of buildings located on the same grounds.

"(6) COMBINATION.—The term ‘combination’ as applied to States or units of local government means any grouping or joining together of States or units of local government for the purpose of preparing, developing, or implementing a juvenile crime control and delinquency prevention plan.

"(7) COMMUNITY-BASED.—The term ‘community-based’ facility, program, or service means a small, open group home or other suitable place located near the home or family of the juvenile and programs of community supervision and service that maintain community and consumer participation in the planning, operation, and evaluation of those programs which may include, medical, educational, vocational, social, and psychological counseling, training, specialized education, counseling, alcoholism treatment, drug treatment, and other rehabilitative services.

"(8) COMPREHENSIVE AND COORDINATED SYSTEM OF SERVICES.—The term ‘comprehensive and coordinated system of services’ means a system that—

of local government, or any law enforcement agency, to obtain or detain or confine adults.

"(A) pending the filing of a charge of violating a criminal law;

"(B) who are awaiting trial on a criminal charge; or

"(C) who are convicted of violating a criminal law.

"(18) JUVENILE DELINQUENCY PROGRAM.—The term ‘juvenile delinquency program’ means any program or activity related to juvenile delinquency prevention, control, diversion, treatment, rehabilitation, planning, evaluation, training, and research, including—

"(A) drug and alcohol abuse programs;

"(B) any program or activity that is designed to reduce known risk factors for juvenile delinquent behavior, by providing activities that build on protective factors for, and develop competencies in, juveniles to prevent and reduce the rate of juvenile delinquent behavior.

"(19) LAW ENFORCEMENT AND CRIMINAL JUSTICE.—The term ‘law enforcement and criminal justice’ means any activity related to crime prevention, control, or reduction or the enforcement of the criminal law, including police efforts to prevent, control, or reduce crime or to apprehend criminals, activities of courts having criminal jurisdiction and related agencies (including prosecutorial and defender services), activities of correctional institutions, parole agencies, and programs relating to the prevention, control, or reduction of juvenile delinquency or narcotic addiction.

"(21) NONPROFIT ORGANIZATION.—The term ‘nonprofit organization’ means an organization described in section 501(c)(3) of the Internal Revenue Code of 1986 that is exempt from taxation under section 501(a) of the Internal Revenue Code of 1986.

"(22) OFFICE.—The term ‘Office’ means the Office of Juvenile Crime Control and Prevention established under section 201.

"(24) OUTCOME OBJECTIVE.—The term ‘outcome objective’ means an objective that relates to the impact of a program or initiative, that measures the reduction of high risk behaviors, such as incidence of arrest, the commission of criminal acts or acts of delinquency, failure in school, violence, the use of alcohol or illegal drugs, involvement in youth gangs, violent and unlawful acts of animal cruelty, and teenage pregnancy, among youth in the community.

"(25) PROCESS OBJECTIVE.—The term ‘process objective’ means an objective that relates to the manner in which a program or initiative is carried out, including—

"(B) an objective relating to the degree to which the program or initiative is reaching the target population; and

"(26) PROHIBITED PHYSICAL CONTACT.—The term ‘prohibited physical contact’ means—

CONGRESSIONAL RECORD—SENATE July 11, 2001
CONGRESSIONAL RECORD—SENATE

July 11, 2001

SEC. 201. ESTABLISHMENT OF OFFICE.

(a) IN GENERAL.—The Office shall be headed by an Administrator, who shall be appointed by the Administrator, and who shall have the same authority as the directors of other offices and bureaus in the Office.

(b) OFFICERS.—The Administrator may appoint, and to fix the compensation of those officers and employees of the Office as the Administrator shall direct.

(c) DETAIL OF FEDERAL PERSONNEL.—Upon the request of the Administrator, the head of any Federal agency may detail, on a reimbursable basis, any of its personnel to the Administrator to assist the Administrator in carrying out the functions of the Administrator under this title.

(d) SERVICES.—The Administrator may obtain services as authorized by section 3109 of title 5, United States Code, at rates not to exceed the rate now or hereafter payable under section 5376 of title 5, United States Code.

SEC. 202. PERSONNEL, SPECIAL PERSONNEL, EXPERTS, AND CONSULTANTS.

(a) NATIONAL JUVENILE CRIME PREVENTION, CONTROL, AND JUVENILE OFFENDER ACCOUNTABILITY PLAN.

(1) IN GENERAL.—Subject to the general authority of the Attorney General, the Administrator shall develop objectives, priorities, and short- and long-term plans, and shall implement overall policy and a strategy to carry out those plans, for all Federal juvenile crime prevention, juvenile offender accountability programs and activities relating to improving juvenile crime control, the rehabilitation of juvenile offenders, the prevention of juvenile crime, and the enhancement of accountability by offenders within the juvenile justice system in the United States.

(b) DELEGATION OF PERSO NS.—(A) IN GENERAL.—Each plan described in paragraph (1) shall.
CONGRESSIONAL RECORD—SENATE

July 11, 2001

“(i) contain specific, measurable goals and criteria for assessing progress toward national juvenile crime control, prevention, and juvenile offender accountability programs, and Federal policies relating to juveniles prosecuted or adjudicated in the Federal courts; 

“(ii) implement and coordinate Federal juvenile crime control, prevention, and juvenile offender accountability programs and activities, including proposals for joint funding to be coordinated by the Administrator; 

“(iii) provide a detailed summary and analysis of the most recent data available indicating the number of juveniles taken into custody, the rate at which juveniles are taken into custody, the time served by juveniles in custody, and the trends demonstrated for assessing progress toward national juvenile crime control and juvenile offender accountability programs; and 

“(iv) provide a description of the activities for which amounts are expended under this title; 

“(v) provide specific information relating to the attainment of goals set forth in the plan, including specific, measurable standards for assessing progress toward national juvenile crime reduction and juvenile offender accountability goals; and 

“(vi) provide for the coordination of Federal, State, and local initiatives for the reduction of youth crime, preventing delinquency, and ensuring accountability for juvenile offenders. 

(B) SUMMARY AND ANALYSIS.—Each summary and analysis paragraph under subparagraph (A)(iii) shall set out the information required by clauses (i), (ii), and (iii) of this subparagraph separately for juvenile non-offenders, juvenile status offenders, and other juvenile offenders, and shall separately address with respect to each category of juveniles specified— 

“(i) the types of offenses with which the juveniles are charged; 

“(ii) the ages of the juveniles; 

“(iii) the programs and policies used to hold the juveniles (including juveniles treated as adults for purposes of prosecution) in custody, including secure detention facilities, secure correctional facilities, jails, and lock-ups; 

“(iv) the length of time served by juveniles in custody; and 

“(v) the number of juveniles who died or suffered serious bodily injury while in custody and the circumstances under which each juvenile died or suffered that injury. 

(C) DISPROPORTION OF SERIOUS BODILY INJURY.—In this paragraph, the term ‘serious bodily injury’ means bodily injury involving extreme physical pain or the impairment of a function of a bodily member, organ, or mental faculty that requires medical intervention such as surgery, hospitalization, or physical rehabilitation. 

“(D) ANNUAL REVIEW.—The Administrator shall annually— 

“(A) review each plan submitted under this subsection; and 

“(B) revise the plans, as the Administrator considers appropriate; and 

“(C) not later than March 1 of each year, present the plans to the Committee on the Judiciary of the Senate and the Committee on Education and the Workforce of the House of Representatives. 

(D) DUTIES OF ADMINISTRATOR.—In carrying out this title, the Administrator shall— 

“(1) advise the President through the Attorney General with respect to the administration of federally assisted juvenile crime control, prevention, and juvenile offender accountability programs, and Federal policies relating to juveniles prosecuted or adjudicated in the Federal courts; 

“(2) implement and coordinate Federal juvenile crime control, prevention, and juvenile offender accountability programs and activities, including proposals for joint funding to be coordinated by the Administrator; 

“(3) serve as a single point of contact for States, units of local government, and private entities for purposes of providing information and juvenile delinquency programs or for referral to other agencies or departments that operate such programs; 

“(4) provide for the auditing of grants provided pursuant to this title; 

“(5) collect, prepare, and disseminate usable data regarding the prevention, correction, and control of juvenile crime and delinquency, and issue, not less than once each calendar year, a report on successful programs or for referral to other agencies or departments that operate such programs; 

“(6) ensure the performance of comprehensive rigorous independent scientific evaluations, each of which shall— 

“(A) be independent in nature, and shall employ rigorous and scientifically valid standards and methodologies; and 

“(B) include measures of outcome and process objectives, such as reductions in juvenile crime, youth gang activities, youth substance abuse, and delinquency, as well as increases in protective factors that reduce the likelihood of delinquency and criminal behavior; 

“(C) consult with appropriate authorities in the States and with appropriate private entities regarding the development, review, and revision of the plans required by subparagraph (a) and the development of policies relating to juveniles prosecuted or adjudicated in the Federal courts; 

“(D) provide technical assistance to the States, to be used by any agency, organization, or private entity that administers a Federal juvenile crime control, prevention, and juvenile offender accountability program or activity; and 

“(E) ensure that the development statement transmitted under paragraph (1), together with the comments of the Administrator under subparagraph (A), shall be— 

“(i) included by the Federal agency involved in every recommendation or request made by such agency for Federal legislation that significantly affects juvenile crime control, prevention, and juvenile offender accountability; and 

“(ii) made available for promulgation to and use by State and local government officials, and by nonprofit organizations involved in delinquency prevention programs. 

(F) JOINT FUNDING.—Notwithstanding any other provision of law, any funds available by more than one Federal agency to be used by any agency, organization, institution, or individual to carry out a Federal juvenile crime control, prevention, and juvenile offender accountability program or activity— 

“(A) participating in the development and use of program models developed through the Institute and through programs funded under section 254; and 

“(B) conducting an annual conference of the members of the National Juvenile Justice Governing Board and the State advisory groups appointed under section 222(b)(2) to assist that eligible organization in— 

“(1) providing technical and financial assistance to eligible organizations; 

“(2) disseminating information, data, standards, advanced techniques, and program models developed through the Institute and through programs funded under section 254; and 

“(3) reviewing and commenting on proposals for joint funding to be coordinated by the Administrator.
**SEC. 204. COMMUNITY PREVENTION GRANT PROGRAM.**

"(a) PURPOSE.—The Administrator may make grants to a State, to be transmitted through the State advisory group to units of local government that meet the requirements of subsection (b), for delinquency prevention programs and activities for youth who have had contact with the juvenile justice system or who are likely to have contact with the juvenile justice system, including the provision to children, youth, and families of—

(1) recreation services;

(2) tutoring and remedial education;

(3) assistance in the development of work awareness skills;

(4) child and adolescent health and mental health services;

(5) alcohol and substance abuse prevention services;

(6) workforce development activities; and

(7) the teaching that people are and should be held accountable for their actions.

"(b) ELIGIBILITY.—The requirements of this subsection are—

(1) in compliance with the requirements of part B of title II;

(2) the unit has submitted to the State advisory group a 3-year plan outlining the local front end plans of the unit for investment for delinquency prevention and early intervention activities;

(3) the unit has included in its application to the Administrator for formula grant funds a summary of the 3-year plan described in paragraph (2);

(4) pursuant to its 3-year plan, the unit has appointed a local policy board of no fewer than 15 and no more than 21 members with the involvement of representatives from agencies and private, nonprofit organizations serving children, youth, and families and business and industry;

(5) the unit has, in order to aid in the prevention of delinquency, included in its application a plan for the coordination of services for at-risk youth and their families, including such programs as nutrition, energy assistance, and housing;

(6) the local policy board is empowered to make all recommendations for distribution of funds and evaluation of activities funded under this title;

(7) the unit or State has agreed to provide a 50 percent match of the amount of the grant, including the value of in-kind contributions, to fund the activity.

"(c) PRIORITY.—In considering grant application under this section, the Administrator shall give priority to applicants that demonstrate—

(1) plans for service and agency coordination and collaboration including the collocalization of services;

(2) innovative ways to involve the private nonprofit and business sector in delinquency prevention activities; and

(3) developing or enhancing a statewide substate or local government that is dedicated to early intervention and delinquency prevention.

**SEC. 205. GRANTS TO INDIAN TRIBES.**

"(a) IN GENERAL.—In each fiscal year, the Administrator shall make grants to Indian tribes for programs pursuant to the purposes specified in subsection (b), subject to the fiscal accountabilities, of Indian tribes that receive grants under this section.

"(b) APPLICATIONS.—

(1) IN GENERAL.—To be eligible to receive a grant under this section, an Indian tribe shall submit to the Administrator an application in such form and containing such information as the Administrator may require by regulation.

(2) PLANS.—Each application submitted under paragraph (1) shall include a plan for conducting projects described in section 204(a), which plan shall—

(A) provide evidence that the Indian tribe performs law enforcement functions as determined by the Secretary of the Interior;

(B) identify the juvenile justice and delinquency problems and juvenile delinquency prevention needs to be addressed by activities conducted by the Indian tribe in the area under the jurisdiction of the Indian tribe with assistance provided by the grant;

(C) provide for fiscal control and accounting procedures that—

(i) are necessary to ensure the prudent use, proper disbursement, and accounting of funds received under this section; and

(ii) are consistent with the requirements of subparagraph (A) of section 222 (c) of this title;

(D) comply with the requirements of section 222(a) (except that such subsection relates to consultation with a State advisory group) and with the requirements of section 222(c); and

(E) contain such other information, and be subject to such additional requirements, as the Administrator may reasonably prescribe to ensure the effectiveness of the grant program under this section.

"(c) FACTORS FOR CONSIDERATION.—In awarding grants under this section, the Administrator shall consider—

(1) the resources that are available to each applicant that will assist, and be coordinated with, the tribal juvenile justice system of the Indian tribe; and

(2) for each Indian tribe that receives assistance under such a grant—

(A) the relative juvenile population; and

(B) who will be served by the assistance provided by the grant.

"(d) GRANT AWARDS.—

(1) IN GENERAL.—

(A) COMPETITIVE AWARDS.—Except as provided in paragraph (2), the Administrator shall—

(i) annually award grants under this section on a competitive basis; and

(ii) enter into a grant agreement with each grant recipient under this section that specifies the terms and conditions of the grant.

(B) PERIOD OF GRANT.—The period of each grant awarded under this section shall be 2 years.

"(2) EXCEPTION.—In any case in which the Administrator determines that a grant recipient under this section has performed satisfactorily in the preceding year in accordance with an applicable grant agreement, the Administrator may—

(A) waive the requirement that the recipient be subject to the competitive award process described in paragraph (1)(A); and

(B) renew the grant for an additional grant period (as specified in paragraph (1)(B)).

"(3) MODIFICATIONS OF PROCESSES.—The Administrator may prescribe requirements to provide for appropriate modifications to the grant application and approval process specified in subsection (b) for an application for a renewal grant under paragraph (2)(B).

"(e) REPORTING REQUIREMENT.—Each Indian tribe that receives a grant under this section shall be subject to the fiscal accountability provisions of section 5(f)(1) of the Indian Self-Determination and Education Assistance Act (20 U.S.C. 1251a), relating to the submission of a single-agency audit report required by chapter 75 of title 31, United States Code.

"(f) MACHINERY REQUIREMENT.—Funds appropriated by Congress for the activities of any agency of an Indian tribal government used to implement and administer law enforcement functions on any Indian lands may be used to provide the non-Federal share of any program or project with a matching requirement funded under this section.

"(g) TECHNICAL ASSISTANCE.—From the amount reserved under section 206(b) in each fiscal year, the Administrator shall reserve 1 percent for the purpose of providing technical assistance to recipients of grants under this part.

**SEC. 206. ALLOCATION OF GRANTS.**

"(a) IN GENERAL.—Subject to subsections (b), (c), and (d), the amount allocated under section 261 to carry out section 204 in each fiscal year shall be allocated to the States as follows:

(1) The amount allocated to any State shall not be less than $200,000.

(2) Not less than 75 percent of the funds made available under Part A of this title shall be used to carry out section 205.

"(b) RESERVATION OF FUNDS.—Notwithstanding any other provision of law, from the amounts allocated under section 261 to carry out section 204 and part B in each fiscal year the Administrator shall reserve an amount equal to the amount which all Indian tribes that qualify for a grant under section 205 would collectively be entitled, if such tribes were collectively treated as a State for purposes of subsection (a).

"(c) EXCEPTION.—The amount allocated to the Northern Mariana Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands shall be less than $75,000 and not more than $100,000.

"(d) ADMINISTRATIVE COSTS.—A State, unit of local government, or eligible unit that receives funds under this part may not use more than 5 percent of those funds to pay for administrative costs.

**PART B—FEDERAL ASSISTANCE FOR STATE AND LOCAL PROGRAMS**

**SEC. 221. AUTHORITY TO MAKE GRANTS AND CONTRACTS.**

"(a) IN GENERAL.—The Administrator may make grants or contracts to or for Indian tribes, States or units of local government, or combinations thereof, to assist them in planning, establishing, operating, coordinating, and evaluating projects directly or through grants and contracts with public and private agencies for the development of more effective education, training, research, prevention, diversion, treatment, and rehabilitation programs and other areas of juvenile delinquency and programs to improve the juvenile justice system.

"(b) TRAINING AND TECHNICAL ASSISTANCE.—

(1) IN GENERAL.—With not to exceed 2 percent of the funds available in a fiscal year to carry out this part, the Administrator shall make grants or contracts with public and private agencies, organizations, and individuals to provide training
and technical assistance to States, units of local government, and combinations thereof, and local private agencies to facilitate compliance with section 222 and implementation of the State plan approved under section 222(c).

(2) ELIGIBLE RECIPIENTS.—

(A) IN GENERAL.—Grants may be made to and contracts may be entered into under paragraph (2) with public and private agencies, organizations, and individuals that have experience in providing training and technical assistance required under paragraph (1).

(B) ACTIVITY COORDINATION.—In providing training and technical assistance required under paragraph (1), the recipient of a grant or contract under this subsection shall coordinate its activities with the State agency described in section 222(a)(1).

SEC. 222. STATE PLANS.

(a) Annual Plans.—In order to receive formula grants under this part, a State shall submit a plan, developed in consultation with the State Advisory Group established under section 222(c), to the Administrator, each of which shall describe the processes necessary to update the State plan, including monitoring, evaluation, and other one-time staff position.

(b) Allocation.—A portion of any allocation of formula grants to a State shall be available to develop a State plan or for other activities associated with such State plan which includes contracts and grants necessary to update the State plan, and shall describe the status of compliance with State plan requirements.

(c) Contents of Plan.—In accordance with regulations that the Administrator shall prescribe, a State plan shall—

(1) designate a State agency as the sole agency for supervising the preparation and administration of the State plan;

(2) contain satisfactory evidence that the State has developed in accordance with paragraph (1) has or will have authority, by legislation if necessary, to implement the State plan in conformity with this part;

(3) contain active coordination with and participation of units of local government in the development of a State plan that adequately takes into account the needs and requests of units of local government, except that nothing in the State plan requires, or any regulations promulgated to carry out such requirements, shall be construed to prohibit or impede the State from making grants to, or entering into contracts with, local private agencies, including religious organizations;

(4) to the extent feasible and consistent with paragraph (5), provide for an equitable distribution of the assistance received with the State, including rural areas;

(5) contain provisions for the use of funds made available to the State under this part in accordance with the manner in which programs are expected to meet the identified juvenile crime and delinquency prevention needs (including the joining of gangs that commit crimes) and juvenile justice and delinquency prevention needs (including educational needs) of the State (including any geographical area in which an Indian tribe performs law enforcement functions), a description of the services to be provided, and a description of the performance goals and priorities, including a specific statement of the manner in which programs are expected to meet the identified juvenile crime and delinquency prevention needs (including the joining of gangs that commit crimes) and juvenile justice and delinquency prevention needs (including educational needs) of the State;

(6) an indication of the manner in which the programs relate to other similar State or local programs that are intended to address the same or similar problems; and

(7) a strategy for the concentration of State efforts, which shall coordinate all State juvenile crime control, prevention, and delinquency prevention programs with respect to overall policy and development of objectives and priorities for all State juvenile crime control and delinquency programs and activities, including the gathering of data on the activities and findings of State officials with responsibility in the area of juvenile justice and delinquency prevention;

(8) needed gender-specific services for the prevention and treatment of juvenile delinquency;

(9) needed services for the prevention and treatment of juvenile delinquency in rural areas;

(10) needed health care services and mental health services to juveniles in the juvenile justice system;

(11) projects designed to deter involvement with, participation in, and participation in unlawful activities on the part of juveniles, including educational failure, with responsible adults (such as law enforcement officers, adults working with local businesses, and adults working with community-based organizations) who are properly screened and trained;

(12) programs designed to develop and implement projects relating to juvenile delinquency and learning disabilities, including on-the-job training programs to assist community services, law enforcement, and juvenile justice personnel to more effectively recognize, refer, and provide for learning disabled and other juveniles with disabilities;

(13) projects designed to deter involvement in illegal activities and promote involvement in lawful activities, including the development of programs to encourage juveniles to remain at home with their families, in order to reduce the likelihood that those juvenile offenders will commit crimes) and juvenile justice and delinquency prevention programs for purposes of establishing treatment plans for juvenile offenders;

(14) programs designed to provide for the treatment for a youth who is dependent on or abuses alcohol or other addictive or nonaddictive drugs;

(15) comprehensive juvenile crime control and delinquency prevention programs that meet the needs of youth through the collaboration of public and private private/agencies and organizations, including the use of graduated sanctions and of neighborhood courts or panels that increase victim satisfaction and require juveniles to make restitution for the damage caused by their actions;

(16) juvenile justice and delinquency prevention programs that meet the needs of youth through the collaboration of public and private agencies and organizations, including the use of graduated sanctions and of neighborhood courts or panels that increase victim satisfaction and require juveniles to make restitution for the damage caused by their actions;

(17) that may promote the complete treatment of the juveniles and the preservation of their families;
July 11, 2001

CONGRESSIONAL RECORD—SENATE 12925

(8) programs that utilize multidisciplinary approaches to enhance management and information sharing, that enable the juvenile justice and law enforcement agencies, schools, and social service agencies to make more informed decisions regarding early identification, investigation, supervision, and treatment of juveniles who repeatedly committed violent or serious delinquent acts;

(9) programs designed to prevent and reduce hate crimes committed by juveniles;

(10) court supervised initiatives that address the illegal possession of firearms by juveniles;

(11) programs for positive youth development that provide delinquent youth and youth at-risk of delinquency with—

(i) an ongoing relationship with a caring adult (such as a mentor, tutor, coach, or shelter youth worker);

(ii) safe places and structured activities during nonschool hours;

(iii) a healthy start;

(iv) a marketable skill through effective education; and

(v) an opportunity to give back through community service;

(12) programs and projects that provide comprehensive post-placement services that help prevent kids from re-offending and successfully re-integrate back into the community, including mental health services, substance abuse treatment, counseling, education, and employment training;

(13) programs and services designed to identify and address the health and mental health needs of youth; and

(14) programs that have been proven to be successful in preventing delinquency, such as Multi-Systemic Therapy, Multi-Dimensional Treatment Foster Care, Functional Family Therapy, and the Bullying Prevention Program;

(15) provide—

(A) a juvenile who is charged with or who has committed an offense that would not be criminal if committed by an adult shall not be placed in a secure detention facility or secure correctional facility unless the juvenile—

(i) was charged with or committed a violation of section 922(x)(2) of title 18, United States Code, or of a similar State law;

(ii) was not charged with or committed a violation of a valid court order; or

(iii) was held in accordance with the Interstate Compact on Juveniles as enacted by the State; and

(B) a juvenile shall not be placed in a secure detention facility or secure correctional facility if the juvenile—

(i) is not charged with any offense; and

(ii) is—

(A) an alien; or

(B) alleged to be dependent, neglected, or abused;

(16) provide—

(A) a juvenile who is alleged to be or found to be delinquent or a juvenile who is described in paragraph (11) will not be detained or confined in any institution in which prohibited physical contact or sustained oral and visual contact with an adult immediate occurs, other non-Federal funds.

(B) there is in effect in the State a policy that requires an individual who works with both juveniles and adult inmates, including in correctional facilities, to be trained and certified to work with juveniles;

(17) provide that no juvenile will be detained or confined in any jail or lockup for adults or older youth;

(A) juveniles who are accused of non-status offenses and who are detained in such jail or lockup for a period not to exceed 6 hours—

(i) for processing or release;

(ii) while awaiting transfer to a juvenile facility; or

(iii) in which period such juveniles make a court appearance;

(B) juveniles who—

(i) are accused of nonstatus offenses;

(ii) are awaiting an initial court appearance that will occur within 48 hours after being taken into custody (excluding Saturdays, Sundays, and legal holidays); and

(iii) are accused of a crime or are awaiting trial on criminal charges;

(18) where conditions of safety exist (such as severe adverse, life-threatening weather conditions that do not allow for reasonably safe travel), in which case the time for an appearance shall be delayed until 24 hours after the time that such conditions allow for reasonable safe travel;

(19) provide assurances that consideration will be given to and that assistance will be available for approaches designed to strengthen the families of delinquent and other youth to prevent juvenile delinquency and—

(A) provide assurances that consideration will be given to and that assistance will be available for approaches designed to strengthen the families of delinquent and other youth to prevent juvenile delinquency and—

(B) approaches under subparagraph (A) should include the involvement of grandparents or other extended family members, when possible, and the provision of family counseling during the incarceration of juvenile family members and coordination of family services when appropriate and feasible;

(20) provide for procedures to be established for protecting the rights of recipients of services and for assuring appropriate privacy with regard to records relating to the services provided to any individual under the State plan;

(21) provide for such fiscal control and fund accounting procedures necessary to assure prudent use, proper disbursement, and accurate accounting of funds received under this title;

(22) provide reasonable assurances that Federal funds made available under this part for any period shall be used to supplement and increase (but not supplant) the level of the State, local, and other non-Federal funds that would, in the absence of the Federal funds, be made available for the programs described in this part, and shall in no event replace the State, local, and other non-Federal funds;

(23) provide that the State agency designated under paragraph (1) shall, not less than 4 years younger than that convicted person, be tested for the presence of a sexually transmitted disease and that the results of that test be provided to the victim or to the family of the victim as well as to any court or other government agency with primary authority for sentencing the person convicted for the commission of the sexual act or sexual contact (as those terms are defined in paragraphs (2) and (3), respectively, of section 2246 of title 18, United States Code);

(24) provide that if a juvenile is taken into custody for violating a valid court order issued for committing a sexual offense—

(A) an appropriate public agency shall be promptly notified that the juvenile is being taken into custody for violating the court order;

(B) that within 24 hours of the juvenile being taken into custody, an authorized representative of the public agency shall interview the juvenile in person; and

(C) that within 48 hours of the juvenile being taken into custody—

(i) the authorized representative shall submit an assessment regarding the immediate needs of the juvenile to the court that issued the order; and

(ii) the court shall conduct a hearing to determine—

(25) whether there is reasonable cause to believe that the juvenile violated the order; and

(26) the appropriate placement of the juvenile pending disposition of the alleged violation;

(27) specify a percentage, if any, of funds received by the State under section 221 that the State reserve for expenditure by the State to provide incentive grants to units of local government, to the extent that those funds are spent consistent with the State plan, except that direct funding of any local private agency by a State shall be permitted only if the local private agency requests direct funding from the State agency has applied for and been denied funding by a unit of general local government.
"(24) provide for the establishment of youth courts, or 'juvies' in school districts in the State to promote zero tolerance policies with respect to misdemeanor offenses, acts of juvenile delinquency, and other antisocial behavior occurring on school property, including truancy, vandalism, underage drinking, and underage tobacco use; and

"(25) provide for projects to coordinate the delivery of adolescent mental health and substance abuse services to children at risk by coordinating councils composed of public and private service providers.

"(26) provide assurances that—

"(A) any assistance provided under this title will not cause the displacement (including a partial displacement, such as a reduction in the hours of nonovertime work, wages, or employment benefits) of any currently employed employee;

"(B) activities assisted under this title will not impair an existing collective bargaining relationship, contract for services, or collective bargaining agreement; and

"(C) no assistance would be inconsistent with the terms of a collective bargaining agreement shall not be undertaken without the written concurrence of the labor organization involved.

"(27) address efforts to reduce the proportion of juveniles detained or confined in secure detention facilities, secure correctional facilities, and lockups who are members of minority groups, if such proportion exceeds the proportion such groups represent in the general population.

"(e) APPROVAL BY STATE AGENCY.—

"(1) STATE AGENCY.—The State agency designated under subsection (d)(1) shall approve the State plan and any modification of that plan prior to submission of the plan to the Administrator.

"(2) STATE ADVISORY GROUP.—

"(A) ESTABLISHMENT.—The State advisory group referred to in subsection (d) shall be known as the ‘State Advisory Group’.

"(ii) MEMBERS.—The State Advisory Group shall—

"(I) consist of representatives from both the private and public sector, each of whom shall be appointed for a term of not more than 2 years, and

"(II) include not less than 1 prosecutor and not less than 1 judge from a court with a juvenile crime or delinquency docket.

"(iii) MEMBER EXPERIENCE.—The State shall ensure that members of the State Advisory Group shall have experience in the area of juvenile delinquency prevention, the prosecution of juvenile offenders, the treatment of juvenile delinquency, the investigation of juvenile crimes, or the administration of juvenile justice programs.

"(iv) CHAIRPERSON.—The chairperson of the State Advisory Group shall not be a full-time employee of the Federal Government or the State government.

"(B) CONSULTATION.—

"(i) IN GENERAL.—The State Advisory Group established under subparagraph (A) shall—

"(I) participate in the development and review of a State plan under this section before the plan is submitted to the supervisory agency for final action; and

"(II) have the opportunity to review and comment, not later than 30 days after the submission to the State Advisory Group, on all juvenile justice and delinquency prevention applications submitted to the State agency designated under subsection (d)(1).

"(ii) AUTHORITY.—The State Advisory Group shall report to the chief executive officer and the legislature of a State that has submitted a plan, on an annual basis regarding recommendations related to the compliance by that State with this section.

"(C) FUNDING.—From amounts reserved for administrative costs, the State may make available to the State Advisory Group such sums as may be necessary to assist the State Advisory Group in adequately performing its duties under this paragraph.

"(d) COMPLIANCE WITH STATUTORY REQUIREMENTS.—If a State fails to comply with any of the applicable requirements of paragraph (11), (12), (13), (27) of subsection (d) in any fiscal year beginning after September 30, 2001, the amount allocated to that State for the subsequent fiscal year shall be reduced by not to exceed 12.5 percent for each such paragraph with respect to which the failure occurs, unless the Administrator determines that the State—

"(1) has achieved substantial compliance with the applicable requirements with respect to which the State was not in compliance; and

"(2) has made, through appropriate executive or legislative action, an unequivocal commitment to achieving full compliance with the applicable requirements within a reasonable time.

"SEC. 223. ALLOCATION OF GRANTS.

"(a) IN GENERAL.—Subject to subsections (b), (c), and (d), of the amount allocated under section 261 to carry out this part in each fiscal year that remains after reservation under section 206(b) for that fiscal year—

"(1) no State shall be allocated less than $750,000; and

"(2) the amount remaining after the allocation under paragraph (1) shall be allocated proportionately based on the juvenile population in the eligible States.

"(b) SYSTEM SUPPORT GRANTS.—Of the amount allocated under section 261 to carry out this part, not to exceed 10 percent of that part that remains after reservation under section 206(b) for that fiscal year, up to 10 percent may be available for use by the Administrator to provide—

"(1) training and technical assistance consistent with the purposes authorized under sections 203, 204, and 221;

"(2) direct grant awards and other support to develop, test, and demonstrate new approaches to improving the juvenile justice system and reducing, preventing, and abating delinquent behavior, juvenile crime, and youth violence;

"(3) for research and evaluation efforts to discover and test methods and practices to improve the juvenile justice system and reduce, prevent, and abate delinquent behavior, juvenile crime, and youth violence; and

"(4) [other provisions]

"(c) EXCEPTION.—The amount allocated to the Virgin Islands of the United States, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands shall be not less than $75,000 and not more than $100,000.

"(d) ADMINISTRATIVE COSTS.—A State, unit of local government, or eligible unit that receives funds under this part may not use more than 5 percent of those funds to pay for administrative costs.

"PART C—GANG-FREE SCHOOLS AND COMMUNITY-BASED GANG INTERVENTION

"SEC. 231. DEFINITION OF JUVENILE.

"In this part, the term ‘juvenile’ means an individual who has not attained the age of 22 years.

"SEC. 232. GANG-FREE SCHOOLS AND COMMUNITIES.

"(a) IN GENERAL.—

"(1) FAMILY AND COMMUNITY GRANTS.—The Administrator shall make grants to or enter into contracts with public agencies (including educational agencies), nonprofit organizations, public and private agencies, organizations, and institutions to establish and support programs and activities that involve families and communities and that are designed to—

"(A) prevent and reduce the participation of juveniles in criminal gang activity by providing—

"(I) Individual, peer, family, and group counseling, including a provision of life skills training and preparation for living independently, which shall include cooperation with local and state services, welfare, and health care programs;

"(ii) education, recreation, and social services designed to address the social and developmental needs of juveniles who are or may become members of gangs; and

"(iii) an organization of neighborhood and community groups to work closely with parents, schools, law enforcement, and other public and private agencies in the community; and

"(B) develop within the juvenile adjudicatory and correctional systems new and innovative means to address the problems of juveniles who have been involved in drug-related and other offenses;

"(C) target elementary school students, with the purpose of steering students away from gang involvement;

"(D) provide treatment to juveniles who are members of gangs, including members who are accused of committing a serious crime and members who have been adjudicated as being delinquent;

"(E) promote the involvement of juveniles in lawful activities in geographical areas in which gangs commit crimes;

"(F) promote and support, with the cooperation of community-based organizations experienced in providing services to juveniles engaged in gang-related activities and the cooperation of local law enforcement agencies, the development of policies and activities in public elementary and secondary schools that will assist those schools in maintaining a safe environment conducive to learning;

"(G) assist juveniles who are or may become members of gangs to obtain appropriate educational instruction, in or outside a regular school program, including the provision of counseling and other services to juveniles who may be required to participate in programs provided for these juveniles in the instructional programs;
(B) expand the availability of prevention and treatment services relating to the illegal use of controlled substances and controlled substance analogues (as defined in paragraphs (6) and (32) of section 102 of the Controlled Substances Act (21 U.S.C. 802)) by juvenile justice, education, and public and private health and social services agencies;  

(I) provide services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity;  

(J) provide services authorized in this section and carried out in a school, housing project or other appropriate site; or  

(K) support activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.  

(2) Research and Evaluation.—From not more than 15 percent of the total amount appropriated to carry out this part in each fiscal year, the Administrator may make grants to and enter into contracts with public agencies and private nonprofit agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the programs and activities for which the grants and contracts are requested, and  

(C) for assistance for programs and activities that—  

(I) are broadly supported by public and private nonprofit agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the programs and activities; and  

(ii) will substantially involve the families of juvenile gang members in carrying out the programs or activities.  

(SEC. 233. Community-Based Gang Intervention.  

(g) IN GENERAL.—The Administrator shall make grants to or enter into contracts with public and private nonprofit agencies, organizations, and institutions to carry out programs and activities—  

(I) to reduce the participation of juveniles in the illegal activities of gangs;  

(2) to develop regional task forces involving State, local, and community-based organizations, and institutions to carry out the programs and activities; and  

(2) APPLICATION CONTENTS.—In accordance with guidelines established by the Administrator, each application submitted under paragraph (1) shall—  

(A) set forth a program or activity for carrying out 1 or more of the purposes specified in subsection (a), and specifically identify each purpose the program or activity is designed to carry out;  

(B) provide that the program or activity shall be administered by or under the supervision of the applicant;  

(C) provide for the proper and efficient administration of the program or activity;  

(D) provide for regular evaluation of the program or activity;  

(E) provide an assurance that the proposed program or activity will supplement, not supplant, similar programs and activities already available in the community;  

(F) describe how the program or activity is coordinated with programs, activities, and services available locally under part B of this title and under chapter 1 of subtitle B of title III of the Anti-Drug Abuse Act of 1988 (22 U.S.C. 11801–11805);  

(G) certify that the applicant has requested the State planning agency to review and comment on the application and to summarize the responses of that State planning agency to the request;  

(H) provide that regular reports on the program or activity shall be sent to the Administrator and to the State planning agency; and  

(I) provide for such fiscal control and fund accounting procedures as may be necessary to ensure prudent use, proper disbursement, and accurate accounting of funds received under this section.  

(3) Preity.—In reviewing applications for grants and contracts under this section, the Administrator shall give priority to an application—  

(A) submitted by, or substantially involving, a local educational agency (as defined in section 1471 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2891));  

(B) based on the incidence and severity of crimes committed by gangs whose membership is composed primarily of juveniles in the geographical area in which the applicant proposes to carry out the programs and activities for which the grants and contracts are requested; and  

(C) for assistance for programs and activities that—  

(I) are broadly supported by public and private nonprofit agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the programs and activities; and  

(ii) will substantially involve the families of juvenile gang members in carrying out the programs or activities.  

(7) Supporting activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.  

(c) Approval of Applications.—  

(1) IN GENERAL.—Any agency, organization, or institution that seeks to receive a grant or enter into a contract under this section shall submit an application at such time, in such manner, and containing such information as the Administrator may prescribe.  

(2) APPLICATION CONTENTS.—In accordance with guidelines established by the Administrator, each application submitted under paragraph (1) shall—  

(A) set forth a program or activity for carrying out 1 or more of the purposes specified in subsection (a), and specifically identify each purpose the program or activity is designed to carry out;  

(B) provide that the program or activity shall be administered by or under the supervision of the applicant;  

(C) provide for the proper and efficient administration of the program or activity;  

(D) provide for regular evaluation of the program or activity;  

(E) provide an assurance that the proposed program or activity will supplement, not supplant, similar programs and activities already available in the community;  

(F) describe how the program or activity is coordinated with programs, activities, and services available locally under part B of this title and under chapter 1 of subtitle B of title III of the Anti-Drug Abuse Act of 1988 (22 U.S.C. 11801–11805);  

(G) certify that the applicant has requested the State planning agency to review and comment on the application and to summarize the responses of the State planning agency to the request;  

(H) provide that regular reports on the program or activity shall be sent to the Administrator and to the State planning agency; and  

(I) provide for such fiscal control and fund accounting procedures as may be necessary to ensure prudent use, proper disbursement, and accurate accounting of funds received under this section.  

(3) Priority.—In reviewing applications for grants and contracts under subsection (a), the Administrator shall give priority to an application—  

(4) Promoting the involvement of juveniles in lawful activities in geographical areas in which gangs commit crimes;  

(5) Expanding the availability of prevention and treatment services relating to the illegal use of controlled substances and controlled substance analogues (as defined in paragraphs (6) and (32) of section 102 of the Controlled Substances Act (21 U.S.C. 802)), by juveniles, provided through State and local health and social services agencies;  

(6) Providing services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity; or  

(7) Supporting activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.  

(D) APPROVAL OF APPLICATIONS.—  

(1) IN GENERAL.—Any agency, organization, or institution that seeks to receive a grant or enter into a contract under this section shall submit an application at such time, in such manner, and containing such information as the Administrator may prescribe.  

(2) APPLICATION CONTENTS.—In accordance with guidelines established by the Administrator, each application submitted under paragraph (1) shall—  

(A) set forth a program or activity for carrying out 1 or more of the purposes specified in subsection (a), and specifically identify each purpose the program or activity is designed to carry out;  

(B) provide that the program or activity shall be administered by or under the supervision of the applicant;  

(C) provide for the proper and efficient administration of the program or activity;  

(D) provide for regular evaluation of the program or activity;  

(E) provide an assurance that the proposed program or activity will supplement, not supplant, similar programs and activities already available in the community;  

(F) describe how the program or activity is coordinated with programs, activities, and services available locally under part B of this title and under chapter 1 of subtitle B of title III of the Anti-Drug Abuse Act of 1988 (22 U.S.C. 11801–11805);  

(G) certify that the applicant has requested the State planning agency to review and comment on the application and to summarize the responses of the State planning agency to the request;  

(H) provide that regular reports on the program or activity shall be sent to the Administrator and to the State planning agency; and  

(I) provide for such fiscal control and fund accounting procedures as may be necessary to ensure prudent use, proper disbursement, and accurate accounting of funds received under this section.  

(3) Priority.—In reviewing applications for grants and contracts under subsection (a), the Administrator shall give priority to an application—  

(4) Providing services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity; or  

(5) Expanding the availability of prevention and treatment services relating to the illegal use of controlled substances and controlled substance analogues (as defined in paragraphs (6) and (32) of section 102 of the Controlled Substances Act (21 U.S.C. 802)), by juveniles, provided through State and local health and social services agencies;  

(6) Providing services to prevent juveniles from coming into contact with the juvenile justice system again as a result of gang-related activity; or  

(7) Supporting activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.  

(7) Supporting activities to inform juveniles of the availability of treatment and services for which financial assistance is available under this section.  

This page has been reviewed by the Office of the Federal Register, National Archives and Records Administration, according to 5 U.S.C. 552 (a).
“(A) submitted by, or substantially involving, a public or private organization experienced in providing services to juveniles.

“(B) based on the incidence and severity of crimes committed by gangs whose membership is comprised primarily of juveniles in the geographical area in which the applicant proposes to carry out the programs and activities for which the grants and contracts are requested; and

“(C) for assistance for programs and activities that—

“(i) are broadly supported by public and private agencies, organizations, and institutions located in the geographical area in which the applicant proposes to carry out the programs and activities; and

“(ii) would involve families of juvenile gang members in carrying out the programs or activities.

SEC. 234. PRIORITY.

“In making grants under this part, the Administrator shall give priority to funding programs and activities described in subsections (a)(2) and (b)(1) of section 233.

PART D—DEVELOPING, TESTING, AND DEMONSTRATING NEW INITIATIVES AND PROGRAMS

SEC. 241. GRANTS AND PROJECTS.

“(a) AUTHORITY TO MAKE GRANTS.—The Administrator may make grants to, and enter into contracts with, States, units of local government, Indian tribal governments, public and private agencies, organizations, and individuals, or combinations thereof, to carry out projects for the development, testing, and demonstration of promising initiatives and programs for the prevention, control, or reduction of juvenile delinquency.

“(b) DISTRIBUTION.—The Administrator shall ensure that, to the extent reasonable and practicable, a grant made under subsection (a) is made to achieve an equitable geographical distribution of such projects throughout the United States.

“(c) USE OF GRANTS.—A grant made under subsection (a) may be used to pay all or part of the cost of the project for which the grant is made.

SEC. 242. GRANTS FOR TRAINING AND TECHNICAL ASSISTANCE.

“The Administrator may make grants to, and enter into contracts with, public and private agencies, organizations, and individuals to provide training and technical assistance to States, units of local government, Indian tribal governments, local private entities or agencies, or any combination thereof, to carry out the projects for which grants are made under section 241.

SEC. 243. ELIGIBILITY.

“To be eligible to receive assistance pursuant to a grant or contract under this part, a public or private organization, Indian tribal government, organization, institution, individual, or combination thereof, shall submit an application to the Administrator at such time, in such form, and containing such information as the Administrator may reasonably require by rule.

SEC. 244. REPORTS.

“Each recipient of assistance pursuant to a grant or contract under this part shall submit to the Administrator reports as may be reasonably requested by the Administrator to describe progress achieved in carrying the projects for which the assistance was provided.

PART E—MENTORING

SEC. 251. MENTORING.

“The purposes of this part are to, through the use of mentors for at-risk youth—

“(1) reduce juvenile delinquency and gang participation; and

“(2) improve academic performance; and

“(3) reduce the dropout rate.

SEC. 252. DEFINITIONS.

“In this part—

“(1) AT-RISK YOUTH.—The term ‘at-risk youth’ means a youth at risk of educational failure, dropping out of school, or involvement in criminal activity.

“(2) MENTOR.—The term ‘mentor’ means a person who works with an at-risk youth on a one-to-one basis, provides a positive role model for the youth, and establishes a supportive relationship with the youth, and provides the youth with academic assistance and exposure to new experiences and examples of opportunity that enhance the ability of the youth to become a responsible adult.

SEC. 253. GRANTS.

“(a) LOCAL EDUCATIONAL GRANTS.—The Administrator shall make grants to local education agencies and nonprofit organizations to establish and support programs and activities for the purpose of implementing mentoring programs that—

“(1) are designed to link at-risk children, particularly children living in high crime areas and children experiencing educational failure, with responsible adults such as law enforcement officers, persons working with local businesses, elders in Alaska Native villages, and the local community.

“(2) improve academic performance; and

“(3) reduce juvenile delinquency.

“(b) DISTRIBUTE.—The Administrator shall ensure that, to the extent reasonable and practicable, grants made under section (a) are made to achieve an equitable geographical distribution of such programs throughout the United States.

“(c) USE OF GRANTS.—A grant made under subsection (a) may be used to pay all or part of the cost of the project for which the grant is made.

SEC. 254. REGULATIONS AND GUIDELINES.

“(a) PROGRAM GUIDELINES.—To implement this part, the Administrator shall issue program guidelines which shall be effective only after a period for public notice and comment.

“(b) MODEL SCREENING GUIDELINES.—The Administrator shall develop and distribute to program participants specific model guidelines for the screening of prospective program mentors.

SEC. 255. USE OF GRANTS.

“(a) PERMITTED USES.—Grants awarded under this part shall be used to implement mentoring programs, including—

“(1) the hiring of mentoring coordinators and support staff;

“(2) the recruitment, screening, and training of adult mentors;

“(3) the reimbursement of mentors for reasonable incidental expenditures, such as transportation, that are directly associated with mentoring; and

“(4) such other purposes as the Administrator may reasonably prescribe by regulation.

“(b) PROHIBITED USES.—Grants awarded pursuant to this part shall not be used—

“(1) to directly request the services of any individual, except as provided pursuant to subsection (a)(3);

“(2) to obtain educational or other materials or equipment that would otherwise be used in the ordinary course of the operations of the grantee;

“(3) to support litigation of any kind; or

“(4) for any other purpose reasonably prohibited by the Administrator by regulation.

SEC. 256. PRIORITY.

“(a) IN GENERAL.—In making grants under this part, the Administrator shall give priority for awarding grants to applicants that—

“(1) serve at-risk youth in high crime areas;

“(2) have 60 percent or more of the youth eligible to receive funds under the Elementary and Secondary Education Act of 1965;

“(3) have a considerable number of youths who drop out of school each year;

“(4) provide a mentoring approach that matches volunteer families with at-risk families allowing parents to work directly with their children; and

“(5) develop community-based organizations and agencies.

“(6) have an after-school program for volunteering.

“(b) FAMILY-TO-FAMILY MENTORING GRANTS.—

“(1) DEFINITIONS.—In this subsection:

“(A) FAMILY-TO-FAMILY MENTORING PROGRAM.—The term ‘family-to-family mentoring program’ means a mentoring program that—

“(i) utilizes a 2-tier mentoring approach that matches volunteer families with at-risk families allowing parents to work directly with their children;

“(ii) has an after-school program for volunteers and at-risk families.

“(B) POSITIVE ALTERNATIVES PROGRAM.—The term ‘positive alternatives program’ means a positive youth development and family-to-family mentoring program that emphasizes drug and gang prevention components.

“(C) QUALIFIED POSITIVE ALTERNATIVES PROGRAM.—The term ‘qualified positive alternative program’ means a positive alternatives program that has established a family-to-family mentoring program, as of the date of enactment of the Juvenile Crime Prevention and Control Act of 2001.

“(2) AUTHORITY.—The Administrator shall make and enter into contracts with a qualified positive alternative program.

SEC. 257. APPLICATIONS.

“An application for assistance under this part shall include—

“(1) information on the youth expected to be served by the program;

“(2) a provision for a mechanism for matching youth with mentors based on the needs of the youth;

“(3) an assurance that no mentor or mentoring family will be assigned a number of youths that would undermine the ability of the mentor to be an effective mentor and ensure a one-to-one relationship with mentored youths;

“(4) an assurance that projects operated in secondary schools will provide the youth with a variety of experiences and support, including—
(A) an opportunity to spend time in a work setting that is not otherwise encum-berable, a (B) an opportunity to witness the job skills that will be required for the youth to obtain employment upon graduation; (C) assistance with homework assignments; and (D) exposure to experiences that the youth might not otherwise encounter; and (5) an assurance that projects operated in elementary schools will provide the youth with— (A) academic assistance; (B) exposure to new experiences and activities; and (C) emotional support; (6) an assurance that projects will be monitored to ensure that each youth benef-its from a mentor relationship, and will include a provision for a new mentor assign-ment if the relationship is not beneficial to the youth; (7) the method by which a mentor and a youth shall be matched to the project; (8) the method by which a prospective mentor will be screened; and (9) the training that will be provided to a mentor.

**SEC. 258. GRANT CYCLES.** Each grant under this part shall be made for a 3-year period.

**SEC. 259. FAMILY MENTORING PROGRAM.** (a) DEFINITIONS.—In this section: (1) COOPERATIVE EXTENSION SERVICES.—The term ‘cooperative extension services’ means the cooperative extension service or services of the State or a unit of local government, and the programs, projects, and activities that are conducted by such service or services. (2) FAMILY MENTORING PROGRAM.—The term ‘family mentoring program’ means a mentoring program that— (A) utilizes a 2-tier mentoring approach that uses college-age or young adult mentors working directly with at-risk youth and uses retirement-age couples working with the parents and siblings of at-risk youth; and (B) has a local advisory board to provide direction and advice to program administra-tors. (3) QUALIFIED COOPERATIVE EXTENSION SERVICE.—The term ‘qualified cooperative extension service’ means a cooperative extension service that has established a family mentoring program, as of the date of enactment of the Juvenile Crime Prevention and Control Act of 2001. (b) MODEL PROGRAM.—The Administrator, in cooperation with the Secretary of Agri-culture, shall make a grant to a qualified co-operational family mentoring programs to reduce the incidence of juvenile crime and delinquency among at-risk youth. (c) ESTABLISHMENT OF NEW FAMILY MENTORING PROGRAMS.— (1) IN GENERAL.—The Administrator, in cooperation with the Secretary of Agri-culture, may make 1 or more grants to coop-erative extension services for the purpose of establishing family mentoring programs to reduce the incidence of juvenile crime and delinquency among at-risk youth. (2) MATCHING REQUIREMENT AND SOURCE OF MATCH.— (A) IN GENERAL.—The amount of a grant under this subsection may not exceed 35 per-cent of the total costs of the program funded by the grant. (B) SOURCE OF MATCH.—Matching funds for grants under this subsection may be de-reived from amounts made available to a State under subsection (b) and (c) of section 3 of the Smith-Lever Act (7 U.S.C. 334), except that the total amount derived from Fed-eral sources may not exceed 70 percent of the total cost of the program funded by the grant.

**PART F—ADMINISTRATIVE PROVISIONS**

**SEC. 261. AUTHORIZATION OF APPROPRIATIONS.** (a) IN GENERAL.—There is authorized to be appropriated for— (1) the program or activity for which the grant or contract involved was made has been so changed that the program or activity no longer complies with this title; or (2) in the operation of such program or activity there is failure to comply substan-tially with any provision of this title.

**SEC. 262. ADMINISTRATIVE PROVISIONS.** (a) AUTHORITY OF ADMINISTRATOR.—The Director of the Bureau of Justice Statistics shall be considered to be a reference to the Office of Justice Programs, the Bureau of Justice Assistance, the National Institute of Justice, or the Bu-reau of Justice Statistics shall be considered to be a reference to the Office of Juvenile Crime Control and Prevention; and (b) APPLICABILITY OF CERTAIN CRIME CONTROL AND SAFE STREETS ACT PROVISIONS.—Sections 809(c), 811(a), and 806 of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789e et seq.) shall apply with respect to the administration of and compli ance with this title, except that, for purposes of this title— (1) any reference to the Office of Justice Programs in such sections shall be consid-ered to be a reference to the Assistant Attor-ney General who heads the Office of Justice Programs; (2) the term ‘this title’ as it appears in such sections shall be considered to be a refer-ence to this title. (c) APPLICABILITY OF CERTAIN OTHER CRIME CONTROL PROGRAMS.—Sections 801(a), 801(c), and 806 of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789c(a), 3789c(c), and 3789e(d)) shall apply with respect to the administration of and compli ance with this title, except that, for purposes of this title— (1) any reference to the Attorney General, the Assistant Attorney General who heads the Office of Justice Programs, the Director of the National Institute of Justice, the Di-rector of the Bureau of Justice Statistics, or the Director of the Bureau of Justice Assist ance shall be considered to be a reference to the Administrator; (2) any reference to the Office of Justice Programs, the Bureau of Justice Assistance, the National Institute of Justice, or the Bu-reau of Justice Statistics shall be considered to be a reference to the Office of Juvenile Crime Control and Prevention; and (3) the term ‘this title’ as it appears in those sections shall be considered to be a refer-ence to this title.

**SEC. 263. RULES, REGULATIONS, AND PROCEDURES.**—The Administrator may, after approp-riate consultation with representatives of States and units of local government, and an opportunity for notice and comment in accordance with subchapter II of chapter 5 of part R of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789e et seq.), establish such rules, regulations, and procedures as are nec-essary for the exercise of the functions of the Office and as are consistent with the purpose of this Act.

**SEC. 264. WITHHOLDING.**—The Administrator shall initiate such proceedings as the Admin-istrator determines that are appropriate to withhold (or to reduce) any grant, if the Administrator, after giving reasonable no- tice and opportunity for hearing to a recipi-ent of financial assistance under this title, finds that— (1) the program or activity for which the grant or contract involved was made has been so changed that the program or activity no longer complies with this title; or (2) in the operation of such program or activity there is failure to comply substan-tially with any provision of this title.

**SEC. 265. JUVENILE OFFENDER ACCOUNT-ABILITY.** (a) GRANT PROGRAM.—Part R of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789e et seq.) is amend-ed to read as follows:

**PART R—JUVENILE ACCOUNTABILITY BLOCK GRANTS**

**SEC. 266. PROGRAM AUTHORIZED.** (a) IN GENERAL.—The Attorney General is authorized to provide grants to States, for use by States and units of local government, and in certain cases directly to specialty groups or individuals, for the purpose of— (1) developing, implementing, and adminis-tering graduated sanctions for juvenile of-fenders; (2) building, expanding, renovating, or op-erating temporary or permanent juvenile correction, detention, or community correc-tions facilities; (3) hiring juvenile court judges, probation officers, and court-appointed special advocates, and funding pretrial services for juvenile offenders, to promote the ef-fective and expeditious administration of the juvenile justice system, which includes— (i) developing, implementing, and adminis-tering graduated sanctions for juvenile of-fenders; (4) hiring additional prosecutors, so that more cases involving violent juvenile offend-ers can be prosecuted and case backlogs re-duced; (5) providing funding to enable prosecu-tors to address drug, gang, and youth vio-lence problems more effectively and for tech-nology, equipment, and training to assist prosecutors in identifying and expediting the prosecution of violent juvenile offenders;
Congressional Record—Senate  
July 11, 2001

“(6) establishing and maintaining training programs for law enforcement and other court personnel with respect to preventing and controlling juvenile crime;

“(7) establishing juvenile gun courts for the prosecution and adjudication of juvenile firearm offenses;

“(8) establishing drug court programs for juvenile offenders that provide continuing judicial supervision over juvenile offenders with substance abuse problems and the integrated administration of other sanctions and services for such offenders;

“(9) maintaining a system of juvenile records designed to promote public safety;

“(10) establishing and maintaining inter-agency information-sharing programs that enable the juvenile and criminal justice systems, schools, and social services agencies to make more informed decisions regarding the early identification, control, supervision, and treatment of juveniles who repeatedly commit serious delinquent or criminal acts;

“(11) establishing and maintaining accountability-based programs designed to reduce recidivism among juveniles who are referred by law enforcement personnel or agencies;

“(12) establishing and maintaining programs to conduct risk and need assessments of juvenile offenders that facilitate the effective early intervention and the provision of comprehensive services, including mental health screening and treatment and substance abuse testing and treatment to such offenders;

“(13) establishing and maintaining accountability-based programs that are designed to enhance school safety;

“(14) establishing and maintaining restorative justice programs;

“(15) establishing and maintaining programs to enable juvenile courts and juvenile probation officers to be more effective and efficient in holding juvenile offenders accountable and reducing recidivism; and

“(16) hiring detention and corrections personnel, and establishing and maintaining training for such personnel to improve facility practices and programming.

“(c) Definition.—In this section the term ‘restorative justice program’ means—

“(1) a program that emphasizes the moral accountability of an offender toward the victim and the affected community; and

“(2) may include community reparations boards, restitution (in the form of monetary payment or service to the victim or, where no victim can be identified, service to the affected community), and mediation between victim and offender.

“SEC. 1802. Grant eligibility.

“(a) State Eligibility.—To be eligible to receive a grant under this part, a State shall submit to the Attorney General an application at such time, in such form, and containing such assurances and information as the Attorney General may require by guidelines, including—

“(1) information about—

“(A) the activities proposed to be carried out with such grant; and

“(B) the criteria by which the State proposes to assess the effectiveness of such activities on achieving the purposes of this part; and

“(2) assurances that the State and any unit of local government to which the State provides funding under section 1803(b), has in effect (or shall have in effect, not later than 1 year after the date that the State submits such application) laws, or has implemented (or shall implement, not later than 1 year after the date that the unit submits such application) laws, or has implemented (or shall implement, not later than 1 year after the date that the unit submits such application) policies and programs that provide for a system of graduated sanctions described in subsection (c).

“(b) Local Eligibility.—To be eligible to receive a grant, a unit of local government, other than a specially qualified unit, shall provide to the State—

“(A) information about—

“(i) the activities proposed to be carried out with such grant; and

“(ii) the criteria by which the unit proposes to assess the effectiveness of such activities on achieving the purposes of this part; and

“(B) such assurances as the State shall require, that, to the maximum extent applicable, the unit of local government has in effect (or shall have in effect, not later than 1 year after the date that the unit submits such application) laws, or has implemented (or shall implement, not later than 1 year after the date that the unit submits such application) policies and programs, that provide for a system of graduated sanctions described in subsection (c).

“(c) Special Rule.—The requirements of paragraphs (1) and (2) of the total funds remaining after the date that the unit submits such application to the Attorney General under section 1803(e), except that information that is otherwise required to be submitted shall be submitted to the Attorney General.

“(d) Graduated Sanctions.—A system of graduated sanctions, which may be discretionary as provided in subsection (d), shall ensure, at a minimum, that—

“(1) sanctions are imposed on a juvenile offender for each delinquent offense;

“(2) sanctions escalate in intensity with each subsequent, more serious delinquent offense;

“(3) there is sufficient flexibility to allow for individualized sanctions and services suited to the individual juvenile offender; and

“(4) appropriate consideration is given to public safety and victims of crime.

“(e) Discretionary Use of Sanctions.—

“(1) IN GENERAL.—Except as provided in paragraph (2), each State which receives funds under subsection (a)(1) in a fiscal year shall distribute among units of local government that are eligible for funding under subsection (a) the amounts received.

“(2) Waiver.—The percentage referred to in paragraph (1) shall equal the percentage determined by subtracting the State percentage from 100 percent, if a State submits to the Attorney General an application for waiver that demonstrates that such a waiver results in a savings to the Federal Government.

“(f) Reporting Requirement if Graduated Sanctions Not Used.—

“(1) Juvenile Courts.—A State or unit of local government in which the imposition of graduated sanctions is discretionary shall require each juvenile court within its jurisdiction—

“(A) its system of graduated sanctions is discretionary

“(B) it demonstrates that it has promoted the use of a system of graduated sanctions by taking steps to encourage implementation of such a system by juvenile courts.

“(2) Reporting Requirement if Graduated Sanctions Used.—

“(A) of the total funds remaining after the date that the State submits such application for the most recent calendar year in which such data is available bears to the amount of remaining funds described in subparagraph (B) that is to be submitted to the Attorney General an application for the purposes specified in section 1801, not less than 7 percent of such amounts received.

“(B) Waiver.—The percentage referred to in paragraph (1) shall equal the percentage determined by subtracting the State percentage from 100 percent, if a State submits to the Attorney General an application for waiver that demonstrates that such a waiver results in a savings to the Federal Government.

“(g) Sec. 1803. Allocation and Distribution of Funds.

“(1) In General.—In accordance with regulations promulgated by the Attorney General, a State shall allocate to each unit of local government for which it receives funds under section 1803(b), a percentage from 100 percent, if a State submits to the Attorney General an application for waiver that demonstrates that such a waiver results in a savings to the Federal Government.

“(2) Waiver.—The percentage referred to in paragraph (1) shall equal the percentage determined by subtracting the State percentage from 100 percent, if a State submits to the Attorney General an application for waiver that demonstrates that such a waiver results in a savings to the Federal Government.

“(3) Allocations.—In making the distribution under paragraph (1), the State shall allocate to such units of local government an amount that bears to the aggregate amount of such funds as—

“(A) the sum of—

“(i) the product of—

“(B) State's average juvenile justice expenditures for such unit of local government for
the 3 most recent calendar years for which such data is available, or
(ii) the product of—
(1) one-quarter; multiplied by
(2) the average annual number of part 1 violent crimes in such unit of local government that are not affected by such operation in accordance with this subsection.

(c) Unavailability of Data for Units of Local Government.—If the State has reason to believe that the reported rate of part 1 violent crimes or juvenile justice expenditures for a unit of local government is insufficient or inaccurate, the State shall—
(1) with such methodology used by the unit to determine the accuracy of the submitted data; and
(2) if necessary, use the best available comparable data, including the number of violent crimes or juvenile justice expenditures for the relevant years for the unit of local government.

(d) Local Government with Allocations Less Than $10,000.—If under this section a unit of local government will deposit all payments received under this section any reference in such provisions to title I shall be deemed to include a reference to this part.

(e) Direct Grants to Speciallly Qualified Units.—

(f) Reports to Attorney General.—

(g) Title I Provisions.—Except as otherwise provided, the administrative provisions of title I shall apply to this part and all other provisions of this section any reference in such provisions to title I shall be deemed to include a reference to this part.

(h) Matching Funds.—

(i) Administrative Costs.—A State or unit of local government that receives funds under this part may use more than 0 percent of such funds to pay for administrative costs.

(j) Nonsupplanting Requirement.—Funds made available under this part may not be used to supplant State or local funds that are the same purpose as the funds made available under this part.

(k) Use of Funds in the Trust Fund.—

(1) IN GENERAL.—The Attorney General shall reserve not more than 50 percent of approved cost.

(l) Specialized or Customized Services.—

(m) Use of Funds.—

(n) Calculation of Assessments.—

(1) IN GENERAL.—The Attorney General shall pay to each State or unit of local government that receives funds under this part an amount that is equal to the product of—

(2) the first day of the payment period if the State has provided the Attorney General with the assurances required by subsection (b)

(3) repayment of unexpended amounts.

A (A) repayment required.—From amounts awarded under this part, a State or specially qualified unit shall repay to the Attorney General, before the expiration of the 36-month period beginning on the date of the one-time extension, by not more than 12 months, of the period referred to in paragraph (1).

(2) Penalty for Failure to Repay.—If the amount required to be repaid is not repaid, the Attorney General shall reduce payment in future payment periods accordingly.

(3) Deposit of Amounts Repaid.—Amounts received by the Attorney General as repayments under this subsection shall be deposited in a designated fund for future payments to States and specially qualified units.

(4) Deposit of Amounts Repaid.—

(c) Administrative Costs.—A State or unit of local government that receives funds under this part may use not more than 0 percent of such funds to pay for administrative costs.

(d) Nonsupplanting Requirement.—Funds made available under this part may not be used to supplant State or local funds that are the same purpose as the funds made available under this part.

(e) Matching Funds.—

(f) Reports to Congress.—Not later than 90 days after the last day of each fiscal year for which 1 or more grants are awarded under this part, the Attorney General shall submit to the Congress a report, which shall include—

(1) a summary of the information provided under subsection (a);

(2) the assessment of the Attorney General of the grant program carried out under this part; and

(3) such other information as the Attorney General considers appropriate.

(g) Definitions.

In this part:

(1) Unit of Local Government.—The term ‘unit of local government’ means—

(i) a county, township, city, or political subdivision of a county, township, or city, that is a unit of local government as determined by the Secretary of Commerce for general statistical purposes;

(ii) any law enforcement district or judicial enforcement district that—

(i) is established under applicable State law;

(ii) has the authority, in a manner independent of other State entities, to establish and maintain a publicly accessible criminal justice database; and

(iii) has the authority to establish and maintain a publicly accessible criminal justice database.

(h) Specialized or Customized Services.—

(i) General.—A State or specially qualified unit that receives funds under this part shall—

(ii) establish a trust fund in which the State or unit of local government that receives funds under this part shall deposit all payments received under this part; and

(iii) use any funds in the trust fund for the purposes specified under section 1805(b)(1) and any extension of that period under section 1805(b)(2).

By the authority vested in me by the Act of July 11, 2001, I determine that this part and the provisions of this part shall apply to this part and all other provisions of this section any reference in such provisions to title I shall be deemed to include a reference to this part.

S. 1805. Payment Requirements.

(a) Timing of Payments.—The Attorney General shall—

(i) pay to each State or unit of local government that receives funds under this part any amount allotted under this section to such State or unit; and

(ii) pay to each State or unit of local government that receives funds under this part any amount allotted under this section to such State or unit.
under this part only in accordance with section 1803(e) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b) and section 314 of the Congressional Budget Act of 1974).”.

**TITLE II—PROTECTING CHILDREN FROM GUN VIOLENCE**

Subtitle A—Gun Show Background Checks

**SECTION 201. SHORT TITLE.**

This subtitle may be cited as the “Gun Show Background Check Act of 2001.”

**SEC. 202. FINDINGS.**

Congress finds that—

(1) more than 4,400 traditional gun shows are held annually across the United States, attracting thousands of attendees per show and hundreds of Federal firearms licensees and nonlicensed firearms sellers;

(2) traditional gun shows, as well as flea markets and other organized events, at which a large number of firearms are offered for sale by Federal firearms licensees and nonlicensed firearms sellers, form a significant part of the national firearms market;

(3) firearms associated with gun shows and other organized events are exhibited or offered for sale or exchange at gun shows, flea markets, and other organized events move easily into substantially affected interstate commerce;

(4) in fact, even before a firearm is exhibited or offered for sale or exchange at a gun show, flea market, or other organized event, the gun, its component parts, ammunition, and the raw materials from which it is manufactured have moved in interstate commerce;

(5) gun shows, flea markets, and other organized events at which firearms are exhibited or offered for sale or exchange, provide a convenient and centralized commercial focal point at which firearms may be bought and sold anonymously, often without background checks and without records that enable gun tracing;

(6) at gun shows, flea markets, and other organized events at which guns are exhibited or offered for sale or exchange, criminals and other prohibited persons obtain guns without background checks and checks are not conducted on guns that cannot be traced to later crimes;

(7) many persons who buy and sell firearms at gun shows, flea markets, and other organized events cross State lines to attend these events and engage in the interstate transportation of firearms obtained at these events;

(8) gun violence is a pervasive, national problem that is exacerbated by the availability of guns at gun shows, flea markets, and other organized events;

(9) firearms associated with gun shows have been transferred illegally to residents of another State by Federal firearms licensees and nonlicensed firearms sellers, and have been involved in subsequent crimes including drug offenses, crimes of violence, property crimes, and illegal possession of firearms by felons and other prohibited persons; and

(10) Congress has the power, under the interstate commerce clause and other provisions of the Constitution of the United States to ensure, by means of this subtitle, that criminals and other prohibited persons do not obtain firearms at gun shows, flea markets, and other organized events.

**SEC. 203. EXTENSION OF CRIMINAL HISTORY CHECKS TO GUN SHOWS.**

(a) DEFINITIONS.—Section 921(a) of title 18, United States Code, is amended by adding at the end the following:

“35) GUN SHOW.—The term ‘gun show’ means any event—

as adjusted in accordance with section 251(b) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b) and section 314 of the Congressional Budget Act of 1974).”

**CONGRESSIONAL RECORD—SENATE**

July 1, 2001

**SEC. 104. EXTENSION OF VIOLENT CRIME REDUCTION PROGRAMS.**

(a) IN GENERAL.—Section 310001(b) of the Violent Crime Control and Law Enforcement Act of 1994 (42 U.S.C. 14211) is amended by inserting at the end the following:

“(3) for fiscal year 2005, $6,458,000,000;

(4) for fiscal year 2005, $6,516,000,000;

(5) for fiscal year 2006, $6,616,000,000; and

(6) for fiscal year 2007, $6,774,000,000.

(b) DETERMINATION.—Title XVI of the Violent Crime Control and Law Enforcement Act of 1994 (42 U.S.C. 14211 et seq.) is amended by inserting after section 310001 the following:

**SEC. 310002. DISCRETIONARY LIMITS.**

“For the purposes of allocations made for the discretionary category pursuant to section 302(a) of the Congressional Budget Act of 1974 (2 U.S.C. 633(a)), the term ‘discretionary spending limit’ means—

(1) with respect to fiscal year 2002—

(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Budget Committee; and

(B) for the violent crime reduction category: $6,225,000,000 in new budget authority and $5,714,000,000 in outlays;

(2) with respect to fiscal year 2003—

(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Budget Committee; and

(B) for the violent crime reduction category: $6,169,000,000 in new budget authority and $6,020,000,000 in outlays;

(3) with respect to fiscal year 2004—

(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Budget Committee; and

(B) for the violent crime reduction category: $6,316,000,000 in new budget authority and $6,303,000,000 in outlays;

(4) with respect to fiscal year 2005—

(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Budget Committee; and

(B) for the violent crime reduction category: $6,458,000,000 in new budget authority and $6,303,000,000 in outlays;

(5) with respect to fiscal year 2006—

(A) for the discretionary category, amounts of budget authority and outlays necessary to adjust the discretionary spending limits to reflect the changes in subparagraph (B) as determined by the Chairman of the Budget Committee; and

(B) for the violent crime reduction category: $6,616,000,000 in new budget authority and $6,606,000,000 in outlays;
(A) at which 50 or more firearms are offered on sale, transfer, or exchange, if 1 or more of the firearms has been shipped or transported in, or otherwise affects, interstate or foreign commerce; and

(B) at which 51 or more than 20 percent of the exhibitors are firearm exhibitors;

(ii) there are not less than 10 firearm exhibitors;

(iii) 50 or more firearms are offered for sale, transfer, or exchange.

(36) **GUN SHOW PROMOTER.**—The term "gun show promoter" means any person who organizes, plans, promotes, or operates a gun show.

(37) **GUN SHOW VENDOR.**—The term "gun show vendor" means any person who exhibits, sells, offers for sale, transfers, or exchanges 1 or more firearms at a gun show, regardless of whether or not the person arranges with the gun show promoter for a fixed location from which to exhibit, sell, offer for sale, transfer, or exchange 1 or more firearms.

(b) **REGULATION OF FIREARMS TRANSFERS AT GUN SHOWS.**

(1) **IN GENERAL.—**Chapter 44 of title 18, United States Code, is amended by adding at the end the following:

"(38) "

Richardson amendment of firearms transfers at gun shows

"(a) **REGISTRATION OF GUN SHOW PROMOTERS.**—It shall be unlawful for any person to organize, plan, promote, or operate a gun show unless that person—

"(1) registers with the Secretary in accordance with regulations promulgated by the Secretary; and

"(2) pays a registration fee, in an amount determined by the Secretary.

"(b) **RESPONSIBILITIES OF GUN SHOW PROMOTERS.**—It shall be unlawful for any person to organize, plan, promote, or operate a gun show unless that person—

"(1) before commencement of the gun show, verifies the identity of each gun show vendor participating in the gun show by examining a valid identification document (as defined in section 302(d)(1) of the gun control act of 1968), and maintains a copy of the records described in paragraph (1); and

"(2) before commencement of the gun show, requires each gun show vendor to sign—

"(A) a ledger with identifying information concerning the vendor; and

"(B) a notice advising the vendor of the obligations of the vendor under this chapter; and

"(3) notifies each person who attends the gun show of the requirements of this chapter, in accordance with such regulations as the Secretary shall prescribe; and

"(4) maintains a copy of the records described in paragraphs (1) and (2) at the permanent place of business of the gun show promoter for such period of time and in such form as the Secretary shall require by regulation.

"(c) **RESPONSIBILITIES OF TRANSFERRORS OTHER THAN LICENSEES.**—

"(1) **IN GENERAL.—**If any part of a firearm transaction takes place at a gun show, it shall be unlawful for any person who is not licensed under this chapter to receive a firearm from another person who is not licensed under this chapter, unless the firearm is transferred through a licensed importer, licensed manufacturer, or licensed dealer to which the transfer is made under subsection (e) of this section.

"(2) **CRIMINAL BACKGROUND CHECKS.**—A person who is subject to the requirements of paragraph (1) shall not have a criminal conviction for a felony or a misdemeanor crime of violence.

"(3) **COMPLYING WITH REGULATIONS.**—A person who is subject to the requirements of paragraph (1) shall comply with the regulations promulgated by the Secretary.

"(4) **EFFECTIVE DATE.**—This section shall take effect 36 months after the date of the enactment of this section.

(c) **RESPONSIBILITIES OF MANUFACTURERS AND DEalers.**—

"(1) **IN GENERAL.—**Any person who transfers a firearm under section (e)(3)(A) or (e)(3)(B) of this section, the term 'firearm transaction'—

"(A) shall be on a form specified by the Secretary by regulation; and

"(B) shall not include the name or other identifying information relating to any person otherwise involved in the transfer who is not licenced under this chapter.

"(2) **EFFECTIVE DATE.**—This section shall take effect 36 months after the date of the enactment of this section.

"(d) **REGISTRATION OF MANUFACTURERS AND DEALERS.**—

"(1) **IN GENERAL.—**Any person who transfers a firearm under section (e)(3)(A) or (e)(3)(B) of this section, the term 'firearm transaction'—

"(A) shall be on a form specified by the Secretary by regulation; and

"(B) shall not include the name or other identifying information relating to any person otherwise involved in the transfer who is not licenced under this chapter.

"(3) **EFFECTIVE DATE.**—This section shall take effect 36 months after the date of the enactment of this section.

"(E) **RECORDS OF MANUFACTURERS AND DEALERS.**—

"(1) **IN GENERAL.—**Any person who transfers a firearm under section (e)(3)(A) or (e)(3)(B) of this section, the term 'firearm transaction'—

"(A) shall be on a form specified by the Secretary by regulation; and

"(B) shall not include the name or other identifying information relating to any person otherwise involved in the transfer who is not licenced under this chapter.

"(F) **EFFECTIVE DATE.**—This section shall take effect 36 months after the date of the enactment of this section.
Section 221. Permanent Prohibition on Firearm Transfers to or Possession by Dangerous Juvenile Offenders

(a) Definition.—Section 922(a)(20) of title 18, United States Code, is amended—
(1) by inserting ‘‘(A)’’ after ‘‘(20)’’;
(2) by redesigning subparagraphs ‘‘(A)’’ and ‘‘(B)’’ as clauses ‘‘(i)’’ and ‘‘(ii), respectively;’’;
(3) by inserting after subparagraph (A) the following:
‘‘(B) For purposes of subsections (d) and (g) of section 922, the term ‘‘adjudicated delinquent’’ means an adjudication of delinquency based upon a finding that the person accused of an offense—
(i) under paragraph (1) or (3) of section 922, the term ‘‘adjudicated delinquent’’ means an adjudication of delinquency which has been expunged or set aside, or for which a person has been pardoned or has had civil rights restored by the jurisdiction in which the conviction or adjudication of delinquency was entered, except that the record of such a conviction or adjudication of delinquency shall be considered a conviction or adjudication of delinquency unless (i) the expunction, set aside, pardon or restoration of civil rights is directed to a specific person, (ii) the State authority granting the expunction, set aside, pardon or restoration of civil rights is a conviction of such a crime or an adjudication of delinquency that the person’s record and reputation are such that the person will not act in a manner dangerous to public safety, and (iii) the expunction, set aside, pardon or restoration of civil rights expressly authorizes the person to ship, transport, receive or possess firearms. The requirement of this subparagraph for an individualized restoration of civil rights shall apply whether or not, under State law, the person’s civil rights were taken away by virtue of the conviction or adjudication.’’;
(b) Prohibition.—Section 922 of title 18, United States Code is amended—
(1) in subsection (d)—
(A) by striking ‘‘or’’ at the end of paragraph (8);
(B) by striking the period at the end of paragraph (9) and inserting ‘‘; or’’; and
(C) by inserting after paragraph (9) the following:
‘‘(10) who has been adjudicated delinquent.’’;
(2) in subsection (g)—
(A) by striking ‘‘or’’ at the end of paragraph (8);
(B) by striking the comma at the end of paragraph (9) and inserting ‘‘; or’’; and
(C) by inserting after paragraph (9) the following:
‘‘(10) who has been adjudicated delinquent.’’;
(c) Authorization of Appropriations.—There are authorized to be appropriated such sums as may be necessary to carry out this section.
as evidence in any proceeding of any court, agency, or other entity, except with respect to an action to enforce this section.

(3) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to bar a government action, to impose a penalty under section 924(p) of title 18, United States Code, for a failure to comply with section 922(y) of that title.

(d) Civil Penalties.—Section 924 of title 18, United States Code, is amended—

(1) in subsection (a)(1), by striking “or (f)” and inserting “(f), or (p);” and

(2) by adding at the end the following:

“(p) PENALTIES RELATING TO LOCKING DEVICES.—

“(1) IN GENERAL.—

“(A) SUSPENSION OR REVOCATION OF LICENSE; CIVIL PENALTIES.—With respect to each violation of section 922(y)(1) by a licensee, the Secretary may, after notice and opportunity for a hearing—

“(i) suspend or revoke any license issued to the licensee under this chapter; or

“(ii) subject that licensee to a civil penalty in an amount equal to not more than $10,000.

“(B) REVIEW.—An action of the Secretary under this paragraph may be reviewed only as provided in section 922(f).

“(2) ADMINISTRATIVE REMEDIES.—The suspension or revocation of a license or the imposition of a civil penalty under paragraph (1) does not preclude any administrative proceeding or any criminal proceeding for good cause.

“(3) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to impose any penalty under any provision of chapter 13 of subtitle A of title 18, United States Code.

“(4) DEFINITIONS.—In this section:

“(1) CHILD.—The term ‘child’ means an individual who has not attained the age of 13 years.

“(2) LOCKING DEVICE.—The term ‘locking device’ has the meaning given that term in clauses (i) and (ii) of section 921(a)(38)(A) of title 18, United States Code.

“(b) CONFORMING AMENDMENT.—Section 1 of the Consumer Product Safety Act is amended by adding at the end of the table of contents the following:

“Sec. 38. Child handgun safety locks.’’.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Consumer Product Safety Commission $2,000,000 to carry out the provisions of section 38 of the Consumer Product Safety Act, such sums as necessary to remain available until expended.

Mr. KOHL. Mr. President, I rise today with Senator BIDEN to introduce the Juvenile Crime Prevention and Control Act.

This bill is an important step forward in the debate on juvenile justice. It is a comprehensive approach that recognizes prevention and enforcement are indispensable partners in combating juvenile crime. This bill addresses the issues most important to our communities, to the police, to the teachers, to the social workers, and most importantly, to the at-risk children whom we need to help. The legislation does this by giving crime prevention programs the priority, attention, and funding they deserve while recognizing that enforcement programs are indispensable to safer communities.

Let me begin with the legislation. The Juvenile Crime Prevention and Control Act increases the authorization of Title V, the Community Prevention Grant program, to $250 million. I worked closely with Senator BROWN to create the VICTIMS program in 1992 because we listened to local law enforcement experts who told us that prevention works. Almost a decade later, they still say the same thing: a crime bill without adequate prevention is only a half-measure. That’s just common sense.

Congress has slowly realized the merits of crime prevention funding. Since 1992, funding for Title V has increased from $20 million to $95 million. Unfortunately, almost two-thirds of that money has been consistently earmarked for purposes other than crime and delinquency prevention. The bill remedies this problem by ensuring that at least 75 percent of all Title V Community Prevention Grants be spent on pure prevention and not set aside for other purposes.

We now know that crime prevention programs like Title V work. Studies prove that crime prevention programs mean less crime. For example, a RAND Study found that crime prevention efforts were three times more cost-effective than increased punishment. A study of the Big Brothers/Bigsisters’ mentoring program showed that mentees were 46 percent less likely to use drugs, 27 percent less likely to use alcohol, 33 percent less likely to commit assault, and skipped 50 percent fewer days of school. A University of Wisconsin study of 64 after-school programs found that participating children became better students and developed improved conflict resolution skills; in addition, vandalism decreased at one third of the schools that participated in the programs.

One of the reasons these programs work is that Title V is designed to let the people with the real expertise do what they know best. Title V is a flexible program of direct local grants. The flexibility permits each community, through a local planning board of experts from the community, to determine how to best fight juvenile crime and delinquency. Title V trusts each community to address its unique problems.

Law enforcement officials appreciate the importance of juvenile crime prevention programs and crave more. Last year, I surveyed every sheriff and chief of police in Wisconsin and found that 100 percent of Wisconsin’s sheriffs and 100 percent of the police chiefs of Wisconsin’s largest cities who responded to the questionnaire believe more Federal money needs to be spent on crime prevention programs. Similarly, more than 80 percent of the police chiefs of small and mid-size cities in Wisconsin want more prevention funding.

When asked how much of Federal juvenile crime funding should go to prevention, these same law enforcement officials answer that close to 40 percent should be spent on prevention programs, far more than the current level of prevention funding. The Juvenile Crime Prevention and Control Act of 2001 listens to what local law enforcement experts have been telling us for years and addresses their concerns.

Congress, of course, prevention is not the sole answer to juvenile crime. Indeed, we need a comprehensive crime-fighting strategy aimed at juvenile offenders and potential offenders, from violent
predators to children at-risk of becoming delinquent. This legislation understands that. Tough law enforcement playing the last does. Certain violent juveniles should be incarcerated, and hopefully rehabilitated, and this bill provides the States with sufficient funds to get them off the streets and safeguard our communities.

Finally, no sensible juvenile crime fighting strategy is complete if it does not address the toxic combination of children and guns. This bill does that as well by mandating the sale of child safety locks with every handgun and insisting that those locks are designed well enough to work as intended.

Each year, teenagers and children are involved in more than 10,000 accidental shootings in which close to 800 people die. In addition, every year 1,300 children use firearms to commit suicide. Safety locks can be effective in deter ring some of these incidents and in preventing others.

The sad truth is that we are inviting disaster every time an unlocked gun is stored, but is still easily accessible to children. The guns are kept in 43 percent of American households with children. In 23 percent of the gun households, the guns are kept loaded. And, in one out of every eight of those homes the guns are left unlocked.

During the last decade, crime rates, including juvenile crime rates, have decreased. Since 1994, the juvenile arrest rate for violent crime has dropped 36 percent. Nonetheless, the public perceives that juvenile crime is a growing problem, especially school violence.

We need to remain vigilant and think creatively about how to maintain this trend in falling juvenile crime. This measure provides a comprehensive approach. Prevention, enforcement, and keeping guns out of the hands of children are three essential elements to a common sense juvenile crime strategy.

By Mr. BINGAMAN (for himself and Mr. DEWINE):
S. 1166. A bill to establish the Next Generation Lighting Initiative at the Department of Energy, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. BINGAMAN. Mr. President, I rise today with Senator DeWine to introduce a bill authorizing the Secretary of Energy to lead the United States into the next generation of lighting technology. If this bill is enacted, I believe it will allow us not only to maintain a world leadership role that Thomas Edison invented Incandescent lighting relies on running a current through a wire to heat it up and illuminate your surroundings. Only 5 percent of the electricity in a conventional bulb is converted into visible light. The second type of lighting is fluorescent lights, which use a combination of chemical vapors, mainly mercury, to discharge light when current is passed through it. Fluorescent lights are six times more efficient than a light bulb.

As I have mentioned, today’s lighting uses up about 19 percent of our electricity supply. In 1998, lighting electricity cost about 47 billion dollars which accounted for about 100 million tons of carbon equivalent from fossil fuels. This is the problem. We need to address.

Today, this paradigm is changing, because some scientists recently made a leap ahead in lighting research. Technology leaps displace, very quickly, traditional markets. We know the stories: cell phones, personal computers, digital cameras, telephones, the telephone, the Internet.

That is why Senator DeWINE and I are proposing this legislation, because some advances have been made in the areas of solid state lighting that require a national investment that no one lighting industry can match. This emerging technology has the capability to disrupt our existing lighting markets. So quickly in fact, that other countries have formed consortia between their governments, industries, laboratories and universities. Solid state lighting is being taken very seriously around the world.

Let me describe solid state lighting. The basic element of solid state lighting is diodes, or "LED’s", found in digital clocks. LED’s produce only one color but they do not burn up a wire like a bulb and are seven times more efficient.

Until recently LED’s were limited to yellow or red. That all changed in 1995. In 1995, some Japanese researchers developed a blue LED. Soon other bright colors started to emerge, such as green. That is when things started to change. Because, white light is a combination of red, blue, the recent Japanese breakthrough, and green or yellow. The recent Japanese breakthrough of that simple blue LED has now made it possible to produce white light from LED’s ten times more efficient than a light bulb.

If it is successful, white light LED’s will revolutionize lighting technology and will disrupt the existing industries. It’s imperative that we move quickly on these advances. We need a consortia of government, research labs and academia to develop the necessary pre-competitive research to maintain our leadership role in this field.

I would like to mention one other technology that will change lighting. That technology is found in your cell phone. Three Nobel Prizes were just awarded for this technology. Conductive polymers offer the possibility of covering large surface areas and replacing fluorescent lamps. These materials will not only provide white light, but like your computer screen, display text or programmed color pictures. These technologies can be Internet controlled to adjust building lighting across the country.

Given these advances, I would like to describe the Next Generation Lighting Initiative Act. If enacted, it will move our country to capture these revolutionary mergers between lighting and information. It will supply the necessary pre-competitive R&D which no one industry alone can provide, and, which we as holders of the public trust of basic research owe a duty to further. It will keep the United States in a leadership role of commercial lighting while promoting energy efficiency that can either be ten times that of incandescent lights or twice that of fluorescent lights. We need to enact this legislation now.

The Next Generation Lighting Initiative authorizes the Department of Energy to grant up to $680 million over ten years to a consortium of the United States lighting industry and research institutions. The goals of the Act are to have a 25 percent penetration of solid state lighting into the commercial markets by the year 2012. The Next Generation’s consortium will perform the basic and manufacturing research. The lighting industry will take this R&D and develop the necessary technologies to make it commercially viable.

This is precompetitive research. It is research that no one industry by itself can achieve and which we have a duty to promote together with industry. It has implications for our country’s energy policy far broader than economic competitiveness. It is the reduction in energy consumption that makes it a national initiative. Once the pre-competitive research is transitioned to industry then it should be terminated, we think that will take about 10 years.

If this initiative is successful, then by 2025, it can reduce our energy consumption by roughly 17 billion watts of power or the need for 17 large electricity generating plants. That’s as much as 17 million homes consume in a single day. That’s more homes than in all of California, Oregon, and Washington combined.

Let me conclude that the Next Generation Lighting Initiative will carry the U.S. lighting industry into the twenty-first century. It capitalizes on technologies that have emerged...
July 11, 2001

only five years ago but have the poten-
tial to quickly displace our lighting in-
dustry. This Initiative will reduce our na-
tional energy consumption and green-
house gas emission. The research ne-
necessary to advance this technology re-
quires a national investment that must be in partnership with industry.

I encourage my colleagues to review this bill, offer their comments, and, join Senator DeWINE and me in its bi-
partisan support. I ask unanimous con-
sent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1166
Be it enacted by the Senate and House of Rep-
resentatives of the United States of America in Congress as-
assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as “Next Generation Lighting Initiative Act”.

SEC. 2. FINDING.
Congresses have agreed that it is in the economic and energy security interests of the United States to encourage the development of white light emitting diodes by providing financial assistance to firms, or a consortium of firms, and supporting research organiza-
tions in the lighting development sectors.

SEC. 3. DEFINITIONS.
In this Act:

(1) CONSTITUENCY.—The term “constituency” means the Next Generation Lighting Initiative Com-
mittee established under section 5(b).

(2) INORGANIC WHITE LIGHT EMITTING DIODE.—The term “inorganic white light emitting diode” means a semiconducting package that produces white light using externally applied voltage.

(3) LIGHTING INITIATIVE.—The term “Lighting Initiative” means the Next Generation Lighting Initiative established by section 4(a).

(4) ORGANIC WHITE LIGHT EMITTING DIODE.—The term “organic white light emitting diode” means an organic semiconducting compound that produces white light using externally applied voltage.

(5) PLANNING BOARD.—The term “planning board” means the Next Generation Lighting Initiative Planning Board established under section 6(a).

(6) RESEARCH ORGANIZATION.—The term “research organization” means an organization that performs or promotes research, de-
velopment, and demonstration activities with respect to white light emitting diodes.

(7) SECRETARY.—The term “Secretary” means the Secretary of Energy, acting through the Assistant Secretary of Energy for Energy Efficiency and Renewable Energy.

(8) WHITE LIGHT EMITTING DIODE.—The term “white light emitting diode” means—

(A) an inorganic white light emitting diode; and

(B) an organic white light emitting diode.

SEC. 4. NEXT GENERATION LIGHTING INITIATIVE.

(a) ESTABLISHMENT.—There is established in the Department of Energy a lighting ini-
tiative to be known as the “Next Generation Lighting Initiative” to research, develop, and conduct demonstration activities on white light emitting diodes.

(b) OBJECTIVES.—The objectives of the Lighting Initiative shall be to develop, by 2011, white light emitting diodes that, com-
pared to incandescent and fluorescent light-
ing technologies, are—

(A) longer lasting;

(B) more energy-efficient; and

(C) cost-competitive.

(2) INORGANIC WHITE LIGHT EMITTING DIODE.—The objective of the Lighting Initiative with respect to inorganic white light emitting diodes shall be to develop an inor-
ganic white light emitting diode that has an efficiency of 160 lumens per watt and a 10-
year lifetime.

(3) ORGANIC WHITE LIGHT EMITTING DIODE.—The objective of the Lighting Initiative with respect to organic white light emitting diodes shall be to develop an organic white light emitting diode with an efficiency of 100 lumens per watt with a 5-year lifetime that—

(A) illuminates over a full color spectrum;

(B) covers large areas over flexible sur-
faces; and

(C) does not contain harmful pollutants typical of fluorescent lamps such as mer-
cury.

SEC. 5. ADMINISTRATION.

(a) PLANNING BOARD.

(1) IN GENERAL.—The Secretary shall estab-
lish a planning board, to be known as the “Next Generation Lighting Initiative Plan-
ning Board”, to assist the Secretary in de-
veloping and implementing the Lighting Ini-
tiative.

(2) COMPOSITION.—The planning board shall be com-
posed of—

(A) 4 members from universities, national laboratories, and other individuals with ex-
pertise in white lighting, to be appointed by the Secretary;

(B) 3 members nominated by the consor-
tium and appointed by the Secretary;

(C) STUDY.—

(I) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the planning board shall complete a study on strategies for the development and imple-
mentation of white light emitting diodes.

(ii) REQUIREMENTS.—The study shall—

(A) develop a comprehensive strategy to im-
plement, through the Lighting Initiative, the use of white light emitting diodes to in-
crease energy efficiency and enhance United States competitiveness; and

(B) identify the research and development, manufac-
turing, and market barriers that must be overcome to achieve a goal of a 25 percent market penetration by white light emitting diode technologies into the incandescent and fluorescent lighting markets by the year 2012.

(C) IMPLEMENTATION.—As soon as prac-
ticable after the study is submitted to the Secretary, the Secretary shall implement the Lighting Initiative in accordance with the recommenda-
tions of the planning board.

(b) CONSORTIUM.

(1) IN GENERAL.—The Secretary shall sol-
licit the establishment of a consortium, to be known as the “Next Generation Lighting Initiative Consortium”, to initiate and man-
age basic and manufacturing related re-
search contracts on white light emitting di-
des for the Lighting Initiative.

(ii) COMPOSITION.—The consortium may be composed of firms, national laboratories, and other entities so that the consortium is representational of the United States solid state lighting industry as a whole.

(ii) FUNDING.—The consortium shall be funded by—

(A) membership fees; and

(B) grants provided under section 6.

SEC. 6. GRANT PROGRAM.

(a) IN GENERAL.—The Secretary shall make grants to firms, the consortium, and re-
search organizations to conduct research, de-
velopment, and demonstration projects re-
lated to white light emitting diode tech-
nologies.

(b) REQUIREMENTS.—To be eligible to re-
ceive a grant under this section, a consor-
tium shall—

(I) enter into a consortium participation agreement that—

(A) is agreed to by all members; and

(B) describes the responsibilities of partici-
pants, membership fees, and the scope of re-
search activities; and

(II) develop a Lighting Initiative annual program plan.

(c) ANNUAL REVIEW.

The annual independent review of firms, the consortium, and research organizations receiving a grant under this section shall be conducted by—

(I) a committee appointed by the Secre-
tery under the Federal Advisory Com-
mittee Act (5 U.S.C. App.); or

(II) a committee appointed by the Na-
tional Academy of Sciences.

(2) REQUIREMENTS.—Using clearly defined standards established by the Secretary, the rev-

(e) TECHNICAL AND FINANCIAL ASSIST-
ANCE.—The national laboratories and other pertinent Federal agencies shall cooperate with and provide technical and financial as-
sistance to firms, the consortium, and re-
search organizations conducting research, development, and demonstration projects carried out under this section.

(f) AUDITS.—

(1) IN GENERAL.—The Secretary shall retain an independent, commercial auditor to de-
termine the extent to which funds made available under this Act have been expended in accordance with paragraph (2).

(g) APPLICABLE LAW.—The Lighting Initia-
tive shall not be subject to the Federal Ac-
quision Regulation.

SEC. 7. PROTECTION OF INFORMATION.

The Federal Government on a confidential basis under this Act shall be considered to constitute trade secrets and commercial or financial informa-
tion obtained from a person and privileged or confidential under section 552(b)(4) of title 5, United States Code.
and Naturalization Service, INS, was private bill on behalf of Zhenfu Ge, a recently. Earlier this year I introduced a States. Nor will the beneficiary be sub-
and in some cases, face deportation. The sponsor, the beneficiary would not lose the line if the visa category is numeri-
have to file a new immigrant visa peti-
ond and sign the affidavit. Without the affidavit of support promising to provide for the support of the immi-
grant. This is the last step before a green card is issued. If the family sponsor dies while they have the chance to adjust status or receive an immigrant visa.

Under current law, a family member who petitions for a relative to receive an immigrant visa must sign a legally binding affidavit of support promising to provide for the support of the im-
igrant. This is the last step before a green card is issued. If the family sponsor dies while the green card applica-
tion is pending, the applicant is forced to find a new sponsor and restart the application process, usually a 7- to 8-year process, or face deportation.

The legislation I have introduced today would correct this anomaly in the law by permitting another family member to stand in for the deceased sponsor and sign the affidavit. Without this legislation, another relative who qualifies as a family sponsor would have to file a new immigrant visa peti-
tion on behalf of the relative and the relative would have to go to the end of the line if the visa category is numeri-
cally limited. Thus, the beneficiary would lose his priority date for a visa based on the filing of the first petition, and in some cases, face deportation.

With the passage of this legislation, even though the original sponsor may be a different sponsor, the beneficiary would not lose his or her priority date to be admitted as a permanent resident of the United States. Nor will the beneficiary be subject to deportation even though they meet all the requirements for an immigrant visa.

A classic example of this situation was presented to my office just recently. Earlier this year I introduced a private bill on behalf of Zhenfu Ge, a 73-year-old grandmother whose daughter died before the Immigration and Naturalization Service, INS, was able to complete the final stage of application process: her interview. As a result, her immigration application is no longer valid and she is now subject to deportation. Whose petition was introduced would allow her to adjust her status, given that she has met all the requirements for a visa.

In previous years, I have introduced other private bills which eventually became law. One bill was on behalf of Sucha Kwong whose husband was killed in a car accident just weeks before her final interview with the INS. In 1997, I introduced a private bill on behalf of Jasmin Salehi, a Korean im-
migrant who became ineligible for per-
manent residency after her husband was murdered at a Denny’s in Reseda, California, where he worked as a man-
ger.

In all of these cases, a family’s grief was compounded by the prospect of the deportation of Family member, who had met all the requirements for a green card. This legislation is an effi-
cient way to alleviate the need for pri-
vate legislation under these cir-
cumstances by making the law more just for those who have chosen to be-
come immigrants in our country through the legal process.

We introduce the “Family Immigra-
tion Act of 2001,” in the hopes that it will go further to alleviate some of the hardships families face when con-
fronted by the untimely death of a sponsor. Similar legislation has gained bipartisan support in the House of Rep-
resentatives. I look forward to working with my colleagues to move it quickly through the Senate.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1167

Be it enacted by the Senate and House of Rep-
resentatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the “Family Sponsor Immigration Act of 2001”.

SEC. 2. SUBSTITUTION OF ALTERNATIVE SPON-
SOR IF ORIGINAL SPONSOR HAS DIED.

(a) PERMITTING SUBSTITUTION OF ALTERN-
ATIVE CLOSE FAMILY SPONSOR IN CASE OF DEATH OF PETITIONER.—

(1) RECOGNITION OF ALTERNATIVE SPONSOR.— Section 213A(f)(5) of the Immigration and Nationality Act (8 U.S.C. 1183a(f)(5)) is amended to read as follows:

“(5) NON-PETITIONING CASES.—Such term also includes an individual who does not meet the requirement of paragraph (1)(D) but who:

(A) accepts joint and several liability with a petitioning sponsor under paragraph (2) or relative of an employment-based immi-
grant under paragraph (4) and who dem-
onstrates (as provided under paragraph (6)) the means to maintain an annual income equal to at least 125 percent of the Federal poverty line; or

(B) is a legal guardian of a sponsored alien, meets the requirements of paragraph (1) (other than subparagraph (D)), and executes an affi-
davit of support with respect to such alien in a case in which—

(i) the individual petitioning under sec-
tion 204 for the classification of such alien died after the approval of such petition; and

(ii) the Attorney General has determined for humanitarian reasons that revocation of such petition under section 205 would be inap-
propriate.

(2) CONFORMING AMENDMENT PERMITTING SUBSTITUTION.—Section 212(a)(4)(C)(ii) of such Act (8 U.S.C. 1118a(a)(4)(C)(ii)) is amend-
ed by striking “(including any additional sponsor required under section 213A(f))” and inserting “(and any additional sponsor required under section 213A(f) or any alter-
native sponsor permitted under paragraph (5)(B) of such section)”.

(3) ADDITIONAL CONFORMING AMENDMENTS.— Section 213A(f) of such Act (8 U.S.C. 1183a(f)) is amend-
ed, in each of paragraphs (2) and (4)(B)(ii), by striking “(5).” and inserting “(5)(A).”.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with re-
spect to deaths occurring before, on, or after the date of the enactment of this Act, except that, in the case of a death occurring before such date, such amendments shall apply only if:

(1) the sponsored alien—

(A) requests the Attorney General to rein-
state the classification petition that was filed with respect to the alien by the de-
ceased and approved under section 204 of the Immigration and Nationality Act (8 U.S.C. 1154) before such death; and

(B) demonstrates that he or she is able to satisfy the requirement of section 212(a)(4)(C)(ii) of such Act (8 U.S.C. 1182(a)(4)(C)(ii)) by reason of such amend-
ments; and

(2) the Attorney General reinstates such petition after making the determination de-
scribed in section 213A(f)(3)(B)(ii) of such Act (as amended by such subsection).

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 126—EX-
PRESSING THE SENSE OF THE SENATE REGARDING OBSER-
VANCE OF THE OLYMPIC TRUCE

Mr. DASCHLE (for himself, Mr. STE-
VENS, Mr. REID, Mr. CONRAD, Mr. HARKIN, Mr. DORGAN, and Mr. SARBANES) submitted the following resolution; which was referred to the Committee on Foreign Relations.

S. Res. 126

Whereas the Olympic Games are a unique opportunity for international cooperation and the promotion of international understanding;

Whereas the Olympic Games bring to-
gether embattled rivals in an arena of peace-
ful competition;

Whereas the Olympic Ideal is to serve peace, friendship, and international under-
standing;

Whereas participants in the ancient Olymp-
ian Games, as early as 776 B.C., observed an Olympic ‘‘Truce’’ whereby the warring part-
ies ceased hostilities and laid down their weapons for the duration of the games and

CONGRESSIONAL RECORD—SENATE
July 11, 2001

12938
during the period of travel for athletes to and from the United States.

Whereas war extracts a terrible price from the civilian populations that suffer under it, and truces during war allow for the provision of humanitarian assistance to those suffering casualties;

Whereas truces may lead to a longer cessation of hostilities and, ultimately, a negotiated settlement and end to conflict;

Whereas the Olympics can and should be used as a tool for international public diplomacy, rapprochement, and building a better world;

Whereas terrorist organizations have used the Olympics not to promote international understanding but to perpetrate cowardly acts against innocent participants and spectators;

Whereas, since 1992, the International Olympic Committee has urged the international community to observe the Olympic Truce;

Whereas the International Olympic Committee and the Government of Greece established the Olympic Truce Center in Athens in 2004; and

Whereas the National Assembly of the United States, has three times called for member states to observe the Olympic Truce, most recently for the XXVIII Olympiad in Sydney, Australia: Now, therefore, be it

Resolved, SECTION 1. SENSE OF THE SENATE WITH RESPECT TO THE OLYMPIC TRUCE.

(a) COMMENDATION OF THE IOC AND THE GOVERNMENT OF GREECE.—The Senate commends the efforts of the International Olympic Committee and the Government of Greece to urge the international community to observe the Olympic Truce.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the United States Government should join efforts to use the Olympic Truce as an instrument to promote peace and reconciliation in areas of conflict; and

(2) the President should continue efforts to work with the Greeks.

SEC. 2. TRANSMISSION OF RESOLUTION.

The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he further transmit such copy to the International Olympic Committee and the Government of Greece.

SENATE RESOLUTION 127—COMMENDING GARY SISCO FOR HIS SERVICE AS SECRETARY OF THE SENATE

Mr. LOTTT (for himself, Mr. DASCHEL, Mr. BYRD, and Mr. THURMOND) submitted the following resolution; which was considered and agreed to:—

Whereas, Gary Sisco faithfully served the Senate of the United States as the 29th Secretary of the Senate from the 104th to the 107th Congress, and discharged the difficult duties and responsibilities of that office with unfailing dedication and a high degree of competence and efficiency; and

Whereas, as an elected officer, Gary Sisco has upheld the processes and traditions of the United States Senate and extended his assistance to all Members of the Senate; and

Whereas, through his exceptional service and personal standards and traditions of the Senate of the United States, Gary Sisco has earned the respect, trust, and gratitude of his associates and the Members of the Senate; Now, therefore, be it

Resolved, That the Senate recognizes the contributions of Gary Sisco to the Senate and to his Country and expresses to him its appreciation for his faithful and outstanding service, and extends its best wishes in his future endeavors.

S. 2. The Secretary of the Senate shall transmit a copy of this resolution to Gary Sisco.

SENATE RESOLUTION 128—CALLING ON THE GOVERNMENT OF THE PEOPLE'S REPUBLIC OF CHINA TO IMMEDIATELY AND UNCONDITIONALLY RELEASE LI SHAOMIN AND ALL OTHER AMERICAN SCHOLARS OF CHINESE ANCESTRY BEING HELD IN DETENTION.

Resolved, That the Senate recognizes the efforts of the International Olympic Committee and the Government of the People's Republic of China to urge the International Olympic Committee to urge the People's Republic of China to observe the Olympic Truce during the period of travel for athletes to and from the games; and

That during the period of travel for athletes to and from the games, the Olympic Games; and

Whereas the United Nations General Assembly, with the strong support of the United States, has called for member states to observe the Olympic Truce;

Whereas the United States citizens and scholars who have been detained by the Government of the People's Republic of China for over more than 114 days, and has been formally charged with espionage for Taiwan on May 15, 2001, and is expected to go on trial on July 14, 2001;

Whereas Dr. Li Shaomin has been deprived of his basic human rights by arbitrary arrest and detention, has not been allowed to contact his wife and child (both United States citizens) and was prevented from seeing his lawyer for an unacceptably long period of time;

Whereas Dr. Gao Zhan is a permanent resident of the United States and scholar who has been detained by the Government of the People's Republic of China for more than 114 days, and was formally charged with “conspiring to obtain foreign influence” on April 4, 2001;

Whereas Dr. Gao Zhan has been deprived of her basic human rights by arbitrary arrest and detention, has not been allowed to contact her husband and child (both United States citizens) or Department of State consular personnel in China, and was prevented from seeing her lawyer for an unacceptably long period of time;

Whereas Wu Jianmin is a United States citizen and author who has been detained by the Government of the People's Republic of China, has been deprived of his basic human rights by arbitrary arrest and detention, has been denied access to lawyers and family members, and has yet to be formally charged with any crimes;

Whereas Qin Guangquang is a permanent resident of the United States and researcher of the Government of the People's Republic of China on suspicions of “leaking state secrets”, has been deprived of his basic human rights by arbitrary arrest and detention, has been denied access to lawyers and family members, and has yet to be formally charged with any crimes;

Whereas Tong Chunyan is a permanent resident of the United States, Falun Gong practitioner, and researcher who has been sentenced to three years in prison for spying by the Government of the People's Republic of China, apparently for conducting research which documented violations of the human rights of Falun Gong adherents in China, has been deprived of her basic human rights by being placed on trial; her appeal to the Beijing Higher People's Court was denied on May 11, 2001;

Whereas Liu Yaping is a permanent resident of the United States and a businessman who was arrested and detained in Inner Mongolia in March 2001 by the Government of the
People's Republic of China, has been deprived of human rights by being denied any access to family members and by being denied regular access to lawyers, is reported to be suffering from severe health problems, was accused of tax evasion and other minor crimes, and has been denied his request for medical parole; whereas because there is documented evidence that the Government of the People's Republic of China uses torture to coerce confessions from suspects, because the Government has thus far presented no evidence to support its claims that the detained scholars and intellectuals are spies, and because spying is vaguely defined under Chinese law, there is reason to believe that the "confessions" of Dr. Li Shaomin and Dr. Gao Zhan may have been coerced; and whereas the arbitrary imprisonment of United States citizens and residents by the Government of the People's Republic of China, and the continuing violations of their fundamental human rights, demands an immediate and forceful response by Congress and the President of the United States: Now, therefore, be it

Resolved, That

(1) the Senate—

(A) condemns and deprecates the continued detention of Li Shaomin, Gao Zhan, Wu Jianmin, Qin Guangguang, and Teng Chunyan, and other scholars detained on false charges by the Government of the People's Republic of China, and calls for their immediate and unconditional release;

(B) condemns and deprecates the lack of due process afforded to these detainees, and the probable coercion of confessions from some of them;

(C) condemns and deprecates the ongoing and systematic violations of the fundamental human rights violations by the Government of the People's Republic of China, of which the unjust detentions of Li Shaomin, Gao Zhan, Wu Jianmin, Qin Guangguang, and Teng Chunyan, are only important examples;

(D) strongly urges the Government of the People's Republic of China to consider carefully the implications to the broader United States-Chinese relationship of detaining and coercing confessions from United States citizens and permanent residents on unsubstantiated and unfounded suspicions;

(E) urges the Government of the People's Republic of China to consider releasing Liu Yaping on medical parole, as provided for under Chinese law; and

(F) believes that human rights violations inflicted on United States citizens and residents by the Government of the People's Republic of China will reduce opportunities for United States-Chinese cooperation on other matters; and

(D) should immediately send a special, high ranking representative to the Government of the People's Republic of China to reiterate the deep concern of the United States regarding the continued imprisonment of Li Shaomin, Gao Zhan, Wu Jianmin, Qin Guangguang, and Liu Yaping, and to discuss their legal status and immediate humanitarian needs.

AMENDMENTS SUBMITTED AND PROPOSED

SA 877. Mr. BYRD proposed an amendment to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes.

SA 878. Mr. CRAPO (for himself, Mr. MURKOWSKI, and Mr. DODD) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 879. Mr. DURBIN (for himself, Mrs. MURRAY, Mr. DAYTON, Mr. REID, Mr. FINKEL, and Mrs. BOXER) proposed an amendment to the bill H.R. 2217, supra.

SA 880. Mr. NICKLES (for himself) submitted an amendment to the bill H.R. 2217, supra.

SA 881. Mr. KYL submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 882. Mr. KYL submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 883. Mr. KYL submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 884. Mr. KERRY submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 885. Mr. MURKOWSKI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 886. Ms. BOXER submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 887. Ms. SNOWE submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 888. Mr. HARKIN (for himself and Mr. GRASSLEY) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 889. Mr. ENZI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 890. Mr. BREAX (for himself and Ms. LANDRIEU) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 891. Mr. CORZINE (for himself and Mr. TORRICE) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 892. Mr. STEVENS submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 893. Mr. NELSON, of Florida (for himself and Mr. GRAHAM) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra.

SA 894. Mr. NELSON, of Florida submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 895. Mr. KERRY (for himself, Ms. SNOWE, Ms. COLLINS, Mr. KENNEDY, and Mrs. BOXER) submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 896. Mr. NICKLES submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 897. Mr. ENZI submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 898. Mr. SESSIONS submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 899. Mr. SMITH, of Oregon submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 900. Mr. ALLARD submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 901. Mr. DURBIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 902. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 903. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 904. Mr. MCCAIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 905. Mrs. BOXER submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 906. Ms. CANTWELL (for herself, Mr. BINGAMAN, and Mrs. BOXER) submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 907. Ms. LANDRIEU (for herself, Mr. SMITH, of New Hampshire, Mr. BREAUX, and Mr. CRAPO) submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 908. Ms. LANDRIEU (for herself, Mr. BREAUX, Mr. LOTT, and Mr. SESSIONS) submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 909. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 910. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 911. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 912. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, supra, which was ordered to lie on the table.

SA 913. Mr. BINGAMAN submitted an amendment intended to be proposed by him
to the bill H.R. 2217, supra; which was or
dered to lie on the table.

SA 914. Mr. BINGAMAN submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was or-
dered to lie on the table.

SA 915. Mr. BINGAMAN submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was or-
dered to lie on the table.

SA 916. Mr. BINGAMAN submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was or-
dered to lie on the table.

SA 917. Mr. LEVIN (for himself and Ms. STABENOW) submitted an amendment inten
tended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 918. Mr. CRAIG submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 919. Mr. BINGAMAN submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was or-
dered to lie on the table.

SA 920. Mr. BINGAMAN submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was or-
dered to lie on the table.

SA 921. Ms. COLLINS submitted an amend
tment intended to be proposed by her to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 922. Ms. COLLINS submitted an amend
tment intended to be proposed by her to the bill H.R. 2217, supra; which was ordered to lie on the table.

SA 923. Mr. TORRICELLI submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 877. Mr. BYRD proposed an amend
tment to the bill H.R. 2217, mak-
ing appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 152, line 4, strike ''longitude'' and insert ''longitude, or for the conduct of preleasing activities in those areas''.

SA 878. Mr. CRAPO (for himself, Mr. MURKOWSKI, and Mr. CRAIG) submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, making appro
cipations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 152, line 4, strike ''$17,181,000'' and insert ''$72,640,000''.

SA 879. Mr. DURBIN (for himself, Mrs. MURRAY, Mr. DAYTON, Mr. REID, Mr. FEINGOLD, and Mrs. BOXER) proposed an amend
tment to the bill H.R. 2217, making appropriations for the De-
partment of the Interior and related agencies for the fiscal year ending Sep-
tember 30, 2002, and for other purposes; as follows:

On page 194, between lines 9 and 10, insert the fol-
lowing:

SEC. 1 . PRELEASING, LEASING, AND RELATED ACTIVITIES.

None of the funds made available by this Act shall be used to conduct any preleasing, leasing, or other related activity under the Prohibited Area Leasing Act of 1990 (30 U.S.C. 131 et seq.) or the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.), within the boundary (in effect as of January 20, 2001) of a national monument established under the Act of June 8, 1906 (16 U.S.C. 431 et seq.), except to the ex-
tent that such a preleasing, leasing, or other related activity is allowed under the Presi-
dential proclamation establishing the monument.

SA 880. Mr. BYRD proposed an amend
tment to the bill H.R. 2217, mak-
ing appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 157, line 7, insert ''Protection'' after the word "Park".

SA 881. Mr. KYL submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, making appro
cipations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 70, line 4, before "(v)" insert the fol-
lowing: "(v) which of $2,000,000 shall be provided to the Ecological Restoration Institute".

SA 882. Mr. KYL submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, making appro
cipations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 69, line 10 before "(v)" insert the fol-
lowing: "(v) which of $500,000 is provided to the Ecological Restoration Institute for as-
sistance to communities and land manage-
ment agencies to support the design and im-
plementation of forest restoration treat-
ments.".

SA 883. Mr. KYL submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, making appro
cipations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 4, line 16, insert before "(v)" the fol-
lowing: "(v) which of $338,000 shall be pro-
vided for Mt. Trumbull".

SA 884. Mr. KERRY submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, making appro
cipations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 183, line 16, strike "longitude" and insert "longitude, or for the conduct of preleasing activities in those areas".

SA 885. Mr. MURKOWSKI submitted an amend
tment intended to be proposed by him to the bill H.R. 2217, making appro
cipations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

At the appropriate place, insert the fol-
lowing:

(a) SHORT TITLE AND FINDINGS.—

(1) This Title can be cited as the "Iraq Pet-
troleum Import Restriction Act of 2001".

(2) Findings.—Congress finds that—

(A) the government of the Republic of Iraq—

(i) has failed to comply with the terms of United Nations Security Council Resolution 687 regarding unconditional Iraqi acceptance of the destruction, removal, or rendering harmless, under international supervision, of all nuclear, chemical and biological weapons and all stocks of agents and all related sub-
ystems and components and all research, development, support and manufacturing fa-
cilities, as well as all ballistic missiles with a range greater than 150 kilometers and re-
lated major parts, and repair and production facilities and has failed to allow United Na-
tions inspectors access to sites used for the production or storage of weapons of mass de-
struction;

(ii) routinely contravenes the terms and conditions of UNSC Resolution 661, author-
izing the export of petroleum products from Iraq in exchange for food, medicine and other humanitarian products by conducting a rou-
tine and extensive program to sell such prod-
ucts outside of the channels established by UNSC Resolution 661 in exchange for mili-
tary equipment and materials to be used in pursuit of its program to develop weapons of mass destruction in order to threaten the United States and its allies in the Persian Gulf and surrounding regions.

(iii) has failed to adequately draw down upon the amounts received in the Escrow Ac-
count established by the United Nations Security Council Resolution 686 to purchase food, medicine and other humani-
tarian products required by its citizens, re-
sulting in massive humanitarian suffering by the Iraqi people;

(iv) conducts a periodic and systematic campaign to harass and obstruct the enforce-
ment of United Nations and United States law-enforced "No-Fly Zones" in effect in the Republic of Iraq;

(v) routinely manipulates the petroleum export production volumes permitted under the United Nations Security Council Resolution 661 in order to create un-
certainty in global energy markets, and therefore threatens the economic security of the United States;

(B) further imports of petroleum products from the Republic of Iraq are inconsistent
with the national security and foreign policy interests of the United States and should be eliminated until such time as they are not so inconsistent.

(b) Prohibition on Iraqi-origin petroleum and petroleum products in violation of UNSC Resolution 986, and not inconsistent with the national security and foreign policy interests of the United States.

(d) Humanitarian Interests.—It is the sense of the Senate that the President should take all appropriate efforts to ensure that the humanitarian needs of the Iraqi people are not negatively affected by this Act, and should encourage through public, private, domestic and international means the direct or indirect sale, donation or other transfer to appropriate non-governmental health and humanitarian organizations and individuals within Iraq of food, medicine and other humanitarian products.

(e) Definitions.—(1) 661 COMMITTEE.—The term ‘‘661 Committee’’ means the Security Council Committee established by UNSC Resolution 661, and persons acting for or on behalf of the Committee under its specific delegation of authority for the relevant matter or category of activity, including the overseers appointed by the Secretary-General to examine and approve agreements for purchases of petroleum and petroleum products from the Government of Iraq pursuant to UNSC Resolution 986.

(4) Effective Date.—The prohibition on importation of Iraqi origin petroleum and petroleum products shall be effective 30 days after enactment of this Act.

SA 886. Mr. SESSIONS submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

SEC. 1. LEASE SALE 181.

Notwithstanding any other provision of this Act, none of the funds made available under this Act shall be used to authorize or carry out the construction of the Gulfstream Natural Gas Project.

SA 887. Ms. COLLINS submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, lines 6, 7, and 8, strike ‘‘Act’’ and insert ‘‘Act (of which $4,000,000 shall be available for the Tumbledown/Mount Blue conservation project, Maine)’’.

SA 888. Mr. HARKIN (for himself and Mr. GRASSLEY) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, add the following:

(1) The National Park Service shall make further evaluations of significant national, suitability and feasibility for the Glenwood locality and each of the twelve Special Landscape Areas (including combinations of such areas) as identified by the National Park Service in the course of undertaking the Special Resource Study of the Loess Hills Landform Region of Western Iowa.

(2) The National Park Service shall provide the results of these evaluations no later than January 15, 2002, to the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Energy and Natural Resources of the Senate, and the Committee on Resources of the House of Representatives.

SA 889. Mr. ENZI submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the Land and Water Conservation Fund, insert: ‘‘$33,000 shall be made available for the purchase of land for the United States Forest Service’s Bearlodge Ranger District Work Center (Old Stoney) in Sundance, Wyoming;’’

And, at the appropriate place in the report, insert: ‘‘$354,000 for the design of historic office renovations of the Bearlodge Ranger District Work Center (Old Stoney) in Sundance, Wyoming;’’

SA 890. Mr. BREAUx (for himself and Ms. LANDRIEU) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. 1. LEASE SALE 181.

Notwithstanding any other provision of law, if the University of Louisiana at Lafayette or the University of Louisiana at Lafayette makes a commitment to construct a facility adjacent to and connected with the National Wetlands Research Center, Louisiana, the Director of the United States Geological Survey, before commencement of construction, center into a long-term lease of the facility.

SA 891. Mr. CORZINE (for himself and Mr. TORRICELLI) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, line 6, after ‘‘activities’’, insert: ‘‘(including related studies)’’.

SA 892. Mr. STEVENS submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the bill insert the following new General Provision:

The term ‘‘Act’’ includes from within available funds in the Alaska Region including entrance fees generated in Glacier Bay National Park, the National Park Service shall conduct an Environmental Impact Statement on cruise ships entering such park to account possible impacts on whale populations; Provided, That none of the funds available under this Act shall be used to reduce or increase the number of permits and vessel entries into the Park below or above the levels established by the National Park Service effective for the 2001 season until the Environmental Impact Statement required by law is completed and any legal challenges thereto are finalized notwithstanding any other provision of law.

SA 893. Mr. NELSON of Florida (for himself and Mr. GRAHAM) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. 1. LEASE SALE 181.

None of the funds made available by this Act shall be used to execute a final lease agreement for oil or gas development in the area of the Gulf of Mexico known as ‘‘Lease Sale 181’’ as identified by the Outer Continental Shelf 5-Year Oil and Gas Leasing Program, before April 1, 2002.

SA 894. Mr. NELSON of Florida submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:
CONGRESSIONAL RECORD—SENATE
12943

SEC. 1. LEASE SALE 181.

None of the funds made available by this Act shall be used to execute a final lease agreement for oil or gas development in the area of the Gulf of Mexico known as ‘‘Lease Sale 181’, as identified in the Outer Continental Shelf 5-Year Oil and Gas Leasing Program.

SA 895. Mr. KERRY (for himself, Ms. SOWE, Ms. COLLINS, Mr. KENNEDY, and Mrs. BOXER) submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 183, line 11, after ‘‘offshore’’, insert ‘‘preleasing’’.

SA 896. Mr. NICKLES submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 220, line 9 strike ‘‘$2,388,614,000’’ and insert ‘‘$2,408,614,000’’.

On page 235, line 14 strike ‘‘$98,234,000’’ and insert ‘‘$78,234,000’’.

SA 897. Mr. NITZE submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 202, line 5, after 205 insert ‘‘of which, $244,000 is to be provided for the establishment of the Cahaba River National Wildlife Refuge, authorized by PL 102–580, for the establishment of the Cahaba River National Wildlife Refuge, authorized by PL 106–331, to remain available until expended, and to be for the conservation activities defined in section 250(c)(4)(E) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, for the purposes of such Act.

LANDOWNER INCENTIVE PROGRAM

For expenses necessary to carry out the provisions of the North American Wetlands Conservation Act, Public Law 101–233, as amended, $42,000,000, to remain available until expended: Provided, That the amount made available under this Act shall be apportioned a sum which is less than one-half of one percent of the total amount of the total costs of such projects and the Federal share of implementation grants shall not exceed 75 percent of the Federal share of such projects may not be derived from Federal grant programs: Provided further, That the State shall receive a sum which is less than one percent of the total amount available for apportionment or more than 10 percent: Provided further, That the Federal share of planning grants shall be for not more than one percent of the total costs of such projects and the Federal share of implementation grants shall not exceed 75 percent of the total costs of such projects: Provided further, That the proportion of the Federal share of each such project may not be derived from Federal grant programs: Provided further, That no State, territory, or other jurisdiction shall receive such funds unless it has developed, or committed to develop by October 1, 2005, a comprehensive wildlife conservation plan, consistent with criteria established by the Secretary of the Interior that considers the broad range of the State, territory, or other jurisdiction’s wildlife and associated habitats, with appropriate priority placed on those species with the greatest conservation need and taking into consideration the relative level of funding available for the conservation of those species: Provided further, That any amount apportioned in 2002 to any State, territory, or other jurisdiction that remains unobligated as of September 30, 2003, shall be reapportioned, together with funds appropriated in 2004, in the manner provided herein.

Of the amounts appropriated in title VIII of Public Law 106–291, $49,890,000 for State Wildlife Grants are rescinded.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed 74 vehicles, and any motor vehicle for replacement only (including 32 for police-type use); repair of damage to public roads.
CONGRESSIONAL RECORD—SENATE  July 11, 2001

within and adjacent to reservation areas caused by the United States or its instrumentalities. The Department of the Interior and related agencies may use such funds in the manner and to the extent provided in the resolution of the Senate of February 26, 2001, inserting the text of SA 902, to provide fish passage upstream of the Klamath Project in accordance with the March 15, 1999 and the April 1, 1999 biological opinions on the Klamath Project.

SA 900. Mr. ALLARD submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC.

(a) Recessions.—There is rescinded an amount equal to 1 percent of the discretionary budget authority provided (or obligation limit imposed) for fiscal year 2002 in this Act, or department, agency, instrumentality, or entity of the Federal Government funded in this Act. Provided, That this reduction percentage shall be applied on a pro rata basis to each program, project, and activity subject to the rescission.

(b) Reconciliation amount. —The amount rescinded pursuant to this section shall be deposited into the account established under section 312(f) of title 31, United States Code, to reduce the public debt.

(c) Report.—The Director of the Office of Management and Budget shall include in the President’s budget submitted for fiscal year 2003 a report specifying the reductions made to each account pursuant to this section.

SA 901. Mr. DURBAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 194, between lines 9 and 10, insert the following:

SEC. . . . No funds provided in this Act may be expended to conduct preleasing, leasing and related activities under either the Mineral Leasing Act (30 U.S.C. 181 et seq.), or the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) within the boundaries of a National Monument established pursuant to the Act of June 8, 1906 (16 U.S.C. 431 et seq.) as such boundary existed on January 20, 2001, except where such activities are allowed under the Presidential proclamation establishing such monument.

SA 902. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table, as follows:

On page 145, line 9, before the period at the end, insert the following: “; of which $500,000 shall be available to acquire land for the Don Edwards San Francisco Bay National Wildlife Refuge, California”.

SA 903. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for...
the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table, as follows:

On page 266, between lines 7 and 8, insert the following:

SEC. 3. FOREST LEGACY PROGRAM.

Section 7(i) of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2182c(i)) is amended by adding at the end the following:

"(3) STATE AUTHORIZATION.—Notwithstanding any other provision of this Act, a State may authorize a local government, or any qualified organization (as defined in section 170(h)(3) of the Internal Revenue Code of 1986) that is organized for 1 or more purposes described in clauses (1), (2), or (3) of section 170(h)(4)(A) of the Internal Revenue Code of 1986, to acquire lands and interests in land to carry out the Forest Legacy Program in the State."

SA 904. Mr. McCAIN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 153, line 22, before the period, insert the following:

"That beginning on page 148, strike line 6 and all that follows through page 150, line 7, and insert the following:

A. MODIFIED LEASE SALE 181.

On page 217, line 7, strike the period and insert:

"Beginning on page 194, between lines 9 and 10, insert the following:

SEC. 1. SENSE OF CONGRESS CONCERNING MODIFIED LEASE SALE 181.

(a) Findings.—Congress finds that—

(1) the United States continues to be reliant on fossil fuels (including crude oil and natural gas) as a source of most of the energy consumed in the country;

(2) this reliance is likely to continue for the foreseeable future;

(3) about 65 percent of the energy needs of the United States are supplied by oil and natural gas;

(4) the United States is becoming increasingly reliant on clean-burning natural gas for electricity generation, home heating and air conditioning, agricultural needs, and essential chemical processes;

(5) a large portion of the remaining crude oil and natural gas resources of the country are on Federal land located in the western United States, in Alaska, and off the coastline of the United States;

(6) the Gulf of Mexico has proven to be a significant source of oil and natural gas and is predicted to remain a significant source in the immediate future;

(7) many States and counties oppose the development of Federal crude oil and natural gas resources within or near the coastline, which opposition results in congressional, executive, state, or local policies to prevent the development of those resources;

(8) actions that prevent the development of certain Federal crude oil and natural gas resources do not lessen the energy needs of the United States or of those States and counties that object to exploration and development for fossil fuels;

(9) actions to prevent the development of certain Federal crude oil and natural gas resources focus development pressure on the remaining areas of Federal crude oil and natural gas resources onshore and offshore Alaska, certain onshore areas in the western United States, and the central Gulf of Mexico off the coasts of Alabama, Alaska, Louisiana, Mississippi, and Texas; and

(10) the development of Federal crude oil and natural gas resources is accompanied by adverse effects on the infrastructure services, public services, and the environment of States, counties, and local communities that host the development of those Federal resources;

(11) States, counties, and local communities do not have the power to tax adequately the development of Federal crude oil and natural gas resources, particularly when those development activities occur off the coastline of States that serve as platforms for that development, such as Alabama, Alaska, Louisiana, Mississippi, and Texas;

(12) the Mineral Leasing Act (30 U.S.C. 181 et seq.), which governs the development of Federal crude oil and natural gas resources located onshore, provides, outside the budget and appropriations processes of the Federal Government, payments to States in which Federal crude oil and natural gas resources are located in the amount of 50 percent of the direct revenues received from the Federal Government for those resources; and

(13) there is no permanent provision in the Outer Continental Shelf Lands Act (33 U.S.C. 1311 et seq.), which governs the development of Federal crude oil and natural gas resources located offshore, that authorizes the sharing of a portion of the annual revenues generated from Federal offshore crude oil and natural gas resources with adjacent coastal States that—

(A) serve as the platform for that development; and

(B) suffer adverse effects on the environment and infrastructure of the States.

(b) SENSE OF CONGRESS.—It is the sense of Congress that Congress should provide a significant portion of the Federal offshore mineral revenues to coastal States that permit the development of Federal mineral resources off the coastline, including by the States of Alabama, Alaska, Louisiana, Mississippi, and Texas."

SA 909. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 191, between lines 10 and 11, insert the following:

SEC. 1. MODIFIED LEASE SALE 181.

Notwithstanding any other provision of this Act, not later than December 31, 2001, the Secretary of the Interior shall use such funds made available by this Act as are necessary to proceed with the sale of the area known as “Modified Lease Sale 181”, located in the eastern portion of the Gulf of Mexico, consisting of 256 lease blocks for a total of approximately 1,470,000 acres, as depicted on the map entitled “Eastern Gulf of Mexico and Sale 181 Area”, dated June 29, 2001.
funds made available by this Act as are necessary to proceed with the sale of the area known as “Lease Sale 181”, located in the eastern portion of the Gulf of Mexico, modifying the sale by excluding from Lease Sale 181 the area comprised of 120 blocks that forms a narrow strip beginning 15 miles south of the coast of Alabama.

SA 911. Ms. LANDRIEU submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 145, line 9, before the period, insert the following:

"On page 145, line 9, before the period, insert the following: ‘‘of which not more than $250,000 shall be used for acquisition of 1,750 acres for the Red River National Wildlife Refuge and not more than $250,000 shall be available for use by the Louisiana herbivory (nutria) control program’’.

SA 912. Ms. LANDRIEU submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 145, line 9, before the period, insert the following:

"On page 145, line 9, before the period, insert the following: ‘‘of which not more than $250,000 shall be used for acquisition of 1,750 acres for the Red River National Wildlife Refuge and not more than $250,000 shall be available for use by the Louisiana herbivory (nutria) control program’’.

SA 913. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . . VALLES CALDERA TRUST.

$300,000 of the funds provided to the Bureau of Land Management shall be available for erosion control and watershed rehabilitation projects and initiatives developed by the Rio Puerco Management Committee (section 401 of Public Law 104–333) in New Mexico.

SA 916. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . . RIO PUECURO MANAGEMENT COMMITTEE.

$300,000 of the funds provided to the Bureau of Land Management shall be available for erosion control and watershed rehabilitation projects and initiatives developed by the Rio Puerco Management Committee (section 401 of Public Law 104–333) in New Mexico.

SA 910. Mr. BINGAMAN submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

Beginning on page 145, strike line 10 and all that follows through page 146, line 22.

Proposed Reallocations:

On page 132, line 9, strike “$1,000,000” and insert “$3,000,000”.

On page 145, line 9, strike “$50,000,000” and insert “$100,000,000”.

On page 145, line 19, strike “$2,000,000” and insert “$4,000,000”.

On page 145, line 9, strike “$2,000,000” and insert “$4,000,000”.

Description: The Committee-reported bill includes $50 million in funding for a “Landowner Incentive Program” and $10 million for a “Stewardship Grants” Program as part of the conservation spending category. Neither program was authorized in last year’s agreement establishing the conservation spending category and neither program is authorized as a stand-alone program. This amendment strikes the funding for both programs and reallocates it to other authorized programs within the overall ceiling on additional funding for the Payments in Lieu of Taxes Program and $10 million in additional funding for Youth Conservation Corps Programs.

SA 902. Ms. COLLINS submitted an amendment intended to be proposed by her to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 144, line 22, strike “expended.” and insert “expended: Provided, That $1,000,000 shall be used for the Moosehorn National Wildlife Refuge to develop and display exhibits in the Downeast Heritage Center in Calais, Maine.”
out a competitively awarded grant program for State, local, or other organizations in Maine to fund on-the-ground projects to further Atlantic salmon conservation and restoration efforts, at least $550,000 of which shall be awarded to projects that will also assist the State of Maine to prevent the listing of Atlantic salmon under the Endangered Species Act.”

SA 923. Mr. TORRICElli submitted an amendment intended to be proposed by him to the bill H.R. 2217, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2002, and for other purposes; which was ordered to lie on the table; as follows:

On page 143, line 7, after “herein,” insert “of which $140,000 shall be made available for the preparation of, and not later than July 31, 2002, submission to Congress of a report on, a feasibility study and situational appraisal of the Hackensack Meadowlands, New Jersey, to identify management objectives and address strategies for preservation efforts, and”.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, July 11, 2001, at 9 a.m. for a business meeting to consider pending committee business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet on Wednesday, July 11, 2001, at 9:30 a.m. on Internet Privacy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Wednesday, July 11, 2001, to hear testimony regarding the Role of Tax Incentives in Energy Policy, Part II.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, July 11, 2001 at 3 p.m. to hold a nomination hearing.

Nominees:

Mr. Peter R. Chaveas, of Pennsylvania, to be Ambassador to the Republic of Sierra Leone.

Mr. Aubrey Hooks, of Virginia, to be Ambassador to the Democratic Republic of the Congo.

Mr. Donald J. McConn, of Ohio, to be Ambassador to the State of Eritrea.

Mr. Nancy J. Powell, of Iowa, to be Ambassador to the Republic of Ghana.

Mr. George M. Stapples, of Kentucky, to be Ambassador to the Republic of Cameroon, and to serve concurrently and without additional compensation as Ambassador to the Republic of Equatorial Guinea.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Wednesday, July 11, 2001, at 9:30 a.m. for a hearing regarding S. 860, the e-Government Act of 2001.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HEALTH, EDUCATION, LABOR, AND WELFARE

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be authorized to meet for a hearing on achieving parity for mental health treatment during the session of the Senate on Wednesday, July 11, 2001, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a nominations hearing on Wednesday, July 11, 2001, at 2 p.m., in Dirksen Senate Office Building.

Panel I: Roger L. Gregory, of Virginia, to be U.S. circuit judge for the Fourth Circuit.

Panel II: Richard F. Cebull, of Montana, to be U.S. district judge for the District of Montana; Sam E. Haddon, of Montana, to be U.S. district judge for the District of Montana.

Panel III: Eileen J. O’Connor, of Maryland, to be Assistant Attorney General for the Tax Division.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. REID. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, July 11, 2001 at 2:30 p.m., to hold a hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUPPLEMENTAL APPROPRIATIONS ACT, 2001

On July 10, 2001, the Senate amended and passed H.R. 2216, as follows:

Resolved, That the bill from the House of Representatives (H.R. 2216) entitled “An Act making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.”, do pass with the following amendment:

Strike out all after the enacting clause and insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2001, and for other purposes, namely:

TITLE I—NATIONAL SECURITY MATTERS

CHAPTER 2

DEPARTMENT OF JUSTICE

RADIATION EXPOSURE COMPENSATION

PAYMENT TO RADIATION EXPOSURE COMPENSATION TRUST FUND

For an additional amount for “Payment to Radiation Exposure Compensation Trust Fund” for claims covered by the Radiation Exposure Compensation Act, $84,000,000, to remain available until expended.

CHAPTER 2

DEPARTMENT OF DEFENSE

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For an additional amount for “Military Personnel, Army”, $164,000,000.

MILITARY PERSONNEL, NAVY

For an additional amount for “Military Personnel, Navy”, $84,000,000.
Military Personnel, Marine Corps
For an additional amount for “Military Personnel, Marine Corps”, $89,000,000.

Military Personnel, Air Force
For an additional amount for “Military Personnel, Air Force”, $126,000,000.

Reserve Personnel, Army
For an additional amount for “Reserve Personnel, Army”, $52,000,000.

Reserve Personnel, Air Force
For an additional amount for “Reserve Personnel, Air Force”, $2,000,000.

National Guard Personnel, Army
For an additional amount for “National Guard Personnel, Army”, $6,000,000.

National Guard Personnel, Air Force
For an additional amount for “National Guard Personnel, Air Force”, $2,000,000.

Operation and Maintenance, Army Reserve
For an additional amount for “Operation and Maintenance, Army Reserve”, $1,000,000.

Operation and Maintenance, Air Force Reserve
For an additional amount for “Operation and Maintenance, Air Force Reserve”, $2,000,000.

Operation and Maintenance, Marine Corps Reserve
For an additional amount for “Operation and Maintenance, Marine Corps Reserve”, $1,000,000.

Operation and Maintenance, Air Force Reserve
For an additional amount for “Operation and Maintenance, Air Force Reserve”, $34,000,000.

Operation and Maintenance, Army National Guard
For an additional amount for “Operation and Maintenance, Army National Guard”, $42,000,000.

Operation and Maintenance, Air National Guard
For an additional amount for “Operation and Maintenance, Air National Guard”, $119,300,000.

Procurement
Other Procurement, Army
For an additional amount for “Other Procurement, Army”, $3,000,000, to remain available for obligation until September 30, 2003.

Shipbuilding and Conversion, Navy (Transfer of Funds)
For an additional amount for “Shipbuilding and Conversion, Navy”, $297,000,000, Provided, That upon enactment of this Act, the Secretary of the Navy shall transfer such funds to the following appropriations in the amount specified: Provided further, That the amounts transferred shall be available for the same purposes as the appropriations to which transferred:

To:

Aircraft Procurement
For an additional amount for “Aircraft Procurement, Air Force”, $78,000,000, to remain available for obligation until September 30, 2003.

Missile Procurement, Air Force
For an additional amount for “Missile Procurement, Air Force”, $155,650,000, to remain available for obligation until September 30, 2003.

Procurement of Ammunition, Air Force
For an additional amount for “Procurement of Ammunition, Air Force”, $31,200,000, to remain available for obligation until September 30, 2003.

Other Procurement, Air Force
For an additional amount for “Other Procurement, Air Force”, $185,650,000, to remain available for obligation until September 30, 2003.

Procurement, Defense-Wide
For an additional amount for “Procurement, Defense-wide”, $5,800,000, to remain available for obligation until September 30, 2003.

Research, Development, Test and Evaluation, Navy
For an additional amount for “Research, Development, Test and Evaluation, Navy”, $287,000,000, to remain available for obligation until September 30, 2003.

Research, Development, Test and Evaluation, Air Force
For an additional amount for “Research, Development, Test and Evaluation, Air Force”, $155,650,000, to remain available for obligation until September 30, 2003.

Revolving and Management Funds
Defense Working Capital Funds
For an additional amount for “Defense Working Capital Funds”, $150,000,000, to remain available until expended.

Other Department of Defense Programs
Defense Health Program
For an additional amount for “Defense Health Program”, $1,522,200,000 for operation and maintenance: Provided, That of the funds made available under this heading, not more than $65,000,000 may be made available pursuant to TRICARE contract costs associated with the provision of health care services to eligible beneficiaries of all the uniformed services: Provided further, That of the funds made available under this heading, not less than $220,000,000 shall be made available upon enactment only for the requirements of the direct care system and military medical research, to be administered solely by the uniformed services Surgeons General.

SEC. 1206. Of the funds appropriated in the Department of Defense Appropriations Act, 2001, Public Law 106–259, in Title IV under the heading, “Research, Development, Test and Evaluation, Navy”, $2,000,000 may be made available for a Maritime Fire Training Center at the Marine and Environmental Research and Training Station (MERTS), and $2,000,000 may be made available for a Maritime Fire Training Center at Barbers Point, including provision for laboratories, construction, and other efforts associated with research and development of such programs of major importance to the Department of Defense.

SEC. 1207. Of the amounts appropriated in this Act under the heading “Operation and Maintenance, Army”, $8,600,000 shall be available for the purpose of repairing storm damage at Fort Sill, Oklahoma, and Red River Army Depot, Texas.

SEC. 1208. (a) Of the total amount appropriated under this Act to the Army for operation and maintenance, such amount as may be necessary shall be available by virtue of a conveyance by the Secretary of the Army, without consideration, of all right, title, and interest of the Department of Defense.
United States in and to the firefighting and rescue vehicles described in subsection (b) to the City of Bayonne, New Jersey.

(b) The firefighting and rescue vehicles referred to in subsection (a) are a rescue hazardous material, a 2,000-gallon per minute pumper, and a 100-foot elevating platform truck, all of which are at Military Ocean Terminal, Bayonne, New Jersey.

SEC. 1290. None of the funds available to the Department of Defense for fiscal year 2001 may be obligated or expended for retiring or dismantling any of the 93 B–1B Lancer bombers in service as of June 1, 2001, or for transferring or realigning any of those aircraft from the unit, or the facility, to which assigned as of that date.

CHAPTER 3
DEPARTMENT OF ENERGY
ATOMIC ENERGY DEFENSE ACTIVITIES
NATIONAL NUCLEAR SECURITY ADMINISTRATION
WEAPONS ACTIVITIES

For an additional amount for "Weapons Activities", $140,000,000, to remain available until expended: Provided, That funding is authorized for Project 01–D–020, Atlas Relocation and Operations, and Project 01–D–108, Microsystems and Engineering Science Application Complex.

OTHER DEFENSE RELATED ACTIVITIES
DEFENSE ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

For an additional amount for "Defense Environmental Restoration and Waste Management", $85,000,000, to remain available until expended.

DEFENSE FACILITIES CLOSURE PROJECTS
For an additional amount for "Defense Facilities Closure Projects", $21,000,000, to remain available until expended.

DEFENSE ENVIRONMENTAL MANAGEMENT PRIVATIZATION
For an additional amount for "Defense Environmental Management Privatization", $29,600,000, to remain available until expended.

OTHER DEFENSE ACTIVITIES
For an additional amount for "Other Defense Activities", $5,000,000, to remain available until expended.

CHAPTER 4
DEPARTMENT OF DEFENSE
MILITARY CONSTRUCTION, AIR FORCE

For an additional amount for "Military Construction, Air Force", $18,000,000, to remain available until September 30, 2005: Provided, That these funds, no less than $1,000,000 shall be used for construction of a new animal taxiing ramp at Ellington National Guard Base, Texas, and that $3,000,000 remain available until September 30, 2003.

"Military Construction, Air National Guard", $6,700,000;
"Family Housing, Army", $1,000,000: Provided, That the funds in this section shall remain available until September 30, 2003.

(F) Of the funds provided in the Military Construction Appropriations Act for the years 2000 and 2001, the following amounts are rescinded:
"Military Construction, Defense-Wide", $6,700,000;
"Family Housing, Army", $1,000,000.

SEC. 1402. Notwithstanding any other provision of law, the amount authorized, and authorized to be appropriated for the Defense Agencies for the TRICARE Management Agency for a military construction project for Bassett Army Hospital at Fort Wainwright, Alaska, shall be $215,000,000.

TITLE II—OTHER SUPPLEMENTAL APPROPRIATIONS
CHAPTER 1
DEPARTMENT OF AGRICULTURE
OFFICE OF THE SECRETARY

For an additional amount for "Office of the Secretary", $3,000,000, to remain available until September 30, 2002: Provided, That of these funds, no less than $1,000,000 shall be used to enhance humane slaughter practices under the Federal Meat Inspection Act: Provided further, That of these funds, no less than $1,000,000 shall be used to enhance humane slaughter practices under the Federal Meat Inspection Act: Provided further, That no more than $500,000 of these funds shall be made available to the Under Secretary for Research, Education and Economics for development and demonstration of technologies to promote the humane treatment of animals: Provided further, That these funds may be transferred to and merged with appropriations for agencies performing this work.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE
SALARIES AND EXPENSES

For an additional amount for "Salaries and Expenses", $35,000,000, to remain available until September 30, 2002.

FARM SERVICE AGENCY
AGRICULTURAL CONSERVATION PROGRAM
(RECISION)

Of the funds appropriated for "Agricultural Conservation Program" under Public Law 104–37, $45,000,000 are rescinded.

NATURAL RESOURCES CONSERVATION SERVICE
WATERSHED AND FLOOD PREVENTION OPERATIONS

For an additional amount for "Watershed and Flood Prevention Operations", to repair damages to waterways and watersheds, resulting from natural disasters occurring in West Virginia on July 7 and July 8, 2001, $5,000,000, to remain available until expended.

GENERAL PROVISIONS—THIS CHAPTER
SEC. 1401. (a) In addition to amounts appropriated or otherwise made available elsewhere in the Military Construction Appropriations Act, 2001, and the Act, the amounts appropriated are hereby appropriated as authorized by section 2854 of title 10, United States Code, as follows for the purpose of repairing storm damage at Ellington National Guard Base, Texas, and Fort Sill, Oklahoma:
"Military Construction, Air National Guard", $6,700,000;
"Family Housing, Army", $1,000,000: Provided, That the funds in this section shall remain available until September 30, 2003.

(b) (1) In the third proviso, by striking “ability of” and inserting “ability of low income rural communities and”; and

CHAPTER 2
DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
COASTAL AND OCEAN ACTIVITIES
(INCLUDING RECISION)

Of the funds made available in Public Law 106–553 for the costs of construction of a research center at the ACE Basin National Estuarine Research Reserve in South Carolina, $5,000,000 are rescinded.

For an additional amount for the activities specified in Public Law 106–553 for which funds were rescinded in the preceding paragraph, $5,000,000, to remain available for construction of and $5,000,000, to remain available for land acquisition.
The text supplied is not legible and contains several typographical errors. As a result, it cannot be accurately transcribed into a readable format. It appears to be a page from a congressional record related to the United States Code, and includes amendments to various sections. Given the nature of the content, it would be advisable to consult a legible version of the document for a precise transcription.
For an additional amount for "Children's Bureau'', $131,000 from local funds for Taxicab Operations, $5,000,000 for the Children Investment Trust.

PUBLIC WORKS

For an additional amount for "Public Works'', $131,000 from local funds for Taxicab Inspectors.

FINANCING AND OTHER USES

WORKFORCE INVESTMENTS

For expenses associated with the workforce investments program, $40,500,000 from local funds.

WILSON BUILDING

For an additional amount for "Wilson Building'', $7,100,000 from local funds.

ENTERPRISE AND OTHER FUNDS

WATER AND SEWER AUTHORITY

For an additional amount for "Water and Sewer Authority'', $2,151,000 from local funds for initiatives associated with complying with stormwater legislation and proposed right-of-way fees.

GENERAL PROVISION—THIS CHAPTER

SEC. 2301. REPORT BY THE MAYOR. Pursuant to Section 222 of Public Law 104–8, the Mayor of the District of Columbia shall provide the House and Senate Committees on Appropriations, the Senate Committee on Governmental Affairs, and the House Committee on Government Reform with recommendations relating to the transition of responsibilities under Public Law 104–8, the District of Columbia Financial Responsibility Act of 1995, at the earliest practicable time.

CHAPTER 4

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

FLOOD CONTROL AND COASTAL EMERGENCIES

For an additional amount for "Flood Control and Coastal Emergencies'', $50,000,000, as authorized by Section 3 of the Flood Control Act of August 18, 1941, as amended, to remain available until expended.

DEPARTMENT OF ENERGY

ENERGY PROGRAMS

NON-DEFENSE ENVIRONMENTAL MANAGEMENT

For an additional amount for "Non-Defense Environmental Management'', $11,400,000, to remain available until expended.

URANIUM FACILITIES MAINTENANCE AND REMEDIATION

(TRANSFER OF FUNDS)

For an additional amount for "Uranium Facilities Maintenance and Remediation'', $18,000,000, to be derived from the Uranium Enrichment Decontamination and Decommissioning Fund, to remain available until expended.

GENERAL PROVISIONS—THIS CHAPTER

SEC. 2401. AUTHORIZATION TO ACCEPT PREPAYMENT OF OBLIGATIONS. (a) In General.—Notwithstanding any provision of law, the Secretary of the Interior may accept the prepayment of all amounts due the Secretary for equipment and services provided to the Secretary under this Act, and for the rehabilitation of the Secretary's facilities on Indian reservations, by agreements authorized by section 1000(a)(2) of Public Law 106–113, as amended, whereby the Secretary agrees to accept a payment in lieu of amounts otherwise due to the Secretary under this Act.

CHAPTER 5

BILATERAL ECONOMIC ASSISTANCE AGENCY FOR INTERNATIONAL DEVELOPMENT

CHILD SURVIVAL AND DISEASE PROGRAMS FUND (INCLUDING RECISSION)

For an additional amount for "Child Survival and Disease Programs Fund'', $500,000,000, to remain available until expended: Provided, That this amount may be made available, notwithstanding any other provisions of law, for United States contributions to a global trust fund to combat HIV/AIDS, malaria, and tuberculosis. Of the funds made available under this heading in the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2000 (as enacted into law by section 1000(a)(2) of Public Law 106–113), as amended, is hereby repealed, and the funds identified by such proviso shall be made available pursuant to the authority of section 526 of the Foreign Assistance Act of 1961 (as amended), to include $1,000,000,000 for the Global Fund to Fight AIDS, Tuberculosis and Malaria, as authorized by section 526 of the Foreign Assistance Act of 1961 (as further amended).

GENERAL PROVISION—THIS CHAPTER

SEC. 2501. The final proviso in section 526 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 2000 (as enacted into law by section 1000(a)(2) of Public Law 106–113), as amended, is hereby repealed, and the funds identified by such proviso shall be made available pursuant to the authority of section 526 of Public Law 106–113.

CHAPTER 6

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

(INCLUDING TRANSFERS OF FUNDS)

For an additional amount to address increased permitting responsibilities related to energy needs, $3,000,000, to remain available until expended, and to be derived by transfer from appropriated to unobligated balances of the American Lands Management Fund, the Department of the Interior for the acquisition of lands and interests in lands.
For an additional amount for “Capital Improvement and Maintenance” to repair damage caused by ice storms in the States of Arkansas and Oklahoma, $4,000,000, to remain available until expended.

GENERAL PROVISIONS—THIS CHAPTER

(INCLUDING TRANSFER OF FUNDS)

SEC. 2001. Pursuant to title VI of the Steens Mountain Cooperative Management and Protection Act, Public Law 106–399, the Bureau of Land Management may transfer such sums as are necessary to complete the individualized and exchanges identified under title VI from unobligated land acquisition balances.

SEC. 2003. Section 2 of Public Law 106–558 is amended by striking subsection (b) in its entirety and inserting in lieu thereof:

“(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of enactment of this Act.”

SEC. 2004. Federal Highway Administration emergency relief for Federally owned roads, made available to the Forest Service as Federal-aid highways funds, may be used to reimburse Forest Service for expenditures previously completed only to the extent that such expenditures would otherwise have qualified for the use of Federal-aid highways funds.

SEC. 2005. For providing any other provision of law, $2,000,000 provided to the Forest Service in Public Law 106–291 for the Region 10 Jobs in the Woods program shall be advanced as a direct lump sum payment to Ketchikan Public Utilities within thirty days of enactment: Provided, That such funds shall be used by Ketchikan Public Utilities specifically for hiring workers for the purpose of removing timber within the right-of-way for the Swan Lake-Lake Tyee Intertie.

SEC. 2006. Section 122(a) of Public Law 106–291 is amended by:

(1) inserting “hereafter” after “such amounts”; and

(2) striking “June 1, 2000” and inserting “June 1, 2001”.

SEC. 2008. SUDEN OAK DEATH SYNDROME. In addition to amounts transferred under section 442(a) of the Plant Protection Act (7 U.S.C. 7775d) the Secretary of Agriculture shall transfer to the Forest Service, pursuant to that section, an additional $1,400,000 to be used by appropriate offices within the Forest Service that carry out research and development activities to arrest, control, eradicate, and prevent the spread of Sudden Oak Death Syndrome, to be derived by transfer from the unobligated balance available to the Secretary of Agriculture for the acquisition of land and interests in land.

CHAPTER 7

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

TRAINING AND EMPLOYMENT SERVICES

(INCLUDING RESCISIONS)

For an additional amount to carry out chapter 1 of the Job Training Programs Act, $45,000,000 to be available for obligation for the period April 1, 2001 through June 30, 2002.

Of the funds made available under this heading—

(1) the aggregate amount specified for the Department of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106–558), $45,000,000 are rescinded; and

(2) the aggregate amount specified for the Department of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106–554), $217,500,000 available for obligation for the period July 1, 2001 through June 30, 2002 for Safe Schools/Healthy Students.

Of the funds made available under this heading—

(1) the aggregate amount specified for the Department of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106–554), for Dislocated Worker Employment and Training Activities, $217,500,000 available for obligation for the period July 1, 2001 through June 30, 2002 are rescinded: Provided, That, notwithstanding any other provision of law, the Secretary shall increase State allotments under section 132(b)(2)(A) of the Workforce Investment Act for program expenses exceeding balances, as determined by the Secretary, as of June 30, 2001, from those States determined to have excess unobligated balances: Provided further, That the rescission of funds under section 132(a)(2)(B) is effective at the time the Secretary re-allots excess unobligated balances to the States: Provided further, That the amount specified in this proviso for the redistribution of the State’s formula allotment under section 132(b)(2), shall equal, to the extent possible, the amount the State would have received on July 1, 2001 had no recision occurred.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH RESOURCES AND SERVICES ADMINISTRATION

HEALTH CARE SERVICES

The matter under this heading in the Department of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106–554) is amended by striking “$226,224,000” and inserting “$224,724,000”.

The provision for Northeastern Universities is amended by striking “$25,000,000” and inserting “$7,000,000”.

National Institutes of Health

(TRANSFER OF FUNDS)

Funds appropriated to the Office of the Director, National Institutes of Health, in fiscal year 2001 for the Office of Biomedical Imaging, Bioinformatics and Bioengineering are transferred to the National Institute of Biomedical Imaging and Bioengineering.

SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES ADMINISTRATION

SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES

For carrying out the Public Health Service Act with respect to mental health services, $6,500,000 for maintenance, repair, preservation, and protection of the Federally owned facilities, including the Civil War Cemetery, at St. Elizabeths Hospital, which shall remain available until expended.

ADMINISTRATION FOR CHILDREN AND FAMILIES

LOW INCOME HOME ENERGY ASSISTANCE

For an additional amount for “Low Income Home Energy Assistance” under section 2002(e) of the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 8621(e)), “$200,000,000, to remain available until expended: Provided, That these funds are for the home energy assistance needs under the grant program authorized by section 2604(e) of that Act and notwithstanding the designation requirement of section 2002(e) of such Act.”

DEPARTMENT OF EDUCATION

EQUITY REFORM

In the statement of the managers of the committee of conference accompanying H.R. 4577 (Public Law 106–554; House Report 106–1013), in title III of the explanatory language on H.R. 5656 (Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001), in the matter relating to the Education for the Disadvantaged Grants Act for the fiscal year 2001 under the heading “Education Reform”, the amount specified for the Appalachian Regional Commission is $10,000,000; and inserting in lieu thereof: “$139,853,000”.

An additional amount (to the corrected amount under this heading) for “Education for the Disadvantaged” to carry out part A of title II (including Technological Competencies Grants, etc.) of the Education for the Disadvantaged Act of 1965 in accordance with the eighth proviso under that heading, $61,000,000, which shall remain available until September 30, 2002.

IMPACT AID

Of the $12,802,000 available under the heading “Impact Aid” in the Department of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by Public Law 106–554) for construction under section 8007 of the Elementary and Secondary Education Act of 1965, $8,802,000 shall be used as directed in the first proviso under that heading, and the remaining $4,000,000 shall be distributed to eligible local educational agencies under section 8007, as such section was in effect on September 30, 2000.

SPECIAL EDUCATION

In the statement of the managers of the committee of conference accompanying H.R. 4577 (Public Law 106–554; House Report 106–1013), in title III of the explanatory language on H.R. 5656 (Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001), in the matter relating to the Fund for the Improvement of Education under the heading “Education Research, Statistics, and Improvement”:

(1) the aggregate amount specified shall be deemed to be $319,853,000; and

(2) the amount specified for the National Mentoring Partnership in Washington, DC for establishing the National Education Training and Technical Assistance Clearinghouse shall be deemed to be $461,000; and

(3) the provision specifying $1,275,000 for one-to-one computing shall be deemed to read as follows: “$1,275,000—NetSchools Corporation, to provide one-to-one e-learning pilot programs for
Deaver Elementary School in San Pablo, California, and the Haven Elementary School in East Menlo Park, California, East Rock Magnet School in New Haven, Connecticut, Reid Elementary School in Searchlight, Nevada, and McDermott Combined School in McDermott, Nevada.

G. GENERAL PROVISIONS—THIS CHAPTER

Sec. 2701. (a) Section 117 of the Carl D. Perkins Vocational and Technical Education Act of 1998 (20 U.S.C. 2237) is amended—

(1) in subsection (a), by inserting “that are not receiving Federal support under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)” after “institutions”; and

(2) in subsection (b), by adding “institutional support of” after “for”;

(3) in subsection (d), by inserting “that is not receiving Federal support under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)” after “institution”; and

(4) by adding at the end the following:

“(D) institutional support of vocational and technical education (as defined in section 397(11) of the Communications Act of 1934 (47 U.S.C. 397(11)) is an entity eligible in section 396 of the Communications Act to be appropriated to the Fund solely (notwithstanding any other provision of law) for basic support payments under section 3006(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7703(b)(3)(B)(iv)) (as amended by section (B) areas under-served by public broadcasting stations including for the support of digital transmission facilities and for the development, production, and distribution of digital programs and services.

(2) Any ‘public broadcasting entity’ as defined in section 397(11) of the Communications Act of 1934 (47 U.S.C. 397(11)) is an entity eligible to receive grants under this subsection.

(3) Proceeds of grants awarded under this subsection may be used for costs associated with the transition of public broadcasting stations including for the support of digital transmission facilities and for the development, production, and distribution of digital programs and services.

(4) The grants shall be distributed to the eligible entities in accordance with principles and criteria established by the Corporation in consultation with the public broadcasting licensees and officials of national organizations representing public broadcasting licensees. The principles and criteria shall include special priority for providing digital broadcast services to:

(A) rural or remote areas;

(B) areas under-served by public broadcasting stations; and

(C) areas where the conversion to, or establishment of primary digital public broadcasting service is made possible by an insufficient availability of private funding for that purpose by reason of the small size of the population or the low average income of the residents of the area.

(b) AUTHORIZATION OF APPROPRIATIONS.—

Subsection (b)(1) of section 396 of the Commu- nications Act of 1934 (47 U.S.C. 396) is amend- ed—

(1) by re-designating subparagraphs (D) and (E) as subparagraphs (E) and (F), respectively; and

(2) by inserting after subparagraph (C) the following new subparagraph (D):

“(D) In any additional amounts authorized under any other provision of this Act to be appropriated to the Fund, funds are hereby authorized to be appropriated to the Fund solely (notwithstanding any other provision of this subsection) for carrying out the pur- pose of subsection (n) as follows:

“(1) For fiscal year 2001, $20,000,000 to carry out the purposes of subsection (n);

“(2) For fiscal year 2002, such sums as may be necessary to carry out the purposes of subsection (n).

Sec. 2702. Impact Aid. (a) Learning Opportunity Threshold Payments—Section 8003(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7703(b)(3)(B)(iv)) (as amended by section (2) in subsection (b), by adding “institutional” and “d” after inserting “or” the average per-pupil expenditure of all the States” after “of the State in which” the agency is located”.

(b) Funding.—The Secretary of Education shall make payments under section 8003(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 from the Impact Aid authorizations of section 8003(a)(6) of the Department of Education Appropriations Act, 1999 to the following entities:

(1) in subsection (d), by inserting “that are not receiving Federal support under the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 et seq.) or the Navajo Community College Act (25 U.S.C. 640a et seq.)” after “institutions”; and

(2) by inserting after the second sentence the following:

“(n) In addition to any amounts authorized under any other provision of this Act to be appropriated to the Fund, funds are hereby authorized to be appropriated to the Fund solely (notwithstanding any other provision of this subsection) for carrying out the purposes of subsection (n) as follows:

“(1) For fiscal year 2001, $20,000,000 to carry out the purposes of subsection (n);

“(2) For fiscal year 2002, such sums as may be necessary to carry out the purposes of subsection (n).”;

Sec. 2703. Impact Aid. (a) Learning Opportunity Threshold Payments—Section 8003(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7703(b)(3)(B)(iv)) (as amended by section 1006(b)(2)(C) of the Impact Aid Reauthorization Act of 2000 (Public Law 106–358)) is amended by inserting “or other than the average per-pupil expenditure of all the States” after “of the State in which” the agency is located”.

(b) Funding.—The Secretary of Education shall make payments under section 8003(b)(3)(B)(iv) of the Elementary and Secondary Education Act of 1965 from the $882,000,000 available under the heading “Impact Aid” in title II of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2001 (as enacted into law by section 1 of Public Law 106–554) for basic support payments under section 8003(b)(3)(B)(iv).

CHAPTER 8
OFFICE OF COMPLIANCE
SALARIES AND EXPENSES
For an additional amount for “Salaries and Expenses”, $35,000.

GOVERNMENT PRINTING OFFICE
CONGRESSIONAL PRINTING AND BINDING
For an additional amount for “Congressional Printing and Binding”, $14,000,000.

GOVERNMENT PRINTING OFFICE REVOLVING FUND
For payment to the “Government Printing Office Revolving Fund”, $6,000,000, to remain available until expended, for air-conditioning and lighting systems.

G. GENERAL PROVISIONS—THIS CHAPTER
Sec. 2801. Section 101(a) of the Supplemental Appropriations Act, 1977 (2 U.S.C. 61h–6(a)) is amended—

(1) by inserting after the second sentence the following: “The President pro tempore emeritus of the Senate is authorized to appoint and fix the compensation of one individual consultant, on a temporary or intermittent basis, at a daily rate of compensation not in excess of that specified in the first sentence of this subsection;”.

(2) in the last sentence by inserting “President pro tempore emeritus,” after “President pro temp-”;

Sec. 2802. The Abraham Lincoln Bicentennial Commission Act, Public Law 106–173, February 25, 2000 is hereby amended in section 7 by striking subsection (e) and inserting the following:

“(e) ADMINISTRATIVE SUPPORT SERVICES.—Upon the request of the Commission, the Librar- ian of Congress shall provide to the Commission, on a reimbursable basis, administrative support services. The Commission shall carry out its responsibilities under this Act, including disbursing funds available to the Commission, and computing and disbursing the basic pay for Commission personnel.”;

Sec. 2803. Notwithstanding any limitation in 31 U.S.C. sec. 1553(b) and 1554, the Architect of the Capitol may use current year appropriations to provide for the support of personnel for the Office for prior year water and sewer services payments otherwise chargeable to closed accounts.

Sec. 2804. That notwithstanding any other provision of law, and specifically section 5(a) of the Employment Act of 1946 (15 U.S.C. 102(a)), the Members of the Senate to be appointed by the President of the Senate shall for the duration of the One Hundred Seventh Congress, be represented by six Members of the majority party and five Members of the minority party.

CHAPTER 9
DEPARTMENT OF TRANSPORTATION
OPERATING EXPENSES
For an additional amount for “Operating Expenses”, $92,000,000.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS
For an additional amount for “Acquisition, Construction, and Improvements”, $4,000,000, to remain available until expended, for the repair of Coast Guard facilities damaged during the Nisqually earthquake or for costs associated with moving the affected Coast Guard assets to an alternative site within Seattle, Washington.

FEDERAL AVIATION ADMINISTRATION
GRANTS-IN- AID FOR AIRPORTS
(AMERICAN AIRWAY TRUST FUND)
(RESCISSION OF CONTRACT AUTHORIZATION)
Of the unobligated balances authorized under 49 U.S.C. 48103, as amended, $39,000,000 are rescinded.

FEDERAL HIGHWAY ADMINISTRATION
EMERGENCY HIGHWAY RESTORATION
For the costs associated with the long term restoration or replacement of seismically-vulnerable highways recently damaged during the Nisqually earthquake, $15,000,000, to remain available until expended; Provided, That the amount made available under this heading, $3,000,000 shall be for the Alaskan Way Viaduct in Seattle, Washington and $9,000,000 shall be for the Magnolia Bridge in Seattle, Washington.

FEDERAL-AID HIGHWAYS
(HIGHWAY TRUST FUND)
(RESCISSION OF CONTRACT AUTHORIZATION)
Of the unobligated balances authorized under Public Law 100–17, $14,000,000 are rescinded.

ALASKA RAILROAD COMMISSION
To enable the Secretary of Transportation to make an additional grant to the Alaska Rail- road, $2,000,000 for a joint United States-Can- ada commission to study the feasibility of connect- ing the rail system in Alaska to the North American continental rail system.

G. GENERAL PROVISIONS—THIS CHAPTER
Sec. 2901. (a) Item 143 in the table under the heading “Capital Investment Grants” in title I of the Department of Transportation and Related Agencies Appropriations Act, 1999 (Public Law 105–277; 112 Stat. 2681–465) is amended by striking “Northern New Mexico park and ride facilities” and inserting “Northern New Mexico park and ride facilities and State of New Mexico, Buses and Bus-Related Facilities”.

(b) Item 167 in the table under the heading “Capital Investment Grants” in title I of the Department of Transportation and Related Agencies Appropriations Act, 2000 (Public Law 106–69; 113 Stat. 1006) is amended by striking “Northern New Mexico Transit Express/Park and Ride Facilities” and inserting “Northern New Mexico Transit Express/Park and Ride Facilities and State of New Mexico, Buses and Bus-Related Facilities”.

CONGRESSIONAL RECORD—SENATE 12953

July 11, 2001
SEC. 3003. DESIGNATION OF ENGINEERING AND MANAGEMENT BUILDING AT NORFOLK NAVAL SHIPYARD, VIRGINIA, AFTER NORMAN SISKIY. The engineering and management building (also known as Building 1500) at Norfolk Naval Shipyard, Portsmouth, Virginia, shall be known as the Norman Siskiyou Engineering and Management Building. Any reference to that building in any law, regulation, map, document, record, or other paper of the United States shall be considered a reference to the Norman Siskiyou Engineering and Management Building. This Act may be cited as the “Supplemental Appropriations Act, 2001”.

UNANIMOUS CONSENT AGREEMENT—H.R. 333

Mr. REID. Mr. President, I ask unanimous consent that the previously ordered debate with respect to the Nelson of Florida amendment No. 893 occur immediately following the vote on cloture on the motion to proceed to H.R. 333, the offering of the substitute amendment, and clamping of that amendment, as under the previous order; further, that no amendments be in order to the substitute amendment to H.R. 333 prior to the cloture vote on the substitute amendment. The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZING USE OF THE ROTUNDA OF THE CAPITOL

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 174 just received from the House.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 174) authorizing the Rotunda of the Capitol to be used on July 26, 2001, for a ceremony to present Congressional Gold Medals to the original 29 Navajo Code Talkers.

FEDERAL EMERGENCY MANAGEMENT AGENCY

HUMAN SPACE FLIGHT

Notwithstanding the proviso under the heading, “Human Space Flight”, in Public Law 106–74, $840,000 of the amount contained therein shall be available for preparations necessary to carry out future research supporting life and micro-gravity science and applications.

TITLE III—GENERAL PROVISIONS

SEC. 3003. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 3002. UNITED STATES—CHINA SECURITY REVIEW COMMISSION. There are hereby appropriated, out of any funds in the Treasury not otherwise appropriated, $1,700,000, to remain available until expended, to the United States—China Security Review Commission.

SEC. 3001. DESIGNATION OF ENGINEERING AND MANAGEMENT BUILDING AT NORFOLK NAVAL SHIPYARD, VIRGINIA, AFTER NORMAN SISKIY. The engineering and management building (also known as Building 1500) at Norfolk Naval Shipyard, Portsmouth, Virginia, shall be known as the Norman Siskiyou Engineering and Management Building. Any reference to that building in any law, regulation, map, document, record, or other paper of the United States shall be considered a reference to the Norman Siskiyou Engineering and Management Building. This Act may be cited as the “Supplemental Appropriations Act, 2001”.

CONGRESSIONAL RECORD—SENATE
There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations reported earlier today by the Government Affairs Committee:

Othonel Armendariz, to be a member of the Federal Labor Relations Authority;

Kay Coles James, to be the Director of the Office of Personnel Management;

that the nominations be confirmed, the motions to reconsider be laid upon the table; that any statements thereon appear at the appropriate place in the RECORD, and that the President be immediately notified of the Senate’s action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

OFFICE OF PERSONNEL MANAGEMENT

Kay Coles James, of Virginia, to be Director of the Office of Personnel Management;

FEDERAL LABOR RELATIONS AUTHORITY

Othonel Armendariz, of Texas, to be a Member of the Federal Labor Relations Authority for a term of five years expiring July 1, 2005.

EXECUTIVE SESSION

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Nos. 182 through 205 and all nominations on the Secretary’s desk; that any statements therein be printed at the appropriate place in the RECORD; that any motions to reconsider be laid upon the table; the President be immediately notified of the Senate’s action, and the Senate adjourn to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

DEPARTMENT OF STATE

Pierre-Richard Prosper, of California, to be Ambassador at Large for War Crimes Issues, to a term of five years; that the Senate vote at a time to be determined by the majority leader, may turn to the consideration of Executive Calendar No. 104, the nomination of John Graham to be the Administrator of the Office of Regulatory Affairs at OMB and that it be considered under the following time limitation:

One hour under the control of Senator LIEBERMAN, 3 hours under the control of Senator THOMPSON, 2 hours under the control of Senator DURBIN, 2 hours under the control of Senator WELLSTONE, 15 minutes under the control of Senator KERRY; that upon the use or yielding back of the time, the Senate vote at a time to be determined by the two leaders on the nomination; that upon the disposition of the nomination, the President be immediately notified of the Senate’s action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY, JULY 12, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9 o’clock a.m., on Thursday, July 12. I further ask consent that on Thursday immediately following the prayer and the pledge, the Senate resume consideration of the bankruptcy bill, the Senate resume consideration of the motion to proceed to H.R. 333, the House Bankruptcy Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, on Thursday, the Senate will convene at 9 a.m. and resume consideration of the motion to proceed to the House Bankruptcy Reform Act, with 3 hours for debate prior to a cloture vote on the motion to proceed.

Following consideration of the bankruptcy act on Thursday, the Senate will resume consideration of the integrations bill and the vote in relation to Nelson of Florida amendment No. 893.

At 11:30 a.m., the Senate will swear in the new Secretary of the Senate, Jeri Thomson.

ORDER FOR ADJOURNMENT

Mr. REID. Mr. President, I ask unanimous consent that following the remarks of Senator MURRAY and Senator
CANTWELL, who will be recognized to speak on matters of importance to them and the States and the country, the Senate stand in adjournment under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, the majority leader has indicated that he wants us to notify people in case we were not able to finish tomorrow.

The PRESIDING OFFICER. Under the previous order, the Senator from Washington is recognized.

LOSS OF FOUR WASHINGTON FIREFIGHTERS

Mrs. MURRAY. Mr. President, I come to the Senate Chamber this evening to join my colleague, Senator MARIA CANTWELL, in acknowledging four young Americans who lost their lives in service to our country last evening.

Like many Americans, this morning I awoke to the very tragic news that four firefighters had died while battling a wildfire in Okanogan County. A tragedy of this magnitude is felt throughout Washington state, but should also be recognized and mourned by a grateful nation.

This is the nation’s deadliest wildfire since 1994. On behalf of the citizens of Washington State, I extend my deepest sympathies to the families of the four brave men and women who gave their lives to protect their neighbors. Squad Leader Tom Craven of Ellensburg, Devin Weaver of Yakima, Jessica Johnson of Yakima, and Karen Fitzpatrick of Yakima gave their lives to keep us safe. Today, we mourn their loss.

Mr. President, I also want to wish a speedy recovery to the other firefighters who were injured while battling the problem.

I want to thank the firefighters in Washington State—and across the country—for the work they do to protect us. We owe them a debt of gratitude.

Today, we owe four families our condolences and our thanks for their sacrifice. I yield to Senator CANTWELL from Washington State.

The PRESIDING OFFICER. The Senator from Washington is recognized. Ms. CANTWELL. Mr. President, it is with a heavy heart that I come to the floor today after learning of the tragic deaths of four firefighters in the Wenatchee National Forest in Washington State. These courageous firefighters died yesterday battling a wildfire in Okanogan County. A tragedy of this magnitude is felt throughout Washington state, but should also be recognized and mourned by a grateful nation.

This is the nation’s deadliest wildfire since 1994. On behalf of the citizens of Washington State, I extend my deepest sympathies to the families of the four brave men and women who gave their lives to protect their neighbors. Squad Leader Tom Craven of Ellensburg, Devin Weaver of Yakima, Jessica Johnson of Yakima, and Karen Fitzpatrick of Yakima gave their lives to keep us safe. Today, we mourn their loss.

As Senator MURRAY pointed out, this tragedy reminds us that we often take for granted the men and women who routinely put their lives on the line to protect us. Every state in the nation has experienced the loss of people involved in fighting wildfires. I hope the families and friends of these brave firefighters know that the courage and sacrifice of their loved ones will not be forgotten and that our sympathies reach out to their families. I also want to recognize the hard work of those firefighters who are still fighting; to those who are injured, I also wish them a speedy recovery. The firefighters of the U.S. Forest Service come from all over the country. They have been battling fires for years. This year alone, 300 firefighting personnel are available on the Okanogan and Wenatchee National Forests. These firefighters work year after year in service to their country with little recognition.

On behalf of the residents of Washington State and the Nation, I thank them for their hard work and their dedication under very trying circumstances. We all remember the sacrifice that each and every one of you have made.

Mrs. MURRAY. Mr. President, I suggest the absence of a quorum.
I am also pleased to see as part of this order that the Attorney General has enhanced whistleblower protection for FBI employees who complain with protected disclosures. As an author of legislation that is on the books now for whistleblower protection, the last time we enhanced the protection for whistleblowers there was just enough sympathy—within this body for the FBI that somehow the FBI could have a separate set of regulations just for whistleblowers within the FBI. As a result, whistleblowers within the FBI have not had the same amount of protection that whistleblowers in any other agency of the Federal Government might have. So this will also help in that direction. I thank the Attorney General for that.

Today, then, following up on this action of the Attorney General, I have forwarded a letter to Attorney General Ashcroft, commending him on these steps, and also request that his office provide me with additional details regarding how the various investigative and audit entities within the Department of Justice, the FBI, and the DEA are to be administered and organized.

Earlier this week, I had the opportunity to meet with FBI Director nominee Robert Mueller. I discussed with Robert Mueller several concerns that I have with how the Bureau has been managed over the past several years. I also discussed with Mr. Mueller my views on the type of leadership that I think the FBI needs.

We have a once-every-10-year opportunity to find someone who can fix the problems inherent in the management culture at the Bureau because that appointment comes up for a 10-year length of time. I want to make sure, during this once-in-a-10-year opportunity, Mr. Mueller understands my concerns.

Part of our discussion concerned the need for strengthening FBI oversight, both on the part of the executive branch, along the lines of what I have been saying about the inspector general, but also from the Congress—oversight, constitutional oversight over the executive branch agencies.

Without asking Mr. Mueller to comment pending legislation, I mentioned to Mr. Mueller I am working on a bill to permanently extend by statute the jurisdiction that was given today by the Attorney General to the Department of Justice inspector general, so that some future Attorney General cannot put impediments in the way of the inspector general investigating things within the FBI. I encourage Mr. Mueller, should he be confirmed, to make it a priority to ensure that he and the FBI will cooperate fully with whatever oversight entity is in place.

I also discussed with Mr. Mueller the need for increased whistleblower protection for FBI employees. Over the years the FBI has been notorious for retaliating against those who would expose the types of waste, fraud, and abuse in cases that have now become synonymous with a culture of arrogance within the FBI. These are cases such as Ruby Ridge, Waco, the TWA-800 investigation, the FBI crime lab investigation, Wen Ho Lee, Robert Hanssen, and most recently the Oklahoma bombing investigation in the McVeigh case.

I will be introducing legislation that will provide statutory protection for FBI whistleblowers to overcome the shortcomings of the legislation that was signed by President Bush in 1989. Those exemptions that were made from the FBI need to be taken out so the whistleblowers in the FBI have the same protections as whistleblowers in any other agency of Government. I hope the new Director will not only support this important reform but will work to ensure these important reforms are communicated clearly throughout the FBI.

I believe that in order to regain the trust and confidence of the American people, the FBI must be open and fully responsive to differing points of view within its own ranks. More importantly, employees must be able to present these opinions in an atmosphere that is free of retaliation that happens so often against people whom we call whistleblowers.

Basically, within any organization there is a great deal of peer pressure to go along to get along. But that peer pressure also has the capability of covering up wrongdoing and bad administration. That is why the process of people telling the truth and coming out in the open is so important.

Without this freedom, the FBI will continue to suppress and marginalize those who speak out, and things will go wrong and hard for so long. That is not good. That is what has brought about a culture of arrogance—of believing within the FBI that the FBI can do no wrong.

Perhaps the greatest example of this type of retaliation against a whistleblower occurred in an investigation I made involving a whistleblower by the name of Dr. Fred Whitehurst. You may remember that when Dr. Whitehurst came forward with proof of abusive practices at the FBI crime lab, he was shamelessly discredited by senior FBI officials. An inspector general investigation—after going through all of those hoops I talked about—later supported the assertions made by Dr. Whitehurst and called back his good name. Dr. Whitehurst won a settlement that ended up costing the American taxpayers $1 million.

There is something wrong when a whistleblower comes forward and he is not listened to, and he has to sue, and it costs the taxpayers $1 million to settle. He should have been listened to in the first instance.

We want to encourage an environment within all government agencies, and particularly that FBI, where wrongdoing is not covered up; that people who whistleblow aren’t treated like a skunk at a picnic on a Sunday afternoon, that they are held up as somebody who ought to be honored rather than somebody who ought to be suppressed.

I want to make sure to mention that the comments I make about the FBI today, though, should in no way minimize the great sacrifices made every day by hard-working FBI agents and support personnel. These men and women serve their nation proudly. They deserve an organization that has integrity and credibility.

The FBI management system is broken. This does a real disservice to the hard-working agents on the street. When the FBI does what they are set up to do—to seek the truth and let the truth convict—they do their job right. But when there is an effort to cover up wrongdoing, then the FBI and people are more concerned about the headlines and the public relations of the organization as opposed to the fundamentals of law enforcement—that is, these cases and a lot of others I have already listed—that is when their agency gets in trouble and loses credit.

In regard to these agents who do their work and do it right and because of this management culture that must be changed by the new Director, I have asked the Attorney General to provide me with information regarding the extent to which the new FBI Director will be able to institute the department-wide reforms and to make staffing changes, including changes at the senior staff and management level.

I believe that a new FBI Director will only have a certain period of time—maybe a couple of months—in which he can bring about real change. In order for the new Director to do that, in that time, he must be afforded maximum flexibility for staffing and policy setting.

I also agree that we have not done enough in Congress. I am not putting the blame just on the Department of Justice and the FBI. We have a constitutional responsibility of oversight. We spend all of our time legislating, giving speeches, passing laws, voting, and offering amendments. That is what most people think being a Congress-man is all about. But also, once laws are passed, the checks and balances of our Constitution require that we do our constitutional job of oversight; that is, to make sure that the laws that we have executed and that money spent appropriated by Congress is spent within the intent of Congress and that the law is enforced within the intent of Congress, Congress does not do a good enough job. For too long we have seen mishap after mishap occur, with the end result being more money and more jurisdiction for the FBI. The Director of the
FBI comes up to Capitol Hill, everybody sees the Director of FBI, and they just melt. The Director of the FBI says a couple of mea culpas and walks out of here with a nice pat on the back, and probably a bigger appropriation. That is not oversight. That is just business as usual. One way this can be improved is through the creation of a subcommittee within the Committee on the Judiciary that would be directly responsible for FBI oversight.

We need to help the FBI change the kind of culture that places image and publicity before basics and fundamentals. We need to help the FBI change the kind of culture that holds press conferences in high-profile cases before the investigation is complete and all the facts are in, and when all the facts are in, then the FBI has egg on its face.

Yes, the American people deserve the kind of agency that won't make the kind of mistakes the FBI has made in the Wen Ho Lee and the Atlantic Olympic bombing case, and the Waco case and the Ruby Ridge case. But, more importantly, the American people deserve an agency that is honest and forthright about their errors; in other words, very transparent.

As one of our Supreme Court Justices said 80 or 100 years ago, the best dispensation is sunshine. Let the Sun shine in and there won't be mold. That is transparency. That is the way the American Government ought to operate.

I look forward to getting down to the business of helping the FBI and its next Director regain the trust and confidence of the American people.

I yield the floor. I thank the Presiding Officer for waiting for me to speak tonight.
The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. COOKSEY).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The Speaker pro tempore laid before the House the following communication from the Speaker:

I hereby appoint the Honorable JOHN COOKSEY to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Reverend Tommy Nelson, Pastor, Denton Bible Church, Denton, Texas, offered the following prayer:

Our Father, You have made us as You have made all things. You have established the nations and their boundaries. You have ordained their leaders, their authority and the absolutes by which they rule. To You, who are the foundation of justice, of love and equality, we ask Your sovereign mercy.

Grant these men and women, whom You have vested, the wisdom to perceive Your pleasure, the skill to implement it, the courage to stand by the right, and the consistency and the integrity of life to merit the trust of this Nation, who has looked unto them. Encourage them and surround their families and marriages with Your blessing and help and truth.

Have mercy on this Nation through them, to walk in Thy way and know Thy peace.

In Thy Holy and Merciful Name we pray. Amen.

THE JOURNAL

The Speaker pro tempore. The Chair has examined the Journal of the last day’s proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. MCNULTY. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker’s approval of the Journal.

The Speaker pro tempore. The question is on the Speaker’s approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MCNULTY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The Speaker pro tempore. Pursuant to clause 8, rule XX, further proceedings on this question will be postponed.

The point of no quorum is considered withdrawn.

PLEDGE OF ALLEGIANCE

The Speaker pro tempore. Will the gentleman from Oregon (Mr. WU) come forward and lead the House in the Pledge of Allegiance.

Mr. WU led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 1. An act to close the achievement gap with accountability, flexibility, and choice, so that no child is left behind. H.R. 2216. An act making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 1) “An Act to close the achievement gap with accountability, flexibility, and choice, so that no child is left behind”, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. KENNEDY, Mr. DODD, Mr. HARKIN, Ms. MUKULA, Mr. JEFFORDS, Mr. BINGAMAN, Mr. WELLSTONE, Mrs. MURRAY, Mr. REED, Mr. EDWARDS, Mrs. CLINTON, Mr. LIEBERMAN, Mr. BAYH, Mr. GREGG, Mr. FRIST, Mr. ENZI, Mr. HUTCHISON, Mr. WARNER, Mr. BOND, Mr. ROBERTS, Ms. COLLINS, Mr. SENSIONS, Mr. DeWINE, Mr. ALLARD, and Mr. ENSIGN, to be the conference on the part of the Senate.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 2216) “An Act making supplemental appropriations for the fiscal year ending September 30, 2001, and for other purposes”, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD, Mr. ENOYE, Mr. HOLLINGS, Mr. STEVENS, and Mr. COCHRAN, to be the conference on the part of the Senate.

WELCOMING THE REVEREND TOMMY NELSON, PASTOR, DENTON BIBLE CHURCH, DENTON, TEXAS

Mr. THORNBERY. Mr. Speaker, on behalf of the gentleman from Texas (Mr. ARMEND), the majority leader, and my colleague the gentleman from Texas (Mr. HALL), it is my privilege to welcome as our guest chaplain today Tom Nelson, the Senior Pastor of Denton Bible Church in Denton, Texas. Tom was born and raised in Waco and grew up in a family of four boys. He attended what is now the University of North Texas in Denton, where he played quarterback for the football team and earned his degree in 1973. From there, he attended Dallas Seminary.

Tom has been pastoring at Denton Bible Church for 23 years. With over 4,000 members, Denton Bible Church is the largest church in Denton. Beside the four services he leads each Sunday, Tom disciples over 20 young men and teaches two men’s Bible studies.

In addition, Tom has served as a national speaker for the Fellowship of Christian Athletes, Campus Crusade for Christ, and Navigators. He is the author of two books and three video series. His taped messages have been heard throughout the world. Tom and his wife Teresa have two sons, Benjamin and John Clark.

Once again, Mr. Speaker, it is my privilege to welcome Tom Nelson to the Congress of the United States. I would like to thank him for his leadership in the community of Denton and express my appreciation for his leading the House today in prayer.

SUPPORT FLETCHER-PETERSON BALANCED PATIENTS’ BILL OF RIGHTS

Mr. GIBBONS. Mr. Speaker, today I rise to express my strong support for a meaningful and responsible Patients’ Bill of Rights recently introduced by my colleagues and friends, the gentleman from Kentucky (Mr. FLETCHER)
and the gentleman from Minnesota (Mr. Peterson).

We have been debating this issue for years, and it is time to give Americans what they need and what they deserve. This bill ensures that Americans will have access to medical care, including pediatric services, OB–GYN, specialists and emergency care. It further provides accountability by assuring those who make medical decisions which result in an injury are held responsible for their actions.

And this bill assures Americans can count on affordable health care. After all, what good is a Patients’ Bill of Rights if millions of more Americans are unable to afford health care?

I call upon everyone in this Chamber to support the Fletcher-Peterson bill. It is a balanced Patients’ Bill of Rights, which ensures that medical decisions are made by doctors and patients, and not by HMO gatekeepers or lawyers.

APPROVE FEDERAL FUNDING OF STEM CELL RESEARCH

(Ms. Eshoo asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ESHOO. Mr. Speaker, I was recently visited in my office here in Washington by two of my young constituents, Mary Lucas, 9 years old, and Kelsey Kagle, 15. They both have juvenile diabetes.

Mary Lucas, the 9-year-old, said something to me that has remained with me and I think always will. She told me that if we found a vaccine or a cure for diabetes, and if there was enough for everyone, she would give up her share to someone who needed it more than her. Her unselfish words, I think, are instructive to us.

How will we cure juvenile diabetes? One promising method is by investing in stem cell research, which has the potential to cure diseases that afflict tens of millions of Americans today, diseases like cancer, Alzheimer’s and Parkinson’s.

According to a recent article in the New York Times, a study by the NIH sites the dazzling array of treatments that may result from research on both embryonic and adult stem cells. The report makes clear that embryonic stem cells are clearly superior to adult stem cells for stem cell research.

Most Americans understand that stem cell research is not about destroying lives, but prolonging and bringing quality to and curing American lives today. So let us get this out of political science and keep it in the hands of the real scientists that understand this, and let us take a giant step, Mr. President, and allow Federal funding for stem cell research.

WALK FAR FOR NATIONAL ALLIANCE FOR AUTISM RESEARCH

(Ms. Ros-Lehtinen asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, these posters portray two beautiful, happy children, Bonnie and Willis Flick. While these pictures do not portray is that Bonnie and Willis cannot effectively communicate with their parents or their playmates because they live with autism.

In recent years autism has risen dramatically across our Nation, and although it typically affects 1 in every 500 children, in my hometown of Miami-Dade County, the rate of autism in young children has jumped to about 1 in every 256.

On Saturday, November 3, I will participate in Walk Far for NAAR, the National Alliance for Autism Research. This will raise funds for research projects and fellowships to fight this devastating disorder.

I ask my colleagues to join me in congratulating the chair of this year’s walkathon, Patricia Cambo, and the co-chairs, Rene Vega and Dr. Michael Alessandri, as well as last year’s co-chairs, Michelle Cruz and Marie Irene Whitehurst.

Due to the success of Walk Far, the National Alliance for Autism Research more than doubled its level of funding for this year, and we hold promise that a cure for autism is just around the bend for Bonnie and Willis Flick and many other children with autism.

SUPPORT USE OF FEDERAL FUNDS FOR STEM CELL RESEARCH

(Ms. DeGette asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DEGETTE. Mr. Speaker, why should we use Federal money for embryonic stem cell research? While it is a difficult medical-ethical decision to make sure we put controls in place, embryonic stem cell research promises new breakthroughs in science that will help literally tens of millions of Americans.

There are three reasons why we need to make sure this research is federally funded and federally supervised.

First, medical breakthroughs of underestimated value are available through funding of this research. A large body of successful work with mouse embryonic stem cells shows these cells are superior to adult stem cells in the development of what may be cures for diabetes, Parkinson’s disease, Alzheimer’s and other chronic diseases.

Second, Federal funding provide necessary oversight of stem cell research. This is the new frontier, and we need to make sure we keep control of it.

Finally, America has the greatest health, medical and science community in the world. Federal funding will help U.S. scientists keep pace with international researchers. We need to find the cure for diabetes, we need to find the cure for Parkinson’s, for Alzheimer’s and so many other diseases.

Let us keep this research going.

FUND ADULT STEM CELL RESEARCH GENEROUSLY

(Mr. Pitts asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, we must have stem cell research. Alzheimer’s, Parkinson’s and diabetes, these are all very serious diseases that have no cures. But our research must be ethical. Adult stem cell research holds the most promise for finding cures.

We should fund adult stem cell research, and fund it now, not embryonic stem cell research. Creating human embryos for research, experimentation, harvesting and destruction is not ethical. Killing one human life, even though very tiny, on the off chance of maybe one day saving another, is not ethical, moral, and I should add, even legal to do with taxpayer money.

Since 1996, our laws ban government funding of research that involves killing human embryos. We should keep that ban. Now we have a study that shows that embryonic stem cells may be too unstable to be of much use any- way, unless they are produced in huge numbers. But there is no such evidence that adult stem cells also involves killing human embryos. We should keep that ban.

Adult stem cell research holds great promise. Adult stem cell research promises to help us find cures to diseases that have plagued mankind for centuries. Let us fund adult stem cell research, and fund it generously.

China does not deserve to host 2008 Olympic games

(Mr. Traficant asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, China has executed 1,781 citizens in the last 90 days. That is more executions than the entire world performed over the last 3 years. China is now even executing citizens for pimping and prostitution. It is getting so bad that Chinese citizens, Chinese lovers, in fact, are afraid to kiss in public. Meanwhile, China says it is necessary to ensure “social stability.”

Now, if that is not enough to power surge your electric chair, China is in line to host the 2008 Olympic games.

Beam me up. The Olympic games are designed to be a celebration of life, not death. China does not deserve to host these games.
I yield back the human rights abuses, the death and dying at the hand of Communist Chinese dictators.

GOVERNMENT SPENDING CAUSES DEFICIT SPENDING

(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, Washington is out of touch with the real world again. Tax relief does not cause deficit spending, as we hear; spending causes deficit spending.

Washington spends every dime we send up here. That is the reason why this Congress stopped deficit spending in America. That is why this Congress stopped 40 years of dipping into the Social Security and Medicare Trust Funds, and that is why this Congress has started to pay down a good amount of the national public debt. Mr. Speaker, make no mistake. The very reason we sent money back home to the people is because we will spend every dime of it.

Look what we spend. Let us talk about the outhouse, the $1 million, two-seater outhouse that our National Parks and Wildlife built a year ago. Let us talk about the salmon. We spend $5 billion a year helping salmon swim upstream to their spawning grounds. We could put each fish in a first-class ticket seat and fly them to the top of the river each year and still save money. We have enough dollars for the priorities of America. What we do not have is enough for the priorities of silliness. Tax relief does not cause deficit spending; spending causes deficit spending.

STEM CELL RESEARCH IS PRO–LIFE

(Ms. HARMAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. HARMAN. Mr. Speaker, I rise today to urge strong support in Congress and the administration for a vital field of medical research. Federal funding for embryonic stem cell research should not be caught up in the abortion debate. As many antichoice proponents have courageously noted, stem cell research is pro-life. It will save lives, not take them.

Let me review what we know about stem cell research.

First, research using embryonic stem cells is helping us understand and treat not just Parkinson’s disease, spinal cord injuries, and Alzheimer’s, but possibly heart disease, arthritis and cancer.

Second, stem cell research is going on today and should be subject to Federal guidelines. Research of the type described in the lead story in today’s Washington Post is not permitted under NIH’s ethical standards.

Third, adult stem cells are not able to develop into as many kinds of tissue as embryonic cells.

Fourth, the embryos used in stem cell research would otherwise be destroyed by fertility clinics.

Mr. Speaker, if the embryos used in this research are simply discarded, we discard with them the hope of patients across the country and the promise of a new generation of medical cures.

HYDROPOWER FOR CLEAN AND SAFE ENERGY

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, we in this House will be marking up an energy policy this week, and part of this policy will include hydropower. Hydropower provides a clean and safe source of energy. Hydropower is the fourth largest source of total generation, making it an important part of America’s energy supply mix. In addition to providing sustainable power at a low cost, hydropower production has significant environmental benefits. Hydropower production has no emissions. Every kilowatt of power that is produced from hydropower reduces the need to burn oil and coal to produce the same amount of energy.

I am pleased that the Republican energy package will include elements to assure that we maximize the potential of our existing hydropower facilities. While we work to implement policies and strategies to conserve energy, we must also work to increase energy supply to keep pace with growing demand. Mr. Speaker, I believe that maximizing the benefits of our hydropower resources is an important part of meeting that challenge.

CHOOSING TO BE RELEVANT TO SCIENCE

(Mr. WU asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WU. Mr. Speaker, stem cell research offers the prospect for cures for diseases such as diabetes, Alzheimer’s, and Parkinson’s disease. It is a development of such great historic significance that I want to hearken back to another era when science was under threat from a theocracy.

About 400 years ago, Galileo Galileo was forced to recant the evidence of his eyes that the moons and the planets revolved around other than the sun. But even as the theocracy forced Galileo to recant his views, he was heard to mutter, “But the planets do move.”

Mr. Speaker, just as the planets move, stem cell research will go forward. The only question is whether it goes forward in this country or in foreign countries; with government support or without government support; subject to NIH guidelines or subject to no ethical guidelines whatsoever.

Our choice here is not about stem cell research or not. Just as a theocracy can prevent the planets from moving, no theocracy can prevent stem cell research from going on. The only choice is whether we choose to be relevant to science.

AMERICA IS A NATION OF THE PEOPLE, BY THE PEOPLE, AND FOR THE PEOPLE

(Mr. SAM JOHNSON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSON. Mr. Speaker, do my colleagues know what? Our taxes were lowered on July 1. That means we will take home more of our own money. We can thank President Bush for that.

When I was home in Texas over July 4, I met Kris and Melissa Kelly who are constituents of mine, and I asked them, what are you going to do with that tax refund? They said they are going to put a down payment on a brand-new minivan for their family. Is that not what America is all about?

Instead of allowing the Federal Government to keep our hard-earned money, creating new and expensive government programs, we gave the people their own money back so they can buy the things they need. So I salute President Bush for all he has done for the hard-working people of this great Nation. America really is a Nation of the people, by the people, for the people.

STEM CELL RESEARCH

(Mr. EVANS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS. Mr. Speaker, there should really be no debate about stem cell research, given the immense promise that it holds for a number of diseases. This is an issue that is of paramount importance to millions of Americans who stand to benefit from this groundbreaking research. I know, because I am one of them. I suffer from Parkinson’s disease.

This debate is being mired down in the politics of abortion, but it has nothing to do with abortion. This is an issue of medicine. Stem cells are never derived from an embryo that a woman intends to be implanted into her womb, nor are embryos ever created for their
CONGRESSIONAL RECORD—HOUSE
July 11, 2001

use in stem cell research. Researchers only use embryos which were scheduled to be discarded.

Clearly, these embryos can be put to better use. The scientific promise of embryonic stem cells offers hope that simply did not exist a few years ago. We cannot afford to literally throw away such potential. Every day that we continue research brings with it astonishing possibilities for enhanced treatments and cures for now-irreversible diseases and injuries.

Let us come together as a body in support of stem cell research.

SUPPORT ETHICAL AND RESPONSIBLE STEM CELL RESEARCH

(Mr. RYUN of Kansas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYUN of Kansas. Mr. Speaker, I rise in support of ethical stem cell research and in opposition to the destruction of human life. I firmly believe we have a responsibility to respect and protect life at every stage. The issue we face is not whether we allow this research. Both the ethical adult stem cell research that I support and the controversial embryonic research will continue on.

However, we must now decide if we are going to force taxpayers to fund this controversial embryonic research. Allocating Federal dollars for research that retires destruction of human embryos would require many Americans to fund something that they morally oppose. I urge the President and my colleagues to join me in supporting responsible and ethical stem cell research and standing for what is right and moving ahead with this research.

JULIAN C. DIXON POST OFFICE

(Ms. WATSON of California asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WATSON of California. Mr. Speaker, on December 8, 2000, Julian Dixon, a Member of Congress, died of a heart attack at age 66. On that day, California lost an experienced leader, and Dixon lost a tireless advocate. But the loss of Julian Dixon was felt the hardest in the 32nd Congressional District of California where Angelenos lost a beloved friend and neighbor.

Yesterday, I introduced a bill to rename a post office in the 32nd district as the "Congressman Julian C. Dixon Post Office." This one small effort pales in comparison to the years of dedicated service Julian provided to his community.

But as a friend and a school chum of Julian Dixon, I know that my neighbors in the 32nd Congressional District would be proud to have Julian remembered in this way. What an appropriate way to honor him, since he was well known for corresponding with his constituents by mail.

Mr. Speaker, I ask the entire California delegation, as well as any other Member, to join me in cosponsoring this piece of legislation.

FROZEN EMBRYOS ARE BEING ADOPTED

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, Hannah is a happy 2½-year-old little girl. She is a normal, healthy toddler discovering the joys of life. In a few days I hope to meet Hannah and when I do, I will reassure her that there is no such thing as a "spare" or "leftover" person.

Although she may not yet understand what that means, her parents sure do. They understand perfectly, because little Hannah used to be a frozen embryo in an invitro fertilization clinic. She was what those who support embryonic stem cell research—research that destroys human embryos—callously call "spare" and "leftover" embryos.

But Hannah is neither "spare" nor "leftover," despite the fact that she spent a considerable amount of time in a deep-freezer that served as her frozen orphanage. The perky toddler could have been fodder for researchers, but instead today is talking a blue streak, and in a few years will go to school.

Mr. Speaker, the story of Hannah and other adopted embryos underscores why we should not spend Federal tax dollars to destroy human embryos to steal their precious stem cells. These stem cells are not ours to take. And given the discoveries from adult stem cell research, which does not rely on destroying human embryos, arguments for federally funding embryonic stem cells is less persuasive than ever.

PUT POLITICS ASIDE AND SUPPORT STEM CELL RESEARCH

(Ms. WOOLSEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WOOLSEY. Mr. Speaker, I rise today in support of stem cell research. It is time for people on all points of the political spectrum to come together, support efforts to make stem cell research safe, legal and ethical. Stem cell research has the potential to unlock the door to medical knowledge for a host of diseases. We cannot allow America's health to be held hostage to politics, while medical research stagnates.

For people suffering from Alzheimer's or Parkinson's, or for those who have loved ones with these diseases, including cancer and juvenile diabetes, stem cell research represents hope for a cure. Yet by banning this research, either adult or embryonic research, we foreclose the possibility of improving or saving many, many lives. And who will pay the price? A mother fighting Parkinson's or a child battling juvenile diabetes. That is why I strongly urge my colleagues to put politics aside, support the promising scientific research of stem cell research.

RESEARCH MONEY SHOULD GO TOWARD ADULT STEM CELL RESEARCH

(Mr. WELDON of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WELDON of Florida. Mr. Speaker, prior to coming to the United States Congress, I practiced internal medicine for 15 years, including treating many patients with diabetes, Alzheimer's disease, and Parkinson's disease. For that reason, I was very interested in this issue of stem cell research.

I have reviewed the medical literature on this issue. Today, most of the people advocating for the use of embryonic stem cells are bench researchers who like to use them because they tend to proliferate very nicely in the U.S. culture. That very same property makes them very problematic in using them in clinical applications.

There is today the use of adult stem cells in treating diseases. There is no use of embryonic stem cells in treating any diseases. Indeed, there is not even an animal model where we can take a rat with a disease and treat it with an embryonic stem cell.

Using embryonic stem cells in clinical applications is very problematic for the very same reason that the bench researchers like to use it, the cells tend to proliferate and behave like malignancies. It is not only ethical to use adult stem cells, it makes the most sense, and it is where the research money should be going.

EMBRYONIC STEM CELL RESEARCH IS A MEDICAL ISSUE

(Ms. SCHAKOWSKY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SCHAKOWSKY. Mr. Speaker, the issue of embryonic stem cell research has been misrepresented as one of abortion. It is not an abortion issue. Stem cell research is a medical issue, one that should transcend political lines and instead focus on human lives.

One such life is that of Carolyn Laughlin, a mother of two diabetic
sons in my hometown of Evanston, Illinois, who wrote me this past April to share her family’s struggle and urge me to support federally-funded stem cell research.

She said, “Diabetes haunts my family every waking hour. Injections, blood testing, calculating food portions are constant companions of my sons. Overnight, I fear insulin reactions that will leave them unconscious. Long-term we face the concerns of kidney failure, blindness, and amputations."

Most scientists are in agreement that embryonic cell research offers the greatest hope for families like the Laughlins. Federal funding guidelines assure that research will meet ethical standards and allow advancements to be made as quickly as possible in diseases like Parkinson’s and Alzheimer’s, cancer, heart disease, spinal cord injury.

The Laughlins and millions of other families are counting on us.

ETHICAL STEM CELL RESEARCH
USES ADULT STEM CELLS

(Mr. LEWIS of Kentucky asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Kentucky. Mr. Speaker, I rise today in strong support of ethical stem cell research that uses adult stem cells instead of embryonic stem cells. Life begins at conception, and the use of embryos for research destroys young life.

I support the use of adult stem cells, not just because no young lives are lost, but also because research using adult stem cells has already produced exciting results. Large Scale Biology Corporation, a biotechnology company in the Second District of Kentucky, has produced a growth factor using tobacco-based plant proteins that causes adult stem cells to behave like embryonic stem cells.

Using their patented method, Large Scale Biology Corporation has successfully produced breast cancer and leukemia vaccines in conjunction with a joint Navy-NIH research team.

We all want to see diseases like cancer and Alzheimer’s cured, so let us support a proven alternative that we can all agree on and is not controversial. I urge my colleagues and President Bush to support funding for adult stem cell research and oppose life-destroying embryonic stem cell research.

WE MUST ALLOW FEDERAL FUNDING FOR LIFE-SAVING EMBRYONIC STEM CELL RESEARCH

(Mr. McDERMOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDERMOTT. Mr. Speaker, throughout time people have resisted scientific advancement. History is replete with the examples of fundamentalist religious leaders issuing scientific decisions based on absolutely no evidence.

It is deja vu all over again today with this current administration as they inject politics into the single most promising medical research of the century. The Bush administration is unfortunately not committed to research that would hasten medical discoveries, but rather, to hold science hostage to the Catholic vote.

Carl Rove, the President’s chief political adviser, is concerned about the views of the Catholic Church because the Catholic voters are seen as a swing vote in the elections. This administration has degraded medical research and the tremendous potential of embryonic stem cell research into an anti-abortion vote.

The White House is currently reviewing the matter. In other words, they are looking at the polls. “A responsible leader,” and this is a quote, “is someone who makes decisions based upon principles, not based upon polls or focus groups.” The New York Times reminds us that President Bush said those words a few days before Election Day. Perhaps he needs to be reminded.

Without a microscope, one cannot even see what this debate is all about. The center of the controversy is a microscopic cluster of cells stored in test tubes like this one. It is smaller than the period at the end of a sentence.

When ORRIN HATCH says he can tell the difference between cells in the test tube and those in a woman’s body, then we know that this is a nonsense argument. We should continue this research.

GUTKNECHT AMENDMENT ALLOWS ACCESS TO REASONABLY-PRICED DRUGS FOR SENIORS

(Mr. GUTKNECHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUTKNECHT. Mr. Speaker, later today we are going to have a very heated debate about a simple amendment that I am going to offer to make it clear what the Congress intended last year in terms of prescription drugs and allowing seniors and other Americans access to drugs from other places.

Much of the debate is going to revolve around this chart and the issue of safety. I just want to talk about a couple of these items here for Glucophage, a commonly-prescribed drug for diabetes, in the United States the average price is $30.12 for a 30-day supply. That same drug made in the same place for $4.11.

Mr. Speaker, a lot of people are going to say, what about safety? What about safety? Well, there is not a single piece of evidence, not one piece of evidence, that anyone has been injured by bringing legal drugs back into the United States where they have a prescription. That is a fact.

It is also a fact that 4.4 percent of the fruit and produce that comes into this country every day is tainted with serious pathogens. Mr. Speaker, we are going to have a chance to vote on this amendment. We are going to have to decide whether we are going to defend and explain this chart, and say that Americans should not have the access to legal drugs from legal countries around the world.

URGING THE PRESIDENT TO ALLOW STEM CELL RESEARCH TO PROCEED

(Mrs. MALONEY of New York asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MALONEY of New York. Mr. Speaker, I urge the President to allow stem cell research to proceed.

Along with the gentlewoman from Maryland (Mrs. MORELLA) and many others in this Congress, we have introduced House Resolution 17 that calls on Federal funding of human pluripotent stem cell research to continue.

As the recent statements by a number of prominent Republicans, such as Andy Card and Tommy Thompson, have said, they have come out in support of stem cell research. They underscore that this should not be a partisan issue. After a lengthy public comment period on August 25, the NIH published guidelines on human pluripotent stem cell research. Additionally, they accepted applications for research projects through March, 2001.

However, President Bush has put a hold on this work, calling for a review of the guidelines. I say to the President that it is estimated that over 100 million Americans are living with diseases like Parkinson’s, Alzheimer’s, diabetes. These people could be helped by stem cell research. We need to support science. We need to support medical knowledge. We need to support stem cell research.

EMBRYONIC STEM CELL RESEARCH DESTROYS LIFE

(Mr. DELAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELAY. Mr. Speaker, I rise in support of a fact, stem cell research, research that is ethical and which has been proven effective. The stem cell research I am referring to is derived from adults, umbilical cord blood, and placental blood, to name just a few sources. I, however, am not talking about stem cell research extracted from human embryos.

We can and are saving lives with stem cells gathered from adults even
more effectively than the stem cell research from embryos that some of my colleagues and I would think that that would be enough to convince folks where they should be on this important issue.

In case it is not, the fact that living human embryos would be deliberately destroyed in order to obtain their stem cells to me is absolutely appalling. Once we begin justifying the killing of human beings at one stage of development, we invite other troubling applications.

Stem cell research from human embryos establishes a bad precedent and is ethically wrong. Human life is too valuable. Let us condemn the logic of faulty research that extinguishes one life on the pretext of extending others. Instead, we should support the promising research methods that will save lives without ending others.

THE SUGAR PROGRAM

(Mr. DAVIS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAVIS of Illinois. Mr. Speaker, some of our colleagues defend the sugar subsidy as a no-net-cost program. If that was ever true, it is not true today. The sugar program costs plenty.

It costs tax dollars. Last year the Department of Agriculture spent $465 million on sugar subsidies.

It costs consumers. The General Accounting Office, a congressional agency, estimates that the people who consume and use sugar, which is all of us, pay an additional $1.9 billion a year because the Federal sugar subsidy keeps prices higher than they would be in a free market.

And the sugar program costs industry. Companies in my community, in my neighborhood, and other places throughout the country are moving away because the price is too high.

That is unfair. It is unfair to consumers. It is unfair to workers, and it is unfair to America.

COMMITTEE ON ENERGY AND COMMERCE IS CRAFTING BALANCED, LONG-TERM ENERGY POLICY

(Mrs. WILSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. WILSON. Mr. Speaker, the Committee on Energy and Commerce of the House today starts working on a comprehensive energy bill. It is going to be a balanced, long-term approach on energy policy for the Nation.

We have made wonderful strides in the last 20 years in conserving energy in this country. The refrigerator that we can buy today down at our local appliance store is one-third more efficient than it was in 1972.

We also have to increase supplies of energy and reduce our reliance on foreign oil. We have to improve our energy infrastructure, strengthen it, and give ourselves safe pipelines and modern transmission grids and refineries to get the energy where it needs to be.

We have a wonderful opportunity this summer to craft a policy important to the future of this country and to every citizen who pumps gas into their car or pays the family electric bill. We should seize that opportunity.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempe (Mr. COOKSEY). Although some minutes have passed since the remarks that prompt the Chair to mention it, the Chair must remind all Members that remarks in debate in the House may not include quotations of Senators, except in making legislative history on a pending measure.

FLAG PROTECTION AMENDMENT

(Ms. SANCHEZ asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SANCHEZ. Mr. Speaker, I rise today in support of House Joint Resolution No. 36, the flag protection constitutional amendment.

The flag stands for all of us in this wonderful country, and the honor we bestow upon it as our symbol is as great as the contributions each of us should hope to make for our Nation.

If the Stars and Stripes could talk, I am sure that they would say, “I am what you make of me. It is up to you to keep me raised high and flying. I am your belief in yourself, your dream of what a people may become. I am all that you hope to be and have the courage to try for.

“I am song and fear, struggle and panic, and emboldening hope. I am the day’s work of the weakest man, and the largest dream of the most daring. I am the battle of yesterday and the mistake of tomorrow. I am the clutch of this world and the embrace of the world to come.”

The bipartisan Shays-Meehan Campaign Finance Reform Act has passed in this body twice before. We should finally move to make it law.

Unfortunately, the Republican leadership is determined to drive a stake through the heart of all campaign finance reform. They have introduced a sham alternative that is intended to delay, distract, and to ultimately kill real reform. The bill will not clean up our campaign finance system but rather allow even more money to flow through it.

Their bill would allow a wealthy couple to give $1.26 million in hard and
soft money to a national party in an election campaign, and it allows Federal candidates to raise unlimited amounts of soft money for State parties to spend on TV attack ads.

Let us stand up for clean elections, let us stand up for good political discourse in this country, let us stand up for real campaign finance reform.

**STEM CELL RESEARCH**

(Mrs. MORELLA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MORELLA. Mr. Speaker, I rise to voice my support for stem cell research under the strict NIH guidelines. I want to thank the Members on both sides of the aisle who have joined with me, both pro choice and pro life, in support of this important research.

This is not a political issue, it is not a partisan issue, it is a medical issue and it is a human issue. It is, for some, a life and death issue. It affects our seniors, men and women, and it affects our children. It goes without saying that the children of this country deserve the best medical research that one can find.

I speak of the children with juvenile diabetes, known as the silent killer. More than 1 million Americans have Type 1, which is the juvenile diabetes, a disease that strikes children suddenly, makes them insulin dependent for life, and carries the constant threat of devastating complications. Someone is diagnosed with Type 1 diabetes every hour. It can and does strike adults as well.

In diabetes research, it is hoped that stem cells can be differentiated into insulin-producing islet cells. If so, we will have found a cure for this disease. Stem cell research offers them hope. Stem cell research will no doubt, in one way or another, touch all Americans. We cannot, we must not shut that door.

Mr. Speaker, I urge President Bush to keep the NIH guidelines in place.

**FEDERAL FARM POLICY**

(Mr. SMITH of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Michigan. Mr. Speaker, today, in a few minutes, we will take up the agricultural bill. In agricultural appropriations we do several things: we have a program in this country, our Federal agricultural policy that guarantees a farmer a minimum price that they can receive from the program commodity crops that they grow.

The problem we are dealing with in an amendment I will offer today says there should be a limitation on how much money goes to any particular producer. The limitation under current law is $75,000. In the bill that was debated under suspension, unavailable for any amendments 2 weeks ago, we increased that to $150,000.

I think when we consider that the giant farm operations are taking a lot of that price support money and realistically taking away from the small family farmer, we need to decide what Federal farm policy should be. I would ask my colleagues to consider an amendment of $75,000 per producer.

We have producers in this country that are now getting $1.2 million. The average size of farm in this country is 420 acres. We have farms up to 80,000 acres. We should be looking at helping family farmers with Federal farm policy.

**THE JOURNAL**

The SPEAKER pro tempore (Mr. COOKSEY). Pursuant to clause 8, rule XX, the pending business is the question of the Speaker’s approval of the Journal of the last day’s proceedings.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HINCHLEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic devices, and there were—yeas 366, nays 42, answered “present” 2, not voting 23, as follows:

[Continued list of names]

[End of list]
Mr. OBERSTAR changed his vote from "yea" to "nay."
So the result of the vote was approved as above recorded.

Mr. FILNER. Mr. Speaker, on rollcall No. 214, I was unavoidably detained. Had I been present, I would have voted "nay."
An amendment by the gentleman from California (Mr. BACA) related to Hispanic-serving institutions for 10 minutes;

An amendment by the gentleman from California (Ms. PELOSI) related to HIV for 10 minutes;

An amendment by Mr. BROWN related to abbreviated applications for the approval of new drugs under section 505(j) of the Food, Drug and Cosmetic Act for 20 minutes;

An amendment by the gentleman from Michigan (Mr. STUPAK), or the gentleman from New York (Mr. BONILLO), related to elderly nutrition, for 20 minutes;

An amendment by the gentelman from North Carolina (Mrs. CLAYTON) related to socially disadvantaged farmers for 20 minutes;

An amendment by the gentleman from New York (Mr. HINCHLEY) related to American Rivers Heritage for 30 minutes;

An amendment by the gentleman from Ohio (Mr. KUCINICH) related to transgenic fish for 30 minutes;

An amendment by the gentleman from Minnesota (Mr. GUTENBERG) related to drug importation for 30 minutes;

An amendment by the gentleman from Vermont (Mr. SANDERS) related to drug importation for 40 minutes;

An amendment by the gentleman from Massachusetts (Mr. OLIVER), or the gentleman from Maryland (Mr. GILCHREST), related to Kyoto, which may be brought up at any time during consideration, for 60 minutes.

Mr. GILMAN. Mr. Chairman, I ask unanimous consent to strike the last word to permit me to engage in a colloquy with the distinguished chairman of our Committee on Agriculture, the gentleman from Texas (Mr. BONILLA).

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, I appreciate the efforts of the gentleman from Texas (Mr. BONILLA) to provide assistance to all of the farmers throughout our Nation. Our onion growers in Orange County, New York, have incurred substantial crop losses due to the damaging weather-related conditions in 3 of the last 4 years?

Mr. BONILLA. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I would first of all like to say that I hope that the constituents back home of the gentleman from New York (Mr. GILMAN) understand how hard he has been working on this issue.

Mr. GILMAN. I appreciate that.

Mr. BONILLA. This is not something that, as the gentleman is presenting it to us today, we are hearing for the first time. The gentleman has done yeoman’s work on bringing this issue to our attention; and we know it is a very serious problem.

It is going to be a difficult issue for us to deal with, but I do commit to the gentleman that we will do what we can and whatever might be possible between now and conference to help the growers back home.

Mr. GILMAN. I thank the gentleman from Texas (Chairman BONILLA) for his encouraging words, and I look forward to working with him on this.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

In addition, $2,950,000, solely for carrying out section 804 of the Federal Food, Drug, and Cosmetic Act, to be available only after the requirements of section 804(h) have been satisfied.

In addition, mammography user fees authorized by 42 U.S.C. 381(b) may be credited to this account, to remain available until expended.

In addition, export certification user fees authorized by 21 U.S.C. 381 may be credited to this account, to remain available until expended.
CONGRESSIONAL RECORD—HOUSE

July 11, 2001

12968

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, acquisition of real property, acquisition of plant and equipment, maintenance and operation of buildings, purchase of fixed equipment or facilities of or used by the Food and Drug Administration, where not otherwise provided, $34,281,000, to remain available until expended (7 U.S.C. 2209b).

INDEPENDENT AGENCIES

COMMERCY FUTURES TRADING COMMISSION

For necessary expenses to carry out the provisions of the Commodity Exchange Act (7 U.S.C. 1 et seq.), including the purchase and rental of passenger motor vehicles; the rental of space (to include multiple year leases) in the District of Columbia and elsewhere; and not to exceed $25,000 for employment under 5 U.S.C. 3109, $70,700,000, including not to exceed $2,000 for official reception and representation expenses.

FARM CREDIT ADMINISTRATION

LIMITATION OF ADMINISTRATIVE EXPENSES

Not to exceed $36,770,000 (from assessments collected from insured institutions and from the Federal Agricultural Mortgage Corporation) shall be obligated during the current fiscal year for administrative expenses as authorized by 12 U.S.C. 2249f. Provided, That this limitation shall not apply to expenses associated with receivables.

TITLE VII—GENERAL PROVISIONS

SEC. 701. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for fiscal year 2002 under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed 379 passenger motor vehicles, of which 378 shall be for replacement only, and for the hire of such vehicles.

SEC. 702. Funds in this Act available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901–5902).

SEC. 703. Not less than $1,500,000 of the appropriations of the Department of Agriculture in this Act for research and service work authorized by sections 1 and 10 of the Act of August 14, 1946 (7 U.S.C. 427 et seq.), and of the Act of June 29, 1935 (7 U.S.C. 427, 427i; consolidated and reenacted in the Agricultural Adjustment Act of 1938; as amended by sections 1 and 10 of the Commodity Credit Corporation Act of 1949 (7 U.S.C. 1661 et seq.)); and of the Act of August 28, 1954 (7 U.S.C. 1766b). Provided, That notwithstanding any other provision of law, none of the funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements made by the United States Department of Agriculture and nonprofit institutions in excess of 10 percent of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate purchase of indirect costs on grants and cooperative agreements when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

SEC. 704. The Secretary of Agriculture may transfer unobligated balances of funds appropriated by this Act or other available unobligated balances of the Department of Agriculture to the Working Capital Fund for the acquisition of plant and capital equipment necessary for the delivery of financial, administrative, and information technology services of primary benefit to the agencies of the Department of Agriculture (hereinafter referred to as the Bankhead-Jones Act), subtitie A of title II and section 302 of the Act of August 14, 1946 (7 U.S.C. 1621 et seq.), and title XI, subtitle C, of the Act of November 30, 1965 (42 U.S.C. 247). Provided, That these funds shall be available for contracts in accordance with such Acts and chapter.

SEC. 705. The Secretary of Agriculture may transfer unobligated balances of funds appropriated by this Act or other available unobligated balances of the Department of Agriculture to the Working Capital Fund for the acquisition of plant and capital equipment necessary for the delivery of financial, administrative, and information technology services of primary benefit to the agencies of the Department of Agriculture (hereinafter referred to as the Bankhead-Jones Act), subtitie A of title II and section 302 of the Act of August 14, 1946 (7 U.S.C. 1621 et seq.), and title XI, subtitle C, of the Act of November 30, 1965 (42 U.S.C. 247). Provided, That none of the funds made available by this Act or any other Act shall be transferred to the Working Capital Fund without the prior approval of the agency administra-

SEC. 706. No appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 707. Not to exceed $50,000 of the appropriations of the Commodity Futures Trading Commission for the fiscal year 2002 under this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act of October 17, 1975 (15 U.S.C. 78t-2).

SEC. 708. No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements made by the United States Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act of October 17, 1975 (15 U.S.C. 78t-2).

SEC. 709. None of the funds in this Act shall be available to restrict the authority of the Commodity Credit Corporation to lease space for its own use or to lease space on behalf of the Federal Intermediate Credit Banks to carry out programs of public interest.

SEC. 710. None of the funds in this Act shall be available to pay grants awarded competitively by the Cooperative State Research, Education, and Extension Service that exceed 19 percent of total Federal funds provided under each award: Provided, That notwithstanding section 1602 of the Act of July 11, 1941 (7 U.S.C. 1602), that any other provision of law, none of the funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements made by the United States Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act of October 17, 1975 (15 U.S.C. 78t-2).

SEC. 711. Notwithstanding any other provision of law, none of the funds in this Act shall be available to pay negotiated indirect cost rates on cooperative agreements or similar arrangements made by the United States Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act of October 17, 1975 (15 U.S.C. 78t-2).

SEC. 712. Appropriations to the Department of Agriculture for the cost of direct and guaranteed loans made available in fiscal year 2002 shall remain available until expended in fiscal year 2002 for the following accounts: the Rural Development Loan Fund program account; the Rural Telephone Bank program account; the Rural Utilities Service loans program account; the Rural Housing Insurance Fund program account; and the Rural Economic Development Loan program account.

SEC. 713. Notwithstanding section 10 of the Commodity Exchange Act (7 U.S.C. 1671 et seq.), the Secretary of Agriculture may use cooperative agreements to reflect a relationship between the Agricultural Marketing Service; the Grain Inspection, Packers and Stockyards Administration; the Animal and Plant Health Inspection Service; and the fund safety activities of the Food Safety and Inspec-

SEC. 714. Notwithstanding any other provi-

SEC. 715. None of the funds in this Act may be used to retire more than 5 percent of the Class A stock of the Rural Telephone Bank or to maintain any account or subaccount within the accounting records of the Rural Telephone Bank the creation of which has been authorized by section 901 of the Act of July 11, 1941 (7 U.S.C. 1616a). Provided, That notwithstanding any other provision of law, none of the funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements made by the United States Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act of October 17, 1975 (15 U.S.C. 78t-2).

SEC. 716. Of the funds made available by this Act, not more than $1,800,000 shall be used to cover necessary expenses of activities related to all advisory committees, panels, commissions, and task forces of the Department of Agriculture, except for panels used to comply with negotiated rule makings and panels used to evaluate competitively awarded grants.

SEC. 717. None of the funds appropriated by this Act may be used to carry out section 410 of the Federal Meat Inspection Act (21 U.S.C. 671 et seq.). Provided, That notwithstanding any other provision of law, none of the funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements made by the United States Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to section 606C of the Act of October 17, 1975 (15 U.S.C. 78t-2).

SEC. 718. No employee of the Department of Agriculture may be detailed or assigned to any other agency or office of the Department of Agriculture, except for an employee of the Department of Agriculture on leave without pay to serve in another agency or office of the Department of Agriculture, for the period of such leave, for the salary and expenses of the employee for the period of such leave.
pay the salaries and expenses of personnel to
able by this or any other Act may be used to
funds appropriated or otherwise made available by this Act shall be used to pay the salaries and expenses of personnel to carry out a conservation farm option program, as authorized by section 1230M of the Food Security Act of 1985 (16 U.S.C. 3839bb).

SEC. 725. None of the funds appropriated by this Act shall be available for obligation or expenditure for personnel which would result in a change in expenditure through a reprogramming of funds which: (1) creates new programs; (2) eliminates a program, project, or activity; (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates an office or employees; (5) reorganizes offices, programs, or activities; or (6) contracts out or privatizes functions of programs or activities currently performed by Federal employees; unless the Committees on Appropriations of both Houses of Congress are notified 15 days in advance of such reprogramming of funds.

SEC. 726. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a position or office within the city limits of St. Louis, Missouri.

SEC. 727. None of the funds made available to the Food and Drug Administration by this Act may be used to relocate the office of the Administrator of the Food and Drug Administration District Office below the operating and full-time equivalent staffing level of July 31, 2003, to change the Office to a station, residence post or similarly modified office; or to reassign residence posts assigned to the Detroit Office: Provided, That this section shall not apply to Food and Drug Administration field laboratory facilities or operations currently located in Detroit, Michigan, except that field laboratory personnel shall be assigned to locations in the general vicinity of Detroit, Michigan, pursuant to cooperative agreements between the Food and Drug Administration and other laboratories associated with the State of Michigan.

MARKET LOSS ASSISTANCE FOR APPLE PRODUCERS

SEC. 740. (a) Assistance Available.—The Secretary of Agriculture, with the approval of the Commodity Credit Corporation, may use any balances available to carry out title III of such Act as of the date of enactment of this Act, and any recoveries and reimbursements that become available after the date of enactment of such Act, may be used to carry out title II of such Act.

SEC. 741. Section 375(e)(6)(B) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2008(e)(6)(B)) is amended by striking "$25,000,000" and inserting "$32,000,000".

SEC. 742. None of the funds appropriated or otherwise made available by this Act shall be used to issue a notice of proposed rulemaking, to promulgate a proposed rule, or to otherwise change or modify the definition of "animal" in existing regulations pursuant to the Animal Welfare Act.

SEC. 743. Notwithstanding any other provi-
sion of law, the Secretary shall consider the City of Casa Grande, Arizona, as meeting the requirements of a rural area in section 520 of the Housing Act of 1949 (42 U.S.C. 1400).

SEC. 735. Notwithstanding any other provi-
sion of law, the City of Saint Joseph, Mis-
souri, shall be eligible for grants and loans administered by the rural development mission areas of the Department of Agriculture.

SEC. 736. Notwithstanding any other provi-
sion of law, the Secretary of Agriculture shall consider the City of Hollister, Cali-
fornia, as meeting the requirements of a rural area for the purposes of housing pro-
grants in the rural development mission areas of the Department of Agriculture.

SEC. 737. None of the funds appropriated or otherwise made available by this Act may be used to maintain, modify, or implement any assessment against agricultural producers as part of a commodity promotion, research, and consumer information order, known as a check-off program, that has not been approved by the affected producers in accordance with the statutory requirements applicable to the order.

SEC. 738. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Drug Analysis (recently renamed the Division of Pharmaceutical Analysis) in St. Louis, Missouri, except that funds could be used to plan a position or office within the city limits of St. Louis, Missouri.

SEC. 743. None of the funds appropriated or otherwise made available by this Act shall be used to issue a notice of proposed rulemaking, to promulgate a proposed rule, or to otherwise change or modify the definition of "animal" in existing regulations pursuant to the Animal Welfare Act.
make payments for that amount of a particular crop's apple production that is in excess of 20,000,000 pounds.

(c) DUPLICATIVE PAYMENTS.—A producer shall be ineligible for payments under this section with respect to a market loss for apples to the extent of that amount that the producer received as compensation or assistance for the same loss under any other Federal program or under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.).

(d) OTHER TERMS AND CONDITIONS.—The Secretary shall not establish any terms or conditions for producer eligibility, such as limits based upon gross income, other than those specified in this section.

(e) APPLICABILITY.—This section applies only with respect to the 2000 crop of apples and producers of that crop.

Mr. BONILLA (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill through page 74 line 21 be considered as read, printed in the Record, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT NO. 12 OFFERED BY MS. KAPTUR

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 12 offered by Ms. KAPTUR: Add before the short title at the end the following new section:

SEC. 7. (a) The Secretary, in issuing regulations under this section, shall prescribe the procedures by which the Secretary will be notified of a request for assistance under this section.

(b) The Secretary shall, to the extent practicable, direct that tonnage equal in value to not more than $25,000,000 shall be made available to foreign countries to assist in mitigating the effects of the Human Immunodeficiency Virus and Acquired Immune Deficiency Syndrome on communities, including the provision of:

(1) agricultural commodities to—

(A) individuals with Human Immunodeficiency Virus or Acquired Immune Deficiency Syndrome in the communities, and

(B) households in the communities, particularly individuals caring for orphaned children;

and

(2) agricultural commodities monetized to provide other assistance (including assistance under microcredit and microenterprise programs) to create or restore sustainable livelihoods among individuals in the communities, particularly individuals caring for orphaned children.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from California (Ms. PELOSI) and a Member opposed each will control 5 minutes.

Ms. PELOSI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I intend to withdraw the amendment after a brief discussion due to an understanding with the gentleman from Texas (Mr. BONILLA) to look for funds for the celebration of the centennial anniversary of National 4-H as we move toward conference.

Also, I do this out of respect for the National 4-H leadership that has committed not to have those funds come at the expense of existing extension programs which are already stretched.

Mr. BONILLA. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 5 minutes.

Mr. BONILLA. Mr. Chairman, just briefly, I would like to acknowledge the gentlewoman's hard work on this issue and commit to working with her as we move to conference to addressing the needs of our good 4-H people around the country.

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Chairman, I thank the chairman very much for his openness and willingness to work with us as we move toward conference.

AMENDMENT OFFERED BY MS. PELOSI

Ms. PELOSI. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. PELOSI: At the end of title VII, insert the following new section (preceding any short title) the following section:

Sec. 7. (a) Of any shipments of commodities authorized pursuant to section 416(b) of the Agricultural Act of 1949 (7 U.S.C. 1431(b)), the Secretary of Agriculture shall, to the extent practicable, direct that tonnage equal in value to not more than $25,000,000 shall be made available to foreign countries to assist in mitigating the effects of the Human Immunodeficiency Virus and Acquired Immune Deficiency Syndrome on communities, including the provision of:

(1) agricultural commodities to—

(A) individuals with Human Immunodeficiency Virus or Acquired Immune Deficiency Syndrome in the communities, and

(B) households in the communities, particularly individuals caring for orphaned children;

and

(2) agricultural commodities monetized to provide other assistance (including assistance under microcredit and microenterprise programs) to create or restore sustainable livelihoods among individuals in the communities, particularly individuals caring for orphaned children.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from California (Ms. PELOSI) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from California (Ms. PELOSI).

Ms. PELOSI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as a member of the Committee on Appropriations, I am pleased to rise and join the gentlewoman from North Carolina (Mrs. CLAYTON), a member of the authorizing committee, the Committee on Agriculture, in offering this amendment to ensure continued funding to reduce the burden of hunger for HIV-AIDS patients and children orphaned by AIDS in developing world.

I commend the gentlewoman from North Carolina (Mrs. CLAYTON) for her leadership on this issue. She worked with us on this issue in the Committee on Agriculture as well as a member of the Congressional HIV Task Force. She developed this proposal, and her leadership has been very important, because this amendment affects so many millions of families worldwide.
I would like to thank the gentleman from Texas (Chairman Bonilla) and the ranking member, the gentlewoman from Ohio (Ms. Kaptur), for their leadership on the subcommittee and their support for this amendment.

Mr. Chairman, I will submit my statement for the record, but I just want to make two quick points. Poor nutrition accelerates the progression of HIV to AIDS, and an adequate food supply is critical to any prevention and care strategy. When a family member becomes infected with HIV, household food production is undermined, limited financial resources are used for medical costs rather than crop production, and family members are forced to care for the sick, rather than work in the fields.

Starting last year, $25 million was provided through the Food for Peace program to reduce the burden of hunger for families impacted by AIDS through food, nutrition, and health programs and direct distribution of food commodities. Today's amendment will continue this vital funding. I wish that we could have the number be higher in the future, but the $25 million called for here is a very, very important addition. I thank my colleagues for their support of this important amendment.

Mr. Chairman, I am pleased to yield 1 minute to the gentlewoman from Ohio (Ms. Kaptur), the very distinguished ranking member of the subcommittee.

Ms. KAPTUR. Mr. Chairman, I want to compliment the wonderful, wonderful gentlewoman from North Carolina (Ms. Clayton), the real author of this amendment, and commend her for her tremendous leadership.

Mrs. CLAYTON. Mr. Chairman, I want to thank the gentlewoman from California for her leadership on this and also her continuous and long-standing leadership in fighting AIDS. This is a unique opportunity to do good while doing well. The Food for Peace program allows us to make contributions all across world where there is suffering. What better effort than to direct $25 million of the Food for Peace program to reduce the burden of hunger for families impacted by AIDS through food, nutrition, and health programs.

As the gentlewoman from California (Ms. Pelosi) said already, this program is available to be a prevention-intervention program. We are increasingly aware that the medication alone does not improve health by itself. Not only that, but because of the health condition of the individual, their productivity and ability to afford food has been decreased drastically. I am very happy that the Republicans as well as the Democrats, all support this, and I want to commend the chairman for his support of this amendment.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. Bonilla) is recognized for 5 minutes.

Mr. BONILLA. Mr. Chairman, I rise to simply state that I am not opposed to the gentlewoman's amendment. A similar provision was included in the conference agreement last year as section 745 of our bill, without any objection of which I am aware. I would hope that we can quickly move to a vote on this issue, and commend the gentlewoman's work on this very important issue.

Ms. PELOSI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the distinguished chairman of the committee for his words of cooperation.

Mr. Chairman, I am pleased to yield 1 minute to the gentlewoman from Ohio (Ms. Kaptur), the very distinguished ranking member of the subcommittee.

Ms. KAPTUR. Mr. Chairman, I want to compliment the wonderful, wonderful gentlewoman from California (Ms. Pelosi) and the gentlewoman from North Carolina (Mrs. Clayton). Would I not know that the two of them would do something this significant? What they are proposing is only to continue what the House had agreed to do in conference last year, and that is to use the food power of this country to help alleviate suffering around the world, and certainly the plague of HIV/AIDS.

Their effort uses the power of food in the most creative way possible. Yet the sponsors of the amendment and all who support it should keep in mind that the President's budget proposes a review of the 416 programs with an eye toward reducing their availability. So, those who utilize and understand these programs need to be prepared to speak out before these programs are eliminated or reduced.

I want to thank the gentlewomen for bringing this up before the full House to make sure that we effectively use the dollars that are there, and not permit the food surplus of this country to be subscribed in a way that would not be made available to those who truly need it globally. I support them in their efforts.

Ms. PELOSI. Mr. Chairman, I rise to join Representative Clayton in offering this amendment to ensure continued funding to reduce the burden of hunger for HIV/AIDS patients and children orphaned by AIDS in the developing world. I commend Representative Clayton for her leadership on this issue, which affects so many millions of families worldwide. I would also like to thank Ranking Member Kaptur and Chairman Bonilla for their leadership on the Subcommittee and their support for this amendment.

We have all heard the staggering statistics—36 million people infected with HIV, 22 million deaths from AIDS, and nearly 14 million children orphaned. Archbishop Desmond Tutu has said, "AIDS in Africa is a plague of biblical proportions. It is a holy war that we must win." It is indeed, and the battles in this war occur on many fronts.

The impact of HIV/AIDS on poor families goes beyond the pain that accompanies the loss of a loved one. AIDS strikes people during their most productive years, and family income is cut by more than half when a parent is sick.

Household food production is undermined as limited financial resources are used for medical costs rather than crop production, and family members are forced to care for the sick, rather than work in the fields.

Starting last year, $25 million was provided through the Food for Peace program to reduce the burden of hunger for families impacted by AIDS through food, nutrition, and health programs and direct distribution of food commodities. Today's amendment will continue this vital funding. I wish that we could have the number be higher in the future, but the $25 million called for here is a very, very important addition. I thank my colleagues for their support of this important amendment.

Mr. Chairman, I will submit my statement for the record, but I just want to make two quick points. I support them in their efforts.

Ms. PELOSI. Mr. Chairman, I rise to join Representative Clayton in offering this amendment to ensure continued funding to reduce the burden of hunger for HIV/AIDS patients and children orphaned by AIDS in the developing world. I commend Representative Clayton for her leadership on this issue, which affects so many millions of families worldwide. I would also like to thank Ranking Member Kaptur and Chairman Bonilla for their leadership on the Subcommittee and their support for this amendment.

We have all heard the staggering statistics—36 million people infected with HIV, 22 million deaths from AIDS, and nearly 14 million children orphaned. Archbishop Desmond Tutu has said, "AIDS in Africa is a plague of biblical proportions. It is a holy war that we must win." It is indeed, and the battles in this war occur on many fronts.

The impact of HIV/AIDS on poor families goes beyond the pain that accompanies the loss of a loved one. AIDS strikes people during their most productive years, and family income is cut by more than half when a parent is sick.

Household food production is undermined as limited financial resources are used for medical costs rather than crop production, and family members are forced to care for the sick, rather than work in the fields. Many families must mortgage their land and sell productive assets, including livestock, to pay for food and medicine.

The U.S. has sought to reduce the burden of hunger that results from families' diminished ability to produce food. Starting last year, $25 million was provided through the Food for Peace program to improve food security through agricultural improvement, maternal and child health programs, and direct distribution of food commodities.

Today's amendment continues this vital funding. I thank my colleagues for their support of this important amendment.

Mr. Chairman, I will submit my statement for the record, but I just want to make two quick points. Poor nutrition accelerates the progression from HIV to AIDS. In addition to the prevention, treatment, and infrastructure needs that must be addressed to stem the tide of the pandemic, we must also recognize that good nutrition is critical to any prevention and care strategy.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from California (Ms. Pelosi).

The amendment was agreed to.

Mr. HINCHHEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

[The amendment text would be inserted here.]

Mr. HINCHHEY. Mr. Chairman, I rise to join Representative Clayton in offering this amendment to ensure continued funding to reduce the burden of hunger for HIV/AIDS patients and children orphaned by AIDS in the developing world. I commend Representative Clayton for her leadership on this issue, which affects so many millions of families worldwide. I would also like to thank Ranking Member Kaptur and Chairman Bonilla for their leadership on the Subcommittee and their support for this amendment.

We have all heard the staggering statistics—36 million people infected with HIV, 22 million deaths from AIDS, and nearly 14 million children orphaned. Archbishop Desmond Tutu has said, "AIDS in Africa is a plague of biblical proportions. It is a holy war that we must win." It is indeed, and the battles in this war occur on many fronts.

The impact of HIV/AIDS on poor families goes beyond the pain that accompanies the loss of a loved one. AIDS strikes people during their most productive years, and family income is cut by more than half when a parent is sick.

Household food production is undermined as limited financial resources are used for medical costs rather than crop production, and family members are forced to care for the sick rather than work in the fields. Many families must mortgage their land and sell productive assets, including livestock, to pay for food and medicine.

The U.S. has sought to reduce the burden of hunger that results from families' diminished ability to produce food. Starting last year, $25 million was provided through the Food for Peace program to improve food security through agricultural improvement, maternal and child health programs, and direct distribution of food commodities.

Today's amendment continues this vital funding. I thank my colleagues for their support of this important amendment.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from California (Ms. Pelosi).

The amendment was agreed to.
gentleman from Texas (Mr. BONILLA), for working with us on this very important subject. I also want to express my appreciation to the gentleman from Pennsylvania (Mr. KANJORSKI), who has also been very deeply concerned about the continuation of these positions, particularly in his case the position of river navigator for the Susquehanna River, a river that flows through Pennsylvania as well as New York.

I believe that the language that we have arrived at here is language which is acceptable to the chairman of the subcommittee, and that the amendment will be accepted by him.

Before I ask him that, I just want to make the point that these two positions are very, very important. What they do is they coordinate all Federal programs on these two rivers. These two rivers are two very important rivers, the Susquehanna, of course, feeding into the Chesapeake Bay, and there are a great many Federal programs, including programs consistent with the Federal Clean Water Act and others, that are very important to these rivers and the people who live along them. Therefore, Federal coordination of all programs associated with these rivers is very important.

I thank the chairman of our subcommittee, the gentleman from Texas, for recognizing that importance, and I want to express to the gentleman my appreciation for the ability to work with him and express my pleasure in having had the opportunity to work with him on this important issue.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent to strike the last word.

The CHAIRMAN. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. BONILLA. Mr. Chairman, I want to acknowledge the good amendment that the gentleman from New York is offering, and tell him that we are delighted to accept the amendment.

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. Mr. Chairman, I yield to the gentlewoman from Ohio.

Ms. KAPTUR. Mr. Chairman, I just want to thank the chairman for his support of our very able colleague from New York who has such a persevering record on attempting to get the American Heritage Rivers Initiative fully operational for the city of New York and for rivers immediately adjacent to and in his district, so that these local river conservation plans become more than plans, but, in fact, help us to preserve the precious fresh water resource that is ours alone in this quadrant of the United States.

I would have to just say as the ranking member on the subcommittee, no Member has fought harder for this program than the gentleman from New York (Mr. HINCHHEY), and the people of New York have sent the right man here to represent them.

Mr. HINCHHEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to thank the gentlewoman from Ohio (Ms. KAPTUR), the ranking member on our Subcommittee on Agriculture of the Committee on Appropriations, for those very kind words, and for her diligent and very effective work on the committee. Once again, I want to extend my appreciation to the chairman of our subcommittee and also to the staff that works under his direction for their assistance in putting this amendment together and for its successful acceptance.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HINCHHEY).

The amendment was agreed to.

AMENDMENT NO. 20 OFFERED BY MR. SANDERS

Mr. SANDERS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 20 offered by Mr. SANDERS:

At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 7. None of the amounts made available in this Act for the Food and Drug Administration may be used for enforcing section 801(d)(1) of the Federal Food, Drug, and Cosmetic Act.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Vermont (Mr. SANDERS) and a Member opposed each will control 20 minutes.

The chair recognizes the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this tripartisan amendment is offered by the gentleman from New York (Mr. CROWLEY), the gentlewoman from Connecticut (Ms. DELAUNO), the gentleman from California (Mr. ROHRABACHER), and the gentleman from Texas (Mr. PAUL).

It is about lowering the cost of prescription drugs so that the American people do not have to pay far the highest prices in the world for prescription drugs. It is about ending the national disgrace of tens of thousands of American citizens in New England, the Midwest, the Northwest, from having to go across the Canadian border in order to purchase the same exact prescription drugs that they buy at home for 50 percent of the cost or 60 percent of the cost or 20 percent of the cost.

It is about ending the absurdity of American citizens in California, Texas, Arizona, and the southern parts of our country of having to go to Mexico for the same exact reason.

It is about allowing women in the United States who are fighting for their lives against breast cancer so they do not have to pay 10 times more than the women in Canada for Tamoxifen, a widely prescribed breast cancer drug.

It is about telling the drug companies that they can no longer charge the American people $1 for drugs when those same exact products are sold in Germany for 60 cents, France for 51 cents, and Italy for 49 cents, the same exact products made by the same exact companies.

Mr. Chairman, for decades now, good people, Democrats, Republicans, in the House and in the Senate, have attempted to do something about lowering the cost of prescription drugs in this country so that the American people do not have to pay outrageously high prices for their medicine, so that doctors do not have to write out prescriptions knowing that their patients cannot afford to fill them. But year after year with legislation, with well-paid lobbyists and massive amounts of campaign contributions the pharmaceutical industry always wins. They never lose.

In the last three years alone the drug companies have spent $200 million in campaign contributions, lobbying and political advertising. In the last election cycle they doubled the amount of campaign contributions from 9 million to $18 million, and I have no doubt that they are prepared to double it again.

The issue today is not only the high cost of prescription drugs. The issue today is whether the Congress has the guts to stand up for their constituents, people who are being charged people who are dying and suffering because they cannot afford sky-high prescription drug prices; or do we cave in again to the pharmaceutical industry that is spending so much money trying to buy our votes.

The pharmaceutical industry has endless amounts of money. Year after year the industry sits at the top of the charts in profits. The top 10 companies last year made $27 billion in profits. They have a lot of money to spend on Congress. Their top executives, well, they have a lot of money to spend too.

A report came out yesterday from Families U.S.A., which talked about the compensation of executives in the pharmaceutical industry.

At a time when Americans die and suffer because they cannot afford prescription drugs, you might be interested to know that the CEO of Bristol-Myers Squibb has unexercised stock options of over $227 million. Elderly people cannot afford prescription drugs, and this CEO has unexercised stock options of over $227 million.

Pfizer has $130 million in unexercised stock options. Merck has $180 million, and on and on it goes.

Mr. Chairman, today in a tripartisan amendment, the gentlewoman from...
Mr. BONILLA. Mr. Chairman, I rise in opposition to the amendment, and I yield myself such time as I may consume.

The gentleman seeks to solve one problem by creating another, and I am going to cite some very, very serious testimony here from the Food and Drug Administration that was presented in front of the gentleman from Pennsylvania (Mr. GREENWOOD) and his Subcommittee on Oversight and Investigations just last month.

At the hearing, the FDA stated, and I quote: "From a public health standpoint, importing prescription drugs for personal use is a potentially dangerous practice. FDA and the public do not have any assurance that unapproved products are effective or safe or have been produced under U.S. good manufacturing practices. U.S.-made drugs that are reimported may not have been stored under proper conditions or may not be the real product, because the U.S. does not regulate foreign distributors or pharmacies. Therefore, unapproved drugs and reimported approved medications may be contaminated, subpotent, superpotent, or even counterfeit."

The FDA also said, and I quote: "Under FDA's personal importation policy, FDA inspectors may permit the importation of certain unapproved prescription medications for personal use. The Secretary of Health and Human Services has an enforcement discretion to allow entry of an unapproved prescription drug if: the product is for personal use, (a 90-day supply or less, and not for resale); the intended use is for a serious condition for which effective treatment may not be available domestically (and, therefore, the policy does not permit inspectors to allow foreign versions of U.S.-approved drugs into the U.S.); or there is no known commercialization or promotion to U.S. residents by those involved in the distribution of the product."

There are several other points here, but the bottom line is, this could be a dangerous threat to consumers in this country. This could be a dangerous threat to consumers in this country. This could be a dangerous threat to consumers in this country. The FDA has not officially permitted the importation of foreign versions of U.S.-approved medications, even if sold under the same name, because these products are unapproved, and the agency has no assurances that these products are safe or effective. I would like to inform my colleagues that both the Committee on Energy and Commerce, which is the authorizing committee for the FDA, and the administration strongly oppose this language and any other language allowing for importation of drugs.

So I rise in strong opposition. We will be hearing from other good Members from the Committee on Commerce as well in just a few minutes.

Mr. SANDERS. Mr. Chairman, I yield 2 1/4 minutes to the gentleman from Connecticut (Ms. DELAUNO), the co-sponsor of this legislation and a real fighter in terms of lowering the price of prescription drugs.

Ms. DELAUNO. Mr. Chairman, I rise in strong support of the Sanders-Crowley-Rohrabacher-DelAuro-Paul amendment to help American families and seniors get the necessary prescription drugs at affordable prices. With spending on prescription drugs by seniors and others up by 18 percent last year to nearly $23 billion, we need to do everything that we can to make them safe, effective, and affordable, make these drugs accessible to those who need them.

One would think that this is a goal that we could rally around. But no, once again, we are being fought by the pharmaceutical industry. They oppose reimportation. That poses the question: What exactly are they for? They are against the Medicare prescription drug plan for all seniors. They are opposed to the Allen bill that would allow for pharmacists to be able to purchase at a discounted rate, the pharmaceuticals that Germany, France, Britain, and others can purchase. They are against across-the-board price reductions. They never tell us why.

In fact, the only thing they seem to be for is extending their patents and seeing their profits increase.

Last year, the top 10 pharmaceutical companies earned $26 billion in profits. They oppose this amendment because the bill might cut into its considerable profit margin. They are waging a massive dollar campaign to protect their agenda across the land. Over the past five election cycles, the Pharmaceutical Research and Manufacturers Association, the trade group for brand-name drug companies, gave nearly $360 million in political contributions, lobbying and advertising campaigns, to protect its legislative agenda.

Mr. Chairman, there are opponents of this amendment who raise the safety issue. The fact is that reimportation is something that has worked for years in Europe. Twenty-five percent of drugs consumed in European countries are reimported. This legislation requires all imported drugs to be the exact same FDA-approved medications that are sold in the United States. Pharmaceutical labels must comply with FDA regulations.

Last year, Dr. David Kessler, the former FDA Commissioner under Presidents Bush and Clinton, stated that U.S.-licensed pharmacists and wholesale distributors would be able to safely import quality prescription drugs. He believes the importation of prescription drugs can be done without causing a greater health risk to American consumers.

Let me just say that GlaxoWellcome is a British company. They send drugs to the United States, and they are perfectly well approved.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, I absolutely believe that we need to control the cost of prescription drugs for seniors. But this is an ill-advised way to do it. I understand that the people who speak for this amendment are well motivated, but the fact is that they run the risk because they are tackling this issue indirectly rather than directly, they run the risk of allowing large numbers of adulterated drugs into this country.

It is one thing to fight for access to affordable drugs for seniors; it is another thing in the process to open our seniors up to the dangers of adulterated or expired drugs, and that is exactly what this amendment does.

If we take a look at what happened last year when we applied a similar approach, try though the Congress did, we wound up producing an importation process which the Secretary of Health and Social Services said she could not certify as to efficacy or safety, and so the proposal could not be approved.

I would point out that every Member of the House has a letter from the gentleman from Louisiana (Mr. TAUZIN),
the chairman of the Committee on Energy and Commerce, and the gentleman from Michigan (Mr. Dingell), one rank and file and various other members of the committee, which says the following: “Despite anybody’s best intention, if the Sanders amendment becomes law, our citizens will have no idea whether the source of their pills is an FDA-approved facility or an unregulated warehouse rented for the weekend by big business counterfeiters and larcenists seeking to penetrate the U.S. market. Drug counterfeiters present a severe and growing threat to the health and safety of the United States consumers.”

If we want to deal with this problem, in my view, the correct way is to support the Allen legislation, because that produces into this country by larcenists; it does not force seniors to have lower the price that is charged to seniors; it does not assure that they are safe, and they are

Mr. SANDERS. Mr. Chairman, just as a point of fact, Donna Shalala did not implement last year because of safety. It had nothing to do with safety; it had to do with pricing loopholes.

Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. Gutknecht), who has done an excellent job on this issue.

Mr. GUTKNECHT. Mr. Chairman, I thank the gentleman from Vermont for yielding time to me. I want to show a couple of charts, because we are going to have several debates. This amendment is somewhat broader than the one that I have drafted, but it really involves around a couple of important points.

One is the issue of price. I do not think anybody here today is going to dispute this chart. I did not make this chart. This was done by the Life Extension Foundation. The information is about 2 weeks old.

If we compare what Americans pay to what Europeans pay, and we are talking about Europe here, not Mexico, not Third World countries, but we are talking about Switzerland and Germany, where they do not have price controls, at some point we are going to have to explain to our constituents why we stand idly by and allow this chart to exist.

The issue they are going to raise, and it is going to be a red herring, is safety. Safety. Understand this, Mr. Chairman, every day millions of pounds of raw meat and vegetables come into this country, and we have checked with the FDA, it is the Food and Drug Administration, their own study in 1999 said that 4.4 percent of the produce coming into the United States has dangerous pathogens, including 3.3 percent have salmonella.

Do Members know what can happen if we get salmonella? We can get real sick. In fact, we can die. That is every day that is coming into the United States. Yet, there is no known scientific study where consumers in the United States have been injured importing legal drugs from G–8 countries, not one. As a matter of fact, if we had heard that, it would be all over. I suspect the pharmaceutical industry would have that over every newspaper and on television.

The truth of the matter is that there is almost no risk to consumers to bringing legal drugs back into the United States.

They are going to talk about illegal drugs. Nothing in the Sanders amendment does to any extent, nothing that is going to be discussed today is about legalizing illegal drugs. We are not talking about the Medellin drug cartel, which incidentally does ship billions of dollars worth of illegal drugs into the United States. I am unable to do almost anything about it. What we are talking about today is the Medellin drug cartel, which incidentally does ship billions of dollars worth of illegal drugs into the United States. The Food and Drug Administration is unable to do almost anything about it. What we are talking about today is legalizing illegal drugs. We are not talking about the Medellin drug cartel, which incidentally makes a lot of money.

We are not talking about the Medellin drug cartel, which incidentally makes a lot of money.

Mr. GREENWOOD. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. Rohrabacher), our co-sponsor.

Mr. ROHRABACHER. Mr. Chairman, I rise in strong support of the Sanders amendment. We have to take a look at the substance here, instead of trying to be diverted away from the central point of what is going on by scare tactics.

I do not know if any Members have had calls come to their office last night, but I had calls. My office was flooded with calls from people who had been told that the Sanders amendment meant that marijuana and heroin and all sorts of drugs would be permitted to flow across the border. That type of scare tactic is what is so important to the health of the American people as the issue that we are discussing today.

It appears that the people on the other side of this issue are so afraid of the actual facts that they have succumbed to this type of scare tactic and dishonesty. That should play no part of this debate.

Let me note that we are being told that there will be a few Americans who will be hurt. Yes, a few Americans might be hurt, and let us admit that. But what we are talking about is the vast number of Americans who will be hurt if we pass the Sanders amendment because some people will get hold of counterfeit drugs, some people will get hold of drugs that are not exactly regulated correctly and produced correctly.

Yes, a few Americans might be hurt, and let us admit that. But what we are talking about is the vast number of Americans who will be hurt if we pass the Sanders amendment because some people will get hold of counterfeit drugs.

This bill permits people, American citizens, and especially those who live near the borders of another country, to go across those borders and buy drugs that are being sold at a cheaper rate.

Sometimes we have seen it to be half as much, a third as much, sometimes one-quarter or 20 percent the price across the border. That type of scare tactic is what is so important to the health of the American people as the issue that we are discussing today.

It makes no sense for us to talk about globalizing the economy and globalizing the world economy without letting our people benefit from the competitive advantages, the consumers’ competitive advantages in dealing on an international market.

We believe, okay, in free trade. We believe in a competitive market and a global market. Let us let the American consumer benefit from that. What will happen if we pass this amendment is that there will be pressures, competitive and market pressures, on our own
drug producers here in the United States to lower the price of their product in the United States as well. By de- feating the Sanders amendment, we are not protecting anybody. What we are doing is keeping the prices high and protecting the pharmaceutical companies from competition.

I like the pharmaceutical companies, and I appreciate the good job that they have done for the American people and for the people of the world in developing new drugs. But that does not mean that they should be free of competition. That does not mean that they should be able to have differential pricing in one country versus another.

Let us stand up for the American people and also stand up for competition at the same time.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it was pointed out by the distinguished gentleman from Minnesota (Mr. GUTKNECHT) a moment ago that in this letter that comes from the gentleman from Louisiana (Chairman TAUZIN), the gentleman from Michigan (Mr. DINGELL), and other subcommittee chairs, the gentleman from Pennsylvania (Mr. GREENWOOD) and the gentleman from Florida (Mr. DEUTSCH), it points out clearly, the ALS Association, the National Prostate Cancer Coalition, the Cystic Fibrosis Foundation, the Pancreatic Cancer Action Network, the National Kidney Cancer Association, the National AIDS Treatment Advocacy Project, all of these groups are adamantly opposed to the Sanders amendment.

Mr. Chairman, I yield 2 minutes to the distinguished gentleman from North Carolina (Mr. BURR).

Mr. BURR of North Carolina. Mr. Chairman, I think the gentleman for yielding time to me.

Mr. Chairman, this is not about bringing illegal drugs in. This is about whether we are going to withhold the gold standard of the Food and Drug Administration in the United States of America.

In 1997, this House in a bipartisan way, and as a matter of fact, under suspended rules in an unanimous vote, voted to modernize the Food and Drug Administration. The one vigilant thing that every Member as I understand was to assure that the gold standard, that stamp of approval that we say to the American people passes on from the FDA on manufactured pharmaceuticals, was maintained.

As a matter of fact, when my good friend, the gentleman from California, talked about global trade, one of our objectives with global trade was to harmonize the standards of approval so that we could reach the efficiencies of a global manufacturing base. We have not yet today to reach harmonization standards with the EU because we cannot accept the Italian standard for drug approval.

But what this amendment does, it says we are going to defund any, any and all reviews at our borders of reforming counterfeits. The gentleman from Pennsylvania (Mr. GREENWOOD) just showed the awful conditions where drugs are manufactured, where they look identical, where they are packaged identically. Today the DEA, the FDA, the Customs Department, they are all against this amendment. They are all against reducing the gold standard that we currently find at the FDA.

As a matter of fact, the executive director of the trade program at U.S. Customs had this quote: “Counterfeit pharmaceuticals enter in both wholesale and retail quantities. Additional problems include expired material, products that have not been approved by the FDA in facilities under no proper regulation, and products not having the proper instructions for consumers to use.”

Mr. Chairman, we should not do this to the American people. We should maintain the gold standard.

Mr. SANDERS. Mr. Chairman, I yield 2½ minutes to the gentleman from New York (Mr. CROWLEY), a cosponsor of this amendment.

Mr. CROWLEY. Mr. Chairman, I rise in strong support of the Sanders-Crowley-DeLauro-Paul-Rohrabacher amendment. This language offered today is the same language I offered last year in the agriculture appropriations bill. We again offer this amendment as a first start to provoke a discussion and get real reimportation language enacted into law.

This is the only way Democrats and Independents can get heard on this issue. The GOP-controlled House authorizing committees are not doing it. The problem of counterfeits is not just a phenomenon of the developing world. Our lucrative market and ineffective import controls are increasingly making the United States an attractive target for drug counterfeiters and diverters.

“Last month three counterfeit prescription drugs were found in the shelves of pharmacies of several States. It is not known whether these fake drugs were made in the United States or overseas, but such a cluster of counterfeiters has not been seen for years in this country.”

The hearing proved that the FDA is unable to assure the U.S. public that it can prevent unsafe imports from entering this country at this point in time. If we look specifically at what this amendment does, it stops all funding for FDA in terms of importation. That is what the amendment actually does. That is a scary thing if we start to think about it.

The CHAIRMAN. Objection is heard.

Mr. BONILLA. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. DEUTSCH).

Mr. DEUTSCH. Mr. Chairman, I would yield to no Member of this House in terms of my efforts to lower prescription drug costs for seniors in America. I support the efforts of the gentleman from Vermont (Mr. SANDERS) to allow importation of drugs from outside the United States.

However, this amendment is not the way to do it. If we look specifically at what this amendment does, it stops all funding for FDA in terms of importation. That is the amendment actually does. That is a scary thing if we start to think about it.

The CHAIRMAN. Objection is heard.
drug, it is paint that is coming in. This amendment cuts out all FDA funding in terms of literally looking at the substance of the drugs that come in, the United States of America, and zip. Nothing. We could not review that if this amendment actually became law.

Mr. SANDERS. Mr. Chairman, will the gentleman yield?

Mr. DEUTSCH. I yield to the gentleman from Vermont.

Mr. SANDERS. Mr. Chairman, the gentleman knows this is not what we are doing. This is a place holder for the Senate and the conference committee to do what we did last year in developing a comprehensive bill and doing away with the pricing loopholes.

Mr. DEUTSCH. I support the gentleman’s efforts, but again, as a place holder, we do not do place holders, we do real amendments. We do real law.

And, unfortunately, I understand the limitations that the gentleman had in the appropriations process, and what this was a way to raise the issue. It is an important issue, and I am glad it is being raised. But when we vote, we actually vote on real things. Members that support this legislation, in fact, are supporting no funding for the FDA to regulate drugs that come into the United States of America. If any of my colleagues had joined me in looking at the drugs that come in, I am sure they would vote against this amendment.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. NORWOOD).

Mr. NORWOOD. Mr. Chairman, I thank the gentleman for yielding me this time, and I rise to strongly oppose this amendment. However, I agree with the makers of the amendment and what they are trying to do. We all do, indeed, want to see the price of medications come down, especially for our senior citizens. But this is simply the wrong way to do it. I am very fond of, for example, the President’s initiative on a senior citizen’s discount card. We should turn over every leaf to try to lower it. But the most expensive drugs there are are drugs that do not work.

Let it be very clear what this amendment would do to drug safety in America. This amendment would allow anyone, individuals and import companies, to import any drug with no FDA inspection for alteration, misbranding, or strength. Any company in the country, in the world, could ship any product in a bottle, label it any way they wanted, be totally fraudulent in their claim, while we sit here and ban the FDA from doing anything about it. If my colleagues liked the Mexican strawberries that poisoned our school children, then they are going to love the Red Chinese sugar pills labeled amoxicillin that allows the child’s strep throat to become heart disease.

When a drug is prescribed, a doctor or dentist has to know with absolute certainty that the drug is precisely what it is asked. This bill will destroy that certainty and undermine the safety of American patients.

Vote “no,” then let us work together on a real effort to try to reduce the cost of prescription drugs for our senior citizens.

Ms. KAPTUR. Mr. Chairman, I was just rising to either ask unanimous consent to strike the last word to get some of my own time on this or to plead with the chairman to see if we could not even get a few more minutes on each side. We have more speakers than we had anticipated, and it is an important issue and lives actually hang in the balance on it. I wondered if we might take a few additional minutes on each side.

The CHAIRMAN. Is the gentlewoman making a unanimous consent request?

Ms. KAPTUR. I am.

The CHAIRMAN. What is that request?

Ms. KAPTUR. My request is to strike the last word.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

Mr. BUYER. I object.

Mr. SANDERS. Mr. Chairman, can I have a point of personal something or other?

On this issue of enormous consequence our friends do not want to add a few more minutes to debate? I think that is really unfortunate.

I want to ask the chairman again, the gentleman from Texas (Mr. BONILLA), who I know is a decent man and I respect his opinion, but we have many people here, so what is wrong with 5 more minutes on either side?

The CHAIRMAN. Is the gentleman making a unanimous consent request?

Mr. SANDERS. I am.

The CHAIRMAN. What is that request?

Mr. SANDERS. That the chairman grant us 5 minutes more so people on both sides can have the opportunity to debate this issue. Five minutes on both sides.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

Mr. BUYER. I object.

The CHAIRMAN. Objection is heard.

Ms. KAPTUR. Mr. Chairman, may I know what the time frame is?

The CHAIRMAN. The gentleman from Vermont (Mr. SANDERS) has 4½ minutes remaining and the gentleman from Texas (Mr. BONILLA) has 8 minutes remaining.

Mr. SANDERS. I would urge the other side to go ahead.

Mr. SANDERS. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. STUPAK).

Mr. STUPAK. Mr. Chairman, why have all of us from the Committee on Commerce come up here to debate this issue and are opposed to it? Because this is exactly what happened. For 2 years we have been working on this project: reimportation. When it leaves this country and comes back into this country, we do not know what it is.

This is one post office, where 721 parcels came back in. We cannot tell what that is. We cannot tell what it is. We do not know what it is. We could not review that if it got here, how it was made, what it is ever made of. This is the yellow powder we speak of. This is boric acid and yellow highway paint. They do it to put on these pills which they put in this blister pack for Poncelet. Nothing we can use medically in this country.

This is about drug safety. It is not priced for senior citizens. All of us Democrats, most of us Republicans, would like to see lower drug prices. This is drug safety. For 2 years we have been working on this issue. Do not limit the FDA’s ability to do enforcement when these drugs like this highway paint are coming in and being put on pills and we are supposed to take it as a safe drug.

Reject this amendment. If you want to pass meaningful legislation, pass the Allen bill.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Chairman, I do agree on one thing with the gentleman from Vermont (Mr. SANDERS). This amendment is important. It is important because if it passes, people will die, and that is no exaggeration.

Why would we ever want to permit a system that is one of the best in the world, like the FDA, which ensures that we have drug safety in our Nation, why do we want to open it up so we are not able to have that gold standard that a former colleague talked about? When people see an FDA-approved drug, they know about the efficacy and safety of that particular drug.

The Food and Drug Administration and the Customs Service have testified before this Committee as recently as June 7th that “Drugs being imported from outside the United States pose considerable risk to consumers because they may be counterfeit, expired, superpotent, subpotent, simply tainted, or mislabeled.”

American consumers should not have to worry that the drugs they take may be adulterated, just as the gentleman from Michigan (Mr. STUPAK) said, with yellow highway paint, which the FDA has found with imported drugs. Defeat the Sanders amendment.

Mr. SANDERS. Mr. Chairman, I yield 45 seconds to the gentlewoman from Florida (Mrs. THURMAN).

Mrs. THURMAN. Mr. Chairman, I was going to ask a lot of other questions, however, I have been covered here on the floor already.

So, I wish to ask the gentleman from Vermont (Mr. SANDERS), we have been hearing about who is against this
Mr. HOLT. Mr. Chairman, I thank the gentleman for yielding me this time. Congress does have an obligation to help seniors get the prescription drugs that they need, and seniors deserve a voluntary universal prescription drug benefit under Medicare. We can all agree on that. But making it easier to bring counterfeit medicines into the United States is not the way to help seniors get these medications, not the way to help families.

The Sanders amendment is a step backward. The FDA and the Customs Service have a huge challenge keeping counterfeit drugs out of this country. In New Jersey and California and Kansas, they are putting safe, tested, clean medicines into their bodies. It is not just agencies like the Customs Service that oppose this; it is also patients' groups, like the National Prostate Cancer Coalition, the Cystic Fibrosis Foundation, and the ALS Foundation. They all strongly oppose it. It is simply not the way to provide seniors with affordable prescription drugs. It would undermine confidence that doctors and patients have in their ability to make informed decisions about patient care.

Mr. SANDERS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Mr. BONILLA, 1 minute to the gentleman from New Jersey (Mr. FRELINGHUYSEN), a member of the Committee on Appropriations.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Chairman, that is absolutely correct. Some groups supporting it are Public Citizens Network, the National Catholic Social Justice Lobby, the National Educational Association, Communication Workers of America, the Children's Foundation, the Alliance for Retired Americans, the Gray Panthers, and a number of other organizations. And I thank the gentlewoman for asking that question.

Ms. DEGETTE. Mr. Chairman, I yield 1 minute to the gentleman from Colorado (Ms. D EGETTE).

Mr. ALLEN. Mr. Chairman, I thank the gentlewoman, all of us, all of us want to see lower drug prices, and all of us are frustrated by the high price of drugs. It does no good, though, to import these drugs if we cannot be guaranteed of their efficacy. In my hand, I have three packages of Viagra, all of them imported. Two of these packages are counterfeit. All the packages look the same. The holograms on the back are the same and the blister packs holding the pills are exactly the same in all three boxes. I am sure that two of these boxes are cheaper than the third, but I would ask my gentlemen colleagues if they would rather have lower prices, or which two of these boxes would they take?

Mr. SANDERS. Mr. Chairman, I yield 1 minute to the gentleman from Maine (Mr. ALLEN).

Mr. ALLEN. Mr. Chairman, I thank the gentleman for yielding me this time, and I rise in support of the Sanders amendment, not because it is the perfect amendment but because I believe it is a step in the right direction. Duly elected, few people, no one really, has asked why are drugs so much less expensive in other countries. The reason is because other countries do not allow the pharmaceutical companies to gouge their citizens, senior citizens or others.

In Canada, in all the rest of the G-7, there are caps on what the pharmaceutical industry can charge. In those countries the pharmaceutical industry sells lots of drugs, they make profits, and they do just fine. Only in America, only in America do we basically allow them to charge the highest prices in the world to seniors, who can least afford it.

That is why this is a step in the right direction. I do believe we need a prescription drug cap here in the United States so that our seniors are not discriminated against and our seniors no longer pay the highest prices in the world.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey (Mr. HOLT).

CONGRESSIONAL RECORD—HOUSE 12977

Mr. HOLT. Mr. Chairman, I thank the gentleman for yielding me this time. Congress does have an obligation to help seniors with the high cost of prescription medicines, but this amendment is not the answer. Secondly, we debated this same issue 1 year ago. The only thing that has changed is that we now have confirmation from both the former Secretary of Health and Human Services, Donna Shalala, and her successor that this amendment could endanger our constituents.

Anyone who thinks the threat is not real, I would refer them to the recent testimony of the U.S. Customs Service and the recent news that counterfeit drugs are already coming into this country that pose a serious health threat to our citizens. This amendment would essentially make that practice legal and allow unscrupulous marketers to invade our markets and endanger our constituents.

Our Nation, with the FDA, has the world's gold standard for ensuring the quality and safety of medicines used by consumers here in the United States and around the globe. Let us not undermine these high standards for consumer safety.

Mr. SANDERS. Mr. Chairman, I would once again ask unanimous consent to ask the chairman now just for 3 minutes on each side of additional time, because we have many speakers who feel strongly about this; and I am sure the gentleman does as well.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

Mr. LUCAS of Oklahoma. Objection, Mr. Chairman.

The CHAIRMAN. Objection is heard. Ms. KAPTUR. So could I ask unanimous consent to ask the chairman now just for 3 minutes on each side of additional time, because we have many speakers who feel strongly about this; and I am sure the gentleman does as well.

The CHAIRMAN. Objection is heard. Ms. KAPTUR. So could I ask unanimous consent to ask the chairman now just for 3 minutes on each side of additional time, because we have many speakers who feel strongly about this; and I am sure the gentleman does as well.

The CHAIRMAN. Objection is heard. Ms. KAPTUR. So could I ask unanimous consent to ask the chairman now just for 3 minutes on each side of additional time, because we have many speakers who feel strongly about this; and I am sure the gentleman does as well.

The CHAIRMAN. Objection is heard. Ms. KAPTUR. So could I ask unanimous consent to ask the chairman now just for 3 minutes on each side of additional time, because we have many speakers who feel strongly about this; and I am sure the gentleman does as well.
Mr. SANDERS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of the Sanders amendment. Again I repeat, last year the vote on this issue passed overwhelmingly 363 to 12 in this House. Indeed the House has spoken. Yet no one confuse what the issues are. First of all, drugs are already being brought into this country. People from my district go up to Canada and buy prescription drugs all the time. That is true for people from San Diego, or New York to Niagra Canada. In fact, most drugs sold here are manufactured in Puerto Rico anyway! They are not even made in the United States, and we require the FDA to inspect those laboratories. So we are not talking about anything different with this amendment. We are talking about expanding an existing system that works and provides the safest drug and food supply in the world.

Mr. Chairman, some of my colleagues came up here and said this amendment poses a threat to consumers. The only threat to consumers is that our seniors and others cannot afford to buy the drugs that they need to keep them alive; that is the threat out there! No industry in this country should be allowed to keep prescription drugs away from people to save their lives.

Someone else talked about the effect of this amendment reducing the gold standard of drug inspection. In fact with this amendment, we want to apply the gold standard of inspection more broadly to make more medications available that are approved by the FDA.

Let me say that we even inspect meat plants and license meat plants all around the world when they ship products in here. We can certainly do that more comprehensively for prescription drugs.

Finally, let me end by stating that when we went to conference on this important item last year, we offered four amendments to deal with some of the important regulatory questions that were raised by the FDA. We were defeated on a totally partisan vote each time. I will say to the Republican Party in this institution, they caused this amendment to be unworkable. Give us the right with this amendment to fix the system as we tried last year when we went to conference and our four amendments were defeated. Mr. Chairman, we want to provide the safest food and drugs supply to the people of this country. Allow us to do that. Again, support the Sanders amendment.

Mr. BONILLA. Mr. Chairman, what is the reasoning time for each side?

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) has 3 minutes remaining; and the gentleman from Vermont (Mr. SANDERS) has 3 minutes remaining.

Mr. BONILLA. Mr. Chairman, I reserve the balance of my time.

Mr. SANDERS. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. DeFAZIO).

Mr. DeFAZIO. Mr. Chairman, we have heard a lot from the other side of the aisle about the FDA is the gold standard. It is fool’s gold. Guess what? U.S. drugs are manufactured mostly in Puerto Rico with major components imported from China and India with no mandatory testing. None.

This bill imposes mandatory testing, a whole new regime. The EU has been doing this for 25 years. What is the result, counterfeit drugs and people dying? No. The result is drugs are much cheaper in the European Union; and in Britain they are on average 36 percent cheaper, and there has not been a single incidence of all of these chimaeras that are raised.

What really happened was the pharmaceutical industry was caught napping last year. The seniors that I have seen divide their pills in half, against doctor’s orders, and I have seen spouses that have to choose, one gets drugs and the other does not. We are doing nothing about that. We are supporting the profits of this industry. If the other side reverses their vote from last year, they will be held accountable by the tens of millions of Americans who can’t afford their pharmaceutical drugs. This is not about safety, it is about affordability, and it is about lives.

Mr. BONILLA. Mr. Chairman, we only have one remaining speaker, and we reserve the right to close.

Mr. Chairman, I reserve the balance of my time.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The jurisdiction of the Committee of the Whole to enlarge the time prescribed by the Order of the House depends on congruent division of the time. The gentleman from Texas (Mr. BONILLA), therefore, has 2 additional minutes as a consequence of the 2 additional minutes granted to the gentlewoman from Ohio (Ms. KAPTUR).

Mr. SANDERS. Mr. Chairman, I do not object; but my understanding of the unanimous consent that the gentleman from Ohio (Ms. KAPTUR) gave was to give Ms. KAPTUR 2 minutes.

Mr. Chairman, I ask unanimous consent for 2 additional minutes for both sides.

Mr. LUCAS of Oklahoma. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SANDERS. Mr. Chairman, I yield 45 seconds to the gentleman from Maine (Mr. BALDACCI).

Mr. BALDACCI. Mr. Chairman, this is really an unfortunate circumstance that we are being forced as citizens of our country to have to reimport drugs that are manufactured in our country under our country’s supervision in FDA-approved laboratories, but in order to be able to get affordable prescription medicines to our citizens.

Our citizens are paying 33 to 50 percent higher for the same drugs. This is no different from some of our agriculture farmers who recognize the importation of products that are manufactured here but sold overseas cheaply. It is cheaper to bring it in than it is to pay for it at the same level in our own country, and we are being put through this process.

Mr. Chairman, this amendment will allow us to get those safe, FDA-approved, reviewed and supervised prescription drugs to our seniors that need them. Our State needs this relief now.

Mr. SANDERS. Mr. Chairman, I yield 45 seconds to the gentleman from New York (Mr. HINCHEY).

Mr. HINCHEY. Mr. Chairman, it seems to me that the honest opponents of this bill are focusing on the trees and, therefore, cannot see the forest. The forest is that Americans pay exorbitantly high prices for pharmaceuticals. We subsidize the price of pharmaceuticals everywhere else in the world.

If we were running this place properly, we would have an honest debate on a pharmaceutical drug program under Medicare. We are not going to have that. We would have an honest debate about health insurance for all Americans. We are not going to have that.

Mr. Chairman, this is the only vehicle that we are permitted. If Members want to move us closer to honest prices for pharmaceuticals for senior citizens and everyone else in America, vote for this amendment.

The CHAIRMAN. The gentleman from Vermont (Mr. SANDERS) has 30 seconds remaining; and the gentleman from Texas (Mr. BONILLA) has 5 minutes remaining.

Mr. SANDERS. Mr. Chairman, is the procedure that the gentleman from Texas has the right to close?

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA), as the chairman of the subcommittee, has the right to close.

Mr. SANDERS. Mr. Chairman, I yield 30 seconds to the gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Chairman, it is a shame we have not had more time for this debate because our constituents do not have time to survive when they
Mr. Chairman, the FDA was created and this important consumer protection law was created to protect our children and loved ones from this stuff. This amendment removes that protection.

I want to ask Members, in the interest of cheaper tires, are Members willing to repeal NHTSA, our Highway Safety Administration? Do Members willing to take away the consumer protections we have built around the law that says people cannot sell us tires that will blow up and flip our trucks over? In the interest of cheaper energy, are Members ready to repeal the EPA so anyone can do anything they want in this country to the environment?

Mr. Chairman, in the interest of cheaper toys and sleepwear, are Members ready to repeal the Consumer Products Safety Commission so our kids can have cheaper toys and sleepwear, but they might burn to death at night because sleepwear is flammable and nobody is looking after them?

Mr. Chairman, the FDA was created to protect us, not the companies; to protect my mom and other moms. When we passed this ban on reimportation, we did something very important. We said to our Secretary, unless we can satisfy that the drugs coming into this country are going to be safe, they are not going to kill my mother, they are not coming from these drug kitchens in Colombia and Thailand, unless the Secretary can satisfy us, keep the ban.

Do Members know what the Secretary said in the last administration? "I cannot tell you that we can satisfy you that without FDA approval these drugs are safe."

Yes, we all want cheaper drugs for our mothers and fathers; and yes, we are working on bills that say that the administration is working on a project to provide discount cards to all seniors. Yes, we ought to be concerned about the high cost of those drugs, but are we going to trade drug safety for drug prices? Are we going to put everybody at risk for the sake of a cheaper drug?

I suggest to Members this is the wrong remedy for the problem. We can all agree that is a problem. We can all agree that there is something wrong about the way that drugs are priced in America, and we are working on something in the Subcommittee on Oversight and Investigations. We can all agree that the Medicare system ought to make drugs more affordable; and the copayment is too high when seniors need treatment for cancer therapy.

□ 1300

But this is a wrong remedy. This lets these operations become legal. It takes away the operation of the Government designed to protect our seniors from this kind of an operation and says from now on, This is legal, this is okay. You can cook it up in a kitchen in Colombia, and you can cook it up in a kitchen in Thailand, using whatever systems you want, whatever unsanitary conditions you want; and you can ship it into America because we think cheaper drugs are so important, we do not care how unsafe they are.

Mr. Chairman, this Sanders amendment is dangerous. It needs to be defeated.

Mr. GARY G. MILLER of California. Mr. Chairman, I rise today to speak in opposition to the amendment offered by my colleague from Vermont, Mr. SANDERS.

In 1988, Congress passed legislation that banned the reimportation of prescription drugs because it recognized that there was a significant risk to the American people associated with counterfeit, adulterated or sub-potent medication.

In fact, recognizing the importance of quality counterfeit drugs, Congress required not only that all domestic distribution centers be licensed, but also that the FDA develop a stringent set of guidelines to regulate domestic prescription drugs.

These guidelines called for detailed record-keeping, including guidelines which outlined very specific temperature and humidity control parameters.

The Sanders Amendment clearly contradicts the reasoning behind these efforts and would instead allow unrestricted reimportation of prescription drugs.

Moreover, the Sanders Amendment would delete the provision which Congress passed last year directing the Secretary of Health and Human Services to demonstrate that any cost-savings derived from reimported drugs be passed to the American consumer.

Last December, then-HHS Secretary Donna Shalala found she could not demonstrate that the reimportation law would not jeopardize patient safety, nor could she demonstrate that savings would be passed on to consumers.

Moreover, Mr. SANDERS' amendment would likely lead to an increase in the flow of counterfeit drugs into the U.S., which is already a growing problem the Government cannot control.

At a June 7, 2001 hearing, Ms. Elizabeth Durant, Executive Director of Trade Programs at the U.S. Customs Service, testified that "perhaps as much as 90 percent of the pharmaceuticals that enter the U.S. via the mail do so in a manner that violates FDA and/or DEA requirements. . . . To offer an example, one seizure included a 3,000-tab shipment of a counterfeit drug with an expiration date of 1980. . . . We have counterfeit drugs. We have gray-market drugs. We have prohibited drugs and we have unapproved drugs. The whole gamut of illegal substances pass through our mail facility at Dulles. And this is a situation that is pretty much replicated around the country."

While I am concerned about the rising cost of pharmaceuticals in the U.S., I am more concerned that Mr. SANDERS' amendment would compromise the health and safety of millions of Americans who count on the quality and purity of pharmaceuticals approved by the FDA to treat their illnesses. What we cannot afford to do is knowingly expose American consumers to drugs and pharmaceuticals that
may jeopardize their health, and yet that is precisely what the Sanders amendment would do.

Again, I urge my colleagues to put the welfare of Americans first and vote against the Sanders amendment.

Ms. LEE of California. Mr. Chairman, I rise in strong support of the Sanders/Crowley/DeLauro prescription drug reimportation amendment to the Agriculture Appropriations bill. This amendment will lay the groundwork for lowering the cost of prescription drugs in the U.S. by 30 to 50 percent.

This amendment will allow prescription drug distributors and pharmacists to purchase FDA-approved prescription drugs from anywhere in the world at competitive and reasonable prices.

It is a shame that millions of Americans are not able to afford the outrageously high cost of prescription drugs in this country. Their quality of life continues to deteriorate while we continue to limit their access to basic health necessities.

Citizens of the United States pay the highest prices in the world for prescription drugs. Many of our constituents will travel to Mexico or Canada to buy the same drugs for a lesser value. In my district in California, the average prices that senior citizens must pay are 97% higher than the prices that Canadian consumers pay and 96 percent higher than the prices that Mexican consumers pay.

For every $1 spent in the United States for prescription drugs, those same drugs are purchased in Switzerland for $.65, the United Kingdom for $.64, France for $.51, and Italy for .49.

Why should patients have to continually compromise their health while being forced to decide which prescription drugs to buy and which drugs not to take because they cannot afford to pay for all of them. These patients cannot afford to pay such burdensome costs.

These patients are forced to gamble with their health when they cannot afford to pay for the care needed to treat their conditions. Every day, these patients have to live with the fear of encountering major medical problems because they were denied access to prescription drugs they could not afford to pay out of their pocket. Often times, these individuals must choose between buying food or medicine. With outrageously high energy costs in California right now, some seniors and other Californians have to choose between paying their electric bill or their drug bills. This is wrong.

All Americans should be entitled to medical treatment at affordable prices. The Sanders/Crowley/DeLauro amendment will allow these patients to buy the prescription drugs needed to lead a healthy and productive life.

This amendment will break the monopoly the pharmaceutical industry now has over reimportation.

Let’s stop gambling with the lives of our patients and support this reimportation amendment in order to cut these outrageous prescription drug prices. Americans deserve the right to lead healthy lives by purchasing prescription drugs at reasonable and competitive prices.

Mr. PAUL. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Vermont. As I am sure I need not remind my colleagues, many Americans are concerned about the high prices of prescription drugs. The high prices of prescription drugs particularly affect lower-income citizens since many senior citizens have a greater than-average need for prescription drugs. One of the reasons prescription drug prices are high is because of government policies which give a few powerful companies a monopoly position in the prescription drug market.

One of the most egregious of these policies is those restricting the importation of quality pharmaceuticals. If members of Congress are serious about lowering prescription drug prices they should support this amendment.

As a representative of an area near the Texas-Mexican border I often hear from constituents angry that they cannot purchase inexpensive quality pharmaceuticals in their local drug store. Many of these constituents regularly travel to Mexico on their own in order to purchase pharmaceuticals.

Mr. Chairman, where does the federal government get the Constitutional or moral right to tell my constituents they cannot have access to the pharmaceuticals of their choice?

Opponents of this amendment have been waging a hysterical campaign to convince members that this amendment will result in consumers purchasing unsafe products. I dispute this claim for several reasons. Unlike the opponents of this amendment I do not believe that consumers will purchase an inferior pharmaceutical simply to save money. Instead, consumers will carefully shop to make sure they are receiving the highest possible quality at the lowest possible price. In fact, the experience of my constituents who are currently traveling to Mexico to purchase prescription drugs shows that consumers are quite capable of ensuring they only purchase safe products without interference from Big Brother.

Furthermore, if the supporters of the status quo were truly concerned about promoting health instead of protecting the special privileges of powerful companies, they would consider how our current policies endanger safety by artificially raising the cost of prescription drugs. Oftentimes lower income Americans will take less than the proper amount of a prescription medicine in order to save money or forgo other necessities, including food, in order to afford their medications.

Mr. Chairman, I urge my colleagues to show they are serious about lowering the prices of prescription drugs and that they trust the people to know what is in their best interest by voting for the Sanders amendment to the Agriculture Appropriations bill.

Mr. CROWLEY. Mr. Chairman, I move to strike the last word.

I rise in strong support of the Sanders/Crowley/DeLauro/Paul/Rohrabacher amendment.

This language offered today is the same language I offered last year.

We again offer this amendment as a first start to provoke a discussion and get real reimportation legislation enacted into law.

This is the only way Democrats and Independents can get heard on this issue—the GOP congressional authorizing committees are not doing their jobs.

All we have seen to date was a Commerce Committee hearing held earlier this month on the horrors of reimportation—and the arguments from that hearing have hardened my resolve in supporting reimportation.

Why?

In part because of the comments from that hearing, such as Chairman TAURIQ’S opening statement where he remarked on June 7, 2001:

"The problem of counterfeit drugs is not just a phenomenon of the developing world. Our lucrative market and ineffective import controls are increasingly making the United States an attractive target for drug counterfeiters and diverters. Last month, three counterfeit prescription drugs were found in the shelves of pharmacies of several states. It is not known whether these fake drugs were made in the United States or overseas. But such a cluster of counterfeits has not been seen for years in this country."

Yes, in fact, counterfeit drugs are making it onto our shores and the legislation that was enacted to stop it—the Prescription Drug Marketing Act (PDMA) enacted in 1987, which includes section 801(d)(1) that we are striking funding for today, has not been successful in protecting consumers.

It has been tremendously successful in protecting drug company profits though.

We, as Democrats, have been trying legislative remedy after legislative remedy to address the spiraling costs of medications—and each time the leaders of this Congress have rebuffed us.

The GOP passed a fake prescription drug benefit last Congress—so weak that 178 of their members later backed my amendment to Agricultural Appropriations last year making reimportation a better alternative to lowering drug prices then their Party Plan.

This year, Congress expressed a collective round of laughter at the Drug proposal advanced by this White House—representing one of the greatest feats of bi-partisanship in recent memory.

I recognize the safety concerns advanced by Commerce Chairman TAURIQ and Ranking Member DINGELL are legitimate and I greatly respect their diligence on this issue and their hard working in protecting American consumers—their motives cannot be questioned here.

But the current laws are not working, as we all readily admit.

Something new must be done.

We cannot protect people from medications by not allowing them to have any access to affordable drugs at all—and unfortunately that is more and more the case throughout the U.S.A.

I remember the thoughts of a local pharmacist who told me that American seniors pay the highest drug prices on Earth.

Some Members will oppose this amendment on fair grounds and for valid reasons—but we offer it as a starting point for discussion to get Congress to act and act this year to lower drug prices for Americans—especially our seniors.

Let me put this in perspective, I have a constituent in Long Island City, NY who must purchase 100 capsules of Prilosec every three months for his wife. He pays almost $400 for these drugs. Diverters.

I have this letter from a gentleman who writes "Isn’t that an outrageous price for a medication my wife will have to take on a regular basis"
CONGRESSIONAL RECORD—HOUSE

July 11, 2001

Yes it is, sir. Especially, in light of the fact that this same drug that costs $400 in Queens New York, would have cost him $107 in Mexico and $184 in Canada.

Price gouging is wrong and needs to be stopped.

Price gouging medications is illegal in Canada and Mexico, and—as surprise—their drug prices are half the cost of what they are in the U.S.—even for the same drugs, with the same FDA-approved label.

This amendment this year will allow for reimportation of FDA-approved drugs and will serve as an important place marker for more comprehensive reimportation language to be included by the Democratically-controlled Senate.

Americans are turning more and more to giant super stores for their consumer needs—because they can get great bargains at prices like Wal-mart and they have no such large wholesaler to purchase their medications.

Something that is not a luxury but a necessity.

What upsets me most is that the drug companies get away with it—they give super discount in every other country in the world, because they know those governments would never allow for price gouging of their elderly.

But knowing full well they can commit this price gouging in the U.S.—they mark up their products well beyond what any reasonable senior can afford.

This price gouging must stop.

We can no longer, in good conscience, as a nation allow our seniors to ration their medications, or have to choose between paying their rent and purchasing their drugs.

Representative SANDERS and I are offering this reimportation amendment as the first of a three pronged approach to helping America’s seniors afford their medications.

Besides reimportation, we argue for the passage of the Prescription Drug Fairness for Seniors Act by Congressman TOM ALLEN of Maine.

And I hope that all of the sponsors of this amendment will join me in this fight—the goals are the same here—lowering drug prices and protecting American seniors.

This legislation would automatically lower the drug prices paid by American seniors by an average of 40 percent overnight at negligible cost to the Government by mandating an average of 40 percent overnight at negligible cost to the Government by mandating foreign wholesalers were cut out of the drug distribution system in 1987 because of the flood of contaminated, counterfeit, and mislabeled products. These shady characters have taken advantage of the appropriate public outrage over drug prices to encourage America to once again open its borders to these dangerous drugs.

Proponents of the amendments argue that if the drugs are made in America they must be safe. They are wrong. Our Committee’s investigations on the counterfeits in the 1980’s showed that American packaging and labeling was duplicated perfectly by counterfeiters entering their product as re-imports. Unfortunately, they had not duplicated the FDA vigilance that Americans believe is attached to such packaging.

Counterfeit aspirin that was imported into the U.S. as “American Goods Returned” before the PDMA put an end to it. Ask the women who took the two million counterfeit birth control pills—in packaging that duplicated Searle’s—just how good the coorks are at graphic design. The cycles, the boxes they came in, and the instructions that accompanied the pills were knocked off perfectly in Spain and in Guatemala. The Spanish product had so much excess hormone that it caused excessive bleeding. The Guatemalan product contained no active ingredient so it went undetected, except, of course, for the unwanted pregnancies that resulted.

I could go on with many more examples such as the perfectly packaged Naprosyn from Mexico that contained aspirin as the only active ingredient. That must have come as a shock to women who were sensitive to aspirin. Even the non-counterfeit products were often so poorly stored that safety was frequently compromised.

Did these counterfeiters and diverters produce any savings to the American consumer? We looked in depth at this $500 million a year market and found no evidence that consumers saved so much as a penny. No compensation was provided to unsuspecting consumers for all the risks they unknowingly assumed.

We should be able to find a way to address effectively the problem of high priced drugs and to protect consumers from risky products. The amendments offered today do nothing, and should be rejected.

Mrs. MALONEY of New York. Mr. Chairman, I come to the floor today in support of the Sanders/Crowley/DeLauro amendment.

Prescription drug costs are a life and death issue for thousands of Americans. Making these life saving and health sustaining drugs affordable for our citizens, and especially for our seniors, is simply the right thing to do.

Just look at the cost of prescription drugs in my district. Last year, I conducted three different studies in New York City that showed rampant price discrimination against uninsured seniors by pharmaceutical companies. Beyond a shadow of a doubt, New Yorkers are being stickered by inflated drug prices.

For instance, Tamoxifen—which is sold under the brand name Nolvadex—is the most frequently prescribed breast cancer drug in this nation. It is used by thousands of women across this state and across the country to treat early and advanced breast cancer. In fact, in 1998, total sales of Tamoxifen were over $520 million.

Women in my district who need Tamoxifen must pay ten times what seniors in other countries pay. According to the study I conducted, a one month supply of Tamoxifen costs only nine dollars in Canada—yet it costs over one-hundred dollars in my district. That means that, over the course of a year, a woman in my district will pay roughly twelve hundred dollars more than women in Canada.

That’s a price differential of over one thousand percent. This is a life-saving drug that thousands of women need to survive. Many women in New York are forced to dilute prescriptions they need to fight breast cancer—force cut their pills in half or in thirds—in order to get by financially. No doctor recommends this. No person deserves this.

All eight of the drugs I studied cost at least forty percent more in my district than they do abroad. The average price differential with Canada was 112 percent, and with Mexico it was 108 percent.

Prilosec, an ulcer medication and the U.S.’s top prescription drug in dollar sales in 1998, cost $49.80 for a one month supply in Canada, but cost $121.83 for a one month supply in my Congressional District, that’s a 145 percent price differential.

Prescription drugs costs are too high for America’s families and are now the largest out-of-pocket health care expense for America’s seniors.

Congress recognized this crisis last year when both the House and Senate passed a drug reimportation bill by wide margins.

Once passed, however, significant flaws were detected in the details of the bill that jeopardized our ability to ensure lower prices and safe products for U.S. consumers through the new policy.

The bill before us today tries to get us back on track by more explicitly preserving the Food and Drug Administration’s authority to ensure the safety and efficacy of a system to reimport prescription drugs.

I urge passage of this reimportation amendment which would allow U.S. pharmacists and prescription drug distributors to purchase and sell locally FDA-approved medications purchased from abroad. This measure should lower the price of prescription drugs, perhaps as much as 50 percent.

I strongly support adoption of the Sanders/Crowley/DeLauro amendment.

Mr. SLUMENAUER, Mr. Chairman, today the House of Representatives is faced with an amendment, offered by Representative SANDERS of Vermont, which attempts to address the problem of high drug prices in the United States. Seniors in the United States pay the highest prices in the industrialized world for prescription medicines and are often the victims of discriminatory pricing. This amendment, however, seriously undermines the current system that protects U.S. consumers from
reimporting potentially tainted drugs from abroad and this is why I play to vote against this measure. We must consider additional amendments to the Agriculture Appropriations bill today that attempt to accomplish similar goals, but unless they address the need for strong consumer protections, I also plan to vote against these amendments.

Prevention drugs are an increasingly vital part of health care and are the fastest growing component of health care expenditures. Spending on prescription drugs is expected to continue to rise. Seniors, who comprise only 13% of the total population, account for more than a third of the annual expenditure on prescription drugs. The average senior uses 18 prescriptions a year and these vital prescriptions are absolutely essential to their quality of life. The rising costs of pharmaceuticals, combined with the increasing reliance on drugs for medical treatments, have created a serious threat to the financial security of a particularly vulnerable population, seniors who are on fixed incomes.

We must provide relief to seniors in the United States. My concern though is that this amendment weakens our ability to ensure the integrity of drug products and could put American consumers, especially our seniors, in serious jeopardy. Counterfeit medicines have already infiltrated the U.S. market and we must make sure that any reimportation proposal addresses consumer safety and the need for thorough drug inspections. It does seniors no good to allow the importation of less costly prescription drugs if we cannot also ensure their safety and efficacy.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont (Mr. SANDERS).

The amendment was agreed to.

AMENDMENT NO. 17 OFFERED BY MRS. MINK OF HAWAII

Mr. LUCAS of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The amendment is as follows:

Amendment No. 17 offered by Mrs. MINK of Hawaii.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Oklahoma (Mr. LUCAS) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Oklahoma (Mr. LUCAS). Mr. LUCAS of Oklahoma. Mr. Chairman, I yield myself such time as I may consume.

The amendment that I am offering today will provide $3 million to be used for the rehabilitation of aging watershed dams. Public Law 106-472 authorizes USDA to assist local communities with rehabilitation of their aging flood-control dams constructed with USDA assistance. The authorizing legislation, which I authored, received widespread bipartisan support in both the Committee on Agriculture and on the House floor.

Since the authorizing legislation was signed into law, NRCS has been flooded with requests from communities for assistance on rehabilitation for their aging dams. As of March of this year, 434 communities have requested rehabilitation assistance on more than 1,400 dams in 35 States. The cost to rehabilitate these dams is estimated to be in excess of $500 million.

In fact, nearly 10,500 small watershed dams have been built in the United States since 1944. Many of these dams, which were built and designed with a 50-year life span, will reach their life expectancy over the next few years.

These watershed projects are extremely important to our communities. They provide flood control, municipal water supply, recreation, soil erosion control, water quality improvement, wetland development, and wildlife habitat enhancement on more than 130 million acres in this Nation. These dams benefit thousands of people's lives every day.

In fact, the small watershed program has proven to be one of our Nation's most successful public-private partnerships. The program represents an $8.5 billion Federal investment and an estimated $6 billion local investment in the infrastructure of this Nation. These completed small watershed projects have provided $2.20 in benefits for every $1 of cost. Very few Government projects can make that claim.

We must continue to build on this program that our predecessors started 50 years ago. I hope that my colleagues will support this very important amendment to begin the process of rehabilitating these dams before we have a tragic dam failure.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent to claim the time in opposition and to pending my support of the amendment.

The CHAIRMAN. Without objection, the gentleman from Texas (Mr. BONILLA) is recognized for 5 minutes.
(Mrs. MINK) and a Member opposed each will control 5 minutes.

Mr. BONILLA. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Texas reserves a point of order.

The Chair recognizes the gentlewoman from Hawaii (Mrs. MINK).

Mrs. MINK of Hawaii. Mr. Chairman, I yield myself such time as I may consume.

Both of these amendments go to the Agricultural Research Service. One has to do with the earmarking of $950,000 for the Hawaii Agricultural Research Center. The other is an earmark of $1,603,000 for the Oceanic Institute.

Both of these programs are long existing and have been funded at this level in the past fiscal year. Both of these programs, the Oceanic Institute and the Hawaii Agricultural Research Center, are included in the President's budget.

I think that the importance of these two amendments is to recognize and to herald the tremendous contributions that these centers have made, not only to Hawaii as a single State but to the entire United States and perhaps even globally with reference to the Oceanic Institute research.

The Hawaii Agricultural Research Center provides vital services to Hawaii's farmers, and particularly now with the loss of our sugar industry with only two plantations remaining, the existence of this center and its support is even more vital as the State struggles to find additional crops to grow on the vast acreages that are being farmed as a result of the closure of the agricultural industry. We do have tremendous potential in coffee, tropical fruits, vegetables, macadamia nuts and many other industries.

In respect to the Oceanic Institute, this program assists the expansion of aquaculture and feed manufacturing sectors and to develop new products, processes and markets for U.S. grains. The Oceanic Institute in Hawaii manages the program and is a world leader in feeds and nutrition technology with extensive experience in a variety of marine finfish.

Some of the program's research highlights in the past year have included the development of new feed formulations that enabled the production of market-size shrimp in only 8 weeks. The program has recently assumed a critical role in the development of a new technology package that offers the United States substantial worldwide competitive advantage in the domestic farming of marine shrimp.

It is because of the importance of both of these research centers that I rise today to ask this House to include special designations of these two programs in allocation of funding for the overall Agricultural Research Service.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does the gentleman from Texas insist on his point of order?

Mr. BONILLA. Mr. Chairman, it is my understanding that the gentlewoman is going to withdraw her amendments, but we are willing to work with the gentlewoman as we move toward conference on this issue. I know it is a very important issue to her.

Mrs. MINK of Hawaii. I thank the gentleman from Texas. It is very important that report language include these two projects. I am heartened to hear that the gentleman will work toward the consent when the matter goes to conference.

With that assurance, Mr. Chairman, I withdraw both my amendments.

The CHAIRMAN. Without objection, the two amendments may be withdrawn. There was no objection.

AMENDMENT OFFERED BY MR. GUTKNECHT

Mr. GUTKNECHT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. GUTKNECHT:

At the end of title VII, insert after the last section (preceding any short title) the following section:

SIC. 7 . . None of the amounts made available in this Act for the Food and Drug Administration under section 801 of the Federal Food, Drug, and Cosmetic Act to prevent an individual who is not in the business of importing prescription drugs within the meaning of section 801(g) of such Act from importing a prescription drug that (1) appears to be FDA-approved; (2) does not appear to be a narcotic drug; and (3) appears to be manufactured, prepared, propagated, compounded, or processed in an establishment registered pursuant to section 510 of such Act.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Minnesota (Mr. GUTKNECHT) and the gentleman from Texas (Mr. BONILLA) each will control 15 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. GUTKNECHT).

Mr. GUTKNECHT. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, this debate is going to be very similar to the debate we had just a few minutes ago concerning the price of prescription drugs. I supported the Sanders amendment even though it was a bit broader than the amendment that I offer. I hope Members will take a few minutes to at least read the amendment that I am offering. Essentially what I am saying is, let us not stop law-abiding citizens from importing drugs from G-8 countries for personal use. The issue again is price. If Members do nothing else, please pay attention to this chart. Because at the end of the day, someday later we are all going to have to try at least to explain this, and there is no explanation.

Americans, it is a fact, it is a dirty little secret in three different ways, we are paying all the research cost for all the other countries in the world, and we are going it in three ways: first of all in the prioritization that we pay for prescription drugs, as Members can see, anywhere from 30 to 70 to 80 percent more than other countries in Europe; secondly, we are paying for the research in the money that we put into the NIH and some of the other science programs here in the United States. It amounts to almost $14 billion a year that the taxpayers are subsidizing research; and, finally, we subsidize the research through the Tax Code. When by law manufacturers of this country says, well, we are spending billions of dollars on research, that is true. The last year that we have numbers for, they spent about $12 billion on research. But do understand they pay hefty taxes, and as a result they can write off all of that research and in some cases they even qualify for research and development tax credits. So the real net cost to the pharmaceutical industry is far lower than most people say.

What we are saying in this amendment is the game has to stop. We have been subsidizing Europe for a long time. It is time for us to stop subsidizing the starving Swiss.

My amendment is very simple. It simply says that an individual who is not in the business of reimporting drugs shall have the right to bring those drugs in either on their person or by mail from any country.

This does not even include Mexico.

We heard this big safety issue. We are going to talk a little bit about that.

The truth of the matter is most of the safety issues that were talked about in the previous amendment exist today. We are not changing anything. We are not going to change the law. We are not going to tell people that they can bring in adulterated drugs. We are talking about law-abiding citizens that have a legal prescription that are bringing in FDA-approved drugs made in pharmacetical industries in some countries.

We have a problem right now, as I mentioned earlier, in terms of contamination on all of the food and produce we bring in. Yet we do not hear this ballyhoo because there is not a company out there, there is not an industry out there like the pharmaceutical industry that stands to make billions of dollars.

Make no mistake, at the end of this debate, this is about money. I believe my simple little amendment that simply opens the door for personal importation could at the end of the day save American consumers upwards of $30 billion. Now, if Members wonder why individuals and groups have been spending millions of dollars over the last couple of weeks, it is about money.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.
Mr. Chairman, once again we have an effort here to solve one problem by creating another; and in fact it could create a series of additional problems. Let me just mention once again a few of the facts that have been stated clearly by the Food and Drug Administration. This presents a clear danger, a potential danger, a serious threat to consumers who could use drugs that are dangerous, that have not been stored under proper conditions, have not been manufactured properly, do not conform to the standards of drug manufacturing in our country. This is simply something that, as we have just heard in the debate in the last half-hour or so, would not be in the best interest of consumers.

We are all in agreement here on both sides of the political aisle that we want to do something about the high cost of drugs in this country, but we want to do it the right way and not add language on an appropriations bill that is not supported by anyone who has been working on this issue in a very serious and sincere way on the authorizing committees for months now. I rise in strong opposition to this amendment and would urge its defeat.

Mr. Chairman, I reserve the balance of my time.

Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would just bring to the attention of the body that last year a much broader amendment than the one that I am offering, that would have had blanket reimportation, passed this House by a vote of 363-to-12. So we are passing the House overwhelmingly, Congress said last year on a bill that had blanket reimportation, passed this one that I am offering, that would have the attention of the body that last year assumed.

Mr. GUTKNECHT. Mr. Chairman, I yield 1 minute to the gentleman from Tennessee (Mr. BRYANT).

Mr. BRYANT. Mr. Chairman, it is with great respect that I rise in opposition to the amendment of my good friend the gentleman from Minnesota (Mr. GUTKNECHT). I did support this last year. But since that time, as a Member of the Committee on Commerce, we have held numerous hearings on the safety of drugs and the possibility of reimporting these drugs; and I have seen very direct evidence that has caused my concern to change enough to oppose that amendment this year.

We have seen films of laboratories overseas that produce counterfeit drugs. We know that drugs are tampered with, with the effectiveness of it is sometimes wasted because of age. The FDA has no way to protect our American citizens from this type of action; and my concern is when it is all said and done, when somebody is actually hurt because of this or someone actually dies because the medicine is paint and not really medicine, what are we going to do about it? What is that consumer going to do? Who is that consumer going to seek redress from? Surely we cannot expect the real drug company to stand up and stand behind their product. How are they going to get to Europe and who are they going to sue there? How are they going to find these people to be adequately and fairly compensated for these injuries and deaths that are surely going to come into this?

Because of this, I do have concern, even though as I said before I voted for this last year, and I would urge my colleagues to oppose this amendment this year.

Mr. GUTKNECHT. Mr. Chairman, I yield 2 1/2 minutes to the gentlewoman from Missouri (Mrs. EMERSON).

Mrs. EMERSON. Mr. Chairman, I rise in support of the Gutknecht amendment. Let me say as one of the Members of the subcommittee who tried to shepherd through last year's reimportation bill, I find it incredulous that every single person who has spoken today against the Sanders amendment or the Gutknecht amendment is again.

Now, of course, there was not a recorded vote on the amendment of the gentleman from Minnesota (Mr. GUTKNECHT) but there was the amendment of the gentleman from Vermont (Mr. SANDERS), or rather the amendment of the gentleman from New York (Mr. CROWLEY) which was identical to the amendment of the gentleman from Vermont (Mr. SANDERS), and every person who was in favor of it is opposed at this time and that is interesting, because I understand PHRMA, the trade association for the pharmaceutical companies, has spent millions of dollars this week advertising against this.

Needless to say, this is a very critical issue. I have constituents who have to go to Canada to get drugs for their children, one of whom has a very severe form of epilepsy. This woman is a single mom and not able to afford to buy this drug in the United States because in Canada, of course, it is only a third of what it costs here in the United States.

The Gutknecht amendment simply allows the reimportation of American-manufactured drugs, in approved, safe FDA facilities, to be brought back here without punishment. I think that it is very important in a nonelection year to be in favor of lower prescription drug costs.

I might also add that safety really is not an issue with regard to the Gutknecht amendment. It preserves all of the FDA's legal duty to approve all imports. And under the current law, FDA's mandate is to stop drugs that appear to be unapproved; and nothing in the Gutknecht amendment changes that. So I would certainly urge all of those people who supported this and other bills last year to vote for it again this year.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from California (Mr. WAXMAN), the author of the Hatch-Waxman Act.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to the Gutknecht amendment. I am opposed to it because the
amendment is so vaguely drafted it can be interpreted as either ineffective or dangerous, but under no reading is it worth our time. I urge the Committee on Commerce to take up legislation to right this wrong, but the Gutknecht amendment does not fix the problem.

My reading of the amendment is that a drug must be FDA approved to be allowed to be imported under this amendment. Since under the law a drug cannot be FDA approved unless it is accompanied by appropriate labeling and since virtually no foreign drug will have this labeling, I believe that few, if any, drugs will be allowed to be imported under this amendment.

There is a different reading of the amendment that it would allow importation if the basic chemical substance has been approved by the FDA. If this is the case, the amendment is dangerous because it would allow drugs to be brought in without allowing FDA to ensure that they are not adulterated not misbranded and are indeed the right dosages and strengths. Moreover, all the consumer labeling that we have worked so hard to assure will be missing.

Under this reading, once FDA approves a drug in theory it may not ensure that it is safe and effective in practice. So that is the choice. Is the amendment ineffective or bad? Either way, I oppose it and urge all of my colleagues to vote against it.

Mr. STUPAK. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. STUPAK).

Mr. STUPAK. Mr. Chairman, I thank the gentleman from Texas (Mr. BONILLA) for yielding me this time.

Mr. Chairman, on this amendment, which I oppose, I wish to strongly agree with all of those who have argued that pharmaceuticals are too high, and that drug companies discriminate against U.S. citizens in their pricing policies. I would urge the Committee on Commerce to take up legislation to right this wrong, but the Gutknecht amendment does not fix the problem.

My reading of the amendment is that a drug must be FDA approved to be allowed to be imported under this amendment. Since under the law a drug cannot be FDA approved unless it is accompanied by appropriate labeling and since virtually no foreign drug will have this labeling, I believe that few, if any, drugs will be allowed to be imported under this amendment.

Ranking Minority Member, House of Represent-
atives Appropriation bill, and in follow-up to
July 5, 2001, regarding Representative Gil
States. This is in response to your letter of
Thank you for your continued interest in the
to the presentation of this report.

For these reasons, we respectfully oppose
the foregoing amendments to H.R. 2390.
Thank you for your attention to this matter.
If we may offer additional assistance, we
trust that you will not hesitate to call upon
us.
The Office of Management and Budget has
advised us that there is no objection from the
standpoint of the Administration’s program
to the presentation of this report.
Sincerely,
WILLIAM B. SIMPKINS,
Acting Administrator.

DEPARTMENT OF HEALTH AND HUMAN
SERVICE
Hon. W. J. “Billy” Tauzin,
Chairman, Committee on Energy and Commerce,
House of Representatives, Washington, DC.
Hon. John Dingell,
Ranking Minority Member, House of Represent-
atives, Washington, DC.

Dear Mr. Chairman and Mr. Dingell:
Thank you for your continued interest in the
safety of medicines available in the United
States. This is in response to your letter of
July 5, 2001, regarding Representative Gil
Gutknecht’s proposed amendment to the FY
2002 Agriculture, Rural Development, Food
and Drug Administration and Related Agen-
cies Appropriation bill, and in follow-up to
questions raised by Committee staff.
As you know, the amendment offered by Mr. Gutknecht would prohibit the Food and
Drug Administration (FDA or the Agency)
from using appropriated funds to enforce sec-
tion 801 of the Food, Drug, Cosmetic
(FD&C) Act to prevent the importation of
personally controlled prescription drugs
from a country other than the United States
if it is determined that the drug is approved
under current law.

1. Section 801 of the FD&C Act requires
the FDA to take certain actions when the drug
is determined to be unsafe or when the drug is
a prescription drug that is approved under
current law.

2. The Gutknecht Amendment would also
require the FDA to determine whether a
country a prescription drug is being im-
ported is a country referred to in section 804(f)
of the FD&C Act.

As you know, under current law, FDA can
send a warning notice if it first makes a de-
termination that the imported drug appears
to be adulterated, misbranded, or in violation
of the FD&C Act. The amendment could be
construed to allow FDA to continue sending
‘‘warning letters’’ to individuals not in the
business of importing prescription drugs,
whether or not a foreign country is listed in
section 804(f).

No, currently FDA does not have the re-
sponsibility to determine the country from
which the drug was imported in order to have
the duty to make such a determination.

Let us not be fooled by the real
thing. Let us make sure it is the real
ting and not a counterfeit. Reject this
measure.

Mr. GUTKNECHT. Mr. Chairman, I
yield myself such time as I may con-

WILLIAM K. HUBBARD,
Senior Associate Commissioner for
Policy, Planning, and Legislation.

Let us not be fooled by the real
thing. Let us make sure it is the real
thing and not a counterfeit. Reject this
measure.

Mr. GUTKNECHT. Mr. Chairman, I
yield myself such time as I may con-

WILLIAM K. HUBBARD,
Senior Associate Commissioner for
Policy, Planning, and Legislation.

Let us not be fooled by the real
thing. Let us make sure it is the real
thing and not a counterfeit. Reject this
measure.

Mr. GUTKNECHT. Mr. Chairman, I
yield myself such time as I may con-

WILLIAM K. HUBBARD,
Senior Associate Commissioner for
Policy, Planning, and Legislation.

Let us not be fooled by the real
thing. Let us make sure it is the real
thing and not a counterfeit. Reject this
measure.

Mr. GUTKNECHT. Mr. Chairman, I
yield myself such time as I may con-

WILLIAM K. HUBBARD,
Senior Associate Commissioner for
Policy, Planning, and Legislation.

Let us not be fooled by the real
thing. Let us make sure it is the real
thing and not a counterfeit. Reject this
measure.

Mr. GUTKNECHT. Mr. Chairman, I
yield myself such time as I may con-

WILLIAM K. HUBBARD,
Senior Associate Commissioner for
Policy, Planning, and Legislation.
Mr. Chairman, in terms of those pictures, I just want to point out that those happened years ago and are not happening today. Most importantly, I believe I am correct, those drugs were actually purchased on shelves in the United States. These are not drugs being brought in by Americans going to other places.

Mr. Chairman, I yield 1 minute to the gentleman from Vermont (Mr. SANDERS).

Mr. SANDERS. Mr. Chairman, I thank the gentleman from Minnesota (Mr. GUTKNECHT) for yielding me the time.

Mr. Chairman, whether the idea comes from a Republican or an Independent or a Democrat, who is trying to lower the outrageously high cost of prescription drugs in this country, there is no question that the pharmaceutical industry is being brought in by Americans going to other places.

These are not drugs that we think that the FDA cannot stop a drug if it appears to be in compliance, even if it is not so good. In fact, as some have suggested this afternoon, it is outright fraud, what we are talking about. We are saying control this, but let us give American consumers the savings.

Secondly, the amendment makes a number of references to the requirements that these incoming drugs appear to not violate certain FDA rules and are not controlled substances. The problem with this approach is one cannot tell whether or not they are, in fact, safe drugs. On the Committee on Energy and Commerce, we saw some drugs that looked perfectly fine and they were made out of yellow paint. So one cannot tell upon inspection whether or not they are a controlled substance or whether or not they are legitimate.

Third and most importantly, this amendment directly affects section 801 of the Food, Drug and Cosmetic Act. This section is the safety section which provides the U.S. Customs Service and FDA the ability to process and examine foreign shipments of drugs to prevent potentially tainted, adulterated, or counterfeit drugs from being delivered to unsuspecting customers.

I want to also talk about safety, because is it safe not to take your Lipitor, is it safe not to take your Zyrtect? This is the issue that seniors and everyday Americans are faced with, not taking their drugs because it is too expensive to.

We appropriated $23 million to the FDA. We are not bypassing them. We are saying control this, but let us give American consumers the savings.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. UPTON).

Mr. UPTON. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. WELDON).

Mr. WELDON of Florida. Mr. Chairman, I rise in support of the Gutknecht amendment. I practiced medicine for 15 years, internal medicine. I treated diabetes, heart disease. I wrote a lot of prescriptions, 100 to 200 prescriptions a day.

Most of the criticisms that have been raised by this amendment I think can be worked through and solved. What this really boils down to is there are millions of senior citizens in the United States who cannot afford their prescription drugs, and, for many of them, going to Canada or doing a mail order arrangement is a very nice solution to the cost problems.

To say that this is so dangerous, to me, I think, is a little bit of a red herring. In terms of the appearance language, as I understand it, that is the standard in the law as it currently exists. The gentleman from Minnesota (Mr. GUTKNECHT) was just following the current standard.

This amendment will help a lot of people. The majority of seniors have a prescription plan that is paid for by their previous employer, so this is not
going to affect them. But, for those in need, and I used to take care of those people, this can be very, very helpful.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. NORWOOD).

Mr. NORWOOD. Mr. Chairman, I thank the gentleman for yielding me time.

Mr. Chairman, we all want to do whatever we can do to lower the prescription drug costs for patients, and the sponsors of this amendment obviously intend to do just that. My friend the gentleman from Minnesota (Mr. GUTKNECHT), that is what he is after. But there is more to this than just lowering the cost. The corresponding cost to public safety under this amendment is simply unacceptable.

Under this amendment, overseas scam artists can counterfeit a label, claiming their product is a brand name, and we ban the FDA from even investigating? Would you vote to ban the FDA from investigating medications prescribed in this country? Even when they suspect exactly what is happening, the FDA is banned from investigating.

Mr. Chairman, I, too, wrote a lot of prescriptions as a practicing dentist for 25 years before I came here. I can tell you, America’s health providers must know beyond any doubt that the medicines that they give their patients are what they say on the label.

Now, I know that some medications can come in, and it does save some people some money. But I do not want it imported through the port of Savannah to be spread out through my State, not knowing what is in that medication.

Mr. GUTKNECHT. Mr. Chairman, I yield 1 minute to the gentleman from Maine (Mr. BALDACCI).

Mr. BALDACCI. Mr. Chairman, I would like to thank the gentleman for introducing this amendment today, which is similar to his amendment which was passed with broad support last year during the consideration of the agriculture appropriations bill.

Living in a border State, many of my constituents are burdened with large prescription bills and travel to Canada to purchase their medication. This is a hard trip for these people who are driving for up to two hours because of the high cost of prescription drugs in this country.

Most of my constituents who board buses to Canada are elderly and in need of medication to manage chronic conditions. They rely on these medications to keep them out of costly and unnecessary hospital care. This amendment enables Americans to obtain their medications from Canada through personal reimportation.

We must ensure that all of our constituents have access to these more affordable prescription drugs. Certainly reimportation is not a panacea, it is not the answer to this problem in itself, but it is a step, and it is a step, an important step, in the right direction, and important to the constituents that we represent.

Mr. Chairman, I urge my colleagues to support the Gutknecht amendment.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Chairman, there are some concerns that have been raised here by the DEA. They sent a letter to the gentleman from Louisiana (Chairman TAUZIN) and the ranking member, the gentleman from Michigan (Mr. DINGELL), dated July 11, 2001, which I will refer to and have placed in the record.

When you look at the actual language, two of the concerns that they raise in the debate here today is this issue of appearance.

Under the present law, the FDA can stop drugs at the border if they appear not to be approved. That is sensible and workable. But the new Gutknecht amendment shifts the burden. The Gutknecht amendment says the FDA cannot stop a drug if it appears to be in compliance. If it appears to be in compliance.

Then it goes even one step further. It says you cannot prevent an individual who is not in the business of importing a prescription drug. This is going to be a safe haven for defense lawyers. They are going to love this. They are going to attack a lot of cases.

Let me refer here to the DEA. DEA says, you know, this will create an undue burden on law enforcement to require the government to prove that someone is in the business of importing prescription drugs. This is going to be a safe haven for defense lawyers. They are going to love this. They are going to attack a lot of cases.

One of the proposed amendments would prohibit the FDA from using any of its appropriated funds to prevent a person “who is not in the business of importing prescription drugs” from importing from certain specified countries “FDA-approved” prescription drugs that are not controlled substances. This proposal would be in conflict with the Controlled Substances Act (CSA), which is DEA’s governing statute. The basic foundation of the CSA is the “closed” system of distribution of controlled substances under which all persons in the legitimate distribution chain (manufacturers, wholesalers, and retailers) must be registered with DEA and maintain strict accounting for all transactions. This regulatory scheme, administered by DEA, is designed to prevent diversion of controlled substances into illicit channels. However, even with no control over the distribution chain and prevention of diversion where American consumers purchase their drugs abroad. Somewhat similar to the law that the FDA, or the FDCA, cannot be effectuated where American consumers purchase their drugs abroad. Among the ways that the FDCA protects the American public is by requiring good manufacturing practices, proper labeling, and sales handling to prevent adulteration. There is no way to ensure such protections to American consumers if they are allowed to purchase drugs from foreign sellers without FDA oversight.

We recognize that the proposed amendment states that it does not apply to controlled substances. However, despite this wording, the proposed amendment would provide a potential loophole that could be exploited by traffickers in controlled substances. Every day, prescription drugs, including controlled substances, are illegally shipped into the United States by mail or private courier. The controlled substances in this fashion do not label their packages as containing controlled substances. Under the proposed amendment, drug traffickers could be looking to traffickers in controlled substances into the United States marked “FDA-approved noncontrolled substance” and the FDA would be powerless to take any investigative action against the United States Customs Service (USCS) or DEA in intercepting these illegal shipments.
An additional concern with the proposal is the risk of "an individual drug being in the business of importing prescription drugs." This terminology is vague, impractical, and inconsistent with that used historically in drug laws. The FDCA and the CSA have always used the concept of "registration." Under the FDCA, only those manufacturers registered with the FDA may import prescription drugs. Under the CSA, persons must be registered with DEA to import controlled substances. Moreover, it would be an undue burden on law enforcement to force drug traffickers to require the government to prove that someone is "in the business of importing prescription drugs before even commencing an investigation." The volume of prescription drugs simply claim they are "not in the business of importing prescription drugs" in order to stifle investigation of potential criminal activity.

As with the proposed amendment described above, another proposal would likely be exploited by drug traffickers. The FDCA would prevent the FDA from enforcing section 801(d)(1) of the FDCA (21 USC 381(d)(1)), which prohibits the reimportation into the United States of prescription drugs, except by the manufacturer of the drug. Under this proposal, a drug trafficker could stymie legitimate efforts by the FDA to prevent illegal drug shipments into the United States simply by attaching a deceptive label to the shipment (e.g., by labeling a shipment of controlled substances as containing "FDA-approved, reimported prescription drugs").

DEA, the FDA, and the USCSs are currently facing enormous challenges on many fronts with respect to prescription drug importation and smuggling. Information obtained from the USCSs indicates that there is an increased volume of prescription drugs being imported through the mail as a result of the Internet. Although the CSA clearly prohibits importation of controlled substances in this manner, the FDA and USCSs must inspect each package to ascertain the contents. Identifying a drug by its appearance and labeling is not an easy task. From a practical standpoint, we cannot examine every drug product and accurately determine the identity of such drugs or the degree of risk they pose to the individual who will use them. This concern is true since these drugs are often intentionally mislabeled. Shipments from countries identified in the section 906(f) of the FDCA have been the source of a large amount of controlled substances that have been illegally imported. Additionally, the USCSs inspectors on the southern and northern borders must determine whether each traveler entering the United States with a drug is complying with the FDCA and the CSA. By preventing the FDA from enforcing section 801(d)(1) of the FDCA regarding the importation of drugs, these amendments could be a windfall for criminals, giving them a new way to hide their activities behind a new restriction on law enforcement.

For these reasons, we respectfully oppose the foregoing amendments to H.R. 2230. That said, attention to this matter. If we may be of additional assistance, we trust that you will not hesitate to call upon us.

The Office of Management and Budget has advised that there is no objection from the standpoint of the Administration's program to the presentation of this report.

Sincerely,

WILLIAM B. SIMPKINS,
Acting Administrator.
Mr. Chairman, it could not have been said better than by the gentleman from Michigan (Mr. DINGELL), the ranking member of the Committee on Energy and Commerce: “I wrote this provision because we had counterfeiting years ago. If we change this provision, we will have counterfeiting in the future.”

Defeat this amendment. Stand up for the safety of our pharmaceuticals in this country.

Mr. FRELINGHUYSEN. Mr. Chairman, I rise in opposition to the Gutknecht amendment.

Like the Sanders amendment, this amendment would expose our constituents to potentially unsafe and harmful drugs. We all want to do more to help our seniors with access to affordable medicines but exposing them to potentially unsafe medicines as a way to do so is unacceptable.

As Members of the authorizing committee will rightfully argue, any proposed changes to the consumer safety standards in our country—a system that now ensures our medicines are the safest in the world—should only be done after thorough investigation and consideration.

To date, that investigation has shown that the Customs Service and the FDA are already overwhelmed at the border and at international mail facilities with drugs being shipped in for personal use and only a small portion of those shipments are currently investigated for their safety. In fact, our health and safety experts are recommending that we strengthen protections against these imported mail order drugs, not weaken them.

And if you won’t heed the warnings of the experts, listen to the people who rely on us to keep their medicines safe. The ALS, Lou Gehrig’s Association wrote with their concern.

This amendment would deprive the FDA, pharmacies and thus, our patients and families of the confidence we now have that our medicines are safe, have been properly stored, and are not counterfeit.

The Gutknecht amendment would only compound the safety risk to our constituents of counterfeit and unsafe medicines. I urge opposition to the amendment.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GUTKNECHT. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT) will be postponed.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. KUCINICH:

At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 7. One of the funds made available in this Act for the Food and Drug Administration may be used for the approval or process of approval, under section 512 of the Federal Food, Drug, and Cosmetic Act, of an application for an animal drug for creating transgenic salmon or any other transgenic fish.

The CHAIRMAN. Pursuant to the order from the House of Representatives, June 28, 2001, the gentleman from Ohio (Mr. KUCINICH) and a Member opposed each will control 15 minutes.

The CHAIRMAN. The gentleman from Ohio (Mr. KUCINICH) will be recognized.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume.

I offer this amendment today to ensure the livelihood of commercial fishers and protect our oceans, lakes and streams. This amendment is a reasonable and moderate safeguard. It will delay FDA approval of genetically engineered fish for 1 year.

This amendment is necessary because commercial fishers and environmentalists have raised concerns that GE fish may pose ecological risks that have not been carefully considered by Federal marine agencies. This amendment corrects this situation by providing a 1-year moratorium, giving Congress the opportunity to investigate and authorize an agency with appropriate population clear authority to regulate the environmental impacts of genetically engineered fish.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I rise in opposition to the amendment, and I yield myself such time as I may consume.

Mr. Chairman, I recognize that there are legitimate concerns for the safety of genetically engineered animals, including those contained in these imported mail order drugs, not weakens them.

And if you won’t heed the warnings of the experts, listen to the people who rely on us to keep their medicines safe. TheALS, Lou Gehrig’s Association wrote with their concern.

This amendment would deprive the FDA, pharmacies and thus, our patients and families of the confidence we now have that our medicines are safe, have been properly stored, and are not counterfeit.

The Gutknecht amendment would only compound the safety risk to our constituents of counterfeit and unsafe medicines. I urge opposition to the amendment.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GUTKNECHT. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT) will be postponed.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. KUCINICH:

At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 7. One of the funds made available in this Act for the Food and Drug Administration may be used for the approval or process of approval, under section 512 of the Federal Food, Drug, and Cosmetic Act, of an application for an animal drug for creating transgenic salmon or any other transgenic fish.

The CHAIRMAN. Pursuant to the order from the House of Representatives, June 28, 2001, the gentleman from Ohio (Mr. KUCINICH) and a Member opposed each will control 15 minutes.

The CHAIRMAN. The gentleman from Ohio (Mr. KUCINICH) will be recognized.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume.

I offer this amendment today to ensure the livelihood of commercial fishers and protect our oceans, lakes and streams. This amendment is a reasonable and moderate safeguard. It will delay FDA approval of genetically engineered fish for 1 year.

This amendment is necessary because commercial fishers and environmentalists have raised concerns that GE fish may pose ecological risks that have not been carefully considered by Federal marine agencies. This amendment corrects this situation by providing a 1-year moratorium, giving Congress the opportunity to investigate and authorize an agency with appropriate population clear authority to regulate the environmental impacts of genetically engineered fish.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I rise in opposition to the amendment, and I yield myself such time as I may consume.

Mr. Chairman, I recognize that there are legitimate concerns for the safety of genetically engineered animals, including those contained in these imported mail order drugs, not weakens them.

And if you won’t heed the warnings of the experts, listen to the people who rely on us to keep their medicines safe. TheALS, Lou Gehrig’s Association wrote with their concern.

This amendment would deprive the FDA, pharmacies and thus, our patients and families of the confidence we now have that our medicines are safe, have been properly stored, and are not counterfeit.

The Gutknecht amendment would only compound the safety risk to our constituents of counterfeit and unsafe medicines. I urge opposition to the amendment.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GUTKNECHT. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT) will be postponed.
I oppose this amendment because it does not give the FDA, the experts in this field, the power to make informed decisions about the safety of transgenic fish. Congress does not possess the depth of scientific knowledge needed to determine the safety of transgenic fish. We should go forward with the review. There is also already a comprehensive regulatory process at FDA's Center for Veterinary Medicine to evaluate any risk associated with transgenic species.

Now, the fundamental flaw also in the Kucinich amendment is that it is not restricted just to transgenic salmon, but applies more broadly to transgenic fish. For example, the amendment would severely hamper ongoing research efforts, including catfish research. Catfish is the Nation's largest commercially farmed fish, generating over $500 million in revenue to farms covering over 190,000 acres in 13 States and is extremely important to my home State of Mississippi. Also, research on transgenic catfish is targeted to the development of disease-resistant stocks and novel veterinary medicine. This research is vital because catfish farmers can identify disease and, once identified, can remove the single greatest barrier to improved farm production and human health.

Mr. Chairman, U.S. agriculture producers and consumers have benefited greatly from advances in transgenic technology and in plant sciences. These new tools allow farmers to produce better products, while reducing chemical use, which provides a tremendous benefit to our environment. In addition, biotechnology holds the keys to eliminating world hunger and wiping out global poverty. While this technology has not been used widely in animal production, for results similar to those that we have seen within the realm of plant science is evident.

Let me just close real quick by saying, oppose the Kucinich amendment. Stand for sound science. Do not stick our heads in the mud. This is a great technology that will make species stronger, healthier and better.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume.

For the record, this amendment does not restrict any research funding. Now, in case my colleagues did not hear that, this amendment does not restrict any research funding. It only restricts FDA funding related to their approval of the fish, but they do not do research. Any research funding comes from other USDA research accounts, and that is not impacted by this amendment.

Mr. Chairman, I yield 4 minutes to the gentleman from Oregon. Mr. DeFazio, whose work on this amendment I appreciate.

Mr. DeFazio. Mr. Chairman, let us just get this straight one more time: no impact on research. Companies that are investing in research are free to continue to research. They are free to continue to research if they like.

But what we want is a full scientific analysis of the potential impact of the release of these transgenic fish into the environment. That is what we are talking about. The FDA has no qualification in the area of environmental science. They admit it. They have deemed, under their authority, that transgenic fish are new drugs. Therefore, they have the authority to pass on the viability of a new drug and the safety of a new drug; but the drug that they are approving is a living fish, a fish that will grow at many times the rate of its natural cousins; and it will outcompete them for food, outcompete them for mating activity, and ultimately lower the viability of the species. The agencies, the FDA, the experts in this area, have not evaluated the environmental impacts.

They say, "Do not worry, they will not be able to mate." Then the same companies that are manufacturing these transgenic fish admit that, "Actually, our process is not quite foolproof, some will mate." But do not worry about it, do not worry about it, we do not think there will be a problem.

The companies go on to say that they have not evaluated the potential impact on native fish stocks. They have not evaluated the environmental impacts. But they say, "Do not worry, the FDA has approved it."

The FDA has approved transgenic fish as a new drug, not as a living creature to be released into the environment to interbreed with existing species. This is extraordinary.

The agency that should have jurisdiction perhaps would be the National Marine Fisheries Service. They know about fish. Maybe it would be the Environmental Protection Agency. They know a little bit about the environment perhaps would be the National Marine Fisheries Service, not the Food and Drug Administration.

That is all we are asking for here. It is a simple request: Bring in an agency that knows something about fish, not the people at the FDA. Find one person at the FDA who has a degree in marine biology and I will buy dinner. There are not any out there. They do not know a darned thing about this issue or the potential impacts on the environment and other species of fish.

So this is a very, very prudent and conservative amendment. I urge Members to adopt it.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky (Mr. WHITFIELD).

Mr. WHITFIELD. Mr. Chairman, I thank the gentleman for yielding time to me. I rise reluctantly to oppose this amendment today, because of my respect for the gentleman from Ohio (Mr. KUCINICH), a good friend of mine. But I think his amendment that would cut off funding for the FDA to go through the approval process or issue the final approval is bad policy.

I do not believe the anti-biotech position is supported by the facts. Even the Washington Post in this Monday's editorial entitled "Food Fight" called efforts to ban biotech murderous nonsense.

"Is this technology safe? No test has suggested that genetically-engineered crops harm human health. On the other hand, a lack of plentiful, cheap food harms human health enormously. Half the children in South Asia and one-third in sub-Saharan Africa are malnourished today. Among other consequences, these children suffer iodine deficiency disorder, which causes mental retardation, and vitamin A deficiency, which causes blindness.

"Some anti-genetic activists say the poor will not be able to afford or benefit from these new genetic products."

They say also that the so-called "green
revolution’, which was supposed to conquer hunger and in their view did not. “The green revolution, which involved improving seeds and fertilizers and pesticides, actually more than doubled cereal production in South Asia between 1970 and 1995. Despite enormous population growth during that period, it reduced the malnutrition rate in the world from 40 percent to 23 percent.”

So what the green revolution began, the gene revolution can continue. Today’s amendment would stop the approval process or the approval. I think that is a mistake. I urge my colleagues to oppose the amendment.

Mr. KUCINICH. Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the gentleman from Idaho (Mr. Simpson).

Mr. SIMPSON. Mr. Chairman, I thank the gentleman for yielding time to me.

Mr. Chairman, I have heard several times on the floor that this does not stop pending research, all it does is stop funding for final approval by the FDA of that research. We might as well stop funding for research, because who is going to put money into the research if there is no provision for final approval for use of that research once it is done?

The FDA has the legal authority to regulate products derived from transgenic animals. Although significant public and private research to develop commercially useful transgenic fish is ongoing, none have completed the FDA process at this time. Products regulated as new animal drugs in the United States are subject to rigorous premarket requirements to determine effects on consumer food, animal, and environmental safety. This process includes targeting animal safety, safety to the environment, and safety for consumers who eat foods derived from genetically-engineered animals.

The Center for Veterinary Medicine intends to use various approaches, including a contract with the National Academy of Sciences, to identify further environmental safety issues associated with the investigation and commercial use of transgenic animals.

Mr. Chairman, we will cooperate closely with other Federal and State agencies that have related authorities, such as the Fish and Wildlife Service and the National Marine Fisheries Service, in the case of transgenic Atlantic salmon. Last year, the U.S. National Academy of Sciences concluded that the regulatory system for biotech foods is appropriate and effective.

These are some of the reasons why this amendment is strongly opposed by a coalition of agricultural interests, including the American Farm Bureau Federation, the American Soybean Association, the Grocery Manufacturers of America, the National Corn Growers Association, the National Cotton Council, the National Fruit Processors Association, and many, many more.

Mr. Chairman, nothing in the gentleman’s amendment stops research. But what it does is it says let us take a pause for thought here with the FDA. Let us take a look as a Congress to investigate and authorize the appropriate agency with environmental expertise and clear authority to regulate the impacts of these genetically-engineered fish, wherever that might be.

I fully support the amendment and urge adoption of this amendment.

Mr. BONILLA. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Texas (Mr. Brady).

Mr. BRADY of Texas. Mr. Chairman, there is a reason America has the highest standards and the safest foods in the world, safer than Europe, more nutrition than Asia, using less pesticides and preserving more of the environment than any other Nation in the world. The reason is that time and again America has refused to inject politics into our food safety process.

However, that is what this amendment does. It contaminates our scientifically sound food safety process with politics. There is no scientific reason for the moratorium. The FDA already requires all food applicants, whether they are scientifically improved or not, to meet their highest safety standards, not just for human food consumption but for animal welfare and environmental safety.

This amendment not only does not contribute to food safety, it actually harms it, because it says no matter how beneficial, no matter how strong the science, no matter how strong the science, this amendment stops research. But we cannot even consider it. This does discourage research into aquaculture breakthroughs which help us develop fish stocks that are healthier, more abundant, and more immune to disease.

That is important not just to farm catfish, not because we have decimated the world’s fishing, but it helps to save the 30 percent of fish killed needlessly each year because of illness. If fish are healthy, the food is going to be healthy.

Finally, this amendment feeds the European hysteria, and feeds upon normal people who have not thought about the progress and benefits of biotechnology, too. The fact of the matter is that we produce more food on less land, more environmentally safe food with less pesticides in America and around the world because of biotechnology.

At Texas A&M, which I represent, we work with the Medical Center in Houston to develop plants and vegetables that have cancer-fighting oxidants. As we said here today, scientists have rice that will address the vitamin A deficiency which could help prevent 500,000...
children each year from going blind in this world.

Mr. KUCINICH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to point out, there seems to be some misunderstanding about the purpose of this amendment. It is not a ban. It is a 1-year moratorium to begin to study the effects on the environment, on consumers.

I also want to point out that something the Washington Post cited on May 19, 2001, basically supporting the approach of the gentleman from Oregon (Mr. DeFazio).

Mr. Chairman, the Post points out that the FDA has classified what they call genetic enhancement, these bigger fish, animals, Now, I follow this. The FDA says it is a drug for animals. That technically means, according to the Post, the main task of its review will not be to look at the effects of the fish on the environment or fish on the consumers, but to study the effect of the growth hormone on the fish. That is all the FDA does.

So here we have people advocating the right of fish to have growth hormones, and saying that that is more important than the right of people to be defended against possible adverse human health consequences, or the right that we have and the responsibility we have to protect our environment.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Ms. McCARTHY).

Ms. McCARTHY of Missouri. Mr. Chairman. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise, very respectful of the gentleman offering the amendment, to oppose the amendment offered today.

While I, too, have concerns for the safety of our food that has been genetically engineered, we need to continue the FDA’s oversight and expertise in this area. Allowing the FDA to prohibit their review process has very broad policy implications.

The risks associated with transgenic fish, and specifically salmon, are overstated. Claims that transgenic salmon will create genetic pollution are unfounded because only sterile all-female stock would be commercialized, virtually eliminating any risk of cross-breeding with wild salmon.

Legislating the approval process of FDA has far-reaching implications which could negatively impact future innovations to improve our food supply and our health.

Mr. DOOLITTLE. Mr. Chairman, I yield the balance of my time to the gentleman from California (Mr. DOOLITTLE).

Mr. DOOLITTLE. Mr. Chairman, I rise in opposition to this amendment; and want to approach this from really just a broad and general perspective. If we look over the next 25 years, the world’s population is going to increase by 2.5 billion. This 2.5 billion increase in population is going to be occurring primarily in the developing countries of the world. When we look at the tremendous demand for food, and in particular for protein, in order to ensure that these people are going to have adequate nutrition, we have to be ensuring that we are investing in new science and research that is going to ensure that we have the capacity to produce these food products.
My concern with the amendment that we are considering today is, one, that we will circumvent our science-based regulatory process. I am concerned that it will set the process back, that it will ensure that we can have politics that can intercede all too often that will preclude our ability to ensure that we can see progress in the development of these new technologies.

One of my colleagues earlier today in this debate mentioned we have half as many fish in the ocean today as we did some few decades ago. A lot of this is due to overfishing and fishing that was occurring because of the demand to provide an adequate food source for a lot of people today. When we are looking at the potential for this technology, the technology that can be advanced through transgenic fish, this is something that in many ways could also most relieve some of this pressure on our natural fisheries by ensuring that we can continue to see progress in the commercial production of food and fish products.

I think this is another argument for us to ensure that we are again continuing this science-based process. Some of the concerns that my colleagues raise I think are adequate. We ought to ensure we are using the most appropriate science. But FDA today is required, when they are considering the approval of these new transgenic products, to have a dialogue, to be consulting with EPA, with U.S. Fish and Wildlife, and the National Marine Fisheries Service and NOAA, as well as USDA.

Furthermore, it is this amendment that would preclude that continued research and investigation through those bodies that have the scientific expertise. In fact, this amendment would set back our ability to fully understand the science and that threat that transgenic fish might pose for human consumption as well as the threat it might potentially pose to the environment.

Once FDA is confident that, through their investigation and the scientific process, that there is not a significant or marginal threat to both consumers as well as the environment, before anyone can even get a permit to produce transgenic animals for salmon, they would have to go through a permitting process at both the Federal and the State level; that they will have to be dealing once again with EPA and other agencies, the National Marine Fisheries Service and U.S. Fish and Wildlife and EPA, which will be mandatory. So we have another safeguard there to ensure we will have adequate protections to the environment to ensure that we will not see any negative impacts.

In closing, I just ask my colleagues to respect the process. One of my colleagues earlier said that this is an amendment to protect the ability to use hormones in fish. Nothing could be further from the truth. Opposing this amendment is to protect a science-based process, to protect a process that will enable us to reach out to the best scientists in the country that we have available to ensure that we will have adequate protections. And when we go through that process, we also then will have the promise to still have the promise that we can see the increase in food production, in this case, in the production of fish, that can meet the protein and nutritional needs of hundreds of thousands if not billions of people that are going to be populating this Earth.

I ask my colleagues to vote "no" on this amendment.

Mr. KIND. Mr. Chairman, I want to thank you for the opportunity to speak on behalf of this amendment and urge my colleagues to support an amendment which would preserve funding for the American Heritage Rivers Initiative. I also want to extend my gratitude to my colleagues for introducing this important amendment.

The Heritage Rivers Initiative is entirely voluntary and locally-driven. This program is composed of local river pilots who work for a federal agency. These pilots help communities locate the resources they need to improve water quality, reduce flood losses, and promote environmental and riverfront development along some of the nation’s significant waterways, including the Upper Mississippi River.

This program has been extremely successful in the designated areas along the Upper Mississippi River that include 58 communities in Illinois, Iowa, Minnesota and Missouri. Along the Upper Mississippi River, the American Heritage Rivers Initiative has been instrumental in bringing communities together to link existing trails and greenways, establish and improve interpretive centers, restore habitat and promote riverfront revitalization. I fully recognize the incredible potential of biotechnology. FDA’s current regulatory process ensures that the products of biotechnology are safe to grow and eat.

Today, for example, disease is the biggest impediment to improved production of farm-raised catfish. This amendment would seriously undermine research that could improve these yields and reduce losses from disease. Quick-growing biotech salmon could reduce the pressure on wild fish stocks that are used for feed. Salmon farmers also use only sterile, all-female stock to prevent cross-breeding with wild populations.

Quick-growing biotech salmon could reduce the pressure on wild fish stocks that are used for feed. Salmon farmers also use only sterile, all-female stock to prevent cross-breeding with wild populations. The gentlemen’s amendment would throw out all of the research and capital that were used to develop these new varieties and that is needed to move toward more sustainable fish production and harvesting.

FDA’s policy on biotechnology has been in place for nearly ten years and has allowed the safe introduction of wholesome and safe foods. Incidentally, FDA’s policy applies to all foods, not just those produced using biotechnology.

The gentleman’s amendment implies that biofarms are inherently different and more risky than foods produced using traditional techniques such as cross breeding. There is no scientific evidence to justify this assertion.

Rather than incite unfounded, ideologically-driven fears of this technology, we should recognize the incredible potential of biotechnology. Biotechnology will help alleviate hunger in the developing world, promote more environmentally-friendly and sustainable farming practices, reduce pressures on arable land, and create new markets for farmers.

Mr. Chairman, make no mistake: this is a measure aimed at stopping aquacultural biotechnology. FDA’s current regulatory process should not be short circuited. I urge my colleagues to oppose this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. KUCINICH). The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. KUCINICH. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Ohio (Mr. KUCINICH) will be postponed.

AMENDMENT NO. 5 OFFERED BY MRS. CLAYTON

Mrs. CLAYTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 5 offered by Mrs. CLAYTON: At the end of the bill (before the short title), insert the following new section:

SEC. 738. The amounts otherwise provided by this Act are hereby made available for "AGRICULTURAL PROGRAMS—AGRICULTURAL BUILDINGS AND FACILITIES AND RENTAL PAYMENTS".

12994 CONGRESSIONAL RECORD—HOUSE July 11, 2001
by reducing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for competitive research grants (7 U.S.C. 450i(b)), by reducing the amount made available for “AGRICULTURAL PROGRAMS—FARM SERVICE AGENCY—SALARIES AND EXPENSES”, and by increasing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for a program of capacity building grants (7 U.S.C. 3152(b)(4)) to colleges eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321-326 and 328), including Tuskegee University), by increasing the amount made available for “AGRICULTURAL PROGRAMS—COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE—RESEARCH AND EDUCATION ACTIVITIES” (and the amount specified under such heading for payment of grants to land-grant colleges and universities (7 U.S.C. 4281)) to Tuskegee University (7 U.S.C. 3232)), and by increasing the amount made available for “AGRICULTURAL PROGRAMS—OUTREACH FOR SPECIALLY DISADVANTAGED FARMERS”, by $5,521,000, $10,000,000, and $7,007,000, respectively.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from North Carolina (Mrs. CLAYTON) and a Member opposed of her party will control 10 minutes.

The Chair recognizes the gentlewoman from North Carolina (Mrs. CLAYTON).

Mrs. CLAYTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I have agreed to present my amendment with the understanding that the chairman is going to work with us during conference, and then I will withdraw it. But he has graciously allowed us to get the argument into the RECORD.

This amendment is an en bloc amendment and has three phases to it. The first part is to indeed allow for justification for the outreach to small and disadvantaged farmers. The reason why we need these extra resources for small and disadvantaged farmers is because small farmers, all farmers are having difficulty, but small farmers and disadvantaged farmers and minority farmers are especially having difficulty.

We are all aware of the issue around farmers not being able to get credit, farmers not being able to get the technical assistance, farmers not being able to keep up with the new technology. Well, providing monies to what we call the capacity building will allow us to do that. So we are asking for an increase to indeed have those resources.

The second part of this amendment would include the research. Now, I understand that many people have problems with the issue that I am suggesting the money should be coming from. But the issue we want for our colleagues to understand on this is that the research and extension for the 1890 institutions has been woefully underfunded. I brought this chart so it could be put in as part of the RECORD. Indeed, this is the competitive grant in the 1999 fiscal year, where we could find the records. All of the seventeen 1890 colleges got 5/10 of 1 percent of the money.

Now, why is this an issue that we want to bring to the attention of my colleagues? Well, most of the small farmers and disadvantaged farmers are more concentrated where the 1890 institutions are. And to the extent that they are not allowed to provide the research to add to the understanding of the research in those areas it would be indeed an error.

The third part of this amendment was the whole issue of capacity building. The capacity building of the grant would allow the opportunity to provide monies for graduate students, for professors, and those who would have the opportunity to build up the capacity of these universities. Now, I understand that this is not as palatable, as being too expensive. Is it too expensive to make these 1890 universities, some 17 of them, as capable as any other university? It adds to the capacity of the American rural structure. It adds to the capacity of the research that we are providing new people about the understanding of our food and our fiber.

So I would ask my colleagues as we move forward to support this.

Mr. Chairman, I am glad to be joined by one of the cosponsors of this amendment. Her particular interest was the research, but she is interested in all parts of the en bloc amendment.

Mr. Chairman, I yield 2 minutes to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Chairman, I thank the gentlewoman from North Carolina for allowing me the opportunity to work with her. I also thank the leadership of this committee and the ranking member for their leadership and their concern.

This is not a new attempt. This is an initiative that we worked on with the Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies and the authorization committee last year dealing with the 1890 land grant colleges. I am on the Committee on Science, and I know the value of R&D. I also know the value of the history of farmers as well as those farmers in the African community.

But generally speaking, the history of the land grant colleges were around the rural communities in particular. They came out of the soil, if you will. In fact, many of the colleges still have very large agricultural programs now and teach agricultural science, such as Prairie View A & M.

It is interesting we are not in this amendment asking, if you will, to take over the percentages and the dollars given to other colleges, in particular the 1862 land grant. But what we are asking for is that the research dollars to the 1890 land grant is less than 1 percent. It is .5. So the opportunity for innovative research that can help in nutrition, that can help in agricultural science as it relates to the research done with farm animals, if you will, and if an urbanite can suggest that particular type of research, soil research, environmental research, coming from these kinds of campuses, dealing with small farmers is an enormous asset to what is a very important part of our economy, and that is farming and food and agriculture.

So I would simply ask and join the gentlewoman from North Carolina in asking for our amendment to be supported. There are many colleges that can benefit in enhancing the opportunity for these colleges. In my State it is Prairie View A & M, but there are many, many colleges that can benefit by this research. It is, again, not to take away, it is to enhance.

I would hope that we would want to enhance the opportunities for research among these particular colleges. I ask for support of this amendment.

Mr. BONILLA. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 10 minutes.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I understand clearly that we are to work on this in the weeks ahead and the months ahead to try to address the concerns of the gentlewoman from North Carolina and would like to inquire if the gentlewoman from North Carolina is still interested in withdrawing this amendment.

Mrs. CLAYTON. Mr. Chairman, will the gentleman yield?

Mr. BONILLA. I yield to the gentlewoman from North Carolina.

Mrs. CLAYTON. Mr. Chairman, I do, but I do have another speaker, if the gentleman will allow me to do that.

Mr. BONILLA. Mr. Chairman, I reserve the balance of my time.

Mrs. CLAYTON. Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio (Ms. KAPTUR), the ranking member on the Subcommittee on Agriculture of the Committee on Appropriations.

Ms. KAPTUR. Mr. Chairman, I thank the gentlewoman from North Carolina (Mrs. CLAYTON) for yielding time to me.

Mr. Chairman, I wanted to publicly acknowledge the incredible work that the gentlewoman from North Carolina (Mrs. CLAYTON) has done in proposing this amendment along with the gentlewoman from Texas (Ms. JACKSON-LEE). Were it not for their vision and leadership last year, we would not have had any increase to these accounts.
Without question these colleges and institutes have such an enormous impact in our country, but also can be pivotal institutions for advancement in other countries. I envision the day when these additional dollars will be able to link these institutions to even some of the most underdeveloped areas of Africa. There, I think, cooperative research projects could benefit both nations, the farmers of both nations, the people of both nations.

I also want to thank both the gentlewomen from North Carolina (Mrs. CLAYTON) and the gentlewoman from Texas (Ms. JACKSON-LEE) for taking a hard look at the full potential of these historically black colleges and universities and the Tuskegee Institute and the needs of our smaller African American farmers.

In supporting this amendment, I am reminded of my travels to one State where there were significant civil rights suits against the U.S. Department of Agriculture. It was unbelievable to me that loans were not being made to very worthy endeavors by minority farmers for food processing. We run into this age-old problem of discrimination even by some of the local loan committees that still exist across this country.

I think that these universities and the Tuskegee Institute and these colleges can help lead America forward in a very important way. They can be of special assistance because of the trust with which they and their researchers are held by the very communities that we want to assist.

Mr. Chairman, I would have to say to these two gentlewomen—who really cannot be viewed as only gentle for some of what they have to address in serving at the national level and dealing with the issues that we contend with—that they are leading America forward in this new millennium in a way that is so vitally necessary. They certainly have my support in their intentions to increase funding in these categories.

Mr. Chairman, I know the gentlewoman wishes to withdraw the amendment at some point, but hopefully as we move toward the Senate, we will be able to take my colleague’s excellent recommendations and enact them into law through conference.

Mrs. CLAYTON. Mr. Chairman, I yield 30 seconds to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Chairman, let me thank the ranking member for the sensitivity and enormity of her leadership in feeding the world.

I wanted to restate something that is crucial: The kind of partnerships that can be built between the historically black colleges and developing nations in terms of nutrition and agriculture science and opportunities to enhance their ability to provide food for themselves, which is a great problem in developing nations.

I thank the gentlewoman from Ohio (Ms. KAPUR) for her leadership. I thank the gentlewoman from North Carolina (Mrs. CLAYTON).

Ms. KAPUR. Mr. Chairman, will the gentlewoman yield?

Ms. JACKSON-LEE of Texas. I yield to the gentlewoman from Ohio.

Ms. KAPUR. Mr. Chairman, certainly we know in most of those places it is women who are raising most of the food and feeding their villages. We know that the historically black colleges and Tuskegee Institute will be especially sensitive to that. Without a doubt their reach can be worldwide.

Mrs. CLAYTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to thank all of those who are sensitive to this issue; but I want to raise the issue of the contribution that small family farmers and minority farmers are making to the vitality of the agricultural community. And to the extent we help them, and 2501 is that outreach program, it is administered by nonprofit groups and 1890 colleges, and that is why it is essential to get sufficient funds for it.

The research that the gentlewoman from Texas (Ms. JACKSON-LEE) emphasized so strongly, already there is a connection between the developing countries. Tuskegee is doing biotechnology in Nigeria. There is a program, Farmers to Africa, Farmers to Caribbean. 1890 is taking sustainable agricultural know-how to these small, struggling countries to transfer the knowledge we have. So Americans are doing well and good at the same time.

Finally, the capacity-building of the 1890 colleges is sustained to add to the credibility and the strength of our higher education system. Research is an important part of agriculture, and to that extent we want to strengthen all of the land grant colleges, and this allows us to strengthen the 1890 land grant college.

Mr. Chairman, I thank the chairman for his willingness to work with us as we go forward in the conference committee.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentlewoman from North Carolina?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

AMENDMENT OFFERED BY MR. BACA

Mr. BACA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. BACA:

Page 74, after line 21, insert the following new section:

SEC. 741. The amount otherwise provided by this Act in title I under the heading “Agricultural Programs—Cooperative State Research, Education, and Extension Service—Research and Education Activities” for an education grants program for Hispanic-serving Institutions (7 U.S.C. 4231) is hereby increased by $16,508,000.

Mr. BONILLA. Mr. Chairman, I reserve a point of order on this amendment.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from California (Mr. BACA) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from California (Mr. BACA). Mr. BACA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of my amendment to increase funding for USDA grants for Hispanic-serving institutions for agricultural research. Hispanic-serving institutions, or HSIs, are the backbone of Hispanic college education. These schools have great research capabilities and have much to offer, but because they do not have a land grant or are not necessarily historical, they sometimes do not receive all of the resources they deserve.

I salute the efforts of the chairman, the gentleman from Texas (Mr. BONILLA), on behalf of the Hispanic-serving institutions on his work towards allowing HSIs to gain a foothold into agricultural research grants. Yet I am certain that the gentleman from Texas (Mr. BONILLA) would agree with me that these schools merit more funding, especially to increase the growth and development of Hispanics in our institutions.

Mr. Chairman, 41 percent of all USDA research project proposals for HSIs are funded. Forty-one percent is a remarkable success rate for proposal acceptance. We obviously have a great resource here that we are not using nearly enough, and we need to tap into that.

In addition, I would like to ask Secretary Veneman and the administration to understand that these institutions are important to the Congressional Hispanic Caucus, and we will work and fight for more resources.

Mr. BONILLA. Mr. Chairman, will the gentleman yield?  Mr. BACA. I yield to the gentleman from Texas.

Mr. BONILLA. Mr. Chairman, I want to commend the work of the gentleman from California (Mr. BACA) on this very important issue on Hispanic-serving institutions, and I want to also express my gratitude for his acknowledging what this subcommittee has done; and also what has been done historically on the behalf of the Health and Human Services and Education over the last few years in a bipartisan way to take care of many of the problems that exist at many institutions in terms of funding.

Mr. Chairman, as I discussed with the gentleman before, we are willing to work to see if there is a possibility at all to try to increase this number down the road. We do not know if that is going to be possible, but we certainly will make every effort. We have given increases in this bill over the last 2 years as well, and we are doing all we can; and we certainly will continue to do that.

Mr. BACA. Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I thank the gentleman from California (Mr. BACA) for his leadership in bringing this issue to the attention of our subcommittee. The gentleman from California is particularly well suited to sensitizing the Congress for the extra attention that needs to be put to identifying those institutions serving higher numbers of Hispanic populations, and to help to place those in a more competitive position with larger and more established institutions that tend to have first call at the U.S. Department of Agriculture, even in their research protocols.

Mr. Chairman, I assure the gentleman that he will have my full support in identifying ways to move funding to those institutions to reach a broader array of the American public, and, as with some of the other institutions we were talking about a little bit earlier, particularly those serving African American populations, to look also toward a global role for those institutions because of their inherent bilingual capabilities and the historic ties that exist, certainly with Latin America and other places.

So we do not have a narrow view of only one State or even our own country, but we have this tremendous resource in our own country if we but see it and enhance it.

Mr. Chairman, I thank the gentleman for coming to us and for being the leader in this Congress and for bringing this issue to our attention. California could not have sent a more capable representative, and the gentleman certainly has my pledge to work with him as we move toward conference to see if we cannot do better in this new millennium than perhaps some of those who served here in the past.

Mr. BACA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the gentlewoman for her comments. We all realize that it is important to support institutions such as the HSIs, and I appreciate the lead that the gentleman from Texas (Mr. BONILLA) has taken in the past years ensuring funding, and I look forward to working with him in the future in conference committee to increase funding for this wonderful grant program.

Mr. Chairman, I understand that my amendment is subject to a point of order. I concede to that point of order, and I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

Sequential votes postponed in committee of the whole

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed in the following order: Amendment No. 20 offered by the gentleman from Vermont (Mr. SANDERS); amendment offered by the gentleman from Minnesota (Mr. GUTKNECHT); amendment No. 13 offered by the gentleman from Ohio (Mr. KAPTUR).

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

Amendment No. 20 offered by Mr. SANDERS

The CHAIRMAN. The pending business is the demand for a recorded vote on amendment No. 20 offered by the gentleman from Vermont (Mr. SANDERS) on which further proceedings were postponed and on which the ayes prevailed by voice vote.

The Clerk will redesignate the amendment. The Clerk redesignated the amendment.

Recorded vote

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 159, noes 257, not voting 7, as follows:

AMENDMENT NO. 13 OFFERED BY MR. KUCINICH

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Ohio (Mr. KUCINICH) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The pending business was stated.

Mr. BONILLA. Mr. Chairman, I recognize the gentleman from Texas.

Mr. BLUMENAUER. Mr. Chairman, I rise to a point of order.

Mr. LEWIS of California. Mr. Chairman, on 1532

The result of the vote was announced as above recorded.

Stated against:
Mr. LEWIS of California. Mr. Chairman, on rolcall No. 218, I was unavoidably detained. Had I been present I would have voted "no."

AMENDMENT OFFERED BY MR. BLUMENAUER

Mr. BLUMENAUER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. BLUMENAUER:
Insert before the short title at the end the following new section:

SEC. 1. Effective three months after the date of the enactment of this Act, none of the funds appropriated or otherwise made available in this Act may be used to pay the salaries or expenses of personnel of the Department of Agriculture to make price support available (in the form of loans, direct payments to producers, or other subsidies) with respect to an agricultural commodity in the absence of a report to Congress by the Secretary of Agriculture that (1) fully specifies the amount of Federal funds being used to provide such price support and (2) describes the full effect of import quotas and tariffs imposed by the United States to protect such commodity.

Mr. BONILLA. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Oregon (Mr. BLUMENAUER) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I yield myself such time as I may consume.

I rise to offer an amendment that would direct the Department of Agriculture to submit a report to Congress that details the full amount of Federal funds being used to provide price support and describes the full effects of quotas and tariffs imposed on our Government protecting commodities.

Mr. Chairman, we have a strange patchwork of policies that date back two-thirds of a century to the Depression Era, back to a time when there were 6 million family farmers, when 25 percent of our population lived on the farms. Today, we have a crazy patchwork of programs that have serious environmental impacts, which is why this amendment has been endorsed by Friends of the Earth and the Environmental Working Group, but it also has distorting impacts as far as the economy is concerned. It is estimated that worldwide, there are over $150 billion in extra costs that are added; and for the United States consumer, it is the equivalent of a 3 percent food sales tax, and the most regressive because of these impacts this has on the poor who spend more, $18 billion a year.

We deserve, Mr. Chairman, the opportunity to see the big picture before we move forward with other elements that deal with agriculture, that deal with international trade.
Mr. Chairman, I yield 1 1/2 minutes to the gentleman from Florida (Mr. MILLER) to speak to a specific example of the impacts that we are concerned about.

Mr. MILLER of Florida. Mr. Chairman, I rise in support of this amendment, and I thank the gentleman for introducing it.

All we are asking for is transparency, and let me use the illustration of the sugar program that was passed in 1996, when we were told, no cost to the American taxpayer. Well, let us look at the facts. Let us look at the facts. First of all, GAO says it cost $1.9 billion for the American consumer. The American consumer is the American taxpayer, so it cost $1.9 billion. Last year, the Federal Government had to buy $430 million worth of sugar, and it does not add any use for it. It is having to store it. We are spending $20 million a year to store all of this sugar that we have no use for, and yet we were told that it had no cost. The price of sugar in the United States is more than double what it is elsewhere around the world, as if the Federal Government were a major purchaser of sugar, whether it is in VA hospitals or schools and such.

In addition, under the environmental issue, sugar is a major contributor to the pollution of the Everglades. We are going to spend $8 billion to clean up the Everglades, and we are going to pay a lot of that cost because the sugar program is causing the problem.

So these agriculture programs that say, oh, it does not cost the Government anything, we do not know what it costs us. It has direct costs and it has indirect costs, and all this amendment says is let us have transparency, and let us figure out what it really costs.

Mr. SCARBOROUGH, Mr. Chairman, I appreciate the gentleman from Oregon bringing this important amendment to the floor.

It is also important to remember that in 1996, this Congress brought the Freedom to Farm Act to this floor. The proposed plan was to phase out farm subsidies in 7 years by spending $36 billion on subsidies. Well, 7 years later we have spent over $80 billion instead of $34 billion, and that has not even been enough for subsidy supporters. In emergency funding for agriculture alone, Congress has spent an additional $38 billion. That means we either made a very bad guess back in 1996, or we are dealing with very bad public policy.

Today we find that the Freedom to Farm Act that was supposed to free American subsidies while freeing American taxpayers from price supports, has actually backfired; and now, Congress once again is paying two, three, even four times the amount of subsidies that we pledged to the American people in 1996.

Congress passed welfare reforms for struggling single parents; and now Congress needs to pass similar reforms for the American farmer. Americans should not continue paying people for not planting their crops.

The Freedom to Farm Act failed because Congressional courage failed all American taxpayers. We need to look at these misguided policies again, and stop subsidy payments that continue to cost American taxpayers billions of dollars.

Mr. BLUMENAUER. Mr. Chairman, I yield myself such time as I may consume.

I would hope that we on this floor of both parties, people of disparate philosophical orientations, could agree on one thing: the American public deserves to know the big picture, how much it costs, who is paying, and the impacts of these programs so that we can make the appropriate decisions for agriculture, for the environment, and sound economic policy.

I understand there may be some question as to the acceptability of this amendment, that it may be subject to a point of order and I respect that, and I will be willing to withdraw my amendment. But I hope that we can work with the members of this subcommittee to be able to work to make sure that we have the information available to protect the environment, to provide sound agricultural policy, and be able to deal with our trade responsibilities in the international arena.

Mr. Chairman, I yield back the balance of my time.

Mr. TRAFICANT. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BONILLA. Is the gentleman going to withdraw his amendment?

Mr. BLUMENAUER. Mr. Chairman, I ask unanimous consent to withdraw the amendment.

Mr. Chairman. The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 1 offered by Mr. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 1 offered by Mr. TRAFICANT

Sect. ______. No funds appropriated or otherwise made available under this Act shall be made available to any person or entity that has been convicted of violating the Act of March 3, 1933 (41 U.S.C. 18a–10c; popularly known as the “Buy American Act”).

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Ohio (Mr. TRAFICANT) and a Member opposed each with control 5 minutes.

The Chair recognizes the gentleman from Ohio (Mr. TRAFICANT).

Mr. TRAFICANT. Mr. Chairman, I yield myself such time as I may consume.

I would like the appropriators, if they would, to listen to my brief remarks, and the other Members. We just celebrated a great holiday, the independence of the United States of America; and right down there on the Mall when the national symphony was performing in celebration of our great democracy and republic, vendors were handing out souvenir small plastic American flags that were made in China. The national symphony is performing, people are in Washington to celebrate this great holiday, and the vendors are distributing small flags that I will send over; I do not have them with me. This is ridiculous.

Mr. Chairman, this is a very simple amendment. It gets right to the point. Anybody that has violated our Buy American laws will not be eligible to get money under the bill.

I would ask that it be approved, as it has been to other bills.

Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. BONILLA), the distinguished chairman in his first term, and I commend him for his work.

Mr. BONILLA. Mr. Chairman, I thank the gentleman for yielding me this time. I want to commend the gentleman for offering this amendment. We support the amendment and would hope that we could move to a vote quickly on this amendment.

Mr. TRAFICANT. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Ms. KAPTUR), my distinguished colleague.

Ms. KAPTUR. Mr. Chairman, I thank the gentleman for proposing this Buy American amendment as well as many other bills that he has been successful in achieving this added language. I would not only like to support the gentleman on this effort, but to work with him to assure that both the letter and spirit of the law, as the gentleman has been able to pass here regarding Buy American, are working in every program of our government, let me point out, for example, the Department of Defense’s purchase of food commodities, should be oriented toward U.S. farmers, U.S. produced commodities, not food brokers that might acquire their product from foreign sources.

Mr. Chairman, I just want to commend the gentleman and say I support the Buy American Act, and congratulations to the gentleman for bringing this Buy American amendment to America’s attention.

Mr. TRAFICANT. Mr. Chairman, I appreciate the gentlewoman’s comments. One of the reasons for the technicalities is that they say the Buy
We are basing our farm programs on antiquated crop history that was established from 1986 to 1991. This amendment纠正s that those other farmers that today are growing that corn, that rice, that cotton, the soybeans, that corn, will still be eligible for the Federal Government price support program.

It is a matter of fairness, and I say to the gentleman from Iowa (Mr. LATHAM), the deputy chairman, that the Senate has indicated they are interested in putting this in the Senate version of their agricultural appropriation bill. It is important that we, as quickly as possible, tell the American farmers, that otherwise might not be eligible for this kind of support help, that we intend to pass this amendment.

We had it in the chairmen's mark of the appropriation bill supplemental. That bill was changed with the Stenholm substitute. This amendment needs to be accomplished. I would ask the leadership in their efforts, when we go to conference, if this is in the Senate bill, can we move ahead on this amendment?

Mr. LATHAM. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Michigan. Mr. Chairman, I appreciate very much the gentleman from Michigan's interest in this matter.

I understand there is strong bipartisan support to remedy this inequity in our farm program laws. I support the gentleman's efforts to accomplish this.

I am sorry that, because of the legislative nature of this amendment, the bill before us today is not the appropriate vehicle for this provision. However, I look forward to working with the gentleman in the future on this problem, and if the provision is in the Senate bill, we will consider this correction in our conference committee. I thank the gentleman for his efforts.

Mr. SMITH of Michigan. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I rise to bring to the body's attention an amendment I have prepared that concerns a matter of fairness and equity to American farmers. Very simply, my amendment would maintain the number of farmers eligible for the price support program that we have in the Federal Government.

We have a price support program that provides that if market prices fall below a certain level for these programs' crops, someone is eligible for an LDP, a loan deficiency payment, or a commodity nonrecourse loan.

Under the provisions of the law, though, technically, only those individuals that were enrolled in farm programs and designated their program crop acreage back in the late 1980s are eligible for this kind of support.

So what we did last year is allow every American farmer, those cattle and livestock farmers, those dairy farmers that did not have program crops, and repeat them back in the 1980s, to be eligible for that same kind of federal price support as those individual crop farmers that had program crops.

at the inception of the base acreage allotments, but later shifted acreage from another use into program crop production. For instance, if a corn/soybean farmer that also grazes some land enrolled in program acreage decides to shift that grazed acreage into corn/soybean production, his new cropping acreage would not be eligible for the Loan Deficiency Payment.

This problem was recognized last year and LDP eligibility was expanded to include farmers not enrolled in program acreage—language included in Crop Insurance legislation. However, this provision was only for crop year 2000, and another legislative remedy is needed for crop year 2001.

My amendment, which I have also introduced as a stand-alone bill, H.R. 2089, would do just that. The idea of LDP eligibility equity has garnered strong bipartisan support within the Ag Committee, and was included in Chairmen SIMPSON's and CHESTERS' 2001 Crop Year Economic Assistance Act that was voted on earlier this week (H.R. 2213), but was narrowly eliminated along with all other fiscal year 2002 spending that was included in the mark.

The Congressional Budget Office estimates that approximately 98.6 percent of program crop production is eligible for LDP payments. While that number is significantly high and captures most commodity producers, it is still unfair for the other 1.4 percent to be ineligible simply because those farmers are not enrolled in farm program base acreage. It is important that we enact this provision and eliminate this loophole that places some farmers at a competitive disadvantage. I urge members to vote for passage of this amendment so that we may correct this problem.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. The amendment of the gentleman from Michigan (Mr. SMITH) is withdrawn.

AMENDMENT NO. 30 OFFERED BY MR. SMITH OF MICHIGAN

Mr. SMITH of Michigan. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 30 offered by Mr. Smith of Michigan.

Add before the short title at the end the following new section:

SEC. . None of the funds appropriated or otherwise made available in this Act may be used to pay the salaries of personnel of the Department of Agriculture who permit the payment limitation specified in section 10012 of the Food Security Act of 1985 (7 U.S.C. 1938a(a)(2)) to be exceeded in any manner (whether through payments in excess of such limitation, permitting repayment of
marketing loans at a lower rate, the issuance of certificates redeemable for commodities, or forfeiture of a loan commodity when the payment limitation level is reached), except, in the case of a husband and wife, the total amount of the payments specified in section 1901(b) of that Act that they may receive during the 2001 crop year may not exceed $150,000.

Mr. LATHAM. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. A point of order is reserved.

Pursuant to the order of the House of Thursday, July 26, 2001, the gentleman from Michigan (Mr. SMITH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Michigan (Mr. SMITH).

Mr. SMITH of Michigan. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am disappointed in this amendment because earlier I had an indication from the Parliamentarian that this would be in order. We added some language that apparently is now going over the line in terms of legislating in an appropriation bill.

But let me just emphasize the importance of policy as we consider this amendment. The question before this body is should the huge, large agricultural farm corporations get the most benefit from Federal agricultural programs? This amendment reinstates the $75,000 limit for payments.

Our agriculture programs, ever since we started these programs in the 1990s, have tended to benefit the large, and very large farmers, so in part the large farmers have bought out the small farmers because they have had the advantage in farm program payments.

My amendment, reinstates the $75,000 payment limitation on loan deficiency payments and it makes it a real $75,000 limitation on these producers. At the same time, and I would call this to the attention of the ranking member and chairman, at the same time, this amendment allows spouses of these farmers to be considered an equal partner in the farm operation, in other words, be eligible for the $75,000 payment limitation.

What we do now is make those spouses jump through, if you will, bureaucratic hoops to become qualified. We require such action as requiring the spouse to borrow money in their own name, put it into the farm operation, and then they can be eligible as a separate partner.

This amendment says that married couples would have the $150,000 payment limitation.

Let me go little further on what this amendment really does. Historically, net losses from loan deficiency payments have been capped at $75,000 per producer, but this limit was doubled in the bill that went through on special orders a couple of weeks ago.

The increased payments to producers over the current $75,000 limit are estimated to be over $350 million. The huge giant farmers are taking $350 million over and above the $75,000 limitation. This benefits only the very largest farmers.

The average farm size in the U.S. is about 420 acres, but one would have to raise 4,000 acres of corn at current prices to exceed or to go over the $75,000 limitation. There are many large farm operations that exceed 20,000 acres, so they are taking all of this extra money in and, in effect, taking it away from the family farmer.

Amazingly, this flawed system has allowed payments over $1 million to go to some of these farmers. Farmers that receive these large subsidies, and the grain traders that profit from expanded production, oppose this amendment. I think it is so important that we consider this kind of policy in terms of focusing the benefits on the small- and moderate-sized family farm operations.

This amendment accomplishes several things. It gives the spouse of a farmer the same kind of considerations as a partner. It provides that we hold to the $75,000 payment limitation, at a time when we are considering being frugal in our spending so that we do not start reaching into the Medicare and Social Security trust fund. It says, let us save that $350 million that is spent on those huge farmers by locking in the limit that would also apply to the nonrecourse loan and the forfeiture provisions or the commodity certificates that are offered to that farmer if they exceed the limitation.

Mr. Chairman, I would urge this body to consider the kind of agricultural farm policy that we want for the future of American agriculture.

Mr. Chairman, I have an amendment concerning payment limitations for marketing loan deficiency payments (LDPs) to farmers, as well as limits on benefits received through the USDA commodity certificate program and nonrecourse loan forfeitures. This amendment would cap payments to individual farmers from these programs at $75,000.

Mr. Chairman, few people are aware that many of our farm commodity programs, for all of their good intentions, are set up to disburse payments with little regard to farm size. Often in our rush to provide support for struggling farmers we overlook just where that support is going.

The limit on price support payments to farmers was increased when we passed H.R. 2213, the 2001 Crop Year Economic Assistance Act on June 28th. Historically, net benefits from loan deficiency payments and marketing loan gains have been capped at $75,000 per farmer. However, H.R. 2213, which passed under the suspension calendar and was not subject to amendment, doubled the benefit cap to $150,000. Even this limitation is exceeded when USDA authorizes a commodity certificate program to pay farmers that reach the payment limit.

The increased costs to government by doubling the benefit cap from the current $75,000 limit is estimated at over $50 million. Furthermore, additional payments to large producers received through the commodity certificate program exceeded over $350 million in crop year 2000 alone.

A Congressional Research Service report on commodity certificates stated that, “while purported to discourage commodity forfeitures, certificates effectively serve to circumvent the payment limitation.” Amazingly, this flawed system allowed a single farmer to receive $1,201,677 in commodity support payments in 1999.

My amendment would simply restore a $75,000 limit on price support payments to individual farmers—including benefits via commodity certificates and loan forfeitures, but increase the limit to $150,000 for husband and wife farming operations. Currently spouses have to jump through several bureaucratic hoops to qualify.

With increased spending a concern, along with the fact that the additional benefits from the “certificate” program go to huge farm operations, I urge your consideration of my amendment. Boosting farm program payment limitations disproportionately skews federal agricultural support to the largest of producers, while doing nothing to alleviate the difficulties faced by small and medium-sized farmers. Let’s do more to focus benefits on small and moderate size family farm operations.

Mr. Chairman, I yield back the balance of my time.

Mr. Chairman. Does the gentleman from Iowa (Mr. LATHAM) insist on his point of order?

Mr. LATHAM. Mr. Chairman, I continue to reserve my point of order. If there are no other speakers, I would make a point of order.

The CHAIRMAN. Is the gentleman withdrawing the amendment?

Mr. SMITH of Michigan. I am not withdrawing the amendment. I question the point of order. It does not legislate, if I may speak.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa (Mr. LATHAM).

POINT OF ORDER

Mr. LATHAM. Mr. Chairman, I make a point of order against the amendment because it proposes to change existing law and constitutes legislation in an appropriations bill, and therefore violates clause 2 of rule XXI.

The rule states, in pertinent part, “An amendment to a general appropriation bill shall not be in order if changing existing law.” The amendment imposes additional duties, and I ask for a ruling from the Chair.

Mr. SMITH of Michigan. Mr. Chairman, I would like to speak on the point of order.

The CHAIRMAN. The gentleman from Michigan (Mr. SMITH) is recognized.
Mr. SMITH of Michigan. Mr. Chairman, hoping the Chair is open to discussions and debate on this issue, I would call to the Chairman’s attention to the fact that we simply say in this amendment, “None of the funds appropriated or otherwise made available in this Act may be used to pay the salaries of personnel of the Department of Agriculture” to accomplish these certain purposes.

This type of amendment has been put in former appropriation bills, so I would like a more detailed explanation from the Chair if he rules this amendment out of order.

The CHAIRMAN. The Chair is prepared to rule.

The Chair finds that this amendment in the last phrase includes language imposing a new duty. The amendment therefore constitutes legislation in violation of clause 2 of rule XXI.

The point of order is sustained and the amendment is not in order.

AMENDMENT OFFERED BY MR. STUPAK
Mr. STUPAK. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. STUPAK:
At the end of the bill, insert after the last section (preceding the short title) the following new section:
Sec. 1600. For an additional amount for the Secretary of Agriculture to carry out section 311 of the Older Americans Act of 1965, and the amount otherwise provided by this Act for “Agriculture Buildings and Facilities and Rental Payments” is hereby reduced by $10,000,000.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Michigan (Mr. STUPAK) and a Member opposed each will control 10 minutes.

The Chair recognizes the gentleman from Michigan (Mr. STUPAK).

Mr. STUPAK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased for the second year in a row to offer this important bipartisan amendment with the gentleman from New York (Mr. BOEHLERT). Unfortunately, the gentleman from New York cannot be here as he is on his way down to the White House, but we have his full support for this amendment.

Our amendment adds $10 million to USDA’s nutrition program for elderly meal programs, known as senior citizen meals and Meals on Wheels. This amendment offsets this additional spending by $10 million from the agriculture building and facilities and rental payments.

Our amendment has the support of the Meals on Wheels Association of Michigan, the National Association of Nutritional and Aging Services Program, the TREA Senior Citizens League, the National Council on the Aging, and the National Association of Area Agencies on Aging.

I am sure all of us have met and spoken with seniors in our districts. I am sure they have told us how much they depend on the senior meals they receive, be it Meals on Wheels or Meals at their senior centers.

Senior meal providers receive funding for the meals they distribute to seniors under the Older Americans Act through several avenues: first, through private donations; second, through the Department of Health and Human Services; and third, through the U.S. Department of Agriculture meal reimbursements.

Let me explain why a funding increase for USDA’s nutrition program for the elderly program is so important. Unlike funding from the U.S. Department of Health and Human Services, HHS, which is distributed to the States based on population, the USDA reimbursement to States is according to the amount of meals served at each senior center. The money they receive is actually based on meals served at the senior center.

Our amendment is the best way to ensure that proper distribution of these funds are going to the centers where they prepare the meals.

Why do we need more money? Why are we back for a second year in a row? Why does this amendment go above the President’s request? As our chart indicates here, if we take a look at this chart, according to the Administration on Aging, 233 million meals were served in 2000, but the agency admits that this year the estimates will be 291 million. That is a 15 percent increase over last year.

Even though we increased the funding last year for the meals, it is not going to keep up with the dramatic rise in demand we see for senior meals. So the President’s budget request, and the good work by the committee, it was good work, would be short of what we need just to cover our basic costs.

What our amendment does, the Stupak-Boehlert amendment will allow this important funding to reflect the inflation and the increase in demand for these meals. We can help senior meal providers so that desperately need assistance in these times of high gas prices, high cost of meals and the increasing number of seniors who have come to depend on these meals, even in these good economic times.

I offer this amendment because of conversations I had last year with one such meal provider and about the plight of his agency. Bill Dubord and Sally Kidd of the Community Action Agency in Escanaba, Michigan, in my northern Michigan District, told me that their agency every year is having a tougher and tougher time keeping its head above water to provide senior meals.

I am sure all of us have heard similar stories as we travel about senior centers. According to a recent study, there are now an average of 85 people on waiting lists for home-delivered meal services, and are on the waiting list for an average of 2.6 months.

The bottom line is, our senior meal providers need more money to provide the meals. Increased funding will give them more money to provide more meals, and are on the waiting list for an average of 2.6 months.

When my colleagues are casting their votes, I hope they will think of the seniors they have met back home and the senior providers they have spoken with. Cast a vote for them and support this Stupak-Boehlert amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. LATHAM. Mr. Chairman, I just congratulate the gentleman on the amendment. I rise to simply state that I am not opposed to his amendment.

The CHAIRMAN. The gentleman seeks unanimous consent to seek the time in opposition even though the gentleman is not in opposition?

Mr. LATHAM. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized for 10 minutes.

Mr. LATHAM. Mr. Chairman, I yield myself such time as I may consume. Mr. Chairman, I am not opposed to his amendment. I just congratulate the gentleman on the amendment. I rise to simply state that I am not opposed to his amendment. The amendment is not in order. The amendment is not in order.

Mr. LATHAM. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized for 6 minutes.

Ms. KAPTUR. Mr. Chairman, I thank the gentleman for yielding me this time on this important amendment to increase funding for the elderly food program and to take funds that may be available from rental payments that USDA does not have to make because it no longer is occupying certain facilities.

Without question, across our country the costs of even paying utility bills are rising significantly for seniors. Electric bills, gas bills in the Midwest, for example, have just risen at astronomical rates. And any way we can find to help seniors make it through this year and next I think are worthy of consideration. This is certainly one
He has been of great assistance to us, was called away to the White House. Boehlert) wanted to be here but he would like to once again point out that the subcommittee and the ranking member, to thank the committee and the myself the balance of my time, in clos-

ability to do in this country. gentleman's proposed expansion, and I counts, can find the funds to cover the that the USDA, within its various ac-

practically, that the senior has are with the per-

nacies. Congregate meal sites give participating seniors the opportunity to socialize with mem-

aries. The Nutrition Program not only feeds seniors in need but also allows those seniors to remain connected to their commu-

tries. Congregate meal sites give participating seniors the opportunity to socialize with mem-

I urge my colleagues to vote for the Stupak-Boehlert amendment. Vote to support our na-

son's seniors. Mr. STUPAK. Mr. Chairman, I yield back the balance of my time. The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. STUPAK). The amendment was agreed to.

AMENDMENT NO. 25 OFFERED BY MR. WEINER Mr. WEINER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 25 offered by Mr. WEINER: Insert before the short title the following:

S. 13004

CONGRESSIONAL RECORD—HOUSE July 11, 2001

of those at the very basic level of de-

cent nutrition.

We know that in many of our senior feeding programs, in fact, the programs are oversubscribed. I have been sur-

prised in my own district on related programs, such as the Seniors Farmers' Market Nutrition Program, where sen-

iors are allowed to use food coupons to purchase fruits, vegetables, herbs and so forth, the enrollment in the program is just growing exponentially because people are pinching every penny be-

cause of other expenditures that they have had.

So I think we really have to look carefully at any ways we can move food to the seniors' tables, and these particular meals programs operated through our area offices on aging are eminently successful across the coun-

try. I know many programs have been initiated in my own district and I have watched seniors being asked to contribute money in little envelopes to help pay for these meals at these senior centers to offset rising costs when they have very little to give.

So I would say to the gentleman that I think he has a very worthy amend-

ment this year. He was successful in leading our country last year with a similar amendment to increase funding for the program, and the number of meals, according to the charts that he has provided, have gone up. So it has been successful.

Certainly no person in America, no senior in this country should go with-

out decent nutrition. We know that the poorest people in our country are women over the age of 85, and many of them are too weak sometimes to even get to the senior centers, so we have home-delivered meals being taken across our country in various neighbor-

hoods. Sometimes the only contact that that senior has are with the per-

son who delivers the noon meal.

So I want to thank the gentleman from Michigan (Mr. STUPAK), whose district actually spans the entire northern region of Michigan, who un-

derstands the problems of rural isola-
tion of people in poverty and thank him for leading us all. And I am sure that the USDA, within its various ac-
counts, can find the funds to cover the gent-

tleman's proposed expansion, and I just want to compliment the gen-
tleman for doing what is right, what is moral, and what we have the eminent capability to do in this country.

Mr. Chairman, I ask our colleagues to support the Stupak amendment.

Mr. STUPAK. Mr. Chairman, I yield myself the balance of my time, in clos-

ing, to thank the committee and the subcommittee and the ranking member for their support of this amendment. I would like to point out that the gentleman from New York (Mr. BOEHLERT) wanted to be here but he was called away to the White House. He has been of great assistance to us, not only in drafting and working this amendment, but in addressing the con-
cerns of seniors throughout this coun-

try. We thought the debate on this bill would go a little longer and we could do our amendment later when he got back from the White House. Unfortunately, he could not be here, but I wanted to recognize his efforts as well as that of the committee in helping us bring forth this amendment.

Mr. BOEHLERT. Mr. Chairman, I rise in strong support for the Stupak-Boehlert amend-
mendment to increase funding for the USDA’s Nutri-
tion Program for the Elderly by $10 million. This vital program helps provide over 3 million senior citizens with nutritionally sound meals in their homes through the meal-on-wheels programs, or in senior centers, churches, and, in my district a few fire halls through the con-
gregate meals program.

I would venture a guess that almost every single Member of this House has visited a congregate meal site or volunteered to ride along with a meal-on-wheels program. I want to remind everyone that these programs are important to us all and that the need is quite real. Participants in this program are disproportionately poor. 33% of con-
gregate meal participants and 50% of home delivered meal participants have incomes below the poverty level. A majority of meal-on-

wheels participants live alone and have twice as many physical impairments as the average elderly person. The Nutrition Program not only feeds seniors in need but also allows those seniors to remain connected to their commu-
nities.

I urge my colleagues to vote for the Stupak-Boehlert amendment.

I would like to thank the gentlewoman from California (Ms. ROYCE) and the gentleman from Wisconsin (Mr. RYAN), who are also joining me in of-

fering this amendment.

I stand as an urban member, someone who represents Brooklyn and Queens, the garden spot of the five boroughs perhaps, but not exactly a bastion of agriculture. But I am someone who strongly supports farm bills when they are offered. I have never voted against one and plan to vote for this one with enthusiasm. But just as during the 1980s and a period thereafter, as we have sought to make government pro-

grams more efficient and many social and urban programs were made more efficient by the actions of this body, we have an opportunity today to end what is quite literally a fleecing of America. The wool and mohair program, which will cost in the area of some $20 million to the United States taxpayer next year, is a program that has been ended 
by this body and now revived by the President with the assistance of this bill. My amendment seeks to eliminate the subsidy.

First of all, let me explain that this is a program that has, I guess, the agricultural version of mission creep. It was started out in the 1930s and 1940s as an effort to protect the strategically needed resource, that is wool; to make sure that wool was available to be used in our military uniforms. Well, those of my colleagues who serve on the Committee on Armed Services recognize that since the 1950s or so it has been removed as a strategically necessary resource because we do not make uniforms out of wool any more. In fact, I have a uniform here that is made out of 100 percent cotton. And all of the uniforms are made out of either cotton or nylon.

So once that rationale was removed, then it became an emergency subsidy intended to get the industry over a hump that it faced in the early 1990s. When it was clear that the program was not as effective and perhaps a little more wasteful than some would want, this body ended the program in 1993. Now there is an effort to revivify it again under the rubric that we need to be able to deal with foreign competition and the only way to do it is with this subsidy.

The second thing about this subsidy is that it is not cheap. We have throughout the 1990s provided more than a billion dollars to this industry. Just last year it was in the neighborhood of $10 million. It is not really clear where next year’s number will end up, but it is somewhere in the range of $10 million, $15 million, or $20 million.

It is also very clear from our history with this program that it is not helping the family farmer. According to a study done in 1993, the average payment is some $44, though there are many who get much more than that. The top 1 percent who benefit from this program, including Mr. Sam Donaldson, gets in the neighborhood of $100,000 or more. So the idea this is something that is helping to augment the family farm is simply not borne out by the facts.

Fourth, as a matter of pure economics, this program is a failure. Wool has seen a price drop since the reinstitution of this programming from some 63 percent. Why are we seeing that? It is because most likely, in combining with the subsidy, we are doing nothing to control supply. So we are continuing to shear more and more animals, more and more stockpiles are building up, the supply keeps on growing and growing, and the price remains depressed. There is nothing in this program that does anything to change that behavior.

But perhaps the most damning economic line in this whole issue is that the price of mohair, which is about 20 percent of this program, has increased about 89 percent since 1995. If there was an impact, it is a negative impact; it is not putting forth forces and not this subsidy that is having an impact on the price and, therefore, the success of the farmers, it is that fact; that wool and mohair are bunched together in this program. And when the subsidy ended, they drop in price and one is seeing a dramatic increase in price. The program simply does not make sense from that perspective. If anything, if we are trying to drive up the price on some level, then at least mohair should be dropped from the program. The final irony is that there is a greater subsidy for mohair in this bill than there is for wool.

I would make one final point. There was a period of time between the time this program died and then like Frankenstein that it resurrected itself, and that was the year 1997 and 1998. And if we look at the statistics as to how the industry did in the last year we had the subsidy and then what it returned, the industry got worse, not better. There was a reduction in wool, in wool production, of about 11 percent. There was an 11 percent reduction in the profits to wool farmers in 1996. And then when the subsidy ended, they actually had smaller losses of only about 3 percent. The same is true in the mohair industry. Mohair prices and mohair jobs actually reduced when we had the subsidy and then came back slightly when we got rid of the subsidy.

I would ask my colleagues to consider very frankly why it is that we have these programs in general. All of us want to be able to support farm programs that operate in the urban centers, like many of the housing programs of the 1980s, it simply is not working, I believe it is incumbent on Members that have those interests at heart to try to weed out the waste. This is, the wool and mohair subsidy program, is simply a waste of taxpayer money.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield to the gentleman from Texas.
Mr. WEINER. If the gentleman will continue to yield, I guess the concern that some of us have that are concerned about this program, and to use the apple example, if we were to stand here in 1950 or 1945 and say, you know what, we need to defend the apple producers because the apple seeds are a vital resource, and then it turned out apple seeds were not that important; and then we come back and said it is the apple core that is very important; and then a few years later we killed the program because it is no longer worthy, I think the point I am trying to make is this is a program that has been tried, it has been offered several different justifications, it has failed by most economic sources I can look to, it has not been successful, and Congress did the right thing in pulling the plug on it.

I guess I would agree with the gentleman that the same standard should be used for the apple program or any other program, sir.

Mr. BONILLA. Well, let me again summarize it, and I do not want to put words in the gentleman’s mouth, but clearly the gentleman does not oppose a program for example in his State that is a big line item in this bill, but is yet trying to remove this program from this bill.

Let me point out some statistics, and perhaps the gentleman can identify with some hardships that exist currently for wool and mohair producers. Since 1993, 16,000 family farms and ranches have left the sheep industry. The U.S. breeding herd has dropped by over 20 percent. Lamb imports have increased by over 50 percent, and it is currently 20 percent of the domestic market. U.S. wool production has dropped to record lows, and imports have increased by 11 percent.

The Nation’s largest wool textile company filed for bankruptcy. Wool prices in 2000 were the lowest in 30 years.

We in Congress do the best we possibly can for whatever part of the agriculture industry that exists around the country that is suffering hardship. There is nothing more American and traditional in this country than to try to preserve family farms and ranches; and there are many, many programs in this bill that do just that, including the one I pointed out that was in the gentleman’s home State as well, which he supports.

All I am saying is whether we are talking about apples, corn, cotton, tobacco, wheat, soybeans or whatever, all of these are part of the American fabric. Wool and mohair producers are part of the American fabric that we do not want to see become extinct. So for that reason I stand in strong opposition to the amendment today.

As a nation, we can no longer afford to arbitrarily attack agriculture because it has the fewest voices representing it. Less than 2% of the American population is involved with agriculture, yet we feed and clothe all of America and most of the world.

What I find even more strange is that the amendment singles out a total of less than $40 million in much needed assistance to wool and mohair producers. Yet the sponsors have no problem with the rest of the $5.5 billion dollars that Congress just approved for corn, cotton, tobacco, wheat and soybean producers. If they did, I assume they would try to kill that relief as well.

Yet, those commodities have a much larger voice and support base in Congress so I guess we do not even bother the little guys. And they are small producers.

Twenty-one percent of the 12,825 payments went to sheep ranchers in the Navajo Nation. I’m sure the gentleman would not even begin to insinuate that the Navajo people are wealthy enough not to need relief. This amendment would hit them harder than any other group of individuals.

Mr. Chairman . . ., many of the statistics the gentleman is using do not even relate to the emergency payments they are trying to stop. They refer to the old wool program which ended in 1995.

Mr. Chairman . . ., I urge all of my colleagues to oppose this amendment, it’s the wrong amendment, the wrong time and the wrong place. Oppose this amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. WEINER. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. ROYCE).

Mr. ROYCE, Mr. Chairman, I think the Congress has been a little sheepish when it comes to reducing wasteful programs especially during times when we have had a Federal surplus.

I would just make the point that Congress did end the wool and mohair subsidy. It was phased out in 1994. I think that was a good thing. Subsequent to that taxpayers did save about $200 million a year. That was good.

However, like a wolf in sheep’s clothing, this subsidy came back in the fiscal 1999 omnibus appropriations bill and again in the fiscal 2000 agriculture appropriations bill. Now wool and mohair producers have become eligible to receive these payments again.

I do oppose the subsidy for apple producers. I think that is another rotten apple in this agriculture measure that is before us. But let me make the observation that while in the old program farmers were paid a subsidy for the wool and mohair they sold, in this new program, if I understand it right, the way it works now is the farmers do not need to attempt to sell their goods necessarily. The Agricultural Department will pay farmers by the pound just to produce mohair. Under the new program not only can farmers make money without selling their crop, they can make money without trying to market it, if I read it correctly.

In 1999, taxpayers provided wool and mohair farmers, I believe, 10.3 million in subsidy. As explained, the original concept of this had to do with our national security. It had to do with the fact that military uniforms were wool. But the reality is that in 1959 they changed to synthetic fabrics and cotton. That is the situation today.

I just think it is time to end this waste of taxpayers’ dollars. I think it is time to shear the wool and mohair subsidy and stop the fleecing of tax dollars.

Mr. WEINER. Mr. Chairman, I reserve the balance of my time.

Mr. WEINER. Mr. Chairman . . ., I urge all of my colleagues to oppose this amendment, it’s the wrong amendment, the wrong time and the wrong place. Oppose this amendment.

This amendment goes against every principle of trying to help people in agriculture help themselves. We do not want to be dependent on the Federal Government; but until this government gets a handle on energy costs, on import problems, and understands that, unless this government steps forward and solves many of the problems that are creating the crisis in the Federal
Mr. BONILLA. Mr. Chairman, what is the time remaining?

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) has 13 minutes remaining. The gentleman from New York (Mr. WEINER) has 9½ minutes remaining, and the gentleman from Texas as the chairman of the subcommittee has the right to close.

Mr. BONILLA. Mr. Chairman, we only have one additional speaker, so I reserve the balance of my time.

Mr. WEINER. Mr. Chairman, I yield myself such time as I may consume.

First of all, let me address some of the points that have come up by the very distinguished chairman about the inconsistency in his mind of my supporting a program that is in New York. Well, I also support programs that are in Mississippi, Montana and North Carolina and all across this country because I support the bill. I think it is a good bill.

Mr. Chairman, I would ask both the chairman and members of the committee and all of my colleagues, if we had a program that was in place under various guises since 1938, and still we were seeing that the marketplace was not responding to the subsidy, that we were still hemorrhaging market share, and still losing the jobs and had fewer and fewer heads of sheep that were being lost, why would you deem it to be a successful program?

Can anyone argue by any measure that it is a successful program? Is it successful for the average farmer that will get $44? The gentleman from Montana said we need to keep it in place because of the strength of the dollar or because of trade disputes. We will add those to the list of justifications and reasons that have been growing since 1938.

Let me reiterate the statistics of this. 1993 we had a subsidy. There was a 5.2 percent reduction in wool production. 1994 we had a subsidy, 11 percent loss. 1995 we had a subsidy, 8 percent loss. 1996 we had a subsidy, 11 percent loss. If we did not have a subsidy, we only had a 3 percent loss.

Perhaps there was something about the marketplace in 1997, perhaps it was the Democratic Presidency, but the fact of the matter is there seems to be no correlation between the subsidy and the success of the program.

Mr. Chairman, I think it is reasonable for Members of Congress who support ag programs to say this one is a bust. It is not working. I think we have to make those distinctions both in agriculture programs, and I would say this to my most fervent colleague in the urban areas, we have to make those determinations with urban areas as well. If a colleague from an urban area said to me to continue the subsidy for mass transit for all of those coal-powered subways, I would say there are no coal-powered subways.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, what is the time remaining?

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) has 13 minutes remaining. The gentleman from New York (Mr. WEINER) has 9½ minutes remaining, and the gentleman from Texas as the chairman of the subcommittee has the right to close.

Mr. BONILLA. Mr. Chairman, we only have one additional speaker, so I reserve the balance of my time.

Mr. CHAIRMAN. Mr. BONILLA, Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I do not have a great deal to add on the importance of preserving what I believe will turn out to be on the final vote on this bill a continuation of the very strong urban-rural coalition that exists in this House. I and many of my colleagues are going to be supporting the agriculture bill with enthusiasm. We recognize the matrix that exists between farm programs that are miles away from our communities and the importance that they play to our economies and our communities.

All of that being said, it should never be a substitute for us making wise decisions about what programs work and what programs do not work. In 1993, this body took several steps to reduce the size of government to make things more efficient.

In 1993, after years of being hammered on television shows which were frequently unfair about a fleecing of America, we finally decided to see what we could do about ending this program. The program ended; and, unfortunately, there continued to be a decline in the production of wool and mohair in this country. That decline slowed, and since then we have had an increase in mohair prices.

There has been an 88 percent increase since 1995, yet we continue the subsidy. The subsidy for mohair is 40 cents, as opposed to a 20-cent subsidy for wool, despite the fact that we say we are trying to help the family farmer. Many more people are producing wool. They are in a much more dire situation, yet they get half the subsidy of those who produce mohair.

We still have the terrible imbalance that exists in this program between the average farmer who gets $44 and the top 1 percent that get over $100,000 each.

Mr. Chairman, I stand shoulder to shoulder with the chairman, who has done a terrific job on this bill, in saying that there are many areas that we have to step in and provide assistance to. But if we are standing here in 38 years, God willing, or 50 years, God willing, and we are debating the apple program, the tobacco program or the corn program, or any of the programs that may or may not be in this bill, and if we are still having the same problems as we had from 50 years ago, I believe my colleagues first to say we should eliminate that program.

Mr. Chairman, I urge Members to eliminate the wool and mohair subsidy, save our constituents 10 to 15 to $20 million; and even more important, end a program that has long since proven itself to be ineffective. More importantly than that, show that we understand and have the ability to separate a program that truly does work from those that do not.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Idaho (Mr. SIMPSON).

Mr. SIMPSON. Mr. Chairman, we will have a funny program. It helps if one knows the facts; it really helps if one understands the facts. But if one neither knows nor understands the facts, it causes a great deal of confusion.

Mr. Chairman, let me talk about the “Dear Colleague” letter that went out. It says this subsidy began during World War II and the Korean War, and obviously it is no longer necessary because the military does not need this wool anymore. This is not the original program for the military in World War II. This is an economic disaster, market loss assistance program, which was put into place.

Our agricultural producers that raise sheep and mohair are suffering the same economic consequences as everybody else is in the agricultural industry: and to pick them out and say we are not going to help them, we are not going to have an assistance program for them and we are going to for everybody else is wrong. This is not the old program put into place during the war.

Mr. Chairman, the other part of the “Dear Colleague” says, “The average farmer received $44 for this subsidy. The largest factory farms, representing 1 percent of all growers, received 25 percent of the subsidy.” That is blatantly not true. There are no facts which support that. To support this, the largest producer would have to raise 62,000 sheep. There are no producers that large.

Mr. BONILLA. Mr. Chairman, I yield myself the balance of my time.

If I can just address the remarks of the previous speaker who was not here earlier, that is exactly my point, that the program that we had since 1938 has evolved so many times; yet we continue to find another justification for it. We say, well, it was because we needed the uniforms; well, now we need an emergency in the 1990s; well, now it is to compete with foreign competitors; well, now it is to make up for the loss in the strength of the dollar. The fact remains that that is the definition of a program that ain’t working.

If you have a program since 1938, if you keep changing the name and changing the justification and still the facts remain the same, that the decline in the industry domestically has been unfettered by these programs. In fact, I earlier read a statistic that I will repeat for the gentleman, that the year
that the program went out of effect for 2 years, the industry did better. It did better. The losses were smaller in 1997 than they were in 1996 in both wool and mohair.

If you want to find a program that works, you say, here is what the subsidy did. I defy anyone in this Chamber to point me a success story from this program. Tell me one year that this program has been in effect that there is a single farmer that got $44 on the average, a single farmer that said, oh, I got my 44 bucks.

Mr. SIMPSON. Mr. Chairman, will the gentleman yield?

Mr. WEINER. I yield to the gentleman from Idaho.

Mr. SIMPSON. Mr. Chairman, I would like to know where he got the average of $44 per farmer, because we cannot find anywhere where that information comes from. In fact, it comes to about $800 per farmer from our information. And the information that he suggests that 1 percent of those sheep producers got 25 percent of the payments is just blatantly false.

Mr. WEINER. I will be glad, reclaiming my time, to give the gentleman the source for that. That was the 1993 National Performance Review performed by the office of Vice President Gore, which was the rationale for a bill that came to this floor providing for greater efficiency in government that ended this program.

Mr. SIMPSON. So these are decade-old figures that he is quoting to us, 8 years, from 1993?

Mr. WEINER. I have been quoting numbers out the yinyang today, but which one is the gentleman referring to?

Mr. SIMPSON. Any ones that he understands.

Mr. WEINER. That should narrow it down.

No, anything after 1993 obviously did not come from that study. Anything after 1993 came from the Agricultural Statistical Service, sir.

Mr. SIMPSON. That is interesting because they did not have any information for us.

Mr. WEINER. I will be glad to provide it for the gentleman. But one thing, and I would yield to anyone, since I have a couple of moments left, anyone that can point to a year the subsidy was in place that it did anything to reverse the trend. The trend has been consistent right along. The only time there has been a blip in the trend was 1997 and 1998 when the program was phased out momentarily. Then reduced. They did not gain, but the losses were reduced.

So the argument for a program is not simply that I came up with a new rationale for it. I could do that for any program. The argument has to be, here is how, and we have not seen any demonstration that it has worked.

Mr. Chairman, I yield back the balance of my time.

Mr. BONILLA. Mr. Chairman, I yield the balance of my time to the gentleman from Texas (Mr. STENHOLM), the ranking member on the Committee on Agriculture, a hero to agriculture, and someone who is going to tie all this up in a little package for us at the conclusion of this debate.

The CHAIRMAN. The gentleman from Texas is recognized for 12 minutes.

Mr. STENHOLM. Mr. Chairman, I thank the gentleman for yielding me this time.

In light of the last exchange, I am often reminded but never more so than this afternoon on this amendment of the late Will Rogers’ quote when he said, “It ain’t people’s ignorance that bothers me so much, it’s them knowing so much that ain’t so is the problem.”

That is what it is about this amendment. The gentleman from New York and the gentleman from California are still attacking a program that was eliminated in 1994. They keep referring and all of these letters that we get about how wool and mohair is still here, the wool and mohair program like it is still here. It was eliminated in 1994.

Even the money the gentleman is talking about for striking is not even in the bill we are discussing today. It is in the emergency bill that passed the House Committee on Agriculture and this body to provide assistance to wool and mohair producers.

Now, this gentleman stood on this floor in 1994 and opposed the elimination of the wool and mohair program because we believed it would do damage to an industry that we did not believe was ready to be eliminated because of unfair foreign competition. We lost. I lost. The gentleman from New York is the one that, as he said, won that amendment. We predicted the demise of the wool and mohair industry. And, guess what? Here in 2001, we have 25,000 less wool producers in the United States. They are gone. The gentleman from New York said there is no supply reduction. I would guarantee you there has been a supply reduction. Production has gone down in the United States; 25,000 producers are gone. We have eliminated 70 percent of the mohair producers. They are gone, thanks to the philosophy of the gentleman from New York.

Now, we might say, Well, that is the way it should be. Well, in April of 1999, the United States International Trade Commission determined that the domestic lamb industry suffered from extremely low prices and a flood of imports which constitutes a substantial cause of threat of serious injury to the domestic lamb industry.

In July of 1999 because of the commission’s findings, President Clinton issued Presidential Proclamation 7208 establishing a tariff rate quota on lamb meat for a 3-year adjustment period. The 3-year adjustment period was established so the domestic sheep industry could recover from unfair trade. Unfair trade.

We have accomplished what this body wanted to accomplish with the elimination of the wool and mohair program. It is gone. Now what some of us are interested in doing is trying to assist those wool and mohair producers that believe that they can compete in the international marketplace if their government would stand shoulder to shoulder with them as just this year the European Union will spend $2 billion, that is with a B, subsidizing their wool industry.

Now, I would ask anyone in this body that represents any interest, whether it be agricultural, airplanes, anything that you are manufacturing in this country, if your competitor is spending $2 billion a year, why is that excessive? What is it that we are doing that has brought this amendment to the floor today to suggest that by trying to stand with an industry that is trying to survive in the marketplace, we are doing that now, not with subsidies. The old program cost $200 million a year. We are providing $16.9 million, exactly like we are doing for apples, for cotton, for wheat. That is all that is being done. Not in this bill, but in some other bill. Since 1999, depressed wool prices. In 1995 wool was selling for $1 a pound. Today it is 33 cents a pound. That is in constant dollars. Real dollars. Yet you stand on the floor today and say there has been no market reaction, that somehow we are doing something that is unfairly subsidizing the wool producers? Come on.

We have a letter from the American Textile Manufacturers Institute saying, “Please do not be misled into thinking that the money for wool and mohair producers is actually a continuation or revival of funding provided by the Wool Act which Congress eliminated in the 1990s.”

That is the truth. The gentleman from New York and the gentleman from California have taken some other individuals who have no knowledge whatsoever of the industry and have suggested that somehow we are putting the wool and mohair back into place. And that is not the case. And, at another time, in another place, is saying to those wool and mohair producers who have survived the elimination of the Wool and Mohair Act that we want to stand shoulder to shoulder with you and we want to give you a little assistance, and it is a little little assistance, and we are struggling now in the Committee on Agriculture to come up with a program that will hopefully give them the opportunity to compete in the marketplace. The gentleman from New York’s rhetoric has suggested; but his facts are so far off base that I know the gentleman did not mean to misstate to this House
what he has stated over and over again today. But I believe he has been misled.

Mr. WEINER. Mr. Chairman, I...
In the last 10 years, America’s taxpayers basically paid out $1.5 billion for this particular subsidy. I think the American people would agree that their money would be better spent if this was relegated back to the private sector.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN pro tempore (Mr. SIMPSON). Does the gentleman from Texas (Mr. BONILLA) claim the time in opposition?

Mr. BONILLA. Mr. Chairman, yes. The CHAIRMAN pro tempore. The gentleman from Texas (Mr. BONILLA) is recognized for 5 minutes.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I thank the gentleman from Texas (Mr. BONILLA) for yielding me this time.

Mr. Chairman, I rise in opposition to the Royce amendment. I think that the proof is in the pudding, and the pudding is in the trade accounts of the United States, which show that in spite of an unbelievably large trade deficit in almost every other sector, in the agricultural arena we have been able to keep our nose above water barely, because we have exported more than we have imported. With dropping prices for product and so forth, we have managed to double some exports. In specialty areas, whether we are talking about fish or packaged juices, we have been able to keep moving product outside this country. That takes effort.

The Market Access Program helps.

With changes made in prior farm bills, we have limited those who can apply for assistance in order to move product into the international market; but we would not want to stand on this floor and oppose a program that has helped America maintain positive trade accounts in agriculture internationally when every other single account in petroleum and imported oil products, in manufactured goods, in electrical equipment, no matter where one goes in the trade accounts, the United States has historic trade deficits but for agriculture. Though the going is getting rougher in international waters in terms of trade, my goodness this would be the last program one would want to eliminate in terms of helping both farmers in this country move product and in maintaining and turning around that yawning trade deficit which is a very serious underbelly inside this economy. So I rise in opposition to the Royce amendment.

Mr. ROYCE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. CHABOT).

Mr. CHABOT. Mr. Chairman, I thank the gentleman from California (Mr. ROYCE) for yielding me this time.

Mr. Chairman, I rise in strong support of the Royce amendment, and I commend the gentleman from California (Mr. ROYCE) for his hard work on this issue.

Mr. Chairman, this is one of the most egregious examples of taxpayer subsidized corporate welfare, the MAP program. Hardworking taxpayers should not have to subsidize the advertising costs of America’s private corporations. Yet that is exactly what the MAP program does. Since 1986, the Federal Government has extracted nearly $2 billion from the pockets of American taxpayers and handed it over to multimillion dollar corporations and cooperatives to subsidize their marketing programs in foreign countries.

When Congress, back in 1996, in the farm bill required MAP funds to be limited to farmer cooperatives and trade associations, proponents argued that the funds could only be used to help small businesses and farmers. In fact, much of the funding went to large trade associations made up of some of the largest and most profitable corporations.

Mr. Chairman, Congress should end the practice of wasting tax dollars on special-interest spending programs and unfairly take money from hard working families to help profitable private companies pad their bottom line. MAP is a massive corporate welfare program that we should eliminate today.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. FARR).

Mr. FARR of California. Mr. Chairman, I would say to my colleagues, wake up, wake up and smell the coffee. How do we know the coffee is brewing? How do we know that there are French and Italian wines at the market? The answer is because these countries that grow these products also advertise these products.

They want us to buy agriculture in other countries. That is why we see oranges from South America being advertised in the United States, coffee from Columbia, wine from France and Italy and so on; and yet when it comes to our own agriculture, the most abundant agriculture in the world, where we grow more than we can consume and where we actually grow products for other countries, we should not be allowed to be on a competitive field where everybody has a fair chance by small matching money that the private sector has to put up and match by the Federal Government?

The Federal Government spends $3.187 billion on advertising and recruiting for the military. Our States advertise for tourism. Let us also advertise for agriculture.

Mr. ROYCE. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. WEINER).

Mr. WEINER. Mr. Chairman, I appreciate the opportunity to speak once again on the MAP program. One of the arguments that was made by my colleague from California is that, well, other countries are in a position that they can do this advertising and it has been burdensome to them. The fact of the matter is that our consumer marketplace encourages that type of advertisement to go on of our products that are here made domestically in the United States, irrespective of what is being done in Chile or what is going on in France. I do not believe that the United States taxpayer should be subsidizing these advertising programs because, in fact, what winds up happening is that much of this advertising, I would argue all of it that is subsidized by the MAP program, would go on anyway because of the decisions made by the industry; that it is in their interest to encourage this type of development.

If the MAP program is another example of a program where I do not see it very easy for us to point to demonstrated areas where the advertising has led to any more farmers, any more ranchers, any more production or sales. I am firmly of the belief, and perhaps I am wrong on an economic level, that if the U.S. Government leaves this field it would quickly be occupied.

Mr. BONILLA. Mr. Chairman, I yield 1 minute to the gentleman from Iowa (Mr. LATHAM).

Mr. LATHAM. Mr. Chairman, I thank the gentleman from Texas (Mr. BONILLA) for yielding me this time.

Mr. Chairman, I rise in strong opposition to this amendment. I would just like to make a couple of points. Number one, these funds are not available to large international corporations. These funds are matched by people like the corn growers, the beef producers, the pork producers, people who care about their product and want to promote their product; that we can expand our exports for the American farmers.

There is a prohibition from these corporations who are making corporate welfare out of this. These programs are absolutely essential, for the future in agriculture so that we can add value to American agriculture, so that we can go out into the world marketplace and talk about the quality and the supply of good American food products.

If anything, Mr. Chairman, we should be increasing these funds. We should be proud of what we stand for in agriculture. We should stand up and say to our American farmers that they do have the best products in the world and we want to go tell the world about it. That is what we need to do to protect this program. It is not large enough as it is.

Mr. ROYCE. Mr. Chairman, I yield myself the remainder of my time.
attributed to the Market Access Program would have occurred whether MAP existed or not. The private sector, I would also point out, knows better to whom to advertise and how to advertise and can do it more efficiently. I think that government hand-outs merely replace money that would be spent by private companies on their own advertising.

The last point I would like to make is MAP, in some cases, uses tax money derived from the competitors of these MAP recipients. So I would urge adoption.

Mr. BOYD. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. BONILLA), a member of the subcommittee.

Mr. BONILLA. Mr. Chairman, I thank the gentleman from Texas (Mr. BOYD) for yielding me this time.

Mr. Chairman, I rise in opposition to the amendment of the gentleman from California (Mr. ROYCE). Mr. Chairman, as we continue to open our borders and expand trade, we continue to put our own small producers at a disadvantage because of the increased pressure from other countries that are heavily subsidizing.

This is one program, one program, that is really working well to enable some of our smaller producers and processors to gain access in the foreign market.

Now, the gentleman from California talked about the GAO study but I want to say, Mr. Chairman, the GAO study did not go to Florida where we have used the program very successfully in the citrus and grapefruit industry. We do a 100 percent match of the Federal funds and since the inception of this program we have increased the grapefruit exports from $40 million to $190 million.

I strongly suggest that we vote down this amendment.

Mr. BONILLA. Mr. Chairman, I yield myself the remainder of my time.

Mr. Chairman, there seems to be an annual debate on this amendment so I will make my remarks brief. We are going to rehash what the benefits of this are very quickly.

I want to point out the positive aspects of the Market Access Program. Each year $80 million is spent out of the Commodity Credit Corporation on MAP to help initiate and expand sales of U.S. agricultural, fish, and forest products overseas. Rural American farmers and ranchers, as the primary suppliers of commodities, benefit from MAP. The entire amount of the credit is used to increase the competitiveness of the country's exports from the program's employment and economic effects from expanded agricultural exports markets.

In 2000, agricultural exports totalled nearly $51 billion and that generated almost three-quarters of a million jobs. About half a million jobs out of that total were also related to other areas like processing, packaging, storing and financing of exports.

Mr. Chairman, agricultural exports are expected to increase by another $2 billion this year, 53 billion. More than 1 million Americans now have jobs that depend on U.S. agricultural exports. This program goes a long way toward making sure that we have these export markets. I strongly oppose this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROYCE).

The question was taken; and the results appeared to have it. Mr. ROYCE. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from California (Mr. ROYCE) will be postponed.

AMENDMENT NO. 11 OFFERED BY MS. KAPTUR

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. KAPTUR:
Add before the short title at the end the following new section:

Sect. Sec.

Provided that the entire amount shall be available only to the Secretary of Agriculture to carry out and support (utilizing existing authorities of the Secretary and subject to the terms and conditions applicable to those authorities) research, technical assistance, loan, and grant programs regarding the development of biofuels (including biodiesel, biodiesel and other forms of biomass-derived fuels), the production of such biofuels, the establishment of farmer-held reserves of fuel stocks and demonstration projects regarding such biofuels, as part of a Biofuels and Biomass Energy Independence effort and to augment the President's National Energy Policy: Provided, That the entire amount shall be available only to the extent an official budget request for $300,000,000, that includes designation of the entire amount of the request as an emergency requirement as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, is transmitted by the President to the Congress: Provided further, That the entire amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of such Act.

Mr. BONILLA. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. A point of order is reserved.

Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Ohio (Ms. KAPTUR) and a Member opposed each and will control 5 minutes.

The Chair recognizes the gentleman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I wanted to especially thank my dear colleagues, the gentleman from Maryland (Mr. HOYER) and the gentleman from Illinois (Mr. DAVIS), for reserving time this afternoon and checking in as this debate ensued on the floor in order to be able to join me in this debate.

Let me say that our amendment proposes that as a part of our national energy strategy that biofuels and bioenergy be more than an afterthought but, in fact, be a central pillar of helping America reach a renewable energy future.

If you look at America's trade accounts, our chief strategic vulnerability relates to imported fuels. We are willing to go to war, to send our young men and women to war, for oil, but we are not willing to invest the dollars here at home to propel ourselves into a more energy self-sufficient future.

When the President of the United States and new Vice President produced a national energy report with solutions for the future, there was one solution: Not a single recommendation relates to renewables and the use of biofuels, what we can take off of our fields and forests, in order to have ethanol, biodiesel, and other such fuels made a part of America's energy future.

We declare an emergency, we set aside $500 million, and we say that biofuels are as important as natural gas, they are as important as petroleum, they are as important as any other fuel, whether it is windmills or turbines or whatever, in order to put America on a sound energy footing. We want to make sure that our message is heard loudly and clearly.

Mr. Chairman, I yield 1½ minutes to the gentleman from Maryland (Mr. HOYER), who has experience in this area, and again I express gratitude for his coming to the floor.

Mr. HOYER. Mr. Chairman, I thank the gentlewoman for her amendment, and I thank her for her comments and her hard work on this committee and on so many other areas. She has touched on a critically important issue to our country.

Mr. Chairman, I rise in support of the gentlewoman's amendment to provide half a billion dollars in emergency spending on biodiesel, ethanol and biomass research and development.

Mr. Chairman, since 1999, the Beltsville Agricultural Research Center, which is located in my district, has been conducting a pilot project using biodiesel. At BARC they use 80 percent diesel and 20 percent soybean oil mix. Their test results found that using biodiesel reduces carbon dioxide emissions 16 percent; particulate matter, which is a major component of smog, 22 percent; and sulfur emissions, 20 percent.

Equally important to the environmental benefits of these fuels is the fact that their use, as has been so well articulated by the gentlewoman from...
Ohio, lessens our dependence on foreign oil and opens up new markets for our farmers. So, from every perspective, this is a very positive direction for our country to move, and I thank the gentlewoman for her leadership.

Ms. KAPTUR. Mr. Chairman, I yield 1½ minutes to the gentleman from Illinois (Mr. DAVIS), who has waited all afternoon in order to make these comments. I thank the gentleman sincerely.

Mr. DAVIS of Illinois. Mr. Chairman, I rise in strong support of the Kaptur amendment.

To say that we have an energy crisis is an understatement, but the State of Illinois stands ready to help find a solution. The State of Illinois is a major producer of corn, which, when used in the development of ethanol, makes good sense. This amendment makes good economic sense, environmental sense and common sense.

Ethanol is an additive which, when used in gasoline, produces cleaner and more efficient energy. To help this country to become more energy-efficient, we can and should employ greater use of ethanol. Ethanol makes us more energy-efficient, more self-reliant and environmentally protected. It is a good amendment, Mr. Chairman, and I urge its adoption.

Mr. Chairman, I thank the gentlewoman from Ohio for introducing this amendment.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in closing this afternoon, let me say that oil ministers of the Middle East should not be put in charge of setting energy prices in the United States of America. We should have that control inside of our border.

This amendment would merely reallocate one half of one hundredth of the nearly $70 billion that we send to the Middle East oil ministers every year for petroleum imported here, and replace it with investments we make in ourselves for the future. It gives the Secretary of Agriculture very flexible authority in order to spend those dollars in order to make agriculture an equal pillar along with other old fossil fuels.

The CHAIRMAN. Does the gentleman from Texas (Mr. BONILLA) insist on his point of order?

Mr. BONILLA. Mr. Chairman, I continue to reserve the point of order.

Mr. Chairman, I would like to inquire if the gentlewoman is going to withdraw her amendment?

Ms. KAPTUR. Mr. Chairman, if the gentleman will yield, I would say to the chairman of our subcommittee, very reluctantly, very, very, very reluctantly, very, very, very reluctantly, I am going to be forced, because of the rules, to withdraw my amendment to put America on a more renewable energy future. But I would hope that our words today have been heard at the U.S. Department of Agriculture.

I appreciate the chairman for his indulgence, and I would hope that wisdom will prevail in the days and months ahead.

The CHAIRMAN. Without objection, the amendment is withdrawn.

There was no objection.

AMENDMENT OFFERED BY MS. KAPTUR

Ms. KAPTUR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. KAPTUR: At the end of title VII, insert after the last section (preceding any short title) the following section:

SEC. 7. Of the amounts appropriated in this Act in the item relating to “DEPARTMENT OF HEALTH AND HUMAN SERVICES—FOOD AND DRUG ADMINISTRATION—SALARIES AND EXPENSES,” the amount appropriated in the second undesignated paragraph of such item (relating to section 804 of the Federal, Food, Drug, and Cosmetic Act) is transferred and made available as an additional appropriation under the first undesignated paragraph of such item.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentlewoman from Ohio (Ms. KAPTUR) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we have witnessed a great debate today about the importation and reimportation of prescription drugs. Yesterday Secretary Thompson finally rendered his decision regarding the fate of the reimportation provision attached to the fiscal year 2001 agriculture appropriation bill. My amendment takes the $2.95 million designated in this bill for costs associated with the reimportation provision and would transfer these funds back to the Food and Drug Administration general account.

Clearly, in the wake of the Secretary’s decision, the Agency no longer needs the funds for the purposes of reimportation, and my amendment would simply keep those funds within the Agency so they are not penalized to be used for program priorities at the Agency’s discretion within such accounts as the prevention of BSE, TSE, mad cow disease and hoof and mouth disease, many of the challenges that are facing our country today.

Given its tremendous responsibilities and challenges, FDA needs every resource available to keep our food and drug supply safe. I encourage the membership to vote yes to keep these funds within the Agency.

Mr. BONILLA. Mr. Chairman, I rise in strong support of this amendment, and ask unanimous consent to control the time in opposition.

The CHAIRMAN. Without objection, the gentleman will be recognized for 5 minutes.

There was no objection.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the chairman very much. It has been a pleasure to work with the gentleman on this bill. We are proceeding expeditiously, in view of the large number of amendments. I am deeply grateful for the gentleman’s support.

Mr. Chairman, I yield back the balance of my time.

Ms. KAPTUR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the chairman for his indulgence and I would hope that wisdom will prevail in the days and months ahead.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Ohio (Ms. KAPTUR).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. Brown of Ohio: At the end of title VII, insert after the last section (preceding any short title) the following section:

Sec. 7. Of the amounts appropriated in this Act for carrying out the responsibilities of the Food and Drug Administration with respect to abbreviated applications for the approval of new drugs under section 505(j) of the Federal Food, Drug, and Cosmetic Act, $1,000,000 is available for the purpose of carrying out section 314.53(b) of title 21, Code of Federal Regulations, in addition to any other allocation for carrying out such section 314.53(b) made from amounts appropriated in this Act for the Food and Drug Administration.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Ohio (Mr. BROWN) and a Member opposed each will control 10 minutes.

The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR).

Mr. BROWN of Ohio. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to start with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment would do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate with what the Brown-Emerson amendment does not do: It does not legislate
on patents that are directly related to a brand-name drug as approved by FDA. The “drug as approved by FDA” is important.

If a generic drug company is sued for potentially infringing on these type of patents, FDA automatically suspends approval of the generic for 30 months. Because the drug industry knows that FDA does not actually enforce its regulations, I repeat, because the drug industry knows that FDA does not actually enforce these regulations and weed out patents that under no circumstances should trigger that 30-month delay, drug companies therefore are conjuring up patents that by no stretch of the imagination fit any FDA criteria, just to trigger the 30-month delay, just to enjoy 30 months more of profits, patents on unapproved formulations of the same or on unapproved uses of the drugs, patents on the shape of the pills, patents on the grooves in the pills, patents even on the bottle holding the pills. Each of these patents, when challenged, triggers the 30-month delay.

These totally unnecessary delays cost consumers billions of dollars in lost savings, while the brand-name companies reap those same billions in additional profits.

Seven years ago CBO estimated that generics save consumers $8 billion to $10 billion per year. Utilization and prices have both increased dramatically since 1994. So have the potential savings associated with generic drugs.

Take Prilosec, for example. Prilosec generates $283 million per month in sales. Astra Zeneca has filed several unapproved use patents on Prilosec, each of which could trigger a 30-month delay in generic competition, even though under FDA regulations only patented and approved uses of a brand name should trigger the 30-month delay.

Remember, generics save consumers, save employer-sponsored plans, save all levels of government 40 to 80 percent over the brand-name price. After a few years, the price differential sometimes grows to 90 percent. Over the next 10 years, brand-name drugs with sales topping $40 billion annually will reach the end of their patent life. If we do not do something to prevent drug companies from gaming the system to extend the life of their lock on the market to make their profits, we are perpetuating needlessly inflated drug prices. I do not want to do that to the consumers in my district.

Our amendment equips FDA to enforce its regulations and at least prevent the most blatant abuses of its 30-month delay provision and stop the gaming of the patent system by the brand-name drug manufacturers.

It permits the Agency to use up to $1 million to get its act together to enforce its laws, to stop brand-name drug companies from walking all over the Agency, and, more importantly, walking all over the public.

We have an opportunity today to help our constituents without changing a word of the existing FDA statute. I urge my colleagues to take advantage of that opportunity and vote for the Brown-Emerson amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. BONILLA. Mr. Chairman, I claim the time in opposition to the amendment.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 10 minutes.

Mr. BONILLA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in lukewarm opposition to this amendment. This concept sounds like a good one, and possibly it could prevent blatant, patent abuses. This amendment does not open the door for FDA to exercise its existing authority to prevent blatant patent abuses under the Hatch-Waxman Act.

As many people may know, since the passage of Hatch-Waxman, brand-name pharmaceutical companies have really become quite proficient in manipulating the law to keep generic alternatives from reaching the market. I do not think that the authors of this legislation would want that to be happening today.

Just, for example, one of the brand industry’s favorite and most frequently used methods to delay generic competition is to make insignificant changes to their products and secure new patents just as the patent on the original product is set to expire. Under current law, once such new patents are granted by the Patent Office, no matter how frivolous or invalid they may be, the generic drug is prohibited from going to market for 30 months. In one instance a brand-name company triggered the 30-month prohibited delay by patenting the color of the bottle, the color of the bottle in which the pharmaceuticals are typically dispensed. In another example, a brand company was able to delay generic competition by claiming the generic version infringed on the brand patent because, like the brand, the generic pill had two grooves in it.

These types of delay tactics cost our constituents billions of dollars every year. For example, Bristol-Myers Squibb listed a frivolous patent with the FDA on the eve of its patent expiration for the drug BuSpar. After months of delay, a Federal court ruled that the patent was improperly listed and ordered Bristol to delist its patent with the FDA. So the cost to consumers for this 5-month delay was $57 million.

The situation is getting so out of hand that on May 16 of this year, the Department of Trade and Development sent a citizens’ petition to the FDA questioning the possible improper or untimely listing of patents by brand-name drug companies.
Mr. Chairman, our amendment is very simple. It would reallocate already-appropriated funds from the amount of $1 million to the FDA’s generic drug office. The money would allow the FDA to use its authority to review and prevent the abuse of patent listings by drug companies who want to extend the patent laws of their blockbuster drugs. This amendment does not add any additional money, no additional money. All it does is reallocate already-appropriated money.

Let us all make sure that the FDA devotes the resources necessary to prevent the exploitation of patent listings, because each 30-month delay of generic drugs costs consumers billions of dollars in lost savings.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.

Mr. Chairman, numerous pharmaceutical companies have listed patents for unapproved uses and inappropriate forms of the drug. I am not going to get into all the examples, but this adds up to billions of dollars lost in consumer savings. We need to pass this amendment.
would ask my colleagues to vote “no” on the Brown amendment.

Mr. ALLEN. Mr. Chairman, I yield the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. BROWN).

The amendment was agreed to.

Amendment No. 4 offered by Mr. ALLEN:

At the end of title VII, insert after the last section (preceding any short title) the following section:

SEC. 7. None of the amounts made available in this Act for the Food and Drug Administration may be expended to approve any application for a new drug submitted by an entity that does not, before completion of the approval process, provide to the Secretary of Health and Human Services a written statement specifying the total cost of research, with respect to such drug, by stage of drug development, including a separate statement specifying the portion paid with Federal funds and the portion paid with State funds.

Mr. BONILLA. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. A point of order is reserved.

Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Maine (Mr. ALLEN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Maine (Mr. ALLEN) for 5 minutes.

Mr. ALLEN. Mr. Chairman, I yield myself such time as I may consume.

I rise to offer an amendment with the gentleman from Ohio (Mr. BROWN) to provide American taxpayers with information about our collective investment in the research and development of new drugs. The Food and Drug Administration should not approve, in our opinion, a new drug application unless the total cost of the research and development of that drug is available to the public. We are particularly interested in knowing how much money the taxpayers have contributed.

The pharmaceutical industry claims that efforts to make drugs affordable for seniors would reduce the industry’s ability to conduct research and to develop new drugs. I disagree. This industry is the most profitable in the country. Their profits last year were more than $27 billion. The manufacturers will always be able to attract capital in order to do R&D.

The industry asserts that they have a right to charge high prices to those least able to afford it because of the $500 million, more or less, that they claim it takes to launch a new drug.

What the industry consistently fails to disclose is that new drugs are usually the result of a partnership with the public. A good portion of our Nation’s pharmaceutical research is conducted by publicly-funded entities. We deserve to know how much.

The pharmaceutical industry says we do not deserve to know. They say this amendment is unjustified. I say there is no justification for the way America’s seniors are currently treated.

Seniors pay taxes which are used to fund research, but the product of that research, which saves lives, is too expensive for many of them to afford.

The DRUG MANUFACTURERS say no other industry has to disclose R&D figures. But no other industry gouges the needy as they do, or operates in such a shroud of secrecy.

We are not asking that the FDA make an approval decision based on the R&D data. We are simply asking that trade secrets be made public. We are simply asking the FDA to inquire about the data on the cost of R&D and to make it available.

The industry has attacked this amendment. They say only assume they know their arguments about their R&D expenses will be undermined if the public is told how much of the cost of the development of new drugs is actually paid by the public.

We know that the taxpayer contribution to the development of innovative medicines is significant. NIH estimates that taxpayer-funded research, combined with private foundation-funded research, accounts for about 50 percent of all medical research in this country. Now we need to know the details, just how much public and private funding is involved in the development of new drugs.

We do not want to slow the approval of new drugs. But there are too many patients who cannot afford the drugs, even if they are approved by the FDA. Proving a drug safe and effective can take years. Providing the cost of development should be easy. A memo to the FDA would do the job. I assure the Members that the pharmaceutical industry is capable of tracking expenditures in their development of new drugs.

We know that the approval process is not biased against generic drugs. The Pharmaceutical Research and Manufacturers of America’s seniors are currently treated.

Seniors pay taxes which are used to fund research, but the product of that research, which saves lives, is too expensive for many of them to afford.

The CHAIRMAN. The question is on the amendment offered by Mr. ALLEN.

Mr. ALLEN. I yield the balance of our time to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I thank the gentleman for yielding time to me.

Prescription drug companies consistently depend on one argument and one argument only, to defend charging U.S. consumers two and three and four times higher prices in the U.S. than they do in other developed countries.

The one argument they use to justify grossly inflated drug prices is that those prices are necessary to sustain R&D. Yet, we know that American taxpayers pay for a portion of all the R&D that is done in the drug industry development in this country.

It is an insult for the industry to ask American taxpayers to willingly pay the highest price in the world when they will not tell us what they spend when they are the most profitable industry in America, when they spend more money lobbying this institution than anybody else. They pay back American taxpayers by charging us more than anybody in the world.

I ask support for the Allen amendment.

The CHAIRMAN. Does the gentleman from Texas (Mr. BONILLA) insist upon his point of order?

Mr. BONILLA. Mr. Chairman, I make a point of order against the amendment. It proposes to change existing law and constitutes legislation in an appropriations bill, and therefore violates clause 2 of rule XII of the House.

The CHAIRMAN. The rules state, in pertinent part, “An amendment to a general appropriations bill shall not be in order if changing existing law.” The amendment imposes additional duties. I ask for a ruling from the Chair.

The CHAIRMAN. Does the gentleman from Maine (Mr. ALLEN) wish to speak on the point of order?

Mr. ALLEN. I simply await the ruling of the Chair.

The CHAIRMAN. The Chair is prepared to rule.

The Chair finds this amendment imposes additional duties not required by
Mr. OLVER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Pursuant to the order of the House of Thursday, June 28, 2001, the gentleman from Massachusetts (Mr. OLVER) and a Member opposed each will control 30 minutes.

Mr. OLVER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, for the most part, this bill is an excellent bill.

Mr. OLVER. Mr. Chairman, will the gentleman yield?

Mr. Chairman, I yield to the gentleman from Texas.

Mr. Chairman, Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, just to inform the gentleman, we are just delighted to accept this amendment. If the gentleman would like to offer any more debate against the language in the bill, we are just delighted to accept the amendment and move it forward.

Mr. OLVER. Mr. Chairman, I thank the gentleman for his acceptance of the amendment. We do have several speakers who wish to speak on it.

Mr. Chairman, this is an excellent bill. I simply respect the outstanding work of the chairman of the subcommittee, the gentleman from Texas (Mr. BONILLA), and the ranking member, the gentlewoman from Ohio (Ms. KAPTUR), but I rise to strike section 726, an anti-environmental rider which is meant to prevent any and all action to address the climate change caused by global warming.

Mr. Chairman, section 726 is equivalent to burying our heads in the sand, and hot sand, at that. Regardless of the fate of the Kyoto Protocol, there is overwhelming, peer-reviewed, sound scientific evidence for global warming. The National Academy of Sciences has very recently reaffirmed that fact.

Placing a gag order on Federal agencies can only stifle our ability to address what will be the most critical environmental issue of the 21st century at a time when carefully considered but comprehensive action is needed.

This oil rider dates back to the Clinton administration, which I believe, with good reason, that President Clinton would have asked to implement Kyoto. But President Bush has made it clear that he has no intention of implementing the Kyoto Protocol. He has declared the Kyoto Protocol dead, dead. So, at the very least, the rider, I am delighted and gratifying it out, it shows a lack of trust in the President's intentions and in the President's word, which I am sure the majority does not mean to do.

So why has the rider appeared? Because it has been used to badger agencies and demand repeated explanations of environmental activities. The Inspector General was recently forced to investigate alleged violations by the EPA, the Department of Energy, and the State Department, and found no instances of violations. It is the President of the United States who will not implement Kyoto, who runs the executive departments.

This rider jeopardizes the executive agency work on every issue related to climate change, which the U.S. is obligated to address as part of the United Nations Framework Convention on Climate Change. Remember, the U.N. Framework Convention on Climate Change was ratified by then President George Herbert Walker Bush in September of 1992, was ratified by the Senate in October of 1992, and took force in 1994.

It states that, and I quote, "The parties to the convention are to implement policies with the aim of returning to their 1990 levels of anthropogenic emissions of carbon dioxide and other greenhouse gases." Mr. Chairman, the consequences of global warming will not be mild. If we do not begin to act soon, it may be too late to preserve our coastlines and our agriculture. The American public wants this Congress and this administration to find a way to address global warming.

How we do that is not the subject of today's debate. This vote has nothing to do with implementing or even liking the Kyoto Protocol. But a yes vote to remove this ill-conceived and unneeded rider allows our agencies to search for ways and measures authorized by the already-ratified U.N. framework to begin addressing greenhouse gases.

I urge a yes vote on the Olver-Gilchrest amendment.

Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. BOEHLERT), the distinguished chairman of the Committee on Science, who is showing every day great leadership on this issue of climate change.

Mr. BOEHLERT. Mr. Chairman, I will spare my colleagues all the arguments against the language in the bill and in support of the Olver-Gilchrest language.

But in the spirit of the subcommittee chairman, who has acknowledged his willingness to applaud that action, because I think for years now the language this amendment would strike has been used to hound Federal agencies that try to address climate change. It was used to harass agencies who sent government officials to international climate change meetings, and it has been used in attempts to thwart voluntary agreements, voluntary agreements, with industries that offered to cut their greenhouse gas emissions.

Yet, both President Bushes, 41 and 43, acknowledged that climate change is a serious problem. In fact, President George Herbert Walker Bush even signed an international agreement to reduce U.S. emissions of greenhouse gases, and that treaty was ratified by the U.S. Senate.

Despite its misgivings about the Kyoto Protocol, this administration too has acknowledged the seriousness of climate change. As many know, after receiving last month the report requested from the National Academy of Sciences, a report that underscored yet again the scientific consensus that exists on climate change, President Bush pledged that the U.S. will take a leadership role to address it.

I, for one, want to help him do that. I want the U.S. to take the lead on dealing with climate change responsibility, and the obstructionist language in this bill does not help do that.

So I want to commend the gentleman from Massachusetts (Mr. OLVER) and I want to commend the gentleman from Maryland (Mr. GILCHREST) for their steadfast support of reasonableness as we shape public policy, and I want to extend to the subcommittee chairman, the gentleman from Texas (Mr. BONILLA), my appreciation for his cooperation.

Mr. Chairman, I rise today, in support of the Olver-Gilchrest amendment, but frankly, I'm disappointed that we have to have this debate at all. I'm disappointed that the language that we are attempting to strike has been included in the Agriculture Appropriations Bill in the first place, because today the scientific consensus on global climate change is stronger than ever.

Mr. Chairman, the opponents of this amendment will tell you that the language included in this bill—the language the amendment would strike—simply prevents the Administration from implementing the international agreement, known as the Kyoto Protocol, to reduce greenhouse gases and curb global climate change.

The opponents say that the Administration should not implement the Kyoto Protocol because it is fatally flawed and unrealistic. They say the Administration shouldn't implement the Protocol because it would exempt developing countries from requirements to reduce their greenhouse gas emissions.

They say the Administration shouldn't implement the Kyoto Protocol. Period.

Well guess who agrees with them entirely? The Administration.

So if this Administration isn't even remotely thinking about implementing the Kyoto Protocol, what is the language this amendment would strike really about?
It is not about the Kyoto Protocol. It is not about fears the Administration will sneakily conduct "back-door" implementation. It is really about preventing any serious progress at all on the serious environmental problem of global climate change. The truth is that this amendment is really about who is for dealing with climate change responsibly, and who is not.

For years now, the language this amendment would strike has been used to hound federal agencies that tried to address climate change. It was used to harass agencies who sent government officials to international climate change meetings. And it has been used in attempts to thwart voluntary agreements—voluntary agreements—with industries that offered to cut their greenhouse gas emissions.

Yet, both Presidents Bush have acknowledged that climate change is a serious problem. In fact, George H.W. Bush even signed an international Senate agreement that pledged that the U.S. will take a leadership role in the global climate change problem of global climate change. The truth is the Bush administration had a number of scientists from the National Academy of Science review and come back and tell the Bush administration the answers to those two questions. Does man have the capacity to change the atmosphere, thus changing the climate?

To read just a couple of sentences from this report commissioned by the Bush administration from the National Academy of Sciences. "Greenhouse gases are accumulating in Earth's atmosphere as a result of human activities, causing surface air temperatures and subsurface ocean temperatures to rise. Temperatures are, in fact, rising. Human-induced warming and associated sea level rises are expected to continue through the next century." That is throughout the 21st century.

Can we change the atmosphere? If we look at this chart produced by the National Oceanic and Atmospheric Administration, we can see from 1860 to the year 2000 the acceleration of the accumulation of carbon dioxide in the atmosphere. This is from our Federal Government, commissioned by the Bush administration. We can change the atmosphere by increasing the greenhouse gas of carbon dioxide, thereby increasing warming. This chart, produced by NASA, shows since 1860 the level of increase in warming which affects the climate, and it is dramatic during the industrial age.

So the questions are: Can we affect our atmosphere? Can we change climate? The answer to those two questions is yes, and now it is time for us to do something about it.

Mr. BONILLA. Mr. Chairman, I ask unanimous consent that the time be extended in opposition, though I am not opposed to the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. BONILLA) is recognized for 30 minutes.

Mr. BONILLA. Mr. Chairman, I yield back the balance of my time.

Mr. OLVER. Mr. Chairman, I yield myself such time as I may consume to thank the gentleman for his acceptance, and I thank him for yielding back his time. I do have two people who wish to make very short statements.

Mr. Chairman, I yield 1 minute to the gentlewoman from California (Ms. LEE).

Ms. LEE. Mr. Chairman, I thank the gentleman from Massachusetts for yielding me this time for his leadership on this issue. I stand in strong support of this amendment, which will ensure that we move forward to combat global warming.

Global climate change is underway. Denying the existence of global warming will not make it go away nor can
the United States afford to deny its role. Just last week I had the opportunity to talk to European leaders about the need to act now and believe me, they have grave concerns about our re-trenchment. Our country must bear its share of this burden.

Now, President Bush recently asked the National Academy of Sciences to revisit the issue. They concluded greenhouse gases are accumulating in the Earth's atmosphere as a result of human activities. Temperatures are in fact rising. Their report goes on to say the national policy decisions made now and in the long-term future will influence the extent of any damage suffered by vulnerable human populations and ecosystems later in this century.

Voluntary reductions, which the President advocates, are not sufficient. I urge adoption of this amendment. We need to send a clear message that this Congress is committed to protecting our environment, protecting the public health and ensuring our future.

Mr. OLVER. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Missouri (Ms. McCARTHY).

Ms. McCARTHY of Missouri. Mr. Chairman, I rise in support of the Olver-Gilchrest amendment to strike the Kyoto rider language.

The President has already indicated that he has no intention of implementing the Kyoto Protocol. The because the U.S. must stay engaged at the table to encourage progress on this critical issue. However, it makes this rider unnecessary.

Science has confirmed the existence of global climate change is real. The effects of this have significant implications for agriculture in our nation and around the world. The mix of crop and livestock production is influenced by climatic conditions and water availability. Increases in climate variability already make adaptation by farmers more difficult. In my state of Missouri, agriculture is a $4 billion annual industry, one-half of which comes from livestock, especially cattle. The major crops in my state are corn, soybeans, and hay. Corn and soybean yields could fall by as much as 22% or rise by as much as 6%, depending on the climate variability resulting from global climate change.

As a result of global warming, we expect to see more frequent anomalies in our weather, with more frequent severe storms, droughts. Clearly these volatile weather patterns can have a highly negative impact on our ability to farm and protect and secure families and property.

We might also expect to see more pests in our plants and food stream. We may see more insects, as a result of global warming. Again, this could have a potentially significant adverse effect on plants and crops by destroying our nation's precious resources and jeopardizing human health.

This morning, Deborah Clark from the University of Missouri-St. Louis, at a National Academy of Sciences forum, spoke about the ability of plants to photosynthesize, thus reducing their ability to capture carbon.

Our Nation's strategy to address climate change can produce a reliable supply of diverse fuels that minimize greenhouse gases and secure our leadership in energy technology to benefit our consumers and to export around the world.

We must make the necessary investments in emerging technologies which will allow the United States to gain the edge in developing and marketing new products and lead to job creation. If we fail to act, we will lose the edge to other nations, Japan and Germany who are committed to this course of action.

A decade of progress has occurred since former President Bush signed the original climate treaty in Rio in 1992. This rider makes it difficult for federal agencies to work on any issues related to climate change, which the U.S. is obligated to address as part of the Rio agreement.

I urge others to join with me in voting in favor of this amendment, because whether or not the Kyoto protocol moves forward, we have an obligation to maintain our global leadership role in developing new technologies that will enable us to reduce emissions of greenhouse gases and promote the agricultural economy. The rider is unnecessary and I urge my colleagues to support the Olver/Gilchrest amendment.

Mr. OLVER. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Chairman, I appreciate the gentleman's courtesy in allowing a brief comment.

America is a polluter dealing with greenhouse gases and it is appropriate for us to exercise some leadership. The gentleman from Maryland (Mr. GILCHREST) has, I think, identified why in fact it is a problem, the single greatest environmental threat that we face. Unfortunately, this administration has been slow to acknowledge the problem, and sadly slower to embrace American leadership, which is needed in a global sense.

I am pleased with the gentleman's willingness to accept the amendment. I hope that it portends greater things in the course of this session where Congress can provide some leadership on this critical environmental level; that we can be promoting a bipartisan commonsense approach to reduce the greenhouse gases, and to encourage American industry and individuals to all play their role.

I think this is an important first step, and I appreciate the learning that the committee has been exerting.

Mr. OLVER. Mr. Chairman, I yield myself such time as I may consume and thank very much the chairman of the subcommittee for his indulgence, even after he had agreed to accept the amendment. We appreciate that very much.

Mr. SMITH of Michigan. Mr. Chairman, I am in opposition to implementing the Kyoto Protocol.

Under the Kyoto Protocol, by 2008 to 2012 the U.S. would be required to slash emissions of greenhouse gases to seven percent below the 1990 level—a level last achieved in 1979. Based on projections of the future growth in U.S. energy use, this would require a real cut in emissions of over 30 percent. In the meantime, major greenhouse-gas emitters, such as China, India, Mexico, and Brazil, would be able to continue business as usual.

In July 1997, before the Kyoto Protocol was signed, the Senate passed on a vote of 95 to 0 the Byrd-Hagel resolution, which states that the U.S. should not sign any treaty that (1) requires cuts in greenhouse gases, and (2) would result in serious economic harm.

This commonsense resolution set the absolute minimum criteria for Senate ratification of any climate treaty. The Clinton Administration never committed the Kyoto Protocol to the Senate for ratification because it knew that it would be dead on arrival.

In a breath of fresh air, President Bush said succinctly, "I will not accept a plan that will harm our economy and hurt American workers." In stating the obvious and pulling the plug on this flawed treaty, the President has spared us from a U.N. boondoggle that would harm American workers, consumers, and businesses.

The proponents of this amendment argue that, because the Administration does not support the Kyoto Protocol, the language in the bill is superfluous. Further, they argue that striking the language will send a positive message to the international community that the U.S. is willing to play a leadership role in climate change. We are a leader in the world on reducing and sequestering harmful emissions. Annually we spend nearly $2 billion on climate change research, more than the rest of the world combined. There are many things about the climate system we still do not understand. That is why we need to continue this research and increase our knowledge of climate variability and the potential human impact of greenhouse gas emissions.

Current computer models predicting warming over the next century may prove to be no more reliable than the five-day weather forecast. But even assuming that these models are right, achieving the emission goals in the treaty would reduce projected warming by less than one-tenth of a degree by 2050. So we still have time to do the necessary research to fill in the gaps and get it right instead of lurching ahead with a treaty that would cost too much and do nothing to solve the problem it is intended to solve.

The Administration also has said that it will be working to develop new technologies, market-based incentives, and other approaches to increase energy efficiency and reduce greenhouse emissions. I fully support these approaches, which make much more sense than the command-and-control dictates that would flow from the Kyoto process.
CONGRESSIONAL RECORD—HOUSE

A recorded vote was ordered.
The vote was taken by electronic device, and there were—aye 155, noes 272, not voting 6, as follows:

Ms. KAPTUR. I thank the Chair very much.

Ms. KAPTUR. Mr. Chairman, for all the Members who are watching from their offices, then, in terms of the order of the votes, it would then be?

Ms. KAPTUR. Mr. Chairman, I think that third amendment was accepted; voice vote.

Ms. KAPTUR. The Members who are watching from their offices, then, in terms of the order of the votes, it would then be?

The CHAIRMAN. The amendment offered by the gentleman from North Carolina (Mr. ROYCE); the amendment offered by the gentleman from California (Mr. WEINER); the amendment offered by the gentleman from Ohio (Mr. BROWN).

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

PARNARIAMENTAL INQUIRY

Ms. KAPTUR. Parliamentary inquiry, Mr. Chairman. We were just presented a list of potential amendments for consideration by the full membership, and I wonder if the Chair would again repeat which amendments the Members will be asked to vote on and the order that they will be presented.

The CHAIRMAN. The amendments on which further proceedings were postponed will be voted on in the following order: the amendment offered by the gentleman from California (Mr. WEINER); the amendment offered by the gentleman from California (Mr. ROYCE); the amendment offered by the gentleman from Ohio (Mr. BROWN). Ms. KAPTUR. Mr. Chairman, I believe that third amendment was accepted; voice vote.

Ms. KAPTUR. Mr. Chairman, for all the Members who are watching from their offices, then, in terms of the order of the votes, it would then be?

The CHAIRMAN. The amendment offered by the gentleman from New York (Mr. WEINER) will be first, followed by the amendment offered by the gentleman from California (Mr. ROYCE).

Ms. KAPTUR. Then we will move to final passage?

The CHAIRMAN. That is correct.

Ms. KAPTUR. I thank the Chair very much.

AMENDMENT NO. 25 OFFERED BY MR. WEINER

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from New York (Mr. WEINER) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesiginate the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.
on which the Chair has postponed further proceedings.  

AMENDMENT NO. 19 OFFERED BY MR. ROYCE

The CHAIRMAN. The pending business was the demand for a recorded vote on the amendment offered by the gentleman from California (Mr. ROYCE) on which further proceedings were postponed and on which the noes prevailed by voice vote.  

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIRMAN. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 85, noes 341, not voting 7, as follows:

**AYES—85**

[A full list of the Ayes is provided, followed by a list of the Nays and Not Voting.]
Mr. WALDEN of Oregon. Mr. Speaker, on roll call No. 221, I was unavoidably detained. Had I been present I would have voted "aye."
He was remembered at his funeral service for what speaker after speaker called his “legacy of justice.” Stanley Mosk was the only Democrat on the State High Court and a very progressive member. He died in San Francisco.

He was my neighbor and he was my friend. Our colleague, the gentleman from California (Mr. Schiff), will be speaking more specifically about Stanley Mosk’s contribution to the law in California and our country. I want to speak briefly about him personally.

Stanley Mosk was a genius. He was a great tennis player. He took great pride in that. He might have wanted that to be first. He was a great family person. Of course, that did come first. He was a person of such great intellect that his decisions when he wrote them were the subject of great admiration and study by law students and admired by those who followed the law. He will be greatly missed in San Francisco, where the supreme court resides in California.

He was the first person elected statewide in California, when he ran for office many years ago, the first person of the Jewish religion ever elected. Once and for all, he settled that issue. Because of Stanley Mosk, Jewish candidates know that their religion is not a factor in elections in this great State. Indeed, if they were a factor at all, it is a plus.

With that, Mr. Speaker, I want to mention further that it is said of him that many people learned much about pain and much about joy from him.

Stanley Mosk did not want to retire. He went home, he was with his family, but he planned to retire in the fall. So, if I am hesitant about this, it is with great sorrow that I tell our colleagues that Stanley was vigorous to the end. Of course, his great and powerful intellect, benefiting all of us to the end.

His plan was to retire in the fall. That was not in the cards for him. God took him sooner. But I want his family to know that many of us in the Congress mourn his passing, and I hope it is a comfort to them that so many people share their grief, but also their great pride in California Justice Stanley Mosk.

PLIGHT OF PUBLIC HOSPITAL SYSTEMS IN NATION

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, this evening I would like to talk about the plight of the public hospital systems in this Nation, and use as an example my own public hospital system, the Harris County Hospital District.

First of all, let me applaud the district for being such a vital part of our community, both in times of need and in times of tragedy. In particular over the last couple of weeks, it is the Harris County Hospital District that has stood up under the burden of Tropical Storm Allison. When any number of our private hospitals were closed, the Harris County Hospital District had its doors open. The Trauma Center, the Emergency Center, was available for those who were in need. Now this hospital district is in need, and we need to rally around it to support it.

First of all, there is an enormous nursing shortage, as we well know, throughout this Nation. We must find ways to enhance and grow nurses, as well as provide opportunities for existing nurses who are immigrants to come in and provide assistance.

Furthermore, we must address the funding issue that plagues the Harris County Hospital District as it relates to the formula utilized for Medicaid dollars in this Congress. I hope that my colleagues agree with me in the fact that I will be approaching, along with Members of the United States Senate, can help us assist in obtaining additional funding, at least providing some minimal relief to the Harris County Hospital District, but addressing the need across the Nation for our public hospital systems. I applaud them and thank them for their service to the health needs of America.

TRIBUTE TO THE LATE JUSTICE STANLEY MOSK

(Mr. FARR of California asked and was given permission to address the House for 5 minutes and to revise and extend his remarks.)

Mr. FARR of California. Mr. Speaker, I rise tonight to speak on the memorial of Justice Stanley Mosk. Many of you know that Justice Stanley Mosk, Californian, born in San Francisco, where Stanley Mosk died, that he was a giant among supreme court Justices in the United States. He left a legacy of justice in California, having served on the supreme court in that State for 37 years.

I knew him as a lawyer. My father was in the State legislature and was very close to the Mosk family and to the Pat Brown family. Governor Pat Brown appointed him to the bench.

The tragedy of his loss is that one of the greatest legal minds of this century served in all of that time when California was emerging as a State, growing to be the incredible nation-state that it is, and the California Supreme Court rose to, I think, in respect probably the highest among all State supreme courts in the United States. Stanley Mosk led that drive. It is a great tragedy that we lost him before we could totally record all of his memories, but his legacy will live on in the history of California. He was one of the men that matched our mountains.
He established the Attorney General's Civil Rights Division and fought to force the Professional Golfers Association to rescind its bylaws denying access to minority golfers.

Governor Pat Brown appointed Mosk to the California Supreme Court in 1964. I note with pride that the late Senator Sam Ervin of North Carolina, on the floor of Congress on August 5, 1964, referred to Mosk as “one of the finest constitutional lawyers in the United States.” While on the court, Justice Mosk authored decisions that presaged decisions later reached by the U.S. Supreme Court. Mosk, as a superior court judge in 1947, overturned a restrictive covenant that had prevented African Americans and other minorities from moving into particular neighborhoods a year before the United States Supreme Court voided such covenants. He wrote a 1978 decision barring prosecutors from using preemptory challenges to eliminate minority or female jurors in criminal cases, a trailblazing ruling that later became Federal constitutional law when the U.S. Supreme Court reached the same conclusion 8 years later.

Mosk, as commentators have noted, was consistent in upholding the rights of individuals. He detested quotas and led the court majority in striking down admission formulas used by the medical school at the University of California at Davis. “Originated as a means of exclusion of racial and religious minorities, a quota becomes no less offensive when it serves to exclude a racial majority,” he wrote. Personally opposed to the death penalty, Mosk nonetheless upheld the law in capital cases.

As the Sacramento Bee columnist Peter Schrag eloquently noted, Justice Mosk exhibited a “combination of judicial creativity and practical sense that produced a string of imaginative legal departures.” Among those imaginative legal departures, as Schrag notes, are decisions that handicapped parents could not be stereotyped and automatically ruled unfit to raise their children; that victims of a pharmaceutical drug who could not identify the specific maker of the pharmaceutical product they consumed could collect damages from all manufacturers in proportion to their market share when injured; and upholding State law requiring private owners of tidelands to permit public access.

As the Sacramento Bee recently editorialized, “Mosk’s greatest contribution to the law and rights was pioneering the theory of ‘independent state grounds.’ The rights of the people were lodged not just in the Bill of Rights and transitory interpretations of the majority, but in the law. Mosk argued, ‘They were embedded as well in State Constitutions, which sometimes offered greater protection to individuals than the minimum required by the Federal courts. The doctrine, widely adopted by State courts around the country, is the source of many of the court’s major decisions.”

Justice Mosk is survived by his wife, Kaygey Kash Mosk; his son, Richard; and his grandson, Matthew Mosk, in attendance in the House gallery here tonight. To them, I want to extend my sincere condolences and, as the gentlewoman from California (Ms. Pelosi) indicated, all of our sincere pride in the work of that great man. As the Sacramento Bee editorialized so appropriately, Justice Mosk was “California’s brightest beacon of liberty.” While his life has ended, his legacy shines brightly for all Californians and for our great Nation.

CRISIS IN KLAMATH RIVER BASIN

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Oregon (Mr. WALDEN) is recognized for 5 minutes.

Mr. WALDEN of Oregon. Mr. Speaker, I rise tonight to again talk about the saga of the Klamath Basin and the farmers who have lived there and tilled the ground and fed the Nation.

As my colleagues know, Mr. Speaker, on April 6, they cut off the water. They said, no water for the farmers this year; the suckerdish would prevail. Mr. Speaker, word is finally getting out about this crisis. There have been stories in The New York Times, and today in the Washington Post there is a story. It has been on Fox News and other networks, CNN and others, who are beginning to cover this story and the tragedy that is occurring at ground zero of the Endangered Species Act debate.

Today, in the Washington Post, Michael Kelly, a columnist, writes, “The Endangered Species Act has worked as intended, but it has been exploited by environmental groups whose agenda is to force humans out of lands they wish to see returned to a prehuman state. Never has this been made more naked, brutally clear than in the battle of Klamath Falls.”

Mr. Speaker, I want to read today from a couple of letters I have received from constituents. These folks, Bill and Ethel Rust wrote, “We have not written sooner as shock and disbelief have kept us almost immobilized and so sick at heart. My husband is 76 years old and a Navy veteran of World War II, having lost a brother in this war. We have been ranchers our entire life and depend on this for our livelihood. We are still in shock that our own government has taken this away from us. We recently retired to a small 75-acre alfalfa ranch that was just perfect for us to handle at our age, and you have just destroyed it. Without water, our alfalfa is dying. What are we to do to replace this income? Is the suckerfish more important to you than us? Having raised nine children to be hard workers and contributors to our society, are we now to apply for welfare or live off our children?

“We have sold our cattle. We are in the process of selling our horses. After a lifetime of getting up in the morning to care for our livestock and ranch chores, what would you suggest we do with our mornings? What reason do you give us to get out of bed? “We need the help of our government. Will we get that?”

Mr. Speaker, this is typical of hundreds, if not thousands of letters I have received from the people of Klamath Falls.

Mr. Speaker, as my colleagues know, this House, prior to the July 4 recess, passed $20 million in aide to the farmers and ranchers of Klamath Basin, and the Senate has now approved that. It will be in conference next week, and I hope it should be on the President’s desk.

Mr. Speaker, today I had the opportunity to speak with President Bush personally about the crisis in the Klamath Basin and he offered his help and urged me to continue to contact and work with Secretaries Norton and Veneman. So later this afternoon, I spoke with Secretary Veneman, Agriculture Secretary, about the problem. Because, Mr. Speaker, the word is getting out, and now the help must get in.

Good people are being urged to do bad things, as frustration levels rise in the Klamath Basin. Twenty million dollars, Mr. Speaker, that will be available to these farmers and ranchers in the Klamath Basin rather than later if the U.S. Department of Agriculture acts expeditiously to get these funds that we have approved in this Congress into the hands of farmers whose fields are drying out.

The land, instead of green, is parched and brown. Wind is stirring up the dust. The costs continue. Mortgages have to be paid. Equipment payments have to be met. Bankers are knocking on the door. People are scared. Their livelihoods are at stake.

We need also to work with USDA to get feed and water for livestock. Literally, a crisis is at the doorstep. We also need in the long term, which has to be shorter, rather than longer, to improve water quality, but moreover, improve water quantity; to get biological opinions for next year’s operations plan that are above question that have been blind peer-reviewed so we know the science is valid but, moreover, the conclusions are sound, so that we can open the gates legally and get water into the fields and the farms for the people of the Klamath Basin.

Mr. Speaker, we have a crisis on our hands, a crisis that is getting worse,
not better, as people's frustration levels rise, not fall. They need our help, Mr. Speaker. They need help in changing the Endangered Species Act. They need help financially; but most of all, they need the water they were promised so that next year they can plant the crops like they have for the past 85 years.

Mr. Speaker, I want to thank my colleagues in the Oregon congressional delegation, members of both parties, for working with me on this issue, for helping secure the $20 million. It is a start, but it is not the end. It must be distributed rapidly and not parcelled out over the months. We need to act.

It took an overnight to cut off the water; it cannot take months to get relief to these same people.

Mr. Speaker, these people who settled on this land and were invited there by this Federal Government with the promise of land and water if they would simply homestead the land and produce food for the country. People who were invited to this area were the very people who fought for our freedom in a far-off land. Veterans of America's Armed Forces were given priority. It is our turn now, Mr. Speaker, to step up and take care of those people.

PROBLEMS IN AMERICAN AGRICULTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. SMITH) is recognized for 5 minutes.

Mr. SMITH of Michigan. Mr. Speaker, today we passed an appropriations bill for agriculture. Let me first spend a second giving my impressions of the predicament that American agriculture is now facing.

On a level playing field, American agriculture could compete favorably with most any other country in the world on most any of the commodities that we produce. Part of the challenge in our Federal agricultural policy is the fact that other countries subsidize their farmers much more than we subsidize our farmers in this country. Hence, those large farmers, with the additional advantage of Government programs, ended up trying to buy out the smaller farms and became even larger. If there is some merit in having a Federal agricultural policy that helps the traditional family farm survive without giving, then it is going to be a situation that gives an additional advantage to the huge, large farmers.

Some farmers in the loan program, the price support program for commodities that we have as part of our Federal farm policy, still continue to favor large farmers. The average farm size in the United States is about 420 acres. To exceed the current limits in law of not more than $75,000 per farmer in this loan, minimum price protection policy that we have, we see a lot of farmers now that have gone way over the average of 420 acres. We have 20, 30, 40, 50, 60, 70, 80,000 acre farms.

Because we have no limit on the price support of those farmers, then some of these farms are taking in $1 million, or some of these farms are taking in $1 million-plus in farm payments.

As we face the predicament of trying to be as frugal and as well-managed as we can on the available resources in this country, we need to look at the kind of policy that does not continue to favor those large farmers, and putting a real limit on how much taxpayers should be paying to any farmer should be part of that consideration.

I am disappointed that my amendment today was ruled out of order, but it is an issue as we start developing new farm legislation that we have to deal with in terms of assuring not only that we have the kind of agricultural production in this country that is not going to put us at a security disadvantage, and I use the comparison of oil.

In concluding, Mr. Speaker, we are now dependent almost 40 percent on imported energy from petroleum products. We have seen the power of OPEC in raising their prices and making us pay the higher price.

That same thing could happen to agriculture, so the decisions we make in agricultural policy are extremely important. Favoring the traditional family farm and not favoring the huge farm corporations must be part of our agricultural agenda.

SMALL BUSINESS REFINERS' COMPLIANCE WITH THE HIGHWAY DIESEL FUEL SULFUR CONTROL REQUIREMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. HORN) is recognized for 5 minutes.

Mr. HORN. Mr. Speaker, at the beginning of this year, on January 18, 2001, the Environmental Protection Agency, EPA, implemented heavy-duty engine and vehicle standards and highway diesel fuel sulfur control requirements.

I strongly supported the final rule by the EPA as a necessary tool to reduce pollution. Under this new regulation, oil refiners must meet rigorous new standards to reduce the sulfur content of the highway diesel fuel from its current level of 500 parts per million to 15 parts per million by June, 2006. The diesel rule goes a long way in reducing the amount of pollution in our air.

Small business refiners produce a full slate of petroleum products, including everything from gasoline to diesel to jet fuel to asphalt, lube oil, and specialty petroleum products.

Today, among the 124 refineries operating in the United States, approximately 25 percent are small independent refiners. These small business refiners contribute to the Nation's energy supply by manufacturing specific products such as grade 80 aviation fuel, JP4 jet fuel, and off-road diesel fuel.

In order for oil refineries to comply with the new rule, the Environmental Protection Agency estimated capital costs at an average of $14 million per refinery. This is a relatively small cost for major multinational oil companies, but for smaller refiners this is a very high capital cost that is virtually impossible to undertake without substantial assistance.

Small business refiners presented information in support of this position to EPA during the rule-making process. In fact, EPA said that small business refiners would likely experience a significant and disproportionate financial hardship in reaching the objectives of the diesel fuel sulfur rule.

There is currently no provision that helps small business refiners meet the objectives of the rule. That is why I am introducing a tax incentive proposal that would provide the specific targeted assistance that small refiners need to achieve better air quality and provide complete compliance with EPA's rule.

A qualified small business refiner, defined as refiners with fewer than 1,500
employees and less than a total capacity of 155,000 barrels a day, will be eligible to receive Federal assistance of up to 35 percent of the costs necessary, through tax credits, to comply with the highway diesel fuel sulfur control requirements of the EPA. Without such a provision, many small refineries would be unable to comply with the EPA rule and could be forced out of the market. Individually, each small refiner represents a small share of the national petroleum marketplace. Cumulatively, however, the impact is substantial. Small business refineries produce about 4 percent of the Nation’s diesel fuel, and in some regions, provide over half.

Small business refineries also fill a critical national security function. For example, in 1998 and in 1999, small business refineries provided almost 20 percent of the jet fuel used by the U.S. military bases. Small business refineries’ pricing competition pressures the larger integrated companies to lower prices for their fuel. Without that competitive pressure, consumers will certainly pay higher prices for the same products.

Over the past decade, approximately 25 United States refineries have shut down. Without assistance in complying with the EPA rule, we may lose another 25 percent of U.S. refineries.

This legislation is critical, not because small business refineries do not want to comply with the EPA rule due to differences in environmental policy, but because it will help keep small business refineries as an integral part of the industry and on the way to cleaner production and full compliance with all environmental regulations.

SENIOR MANAGED CARE LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GREEN) is recognized for 5 minutes.

Mr. GREEN of Texas. Mr. Speaker, I rise tonight to encourage our House leadership to bring the Patients’ Bill of Rights to the floor as soon as possible, hopefully next week.

The Senate took historic steps before the July 4 recess to pass a bipartisan, meaningful Patients’ Bill of Rights. The McCain-Kennedy compromise legislation includes strong patient protections that will ensure high quality health care for millions of Americans with private health insurance coverage.

These protections include:

- Access. Patients will be able to go directly to specialists. Women have the right to go to their OB-GYNs, and children directly to their pediatricians. Communication. The Senate bill eliminates gag clauses which prohibit doctors from discussing all the treatment options, even those not covered by the plan, with their patients.

Emergency room care for patients who reasonably believe that they are suffering from an emergency medical condition do not have to drive by an emergency hospital to go to the one that is on their list.

- Internal-external appeals, which ensures that patients have access to timely and appropriate health care. And probably the most important is accountability if an HMO’s denial or delay of treatment causes a person’s injury or death.

- Many critics of this legislation say it would result in an onslaught of frivolous and expensive litigation, but this compromise bill also included many provisions to prevent such lawsuits from taking place.

For example, the legislation requires patients to exhaust all their appeal procedures before they utilize their health plan. By requiring that patients utilize an independent review panel, the bill makes sure that medical decisions are made in the best interests of medical practice in a timely manner.

In my home State of Texas, we have been using independent review organizations, or IROs, as we call them, to resolve HMO and patient coverage disputes since 1997, 4 years. These IROs are made up of experienced physicians who have the capability and the authority to resolve disputes for cases involving medical judgment.

These provisions have been successful not only because they protect patients, but also because they protect the insurers. Plans that comply with the independent review organization’s decision cannot be held liable for punitive damages if they do go to court.

This plan has worked well. Since 1997, more than 1,000 patients and physicians have had decisions of HMO plans. The independence of this process is demonstrated by its fairly even split. Of this about 1,000 appeals, in only 55 percent of these cases did the IRO fully or partially reverse the decision of that HMO.

- The Senate legislation protects employers from unnecessary litigation.

Let me go back to the independent review organizations. Fifty-five percent of the time, these IROs found that there was something wrong with the HMO’s decision. I would hope that our medical decisions have a better percentage than to flip a coin, so in 55 percent of the cases in Texas, either partially or totally the HMO was reversed by the independent review organization.

- The bill goes so far because it protects employers against any liability unless they are directly participating in the decision on a claim for benefits which result in personal injury or death.

- The bill specifically lists a number of areas that are not considered direct participation. In other words, as an employer, one could select the health plan, choose benefits to be covered under the plan, buy a Cadillac plan or a Chevrolet plan, and the employer would not be sued for that, or for advocating with the health plan on behalf of the beneficiary for coverage.

I know in my own experience as a small business, oftentimes my biggest problem was advocating for our employees with our health insurance plan to say it should be covered. The only case where an employer would be liable would be if they choose to make medical decisions which harm or kill a patient. If the employer acts like a doctor, then the McCain-Kennedy bill hold them responsible like a doctor.

Mr. Speaker, I mentioned earlier, we have had many of these same provisions in Texas law now for 4 years. Yet, we have not seen a barrage of frivolous lawsuits, nor have insurance premiums risen at a faster rate than anywhere else in the Nation.

Mr. Speaker, the Dingell-Ganske bill being the House is very similar to the McCain-Kennedy bill, which is very similar to a law that we have had on the books in Texas for 4 years. It contains many of the same compromise provisions, which at the same time ensure that these protections can be enforced.

It is time that the House followed suit and passed a real, meaningful, strong, bipartisan Patients’ Bill of Rights. I urge the leadership not to delay in bringing the Dingell-Ganske bill to the floor for a vote.

GENERAL LEAVE

Ms. WATSON of California. Mr. Speaker, I ask unanimous consent that Members have 5 days to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

THE LEGACY OF CALIFORNIA STATE SUPREME COURT JUSTICE STANLEY MOSK

Ms. WATSON of California. Mr. Speaker, today I stand before this august body to pay tribute to a superb colleague, friend, and fighter for justice, the late Honorable California State Supreme Court Justice Stanley Mosk.

As a State Supreme Court Justice, Stanley Mosk fought repeatedly for civil rights and individual liberties. He constantly strove for fairness for all Californians. Judge Mosk did not view his judicial task as a job, but as a mission for humanity. Judge Mosk understood the pain of racism.
It was during his election to statewide office that his faith was made an issue. Judge Mosk, as a Los Angeles Superior Court judge, threw out a racially restrictive real estate covenant that prevented a black family from moving into a white neighborhood. A year later, the U.S. Supreme Court voided such covenants.

It was Judge Mosk’s ability to relate to the pain caused by racism that allowed him to approach legal decisions with a touch of humanity and fairness. Even before his career as a judge, Mosk had the ability to tell the difference between right and wrong. As a State Attorney General in the late 1950s and early 1960s, he established the office's civil rights division, and helped to persuade the Professional Golfer’s Association to drop its whites-only clause.

In 1978, Justice Mosk again led the U.S. Supreme Court in groundbreaking decisions. In that year, he ruled for a ban on racial discrimination in jury selections. The U.S. Supreme Court waited eight years before making the same ruling.

Justice Mosk promoted civil rights from an early stage in his career. While serving as the California State Attorney General in the late 1950s and early 1960s, Justice Mosk established the office’s civil rights division. He also successfully fought against the Professional Golf Association’s bylaws that denied access to minority golfers. Justice Mosk went further than that—actually contacting each state’s attorney general on this matter, to ensure that no state would provide the PGA with a place to hide. Charlie Sifford, the African-American golfer whose cause Justice Mosk took up, sent a note to the Mosk family after hearing of Justice Mosk’s death.

Judge Mosk, a longtime Democrat and self-described liberal, was appointed to the State’s highest court in 1964 and served until his death, a 37-year tenure that made him the State’s longest-serving Justice. During that time, he wrote 1,500 opinions.

Judge Mosk often produced opinions separate from the court majority. He opposed the death penalty, but also showed flexibility and a knack for anticipating political currents. His decisions continued to reflect his quest for fairness and the desire to correct existing wrongs.

In 1972, Judge Mosk’s ruling extended to private developers a law requiring a study of each major project’s likely environmental impact and ways to avoid the harm.

In 1978, Judge Mosk ruled to ban racial discrimination in jury selections. He rendered this decision 8 years before the U.S. Supreme Court made the same decision. In light of his judicial decisions and opinions, Judge Stanley Mosk remained a champion for fairness and humanity.

In 1978, Justice Mosk became a judge of the Superior Court in Los Angeles. After serving in the Coast Guard during the early days of World War II, Judge Mosk left the Superior Court bench and enlisted in the army as a private. He served until the end of the war and then returned to the court.

In 1958, Mosk was elected Attorney General of California with more than a million vote margin over his opponent, the largest majority of any contest in America that year. He was overwhelmingly re-elected in 1962.

He was the first person of the Jewish faith to be elected to a statewide office after a campaign in which his religion was made an issue.

Justice Mosk served the state of California until the day before he died, and with his death, the state of California lost what many considered to be a true champion of justice. Justice Mosk was not only his well deserved title, but was also characteristic of his personal mission—to find fairness in a world filled with injustice. As a devoted liberal, his eloquence and principles shined through his work on the court. Among his many great contributions he will be remembered for pioneering the theory of "independent state grounds." This is the source of many of the state's privacy rulings and has given states the chance to become agents of legal change.

Mr. Speaker, I am proud to stand here today to honor Justice Stanley Mosk, a glorious man who has left an indelible impression on our state and our country. Through his body of accomplishments his passion for justice shall live beyond his tenure on earth. His family, friends, colleagues, and the state of California will miss him dearly.

Mr. BERMAN. Mr. Speaker, I rise today to honor Justice Stanley Mosk, who died last month after serving 37 years on the California Supreme Court. He was California’s longest serving Justice, a highly respected, even revered judge who delivered almost 1,700 opinions in his remarkable career. He was repeatedly honored for his contributions to the caliber of our judiciary and the quality of justice meted out by our courts in California. He was a distinguished lawyer, a renowned author and an outstanding jurist.

I have had the honor of knowing Justice Mosk and his family for many years and he was one of the people who had a profound influence on my political life. He was a tremendously impressive individual who embodied a unique combination of political savvy and legal scholarship with an abiding commitment to justice.

From 1939 to 1942 he served as executive secretary and legal adviser to the Governor of California, and for the 16 years from 1943 to 1959 he was a judge of the Superior Court in Los Angeles. After serving in the Coast Guard Temporary Reserve during the early days of World War II, Judge Mosk left the Superior Court bench and enlisted in the army as a private. He served until the end of the war and then returned to the court.

In 1958, Mosk was elected Attorney General of California with more than a million vote margin over his opponent, the largest majority of any contest in America that year. He was overwhelmingly re-elected in 1962.

He was the first person of the Jewish faith to be elected to a statewide office after a campaign in which his religion was made an issue.
He was appointed to the state's high court in 1964 by then-Governor Pat Brown. Justice Mosk loved being on the court and hated the thought of retirement, but fearing that his age was slowing him down, he had reluctantly decided to step down this year. He died the day he planned to submit his resignation letter to Governor Davis.

Justice Mosk fought doggedly for civil rights and individual liberties. He threw out restrictive real estate covenants that kept black families out of white neighborhoods and opened professional golf to nonwhites. He barred prosecutors from removing jurors on racial grounds. He declared that handicapped parents could not be stereotyped and automatically disqualified from raising their own children.

He was revered for his independence as well as his intelligence, his dedication to equal justice and his wisdom and common sense.

In another column, I have written down the top priorities Justice Mosk believed in: (1) Freedom of speech and the press, (2) Due process and individual rights, and (3) Justice. He can be no better eulogized than by this short list, which he honored throughout his brilliant career. I ask my colleagues to join me today in paying tribute to Justice Stanley Mosk, a legal giant of California.

---

**COUNTRY-OF-ORIGIN LABELING FOR FARM-RAISED FISH**

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Arkansas (Mr. Ross) is recognized for 5 minutes.

Mr. ROSS. Mr. Speaker, the farm-raised catfish industry is an important part of the economy in my congressional district that covers the southern third of Arkansas. In fact, Arkansas is third in catfish sales in the Nation, behind only Mississippi and Alabama, with nearly $66 million, or 13 percent, of the total U.S. sales.

I recently met with catfish farmers in southeast Arkansas, and I can tell my colleagues that catfish producers in my district are upset that so-called catfish are being dumped into our markets from Vietnam and sold as farm-raised catfish. The truth is that it is not farm raised, and I am not even sure it is catfish. Last year, imports of Vietnamese catfish totaled 7 million pounds, more than triple the 2 million pounds imported in 1999 and more than 12 times the 575,000 pounds imported in 1998.

In Vietnam, these so-called catfish, also known as basa, can be produced at a much lower cost, due to cheap labor and less stringent environmental regulations. In fact, many of these fish are grown in floating cages in the Mekong River, exposing the fish to pollutants and other conditions. They are then dumped into American markets and often marketed as farm-raised catfish.

Many catfish producers believe that these imports have taken away as much as 10 percent of our markets here at home. It is really quite simple. Farmers do not mind competition, but they do mind when the competition is unfair and untruthful. This is why today my colleagues, including the gentleman from Arkansas (Mr. BERRY), the gentleman from Mississippi (Mr. SHOWS), and the gentleman from Mississippi (Mr. PICKERING) introduced, along with me, a bipartisan bill, H.R. 2439, the Ross-Berry-Pickering bill, that would amend the Agricultural Marketing Act of 1946 to require retailers to inform consumers of the country of origin of the fish that they sell.

Under the bill, all fish would be covered. Each retailer would be required to notify the consumer at the final point of sale of the country of origin of the fish. One of the provisions would only be designated as being from the United States if it is from a farm-raised fish that is exclusively born, raised, and processed in the United States.

When our consumers go into the store to buy catfish, they deserve to know what they are getting is actually farm raised and catfish. By letting consumers know where the product is coming from, this bill will encourage the people in Arkansas and all across America to buy catfish grown by our farm families, not fish grown in a polluted river in another country.

I urge my colleagues to join me in protecting consumers and to support a level playing field for America's farm-raised fish producers by supporting this measure.

---

**TRIBUTE TO THE LATE JUDGE STANLEY MOSK**

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. WAXMAN) is recognized for 5 minutes.

Mr. WAXMAN. Mr. Speaker, I am pleased to join my California congressional colleagues in honoring the memory of Justice Stanley Mosk and the great legacy he left the people of California and our Nation.

Justice Mosk was in public service for sixty years. He was a trial judge on the Superior Court of Los Angeles. He served as the Attorney General for the State of California. He was the longest serving member in California State’s Supreme Court 151-year history. He served on the court for 37 years under five chief justices until his death on June 19, 2001 at the age of 88.

My colleagues who have preceded me have spoken very eloquently about Judge Mosk’s contributions to our Nation. I want to take a moment to speak about Mosk’s personal influence on me as a Jewish American. Today, we take for granted that individuals of different racial and ethnic ancestry serve in public office. Last year, when Senator Joe Lieberman ran on the national ticket for vice president, he was the first Jewish American to do so, but his religious and ethnic background did not cause a strong reaction in most Americans. He was judged as an individual on his abilities, his political beliefs, and his record.

In the late 1950’s, Stanley Mosk was the first Jewish American to run for statewide office in California, and his candidacy caused some concern and trepidation in the Jewish community. American Jews were very active in politics, and they made great public service contributions, but there was enormous hesitancy in running for public office and assuming such a visible a position. Today, those of us who are Jewish and from California feel an enormous amount of pride in Justice Mosk because he was one of the premier constitutional lawyers in our Nation and he met the highest standards for public officials.

As a trailblazer in the Jewish community, Stanley Mosk never forgot that he helped pave the way for Jews and other minority Americans who faced professional and social hurdles. He was an unflagging champion of civil rights and individual liberties. He was also a shining inspiration to all of us who followed. When I ran for a seat in the House of Representatives more than twenty-five years ago, I was the first Jewish American from Southern California to be elected to Congress, and the first in the State in forty years. It is tribute to our Nation that Jewish Americans today represent not only districts with large Jewish populations, but those with small Jewish constituencies as well.

Stanley Mosk was mentor to a whole generation of Jewish activists. He will be affectionately remembered and sorely missed.

---

**ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE**

The SPEAKER pro tempore. The Chair would remind Members not to refer to individual Senators.

---

**AMERICA’S ENERGY POLICY**

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 3, 2001, the gentleman from Oregon (Mr. DeFAZIO) is recognized for 60 minutes as the designee of the minority leader.

Mr. DeFAZIO. Mr. Speaker, this evening I rise, hopefully to be joined by others, to discuss the energy situation in the United States of America. It was James Watt, when President Bush unveiled the national energy policy, so full of words in this blue book, who said, “Well, they just took out my work of 20 years ago.” This is James Watt, mind you, not exactly an enlightened individual when it comes to present-
day energy policy. He said, "They just dusted off my work of 20 years ago. It is really good in search of a 20th century energy policy for the 21st century?"

Well, after I read through it, upon hearing Mr. Watt's comments, I would observe it a little differently. I would say this is not James Watt's energy policy of 1980. This is actually our father's energy policy. It is much more 1960s energy policy. It is Dick Cheney's energy policy, and it reflects a bygone era of limitless frontiers, dig, drill, and burn. It is not and does not offer America a new sustainable and more affordable energy path to the next century.

So we will be talking about that a bit tonight, about electricity, electric deregulation, and other subjects. But before I go there, I would like to recognize the gentlewoman from California who introduced important legislation today in the area of our future energy supply to talk a bit about her proposal.

Ms. WOOLSEY. Mr. Speaker, I want to thank the Chairman of the Energy and Commerce Committee for organizing this special order tonight because the timing is absolutely perfect. We have just returned from the July 4 district work period and House committees are gearing up to tackle energy policy.

Since passing the national Energy Policy Act in 1972, Congress has generally ignored energy issues, but energy problems in California and higher prices for natural gas and oil throughout the country have brought energy back to the top of our Nation's agenda. We are finally beginning to realize that the debate over the nation's energy policy will probably be, if not the, one of the most important issues addressed in this Congress.

The energy shortage we are experiencing in California is a signal to be heeded by the rest of the country. The signal is that the Congress must raise the stakes in search of a sensible energy policy because, obviously, what we are doing is not enough. I am here tonight to remind my colleagues that as Congress and the administration work to forge a long-term energy policy, it is absolutely imperative we make a true commitment to renewable energy sources, to efficiency, and to conservation in order to prevent a future energy crisis and to protect our environment.

As the ranking Democrat on the Subcommittee on Energy on the Committee on Science, I am working to do just that. In fact, as the gentleman from Oregon (Mr. DeFazio) mentioned, earlier today I introduced the National Renewable Energy and Energy Efficiency Act of 2001. It is to be used as a blueprint for renewable energy sources and energy efficiency measures. It is to ensure that we make renewable energy sources a more important part of national energy policy we put in place in this country.

We can no longer afford to make large investments in outdated energy technologies, like fossil fuels, coal, and nuclear. Increasing our reliance on 20th century technology is not in the best interest of the 21st century, and it is certainly not an answer to our energy future. Instead, with the energy challenges we are experiencing across the country, it is more important than ever that we take this opportunity to craft a more responsible policy. By leveling the playing field for renewables and efficiency measures, we can and must ensure that our national security becomes more safe and secure through diverse energy sources.

Of course, we cannot expect renewable energy to meet all of our energy needs right away. I wish we could, but we cannot. We can make it a Federal priority to give renewables a more prominent role among energy sources. Unfortunately, Federal investment in renewables and energy efficiency has declined over the last 20 years. That is why CREEEA, my bill, aims not only to reverse that harmful funding trend, but also to set a goal for our Nation that at least 20 percent of the energy generated in the United States be produced from nonhydropower renewable energy sources by the year 2020.

CREEEA calls for new investments in renewable energy and energy efficiency research and development, as well as competitive grants to help bring green technologies to market. In the bill, regulatory provisions will eliminate barriers to development to put renewables on par with traditional energy sources.

Aside from energy efficiency provisions for schools, homes and vehicles, CREEEA also calls on the Federal Government and the Architect of the Capitol to set an example here in Washington by adopting renewable energy standards and improved energy efficiency measures. After all, the Federal Government must do our part, its part, to use more clean, renewable and efficient energy resources and technologies.

CREEEA also offers tax incentives to both individuals and corporations for increased investments in renewable technologies and for embracing energy efficiency products, buildings and technologies. With smart, aggressive policies, we will encourage the development of green industries.

Mr. Speaker, putting a priority on forward-thinking domestic options like renewable energy and energy efficiency is in the best interest of the 21st century, and it is certainly not an answer to our energy future. Instead, with the energy challenges we are experiencing across the country, it is more important than ever that we take this opportunity to craft a more responsible policy. By leveling the playing field for renewables and efficiency measures, we can and must ensure that our national security becomes more safe and secure through diverse energy sources.

Mr. DEFAZIO. Mr. Speaker, I thank the gentlewoman for her comments.

Mr. Speaker, it is important that we look toward the future and not toward the past for the energy supply for the United States of America. We can both have energy sources that are more gentle on the environment and deal with the problem of global warming, and are more stable and more affordable for the people of our Nation so we will no longer be held hostage to OPEC and other cartels around the world who basically blackmail us from time to time in jacking up the price of oil and extorting from American consumers.

I think her legislation is a very, very important addition to getting something that looks forward instead of back, and I thank the gentlewoman for her contribution.

Mr. Speaker, today we had Secretary Norton come before the Committee on Resources to update us on where they are on the President's national energy policy. In reading her testimony, I was interested to see that she said despite the comments of the Vice President, Secretary Norton of about 6 weeks ago where she said conservation and renewables, that might be a personal virtue, but it is nothing for a national energy policy to be based upon.

Despite the fact that over the last 20 years this Nation has gained 4 times as much energy from efforts in conservation and renewables than from new energy development based on fossil fuels, nuclear and other traditional sources, 4 times as much, the Vice President says that might be a personal virtue, but we cannot base policy on it.

Mr. Speaker, there seems to have been a backlash, and the administration seems to have been very quickly backpedaling on the energy of Vice President Cheney. In fact, today Secretary Norton said, remember, the President's energy policy, this blue book written by Vice President Cheney, 50 percent of that is based on conservation renewables and other sustainable energy sources. I said, Madam Secretary, that is an extraordinary statement. I said, tell me, 50 percent of what in this book, 50 percent of the projected new energy supply? When I look in the back, I see that they are projecting 28 percent of our energy over the next 50 years might come from sustainable renewable sources and conservation, so it was not 50 percent of the new energy. They are projecting 93.2 percent will come from conventional fossil fuels and nuclear power. I said, I am a bit puzzled. Is it 50 percent of the investment? I said, I remember the President's budget dramatically slashed investment in conservation renewables and sustainable energy sources, things that could make the United States of America energy independent.

She said it is 50 percent of the words in this proposal were on conservation,
So we are what we are getting here in this blue book and not a forward-thinking energy policy. The administration again staunchly defended going into ANWR, despite the fact that they admitted that no one has come anywhere near fully exploring the potential of the National Petroleum Reserve, which was just let out for leasing last year by the Clinton administration just before they left office, and the potential finds and the already discovered finds in the former National Petroleum Reserve, it will no longer be a reserve for national security purposes, will be diverted into the existing pipeline system and may well exceed the current and of that system for some time to come.

She admitted, as has every other administration witness, if there was recoverable energy at economic values in the Alaskan National Wildlife Refuge, they want to see if it is possible to get that it gets drilled; but they do not expect that a drop of that oil will flow for 10 years. Not a drop. So it is not addressing our immediate concerns.

Beyond that, I said, Madam Secretary, if it is such a crisis that we have to go into the last pristine area in the United States of America to explore for oil, does the administration think that oil should be kept here at home in the United States of America, as the law provided until 1996 when the Republicans took over Congress, and at the behest of the oil companies lifted the ban on the export of oil from Alaska?

She said she would have to get back to me on that. She certainly intended that the oil produced in Alaska should principally benefit the people of the United States of America, but she would not go so far to say that oil ought to be kept home, processed in the United States and used by the citizens of our country; but she will get back to me on that. I pointed out that President Bush could do that tomorrow by Executive Order. There is authority in the law for President Bush, if he believes that there is an energy crisis and a shortage, and that is what is driving up the prices, he could tomorrow with a simple stroke of his pen rescind the authority for those oil companies to export our oil from Alaska.

Mr. Speaker, that would be a concrete step that could be taken, and certainly sending a message to the American people, and also sending a message to OPEC, which is we are not going to take this. We are not going to let them jack up prices over there and extort our consumers in the short run while hopefully this Congress acts to adopt a more forward-thinking energy policy for the future based on new technologies so we can break our dependence on the oil cartels in the long term. In the short term, we do not want to have consumers extorted and bankrupted by the oil cartels.

Let us send them a strong message. We could do that by the President saying he is going to keep the Alaska oil home. We could do that in a number of other ways to show that we, in fact, in the United States are not going to be patsies, but this administration has chosen so far not to do that.

Mr. Speaker, there are so many subjects to be covered in this area, this is just sort of a beginning. I see the gentleman from Oregon (Mr. BLUMENAUER) has joined me, and I wonder if he might like to address some of these subjects.

Mr. BLUMENAUER. Mr. Speaker, I thank the gentleman for yielding.

I do appreciate our taking the time this evening with the professional detail the other side of some of these questions because it is indeed complex. It is indeed important.

As the gentleman pointed out, there are a wide range of interests that are coalitions and we are going to come up a lot. Conservatives, liberals, people from the East and the West, even some of our friends from California step back, and they are looking at what has been advanced by the administration with skepticism and in some cases wonder.

I personally just returned from the Arctic Wildlife Refuge. It is an area that I have not visited before in previous trips to Alaska, and I have heard people on the floor make some assertions. I wanted to take the time to see for myself, to put in context the reports that we are given, the information that comes forward. I must say that I do not pretend to be an expert based on my hiking, camping, exploring the wilderness, flying over some of the vast stretches, talking to Alaskans of a variety of different perspectives, including spending time in the Prudhoe Bay area with representatives of the petroleum industry.

Mr. Speaker, I must say having visited some of the BP operations, having Fourth of July in the snow, roasting hot dogs as part of their Fourth of July celebration on a man-made island on the Arctic Ocean, I came away impressed with the professionalism and dedication of the men and women working in the industry. But I also came away struck with the rather wide range of the area that is already available for oil exploration, the billions of cubic feet of natural gas that are being pumped down back into the ground that are available for energy purposes, and, if the circumstances and costs are right, that would be available to us.

I was struck by the magnitude of the Alaska pipeline, which is now 25 years old. I have a certain personal relationship to this. My father worked on the pipeline until the day he died. I had some input from him about the challenges based on his experiences there. But it is aging.

Just yesterday we saw in the Wall Street Journal a front-page article that the State of Alaska, covering the inspections of people in this area for this vast infrastructure which pumps more oil in 3 days than is pumped from the entire State of Indiana in a year, and it has approximately one-half the inspectors, only five people inspecting this vast infrastructure which is aging and subjected, despite the professionalism and dedication of the employees and, I think, the good intentions of the industry, I take it at face value, but there is not much that inspires my confidence when I think of the volume of it. Then when I consider what was there in the Arctic Wildlife Refuge, this amazing vista, the tussock bogs and the drumlin field for miles and hike for hours and be completely unaware of how far you had gone, seeing hundreds of caribou in a relatively small area, and in the course of 3 days had seen thousands of them, and had some sensitivity to how fragile that area is and how fragile it is in terms of the habits, in terms of the calving cycle of this vast caribou.

I did see some caribou around Prudhoe Bay that we see in some of the pictures, but I had an appreciation for the vast fragility of the tundra; small willows that are 10, 20, 30 years old that are only inches high and thinking about what would happen if there were problems there. I came away with a profound sense that the American public is right. The Arctic Wildlife Refuge is absolutely the last place we should be exploring for oil, not the first.

The gentleman referenced the much-debated comment from our Vice President dismissing the notion that conservation may be a virtue, but it should not be the basis for a rational national energy policy. I think the American public, and I certainly agree, conclude that he has it 180 percent wrong. You cannot have a rational national energy policy without beginning with the notion of conservation and wiser use of our energy resources. And it does not have to drive the American public back to the Stone Age. Our friends in Japan have been able to manufacture a hybrid vehicle that will get 60, 70 miles per gallon. There is a 6-month waiting list for American consumers. Yet the American Government in the 5 years I have been in Congress, we have been prohibited from even studying extending the vehicle miles for the CAFE standards and having more fuel-efficient automobiles.

It has been represented to me that the average American family gets the abysmal mileage that they get now and the potential for bringing it up to the overall fleet average would be the difference for the typical SUV, the gap...
here is the equivalent of leaving your refrigerator running with the door open for 6 years. This is not technology that is beyond us.

We hear people making rash claims that we have to have the administration’s proposal of building a power plant a week and the attendant economic, environmental cost, and they will throw out arguments like, Well, we haven’t had a nuclear plant licensed in this country in 20 years. Well, they are right, we have not had a nuclear plant licensed in this country in 20 years, but what they do not tell you is that we have not had an application for licensing in more than 20 years. Industry has recognized that it is not a good investment. And for the administration to put forward half-representations, arguing for the need, rather than going to the plant a week and ignore simple, commonsense steps to improve energy conservation, I think completely misses the target.

Again, the last things and I will turn this over back to the gentleman. I know that there are others that wish to join the gentleman from Oregon (Mr. DeFazio), and the last thing I want to do is disrupt his train of thought too much. As dean of the Oregon delegation, I have too much respect for his rhetorical and intellectual capacity to do that, but if he will permit me to make two other observations.

Number one, it seems to me that we can take steps, and we may hear from some of our friends in California who have had some energy difficulties which they are working their way through, we may be hearing about that this evening, but the simple, expedient step of having roof colors, and you do not have to go all the way to having a green roof, but just having a reflective color, can cut the energy requirements for air conditioning one-third. Having concrete instead of asphalt can lower the temperatures of our cities 2 degrees, the heat island effect that we are seeing in major metropolitan areas. Not only will those roads last longer, but that will save energy.

Last but not least, it seems to me that if in fact we have several trillion dollars that we do not need to invest in energy. Government services over the next 10 years, which as we note as each day goes by it looks as though we do not quite have the resources that were represented to us; a better use of this, rather than some of the tax reductions for people who need help the least, would be to provide tax credits and incentives for our citizens, particularly low- and moderate-income citizens, to be able to afford more fuel-efficient air conditioners, heating, other appliances which again would save huge amounts of money for not having to invest in energy production, would save the cost of energy for these individuals, and would be a shot in the arm for American industry. I think these are more appropriate approaches, rather than discounting energy conservation and simply building an energy plant a week.

I appreciate the opportunity to join the gentleman this evening. I appreciate his leadership and look forward to further discussion.

Mr. DeFazio. Just taking up what the gentleman was talking about, tax credits for Americans, for consumers, to help them meet their needs at home or at work or purchase more energy-efficient transportation, to create a market for that and help our people, that unfortunately did not make the cut in the blue book here. But what did make the cut, for instance, is royalty relief.

For those poor suffering oil companies, we have got to have some royalty relief. I am certain that they will too pass those lowered costs on to the consumers. The estimate is that the Bush energy plan would lower royalties by $7.4 billion over 2 years. That is money that should flow to the Federal Treasury and stay in the United States of America because of the extraction in our coastal areas and inland areas of oil and gas, would be reduced by $7.4 billion under the proposal of the Bush administration.

Now, of course, these are the same companies that just last year entered into a plea bargain in a criminal case for defrauding the taxpayers of royalty revenues and entering into an unprecedented $443 million civil settlement with the Justice Department. But, of course, that was the Clinton Justice Department, and I do not think the Bush Justice Department is going to be pursuing too many defrauded American taxpayers’ royalty claims. In fact, no, they are not about it: Hey, let’s just forgive the royalties altogether. This is the basis for an energy policy.

Certainly we do not need to forgive the royalties to get these people to explore or pump oil. Let us look at the profits. Last year, ExxonMobil profits, $15.9 billion, a 1-year, 102 percent increase. Chevron, $5.1 billion, a 150 percent, 1-year increase. Texaco, $2.5 billion, 116 percent, 1 year. Conoco, $1.9 billion, 155 percent. Phillips Petroleum even bought Atlantic, you can see them down the list. These people need relief? They need encouragement from the taxpayers? They need subsidies from the taxpayers to explore for oil and gas? I do not think so. In fact they should be giving money back to the taxpayers because they are fleecing the taxpayers to show those sorts of profit increases in one year.

So the gentleman is exactly right with his orientation of where we should be investing or forgiving revenue for the Federal Government, should be oriented toward small businesses and consumers and others who want to invest in energy-efficient measures, not those who want to go out and extract yet more oil and gas from sensitive areas in our coastal plain, our national monuments and elsewhere.

From there, I believe we would be well served to get into the area of electricity. Most recently in the western United States, the most extraordinary manifestation of an energy crisis that we have seen has been the rolling blackouts and brownouts in California, the fact that the total electricity energy bill in California went from $7 billion 2 years ago to $27 billion last year and is projected to go to over $50 billion this year. The fact that we have found out that even in the Pacific Northwest, we are paying higher average wholesale prices but thankfully thus far have been buffered by our Bonneville Power Administration and our own energy policy. We are paying higher average wholesale prices but thankfully thus far have been buffered by our Bonneville Power Administration and our own energy policy.

Number one, it seems to me that we do not need to forgive these people the increase in 1 year in the price, there is a justified increase? Is this such a short-term view and such a ridiculous view of an economy that you can justify increases of up to, well, if you went from $30 an hour average megawatt 2 years ago to the high price that has been charged up over $3,000 a megawatt, a 1,000 percent increase in 1 year in the price, there is a real question. There is no one who is more expert on that than the gentleman from San Diego, who comes from ground zero in terms of the electricity energy crisis, market manipulation and price gouging in the western United States. I yield to the gentleman to educate us a bit on what has been going on down in his district.

Mr. Filner. I thank the gentleman from Oregon for yielding, and I thank him for his leadership. I recall over the last few years the gentleman from Oregon talking about the problems with deregulation. Very few of our colleagues listened. But now we are witnessing them, and he was right. And California has been the greatest example of that. He mentioned rolling blackouts. He mentioned manipulated markets.

Let me tell you what happened one day in January of this year. We suffered several hours of rolling blackouts in San Diego. That had, just a few hours, a tremendous impact. Companies in production lost millions of dollars of production. People who could not deal with the traffic lights off, we had near fatal accidents. People stuck in elevators. The largest company sending people home and not getting a paycheck. At that time, at a time of the rolling blackout, with all these disruptions, the biggest generator in San Diego County was not in operation. It was shut down, not due to any maintenance; it was just taken out of service.

Now, we have examples of that all through the last year where production
was down, not for maintenance, not for any environmental reason but to bolster the price, because in a controlled market you withhold supplies, you can increase the price. What occurred in San Diego at what we call the South Bay Power Plant in my district operated by the Duke Energy Corporation, they took generators out of service, not only during the blackout but many times during the year.

We just recently had five former employees of that plant who worked there for a total of 100 years. These are not newcomers. They know what is going on in that plant. They testified under oath to a State Senate committee that not only were these generators down not because there was any real lack of need for them, we were in a rolling blackout, but purely related to the price. DEFAZIO: I think the key point and one of my principal objections to deregulation was that it severed the relationship between a utility and the consumer. Historically in this country from the very beginning, utilities had a duty to serve. Their highest duty was to keep the lights on. They maintained a buffer over and above their demand or their anticipated demand. They were required to do that. They were required to, except in times of catastrophe, provide as nearly as possible 100 percent reliability.

Mr. DEFAZIO. And they made a healthy profit doing that. Mr. DEFAZIO. They certainly did. They always were favored by investors. They had no problem raising money. It was an industry that was known as a good place to put your money for a reliable and very healthy rate of return.

Now, what happened as the gentleman just pointed out with Duke and with all the others, they are not exception, is that they no longer had under deregulation a duty to serve their customers. Their only duty is to serve their stockholders and the people on Wall Street. If they can make more money by blacking you out, shutting you down, closing other businesses for lack of power, it is their duty, their fiduciary responsibility as their board of directors sees it to do that. That is why they tied their floor traders to the plant operators.

It is absolutely outrageous to think that that is what the system has come to.

Mr. FILNER. They made almost a billion dollars doing that in the course of the year. By the way, just to emphasize the gentleman's point of the cut in relationship to the community, the five employees I mentioned lived in our area were community members, paid taxes, had their kids go to school. They were let go. Apparently, Duke did not want people tied to the community working in their own plant.

There is insult to injury. I would say to the gentleman from Oregon (Mr. DEFAZIO) that in this case I just told him about, the plant was being ramped up and down for profit, which stole a billion dollars out of our economy, is a public plant, a public interest. The law, the San Diego Unified Port District bought that plant and leased it to Duke and leased it for very, very, let us say, favorable terms. The terms under which they leased the plant they thought they would recoup their investment in 5.7 years. They got it back in 3 months. That shows what the prices were that they charged.

They leased this plant from the public so they are stealing from the people who own this plant. They have violated the lease terms that they were under. They were supposed to operate that plant in a prudent manner. It is a prima facie case that they had not and these employees testified that they had not.

I think the Port District, a public agency in San Diego, ought to take that lease, take back the plant, operate it in the public interest. They produce power there for three or four cents a kilowatt. As the gentleman pointed out earlier, a thousand percent increase in the price they were charging us up to $1.00 a kilowatt. So here we have the most obscene price gouging.

Duke, by the way, was the one that charged that. $1,000 a megawatt, or $4.00 a kilowatt, hour and they did it out of a public plant. I think San Diego consumers ought to demand that that plant be taken back. It is our plant. Let us show that we can produce the electricity at a reasonable rate and still protect our environment. So this is a case study of enormous greed, and I think San Diegans understand that they have been gouged and they are ready, in fact, to embark with a municipal utility district, take over plants such as the one I mentioned, the South Bay Power Plant, and begin to get out of the control of this energy cartel.

Let me just conclude this part by saying, the gentleman made the point earlier about how we need renewables. He made the point earlier about how we need conservation. Everybody in California, as I am sure in Oregon, is dealing with the other. We are going to do that. Only the Federal Government can deal with the wholesale prices. Only the Federal Government can regulate that. Our President has chosen not to be involved. Our vice president has refused to listen. The Federal Energy Regulatory Commission has taken some baby steps in this direction, but the Congress should impose what is called cost-based rates on wholesale electricity prices and refund all the criminal overcharges since last summer when this started. Then we can begin to talk about a national energy policy, and as the gentleman pointed out, the President's plans say nothing about this area.

Mr. DEFAZIO. Unfortunately, the President's plans do say something about this, but it says what we should do is spread retail deregulation nationwide. We are going to take the model of California and we are going to impose it on the rest of the States of the United States of America.

Now, if there was some place we could turn to and say, well, look, look how great deregulation has worked, well, first off the model was Great Britain. They are still trying to fix the problems they created with deregulation. Their prices are 70 percent higher than the average in the United States. They suffer a much higher percentage of blackouts, brownouts. They have extraordinary complaints about service. That is the model on which the 1992 deregulation was written.

Maybe we have done better in the States. Let us turn to some of the pioneers in the United States. Montana is one. There they have an industry, which was deregulated, as were the rates in Montana, go up by 1,000 percent because Pennsylvania Power and Light bought all of the generation in Montana, which is a State that can produce 150 percent of its needs and they can make more money by exporting that power, some of it to the gentleman, and charging extraordinary prices for it. So that has not worked out real well in Montana.

Rhode Island, another pioneer, prices are up 60 percent. The list goes on and on and on. Everywhere that we have seen energy deregulation, with the promise of competition, lower prices, better service, we have seen higher prices, worse service and now rolling blackouts and brownouts. Guess what? I have never had an Oregonian come up to me and say, Congressman, I am tired of this utility that provides me electricity day in and day out at a reasonable price; I want a chance to choose my energy provider. But those phone calls at 5:00 at night from AT&T and MCI and all the others, offering me stuff that I cannot quite fathom and does not ever really seem to work out
quite the way they promised it but every once in awhile they send me a $15 check. If I change from one to the other, my face has come to me and said I want to impose that system on my electricity. I want to guess whether my electricity, my lights, are going to go on or off, what my bill is going to be. No, they do not want that. Americans want reliable, affordable electricity and they are not getting it under this system.

Now some people are doing very well. We have mentioned a few. The gentleman mentioned Duke Energy. Their profits were $1.8 billion last year. That is a 100 percent 1-year increase. That was before they got into this really overt manipulation described by the employees to drive the prices even higher. So we can expect that they will do even more in the future.
